

TORONTO DOMINION BANK
Form 424B2
November 02, 2018

Filed Pursuant to Rule 424(b)(2)

Registration Statement No. 333-211718

Pricing Supplement dated October 31, 2018 to the
Product Prospectus Supplement MLN-EI-1 dated June 30, 2016 and
Prospectus Dated June 30, 2016

The
Toronto-Dominion
Bank

\$1,105,000

Leveraged
Buffered Notes
Linked to the Least
Performing of the
Russell 2000®
Index and the S&P
500® Index Due
November 2, 2023

The Toronto-Dominion Bank ("TD" or "we") has offered the Leveraged Buffered Notes (the "Notes") linked to the least performing of the Russell 2000® Index and the S&P 500® Index (each, a "Reference Asset" and together, the "Reference Assets").

The Notes provide 181% leveraged participation in the positive return of the Least Performing Reference Asset if the value of each Reference Asset increases from its Initial Value to its Final Value. The "Least Performing Reference Asset" is the Reference Asset with the lowest percentage change from its Initial Value to its Final Value. The Percentage Change for each Reference Asset is the quotient, expressed as a percentage, of (i) its Final Value *minus* its Initial Value *divided* by (ii) its Initial Value. Investors will receive their Principal Amount at maturity if the Final Value of each Reference Asset is below its Initial Value by up to 10%. If the Final Value of any Reference Asset is below its Initial Value by more than 10%, investors will lose will lose 1% of the Principal Amount of the Notes for each 1% decrease of the Final Value from the Initial Value of the Least Performing Reference Asset in excess of 10% and may lose up to 90% of the Principal Amount of the Notes. ***If the Final Value of the Least Performing Reference Asset declines by more than 10% from its Initial Value, the return on your Notes will be negative and you will lose 1% of the Principal Amount of the Notes for each 1% decrease of the Final Value from the Initial Value of the***

Least Performing Reference Asset in excess of 10%, and you may lose up to 90% of the Principal Amount. Any payments on the Notes are subject to our credit risk.

Investors are exposed to the market risk of each Reference Asset and any decline in the value of one Reference Asset will not be offset or mitigated by a lesser decline or potential increase in the value of any other Reference Asset. The Payment at Maturity will be greater than the Principal Amount only if the Percentage Change of each Reference Asset is greater than zero. The Notes do not guarantee the return of the Principal Amount and investors may lose up to 90% of their investment in the Notes if the Final Value of any Reference Asset is less than its Initial Value in excess of 10%. Any payments on the Notes are subject to our credit risk.

The Notes are unsecured and are not savings accounts or insured deposits of a bank. The Notes are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality of Canada or the United States. The Notes will not be listed or displayed on any securities exchange or electronic communications network.

The Notes have complex features and investing in the Notes involves a number of risks. See “Additional Risk Factors” beginning on page P-6 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 in the product prospectus supplement MLN-EI-1 dated June 30, 2016 (the “product prospectus supplement”) and “Risk Factors” on page 1 of the prospectus dated June 30, 2016 (the “prospectus”).

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of these Notes or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

We will deliver the Notes in book-entry only form through the facilities of The Depository Trust Company on November 5, 2018 against payment in immediately available funds.

The estimated value of your Notes at the time the terms of your Notes were set on the Pricing Date was \$966.80 per Note, as discussed further under “Additional Risk Factors — Estimated Value” beginning on page P-7 and “Additional Information Regarding the Estimated Value of the Notes” on page P-27 of this pricing supplement. The estimated value is less than the public offering price of the Notes.

	Public Offering Price ¹	Underwriting Discount ²	Proceeds to TD
Per Note	\$1,000.00	\$5.00	\$995.00
Total	\$1,105,000.00	\$5,525.00	\$1,099,475.00

The public offering price, underwriting discount and proceeds to TD listed above relate to the Notes we issue initially. We may decide to sell additional Notes after the date of this pricing supplement, at public offering prices and with underwriting discounts and proceeds to TD that differ from the amounts set forth above. The return (whether positive or negative) on your investment in the Notes will depend in part on the public offering price you pay for such Notes.

¹ Certain dealers who purchase the Notes for sale to certain fee-based advisory accounts may forego some or all of their selling concessions, fees or commissions. The public offering price for investors purchasing the Notes in these accounts may be as low as \$995.00 (99.50%) per \$1,000.00 Principal Amount of the Notes.

² TD Securities (USA) LLC (“TDS”) will receive a commission of \$5.00 (0.50%) per \$1,000 principal amount of the Notes and may use a portion of that commission to allow selling concessions to other dealers in connection with the distribution of the Notes, or has offered the Notes directly to investors. TDS may resell the Notes to other securities dealers at the Principal Amount less a concession not in excess of \$5.00 per Note. The other dealers may forgo, in their sole discretion, some or all of their selling concessions. TD will reimburse TDS for certain expenses in connection with its role in the offer and sale of the Notes, and TD will pay TDS a fee in connection with its role in the offer and sale of the Notes. See “Supplemental Plan of Distribution (Conflicts of Interest)” on page P-26 of this pricing

supplement.

