Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 or 15 (d) OF THE SECURITIES EXCHANGE ACT OF \mathring{y}_{1934} 1934

For the Quarterly Period Ended March 31, 2016

...TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to Commission File Number 001-03970

HARSCO CORPORATION

(Exact name of registrant as specified in its charter)

23-1483991 Delaware

(State or other jurisdiction of incorporation or organization) (I.R.S. employer identification number)

350 Poplar Church Road, Camp Hill, Pennsylvania 17011 (Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code 717-763-7064

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES \(\xi\) NO o Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES ý NO o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ý Accelerated filer o

Non-accelerated filer o

(Do not check if a smaller reporting company)

Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). YES o NO ý

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

Class Outstanding at April 29, 2016

Common stock, par value \$1.25 per share 80,097,958

HARSCO CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. Basis of Presentation

Harsco Corporation (the "Company") has prepared these unaudited condensed consolidated financial statements based on Securities and Exchange Commission rules that permit reduced disclosure for interim periods. In the opinion of management, all adjustments (all of which are of a normal recurring nature) that are necessary for a fair statement are reflected in the unaudited condensed consolidated financial statements. The December 31, 2015 Condensed Consolidated Balance Sheet information contained in this Quarterly Report on Form 10-Q was derived from the 2015 audited consolidated financial statements, but does not include all disclosures required by accounting principles generally accepted in the U.S. ("U.S. GAAP") for an annual report. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements, including the notes thereto, included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015.

Operating results and cash flows for the three months ended March 31, 2016 are not indicative of the results that may be expected for the year ending December 31, 2016.

Reclassifications

Certain reclassifications have been made to prior year amounts to conform with current year classifications.

2. Recently Adopted and Recently Issued Accounting Standards

The following accounting standards have been adopted in 2016:

On January 1, 2016, the Company adopted changes issued by the Financial Accounting Standards Board ("FASB")

related to reporting extraordinary and unusual items. The changes simplified income statement presentation by eliminating the concept of extraordinary items. The changes became effective for the Company on January 1, 2016. The adoption of these changes did not have an impact on the Company's condensed consolidated financial statements. On January 1, 2016, the Company adopted changes issued by the FASB related to consolidation. The changes updated consolidation analysis and affected reporting entities that are required to evaluate whether they should consolidate certain legal entities. The changes became effective for the Company on January 1, 2016. The adoption of these changes did not have a material impact on the Company's condensed consolidated financial statements. On January 1, 2016, the Company adopted changes issued by the FASB related to simplifying the presentation of debt issuance costs. The changes required that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct reduction from the carrying amount of that debt liability. In August 2015, the FASB added guidance about the presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements. The changes became effective for the Company on January 1, 2016. The adoption of these changes resulted in the reclassification of approximately \$10 million in deferred financing costs from Other assets to Long-term debt on the Company's consolidated balance sheets for all periods presented.

On January 1, 2016, the Company adopted changes issued by the FASB related to the determination of whether a cloud computing arrangement includes a software license. If a cloud computing arrangement is determined to include a software license, then the customer accounts for the software license element consistent with the acquisition of other software licenses. If the arrangement is determined not to contain a software license, the customer should account for the arrangement as a service contract. The changes became effective for the Company on January 1, 2016. The adoption of these changes did not have a material impact on the Company's condensed consolidated financial statements.

On January 1, 2016, the Company adopted changes issued by the FASB simplifying the accounting for measurement period adjustments for business combinations. The changes resulted in an acquirer no longer being required to retrospectively reflect adjustments to provisional amounts during the measurement period as if they were recognized as of the acquisition date. Instead the acquirer would record the effect of the change to the provisional amounts during the measurement period in which the adjustment is identified. The changes also required additional disclosure related to such measurement period adjustments. The changes became effective for the Company on January 1, 2016. The

adoption of these changes did not have an impact on the Company's condensed consolidated financial statements; however in the future will have an effect on how the Company reports adjustments to provisional amounts during the measurement period.

The following accounting standards have been issued and become effective for the Company at a future date: In May 2014, the FASB issued changes related to the recognition of revenue from contracts with customers. The changes clarify the principles for recognizing revenue and develop a common revenue standard. The core principle of the changes is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The changes also require additional disclosures related to revenue recognition. In July 2015, the FASB deferred the effective date of these changes by one year, but will permit entities to adopt one year earlier. In March 2016, the FASB amended and clarified certain matters related to principal-versus-agent considerations. The changes become effective for the Company on January 1, 2018. Management is currently evaluating these changes. In August 2014, the FASB issued changes related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. The changes become effective for the Company for the annual period ending December 31, 2016 and interim periods thereafter. Management has evaluated these changes and does not expect these changes will have a material impact on the Company's condensed consolidated financial statements.

In July 2015, the FASB issued changes related to the simplification of the measurement of inventory. The changes require entities to measure most inventory at the lower of cost and net realizable value, thereby simplifying the current guidance under which an entity must measure inventory at the lower of cost or market. The changes do not apply to inventories that are measured using either the last-in, first-out method or the retail inventory method. The changes become effective for the Company on January 1, 2017. Management has determined that these changes will not have a material impact on the Company's condensed consolidated financial statements.

In November 2015, the FASB issued changes that require deferred tax assets and liabilities to be classified as noncurrent in a classified statement of financial position. The changes apply to all entities that present a classified statement of financial position. The current requirement that deferred tax assets and liabilities of a tax-paying component of an entity be offset and presented as a single amount is not affected. The changes become effective for the Company on January 1, 2017. Had these changes been adopted, the Company's working capital would have decreased by approximately \$41 million and \$38 million at March 31, 2016 and December 31, 2015, respectively. In February 2016, the FASB issued changes in accounting for leases. The changes introduce a lessee model that brings most leases on the balance sheet. The changes also align many of the underlying principles of the new lessor model with those in the FASB's new revenue recognition standard. Furthermore, the changes address other concerns related to the current leases model such as eliminating the requirement in current guidance for an entity to use bright-line tests in determining lease classification. The changes also require lessors to increase the transparency of their exposure to changes in value of their residual assets and how they manage that exposure. The changes become effective for the Company on January 1, 2019. The Company is currently evaluating the impact of these changes on its consolidated financial statements.

