

CPS TECHNOLOGIES CORP/DE/  
Form 10-K  
March 25, 2011

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

**FORM 10-K**

(Mark One)

**Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934** for the fiscal year ended December 25, 2010

or

**Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934**, for the transition period from to

Commission file number: 0-16088

CPS TECHNOLOGIES CORPORATION

(Exact Name of Registrant as Specified in its Charter)

Delaware  
(State or Other Jurisdiction  
of Incorporation or Organization)

04-2832509

(I.R.S. Employer  
Identification No.)

111 South Worcester Street  
Norton, MA  
(Address of principal executive offices)

02766-2102  
(Zip Code)

Registrant's telephone no., including area code: 508-222-0614

Securities registered pursuant to Section 12(b) of the Act: None  
Securities registered pursuant to Section 12(g) of the Act:

Common Stock, par value, \$0.01 per share

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period than the registrant was required to file such reports), and (2) has been subject to the filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to the Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer

Non-accelerated filer  Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act)

Yes  No

The aggregate market value of the voting Common Stock held by non-affiliates of the Registrant was \$13,064,538 based on the average of the reported closing bid and asked prices for the Common Stock as of the last business day of the registrant's most recently completed second fiscal quarter as reported on the OTC Bulletin Board.

Number of shares of Common Stock outstanding as of March 25, 2011: 12,675,959 shares.

Documents incorporated by reference.

## Part I

### Item 1. Business.

CPS Technologies Corporation (the "Company" or "CPS") provides advanced material solutions to the electronics, power generation, automotive and other industries. In 2008 the Company also entered into a cooperative agreement with the U.S. Army to further develop its composite technology to produce armor.

The Company's products are generally used in high-power, high-reliability applications. These applications always involve energy use or energy generation and the Company's products allow higher performance and improved energy efficiency. The Company is an important participant in the growing movement towards alternative energy and "green" lifestyles. For example, the Company's products are used in mass transit, hybrid and electric cars, wind-turbines for electricity generation as well as routers and switches for the internet which in turn allows telecommuting.

The Company's primary advanced material solution is metal matrix composites (MMCs), a new class of materials which are a combination of metal and ceramic. CPS has a leading, proprietary position in metal matrix composites. Metal matrix composites have several superior properties compared to conventional materials including improved thermal conductivity, thermal expansion matching, stiffness and light weight which enable higher performance and higher reliability in our customers' products.

Like plastics several decades ago, we believe metal-matrix composites will penetrate many end markets over many years. CPS management believes our business model of providing advanced material solutions to a portfolio of high growth end markets which are, at any point in time, in various stages of the technology adoption lifecycle, provides CPS with the opportunity for sustained growth and a diversified customer base. We believe we have validated this model as we are now supplying customers at all stages of the technology adoption lifecycle.

CPS is the leader in supplying metal matrix composites to certain high growth electronics end markets which are well along in the adoption lifecycle and therefore generating significant demand. These end markets include high-performance integrated circuits and circuit boards used in internet switches and routers, as well as motor controllers used in high-speed electric trains, subway cars and wind turbines. CPS supplies heat spreaders, lids and baseplates to customers in these end markets. CPS is a fully qualified manufacturer for many of the world's largest electronics OEMs.

CPS also assembles housings and packages for hybrid circuits. These housings and packages may include components made of metal-matrix composites; they may include components made of more traditional materials such as aluminum, copper-tungsten, etc.

Concurrently, CPS is participating in certain end markets that are at an earlier stage of the adoption lifecycle. Management believes these end markets will generate additional growth in both the intermediate and longer term. An example of such an end market is motor controllers for hybrid automobiles and trucks. In 2010, hybrid automobiles containing the Company's baseplates were available for purchase from two major automobile manufacturers.

We are also actively working with customers in end markets at the beginning stages of the adoption lifecycle. An example of such a market is the market for armor. In 2008 the Company entered into a cooperative agreement with the Army Research Laboratory to further develop large hybrid metal matrix composite modules which integrally combine metal matrix composites and ceramics by enveloping ceramic tiles with MMCs. This system offers a lighter weight, durable, multi-hit capable and cost competitive alternative to conventional steel, aluminum and ceramic based armor systems. CPS hybrid hard face armor modules are comprised of multiple materials completely enveloped within and mechanically and chemically bonded to lightweight and stiff aluminum metal matrix composites.

The Company believes that its hybrid hard face armor tiles will find application in many military vehicles as well as armored commercial vehicles.

Our products are manufactured by proprietary processes we have developed including the Quickset™ Injection Molding Process ("Quickset Process") and the QuickCast™ Pressure Infiltration Process ("QuickCast Process").

CPS was incorporated in Massachusetts in 1984 as Ceramics Process Systems Corporation and reincorporated in Delaware in April 1987 through a merger into a wholly-owned Delaware subsidiary organized for purposes of the reincorporation. In July 1987, CPS completed our initial public offering of 1.5 million shares of our Common Stock.

In March 2007, we changed our name from Ceramics Process Systems Corporation to CPS Technologies Corporation.

## Overview of Markets and Products

### Electronics Markets Overview

Consumer demand continues to motivate the electronics industry to produce products which:

- operate at higher speeds;
- are smaller in size; and
- operate with higher reliability.

While these three requirements result in products of ever-increasing performance, these requirements also create a fundamental challenge for the designer to manage the heat generated by the system moving at higher speeds and/or higher power. Smaller assemblies further concentrate the heat and increase the difficulty of removing it.

This challenge is found at each level in an electronic assembly: at the integrated circuit level speeds are increasing and line widths are decreasing; at the circuit board level higher density devices are placed closer together on circuit boards; and at the system level higher density circuit boards are being assembled closer together.

The designer must resolve the thermal management issues or the system will fail. For every 10 degree Celsius rise in temperature above a threshold level, the reliability of a circuit is decreased by approximately half. In addition, heat usually causes changes in parameters which degrade the performance of both active and passive electronic components.

To resolve thermal management issues the designer is primarily concerned with two properties of the materials which comprise the system: 1) thermal conductivity, which is the rate at which heat moves through materials, and 2) thermal expansion rate (Coefficient of Thermal Expansion or CTE) which is the rate at which materials expand or contract as temperature changes. The designer must ensure that the temperature of an electronic assembly stays within a range in which the differences in the expansion rates of the materials in the assembly do not cause a failure from breaking, delaminating, etc.

CPS combines at the microstructural level a ceramic with a metal to produce a metal matrix composite which has the thermal conductivity needed to remove heat, and a thermal expansion rate which is sufficiently close to other components in the assembly to ensure the assembly is reliable. The ceramic is silicon carbide (SiC), the metal is aluminum (Al), and the composite is aluminum silicon carbide (AlSiC), a metal-matrix composite. CPS can adjust the thermal expansion rate of AlSiC components to match the specific application by modifying the amount of SiC compared to the amount of Al in the component.

CPS produces products made of AlSiC in the shapes and configurations required for each application, for example, in the form of lids, substrates, housings, etc. Every product is made to a customer's blueprint. The CPS process technology allows most products to be made to net shape, requiring no or little final machining.

Although our focus today is on AlSiC components, we believe our proprietary Quickset- Quickcast process technology can be used to produce other metal-matrix composites which may meet future market needs.

Today, the problem of thermal management is most acute in high-performance, high-density applications such as high-performance microprocessors, application-specific integrated circuits for internet routers and switches, motor controllers for trains, subway cars and wind turbines, and components for satellite communications. However, as the trends towards faster speeds, reduced size and increased reliability continue, and as high-density circuitry is used in a larger number of applications, we believe our products will be used in an increasing number of applications across many end markets.

### Structural Markets Overview

Structural applications perform primarily a mechanical rather than electrical function. In any mechanical assembly with moving parts the stiffness and weight of moving parts can have a significant impact on the performance and energy efficiency of the assembly. In particular, in equipment with reciprocating components increasing the stiffness and reducing the weight of reciprocating components improves the performance and energy efficiency of the equipment.

Today many mechanical components are made of steel because steel has the stiffness required for the particular application. AlSiC has approximately the same stiffness as steel, but is only one-third the weight of steel. AlSiC is, however, higher cost than steel. However, we believe there are many mechanical applications where the customer will pay the higher cost for AlSiC because of significant improvements in performance resulting from the superior stiffness-to-weight ratio of AlSiC.

Examples of structural applications for which we are developing and supplying components include armor, robotic arms for semiconductor manufacturing equipment and certain components for specialty internal combustion engines.

### Specific Markets and Products

#### Motor Controller Applications (Insulated Gate Bipolar Transistor ("IGBT") Applications)

The use of power modules to control electric motors of all sizes is growing. This growth is the result of several factors including emerging high-power applications which demand power controllers such as trains, subways and certain industrial equipment, and cost declines in power modules which increasingly make variable speed drives cost effective. Power semiconductors are a very significant portion of the cost of variable speed drives, and the cost of the module housing and thermal management system are also significant; declines in the costs of all these components is driving increased use of variable speed drives.

We provide substrates, baseplates and heat spreaders on which power semiconductors are mounted to produce modules for motor control. The power semiconductors are typically insulated gate bipolar transistors and these applications are often referred to as IGBT applications. Our AlSiC baseplates have sufficient thermal conductivity to allow for removal of heat through the baseplate, and have a thermal expansion rate sufficiently similar to the other components in the assembly to ensure reliability over time as the assembly thermally cycles. We believe this market will continue to grow as the use of power modules penetrates additional motor applications, and as electric motors themselves penetrate new applications such as the hybrid electric vehicle.

Today our primary products for IGBT applications are used in electric trains, subway cars, wind-generating turbines and hybrid and electric vehicles.

Major automobile companies around the world are introducing hybrid electric vehicles (HEVs) and electric vehicle (EVs) at an increasing rate. This focus on more energy efficient vehicles is being driven by increases in energy costs and concerns about climate change. There are many varieties of HEVs and EVs, but all HEVs and EVs contain an electric motor and contain one or more motor controller modules. The Company provides baseplates on which motor controller modules are assembled; these baseplates are lighter weight and provide greater reliability than baseplates made from more conventional materials.

The Company is working with multiple tier one and tier two suppliers to the automobile industry on several new designs for future introduction. The Company believes the HEV and EV markets will be the source of significant and long-term growth for the Company.

Lids and Heat Spreaders for High-Performance Microprocessors, Application-Specific Integrated Circuits and Other Integrated Circuits ("Flip-chip Applications")

Increases in speed, circuit density, and the number of connections in microprocessor chips (CPUs) and application-specific integrated circuits (ASICs) are accelerating a transition in the way in which these circuits are packaged. Packages provide mechanical protection to the integrated circuit (IC), enable the IC to be connected to other circuits via pins, solder bumps or other connectors, and allow attachment of a heat sink or fan to ensure the IC does not overheat. In the past most high-performance ICs were electrically connected to the package by fine wires in a process known as wire bonding. Increasingly high-performance semiconductors are connected to the package by placing metal bumps on the connection points of the die, turning the die upside down in the package, and directly connecting the bumps on the die with corresponding bumps on the package base by reflowing the bumps. This is referred to as a "flip-chip package". Flip chip packages allow for connection of a larger number of leads in a smaller space, and can provide other electrical performance advantages compared to wire bonded packages.

