NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

Note 1. Basis of Presentation

The accompanying consolidated financial statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2014 ("2014 Annual Report"). These consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC"). Accordingly, certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP") have been condensed or omitted pursuant to such rules and regulations. These consolidated financial statements are unaudited but, in the opinion of management, reflect all material adjustments necessary to present fairly our consolidated financial position, results of operations and cash flows for the periods presented. All such adjustments were of a normal, recurring nature. The results of operations for such interim periods are not necessarily indicative of the results of operations for the full year.

Note 2. Recent Accounting Pronouncements

ASU 2015-11

In July 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2015-11, "Simplifying the Measurement of Inventory (Topic 330)." ASU 2015-11 simplifies the accounting for the valuation of all inventory not accounted for using the last-in, first-out ("LIFO") method by prescribing that inventory be valued at the lower of cost and net realizable value. ASU 2015-11 is effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016 on a prospective basis. We do not expect the adoption of ASU 2015-11 to have a material effect on our financial position, results of operations or cash flows.

ASU 2015-05

In April 2015, the FASB issued ASU 2015-05, "Intangibles - Goodwill and Other - Internal-Use Software (Subtopic 350-40)." ASU 2015-05 provides guidance regarding the accounting for a customer's fees paid in a cloud computing arrangement; specifically about whether a cloud computing arrangement includes a software license, and if so, how to account for the software license. ASU 2015-05 is effective for public companies' annual periods, including interim periods within those fiscal years, beginning after December 15, 2015 on either a prospective or retrospective basis. Early adoption is permitted. We do not expect the adoption of ASU 2015-05 to have a material effect on our financial position, results of operations or cash flows.

ASU 2015-03

In April 2015, the FASB issued ASU No. 2015-03, "Interest - Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs." The amendments in this ASU require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this ASU. The amendments are effective for financial statements issued for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The amendments are to be applied on a retrospective basis, wherein the balance sheet of each individual period presented is adjusted to reflect the period-specific effects of applying the new guidance. We do not expect the adoption of ASU 2015-03 to have a material effect on our financial position, results of operations or cash flows.

ASU 2015-02

In February 2015, the FASB issued ASU No. 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis," which is intended to improve targeted areas of consolidation guidance for legal entities such as limited partnerships, limited liability corporations, and securitization structures (collateralized debt obligations, collateralized loan obligations, and mortgage-backed security transactions). The ASU focuses on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. In addition to reducing the number of consolidation models from four to two, the new standard simplifies the FASB Accounting Standards Codification and improves current U.S. GAAP by placing more emphasis on risk of loss when determining a controlling financial interest, reducing the frequency of the application of related-party guidance when determining a controlling financial interest in a variable interest entity ("VIE"), and changing consolidation conclusions for companies in several industries that typically make use of limited partnerships or VIEs. The ASU will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. We do not expect the adoption of ASU 2015-02 to have a material effect on our financial position, results of operations or cash flows.

Index

ASU 2015-01

In January 2015, the FASB issued ASU No. 2015-01, "Income Statement - Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items." This ASU eliminates from U.S. GAAP the concept of extraordinary items. ASU 2015-01 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. We do not expect the adoption of ASU 2015-01 to have a material effect on our financial position, results of operations or cash flows.

ASU 2014-17

In November 2014, the FASB issued ASU No. 2014-17, "Business Combinations (Topic 805): Pushdown Accounting." This ASU provides an acquired entity with an option to apply pushdown accounting in its separate financial statements upon occurrence of an event in which an acquirer obtains control of the acquired entity. An acquired entity may elect the option to apply pushdown accounting in the reporting period in which the change-in-control event occurs. If pushdown accounting is applied to an individual change-in-control event, that election is irrevocable. ASU 2014-17 was effective on November 18, 2014. The adoption of ASU 2014-17 did not have any effect on our financial position, results of operations or cash flows.

ASU 2014-16

In November 2014, the FASB issued ASU 2014-16, "Derivatives and Hedging (Topic 815)." ASU 2014-16 addresses whether the host contract in a hybrid financial instrument issued in the form of a share should be accounted for as debt or equity. ASU 2014-16 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. We do not currently have issued, nor are we investors in, hybrid financial instruments. Accordingly, we do not expect the adoption of ASU 2014-16 to have any effect on our financial position, results of operations or cash flows.

