FORM 10-Q

(Mark One)

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For The Quarterly Period Ended September 30, 2013

OR

TRANSITION REPORT PURSANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For The Transition Period From _____ To _____.

Commission File number 0-11733

CITY HOLDING COMPANY

(Exact name of registrant as specified in its charter)

West Virginia

55-0619957

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

25 Gatewater Road

Charleston, West Virginia

25313

(Address of principal executive offices)

(Zip Code)

(304) 769-1100

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant has (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Edgar Filing: CITY HOLDING CO - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date.

Common stock, \$2.50 Par Value – 15,730,090 shares as of November 1, 2013.

FORWARD-LOOKING STATEMENTS

All statements other than statements of historical fact included in this Quarterly Report on Form 10-Q, including statements in Management's Discussion and Analysis of Financial Condition and Result of Operations are, or may be deemed to be, forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such information involves risks and uncertainties that could result in the Company's actual results differing from those projected in the forward-looking statements. Important factors that could cause actual results to differ materially from those discussed in such forward-looking statements include, but are not limited to: (1) the Company may incur additional loan loss provision due to negative credit quality trends in the future that may lead to a deterioration of asset quality; (2) the Company may incur increased charge-offs in the future; (3) the Company could have adverse legal actions of a material nature; (4) the Company may face competitive loss of customers; (5) the Company may be unable to manage its expense levels; (6) the Company may have difficulty retaining key employees; (7) changes in the interest rate environment may have results on the Company's operations materially different from those anticipated by the Company's market risk management functions; (8) changes in general economic conditions and increased competition could adversely affect the Company's operating results; (9) changes in other regulations and government policies affecting bank holding companies and their subsidiaries, including changes in monetary policies, could negatively impact the Company's operating results; (10) the Company may experience difficulties growing loan and deposit balances; (11) the current economic environment poses significant challenges for us and could adversely affect the Company's financial condition and results of operations; (12) continued deterioration in the financial condition of the U.S. banking system may impact the valuations of investments the Company has made in securities of other financial institutions resulting in either actual losses or other than temporary impairments on such investments; (13) the effects of the Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") adopted by the United States Congress; and (14) the integration of the operations of City Holding and Community Financial may be more difficult than anticipated. Forward-looking statements made herein reflect management's expectations as of the date such statements are made. Such information is provided to assist stockholders and potential investors in understanding current and anticipated financial operations of the Company and is included pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances that arise after the date such statements are made.

Table of Contents

Notes to Consolidated Financial Statements (Unaudited)
September 30, 2013

Note A –Basis of Presentation

The accompanying consolidated financial statements, which are unaudited, include all of the accounts of City Holding Company (“the Parent Company”) and its wholly-owned subsidiaries (collectively, “the Company”). All material intercompany transactions have been eliminated. The consolidated financial statements include all adjustments that, in the opinion of management, are necessary for a fair presentation of the results of operations and financial condition for each of the periods presented. Such adjustments are of a normal recurring nature. The results of operations for nine months ended September 30, 2013 are not necessarily indicative of the results of operations that can be expected for the year ending December 31, 2013. The Company’s accounting and reporting policies conform with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Such policies require management to make estimates and develop assumptions that affect the amounts reported in the consolidated financial statements and related footnotes. Actual results could differ from management’s estimates.

The consolidated balance sheet as of December 31, 2012 has been derived from audited financial statements included in the Company’s 2012 Annual Report to Shareholders. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles have been omitted. These financial statements should be read in conjunction with the financial statements and notes thereto included in the 2012 Annual Report of the Company.

Certain amounts in the financial statements have been reclassified. Such reclassifications had no impact on shareholders’ equity or net income for any period.

Note B - Recent Accounting Pronouncements

In January 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-01, "Balance Sheet (Topic 210) - Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities." This ASU requires an entity to disclose both the gross and net information about financial instruments, such as derivatives, that are eligible for offset in the balance sheet. ASU No. 2013-01 became effective for the Company on January 1, 2013. The adoption of ASU No. 2013-01 did not have a material impact on the Company's financial statements. See Note I - Derivative Instruments for applicable disclosures.

In February 2013, the FASB issued ASU No. 2013-02, "Comprehensive Income (Topic 220) - Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income." This ASU requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amounts reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. ASU No. 2013-02 became effective for the Company beginning on January 1, 2013. The adoption of ASU No. 2013-02 did not have a material impact on the Company's financial statements.

In July 2013, the FASB issued ASU No. 2013-10, "Derivatives and Hedging (Topic 815) - Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes." This ASU permits the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) to be used as a U.S.

benchmark interest rate for hedge accounting purposes under Topic 815, in addition to interest rates on direct Treasury obligations of the U.S. government and the London Interbank Offered Rate ("LIBOR"). ASU 2013 is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013 and did not have a material impact on the Company's financial statements.

In July 2013, the FASB issued ASU No. 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." This ASU requires entities to present an unrecognized tax benefit, or a portion of an unrecognized tax benefit, as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, subject to certain exceptions. This ASU will become effective for the Company beginning on January 1, 2014. The adoption of ASU No. 2013-11 is not expected to have a material impact on the Company's financial statements.

Table of Contents

Note C –Acquisitions

On May 31, 2012, the Company acquired 100% of the outstanding common and preferred stock of Virginia Savings Bancorp, Inc. and its wholly owned subsidiary, Virginia Savings Bank (collectively, “Virginia Savings”). As a result of this acquisition, the Company acquired five branches which expanded its footprint into Virginia. At the time of closing, Virginia Savings had total assets of \$132 million, loans of \$82 million, deposits of \$120 million and shareholders’ equity of \$11 million.

The total transaction was valued at \$12.4 million, consisting of cash of \$4.7 million and approximately 240,000 shares of common stock valued at \$7.7 million. The common stock was valued based on the closing price of \$32.18 for the Company’s common shares on May 31, 2012.

On January 10, 2013, the Company acquired 100% of the outstanding common and preferred stock of Community Financial Corporation and its wholly owned subsidiary, Community Bank (collectively, "Community"). As a result of this acquisition, the Company acquired eight branches along the I-81 corridor in western Virginia and two branches in Virginia Beach, Virginia. At the time of closing, Community had total assets of \$460 million, loans of \$410 million, deposits of \$380 million and shareholders' equity of \$53 million. Community shareholders received 0.1753 shares of the Company's common stock for each share of Community Financial Corporation stock, resulting in the issuance of approximately 767,000 shares of the Company's common stock valued at \$27.8 million. The common stock was valued based on the closing price of \$36.23 for the Company's common stock on January 9, 2013. In conjunction with this acquisition, the Company repurchased \$12.7 million of Community preferred stock previously issued to the U.S. Department of Treasury ("Treasury Department"). A related warrant issued by Community to the Treasury Department has been converted into a warrant to purchase 61,565 shares of the Company's common stock, with an exercise price of \$30.80 per share and an expiration period of ten years, which was subsequently reduced to six years. Based on the preliminary purchase price allocation, the Company recorded an estimate of goodwill of \$9.3 million and a core deposit intangible of \$2.7 million as a result of this acquisition. The Company has recorded estimates of the fair values of the acquired assets and liabilities. These fair value estimates are provisional amounts based on third-party valuations that are currently under review.

Table of Contents

The purchase price of both acquisitions has been allocated as follows (in thousands):

	Virginia Savings May 31, 2012	(preliminary) Community January 10, 2013	Total

Acquired Loans

In determining the estimated fair value of the acquired loans, management considered several factors, such as estimated future credit losses, estimated prepayments, remaining lives of the acquired loans, estimated value of the underlying collateral and the net present value of the cash flows expected to be received. For smaller loans not specifically reviewed, management grouped the loans into their respective homogeneous loan pool and applied a fair value estimate accordingly.

Acquired loans are accounted for using one of the two following accounting standards:

- ASC Topic 310-20 is used to value loans that do not have evidence of credit quality deterioration. For these loans, (1) the difference between the fair value of the loan and the amortized cost of the loan would be amortized or accreted into income using the interest method.
- (2) ASC Topic 310-30 is used to value loans that have evidence of credit quality deterioration. For these loans, the expected cash flows that exceed the fair value of the loan represent the accretable yield, which is recognized as interest income on a level-yield basis over the expected cash flow periods of the loans. The non-accretable difference represents the difference between the contractually required principal and interest payments and the cash flows expected to be collected based upon management's estimation. Subsequent decreases in the expected cash flows will require the Company to evaluate the need for additions to the Company's allowance for loan

losses. Subsequent increases in the expected cash flows will result in a reversal of the provision for loan losses to the extent of prior charges with a corresponding adjustment to the accretable yield, which will result in the recognition of additional interest income over the remaining lives of the loans.

Table of Contents

The following table presents the purchased credit-impaired loans acquired in conjunction with both acquisitions (in thousands):

	Virginia	Community	Total
Contractually required principal and interest	\$11,567	\$58,014	\$69,581
Contractual cash flows not expected to be collected (non-accretable difference)	(3,973)	(20,724)	(24,697)
Expected cash flows	7,594	37,290	44,884
Interest component of expected cash flows (accretable difference)	(954)	(5,587)	(6,541)
Estimated fair value of purchased credit impaired loans acquired	\$6,640	\$31,703	\$38,343

Acquired Deposits

The fair values of non-time deposits approximated their carrying value at the acquisition date. For time deposits, the fair values were estimated based on discounted cash flows, using interest rates that are currently being offered compared to the contractual interest rates. Based on these analyses, management recorded a premium on time deposits acquired of \$2.3 million and \$1.1 million, for the Virginia Savings and Community acquisitions, respectively, each of which is being amortized over five years.

Core Deposit Intangible

The Company believes that the customer relationships with the deposits acquired have an intangible value. In connection with the acquisition, the Company recorded a core deposit intangible asset of \$1.3 million and \$2.7 million, for Virginia Savings and Community, respectively. Each of the core deposit intangible assets represent the value that the acquiree had with their deposit customers. The fair value was estimated based on a discounted cash flow methodology that considered type of deposit, deposit retention and the cost of the deposit base. The core deposit intangible is being amortized over ten years, with an annual charge of less than \$0.7 million per year. The following table presents a rollforward of the Company's intangible assets from the beginning of the year (in thousands):

	Intangible Assets
Balance, beginning of period	\$2,069
Core deposit intangible acquired in conjunction with the acquisition of Community	2,711
Amortization expense	(779)
Balance, end of period	\$4,001

Goodwill

Under GAAP, management has up to twelve months following the date of the acquisition to finalize the fair values of acquired assets and liabilities. The measurement period ends as soon as the Company receives information it was seeking about facts and circumstances that existed as of the acquisition date or learns more information is not obtainable. Any subsequent adjustments to the fair value of the acquired assets and liabilities, intangible assets or other purchase accounting adjustments during the measurement period will result in adjustments to the goodwill recorded. The measurement period is limited to one year from the acquisition date. The goodwill recorded in conjunction with the Virginia Savings and Community acquisitions is not expected to be deductible for tax purposes. The following table presents a rollforward of goodwill from the beginning of the year (in thousands):

	Goodwill
Balance, beginning of period	\$62,988

Edgar Filing: CITY HOLDING CO - Form 10-Q

Adjustment to goodwill acquired in conjunction with the acquisition of Virginia Savings	142
Goodwill acquired in conjunction with the acquisition of Community	9,289
Balance, end of period	\$72,419

Table of Contents

Merger Related Costs

During the three and nine months ended September 30, 2013, the Company incurred less than \$0.1 million and \$5.5 million of merger-related costs in connection with the Community acquisition. These costs were primarily for severance (\$2.5 million), professional fees (\$1.4 million) and data processing costs (\$1.1 million).

During the three and nine months ended September 30, 2012, the Company incurred \$0.2 million and \$4.3 million of merger-related costs in the connection with the Virginia Savings acquisition. These costs were primarily for severance (\$0.9 million), professional fees (\$0.9 million) and data processing costs (\$2.3 million).

Marketable equity securities consist of investments made by the Company in equity positions of various community banks. Included within this portfolio are meaningful (2-5%) ownership positions in the following community bank holding companies: First National Corporation (FXNC) and First United Corporation (FUNC).

