PROXY STATEMENT

Annual Meeting of Stockholders
To Be Held on July 28, 2004

GENERAL INFORMATION

This Proxy Statement is being furnished to the stockholders of Pioneer Oil and Gas (the "Company"), in connection with the solicitation of proxies on behalf of the Board of Directors of Pioneer Oil and Gas (the "Directors") for use at the Company's 2004 Annual Meeting of Stockholders and any and all adjournments or continuations thereof (the "Meeting"), to be held on Wednesday, July 28th, 2004 for the purposes set forth under the next paragraph. These materials will be first mailed to stockholders on or about June 11th, 2004.

PURPOSE OF ANNUAL MEETING

At the Meeting, stockholders will be asked: (i) to elect a Board of Directors to serve until the next annual meeting of the stockholders, or until their successors are duly elected and qualified; (ii) to ratify the selection by the Directors of Jones as independent auditors of the Company for the fiscal year ending September 30th, 2003 ("Fiscal 2003"); and (iii) to transact such other business as may properly come before the Meeting or any adjournment or postponement thereof.

QUORUM, VOTING RIGHTS AND OTHER MATTERS

The Company presently has one class of capital stock, common stock, \$.001 par value, of which 7,913,519 shares were issued and outstanding at the close of business on June 11th, 2004. Only shareholders of record at the close of business on June 11, 2004 will be entitled to notice of and to vote at the meeting. The presence at the meeting in person or by proxy of a majority of the shares entitled to a vote shall constitute a quorum for the transaction of business. All voting is non-cumulative.

The Directors know of no other matters, which are likely to be brought before the Meeting. If any other matters properly come before the Meeting, however, the person named in the enclosed proxy, or that person's duly constituted substitute acting at the Meeting, will be authorized to vote or otherwise act thereon in accordance with such matters. If the enclosed proxy is properly executed and returned prior to voting at the Meeting, the shares represented thereby will be voted in accordance with the instructions marked thereon. In the absence of instructions, executed proxies will be voted "FOR" the items listed in the Notice. The Directors recommend a vote "FOR" each of the proposals. Directors are elected by a plurality of the common stock represented at the meeting.

In accordance with Utah State law, certain corporate actions, generally, may create shareholder's rights of dissent and entitlement to payment of the fair market value of shares held. However, none of the proposals at the Annual Meeting creates such shareholder dissenters' rights.

Any stockholder executing a proxy has the power to revoke such proxy at any time prior to its exercise. A proxy may be revoked prior to exercise by (i) filing with the Company a written revocation of the proxy, (ii) appearing at the Meeting and casting a vote contrary to that indicated on the proxy, or (iii)

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

submitting a duly executed proxy bearing a latter date.

The cost of preparing, printing, assembling and mailing this Proxy Statement and other material furnished to stockholders in connection with the solicitation of proxies will be borne by the Company. In addition to the solicitation of proxies by use of mails, officers, directors, employees and agents of the Company may solicit proxies by written communication, telephone or personal call. Such persons are to receive no special compensation for any solicitation activities. The Company will reimburse banks, brokers and other persons holding common stock in their names, or those of their nominees, for their expenses in forwarding proxy solicitation materials to beneficial owners of common stock.

The Company will appoint one or more inspectors of election to act at the Meeting and report the results. Prior to the Meeting, each inspector will sign an oath to perform his duties in an impartial manner and according to the best of his ability. Inspectors will ascertain the number of shares outstanding and the voting power of each, determine the shares represented at the Meeting and the validity of proxies and ballots, count all votes and ballots, and perform certain other duties as required by law. Inspectors will tabulate the number of votes cast for or withheld in the election of directors, and the number of votes cast for or against all other proposals, including abstentions and other non-votes.

The required quorum necessary to transact business at the Meeting is a majority of the issued common stock outstanding on the record date. If a quorum is present, a plurality of the votes cast for directors will determine the directors elected and the approval of each proposal at the Meeting requires the affirmative vote of a majority of the common stock actually voted on such proposal. Abstentions and broker non-votes will be counted to determine if a quorum is present but will not otherwise affect the voting on any proposal.