ASU 2014-15

In August 2014, the FASB issued ASU No. 2014-15, "Presentation of Financial Statements - Going Concern (Subtopic 205-40)". ASU 2014-15 provides guidance related to management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosure. ASU 2014-15 is effective for annual periods ending after December 15, 2016, and for interim and annual periods thereafter. Early application is permitted. We do not expect the adoption of ASU 2014-15 to have a material effect on our financial position, results of operations or cash flows.

ASU 2014-12

In June 2014, the FASB issued ASU No. 2014-12, "Compensation – Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period." This ASU requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. We do not expect the adoption of ASU 2014-12 to have a material effect on our financial position, results of operations or cash flows.

ASU 2014-09

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." ASU 2014-09 affects any entity using U.S. GAAP that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (e.g., insurance contracts or lease contracts). ASU 2014-09 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. We are still evaluating the effect of the adoption of ASU 2014-09. On April 1, 2015, the FASB voted to propose to defer the effective date of the new revenue recognition standard by one year.

ASU 2014-08

In April 2014, the FASB issued ASU No. 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360) and Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." ASU 2014-08 amends the definition for what types of asset disposals are to be considered discontinued operations, as well as amending the required disclosures for discontinued operations and assets held for sale. ASU 2014-08 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2014. The adoption of ASU 2014-08 did not have any effect on our financial position, results of operations or cash flows.

Note 3. Cash and Cash Equivalents

We maintain cash balances with financial institutions that may exceed federally insured limits. We consider all highly liquid investments with an original maturity of three months or less to be cash equivalents. As of June 30, 2015 and December 31, 2014, we did not have any cash equivalents.

Index

Under our cash management system, we utilize a controlled disbursement account to fund cash distribution checks presented for payment by the holder. Checks issued but not yet presented to banks may result in overdraft balances for accounting purposes. As of June 30, 2015 and December 31, 2014, there were no bank overdrafts. Changes in bank overdrafts from period to period are reported in the Consolidated Statements of Cash Flows as a component of operating activities within Accounts payable and Other accrued expenses.

Note 4. Inventories

Inventories, except for pub food, beverages and supplies, are stated at the lower of standard cost or market. Pub food, beverages and supplies are stated at the lower of cost or market.

We regularly review our inventories for the presence of obsolete product attributed to age, seasonality and quality. If our review indicates a reduction in utility below the product's carrying value, we reduce the product to a new cost basis. We record the cost of inventory for which we estimate we have more than a twelve-month supply as a component of Intangible and other assets, net on our Consolidated Balance Sheets.

Note 6. Derivative Financial Instruments

Interest Rate Swap Contract

Our risk management objectives are to ensure that business and financial exposures to risk that have been identified and measured are minimized using the most effective and efficient methods to reduce, transfer and, when possible, eliminate such exposures. Operating decisions contemplate associated risks and management strives to structure proposed transactions to avoid or reduce risk whenever possible.

We have assessed our vulnerability to certain business and financial risks, including interest rate risk associated with our variable-rate long-term debt. To mitigate this risk, effective January 23, 2014, we entered into an interest rate swap contract with Bank of America, N.A. ("BofA") for 75% of the Term Loan balance, to hedge the variability of interest payments associated with our variable-rate borrowings under our Term Loan with BofA. The current swap contract terminates on September 29, 2023, and had a total notional value of \$7.7 million as of June 30, 2015. Through this swap agreement, we pay interest at a fixed rate of 2.86% and receive interest at a floating-rate of the one-month LIBOR, which was 0.18% at June 30, 2015. Since the interest rate swap hedges the variability of interest payments on variable rate debt with similar terms, it qualifies for cash flow hedge accounting treatment. As of June 30, 2015, unrealized net losses of \$453,000 were recorded in Accumulated other comprehensive loss as a result of this hedge. The effective portion of the gain or loss on the derivative is reclassified into Interest expense in the same period during which we record Interest expense associated with the Term Loan. There was no hedge ineffectiveness during the first two quarters of 2015 or 2014.

