PART I

Item 1. Business

Overview

OM Group, Inc. (the “Company”, “we”, “our”, “us”) is a technology-driven industrial company serving attractive global markets, including automotive systems, electronic devices, aerospace and defense, industrial and renewable energy. We use innovative technologies to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product and application innovation and new market and customer development, to grow strategically primarily through synergistic acquisitions, and to maximize total stockholder return through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value. The Company is a Delaware Corporation and was formed in 1991.

We operate three strategic business platforms: Magnetic Technologies, Battery Technologies, and Specialty Chemicals. We also have limited continuing involvement in the Advanced Materials business through transition agreements with the buyer as described below. Further discussion of and financial information for these segments, including external sales, operating profit and total assets, is contained in Note 17 to the accompanying consolidated financial statements of this Annual Report on Form 10-K.

On March 29, 2013, we completed the divestiture of our cobalt-based Advanced Materials business and the transfer of our 55% equity interests in the Democratic Republic of Congo-based joint venture known as GTL to the joint venture partners. In connection with this transaction, we received net proceeds of \$329 million, \$302 million of which was used, together with cash on hand, to repay approximately \$346 million of our Term B debt. A loss of \$112 million was recorded on the divestiture. The sale agreement for the downstream portion of the business also provides for potential future additional cash consideration of up to \$110 million based on the business achieving certain revenue targets over a period of three years. Using our projected trends of cobalt prices and volumes, it is not probable that the business will meet the revenue targets, and no value was assigned to the potential future cash consideration while calculating the loss at the time of the divestiture or at December 31, 2013.

On May 31, 2013, we completed the divestiture of our Ultra Pure Chemicals (UPC) business for cash proceeds of \$63 million. The results of operations of the UPC business are reflected as discontinued operations in the accompanying unaudited condensed consolidated financial statements for all periods presented. A loss, net of tax, of \$9.8 million was recorded on the divestiture. We used the proceeds of the UPC divestiture, along with cash on hand, to repay our remaining indebtedness.

The Company consists of the following segments:

Magnetic Technologies segment

The Magnetic Technologies segment develops, manufactures and distributes high-performance, industrial-use magnetic materials and related products with differentiated magnetic and/or other performance properties. A large majority of our products are specially designed and manufactured for specific customers. We offer a wide range of magnetic technology products, from magnetically soft products to some of the most powerful permanent magnets in the world. Our products are sold into a wide array of end markets, including automotive systems, electrical installation technology, industrial, retail and renewable energy. We sell the majority of our products directly to original equipment manufacturers who incorporate them into their sub-assemblies and final assemblies.

At December 31, 2013 and 2012, backlog was \$97.9 million and \$101.3 million, respectively. The entire December 2013 backlog is expected to be converted into sales during the next twelve months.

We believe we are a market leader for many of our applications within our primary geographic markets; however, the competitive landscape remains fragmented with many competitors, and no single competitor has significant market share and geographic coverage.

Magnetic Technologies uses a variety of material inputs, including dysprosium and neodymium, to produce its products. The supply of these rare earths is currently concentrated in China and was constrained in 2011, resulting in significant price increases during 2011. These prices declined significantly throughout 2012 before moderating in the second half of 2013. Please see Risk Factors for important information regarding rare earth raw materials.

Table of Contents

The segment is focused on developing and leveraging its substantial patent portfolio and applications expertise to develop new products, enter new markets and generally increase market share.

Battery Technologies segment

The Battery Technologies segment provides advanced batteries, battery management systems, and energetic devices for defense, space and medical markets. We sell these products directly to customers who incorporate them into sub-assemblies. The business is also developing and commercializing products, technologies and applications for emerging markets, including commercial aerospace, alternative energy storage and oil & gas.

At December 31, 2013, backlog was \$135.2 million as compared to \$128.0 million at December 31, 2012. At December 31, 2013, \$15.1 million of the backlog is not expected to be converted into sales during the next twelve months.