During the nine months ended September 30, 2013, the Company did not record any credit-related net investment impairment losses. During the nine months ended September 30, 2012, the Company recorded \$0.6 million in credit-related net investment impairment losses. The charges deemed to be other-than-temporary were related to pooled bank trust preferred securities with a remaining carrying value of \$5.6 million at September 30, 2012. The credit-related net impairment charges related to the pooled bank trust preferred securities were based on the Company's quarterly reviews of its investment securities for indications of losses considered to be other-than-temporary. Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other-than-temporary would be reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers, among other things (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition, capital strength, and near-term (12 months) prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings potential; (iii) the historical volatility in the market value of the investment and/or the liquidity or illiquidity of the investment; (iv) adverse conditions specifically related to the security, an industry, or a geographic area; or (v) the intent to sell the investment security and if it's more likely than not that the Company will

not have to sell the security before recovery of its cost basis. In addition, management also employs a continuous monitoring process in regards to its marketable equity securities, specifically its portfolio of regional community bank holdings. Although the regional community bank stocks that are owned by the Company are publicly traded, the trading activity for these stocks is minimal, with trading volumes of less than 0.1% of each respective company being traded on a daily basis. Another factor influencing the market value of these equity securities is a depressed stock market, particularly in the smaller community bank financial sector. As part of management's review process for these securities, management reviews the financial condition of each respective regional community bank for any indications of financial weakness.

Table of Contents

Management has the ability and intent to hold the securities classified as held to maturity until they mature, at which time the Company will receive full value for the securities. Furthermore, as of September 30, 2013, management does not intend to sell an impaired security and it is not more than likely that it will be required to sell the security before the recovery of its amortized cost basis. The unrealized losses on debt securities are primarily the result of interest rate changes, credit spread widening on agency-issued mortgage related securities, general financial market uncertainty and unprecedented market volatility. These conditions will not prohibit the Company from receiving its contractual principal and interest payments on its debt securities. The fair value is expected to recover as the securities approach their maturity date or repricing date. As of September 30, 2013, management believes the unrealized losses detailed in the table above are temporary and no impairment loss has been recognized in the Company's consolidated income statement. Should the impairment of any of these securities become other-than-temporary, the cost basis of the investment will be reduced and the resulting loss recognized in net income in the period of the other-than-temporary impairment is identified, while any noncredit loss will be recognized in other comprehensive income.

At September 30, 2013, the book value of the Company's five pooled trust preferred securities totaled \$4.2 million with an estimated fair value of \$2.3 million. All of these securities are mezzanine tranches. Pooled trust preferred securities represent beneficial interests in securitized financial assets that the Company analyzes within the scope of ASC 320, "Investments-Debt and Equity Securities" and are evaluated quarterly for other-than-temporary-impairment ("OTTI"). Management performs an analysis of OTTI utilizing its internal methodology as described below to estimate expected cash flows to be received in the future. The Company reviews each of its pooled trust preferred securities to determine if an OTTI charge would be recognized in current earnings in accordance with ASC 320, "Investments-Debt and Equity Securities". There is a risk that continued collateral deterioration could cause the Company to recognize additional OTTI charges in earnings in the future.

When evaluating pooled trust preferred securities for OTTI, the Company determines a credit related portion and a noncredit related portion. The credit related portion is recognized in earnings and represents the difference between the present value of expected future cash flows and the amortized cost basis of the security. The noncredit related portion is recognized in other comprehensive income, and represents the difference between the book value and the fair value of the security less the amount of the credit related impairment. The determination of whether it is probable that an adverse change in estimated cash flows has occurred is evaluated by comparing estimated cash flows to those previously projected as further described below. The Company considers this process to be its primary evidence when determining whether credit related OTTI exists. The results of these analyses are significantly affected by other variables such as the estimate of future cash flows, credit worthiness of the underlying issuers and determination of the likelihood of defaults of the underlying collateral.

The Company utilizes a third party model to compute the present value of expected cash flows which considers the structure and term of each of the five respective pooled trust preferred securities and the financial condition of the underlying issuers. Specifically, the third party model details interest rates, principal balances of note classes and underlying issuers, the timing and amount of interest and principal payments of the underlying issuers, and the allocation of the payments to the note classes. The current estimate of expected cash flows is based on the most recent trustee reports and any other relevant market information including announcements of interest payment deferrals or defaults of underlying trust preferred securities. For issuing banks that have defaulted, management generally assumes no recovery. For issuing banks that have deferred its interest payments, management excludes the collateral balance associated with these banks and assumes no recoveries of such collateral balance in the future. The exclusion of such issuing banks in a current deferral position is based on such bank experiencing a certain level of financial difficulty that raises doubt about its ability to satisfy its contractual debt obligation, and accordingly, the Company excludes the associated collateral balance from its estimate of expected cash flows. Other assumptions used in the estimate of expected cash flows include expected future default rates and prepayments. Specifically, the model assumes annual prepayments of 1.0% with 100% at maturity and assumes 150 basis points of additional annual defaults from banks

that are currently not in default or deferral. In addition, the model assumes no recoveries except for one trust preferred security which assumes that one of the banks currently deferring will cure such positions. Management compares the present value of expected cash flows to those previously projected to determine if an adverse change in cash flows has occurred. If an adverse change in cash flows has occurred, management determines the credit loss to be recognized in the current period and the portion related to noncredit factors to be recognized in other comprehensive income.

The following table presents a progression of the credit loss component of OTTI on debt and equity securities recognized in earnings during the nine months ended September 30, 2013 and for the year ended December 31, 2012 (in thousands). The credit loss component represents the difference between the present value of expected future cash flows and the amortized cost basis of the security. The credit component of OTTI recognized in earnings during a period is presented in two parts based upon whether the credit impairment in the current period is the first time the security was credit impaired (initial credit impairment) or if there is additional credit impairment on a security that was credit impaired in previous periods.

(1)

The differences noted consist of unrealized gains (losses) recorded at September 30, 2013 and noncredit other-than-temporary impairment losses recorded subsequent to April 1, 2009 that have not been reclassified as credit losses.

(2) Performing collateral is defined as total collateral minus all collateral that has been called, is currently deferring, or currently in default. This model for this security assumes that all collateral that is currently deferring will default with a zero recovery rate. The underlying issuers can cure, thus this bond could recover at a higher percentage upon default than zero.

(3) Performing collateral is defined as total collateral minus all collateral that has been called, is currently deferring, or currently in default. The model for this security assumes that one of the banks that is currently deferring will cure. If additional underlying issuers cure, this bond could recover at a higher percentage.

(4) Excess subordination is defined as the additional defaults/deferrals necessary in the next reporting period to deplete the entire credit enhancement (excess interest and over-collateralization) beneath our tranche within each pool to the point that would cause a "break in yield." This amount assumes that all currently performing collateral continues to perform. A break in yield means that our security would not be expected to receive all the contractual cash flows (principal and interest) by maturity. The "percent of current performing collateral" is the ratio of the "excess subordination amount" to current performing collateral—a higher percent means there is more excess subordination to absorb additional defaults/deferrals, and the better our security is protected from loss.

(5) No other-than-temporary impairment losses were recognized during the nine months ended September 30, 2013. Other-than-temporary impairment losses of \$11,000 were recognized during the year ended December 31, 2012.

(6) No other-than-temporary impairment losses were recognized during the nine months ended September 30, 2013. Other-than-temporary impairment losses of \$565,000 were recognized during the year ended December 31, 2012.

Table of Contents

The amortized cost and estimated fair value of debt securities at September 30, 2013, by contractual maturity, are shown in the following table (in thousands). Expected maturities will differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties. Mortgage-backed securities have been allocated to their respective maturity groupings based on their contractual maturity.

	Cost	Estimated Fair Value
Securities Available-for-Sale		
Due in one year or less	\$5,566	\$5,581
Due after one year through five years	24,206	24,677
Due after five years through ten years	36,483	37,258
Due after ten years	258,876	255,268
	\$325,131	\$322,784
Securities Held-to-Maturity		
Due in one year or less	\$—	\$—
Due after one year through five years	—	—
Due after five years through ten years	—	—
Due after ten years	3,994	6,406
	\$3,994	\$6,406

Gross gains and gross losses realized by the Company from investment security transactions are summarized in the table below (in thousands). The specific identification method is used to determine the cost basis of securities sold.

	Three Months Ended		Nine Months Ended	
	September 30, 2013	2012	September 30, 2013	2012
Gross realized gains	\$—	\$830	\$93	\$1,776
Gross realized losses	—	(100) —	(246
Net investment security gains	\$—	\$730	\$93	\$1,530

The carrying value of securities pledged to secure public deposits and for other purposes as required or permitted by law approximated \$266 million and \$228 million at September 30, 2013 and December 31, 2012, respectively.

Note E –Loans

The following summarizes the Company's major classifications for loans (in thousands):

	September 30, 2013	December 31, 2012
Residential real estate	\$1,188,841	\$1,031,435
Home equity – junior liens	140,887	143,110
Commercial and industrial	151,185	108,739
Commercial real estate	1,022,278	821,970
Consumer	50,757	36,564
DDA overdrafts	4,508	4,551
Gross loans	2,558,456	2,146,369
Allowance for loan losses	(20,606) (18,809
Net loans	\$2,537,850	\$2,127,560

Construction loans of \$14.8 million and \$15.4 million are included within residential real estate loans at September 30, 2013 and December 31, 2012, respectively. Construction loans of \$17.4 million and \$15.4 million are included within commercial real estate loans at September 30, 2013 and December 31, 2012, respectively. The Company's commercial and residential real estate construction loans are primarily secured by real estate within the Company's principal markets. These loans were originated

Table of Contents

under the Company's loan policy, which is focused on the risk characteristics of the loan portfolio, including construction loans. Adequate consideration has been given to these loans in establishing the Company's allowance for loan losses.

The information in the following tables related to the Community acquisition are estimated amounts, based on management's assumptions. Once the purchase price allocation is finalized, actual results could be significantly different than those assumed below.

The following table details the loans acquired in conjunction with the Virginia Savings and Community acquisitions (in thousands):

	Virginia Savings	Community	Total
September 30, 2013			
Outstanding loan balance	\$52,640	\$288,117	\$340,757
Credit-impaired loans:			
Carrying value	4,248	24,958	29,206
Contractual principal and interest	5,253	40,896	46,149
December 31, 2012			
Outstanding loan balance	\$65,219	\$—	\$65,219
Credit-impaired loans:			
Carrying value	7,018	—	7,018
Contractual principal and interest	10,759	—	10,759

Changes in the accretable yield of the credit-impaired loans for the nine months ended September 30, 2013 is as follows (in thousands):

	Virginia Savings		Community		Total	
	Accretable Yield	Carrying Amount of Loans	Accretable Yield	Carrying Amount of Loans	Accretable Yield	Carrying Amount of Loans
Balance at the beginning of the period	\$1,823	\$7,018	\$—	\$—	\$1,823	\$7,018
Additions	—	—	5,587	31,790	5,587	31,790
Accretion	(844)	844	(1,665)	1,665	(2,509)	2,509
Net reclassifications to accretable yield from						
non-accretable yield	889	—	—	—	889	—
Payments received, net	—	(3,585)	—	(8,497)	—	(12,082)
Disposals	(604)	(29)	(344)	—	(948)	(29)
Balance at the end of period	\$1,264	\$4,248	\$3,578	\$24,958	\$4,842	\$29,206

Increases in expected cash flow subsequent to the acquisition are recognized first as a reduction of any previous impairment, then prospectively through adjustment of the yield on the loans or pools over its remaining life, while decreases in expected cash flows are recognized as impairment through a provision for loan loss and an increase in the allowance for purchased credit-impaired loans.

Note F – Allowance For Loan Losses

Management systematically monitors the loan portfolio and the adequacy of the allowance for loan losses on a quarterly basis to provide for probable losses inherent in the portfolio. Management assesses the risk in each loan type based on historical trends, the general economic environment of its local markets, individual loan performance and other relevant factors.

Individual credits are selected throughout the year for detailed loan reviews, which are utilized by management to assess the risk in the portfolio and the adequacy of the allowance. Due to the nature of commercial lending, evaluation of the adequacy

Table of Contents

of the allowance as it relates to these types of loan types is often based more upon specific credit reviews, with consideration given to the potential impairment of certain credits and historical loss rates, adjusted for economic conditions and other inherent risk factors.

