CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. Significant Accounting Policies

Background

CSX Corporation (“CSX” and together with its subsidiaries, the “Company”), based in Jacksonville, Florida, is one of the nation's leading transportation companies. The Company’s rail and intermodal businesses provide rail-based transportation services including traditional rail service and the transport of intermodal containers and trailers.

CSX’s principal operating company, CSX Transportation, Inc. (“CSXT”), provides a crucial link to the transportation supply chain through its approximately 21,000 route mile rail network, which serves every major population center in 23 states east of the Mississippi River, the District of Columbia and the Canadian provinces of Ontario and Quebec. CSX Intermodal, Inc. (“Intermodal”), one of the nation’s largest coast-to-coast intermodal transportation providers, is a stand-alone, integrated intermodal company linking customers to railroads via trucks and terminals.

Other entities

In addition to CSXT, the rail segment includes Total Distribution Services, Inc. (“TDSI”), Transflo Terminal Services, Inc. (“Transflo”), CSX Technology, Inc. (“CSX Technology”) and other subsidiaries. TDSI serves the automotive industry with distribution centers and storage locations, while Transflo provides logistical solutions for transferring products from rail to trucks. Technology and other support services are provided by CSX Technology and other subsidiaries.

CSX’s other holdings include CSX Real Property, Inc., a subsidiary responsible for the Company’s real estate sales, leasing, acquisition and management and development activities, and CSX Hotels, Inc., a resort doing business as The Greenbrier, located in White Sulphur Springs, West Virginia.

Basis of Presentation

In the opinion of management, the accompanying consolidated financial statements contain all normal, recurring adjustments necessary to fairly present the following:

- Consolidated balance sheets at March 28, 2008 and December 28, 2007;
- Consolidated income statements for the quarters ended March 28, 2008 and March 30, 2007; and
- Consolidated cash flow statements for the quarters ended March 28, 2008 and March 30, 2007.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. Significant Accounting Policies, continued

Beginning in 2008, certain items have been reclassified within the income statement. These reclassifications include reclassifying all items within other operating income and certain items within other income into the Rail segment. As a result of this change, CSX consolidated operating income and Surface Transportation operating income will now be the same; therefore, the Company will no longer report separate Surface Transportation results. The Rail segment was not materially impacted by these reclassifications. Certain prior-year data have been reclassified to conform to the 2008 presentation.

Additionally, the Company reclassified all non-locomotive fuel related costs previously included in materials, supplies and other into fuel on the Company's consolidated income statement so that it now includes all fuel used for operations and maintenance. For first quarters 2008 and 2007, these amounts were \$36 million and \$25 million, respectively.

Pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"), certain information and disclosures normally included in the notes to the annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted from these interim financial statements. CSX suggests that these financial statements be read in conjunction with the audited financial statements and the notes included in CSX's most recent Annual Report on Form 10-K and any Current Reports on Form 8-K.

Fiscal Year

CSX follows a 52/53 week fiscal reporting calendar.

- The first fiscal quarter of 2008 and 2007 consisted of 13 weeks ending on March 28, 2008 and March 30, 2007, respectively.
 - Fiscal year 2007 consisted of 52 weeks ending on December 28, 2007.
 - Fiscal year 2008 will consist of 52 weeks ending on December 26, 2008.

Except as otherwise specified, references to quarters indicate CSX's fiscal periods ending March 28, 2008 or March 30, 2007, and references to year-end indicate the fiscal year ending December 28, 2007.

Table of Contents

CSX CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

NOTE 1. Significant Accounting Policies, continued

Comprehensive Earnings

Comprehensive earnings is defined as all changes in shareholders' equity during a period, other than those resulting from investments by and distributions to shareholders (i.e. issuance of equity securities and dividends). For CSX, differences between net income and comprehensive earnings consist primarily of adjustments for pension and other post-retirement liabilities. For first quarter 2008 and 2007, comprehensive earnings were \$353 million and \$242 million, respectively.

Share Repurchases and Dividends

On March 17, 2008, CSX announced additional share repurchase authority of approximately \$2.4 billion. This is in addition to the remaining share repurchase authority under the 2007 program of \$600 million for a new combined total of \$3 billion. CSX intends to complete all authorized share repurchases by year-end 2009. The timing and amount of repurchase transactions will be determined by the Company's management based on its evaluation of market conditions, share price and other factors. While it is not the Company's intention, the program could be suspended or discontinued at any time, based on market, economic or business conditions.

Cumulatively since 2006 under various authorized repurchase programs, CSX has already bought approximately \$2.9 billion of its outstanding common stock through the first quarter of 2008. These actual repurchases along with the new authorization of \$3 billion equal nearly \$6 billion expected to be repurchased through 2009.

Total share repurchases under all publicly announced plans were as follows:

(In Millions)	First Quarters	
	2008	2007
Number of Shares Repurchased	7	5
Value of Shares Repurchased	\$ 300	\$ 179

In addition to the new share repurchase authority authorized on March 17, 2008, CSX announced a 20 percent increase to its quarterly cash dividend to 18 cents per share payable June 13, 2008 to shareholders of record on May 30, 2008. This increase followed the 50 percent increase implemented in 2007.

Retained Earnings

During first quarter 2008, CSX's other capital balance was reduced to zero as a result of share repurchases. Since CSX's other capital balance cannot be negative, retained earnings was reduced by \$192 million during the quarter, which represented share repurchases occurring after the other capital balance had been reduced to zero. Generally, retained earnings is only impacted by net earnings and dividends.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. Significant Accounting Policies, continued

Equity Earnings Adjustment

During the first quarter of 2008, the Company determined that an adjustment was needed to correct earnings of an unconsolidated subsidiary accounted for under the equity method. Under the guidance of Staff Accounting Bulletin (“SAB”) 99, Materiality and SAB 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements, the Company has determined that the error was immaterial, both quantitatively and qualitatively, to prior and current periods. The correction resulted in an increase to other income in the first quarter of 2008 of \$30 million pretax or \$.05 per diluted share. Additionally, other assets increased by \$29 million and accumulated other comprehensive income decreased by \$1 million. There was no impact on the cash flow statements as the adjustment was a non-cash item, and the income statement impact is expected to be immaterial in future reporting periods.

NOTE 2. Earnings Per Share

The following table sets forth the computation of basic earnings per share and earnings per share, assuming dilution:

	First Quarters	
	2008	2007
Numerator (Millions):		
Net Earnings	\$ 351	\$ 240
Interest Expense on Convertible Debt - Net of Tax	1	1
Net Earnings, If-Converted	\$ 352	\$ 241
Denominator (Thousands):		
Average Common Shares Outstanding	404,280	437,637
Convertible Debt	5,717	19,456
Stock Option Common Stock Equivalents(a)	4,361	5,545
Other Potentially Dilutive Common Shares	827	538
Average Common Shares Outstanding, Assuming Dilution	415,185	463,176
Basic Earnings Per Share	\$ 0.87	\$ 0.55
Earnings Per Share, Assuming Dilution	\$ 0.85	\$ 0.52

(a) In calculating diluted earnings per share, SFAS 128, Earnings Per Share requires the Company to include the potential shares that would be outstanding if all outstanding stock options were exercised. This is offset by shares the Company could repurchase using the proceeds from these hypothetical exercises to obtain the common stock equivalent. This number is different from outstanding stock options, which is included in Note 3, Share-Based Compensation.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 2. Earnings Per Share, continued

Basic earnings per share is based upon the weighted-average number of common shares outstanding. Earnings per share, assuming dilution is based on the weighted-average number of common shares outstanding adjusted for the effect of the following types of potentially dilutive common shares:

- convertible debt,
- employee stock options, and
- other equity awards, which include unvested restricted stock and long-term incentive awards.

