	\$ 748,482	\$ 763,681

The accompanying notes are an integral part of these consolidated financial statements.

Notes to Consolidated Financial Statements

Note 1. Basis of Presentation and Consolidation

The interim consolidated financial statements of Community Bancorp. and Subsidiary are unaudited. All significant intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, all adjustments necessary for fair presentation of the financial condition and results of operations of the Company contained herein have been made. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto for the year ended December 31, 2009 contained in the Company's Annual Report on Form 10-K/A. The results of operations for the interim period are not necessarily indicative of the results of operations to be expected for the full annual period ending December 31, 2010, or for any other interim period.

Certain amounts in the 2009 financial statements have been reclassified to conform to the current year presentation.

Note 2. Recent Accounting Developments

In June 2009, the Financial Accounting Standards Board (FASB) issued a change to Accounting Standards Codification (ASC) Topic 860, "Transfers and Servicing", to improve the reporting for the transfer of financial assets resulting from (1) practices that have developed since the issuance of a previous FASB statement that are not consistent with the original intent and key requirements of that statement and (2) concerns of financial statement users that many of the financial assets (and related obligations) that have been derecognized should continue to be reported in the financial statements of transferors. This ASC became effective for the Company on January 1, 2010. Adoption of this Statement did not have a material impact on the Company's consolidated financial statements.

In June 2009, the FASB issued a change to ASC Topic 810, "Consolidation", to amend certain requirements of consolidation of variable interest entities, to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. The ASC became effective for the Company on January 1, 2010. Adoption of this Statement did not have a material impact on the Company's consolidated financial statements.

In January 2010, the FASB issued Accounting Standards Update (ASU) 2010-06, "Fair Value Measurements and Disclosures (Topic 820) - Improving Disclosures about Fair Value Measurements," to amend the disclosure requirements related to recurring and nonrecurring fair value measurements. The guidance requires new disclosures on the transfers of assets and liabilities between Level 1 (quoted prices in active market for identical assets or liabilities) and Level 2 (significant other observable inputs) of the fair value measurement hierarchy, including the reasons and the timing of the transfers. Additionally, the guidance requires a roll forward of activities on purchases, sales, issuance, and settlements of the assets and liabilities measured using significant unobservable inputs (Level 3 fair value measurements). The guidance became effective for the Company on January 1, 2010, except for the disclosure on the roll forward activities for any Level 3 fair value measurements, which will become effective with the reporting period beginning January 1, 2011. Adoption of this new guidance requires additional disclosures of fair value measurements but did not have a material impact on the Company's consolidated financial statements.

In February 2010, the FASB issued ASU 2010-09, "Subsequent Events: Amendments to Certain Recognition and Disclosure Requirements," related to events that occur after the balance sheet date but before financial statements are issued. This guidance amends existing standards to address potential conflicts with Securities and Exchange Commission ("SEC") guidance and refines the scope of the reissuance disclosure requirements to include revised financial statements only. Under this guidance, SEC filers are no longer required to disclose the date through which subsequent events have been evaluated. The adoption of this update did not have a material effect on the Company's consolidated financial statements.

On July 21, 2010, the FASB issued ASU 2010-20, "Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses," which requires significant new disclosures about the allowance for credit losses and the credit quality of financing receivables. The ASU is intended to enhance transparency about an entity's allowance for credit losses and the credit quality of loan and lease receivables by requiring disclosure of an evaluation of the nature of the credit risk inherent in the entity's financing receivables portfolio, as well as disclosure of how that risk is analyzed and assessed in arriving at the allowance for credit losses and the changes and reasons for those changes in the allowance. Under this standard, disclosures about the allowance for credit losses and fair value are to be presented by portfolio segment, while credit quality information, impaired financing receivables and nonaccrual status are to be presented by class of financing receivable. In addition to existing requirements, ASU 2010-20 requires an entity to provide additional disclosures about (1) credit quality indicators of financing receivables at the end of the reporting period by class of financing receivables; (2) the aging of past due financing receivables at the end of the reporting period by class of financing receivable; (3) the nature and extent of troubled debt restructurings that occurred during the period, by class of financing receivable and their effect on the allowance for credit losses; (4) the nature and extent of financing receivables modified as troubled debt restructurings within the previous 12 months that defaulted during the reporting period, by class of financing receivable and their effect on the allowance for credit losses; and (5) significant purchases and sales of financing receivables during the reporting period, disaggregated by portfolio segment. The disclosures are to be presented at the level of disaggregation that management uses when assessing and monitoring the portfolio's risk and performance. ASU 2010-20 will be effective for interim and annual financial reporting periods after December 15, 2010, as it relates to disclosures required as of the end of a reporting period. Disclosures that relate to activity during a reporting period will be required for the Company's consolidated financial statements that include periods beginning on or after January 1, 2011. Other than requiring additional disclosures, the Company does not anticipate that adoption of this ASU will have a material impact on the Company's consolidated financial statements and accompanying footnotes.

Note 3. Earnings per Common Share

Earnings per common share amounts are computed based on the weighted average number of shares of common stock issued during the period (retroactively adjusted for stock splits and stock dividends), including Dividend Reinvestment Plan shares issuable upon reinvestment of dividends, and reduced for shares held in treasury.

The following table illustrates the calculation for the periods ended June 30, as adjusted for the cash dividends declared on the preferred stock:

For The Second Quarter Ended June 30,	2010	2009
Net income, as reported	\$732,533	\$1,007,565
Less: dividends to preferred shareholders	46,875	46,875
Net income available to common shareholders	\$685,658	\$960,690
Weighted average number of common shares used in calculating earnings per share	4,574,475	4,495,387
Earnings per common share	\$0.15	\$0.21
For the Six Months Ended June 30,	2010	2009
Net income, as reported	\$1,671,445	\$1,690,818
Less: dividends to preferred shareholders	93,750	93,750
Net income available to common shareholders	\$1,577,695	\$1,597,068
Weighted average number of common shares used in calculating earnings per share	4,566,382	4,484,276
Earnings per common share	\$0.35	\$0.36

Note 4. Comprehensive Income

Accounting principles generally require recognized revenue, expenses, gains, and losses to be included in net income. Certain changes in assets and liabilities, such as the after-tax effect of unrealized gains and losses on available-for-sale securities, are not reflected in the statement of income, but the cumulative effect of such items from period-to-period is reflected as a separate component of the equity section of the balance sheet (accumulated other comprehensive income or loss). Other comprehensive income or loss, along with net income, comprises the Company's total comprehensive income.

The Company's total comprehensive income for the comparison periods is calculated as follows:

For The Second Quarter Ended June 30,	2010	2009
Net income before write down of Fannie Mae preferred stock and tax effect thereof	\$732,533	\$1,069,899
Realized loss on write down of Fannie Mae preferred stock	0	94,446
Tax effect	0	(32,112)
Net income after realized loss	732,533	1,007,565
Other comprehensive loss, net of tax:		
Change in unrealized holding gain on available-for-sale securities arising during the period	(11,981)	(814,830)
Reclassification adjustment for gains realized in income	0	447,420

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

Net change in unrealized gain	(11,981)	(367,410)
Tax effect	4,074	124,919
Other comprehensive loss, net of tax	(7,907)	(242,491)
Total comprehensive income	\$724,626	\$765,074
For the Six Months Ended June 30,	2010	2009
Net income before write down of Fannie Mae preferred stock and tax effect thereof	\$1,671,445	\$1,753,152
Realized loss on write down of Fannie Mae preferred stock	0	94,446
Tax effect	0	(32,112)
Net income after realized loss	1,671,445	1,690,818
Other comprehensive loss, net of tax:		
Change in unrealized holding gain on available-for-sale securities arising during the period	(25,551)	(1,012,723)
Reclassification adjustment for gains realized in income	0	471,055
Net change in unrealized gain	(25,551)	(541,668)
Tax effect	8,687	184,167
Other comprehensive loss, net of tax	(16,864)	(357,501)
Total comprehensive income	\$1,654,581	\$1,333,317

Note 5. Investment Securities

Securities available-for-sale (AFS) and held-to-maturity (HTM) consisted of the following:

Securities AFS	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value*
June 30, 2010				
U. S. Government sponsored enterprise securities	\$17,357,854	\$139,114	\$0	\$17,496,968
U. S. Government securities	5,048,310	43,804	0	5,092,114
Preferred stock	68,164	0	37,436	30,728
	\$22,474,328	\$182,918	\$37,436	\$22,619,810
December 31, 2009				
U. S. Government sponsored enterprise securities	\$18,686,949	\$138,283	\$18,582	\$18,806,650
U. S. Government securities	5,048,683	48,773	764	5,096,692
Preferred stock	68,164	3,324	0	71,488

Due after ten years	3,184,802	3,569,000
	\$32,878,174	\$33,646,000

*Method used to determine fair value on held-to-maturity securities rounds values to nearest thousand.

All debt securities with unrealized losses are presented in the table below either as those with a continuous loss position less than 12 months or as those with a continuous loss position for 12 months or more. The Company had no debt securities with an unrealized loss at June 30, 2010 nor any with a continuous unrealized loss position of 12 months or more in any of the periods presented. The Fannie Mae preferred stock has been in an unrealized loss position for less than 12 months.

Debt securities with unrealized losses were as follows:

	Less than 12 months Fair Value	Unrealized Loss
December 31, 2009		
U.S. Government sponsored enterprise securities	\$2,055,018	\$18,582
U.S. Government securities	1,003,233	764
	\$3,058,251	\$19,346
June 30, 2009		
U.S. Government sponsored enterprise securities	\$4,288,656	\$4,810
U.S. Government securities	1,009,716	1,969
	\$5,298,372	\$6,779

At June 30, 2010 and December 31, 2009, the Company's available-for-sale portfolio included two classes of Fannie Mae preferred stock with an aggregate book value of \$68,164, which reflected two other-than-temporary impairment write downs on the investment in prior periods. The fair market value of the Fannie Mae preferred stock as of June 30, 2010 was \$30,728, a decrease of \$40,760 from the December 31, 2009 fair market value of \$71,488. The decrease in value occurred shortly before the end of the quarter after the Federal Housing Finance

Agency ordered Fannie Mae to delist its common and preferred stock from the New York Stock Exchange. Due to the fact that the volatility was recent, the stock price increased slightly over the low-point it reached immediately following the announcement of the delisting and the Company has the ability and intention to hold the investment for the foreseeable future, management did not record an other-than-temporary impairment on June 30, 2010.

At December 31, 2009, there were two U.S. Government sponsored enterprise debt securities and one U.S. Government debt security in the investment portfolio in an unrealized loss position compared to four U.S. Government sponsored enterprise debt securities and one U.S. Government debt security in an unrealized loss position at June 30, 2009. These unrealized losses were principally attributable to changes in prevailing interest rates for similar types of securities, and not deterioration in the creditworthiness of the issuer.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market conditions, or adverse developments relating to the issuer, warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than the carrying value, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment for a period of time sufficient to allow for any anticipated recovery in fair value. In analyzing an issuer's financial condition, management considers whether the securities are issued by the federal government or its agencies, whether downgrades by rating agencies or other adverse developments in the status of the securities have occurred, and the results of reviews of the issuer's financial condition.

Note 6. Goodwill and Other Intangible Assets

As a result of the merger with LyndonBank on December 31, 2007, the Company recorded goodwill amounting to \$11.6 million. The goodwill is not amortizable and is not deductible for tax purposes.

The Company also recorded \$4.2 million of acquired identified intangible assets representing the core deposit intangible which is subject to amortization as a non-interest expense over a ten year period using a double declining method and is deductible for tax purposes.