In March 2016, the FASB issued changes related to the simplification of several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. The changes become effective for the Company on January 1, 2017. The Company is currently evaluating the impact of these changes on its consolidated financial statements.

3. Accounts Receivable and Inventories

Accounts receivable consist of the following:

(In thousands)	March 31	December 3	1
(In thousands)	2016	2015	
Trade accounts receivable	\$268,716	\$ 280,526	
Less: Allowance for doubtful accounts	(16,056)	(25,649)
Trade accounts receivable, net	\$252,660	\$ 254,877	

Other receivables (a) \$19,458 \$30,395

(a) Other receivables include insurance claim receivables, employee receivables, tax claim receivables, receivables from affiliates and other miscellaneous receivables not included in Trade accounts receivable, net.

Table of Contents

The decrease in Allowance for doubtful accounts in 2016 is due to the write-off of previously reserved accounts receivable balances.

The provision for doubtful accounts related to trade accounts receivable was as follows:

Three Months Ended March 31 2016 2015

(In thousands)

Provision for doubtful accounts related to trade accounts receivable \$(146) \$196

Inventories consist of the following:

March 31 December 31 (In thousands) 2016 2015 \$35,694 \$ 32,586 Finished goods Work-in-process 98,500 86,745 Raw materials and purchased parts 73,215 70,755 Stores and supplies 25,926 26,881 **Inventories** \$233,335 \$ 216,967

4. Equity Method Investments

In November 2013, the Company sold the Company's Harsco Infrastructure Segment into a strategic venture with Clayton, Dubilier & Rice ("CD&R") as part of a transaction that combined the Harsco Infrastructure Segment with Brand Energy & Infrastructure Services, Inc., which CD&R simultaneously acquired (the "Infrastructure Transaction"). As a result of the Infrastructure Transaction, the Company retained an equity interest in Brand Energy & Infrastructure Service, Inc. and Subsidiaries ("Brand" or the "Infrastructure strategic venture") which is accounted for as an equity method investment in accordance with U.S. GAAP.

As part of the Infrastructure Transaction, the Company is required to make a quarterly payment to the Company's partner in the Infrastructure strategic venture, either (at the Company's election) (i) in cash, with total payments to equal approximately \$22 million per year on a pre-tax basis (approximately \$15 million per year after-tax), or (ii) in kind, through the transfer of approximately 3% of the Company's ownership interest in the Infrastructure strategic venture on an annual basis (the "unit adjustment liability"). The Company will recognize the change in fair value to the unit adjustment liability each period until the Company is no longer required to make these payments or chooses not to make these payments. The change in fair value to the unit adjustment liability is a non-cash expense.

In March 2016, the Company elected not to make the quarterly cash payments to the Company's partner in the Infrastructure strategic venture for the remainder of 2016. Instead, the Company will transfer approximately 3% of its ownership interest in satisfaction of the Company's 2016 obligation related to the unit adjustment liability. As a result of not making the quarterly cash payments for 2016, the Company's ownership interest in the Infrastructure strategic venture decreased to approximately 26% at March 31, 2016 compared to approximately 29% at December 31, 2015, and the value of the unit adjustment liability was updated to reflect this change. Accordingly, the book value of the Company's equity method investment in Brand decreased by \$29.4 million and the unit adjustment liability decreased by \$19.1 million. The resulting net loss of \$10.3 million was recognized in the Condensed Consolidated Statement of Operations caption Change in fair value to the unit adjustment liability and loss on dilution of equity method investment. This net loss is non-cash expense.

For the three months ended March 31, 2016 and 2015, the Company recognized \$1.9 million and \$2.2 million, respectively, of change in fair value to the unit adjustment liability, exclusive of the fair value adjustment resulting from the decision not to make the quarterly payments in 2016, in the Condensed Consolidated Statement of

Operations caption Change in fair value to the unit adjustment liability and loss on dilution of equity method investment. The Condensed Consolidated Balance Sheets as of March 31, 2016 and December 31, 2015 include balances related to the unit adjustment liability of \$62.7 million and \$79.9 million, respectively, in the current and non-current captions, Unit adjustment liability. A reconciliation of beginning and ending balances related to the unit adjustment liability is included in Note 11, Derivative Instruments, Hedging Activities and Fair Value.

Table of Contents

The Company will continue to evaluate whether to make payments in cash or in kind in 2017 and beyond based upon performance of the Infrastructure strategic venture and the Company's liquidity and capital resources. Should the Company decide not to make additional cash payments in 2017 and beyond, the value of both the equity method investment in Brand and the related unit adjustment liability may be further impacted, and the change may be reflected in earnings in that period.

The book value of the Company's equity method investment in Brand at March 31, 2016 and December 31, 2015 was \$227.8 million and \$250.1 million, respectively. The Company records the Company's proportionate share of Brand's net income or loss one quarter in arrears.

Brand's results of operations for the three months ended December 31, 2015 and 2014 are summarized as follows:

(In thousands)	Three Months Ended December 31 2015	Months Ended December 31 2014
Net revenues	\$800,752	\$804,199
Gross profit	180,577	197,241
Net income attributable to Brand Energy & Infrastructure Services, Inc. and Subsidiaries	11,060	14,217
Harsco's equity in income of Brand	3,175	4,083

Balances related to transactions between the Company and Brand are as follows:

 March 31
 December 31

 2016
 2015

 Balances due from Brand
 \$ 1,942
 \$ 1,557

 Balances due to Brand
 21,600
 21,407

The remaining balances between the Company and Brand, at March 31, 2016, relate primarily to transition services and the funding of certain transferred defined benefit pension plan obligations through 2018. There is not expected to be any significant level of revenue or expense between the Company and Brand on an ongoing basis once all aspects of the Infrastructure Transaction have been finalized.