The following summarizes the activity in the allowance for loan loss, by portfolio segment, for the nine months ended September 30, 2013 and 2012 (in thousands). The following also presents the balance in the allowance for loan loss disaggregated on the basis of the Company's impairment measurement method and the related recorded investment in loans, by portfolio segment, as of September 30, 2013 and December 31, 2012 (in thousands).

Credit Quality Indicators

All commercial loans within the portfolio are subject to internal risk grading. All non-commercial loans are evaluated based on payment history. The Company's internal risk ratings for commercial loans are: Pass, Special Mention, Substandard and Doubtful. Each internal risk rating is defined in the loan policy using the following criteria: balance sheet yields, ratios and leverage, cash flow spread and coverage, prior history, capability of management, market position/industry, potential impact of changing economic, legal, regulatory or environmental conditions, purpose structure, collateral support, and guarantor support. Risk grades are generally assigned by the primary lending officer and are periodically evaluated by the Company's internal loan review process. Based on an individual loan's risk grade, estimated loss percentages are applied to the outstanding balance of the loan to determine the amount of probable loss.

The Company categorizes loans into risk categories based on relevant information regarding the customer's debt service ability, capacity, overall collateral position along with other economic trends, and historical payment performance. The risk grades for each credit are updated when the Company receives current financial information, the loan is reviewed by the Company's internal loan review/credit administration departments, or the loan becomes delinquent or impaired. The risk grades are updated a minimum of annually for loans rated exceptional, good, acceptable, or pass/watch. Loans rated special mention, substandard or doubtful are reviewed at least quarterly. The Company uses the following definitions for its risk ratings:

Risk Rating	Description
Pass ratings:	
(a) Exceptional	Loans classified as exceptional are secured with liquid collateral conforming to the internal loan policy. Loans rated within this category pose minimal risk of loss to the bank and the risk grade within this pool of loans is generally updated on an annual basis.
(b) Good	Loans classified as good have similar characteristics that include a strong balance sheet, satisfactory debt service coverage ratios, strong management and/or guarantors, and little exposure to economic cycles. Loans within this category are generally reviewed on an annual basis. Loans in this category generally have a low chance of loss to the bank.
(c) Acceptable	Loans classified as acceptable have acceptable liquidity levels, adequate debt service coverage ratios, experienced management, and have average exposure to economic cycles. Loans within this category generally have a low risk of loss to the bank.
(d) Pass/watch	Loans classified as pass/watch have erratic levels of leverage and/or liquidity, cash flow is volatile and the borrower is subject to moderate economic risk. A borrower in this category poses a low to moderate risk of loss to the bank.
Special mention	Loans classified as special mention have a potential weakness(es) that deserves management's close attention. The potential weakness could result in deterioration of the loan repayment or the bank's credit position at some future date. A loan rated in this category poses a moderate loss risk to the bank.
Substandard	Loans classified as substandard reflect a customer with a well defined weakness that jeopardizes the liquidation of the debt. Loans in this category have the possibility that the bank will sustain some loss if the deficiencies are not corrected and the bank's collateral value is weakened by the financial deterioration of the borrower.
Doubtful	Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristics that make collection of the full contract amount highly improbable. Loans rated in this category are most likely to cause the bank to have a loss due to a collateral shortfall or a negative capital position.

Aging Analysis of Accruing and Non-Accruing Loans

Interest income on loans is accrued and credited to operations based upon the principal amount outstanding, using methods that generally result in level rates of return. Loan origination fees, and certain direct costs, are deferred and amortized as an adjustment to the yield over the term of the loan. The accrual of interest generally is discontinued when a loan becomes 90 days past due as to principal or interest for all loan types. However, any loan may be placed on non-accrual if the Company receives information that indicates a borrower is unable to meet the contractual terms of their respective loan agreement. Other indicators considered for placing a loan on non-accrual status include the borrower's involvement in bankruptcies, foreclosures, repossessions, litigation and any other situation resulting in doubt as to whether full collection of contractual principal and interest is attainable. When interest accruals are discontinued, unpaid interest recognized in income in the current year is reversed, and interest accrued in prior years is charged to the allowance for loan losses. Management may elect to continue the accrual of interest when the net realizable value of collateral exceeds the principal balance and related accrued interest, and the loan is in the process of collection.

Generally for all loan classes, interest income during the period the loan is non-performing is recorded on a cash basis after recovery of principal is reasonably assured. Cash payments received on nonperforming loans are typically

applied directly against the outstanding principal balance until the loan is fully repaid. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time, and the ultimate collectability of the total contractual principal and interest is no longer in doubt.

Generally, all loan types are considered past due when the contractual terms of a loan are not met and the borrower is 30 days or more past due on a payment. Furthermore, residential and home equity loans are generally subject to charge-off when the loan becomes 120 days past due, depending on the estimated fair value of the collateral less cost to dispose, versus

Table of Contents

the outstanding loan balance. Commercial loans are generally charged off when the loan becomes 120 days past due. Open-end consumer loans are generally charged off when the loan becomes 180 days past due.

A loan acquired and accounted for under ASC Topic 310-30 is reported as an accruing loan and a performing asset provided that the loan is performing in accordance with the initial expectations. The loan would be considered non-performing if the loan's performance deteriorates below the initial expectations.

The following presents an aging analysis of the Company's accruing and non-accruing loans, by class, as of September 30, 2013 and December 31, 2012 (in thousands):

Approximately \$0.4 million and \$0.7 million of interest income would have been recognized during the nine months ended September 30, 2013 and 2012, if such loans had been current in accordance with their original terms. There were no commitments to provide additional funds on non-accrual, impaired or other potential problem loans at September 30, 2013.

Table of Contents

Loan Modifications

The Company's policy on loan modifications typically does not allow for modifications that would be considered a concession from the Company. However, when there is a modification, the Company evaluates each modification to determine if the modification constitutes a troubled debt restructuring ("TDR") in accordance with ASU 2011-2, whereby a modification of a loan would be considered a TDR when both of the following conditions are met: (1) a borrower is experiencing financial difficulty and (2) the modification constitutes a concession. When determining whether the borrower is experiencing financial difficulties, the Company reviews whether the debtor is currently in payment default on any of its debt or whether it is probable that the debtor would be in payment default in the foreseeable future without the modification. Other indicators of financial difficulty include whether the debtor has declared or is in the process of declaring bankruptcy, the debtor's ability to continue as a going concern, or the debtor's projected cash flow to service its debt (including principal and interest) in accordance with the contractual terms for the foreseeable future, without a modification.

During the third quarter of 2012, regulatory guidance was clarified to require loans to be accounted for as collateral-dependent loans when borrowers have filed Chapter 7 bankruptcy, the debt has been discharged by the bankruptcy court and the borrower has not reaffirmed the debt. The filing of bankruptcy is deemed to be evidence that the borrower is in financial difficulty and the discharge of the debt by the bankruptcy court is deemed to be a concession granted to the borrower. The impact on the allowance for loan losses of this reclassification was insignificant. Prior to this reclassification, the Company's TDRs were insignificant.

The following tables set forth the Company's TDRs (in thousands):

	September 30, 2013			December 31, 2012		
	Accruing	Non-Accruing	Total	Accruing	Non-Accruing	Total

Note G – Previously Securitized Loans

Between 1997 and 1999, the Company completed six securitization transactions involving approximately \$760 million in 125% of fixed rate, junior-lien underlying mortgages. The Company retained a financial interest in each of the securitizations until 2004. Principal amounts owed to investors were evidenced by securities (“Notes”). During 2003 and 2004, the Company

28

Table of Contents

exercised its early redemption options on each of those securitizations. Once the Notes were redeemed, the Company became the beneficial owner of the mortgage loans and recorded the loans as assets of the Company within the loan portfolio.

As the Company redeemed the outstanding Notes, no gain or loss was recognized in the Company's financial statements and the remaining mortgage loans were recorded in the Company's loan portfolio as "previously securitized loans," at the lower of carrying value or fair value. Because the carrying value of the mortgage loans incorporated assumptions for expected prepayment and default rates, the carrying value of the loans was generally less than the actual outstanding contractual balance of the loans. As of September 30, 2013, there is no carrying value remaining on these loans, while the actual contractual balances of these loans were \$6.5 million. During the three and nine months ended September 30, 2013 and 2012, the Company recognized \$0.6 million and \$2.0 million and \$0.8 million and \$2.4 million, respectively, of interest income from its previously securitized loans.

Note H – Long-Term Debt

The components of long-term debt are summarized below (in thousands):

	September 30, 2013	December 31, 2012
Junior subordinated debentures owed to City Holding Capital Trust III, due 2038, interest at a rate of 3.75% and 3.89%, respectively	\$ 16,495	\$ 16,495

The Company formed a statutory business trust, City Holding Capital Trust III ("Capital Trust III"), under the laws of Delaware. Capital Trust III was created for the exclusive purpose of (i) issuing trust-preferred capital securities ("Capital Securities"), which represent preferred undivided beneficial interests in the assets of the trust, (ii) using the proceeds from the sale of the Capital Securities to acquire junior subordinated debentures ("Debentures") issued by the Company, and (iii) engaging in only those activities necessary or incidental thereto. The trust is considered a variable interest entity for which the Company is not the primary beneficiary. Accordingly, the accounts of the trusts are not included in the Company's consolidated financial statements.

Distributions on the Debentures are cumulative and will be payable quarterly at an interest rate of 3.50% over the three month LIBOR rate, reset quarterly. Interest payments are due in March, June, September and December. The Debentures are redeemable prior to maturity at the option of the Company (i) in whole or at any time or in part from time-to-time, at declining redemption prices ranging from 103.525% to 100.000% on June 15, 2013, and thereafter, or (ii) in whole, but not in part, at any time within 90 days following the occurrence and during the continuation of certain pre-defined events.

Payments of distributions on the trust preferred securities and payments on redemption of the trust preferred securities are guaranteed by the Company. The Company also entered into an agreement as to expenses and liabilities with the trust pursuant to which it agreed, on a subordinated basis, to pay any cost, expenses or liabilities of the trust other than those arising under the trust preferred securities. The obligations of the Company under the junior subordinated debentures, the related indentures, the trust agreement establishing the trust, the guarantees and the agreements as to expenses and liabilities, in the aggregate, constitute a full and unconditional guarantee by the Company of the trust's obligations under the trust preferred securities. The Capital Securities issued by the statutory business trusts qualify as Tier 1 capital for the Company under current Federal Reserve Board guidelines.

Note I – Derivative Instruments

As of September 30, 2013 and December 31, 2012, the Company has derivative financial instruments not included in hedge relationships. These derivatives consist of interest rate swaps used for interest rate management purposes and

derivatives executed with commercial banking customers to facilitate their interest rate management strategies.

The following table summarizes the fair value of these derivative instruments (in thousands):

Fair Value:	September 30, 2013	December 31, 2012
Other Assets	\$5,810	\$14,012
Other Liabilities	5,810	14,012

The following table summarizes the change in fair value of these derivative instruments (in thousands):

29

Table of Contents

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Change in Fair Value:				
Other income - derivative asset	\$(86) \$581	\$(7,876) \$2,839
Other income - derivative liability	86	(581) 7,876	(2,839

Certain financial instruments, including derivatives, may be eligible for offset in the consolidated balance sheet and/or subject to master netting arrangements. The Company's derivative transactions with financial institution counterparties are generally executed under International Swaps and Derivative Association ("ISDA") master agreements which include "right of setoff" provisions. In such cases there is generally a legally enforceable right to offset recognized amounts and there may be an intention to settle such amounts on a net basis. Nonetheless, the Company does not generally offset financial instruments for financial reporting purposes. Information about financial instruments that are eligible for offset in the consolidated balance sheet as of September 30, 2013 is presented in the following tables (in thousands):

Description	Gross Amounts of Recognized Assets (a)	Gross Amounts Offset in the Statement of Financial Position (b)	Net Amounts of Assets presented in the Statement of Financial Position (c)=(a)-(b)	Gross Amounts Not Offset in the Statement of Financial Position		Total of Gross Amounts Not Offset in the Statement of Financial Position Including Applicable Netting Agreement and Fair Value of Collateral (d)	Net Amount (c)-(d)
				Netting Adjustment per Applicable Master Netting Arrangements	Fair Value of Financial Collateral		
Derivative assets:

Note J – Employee Benefit Plans

Pursuant to the terms of the City Holding Company 2003 Incentive Plan and the City Holding Company 2013 Incentive Plan (the "2003 Plan" and "2013 Plan", respectively), the Compensation Committee of the Board of Directors, or its delegate, may, from time-to-time, grant stock options, stock appreciation rights ("SARs"), or stock awards to employees, directors and individuals who provide service to the Company (collectively, "Plan Participants"). The 2003 Plan expired in April of 2013 and the 2013 Plan was approved by the shareholders in April 2013. A maximum of 750,000 shares of the Company's common stock may be issued upon the exercise of stock options, SARs and stock awards. These limitations may be adjusted in the event of a change in the number of outstanding shares of common stock by reason of a stock dividend, stock split or other similar event. Specific terms of options and SARs awarded, including vesting periods, exercise prices (stock price at date of grant) and expiration dates are determined at the date of grant and are evidenced by agreements between the Company and the awardee. The exercise price of the option grants equals the market price of the Company's stock on the date of grant. All incentive stock options and SARs will be exercisable up to 10 years from the date granted and all options and SARs are exercisable for the period specified in the individual agreement.