Amortization expense for the core deposit intangible for the first six months of 2010 was \$266,304. As of June 30, 2010, the remaining annual amortization expense related to core deposit intangible, absent any future impairment, is expected to be as follows:

2010	\$266,304
2011	426,086
2012	340,869
2013	272,695
2014	272,695
Thereafter	818,087
Total	\$2,396,736

Management evaluates goodwill for impairment annually and the core deposit intangible asset for impairment if certain conditions occur. As of the date of the most recent such evaluation (December 31, 2009), management concluded that no impairment existed.

Note 7. Income Taxes

The Company receives tax credits for its investments in various low income housing partnerships which reduce taxes payable. Periodically the Company has the opportunity to participate in a low income housing project that offers one-time historic tax credits. In 2008, the Company was given this opportunity through a local project, with historic tax credit for 2009 amounting to \$535,000, or \$133,750 quarterly. This one-time historic tax credit is reflected in the

negative variance between the tax expense for both of the 2010 interim periods presented and the tax benefit for the same periods presented for 2009.

Note 8. Fair Value

ASC Topic 820-10-20, Fair Value Measurements and Disclosures, provides a framework for measuring and disclosing fair value under U.S. Generally Accepted Accounting Principles (GAAP). ASC Topic 820-10-20 requires disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring basis (for example, available-for-sale investment securities) or on a nonrecurring basis (for example, impaired loans).

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820-10-20 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as U.S. Treasury, other U.S. Government and agency mortgage-backed debt securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets and liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain derivative contracts, residential mortgage servicing rights, and impaired loans.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. For example, this category generally includes certain private equity investments, retained residual interest in securitizations, and highly-structured or long-term derivative contracts.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Assets measured at fair value on a recurring basis and reflected in the balance sheet at the dates presented are summarized below:

June 30, 2010	Level 1	Level 2	Total
Assets:			
U.S. Government sponsored enterprise securities	\$0	\$17,496,968	\$17,496,968
U.S. Government securities	3,032,264	2,059,850	5,092,114
Preferred stock	30,728	0	30,728
Total	\$3,062,992	\$19,556,818	\$22,619,810
December 31, 2009	Level 1	Level 2	Total
Assets:			
U.S. Government sponsored enterprise securities	\$0	\$18,806,650	\$18,806,650

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

U.S. Government securities	1,003,233	4,093,459	5,096,692
Preferred stock	71,488	0	71,488
Total	\$1,074,721	\$22,900,109	\$23,974,830

June 30, 2009

Assets:

Total	\$497,219	\$4,376,722	\$4,873,941

December 31, 2009

Assets:

Loans held-for-sale	\$321,983	\$0	\$321,983
Mortgage servicing rights	0	1,011,360	1,011,360
Impaired loans, net of related allowance	0	2,186,171	2,186,171
Other real estate owned	0	743,000	743,000
Total	\$321,983	\$3,940,531	\$4,262,514

June 30, 2009

Assets:

Loans held-for-sale	\$765,943	\$0	\$765,943
Mortgage servicing rights	0	929,952	929,952
Impaired loans, net of related allowance	0	2,720,941	2,720,941
Other real estate owned	0	770,000	770,000
Total	\$765,943	\$4,420,893	\$5,186,836

The fair value of loans held-for-sale is based upon an actual purchase and sale agreement between the Company and an independent market participant. The sale is executed within a reasonable period following quarter end at the stated fair value.

Real estate properties acquired through or in lieu of loan foreclosure are carried as OREO and are initially recorded at fair value less estimated selling cost at the date of foreclosure. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan losses. After foreclosure, these assets are carried at the lower of their new cost basis or fair value, less estimated cost to sell. Costs of significant property improvements are capitalized, whereas costs relating to holding property are expensed. Appraisals are then done periodically on properties that management deems significant, or evaluations may be performed by management on properties in the portfolio that are less vulnerable to market conditions. Subsequent write-downs are recorded as a charge to operations, if necessary, to reduce the carrying value of a property to the lower of its cost or fair value, less estimated cost to sell.

There were no transfers between Levels 1 and 2 during the six months ended June 30, 2010.

Fair values of financial instruments

The following methods and assumptions were used by the Company in estimating its fair value disclosures for financial instruments:

Cash and cash equivalents: The carrying amounts reported in the balance sheet for cash and cash equivalents approximate their fair values.

Investment securities: The fair value of securities available for sale equals quoted market prices, if available. If quoted market prices are not available, fair value is determined using quoted market prices for similar securities. Level 1 securities include certain U.S. Government Bonds and preferred stock. Level 2 securities include asset-backed securities, including obligations of government sponsored entities, certain U.S Government securities, mortgage-backed securities, municipal bonds and certain equity securities.

Restricted equity securities: Restricted equity securities are comprised of Federal Reserve Bank of Boston (FRBB) stock and Federal Home Loan Bank of Boston (FHLBB) stock. These securities are carried at cost, which is believed to approximate fair value, based on the redemption provisions of the FRBB and the FHLBB. The stock is nonmarketable, and redeemable at par value.

Loans and loans held-for-sale: For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying amounts. The fair values for other loans (for example, fixed rate residential, commercial real estate, and rental property mortgage loans, and commercial and industrial loans) are estimated using discounted cash flow analyses, based on interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Loan fair value estimates include judgments regarding future expected loss experience and risk characteristics. The carrying amounts reported in the balance sheet for loans that are held-for-sale approximate their fair values. Loans that are deemed to be impaired are valued at the lower of the loan's carrying value or the loan's impaired basis. The impaired basis is measured using the impairment method that the Company has applied, be it the present value of cash flows, the observable market price, or the fair value of collateral. The Company selects the measurement method on a loan-by-loan basis, except that when a foreclosure of a collateral dependent loan is probable then the fair value of collateral method is used. The fair value of real estate collateral is usually determined using independent appraisals and evaluations. The Company considers impaired loans to be valued based on Level 2 inputs.

The fair value of loans held-for-sale is based upon an actual purchase and sale agreement between the Company and an independent market participant. The sale is executed within a reasonable period following quarter end at the stated fair value.

Mortgage servicing rights: Mortgage servicing rights are evaluated regularly for impairment based upon the fair value of the servicing rights as compared to their amortized cost. The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income, with loans divided into strata for valuation purposes based on their rates, terms and features. The Company obtains a third party valuation based upon loan level data, including note rate, type and term of the underlying loans. The model utilizes a variety of observable inputs for its assumptions, the most significant of which are loan prepayment assumptions and the discount rate used to discount future cash flows. Mortgage servicing rights are subject to measurement at fair value on a nonrecurring basis and are classified as Level 2 assets.

Deposits and borrowed funds: The fair values disclosed for demand deposits (for example, checking and savings accounts) are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying

amounts). The fair values for certificates of deposit and debt are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates and debt to a schedule of aggregated contractual maturities on such time deposits and debt.

Junior subordinated debentures: Fair value is estimated using current rates for debentures of similar maturity.

Capital lease obligations: Fair value is determined using a discounted cash flow calculation using current rates. Based on current rates, carrying value approximates fair value.

Accrued interest: The carrying amounts of accrued interest approximate their fair values.

Off-balance-sheet credit related instruments: Commitments to extend credit were evaluated and fair value was estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit-worthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

The estimated fair values of the Company's financial instruments were as follows:

	June 30, 2010		December 31, 2009		June 30, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(in thousands)					
Financial assets:						
Cash and cash equivalents	\$13,883	\$13,883	\$9,603	\$9,603	\$9,263	\$9,263
Securities held-to-maturity	30,826	31,431	44,766	45,543	32,878	33,646
Securities available-for-sale	22,620	22,620	23,975	23,975	25,160	25,160
Restricted equity securities	3,907	3,907	3,907	3,907	3,907	3,907
Loans and loans held-for-sale, net	382,246	393,100	378,656	388,199	365,519	373,102
Mortgage servicing rights	896	896	933	1,011	930	930
Accrued interest receivable	1,747	1,747	1,895	1,895	1,877	1,877
Bank owned life insurance	3,873	3,873	3,813	3,813	3,751	3,751
Other real estate owned	1,071	1,071	743	743	770	770
Financial liabilities:						
Deposits	385,924	389,216	418,786	420,933	384,132	386,519
Federal funds purchased and other borrowed funds	37,843	38,132	13,411	13,549	25,328	25,437
Repurchase agreements	19,181	19,181	19,042	19,042	16,610	16,610
Capital lease obligations	856	856	877	877	896	896
Subordinated debentures	12,887	12,894	12,887	11,370	12,887	9,006
Accrued interest payable	197	197	234	234	275	275

The estimated fair values of commitments to extend credit and letters of credit were immaterial for the periods presented in the above table.

Note 9. Mortgage Servicing Rights

During the first quarter of 2010, the market rates used to determine the fair value of the Company's mortgage servicing rights remained relatively stable and at levels which indicated fair values were higher than the end of 2009. Given this factor and the secondary market volume within the residential mortgage loan portfolio, a write up in the amount of \$104,176 was deemed appropriate as of March 31, 2010. Subsequently, interest rates hit record low levels at June 30, 2010 requiring a write down of \$66,997, for a net increase in market value since December 31, 2009 of \$37,179.

The following table shows the changes in the carrying amount of the mortgage servicing rights for the periods indicated:

	June 30, 2010	December 31, 2009	June 30, 2009
Balance at beginning of year	\$932,961	\$960,110	\$960,110
Mortgage servicing rights capitalized	119,369	584,004	411,617
Mortgage servicing rights amortized	(193,600)	(363,755)	(168,846)
Increase (decrease) in market value	37,179	(247,398)	(272,929)
Balance at end of period	\$895,909	\$932,961	\$929,952

Note 10. Legal Proceedings

In the normal course of business the Company and its subsidiary are involved in litigation that is considered incidental to their business. Management does not expect that any such litigation will be material to the Company's consolidated financial condition or results of operations.

Note 11. Subsequent Event

The Company has evaluated events and transactions subsequent to June 30, 2010 for potential recognition or disclosure in these financial statements, as required by GAAP. On June 8, 2010, the Company declared a cash dividend of \$0.12 per share payable August 1, 2010 to shareholders of record as of July 15, 2010. This dividend, amounting to \$548,231, was accrued at June 30, 2010.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
for the Period Ended June 30, 2010

FORWARD-LOOKING STATEMENTS

The Company's Management's Discussion and Analysis of Financial Condition and Results of Operations contains certain statements about the results of operations, financial condition and business of the Company and its subsidiary that may be considered forward-looking statements under the Private Securities Litigation Reform Act of 1995. When used therein, the words such as "believes," "expects," "anticipates," "intends," "estimates," "assumes," "plans," "predicts," "should," "could," "may," or similar expressions which predict or indicate future events, trends or expectations, indicate that management of the Company is making forward-looking statements.

Forward-looking statements are not guarantees of future performance. They necessarily involve risks, uncertainties and assumptions. Future results of the Company may differ materially from those expressed in these forward-looking statements. Examples of forward looking statements included in this discussion include, but are not limited to, estimated contingent liability related to assumptions made within the asset/liability management process, management's expectations as to the future interest rate environment and the Company's related liquidity level, credit risk expectations relating to the Company's loan portfolio and its participation in the Federal Home Loan Bank of Boston (FHLBB) Mortgage Partnership Finance (MPF) program, and management's general outlook for the local and national economy and the future performance of the Company. Although forward-looking statements are based on management's current expectations and estimates, many of the factors that could influence or determine actual results are unpredictable and not within the Company's control. Readers are cautioned not to place undue reliance on such statements as they speak only as of the date they are made. The Company does not undertake, and disclaims any obligation, to revise or update any forward-looking statements to reflect the occurrence or anticipated occurrence of events or circumstances after the date of this Report, except as required by applicable law.