5. Property, Plant and Equipment

Property, plant and equipment consists of the following:

(In they cando)	March 31	December 31
(In thousands)	2016	2015
Land	\$11,205	\$ 10,932
Land improvements	15,314	15,277
Buildings and improvements	191,286	191,356
Machinery and equipment	1,688,499	1,661,914
Construction in progress	37,359	36,990
Gross property, plant and equipment	1,943,663	1,916,469
Less: Accumulated depreciation	(1,387,877)	(1,352,434)
Property, plant and equipment, net	\$555,786	\$ 564,035

6. Goodwill and Other Intangible Assets

The following table reflects the changes in carrying amounts of goodwill by segment for the three months ended March 31, 2016:

	Harsco			
	Metals	Harsco	Harsco	Consolidated
(In thousands)	&	Industrial	Rail	
	Minerals	Segment	Segment	Totals
	Segment			
Balance at December 31, 2015	\$380,761	\$ 6,806	\$12,800	\$ 400,367
Changes to goodwill	_	33	226	259
Foreign currency translation	2,033	_		2,033
Balance at March 31, 2016	\$382,794	\$ 6,839	\$13,026	\$ 402,659

The Company's 2015 annual goodwill impairment testing did not result in any impairment of the Company's goodwill. The fair value of the Harsco Metals & Minerals Segment exceeded the carrying value by approximately 15%. The Company tests for goodwill impairment annually or more frequently if indicators of impairment exist, or if a decision is made to dispose of a business. The Company performs the annual goodwill impairment test as of October 1 and monitors for triggering events on an ongoing basis. The Company determined that, as of March 31, 2016, no interim goodwill impairment testing was necessary. There can be no assurance that the Company's annual goodwill impairment testing will not result in a charge to earnings. Should the Company's analysis indicate further degradation in the overall markets served by the Harsco Metals & Minerals Segment, impairment losses for associated assets could be required. Any impairment could result in the write-down of the carrying value of goodwill to its implied fair value. Intangible assets included in the captions, Other current assets and Intangible assets, net, on the Condensed Consolidated Balance Sheets consist of the following:

	March 31, 2016		December 31, 2015	
(In thousands)	Gross Carraingumulated		Gross Carraingumulated	
(III tilousands)	Amount	Amortization	Amount	Amortization
Customer related	\$153,667	\$ 113,175	\$153,287	\$ 111,227
Non-compete agreements	1,098	1,098	1,092	1,092
Patents	5,876	5,530	5,882	5,495
Technology related	25,895	24,060	25,559	23,089
Trade names	8,310	4,303	8,303	4,194
Other	8,768	4,875	8,701	4,669
Total	\$203,614	\$ 153,041	\$202,824	\$ 149,766

Amortization expense for intangible assets was as follows:

Three Months Ended March 31 2016 Amortization expense for intangible assets \$2,105 \$2,137

The estimated amortization expense for the next five fiscal years based on current intangible assets is as follows: 2016 2017 2018 2019

(In thousands) 2020 Estimated amortization expense (a) \$8,000 \$5,500 \$5,250 \$4,750 \$4,500

(a) These estimated amortization expense amounts do not reflect the potential effect of future foreign currency exchange fluctuations.

7. Employee Benefit Plans

(In thousands)

	Three Months Ended			
	March 3	1		
Defined Benefit Pension Plans Net Periodic Pension Cost	U.S. Pla	ns	Internati	onal Plans
(In thousands)	2016	2015	2016	2015
Service cost	\$946	\$722	\$404	\$438
Interest cost	2,545	3,089	7,123	9,189
Expected return on plan assets	(3,601)	(4,203)	(11,463)	(12,674)
Recognized prior service costs	16	20	44	49
Recognized loss	1,372	1,230	3,218	4,235
Defined benefit pension plans net periodic pension cost	\$1,278	\$858	\$(674)	\$1,237

The Company has changed the method utilized to estimate the 2016 service cost and interest cost components of net periodic pension cost ("NPPC") for defined benefit pension plans. The more precise application of discount rates for measuring both service costs and interest costs employs yield curve spot rates on a year-by-year expected cash flow basis, using the same yield curves that the Company has previously used. This change in method decreased the Company's NPPC by approximately \$2 million for the three months ended March 31, 2016 compared to what NPPC would have been under the prior method. For additional information related to this change in method, please refer to Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations," of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Table of Contents

Three Months
Ended
Company Contributions
(In thousands)
Defined benefit pension plans (U.S.)
Defined benefit pension plans (International)
Multiemployer pension plans
Defined contribution pension plans
2,826 3,448

The Company's estimate of expected contributions to be paid during the remainder of 2016 for the U.S. and international defined benefit plans are \$1.6 million and \$9.7 million, respectively.

8. Income Taxes

The income tax benefit related to continuing operations for the three months ended March 31, 2016 was \$2.2 million. Income tax expense related to continuing operations for the three months ended March 31, 2015 was \$12.9 million.

An income tax benefit from an uncertain tax position may be recognized when it is more likely than not that the position will be sustained upon examination, based on technical merits, including resolutions of any related appeals or litigation processes. The unrecognized income tax benefit at March 31, 2016 was \$6.2 million, including interest and penalties. Within the next twelve months, it is reasonably possible that no unrecognized income tax benefits will be recognized upon settlement of tax examinations and the expiration of various statutes of limitations.

9. Commitments and Contingencies

Environmental

The Company is involved in a number of environmental remediation investigations and cleanups and, along with other companies, has been identified as a "potentially responsible party" for certain waste disposal sites. While each of these matters is subject to various uncertainties, it is probable that the Company will agree to make payments toward funding certain of these activities and it is possible that some of these matters will be decided unfavorably to the Company. The Company has evaluated its potential liability, and its financial exposure is dependent upon such factors as the continuing evolution of environmental laws and regulatory requirements, the availability and application of technology, the allocation of cost among potentially responsible parties, the years of remedial activity required and the remediation methods selected. The Company did not have any material accruals or record any material expenses related to environmental matters during the periods presented.