In many flip chip configurations a lid or heat spreader is placed over the die to protect the die from mechanical damage and to facilitate the removal of heat from the die. Often a heat sink or fan is then attached to the lid. For a high-density die the package designer must ensure that the lid has sufficient thermal conductivity to remove heat from the die and that all components of the package assembly - the die itself, the package base, and the package lid - are made from materials with sufficiently similar thermal expansion rates to ensure the assembly will not break itself apart over time as it thermally cycles.

Our composite material, AlSiC, has been developed to meet these two needs: it is engineered to have sufficient thermal conductivity to allow the heat generated by the die to be removed through the lid, and it is engineered to expand upon heating at a rate similar to other materials used in the package assembly in order to ensure reliability of the package over time as it thermally cycles. We produce lids made of AlSiC for high performance microprocessors and application-specific integrated circuits used in servers, internet switches and other applications.

Most participants in the semiconductor industry believe the densities of ICs will continue to increase following the well-known "Moore's Law". As IC densities increase, generally so does the IC size, and the amount of heat generated by the IC. We believe the need for thermal management will continue to grow rapidly.

Customers

We sell primarily to major microelectronics systems houses in the United States, Europe and Asia. Our customers typically purchase prototype and evaluation quantities of our products over a one to three year period before purchasing production volumes.

In 2010, our three largest customers accounted for 34%, 27% and 7% of revenues, respectively. In 2010, 88% of our revenues were derived from commercial applications and 12% from defense-related applications.

Research and Development

In 2010, research and development costs were incurred related to the Cooperative Agreement with the US Army. These costs consist of labor, including applicable overhead expenses, materials and other costs associated with our Cooperative Agreement. Total expenditures incurred in 2010 under this Cooperative Agreement amounted to \$1.557 million of which \$1.328 million is included in cost of research and development under cooperative agreement in the Statement of Income. \$1.484 million of these costs were funded by the US Army in 2010 and is classified as research and development cooperative agreement revenues in the Statement of Income. The \$65 thousand funded by CPS consists of \$61 thousand of direct and indirect costs in connection with the contract included in costs of research and development under cooperative agreements and the Company's allocated portion of general and administrative expenses allowed under the contract included in selling, general and administrative expenses of \$4 thousand. An

additional \$8 thousand is included in total expenditures in 2010 and was unbilled to the US Army as of December 25, 2010.

Unfunded research and development costs, if any, are charged to expense as incurred and were \$0 in 2010, 2009 and 2008.

#### Availability of Raw Materials

We use a variety of raw materials from numerous domestic and foreign suppliers. These materials are primarily aluminum ingots, ceramic powders and chemicals. The raw materials we use are available from domestic and foreign sources and none is believed to be scarce or restricted for national security reasons. We use no conflict metals.

#### Patents and Trade Secrets

As of December 25, 2010, we had 13 United States patents and three United States patent pending. We also have several international patents covering the same subject matter as the U.S. patents. Our licensees have rights to use certain patents as defined in their respective license agreements. As of December 25, 2010, none of our licensees are producing products under license agreements signed previously, and we do not expect the license agreements in place to generate additional license revenues in the future.

We intend to continue to apply for domestic and foreign patent protection in appropriate cases. In other cases, we believe we are better served by reliance on trade secret protection. In all cases, we seek protection for our technological developments to preserve our competitive position.

#### Backlog and Contracts

As of December 25, 2010, we had a total backlog of approximately \$23.5 million consisting of product backlog of \$23.2 million and backlog remaining on the second-year funding under the Cooperative Agreement with the US Army of \$317 thousand.

The total backlog as of December 26, 2009, was approximately \$8.9 million. We shipped 100% of the year-end 2009 backlog in 2010.

#### Competition

We have developed and expect to continue to develop products for a number of different end markets and we will encounter competition from different producers of metal-matrix composites and other competing materials.

We believe that the principal competitive factors in our end markets today include technical competence, product performance, quality, reliability, price, corporate reputation, and strength of sales and marketing resources. We believe our proprietary processes, reputation, and the price at which we can offer products for sale will enable us to compete successfully in the many electronics end markets. However, many of the American and foreign companies now producing or developing metal-matrix composites have far greater financial and sales and marketing resources than we do which may enable them to develop and market products which would compete against those developed by us.

#### Government Regulation

We produce non-nuclear, non-medical hazardous waste in our development and manufacturing operations. The disposal of such waste is governed by state and federal regulations. Various customers, vendors, and collaborative development agreement partners of CPS may reside abroad, thereby possibly requiring export and import of raw materials, intermediate products, and finished products, as well as potential technology transfer abroad under

collaborative development agreements. These types of activities are regulated by bureaus within the Departments of Commerce, State and Treasury.

In 2008, the Company entered into a cooperative agreement with the US Army Research Laboratory to perform research and development concerning hybrid metal matrix composite encapsulated ceramic armor technology. The Cooperative Agreement is a four-year agreement which is 95% funded by the US Department of Defense and 5% funded by CPS.

Revenues from this Cooperative Agreement are recognized proportionally as costs are incurred. We are reimbursed for reasonable and allocable costs up to the reimbursement limits set by the Cooperative Agreement. All payments to the Company for work performed on this Cooperative Agreement are subject to audit and adjustment by the Defense Contract Audit Agency. Adjustments are recognized in the period made.

### Employees

As of December 25, 2010, we had 189 full-time employees and 5 part-time employees, of whom 174 were engaged in manufacturing and engineering and 15 in sales and administration. We also employ temporary employees as needed to support production and program requirements.

None of our employees are covered by a collective bargaining agreement. We consider our relations with our employees to be excellent.

### Item 1A. Risk Factors.

#### **We are heavily dependent on the electronics industry and changes in the industry could harm our business and operating results.**

The electronics industry is subject to economic cycles, demand in some segments is currently volatile, and is likely in the future to experience recessionary periods. A protracted general recession in the electronics industry could have a material adverse effect on our business, financial condition and results of operations.

Our operating results may fluctuate substantially, which may cause our stock price to fall.

Our quarterly and annual results of operations have varied in the past, and our operating results may vary significantly in the future due to a number of factors including, but not limited to, the following: timing of orders from major customers; mix of products and services; pricing and other competitive pressures; delays in prototype shipments, economic conditions in the electronics industry, raw material costs, and our ability to time expenditures in anticipation of future revenues.

Some executive officers and key personnel are critical to our business and these key personnel may not remain with the Company in the future.

Our success depends upon the continued service of some executive officers and other key personnel. Our employees are not bound by employment agreements, and there can be no assurance that the Company will retain its officers and key employees.

We may need additional capital in the future, which may not be available.

If our capital resources are insufficient to meet future capital requirements, we will have to raise additional funds. The sale of equity or convertible debt securities in the future may be dilutive to our shareholders. If we are unable to obtain adequate funds on reasonable terms, we may be required to curtail operations significantly or to obtain funds by entering into financing agreements on unattractive terms.

The trading price of our common stock may be volatile.

The trading prices of our common stock has been and could in the future be subject to significant fluctuations in response to variations in quarterly operating results, developments in the electronics industry, changes in general economic conditions and economic conditions in the electronics industry, and other factors. In addition, the stock market in recent years has experienced significant price and volume fluctuations which have affected the market prices of technology companies and which have been unrelated to or disproportionately impacted by the operating performance of those companies. These broad market fluctuations may cause the market price of our common stock to decline.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties.

As of December 25, 2010, all our manufacturing, engineering, sales and administrative operations are located in a leased facility in Norton, Massachusetts. The Company entered into a 10-year lease for the Norton facilities effective on March 1, 2006. The leased facilities comprise approximately 38 thousand square feet.

In February 2011, the Company entered into a lease for an additional 13,800 square feet in Attleboro, MA. The lease term is for one year and has the option to extend the lease for five additional one year periods.

**Item 3. Legal Proceedings.**

We are not a party to any litigation which could have a material adverse effect on us or on our business and we are not aware of any pending or threatened material litigation against us.

Item 4. (Removed and Reserved)

Part II

Item 5. Market for Registrant`s Common Equity, Related Stockholder Matters and Issuer Purchase of Equity Securities.

On December 25, 2010, we had approximately 870 shareholders. The high and low closing bid prices of our common stock for each quarter during the years ended December 25, 2010 and December 26, 2009 are shown below.

	<u>2010</u>		<u>2009</u>	
	<u>High</u>	<u>Low</u>	<u>High</u>	<u>Low</u>
1st Quarter	\$ 1.40	\$ 1.05	\$ 1.39	\$ 0.75
2nd Quarter	\$ 1.75	\$ 1.25	\$ 1.49	\$ 0.70

Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-K

3rd Quarter	\$ 1.99	\$ 1.50	\$ 1.49	\$ 0.85
4th Quarter	\$ 1.85	\$ 1.55	\$ 1.45	\$ 0.81

CPS has never paid cash dividends on our Common Stock. We currently plan to reinvest our earnings, if any, for use in the business and do not intend to pay cash dividends in the foreseeable future. Future dividend policy will depend, among other factors, upon our earnings and financial condition.

Our Common Stock is traded on NASD's Over-the-Counter Bulletin Board (OTCBB) under the symbol CPSH.OB

Item 6. Selected Financial Data (000's)

The following selected financial data of CPS should be read in conjunction with the financial statements and related notes filed as part of this Annual Report on Form 10-K. Amounts are in thousands except per share amounts.

SELECTED FINANCIAL DATA

For the Fiscal Year:	<u>2010</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Summary of Operations					
Product Revenue	\$19,913	\$11,301	\$14,456	\$12,447	\$11,908

-

SELECTED QUARTERLY FINANCIAL DATA

	First Fiscal <u>Quarter</u> (000`s)	Second Fiscal <u>Quarter</u> (000`s)	Third Fiscal <u>Quarter</u> (000`s)	Fourth Fiscal <u>Quarter</u> (000`s)
2010				
Total Revenues	\$5,409	\$5,187	\$6,008	\$4,793
Gross Margin	\$1,050	\$1,384	\$1,485	\$97
Net Income (loss)	\$165	\$450	\$420	\$(325)
Net Income (loss) Per Basic Share	\$0.01	\$0.04	\$0.03	\$(0.03)
Net Income (loss) Per Diluted Common Share	\$0.01	\$0.03	\$0.03	\$(0.03)
2009				
Total Revenues	\$3,053	\$3,602	\$2,864	\$3,461
Gross Margin	\$620	\$673	\$316	\$638
Net Income	\$95	\$66	\$(136)	\$537
Net Income Per Basic Share	\$0.01	\$0.01	\$(0.01)	\$0.04
Net Income Per Diluted Common Share	\$0.01	\$0.01	\$(0.01)	\$0.04

Our results of operations fluctuate from quarter to quarter. The fluctuations are caused by various factors, primarily fluctuations in the timing of customer demand for our products. Quarterly data may not sum to annual data due to rounding.

Gross margins and net income for the fourth fiscal quarter of 2010 were negatively affected by lower revenue and lower manufacturing yields. Management believes the revenue decline in the fourth fiscal quarter of 2010 reflects continuing volatility in the macro economic environment. Manufacturing yields declined in the fourth fiscal quarter of 2010 due primarily to a change in raw materials; this yield issue was resolved in Q1 2011.