Factors that may cause actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities: (1) general economic or monetary conditions, either nationally or regionally, continue to deteriorate, resulting in a decline in credit quality or a diminished demand for the Company's products and services; (2) competitive pressures increase among financial service providers in the Company's northern New England market area or in the financial service industry generally, including competitive pressures from non-bank financial service providers, from increasing consolidation and integration of financial service providers, and from changes in technology and delivery systems; (3) interest rates change in such a way as to reduce the Company's margins; (4) enactment of new laws and adoption of new government regulations, as well as changes in existing laws or regulations, or the way in which courts and government agencies interpret those laws or regulations, increase our costs of doing business or otherwise adversely affect the Company's business; (5) changes in federal or state tax policy; (6) changes in the level of nonperforming assets and charge-offs; (7) changes in estimates of future reserve requirements based upon relevant regulatory and accounting requirements; (8) changes in consumer and business spending, borrowing and savings habits; and (9) the effect of and changes in the United States monetary and fiscal policies, including the interest rate policies and regulation of the money supply by the Federal Reserve Board, which, in turn, may result in inflation and interest rate, securities market and monetary fluctuations.

NON-GAAP FINANCIAL MEASURES

Under Securities and Exchange Commission (SEC) Regulation G, public companies making disclosures containing financial measures that are not in accordance with generally accepted accounting principles in the United States (U.S. GAAP or GAAP) must also disclose, along with each non-GAAP financial measure, certain additional information,

including a reconciliation of the non-GAAP financial measure to the closest comparable GAAP financial measure, as well as a statement of the company's reasons for utilizing the non-GAAP financial measure. The SEC has exempted from the definition of non-GAAP financial measures certain commonly used financial measures that are not based on GAAP. However, two non-GAAP financial measures commonly used by financial institutions, namely tax-equivalent net interest income and tax-equivalent net interest margin, have not been specifically exempted by the SEC, and may therefore constitute non-GAAP financial measures under Regulation G. We are unable to state with certainty whether the SEC would regard those measures as subject to Regulation G.

Management believes that these non-GAAP financial measures are useful in evaluating the Company's financial performance and facilitate comparisons with the performance of other financial institutions. However, that information should be considered supplemental in nature and not as a substitute for related financial information prepared in accordance with GAAP.

OVERVIEW

Total assets at June 30, 2010 were \$497.7 million compared to \$505.3 million at December 31, 2009 and \$479.3 million at June 30, 2009, a decrease of 1.5% and an increase of 3.9%, respectively. The decrease from year-end to June 30, 2010 reflects the annual municipal finance cycle as short-term municipal loans generally mature at the end of the second quarter and are not replaced until after the start of the third quarter. Municipal loans totaling \$17.0 million matured on June 30, 2010, with renewals and new municipal loans of approximately \$22.0 million recorded in July, 2010. Gross loans increased from year-end \$3.5 million while deposits decreased \$32.9 million. The decrease in deposits resulted in part from a decrease in municipal deposits of \$35.8 million that corresponds to the seasonal municipal loan activity as well as a decrease in time deposits of \$20.5 million. Reflected in this decrease in time deposits was the \$15.1 million in one way funds purchased in the Certificate of Deposit Account Registry Service (CDARS) program of Promontory Interfinancial Network (described below in the Liquidity and Capital Resources section) that matured during the first quarter of 2010 and were replaced with long-term borrowings from the FHLBB. Also contributing to the decrease in deposits is the competitive interest rate environment for Certificate of Deposit specials, resulting in a decrease in certificates of deposit of \$5.6 million. These decreases were partially offset by an increase in core money market accounts of \$18.0 million, which includes a new money market account of the Company's trust company affiliate, Community Financial Service Group (CFSG) of \$14.2 million, and increases of \$1.1 million in demand deposit accounts and \$4.5 million in savings accounts. The Company considers these increases in core deposits as significant to the overall balance sheet as a stable source of funding to support asset growth.

Net interest income was \$4.2 million for the second quarter of 2010 compared to \$4.0 million for the second quarter of 2009, an increase of 5.22%. The historic low interest rate environment has allowed the Company to fund the balance sheet with lower cost funds resulting in the increase in net interest income despite a decline in interest and dividend income. However, nonrecurring non-interest income items in 2009 and a need to increase the provision for loan losses resulted in reduced net income in the second quarter of 2010 versus the second quarter of 2009.

Net income for the second quarter of 2010 was \$732,533 compared to \$1.0 million for the second quarter of 2009, resulting in earnings per common share of \$0.15 and \$0.21 for the respective quarters. Contributing to the decrease in net income was a \$447,420 one-time gain from the sale of mortgage backed securities in the investment portfolio in the second quarter of 2009, while there were no gains from the sale of securities in the second quarter of 2010. Another factor was the higher level of income from sold loans during the second quarter of 2009 than in 2010 due to the high refinancing activity in 2009. Throughout 2009, the Federal Reserve purchased trillions of dollars of mortgage-backed securities from Freddie Mac and Fannie Mae to support mortgage lending and the housing markets, driving down secondary market interest rates during 2009 and into the first quarter of 2010. This action was abated at the end of the first quarter and mortgage rates started to increase. The low interest rates in 2009 fueled stronger than expected income for the Company from the origination and subsequent sale of residential fixed rate mortgages to

Freddie Mac and the FHLBB. However, these levels are not expected to continue in 2010, and the Company has already seen a decline in residential mortgage loan activity in the first six months of 2010 compared to 2009. Despite mortgage rates at June 30, 2010 being lower than at any point in 2009, qualifying for the secondary market mortgage financing has become more difficult for borrowers because of lower property values and tighter underwriting standards. In addition, the federal income tax credit for first-time homebuyers expired in April, 2010, which has adversely affected new home sales and financings. Although not at 2009 levels, the income from sold loans in 2010 has so far exceeded the Company's expectations.

Non-interest expense for the second quarter of 2010 was 8.3% lower than the second quarter in 2009, with decreases noted in all components of non-interest expense. Most significant are decreases in salaries and benefits, due to several retirements at the end of 2009, and in Federal Deposit Insurance Corporation (FDIC) insurance expense due to the special assessment of \$100,500 in the second quarter of 2009. Additionally in 2009, other expenses included a loss of \$244,890 on limited partnerships compared to a loss of \$123,897 in the second quarter of 2010. The difference was due to a significant investment made by the Company in a local senior housing project in 2009 that increased the losses in those partnerships for the year.

Although operating expenses were generally less in 2010 than in 2009, non-interest expenses related to collections of past due and non-accruing loans have increased from a minimal amount in the second quarter of 2009 to \$60,114 for the second quarter of 2010. An increase in non-performing loans and charge off activity also called for a provision for loan losses for the second quarter of 2010 of approximately \$300,000 compared to \$125,001 for the second quarter in 2009. The higher level of charge off activity was a result of the resolution of numerous non-performing loans, which also resulted in an increase in other real estate owned. Despite trending higher, the Company's level of non-performing assets, net of government guarantees, remains well below the Company's national peer group. The effects of the recession and the stagnant recovery continue to have a negative impact on the local economy. Sectors of the loan portfolio most affected by the recession are construction and dairy farming. Construction activity continues to be slow for commercial and residential markets and milk prices have yet to stabilize at a level sufficient to allow struggling farmers to recover. On the positive side, there has been some improvement in manufacturing with some of the local furniture manufacturers hiring additional workers and increasing work hours.

While there are signs of economic growth and some evidence that the labor market may be stabilizing, the economic picture remains uncertain and housing markets remain soft. Expectations of inflation are low, indicating that it will take time before the recovery shows substantive signs of expansion. The Company expects that the Federal Reserve will maintain the low levels of the federal funds rate for an extended period of time. In this uncertain economic environment, unforeseen losses could present a challenge to the Company's future core earnings.

Local economic conditions are similar to national conditions. During the closing weeks of the second quarter 2010, activity in the residential real estate market increased somewhat, which was evident in an increase in the pipeline of mortgage applications at the end of the quarter, although, as expected, well below the levels of 2009. Jobless claims in the local manufacturing sector have subsided and some factories have increased work hours for production crews. Areas that are struggling are the dairy industry and tourism due to a winter season that was negatively affected by limited snow and warmer than normal temperatures. Although too early to tell, a positive summer season for the local tourism will be beneficial to the local economy. One positive note for the northeastern Vermont market area is a multi-phase expansion project of a local ski area, where construction of two hotels, a hockey arena, an indoor water park and a golf club house are expected to transform the ski resort to a year-round indoor and outdoor recreation destination resort. This project is expected to inject \$90 million of construction funding into the local economy over the next two years utilizing Federal EB5 program capital from foreign investors. Each of the Company's markets seems to have some project, segment or niche that is breathing life into its local economy and contributing to the increased level of commercial applications during the six months of this year.

While there are some signs of a recovery, the number of people unemployed and the limited new job opportunities suggest that the recovery will be slow and the economy in the Company's markets will remain constrained for the time

being. The recent poor economic conditions continue to have a negative impact on the consumer, particularly as it relates to credit performance, which tends to lag economic cycles. The increase in past dues and non-performing loans during the first six months of 2010 compared to 2009 indicates that customers continue to struggle to make their mortgage payments, not only due to layoffs and reduced income, but some are plagued by high levels of other consumer debt as well. These economic factors are considered in assessing the level of the Company's reserve for loan losses in an effort to adequately reserve for probable losses due to the consequences of the recession.

On April 13, 2010, the Board of Directors of the FDIC approved an interim rule to extend the Transaction Account Guarantee (TAG) program to December 31, 2010. Last year the program had been previously extended to June 30, 2010. Under the TAG program, customers of participating insured depository institutions are provided full deposit insurance coverage on transaction accounts. The interim rule gives the Board discretion to extend the program to the end of 2011, without additional rulemaking, if it determines that economic conditions warrant such an extension. The TAG program provides unlimited FDIC insurance on deposits in transaction accounts earning less than or equal to 25 basis points. This gives financial institutions who are participating in the TAG program an option for their customers with large dollar accounts who are looking for insured funds beyond the current FDIC coverage of \$250,000.

The regulatory environment continues to increase operating costs and place extensive burden on personnel resources to comply with rules such as Sarbanes-Oxley Act of 2002, the USA Patriot Act, the Bank Secrecy Act, the Real Estate Settlement Procedures Act and the Truth in Lending Act. This burden will only increase with the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 that includes a new Consumer Financial Protection Bureau and calls for numerous administrative rulemakings that could take years to implement.

On June 8, 2010, the Company's Board of Directors declared a quarterly cash dividend of \$0.12 per common share, payable on August 1, 2010 to shareholders of record on July 15, 2010. The Company is focused on increasing the profitability of the balance sheet, improving expense efficiency, and prudently managing risk, particularly as it pertains to credit in order to remain a well-capitalized bank in this challenging economic environment.

The following pages describe our second quarter financial results in much more detail. Please take the time to read them to more fully understand the quarter and six months ended June 30, 2010 in relation to the 2009 comparison periods. The discussion below should be read in conjunction with the Consolidated Financial Statements of the Company and related notes included in this report and with the Company's Annual Report on Form 10-K/A for the year ended December 31, 2009.

This report includes forward-looking statements within the meaning of the Securities and Exchange Act of 1934 (the "Exchange Act").

CRITICAL ACCOUNTING POLICIES

The Company's consolidated financial statements are prepared according to U.S. GAAP. The preparation of such financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities in the consolidated financial statements and related notes. The SEC has defined a Company's critical accounting policies as those that are most important to the portrayal of the Company's financial condition and results of operations, and which require the Company to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Because of the significance of these estimates and assumptions, there is a high likelihood that materially different amounts would be reported for the Company under different conditions or using different assumptions or estimates. Management evaluates on an ongoing basis its judgment as to which policies are considered to be critical.