The Company evaluates its liability for future environmental remediation costs on a quarterly basis. Although actual costs to be incurred at identified sites in future periods may vary from the estimates (given inherent uncertainties in evaluating environmental exposures), the Company does not expect that any costs that are reasonably possible to be incurred by the Company in connection with environmental matters in excess of the amounts accrued would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Brazilian Tax Disputes

The Company is involved in a number of tax disputes with federal, state and municipal tax authorities in Brazil. These disputes are at various stages of the legal process, including the administrative review phase and the collection action phase, and include assessments of fixed amounts of principal and penalties, plus interest charges that increase at statutorily determined amounts per month and are assessed on the aggregate amount of the principal and penalties. In addition, the losing party at the collection action or court of appeals phase could be subject to a charge to cover

statutorily mandated legal fees, which are generally calculated as a percentage of the total assessed amounts due, inclusive of penalty and interest. A large number of the claims relate to value-added ("ICMS") services and social security ("INSS") tax disputes. The largest proportion of the assessed amounts relate to ICMS claims filed by the State Revenue Authorities from the State of São Paulo, Brazil (the "SPRA"), encompassing the period from January 2002 to May 2005.

In October 2009, the Company received notification of the SPRA's final administrative decision regarding the levying of ICMS in the State of São Paulo in relation to services provided to a customer in the State between January 2004 and May 2005. As of March 31, 2016, the principal amount of the tax assessment from the SPRA with regard to this case is approximately \$2 million, with penalty, interest and fees assessed to date increasing such amount by an additional \$20 million. Any change in the aggregate amount since the Company's last Annual Report on Form 10-K for the year ended December 31, 2015 is due to an increase in assessed interest and statutorily mandated legal fees for the period as well as foreign currency translation.

Table of Contents

Another ICMS tax case involving the SPRA refers to the tax period from January 2002 to December 2003, and is still pending at the administrative phase. The aggregate amount assessed by the tax authorities in August 2005 was \$7.0 million (the amounts with regard to this claim are valued as of the date of the assessment since it has not yet reached the collection phase), composed of a principal amount of \$1.7 million, with penalty and interest assessed through that date increasing such amount by an additional \$5.3 million. All such amounts include the effect of foreign currency translation.

The Company continues to believe it is not probable that it will incur a loss for these assessments by the SPRA. The Company also continues to believe that sufficient coverage for these claims exists as a result of the Company's customer's indemnification obligations and such customer's pledge of assets in connection with the October 2009 notice, as required by Brazilian procedure.

The Company intends to continue its practice of vigorously defending itself against these tax claims under various alternatives, including judicial appeal. The Company will continue to evaluate its potential liability with regard to these claims on a quarterly basis; however, it is not possible to predict the ultimate outcome of these tax-related disputes in Brazil. No loss provision has been recorded in the Company's condensed consolidated financial statements for the disputes described above because the loss contingency is not deemed probable, and the Company does not expect that any costs that are reasonably possible to be incurred by the Company in connection with Brazilian tax disputes would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Brazilian Labor Disputes

The Company is subject to collective bargaining and individual labor claims in Brazil through the Harsco Metals & Minerals Segment which allege, among other things, the Company's failure to pay required amounts for overtime and vacation at certain sites. The Company is vigorously defending itself against these claims; however, litigation is inherently unpredictable, particularly in foreign jurisdictions. While the Company does not currently expect that the ultimate resolution of these claims will have a material adverse effect on the Company's financial condition, results of operations or cash flows, it is not possible to predict the ultimate outcome of these labor-related disputes.

The Company is continuing to review all known labor claims and as of March 31, 2016 and December 31, 2015, the Company has established reserves of \$7.4 million and \$6.9 million, respectively, on the Company's Condensed Consolidated Balance Sheets for amounts considered to be probable and estimable. As the Company continues to evaluate these claims and takes actions to address them, the amount of established reserves may be impacted.

Customer Disputes

The Company, through its Harsco Metals & Minerals Segment, may, in the normal course of business, become involved in commercial disputes with subcontractors or customers.

During the first quarter of 2015, a rail grinder manufactured by the Company's Harsco Rail Segment and operated by a subcontractor caught fire, causing a customer to incur monetary damages. There is a legal action pending to determine the cause of the incident. Depending on the cause of the fire and the extent of insurance coverage, the Company's results of operations and cash flows may be impacted in future periods.

Although results of operations and cash flows for a given period could be adversely affected by a negative outcome in these or other lawsuits, claims or proceedings, management believes that the ultimate outcome of these matters will not have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Lima Refinery Litigation

On April 8, 2016, Lima Refining Company filed a lawsuit against the Company in the District Court of Harris County, Texas related to a January 2015 explosion at an oil refinery operated by Lima Refining Company. The action seeks approximately \$95 million in property damages and \$250 million in lost profits and business interruption damages. The action alleges the explosion occurred because of a defect in a heat exchange cooler manufactured by Hammco

Corporation ("Hammco") in 2009, prior to the Company's acquisition of Hammco in 2014. The Company plans to vigorously contest the allegations against it both as to liability for the accident and the amount of the claimed damages. As a result, the Company believes the situation does not result in a probable loss. The Company has both an indemnity right from the sellers of Hammco and liability insurance coverage under various primary and excess policies that the Company believes will be available, if necessary, to cover substantially all of any such liability that might ultimately be incurred in the above action.

Other

The Company is named as one of many defendants (approximately 90 or more in most cases) in legal actions in the U.S. alleging personal injury from exposure to airborne asbestos over the past several decades. In their suits, the plaintiffs have named as defendants, among others, many manufacturers, distributors and installers of numerous types of equipment or products that allegedly contained asbestos.

The Company believes that the claims against it are without merit. The Company has never been a producer, manufacturer or processor of asbestos fibers. Any asbestos-containing part of a Company product used in the past was purchased from a supplier and the asbestos encapsulated in other materials such that airborne exposure, if it occurred, was not harmful and is not associated with the types of injuries alleged in the pending actions.