TD SECURITIES (USA) LLC

P-1

Summary

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

Issuer: TD
Issue: Senior Debt Securities, Series E
Type of Note: Leveraged Buffered Notes
Term: Approximately 5 years
Reference Assets: The Russell 2000® Index (Bloomberg ticker: RTY, the “RTY”) and the S&P 500 Index (Bloomberg ticker: SPX, the “SPX”)

CUSIP / ISIN: 89114QEK0 / US89114QEK04
Agent: TDS
Currency: U.S. Dollars
Minimum Investment: \$1,000 and minimum denominations of \$1,000 in excess thereof
Principal Amount: \$1,000 per Note

Pricing Date: October 31, 2018
 November 5, 2018, which is three Business Days following the Pricing Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), trades in the secondary market generally are required to settle in two Business Days (“T+2”), unless the parties to a trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Notes in the secondary market on any date prior to two Business Days before delivery of the Notes will be required, by virtue of the fact that each Note initially will settle in three Business Days (“T+3”), to specify alternative settlement arrangements to prevent a failed settlement of the secondary market trade.

Issue Date:

Final Valuation Date: October 31, 2023, subject to postponement as described below under “Final Value” and as described under “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement. If such day is not a Trading Day, the Final Valuation Date will be the next succeeding Trading Day.

Maturity Date: November 2, 2023, subject to postponement as described below under “Final Value” and as described under “General Terms of the Notes—Market Disruption Events” in the product prospectus supplement or, if such day is not a Business Day, the next following Business Day.

If, on the Final Valuation Date, the Percentage Change of each Reference Asset is **positive**, then the investor will receive an amount per \$1,000 Principal Amount of the Notes equal to:

$\text{Principal Amount} + (\text{Principal Amount} \times \text{Least Performing Percentage Change} \times \text{Leverage Factor})$

Payment at Maturity: If, on the Final Valuation Date, the Least Performing Percentage Change is less than or equal to 0%, but not by more than the Buffer Percentage (that is, the Least Performing Percentage Change is between 0% and -10%), then the investor will receive:

Principal Amount of \$1,000

If, on the Final Valuation Date, the Least Performing Percentage Change is **negative** by more than the Buffer Percentage (that is, the Least Performing Percentage Change is between -10% and -

100%), then the investor will receive less than \$1,000 per \$1,000 Principal Amount of the Notes, calculated using the following formula:

Principal Amount + [Principal Amount x (Least Performing Percentage Change + Buffer Percentage)]

If the Final Value of the Least Performing Reference Asset is less than its Buffer Value, the investor will lose 1% of the Principal Amount of the Notes for each 1% decrease of the Final Value from the Initial Value of the Least Performing Reference Asset in excess of 10%, and may lose up to 90% of their investment. Any payments on the Notes are subject to our credit risk.

All amounts used in or resulting from any calculation relating to the Notes, including the Payment at Maturity, will be rounded upward or downward as appropriate, to the nearest cent.

For each Reference Asset, the Percentage Change is the quotient, expressed as a percentage, of the following formula:

Percentage
Change:

$$\frac{\text{Final Value} - \text{Initial Value}}{\text{Initial Value}}$$

With respect to the RTY, 1,511.413.

Initial Value: With respect to the SPX, 2,711.74.

In each case equal to its Closing Value on the Pricing Date, as determined by the Calculation Agent. For each Reference Asset, the Closing Value will be the official closing value published by its sponsor, as specified under “Information Regarding the Reference Assets” herein (its “Index Sponsor”) or any “successor index” (as defined in the product prospectus supplement) on any Trading Day for such Reference Asset.

**Closing
Value:**

For each Reference Asset, the Closing Value of such Reference Asset on the Final Valuation Date.

If the originally scheduled Final Valuation Date is not a Trading Day with respect to a Reference Asset or a Market Disruption Event with respect to a Reference Asset occurs or is continuing on that day, the Closing Value for such Reference Asset will be its Closing Value on the first Trading Day for such Reference Asset following the originally scheduled Final Valuation Date on which the Calculation Agent determines that a Market Disruption Event does not occur or is not continuing with regard to such Reference Asset. If a Market Disruption Event with respect to a Reference Asset occurs or is continuing on each Trading Day to and including the tenth Trading Day following the originally scheduled Final Valuation Date, the Closing Value for such Reference Asset will be determined (or, if not determinable, estimated by the Calculation Agent in a manner which is considered commercially reasonable under the circumstances) by the Calculation Agent on that tenth Trading Day, regardless of the occurrence or continuation of a Market Disruption Event with regard to such Reference Asset on that day. For the avoidance of doubt, if the originally scheduled Final Valuation Date is a Trading Day and no Market Disruption Event exists on that day with respect to a Reference Asset, the determination of that Reference Asset’s Closing Value will be made on the originally scheduled Final Valuation Date, irrespective of the non-Trading Day status or the existence of a Market Disruption Event with respect to any other Reference Asset. For the definition of a market disruption event, see “General Terms of the Notes—Market Disruption Events” in the accompanying product prospectus supplement. If the Final Valuation Date is postponed due to a Market Disruption Event or non-Trading Day for a Reference Asset, the Maturity Date will be postponed to maintain the same number of Business Days between the final postponed Final Valuation Date and Maturity Date as existed prior to such postponement(s).