Net income for the fourth fiscal quarter of 2009 includes tax benefits of \$442 thousand resulting from reductions in the valuation allowance for deferred tax assets due to management`s assessment of the likelihood of the realization of these assets.

Item 7. Management`s Discussion and Analysis of Financial Condition and Results of Operations

This document contains forward-looking statements, based on numerous assumptions, subject to risks and uncertainties. Although we believe that the forward-looking statements are reasonable, we do not and cannot give any

assurance that our beliefs and expectations will prove to be correct. Many factors could significantly affect our operations and cause our actual results to be substantially different from our expectations. Those factors include, but are not limited to: (i) general economic and business conditions; (ii) customer acceptance of our products; (iii) materials and manufacturing costs; (iv) the financial condition of customers, competitors and suppliers; (v) technological developments; (vi) increased competition; (vii) changes in capital market conditions; (viii) governmental and business conditions in countries where our products are manufactured and sold; (ix) changes in trade regulations; (x) the effect of acquisition activity; (xi) changes in our plans, strategies, objectives, expectations or intentions; and (xii) other risks and uncertainties indicated from time to time in our filings with the Securities and Exchange Commission. Actual results might differ materially from results suggested by any forward-looking statements in this report. We do not have an obligation to publicly update any forward-looking statements, whether as a result of the receipt of new information, the occurrence of future events or otherwise.

### Overview

We provide advanced material solutions to the electronics, robotics, automotive, defense and other industries.

Our primary advanced material solution is metal matrix composites, a new class of materials which are a combination of metal and ceramic. CPS has a leading, proprietary position in metal matrix composites. Metal matrix composites have several superior properties compared to conventional materials including improved thermal conductivity, thermal expansion matching, stiffness and light weight, which enable higher performance and higher reliability in our customers' products.

The end markets which account for a majority of our sales today are all electronics markets: primarily the high-performance microprocessor and application-specific integrated circuits market and the motor controller market. Our products are typically in the form of housings, packages, lids, substrates, thermal planes, heat spreaders or baseplates, and are used in applications where thermal management and/or weight are important considerations.

In addition to electronics end markets, we are developing, manufacturing and marketing metal-matrix composite components for some structural end-markets including armor.

The objective of the Cooperative Agreement is to further develop large hybrid metal matrix composite modules which integrally combine metal matrix composites and ceramics by enveloping ceramic tiles with MMCs. This system offers a lighter weight, durable, multi-hit capable and cost competitive alternative to conventional steel, aluminum and ceramic based armor systems. CPS hybrid hard face armor modules are comprised of multiple materials completely enveloped within and mechanically and chemically bonded to lightweight and stiff aluminum metal matrix composites. The Company believes that its hybrid hard face armor tiles will find application in many military vehicles as well as armored commercial vehicles.

Our products are custom rather than catalog items. They are made to customers' blueprints and are used as components in systems built and sold by our customers. At any point in time our product mix will consist of some products with on-going production demand, and some products which are in the prototyping or evaluation stages at our customers. We seek to have a portfolio of products which include products in every stage of the technology adoption lifecycle at our customers. Our growth is dependent upon the level of demand for those products already in production, as well as our success in achieving new "design wins" for future products.

As a manufacturer of highly technical and custom products, we incur fixed costs needed to support the business, but which do not vary significantly with changes in sales volume. These costs include the fixed costs of applications engineering, tooling design and fabrication, process engineering, etc. Accordingly, particularly given our current size, changes in sales volume generally result in even greater changes in financial performance on a percentage basis as fixed costs are spread over a larger or smaller base. Sales volume is therefore a key financial metric used by management.

We believe the underlying demand for metal matrix composites is growing as the electronics and other industries desire higher performance, higher reliability, and reduced costs. We believe that we are well positioned to offer our solutions to current and new customers as these demands grow. In 2010 our top three customers accounted for 68% of revenue and the remaining 32% of revenue was derived from approximately 45 customers. In 2009, our top three customers accounted for 62% of revenue, and the remaining 38% of revenue was derived from approximately 52 other customers.

#### Application of Critical Accounting Policies

Management prepares our financial statements in conformity with accounting principles generally accepted in the United States of America. As such, we are required to make certain estimates, judgments and assumptions that we believe are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the periods presented. Our significant accounting policies are presented within Note 2 to the financial statements; the significant accounting policies which management believes are most critical to aid in fully understanding and evaluating our reported financial results include the following:

#### Revenue Recognition

We recognize revenue in accordance with the provisions of the Securities and Exchange Commission Staff Accounting Bulletin ("SAB") No. 104 which establishes guidance in applying generally accepted accounting principles to revenue recognition in financial statements. SAB No. 104 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services rendered; (3) the price to the buyer is fixed or determinable; and (4) collectability is reasonably assured.

Our shipping terms are customarily FOB shipping point. Revenues for products sold in the normal course of business are recognized upon shipment when delivery terms are FOB shipping point and all other revenue recognition criteria have been met.

We have entered into consigned inventory agreements with several customers. For product shipped under consigned inventory agreements, we recognize revenue when the customer notifies us that they have picked the product from the consigned inventory. Of the total finished goods inventory of \$865,448 at December 25, 2010, \$524,576 was located at the Company's facility in Norton, Massachusetts and \$340,872 was located at customers' locations pursuant to consigned inventory agreements. Of the total finished goods inventory of \$983,006 at December 26, 2009, \$355,868 was located at the Company's facility in Norton, Massachusetts and \$627,138 was located at customers' locations pursuant to consigned inventory agreements.

Advance payments in excess of revenue recognized are recorded as deferred revenue.

In 2008, we entered into a cooperative agreement with the US Army Research Laboratory to perform research and development concerning hybrid metal matrix composite encapsulated ceramic armor technology. The Cooperative Agreement is a four-year agreement which is 95% funded by the US Department of Defense and 5% funded by CPS.

Revenues on this Cooperative Agreement are recognized proportionally as costs are incurred. We are reimbursed for reasonable and allocable costs up to the reimbursement limits set by the Cooperative Agreement. All payments to the Company for work performed on this Cooperative Agreement are subject to audit and adjustment by the Defense Contract Audit Agency. Adjustments are recognized in the period made.

The Cooperative Agreement extends for four years and provides for funding of up to \$8.34 million over the four years, but actual funding is provided incrementally on a year-to-year basis, depending on, among other factors, if yearly objectives are met and if Congress authorizes the funds. If the total \$8.34 million in funding is provided by the

Government, the Company's cost share will amount to \$439,000 over the term of the Agreement. As of December 25, 2010, the Company has been approved for \$3.837 million in funding of which \$1,484,000, \$1,679,000, and \$357,000 was invoiced in 2010, 2009 and 2008, respectively.

#### Accounts Receivable

We perform ongoing monitoring of the status of our receivables based on the payment history and the credit worthiness of our customers, as determined by a review of their current credit information. Management continuously monitors collections and payments from customers and maintains a provision for estimated credit losses based upon historical experience and any specific customer collection issues that have been identified. While such credit losses have historically been low and within expectations, there is no guarantee that we will continue to experience the same credit loss rates as in the past. A significant change in the liquidity or financial position of one of our major customers could have a material adverse impact on the collectability of accounts receivable and future operating results.

#### Inventory

We follow a build to order business model; we manufacture product to ship against specific purchase orders, only rarely do we manufacture product in advance of anticipated purchase orders. In addition, 100% of our products are custom, meaning they are produced to a customer's blueprint and generally cannot be used for any other purpose. Purchase orders generally have cancellation provisions which vary from customer to customer, but which can result occasionally in CPS producing product which the customer is not obligated to purchase. However, once a product has gone into production most customer orders are recurring and order cancellations are very rare therefore no reserve is needed for obsolete inventory.

The level of inventory fluctuates for several reasons. Some customers place a blanket purchase order and then request that we maintain certain inventory levels so we can ship immediately upon receiving a shipment release from them. In other cases we may deliberately produce product for which the customers' shipment dates are in the future to more efficiently schedule production resources. Many customers provide us with forecasts and our inventory levels may fluctuate as we adjust production schedules to changes in customer forecasts.

In determining inventory cost we use the first-in, first-out method and state inventory at the lower of cost or market. As a result of the fact that our inventory is customer specific, if a customer order is cancelled it is likely that we would be unable to sell inventory manufactured to meet that order to another customer. Likewise, if we did manufacture product in advance of anticipated purchase orders and those orders did not materialize, it is likely that we would be unable to sell that inventory to another customer. The value of our work in process and finished goods is based on the assumption that specific customers will take delivery of specific items of inventory. We have experienced no losses to date as a result of customer cancellations and we have no reserves against such cancellations.

#### Property and Equipment

Property and equipment are stated at cost. Depreciation of equipment is calculated on a straight-line basis over the estimated useful life, generally five years for production equipment and three to five years for furniture and office equipment. Amortization of equipment under capital leases is calculated on a straight-line basis over the life of the lease. Maintenance and repairs are charged to expense as incurred. Upon retirement or sale, the cost and related accumulated depreciation or amortization are removed from their respective accounts. Any gains or losses on the disposition of property and equipment are included in the results of operations in the period in which they occur.

#### Income Taxes

We record deferred tax assets and liabilities based on the net tax effects of tax credits, operating loss carryforwards and temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and

the amounts used for income tax purposes. We assess the likelihood that our deferred tax assets will be recovered from future taxable income and we establish a valuation allowance to reduce deferred tax assets to an amount which we believe to be more likely than not realizable. The valuation allowance is based on our estimates of taxable income by jurisdiction in which we operate and the period over which our deferred tax assets will be recoverable.

### Results of Operations

Revenue in 2010 of \$21.4 million was a 65% increase from 2009 revenue of \$13.0 million. The 65% increase in revenue results from increased customer demand for all product families, offset somewhat by a slight decline in revenues from the Company's Cooperative Agreement with the Army Research Laboratory for armor development.

In the case of baseplates for motor controllers used for trains, subway cars and wind turbines, increased demand came from three sources: growth in the underlying market itself, increased penetration of AlSiC into specific applications, and market share gains by the Company. Increased demand for baseplates used in hybrid cars resulted from increased sales of the hybrid cars which use the Company's baseplates, as well as increased pre-production shipments of baseplates for hybrid cars that will begin serial production in 2011.

Sales increased for AlSiC lids and heatspreaders used in switches, routers and high-performance computing. This market segment continues to be quite volatile, driven somewhat by the external economic environment. Sales also increased for the Company's hermetic metal packages, driven somewhat by increasing market interest in the Company's hermetic packages incorporating the Company's AlSiC components.

Revenue in 2009 of \$13.0 million was a 13% decrease from 2008 revenue of \$14.8 million. The 13% decrease in revenue in 2009 primarily reflects reduced customer demand due to the challenging external economic environment. Customer demand declined in all product families; this decline was somewhat offset by revenues from the Company's Cooperative Agreement with the Army Research Laboratory entered into in September 2008.