Emerging Issues Task Force (EITF) 04-8, The Effect of Contingently Convertible Debt on Diluted Earnings Per Share, required CSX to include additional shares in the computation of earnings per share, assuming dilution. The amount included in diluted earnings per share represents the number of shares that would be issued if all of CSX's outstanding convertible debentures were converted into CSX common stock.

When convertible debentures are converted into CSX common stock, the newly-issued shares are included in the calculation of both basic and diluted earnings per share on a weighted-average basis. During first quarter 2008, \$25 million of face value convertible debentures were converted into 1 million shares of CSX common stock. No material conversions occurred during first quarter 2007. As of March 2008, \$148 million face value remained outstanding, convertible into 5 million shares of CSX common stock.

Stock options are excluded from the computation of earnings per share, assuming dilution, when option exercise prices are greater than the average market price of the common shares during the period. In first quarter 2008 and 2007, all stock options were dilutive. Therefore, no stock options were excluded from the calculation.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 3. Share-Based Compensation

CSX share-based compensation plans primarily include long-term incentive plans, restricted stock awards, stock options, and stock plans for directors. CSX has not granted stock options since 2003. Awards granted under the various plans were determined and approved by the Compensation Committee of the Board of Directors or, in certain circumstances, by the Chief Executive Officer for awards to management employees other than senior executives. The Governance Committee of the Board of Directors approves awards granted to the Company's non-management directors.

Total pre-tax expense associated with share-based compensation and its related income tax benefit is as follows:

(Dollars in Millions)	First Quarters	
	2008	2007
Share-Based Compensation		
Expense	\$ 14	\$ 15
Income Tax Benefit	5	6

The following table provides information about stock options exercised.

(In Thousands)	First Quarters	
	2008	2007
Number of Stock Options Exercised	1,858	4,318

As of March 2008, CSX had approximately 10 million stock options outstanding.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves

Casualty, environmental and other reserves were determined to be critical accounting estimates due to the need for significant management judgments. They are provided for in the consolidated balance sheets as follows:

(Dollars in Millions)	March 28, 2008			December 28, 2007		
	Current	Long-term	Total	Current	Long-term	Total
Casualty	\$ 157	\$ 399	\$ 556	\$ 157	\$ 389	\$ 546
Separation	15	84	99	16	87	103
Environmental	42	56	98	42	58	100
Other	31	90	121	32	90	122
Total	\$ 245	\$ 629	\$ 874	\$ 247	\$ 624	\$ 871

Details with respect to each type of reserve are described below. Actual settlements and claims received could differ. The final outcome of these matters cannot be predicted with certainty. Considering the legal defenses available, the liabilities that have been recorded, and other factors, it is the opinion of management that none of these items, when finally resolved, will have a material effect on the Company's results of operations, financial condition or liquidity. However, should a number of these items occur in the same period, they could have a material effect on the results of operations, financial condition or liquidity in that particular period.

Casualty

Casualty reserves represent accruals for personal injury and occupational injury claims. Currently, no individual claim is expected to exceed the Company's self-insured retention amount. To the extent the value of an individual claim exceeds the self-insured retention amount, the Company would present the liability on a gross basis with a corresponding receivable for insurance recoveries. Personal injury and occupational claims are presented on a gross basis and in accordance with SFAS 5, Accounting for Contingencies ("SFAS 5"). These reserves fluctuate with independent third party estimates, which are reviewed by management, and the timing of payments. Most of the claims were related to CSXT unless otherwise noted.

Defense and processing costs, which historically have been insignificant and are anticipated to be insignificant in the future, are not included in the recorded liabilities. The Company is presently self-insured for personal injury and occupational-related claims.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves, continued

Personal Injury

Personal injury reserves represent liabilities for employee work-related and third-party injuries. Work-related injuries for CSXT employees are primarily subject to the Federal Employers' Liability Act ("FELA"). In addition to FELA liabilities, employees of other CSX subsidiaries are covered by various state workers' compensation laws, the Federal Longshore and Harbor Worker's Compensation Program or the Maritime Jones Act.

CSXT retains an independent actuarial firm to assist in assessing the value of personal injury claims and cases. An analysis is performed by the independent actuarial firm semi-annually and is reviewed by management. The methodology used by the actuary includes a development factor to reflect growth or reduction in the value of these personal injury claims. It is based largely on CSXT's historical claims and settlement experience. Actual results may vary from estimates due to the type and severity of the injury, costs of medical treatments, and uncertainties in litigation.

Occupational

Occupational claims arise from allegations of exposures to certain materials in the workplace, such as asbestos, solvents (which include soaps and chemicals) and diesel fuels or allegations of chronic physical injuries resulting from work conditions, such as repetitive stress injuries, carpal tunnel syndrome and hearing loss.

The Company retains a third party specialist with extensive experience in performing asbestos and other occupational studies to assist management in assessing the value of the Company's claims and cases. The analysis is performed by the specialist semi-annually and is reviewed by management. The methodology used by the specialist includes an estimate of future anticipated claims based on the Company's trends of average historical claim filing rates, future anticipated dismissal rates and settlement rates.

Separation

Separation liabilities provide for the estimated costs of implementing workforce reductions, improvements in productivity and certain other cost reductions at the Company's major transportation units since 1991. These liabilities are expected to be paid out over the next 10 to 15 years from general corporate funds and may fluctuate depending on the timing of payments and associated taxes.

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves, continued

Environmental

The Company is a party to various proceedings related to environmental issues, including administrative and judicial proceedings, involving private parties and regulatory agencies. The Company has been identified as a potentially responsible party at approximately 243 environmentally impaired sites, many of which were, or may be, subject to remedial action under the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, or CERCLA, also known as the Superfund Law, or similar state statutes. Most of these proceedings arose from environmental conditions on properties used for ongoing or discontinued railroad operations. However, a number of these proceedings are based on allegations that the Company, or its predecessors, sent hazardous substances to facilities owned or operated by others for treatment or disposal. In addition, some of the Company's land holdings were leased to others for commercial or industrial uses that may have resulted in releases of hazardous substances or other regulated materials onto the property and could give rise to proceedings against the Company.

In any such proceedings, the Company is subject to environmental clean-up and enforcement actions under the Superfund Law, as well as similar state laws that may impose joint and several liability for clean-up and enforcement costs on current and former owners and operators of a site without regard to fault or the legality of the original conduct. These costs could be substantial.