The fair value of our derivative instrument is as follows (in thousands):

Fair Value of Derivative Instrument

	June 30,	December 31,
	2015	2014
Fair value of interest rate swap	\$(453) \$(503

Index

The effect of our interest rate swap contract that was accounted for as a derivative instrument on our Consolidated Statements of Operations for the three- and six-month periods ended June 30, 2015 and 2014 was as follows (in thousands):

Derivatives in Cash Flow Hedging Relationships	Amount of Gain (Loss) Recognized in Accumulated OCI (Effective Portion)	Location of Loss Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Loss Reclassified from Accumulated OCI into Income (Effective Portion)

2014	\$(370) Interest expense	\$96

See also Note 7.

Note 7. Fair Value Measurements

Factors used in determining the fair value of our financial assets and liabilities are summarized into three broad categories:

Level 1 – quoted prices in active markets for identical securities as of the reporting date;

Level 2 – other significant directly or indirectly observable inputs, including quoted prices for similar securities, interest rates, prepayment speeds and credit risk; and

Level 3 – significant inputs that are generally less observable than objective sources, including our own assumptions in determining fair value.

The factors or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following tables summarize liabilities measured at fair value on a recurring basis (in thousands):

Fair Value at	Level 1	Level 2	Level 3	Total
Fair Value at June 30, 2015				
Interest rate swap	\$—	\$(453) \$—	\$(453
Fair Value at December 31, 2014				
Interest rate swap	\$—	\$(503) \$—	\$(503

We did not have any assets measured at fair value on a recurring basis at June 30, 2015 or December 31, 2014.

The fair value of our interest rate swap was based on quarterly statements from the issuing bank. There were no changes to our valuation techniques during the second quarter of 2015.

We believe the carrying amounts of Cash, Accounts receivable, Other current assets, Accounts payable, Accrued salaries, wages and payroll taxes, and Other accrued expenses are a reasonable approximation of the fair value of those financial instruments because of the nature of the underlying transactions and the short-term maturities involved.

We had fixed-rate debt outstanding as follows (in thousands):

	June 30, 2015	December 31, 2014
Fixed-rate debt on balance sheet	\$1,335	\$1,456
Estimated fair value of fixed-rate debt	\$1,381	\$1,513

Index

We calculate the estimated fair value of our fixed-rate debt using a discounted cash flow methodology. Using estimated current interest rates based on a similar risk profile and duration (Level 2), the fixed cash flows are discounted and summed to compute the fair value of the debt.

Note 8. Segment Results and Concentrations

Our chief operating decision maker monitors net sales and gross margins of our Beer Related operations and our Pubs operations. Beer Related operations include the brewing operations and related beer sales of our Widmer Brothers, Redhook, Kona and Omission beer brands, as well as our Square Mile cider brand. Pubs operations primarily include our pubs, some of which are located adjacent to our Beer Related operations. We do not track operating results beyond the gross margin level or our assets on a segment level.

The segments use many of the same assets. For internal reporting purposes, we do not allocate assets by segment and, therefore, no asset by segment information is provided to our chief operating decision maker.

In preparing this financial information, certain expenses were allocated between the segments based on management estimates, while others were based on specific factors such as headcount. These factors can have a significant impact on the amount of Gross profit for each segment. While we believe we have applied a reasonable methodology, assignment of other reasonable cost allocations to each segment could result in materially different segment Gross profit.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This quarterly report on Form 10-Q includes forward-looking statements. Generally, the words "believe," "expect," "intend," "estimate," "anticipate," "project," "will," "may," "plan" and similar expressions or their negatives identify forward-looking statements, which generally are not historical in nature. These statements are based upon assumptions and projections that we believe are reasonable, but are by their nature inherently uncertain. Many possible events or factors could affect our future financial results and performance, and could cause actual results or performance to differ materially from those expressed, including those risks and uncertainties described in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2014 ("2014 Annual Report"), and those described from time to time in our future reports filed with the Securities and Exchange Commission (the "SEC"). Caution should be taken not to place undue reliance on these forward-looking statements, which speak only as of the date of this quarterly report.

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes thereto included herein, as well as the audited Consolidated Financial Statements and Notes and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our 2014 Annual Report. The discussion and analysis includes period-to-period comparisons of our financial results. Although period-to-period comparisons may be helpful in understanding our financial results, we believe that they should not be relied upon as an accurate indicator of future performance.

Overview

Craft Brew Alliance is a leading craft brewing company that brews, brands and markets some of the world’s most respected and best-loved American craft beers.