The Cooperative Agreement is a four-year agreement which is 95% funded by the US Department of Defense and 5% funded by CPS. The Department of Defense funding is Manufacturing Technology ("ManTech") funding. The Agreement provides for funding of up to \$8.34 million over the four years, but actual funding is provided incrementally on a year-to-year basis, depending on, among other factors, if yearly objectives are met and if Congress authorizes the funds. If the total \$8.34 million in funding is provided by the Government, the Company's cost share will amount to \$439 thousand over the term of the Agreement.

In 2010, 2009 and 2008, research and development costs were incurred related to the Cooperative Agreement with the US Army. These costs consist of materials, labor, overhead expenses, general and administrative expenses, and equipment purchases. Total expenditures incurred in 2010, 2009 and 2008 under this Agreement amounted to \$1.557 million, \$1.775 million and \$376 thousand, respectively, of which \$1.328 million, \$1.541 million and \$310 thousand, respectively, is included in cost of research and development under cooperative agreement in the Statement of Income. \$1.484 million, \$1.679 million and \$357 thousand in 2010, 2009 and 2008, respectively, of these costs were funded by the US Army and are classified as research and development cooperative agreement revenues in the Statement of Income.

### Operating Costs

Operating costs consist of cost of product sales, cost of research and development under the Cooperative Agreement, and selling, general, and administrative expenses. Total operating costs were \$20.3 million, \$12.8 million and \$13.4 million for the fiscal years 2010, 2009 and 2008, respectively.

Cost of sales for 2010, 2009 and 2008 were \$17.4 million, \$10.7 million and \$10.8 million, respectively. The increase in cost of sales in 2010 compared to 2009 was primarily the result of increases in labor and materials associated with

increased shipments. Cost of sales in 2009 compared to 2008 was essentially flat.

Gross margins on product revenue for 2010, 2009 and 2008 were 19.4%, 18.7% and 27.2% respectively. The increased revenue in 2010 resulted in fixed costs being spread over a larger base, positively affecting gross margins; however, lower manufacturing yields in Q4 2010 reduced gross margins, resulting in essentially flat margins year to year. Lower manufacturing yields in Q4 were primarily caused by a change in raw materials and this issue was resolved in Q1 2011. The lower manufacturing yields in Q4 2010 increased raw material costs and labor costs, including overtime.

The decrease in gross margin in 2009 compared to 2008 is a result of lower labor utilization related to reduced demand and fixed costs being spread over a smaller base.

Cost of sales for 2010, 2009 and 2008 for the Cooperative Agreement were \$1.328 million, \$1.541 million, and \$310 thousand, respectively. Cost of sales for the Cooperative Agreement includes a portion of the 5% cost share from CPS for 2010, 2009 and 2008 of \$61 thousand, \$81 thousand, and a \$16 thousand, respectively.

Selling, general and administrative (SG&A) expenses for 2010, 2009 and 2008 were \$3.0 million, \$2.1 million and \$2.6 million, respectively. The increase in SG&A expenses in 2010 is primarily the result of higher commissions paid to sales representatives and increased compensation expense related to stock option grants made in July 2010.

The decrease in SG&A expense in 2009 compared to 2008 is primarily the result of lower commissions paid to sales representatives and lower sales promotion expense.

#### Other Expense, Net

The Company had net other expense of \$32 thousand, \$39 thousand and \$44 thousand for 2010, 2009 and 2008, respectively. These amounts were primarily interest expense for production equipment on capital leases, offset partially by interest income on cash balances.

#### Income Taxes

The Company recorded income tax expense of \$311 thousand which includes a \$222 thousand deferred tax expense consisting of \$396 thousand resulting from the use and expiration of certain net operating loss carry forward offset by changes in deferred taxes related to stock compensation and depreciation. The current federal tax expense of \$45 thousand relates to alternative minimum tax. The Company incurred \$43 thousand of current state tax expense in 2010.

The Company recorded an income tax benefit of \$452 thousand in 2009 consisting of a deferred tax benefit of \$480 thousand resulting from most significantly the reduction in the valuation allowance provided on our net operating loss carryforwards based on our estimate of future taxable income offset by \$28 thousand of current federal and state tax expense. The current federal tax expense of \$6 thousand relates to alternative minimum tax. The Company incurred \$22 thousand of current state tax expense in 2009.

The Company recorded an income tax benefit of \$134 thousand in 2008 consisting of a deferred tax benefit of \$299 thousand resulting from most significantly the reduction in the valuation allowance provided on our net operating loss carryforwards based on our estimate of future taxable income offset by \$165 thousand of current federal and state tax expense. The current federal tax expense of \$27 thousand relates to alternative minimum tax. The Company incurred \$137 thousand of current state tax expense in 2008.

Certain provisions of the Internal Revenue Code limit the annual utilization of net operating loss carryforwards if a change in ownership as defined, occurs. The Company believes that it did not have an ownership change as defined

through the year ending December 25, 2010; therefore, at December 25, 2010 all net operating loss carryforwards are available to offset future taxable income.

The reduction in the valuation allowance in 2009 to \$0 means that if, in future periods, taxable income falls significantly below projections there is a risk of deferred tax assets not being realized and additional tax expense being recorded.

### Liquidity and Capital Resources

Cash on hand at year-end 2010 of \$1.80 million reflects a 68% increase from cash on hand at year-end 2009 of \$1.07 million. The increased cash is a result of higher revenues in 2010 as well as changes in inventory levels. In 2010, the Company generated cash of \$1.60 million from operations, used cash of \$230 thousand in financing activities and used cash of \$640 thousand in purchases of property and equipment.

Cash on hand at year-end 2009 of \$1.07 million reflects an 8% decrease from cash on hand at year-end 2008 of \$1.16 million. Cash declined as a result of changes in inventory levels and accounts receivable; management views this level of fluctuation as within the ordinary course of business. In 2009, the Company generated cash of \$162 thousand from operations and \$46 thousand from financing activities, but consumed \$293 thousand in purchases of property and equipment.

In May 2010, the Company renewed a \$1 million revolving line of credit with Sovereign Bank. The line of credit is secured by the accounts receivable and other assets of the Company. The revolving line of credit has a one-year term although management believes it is likely that Sovereign Bank and the Company will renew the line at the end of the term. In 2010 there were no borrowings under this line of credit.

An equipment financing facility with Sovereign Bank allows the Company to finance up to \$1 million of eligible equipment. As of year-end 2010 the Company had \$571 thousand available remaining on the Sovereign lease line. Equipment financed by the Sovereign Equipment lease qualifies for treatment as a capital lease.

Management believes that cash flows from operations, existing cash balances and the leasing and credit line in place with Sovereign Bank will be sufficient to fund our cash requirements for the foreseeable future. However, there is no assurance that we will be able to generate sufficient revenues or reduce certain discretionary spending in the event that planned operational goals are not met such that we will be able to meet our obligations as they become due.

### Contractual Obligations

Our contractual obligations at year-end 2010 consist of the following

:

	<u>Payments Due by Period</u>				
	<u>Total</u>	<u>Less than one year</u>	<u>1-3 years</u>	<u>4-5 years</u>	<u>More than 5 years</u>
Capital lease obligations, including interest	\$ 450,910	\$ 269,787	\$ 181,123	None	None
	\$ 825,500	\$ 204,000	\$ 285,500	\$ 298,500	\$ 37,500

Operating lease  
obligations

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Recent Accounting Pronouncements

A summary of recent accounting standards is included in Note 2 to the financial statements.

Inflation

Inflation had no material effect on the results of operations or financial condition during 2010, 2009 or 2008. There can be no assurance however, that inflation will not affect our operations or business in the future.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

We are not significantly exposed to the impact of interest rate changes and foreign currency fluctuations. We have not used derivative financial instruments.

Item 8. Financial Statements and Supplementary Data

See Index to the Company's Financial Statements and the accompanying notes which are filed as part of this Annual Report on Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

*Evaluation of Disclosure Controls and Procedures*

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in Securities and Exchange Commission reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Under the direction of our Chief Executive Officer and Chief Financial Officer, management has carried out an evaluation of the effectiveness of the Company's disclosure controls and procedures as such item is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures were effective as of December 25, 2010.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting in the fourth quarter of fiscal 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over

financial reporting.

#### Item 9A Controls and Procedures

##### Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company, as such term is defined in Rule 13a-15(f) of the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States and includes those policies and procedures that (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the Company's assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of the Company's management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the direction of our Chief Executive Officer and Chief Financial Officer, management has assessed the effectiveness of the Company's internal control over financial reporting as of December 25, 2010. In making this assessment, management used the criteria set forth in the "Internal Control Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management concluded that the Company's internal control over financial reporting was effective as of December 25, 2010.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to recent final rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

#### Item 9B. Other Information

The Company had no information required to be disclosed in a report on Form 8-K during the fourth quarter of the year covered by this Form 10-K that has not been so reported.

### Part III

#### Item 10. Directors, Executive Officers and Corporate Governance

##### Board Members and Executive Officers

Directors of the Company are elected annually and hold office until the next annual meeting of stockholders and until their respective successors are duly elected and qualified. The executive officers of the Company are appointed by the Board of Directors and hold office until their respective successors are duly elected and qualified.

## Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-K

The names of the directors and executive officers of the Company and certain information about them as of December 25, 2010 are listed below.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Grant C. Bennett	56	President, Chief Executive Officer, Treasurer and Director
Francis J. Hughes, Jr.	60	Director
Daniel Snow	39	Director

Mr. Grant C. Bennett has held the positions of President, Chief Executive Officer and Director and Treasurer of the Company since September, 1992. Prior to that time, he served as Vice President, Sales and Marketing of the Company from November, 1985 to September, 1992. Before joining CPS, Mr. Bennett was a consultant at Bain & Company, a Boston-based management consulting firm. Mr. Bennett has an MS degree from MIT.

Mr. Francis J. Hughes, Jr. has served as President of American Research and Development Corporation ("ARD"), a venture capital firm, since 1992. Mr. Hughes joined ARD's predecessor organization in 1982, and became Chief Operating Officer in 1990. Mr. Hughes has co-founded and served as a General Partner of the following venture capital funds: ARD I, L.P., ARD II, L.P. (July, 1985), ARD III, L.P. (April, 1988), Hospitality Technology Fund, L.P. (June, 1991) and Egan-Managed Capital, L.P. (February, 1997). Mr. Hughes has served as a Director of the Company since 1993. Mr. Hughes has an MS degree from MIT and an MBA from the Harvard Business School.

Dr. Daniel C. Snow has served as associate professor at the Marriott School of Management at Brigham Young University since 2009. From 2004 to 2009, he served on the faculty of the Harvard Business School. His research focuses on technological innovation, specifically furthering the understanding of the complex interplay between old and new technologies. Professor Snow holds an MBA from Brigham Young University's Marriott School of Management, and a PhD from the University of California, Berkeley. Professor Snow previously worked for Ford Motor Company as a financial analyst.

There are no family relationships between or among any executive officers or directors of the Company.

### Board Independence

The Board has determined that Messrs. Hughes and Snow are independent as defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards.

### Board Meetings and Attendance

The Board held six meetings during the fiscal year ended December 25, 2010. Each Board member attended more than 75% of the meetings of the Board and of the committees on which he served which were held during the period for which he was a director or committee member.