In accordance with Statement of Position 96-1, Environmental Remediation Liabilities, the Company reviews its role with respect to each site identified at least once a quarter. Based on the review process, the Company has recorded amounts to cover anticipated contingent future environmental remediation costs with respect to each site to the extent such costs are estimable and probable. The recorded liabilities for estimated future environmental costs are undiscounted and include amounts representing the Company's estimate of unasserted claims, which the Company believes to be immaterial. The liability includes future costs for remediation and restoration of sites as well as any significant ongoing monitoring costs, but excludes any anticipated insurance recoveries. Payments related to these liabilities are expected to be made over the next several years.

Table of Contents

CSX CORPORATION
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

NOTE 4. Casualty, Environmental and Other Reserves, continued

Currently, the Company does not possess sufficient information to reasonably estimate the amounts of additional liabilities, if any, on some sites until completion of future environmental studies. In addition, conditions that are currently unknown could, at any given location, result in exposure, the amount and materiality of which cannot presently be reliably estimated. Based upon information currently available, however, the Company believes its environmental reserves are adequate to fund remedial actions to comply with present laws and regulations, and that the ultimate liability for these matters, if any, will not materially affect its overall results of operations, financial condition or liquidity.

Other

Other reserves include liabilities for various claims, such as longshoremen disability claims, freight claims, and claims for property, automobile and general liability. These liabilities are accrued at the estimable and probable amount in accordance with SFAS 5.

NOTE 5. Commitments and Contingencies

Purchase Commitments

CSXT has a commitment under a long-term maintenance program that currently covers 46% of CSXT's fleet of locomotives. The agreement is based upon the maintenance cycle for each locomotive. Under CSXT's current obligations, the agreement expires no earlier than 2028 and may last until 2031 depending upon when certain locomotives are placed in service. The costs expected to be incurred throughout the duration of the agreement fluctuate as locomotives are placed into, or removed from, service or as required maintenance schedules are revised. CSXT may terminate the agreement at its option after 2012, although such action would trigger certain liquidated damages provisions.

The following table summarizes CSXT's payments under the long-term maintenance program:

(Dollars in Millions)	First Quarters	
	2008	2007
Amounts Paid	\$ 61	\$ 50

Table of Contents

CSX CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 5. Commitments and Contingencies, continued

Insurance

The Company maintains numerous insurance programs, most notably for third-party casualty liability and for Company property damage and business interruption, with substantial limits. A specific amount of risk is retained by the Company on each of the casualty and property programs. Specifically, the Company has a \$25 million deductible for each of the casualty and non-catastrophic property programs and a \$50 million deductible for the catastrophic property program. These deductibles only apply to the first event. If a catastrophic property or liability event occurs in excess of the Company's deductible and the Company does not elect to purchase additional insurance coverage, then the deductible for the second covered event will equal the amount of the claim in the first event. For information on insurance issues resulting from the effects of Hurricane Katrina on the Company's operations and assets, see Note 7, Hurricane Katrina.

Guarantees

CSX and certain of its subsidiaries are contingently liable, individually and jointly with others, as guarantors of approximately \$72 million in obligations principally relating to leased equipment, vessels and joint facilities used by the Company in its current and former business operations. Utilizing the Company's guarantee for these obligations allows the obligor to take advantage of lower interest rates and to obtain other favorable terms. Guarantees are contingent commitments issued by the Company that could require CSX or one of its affiliates to make payment to or to perform certain actions for the beneficiary of the guarantee based on another entity's failure to perform.

As of first quarter 2008, the Company's guarantees primarily related to the following:

1. Guarantee of approximately \$61 million of obligations of a former subsidiary, CSX Energy, in connection with a sale-leaseback transaction. CSX is, in turn, indemnified by several subsequent owners of the subsidiary against payments made with respect to this guarantee. Management does not expect that the Company will be required to make any payments under this guarantee for which CSX will not be reimbursed. CSX's obligation under this guarantee will be completed in 2012.
2. Guarantee of approximately \$11 million of lease commitments assumed by A.P. Moller-Maersk ("Maersk") for which CSX is contingently liable. CSX believes Maersk will fulfill its contractual commitments with respect to such lease commitments, and CSX will have no further liabilities for those obligations. CSX's obligation under this guarantee will be completed in 2011.

As of first quarter 2008, the Company has not recognized any liabilities in its financial statements in connection with any guarantee arrangements. The maximum amount of future payments the Company could be required to make under these guarantees is the amount of the guarantees themselves.

NOTE 5. Commitments and Contingencies, continued

Fuel Surcharge Antitrust Litigation

Since May 2007, at least 30 putative class action suits have been filed in various federal district courts against CSXT and the four other U.S.-based Class I railroads. The lawsuits contain substantially similar allegations to the effect that the defendants' fuel surcharge practices relating to contract and unregulated traffic resulted from an illegal conspiracy in violation of antitrust laws. The suits seek unquantified treble damages (three times the amount of actual damages) allegedly sustained by purported class members, attorneys' fees and other relief. All but three of the lawsuits purport to be filed on behalf of a class of shippers that allegedly purchased rail freight transportation services from the defendants through the use of contracts or through other means exempt from rate regulation during defined periods commencing as early as June 2003 and that were assessed fuel surcharges. Three of the lawsuits purport to be on behalf of indirect purchasers of rail services. One additional lawsuit has been filed by an individual shipper.

In July 2007, CSXT received a grand jury subpoena from the New Jersey Office of the Attorney General seeking information related to the same fuel surcharges that are the subject of the civil actions. It is possible that additional federal or state agencies could initiate investigations into similar matters.

CSXT believes that its fuel surcharge practices are lawful. Accordingly, CSXT intends to vigorously defend itself against the purported class actions, which it believes are without merit. CSXT cannot predict the outcome of the private lawsuits, which are in their preliminary stages, or of any government investigations, charges or additional litigation that may be filed in the future. Penalties for violating antitrust laws can be severe, involving both potential criminal and civil liability. CSXT is unable to assess at this time the possible financial impact of this litigation. CSXT has not accrued any liability for an adverse outcome in the litigation. If a material adverse outcome were to occur and be sustained, it could have a material adverse impact on the Company's results of operations, financial condition or liquidity.

Other Legal Proceedings

In addition to the matter described above, the Company is involved in litigation incidental to its business and is a party to a number of legal actions and claims, various governmental proceedings and private civil lawsuits, including, but not limited to, those related to environmental matters, FELA claims by employees, other personal injury claims and disputes and complaints involving certain transportation rates and charges. Some of the legal proceedings include claims for compensatory as well as punitive damages and others are, or are purported to be, class actions. While the final outcome of these matters cannot be predicted with certainty, considering, among other things the meritorious legal defenses available and liabilities that have been recorded along with applicable insurance, it is currently the opinion of CSX management that none of these items will have a material adverse effect on the Company's results of operations, financial condition or liquidity. An unexpected adverse resolution of one or more of these items, however, could have a material adverse effect on the Company's results of operations, financial condition or liquidity in a particular period or fiscal year.