We are home to three of the earliest pioneers in craft beer: Redhook Ale Brewery, Washington’s largest craft brewery, founded in 1981; Widmer Brothers Brewing, Oregon’s largest craft brewery, founded in 1984; and Kona Brewing Company, Hawaii’s oldest and largest craft brewery, founded in 1994. As part of Craft Brew Alliance, these craft brewing legends have expanded their reach across the U.S. and more than 15 international markets.

In addition to growing and nurturing distinctive brands rooted in local heritage, Craft Brew Alliance is committed to developing innovative new category leaders, such as Omission Beer, which is the #1 beer in the gluten-free beer segment, and Square Mile Cider, a tribute to the early American settlers who purchased the first plots of land in the Pacific Northwest.

Publicly traded on NASDAQ under the ticker symbol BREW, Craft Brew Alliance is headquartered in Portland, Oregon and operates five breweries and five pub restaurants across the U.S.

We proudly brew our craft beers in four company-owned breweries located in Portland, Oregon; the Seattle suburb of Woodinville, Washington; Portsmouth, New Hampshire; and Kailua-Kona, Hawaii; and one brewery in Memphis, Tennessee owned by our brewing partner. Additionally, we own and operate two small innovation breweries, primarily used for small batch production and innovative brews, in Portland, Oregon and Portsmouth, New Hampshire.

We distribute our beers to retailers through independent wholesalers that are aligned with the Anheuser-Busch, LLC (“A-B”) network. These sales are made pursuant to a Master Distributor Agreement (the “A-B Distributor Agreement”) with A-B. As a result of this distribution arrangement, we believe that, under alcohol beverage laws in a majority of states, these wholesalers would own the exclusive right to distribute our beers in their respective markets if the A-B Distributor Agreement expires or is terminated. Kona, Redhook and Widmer Brothers beers are distributed in all 50 states. Omission Beer continues to expand into new markets in the U.S. and internationally, while Square Mile Cider is currently available in 12 states in the West. Separate from our A-B wholesalers, we maintain an internal independent sales and marketing organization with resources across the key functions of brand management, field marketing, field sales, and national retail sales.

We operate in two segments: Beer Related operations and Pubs operations. Beer Related operations include the brewing, and domestic and international sales, of craft beers and ciders from our breweries. Pubs operations primarily include our five pubs, four of which are located adjacent to our Beer Related operations, as well as other merchandise sales, and sales of our beers directly to customers.

Total	406,600	417,100	(10,500)	(2.5)	%	

(1) Change in depletions reflects the year-over-year change in barrel volume sales of beer by wholesalers to retailers.

(2) Contract brewing and beer related includes international shipments of our beers.

The increase in sales to A-B and A-B related in the three-month period ended June 30, 2015 compared to the same period of 2014 was primarily due to an increase in shipments and a shift in package mix from draft to packaged, which has a higher selling price per barrel than draft.

The decrease in sales to A-B and A-B related in the six-month period ended June 30, 2015 compared to the same period of 2014 was primarily due to reductions in our wholesaler inventory levels in the first quarter of 2015. During the same period of 2014,

15

Index

wholesalers were building inventory levels in response to low levels at the end of 2013. The decrease in sales was partially offset by an increase in pricing and a shift in package mix from draft to packaged, which has a higher selling price per barrel than draft.

The increases in Contract brewing and beer related sales in the three-- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to increases in international shipments of our beers, which sell at a higher rate per barrel than contract brewing sales, as we expanded into additional countries, as well as increases in volume of our contract brewing sales.

Pubs sales increased in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014, primarily as a result of higher guest counts at both of our pubs in Hawaii, which also have higher revenue per guest than the Redhook and Widmer Brothers pubs, which experienced lower guest counts at the Portland and Portsmouth locations. The increases in pub sales in the six months ended June 30, 2015 were partially offset by the closure of the Redhook Pub in Portsmouth, New Hampshire for seven days due to inclement weather, and closure of our Kona Pub on the island of Oahu for three weeks for a full remodel in the first quarter of 2015. The increase in Pubs sales in the first six months of 2015 compared to the same period of 2014 was also partially offset by the decrease in beer shipment volume through our Pubs.

Excise taxes vary directly with the volume of beer shipped.