At March 31, 2016, there were 17,134 pending asbestos personal injury actions filed against the Company. Of those actions, 16,811 were filed in the New York Supreme Court (New York County), 125 were filed in other New York State Supreme Court Counties and 198 were filed in courts located in other states.

The complaints in most of those actions generally follow a form that contains a standard damages demand of \$20 million or \$25 million, regardless of the individual plaintiff's alleged medical condition, and without identifying any specific Company product.

At March 31, 2016, 16,752 of the actions filed in New York Supreme Court (New York County) were on the Deferred/Inactive Docket created by the court in December 2002 for all pending and future asbestos actions filed by persons who cannot demonstrate that they have a malignant condition or discernible physical impairment. The remaining 59 cases in New York County are pending on the Active or In Extremis Docket created for plaintiffs who can demonstrate a malignant condition or physical impairment.

The Company has liability insurance coverage under various primary and excess policies that the Company believes will be available, if necessary, to substantially cover any liability that might ultimately be incurred in the asbestos actions referred to above. The Company believes that a substantial portion of the costs and expenses of the asbestos actions will be paid by the Company's insurers.

In view of the persistence of asbestos litigation in the U.S., the Company expects to continue to receive additional claims in the future. The Company intends to continue its practice of vigorously defending these claims and cases. At March 31, 2016, the Company has obtained dismissal in 27,805 cases by stipulation or summary judgment prior to trial.

It is not possible to predict the ultimate outcome of asbestos-related actions in the U.S. due to the unpredictable nature of this litigation, and no loss provision has been recorded in the Company's condensed consolidated financial statements because a loss contingency is not deemed probable or estimable. Despite this uncertainty, and although results of operations and cash flows for a given period could be adversely affected by asbestos-related actions, the Company does not expect that any costs that are reasonably possible to be incurred by the Company in connection with asbestos litigation would have a material adverse effect on the Company's financial condition, results of operations or cash flows.

The Company is subject to various other claims and legal proceedings covering a wide range of matters that arose in the ordinary course of business. In the opinion of management, all such matters are adequately covered by insurance or by established reserves, and, if not so covered, are without merit or are of such kind, or involve such amounts, as would not have a material adverse effect on the financial condition, results of operations or cash flows of the Company.

Insurance liabilities are recorded when it is probable that a liability has been incurred for a particular event and the amount of loss associated with the event can be reasonably estimated. Insurance reserves have been estimated based primarily upon actuarial calculations and reflect the undiscounted estimated liabilities for ultimate losses, including claims incurred but not reported. Inherent in these estimates are assumptions that are based on the Company's history of claims and losses, a detailed analysis of existing claims with respect to potential value, and current legal and legislative trends. If actual claims differ from those projected by management, changes (either increases or decreases) to insurance reserves may be required and would be recorded through income in the period the change was determined. When a recognized liability is covered by third-party insurance, the Company records an insurance claim

receivable to reflect the covered liability. Insurance claim receivables are included in Other receivables on the Company's Condensed Consolidated Balance Sheets. See Note 1, Summary of Significant Accounting Policies, to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 for additional information on Accrued Insurance and Loss Reserves.

11. Derivative Instruments, Hedging Activities and Fair Value

Derivative Instruments and Hedging Activities

The Company uses derivative instruments, including foreign currency exchange forward contracts and cross-currency interest rate swaps ("CCIRs"), to manage certain foreign currency and interest rate exposures. Derivative instruments are viewed as risk management tools by the Company and are not used for trading or speculative purposes. All derivative instruments are recorded on the Condensed Consolidated Balance Sheets at fair value. Changes in the fair value of derivatives used to hedge foreign currency denominated balance sheet items are reported directly in earnings, along with offsetting transaction gains and losses on the items being hedged. Derivatives used to hedge forecasted cash flows associated with foreign currency commitments or forecasted commodity purchases may be accounted for as cash flow hedges, as deemed appropriate, if the criteria for hedge accounting are met. Gains and losses on derivatives designated as cash flow hedges are deferred as a separate component of equity and reclassified to earnings in a manner that matches the timing of the earnings impact of the hedged transactions. Generally, at March 31, 2016, deferred gains and losses related to asset purchases are reclassified to earnings over 10 to 15 years from the balance sheet date and those related to revenue are deferred until the revenue is recognized. The ineffective portion of all hedges, if any, is recognized currently in earnings.

Table of Contents

The fair value of outstanding derivative contracts recorded as assets and liabilities on the Condensed Consolidated Balance Sheets at March 31, 2016 and December 31, 2015 were as follows:

	Asset Derivatives		Liability Derivatives	
(In thousands)	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
March 31, 2016				
Derivatives designated as hedging instruments	:			
Foreign currency exchange forward contracts	Other current assets	\$ 271	Other current liabilities	\$ 52
Cross-currency interest rate swaps	Other assets	861	Other liabilities	_
Total derivatives designated as hedging instruments		\$ 1,132		\$ 52
Derivatives not designated as hedging instrument	ents:			
Foreign currency exchange forward contracts	Other current assets Asset Derivatives	\$ 1,574	Other current liabilities Liability Derivatives	\$ 11,326
(In thousands)	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
December 31, 2015				
Derivatives designated as hedging instruments	:			
Foreign currency exchange forward contracts	Other current assets	\$ 1,640		\$ —
Cross-currency interest rate swaps	Other assets	15,417		
Total derivatives designated as hedging instruments		\$ 17,057		\$ —
Derivatives not designated as hedging instrume. Foreign currency exchange forward contracts		\$ 4,188	Other current liabilities	\$ 1,738

All of the Company's derivatives are recorded in the Condensed Consolidated Balance Sheets at gross amounts and not offset. All of the Company's CCIRs and certain foreign currency exchange forward contracts are transacted under International Swaps and Derivatives Association ("ISDA") documentation. Each ISDA master agreement permits the net settlement of amounts owed in the event of default. The Company's derivative assets and liabilities subject to enforceable master netting arrangements did not result in a net asset or net liability at either March 31, 2016 or December 31, 2015.

