NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share data)

(Unaudited)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States (“U.S.”) generally accepted accounting principles (“GAAP”) and with the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements of Sonic Corp. (the “Company”). In the opinion of management, these financial statements reflect all adjustments of a normal recurring nature, including recurring accruals, necessary for the fair presentation of the Company’s financial position, results of operations and cash flows for the interim periods presented in conformity with GAAP. In certain situations, recurring accruals, including franchise royalties, are based on more limited information at interim reporting dates than at the Company’s fiscal year end due to the abbreviated reporting period. Actual results may differ from these estimates. These unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto for the fiscal year ended August 31, 2014, included in the Company’s Annual Report on Form 10-K. Interim results are not necessarily indicative of the results that may be expected for a full year or any other interim period.

Principles of Consolidation

The accompanying financial statements include the accounts of the Company, its wholly owned subsidiaries and a number of Company Drive-Ins in which a subsidiary has a controlling ownership interest. All intercompany accounts and transactions have been eliminated.

Reclassifications

Certain amounts reported in previous years have been combined and reclassified to conform to the current-year presentation.

New Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2014-09, “Revenue from Contracts with Customers,” which requires entities to recognize revenue in the way it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most of the existing revenue recognition requirements in U.S. GAAP when it becomes effective. This pronouncement is effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period, and is to be applied retrospectively, with early application not permitted. The Company is currently evaluating the effect that this pronouncement will have on its financial statements and related disclosures.

In April 2015, FASB issued ASU No. 2015-03, “Simplifying the Presentation of Debt Issuance Costs.” This update requires debt issuance costs to be presented in the balance sheet as a reduction of the related liability rather than an asset. This pronouncement is effective for reporting periods beginning after December 15, 2015, including interim periods within that reporting period, and is to be applied retrospectively; early adoption is permitted. The Company is currently evaluating the effect this guidance will have on its financial statements and related disclosures.

In April 2015, FASB issued ASU No. 2015-05, “Customer's Accounting for Fees Paid in a Cloud Computing Arrangement.” The guidance provides clarification on whether a cloud computing arrangement includes a software license. If a software license is included, the customer should account for the license consistent with its accounting of other software licenses. If a software license is not included, the arrangement should be accounted for as a service contract. The update is effective for reporting periods beginning after December 15, 2015. The Company is currently evaluating the effect that this pronouncement will have on its financial statements and related disclosures.

2.Earnings Per Share

The following table sets forth the computation of basic and diluted earnings per share:

	Three months ended		Nine months ended	
	May 31,		May 31,	
	2015	2014	2015	2014
Numerator:				
Net income	\$ 20,442	\$ 16,776	\$ 38,189	\$ 29,091
Denominator:				
Weighted average common shares outstanding— basic	52,022	54,382	52,851	55,544
Effect of dilutive employee stock options and unvested restricted stock units	1,369	1,371	1,442	1,476
Weighted average common shares – diluted	53,391	55,753	54,293	57,020
Net income per common share – basic	\$ 0.39	\$ 0.31	\$ 0.72	\$ 0.52
Net income per common share – diluted	\$ 0.38	\$ 0.30	\$ 0.70	\$ 0.51
Anti-dilutive securities excluded(1)	379	1,025	335	1,036

(1) Anti-dilutive securities consist of stock options and unvested restricted stock units that were not included in the computation of diluted earnings per share because either the exercise price of the options was greater than the average market price of the common stock or the total assumed proceeds under the treasury stock method resulted in negative incremental shares and thus the inclusion would have been anti-dilutive.

3.Share Repurchase Program

In August 2014, the Company's Board of Directors extended the Company's share repurchase program, authorizing the Company to purchase up to \$105 million of its outstanding shares of common stock to be repurchased through August 31, 2015. Share repurchases may be made from time to time in the open market or otherwise, including through an accelerated share repurchase program, under terms of a Rule 10b5-1 plan, in privately negotiated transactions or in round lot or block transactions. The share repurchase program may be extended, modified, suspended or discontinued at any time.

In October 2014, the Company entered into an accelerated share repurchase ("ASR") agreement with a financial institution to purchase \$15 million of the Company's common stock. In exchange for a \$15 million up-front payment, the financial institution delivered approximately 0.6 million shares. During January 2015, the ASR purchase period concluded, and the Company elected to settle the agreement in cash rather than shares. Accordingly, the Company paid \$0.1 million, and no additional shares were delivered, resulting in an average price per share of \$26.32.