Each award from the Plan is evidenced by an award agreement that specifies the option price, the duration of the option, the number of shares to which the option pertains, and such other provisions as the Compensation Committee, or its delegate, determines. The option price for each grant is equal to the fair market value of a share of the Company's common stock on the date of the grant. Options granted expire at such time as the Compensation Committee, or its delegate, determines at the date of the grant and in no event does the exercise period exceed a maximum of ten years. Upon a change-in-control of the Company, as defined in the Plan, all outstanding options and awards shall immediately vest.

Stock Options

A summary of the Company's stock option activity and related information is presented below:

Table of Contents

	Nine months ended September 30, 2013		2012	
	Options	Weighted-Average Exercise Price	Options	Weighted-Average Exercise Price
Outstanding at January 1	289,544	\$ 34.38	293,817	\$ 33.95
Granted	15,475	37.74	16,876	35.39
Exercised	(107,140)) 33.36	(18,899)) 28.78
Forfeited	(2,250)) 34.73	(1,500)) 34.73
Outstanding at September 30	195,629	\$ 35.19	290,294	\$ 34.37

Additional information regarding stock options outstanding and exercisable at September 30, 2013, is provided in the following table:

Ranges of Exercise Prices	No. of Options Outstanding	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life (Months)	Aggregate Intrinsic Value (in thousands)	No. of Options Currently Exercisable	Weighted-Average Exercise Price of Options Currently Exercisable	Weighted-Average Remaining Contractual Life (Months)	Aggregate Intrinsic Value of Options Currently Exercisable (in thousands)
\$26.62 - \$33.90	72,028	\$ 30.70	53	\$903	22,860	\$ 31.86	20	\$ 260
\$35.09 - \$40.88	123,601	37.81	64	671	75,250	38.95	39	323
	195,629			\$1,574	98,110			\$ 583

Proceeds from stock option exercises were \$2.9 million and \$0.5 million during the nine months ended September 30, 2013 and 2012, respectively. Shares issued in connection with stock option exercises are issued from available treasury shares. If no treasury shares are available, new shares are issued from available authorized shares. During the nine months ended September 30, 2013 and 2012 all shares issued in connection with stock option exercises and restricted stock awards were issued from available treasury stock.

The total intrinsic value of stock options exercised was \$0.6 million and less than \$0.1 million during the nine months ended September 30, 2013 and 2012, respectively.

Stock-based compensation expense was approximately \$0.2 million for both the nine months ended September 30, 2013 and 2012. Unrecognized stock-based compensation expense related to stock options approximated \$0.4 million at September 30, 2013. At such date, the weighted-average period over which this unrecognized expense was expected to be recognized was 1.7 years.

The fair value of the options is estimated at the date of grant using a Black-Scholes option-pricing model. The following weighted average assumptions were used to estimate the fair value of options granted:

	Nine months ended September 30,	
	2013	2012
Risk-free interest rate	1.88	% 2.51
Expected dividend yield	3.70	% 3.90
Volatility factor	41.35	% 48.40
Expected life of option	8.0 years	5.0 years

Restricted Shares

The Company records compensation expense with respect to restricted shares in an amount equal to the fair value of the common stock covered by each award on the date of grant. The restricted shares awarded become fully vested after various periods of continued employment from the respective dates of grant. The Company is entitled to an income tax deduction in an amount equal to the taxable income reported by the holders of the restricted shares when the restrictions are released and the shares are issued. Compensation is being charged to expense over the respective vesting periods.

Table of Contents

Restricted shares are forfeited if officers and employees terminate prior to the lapsing of restrictions. The Company records forfeitures of restricted stock as treasury share repurchases and any compensation cost previously recognized is reversed in the period of forfeiture. Recipients of restricted shares do not pay any cash consideration to the Company for the shares, have the right to vote all shares subject to such grant and receive all dividends with respect to such shares, whether or not the shares have vested. Stock-based compensation expense related to restricted shares was approximately \$0.6 million and \$0.5 million for the nine months ended September 30, 2013 and 2012, respectively. Unrecognized stock-based compensation expense related to non-vested restricted shares was \$2.9 million at September 30, 2013. At September 30, 2013, this unrecognized expense is expected to be recognized over 4.1 years based on the weighted average-life of the restricted shares.

A summary of the Company's restricted shares activity and related information is presented below:

	Nine months ended September 30,		2012	
	Restricted Awards	Average Market Price at Grant	Restricted Awards	Average Market Price at Grant
Outstanding at January 1	116,711		108,209	
Granted	35,083	\$38.07	23,336	\$34.94
Forfeited/Vested	(9,325)	(13,234)
Outstanding at September 30	142,469		118,311	

Benefit Plans

The Company provides retirement benefits to its employees through the City Holding Company 401(k) Plan and Trust ("the 401(k) Plan"), which is intended to be compliant with Employee Retirement Income Security Act (ERISA) section 404(c). The Company's total expense associated with the retirement benefit plan approximated \$0.6 million and \$0.5 million for the nine months ended September 30, 2013 and 2012, respectively.

The Company maintains two defined benefit pension plan ("the Defined Benefit Plans"), which were inherited from the Company's acquisition of the plan sponsors (Classic Bancshares, Inc. and Community Financial Corporation). The Classic Defined Benefit Plan was frozen in 1999 and maintains a December 31st year-end for purposes of computing its benefit obligations. The Community Defined Benefit Plan was frozen as of December 31, 2012 and maintains a March 31st year-end for purposes of computing its benefit obligations. The Company made contributions of approximately \$0.5 million and \$0.6 million to the Defined Benefit Plans during the nine months ended September 30, 2013 and 2012, respectively.

The following table presents the components of the net periodic pension cost of the Defined Benefit Plans (in thousands):

	Three months ended September 30,		Nine months ended September 30,	
	2013	2012	2013	2012
Components of net periodic cost:				
Interest cost	\$217	\$158	\$549	\$476
Expected return on plan assets	(276) (203) (695) (607
Net amortization and deferral	267	174	732	522
Net Periodic Pension Cost	\$208	\$129	\$586	\$391

Note K – Commitments and Contingencies

The Company is a party to certain financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. The Company has entered into agreements with its customers to extend credit or provide a conditional commitment to provide payment on drafts presented in accordance with the terms of the underlying credit documents. The Company also provides overdraft protection to certain demand deposit customers that represent an unfunded commitment. Overdraft protection commitments, which are included with other commitments below, are uncollateralized and are paid at the Company's discretion. Conditional commitments generally include standby and commercial letters of credit. Standby letters of credit represent an obligation of the Company to a designated third party contingent upon the failure of a customer of the Company to perform under the terms of the underlying contract between the customer and the third party. Commercial letters of credit are issued specifically to facilitate trade or commerce. Under the terms of a commercial letter of credit, drafts will be drawn when the underlying transaction is consummated, as intended, between the customer and a third party. The funded portion of these financial instruments is reflected in the Company's balance sheet, while the unfunded portion of these commitments is

Table of Contents

not reflected in the balance sheet. The table below presents a summary of the contractual obligations of the Company resulting from significant commitments (in thousands):

	September 30, 2013	December 31, 2012
Commitments to extend credit:		
Home equity lines	\$ 179,588	\$ 156,274
Commercial real estate	36,919	33,869
Other commitments	199,323	171,670
Standby letters of credit	14,450	16,743
Commercial letters of credit	1,189	425

Loan commitments and standby and commercial letters of credit have credit risks essentially the same as that involved in extending loans to customers and are subject to the Company's standard credit policies. Collateral is obtained based on management's credit assessment of the customer. Management does not anticipate any material losses as a result of these commitments.

The Company is engaged in various legal actions that it deems to be in the ordinary course of business. As these legal actions are resolved, the Company could realize positive and/or negative impact to its financial performance in the period in which these legal actions are ultimately decided. There can be no assurance that current actions will have immaterial results, either positive or negative, or that no material actions may be presented in the future.

Note L – Accumulated Other Comprehensive Loss

The activity in accumulated other comprehensive loss for the nine months ended September 30, 2013 and 2012 is presented in the tables below (in thousands). All amounts are shown net of tax, which is calculated using a combined Federal and state income tax rate approximating 37%.

	Accumulated Other Comprehensive Loss		
		Unrealized Gains (Losses) on	
	Defined Benefit Pension Plans	Securities Available-for-Sale	Total
Balance at December 31, 2011	\$(4,732) \$825	\$(3,907
Other comprehensive income before reclassifications	—	4,137	4,137
Amounts reclassified from other comprehensive loss	—	(595) (595
	—	3,542	3,542
Balance at September 30, 2012	\$(4,732) \$4,367	\$(365
Balance at December 31, 2012	\$(4,995) \$3,573	\$(1,422
Other comprehensive income before reclassifications	—	(4,693) (4,693
Amounts reclassified from other comprehensive loss	—	(59) (59
	—	(4,752) (4,752
Balance at September 30, 2013	\$(4,995) \$(1,179) \$(6,174

Table of Contents

	Amount reclassified from Other Comprehensive Loss				Affected line item in the Statements of Income
	Three months ended September 30, 2013		Nine months ended September 30, 2012		
Securities available-for-sale:					
Net securities (gains) losses reclassified into earnings	\$—	\$(458)	\$(93)	\$(954)	Security gains (losses)
Related income tax expense (benefit)	—	172	34	359	Income tax expense
Net effect on accumulated other comprehensive loss	\$—	\$(286)	\$(59)	\$(595)	

Note M – Earnings per Share

The following table sets forth the computation of basic and diluted earnings per share (in thousands, except per share data):

	Three months ended September 30, 2013		Nine months ended September 30, 2012	
	2013	2012	2013	2012
Distributed earnings allocated to common stock	\$5,767	\$5,150	\$17,302	\$15,451
Undistributed earnings allocated to common stock	8,081	5,373	17,349	12,375
Net earnings allocated to common shareholders	\$13,848	\$10,523	\$34,651	\$27,826
Average shares outstanding	15,608	14,751	15,545	14,700
Effect of dilutive securities:				
Warrants outstanding	62	—	60	—
Employee stock awards	120	83	108	83
Shares for diluted earnings per share	15,790	14,834	15,713	14,783
Basic earnings per share	\$0.89	\$0.71	\$2.23	\$1.89
Diluted earnings per share	\$0.88	\$0.71	\$2.21	\$1.88

Options to purchase approximately 124,000 shares of common stock at an exercise price between \$35.09 and \$40.88 per share were outstanding during the third quarter of 2012 but were not included in the computation of diluted earnings per share because the options' exercise price was greater than the average market price of the common shares and therefore, the effect would have been anti-dilutive. During the third quarter of 2013, there were no anti-dilutive options outstanding.

Note N – Fair Value Measurements

Fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC Topic 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1: Quoted prices (unadjusted) or identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company bases fair value of assets and liabilities on quoted market prices, prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market

Table of Contents

data. If such information is not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality and the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Furthermore, the reported fair value amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amount presented herein. A more detailed description of the valuation methodologies used for assets and liabilities measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Financial Assets and Liabilities

The Company used the following methods and significant assumptions to estimate fair value for financial assets and liabilities measured on a recurring basis.