NOTE 6. Debt and Credit Agreements

Total activity related to debt and current maturities of long-term debt for first quarter 2008 was as follows:

(Dollars in Millions)	Current Portion	Long-term Portion	Total Debt Activity
Total Long-term Debt at December 28, 2007	\$ 785	\$ 6,470	\$ 7,255
2008 Long-term Debt Activity:			
Issued	-	1,000	1,000
Repaid	(44)	-	(44)
Reclassifications	28	(28)	-
Converted into CSX stock	(25)	-	(25)
Discount amortization and other	19	(2)	17
Total Long-term Debt at March 28, 2008	\$ 763	\$ 7,440	\$ 8,203

Debt Issuance

On March 27, 2008, CSX issued \$600 million in one series of unsecured notes, which bear interest at 6.25% and mature on April 1, 2015, and \$400 million in another series of unsecured notes, which bear interest at 7.45% and mature on April 1, 2038. Each series of notes is included in the Consolidated Balance Sheets under Long-term Debt and may be redeemed by CSX at any time. The net proceeds from the sale of the notes will be used for general corporate purposes, which may include repurchases of CSX common stock, capital expenditures, working capital requirements, improvements in productivity and other cost reductions at the Company's major transportation units.

Revolving Credit Facilities

CSX has a \$1.25 billion unsecured revolving credit facility expiring in 2012. As of March 2008, this facility was not drawn on, and CSX was in compliance with all covenant requirements under the facility. CSX also has a \$15 million secured revolving credit facility expiring in 2011 and an \$18.5 million 364-day unsecured revolving credit facility expiring in August 2008.

NOTE 7. Hurricane Katrina

In August 2005, Hurricane Katrina caused extensive damage to Company assets on the Gulf Coast, including damage to track infrastructure and bridges. Operations were returned to pre-hurricane conditions by the end of first quarter 2006. In 2005, the Company had insurance coverage of \$535 million, after a \$25 million deductible (per occurrence), for fixed asset replacement, incremental expenses, and lost profits. Management's current loss estimate is approximately \$450 million.

The Company's insurance policies do not prioritize coverage based on types of losses. As claims were submitted to the insurance companies, they were reviewed and preliminary payments were received until all losses were incurred and documented. A final payment will be received once the Company and its insurers agree on the total value of the claim. Through the first quarter 2008, the Company had collected insurance payments of \$370 million.

Gains on insurance from claims related to Hurricane Katrina were as follows:

(Dollars in Millions)	First Quarters	
	2008	2007
Gain on Insurance Recoveries	\$ 2	\$ 18

The gains were attributable to recovering amounts in excess of the net book value of damaged fixed assets and to recording recoveries related to lost profits. Additional cash proceeds are expected and will result in future gain recognition.

Cash proceeds from the insurers are not specific to the types of losses and so, for cash flow presentation, the Company allocated the proceeds ratably among the three types of losses mentioned above. Allocated cash proceeds for lost profits and incremental expenses were classified as operating activities since they related directly to revenue and expenses from operations and were \$1 million and \$9 million for first quarters 2008 and 2007, respectively. Allocated cash proceeds for fixed asset damage were classified as investing activities since these proceeds had a direct relationship to money the Company spent on property additions to repair the hurricane-damaged assets that were recorded in the same category. Cash proceeds for fixed asset damage were \$1 million and \$10 for first quarters 2008 and 2007, respectively. In 2007, the \$18 million gain on insurance recoveries is \$1 million less than the \$19 million of total cash received due to incremental costs incurred during the period. Those costs were added to the insurance claim and are expected to be recovered as part of the claim process.

Additional information about the effects of Hurricane Katrina is included in CSX's 2007 Annual Report on Form 10-K.

Table of Contents

 (Unaudited)

NOTE 8. Income Taxes

As of March 2008 and December 2007, the Company has approximately \$59 million and \$58 million of total unrecognized tax benefits before federal tax benefits. Of this total, \$50 million of both the beginning and ending balances net of federal benefits on state issues could favorably affect the effective tax rate. The Company estimates that approximately \$20 million of the net unrecognized tax benefits as of March 2008 for various state and federal income tax matters will be resolved with the settlement of audits over the next 12 months. The final outcome of these uncertain tax positions, however, is not yet determinable.

CSX's continuing practice is to recognize net interest and penalties related to income tax matters in income tax expense. The Company had \$4 million accrued for interest and penalties at both March 2008 and December 2007.

NOTE 9. Other Income (Expense) – Net

Other Income (Expense) – Net consists of the following:

(Dollars in Millions)	First Quarters	
	2008	2007
Interest Income(a)	\$ 8	\$ 13
Income (Expense) from Real Estate and Resort Operations(b)	14	(16)
Miscellaneous(c)	33	(5)
Total Other Income (Expense) - Net	\$ 55	\$ (8)

(a) Interest income includes amounts earned from CSX's cash, cash equivalents and short-term investments.

(b) Income from real estate and resort operations includes the results of operations of the Company's real estate sales, leasing, acquisition and management and development activities as well as the results of operations from CSX Hotels, Inc., a resort doing business as The Greenbrier, located in White Sulphur Springs, West Virginia. Results of these operations may fluctuate as a function of timing of real estate sales and resort seasonality.

(c) Miscellaneous income is comprised of equity earnings, minority interest, investment gains and losses and other non-operating activities. Additionally in first quarter 2008, CSX recorded a non-cash adjustment to correct equity earnings from a non-consolidated subsidiary. This correction resulted in additional income of \$30 million. The impact is expected to be immaterial in future reporting periods.

NOTE 10. Business Segments

The Company's consolidated operating income results are comprised of two business segments: Rail and Intermodal. The Rail segment provides rail freight transportation over a network of approximately 21,000 route miles in 23 states, the District of Columbia and the Canadian provinces of Ontario and Quebec. The Intermodal segment provides integrated rail and truck transportation services and operates a network of dedicated intermodal facilities across North America. These segments are strategic business units that offer different services and are managed separately. Performance is evaluated and resources are allocated based on several factors, of which the principal financial measures are business segment operating income and operating ratio. The accounting policies of the segments are the same as those described in Note 1, Nature of Operations and Significant Accounting Policies, in the CSX 2007 Annual Report on Form 10-K.

Certain segment information has been reclassified to conform to current year presentation. See Note 1, Significant Accounting Policies, for further details. Business segment information for first quarters 2008 and 2007 is as follows:

(Dollars in Millions)	Rail(a)	Intermodal	Total Operating
First Quarter 2008			
Revenues from External Customers	\$ 2,365	\$ 348	\$ 2,713
Segment Operating Income	565	61	626
First Quarter 2007			
Revenues from External Customers	\$ 2,104	\$ 318	\$ 2,422
Segment Operating Income	436	49	485

(a) In addition to CSXT, the Rail segment includes non-railroad subsidiaries such as TDSI, Transflo, CSX Technology and other subsidiaries.

NOTE 11. Employee Benefit Plans

The Company sponsors defined benefit pension plans principally for salaried, management personnel. The plans provide eligible employees with retirement benefits based predominantly upon years of service and compensation rates near retirement. For employees hired after December 31, 2002, benefits are determined based on a cash balance formula, which provides benefits by utilizing interest and pay credits based upon age, service and compensation.