Final Value:

Least

Performing Reference Asset: The Reference Asset with the lowest Percentage Change as compared to the Percentage Change of any other Reference Asset.

Least

Performing Percentage Change: The Percentage Change of the Least Performing Reference Asset.

Change:

TD SECURITIES (USA) LLC

P-3

Leverage Factor:	181%
Buffer Percentage:	10%, which is equal to the amount, expressed in percentage terms, by which the Buffer Value of each Reference Asset is below its Initial Value.
Buffer Value:	With respect to the RTY, 1,360.272 (90.00% of its Initial Value). With respect to the SPX, 2,440.57 (90.00% of its Initial Value).
Monitoring Period:	Final Valuation Date Monitoring
Trading Day:	For each Reference Asset, a Trading Day means a day on which (1) the NYSE and the NASDAQ Stock Market, or their successors, are scheduled to be open for trading and (2) such Reference Asset or any successor thereto is calculated and published by its Index Sponsor.
Business Day:	Any day that is a Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or required by law to close in New York City or Toronto.
U.S. Tax Treatment:	By purchasing a Note, each holder agrees, in the absence of a statutory or regulatory change or an administrative determination or judicial ruling to the contrary, to characterize the Notes, for U.S. federal income tax purposes, as pre-paid derivative contracts with respect to the Reference Assets. Based on certain factual representations received from us, our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, is of the opinion that it would be reasonable to treat the Notes in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Notes, it is possible that your Notes could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization, and the timing and character of your income from the Notes could differ materially and adversely from the treatment described above, as discussed further under “Supplemental Discussion of U.S. Federal Income Tax Consequences” and in the product prospectus supplement under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.
Canadian Tax Treatment:	Please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences,” which applies to the Notes.
Calculation Agent:	TD
Listing:	The Notes will not be listed or displayed on any securities exchange or electronic communications network.
Clearance and Settlement:	DTC global (including through its indirect participants Euroclear and Clearstream, Luxembourg as described under “Forms of the Debt Securities” and “Book-Entry Procedures and Settlement” in the prospectus).
Canadian Bail-in:	The Notes are not bail-inable notes under the Canada Deposit Insurance Corporation Act.

Additional Terms of Your Notes

You should read this pricing supplement together with the prospectus, as supplemented by the product prospectus supplement MLN-EI-1 (the “product prospectus supplement”), relating to our Senior Debt Securities, Series E, of which these Notes are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus. ***The Notes vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Notes and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” beginning on page P-6 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 in the product prospectus supplement and “Risk Factors” on page 1 of the prospectus, as the Notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Notes. You may access these documents on the SEC website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

§

Prospectus dated June 30, 2016:

§

Product Prospectus Supplement MLN-EI-1 dated June 30, 2016:

https://www.sec.gov/Archives/edgar/data/947263/000089109216015847/e70323_424b2.htm

Our Central Index Key, or CIK, on the SEC website is 0000947263. Alternatively, The Toronto-Dominion Bank, any Agent or any dealer participating in this offering will arrange to send you the product prospectus supplement and the prospectus if you so request by calling 1-855-303-3234. As used in this pricing supplement, the “Bank,” “we,” “us,” or “our” refers to The Toronto-Dominion Bank and its subsidiaries.

We reserve the right to change the terms of, or reject any offer to purchase, the Notes prior to their issuance. In the event of any changes to the terms of the Notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes, in which case we may reject your offer to purchase.

Additional Risk Factors

The Notes involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Notes. For additional information as to these and other risks, please see “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and the prospectus.

You should carefully consider whether the Notes are suited to your particular circumstances before you decide to purchase them. Accordingly, prospective investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Notes and the suitability of the Notes in light of their particular circumstances.

Your Investment in the Notes May Result in a Loss.

The Notes do not guarantee the return of the Principal Amount and investors could lose up to 90% of their investment in the Notes if there is a decline in the value of any Reference Asset by more than 10% from the Pricing Date to the Final Valuation Date. Specifically, if the Final Value of the Least Performing Reference Asset is less than its Initial Value by more than 10%, investors will lose 1% of the Principal Amount of the Notes for each 1% decrease of the Final Value from the Initial Value of the Least Performing Reference Asset in excess of the Buffer Percentage.

The Notes Do Not Pay Interest and Your Return May Be Lower than the Return on a Conventional Debt Security of Comparable Maturity.

There will be no periodic interest payments on the Notes as there would be on a conventional fixed-rate or floating-rate debt security having a comparable maturity. The return that you will receive on the Notes, which could be negative, may be less than the return you could earn on other investments. Even if your return is positive, your return may be less than the return you would earn if you bought a conventional senior interest bearing debt security of TD.

Investors Are Subject to TD’s Credit Risk, and TD’s Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Notes.

Although the return on the Notes will be based on the performance of the Least Performing Reference Asset, the payment of any amount due on the Notes is subject to TD’s credit risk. The Notes are TD’s senior unsecured debt obligations. Investors are dependent on TD’s ability to pay all amounts due on the Notes and, therefore, investors are subject to the credit risk of TD and to changes in the market’s view of TD’s creditworthiness. Any decrease in TD’s credit ratings or increase in the credit spreads charged by the market for taking TD’s credit risk is likely to adversely affect the market value of the Notes. If TD becomes unable to meet its financial obligations as they become due, investors may not receive any amounts due under the terms of the Notes.