All full-time employees of the Company participate in the Employee Stock Ownership Plan on the same terms and conditions as management. For the fiscal years shown above 15% of the compensation amount was paid towards the Employee Stock Ownership Plan in the form of Company stock for 2003 and 10% in fiscal years 2002 and 2001.

The Board of Directors reviews and sets compensation levels of the executive officers of the Company by evaluating their respective performance in light of a number of factors, including the Board's assessment of the performance of the

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

Company, as well as the range of compensation paid by the Company in comparison to the range of compensation paid by similar oil and gas companies in the western United States. The board weighs other factors, such as the officer's performance relative to the continued acquisition of favorable properties, and relative to the Company's financial performance.

The Company's executive compensation policy continues to look at three variable elements: base salary, stock awards and option grants. The policy factors, which determine the setting of these compensation elements, are largely aimed at attracting and retaining executives considered essential to the Company's long-term success.

The granting of stock and/or options is designed as an incentive to increasingly focus management's interests in closer alignment with interests of shareholders. The Company's executive compensation policy seeks to engender committed leadership and strategic management to favorably posture the Company for continued growth, stability and strength of shareholder equity. All options granted currently to directors, officers and employees of the Company are pursuant to an incentive stock option plan approved by shareholders of the Company at the last annual meeting of the shareholders.

DESCRIPTION OF BUSINESS

Pioneer Oil and Gas (the "Company") was organized on October 16, 1980 under the laws of the State of Utah. The Company's principal place of business is located at 1206 West South Jordan Parkway, Unit B, South Jordan, Utah 84095-5512. The Company's telephone number is (801) 566-3000 and the Company's fax number is (801) 446-5500. The Company has primarily been engaged in the acquisition and exploration of oil and gas properties in Utah, Wyoming, Colorado and Nevada.

The Company has focused its efforts over the years in acquiring oil and gas properties from other companies, selling producing wells and acquiring new oil and gas leases for the purpose of exploring for oil and gas. Leases have also been acquired over the years for the purpose of reselling them at a profit to other oil and gas companies.

Most of the Company's operated oil and gas properties were acquired from large oil companies selling properties they considered to be marginal producers. The Company has found that it can operate these properties at a profit. Presently, the Company operates 9 producing oil and gas wells in Utah and Wyoming.

The Company also owns an interest in several non-operated oil and gas wells and overriding royalty interests in oil and gas wells located in Utah, Colorado, Texas and Wyoming. An overriding royalty interest, is an interest in a well that receives a percentage of the production from a well without paying any operation expenses.

The Company operates in a highly competitive industry wherein many companies are competing for the same finite resources as the Company.

The Company over the last few years has focused most of its exploration efforts in the Rocky Mountain area, and in acquiring leasehold positions in trend areas of existing production. Prior to leasing an area a geological review of the prospective area is made by the Company's staff to determine the potential for oil and gas. If an area is determined to have promise the Company will attempt to acquire oil and gas leases over the prospective area. The Company will then acquire geophysical data (generally seismic and gravity data) to further evaluate the area. After the evaluation of the geophysical data, if the area appears to contain significant accumulations of oil and gas in the Company's opinion for the area, the Company will market a drilling program to outside investors covering the Company's leases or sell the leases with the Company retaining an overriding royalty interest. Significant accumulations cannot be quantified because it depends on many factors such as how much it costs to drill

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

and complete wells in a certain area, how close the wells are to pipelines, what the price of oil or gas is, how accessible the area is, whether the project is a developmental or wildcat project, what the cost of oil and gas leases are in an area, the type of return investors are seeking at that time in the different exploration areas, and many other geological, geophysical and other considerations.

When the Company markets a drilling program it sells a portion of its oil and gas leases over the prospect area along with obtaining a drilling commitment from the parties purchasing the leases to drill a well on the prospect area. A drilling program will generally allow the Company to recoup its investment in the area with the Company also retaining an ongoing interest in new wells to be drilled in the area.