### Committees

The Board has an Audit Committee and a Compensation Committee, but not a Nominating Committee.

### Audit Committee

The Company has a separately designated standing Audit Committee established in accordance with Section 3(a)(58)(A) of the Exchange Act. The members of the Audit Committee are Francis J. Hughes, Jr. and Daniel C. Snow. The Audit Committee met four times in fiscal 2010.

The Board of Directors has determined that Francis J. Hughes, Jr. and Daniel C. Snow are both audit committee financial experts as defined by Item 401(h) of Regulations S-K of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and is independent within the meaning of Item 7(d)(3)(iv) of Schedule 14A of the Exchange Act.

#### Compensation Committee

Each member of the Compensation Committee is independent as defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards. The Compensation Committee makes recommendations concerning salaries and incentive compensation, awards equity compensation to employees and consultants under our equity incentive plans and otherwise determines compensation levels and performs other functions regarding compensation that are delegated by the Board. The members of the Compensation Committee are Daniel C. Snow and Francis J. Hughes, Jr. The Compensation Committee met two times in fiscal 2010.

#### *Selection of New Directors*

The Board does not have a nominating committee. The Board itself is responsible for selecting its own members and recommending them for election by the shareholders.

#### Shareholder Communication with the Board of Directors

Any shareholder who desires to communicate with the Board, non-management directors as a group, or any individual director, may send a letter addressed to the same, c/o VP Administration, CPS Technologies Corporation, 111 South Worcester Street, Norton, MA 02766. The VP Administration has been instructed by the Board to forward such communication directly to the addressee(s) unopened.

#### Directors' Compensation

The Company adopted the 2009 Stock Incentive Plan ("2009 Plan") on December 10, 2009. Under the terms of the 2009 Plan, all of the Company's employees, officers, directors, consultants and advisors are eligible to be granted options, restricted stock awards, or other stock-based awards. In 2010, Mr. Hughes and Mr. Snow were each granted options to purchase 15,000 shares of the Company's common stock. The options granted are nonstatutory stock options exercisable at the fair market value of the stock on the date of grant one year from the date of grant, and expire ten years from the date of grant. The 2009 Plan includes provisions for the acceleration of vesting in the event of a change in control of the Company. The Company measures the fair value of the stock awards on the date of grant and the cost is recognized over the requisite service period.

In addition to stock options, beginning with Q3, 2010, directors receive cash payments of \$1,000 per meeting attended, as well as \$2,500 for each fiscal quarter in which the Company meets certain financial performance criteria. The Company met these criteria in Q3 2010, but did not meet these criteria in Q4 2010.

Outside directors may receive expense reimbursements for attending board and committee meetings. Directors who are officers or employees of the Company do not receive any additional compensation for their services as directors.

#### Code of Ethics

We have adopted a code of business conduct and ethics for directors, officers, (including the principal executive officer, principal financial officer and treasurer) and employees, known as the CPS Code of Conduct. The CPS Code of Conduct is available by contacting our human resource department.

## Item 11. Executive Compensation

### Executive Officer Summary Compensation Table

The following table shows compensation earned during the three most recent fiscal years by our chief executive officer, chief financial officer, and all other officers whose salary and bonus exceeded \$100,000 in any of the past three years. Grant Bennett is both our chief executive officer and chief financial officer. For the purpose of executive compensation and related person disclosure, we refer to these individuals collectively as the Named Executive Officers.

#### NAMED EXECUTIVE OFFICER SUMMARY COMPENSATION TABLE

<u>Name &amp; Position</u>	<u>Year</u>	<u>Salary (\$)</u>	<u>Bonus (\$)</u>	<u>Stock Awards (\$)</u>	<u>Option Awards (\$)</u>	<u>Non-Equity Incentive Plan Compensation (\$)</u>	<u>Change in Pension Value and Non</u>	
							<u>qualified Deferred Compensation Earnings (\$)</u>	<u>All Other Compensation (\$)</u>
Grant	2010	\$168,845	\$ 203	\$0	\$0	\$0	\$0	\$0
Bennett	2009	\$120,679	\$15,038	\$0	\$0	\$0	\$0	\$0
CEO, CFO	2008	\$136,298	\$20,051	\$0	\$0	\$0	\$0	\$0
Richard	2010	\$149,448	\$ 203	\$0	\$18,385	\$0	\$0	\$0
Adams	2009	\$121,059	\$ 7,538	\$0	\$0	\$0	\$0	\$0
CTO & Senior VP	2008	\$134,789	\$10,051	\$0	\$0	\$0	\$0	\$0
Mark	2010	\$122,557	\$ 203	\$0	\$24,804	\$0	\$0	\$0
Occhionero	2009	\$ 99,859	\$5,250	\$0	\$0	\$0	\$0	\$0
VP Marketing	2008	\$104,677	\$5,054	\$0	\$0	\$0	\$0	\$0

Cheryl	2010	\$109,981	\$ 217	\$0	\$1,519	\$0	\$0	\$0
Oliveira	2009	\$88,892	\$5,250	\$0	\$0	\$0	\$0	\$0
VP Sales	2008	\$95,885	\$5,054	\$0	\$0	\$0	\$0	\$0

The dollar amounts listed in "Option Awards (\$)" above represent the dollar amount recognized on the Company's 2010 Financial Statements as compensation expense resulting from options held by the Named Executive Officer. This dollar amount is determined pursuant to FASB ASC718. See "Stock Option Grants and Exercises" below for additional information relating to the options held by these Named Executive Officers.

**Change-of-Control Agreements**

None of the Named Executive Officers described in the Summary Compensation Table above have entered into a change-of-control agreement with the Company. All options granted to all employees, including the officers listed above, are subject to accelerated vesting in the event of a change of control as described in the option plans.

**Stock**

**Option Grants And Exercises**

In fiscal 2010 a total of 724,105 stock options were granted to employees under the Company's 2009 Stock Incentive Plan of which a total of 368,105 stock options were granted to Named Executive Officers.

As described above, in fiscal 2010 a total of 30,000 stock options were granted to directors as directors' compensation and 8,000 stock options were granted to a consultant to the Company as compensation for services rendered.

In fiscal 2010 a total of 3,000 stock options were exercised by Dr. Mark Occhionero, VP Marketing, a Named Executive Officer; no stock options were exercised by the other Named Executive Officers.

**AGGREGATED OPTION EXERCISES IN FISCAL 2010 AND FISCAL 2010 YEAR END OPTION VALUES FOR NAMED EXECUTIVE OFFICERS**

Name	Shares Acquired On Exercise (#)	Value Realized (\$)	Number of Securities Underlying Unexercised Options at December 25, 2010				Value of Unexercised In-the-Money Options at December 25, 2010	
			Exer-cisable	Exer-cise Price	Expir-ation Date	Un-exer-cisable	Exer-cisable	Un-exer-cisable
Grant	0	\$0	0	--	--	0	\$0	\$0

Bennett

Richard Adams	0	\$0	242,750	\$0.30 to \$0.65	October 9, 2011 through Oct 12, 2014	151,250	\$312,150	\$231,413
Mark Occhionero	3,000	\$4,020	120,500	\$0.30 to \$0.65	October 9, 2011 through Oct 12, 2014	204,355	\$148,180	\$312,665
Cheryl Oliveira	0	\$0	50,000	\$1.37	August 8, 2015	12,000	\$14,000	\$18,360

The value of unexercised in-the-money options is based on the fair market value of our common stock as of December 25, 2010 of \$1.65 per share, minus the exercise price, multiplied by the number of shares underlying the option.

#### Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table sets forth certain information, as of December 25, 2010, with respect to the beneficial ownership of the Company's Common Stock by (i) each person known by the Company to own beneficially more than 5% of the outstanding shares of Common Stock, (ii) each Director of the Company, (iii) each Executive Officer of the Company named above in the Summary Compensation Table, and (iv) all Directors and Officers as a group:

<u>Name and Address of Beneficial Owner</u>	<u>Common Stock Beneficially Owned</u>	<u>Notes (1)</u>	<u>Percentage of Shares of Common Stock Outstanding</u>
ARD Master, L.P. 85 Devonshire Street 6 <sup>th</sup> Floor Boston, MA 02109	2,184,789	(2)	17.2%
Norman J. Wechsler P.O. Box 5123 Mt. Crested Butte, CO 81225	1,484,049	(3)	11.7%
<b>DIRECTORS AND OFFICERS:</b>			
Grant C. Bennett Director & Officer	1,564,554		12.3%
Richard W. Adams Chief Technical Officer and Senior Vice President of Engineering	429,000	(4)	3.4%

Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-K

Mark A. Occhionero Vice President Marketing and Senior Scientist	338,255	(5)	2.7%
Cheryl Oliveira Vice President Sales	62,500	(6)	*
Daniel C. Snow Director	39,000	(7)	*
Francis J. Hughes, Jr. Director	2,287,789	(8)	18%
	-----		-----
All directors and officers as a group (6 persons)	4,791,098	(9)	37.2%
	=====		=====

\*Less than 1% of the total number of outstanding shares of Common Stock.

1. The inclusion herein of any shares of Common Stock deemed beneficially owned does not constitute an admission of beneficial ownership of those shares. Unless otherwise indicated, each stockholder referred to above has sole voting and investment power with respect to the shares listed.
2. Consists of 2,184,789 shares owned by ARD Master L.P., Excludes 8,000 shares and options to purchase 95,000 shares of common stock held by Mr. Hughes.
3. Consists of 1,484,049 shares owned by CYB Master LLC. Mr. Wechsler may be deemed to be the beneficial owner of these shares by virtue of being the sole person in a position to direct the voting and investment decisions of CYB Master LLC.
4. Consists of 35,000 shares owned by Mr. Adams and options to purchase 394,000 shares of common stock.
5. Consists of 13,400 shares owned by Dr. Occhionero and options to purchase 324,855 shares of common stock.
6. Consists of options to purchase 62,000 shares of common stock.
7. Consists of options to purchase 39,000 shares of common stock
8. Consists of shares described in Footnote 2 above owned by ARD Master, L.P., plus 8,000 shares of common stock and options to purchase 95,000 shares of common stock held by Mr. Hughes.
9. Consists of all shares and options to purchase shares owned by Messrs. Hughes, Snow, Bennett, Adams, Occhionero and Ms. Oliveira.

#### Compliance with Section 16(a) of the Exchange Act

Section 16(a) of the Securities Exchange Act of 1934 requires our directors, executive officers, and persons who own more than ten percent of a registered class of our equity securities to file with the Securities and Exchange Commission initial reports of ownership and reports of changes in ownership of our common stock and other equity securities. Officers, directors and greater than ten percent stockholders are required by Securities and Exchange Commission regulations to furnish us with copies of all Section 16(a) forms they file.

To our knowledge, based solely on a review of the copies of the reports furnished to us and written representations that no other reports were required, during the fiscal year ended December 25, 2010, all Section 16(a) filing requirements applicable to our officers, directors and greater than ten percent stockholders were complied with and no reports or transactions were filed late.