Management believes that the calculation of the allowance for loan losses (ALL) is a critical accounting policy that requires the most significant judgments and estimates used in the preparation of its consolidated financial statements. In estimating the ALL, management considers historical experience as well as other qualitative factors, including the effect of current economic indicators and their probable impact on borrowers and collateral, trends in delinquent and non-performing loans, trends in criticized and classified assets, concentrations of credit, levels of exceptions, and the impact of competition in the market. Management's estimates used in calculating the ALL may increase or decrease based on changes in these factors, which in turn will affect the amount of the Company's provision for loan losses charged against current period income. Actual results could differ significantly from these estimates under different assumptions, judgments or conditions.

Occasionally, the Company acquires property in connection with foreclosures or in satisfaction of debts previously contracted, other real estate owned (OREO). Such properties are carried at fair value, which is the market value less estimated cost of disposition, i.e. sales commissions and costs associated with the sale. Market value is defined as the cash price that might reasonably be anticipated in a current sale that is within 12 months, under all conditions requisite to a fair sale. A fair sale means that a buyer and seller are each acting prudently, knowledgeably, and under no necessity to buy or sell. Market value is determined, as appropriate, either by obtaining a current appraisal or evaluation prepared by an independent, qualified appraiser, by obtaining a Broker's Price Opinion, or if the Company has limited exposure and limited risk of loss, by the opinion of management as supported by an inspection of the property and its most recent tax valuation. If the Company has a valid appraisal or an appropriate evaluation obtained in connection with the real estate loan, and there has been no obvious and material change in market conditions or physical aspects of the property, then the Company need not obtain another appraisal or evaluation when it acquires ownership of the property. Under recent and current market conditions, and periods of declining market values, the Company will generally obtain a new appraisal or evaluation.

The amount, if any, by which the recorded amount of the loan exceeds the fair value, less cost to sell, is a loss which is charged to the allowance for loan losses at the time of foreclosure or repossession. The recorded amount of the loan is the loan balance adjusted for any unamortized premium or discount and unamortized loan fees or costs, less any amount previously charged off, plus recorded accrued interest.

The Company performs quarterly reviews of individual debt and equity securities in the investment portfolio to determine whether decline in the value of a security is other than temporary. A review of other-than-temporary impairment requires companies to make certain judgments regarding the materiality of the decline and the probability, extent and timing of a valuation recovery, the company's intent to continue to hold the security and, in the case of debt securities, the likelihood that the company will not have to sell the security before recovery of its cost basis. Pursuant to these requirements, management assesses valuation declines to determine the extent to which such changes are attributable to fundamental factors specific to the issuer, such as financial condition and business prospects, or to market-related or other factors, such as interest rates, and in the case of debt securities, the extent to which the impairment relates to credit losses of the issuer, as compared to other factors. Declines in the fair value of securities below their cost that are deemed in accordance with GAAP to be other than temporary, and declines in fair value of debt securities below their cost that are related to credit losses, are recorded in earnings as realized losses. The non-credit loss portion of an other than temporary decline in the fair value of debt securities below their cost basis (generally, the difference between the fair value and the estimated net present value of the debt security) is recognized in other comprehensive income as an unrealized loss.

Mortgage servicing rights associated with loans originated and sold, where servicing is retained, are required to be initially capitalized at fair value and subsequently accounted for using the "fair value method" or the "amortization method". Capitalized mortgage servicing rights are included in other assets in the consolidated balance sheet. Mortgage servicing rights are amortized into non-interest income in proportion to, and over the period of, estimated future net servicing income of the underlying financial assets. The value of capitalized servicing rights represents the estimated present value of the future servicing fees arising from the right to service loans in the portfolio. The carrying value of the mortgage servicing rights is periodically reviewed for impairment based on a determination of fair value compared

to amortized cost, and impairment, if any, is recognized through a valuation allowance and is recorded as amortization of other assets. Subsequent improvement (if any) in the estimated fair value of impaired mortgage servicing rights is reflected in a positive valuation adjustment and is recognized in other income up to (but not in excess of) the amount of any prior impairment. Critical accounting policies for mortgage servicing rights relate to the initial valuation and subsequent impairment tests. The methodology used to determine the valuation of mortgage servicing rights requires the development and use of a number of estimates, including anticipated principal amortization and prepayments of that principal balance. Factors that may significantly affect the estimates used are changes in interest rates and the payment performance of the underlying loans. The Company analyzes and accounts for the value of its servicing rights with the assistance of a third party consultant.

The Company's 2007 acquisition of LyndonBank requires the application of the purchase method of accounting. Under the purchase method, the Company is required to record the net assets and liabilities acquired through the acquisition at fair value, with the excess of the purchase price over the fair value of the net assets recorded as goodwill and evaluated annually for impairment based on its fair value. The determination of fair value requires the use of assumptions, including discount rates, changes in which could significantly affect assigned fair values.

Management utilizes numerous techniques to estimate the carrying value of various assets held by the Company, including, but not limited to, bank premises and equipment and deferred taxes. The assumptions considered in making these estimates are based on historical experience and on various other factors that are believed by management to be reasonable under the circumstances. The use of different estimates or assumptions could produce different estimates of carrying values and those differences could be material in some circumstances.

RESULTS OF OPERATIONS

The Company's net income for the second quarter of 2010 was \$732,533, representing a decrease of \$275,032 or 27.3% from net income of \$1.0 million for the second quarter of 2009. This resulted in earnings per share of \$0.15 and \$0.21, respectively, for the second quarters of 2010 and 2009. Net income for the first six months of 2010 was \$1.67 million, compared to \$1.69 million for the same period in 2009, representing a decrease of \$19,373 or 1.2%. This resulted in earnings per share for the six month periods of \$0.35 for 2010 and \$0.36 for 2009. Net interest income for the second quarter of 2010 increased \$209,400 or 5.2% over the second quarter of 2009. Although total interest income decreased \$61,166 or just over 1.0%, this decrease was more than offset by a decrease in interest expense of \$270,566 or 13.9% quarter over quarter, accounting for the increase in net interest income. Net interest income for the first six months of 2010 increased \$490,580 or 6.2% over the first six months of 2009. Interest income decreased \$267,509 or 2.2% but that decrease was more than offset by a decrease in interest expense of \$758,089 or 18.6% year over year. Despite a \$16.7 million increase in loans at June 30, 2010 and compared to June 30, 2009, interest and fees on loans, the major component of interest income, showed only a moderate increase of \$53,625 or 0.5% between periods. Interest on taxable investments which consist of U.S. Government sponsored enterprise securities and U.S. Government securities decreased \$299,346 or 60.1% year over year due to declining rates on securities purchased to replace maturing securities. Interest expense on deposits, the major component of interest expense, decreased \$873,844 or 26.3% between the first six months of 2010 and 2009, attributable in part to a decrease of \$24.1 million in time deposits as well as a decrease in the rates paid on these deposit accounts. The Company has chosen to not compete as aggressively for time deposits as in the past due to the availability of low rate funds through FHLBB borrowings. This funding strategy has contributed to the decrease in time deposits and the increase in borrowed funds of \$12.5 million or 49.4% year over year. Additionally, when the \$15.1 million in one-way CDARS funds matured, the Company replaced them with long-term borrowings through FHLBB.

As a result of the LyndonBank merger, the Company is required to amortize the fair value adjustments of the acquired loans and time deposits against net interest income and the core deposit intangible against non-interest expense. The loan fair value adjustment was a net premium, creating a decrease in interest income of \$20,756 for the second quarter of 2010 compared to a decrease of \$39,431 for the second quarter of 2009 and year to date decreases of \$32,734 and \$62,062, respectively, for 2010 and 2009. The certificate of deposit fair value adjustment resulted in an

increase in interest expense of \$78,000 for the second quarter of 2010, compared to an increase of \$65,000 for the same period in 2009 and year to date increases of \$156,000 and \$130,000, respectively, for 2010 and 2009. The amortization of the core deposit intangible amounted to a non-interest expense of \$133,152 for the second quarter of 2010, compared to \$166,440 for the second quarter of 2009 and year to date non-interest expense of \$266,304 for 2010 and \$332,880 for the same period in 2009.

The low interest rate environment that prevailed throughout 2009 and into 2010 not only helped the Company build its commercial and residential real estate mortgage loan portfolios, but also generated secondary market residential mortgage loan activity. Although secondary market activity was not as strong as a year ago, non-interest income from loan sales was still significant for the first six months of 2010. Income from sold loans for the second quarter of 2010 totaled \$183,401 versus \$353,120 for the same period in 2009. Income from loans sold in the secondary market for the first six months totaled \$319,683, compared to \$693,544 for the first six months in 2009. All of the major components of non-interest expense decreased during the first six months of 2010, with FDIC insurance accounting for the largest decrease. During the first six months of 2009, the Company recorded FDIC insurance expense totaling \$268,023 and a special assessment fee of \$233,500, compared to FDIC insurance expense of \$316,234 during the first six months of 2010. There was no special FDIC assessment during the first six months of 2010.

Return on average assets (ROA), which is net income divided by average total assets, measures how effectively a corporation uses its assets to produce earnings. Return on average equity (ROE), which is net income divided by average shareholders' equity, measures how effectively a corporation uses its equity capital to produce earnings. The Company's ROA and ROE began to return to more normal levels in 2009 following the immediate impact of the LyndonBank acquisition in 2007, but have decreased during the second quarter of 2010 as a result of the decrease in income in both periods. The following table shows these ratios annualized for the comparison periods.

For the second quarter ended June 30,	2010	2009
Return on Average Assets	0.58%	0.84%
Return on Average Equity	7.76%	11.44%
For the six months ended June 30,	2010	2009
Return on Average Assets	0.67%	0.70%
Return on Average Equity	8.96%	9.64%

INTEREST INCOME LESS INTEREST EXPENSE (NET INTEREST INCOME)

Net interest income, the difference between interest income and interest expense, represents the largest portion of the Company's earnings, and is affected by the volume, mix, and rate sensitivity of earning assets and interest bearing liabilities, market interest rates and the amount of non-interest bearing funds which support earning assets. The three tables below provide a visual comparison of the consolidated figures, and are stated on a tax equivalent basis assuming a federal tax rate of 34%. The Company's corporate tax rate is 34%; therefore, to equalize tax-free and taxable income in the comparison, the tax-free income is divided by 66%, with the result that every tax-free dollar is equal to \$1.52 in taxable income.

Tax-exempt income is derived from municipal investments which comprised the entire held-to-maturity portfolio of \$30.8 million at June 30, 2010, and \$32.9 million at June 30, 2009. The Company acquired municipal investments through the merger with LyndonBank amounting to approximately \$1.1 million, which were sold in January 2009, for a net loss of \$12,122. Also included in the Company's available-for-sale portfolio at both June 30, 2009 and 2010 are two classes of Fannie Mae preferred stock acquired in the merger, which, until the last quarter of 2008, carried a 70% tax exemption on dividends received. Dividend payments on the Fannie Mae preferred stock ceased following the

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

federal government's action in September 2008, placing Fannie Mae under conservatorship. Dividend payments on the Company's holdings of FHLBB stock also ceased during the last quarter of 2008, as the FHLBB adopted measures to conserve its capital, including suspension of dividend payments. Resumption of dividend payments on the Fannie Mae and FHLBB stock in 2010, and possibly beyond, is unlikely.

The following table shows the reconciliation between reported net interest income and tax equivalent, net interest income for the six month comparison periods of 2010 and 2009.

For the six months ended June 30,	2010	2009
Net interest income as presented	\$8,461,777	\$7,971,197
Effect of tax-exempt income	320,911	331,931
Net interest income, tax equivalent	\$8,782,688	\$8,303,128

The following table presents average earning assets and average interest-bearing liabilities supporting earning assets. Interest income (excluding interest on non-accrual loans) and interest expense are both expressed on a tax equivalent basis, both in dollars and as a rate/yield for the 2010 and 2009 comparison periods.