The Company markets its drilling programs to other industry partners. Drilling programs have been marketed by placing ads in industry journals, attending trade shows and by traveling to the offices of prospective partners. In the past, the Company has sold drilling programs to major oil companies and large independents and occasionally to individuals.

Leases acquired for resale have been acquired in areas determined to be prospective by the Company's staff. An area is determined to be prospective based on a geological review of the area, drilling in the area and review of the Company's geophysical data if available. Usually resale leases are acquired for the purpose of selling at a profit along with the Company retaining an overriding royalty interest in the leases sold.

RECENT DEVELOPMENTS:

Since September 1999, the Company has been focusing on obtaining prospects for the exploration of oil and gas and continuing the operations of its current producing oil and gas properties. During the last fiscal year ended September 30th, 2003, the Company has sold approximately two-thirds of its overpressured gas play leaving 13,189.16 acres left to sell in the play. The Company is currently marketing the remaining acreage to outside industry partners and individuals for development. The prospect could contain significant natural gas reserves.

The Company has also sold its Emigrant Gap Prospect in Natrona County, Wyoming, which it intends to drill prior to December 31, 2004. The Company is presently marketing a coal bed methane prospect in Carbon County, Wyoming, the Yankee Mine West Prospect in White Pine County Nevada and an oil prospect in Nye County, Nevada. During the last year the Company has decreased the amount of undeveloped oil and gas leases it holds from 100,815 gross acres on 9/30/02 to 59,018 gross acres on 9/30/03 primarily through the sale of its overpressured gas acreage.

The Company has been involved in a 3D seismic project in Texas that will continue to cause the Company to expend funds during the current year in prospective drilling on prospects identified on 3D seismic. The Company owns a 1.65% working interest in the 3D seismic venture in Texas and already has drilled four wells on the 3D seismic venture. One of the wells appears to be a producer, two are dry holes and the other appears to be productive but will need to be redrilled.

FINANCIAL AND OTHER INFORMATION

The audited financial statements regarding the Company for the fiscal year ended September 30, 2002, are presented in the Appendix following the proxy statement. A summary of selected financial data, and the information contained in the disclosures entitled " Management's Discussion and Analysis of Financial Condition and Results of Operations", are presented below.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

RESULTS OF OPERATIONS -2003 Compared to 2002

Total revenue for fiscal year 2003 was \$1,929,279 as compared to total revenue for fiscal year 2002 of \$909,321. The increase in revenue was due primarily to an increase in natural gas and crude oil prices from fiscal 2002 as compared to fiscal 2003 and \$566,356 in project and lease sales income (including the sale of two-thirds of the overpressured gas project). Total oil and gas sales (including royalty revenue) increased from \$908,821 to \$1,360,985. Average gas prices increased 103% from \$2.01 MCF (2002) to \$4.08 MCF (2003). Average oil prices increased 42 percent from \$18.65 per barrel in 2002 to \$26.43 per barrel in 2003.

Project and lease sales income increased from \$0 in 2002 to \$566,365 in 2003 as the Company sold two-thirds of its overpressured gas project and a 3500 acre coalbed methane lease block.

Costs of operations increased from \$425,743 to \$632,264. This item includes all well operating expenses and any amounts paid to employees and other interest owners for their interest in producing properties. Increased disbursements to interest owners due to higher product prices accounted for most of the increase.

General and administrative costs decreased from \$341,089 in fiscal 2002 to \$316,259 in fiscal 2003 due to cost saving measures.

In fiscal 2003 loss on assets sold or abandoned increased from 0 to \$355,459. The write-off of some of the Company's producing assets in Wyoming during fiscal 2003 accounted for the increase along with the sale of the overpressured leases sold.

The Company's total stockholders' equity increased from \$831,103 to \$1,034,808. This increase in shareholder's equity during fiscal 2003 was the result of positive net income of \$177,413 and a decrease in the ESOP stock subscription receivable of \$26,292. Net income increased from a loss of \$163,810 in 2002 to income of \$177,413 in 2003.