## COMPENSATION COMMITTEE REPORT

### General

Compensation of our senior executives is determined by the Compensation Committee of the Board ("Committee"). The Committee, comprised entirely of independent directors as defined in Rule 4200(a)(15) of the National Association of Securities Dealers' listing standards, meets to set annual salaries in advance and bonuses for the current year, to review annual goals and to reward outstanding annual performance of executive officers and to grant stock options pursuant to our stock plans. The Committee has considered executive officers' compensation matters at several meetings in 2010. During those meetings, the Committee consulted with senior management, reviewed and approved corporate goals and objectives relevant to compensation matters, evaluated the performance of certain executives and considered, among other factors, third party studies of executive compensation for comparable companies, and the Company's performance and relative stockholder return. The results of some of the actions taken from those meetings are included under the heading "*Executive Officer Compensation*" in Form 10-K.

While management may have been present during a part of Committee discussions regarding officers' compensation during the last fiscal year, Committee decisions with respect to the compensation of our Chief Executive Officer and other executives were reached in private session without the presence of any member of management.

Stockholder comments to the Committee are welcomed and should be addressed to the Secretary of the Company at our principal executive office.

### Compensation Philosophy

Our primary goal is to align compensation with our business objectives and performance. Our aim is to attract, retain and reward executive officers and other key employees who contribute to our long-term success and to motivate those individuals to enhance long-term stockholder value. To establish this relationship between executive compensation and the creation of stockholder value, the Board has adopted a total compensation package comprised of base salary, bonus and stock option awards. Key elements of this compensation package are:

- We intend to pay competitively with leading companies with which we compete for talent.
- We maintain annual incentive opportunities sufficient to provide motivation to achieve specific operating goals and to generate rewards that are intended to bring total compensation to competitive levels.
- We provide meaningful equity-based incentives for executives and other key employees to ensure that individuals are motivated over the long-term to respond to our business challenges and opportunities as owners and not just as employees.

### Base Salary

The Committee reviews each executive officer's base salary on an annual basis. Among those factors taken into consideration in setting salaries for executives are (1) individual and corporate performance, (2) level of responsibility, (3) prior experience, (4) breadth of knowledge of the industry, and (5) competitive pay practices.

### Bonus

We believe that executive performance may be maximized through a system of incentive awards. Toward this end, the Committee adopted several years ago a discretionary cash incentive plan and has paid bonuses some years and not paid bonuses some years. For all cash incentive arrangements, the award earned depends primarily on the extent to which our performance objectives are achieved. Each fiscal year the Committee will review and approve our annual performance objectives and our executive officers' performance. Our objectives consist of operating, strategic and financial goals that are considered to be critical to our overall goal: building stockholder value. For the fiscal year ended December 25, 2010, the Committee had determined that the primary goal in building stockholder value was

meeting sales growth and profit targets.

#### Long-Term Incentives

Our long-term incentive program presently consists of our 2009 Stock Incentive Plan.

#### Chief Executive Officer Compensation

Mr. Bennett's salary and bonus are evaluated at least annually by the Committee, and any changes are determined in accordance with the criteria described under the headings "*Base Salary*," "*Bonus*," and "*Long-Term Incentives*" in this report, and otherwise reflect the Committee's assessment of (1) his performance, (2) his skills in relation to other CEO's in our industry, (3) its confidence in his ability to lead our continued development, and (4) his broad involvement in our operations.

Several years ago Mr. Bennett recommended to the Committee that no stock options be awarded to him because his stock ownership position already firmly aligned his interests with those of the Company, and the options thereby made available could be awarded to other members of the management team; the Committee accepted Mr. Bennett's recommendation and since becoming CEO he has not been awarded any options.

#### Certain Tax Considerations

Section 162(m) of the Internal Revenue Code may limit us to a deduction for federal income tax purposes of not more than \$1 million of compensation paid to certain executive officers in a taxable year, if considered unreasonable. No employee's compensation exceeded \$1 million and the Committee believes it is highly unlikely any employee's covered compensation will exceed this amount in the foreseeable future.

#### Compensation Committee Interlocks and Insider Participation

As discussed in the report above, Grant Bennett our President, Chief Executive Officer and Treasurer, is not a member of the Committee but participated in the deliberations of the Board concerning executive officer compensation, except where the decision directly involved his own compensation package.

From the members of the Compensation Committee:

Daniel C. Snow (Chairman)

Francis J. Hughes, Jr.

#### Item 13. Certain Relationships and Related Transactions

None.

#### Item 14. Principal Accounting Fees and Services.

Fees paid to the Company's independent accountants in the last two fiscal years are:

	<u>Wolf &amp; Company PC</u>	
	<u>2010</u>	<u>2009</u>
Audit fees	\$ 97,102	\$ 84,788
	=====	=====

Audit Fees consist of aggregate fees for professional services rendered for the audit of our annual financial statements and review of the interim financial statements included in quarterly reports or services that are normally provided by the independent auditor in connection with statutory and regulatory filings or engagements for the fiscal years ended December 25, 2010 and December 26, 2009, respectively.

At present, our Audit Committee approves each engagement for audit or non-audit services before we engage Wolf & Company, P.C.(Wolf & Company), or any other accounting firm, to provide those services. Our audit committee has not established any pre-approval policies or procedures that would allow our management to engage Wolf & Company to provide any specified services with only an obligation to notify the Audit Committee of the engagement for those services. None of the services provided by Wolf & Company for fiscal 2010 was obtained in reliance on the waiver of the pre-approval requirement afforded in SEC regulations.

#### AUDIT COMMITTEE REPORT

Our Audit Committee consists of two independent members of the Board of Directors as defined in Rule 4200(a)(15) of the National Association of Securities Dealers` listing standards.

The primary purpose of the Audit Committee is to assist the Board in fulfilling its responsibility to oversee management`s conduct of our financial reporting process, including the process of preparing the financial reports and other financial information we provide to any governmental or regulatory body, the public or other users thereof, our systems of internal accounting and financial controls, the annual independent audit of our financial statements and our legal compliance and ethics programs as established by management and the Board. Management is responsible for the preparation, presentation, and integrity of our financial statements, accounting and financial reporting principles, internal controls, and procedures designed to ensure compliance with accounting standards, applicable laws and regulations. The independent auditors are responsible for auditing our financial statements and expressing an opinion as to their conformity with generally accepted accounting principles.

The Audit Committee has reviewed and discussed the audited financial statements for the fiscal year ended December 25, 2010 with management. Furthermore, the Audit Committee has discussed with Wolf & Company, P.C., our independent auditors for the fiscal year ended December 25, 2010, the matters required to be discussed by Statement on Auditing Standards No. 61. The Audit Committee has received the written disclosures from Wolf & Company, P.C., required by Independence Standards Board Standard No. 1 and has discussed with Wolf & Company, P.C., such auditing firm`s independence.

Based on these reviews and discussions, the Audit Committee recommended to the Board that the audited financial statements be included in this, our Annual Report on Form 10-K for the fiscal year ended December 25, 2010.

The Audit Committee has also recommended to the Board the selection of Wolf & Company, P.C., as the Company`s independent auditors for the fiscal year ending December 31, 2011, and the Board has approved that recommendation.

From the members of the Audit Committee:  
Francis J. Hughes, Jr. (Chairman)  
Daniel C. Snow

#### Part IV

Item 15. Exhibits, Financial Statement Schedules.

(a) Documents filed as part of this Form 10-K.

#### 1. Financial Statements

The financial statements filed as part of this Form 10-K are listed on the Index to Financial Statements of this Form 10-K.

## 2. Exhibits

The exhibits to this Form 10-K are listed on the Exhibit Index of this Form 10-K.

## SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

2009 and December 27, 2008

Notes to Financial Statements

#### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders  
CPS Technologies Corporation  
Norton, Massachusetts

We have audited the accompanying balance sheets of CPS Technologies Corporation as of December 25, 2010 and December 26, 2009 and the related statements of income, stockholders` equity and cash flows for each of the years in the three-year period ended December 25, 2010. These financial statements are the responsibility of the Corporation`s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of CPS Technologies Corporation as of December 25, 2010 and December 26, 2009, and the results of its operations and its cash flows for each of the years in the three-year period ended December 25, 2010, in conformity with accounting principles generally accepted in the United States of America.

/s/ Wolf & Company, P.C.  
Boston, Massachusetts

See accompanying notes to financial statements.

CPS Technologies Corporation

Years Ended December 25, 2010, December 26, 2009, and December 27, 2008

Notes to Financial Statements

(1) Nature of Business

The Company provides advanced material solutions to the electronics, robotics, automotive and other industries. The Company's primary advanced material solution is metal matrix composites which are a combination of metal and ceramic.

CPS also assembles housings and packages for hybrid circuits. These housings and packages may include components made of metal-matrix composites or they may include components made of more traditional materials such as aluminum, copper-tungsten, etc.

The Company sells into several end markets including the wireless communications infrastructure market, high-performance microprocessor market, motor controller market, and other microelectronic and structural markets. In 2008 the Company also entered into a cooperative agreement with the U.S. Army to further develop its composite technology to produce armor.

(2) Summary of Significant Accounting Policies

(2)(a) Cash and Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less at the date of purchase to be cash equivalents.

(2)(b) Accounts Receivable

The Company reports its accounts receivable at the invoiced amount less an allowance for doubtful accounts. The Company's management provides appropriate provisions for uncollectible accounts based upon factors surrounding

the credit risk and activity of specific customers, historical trends, economic conditions and other information. Adjustments to the allowance are charged to operations in the period in which information becomes available that may affect the allowance.

(2)(c) Inventories

Inventories are stated at the lower of cost, as determined under the first-in, first-out method (FIFO), or market. A reserve for obsolete inventories, if any, is based on factors regarding the sales and usage of such inventories, including inventories manufactured for specific customers.

(2)(d) Property and Equipment

Property and equipment are stated at cost. Depreciation of equipment is calculated on a straight-line basis over the estimated useful life, generally five years for production equipment and three to five years for furniture and office equipment. Amortization of equipment under capital leases is calculated on a straight-line basis over the shorter of the life of the lease or the estimated useful life of the equipment. Maintenance and repairs are charged to expense as incurred. Upon retirement or sale, the cost and related accumulated depreciation or amortization are removed from their respective accounts. Any gains or losses on the disposition of property and equipment are included in the results of operations in the period in which they occur.

(2)(e) Impairment of Long-Lived Assets

The Company reviews long-lived assets for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. Recoverability is assessed based on estimated undiscounted future cash flows. As of December 25, 2010 and December 26, 2009, the Company believes that there has been no impairment of its long-lived assets.

(2)(f) Revenue Recognition

The Company recognizes revenue in accordance with the provision of the Securities and Exchange Commission Staff Accounting Bulletin ("SAB") No. 104 which establishes guidance in applying generally accepted accounting principles to revenue recognition in financial statements. SAB No. 104 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services rendered; (3) the price to the buyer is fixed or determinable; and (4) collectability is reasonably assured.

The Company's shipping terms are customarily FOB shipping point. Revenues for products sold in the normal course of business are recognized upon shipment when delivery terms are FOB shipping point and all other revenue recognition criteria have been met.

The Company has entered into consigned inventory agreements with several customers. For products shipped under consigned inventory agreements, the Company recognizes revenue when the customer notifies the Company that they have picked the product from the consigned inventory.