We believe we are a market leader for defense and space applications in the U.S. due to our innovation, reliability, broad applications expertise and chemistries and long-standing relationships with key customers. There are few competitors qualified to supply into our principal markets. The segment is a prime contractor or subcontractor for numerous U.S. Government programs, including U.S. Government customers, and its top three customers account for approximately half of its sales. Please see "Risk Factors" for important information regarding U.S. government contracts and programs.

The segment is focused on developing new battery chemistries, expanding the markets it serves and developing products and technologies for emerging applications.

Specialty Chemicals segment

The Specialty Chemicals segment develops, produces and supplies chemicals for electronic applications, industrial applications including coatings, composites and tire, and photomasks used by customers to produce semiconductors and related products. The majority of our sales are directly to customers. Orders are quickly filled, and backlog is not material in this segment.

We participate in fragmented markets and believe we are a market leader for certain of our products for electronic device and coating applications. Our customer base in this segment requires significant technical support and high-quality formulations and products that meet stringent requirements and quality specifications. New products and customers often require a long qualification process.

We are focused on providing innovative products that meet specific customer requirements and expanding our geographical reach.

Advanced Materials segment

As discussed above, we completed the divestiture of this business in March 2013. Through the date of sale, this business manufactured inorganic products using unrefined cobalt and other metals, for the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets. It also had a 55% interest in GTL.

Following the sale, to assist in the transition of the downstream business, we entered into two agreements with the buyer pursuant to which: (1) we act as intermediary in a supply agreement between GTL and the buyer, in back-to-back arrangements for a period of at least two years, subject to delivery of 7,000 MT of cobalt feed and extendable for up to an additional six months in order to deliver 7,000 MT of cobalt feed; and, (2) we served as the U.S. distributor for refined cobalt products in primarily back-to-back arrangements until December 31, 2013. These

agreements result in minimal statement of operations or cash flow impact for us and will be reported in the Advanced Materials segment until both agreements expire or are terminated.

Raw Materials

We use a variety of raw materials purchased from a broad supplier base. The primary raw materials used by Magnetic Technologies are nickel, cobalt and certain rare earth materials, primarily alloys containing dysprosium and neodymium. Multiple suppliers are generally available for each of these materials; however, some raw materials are sourced from a single supplier. Rare earth materials, principally neodymium and dysprosium, are critical to the production of certain Magnetic Technologies products and currently are available from a limited number of suppliers, primarily in China. Temporary shortages of raw materials may occasionally occur and cause short-term price increases. Historically, these shortages have not resulted in lack of availability of raw materials. We also use certain raw materials that must be

Table of Contents

qualified prior to being used in production. For these raw materials, changes in suppliers may result in disruption of production, forward purchasing of contract requirements or re-qualification expenses.

We generally pass through rare earth and certain other raw material prices to our customers in our selling prices. During periods of rapidly changing prices of key raw materials, there may be price lags that can positively or negatively impact our short-term profitability and cash flow from operations. Declines in the selling prices of our finished goods, which can result from decreases in the market price of raw materials and the timing of our pass-through of certain raw materials costs in our selling prices, can result in our inventory carrying value being written down to a lower market value.

Foreign Operations

We have operations in North America, Europe and Asia, with the majority of our operations located outside of the United States. We market our products worldwide and purchase important raw materials from suppliers located outside of the United States. Some of our sales, raw material prices, operating expenses and income taxes are denominated in local currencies. Accordingly, fluctuations in currency prices affect our operating results. The primary currencies for which we have foreign currency rate exposure are the European Union Euro, Taiwanese Dollar, Malaysian Ringgit, Singapore Dollar, British Pound Sterling, Chinese Renminbi and the Canadian Dollar. Please see "Risk Factors" for additional information regarding our foreign operations and Note 17 to the accompanying consolidated financial statements to this Annual Report on Form 10-K for financial information about geographic areas.

Research and Development

Our research and development programs are part of our strategy to grow the business through new products, applications and markets. Research and development expenses were approximately \$26.3 million in 2013, \$32.2 million in 2012 and \$24.4 million in 2011. The decrease from 2012 to 2013 is primarily due to the sale of the cobalt business in 2013. The increase from 2011 to 2012 is primarily due to the acquisition of VAC in August 2011. These amounts do not include development and application engineering costs incurred in conjunction with fulfilling customer orders and executing customer projects.