Investors Are Exposed to the Market Risk of Each Reference Asset.

Your return on the Notes is not linked to a basket consisting of the Reference Assets. Rather, it will be contingent upon the performance of each Reference Asset. Unlike an instrument with a return linked to a basket of indices, common stocks or other underlying securities, in which risk is mitigated and diversified among all of the components of the basket, you will be exposed equally to the risks related to each Reference Asset. Poor performance by any Reference Asset over the term of the Notes will negatively affect your return and will not be offset or mitigated by a positive performance by any other Reference Asset. For instance, if the Final Value of the Least Performing Reference Asset declines by more than 10% (therefore, the Percentage Change is between -10% and -100%) from its Initial Value, the return on your Notes will be negative and you will lose 1% of the Principal Amount of the Notes for each 1% decrease of the Final Value from the Initial Value of the Least Performing Reference Asset in excess of the Buffer

Percentage and you may lose up to 90% of the Principal Amount, even if the Percentage Change of another Reference Asset is positive or has not declined as much. Accordingly, you are subject to the market risk of each Reference Asset and may lose a substantial portion of your Principal Amount if the Final Value of any Reference Asset is less than its Buffer Value. Therefore, your investment is subject to the market risk of each Reference Asset.

Because the Notes are Linked to the Least Performing Reference Asset, You Are Exposed to a Greater Risk of Losing a Substantial portion of Your Initial Investment at Maturity than if the Notes Were Linked to a Single Reference Asset.

The risk that you will lose a substantial portion of your initial investment in the Notes is greater if you invest in the Notes than the risk of investing in substantially similar securities that are linked to the performance of only one Reference Asset. With more Reference Assets, it is more likely that the Final Value of any Reference Asset will be less than its Buffer Value on the Final Valuation Date than if the Notes were linked to a single Reference Asset.

In addition, the lower the correlation between the performance of a pair of Reference Assets, the more likely it is that one of the Reference Assets will decline in value to a Final Value that is less than its Buffer Value on the Final Valuation Date. Although the correlation of the Reference Assets' performance may change over the term of the Notes, the economic terms of the Notes, including the Buffer Value and Leverage Factor, are determined, in part, based on the correlation of the Reference Assets' performance calculated using our internal models at the time when the terms of the Notes are finalized. All things being equal, a higher Leverage Factor and lower Buffer Values are generally associated with lower correlation of the Reference Assets. Therefore, if the performance of a pair of Reference Assets is not correlated to each other or is negatively correlated, the risk that the Final Value of any Reference Asset is less than its Buffer Value on the Final Valuation Date is even greater despite a lower Buffer Value. Therefore, it is more likely that you will lose a substantial portion of your initial investment at maturity.

The Agent Discount, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Notes will likely be lower than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, any underwriting discount paid in connection with the initial distribution, offering expenses as well as the cost of hedging our obligations under the Notes. In addition, any such price is also likely to reflect dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction.

There May Not Be an Active Trading Market for the Notes — Sales in the Secondary Market May Result in Significant Losses.

There may be little or no secondary market for the Notes. The Notes will not be listed or displayed on any securities exchange or electronic communications network. The Agent or another of our affiliates may make a market for the Notes; however, they are not required to do so and may stop any market-making activities at any time. Even if a secondary market for the Notes develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Notes in any secondary market could be substantial.

If you sell your Notes before the Maturity Date, you may have to do so at a substantial discount from the Principal Amount irrespective of the value of the then-current least performing Reference Asset, and as a result, you may suffer substantial losses.

If the Value of any Reference Asset Changes, the Market Value of Your Notes May Not Change in the Same Manner.

Your Notes may trade quite differently from the performance of any of the Reference Assets. Any payments on the Notes will be based solely on the Final Value of the Least Performing Reference Asset on the Final Valuation Date. Changes in the value of any Reference Asset may not result in a comparable change in the market value of your Notes. Even if the Closing Value of each Reference Asset remains equal to or greater than its Buffer Value or increases to above its Initial Value during the life of the Notes, the market value of your Notes may not increase by the same amount and could decline.

There Are Market Risks Associated with each Reference Asset.

The value of each Reference Asset can rise or fall sharply due to factors specific to such Reference Asset, the Reference Asset Constituents and their issuers (the "Reference Asset Constituent Issuers"), such as stock price volatility, earnings, financial conditions, corporate, industry and regulatory developments, management changes and decisions and other events, as well as general market factors, such as general stock and commodity market volatility and levels, interest rates and economic and political conditions. You, as an investor in the Notes, should make your own investigation into the Reference Assets for your Notes. For additional information, see "Information Regarding the Reference Assets" in this pricing supplement.

Estimated Value

The Estimated Value of Your Notes Is Lower Than the Public Offering Price of Your Notes.

The estimated value of your Notes is lower than the public offering price of your Notes. The difference between the public offering price of your Notes and the estimated value of the Notes reflects costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

The Estimated Value of Your Notes Is Based on Our Internal Funding Rate.