In 2008, the Company entered into a Cooperative Agreement with the US Army Research Laboratory to perform research and development concerning hybrid metal matrix composite encapsulated ceramic armor technology. The Cooperative Agreement is a four-year agreement which is 95% funded by the US Department of Defense and 5% funded by CPS.

Revenues on this Cooperative Agreement are recognized proportionally as costs are incurred. We are reimbursed for reasonable and allocable costs up to the reimbursement limits set by the Cooperative Agreement. All payments to the Company for work performed on this Cooperative Agreement are subject to audit and adjustment by the Defense

Contract Audit Agency. Adjustments are recognized in the period made.

While this Cooperative Agreement extends for four years, funding is provided incrementally on a year-to-year basis if contract terms are met and Congress has authorized the funds. As of December 25, 2010, the Company has recognized \$3.521 million of revenue on the Cooperative Agreement. The total maximum funding to be received over the four year term is \$8.34M. The Company's cost share amounts to \$439,000 over the term of the Cooperative Agreement. Should funding be tentatively delayed or if business initiatives change, we may choose to devote resources to other activities, including internally funded research and development. Funding for the Cooperative Agreement amounting to \$1.048M and \$1.490M for year one and two, respectively has been authorized of which 100% was billed as of December 25, 2010. Funding for the Cooperative Agreement amounting to \$1.298M of year three funding has been authorized of which \$982 thousand was billed in 2010; funding for year four has been authorized of \$1.909M

(2)(g) Research and Development Costs

In 2010, research and development costs were incurred related to the Cooperative Agreement with the US Army. These costs consist of labor, including applicable overhead expenses, materials and other costs associated with our Cooperative Agreement. Total expenditures incurred in 2010 under this Cooperative Agreement amounted to \$1.557 million of which \$1.328 million is included in cost of research and development under cooperative agreement in the Statement of Income. \$1.484 million of these costs were funded by the US Army in 2010 and is classified as research and development cooperative agreement revenues in the Statement of Income. The \$65 thousand funded by CPS consists of \$61 thousand of direct and indirect costs in connection with the contract included in costs of research and development under cooperative agreements and the Company's allocated portion of general and administrative expenses allowed under the contract included in selling, general and administrative expenses of \$4 thousand. An additional \$8 thousand is included in total expenditures in 2010 and was unbilled to the US Army as of December 25, 2010.

Total expenditures incurred in 2009 under this Cooperative Agreement amounted to \$1.775 million of which \$1.541 million is included in cost of research and development under cooperative agreement in the Statement of Income. \$1.679 million of these costs were funded by the US Army in 2009 and is classified as research and development cooperative agreement revenues in the Statement of Income. The \$89 thousand funded by CPS consists of \$81 thousand of direct and indirect costs in connection with the contract included in costs of research and development under cooperative agreements and the Company's allocated portion of general and administrative expenses allowed under the contract included in selling, general and administrative expenses of \$8 thousand. An additional \$7 thousand is included in total expenditures in 2009 and was unbilled to the US Army as of December 26, 2009.

Total expenditures incurred in 2008 under this Cooperative Agreement amounted to \$376 thousand of which \$310 thousand is included in cost of research and development under cooperative agreement in the Statement of Income. \$357 thousand of these costs were funded by the US Army in 2008 and is classified as research and development cooperative agreement revenues in the Statement of Income. The \$19 thousand funded by CPS consists of \$16 thousand of direct and indirect costs in connection with the contract included in costs of research and development under cooperative agreements and the Company's allocated portion of general and administrative expenses allowed under the contract included in selling, general and administrative expenses of \$3 thousand.

Unfunded research and development costs, if any, are charged to expense as incurred and were \$0 in 2010, 2009 and 2008.

(2)(h) Income Taxes

The Company records deferred tax assets and liabilities based on the net tax effects of tax credits, operating loss carryforwards and temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company assesses the likelihood that its deferred tax

assets will be recovered from future taxable income and the Company establishes a valuation allowance to reduce deferred tax assets to an amount which it believes to be more likely than not realizable. The valuation allowance is based on the Company's estimates of taxable income by jurisdiction in which it operates and the period over which its deferred tax assets will be recoverable.

The Company's policy is to recognize interest and penalties related to income tax matters in income tax expense. As of December 25, 2010 and December 26, 2009, the Company has no accruals for interest or penalties related to income tax matters. The Company does not have any uncertain tax positions at December 25, 2010 or December 26, 2009 which required accrual or disclosure.

Income tax benefits related to stock compensation that is in excess of grant-date fair value, less any proceeds on exercise, are recognized as an increase to additional paid-in capital upon vesting or exercising and delivery of the stock. Any income tax effects related to stock compensation that are less than grant-date fair value, less any proceeds on exercise, would be recognized as a reduction of additional paid in capital to the extent of previously recognized income tax benefits and then through income tax expense for the remaining amount.

#### (2)(i) Net Income Per Common Share

Basic net income per common share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per common share is calculated by dividing net income by the sum of the weighted average number of common shares plus additional common shares that would have been outstanding if potential dilutive common shares had been issued for granted stock option and stock purchase rights. Common stock equivalents are excluded from the diluted calculations if a net loss is incurred as they would be anti-dilutive.

#### (2)(j) Comprehensive Income

The Company has no items of comprehensive income, and therefore net income is equal to comprehensive income.

#### (2)(k) Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board ("FASB") issued two related accounting pronouncements, Accounting Standards Update ("ASU") 2009-13 and ASU 2009-14, relating to revenue recognition. One pronouncement provides guidance on allocating the consideration in a multiple-deliverable revenue arrangement and requires additional disclosure, while the other pronouncement provides guidance specific to revenue arrangements that include software elements. Both of these pronouncements are effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010 and both must be adopted together. The Company does not expect the adoption of these pronouncements to have a material impact on the financial statements.

In January 2010, the FASB issued ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820), Improving Disclosures about Fair Value Measurements. This Update requires new disclosures and clarifies existing disclosures regarding recurring and nonrecurring fair value measurements to provide increased transparency to users of the financial statements. The new disclosures and clarification of existing disclosures are effective for interim and annual periods beginning after December 15, 2009, except for the disclosures pertaining to the roll forward of activity for Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The adoption of this Update did not have a material impact on the financial statements.

In April 2010, the FASB issued ASU 2010-17, Revenue Recognition Milestone Method (ASU 2010-17). ASU 2010-17 provides guidance in applying the milestone method of revenue recognition to research or development

arrangements. Under this guidance management may recognize revenue contingent upon the achievement of a milestone in its entirety, in the period in which the milestone is achieved, only if the milestone meets all the criteria within the guidance to be considered substantive. This ASU is effective on a prospective basis for research and development milestones achieved in fiscal years, beginning on or after June 15, 2010. Early adoption is permitted; however, the Company has elected to implement ASU 2010-17 prospectively, and as a result, the effect of this guidance will be limited to future transactions. The Company does not expect the adoption of this pronouncement to have a material impact on the financial statements.

(2)(l) Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenues and expenses recorded during the reporting period. Such estimates are adjusted by management periodically as a result of existing or anticipated economic changes which effect, or may effect, the Company's financial statements. Actual results could differ from these estimates.

(2)(m) Fiscal Year-End

The Company's fiscal year end is the last Saturday in December which could result in a 52 or 53 week year. Fiscal years 2010, 2009 and 2008 each consisted of 52 weeks.

(2)(n) Share-Based Payments

The Company measures the cost of employee services received in exchange for an award of equity instruments based on the grant date fair value of the award. That cost is recognized over the period during which an employee is required to provide services in exchange for the award, the requisite service period (usually the vesting period). The Company provides an estimate of forfeitures at initial grant date, and this estimated forfeiture rate is adjusted periodically based on actual forfeiture experience. The Company uses the Black-Scholes option pricing model to determine the fair value of stock options granted.

(2)(o) Segment Reporting

To date, the Company views its operations and manages its business as one segment. The Company produces and sells advanced material solutions, primarily metal matrix composites, to assemblers of high density electronics and other specialty components and subassemblies. The Company also assembles housings and packages for hybrid circuits, selling to the same customers mentioned above. These customers represent a single market or segment with similar stringent and well-defined requirements. The Company's customers, in turn, sell the components and subassemblies which incorporate the products into many different end markets, however, these end markets are two to three levels removed from the Company. The Company makes operating decisions and assesses financial performance only for the Company as a whole and does not make operating decisions or assess financial performance by the end markets which ultimately use the products.

The Cooperative Agreement the Company entered into with the Army Research Laboratory in 2008 uses the same equipment and personnel as does the Company's electronics business described above, and at this stage does not represent a separate business segment.

(2)(p) Reclassifications

Certain amounts in 2009 and 2008 have been reclassified to conform with the 2010 financial statement presentation.

(3) Inventories

As of December 25, 2010 and December 26, 2009 inventories consisted of the following:

	<u>2010</u>	<u>2009</u>
Raw materials	\$ 360,306	\$ 418,002
Work in process	298,004	671,202
Finished goods	865,448	983,006
	-----	-----
Total	\$ 1,523,758	\$ 2,072,210
	=====	=====

(4) Leases and Commitments

The Company has a \$1 million equipment finance facility with Sovereign Bank which expires in May 2011. At December 25, 2010, the Company had production equipment with a cost of \$2,311,161 and accumulated amortization of \$1,621,114 under capital leases. At December 26, 2009, the Company had production equipment with a cost of \$2,125,891 and accumulated amortization of \$1,305,114 under capital leases. All capital leases are three year leases with a one dollar buyout. At December 25, 2010, the Company had \$571,272 of availability remaining against the equipment finance facility.

Future payments required under capital lease obligations are as follows at December 25, 2010:

2011	\$ 269,787
2012	136,848
2013	44,275
	-----
Total future minimum lease payments	450,910
Less amount representing interest	22,182
at rates ranging between 4.8% and 7.2%	-----
Present value of net future lease payments	428,728
Less current portion	253,167
	-----
Long-term obligation under capital leases	\$ 175,561
	=====

Interest expense was approximately \$32 thousand, \$38 thousand, and \$45 thousand for 2010, 2009, and 2008, respectively.

The Company entered into a 10-year lease for the Norton facilities effective on March 1, 2006. Rental expense for operating leases is recognized on a straight-line basis over the term of the lease and was \$129 thousand in each of the years 2010, 2009 and 2008.

In February 2011, the Company entered into a lease for an additional 13,800 square feet in Attleboro, MA. The lease is for one year and requires monthly payments of \$6,900. The Company has the option to extend the lease for 5 one year periods.

Future minimum rental payments over the terms of the lease agreements are approximately as follows:

Fiscal year:

2011	\$ 204,000
2012	145,500
2013	140,000
2014	148,500
2015	150,000
Thereafter	37,500
	-----
	\$ 825,500
	=====

#### (5) Share-Based Compensation Plans

The Company adopted the 2009 Stock Incentive Plan ("2009 Plan") on December 10, 2009. Under the terms of the 2009 Plan all of the Company's employees, officers, directors, consultants and advisors are eligible to be granted options, restricted stock awards, or other stock-based awards. All outstanding options are nonstatutory stock options exercisable at the fair market value of the stock on the date of grant, and expire ten years from the date of grant. The options granted to employees generally vest in equal annual installments over a five-year period. The options granted to directors generally vest one year from date of grant.