In addition to these plans, CSX sponsors a post-retirement medical plan and a life insurance plan that provide benefits to full-time, salaried, management employees hired on or before December 31, 2002 upon their retirement if certain eligibility requirements are met. The post-retirement medical plan is contributory (partially funded by retirees), with retiree contributions adjusted annually. The life insurance plan is non-contributory.

The following table describes the components of expense/(income) related to net periodic benefit cost:

(Dollars in Millions)	Pension Benefits			
	First Quarters			
	2008		2007	
Service Cost	\$	8	\$	8
Interest Cost		30		28
Expected Return on Plan Assets		(36)		(29)

NOTE 12. Related Party Transactions

Through a limited liability company, CSX and Norfolk Southern Corporation (“NS”) jointly own Conrail Inc. (“Conrail”). CSX has a 42% economic interest and 50% voting interest in the jointly owned entity and NS has the remainder of the economic and voting interests. Pursuant to the Accounting Principles Board (“APB”) Opinion 18, The Equity Method of Accounting for Investments in Common Stock, CSX applies the equity method of accounting to its investment in Conrail. Conrail’s equity earnings are included in materials, supplies and other in the consolidated income statements.

As required by SFAS 57, Related Party Disclosures, the Company has identified below amounts owed to Conrail, or its affiliates, representing liabilities under operating, equipment and shared area agreements with Conrail. The Company also executed two promissory notes with a subsidiary of Conrail which are included in long-term debt on the consolidated balance sheets.

(Dollars in Millions)	March 28, 2008	December 28, 2007
Balance Sheet Information:		
CSX Payable to Conrail (a)	\$ 58	\$ 49
Promissory Notes Payable to Conrail Subsidiary		
4.40% CSX Promissory Note due October 2035 (b)	\$ 73	\$ 73
4.52% CSXT Promissory Note due March 2035 (b)	\$ 23	\$ 23

(a) Included on the consolidated balance sheet of CSX as accounts payable

(b) Included on the consolidated balance sheet of CSX as long-term debt

Interest expense from the promissory notes with a subsidiary of Conrail and Conrail rents, fees, and services expense was as follows:

(Dollars in Millions)	First Quarters	
	2008	2007
Income Statement Information:		
Interest Expense Related to Conrail	\$ 1	\$ 1
Conrail Rents, Fees, and Services		
(a)	\$ 26	\$ 23

(a) Conrail rents, fees and services represent expenses paid to Conrail related to right-of-way usage fees, equipment rental, other service related charges and fair value write-up amortization. These amounts have been included in materials, supplies and other on the consolidated income statements. The amounts disclosed above do not include CSX’s 42% portion of Conrail’s earnings, which are also included in materials, supplies and other and amounted to \$5 million and \$3 million for first quarters 2008 and 2007, respectively.

Additional information about the investment in Conrail is included in CSX’s most recent Annual Report on Form 10-K.

NOTE 13. Summarized Consolidating Financial Data

In 2007, CSXT sold \$381 million of Secured Equipment Notes due 2023 in a registered public offering pursuant to an existing shelf registration statement. CSX has fully and unconditionally guaranteed the notes. In connection with the notes, the Company is providing the following condensed consolidating financial information in accordance with SEC disclosure requirements. Each entity in the consolidating financial information follows the same accounting policies as described in the consolidated financial statements, except for the use of the equity method of accounting to reflect ownership interests in subsidiaries which are eliminated upon consolidation and the allocation of certain expenses of CSX incurred for the benefit of its subsidiaries.

The condensed consolidating balance sheets as of March 2008 and December 2007, and the statements of income and cash flows for first quarters 2008 and 2007 for the parent and obligor are as follows:

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

STRATEGIC OVERVIEW

The Company provides customers access to a modern transportation network that connects ports, production facilities and distribution centers to markets in the Northeast, Midwest and the rapidly growing southern states. The Company transports a diversified portfolio of products, from domestically abundant coal to new energy sources such as ethanol, from automobiles produced by traditional American manufacturers to “new domestic” factories owned by European, Japanese and Korean automotive companies, and from life-essential chemicals to life-enriching consumer electronics. Additionally, the Company serves every major market in the eastern United States and has direct access to all Atlantic and Gulf Coast ports, as well as the Mississippi River, the Great Lakes and the St. Lawrence Seaway. Furthermore, the Company has access to Pacific ports through alliances with western railroads. Overall, the CSXT transportation network encompasses approximately 21,000 route miles of track in 23 states, the District of Columbia and the Canadian provinces of Ontario and Quebec.

As the nation consumes increasingly higher quantities of imported goods, those products must be transported across the country in a way that minimizes the impact on the environment, takes traffic off an already congested highway system and minimizes fuel consumption and transportation costs. The Company's transportation network, located in some of the largest and fastest-growing population centers in the nation, is well-positioned to capitalize on consumption growth trends. In this regard, more than two-thirds of Americans live within the Company's service territory, accounting for about three-quarters of the nation's consumption.

The Company has made substantial strides in improving operating performance in order to capitalize on these consumption growth trends. In 2004, CSXT implemented the ONE Plan, which continues to focus on optimizing the train network and utilizing rail assets more efficiently. Anchored by the ONE Plan and a variety of other initiatives implemented after the ONE Plan was introduced, the Company has achieved significant operational improvements that have enhanced safety, service reliability and productivity.

In addition to the ONE Plan, the Company continues to implement its Total Service Integration initiative (“TSI”), which aims to better align the Company's capabilities with customer demands. TSI aims to optimize train size and increase asset utilization while delivering more reliable service to customers.

These initiatives delivered strong results for shareholders while higher levels of customer service have led to improved pricing. These efforts combined with operational efficiencies have resulted in substantial improvements in CSX's operating income and operating ratio.

In addition to driving better financial results to create value for shareholders, CSX also employs a balanced approach in deploying its capital for the benefit of shareholders. This approach includes investments in the future, share repurchases and dividends. Through this balanced use of financial resources, CSX will strive to capitalize on an economic environment that is increasingly favoring rail transportation.

Table of Contents

CSX CORPORATION
ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FIRST QUARTER 2008 HIGHLIGHTS

- Revenue grew \$291 million or 12% to over \$2.7 billion.
- Expenses increased \$150 million or 8% to \$2.087 billion driven by rising fuel costs.
- Operating income was a 1st quarter record at \$626 million an increase of \$141 million or 29%.
 - Service and safety measurements improved in all categories.

CSX achieved record first quarter revenue, operating income and earnings per share from continuing operations. Revenue and revenue-per-unit increased 12% and 14%, respectively, driven by the value CSX provides to its customers through better service as well as higher fuel recovery due to higher fuel prices. The Company was able to achieve pricing gains predominantly due to CSXT service improvements and the overall cost advantages that the Company's rail-based solutions provide to customers versus other modes of transportation.

These strong results in revenue were achieved despite volume declines in the Company's merchandise and automotive lines of business. The overall 2% volume decrease was primarily driven by continued weakness in housing construction and associated markets, as well as lower automotive production.

Expenses were higher primarily due to the effects of rising fuel prices. Lower first quarter 2008 volume and better productivity from improved operations offset the effects of inflation for certain expense categories.

For additional information, refer to Rail and Intermodal Results of Operations discussed on pages 33 through 35.