Patents and Other Intellectual Property

We hold patents, registered primarily in Europe and the United States, relating to the formulation, content, manufacturing, processing and use of certain products, materials and chemistries. We also possess other intellectual property, including trademarks, tradenames, know-how, developed technology and trade secrets. Although we believe these intellectual property rights are important in the operations of our specific businesses, we do not consider any single patent, trademark, tradename, know-how, developed technology or trade secret to be material to our business as a whole.

Environmental Matters

The Company is subject to a variety of environmental and pollution control laws and regulations in the jurisdictions in which it operates. As is the case with other companies in similar industries, we face exposure from actual and potential claims and legal proceedings involving environmental matters. A number of factors affect the cost of environmental remediation, including the determination of the extent of contamination, the length of time the remediation may require, the complexity of environmental regulations and the continuing improvements in remediation techniques. Taking these factors into consideration, we estimate the undiscounted costs of remediation, which will be incurred over several years, and accrue an amount consistent with the estimates of these costs when it is probable that a liability has been incurred. We continually evaluate the adequacy of our reserves and adjust the reserves when determined to be appropriate. Ongoing environmental compliance costs, which are expensed as incurred, were approximately \$8.0 million in 2013 and \$15.3 million in 2012. We anticipate that we will continue to incur compliance costs for the foreseeable future; however, the amount and timing of future environmental

expenditures could vary significantly. We believe that our ultimate aggregate cost of environmental remediation as well as liability under environmental protection laws will not materially adversely affect our financial condition or results of operations.

Employees

At December 31, 2013, we had 5,900 full-time employees.

SEC Reports

We make available, free of charge, through our website, (www.omgi.com) our reports on Forms 10-K, 10-Q and 8-K as soon as reasonably practicable after the reports are electronically filed with the Securities and Exchange Commission. A copy of any of these documents is available in print, free of charge, to any stockholder who requests a copy, by writing to OM Group, Inc., 950 Main Avenue, Suite 1300, Cleveland, Ohio 44113-7210, USA, Attention:

Table of Contents

Investor Relations. The SEC maintains an Internet website at <http://www.SEC.gov> that contains the Company's annual report and proxy statements and other information. You may read and copy any materials filed with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

Item 1A. Risk Factors

The following discussion of “risk factors” identifies the most significant risks that our business faces. Our business, financial condition and results of operations could be materially adversely affected by any of these risks. There may be additional risks and uncertainties not presently known to us or that we currently deem to be immaterial. These risks should be read in conjunction with the other information in this Annual Report on Form 10-K.

We are subject to risks arising from uncertainty in worldwide economic conditions.

Overall demand for our products and our profitability may be adversely affected by changes in global economic conditions, including inflationary or deflationary pressures; interest rates; access to and functioning of capital markets; consumer and business spending rates; and higher commodity, raw material and fuel costs. Current uncertainty regarding global economic conditions could lead to reduced demand for our products, reduced profitability, and increased payment delays or defaults. We are limited in our ability to reduce costs to offset the results of a prolonged or severe economic downturn in light of certain fixed costs associated with our operations.

We may not be able to respond effectively to technological changes in our industry or in our customers' products. Our future business success will depend in part upon our ability to continue to enhance our technological capabilities, develop and market products and applications that meet changing customer needs and successfully anticipate or respond to technological changes on a cost-effective and timely basis. Moreover, technological and other changes in our customers' products or processes may render some of our products obsolete, which would reduce the demand for those products. In addition, technical advances by competitors may lead to production of less expensive or more effective products which could reduce our future sales.

Our Battery Technologies segment maintains contracts with the United States Government and is subject to government regulations, uncertain levels of funding, modifications due to changes in customer priorities and potential termination.

U.S. Government contracts are subject to specific regulations including those related to employment practices, environmental protection, recordkeeping and accounting. These laws impact how we transact business with our governmental clients and, in some instances, impose significant costs on our business operations. If we fail to comply with any of these regulations, requirements or statutes, our existing government contracts could be terminated, and we could be temporarily suspended or even debarred from government contracting or subcontracting which would reduce our sales and profits. Non-compliance with government regulations could also result in financial penalties, disallowed payments to us, and criminal prosecution.