Securities Available for Sale. Securities available for sale are reported at fair value utilizing Level 1, Level 2, and Level 3 inputs. The fair value of securities available for sale is determined by utilizing a market approach by obtaining quoted prices on nationally recognized securities exchanges (other than forced or distressed transactions) that occur in sufficient volume or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities. If such measurements are unavailable, the security is classified as Level 3. Significant judgment is required to make this determination.

The Company utilizes a third party pricing service provider to value its Level 1 and Level 2 investment securities. Annually, the Company obtains an independent auditor's report from its third party pricing service provider regarding its controls over investment securities. Although no control deficiencies were noted, the report did contain caveats and disclaimers regarding the pricing information, such as the Company should review fair values for reasonableness. On a quarterly basis, the Company selects a sample of its debt securities and reprices those securities with a third party that is independent of the primary pricing service provider to verify the reasonableness of the fair values. In addition, the Company selects a sample of securities and reviews the underlying support from the primary pricing service provider.

The Company has determined that its pooled trust preferred securities should be priced using Level 3 inputs in accordance with ASC Topic 820 and guidance issued by the SEC. The Company has determined that there are few observable transactions and market quotations available for pooled trust preferred securities and they are not reliable for purposes of determining fair value at September 30, 2013. Due to these circumstances, the Company has elected to utilize an income valuation approach produced by a third party pricing source. This third party model utilizes deferral and default probabilities for the underlying issuers, estimated prepayment rates and assumes no future recoveries of any defaults or deferrals. The Company then compares the values provided by the third party model with other external sources. At such time as there are observable transactions or quoted prices that are associated with an orderly and active market for pooled trust preferred securities, the Company will incorporate such market values in its estimate of fair values for these securities.

Derivatives. Derivatives are reported at fair value utilizing Level 2 inputs. The Company utilizes a market approach by obtaining dealer quotations to value its customer interest rate swaps. The Company's derivatives are included

within its Other Assets and Other Liabilities in the accompanying consolidated balance sheets. Derivative assets are typically secured through securities with financial counterparties or cross collateralization with a borrowing customer. Derivative liabilities are typically secured through the Company pledging securities to financial counterparties or, in the case of a borrowing customer, by the right of setoff. The Company considers such factors such as the likelihood of default by itself and its counterparties, right of setoff, and remaining maturities in determining the appropriate fair value adjustments. All derivative counterparties approved by the Company's Asset and Liability Committee ("ALCO") are regularly reviewed, and appropriate business action is taken to adjust the exposure to certain counterparties, if necessary. Counterparty exposure is evaluated by netting positions that are subject to master netting agreements, as well as considering the amount of marketable collateral securing the position. This approach used to estimate impacted exposures to counterparties is also used by the Company to estimate its own credit risk in derivative liability positions. To date, no material losses have been incurred due to a counterparty's inability to pay any undercollateralized position. There was no significant change in the value of derivative assets and liabilities attributed to credit risk during the three and nine months ended September 30, 2013.

Table of Contents

The Company may be required, from time to time, to measure certain financial assets and financial liabilities at fair value on a nonrecurring basis. Financial assets measured at fair value on a nonrecurring basis include impaired loans reported at the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are estimated using Level 2 inputs based on observable market data for real estate collateral or Level 3 inputs for non-real estate collateral. The following table presents assets and liabilities measured at fair value (in thousands):

	Total	Level 1	Level 2	Level 3	Total Gains (Losses)
September 30, 2013					
Recurring fair value measurements

The table below presents a reconciliation of the Company's financial assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) (in thousands):

37

Table of Contents

	Nine months ended September 30,	
	2013	2012
Beginning balance	\$2,385	\$1,982
Impairment losses on investment securities	—	(576
Included in other comprehensive income	2,176	940
Dispositions	(1,776) —
Transfers into Level 3	—	—
Ending Balance	\$2,785	\$2,346

The Company utilizes a third party model to compute the present value of expected cash flows which considers the structure and term of each of the five respective pooled trust preferred securities and the financial condition of the underlying issuers. Specifically, the third party model details interest rates, principal balances of note classes and underlying issuers, the timing and amount of interest and principal payments of the underlying issuers, and the allocation of the payments to the note classes. The current estimate of expected cash flows is based on the most recent trustee reports and any other relevant market information including announcements of interest payment deferrals or defaults of underlying trust preferred securities. For issuing banks that have defaulted, management generally assumes no recovery. For issuing banks that have deferred its interest payments, management excludes the collateral balance associated with these banks and assumes no recoveries of such collateral balance in the future. The exclusion of such issuing banks in a current deferral position is based on such bank experiencing a certain level of financial difficulty that raises doubt about its ability to satisfy its contractual debt obligation, and accordingly, the Company excludes the associated collateral balance from its estimate of expected cash flows. Other assumptions used in the estimate of expected cash flows include expected future default rates and prepayments. Specifically, the model assumes annual prepayments of 1.0% with 100% at maturity and assumes 150 basis points of additional annual defaults from banks that are currently not in default or deferral. In addition, the model assumes no recoveries except for one trust preferred security which assumes that one of the banks currently deferring or in default will cure such positions.

The table below presents a reconciliation of the Company's financial assets and liabilities measured at fair value on a nonrecurring basis using significant unobservable inputs (Level 3), which solely relates to impaired loans that were remeasured and reported at fair value through a specific valuation allowance allocation of the allowance for loan losses based upon the fair value of the underlying collateral (in thousands). The fair value of impaired loans is estimated using one of several methods, including collateral value, liquidation value and discounted cash flows. The significant unobservable inputs used in the fair value measurement of collateral for collateral-dependent impaired loans primarily relate to discounts applied to the customers' reported amount of collateral. The amount of collateral discount depends upon the marketability of the underlying collateral. During the nine months ended September 30, 2013 and 2012, collateral discounts ranged from 20% to 30%. During the nine months ended September 30, 2013 and 2012, the Company had no Level 2 financial assets and liabilities that were measured on a nonrecurring basis.

	Nine months ended September 30,

Non-Financial Assets and Liabilities

38

Table of Contents

The Company has no non-financial assets or liabilities measured at fair value on a recurring basis. Certain non-financial assets measured at fair value on a non-recurring basis include other real estate owned (“OREO”), which is measured at the lower of cost or fair value, and goodwill and other intangible assets, which are measured at fair value for impairment assessments.

The table below presents OREO that was remeasured and reported at fair value based on significant unobservable inputs (Level 3) (in thousands):

	Nine months ended September 30,	
	2013	2012
Beginning balance	\$8,162	\$7,948
OREO remeasured at initial recognition:		
Carrying value of foreclosed assets prior to remeasurement	4,387	4,563
Charge-offs recognized in the allowance for loan losses	(1,565) (1,472
Fair value	2,822	3,091
OREO remeasured subsequent to initial recognition		
Carrying value of foreclosed assets prior to remeasurement	2,832	2,681
Fair value	1,774	1,872
Write-downs included in other non-interest expense	(1,058) (809
Acquired	3,492	728
Disposed	(5,900) (1,841
Ending balance	\$7,518	\$9,117

ASC Topic 825 “Financial Instruments” as amended, requires disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet, for which it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including discount rate and estimate of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument. ASC Topic 825 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company. The following methods and assumptions were used in estimating fair value for financial instruments:

Cash and cash equivalents: Due to their short-term nature, the carrying amounts reported in the consolidated balance sheets approximate fair value.

Securities: The fair value of securities, both available-for-sale and held-to-maturity, are generally based on quoted market prices or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities’ relationship to other benchmark quoted securities.

Net loans: The fair value of the loan portfolio is estimated by discounting the expected future cash flows using the current interest rates at which similar loans would be made to borrowers for the same remaining maturities. Loans were first segregated by type such as commercial, real estate and consumer, and were then further segmented into fixed, adjustable and variable rate categories. Expected future cash flows were projected based on contractual cash

flows, adjusted for estimated prepayments.

Deposits: The fair values of demand deposits (i.e., interest and noninterest-bearing deposits, regular savings and other money market demand accounts) are, by definition, equal to their carrying values. The fair values of time deposits were estimated using discounted cash flow analyses. The discount rates used were based on rates currently offered for deposits with similar remaining maturities. The fair values of the time deposit liabilities do not take into consideration the value of the Company's long-term relationships with depositors, which may have significant value.

Table of Contents

Short-term debt: Securities sold under agreements to repurchase represent borrowings with original maturities of less than 90 days. The carrying amount of borrowings under purchase agreements approximate their fair value.

Long-term debt: The fair value of long-term borrowings is estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements and market conditions of similar debt instruments.

Commitments and letters of credit: The fair values of commitments are estimated based on fees currently charged to enter into similar agreements, taking into consideration the remaining terms of the agreements and the counterparties' credit standing. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. The amounts of fees currently charged on commitments and letters of credit are deemed insignificant, and therefore, the estimated fair values and carrying values have not been reflected in the table below.

The following table represents the estimates of fair value of financial instruments (in thousands). This table excludes financial instruments for which the carrying amount approximates fair value. For short-term financial assets such as cash and cash equivalents, the carrying amount is a reasonable estimate of fair value due to the relatively short time between the origination of the instrument and its expected realization. For financial liabilities such as noninterest-bearing demand, interest-bearing demand and savings deposits, the carrying amount is a reasonable estimate of fair value due to these products having no stated maturity.

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Critical Accounting Policies

The accounting policies of the Company conform with U.S. generally accepted accounting principles and require management to make estimates and develop assumptions that affect the amounts reported in the financial statements and related footnotes. These estimates and assumptions are based on information available to management as of the date of the financial statements. Actual results could differ significantly from management's estimates. As this information changes, management's estimates and assumptions used to prepare the Company's financial statements and related disclosures may also change. The most significant accounting policies followed by the Company are presented in Note One to the audited financial statements included in the Company's 2012 Annual Report to Shareholders. The information included in this Quarterly Report on Form 10-Q, including the Consolidated Financial Statements, Notes to Consolidated Financial Statements, and Management's Discussion and Analysis of Financial Condition and Results of Operations, should be read in conjunction with the financial statements and notes thereto included in the 2012 Annual Report of the Company. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has identified the determination of the allowance for loan losses, income taxes, other-than-temporary impairment on investment securities and purchased credit-impaired loans to be the accounting areas that require the most subjective or complex judgments and, as such, could be most subject to revision as new information becomes available.

The section Allowance and Provision for Loan Losses provides management's analysis of the Company's allowance for loan losses and related provision. The allowance for loan losses is maintained at a level that represents management's best estimate of probable losses in the loan portfolio. Management's determination of the adequacy of the allowance for loan losses is based upon an evaluation of individual credits in the loan portfolio, historical loan loss experience, current economic conditions, and other relevant factors. This determination is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. The allowance for loan losses related to loans considered to be impaired is generally evaluated based on the discounted cash flows using the impaired loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans.

The Company is subject to federal and state income taxes in the jurisdictions in which it conducts business. In computing the provision for income taxes, management must make judgments regarding interpretation of laws in those jurisdictions. Because the application of tax laws and regulations for many types of transactions is susceptible to varying interpretations, amounts reported in the financial statements could be changed at a later date upon final determinations by taxing authorities. On a quarterly basis, the Company estimates its annual effective tax rate for the year and uses that rate to provide for income taxes on a year-to-date basis. The amount of unrecognized tax benefits could change over the next twelve months as a result of various factors. However, management cannot currently estimate the range of possible change. The Company is currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2010 through 2012. The Company and its subsidiaries state income tax returns are open to audit under the statute of limitations for the years ended December 31, 2009 through 2012.