The estimated value of your Notes is determined by reference to our internal funding rate. The internal funding rate used in the determination of the estimated value of the Notes generally represents a discount from the credit spreads for our conventional fixed-rate debt securities and the borrowing rate we would pay for our conventional fixed-rate debt securities. This discount is based on, among other things, our view of the funding value of the Notes as well as the higher issuance, operational and ongoing liability management costs of the Notes in comparison to those costs for our conventional fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for our conventional fixed-rate debt securities, or the borrowing rate we would pay for our conventional fixed-rate debt securities were to be used, we would expect the economic terms of the Notes to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Notes is expected to increase the estimated value of the Notes at any time.

The Estimated Value of the Notes Is Based on Our Internal Pricing Models, Which May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions.

The estimated value of your Notes is based on our internal pricing models, which take into account a number of variables, such as our internal funding rate on the Pricing Date, and are based on a number of subjective assumptions, which are not evaluated or verified on an independent basis and may or may not materialize. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the Notes may not be consistent with those of other financial institutions that may be purchasers or sellers of Notes in the secondary market. As a result, the secondary market price of your Notes may be materially lower than the estimated value of the Notes determined by reference to our internal pricing models. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

The Estimated Value of Your Notes Is Not a Prediction of the Prices at Which You May Sell Your Notes in the Secondary Market, If Any, and Such Secondary Market Prices, If Any, Will Likely be Lower Than the Public Offering Price of Your Notes and May Be Lower Than the Estimated Value of Your Notes.

The estimated value of the Notes is not a prediction of the prices at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Notes in the secondary market at any time, if any, will be influenced by many factors that cannot be predicted, such as market conditions, and any bid and ask spread for similar sized trades, and may be substantially less than the estimated value of the Notes. Further, as secondary market prices of your Notes take into account the levels at which our debt securities trade in the secondary market, and do not take into account our various costs and expected profits associated with selling and structuring the Notes, as well as hedging our obligations under the Notes, secondary market prices of your Notes will likely be lower than the public offering price of your Notes. As a result, the price at which the Agent, other affiliates of ours or third parties may be willing to purchase the Notes from you in secondary market transactions, if any, will likely be lower than the price you paid for your Notes, and any sale prior to the Maturity Date could result in a substantial loss to you.

The Temporary Price at Which the Agent May Initially Buy the Notes in the Secondary Market May Not Be Indicative of Future Prices of Your Notes.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agent may initially buy or sell the Notes in the secondary market (if the Agent makes a market in the Notes, which it is not obligated to do) may exceed the estimated value of the Notes on the Pricing Date, as well as the secondary market value of the Notes, for a temporary period after the Issue Date of the Notes, as discussed further under “Additional Information Regarding the Estimated Value of the Notes.” The price at which the Agent may initially buy or sell the Notes in the secondary market may not be indicative of future prices of your Notes.

We Have No Affiliation with Any Index Sponsor and Will Not Be Responsible for Any Actions Taken by any Index Sponsor.

No Index Sponsor is an affiliate of ours and no such entity will be involved in the offering of the Notes in any way. Consequently, we have no control over the actions of any Index Sponsor, including any actions of the type that would require the Calculation Agent to adjust any amounts payable on the Notes. No Index Sponsor has any obligation of any sort with respect to the Notes. Thus, no Index Sponsor has any obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the applicable Reference Asset or the Notes. Except pursuant to any license agreement with an Index Sponsor and specified in “Information About the Reference Assets” below, none of the proceeds from the issuance of the Notes will be delivered to any Index Sponsor.

The Reference Assets Reflect Price Return, not Total Return.

The return on your Notes is based on the performance of the Reference Assets, which reflect the changes in the market prices of their respective Reference Asset Constituents. They are not, however, linked to a “total return” index or strategy, which, in addition to reflecting those price returns, would also reflect dividends paid on the Reference Asset Constituents. The return on your Notes will not include such a total return feature or dividend component.

The Notes are subject to small-capitalization stock risks.

The Notes are subject to risks associated with small-capitalization companies because the RTY is comprised of Reference Asset Constituents that are considered small-capitalization companies. These companies often have greater stock price volatility, lower trading volume and less liquidity than large-capitalization companies and therefore the

RTY may be more volatile than an index in which a greater percentage of the Reference Asset Constituents are issued by large-capitalization companies. Stock prices of small-capitalization companies are also more vulnerable than those of large-capitalization companies to adverse business and economic developments, and the stocks of small-capitalization companies may be thinly traded. In addition, small-capitalization companies are typically less stable financially than large-capitalization companies and may depend on a small number of key personnel, making them more vulnerable to loss of personnel. Small-capitalization companies are often given less analyst coverage and may be in early, and less predictable, periods of their corporate existences. Such companies tend to have smaller revenues, less diverse product lines, smaller shares of their product or service markets, fewer financial resources and less competitive strengths than large-capitalization companies and are more susceptible to adverse developments related to their products.

There Are Potential Conflicts of Interest Between You and the Calculation Agent.