Shipments by Brand

The following table sets forth a comparison of shipments by brand (in barrels):

Total ⁽¹⁾	386,800	397,500	(10,700)	(2.7))% 1	%

(1) Total shipments by brand include international shipments and exclude shipments produced under our contract brewing arrangements.

The increases in our Kona brand shipments in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to increases in shipments of Big Wave Golden Ale and Island Hopper variety pack, partially offset by decreases in Koko Brown.

The decreases in our Redhook brand shipments in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to decreases in our KCCO series, a craft beer brand developed in partnership with theChive, a photo entertainment website, Audible Ale, ESB and Longhammer IPA, partially offset by

an increase related to the introduction of Seedy Blonde Apple Ale.

The decreases in our Widmer Brothers brand shipments in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to decreases in Upheaval IPA and Hefeweizen draft in the three-month period; and Alchemy Ale, Columbia Commons and Hefeweizen draft in the six-month period, partially offset by an increase in Hefeweizen packaged beer and the summer seasonal which switched to Hefe Shandy from Citra Blonde. Hefeweizen packaged has benefited from the introduction of the new Hefeweizen packaging in collaboration with the Portland Timbers.

Index

The increases in our Omission brand shipments in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to the continued success of, and demand for, the IPA, Lager and Pale Ale styles.

Shipments by Package

The following table sets forth a comparison of our shipments by package, excluding shipments produced under our contract brewing arrangements (in barrels):

Three Months Ended June 30,	2015		2014		
	Shipments	% of Total	Shipments	% of Total	
Draft	50,400	22.1	% 53,400	23.7	%
Packaged	177,900	77.9	% 171,900	76.3	%
Total	228,300	100.0	% 225,300	100.0	%

Six Months Ended June 30,	2015		2014

Total	386,800	100.0	% 397,500	100.0	%

The shifts in package mix from draft to packaged in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily the result of our Kona brand family becoming a larger share of our overall shipments by brand family, which is more heavily weighted to packaged sales, and the growth of Omission, which is only available in packaged.

Cost of Sales

Cost of sales includes purchased raw and component materials, direct labor, overhead and distribution costs.

Information regarding Cost of sales was as follows (dollars in thousands):

	Three Months Ended June 30,		Dollar Change	% Change	
	2015	2014			
Beer Related	\$33,514	\$32,384	\$1,130	3.5	%

Pubs	11,882	10,947	935	8.5	%
Total	\$70,388	\$70,098	\$290	0.4	%

The increase in Beer Related Cost of sales in the three-month period ended June 30, 2015 compared to the same period of 2014 was primarily due to an increase in brewery costs per barrel at our owned breweries, the increase in shipment volume and the mix shift from draft to packaged beers, as the cost per barrel of packaged beer is higher than draft. The increase in Cost of sales was partially offset by decreases in our cost of component materials and more favorable distribution costs per barrel.

The decrease in Beer Related Cost of sales in the six-month period ended June 30, 2015 compared to the same period of 2014 was primarily due to the decrease in shipment volume and more favorable distribution costs per barrel. The decrease in Cost of sales was partially offset by an increase in brewery costs per barrel at our owned breweries, and the mix shift from draft to packaged beers, as the cost per barrel of packaged beer is higher than draft.

Pubs Cost of sales increased in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014, primarily due to increases in Sales and employee-related costs, as well as higher labor costs relating to training and overhead following the closure of our Kona Pub on the island of Oahu for three weeks for a full remodel in the first quarter of 2015.

Index

Capacity utilization is calculated by dividing total shipments from our owned breweries by the approximate working capacity of these breweries and was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,		
	2015	2014	2015	2014	
Capacity utilization	82	% 87	% 70	% 78	%

In June 2014, we initiated full-scale brewing with our brewing partner in Memphis, Tennessee. In the second quarter of 2014, we intentionally increased production in anticipation of the Memphis brewery coming online, which contributed to the higher utilization rates during the three- and six-month periods ended June 30, 2014. This partnership provides us scalable capacity and we anticipate producing up to 100,000 barrels at this location in 2015.

