

Item 2.05 – Costs Associated with Exit or Disposal Activities.

On September 22, 2016, LSI Industries Inc. ("LSI" or the "Company") announced that it will close its LSI MidWest Lighting Inc. manufacturing facility in Kansas City, Kansas. The Company expects to record estimated restructuring costs totaling, in the aggregate, between \$1,100,000 and \$1,300,000 over the first, second and third fiscal quarters. Restructuring costs primarily include employee-related costs (severance) and the probable impairment of manufacturing equipment and also include plant shut down expenses, expenses related to preparation of the facility for sale, legal expenses, and other related costs. LSI will also have an additional inventory write-down expense of between \$300,000 and \$500,000 recorded in the first quarter of fiscal year 2017. The Company owns the facility in Kansas City and expects to realize a gain when the facility is sold. The Company expects the closure of this facility will result in annual net operating profit improvement and cost savings of approximately \$1,400,000, before consideration of the restructuring and inventory write-down expenses.

The Company has also taken recent action to consolidate its small LSI Controls facility in Beaverton, Oregon into other LSI facilities by about September 30, 2016. The light assembly of products in the Beaverton facility was moved to the Company's Columbus, Ohio facility, and the administrative and engineering functions were moved to an LSI facility in Cincinnati, Ohio. A restructuring charge of approximately \$368,000 is expected to be recorded in the first quarter of fiscal 2017, with the majority of this primarily representing the costs related to the remaining period of the facility's lease and severance costs for employees who formerly worked in the Beaverton facility. The consolidation of this facility and net reduction of employment is expected to result in annual cost savings of approximately \$450,000.