The Calculation Agent will, among other things, determine the Payment at Maturity on the Notes. We will serve as the Calculation Agent but may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions and may take into consideration our ability to unwind any related hedges. Since this discretion by the Calculation Agent may affect payments on the Notes, the Calculation Agent may have a conflict of interest if it needs to make any such decision. For example, the Calculation Agent may have to determine whether a Market Disruption Event affecting a Reference Asset has occurred, and may make certain adjustments to a Reference Asset if certain events occur. This determination may, in turn, depend on the Calculation Agent's judgment whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Since this determination by the Calculation Agent will affect the payment on the Notes, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information as to the Calculation Agent's role, see "General Terms of the Notes—Role of Calculation Agent" in the product prospectus supplement.

Trading and Business Activities by the Bank or its Affiliates May Adversely Affect the Market Value of the Notes.

We and our affiliates may hedge our obligations under the Notes by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the values of the Reference Assets or one or more Reference Asset Constituents, and we may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Notes declines. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the values of the Reference Assets or one or more Reference Asset Constituents.

These trading activities may present a conflict between the holders' interest in the Notes and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers' accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Notes.

We, the Agent and our other affiliates may, at present or in the future, engage in business with one or more Reference Asset Constituent Issuers, including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These business activities may present a conflict between our, the Agent's and our affiliates' obligations, and your interests as a holder of the Notes. Moreover, we, the Agent or our other affiliates may have published, and in the future expect to publish, research reports with respect to the Reference Assets or one or more Reference Asset Constituents. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these activities by us, the Agent or one or more of our other affiliates or the Agents or their affiliates may affect the value of a Reference Asset or one or more Reference Asset Constituents and, therefore, the market value of the Notes and any payments on the Notes.

Significant Aspects of the Tax Treatment of the Notes Are Uncertain.

The U.S. tax treatment of the Notes is uncertain. Please read carefully the section entitled "Supplemental Discussion of U.S. Federal Income Tax Consequences" in the product prospectus supplement, and the section entitled "Supplemental Discussion of U.S. Federal Income Tax Consequences" below. You should consult your tax advisor about your tax situation.

For a more complete discussion of the Canadian federal income tax consequences of investing in the Notes, please see the discussion in the product prospectus supplement under "Supplemental Discussion of Canadian Tax Consequences." If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Notes in the secondary market, you should consult your tax advisors as to the consequences of acquiring, holding and disposing of the Notes and receiving the payments that might be due under the Notes.

Hypothetical Returns

The examples and table set out below are included for illustration purposes only and are hypothetical examples only: amounts below may have been rounded for ease of analysis. The **hypothetical** Percentage Changes of the Reference Assets used to illustrate the calculation of the Payment at Maturity (rounded to two decimal places) are not estimates or forecasts of the Initial Values, the Final Values or the values of the Reference Assets on any Trading Day prior to the Maturity Date. All examples assume a Leverage Factor of 181%, a Buffer Percentage of 10% (the Buffer Value of each Reference Asset equal to 90% of its Initial Value), that a holder purchased Notes with an aggregate Principal Amount of \$1,000 and that no Market Disruption Event occurs on the Valuation Date. The actual terms of the Notes are indicated on the cover hereof.

Example 1 — Calculation of the Payment at Maturity where the Least Performing Percentage Change is positive.

Least Performing Percentage Change:	5.00%
	= \$1,000.00 + (\$1,000.00 x 5.00% x 181.00%)
Payment at Maturity:	= \$1,000.00 + \$90.50
	= \$1,090.50

On a \$1,000.00 investment, a 5.00% Percentage Change in the Least Performing Reference Asset results in a Payment at Maturity of \$1,090.50, a 9.05% return on the Notes.

Example 2 — Calculation of the Payment at Maturity where the Percentage Change of each Reference Asset is zero.

Percentage Change of each Reference Asset:	0.00%
Payment at Maturity:	At maturity, if the Percentage Change of each Reference Asset is zero, then the Payment at Maturity will equal the Principal Amount.

On a \$1,000.00 investment, a 0.00% Percentage Change of each Reference Asset results in a Payment at Maturity of \$1,000.00, a 0.00% return on the Notes.

Example 3 — Calculation of the Payment at Maturity where the Least Performing Percentage Change is negative but not by more than the Buffer Percentage.

Least Performing Percentage Change:	-5.00%
Payment at Maturity:	At maturity, if the Least Performing Percentage Change is negative BUT not by more than the Buffer Percentage, then the Payment at Maturity will equal the Principal Amount.

On a \$1,000.00 investment, a -5.00% Percentage Change in the Least Performing Reference Asset results in a Payment at Maturity of \$1,000.00, a 0.00% return on the Notes.

Example 4 — Calculation of the Payment at Maturity where the Least Performing Percentage Change is negative by more than the Buffer Percentage.

Least Performing Percentage Change:	-35.00%
Payment at Maturity:	= \$1,000.00 + (\$1,000.00 x -35.00% + 10.00%)

= \$1,000.00 - \$250.00

= \$750.00

On a \$1,000.00 investment, a -35.00% Percentage Change in the Least Performing Reference Asset results in a Payment at Maturity of \$750.00, a -25.00% return on the Notes. ***If the Final Value of the Least Performing Reference Asset declines by more than 10% from its Initial Value, the return on your Notes will be negative and you will lose 1% of the Principal Amount of the Notes for each 1% decrease of the Final Value from the Initial Value of the Least Performing Reference Asset in excess of 10%, and you may lose up to 90% of the Principal Amount. Any payments on the Notes are subject to our credit risk.***

The following table shows the return profile for the Notes on the Maturity Date, assuming that the investor purchased the Notes with an aggregate Principal Amount of \$1,000 and held the Notes until the Maturity Date. The returns and losses illustrated in the following table are not estimates or forecasts of the Percentage Change of the Least Performing Reference Asset or the return or loss on the Notes. Neither TD nor the Agent is predicting or guaranteeing any gain or particular return on the Notes.