On a quarterly basis, the Company performs a review of investment securities to determine if any unrealized losses are other-than-temporarily impaired. Management considers the following, amongst other things, in its determination of the nature of the unrealized losses, (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition, capital strength, and near-term (12 months) prospects of the issuer, including any specific events which may influence the operations of the issuer such as changes in technology that may impair the earnings potential of the investment or the discontinuance of a segment of the business that may affect the future earnings

potential; (iii) the historical volatility in the market value of the investment and/or the liquidity or illiquidity of the investment; (iv) adverse conditions specifically related to the security, an industry, or a geographic area; or (v) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. The Company continues to actively monitor the market value of these investments along with the financial strength of the issuers behind these securities, as well as its entire investment portfolio. Based on the market information available, the Company believes that the recent declines in market value are temporary and that the Company does not have the intent to sell any of the securities classified as available for sale and believes it is more likely than not that the Company will not have to sell any such securities before recovery of costs. The Company cannot guarantee that such securities will recover and if additional information becomes available in the future to suggest that the losses are other than temporary, the Company may need to record impairment charges in future periods. No impairment charges were recognized during the three and nine months ended September 30, 2013 as a result of this review. The Company continues to actively monitor the market values of these investments along with the financial strength of the issuers behind these securities, as well as our entire investment portfolio.

Table of Contents

The Company values purchased credit-impaired loans at fair value in accordance with ASC Topic 310-30. In determining the estimated fair value, management considers several factors, such as estimated future credit losses, estimated prepayments, remaining lives of the acquired loans, estimated value of the underlying collateral and the net present value of the cash flows expected to be received. For these loans, the expected cash flows that exceed the fair value of the loan represent the accretible yield, which is recognized as interest income on a level-yield basis over the expected cash flow periods of the loans. The non-accretible difference represents the difference between the contractually required principal and interest payments and the cash flows expected to be collected based upon management's estimation. Subsequent decreases in the expected cash flows will require the Company to evaluate the need for additions to the Company's allowance for loan losses. Subsequent increases in the expected cash flows will result in a reversal of the provision for loan losses to the extent of prior charges with a corresponding adjustment to the accretible yield, which will result in the recognition of additional interest income over the remaining lives of the loans.

Financial Summary

Nine months ended September 30, 2013 vs. 2012

The Company reported consolidated net income of \$35.0 million, or \$2.21 per diluted common share, for the nine months ended September 30, 2013, compared to \$28.0 million, or \$1.88 per diluted common share, for the nine months ended September 30, 2012. Return on average assets ("ROA") was 1.38% and return on average equity ("ROE") was 12.6% for the first nine months of 2013, compared to 1.33% and 11.6%, respectively, for the first nine months of 2012. The results for the nine months ended September 30, 2013 include \$5.5 million, or \$0.23 diluted per share on an after tax basis, of acquisition and integration expenses related to the acquisition of Community Financial Corporation ("Community"). Excluding these acquisition and integration expenses, the Company would have reported net income of \$38.6 million, a return on average assets of 1.53% and a return on average equity of 14.0%. The results for the nine months ended September 30, 2012 include \$4.3 million, or \$0.19 diluted per share on an after tax basis, of acquisition and integration expenses related to the acquisition of Virginia Savings Bancorp, Inc. ("Virginia Savings"). Excluding these acquisition and integration expenses, the Company would have reported net income of \$30.9 million, a return on average assets of 1.47% and a return on average equity of 12.8%.

The Company's net interest income for the first nine months of 2013 increased \$21.0 million compared to the first nine months of 2012 (see Net Interest Income). The Company recorded a provision for loan losses of \$4.9 million for the first nine months of 2013 compared to \$4.6 million for the first nine months of 2012 (see Allowance and Provision for Loan Losses). As further discussed under the caption Non-Interest Income and Expense, non-interest income increased \$2.1 million from the nine months ended September 30, 2012, to the nine months ended September 30, 2013. Non-interest expenses for the nine months ended September 30, 2013 increased \$11.9 million from the nine months ended September 30, 2012.

Three months ended September 30, 2013 vs. 2012

The Company reported consolidated net income of \$14.0 million, or \$0.88 per diluted common share, for the three months ended September 30, 2013, compared to \$10.6 million, or \$0.71 per diluted common share, for the three months ended September 30, 2012. Return on average assets ("ROA") was 1.65% and return on average equity ("ROE") was 14.8% for the three months ended September 30, 2013 compared to 1.47% and 13.0%, respectively, for the third quarter of 2012.

The Company's net interest income for the third quarter of 2013 increased \$7.5 million compared to the third quarter of 2012 (see Net Interest Income). The Company recorded a provision for loan losses of \$1.2 million for the third

quarter of 2013 compared to \$1.0 million for the third quarter of 2012 (see Allowance and Provision for Loan Losses). As further discussed under the caption Non-Interest Income and Expense, non-interest income increased \$0.4 million from the third quarter of 2012, to the third quarter of 2013. Non-interest expenses for the three months ended September 30, 2013 decreased \$2.8 million from the three months ended September 30, 2012.

Net Interest Income

Nine months ended September 30, 2013 vs. 2012

The Company's tax equivalent net interest income increased \$20.9 million, or 28.7%, from \$72.8 million for the nine months ended September 30, 2012 to \$93.7 million for the nine months ended September 30, 2013. This increase is primarily due to the acquisitions of Virginia Savings and Community, and an increase in the accretion related to these acquisitions. The Company's reported net interest margin increased from 3.95% for the nine months ended September 30, 2012 to 4.33% for the nine months ended September 30, 2013. Excluding the favorable impact of the accretion from the fair value adjustments (\$10.7 million and

Table of Contents

\$0.9 million), the net interest margin for the nine months ended September 30, 2013 and 2012 would have been 3.84% and 3.90%, respectively.

Three months ended September 30, 2013 vs. 2012

The Company's tax equivalent net interest income increased \$7.5 million, or 29.8%, from \$25.1 million for the third quarter of 2012 to \$32.5 million for the third quarter of 2013. This increase is primarily due to the acquisitions of Virginia Savings and Community, and an increase in the accretion related to these acquisitions. The Company's reported net interest margin increased from 3.95% for the quarter ended September 30, 2012 to 4.47% for the quarter ended September 30, 2013. Excluding the favorable impact of the accretion from the fair value adjustments (\$5.0 million and \$0.9 million), the net interest margin for the three months ended September 30, 2013 and 2012 would have been 3.78% and 3.80%, respectively.

The following schedule presents the actual and estimated future accretion related to the fair value adjustments on net interest income as a result of the Company's acquisitions (in thousands). The amounts in the table below require management to make significant assumptions based on estimated future default, prepayment and discount rates. Actual performance could be significantly different from that assumed, which could result in actual results being materially different than those estimated below.

Year Ended	Virginia Savings		Community		Total
	Loans	Certificates of Deposit	Loans	Certificates of Deposit

Table of Contents

- (1) For purposes of this table, non-accruing loans have been included in average balances and loan fees, which are immaterial, have been included in interest income.
For 2013, interest income on residential real estate loans includes \$0.8 million and \$0.5 million of accretion related to the fair value adjustments due to the acquisitions of Virginia Savings and Community, respectively.
- (2) For 2012, interest income on residential real estate loans includes \$0.6 million of accretion related to the fair value adjustments due to the acquisition of Virginia Savings.
For 2013, interest income on commercial, financial, and agriculture loans includes \$2.0 million and \$5.4 million of accretion related to the fair value adjustments due to the acquisitions of Virginia Savings and Community, respectively.
- (3) For 2012, interest income on commercial, financial and agricultural loans includes \$0.3 million of accretion related to the fair value adjustments due to the acquisition of Virginia Savings.
- (4) Includes the Company's consumer and DDA overdrafts loan categories.
For 2013, interest income on installment loans to individuals includes \$0.1 million and \$1.0 million of accretion related to the fair value adjustments due to the acquisitions of Virginia Savings and Community, respectively.
- (5) For 2012, interest income on installment loans to individuals includes less than \$0.1 million of accretion related to the fair value adjustments due to the acquisition of Virginia Savings.
- (6) Effective January 1, 2012, there is no carrying value of the Company's previously securitized loans.
- (7) Computed on a fully federal tax-equivalent basis assuming a tax rate of approximately 35%.
For 2013, interest expense on time deposits includes \$0.4 million and \$0.5 million in accretion of the fair value adjustments related to the acquisitions of Virginia Savings and Community, respectively.
- (8) For 2012, interest expense on time deposits includes \$0.1 million in accretion of the fair value adjustments related to the acquisition of Virginia Savings.

Table of Contents

- (1) For purposes of this table, non-accruing loans have been included in average balances and loan fees, which are immaterial, have been included in interest income.
For 2013, interest income on residential real estate loans includes \$0.3 million and \$0.3 million of accretion related to the fair value adjustments due to the acquisitions of Virginia Savings and Community, respectively.
- (2) For 2012, interest income on residential real estate loans includes \$0.6 million of accretion related to the fair value adjustments due to the acquisition of Virginia Savings.
For 2013, interest income on commercial, financial, and agriculture loans includes \$0.3 million and \$3.5 million of accretion related to the fair value adjustments due to the acquisitions of Virginia Savings and Community, respectively. For 2012, interest income on commercial, financial and agricultural loans includes \$0.3 million of accretion related to the fair value adjustments due to the acquisition of Virginia Savings.
- (3) Includes the Company's consumer and DDA overdrafts loan categories.
For 2013, interest income on installment loans to individuals includes \$0.1 million and \$0.4 million of accretion related to the fair value adjustments due to the acquisitions of Virginia Savings and Community respectively.
- (4) For 2012, interest income on installment loans to individuals includes less than \$0.1 million of accretion related to the fair value adjustments due to the acquisition of Virginia Savings.
- (5) Effective January 1, 2012, there is no carrying value of the Company's previously securitized loans.
- (6) Computed on a fully federal tax-equivalent basis assuming a tax rate of approximately 35%.
For 2013, interest expense on time deposits includes \$0.1 million and \$0.2 million in accretion of the fair value adjustments related to the acquisitions of Virginia Savings and Community Financial, respectively. For 2012, interest expense on time deposits includes \$0.1 million in accretion of the fair value adjustments related to the acquisition of Virginia Savings.

Loans

The composition of the Company's loan portfolio as of the dates indicated follows:

47

Table of ContentsTable Five
Loan Portfolio
(In thousands)

	September 30, 2013	December 31, 2012	September 30, 2012
Residential real estate	\$ 1,188,841	\$ 1,031,435	\$ 1,008,305
Home equity – junior liens	140,887	143,110	143,058
Commercial and industrial	151,185	108,739	105,027
Commercial real estate	1,022,278	821,970	787,887
Consumer	50,757	36,564	38,285
DDA overdrafts	4,508	4,551	2,670
Total loans	\$ 2,558,456	\$ 2,146,369	\$ 2,085,232

Loan balances increased \$412.1 million from December 31, 2012 to September 30, 2013, with the acquisition of Community contributing \$371 million. Excluding the acquisition of Community, which contributed \$116 million, residential real estate loans increased \$41.1 million, or 4.0%, from December 31, 2012 to September 30, 2013. Residential real estate loans primarily consist of: (i) single-family 3 and 5 year adjustable rate mortgages with terms that amortize the loans over periods from 15-30 years and (ii) home equity loans secured by first liens. The Company's mortgage products do not include sub-prime, interest only, or option adjustable rate mortgage products. The Company's home equity loans are underwritten differently than 1-4 family residential mortgages with typically less documentation but lower loan-to-value ratios. Home equity loans consist of lines of credit, short-term fixed amortizing loans and non-purchase adjustable rate loans. At September 30, 2013, \$14.8 million of the residential real estate loans were for properties under construction.

Junior lien home equity loans decreased \$2.5 million during the first nine months of 2013. Junior lien home equity loans consist of lines of credit, short-term fixed amortizing loans, and non-purchase adjustable rate loans with second lien positions.

Excluding the acquisition of Community, which contributed \$185 million, commercial real estate loans increased \$15.7 million, or 1.9%, from December 31, 2012 to September 30, 2013. At September 30, 2013, \$17.4 million of the commercial real estate loans were for commercial properties under construction. Excluding the acquisition of Community, which contributed \$46 million, commercial and industrial loans ("C&I") decreased \$3.3 million from December 31, 2012 to September 30, 2013. This decrease is primarily due to the continuation of a strategy engaged by the Company to allow certain other high risk loans to exit the portfolio.

Exclusive of the acquisition of Community, which contributed \$24 million, consumer loans decreased \$9.8 million during the first nine months of 2013. The consumer loan portfolio primarily consists of new and used automobile loans, personal loans secured by cash and cash equivalents, unsecured revolving credit products, and other similar types of credit facilities. The Company strategically decided to reduce consumer loans due to the acquisition of an indirect portfolio of loans associated with Community. These loans have higher loss percentages compared to the Company's historical consumer portfolio.