Pubs	13.4	% 13.8	% 11.7	% 13.5	%
Overall	31.9	% 32.8	% 29.8	% 30.3	%

The increase in Gross profit in the three-month period ended June 30, 2015 compared to the same period of 2014 was primarily due to the decrease in our component materials costs, lower distribution costs per barrel and increase in shipment volume. The increase in Gross profit was partially offset by an increase in brewery costs per barrel at our owned breweries.

The decrease in Gross profit in the six-month period ended June 30, 2015 compared to the same period of 2014 was primarily due to the increase in brewery costs per barrel at our owned breweries and the decrease in shipment volume. The decrease was partially offset by lower distribution costs per barrel, favorable pricing increases and the decrease in our component materials costs.

The decreases in the Beer Related gross margin in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to higher brewery costs per barrel, as well as the mix shift from draft to

packaged beers. The decreases were partially offset by lower distribution and component costs per barrel and, for the six-month period, favorable selling price increases.

The decreases in the Pubs gross margin in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were due to higher labor costs relating to training and overhead following the closure of our Kona Pub on the island of

Selling, General and Administrative Expenses

Selling, general and administrative expenses (“SG&A”) include compensation and related expenses for our sales and marketing activities, management, legal and other professional and administrative support functions.

Information regarding SG&A was as follows (dollars in thousands):

	Three Months Ended		Dollar		
	June 30,		Change	% Change	
	2015	2014			
	\$16,263	\$15,208	\$1,055	6.9	%

	\$29,216	\$27,270	\$1,946	7.1	%
As a % of Net sales	29.1	% 27.1	%		

The increases in SG&A for the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to increases in employee-related costs, as well as planned increases in sales and marketing spending. SG&A increased as a percentage of Net sales in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 primarily due to the deceleration and decrease, respectively, in Net sales.

	June 30,		June 30,			
	2015	2014	2015	2014		
Average debt outstanding	\$21,046	\$11,704	\$19,595	\$11,701		
Average interest rate	1.85	% 1.74	% 1.70	% 1.89	% %	

The increases in Interest expense in the three- and six-month periods ended June 30, 2015 compared to the same periods of 2014 were primarily due to the increase in our average debt outstanding. Our average debt outstanding increased as we have borrowed on our line of credit facility to support our expansion and growth plans, and to fund our working capital needs.

Income Tax Provision

Our effective income tax rate was 39.9% for the first six months of 2015 and 39.0% in the first six months of 2014. The effective income tax rates reflect the impact of non-deductible expenses (primarily meals and entertainment expenses), state and local taxes, tax credits, and income excluded from taxation under the domestic production activities exclusion.

Liquidity and Capital Resources

We have required capital primarily for the construction and development of our production breweries, to support our expansion and growth plans, and to fund our working capital needs. Historically, we have financed our capital requirements through cash flows from operations, bank borrowings and the sale of common and preferred stock. We anticipate meeting our obligations for the twelve months beginning July 1, 2015 primarily from cash flows generated from operations and borrowing under our line of credit facility as the need arises. Capital resources available to us at June 30, 2015 included \$1.3 million of Cash and cash equivalents and \$14.1 million available under our line of credit facility.

At June 30, 2015 and December 31, 2014, we had \$14.3 million and \$8.0 million of working capital, respectively, and our debt as a percentage of total capitalization (total debt and common shareholders' equity) was 14.3% and 11.4%, respectively.

A summary of our cash flow information was as follows (dollars in thousands):

	Six Months Ended	
	June 30,	
	2015	2014
Net cash provided by operating activities	\$1,112	\$8,118
Net cash used in investing activities	(5,429) (5,059
Net cash provided by financing activities	4,613	639
Increase in Cash and cash equivalents	\$296	\$3,698

Cash provided by operating activities of \$1.1 million in the first six months of 2015 resulted from our Net income of \$0.2 million, net non-cash expenses of \$5.7 million and changes in our operating assets and liabilities as discussed in more detail below.

Accounts receivable, net, increased \$9.9 million to \$21.6 million at June 30, 2015 compared to \$11.7 million at December 31, 2014. This increase was primarily due to the timing of shipments and a \$6.7 million increase in our receivable from A-B, which totaled \$14.5 million at June 30, 2015. Historically, we have not had collection problems related to our accounts receivable.

Inventories increased \$0.4 million to \$19.4 million at June 30, 2015 compared to \$19.0 million at December 31, 2014. The increase from December 31, 2014 is minor due to the timing of shipments in the second quarter of 2015.