Hypothetical Least Performing Percentage Change	Hypothetical Payment at Maturity (\$)	Hypothetical Return on Notes (%)
40.00%	\$1,724.00	72.40%
30.00%	\$1,543.00	54.30%
20.00%	\$1,362.00	36.20%
15.00%	\$1,271.50	27.15%
10.00%	\$1,181.00	11.81%
5.00%	\$1,090.50	9.05%
3.00%	\$1,054.30	5.43%
2.00%	\$1,036.20	3.62%
1.00%	\$1,018.10	1.81%
0.00%	\$1,000.00	0.00%
-2.00%	\$1,000.00	0.00%
-4.00%	\$1,000.00	0.00%
-6.00%	\$1,000.00	0.00%
-8.00%	\$1,000.00	0.00%
-10.00%	\$1,000.00	0.00%
-20.00%	\$900.00	-10.00%
-30.00%	\$800.00	-20.00%
-40.00%	\$700.00	-30.00%
-50.00%	\$600.00	-40.00%
-75.00%	\$350.00	-65.00%
-100.00%	\$100.00	-90.00%

Information Regarding the Reference Assets

All disclosures contained in this document regarding the Reference Assets, including, without limitation, their make-up, methods of calculation, and changes in any Reference Asset components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, the Index Sponsors. Each Index Sponsor, owns the copyright and all other rights to the relevant Reference Asset, has no obligation to continue to publish, and may discontinue publication of, the relevant Reference Asset. None of the websites referenced in the Reference Asset descriptions below, or any materials included in those websites, are incorporated by reference into this document or any document incorporated herein by reference.

The graphs below set forth the information relating to the historical performance of each Reference Asset. The graphs below show the daily historical Closing Values of each Reference Asset from October 31, 2008 through October 31, 2018. We obtained the information regarding the historical performance of each Reference Asset in the graphs below from Bloomberg Professional® Service (“Bloomberg”).

We have not independently verified the accuracy or completeness of the information obtained from Bloomberg. The historical performance of any Reference Asset should not be taken as an indication of its future performance, and no assurance can be given as to the Final Value of any Reference Asset. We cannot give you assurance that the performance of any Reference Asset will result in any positive return on your initial investment.

Russell 2000® Index

All disclosures contained in this pricing supplement regarding the Reference Asset, including, without limitation, its makeup, method of calculation, and changes in its components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, the Frank Russell Company (“Russell”). Russell, which owns the copyright and all other rights to the Reference Asset, has no obligation to continue to publish, and may discontinue publication of, the Reference Asset. The consequences of Russell discontinuing publication of the Reference Asset are discussed in the section of the product prospectus supplement entitled “General Terms of the Notes — Unavailability of the Level of the Reference Asset.” Neither we nor TDS accepts any responsibility for the calculation, maintenance or publication of the Reference Asset or any successor index.

Russell began dissemination of the Reference Asset (Bloomberg L.P. index symbol “RTY”) on January 1, 1984 and calculates and publishes the Reference Asset. The Reference Asset was set to 135 as of the close of business on December 31, 1986. The Reference Asset is designed to track the performance of the small capitalization segment of the U.S. equity market. As a subset of the Russell 3000® Index, the Reference Asset consists of the smallest 2,000 companies included in the Russell 3000® Index. The Russell 3000® Index measures the performance of the largest 3,000 U.S. companies, representing approximately 98% of the investable U.S. equity market. The Reference Asset is determined, comprised, and calculated by Russell without regard to the Notes.

Selection of Stocks Underlying the Reference Asset

All companies eligible for inclusion in the Reference Asset must be classified as a U.S. company under Russell’s country-assignment methodology. If a company is incorporated, has a stated headquarters location, and trades in the same country (American Depositary Receipts and American Depositary Shares are not eligible), then the company is assigned to its country of incorporation. If any of the three factors are not the same, Russell defines three Home

Country Indicators (“HCIs”): country of incorporation, country of headquarters, and country of the most liquid exchange (as defined by a two-year average daily dollar trading volume) (“ADDTV”). Using the HCIs, Russell compares the primary location of the company’s assets with the three HCIs. If the primary location of its assets matches any of the HCIs, then the company is assigned to the primary location of its assets. If there is insufficient information to determine the country in which the company’s assets are primarily located, Russell will use the primary country from which the company’s revenues are primarily derived for the comparison with the three HCIs in a similar manner. Russell uses the average of two years of assets or revenues data to reduce potential turnover. If conclusive country details cannot be derived from assets or revenues data, Russell will assign the company to the country of its headquarters, which is defined as the address of the company’s principal executive offices, unless that country is a Benefit Driven Incorporation “BDI” country, in which case the company will be assigned to the country of its most liquid stock exchange. BDI countries include: Anguilla, Antigua and Barbuda, Aruba, Bahamas, Barbados, Belize, Bermuda, Bonaire, British Virgin Islands, Cayman Islands, Channel Islands, Cook Islands, Curacao, Faroe Islands, Gibraltar, Isle of Man, Liberia, Marshall Islands, Panama, Saba, Sint Eustatius, Sint Maarten, and Turks and Caicos Islands. For any companies incorporated or headquartered in a U.S. territory, including countries such as Puerto Rico, Guam, and U.S. Virgin Islands, a U.S. HCI is assigned.