In February 2015, the Company entered into additional ASR agreements with a financial institution to purchase \$75 million of the Company's common stock. These ASR transactions were funded with available cash on hand and funds from borrowing on the Company's Series 2011-1 Senior Secured Variable Funding Notes, Class A-1 (the "2011 Variable Funding Notes"). In exchange for a \$75 million up-front payment, the financial institution delivered approximately 2.1 million shares. Subsequent to the end of the third quarter, the ASR transactions completed with 0.3 million additional shares delivered, resulting in an average price per share of \$31.38.

The Company reflected the ASR transactions as a repurchase of common stock for purposes of calculating earnings per share and as a forward contract indexed to its own common stock. The forward contract met all of the applicable criteria for equity classification.

Table of Contents

SONIC CORP.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(In thousands, except per share data)

(Unaudited)

Including shares repurchased through the ASR transactions described above, during the first nine months of fiscal year 2015, approximately 2.9 million shares were repurchased for a total cost of \$95.3 million. Including the 0.3 million shares received at completion of the ASR transactions subsequent to the end of the third quarter, approximately 3.2 million shares were repurchased for a total cost of \$95.3 million, resulting in an average price per share of \$29.76. The total remaining amount authorized under the share repurchase program, as of May 31, 2015, was \$9.7 million.

4. Income Taxes

The following table presents the Company's provision for income taxes and effective income tax rate for the periods below:

	Three months ended May 31,		Nine months ended May 31,	
	2015	2014	2015	2014
Provision for income taxes	\$ 9,637	\$ 8,689	\$ 19,019	\$ 14,576
Effective income tax rate	32.0 %	34.1 %	33.2 %	33.4 %

The lower effective income tax rate during the third quarter of fiscal year 2015 was primarily attributable to amending prior years' federal tax returns in order to claim certain allowable tax deductions. The lower effective income tax rate during the first nine months of fiscal year 2015 was primarily attributable to the recognition of prior years' federal tax deductions and legislation that was passed during the second quarter to retroactively reinstate and extend the Work Opportunity Tax Credit ("WOTC").

As of May 31, 2015, the Company had \$3.3 million of unrecognized tax benefits, including \$0.4 million of interest and penalties. During the first nine months of fiscal year 2015, the liability for unrecognized tax benefits increased

\$0.9 million. The increase was primarily due to new uncertain tax positions related to a federal tax deduction and an adjustment to a federal tax credit. The Company recognizes estimated interest and penalties as a component of its income tax expense, net of federal benefit. If recognized, the entire amount of unrecognized tax benefits would favorably impact the effective tax rate.

The Company or one of its subsidiaries is subject to U.S. federal income tax and income tax in multiple U.S. state jurisdictions. The Company is currently undergoing examinations or appeals by various state and federal authorities. The Company anticipates that the finalization of these examinations or appeals, combined with the expiration of applicable statutes of limitations and the additional accrual of interest related to unrecognized benefits on various return positions taken in years still open for examination, could result in a change to the liability for unrecognized tax benefits during the next 12 months ranging from a decrease of \$2.7 million to an increase of \$0.1 million depending on the timing and terms of the examination resolutions.

5. Contingencies

The Company is involved in various legal proceedings and has certain unresolved claims pending. Based on the information currently available, management believes that all claims currently pending are either covered by insurance or would not have a material adverse effect on the Company's business, operating results or financial condition.

On December 20, 2013, the Company extended a note purchase agreement to a bank that serves to guarantee the repayment of a franchisee loan, with a term through 2018. In the event of default by the franchisee, the Company would purchase the franchisee loan from the bank, thereby becoming the note holder and providing an avenue of recourse with the franchisee. The Company recorded a liability for this guarantee which was based on the Company's estimate of fair value. As of May 31, 2015, the balance of the franchisee's loan was \$6.0 million.

(Unaudited)

The Company has obligations under various operating lease agreements with third-party lessors related to the real estate for certain Company Drive-In operations that were sold to franchisees. Under these agreements, which expire through 2029, the Company remains secondarily liable for the lease payments for which it was responsible as the original lessee. As of May 31, 2015, the amount remaining under these guaranteed lease obligations totaled \$8.1 million. At this time, the Company does not anticipate any material defaults under the foregoing leases; therefore, no liability has been provided.