LIQUIDITY AND CAPITAL RESOURCES

Historically the Company has funded operations primarily from earnings and bank borrowing. As of September 30, 2003 the Company had working capital of \$593,697 and an unused line of credit with Zions Bank for \$750,000. This line of credit is collateralized by all of the companies operated oil and gas properties. The line of credit bears interest at prime rate plus 1.0%. The line of credit with Zions Bank matured on December 31, 2001, and was renewed for a two year period ending December 31, 2003. As of September 30, 2002 and as of September 30, 2003, the amount on the credit line was \$654,158 and \$0 respectively.

During fiscal 2003 cash provided in operating activities was \$967,385 while cash used for investing activities was for \$32,158. There was a net increase in cash of \$281,069, as cash increased from \$90,458 to \$371,527. The increase in cash for operating activities was primarily the result of project and lease sale income and increased product prices.

OIL AND GAS PROPERTIES

The Company, as of the date of this filing, is the owner of several oil and gas properties located throughout the Rocky Mountain Region. The Company operates four properties in Utah, three in Wyoming and one in Colorado. The standardized measure of discounted future net cash flows (before income taxes) of all the Company's properties as of September 30, 2003 was \$3,416,961.

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

INCOME TAXES

The Company's present net operating loss carryforward of approximately \$1,988,000 arises primarily from operations for the year ended September 30th, 1997. Carryforwards of net operating losses for years prior to the year ended September 30th, 1997 were completely used for tax purposes to offset net income for the year ended September 30th, 1999. The present net operating loss carry-forward of the Company will begin to expire in the year 2012.

The Company does not anticipate that it will have taxable income during the carryforward period because of the applicable net operating loss.

THE COMPANY UNDERTAKES TO PROMPTLY FURNISH (WITHOUT CHARGE EXCEPT AS TO THE EXHIBITS IF REQUESTED THAT INCLUDE ARTICLES OF INCORPORATION, BYLAWS, LETTER FROM PETROLEUM ENGINEER AND FINANCING AGREEMENTS WITH ZIONS BANK) A COPY OF ITS FORM 10-KSB FILED PREVIOUSLY WITH THE SECURITIES AND EXCHANGE COMMISSION, TO ANY SHAREHOLDER OF RECORD UPON WRITTEN REQUEST, WHICH SHALL ALSO INCLUDE A GOOD FAITH REPRESENTATION THAT, AS OF JUNE 11TH, 2003, THE PERSON MAKING THE REQUEST WAS THE BENEFICIAL OWNER OF COMMON STOCK OF THE COMPANY ENTITLED TO VOTE AT THE ANNUAL MEETING. NOTES TO FINANCIAL STATEMENTS

September 30, 2003 and 2002

Note 1 - Organization and Summary of Significant Accounting Policies

Organization

The Company is incorporated under the laws of the state of Utah and is primarily engaged in the business of acquiring, developing, producing and selling oil and gas properties to companies located in the continental United States.

Cash and Cash Equivalents

For purposes of the statement of cash flows, the Company considers all highly liquid investments with a maturity of three months or less to be cash equivalents.

Concentration of Credit Risk

The Company maintains its cash in bank deposit accounts, which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts. The Company believes it is not exposed to any significant credit risk on cash and cash equivalents.

Resale Leases

The Company capitalizes the costs of acquiring oil and gas leaseholds held for resale, including lease bonuses and any advance rentals required at the time of assignment of the lease to the Company. Advance rentals paid after assignment are charged to expense as carrying costs in the period incurred. Costs of oil and gas leases held for resale are valued at lower of cost or net realizable value and included in current assets since they could be sold within one year, although the holding period of individual leases may be in excess of one year. The cost of oil and gas leases sold is determined on a specific identification basis.

Oil and Gas Producing Activities

The Company utilizes the successful efforts method of accounting for its oil and gas producing activities. Under this method, all costs associated with productive exploratory wells and productive or nonproductive development wells are capitalized while the costs of nonproductive exploratory wells are expensed.

F-7

PIONEER OIL AND GAS
NOTES TO FINANCIAL STATEMENTS
September 30, 2003 and 2002

Note 1 - Organization and Summary of Significant Accounting Policies (continued)

Oil and Gas Producing Activities (continued)

If an exploratory well finds oil and gas reserves, but a determination that such reserves can be classified as proved is not made after one year following completion of drilling, the costs of drilling are charged to operations.