Allowance and Provision for Loan Losses

Management systematically monitors the loan portfolio and the adequacy of the allowance for loan losses ("ALLL") on a quarterly basis to provide for probable losses inherent in the portfolio. Management assesses the risk in each loan type based on historical trends, the general economic environment of its local markets, individual loan performance, and other relevant factors. Individual credits are selected throughout the year for detailed loan reviews, which are

utilized by management to assess the risk in the portfolio and the adequacy of the allowance. Due to the nature of commercial lending, evaluation of the adequacy of the allowance as it relates to these loan types is often based more upon specific credit review, with consideration given to the potential impairment of certain credits and historical loss rates, adjusted for general economic conditions and other inherent risk factors. Conversely, due to the homogeneous nature of the real estate and installment portfolios, the portions of the allowance allocated to those portfolios are primarily based on prior loss history of each portfolio, adjusted for general economic conditions and other inherent risk factors.

In evaluating the adequacy of the allowance for loan losses, management considers both quantitative and qualitative factors. Quantitative factors include actual repayment characteristics and loan performance, cash flow analyses, and estimated fair values of underlying collateral. Qualitative factors generally include overall trends within the portfolio, composition of the portfolio, changes in pricing or underwriting, seasoning of the portfolio, and general economic conditions.

Table of Contents

The allowance not specifically allocated to individual credits is generally determined by analyzing potential exposure and other qualitative factors that could negatively impact the adequacy of the allowance. Loans not individually evaluated for impairment are grouped by pools with similar risk characteristics and the related historical loss rates are adjusted to reflect current inherent risk factors, such as unemployment, overall economic conditions, concentrations of credit, loan growth, classified and impaired loan trends, staffing, adherence to lending policies, and loss trends.

Determination of the allowance for loan losses is subjective in nature and requires management to periodically reassess the validity of its assumptions. Differences between actual losses and estimated losses are assessed such that management can timely modify its evaluation model to ensure that adequate provision has been made for risk in the total loan portfolio.

As a result of the Company's quarterly analysis of the adequacy of the ALLL, the Company recorded a provision for loan losses of \$4.9 million in the first nine months of 2013 and \$4.6 million in the first nine months of 2012. Changes in the amount of the provision and related allowance are based on the Company's detailed systematic methodology and are directionally consistent with changes in the composition and quality of the Company's loan portfolio. The Company believes its methodology for determining its ALLL adequately provides for probable losses inherent in the loan portfolio and produces a provision and allowance for loan losses that is directionally consistent with changes in asset quality and loss experience.

The Company had net charge-offs of \$3.1 million and \$5.0 million for the first nine months of 2013 and 2012, respectively. Net charge-offs in the first nine months of 2013 consisted primarily of net charge-offs on residential real estate loans of \$1.5 million and commercial and industrial loans of \$0.7 million.

The Company's ratio of non-performing assets to total loans and other real estate owned decreased from 1.28% at December 31, 2012 to 1.15% at September 30, 2013. Excluded from this ratio are purchased credit-impaired loans in which the Company estimated cash flows and estimated a credit mark. These loans are considered performing loans provided that the loan is performing in accordance with the estimated expectations. Such loans would be considered non-performing loans if the loan's performance deteriorates below the initial expectations. The Company's ratio of non-performing assets to total loans and other real estate owned is approximately a third of the 3.62% non-performing asset ratio reported by the Company's peer group (bank holding companies with total assets between \$1 and \$5 billion), as of the most recently reported quarter ended June 30, 2013.

The ALLL at September 30, 2013 was \$20.6 million compared to \$18.8 million at December 31, 2012. Below is a summary of the changes in the components of the ALLL from December 31, 2012 to September 30, 2013.

The allowance allocated to the commercial real estate loan portfolio (see Table Nine) increased \$0.1 million, or 0.64%, from \$10.4 million at December 31, 2012 to \$10.5 million at September 30, 2013.

The allowance related to the commercial and industrial loan portfolio increased from \$0.5 million at December 31, 2012 to \$1.2 million at September 30, 2013 (see Table Nine). This increase was due to a downgrade of a particular credit.

The allowance allocated to the residential real estate portfolio (see Table Nine) increased \$1.0 million from \$5.2 million at December 31, 2012 to \$6.2 million at September 30, 2013. This increase was due to growth in the portfolio.

The allowance allocated to the home equity loan portfolio (see Table Nine) remained flat at \$1.7 million at September 30, 2013.

The allowance allocated to the consumer loan portfolio (see Table Nine) remained flat at \$0.1 million at September 30, 2013.

The allowance allocated to overdraft deposit accounts (see Table Nine) decreased modestly from \$0.9 million at December 31, 2012 to \$0.8 million at September 30, 2013.

Based on the Company's analysis of the adequacy of the allowance for loan losses and in consideration of the known factors utilized in computing the allowance, management believes that the allowance for loan losses as of September 30, 2013, is adequate to provide for probable losses inherent in the Company's loan portfolio. Future provisions for loan losses will be dependent upon trends in loan balances including the composition of the loan portfolio, changes in loan quality and loss experience trends, and recoveries of previously charged-off loans, among other factors.

Allowance for loan losses	93.86	% 82.61	% 96.59	%

Table Seven

Non-Accrual, Past-Due and Restructured Loans

(In thousands)

	As of September 30,		December 31,	
	2013	2012	2012	
Non-accrual loans	\$21,535	\$22,586	\$19,194	
Accruing loans past due 90 days or more	418	397	280	
Total non-performing loans	21,953	22,983	19,474	

The average recorded investment in impaired loans during the nine months ended September 30, 2013 and 2012 was \$13.2 million and \$21.6 million, respectively. The Company recognized less than \$0.1 million and approximately \$0.7 million of interest income received in cash on non-accrual and impaired loans for the nine months ended September 30, 2013 and 2012, respectively. Approximately \$0.4 million and \$0.7 million of interest income would have been recognized during the nine months ended September 30, 2013 and September 30, 2012, respectively, if such loans had been current in accordance with their original terms. There were no commitments to provide additional funds on non-accrual, impaired, or other potential problem loans at September 30, 2013.

Interest on loans is accrued and credited to operations based upon the principal amount outstanding. The accrual of interest income is generally discontinued when a loan becomes 90 days past due as to principal or interest unless the loan is well collateralized and in the process of collection. When interest accruals are discontinued, interest credited to income in the

50

Table of Contents

current year that is unpaid and deemed uncollectible is charged to operations. Prior-year interest accruals that are unpaid and deemed uncollectible are charged to the allowance for loan losses, provided that such amounts were specifically reserved.

Allocation of the Allowance for Loan Losses
(In thousands)

	As of September 30,		As of December
	2013	2012	31, 2012
Commercial and industrial	\$1,237	\$521	\$498
Commercial real estate	10,507	10,590	10,440
Residential real estate	6,249	3,815	5,229
Home equity	1,689	3,046	1,699
Consumer	76	105	81
DDA overdrafts	848	909	862
Allowance for Loan Losses	\$20,606	\$18,986	\$18,809

Previously Securitized Loans

As of September 30, 2013, the carrying value of the remaining previously securitized loans was zero, while the actual contractual balances of these loans were \$6.5 million. The Company accounts for the difference between the carrying value and the total expected cash flows of previously securitized loans as an adjustment of the yield earned on these loans over their remaining lives. The discount was accreted to income over the period during which payments were probable of collection and were reasonably estimable. During the first nine months of 2013 and 2012, the Company recognized \$2.0 million and \$2.4 million, respectively, of interest income on its previously securitized loans.

Non-Interest Income and Non-Interest Expense

Nine months ended September 30, 2013 vs. 2012

	Nine months ended September 30,		\$ Change	% Change	
	2013	2012			
Net investment security gains	\$0.1	\$1.0	\$(0.9)	(90.0))%
Non-interest income	43.0	40.0	3.0	7.5	%

Non-interest expense	78.0	66.1	11.9	18.0	%
----------------------	------	------	------	------	---

51

Table of Contents

Non-Interest Income: Excluding investment security transactions, non-interest income increased \$3.0 million to \$43.0 million in the first nine months of 2013 as compared to \$40.0 million in the first nine months of 2012. Service charges increased \$1.3 million, or 6.8%, to \$20.6 million, while bankcard revenues increased \$0.8 million, or 8.7%, to \$10.1 million. These increases were primarily due to the acquisitions of Virginia Savings and Community. In addition, other income increased \$0.6 million or 34.8%, to \$2.4 million primarily as a result of increased mortgage related revenues. Trust and investment management fee income increased \$0.2 million, or 8.7%, to \$2.9 million due to core growth, as Virginia Savings and Community did not offer these services.

Non-Interest Expense: Non-interest expenses increased \$11.9 million from \$66.1 million in the first nine months of 2012 to \$78.0 million in the first nine months of 2013. During the first nine months of 2013 and 2012 the Company recognized \$5.5 million and \$4.3 million of acquisition and integration expenses related to the acquisitions of Community and Virginia Savings, respectively. Excluding these expenses, non-interest expenses increased \$10.8 million, from \$61.8 million in the first nine months of 2012 to \$72.6 million in the first nine months of 2013. This increase was primarily related to higher salaries and employee benefits (\$6.3 million) due to the acquisitions of Virginia Savings and Community (\$5.7 million) and higher health insurance costs (\$0.6 million). In addition, other expenses increased \$1.3 million, occupancy and equipment expense increased \$1.3 million and depreciation increased \$0.9 million. These increases were primarily attributable to the acquisitions of Virginia Savings and Community. Overall expense associated with the acquisitions of Virginia Savings and Community have been in line with the Company's expectations.

Income Tax Expense: The Company's income tax rate for the nine months ended September 30, 2013 was 34.5% compared to 34.3% for the year ended December 31, 2012, and 34.0% for the nine months ended September 30, 2012. As a result of the Company's acquisition of Community during the first quarter of 2013, the Company's effective tax rate for 2013 is expected to decrease from 34.3% for the year ended December 31, 2012 to 33.6% for the year ending December 31, 2013. Due to this decline in the effective tax rate, the Company's net deferred tax assets are expected to be realized at a lower effective tax rate, and as a result, the Company's net deferred tax assets were reduced by \$0.5 million in the first quarter of 2013.

Three months ended September 30, 2013 vs. 2012

	Three months ended September 30,				
	2013	2012	\$ Change	% Change	
Net investment security gains	\$—	\$0.5	\$(0.5)	(100.0))%
Non-interest income	14.5	13.6	0.9	6.6	%
Non-interest expense	24.7	21.8	2.9	13.3	%

Non-Interest Income: Exclusive of the net investment gain discussed above, non-interest income increased \$0.9 million to \$14.5 million in the third quarter of 2013 as compared to \$13.6 million in the third quarter of 2012. Service charges increased \$0.4 million, or 6.2%, to \$7.2 million while bankcard revenues increased \$0.4 million, or 11.5%, to \$3.5 million. These increases were primarily due to the acquisition of Community.

Non-Interest Expense: Non-interest expense increased \$2.9 million, from \$21.8 million in the third quarter of 2012 to \$24.7 million in the third quarter of 2013. This increase was primarily related to higher salaries and employee benefits (\$1.6 million) and repossessed asset losses (\$0.5 million). Salaries and employee benefits increased due to the acquisition of Community (\$1.0 million) and higher incentive compensation accruals (\$0.2 million). Repossessed asset losses were based on updated appraisals. The Company continually re-evaluates the estimated fair value of

properties that have been repossessed by obtaining updated appraisals on at least an annual basis. In addition, occupancy and equipment expense increased \$0.3 million and depreciation increased \$0.3 million. These increases were also primarily attributable to the acquisition of Community. Overall expense increases associated with the acquisition of Community have been in line with the Company's expectations.

Income Tax Expense: The Company's income tax rate for the third quarter of 2013 was 33.6% compared to 34.3% for the year ended December 31, 2012, and 34.3% for the third quarter of 2012. The income tax rate is based upon the Company's expected tax rate for the year ending December 31, 2013.