6. Fair Value of Financial Instruments

The fair value of financial instruments is the amount at which the instrument could be exchanged in a current transaction between willing parties. The Company has no financial liabilities that are required to be measured at fair value on a recurring basis.

The Company categorizes its assets and liabilities recorded at fair value based upon the following fair value hierarchy established by the Financial Accounting Standards Board:

- Level 1 valuations use quoted prices in active markets for identical assets or liabilities that are accessible at the measurement date. An active market is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 valuations use inputs other than actively quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: (a) quoted prices for similar assets or liabilities in active markets, (b) quoted prices for identical or similar assets or liabilities in markets that are not active, (c) inputs other than quoted prices that are observable for the asset or liability such as interest rates and yield curves observable at commonly quoted intervals and (d) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

•Level 3 valuations use unobservable inputs for the asset or liability. Unobservable inputs are used to the extent observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

The Company's cash equivalents are carried at cost which approximates fair value and totaled \$33.7 million at May 31, 2015 and \$34.4 million at August 31, 2014. This fair value is estimated using Level 1 inputs.

At May 31, 2015, the fair value of the Company's Series 2011-1 Senior Secured Fixed Rate Notes, Class A-2 (the "2011 Fixed Rate Notes") and Series 2013-1 Senior Secured Fixed Rate Notes, Class A-2 (the "2013 Fixed Rate Notes") approximated the carrying value of \$430.5 million, including accrued interest. At August 31, 2014, the fair value of the 2011 Fixed Rate Notes and 2013 Fixed Rate Notes approximated the carrying value of \$437.8 million, including accrued interest. The fair value of the Company's 2011 Variable Funding Notes at May 31, 2015 approximated the carrying value of \$11.0 million, including accrued interest. At August 31, 2014, the 2011 Variable Funding Notes had no balance. The fair value of the 2011 Fixed Rate Notes, 2013 Fixed Rate Notes and 2011 Variable Funding Notes is estimated using Level 2 inputs from market information available for public debt transactions for companies with ratings that are similar to the Company's ratings and from information gathered from brokers who trade in the Company's notes.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

In the Quarterly Report on Form 10-Q, unless the context otherwise requires, the terms "Sonic Corp.," "the Company," "we," "us" and "our" refer to Sonic Corp. and its subsidiaries.

Overview

System-wide same-store sales increased 6.1% during the third quarter and increased 8.3% for the first nine months of fiscal year 2015 as compared to an increase of 5.3% and 3.1%, respectively, for the same periods last year. Same-store sales at Company Drive-Ins increased 5.5% during the third quarter and 8.0% for the first nine months of fiscal year 2015 as compared to an increase of 5.2% and 3.0%, respectively, for the same periods last year. Our continued positive same-store sales are a result of the successful implementation of initiatives, including product quality improvements, a greater emphasis on personalized service and a tiered pricing strategy, combined with an improving macro environment. Along with new technology initiatives implemented in Company Drive-Ins during fiscal 2014, we continue to focus on key initiatives such as increased media effectiveness, an innovative product pipeline and our layered day-part promotional strategy to drive same-store sales growth. All of these initiatives drive Sonic's multi-layered growth strategy which incorporates same-store sales growth, operating leverage, deployment of cash, an ascending royalty rate and new drive-in development. Same-store sales growth is the most important layer and drives operating leverage and increased operating cash flows.

Revenues increased to \$164.7 million for the third quarter and \$430.8 million for the first nine months of fiscal year 2015 from \$152.2 million and \$388.6 million, respectively, for the same periods last year. The increase in revenues was attributable to a same-store sales growth at Company and Franchise Drive-Ins and a license conversion increasing royalty rates for approximately 900 Franchise Drive-Ins. Restaurant margins at Company Drive-Ins improved by 100 basis points during the third quarter and 90 basis points for the first nine months of fiscal year 2015, attributable to moderating commodity costs and improved inventory management at the drive-in level. For the nine months ending May 31, 2015, margin improvement is also attributable to leverage from higher sales and improved food and packaging costs.

Third quarter results for fiscal year 2015 reflected net income of \$20.4 million or \$0.38 per diluted share, as compared to net income of \$16.8 million or \$0.30 per diluted share for the same period last year. Excluding the non-GAAP adjustment further described below, net income and diluted earnings per share for the third quarter of fiscal year 2015 increased 15% and 20%, respectively. Net income and diluted earnings per share for the first nine months of fiscal year 2015 were \$38.2 million and \$0.70, respectively, as compared to net income of \$29.1 million and \$0.51 per diluted share for the same period last year. Excluding the non-GAAP adjustments further described below, net income and diluted earnings per share for the first nine months of fiscal year 2015 increased 27% and 24%, respectively.