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

Indirect exploratory expenditures, including geophysical costs and annual lease rentals are expensed as incurred. Unproved oil and gas properties that are individually significant are periodically assessed for impairment of value and a loss is recognized at the time of impairment by providing an impairment allowance. Other unproved properties are amortized based on the Company's experience of successful drillings and average holding period. Capitalized costs of producing oil and gas properties after considering estimated dismantlement and abandonment costs and estimated salvage values, are depreciated and depleted by the units-of-production method. Support equipment and other property and equipment are depreciated over their estimated useful lives.

On the sale or retirement of a complete unit of a proved property, the cost and related accumulated depreciation, depletion and amortization are eliminated from the property accounts, and the resultant gain or loss is recognized. On the retirement or sale of a partial unit of proved property, the cost is charged to accumulated depreciation, depletion and amortization with a resulting gain or loss recognized in income.

On the sale of an entire interest in an unproved property for cash or cash equivalent, gain or loss on the sale is recognized, taking into consideration the amount of any recorded impairment if the property has been assessed individually. If a partial interest in an unproved property is sold, the amount received is treated as a reduction of the cost of the interest retained.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation is provided using the straight-line method over the estimated useful lives of the assets. Expenditures for maintenance and repairs are expensed when incurred and betterments are capitalized. When assets are sold, retired or otherwise disposed of the applicable costs and accumulated depreciation, depletion and amortization are removed from the accounts, and the resulting gain or loss is reflected in operations.

F-8

PIONEER OIL AND GAS NOTES TO FINANCIAL STATEMENTS September 30, 2003 and 2002

Note 1 - Organization and Summary of Significant Accounting Policies (continued)

Income Taxes

Deferred income taxes arise from temporary differences resulting from income and expense items reported for financial accounting and tax purposes in different periods. Deferred taxes are classified as current or noncurrent, depending on the classification of the assets and liabilities to which they relate. Deferred taxes arising from temporary differences that are not related to an asset or liability are classified as current or noncurrent depending on the periods in which the temporary differences are expected to reverse. Temporary differences result primarily from a net operating loss carryforward, intangible drilling costs and depletion.

Earnings Per Share

The computation of basic earnings per common share is based on the weighted average number of shares outstanding during each year.

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

The computation of diluted earnings per common share is based on the weighted average number of shares outstanding during the year plus the common stock equivalents which would arise from the exercise of stock options and warrants outstanding using the treasury stock method and the average market price per share during the year. Common stock equivalents are not included in the diluted earnings per share calculation when their effect is antidilutive.

Revenue Recognition

Revenue is recognized from oil sales at such time as the oil is delivered to the buyer. Revenue is recognized from gas sales when the gas passes through the pipeline at the well head. Revenue from overriding royalty interests is recognized when earned.

The Company does not have any gas balancing arrangements.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions primarily related to oil and gas property reserves and prices, that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 3 - Note Payable

The Company has a bank revolving line-of-credit agreement, which allows the Company to borrow a maximum amount of \$750,000. This agreement bears interest at the bank's prime rate plus 1 percent and is secured by accounts receivable and producing properties. The line-of-credit matures on December 31, 2003 and had an

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

outstanding balance at September 30, 2003 and 2002 of \$0 and \$654,158, respectively.

Note 4 - Stock Subscription Receivable

The stock subscription receivable consists of a six percent receivable due from the Company's ESOP. The receivable is reduced every six months by the amount of the obligation owed by the Company to the ESOP, less interest (see Note 10). During the years ended September 30, 2003 and 2002, the Company recognized \$15,104 and \$16,016 of interest income related to this note.