Average Balances and Interest Rates

	For the Six Months Ended June 30:							
	Average Balance	2010 Income/Expense	Rate/Yield		Average Balance	2009 Income/Expense	Rate/Yield	
Interest-Earning Assets								
Loans (1)	\$384,573,013	\$10,932,159	5.73	%	\$367,188,471	\$10,878,534	5.97	%
Taxable investment securities	23,092,781	198,754	1.74	%	26,956,956	498,100	3.73	%
Tax exempt investment securities	46,889,732	943,856	4.06	%	39,951,599	975,835	4.93	%
Federal funds sold and overnight deposits	98,329	227	0.47	%	195,845	1,057	1.09	%
Other investments	975,150	32,276	6.67	%	975,150	32,275	6.67	%
Total	\$455,629,005	\$12,107,272	5.36	%	\$435,268,021	\$12,385,801	5.74	%
Interest-Bearing Liabilities								
NOW & money market funds	\$142,356,445	\$662,677	0.94	%	\$122,237,986	\$673,281	1.11	%
Savings deposits	54,997,242	84,100	0.31	%	52,878,309	79,780	0.30	%
Time deposits	153,572,331	1,700,269	2.23	%	171,601,349	2,567,829	3.02	%
Federal funds purchased and other borrowed funds	33,603,696	260,051	1.56	%	15,982,967	102,694	1.30	%
Repurchase agreements	19,131,010	95,302	1.00	%	18,970,474	135,344	1.44	%

Junior subordinated debentures	12,887,000	487,129	7.62	%	12,887,000	487,129	7.62	%

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

Total	\$417,412,471	\$3,324,584	1.61	%	\$395,462,212	\$4,082,673	2.08	%
Net interest income		\$8,782,688				\$8,303,128		
Net interest spread (2)			3.75	%			3.66	%
Net interest margin (3)			3.89	%			3.85	%

(1) Included in gross loans are non-accrual loans with an average balance of \$5,036,185 and \$2,446,493 for the six months ended 2010 and 2009,

respectively. Loans are stated before deduction of unearned discount and allowance for loan losses.

(2) Net interest spread is the difference between the yield on earning assets and the rate paid on interest-bearing liabilities.

(3) Net interest margin is net interest income divided by average earning assets.

The average volume of earning assets for the first six months of 2010 increased \$20.4 million or 4.7% compared to the same period of 2009, while the average yield decreased 38 basis points. The average volume of loans increased \$17.4 million or 4.7%, while the average yield decreased 24 basis points. Interest earned on the loan portfolio comprised 90.3% of total interest income for the first six months of 2010 and 87.8% for the 2009 comparison period. Loan activity was steady during the latter part of 2009 and into the first half of 2010 primarily in the residential and commercial real estate portfolios, contributing to the increase in the average loan portfolio. The average volume of the taxable investment portfolio (classified as available-for-sale) decreased approximately \$3.9 million or 14.3% between periods, and the average yield decreased 199 basis points. The Company sold its entire collateralized mortgage obligation (CMO) and mortgage-backed securities (MBS) investment portfolio classified as available-for-sale, for approximately \$14.6 million during the first half of 2009, and replaced it with \$13.0 million in U.S. Government Agency securities, accounting for a portion of the decrease in the average balances of the investment portfolio. The remaining decrease in average investments is due to maturities within the Company's available-for-sale portfolio, which were used to help fund loan growth. The average volume of the tax exempt investment portfolio (classified as held-to-maturity) increased \$6.9 million or 17.4%, due to new municipal investment for the Company, and the average tax equivalent yield decreased 87 basis points. Interest earned on tax exempt investments (which is presented on a tax equivalent basis) comprised 7.8% of total interest income for the first six months of 2010 compared to 7.9% for the same period in 2009.

In comparison, the average volume of interest bearing liabilities for the first six months of 2010 increased just under \$22.0 million or 5.6% over the 2009 comparison period, while the average rate paid on these accounts decreased 47 basis points. The average volume of NOW and money market funds increased \$20.1 million or 16.5% and the average rate paid decreased 17 basis points. This increase in volume was due in part to an increase in municipal deposits that correspond to the new municipal investments mentioned in the prior paragraph. The average volume of time deposits decreased \$18.0 million, or 10.5%, and the average rate paid on time deposits decreased 79 basis points. Competition for time deposits remains aggressive in the Company's market area and the Company has chosen to not pay up on these deposits and instead to replace them with other funding sources, primarily borrowings from the FHLBB. The Company also chose to replace the \$15.1 million in one-way CDARS funds at maturity with FHLBB advances. The average volume of federal funds purchased and other borrowed funds increased \$17.6 million or 110.3% from an average volume of just under \$16.0 million for the first six months of 2009 to \$33.6 million for the same period in 2010. Given the low rates on borrowed funds, both in overnight funds purchased and in long-term borrowings, the Company extended some of its overnight funds into two, three and five year advances to supplement its deposit funding. The Company also increased core deposits at the end of March 2010 with an \$11.2 million money market account from its affiliate, CFSG. The average balance on this account for the second quarter of 2010 was \$14.2 million.

The cumulative result of all these changes was an increase of nine basis points in the net interest spread and an increase of four basis points in the net interest margin. The increase in the loan portfolio and the change in the mix of interest bearing liabilities, primarily time deposits versus borrowed funds, helped to increase net interest income and

maintain a positive net interest spread and net interest margin despite a sustained low rate environment.

The following table summarizes the variances in interest income and interest expense on a fully tax-equivalent basis for the first six months of 2010 and 2009 resulting from volume changes in average assets and average liabilities and fluctuations in rates earned and paid.

Changes in Interest Income and Interest Expense

Rate / Volume	Variance Due to Rate (1)	Variance Due to Volume (1)	Total Variance
Interest-Earning Assets			
Loans	\$(461,038)	\$514,663	\$53,625
Taxable investment securities	(266,004)	(33,342)	(299,346)
Tax exempt investment securities	(201,598)	169,619	(31,979)
Federal funds sold and overnight deposits	(603)	(227)	(830)
Other investments	1	0	1
Total	\$(929,242)	\$650,713	\$(278,529)
Interest-Bearing Liabilities

Savings deposits	1,168	3,152	4,320
Time deposits	(668,189)	(199,371)	(867,560)
Federal funds purchased and other borrowed funds	43,764	113,593	157,357
Repurchase agreements	(41,188)	1,146	(40,042)
Capital lease obligations	24	(1,584)	(1,560)
Junior subordinated debentures	0	0	0
Total	\$(785,765)	\$27,676	\$(758,089)
Changes in net interest income	\$(143,477)	\$623,037	\$479,560

(1) Items which have shown a year-to-year increase in volume have variances allocated as follows:

Variance due to rate = Change in rate x new volume

Variance due to volume = Change in volume x old rate

Items which have shown a year-to-year decrease in volume have variances allocated as follows:

Variance due to rate = Change in rate x old volume

Variances due to volume = Change in volume x new rate

NON-INTEREST INCOME AND NON-INTEREST EXPENSE

Non-interest income decreased \$666,019 or just under 36.0% for the second quarter of 2010 compared to the second quarter of 2009, from \$1.85 million to \$1.19 million. A gain of \$447,420 from the sale of the Company's CMO and MBS portfolio during the second quarter of 2009 accounts for most of the decrease from 2009 to 2010. Non-interest income decreased \$585,774 or 19.5% for the first six months of 2010 compared to the same period in 2009 from just over \$3.0 million to \$2.4 million. The Company experienced strong loan activity during the first six months of 2009, primarily in residential mortgage loans sold to the secondary market, compared to the first six months of 2010, accounting for the decrease in income on sold loans of \$169,719 or 48.1% for the second quarter of 2010 compared to 2009 and \$373,861 for the first six months of 2010 compared to the first six months of 2009. The volume of loans sold during the first six months of 2009 was \$47.4 million compared to \$16.7 million in

the same period in 2010. The Company recognized income for the first six months of 2010 of \$37,679 from its trust and investment management affiliate, CFSG, and \$61,721 from its Supplemental Executive Retirement Program investment assets compared to losses for the first six months of 2009 of \$16,516 and \$113,660, respectively. Both increases reflect improved stock market conditions between periods.

Non-interest expense decreased \$394,653 or 8.3% to \$4.4 million for the second quarter of 2010 compared to \$4.8 million for the second quarter of 2009. Decreases are noted in all components of non-interest expense for the second quarter comparison periods including a decrease of \$69,825 or 30.7% in FDIC insurance expense. Non-interest expense for the first six months of 2010 decreased \$605,943 or 6.6% compared to the first six months of 2009 with expense figures of \$8.65 million and \$9.26 million, respectively. Decreases are again noted in all components of non-interest expense with loss on limited partnerships (a component of other expenses) recording the biggest decrease amounting to \$241,986 or 49.4% followed by FDIC insurance expense with a decrease of \$185,289 or approximately 37.0%. Salaries and wages decreased in both comparison periods due to retirements of long-time employees at the end of 2009. The amortization of the core deposit intangible associated with the LyndonBank acquisition decreased \$33,288 or 20.0% to \$133,152 for the second quarter of 2010 compared to \$166,440 for the second quarter of 2009 and \$66,576 or 20.0% to \$266,304 for the first six months of 2010 compared to \$332,880 for the first six months of 2009.

Management monitors all components of other non-interest expense; additionally, a quarterly review is performed to assure that the accruals for these expenses are accurate and timely. This helps alleviate the need to make significant adjustments to these accounts that in turn affect the net income of the Company.

APPLICABLE INCOME TAXES

The provision for income taxes changed from a tax benefit to a tax expense in both comparison periods. A tax benefit of \$25,992 versus a tax expense of \$12,076 was reported for the second quarter of 2009 and 2010, respectively. Figures for the six month comparison period include a tax benefit of \$220,838 for 2009 and a tax expense of \$134,286 for 2010. The Company receives tax credits for its investments in various low income housing partnerships which reduce taxes payable. From time to time, the Company has the opportunity to participate in a low income housing project that offers one-time historic tax credits. In 2008, the Company was given this opportunity through a local project, with historic tax credit for 2009 amounting to \$535,000, or \$133,750 quarterly. Total tax credits, including the one-time historic tax credit, recorded for the second quarter of 2009 and for the first six months amounted to \$251,688 and \$503,376, respectively, compared to regular tax credits for the second quarter of 2010 and the first six months of \$133,701 and \$267,402, respectively.

CHANGES IN FINANCIAL CONDITION

The following table reflects the composition of the Company's major categories of assets and liabilities as a percent of total assets or liabilities and shareholders' equity, as the case may be, as of the dates indicated:

	June 30, 2010		December 31, 2009		June 30, 2009	
Assets						
Loans (gross)*	\$385,782,686	77.51%	\$382,259,106	75.65%	\$369,105,295	77.01%
Available for Sale Securities	22,619,810	4.54%	23,974,830	4.74%	25,160,194	5.25%
Held to Maturity Securities	30,826,040	6.19%	44,766,250	8.86%	32,878,174	6.86%
*includes loans held for sale						

	June 30, 2010	December 31, 2009	June 30, 2009
Liabilities			

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

Time Deposits	\$146,740,333	29.48%	\$167,270,840	33.10%	\$170,845,738	35.65%

and						
Other Borrowed Funds	37,843,000	7.60%	13,411,000	2.65%	25,328,000	5.28%

The Company's loan portfolio increased \$3.5 million, or 0.9% from December 31, 2009 to June 30, 2010, and \$16.7 million, or 4.5%, from June 30, 2009 to June 30, 2010. The decrease in mortgage interest rates throughout 2009 triggered an increase in new loan activity during 2009, with an even larger increase in refinancing activity, especially in the residential loan portfolio. During the last quarter of 2009 and into the first quarter of 2010, the Company experienced an increase in loan activity within the commercial and residential mortgage loan portfolio that the Company retains in-house. Residential mortgage loan activity decreased during the second quarter of 2010, but commercial mortgage loan activity remained steady. Available-for-sale investments decreased \$1.4 million or 5.7% through maturities and sales from December 31, 2009 to June 30, 2010, and \$2.5 million or 10.1% year over year. Most of the maturities and sales during 2009 and 2010 were used to fund loan growth and reinvestment in U.S. Government Agency securities. Held-to-maturity securities decreased \$13.9 million or 31.1% during the first six months of 2010, and \$2.1 million or 6.2% year to year. The decrease in the held-to-maturity portfolio which consists of municipal investments is due to the annual municipal finance cycle as short-term municipal loans generally mature at the end of the second quarter and are not replaced until after the start of the third quarter. This portfolio has increased approximately \$22 million at the time this report was being prepared.