The effect of derivative instruments on the Condensed Consolidated Statements of Operations and the Condensed Consolidated Statements of Comprehensive Income for the three months ended March 31, 2016 and 2015 was as follows:

Derivatives Designated as Hedging Instruments (a)

(In thousands)	Amount of Gain (Loss) Recognized in Other Comprehensi Income ("OCI") on Derivative - Effective Portion	Location of Gain Reclassified ive from Accumulated OCI into Income - Effective Portion	Amount of Gain Reclassified from Income on Derivative - Ineffective Portion and Amount CCI into Income - Effective Portion Amount Excluded from Effective Portion	Amount of Gain Recognized in Income on Derivative - Ineffective Portion and Amount Excluded from Effectiveness Testing

Foreign currency exchange forward contracts	Cost of services and products sold	\$ (6,844) \$ 4,755	

⁽a) These gains (losses) offset amounts recognized in cost of services and products sold principally as a result of intercompany or third party foreign currency exposures.

Foreign Currency Exchange Forward Contracts

The Company conducts business in multiple currencies and, accordingly, is subject to the inherent risks associated with foreign exchange rate movements. The financial position and results of operations of substantially all of the Company's foreign subsidiaries are measured using the local currency as the functional currency. Foreign currency-denominated assets and liabilities are translated into U.S. dollars at the exchange rates existing at the respective balance sheet dates, and income and expense items are translated at the average exchange rates during the respective periods. The aggregate effects of translating the balance sheets of these subsidiaries are deferred and recorded in Accumulated other comprehensive loss, which is a separate component of equity.

The Company uses derivative instruments to hedge cash flows related to foreign currency fluctuations. Foreign currency exchange forward contracts outstanding are part of a worldwide program to minimize foreign currency exchange operating income and balance sheet exposure by offsetting foreign currency exposures of certain future payments between the Company and various subsidiaries, suppliers or customers. These unsecured contracts are with major financial institutions. The Company may be exposed to credit loss in the event of non-performance by the contract counterparties. The Company evaluates the creditworthiness of the counterparties and does not expect default by them. Foreign currency exchange forward contracts are used to hedge commitments, such as foreign currency debt, firm purchase commitments and foreign currency cash flows for certain export sales transactions.

The following tables summarize, by major currency, the contractual amounts of the Company's foreign currency exchange forward contracts in U.S. dollars at March 31, 2016 and December 31, 2015. The "Buy" amounts represent the U.S. dollar equivalent of commitments to purchase foreign currencies, and the "Sell" amounts represent the U.S. dollar equivalent of commitments to sell foreign currencies. The recognized gains and losses offset amounts recognized in cost of services and products sold principally as a result of intercompany or third party foreign currency exposures.

Contracted Amounts of Foreign Currency Exchange Forward Contracts Outstanding at March 31, 2016:

Other currencies	Buy	7,981	January 2016	(38)
Total		\$ 592,414		\$ 4,090	

In addition to foreign currency exchange forward contracts, the Company designates certain loans as hedges of net investments in international subsidiaries. The Company recorded pre-tax net losses of \$3.9 million and pre-tax net gains of \$3.1 million during the three months ended March 31, 2016 and 2015, respectively, into Accumulated other comprehensive loss.

Cross-Currency Interest Rate Swaps

The Company uses CCIRs in conjunction with certain debt issuances in order to secure a fixed local currency interest rate. Under these CCIRs, the Company receives interest based on a fixed or floating U.S. dollar rate and pays interest on a fixed local currency rate based on the contractual amounts in dollars and the local currency, respectively. At maturity, there is also the payment of principal amounts between currencies. The CCIRs are recorded on the Condensed Consolidated Balance Sheets at fair value, with changes in value attributed to the effect of the swaps' interest spread and changes in the credit worthiness of the counter-parties recorded in the caption, Accumulated other comprehensive loss. Changes in value attributed to the effect of foreign currency fluctuations are recorded in the Condensed Consolidated Statements of Operations and offset currency fluctuation effects on the debt principal. The following table indicates the contractual amounts of the Company's CCIRs at March 31, 2016:

Interest Rates

(In millions) Contractual Amount Receive Pay
Maturing 2016 through 2017 \$ 5.7 Floating U.S. dollar rate Fixed rupee rate

During March 2016, the Company effected the early termination of the British pound sterling CCIR with an original maturity date of 2020. The Company received \$16.6 million in cash related to this termination. There was no gain or loss recorded on the termination as any change in value attributable to the effect of foreign currency translation was previously recognized in the Condensed Consolidated Statements of Operations.

Fair Value of Derivative Assets and Liabilities and Other Financial Instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). The Company utilizes market data or assumptions that the Company believes market participants would use in valuing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique.

The fair value hierarchy distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs), and (2) an entity's own assumptions about market participant assumptions based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which give the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

The three levels of the fair value hierarchy are described below:

Level 1—Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3—Inputs that are both significant to the fair value measurement and unobservable.

In instances in which multiple levels of inputs are used to measure fair value, hierarchy classification is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. The following table indicates the fair value hierarchy of the financial instruments of the Company at March 31, 2016 and December 31, 2015:

Level 2 Fair Value Measurements	March 31	December 31
(In thousands)	2016	2015
Assets		
Foreign currency exchange forward contracts	\$ 1,845	\$ 5,828
Cross-currency interest rate swaps	861	15,417
Liabilities		
Foreign currency exchange forward contracts	11,378	1,738

Table of Contents

The following table reconciles the beginning and ending balances for liabilities measured on a recurring basis using unobservable inputs (Level 3) for the three months ended March 31, 2016 and 2015:

	Three Mo	ntha
		onuis
Level 3 Liabilities—Unit Adjustment Liability (a) for the Three Months Ended March 31	Ended	
(In thousands)	March 31	
	2016	2015
Balance at beginning of period	\$79,934	\$93,762
Reduction in the fair value related to election not to make 2016 payments	(19,145)	_
Payments	_	(5,580)
Change in fair value to the unit adjustment liability	1,913	2,245
Balance at end of period	\$62,702	\$90,427

(a) During the quarter ended March 31, 2016, the Company decided that it will not make the four quarterly payments to CD&R for 2016. This resulted in the Company revaluing the Unit Adjustment Liability. See Note 4, Equity Method Investments, for additional information related to the unit adjustment liability.