F-10

PIONEER OIL AND GAS NOTES TO FINANCIAL STATEMENTS September 30, 2003 and 2002

Note 5 - Income Taxes

The provision for income taxes differs from the amount computed at federal statutory rates as follows:

		Year Sep 2003 -----
Income tax provision (benefit) at statutory rate	\$	45,000
Change in valuation allowance		(45,000) -----
	\$	-

Deferred tax assets (liabilities) are comprised of the following:

		Sep 2003 -----
Intangible drilling costs and depletion	\$	15,000
Net operating loss carryforwards		696,000
AMT credit carryforward		5,000 -----
		716,000 -----
Valuation allowance		(716,000) -----
	\$	- =====

A valuation allowance has been recorded for the full amount of the deferred tax asset because it is more likely than not that the deferred tax asset will not be realized.

As of September 30, 2003, the Company had net operating loss carryforwards of approximately \$1,988,000. These carryforwards begin to expire in 2012. If substantial changes in the Company's ownership should occur there would be an

Edgar Filing: PIONEER OIL & GAS - Form DEF 14A

annual limitation of the amount of NOL carryforward which could be utilized. Also, the ultimate realization of these carryforwards is due, in part, on the tax law in effect at the time and future events that cannot be determined.

F-11

PIONEER OIL AND GAS NOTES TO FINANCIAL STATEMENTS September 30, 2003 and 2002

Note 6 - Sales to Major Customers

The Company had sales to major customers during the years ended September 30, 2003 and 2002, which exceeded ten percent of total sales as follows:

		September 30, 2003	2002
		-----	-----
Company A	\$	420,000	140,000
Company B		414,000	306,000
Company C		134,000	88,000
Company D		115,000	90,000

Note 7 - Related Party Transactions

At September 30, 2003 and 2002 there was \$17,917 and \$12,236, respectively, included in accounts payable due from/to related parties as a result of these activities. The Company also is the general manager in certain limited partnerships and the operator for certain joint ventures formed for the purpose of oil and gas exploration and development.

The Company leases its office space from certain officers of the Company. The lease requires monthly rental payments of \$2,500 plus all expenses pertaining to the office space and expires in September 2005. Future minimum lease payments for the next two years are \$30,000 each year. Rent expense for the years ended September 30, 2003 and 2002 was approximately \$30,000 each year.

The Company has a stock subscription receivable from the ESOP (See Note 4).

Note 8 - Supplemental Disclosures of Cash Flow Information

Operations reflect actual amounts paid for interest and income taxes approximately as follows:

NOTES TO FINANCIAL STATEMENTS September 30, 2003 and 2002

Note 9 - Fair Value of Financial Instruments

The Company's financial instruments consist of cash, receivables, payables and a note payable. The carrying amount of cash, receivables and payables approximates fair value because of the short-term nature of these items. The carrying amount of the note payable approximates fair value as the note bears interest at floating market interest rates.

Note 10 - Stock Options

The Company has granted stock options to the members of the Board of Directors and the officers and employees of the Company to purchase shares of the Company's common stock. The exercise price of the options and warrants is equal to or in excess of the fair market value of the stock on the date of grant. At September 30, 2003 and 2002, the Company had 420,000 options outstanding.

Information related to these options at September 30, 2003 is as follows:

-----	-----	-----	-----	-----	-----
\$.20	420,000	7.9	\$.20	420,000	\$.20

Employee Stock Ownership Plan

The Company has adopted a noncontributory employee stock ownership plan (ESOP) covering all full-time employees who have met certain service requirements. It provides for discretionary contributions by the Company as determined annually by the Board of Directors, up to the maximum amount permitted under the Internal Revenue Code. The plan has received IRS approval under Section 401(A) and 501(A) of the Internal Revenue Code. Pension expense charged to operations for the years ended September 30, 2003 and 2002 was \$41,396 and \$27,597 respectively. Employment Agreements

present value, discounted at a 10% annual rate, from the Company's proved reserves of oil, condensate and gas. The estimated future net revenue is computed by applying the year end prices of oil and gas (including price changes that are fixed and determinable) and current costs of development production to estimated future production assuming continuation of existing economic conditions. The values expressed are estimates only, without actual long-term production to base the production flows, and may not reflect realizable values or fair market values of the oil and gas ultimately extracted and recovered. The ultimate year of realization is also subject to accessibility of petroleum reserves and the ability of the Company to market the products.