Table of Contents

The following analysis of non-GAAP adjustments is intended to supplement the presentation of the Company's financial results in accordance with GAAP. We believe the exclusion of these items in evaluating the change in net income and diluted earnings per share for the periods below provides useful information to investors and management regarding the underlying business trends and the performance of our ongoing operations and is helpful for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the financial results for the Company and predicting future performance.

Table of Contents

The following table provides information regarding the number of Company Drive-Ins and Franchise Drive-Ins operating as of the end of the periods indicated as well as the system-wide change in sales and average unit volume. System-wide information includes both Company Drive-In and Franchise Drive-In information, which we believe is useful in analyzing the growth of the brand as well as the Company's revenues, since franchisees pay royalties based on a percentage of sales.

Same-store sales for Company Drive-Ins increased 5.5% for the third quarter and 8.0% for the first nine months of fiscal year 2015, as compared to an increase of 5.2% and 3.0%, respectively, for the same periods last year, showing continued momentum from the Company's successful implementation of initiatives to improve product quality, service and value perception, combined with an improving macro environment. Furthermore, we continued to focus on our innovative product pipeline and increased media effectiveness while benefitting from the implementation of new technology initiatives at Company Drive-Ins. Company Drive-In sales increased \$7.4 million during the third quarter and \$24.5 million during the first nine months of fiscal year 2015, as compared to the same periods last year, mainly due to an increase in same-store sales of \$6.0 million and \$22.3 million, respectively.

Table of Contents

The following table reflects the change in franchise sales, the number of Franchise Drive-Ins, average unit volumes and franchising revenues. While we do not record Franchise Drive-In sales as revenues, we believe this information is important in understanding our financial performance since these sales are the basis on which we calculate and record franchise royalties. This information is also indicative of the financial health of our franchisees.

(1) Drive-ins that are temporarily closed for various reasons (repairs, remodeling, relocations, etc.) are not considered closed unless the Company determines that they are unlikely to reopen within a reasonable time.

(2) Represents percentage change for drive-ins open for a minimum of 15 months.

(3) Consists of revenues derived from franchising activities, including royalties, franchise fees and lease revenues. See Revenue Recognition Related to Franchise Fees and Royalties in the Critical Accounting Policies and Estimates section of Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended August 31, 2014.

(4) Represents franchise royalties as a percentage of Franchise Drive-In sales.

Same-store sales for Franchise Drive-Ins increased 6.1% for the third quarter and 8.3% for the first nine months of fiscal year 2015, as compared to an increase of 5.3% and 3.2%, respectively, for the same periods last year. Franchising revenues increased \$5.4 million, or 13.5%, for the third quarter and increased \$18.7 million, or 18.8%, for the first nine months of fiscal year 2015, compared to the same periods last year. The increase in franchise revenues was primarily attributable to increases in royalties related to the growth of same-store sales and approximately 900 Franchise Drive-Ins converting to a higher royalty rate.

Table of Contents

Operating Expenses. The following table presents the overall costs of drive-in operations as a percentage of Company Drive-In sales. Other operating expenses include direct operating costs such as marketing, telephone and utilities, repair and maintenance, rent, property tax and other controllable expenses.

Company Drive-In Margins

	Three months ended		Percentage Points Increase (Decrease)
	May 31, 2015	2014	
Costs and expenses:			
Company Drive-Ins:			
Food and packaging	27.6 %	29.0 %	(1.4)
Payroll and other employee benefits	34.6	34.0	0.6
Other operating expenses	19.4	19.6	(0.2)
Cost of Company Drive-In sales	81.6 %	82.6 %	(1.0)

	Nine months ended		Percentage Points Increase (Decrease)
	May 31, 2015	2014	
Costs and expenses:			
Company Drive-Ins:			
Food and packaging	28.0 %	28.4 %	(0.4)
Payroll and other employee benefits	35.4	35.3	0.1
Other operating expenses	21.1	21.7	(0.6)
Cost of Company Drive-In sales	84.5 %	85.4 %	(0.9)