Under the 2009 Plan a total of 1,500,000 shares of common stock are available for issuance, of which 689,895 shares remain available for grant as of December 25, 2010.

As of December 25, 2010, the 2009 Plan is the only stock option plan from which awards can be made as all other option plans have expired. The 1999 Stock Option plan expired on January 22, 2009 and no additional options can be granted from the plan. As of December 25, 2010 there are 725,500 options outstanding under the 1999 Plan.

A summary of stock option activity for all the above plans as of December 25, 2010 and changes during the year then ended is presented below:

	<u>Shares</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Remaining Contractual Life (years)</u>	<u>Aggregate Intrinsic Value</u>
Outstanding at beginning of year	913,750	\$ 0.66		
Granted	762,105	\$ 1.53		
Exercised	(51,000)	\$ 0.69		

Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-K

Forfeited/expired	(89,250)	\$ 1.10		
	-----			
Outstanding at end of year	1,535,605	\$ 1.07	6.36	\$ 900,500
	=====			=====
Options exercisable at year-end	773,500	\$ 0.62	3.23	\$ 809,048
	=====			=====

The total intrinsic value of options exercised during fiscal years 2010 and 2008 was \$58,190 and \$73,180, respectively. As of December 25, 2010, there was \$838,683 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the plans; that cost is expected to be recognized over a weighted average period of 4.5 years.

Cash received from option exercises under all share-based payment arrangements was \$35,360 and \$73,640, for the years ended December 25, 2010 and December 27, 2008, respectively.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes option-pricing model. The following table presents the annualized weighted average values of the significant assumptions used to estimate the fair values of the options:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Risk-free interest rate	2.45%	3.05%	3.58%
Expected life in years	7	7	7
Expected volatility	84%	126%	103%
Expected dividend yield	0	0	0
Weighted average fair value of grants	\$ 1.15	\$ 1.19	\$ 1.44

All options are granted with an exercise price equal to the fair market value of the underlying common stock on the date of grant.

The Company recognized \$163,431, \$10,320, and \$19,877 as compensation expense related to stock options granted in 2010, 2009, and 2008, respectively. A tax benefit of \$23,149 and \$6,819 was recognized as additional paid in capital in the years ended December 25, 2010 and December 27, 2008, respectively, resulting from the excess tax benefit of share-based awards over the cumulative compensation expense recognized for financial reporting.

(6) Accrued Expenses

Accrued expenses at December 25, 2010 and December 26, 2009 consist of the following:

	<u>2010</u>	<u>2009</u>
Accrued legal and accounting	\$ 51,200	\$ 69,124
Accrued payroll	578,021	441,648

Accrued other	215,038	129,784
Accrued income tax payable	40,000	3,702
	-----	-----
	\$ 884,259	\$ 644,258
	=====	=====

(7) Revolving Line of Credit

In May 2010, the Company renewed a \$1 million revolving line of credit with Sovereign Bank. The line of credit is secured by the accounts receivable and other assets of the Company, has an interest rate of prime plus one percent (1%) and a one-year term. Management believes it is likely that Sovereign Bank and the Company will renew the line at the end of the term in May 2011. Under the terms of the agreement, the Company is required to maintain its operating accounts with Sovereign Bank. The line of credit and the equipment finance facility are cross defaulted and cross collateralized. The Company is also subject to certain financial covenants within the terms of the line of credit that require the Company to maintain a targeted rolling four quarter debt service coverage ratio as well as targeted debt to equity and current ratios. At December 25, 2010, the Company was in compliance with these covenants. In 2010, there were no borrowings under this line of credit.

(8) Income Taxes

Components of income tax expense (benefit) for each year are as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Current			
United States:			
Federal	\$45,292	\$5,766	\$ 27,350
State	43,264	21,552	137,384
	-----	-----	-----
Current income tax provision:	88,556	27,318	164,734
	-----	-----	-----
Deferred:			
United States:			
Federal	247,563	(432,193)	(228,470)
State	(25,146)	(47,348)	(70,685)
	-----	-----	-----
Deferred income tax provision (benefit), net	222,417	(479,541)	(299,155)
	-----	-----	-----
Total	\$ 310,973	\$ (452,223)	\$ (134,421)
	=====	=====	=====

Deferred tax assets (liabilities) as of December 25, 2010 and December 26, 2009 are as follows:

	<u>December 25, 2010</u>	<u>December 26, 2009</u>
Deferred Tax Assets:		

Net operating loss		
carryforwards	\$ 588,000	\$ 984,000
Stock compensation	87,000	--
Credit carryforwards	105,000	67,000
Inventory	168,000	200,000
Accrued liabilities	50,000	38,000
Depreciation	101,000	32,000
Other	1,279	1,696
	-----	-----
Gross deferred tax assets	1,100,279	1,322,696
Valuation allowance	--	--
	-----	-----
Net deferred tax assets	\$ 1,100,279	\$1,322,696
	=====	=====

At December 25, 2010 and December 26, 2009, the Company had net operating loss carryforwards of approximately \$1,731,000 and \$2,894,000 respectively available to offset future income for U.S. Federal income tax purposes. These operating loss carryforwards expire in various amounts from 2011 through 2022 as follows:

2011	\$397,000
2020	79,000
2021	364,000
2022	891,000
	-----
	\$ 1,731,000
	=====

During 2010, the Company used approximately \$1,142,000 of net operating loss carryforwards and \$21,000 expired unused. During 2009, the Company used approximately \$259,000 of net operating loss carryforwards and \$1,796,000 expired unused. The Company reduced the valuation reserve for deferred tax assets by \$1,174,000 and \$880,000 in the fourth quarter of 2009 and 2008, respectively, as a result of the use and expiration of federal net operating loss carryforwards and the assessment of Company taxable income.

A valuation allowance is required to be established or maintained when it is "more likely than not" that all or a portion of deferred tax assets will not be realized. The Company believes that it will generate sufficient future taxable income to realize the tax benefits related to the remaining deferred tax assets.

A summary of the change in the deferred tax asset is as follows:

<u>2010</u>	<u>2009</u>	<u>2008</u>
-------------	-------------	-------------

Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-K

Balance at beginning of year	\$ 1,322,696	\$ 843,155	\$ 544,000
Deferred tax (expense) benefit	(222,417)	479,541	299,155
	-----	-----	-----
Balance at end of year	\$ 1,100,279	\$ 1,322,696	\$ 843,155
	=====	=====	=====

Income tax (benefit) expense is different from the amounts computed by applying the U.S. federal statutory income tax rate of 34 percent to pretax income as a result of the following:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Tax at statutory rate	\$ 347,000	\$ 37,500	\$ 455,600
State tax, net of federal benefit	46,000	17,000	44,000
Net operating loss and credit carryforwards	(8,000)	664,677	245,979
Reduction in the valuation allowance	--	(1,174,000)	(880,000)
Other	(74,027)	2,600	--
	-----	-----	-----
Total	\$ 310,973	\$ (452,223)	\$ (134,421)
	=====	=====	=====

Other in the table above includes adjustments to amounts in prior year's tax returns and other permanent differences. Certain provisions of the Internal Revenue Code limit the annual utilization of net operating loss carryforwards if a change in ownership occurs, as defined. The Company believes that it did not have an ownership change through the period ended December 25, 2010. Therefore, as of year-end 2010 all net operating loss carryforwards should be available to offset future taxable income. The Company's income tax filings are subject to review and examination by federal and state taxing authorities. The Company is currently open to audit under the applicable statutes of limitations for the years 2007 through 2009.

(9) Retirement Savings Plan

The Company sponsors a Retirement Savings Plan (the "Plan") under the provisions of Section 401 of the Internal Revenue Code. Employees, as defined in the Plan, are eligible to participate in the Plan after 30 days of employment. Under the terms of the Plan, the Company may match employee contributions under such method as described in the Plan and as determined each year by the Board of Directors. No employer matching contributions have been made to the Plan from inception through December 25, 2010.

(10) Concentrations of Credit Risk, Significant Customers and Geographic Information

Financial instruments which subject the Company to concentrations of credit risk consist principally of cash and trade accounts receivable. The Company maintains such cash deposits in a high credit quality financial institution.

The Company extends credit to customers who consist principally of microelectronics systems companies in the United States, Europe and Asia. The Company generally does not require collateral or other security as a condition of sale rather relying on credit approval, balance limitation and monitoring procedures to control credit risk of trade accounts receivable. Management conducts on-going credit evaluations of its customers, and historically the Company has not experienced any significant credit-related losses with respect to its trade accounts receivable.

Revenues from significant customers as a percentage of total revenues in 2010, 2009 and 2008 were as follows:

<u>Significant Customer</u>	<u>Percent of Total Revenues</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
A	34%	25%	35%
B	27%	24%	28%
C	7%	13%	8%

As of December 25, 2010, the Company had trade accounts receivable due from these three customers that accounted for 74% of total trade accounts receivable as of that date. Management believes that any credit risks have been properly provided for in the accompanying financial statements.

The Company's revenue was derived from the following countries in 2010, 2009 and 2008:

<u>Country</u>	<u>Percent of Total Revenues</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
United States of America	50%	57%	66%
Germany	43%	33%	28%
Canada	0%	0%	1%
Other	7%	10%	5%

Many of the Company's customers based in the United States conduct design, purchasing and payable functions in the United States, but manufacture overseas. Revenue generated from shipments made to customers' locations outside the United States accounted for 78%, 69% and 79% of total revenue in 2010, 2009 and 2008, respectively.

All of the Company's long-lived assets and operations are located in the United States.

#### (11) Net Income Per Share

The following reconciles the basic and diluted net income per share calculations.

	<u>For the years ended</u>		
	Dec. 25, <u>2010</u>	Dec. 26, <u>2009</u>	Dec. 27, <u>2008</u>
Basic Computation:			
Numerator:			
Net income	\$ 710,189	\$ 562,415	\$ 1,474,336
Denominator:			
Weighted average			

Edgar Filing: CPS TECHNOLOGIES CORP/DE/ - Form 10-K

common shares			
outstanding	12,642,517	12,624,959	12,612,990
Basic net income per share	\$ 0.06	\$ 0.04	\$ 0.12
Diluted Computation:			
Numerator:			
Net income	\$ 710,189	\$ 562,415	\$1,474,336
Denominator:			
Weighted average			
common shares			
outstanding	12,642,517	12,624,959	12,612,990
Stock options	239,026	305,616	629,717
	-----	-----	-----
Total shares	12,881,542	12,930,575	13,242,707
	=====	=====	=====
Diluted net income per share	\$ 0.06	\$ 0.04	\$ 0.11

(12) Allowance for Doubtful Accounts

Activity in the allowance for doubtful account was as follows for fiscal years 2010, 2009, and 2008:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Beginning balance	\$ 5,000	\$ 5,461	\$ 5,461
Provision for bad debt	17,205	24,781	--
Charge-offs	(17,205)	(25,242)	--
	-----	-----	-----
Ending balance	\$ 5,000	\$ 5,000	\$ 5,461
	=====	=====	=====