The funding of U.S. Government programs is subject to congressional budget authorization and appropriation processes. We cannot predict the extent to which funding will be provided as part of the budget ultimately approved by Congress. In the event that appropriations for any of our or our customers' programs are impacted, our contract or subcontract under such program may be terminated or adjusted by the U.S. Government. We also cannot predict the impact of potential changes in priorities due to sequestration, military transformation and planning and/or the nature of war-related activity on related programs.

We intend to seek additional acquisitions, but we may not be able to identify attractive targets, complete transactions, or successfully integrate acquired companies, which could adversely affect our strategy.

Our strategy anticipates growth partly through future acquisitions; however, our ability to identify and consummate any future acquisitions on terms that are favorable to us may be limited by the number of attractive acquisition targets, internal demands on our resources and our ability to obtain financing. Our success in integrating newly-acquired businesses could be compromised if we fail to retain key personnel or fail to execute effective integration plans. Integration of acquired operations may take longer, or be more costly or disruptive to our business, than originally anticipated, and it is also possible that expected synergies from future acquisitions may not materialize. We also may incur costs and divert management attention for potential acquisitions that are never consummated. Acquisitions could result in the incurrence of additional debt, costs and contingent liabilities.

There may be liabilities of the acquired companies that we fail to properly determine during the due diligence investigation and for which we, as a successor owner, may be responsible. Indemnities and warranties obtained from

Table of Contents

the seller may not fully cover the liabilities due to limitations in scope, amount, duration, financial limitations of the indemnitor or warrantor or other reasons.

Failure to retain and recruit key personnel would harm our ability to meet key objectives.

Our key personnel are critical to the management and direction of our businesses. Our future success depends, in large part, on our ability to retain key personnel and other capable management personnel. It is particularly important that we retain our senior management group that is responsible for implementing our strategy. If we were not able to attract and retain talented personnel and replace key personnel should the need arise, we may not successfully execute our strategy.

The majority of our operations are outside the United States, which subjects us to risks that may adversely affect our operating results.

Conducting business outside the U.S subjects us to risks related to the differing legal and regulatory requirements and the social, political and economic conditions of many jurisdictions. These risks include currency rate fluctuations; labor difficulties; difficulty collecting receivables and longer customer payment cycles; unexpected additional taxes, tariffs, restrictions on capital flows, restrictions on trade; and changes in foreign laws or regulatory requirements. Furthermore, unexpected devaluations of currencies in developing or emerging markets could negatively affect the value of our earnings from, and of the assets located in, those markets.

We engage in business in certain countries where the risk of public sector corruption and bribery is high. We have implemented policies and procedures and conducted employee training to assure that our operations are in compliance with anti-corruption laws. If our compliance actions fail, a violation of anti-corruption laws could result in serious penalties, including criminal and civil sanctions.

We are at risk from fluctuations in the price and uncertainties in the supply of certain raw materials. Nickel, cobalt and certain rare earth materials, primarily dysprosium and neodymium, are the primary raw materials used by Magnetic Technologies. Fluctuations in the price of rare earth materials and other raw materials have been significant in the past and we believe price fluctuations are possible in the future. Our ability to pass increases in raw material costs through to our customers by increasing the selling prices of our products is an important factor in our business. We cannot guarantee that we will be able to maintain an appropriate differential between customer prices and our costs at all times, which could lead to reduced profitability. In addition, we may be required under US generally accepted accounting policies ("US GAAP") accounting rules to write down the carrying value of our inventory when rare earth and other raw material prices decrease, which could reduce our profit margins.

Rare earth materials are available from a limited number of suppliers, primarily in China. Political instability and unexpected adverse changes in laws or regulatory requirements, including with respect to export duties, quotas or embargoes, may affect the market price and availability of raw materials, including rare earth materials, particularly from China. If a substantial interruption should occur in the supply of rare earth materials, we may not be able to obtain other sources of supply in a timely fashion or at a reasonable price. A substantial increase in the price or an interruption in supply of rare earth materials may cause our customers to look for substitute materials or processes which could lead to reduced demand for our products.