Drive-in level margins improved by 100 basis points during the third quarter and 90 basis points in the first nine months of fiscal year 2015. The margin improvement for the quarter is attributable to moderating commodity costs and improved inventory management at the drive-in level. The margin improvement for the year also reflects leverage from improved same-store sales. Food and packaging costs were favorable by 140 basis points during the quarter and 40 basis points during the first nine months of fiscal year 2015. Higher commodity costs in the prior year, primarily related to dairy and limes, have resulted in the favorable impact to food and packaging costs for the first nine months of fiscal year 2015. Payroll and other employee benefits were unfavorable by 60 basis points for the quarter and 10 basis points for the first nine months of fiscal year 2015 reflecting increased health care expenses and increased incentive compensation related to the growth in same-store sales. Other operating expenses improved 20 basis points during the quarter and 60 basis points for the first nine months of fiscal year 2015 mainly as a result of leveraging improved sales.

Selling, General and Administrative (“SG&A”). SG&A expenses increased \$3.1 million, or 17.3%, to \$20.7 million for the third quarter and \$7.1 million, or 14.0%, to \$57.6 million for the first nine months of fiscal year 2015 as compared to the same periods last year. This increase is primarily related to the costs of additional headcount in support of the Company’s technology initiatives and higher variable compensation due to strong operating performance.

Depreciation and Amortization. Depreciation and amortization increased \$0.4 million, or 3.7%, to \$11.4 million for the third quarter and \$3.5 million, or 11.4%, to \$34.6 million for the first nine months of fiscal year 2015 as compared to the same periods last year. This increase is primarily attributable to our increased investments in technology initiatives at Company Drive-Ins.

Net Interest Expense. Net interest expense was flat in the third quarter and first nine months of fiscal year 2015. For additional information on long-term debt, see our Annual Report on Form 10-K for the year ended August 31, 2014.

Table of Contents

Income Taxes. The provision for income taxes reflects an effective tax rate of 32.0% for the third quarter of fiscal 2015 as compared to 34.1% for the same period in 2014. The lower effective income tax rate was primarily attributable to amending prior years' federal tax returns in order to claim certain allowable deductions. The provision for income taxes reflects an effective tax rate of 33.2% for the first nine months of fiscal 2015 compared to 33.4% for the same period in 2014. The change was primarily due to the recognition of prior years' federal tax deductions and legislation that was passed during the second quarter to retroactively reinstate and extend the Work Opportunity Tax Credit ("WOTC"). The fiscal year 2014 effective rate was favorably impacted by a decrease in an unrecognized tax benefit resulting from the IRS' acceptance of a federal tax method change that took place during the first quarter of fiscal year 2014. The Company's fiscal year 2015 tax rate may vary depending upon the reinstatement of employment tax credit programs that expired on December 31, 2014, and pending resolution of certain tax matters. Further, our tax rate may continue to vary from quarter to quarter depending on the timing of stock option dispositions by option-holders and as circumstances on other tax matters change.

Financial Position

Total assets decreased \$28.0 million, or 4.3%, to \$623.0 million during the first nine months of fiscal year 2015 from \$651.0 million at the end of fiscal year 2014. The decrease in total assets was primarily attributable to a decline in cash and restricted cash of \$16.0 million. Additionally, there was a decrease in net property, equipment and capital leases of \$11.7 million, driven by depreciation and asset retirements, partially offset by purchases of property and equipment.

Total liabilities increased \$16.1 million, or 2.7%, to \$604.4 million during the first nine months of fiscal year 2015 from \$588.3 million at the end of fiscal year 2014. The increase was primarily attributable to \$9.3 million of the increase in deferred tax liability that relates to retroactive reinstatement of bonus depreciation. Additionally, the increase relates to the \$11.0 million balance from borrowing on the Company's Series 2011-1 Senior Secured Variable Funding Notes, Class A-1 (the "2011 Variable Funding Notes") partially offset by \$7.3 million of scheduled debt principal payments that were made in the first nine months of fiscal year 2015.

Total stockholders' equity decreased \$44.1 million, or 70.3%, to \$18.6 million during the first nine months of fiscal year 2015 from \$62.7 million at the end of fiscal year 2014. This decrease was primarily attributable to \$95.3 million in purchases of common stock during the first nine months of the fiscal year partially offset by current-year earnings of \$38.2 million and \$16.1 million from the issuance of stock related to stock option exercises.