The Company primarily applies the market approach for recurring fair value measurements and endeavors to utilize the best available information. Accordingly, the Company utilizes valuation techniques that maximize the use of observable inputs, such as forward rates, interest rates, the Company's credit risk and counterparties' credit risks, and which minimize the use of unobservable inputs. The Company is able to classify fair value balances based on the ability to observe those inputs. Foreign currency exchange forward contracts and CCIRs are classified as Level 2 fair value based upon pricing models using market-based inputs. Model inputs can be verified, and valuation techniques do not involve significant management judgment.

The carrying amounts of cash and cash equivalents, accounts receivable, accounts payable, accrued liabilities and short-term borrowings approximate fair value due to the short-term maturities of these assets and liabilities. At March 31, 2016 and December 31, 2015, the total fair value of long-term debt (excluding deferred financing costs), including current maturities, was \$745.9 million and \$834.6 million, respectively, compared with a carrying value of \$837.2 million and \$880.8 million, respectively. Fair values for debt are based on quoted market prices for the same or similar issues, or on the current rates offered to the Company for debt of the same remaining maturities (Level 2).

Total amounts reclassified from accumulated other comprehensive loss in connection with loss on dilution of equity method investment	\$3,037	

15. Restructuring Programs

In recent years, the Company has instituted restructuring programs to balance short-term profitability goals with long-term strategies. A primary objective of these programs has been to establish platforms upon which the affected businesses can grow with reduced fixed investment and generate annual operating expense savings. The restructuring programs have been instituted in response to the continuing impact of global financial and economic uncertainty on the Company's end markets. Restructuring costs incurred in these programs were recorded as part of the caption, Other expenses, of the Condensed Consolidated Statements of Operations. The timing of associated cash payments is dependent on the type of restructuring cost and can extend over a multi-year period. Project Orion

Under Project Orion, the Harsco Metals & Minerals Segment made organizational and process improvement changes that are expected to improve its return on capital and deliver a higher and more consistent level of service to customers. These changes include improving several core processes and simplifying the organizational structure. During the fourth quarter of 2015, Project Orion was expanded with additional targeted workforce and operational savings of \$20 million to \$25 million. The majority of these benefits are expected to be realized in 2016.

The restructuring accrual for Project Orion at March 31, 2016 and the activity for the three months ended March 31, 2016 were as follows:

	Employee					
(In thousands)	Termination					
	Benefit					
	Costs					
Balance, December 31, 2015	\$ 5,807					
Cash expenditures	(2,525)					
Foreign currency translation	92					

Other adjustments 62 Balance, March 31, 2016 \$ 3,436

The remaining accrual related to Project Orion is expected to be paid principally through the first half of 2016.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the accompanying unaudited condensed consolidated financial statements as well as the audited consolidated financial statements of Harsco Corporation (the "Company"), including the notes thereto, included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 which includes additional information about the Company's critical accounting policies, contractual obligations, practices and the transactions that support the financial results, and provides a more comprehensive summary of the Company's outlook, trends and strategies for 2016 and beyond.

Certain amounts included in Item 2 of this Quarterly Report on Form 10-Q are rounded in millions and all percentages are calculated based on actual amounts. As a result, minor differences may exist due to rounding. Forward-Looking Statements

The nature of the Company's business and the many countries in which it operates subject it to changing economic,

competitive, regulatory and technological conditions, risks and uncertainties. In accordance with the "safe harbor" provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, the Company provides the following cautionary remarks regarding important factors that, among others, could cause future results to differ materially from the results contemplated by forward-looking statements, including the expectations and assumptions expressed or implied herein. Forward-looking statements contained herein could include, among other things, statements about management's confidence in and strategies for performance; expectations for new and existing products, technologies and opportunities; and expectations regarding growth, sales, cash flows, and earnings. Forward-looking statements can be identified by the use of such terms as "may," "could," "expect," "anticipate," "intend," "believe," "likely," "estimate," "plan" or other comparable terms. Factors that could cause actual results to differ, perhaps materially, from those implied by forward-looking statements include, but are not limited to: (1) changes in the worldwide business environment in which the Company operates, including general economic conditions; (2) changes in currency exchange rates, interest rates, commodity and fuel costs and capital costs;(3) changes in the performance of equity and bond markets that could affect, among other things, the valuation of the assets in the Company's pension plans and the accounting for pension assets, liabilities and expenses; (4) changes in governmental laws and regulations, including environmental, occupational health and safety, tax and import tariff standards; (5) market and competitive changes, including pricing pressures, market demand and acceptance for new products, services and technologies; (6) the Company's inability or failure to protect its intellectual property rights from infringement in one or more of the many countries in which the Company operates; (7) failure to effectively prevent, detect or recover from breaches in the Company's cybersecurity infrastructure; (8) unforeseen business disruptions in one or more of the many countries in which the Company operates due to political instability, civil disobedience, armed hostilities, public health issues or other calamities; (9) disruptions associated with labor disputes and increased operating costs associated with union organization; (10) the seasonal nature of the Company's business; (11) the Company's ability to successfully enter into new contracts and complete new acquisitions or strategic ventures in the time-frame contemplated, or at all; (12) the integration of the Company's strategic acquisitions; (13) the amount and timing of repurchases of the Company's common stock, if any; (14) the prolonged recovery in global financial and credit markets and economic conditions generally, which could result in the Company's customers curtailing development projects, construction, production and capital expenditures, which, in turn, could reduce the demand for the Company's products and services and, accordingly, the Company's revenues, margins and profitability; (15) the outcome of any disputes with customers, contractors and subcontractors; (16) the financial condition of the Company's customers, including the ability of customers (especially those that may be highly leveraged and those with inadequate liquidity) to maintain their credit availability; (17) the Company's ability to successfully implement and receive the expected benefits of cost-reduction and restructuring initiatives, including the achievement of expected cost savings in the expected time frame; (18) the ability to successfully implement the Company's strategic initiatives and portfolio optimization and the impact of such initiatives, such as the Harsco Metals & Minerals Segment's Improvement Plan ("Project Orion"); (19) the amount ultimately realized from the Company's exit from the strategic venture between the Company and Clayton, Dubilier & Rice and the timing of such exit; (20)