In addition to the Company's strong financial results, leadership and continued execution of established safety programs, which emphasize training, rules compliance and employee engagement, helped the Company deliver continued improvement in safety performance. The positive momentum continued as personal injury frequency improved 19% to 1.10 for the quarter. Train accident frequency improved 1% on a year-over-year basis to 3.04.

All key operating measures also improved during the first quarter of 2008, reflecting improved service reliability and efficiency gains. Train performance showed marked improvement, with on-time originations and arrivals improving 7% and 8%. System dwell, the average number of hours a rail car spends in a terminal, declined to 22.7 hours reflecting gains in terminal performance. Both average train velocity and reworks improved, indicating a positive trend in overall network fluidity. Train velocity increased 3% to 20.8 miles per hour, while average reworks improved 7% to 66 per day.

Key Performance Measures Definitions

FRA Personal Injuries Frequency Index – Number of FRA-reportable injuries per 200,000 man-hours.

FRA Train Accident Rate – Number of FRA-reportable train accidents per million train-miles.

On-Time Train Originations – Percent of scheduled road trains that depart the origin yard on-time or ahead of schedule.

On-Time Destination Arrivals – Percent of scheduled road trains that arrive at the destination yard on-time to two hours late (30 minutes for intermodal trains).

Dwell – Amount of time in hours between car arrival at and departure from the yard. It does not include cars moving through the yard on the same train.

Cars-On-Line – A count of all cars on the CSX network (does not include locomotives, cabooses, trailers, containers or maintenance equipment).

System Train Velocity – Average train speed between terminals in miles per hour (does not include locals, yard jobs, work trains or passenger trains).

Recrews –Number of crews used in addition to those planned for the trains running that day.

	76.1%	79.3%	82.5%	84.6%	76.9%	80.0%	

(a) Beginning in 2008, certain items have been reclassified within the income statement. These reclassifications include reclassifying all items within other operating income and certain items within other income into the Rail segment. As a result of this change, CSX consolidated operating income and Surface Transportation operating income will now be the same; therefore, the Company will no longer report separate Surface Transportation results. The Rail segment was not materially impacted by these reclassifications. Certain prior-year data have been reclassified to conform to the 2008 presentation.

(b) In addition to CSXT, the Rail segment includes non-railroad subsidiaries such as TDSI, Transflo, CSX Technology and other subsidiaries.

(c) The Company reclassified all non-locomotive fuel related costs previously included in materials, supplies and other into fuel on the Company's consolidated income statement so that it now includes all fuel used for operations and maintenance. For first quarters 2008 and 2007, these amounts were \$36 million and \$25 million, respectively.

Table of Contents

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

First Quarter Rail Results of Operations

Rail Operating Revenue

The Company was able to achieve continued pricing gains during first quarter 2008 predominantly due to the overall cost and service advantages that rail-based solutions provide versus other modes of transportation. These pricing gains, and higher fuel recovery due to higher fuel prices, more than offset volume weakness in housing construction, domestic automobile production and related markets.

Merchandise

Chemicals – Revenue and revenue-per-unit increases were driven primarily by improved pricing and increased fuel recovery. Volume was down due to weakness in plastic shipments and chemicals used in construction.

Emerging Markets, Forest Products, and Food and Consumer – Volume declines in building products, appliances and aggregates, which include crushed stone, sand and gravel, were due to continued softness in residential construction and related markets. Revenue-per-unit increases were driven by yield management initiatives and favorable fuel recoveries.

Agricultural Products – Gains in price and fuel surcharge coverage led to increases in revenue and revenue per unit. Volume growth was due to strong demand for many of the commodities in this segment including feed ingredients, export grain, wheat, soybeans and vegetable oil. Additionally, ethanol volumes rose substantially as a result of expanded use of ethanol in the northeastern United States.

Metals – Improved pricing and increased fuel recovery continue to drive revenue and revenue-per-unit gains. Volumes were down slightly as weakness in sheet steel used for automobile production more than offset increases in scrap metal, semi-finished steel and pipe shipments.

Phosphates and Fertilizers – Revenue and revenue-per-unit increased due to favorable pricing actions and a rise in long-haul, high revenue per unit shipments. Volume declines in short-haul phosphate shipments in Florida more than offset a trend of stronger fertilizer volumes due to increased crop plantings.

Coal

Sustained growth in yield, longer length of haul and improved fuel recovery positively influenced revenue and revenue-per-unit. Volumes increased in the export market due to strong overseas demand. These gains were offset by weakness in utility shipments.

Table of Contents

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Automotive

Volume was down due to declines in vehicle production and vehicle sales, and a strike at a supplier to the automotive industry. Revenue-per-unit improved due to price increases and higher fuel recoveries.

Rail Operating Expense

Labor and Fringe expenses increased \$12 million. This increase was primarily driven by wage and benefit inflation and higher incentive compensation. Partially offsetting these increases were productivity gains from improved operations and lower volume, which resulted in a reduction of train crew headcount.

Materials, Supplies and Other expenses decreased \$38 million. The primary driver was a decrease in train accident-related expenses from the prior year and a current year decrease in the cost associated with personal injuries. These decreases were partially offset by inflation.

Fuel expense increased \$156 million due to higher fuel prices which more than offset increased fuel efficiency.

Depreciation expense increased \$6 million. A larger asset base related to higher capital spending was partially offset by lower depreciation rates resulting from asset life studies.

Equipment and Other Rents expense decreased \$7 million primarily due to lower volumes which more than offset the impacts of inflation and asset utilization.

Gain on Insurance Recoveries of \$2 million represents insurance recoveries related to Hurricane Katrina property damage and lost profits. The decrease from last year's quarter is due to timing of cash receipts.

First Quarter Intermodal Results of Operations

Intermodal Operating Revenue

International - Revenue-per-unit increases were primarily driven by increased fuel recovery and yield management. Volumes declined due to slowing imports and customer losses in 2007.

Domestic - Growth in transcontinental (coast-to-coast) shipments resulted in revenue and volume gains. Revenue-per-unit increases were primarily driven by increased fuel recovery as the favorable mix change from increased transcontinental business was largely offset by the growth in lower revenue-per-unit short-haul train services introduced in 2007.

Table of Contents

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Intermodal Operating Expense

Intermodal operating expense increased due to higher inland transportation expense. This was driven by higher fuel expense charged by CSXT for purchased transportation services and increased purchased transportation services from other railroads to support Intermodal's coast-to-coast business. These increases were partially offset by improved productivity.

Additional First Quarter Consolidated Results

Other Income

Other income increased \$63 million to \$55 million in first quarter 2008 due to higher income from real estate sales and a \$30 million non-cash adjustment to correct equity earnings from a non-consolidated subsidiary. The impact of this adjustment is expected to be immaterial in future reporting periods.

Interest Expense

Interest expense increased \$20 million to \$119 million due primarily to higher average debt balances in first quarter 2008.

Income Tax Expense

Income tax expense increased \$73 million to \$211 million, which was driven by higher operating income in first quarter 2008.

Net Earnings

Net earnings increased \$111 million to \$351 million, and earnings per diluted share increased \$.33 to \$.85. Pricing gains and increased fuel recovery more than offset higher fuel expense.