Time deposits decreased \$20.5 million or 12.3% from December 31, 2009 to June 30, 2010 and \$24.1 million or 14.1% from June 30, 2009 to June 30, 2010. Competitive interest rate programs at other financial institutions accounted for some of the decrease as the Company chose to seek alternate sources of funding (primarily FHLBB borrowings) to replace these higher cost deposits. Also affecting the time deposit balances in the comparison was the balance of one-way purchased funds in the CDARS program. At June 30, 2010, there were no funds in the one-way purchased funds program compared to \$15.1 million on December 31, 2009 and \$4.6 million on June 30, 2009. During the first quarter of 2010, as the \$15.1 million in purchased CDARS funds matured, they were replaced with FHLBB advances, which are included in the \$24.4 million increase in borrowed funds compared to year end 2009. Savings deposits increased \$4.5 million or 8.6% during the first six months of 2010 and \$1.9 million or 3.5% year to year. Demand deposits increased \$1.1 million or 2.1% during the first six months of 2010, compared to an increase of \$2.5 million or 4.9% year to year. NOW and money market funds reported a decrease of \$17.9 million or 12.3% for the first six months of 2010, while year over year an increase of \$21.5 million or 20.1% was reported. The Company's municipal accounts, which are primarily a component of NOW and money market funds, increased during the last half of 2009 to levels above the volume in the first quarter of 2009; however, due to normal cyclical activity, the volume on these accounts decreased during the first six months of 2010, accounting for most of the changes in both comparison periods. The year to date decrease was offset by a \$14.2 million money market account from the Company's affiliate, CFSG, that was established at the end of the first quarter of 2010. Other borrowed funds increased \$24.4 million or 182.2% from December 31, 2009 to June 30, 2010 and \$12.5 million or 49.41% year to year. The average cost of funds from FHLBB during 2009 and into 2010 was approximately 0.31%, causing the Company to rely more heavily on this source of funding as opposed to offering higher rates in order to replace maturing time deposits, including the \$15.1 million in purchased CDARS deposits. While the Company strives to keep its core customers, there was not as much emphasis placed on attracting rate shoppers.

RISK MANAGEMENT

Interest Rate Risk and Asset and Liability Management - Management actively monitors and manages its interest rate risk exposure and attempts to structure the balance sheet to maximize net interest income while controlling its

exposure to interest rate risk. The Company's Asset/Liability Management Committee (ALCO) is made up of the Executive Officers and all the Vice Presidents of the Bank. The ALCO formulates strategies to manage interest rate risk by evaluating the impact on earnings and capital of such factors as current interest rate forecasts and economic indicators, potential changes in such forecasts and indicators, liquidity, and various business strategies. The ALCO meets monthly to review financial statements, liquidity levels, yields and spreads to better understand, measure, monitor and control the Company's interest rate risk. In the ALCO process, the committee members apply policy limits set forth in the Asset, Liability, Liquidity and Investment policies approved by the Company's Board of Directors. The ALCO's methods for evaluating interest rate risk include an analysis of the effects of interest rate changes on net interest income and an analysis of the Company's interest rate sensitivity "gap", which provides a static analysis of the maturity and repricing characteristics of the entire balance sheet.

Interest rate risk represents the sensitivity of earnings to changes in market interest rates. As interest rates change, the interest income and expense streams associated with the Company's financial instruments also change, thereby impacting net interest income (NII), the primary component of the Company's earnings. Fluctuations in interest rates can also have an impact on liquidity. The ALCO uses an outside consultant to perform rate shock simulations to the Company's net interest income, as well as a variety of other analyses. It is the ALCO's function to provide the assumptions used in the modeling process. The ALCO utilizes the results of this simulation model to quantify the estimated exposure of NII and liquidity to sustained interest rate changes. The simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest-earning assets and interest-bearing liabilities reflected on the Company's balance sheet. All rate scenarios are simulated assuming a parallel shift of the yield curve; however further simulations are performed utilizing a flattening and steepening yield curve as well. This sensitivity analysis is compared to the ALCO policy limits which specify a maximum tolerance level for NII exposure over a 1-year horizon, assuming no balance sheet growth, given upward and downward shifts in interest rates depending on the current rate environment. The analysis also provides a summary of the Company's liquidity position. Furthermore, the analysis provides testing of the assumptions used in previous simulation models by comparing the projected NII with actual NII. The asset/liability simulation model provides management with an important tool for making sound economic decisions regarding the balance sheet.

The Company's Asset/Liability Policy has been enhanced with a contingency funding plan to help management prepare for unforeseen liquidity challenges, with modeling based on hypothetical severe liquidity crisis scenarios.

While management's assumptions are developed based upon current economic and local market conditions, the Company cannot provide any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change. This is especially true in light of the continued significant market volatility since the collapse of the financial markets in 2008 and the unprecedented, sustained low interest rate environment.

Credit Risk - A primary challenge of management is to reduce the exposure to credit loss within the loan portfolio. Management follows established underwriting guidelines, and exceptions to the policy must be approved in accordance with limits prescribed by the Board of Directors. The adequacy of the loan loss coverage is reviewed quarterly by the risk management committee of the Board of Directors and then presented to the full Board of Directors for approval. This committee meets to discuss, among other matters, potential exposures, historical loss experience, and overall economic conditions. Existing or potential problems are noted and addressed by senior management in order to assess the risk of probable loss or delinquency. A variety of loans are reviewed periodically by an independent firm in order to assure accuracy of the Company's internal risk ratings and compliance with various internal policies and procedures, as well as those set by the regulatory authorities. The Company also has a Credit Administration department whose function includes credit analysis and monitoring and reporting on the status of the loan portfolio including delinquent and non-performing loans. Credit risk may also arise from geographic concentration of loans. While the Company's loan portfolio is derived primarily from its primary market area in northern Vermont, geographic concentration is partially mitigated by the continued growth of the Company's loan portfolio in central Vermont, and through the year-end 2007 LyndonBank acquisition, which increased the level of

loans particularly in Caledonia County, and to a lesser extent in Lamoille and Franklin Counties. The Company also monitors concentrations of credit to individual borrowers, to various industries, and to owner and non-owner occupied commercial real estate.

The following table reflects the composition of the Company's loan portfolio as of the dates indicated:

	June 30, 2010		December 31, 2009	
	Total Loans	% of Total	Total Loans	% of Total
Construction & Land Development	\$ 14,389,283	3.73 %	\$ 16,868,447	4.41 %
Secured by Farm Land	9,014,505	2.34 %	10,038,998	2.63 %
1-4 Family Residential	217,873,117	56.47 %	216,458,286	56.62 %
Commercial Real Estate	100,072,269	25.94 %	97,620,300	25.54 %
Loans to Finance Agricultural Production	1,200,399	0.31 %	952,305	0.25 %
Commercial & Industrial Loans	29,858,571	7.74 %	26,496,269	6.93 %
Consumer Loans	12,963,415	3.36 %	13,634,490	3.57 %
All other loans	411,127	0.11 %	190,011	0.05 %
Total Gross Loans	385,782,686	100.00 %	382,259,106	100.00 %
Reserve for loan losses	(3,439,261)		(3,450,542)	
Unearned loan fees	(96,979)		(152,188)	
Net Loans	\$ 382,246,446		\$ 378,656,376	

Allowance for Loan Losses and Provisions - The Company maintains an allowance for loan losses at a level that management believes is appropriate to absorb losses inherent in the loan portfolio (See "Critical Accounting Policies"). Although the Company, in establishing the allowance, considers the inherent losses in individual loans and pools of loans, the allowance is a general reserve available to absorb all credit losses in the loan portfolio. No part of the allowance is segregated for, or allocated to, any particular loan or pools of loans.

When establishing the allowance each quarter the Company applies a combination of historical loss factors and qualitative factors to pools of loans including the residential mortgage, commercial real estate, commercial and industrial, and consumer loan and overdraft portfolios. The Company will shorten or lengthen its look back period for determining average portfolio historical loss rates as the economy either contracts or expands; during a period of economic contraction a shortening of the look back period may more conservatively reflect the current economic climate. In light of the recent recession, in late 2008 the Company modified its allowance methodology by shortening its historical look back period from five years to one to two years, and by also comparing loss rates to losses experienced during the last economic downturn, from 1999 to 2002. The highest loss rates experienced for these look back periods are applied to the various pools in establishing the allowance.

The Company then applies numerous qualitative factors to each of these segments of the loan portfolio. Those factors include the levels of and trends in delinquencies and non-accrual loans; criticized and classified assets; volumes and terms of loans; and the impact of any loan policy changes. Experience, ability and depth of lending personnel, levels of policy and documentation exceptions, national and local economic trends, the competitive and regulatory environments, and concentrations of credit are also factors considered.

Specific allocations to the reserve are made for impaired loans. Impaired loans are those that have been placed in non-accrual status. Commercial and commercial real estate loans are placed in non-accrual status when there is deterioration in the financial position of the borrower, payment in full of principal and interest is not expected, and/or principal or interest has been in default for 90 days or more. Such a loan need not be placed in non-accrual status if it is both well secured and in the process of collection. Residential mortgages and home equity loans are considered for non-accrual status at 90 days past due and are evaluated on a case by case basis to assure that the Company's net

income is not materially overstated. Once the loan is deemed impaired, the Company obtains current property appraisals and valuations on significant properties and considers the cost to carry and sell collateral in order to assess the level of specific allocations required. Consumer loans are not placed in non-accrual but are charged off by the time they reach 120 days past due.

The Company's impaired loans increased \$1.2 million or 30.9% during the first six months from \$3.8 million at December 31, 2009 to just over \$5.0 million as of June 30, 2010, reflecting the recent recession and measured recovery. The increase is principally related to two commercial real estate loans to one borrower totaling approximately \$1.1 million. The two loans carry 90% USDA Rural Development government guarantees amounting to \$998,699. Specific allocations to the reserve increased for the same period, from \$232,900 to \$252,100. The relatively low increase to the specific allocations reflects the guaranteed nature of the two newly impaired commercial real estate loans. Loans rewritten through a troubled debt restructuring in 2009 consisted of three loans to one borrower with a balance of \$629,457 as of December 31, 2009 and \$592,432 as of June 30, 2010. The combined restructured loan is being repaid according to the restructured terms. The impaired portfolio mix as of June 30, 2010 includes approximately 52% in residential real estate and 44% in commercial real estate compared to December 31, 2009 totals of approximately 65% residential real estate and 30% commercial real estate. Management reports increasing trends in delinquencies and the levels of non-performing loans and criticized and classified assets, which is consistent with the length and depth of the economic recession and the measured recovery; the related qualitative factors in the loan loss reserve analysis have been adjusted accordingly.