implementation of environmental remediation matters; (21) risk and uncertainty associated with intangible assets; (22) the impact of a transaction, if any, resulting from the Company's determination to explore strategic options for the separation of the Harsco Metals & Minerals Segment; and (23) other risk factors listed from time to time in the Company's SEC reports. A further discussion of these, along with other potential risk factors, can be found in Part I, Item 1A, "Risk Factors," of the Company's Annual Report on Form 10-K for the year ended December 31, 2015. The Company cautions that these factors may not be exhaustive and that many of these factors are beyond the Company's ability to control or predict. Accordingly, forward-looking statements should not be relied upon as a prediction of actual results. The Company undertakes no duty to update forward-looking statements except as may be required by law.

Table of Contents

Executive Overview

The Harsco Industrial Segment's air cooled heat exchangers business expects low oil prices to continue to impact capital expenditures and overall spending by customers in the upstream, midstream, and downstream oil and gas markets. Accordingly, these factors will impact revenue and operating income in the near-term in the Harsco Industrial Segment.

The Harsco Rail Segment's revenues were consistent year-over-year despite weakness in the North American market partially offset by growth in equipment sales in the international market. However, operating income was unfavorably impacted by a \$10.9 million foreign exchange gain recorded in 2015 that was not repeated in 2016, and by lower margins on after-market repair part sales.

The Harsco Metals & Minerals Segment continues to be negatively impacted by lower customer steel production, weaker commodity prices and demand and site exits. In addition, the Harsco Metals & Minerals Segment recorded severance costs of \$5.1 million resulting from a probable site exit in the first quarter of 2016. These impacts have been partially offset by the savings and benefits achieved as part of Project Orion which has helped to transform the Harsco Metals & Minerals Segment into a leaner and more disciplined business. During the fourth quarter of 2015, Project Orion was expanded with additional targeted workforce and operational savings of \$20 million to \$25 million. The majority of these benefits are expected to be realized in 2016. Please see Note 15, Restructuring Programs, In Part I, Item 1, Financial Statements for additional information. The Company remains focused on achieving additional cost reductions and operational improvements to enhance returns for the Harsco Metals & Minerals Segment. The Company has announced its intention to pursue strategic options for the separation of the Harsco Metals & Minerals Segment from the rest of the Company. A separation of the Harsco Metals & Minerals Segment would allow each of the Company's businesses to benefit from dedicated capital structures, execute tailored and flexible strategic priorities and optimize capital return policies consistent with each business's unique priorities. There is no specific timetable related to this initiative and there can be no assurance that a sale, spin-off or any other transaction will take place. The Company incurred \$3.3 million of expenses during the first quarter of 2016 related to the separation, which are included as part of the Corporate caption in the Company's segment results.

	Three Months Ended

Total revenues	\$353.3	\$451.6	\$(98.3)	(21.8)%		
(a) Includes Mexico.						

Revenues for the Company during the first quarter of 2016 were \$353.3 million compared with \$451.6 million in the first quarter of 2015. The change is primarily related to the impact of price and volume changes in the Harsco Metals & Minerals and Harsco Industrial Segments; exited contracts in the Harsco Metals & Minerals Segment; and the impacts of foreign currency translation. Foreign currency translation decreased revenues by \$18.8 million for the first quarter of 2016 compared with the same period in the prior year.

Operating income from continuing operations for the first quarter of 2016 was \$9.4 million compared with \$38.9 million in the first quarter of 2015. Refer to the Segment discussions below for information pertaining to factors positively affecting and negatively impacting operating income from continuing operations.

The diluted loss per share from continuing operations for the first quarter of 2016 of \$0.13 compared with diluted earnings per share from continuing operations of \$0.20 for the first quarter of 2015. This change is primarily related to decreased operating income from continuing operations and the loss on dilution of the Company's equity method investment in the Infrastructure strategic venture, partially offset by an income tax benefit in the current year compared to an income tax expense in prior year.

Harsco Metals & Minerals Segment:

	Three
Significant Impacts on Revenues	
	Ended
(In millions)	
Net impact of new and lost contracts (including exited underperforming contracts).	(23.8)
Net impacts of price/volume changes, primarily attributable to volume changes.	(20.6)
Impact of foreign currency translation.	(17.1)
Revenues — 2016	\$ 229.7

Factors Positively Affecting Operating Income:

Incremental Project Orion restructuring benefits, related to compensation savings, of approximately \$2.9 million during the first quarter of 2016 associated with the recent expansion of Project Orion.

Selling and administrative costs, exclusive of Project Orion savings, incurred by the Harsco Metals & Minerals Segment decreased by \$3.9 million during the first quarter of 2016 compared with the same period in prior year. Lower maintenance, fuel and pension costs have helped to partially offset the impacts of lost or exited contracts and decreased volumes.

Increased volumes in the roofing granules and industrial abrasives business, due partly to favorable weather conditions during the first quarter of 2016.

Factors Negatively Impacting Operating Income:

Decreased global steel production and scrap metal prices. Overall, steel production by customers under services contracts, including the impact of exited contracts, decreased by 18% during the first quarter of 2016 compared with the same period in prior year.

Decreased income attributable to the impact of exited contracts and reduced nickel prices and demand. Nickel prices decreased 40% during the first quarter of 2016 compared with the same period in prior year.

Severance costs resulting from a probable site exit decreased operating income by \$5.1 million during the first quarter of 2016.