Table of Contents

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

LIQUIDITY AND CAPITAL RESOURCES

Material Changes in Consolidated Balance Sheets and Significant Cash Flow Statement Items

The following are material changes in the Consolidated Balance Sheets and sources of liquidity and capital, which provide an update to the discussion included in CSX's most recent Annual Report on Form 10-K.

Long-term debt increased nearly \$1 billion due to debt issued at the end of the quarter. For additional information, see Note 6, Debt and Credit Agreements, under Part I, Item 1 of this Quarterly Report on Form 10-Q.

This \$1 billion debt issuance also drove higher cash and cash equivalent balances, which increased \$1.2 billion during first quarter 2008. Cash provided by operating activities increased to \$734 million due in part to strong earnings during the quarter. These gains were offset by property additions of \$446 million and share repurchases of \$300 million.

Working Capital

Working capital can be considered a measure of a company's ability to meet its short-term needs. CSX had a working capital surplus of \$710 million at March 2008, compared to a deficit of \$180 million at December 2007. The increase was primarily due to higher cash balances as a result of the recent \$1 billion debt issuance.

The Company's working capital balance varies from quarter to quarter due to factors such as the timing of scheduled debt payments and changes in cash and cash equivalent balances. As a result, the working capital balance could return to a deficit in future periods. A working capital deficit is not unusual for CSX or other companies in the industry and does not indicate a lack of liquidity. The Company continues to maintain adequate current assets to satisfy current liabilities and maturing obligations when they come due. CSX has sufficient financial capacity, including the revolving line of credit and shelf registration, to manage its day-to-day cash requirements and any anticipated obligations.

Credit Ratings

Credit ratings reflect an independent agency's judgment on the likelihood that a borrower will repay a debt obligation at maturity. The ratings reflect many considerations, such as the nature of the borrower's industry and its competitive position, the size of the company, its liquidity and access to capital and the sensitivity of a company's cash flows to changes in the economy. The two largest rating agencies, Standard & Poor's ("S&P") and Moody's Investors Service ("Moody's"), use alphanumeric codes to designate their ratings. The highest quality rating for long-term credit obligations is AAA+ and Aaa1 for S&P and Moody's, respectively. A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency.

Table of Contents

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Long-term ratings of BBB- and Baa3 or better by S&P and Moody's, respectively, reflect ratings on debt obligations that fall within a band of credit quality considered to be "investment grade." Currently, the long-term ratings for CSX's obligations are BBB- and Baa3 and have a stable outlook. If CSX's credit ratings were to decline to lower levels, the Company could experience more significant increases in its interest cost for new debt. In addition, the market's demand, and thus the Company's ability to readily issue new debt, could become further influenced by the economic and credit market environment.

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires that management make estimates in reporting the amounts of certain assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and certain revenues and expenses during the reporting period. Actual results may differ from those estimates. These estimates and assumptions are discussed with the Audit Committee of the Board of Directors on a regular basis. Consistent with the prior year, significant estimates using management judgment are made for the following areas:

- casualty, environmental and legal reserves;
- pension and post-retirement medical plan accounting;
- depreciation policies for assets under the group-life method; and
- income taxes.

For further discussion of the Company's critical accounting estimates, see the Company's most recent Annual Report on Form 10-K.

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

Certain statements in this report and in other materials filed with the SEC, as well as information included in oral statements or other written statements made by the Company, are forward-looking statements within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. These forward-looking statements include, among others, statements regarding:

- Expectations as to results of operations and operational improvements;
- Expectations as to the effect of claims, lawsuits, environmental costs, commitments, contingent liabilities, labor negotiations or agreements on the Company's financial condition;
- Management's plans, goals, strategies and objectives for future operations and other similar expressions concerning matters that are not historical facts, and management's expectations as to future performance and operations and the time by which objectives will be achieved; and
- Future economic, industry or market conditions or performance.

Forward-looking statements are typically identified by words or phrases such as "believe," "expect," "anticipate," "project," "estimate" and similar expressions. The Company cautions against placing undue reliance on forward-looking statements, which reflect its good faith beliefs with respect to future events and are based on information currently available to it as of the date the forward-looking statement is made. Forward-looking statements should not be read as a guarantee of future performance or results and will not necessarily be accurate indications of the timing when, or by which, such performance or results will be achieved.

Forward-looking statements are subject to a number of risks and uncertainties and actual performance or results could differ materially from those anticipated by these forward-looking statements. The Company undertakes no obligation to update or revise any forward-looking statement. If the Company does update any forward-looking statement, no inference should be drawn that the Company will make additional updates with respect to that statement or any other forward-looking statements. The following important factors, in addition to those discussed elsewhere, may cause actual results to differ materially from those contemplated by these forward-looking statements:

- Legislative, regulatory or legal developments involving transportation, including rail or intermodal transportation, the environment, hazardous materials, taxation, including the outcome of tax claims and litigation, the potential enactment of initiatives to re-regulate the rail industry and the ultimate outcome of shipper and rate claims subject to adjudication;
- The outcome of litigation and claims, including, but not limited to, those related to fuel surcharge, environmental contamination, personal injuries and occupational illnesses;

Table of Contents

CSX CORPORATION

ITEM 2: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

- Material changes in domestic or international economic or business conditions, including those affecting the transportation industry such as access to capital markets, ability to revise debt arrangements as contemplated, customer demand, customer acceptance of price increases, effects of adverse economic conditions affecting shippers and adverse economic conditions in the industries and geographic areas that consume and produce freight;
 - Changes in fuel prices, surcharges for fuel and the availability of fuel;
- The impact of increased passenger activities in capacity-constrained areas or regulatory changes affecting when CSXT can transport freight or service routes;
- Natural events such as severe weather conditions, including floods, fire, hurricanes and earthquakes, a pandemic crisis affecting the health of the Company's employees, its shippers or the consumers of goods, or other unforeseen disruptions of the Company's operations, systems, property or equipment;
 - An unintentional failure to comply with applicable laws or regulations;
- The inherent risks associated with safety and security, including the availability and cost of insurance, the availability and vulnerability of information technology, adverse economic or operational effects from actual or threatened war or terrorist activities and any governmental response;
- Labor costs and labor difficulties, including stoppages affecting either the Company's operations or the customers' ability to deliver goods to the Company for shipment;
- Competition from other modes of freight transportation, such as trucking and competition and consolidation within the transportation industry generally;
- The Company's success in implementing its strategic plans and operational objectives and improving operating efficiency; and
 - Changes in operating conditions and costs or commodity concentrations.

Other important assumptions and factors that could cause actual results to differ materially from those in the forward-looking statements are specified elsewhere in this report and in CSX's other SEC reports, accessible on the SEC's website at www.sec.gov and the Company's website at www.csx.com.

ITEM 3: QUANTATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in market risk from the information provided under “Quantitative and Qualitative Disclosures about Market Risk” in Item 7A of CSX’s most recent Annual Report on Form 10-K.