The Company is not contractually committed to lend additional funds to debtors with impaired, non-accrual or modified loans.

As of June 30, 2010 and December 31, 2009, the OREO balance was \$1,070,500 and \$743,000, respectively. The Company's OREO portfolio at June 30, 2010 consisted of three properties acquired through the normal foreclosure process amounting to \$510,500 and one former LyndonBank branch property in Derby, Vermont with a carrying value of \$560,000. During the first six months of 2010 the Company sold two foreclosed OREO properties that had carrying values totaling \$181,650. At December 31, 2009, the OREO portfolio consisted of two properties acquired through the normal foreclosure process amounting to \$158,000 and the former LyndonBank branch property in Derby, Vermont. This property was placed in OREO a short time after the merger, when that branch was consolidated with the Company's main office. The June 30, 2010 carrying value of the former branch property reflects a first quarter write down of \$25,000. The property is being actively marketed for sale.

The Company is committed to a conservative lending philosophy and maintains high credit and underwriting standards. As of June 30, 2010, the Company maintained a residential loan portfolio of \$217.9 million compared to \$216.5 million as of December 31, 2009 and a commercial real estate portfolio (including construction, land development and farm land loans) of \$123.5 million as of June 30, 2010 and \$124.5 million as of December 31, 2009, together accounting for approximately 90% of the total loan portfolio for each period.

The residential mortgage portfolio makes up the largest part of the overall loan portfolio and while it continues to have the lowest historical loss ratio of the portfolio segments, portfolio losses have been increasing with higher delinquencies, foreclosures and lower property values. The Company maintains a mortgage loan portfolio of traditional mortgage products and has not engaged in higher risk loans such as option ARM products, high loan-to-value products, interest only mortgages, subprime loans and products with deeply discounted teaser rates. In areas of the country where such risky products were originated, borrowers with little or no equity in their property have been defaulting on mortgages they can no longer afford, and are walking away from those properties as real estate values have fallen precipitously. While real estate values have declined in the Company's market area, the sound underwriting standards historically employed by the Company have mitigated the trends in defaults and property surrenders to the extent experienced elsewhere. The Company generally requires private mortgage insurance (PMI) on residential mortgages with loan-to-values exceeding 80%. A 90% loan-to-value residential mortgage product without PMI is only available to borrowers with excellent credit and low debt-to-income ratios and has not

been widely originated. Junior lien home equity products make up 22% of the Company's residential mortgage portfolio with maximum loan-to-value ratios (including senior liens) of 80%. While experiencing increasing delinquency and losses in this area, the residential mortgage portfolio has performed well in light of the extent of the severity of the recession and problem loan levels remain manageable.

Risk in the Company's commercial and commercial real estate loan portfolios is mitigated in part by using government guarantees issued by federal agencies such as the US Small Business Administration and USDA Rural Development. At June 30, 2010, the Company had \$19.9 million in guaranteed loans, compared to \$17.8 million at December 31, 2009.

The following table summarizes the Company's loan loss experience for the six months ended June 30,

	2010	2009		
Loans Outstanding End of Period	\$385,782,686	\$369,105,295		
Average Loans Outstanding During Period	\$384,573,013	\$367,188,471		
Non-Accruing Loans	\$5,029,876	\$2,895,041		
Loan Loss Reserve, Beginning of Period	\$3,450,542	\$3,232,932		
Loans Charged Off:				
Residential Real Estate	246,702	19,912		
Commercial Real Estate	147,397	5,063		
Commercial Loans not Secured by Real Estate	22,014	38,747		
Consumer Loans	45,340	85,120		
Total Loans Charged Off	461,453	148,842		
Recoveries:				
Residential Real Estate	3,396	496		
Commercial Real Estate	2,049	15,668		
Commercial Loans not Secured by Real Estate	1,938	3,512		
Consumer Loans	17,789	21,117		
Total Recoveries	25,172	40,793		
Net Loans Charged Off	436,281	108,049		
Provision Charged to Income	425,000	250,002		
Loan Loss Reserve, End of Period	\$3,439,261	\$3,374,885		
Net Charge Offs to Average Loans Outstanding	0.113	%	0.029	%
Provision Charged to Income as a Percent of Average Loans	0.111	%	0.068	%
Loan Loss Reserve to Average Loans Outstanding	0.894	%	0.919	%
Loan Loss Reserve to Non-Accruing Loans*	68.377	%	116.575	%

*The percentage for 2010 includes two loans that were transferred to non-accrual status during the first quarter of 2010 carrying 90% guarantees by USDA Rural Development which, if deducted, would increase the coverage to 85.3% as of June 30, 2010.

Given loan portfolio trends and the recent recession and stagnant recovery, the provision for loan losses was \$425,000 for the six months ended June 30, 2010 compared to \$250,002 for the six months ended June 30, 2009. The higher level of 2010 charge off activity is attributable largely to the resolution of numerous non-performing loans. While the reduction in both the Loan Loss Reserve balance and the reserve coverage ratios at June 30, 2010 compared to year-end 2009 is not directionally consistent with portfolio trends, management believes that second quarter 2010 charge off activity was unusually high, due to non-performing loan resolutions. Management will continue to monitor the activity of non-performing assets and adjust the provision in future periods as circumstances

warrant. The Company has an experienced collections department that continues to actively work with borrowers to resolve problem loans.

Non-performing assets for the comparison periods were as follows:

	June 30, 2010		December 31, 2009	
	Balance	Percent of Total	Balance	Percent of Total
Non-Accruing loans	\$5,029,876	88.26 %	\$3,843,820	87.32 %
Loans past due 90 days or more and still accruing	669,044	11.74 %	557,976	12.68 %
Total	\$5,698,920	100.00 %	\$4,401,796	100.00 %

Market Risk - In addition to credit risk in the Company's loan portfolio and liquidity risk, the Company's business activities also generate market risk. Market risk is the risk of loss in a financial instrument arising from adverse changes in market prices and rates, foreign currency exchange rates, commodity prices and equity prices. Changes in the capital markets result from events and conditions outside the Company's control or ability to predict with any certainty, such as changes in general economic conditions of growth or recession, inflation, regulatory or other government actions and changes in interest rates and government monetary policy. Market risk comprises many individual risks that, when combined, create a macroeconomic impact.

The Company's market risk arises primarily from interest rate risk inherent in its lending and deposit taking activities. During times of recessionary periods, a declining housing market can result in an increase in loan loss reserves or ultimately an increase in foreclosures. Interest rate risk is directly related to the different maturities and repricing characteristics of interest-bearing assets and liabilities, as well as to loan prepayment risks, early withdrawal of time deposits, and the fact that the speed and magnitude of responses to interest rate changes vary by product. The recent deterioration of the economy and disruption in the financial markets has heightened the Company's market risk. The Company actively monitors and manages its interest rate risk through the ALCO process.

During the first quarter of 2010, the market rates used to determine the fair value of the Company's mortgage servicing rights remained relatively stable and at levels higher than the end of 2009. Given this factor and the secondary market volume within the residential mortgage loan portfolio, a write up in the amount of \$104,176 was deemed appropriate as of March 31, 2010. By June 30, 2010, market rates fell to record lows requiring a write down of \$66,997. At such date, the net carrying value of the Company's mortgage servicing rights portfolio was \$895,909, compared to \$932,961 at year end 2009 and \$929,952 at June 30, 2009.

At June 30, 2010 and December 31, 2009, the Company's available-for-sale portfolio included two classes of Fannie Mae preferred stock with an aggregate book value of \$68,164, which reflected two other-than-temporary impairment write downs on the investment in prior periods. The fair market value of the Fannie Mae preferred stock as of June 30, 2010 was \$30,728, a decrease of \$40,760 over the December 31, 2009 fair market value of \$71,488. The decrease in value occurred shortly before the end of the quarter after the Federal Housing Finance Agency ordered Fannie Mae to delist its common and preferred stock from the New York Stock Exchange. Due to the fact that the volatility was recent, the stock price increased slightly over the low-point it reached immediately following the announcement of the delisting and the Company has the ability and intention to hold the investment for the foreseeable future, management did not record an other-than-temporary impairment on June 30, 2010.

FINANCIAL INSTRUMENTS WITH OFF-BALANCE-SHEET RISK

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit (including commercial and construction lines of credit),

standby letters of credit and risk-sharing commitments on certain sold loans. Such instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments. During the first six months of 2010, the Company did not engage in any activity that created any additional types of off-balance-sheet risk.

The Company generally requires collateral or other security to support financial instruments with credit risk. The Company's financial instruments or commitments whose contract amount represents credit risk as of June 30, 2010 were as follows:

	Contract or Notional Amount
Unused portions of home equity lines of credit	\$17,784,514
Other commitments to extend credit	27,046,198
Residential construction lines of credit	1,170,005
Commercial real estate and other construction lines of credit	31,140,711
Standby letters of credit and commercial letters of credit	1,088,509
Recourse on sale of credit card portfolio	389,730
MPF credit enhancement obligation, net of liability recorded	1,590,022

Since some commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The recourse provision under the terms of the sale of the Company's credit card portfolio in 2007 is based on total lines, not balances outstanding. The remaining recourse, which consists of business customers and Canadian customers, is subject to increase, but only to the extent that the Company, in its discretion, approves a requested increase by a customer whose credit line was still active and included in the recourse portfolio. Based on historical losses, and adjusting for current economic conditions, the Company does not expect any significant losses from this commitment.

LIQUIDITY AND CAPITAL RESOURCES

Managing liquidity risk is essential to maintaining both depositor confidence and stability in earnings. Liquidity management refers to the ability of the Company to adequately cover fluctuations in assets and liabilities. Meeting loan demand (assets) and covering the withdrawal of deposit funds (liabilities) are two key components of the liquidity management process. The Company's principal sources of funds are deposits, amortization and prepayment of loans and securities, maturities of investment securities, sales of loans available for sale, and earnings and funds provided from operations. Maintaining a relatively stable funding base, which is achieved by diversifying funding sources, competitively pricing deposit products, and extending the contractual maturity of liabilities, reduces the Company's exposure to roll over risk on deposits and limits reliance on volatile short-term borrowed funds. Short-term funding needs arise from declines in deposits or other funding sources and funding of loan commitments. The Company's strategy is to fund assets to the maximum extent possible with core deposits that provide a sizable source of relatively stable and low-cost funds. When funding needs, including loan demand, outpace deposit growth, it is necessary for the Company to use alternative funding sources, such as investment portfolio maturities, FHLBB borrowings and outside deposit funding such as CDARS deposits (described below), to meet these funding needs.

In order to attract deposits, the Company has from time to time taken the approach of offering deposit specials at competitive rates, in varying terms that fit within the balance sheet mix. The strategy of offering specials is meant to provide a means to retain deposits while not having to reprice the entire deposit portfolio. The Company recognizes

that with increasing competition for deposits, it may at times be desirable to utilize alternative sources of deposit funding to augment retail deposits and borrowings. One-way deposits purchased through the CDARS provide an alternative funding source when needed. Such deposits are generally considered a form of brokered deposits. The Company had no one-way funds on June 30, 2010 and \$15.1 million on December 31, 2009. In addition, two-way CDARS deposits allow the Company to provide FDIC deposit insurance in excess of account coverage limits by exchanging deposits with other CDARS members. At June 30, 2010, the entire balance of \$2.2 million in CDARS deposits represented exchanged deposits with other CDARS participating banks compared to \$2.1 million at December 31, 2009. During the first quarter of 2010, as the \$15.1 million in purchased deposits matured, they were replaced with FHLBB advances, which are included in the \$24.4 million increase in borrowed funds compared to year end 2009. Anticipating a possible increase in long-term rates due to a steepening yield curve, the Company extended \$18.0 million of short-term funding into longer-term FHLBB advances with two, three and five year maturities. Management believes this will help protect the balance sheet from interest-rate risk in the event of a rising rate environment. This reallocation of funds contributed to the decrease in certificates of deposit during the comparison period.