Risk Management

Table of Contents

Market risk is the risk of loss due to adverse changes in current and future cash flows, fair values, earnings or capital due to adverse movements in interest rates and other factors, including foreign exchange rates and commodity prices. Because the Company has no significant foreign exchange activities and holds no commodities, interest rate risk represents the primary risk factor affecting the Company's balance sheet and net interest margin. Significant changes in interest rates by the Federal Reserve could result in similar changes in LIBOR interest rates, prime rates, and other benchmark interest rates that could affect the estimated fair value of the Company's investment securities portfolio, interest paid on the Company's short-term and long-term borrowings, interest earned on the Company's loan portfolio and interest paid on its deposit accounts.

The Company's Asset and Liability Committee ("ALCO") has been delegated the responsibility of managing the Company's interest-sensitive balance sheet accounts to maximize earnings while managing interest rate risk. ALCO, comprised of various members of executive and senior management, is also responsible for establishing policies to monitor and limit the Company's exposure to interest rate risk and to manage the Company's liquidity position. ALCO satisfies its responsibilities through monthly meetings during which product pricing issues, liquidity measures, and interest sensitivity positions are monitored.

In order to measure and manage its interest rate risk, the Company uses an asset/liability management and simulation software model to periodically update the interest sensitivity position of the Company's balance sheet. The model is also used to perform analyses that measure the impact on net interest income and capital as a result of various changes in the interest rate environment. Such analyses quantify the effects of various interest rate scenarios on projected net interest income.

The Company's policy objective is to avoid negative fluctuations in net income or the economic value of equity of more than 15% within a 12-month period, assuming an immediate parallel increase or decrease of 400 basis points. The Company measures the long-term risk associated with sustained increases and decreases in rates through analysis of the impact to changes in rates on the economic value of equity. Due to the current Federal Funds target rate of 25 basis points, the Company has chosen not to reflect a decrease of 25 basis points from current rates in its analysis.

During the fourth quarter of 2012, the Company revised its sensitivity analysis to consider the impact of rising interest rates on its deposit balance mix. Prior the interest rates declining in 2007, the Company's deposit account composition included more balances as a percentage of total deposit balances in higher yielding deposit accounts, primarily time deposits. As interest rates have fallen over the last five years, and as the higher yielding time deposits have matured, these balances have shifted to lower yielding transactional deposit accounts such as demand deposits and savings accounts. The Company revised its interest rate sensitivity model at December 31, 2012 and September 30, 2013 to reflect its belief that as interest rates increase, transactional deposit balances will begin to shift back to higher yielding time deposits and the benefit to rising interest rates for the Company will be reduced from its previous models which had not reflected this modification.

The following table summarizes the sensitivity of the Company's net income to various interest rate scenarios. The results of the sensitivity analyses presented below differ from the results used internally by ALCO in that, in the analyses below, interest rates are assumed to have an immediate and sustained parallel shock. The Company recognizes that rates are volatile, but rarely move with immediate and parallel effects. Internally, the Company considers a variety of interest rate scenarios that are deemed to be possible while considering the level of risk it is willing to assume in "worst-case" scenarios such as shown by the following:

Immediate Basis Point Change in Interest Rates	Implied Federal Funds Rate Associated with Change in Interest Rates	Estimated Increase (Decrease) in Net Income Over 12 Months	Estimated Increase (Decrease) in Economic Value of Equity
September 30, 2013

These estimates are highly dependent upon assumptions made by management, including, but not limited to, assumptions regarding the manner in which interest-bearing demand deposit and saving deposit accounts reprice in different interest rate

Table of Contents

scenarios, changes in the composition of deposit balances, pricing behavior of competitors, prepayments of loans and deposits under alternative rate environments, and new business volumes and pricing. As a result, there can be no assurance that the estimates above will be achieved in the event that interest rates increase during 2013 and beyond. The estimates above do not necessarily imply that the Company will experience increases in net income if market interest rates rise. The table above indicates how the Company's net income and the economic value of equity behave relative to an increase or decrease in rates compared to what would otherwise occur if rates remain stable.

Based upon the estimates above, the Company believes that its net income is positively correlated with increasing rates as compared to the level of net income the Company would expect if interest rates remain flat.

Liquidity

The Company evaluates the adequacy of liquidity at both the Parent Company level and at the banking subsidiary level. At the Parent Company level, the principal source of cash is dividends from its banking subsidiary, City National Bank. Dividends paid by City National Bank to the Parent Company are subject to certain legal and regulatory limitations. Generally, any dividends in amounts that exceed the earnings retained by City National Bank in the current year plus retained net profits for the preceding two years must be approved by regulatory authorities. At September 30, 2013, City National Bank could pay dividends up to \$24.0 million plus net profits for the remainder of 2013, as defined by statute, up to the dividend declaration date without prior regulatory permission.

The Parent Company used cash obtained from the dividends received primarily to: (1) pay common dividends to shareholders, (2) remit interest payments on the Company's junior subordinated debentures, and (3) fund repurchase of the Company's common shares.

Over the next 12 months, the Parent Company has an obligation to remit interest payments approximating \$0.6 million on the junior subordinated debentures held by City Holding Capital Trust III. Additionally, the Parent Company anticipates continuing the payment of dividends, which are expected to approximate \$23.3 million on an annualized basis over the next 12 months based on common shareholders of record at September 30, 2013. However, interest payments on the debentures can be deferred for up to five years under certain circumstances and dividends to shareholders can, if necessary, be suspended. In addition to these anticipated cash needs, the Parent Company has operating expenses and other contractual obligations, which are estimated to require \$0.7 million of additional cash over the next 12 months. As of September 30, 2013, the Parent Company reported a cash balance of \$2.7 million and management believes that the Parent Company's available cash balance, together with cash dividends from City National Bank will be adequate to satisfy its funding and cash needs over the next twelve months.

Excluding the interest and dividend payments discussed above, the Parent Company has no significant commitments or obligations in years after 2013 other than the repayment of its \$16.5 million obligation under the debentures held by City Holding Capital Trust III. However, this obligation does not mature until June 2038, or earlier at the option of the Parent Company. It is expected that the Parent Company will be able to obtain the necessary cash, either through dividends obtained from City National Bank or the issuance of other debt, to fully repay the debentures at their maturity.

City National Bank manages its liquidity position in an effort to effectively and economically satisfy the funding needs of its customers and to accommodate the scheduled repayment of borrowings. Funds are available to City National Bank from a number of sources, including depository relationships, sales and maturities within the investment securities portfolio, and borrowings from the FHLB and other financial institutions. As of September 30, 2013, City National Bank's assets are significantly funded by deposits and capital. Additionally, City National Bank maintains borrowing facilities with the FHLB and other financial institutions that are accessed as necessary to fund operations and to provide contingency funding mechanisms. As of September 30, 2013, City National Bank has the

capacity to borrow an additional \$1.4 billion from the FHLB and other financial institutions under existing borrowing facilities. City National Bank maintains a contingency funding plan, incorporating these borrowing facilities, to address liquidity needs in the event of an institution-specific or systemic financial industry crisis. Also, City National Bank maintains a significant percentage (95.0%, or \$329.2 million million at September 30, 2013) of its investment securities portfolio in the highly liquid available-for-sale classification. Although it has no current intention to do so, these securities could be liquidated, if necessary, to provide an additional funding source. City National Bank also segregates certain mortgage loans, mortgage-backed securities, and other investment securities in a separate subsidiary so that it can separately monitor the asset quality of these primarily mortgage-related assets, which could be used to raise cash through securitization transactions or obtain additional equity or debt financing if necessary.

The Company manages its asset and liability mix to balance its desire to maximize net interest income against its desire to minimize risks associated with capitalization, interest rate volatility, and liquidity. With respect to liquidity, the Company has chosen a conservative posture and believes that its liquidity position is strong. The Company's net loan to asset ratio is 74.7% as

Table of Contents

of September 30, 2013 and deposit balances fund 82.7% of total assets. The Company has obligations to extend credit, but these obligations are primarily associated with existing home equity loans that have predictable borrowing patterns across the portfolio. The Company has investment security balances with carrying values that totaled \$346.6 million at September 30, 2013, and that greatly exceeded the Company's non-deposit sources of borrowing which totaled \$167.4 million. Further, the Company's deposit mix has a very high proportion of transaction and savings accounts that fund 50.3% of the Company's total assets.

As illustrated in the Consolidated Statements of Cash Flows, the Company generated \$58.4 million of cash from operating activities during the first nine months of 2013, primarily from interest income received on loans and investments, net of interest expense paid on deposits and borrowings. The Company used \$1.9 million of cash in investing activities during the first nine months of 2013 primarily from the purchase of available-for-sale securities. The Company generated \$38.1 million of cash in financing activities during the first nine months of 2013, principally as a result of an increase in short-term borrowings (\$36.3 million) and deposits (\$16.1 million), partially offset by cash dividends paid to the Company's common stockholders of \$17.1 million.

Capital Resources

During the first nine months of 2013, Shareholders' Equity increased \$44.8 million, or 13.4%, from \$333.3 million at December 31, 2012 to \$378.0 million at September 30, 2013. This increase was primarily due to the acquisition of Community (\$28.5 million) and net income of \$35.0 million, partially offset by dividends declared of \$17.7 million.

Regulatory guidelines require the Company to maintain a minimum total capital to risk-adjusted assets ratio of 8.0%, with at least one-half of capital consisting of tangible common stockholders' equity and a minimum Tier I leverage ratio of 4.0%. Similarly, City National Bank is also required to maintain minimum capital levels as set forth by various regulatory agencies. Under capital adequacy guidelines, City National Bank is required to maintain minimum total capital, Tier I capital, and leverage ratios of 8.0%, 4.0%, and 4.0%, respectively. To be classified as "well capitalized," City National Bank must maintain total capital, Tier I capital, and leverage ratios of 10.0%, 6.0%, and 5.0%, respectively.

The Company's regulatory capital ratios for both City Holding and City National Bank as illustrated in the following table:

City Holding:	Minimum	Well-Capitalized	Actual September 30, 2013	December 31, 2012	
Total	8.0	% 10.0	% 13.5	% 13.9	%
Tier I Risk-based	4.0	6.0	12.7	13.0	
Tier I Leverage	4.0	5.0	9.4	9.8	
City National Bank:					
Total	8.0	% 10.0	% 13.1	% 12.4	%
Tier I Risk-based	4.0	6.0	12.2	11.5	
Tier I Leverage	4.0	5.0	9.1	8.7	

As of September 30, 2013, management believes that City Holding Company, and its banking subsidiary, City National Bank, were "well capitalized." City Holding is subject to regulatory capital requirements administered by the Federal Reserve, while City National Bank is subject to regulatory capital requirements administered by the Office of the Comptroller of the Currency ("OCC") and the Federal Deposit Insurance Corporation ("FDIC"). Regulatory agencies can initiate certain mandatory actions if either City Holding or City National Bank fails to meet the minimum capital

requirements, as shown above. As of September 30, 2013, management believes that City Holding and City National Bank meet all capital adequacy requirements.

In July 2013, the Federal Reserve published the final rules that establish a new comprehensive capital framework for banking organizations, commonly referred to as Basel III. These final rules substantially revise the risk-based capital requirements applicable to bank holding companies and depository institutions. The final rule is effective January 1, 2015 for smaller, non-complex banking organizations with full implementation by January 1, 2019.

Item 3 - Quantitative and Qualitative Disclosure About Market Risk

Table of Contents

The information called for by this item is provided under the caption “Risk Management” under Item 2—Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Item 4 - Controls and Procedures

Pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934, the Company carried out an evaluation, with the participation of the Company’s management, including the Company’s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company’s disclosure controls and procedures (as defined under Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, the Company’s Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in the Company’s periodic SEC filings. There has been no change in the Company’s internal control over financial reporting during the quarter ended September 30, 2013 that has materially affected, or is reasonably likely to materially affect, the Company’s internal control over financial reporting.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings

The Company is engaged in various legal actions that it deems to be in the ordinary course of business. As these legal actions are resolved, the Company could realize positive and/or negative impact to its financial performance in the period in which these legal actions are ultimately decided. There can be no assurance that current actions will have immaterial results, either positive or negative, or that no material actions may be presented in the future.

Item 1A. Risk Factors

There have been no material changes to the factors disclosed in Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

None.

Item 5. Other Information.

None.

Item 6. Exhibits