Accounts payable increased \$5.6 million to \$18.6 million at June 30, 2015 compared to \$13.0 million at December 31, 2014, primarily due to timing of payments related to raw and component materials and marketing.

As of June 30, 2015, we had the following net operating loss carryforwards ("NOLs") and federal credit carry forwards available to offset payment of future income taxes:

- state NOLs of \$31,000, tax-effected;
- federal alternative minimum tax ("AMT") credit carry forwards of \$332,000; and
- federal insurance contributions act ("FICA") credit carry forwards of \$72,000.

We anticipate that we will utilize the remaining NOLs and federal credit carry forwards in the near future and, accordingly, once utilized, we will be required to satisfy all of our income tax obligations with cash.

Capital expenditures of \$5.8 million in the first six months of 2015 were primarily directed to beer production capacity and efficiency improvements and Pubs remodeling. As of June 30, 2015, we had an additional \$0.7 million of expenditures recorded in Accounts payable on our Consolidated Balance Sheets, compared to \$0.6 million at December 31, 2014. We anticipate capital expenditures of approximately \$16 million to \$19 million in 2015 primarily for capacity and efficiency improvements, quality initiatives and restaurant and retail. Beginning in 2015, we will be investing approximately \$10 million in our Oregon Brewery to expand capacity to 750,000 barrels per year, with expected completion in the first half of 2017. Also beginning in 2015 through expected completion in early 2017, we will be investing approximately \$15 million in a new Hawaiian Brewery to expand capacity to 100,000 barrels per year. Both of these projects are included in the anticipated capital expenditures of \$16 million to \$19 million in 2015. We also anticipate total capital expenditures of \$17 million to \$21 million in 2016, including spending for the expansion projects.

We have a loan agreement (as amended, the “Loan Agreement”) with Bank of America, N.A., which consists of a \$22.0 million revolving line of credit (“Line of Credit”), including provisions for cash borrowings and up to \$2.5 million notional amount of letters of credit, and a \$10.2 million term loan (“Term Loan”). We may draw upon the Line of Credit for working capital and general corporate purposes until expiration on October 31, 2018. The maturity date of the Term Loan is September 30, 2023. At June 30, 2015, we had \$7.9 million of borrowings outstanding under the Line of Credit and \$10.2 million outstanding under the Term Loan.

Critical Accounting Policies and Estimates

Our financial statements are based upon the selection and application of significant accounting policies that require management to make significant estimates and assumptions. Judgments and uncertainties affecting the application of these policies may result in materially different amounts being reported under different conditions or using different assumptions. Our estimates are based upon historical experience, market trends and financial forecasts and projections, and upon various other assumptions that management believes to be reasonable under the circumstances at various points in time. Actual results may differ, potentially significantly, from these estimates.

Our critical accounting policies, as described in our 2014 Annual Report, relate to goodwill, indefinite-lived intangible assets, long-lived assets, refundable deposits on kegs, revenue recognition and deferred taxes. There have been no changes to our critical accounting policies since December 31, 2014.

Seasonality

Our sales generally reflect a degree of seasonality, with the first and fourth quarters historically exhibiting low sales levels compared to the second and third quarters. Accordingly, our results for any particular quarter are not likely to be indicative of the results to be achieved for the full year.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on our financial condition, changes in financial condition, revenue or expenses, results of operations, liquidity, capital expenditures or capital resources.

Recent Accounting Pronouncements

See Note 2 of Notes to Consolidated Financial Statements included in Part I, Item 1 of this Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in our reported market risks and risk management policies since the filing of our 2014 Annual Report on Form 10-K, which was filed with the SEC on March 4, 2015.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

Our management, including our Chief Executive Officer and our Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e) or 15d-15(e)) under the Securities Exchange Act of 1934 (“Exchange Act”) as of the end of the period covered by this Report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, disclosure controls and procedures were effective to

ensure that information required to be disclosed in the reports filed or submitted by us under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. While reasonable assurance is a high level of assurance, it does not mean absolute assurance. Disclosure controls and internal control over financial reporting cannot prevent or detect all errors, misstatements or fraud. In addition, the design of a control system must recognize that there are resource constraints, and the benefits associated with controls must be proportionate to their costs.