Liquidity and Sources of Capital

Operating Cash Flows. Net cash provided by operating activities increased \$29.4 million to \$100.5 million for the first nine months of fiscal year 2015, as compared to \$71.1 million for the same period in fiscal year 2014. This increase resulted from changes in working capital along with a \$9.1 million increase in net income.

Investing Cash Flows. Net cash used in investing activities during the first nine months of fiscal year 2015 decreased \$30.9 million to \$22.6 million compared to \$53.5 million for the same period in fiscal year 2014.

The table below outlines our use of cash for investments in property and equipment for the first nine months of fiscal year 2015 in millions:

Purchase and replacement of equipment and technology	\$ 10.4
Brand technology investments	7.5
Newly constructed drive-ins	6.3
Acquisition of underlying real estate for drive-ins	3.8
Rebuilds, relocations, remodels and retrofits of existing drive-ins	2.9
Total investments in property and equipment	\$ 30.9

These investments decreased \$23.9 million compared to the same period last year mainly due to the completion of the new technology installations at Company Drive-Ins during the first quarter of the fiscal year.

Table of Contents

Financing Cash Flows. Net cash used in financing activities increased \$30.0 million to \$90.6 million for the first nine months of fiscal year 2015 as compared to \$60.6 million for the same period in fiscal year 2014. This increase primarily relates to a \$26.7 million increase in purchases of treasury stock and \$14.2 million in dividend payments. This increase is partially offset by \$67.5 million proceeds from the drawdown on the 2011 Variable Funding Notes as well as a \$56.5 million increase in debt payments as a result of repayments on the 2011 Variable Funding Notes.

In August 2014, our Board of Directors extended the Company's share repurchase program, authorizing the purchase of up to \$105 million of our outstanding shares of common stock during fiscal year 2015. Share repurchases may be made from time to time in the open market or otherwise. The share repurchase program may be extended, modified, suspended or discontinued at any time. Including shares repurchased through the accelerated share repurchase ("ASR") transactions described in Note 3 - Share Repurchase Program of the notes to the Condensed Consolidated Financial Statements, during the first nine months of fiscal year 2015, approximately 2.9 million shares were repurchased for a total cost of \$95.3 million.

As of May 31, 2015, our total cash balance of \$32.9 million (\$22.9 million of unrestricted and \$10.0 million of restricted cash balances) reflected the impact of the cash generated from operating activities, stock option exercise proceeds, 2011 Variable Funding Notes borrowing proceeds, cash used for share repurchases, debt payments and capital expenditures mentioned above. We believe that existing cash, funds generated from operations and the amount available under our 2011 Variable Funding Notes will meet our needs for the foreseeable future.

Critical Accounting Policies and Estimates

Critical accounting policies are those the Company believes are most important to portraying its financial conditions and results of operations and also require the greatest amount of subjective or complex judgments by management. Judgments and uncertainties regarding the application of these policies may result in materially different amounts being reported under various conditions or using different assumptions. There have been no material changes to the critical accounting policies previously disclosed in the Company's Annual Report on Form 10-K for the fiscal year ended August 31, 2014.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the quantitative and qualitative market risks set forth in Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk" in our Annual Report on Form 10-K for the year ended

August 31, 2014.

Item 4. Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-14 under the Securities Exchange Act of 1934). Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective at the reasonable assurance level.

There were no significant changes in the Company's internal control over financial reporting during the quarter ended May 31, 2015, that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in various legal proceedings and has certain unresolved claims pending. Based on the information currently available, management believes that all claims currently pending are either covered by insurance or would not have a material adverse effect on the Company's business, operating results or financial condition.

Item 1A. Risk Factors

There has been no material change in the risk factors set forth in Part I, Item 1A, "Risk Factors" in our Annual Report on Form 10-K for the year ended August 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

Shares repurchased during third quarter of fiscal year 2015 are as follows (in thousands, except per share amounts):

(1) In August 2014, the Company's Board of Directors extended the Company's share repurchase program, authorizing the Company to purchase up to \$105 million of its outstanding shares of common stock to be repurchased through August 31, 2015. Share repurchases may be made from time to time in the open market or otherwise, including through an accelerated share repurchase program, under terms of a Rule 10b5-1 plan, in privately negotiated transactions or in round lot or block transactions. The share repurchase program may be extended, modified, suspended or discontinued at any time. Please refer to Note 3 – Share Repurchase Program of the notes to the Condensed Consolidated Financial Statements for additional information.

(2) There were no share repurchases during the third fiscal quarter of 2015.