All securities eligible for inclusion in the Reference Asset must trade on a major U.S. exchange. Bulletin board, pink-sheets, and over-the-counter (“OTC”) traded securities are not eligible for inclusion. Stocks must trade at or above \$1.00 on their primary exchange on the last trading day in May to be eligible for inclusion during annual reconstitution. However, in order to reduce unnecessary turnover, if an existing member’s closing price is less than \$1.00 on the last day of May, it will be considered eligible if the average of the daily closing prices (from its primary exchange) during the month of May is equal to or greater than \$1.00. Initial public offerings are added each quarter and must have a closing price at or above \$1.00 on the last day of their eligibility period in order to qualify for index inclusion. If a stock, new or existing, does not have a closing price at or above \$1.00 (on its primary exchange) on the last trading day in May, but does have a closing price at or above \$1.00 on another major U.S. exchange, that stock will be eligible for inclusion.

An important criteria used to determine the list of securities eligible for the Reference Asset is total market capitalization, which is defined as the market price as of the last trading day in May for those securities being considered at annual reconstitution times the total number of shares outstanding. Where applicable, common stock, non-restricted exchangeable shares and partnership units/membership interests are used to determine market capitalization. Any other form of shares such as preferred stock, convertible preferred stock, redeemable shares, participating preferred stock, warrants and rights, or trust receipts, are excluded from the calculation. If multiple share classes of common stock exist, they are combined. In cases where the common stock share classes act independently of each other (e.g., tracking stocks), each class is considered for inclusion separately. If multiple share classes exist, Russell will determine a primary trading vehicle, and the price of that primary trading vehicle (usually the most liquid) is used to calculate market capitalization.

Companies with a total market capitalization of less than \$30 million are not eligible for the RTY. Similarly, companies with only 5% or less of their shares available in the marketplace are not eligible for the RTY. Royalty trusts, limited liability companies, closed-end investment companies, blank check companies, special-purpose acquisition companies, and limited partnerships are also not eligible for inclusion in the Russell U.S. Indices. Business development companies, exchange traded funds and mutual funds are also excluded. Bulletin board, pink-sheets, and OTC traded securities are not eligible for inclusion.

Annual reconstitution is a process by which the Reference Asset is completely rebuilt. Based on closing levels of the company's common stock on its primary exchange on the last trading day of May of each year, Russell reconstitutes the composition of the Reference Asset using the then existing market capitalizations of eligible companies. Reconstitution of the Reference Asset occurs on the last Friday in June or, when the last Friday in June is the 29th or 30th, reconstitution occurs on the prior Friday. In addition, Russell adds initial public offerings to the Reference Asset on a quarterly basis based on market capitalization guidelines established during the most recent reconstitution.

After membership is determined, a security's shares are adjusted to include only those shares available to the public. This is often referred to as "free float." The purpose of the adjustment is to exclude from market calculations the capitalization that is not available for purchase and is not part of the investable opportunity set.

License Agreement

The Reference Asset is a trademark of Russell and has been licensed for use by TD. The Notes are not sponsored, endorsed, sold or promoted by Russell and Russell makes no representation regarding the advisability of investing in the Notes.

Russell does not guarantee the accuracy and/or the completeness of the Reference Asset or any data included in the Reference Asset and has no liability for any errors, omissions, or interruptions in the Reference Asset. Russell makes no warranty, express or implied, as to results to be obtained by the calculation agent, holders of the Notes, or any other person or entity from the use of the Reference Asset or any data included in the Reference Asset in connection with the rights licensed under the license agreement described in this document or for any other use. Russell makes no express or implied warranties, and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Reference Asset or any data included in the Reference Asset. Without limiting any of the above information, in no event will Russell have any liability for any special, punitive, indirect or consequential damages, including lost profits, even if notified of the possibility of these damages.

The Notes are not sponsored, endorsed, sold or promoted by Russell. Russell makes no representation or warranty, express or implied, to the owners of the Notes or any member of the public regarding the advisability of investing in securities generally or in the Notes particularly or the ability of the Reference Asset to track general stock market performance or a segment of the same. Russell's publication of the Reference Asset in no way suggests or implies an opinion by Russell as to the advisability of investment in any or all of the stocks upon which the Reference Asset is

based. Russell's only relationship to TD is the licensing of certain trademarks and trade names of Russell and of the Reference Asset, which is determined, composed and calculated by Russell without regard to TD or the Notes. Russell is not responsible for and has not reviewed the Notes nor any associated literature or publications and Russell makes no representation or warranty express or implied as to their accuracy or completeness, or otherwise. Russell reserves the right, at any time and without notice, to alter, amend, terminate or in any way change the Reference Asset. Russell has no obligation or liability in connection with the administration, marketing or trading of the Notes.