ITEM 4: CONTROLS AND PROCEDURES

As of March 28, 2008, under the supervision and with the participation of CSX’s Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), management has evaluated the effectiveness of the design and operation of the Company’s disclosure controls and procedures. Based on that evaluation, the CEO and CFO concluded that, as of first quarter 2008, the Company’s disclosure controls and procedures were effective at the reasonable assurance level in timely alerting them to material information required to be included in CSX’s periodic SEC reports. There were no changes in the Company’s internal controls over financial reporting during the first quarter of 2008 that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1: LEGAL PROCEEDINGS

For information relating to the Company’s settlements and other legal proceedings, see Note 5, Commitments and Contingencies under Part I, Item 1 of this Quarterly Report on Form 10-Q.

ITEM 1A. RISK FACTORS

For information regarding factors that could affect the Company’s results of operations, financial condition or liquidity, see the risk factors discussed under “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in Item 7 of CSX’s most recent Annual Report on Form 10-K. See also “Forward-Looking Statements,” included in Item 2 of this Quarterly Report on Form 10-Q. There have been no material changes from the risk factors previously disclosed in CSX’s most recent Annual Report on Form 10-K.

Table of Contents

CSX CORPORATION

ITEM 2: CSX PURCHASES OF EQUITY SECURITIES

CSX is required to disclose any purchases of its own common stock for the most recent quarter. CSX purchases its own shares for two primary reasons: to further its goals under its share repurchase program and to fund the Company's contribution required to be paid in CSX common stock under 401(k) plans which cover certain union employees.

On March 17, 2008, CSX announced additional share repurchase authority of approximately \$2.4 billion. This is in addition to the remaining share repurchase authority under the 2007 program of \$600 million for a new combined total of \$3 billion. CSX intends to complete all authorized share repurchases by year-end 2009. The timing and amount of repurchase transactions will be determined by the Company's management based on its evaluation of market conditions, share price and other factors. While it is not the Company's intention, the program could be suspended or discontinued at any time, based on market, economic or business conditions.

Cumulatively since 2006 under various authorized repurchase programs, CSX has already bought approximately \$2.9 billion of its outstanding common stock through the first quarter of 2008. These actual repurchases along with the new authorization of \$3 billion equal nearly \$6 billion expected to be repurchased through 2009.

Share repurchase activity of \$300 million for first quarter 2008 was as follows:

41

ITEM 4: SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5: OTHER INFORMATION

The Company is voluntarily furnishing the following information:

On March 17, 2008, the Company filed a lawsuit against The Children's Investment Master Fund (together with certain of its affiliates, "TCI"), 3G Capital Partners Ltd. (together with certain of its affiliates, "3G") and certain of their affiliates (collectively, the "TCI Group") in the United States District Court for the Southern District of New York alleging violations of federal securities laws, including violations of Sections 13(d) and 14(a) of the Securities Exchange Act of 1934. The lawsuit alleges, among other things, that TCI and 3G have undisclosed plans with respect of CSX. The lawsuit further alleges that TCI and 3G have employed swap agreements in order to evade the filing requirements of Section 13(d) and that their Section 14(a) and Section 13(d) filings concerning their collective 12.3 percent swap position in CSX shares are materially misleading. The lawsuit further alleges that TCI's and 3G's disclosures in their Section 14(a) and Section 13(d) filings concerning their formation of a Section 13(d) group are false and misleading.

The complaint seeks an order (i) declaring that TCI and 3G failed to file disclosures as required by the Securities Exchange Act of 1934, (ii) directing TCI and 3G to file truthful and accurate Schedule 13D and Schedule 14A disclosures, (iii) enjoining TCI and 3G from acquiring additional shares of the Company until such truthful and accurate filings have been made, (iv) enjoining TCI and 3G from acquiring any Company shares referenced in swap arrangements to which they are party, (v) directing TCI and 3G to sell all Company shares acquired, and terminate all swaps referencing Company shares that TCI and 3G entered into, renewed or extended after the date by which TCI and 3G should have filed a Schedule 13D, and enjoining TCI and 3G from voting such shares at the Meeting, or alternatively, directing TCI and 3G to vote such shares in proportion with the votes of other shareholders of CSX, (vi) enjoining TCI and 3G from voting any proxies received prior to the date on which TCI's and 3G's filings complied with the requirements of Schedule 13D and Schedule 14A, as determined by the court, (vii) declaring that TCI's and 3G's notices with respect to the nomination of candidates for the Board and the two shareholder proposals are invalid as non-compliant with the Company's bylaws, and (viii) granting leave to the Company to conduct expedited discovery regarding the above claims. TCI and 3G have stated that they believe the claims to be without merit and intend to defend themselves vigorously.

CSX CORPORATION

On April 4, 2008, TCI and 3G each filed substantially similar counterclaims against the Company and Michael Ward, chairman, president and CEO of CSX. The counterclaims allege, among other things, that (i) the 2007 long-term incentive plan target share awards to the Company's named executive officers and over 600 other employees and the May 2007 stock grants to the Company's non-employee directors under the CSX Corporation Stock Plan for Directors were made while the board of directors of CSX was in possession of material, non-public information, (ii) such awards and grants and the December 2007 stock grants to the Company's non-employee directors were made in violation of the CSX Omnibus Incentive Plan, the Company's insider trading policy, the code of ethics, the corporate governance guidelines and the bylaws, (iii) the Company's proxy statement omits details regarding the bylaw amendments relating to shareholder requests for special meetings adopted in February 2008, which will be considered at the 2008 annual meeting of shareholders, including the requirement that the request come from holders of record, the requirement that the requesting shareholders hold the shares through the date of the requested meeting and other procedural requirements, (iv) the Company's proxy statement mischaracterizes a special shareholder meeting shareholder proposal proposed by TCI and the purpose of the non-binding 2007 special shareholder meeting proposal, (v) the Company's proxy materials mischaracterize the TCI Group's intentions as seeking control and the TCI Group's suggestions regarding limitations on capital spending, (vi) the Company's proxy materials mischaracterize CSX's reasons for filing the lawsuit, (vii) the February 2008 bylaw amendments violate Virginia law, and (viii) the Company's proxy statement and other proxy materials are materially false and misleading and violate Section 14(a) of the Securities Exchange Act of 1934 because they fail to disclose such alleged items and include such mischaracterizations.

TCI and 3G seek an order (i) declaring that the Company failed to file disclosures required by Section 14(a) of the Securities Exchange Act of 1934, (ii) directing the Company to file truthful and accurate Schedule 14A disclosures at the personal expense of the current directors, (iii) declaring that the board of directors of CSX was in violation of Company policies and the bylaws, (iv) directing that the February 2008 bylaw amendments are void under Virginia law, (v) enjoining the proposal regarding the bylaw amendments relating to shareholder requests for special meetings adopted in February 2008 from being considered at the 2008 annual meeting of shareholders, (vi) enjoining the Company from voting any proxies received prior to the date on which the Company's proxy statement is accurate and compliant, as determined by the court, (vii) enjoining the Company from committing violations of Rule 14a-9 promulgated under the Securities Exchange Act of 1934, and (viii) granting costs, including attorneys' fees to TCI and 3G. The Company believes the TCI and 3G counterclaims are without merit and will defend against them vigorously.

The outcome of the litigation cannot be predicted.