During the first six months of 2010, the Company's loan portfolio increased \$3.5 million or 0.9%. Demand for residential mortgages was moderate compared to the level of activity in 2009, while commercial mortgage demand increased during this period and remains favorable into the third quarter of 2010. The available-for-sale investment portfolio decreased \$1.4 million or 5.7% and the held-to-maturity investment portfolio decreased \$13.9 million or 31.1% compared to 2009 year end levels. Maturities in the available-for-sale portfolio were used in part to fund loan growth. The decrease in the held-to-maturity investments, which is primarily municipal investments, is attributable to the annual municipal finance cycle. Short-term municipal investments generally mature at the end of the second quarter and are not replaced until the beginning of the third quarter. During July, these investments have increased approximately \$22 million with both renewals and new municipal investments.

On the liability side, savings deposits increased \$4.5 million or 8.6%, while NOW and money market accounts decreased \$17.9 million or 12.3% and time deposits decreased \$20.5 million or 12.3%. Aggressive pricing from other financial institutions for time deposits, as well as a shift of maturing one-way CDARS to alternate sources of funding, were both factors in the decrease in deposits. Other borrowed funds (the alternate funding source), increased \$24.4 million or 182.2% for the first six months of 2010. The low cost of funds at FHLBB, which remains at approximately 0.31%, caused the Company to utilize this source of funding over the higher cost time deposits.

In 2009 the Company established a borrowing line with the FRBB to be used as a contingency funding source. To secure this Borrower-in-Custody arrangement, the Company pledged eligible commercial loans, commercial real estate loans and home equity loans, resulting in an available line of \$68.1 million as of June 30, 2010 and \$71.0 million as of December 31, 2009. Credit advances in the FRBB lending program are overnight advances with interest chargeable at the primary credit rate (generally referred to as the discount rate), currently 75 basis points. As of June 30, 2010 and December 31, 2009, the Company did not have any outstanding borrowings against this line.

As a member of the FHLBB, the Company has access to pre-approved lines of credit. The Company had a \$500,000 unsecured Federal Funds line with an available balance of the same amount at June 30, 2010 and year end 2009. Interest is chargeable at a rate determined daily, approximately 25 basis points higher than the rate paid on federal funds sold. As of June 30, 2010 and December 31, 2009, additional borrowing capacity of approximately \$90.3 million and \$90.9 million, respectively, less outstanding advances, through the FHLBB was secured by the Company's qualifying loan portfolio.

Given the Federal Funds rate prevailing in 2010, the Company extended a portion of its overnight funding into \$28 million in long-term advances scheduled to mature within five years, with the remainder falling into short-term FHLBB advances and overnight funding at this time.

Edgar Filing: COMMUNITY BANCORP /VT - Form 10-Q

The following table reflects the Company's outstanding FHLBB advances against the respective lines as of the dates indicated:

	June 30, 2010	December 31, 2010	June 30, 2010
Long-Term Advances			
FHLBB term borrowing, 2.13% fixed rate, due January 31, 2011	\$10,000,000	\$10,000,000	\$10,000,000
Community Investment Program borrowing, 7.67% fixed rate, due November 16, 2012	10,000	10,000	10,000
FHLBB term borrowing, 1.00% fixed rate, due January 27, 2012	6,000,000	0	0
FHLBB term borrowing, 1.71% fixed rate, due January 27, 2013	6,000,000	0	0
FHLBB term borrowing, 2.72% fixed rate, due January 27, 2015	6,000,000	0	0
	28,010,000	10,010,000	10,010,000
Short-Term Advances			
FHLBB term borrowing, 0.31% fixed rate, due July 23, 2010	5,000,000	0	0
Overnight Borrowings			
Federal funds purchased (FHLBB), 0.3100%, 0.3125%, and .2813%, respectively	4,833,000	3,401,000	15,318,000
Total	\$37,843,000	\$13,411,000	\$26,328,000

Under a separate agreement with the FHLBB, the Company has the authority to collateralize public unit deposits, up to its FHLBB borrowing capacity (\$90.3 million at June 30, 2010, less outstanding advances noted above), with letters of credit issued by the FHLBB. At June 30, 2010 approximately \$16.6 million of eligible collateral was pledged as collateral to the FHLBB to secure the Company's obligations relating to these letters of credit.

Other alternative sources of funding come from unsecured Federal Funds lines with one unaffiliated correspondent bank in the amount of \$3.5 million. There was no balance outstanding on this line at June 30, 2010.

The following table illustrates the changes in shareholders' equity from December 31, 2009 to June 30, 2010:

Balance at December 31, 2009 (book value \$7.56 per common share)	\$36,889,838
Net income	1,671,445
Issuance of stock through the Dividend Reinvestment Plan	353,028
Dividends declared on common stock	(1,094,320)
Dividends declared on preferred stock	(93,750)
Change in unrealized gain on available-for-sale securities, net of tax	(16,864)
Balance at June 30, 2010 (book value \$7.68 per common share)	\$37,709,377

On June 8, 2010, the Company declared a cash dividend of \$0.12 on common stock payable on August 1, 2010, to shareholders of record as of July 15, 2010, which is accrued in the financial statements at June 30, 2010.

The primary source of funds for the Company's payment of dividends to its shareholders is dividends paid to the Company by the Bank. The Bank, as a national bank, is subject to certain dividend restrictions under the National Bank Act and regulations of the Comptroller of the Currency (OCC). Under such restrictions, the Bank may not, without the prior approval of the OCC, declare dividends in excess of the sum of the current year's earnings (as defined) plus the retained earnings (as defined) from the prior two years. The Company is also subject to regulatory

restrictions applicable to payment of dividends by bank holding companies, some circumstances, such as where dividends would exceed current period earnings, or where the bank holding company is in a troubled financial condition.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and a so-called leverage ratio of Tier 1 capital (as defined) to average assets (as defined). Under current guidelines, banks must maintain a risk-based capital ratio of 8.0%, of which at least 4.0% must be in the form of core capital (as defined).

Regulators have also established minimum capital ratio guidelines for FDIC-insured banks under the prompt corrective action provisions of the Federal Deposit Insurance Act, as amended. These minimums are a total risk-based capital ratio of 10.0%, a Tier I risk-based capital ratio of 6%, and a leverage ratio of 5%. As of June 30, 2010, the Company's Subsidiary was deemed well capitalized under the regulatory framework for prompt corrective action. There are no conditions or events since that time that management believes have changed the Subsidiary's classification.

The regulatory capital ratios of the Company and its subsidiary as of June 30, 2010 and December 31, 2009 exceeded regulatory guidelines and are presented in the following table.

	Actual		Minimum For Capital Adequacy Purposes:		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions:	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in Thousands)						
As of June 30, 2010:						
Total capital (to risk-weighted assets)						
Consolidated	\$41,625	11.91%	\$27,959	8.00%	N/A	N/A
Bank	\$41,280	11.83%	\$27,910	8.00%	\$34,887	10.00%
Tier I capital (to risk-weighted assets)						
Consolidated	\$38,160	10.92%	\$13,980	4.00%	N/A	N/A
Bank	\$37,815	10.84%	\$13,955	4.00%	\$20,932	6.00%
Tier I capital (to average assets)						
Consolidated	\$38,160	7.61%	\$20,062	4.00%	N/A	N/A
Bank	\$37,815	7.55%	\$20,042	4.00%	\$25,053	5.00%

	Actual		Minimum For Capital Adequacy Purposes:		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions:	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2009:						
Total capital (to risk-weighted assets)						
Consolidated	\$40,326	11.57%	\$27,877	8.00%	N/A	N/A
Community National Bank	\$40,336	11.60%	\$27,811	8.00%	\$34,764	10.00%
Tier I capital (to risk-weighted assets)						
Consolidated	\$36,875	10.58%	\$13,939	4.00%	N/A	N/A
Community National Bank	\$36,885	10.61%	\$13,906	4.00%	\$20,858	6.00%
Tier I capital (to average assets)						
Consolidated	\$36,875	7.50%	\$19,674	4.00%	N/A	N/A
Community National Bank	\$36,885	7.51%	\$19,643	4.00%	\$24,554	5.00%

The Company intends to maintain a capital resource position in excess of the minimums shown above. Consistent with that policy, management will continue to anticipate the Company's future capital needs.

From time to time the Company may make contributions to the capital of Community National Bank. At present, regulatory authorities have made no demand on the Company to make additional capital contributions.

ITEM 3. Quantitative and Qualitative Disclosures about Market Risk

The Company's management of the credit, liquidity and market risk inherent in its business operations is discussed in Part 1, Item 2 of this report under the captions "RISK MANAGEMENT" and "FINANCIAL INSTRUMENTS WITH OFF BALANCE SHEET RISK", which are incorporated herein by reference. Management does not believe that there have been any material changes in the nature or categories of the Company's risk exposures from those disclosed in the Company's 2009 annual report on form 10-K/A.

ITEM 4. Controls and Procedures

Disclosure Controls and Procedures

Management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"). As of June 30, 2010, an evaluation was performed under the supervision and with the participation of management, including the principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, management concluded that its disclosure controls and procedures as of June 30, 2010 were effective in ensuring that material information required to be disclosed in the reports it files with the Commission under the Exchange Act was recorded, processed, summarized, and reported on a timely basis.

For this purpose, the term "disclosure controls and procedures" means controls and other procedures of the Company that are designed to ensure that information required to be disclosed by it in the reports that it files or submits under the Exchange Act (15 U.S.C. 78a et seq.) is recorded, processed, summarized and reported, within the time periods

specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the quarter ended June 30, 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

In the normal course of business the Company and its subsidiary are involved in litigation that is considered incidental to their business. Management does not expect that any such litigation will be material to the Company's consolidated financial condition or results of operations.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information as to purchases of the Company's common stock during the quarter ended June 30, 2010, by the Company and by any affiliated purchaser (as defined in SEC Rule 10b-18):

For the period:	Total Number of Shares Purchased(1)(2)	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan	Maximum Number of Shares That May Yet Be Purchased Under the Plan at the End of the Period
April 1 – April 30	7,490	\$ 11.68	N/A	N/A
May 1 – May 31	0	0.00	N/A	N/A
June 1 – June 30	6,350	9.65	N/A	N/A
Total	13,840	\$ 10.75	N/A	N/A

(1) All 13,840 shares were purchased for the account of participants invested in the Company Stock Fund under the Company's Retirement Savings Plan by or on behalf of the Plan Trustee, the Human Resources Committee of Community National Bank. Such share purchases were facilitated through CFSG, which provides certain investment advisory services to the Plan. Both the Plan Trustee and CFSG may be considered affiliates of the Company under Rule 10b-18.

(2) Shares purchased during the period do not include fractional shares repurchased from time to time in connection with the participant's election to discontinue participation in the Company's Dividend Reinvestment Plan.

ITEM 6. Exhibits

The following exhibits are filed with this report:

Exhibit 31.1 - Certification from the Chief Executive Officer of the Company pursuant to section 302 of the Sarbanes-Oxley Act of 2002

Exhibit 31.2 - Certification from the Chief Financial Officer of the Company pursuant to section 302 of the Sarbanes-Oxley Act of 2002

Exhibit 32.1 - Certification from the Chief Executive Officer of the Company pursuant to 18 U.S.C., Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002*

Exhibit 32.2 - Certification from the Chief Financial Officer of the Company pursuant to 18 U.S.C., Section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002*

*This exhibit shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section, and shall not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Securities Act of 1934.
