ITEM 9. REGULATION FD DISCLOSURE

On November 30, 2001, the Registrant announced that it would close its Mississippi and New Mexico manufacturing plants during the second half of 2002 and transfer all production of PRESTO(R) brand small appliances to manufacturers in the Orient and Mexico. According to Registrant, the need to match aggressive pricing from competitive small appliance companies (most of whom have discontinued U.S. operations and taken advantage of lower cost, foreign-sourced products) and thereby maintain its long-term competitive position, has resulted in the erosion of the Registrant's margins beyond endurance, in turn making the decision to transfer manufacturing to foreign sources unavoidable. As part of this restructuring plan, the Registrant will record a fourth quarter charge to account for the costs related to the manufacturing plant closings.

In a separate matter, on November 19, 2001, the Registrant purchased certain assets, including two state-of-the-art, high speed diaper machines, related equipment, and the existing customer base from RMED International, Inc. The Registrant also assumed the obligation to pay certain specified liabilities of RMED, and entered into a long term manufacturing contract with RMED to

manufacture certain disposable diaper products. The new business, Presto Absorbent Products, Inc., has genuine growth potential in baby diapers and related products. The new equipment and technical expertise acquired from RMED will be augmented with capital supplied by the Registrant to fund ongoing operations and future growth.

Forward-looking statements in this Form 8-K are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. There are certain important factors that could cause results to differ materially from historical results. Investors are cautioned that all forward looking statements involve risks and uncertainty. The factors that could cause actual results to differ materially are the following: consumer spending and debt levels; interest rates; continuity of relationships with and purchases by major customers; product mix; competitive pressure on sales and pricing; and increases in material or production costs, which cannot be recouped in product pricing.