The level of returns on pension plan assets and changes in the actuarial assumptions used could adversely affect us. Our operating results may be positively or negatively impacted by the amount of expense we record for our defined benefit pension plans. US GAAP requires that we calculate pension expense using actuarial valuations, which are dependent upon our various assumptions including estimates of expected long-term rate of return on plan assets, discount rates for future payment obligations, and the expected rate of increase in future compensation levels. Our pension expense and funding requirements may also be affected by our actual return on plan assets, and by legislation and other government regulatory actions. Changes in assumptions, laws or regulations could lead to variability in

operating results and could have a material adverse impact on liquidity.

The insurance that we maintain may not fully cover all potential exposures.

We maintain property, business interruption and casualty insurance but such insurance may not cover all risks associated with the hazards of our business and is subject to limitations, including deductibles and maximum liabilities covered. We are potentially at risk if one or more of our insurance carriers fail. Additionally, severe disruptions in the domestic and global financial markets could adversely impact the ratings and survival of some insurers. In the future, we may not be able to obtain coverage at current levels, and our premiums may increase significantly on coverage that we maintain.

Table of Contents

Changes in effective tax rates or adverse outcomes resulting from examination of our income tax returns could adversely affect us.

We are subject to income taxes in the United States and numerous jurisdictions outside of the United States. Significant judgment is required in evaluating our worldwide provision for income taxes. During the ordinary course of business, there are many transactions for which the ultimate tax determination is uncertain. For example, our effective tax rates could be adversely affected by the mix of earnings in various tax jurisdictions with different tax rates, changes in the valuation of our deferred tax assets and liabilities, the timing and amounts of funds repatriated to the U.S., and changes in tax laws, regulations and accounting principles and interpretations.

We are subject to tax audits in various jurisdictions, and such jurisdictions may assess additional income tax against us. The final determination of tax audits and any related litigation could be materially different from our historical income tax provisions and accruals, resulting in a material reduction of net income.

We are subject to stringent environmental regulation that could cause us to incur unanticipated costs or liabilities and could affect sales of our products.

We have expended, and may be required to expend in the future, substantial funds for compliance with laws and regulations relating to the storage, handling, disposal, emission and discharge of materials into the environment. In addition, we may from time to time be subjected to claims for personal injury, property damages or natural resource damages made by third parties or regulators. Given the many uncertainties involved in assessing liability for environmental claims or fully anticipating the scope of unknown contamination and remediation, our current reserves may prove to be insufficient.

In addition, new or revised governmental regulations relating to health, safety and the environment may affect demand for our products. Such new or revised regulations may result in heightened concerns about the materials involved and in additional requirements being placed on the production, handling, or labeling of these materials and may increase the cost of producing them, transporting them and/or limit the use of such materials or products containing such materials, which could lead to a decrease in demand. As a result of these regulations, customers may avoid purchasing some products in favor of perceived environmentally sensitive, less hazardous or less costly alternatives.

Our financial condition could be negatively impacted if we fail to maintain sufficient cash in the United States. The majority of our cash and cash equivalents are held outside the United States. If a substantial amount of cash were required in the United States for debt repayment, capital expenditures or other initiatives including future acquisitions, we may be required to repatriate funds to the United States with potentially unfavorable tax consequences or otherwise finance the desired activity.

We may not be able to adequately protect or enforce our intellectual property rights.

We rely on patents and trade secrets to protect our intellectual property. We attempt to protect and restrict access to our trade secrets and proprietary information, but it may be possible for a third party to obtain our information and develop similar technologies. If a competitor infringes upon our patent or other intellectual property rights, enforcing those rights could be difficult, expensive and time-consuming, making the outcome uncertain. Even if we are successful, litigation to enforce our intellectual property rights or to defend our patents against challenge could be costly and could divert management's attention.

Because we depend on several large customers for a significant portion of our revenues, our operating results could be adversely affected by any disruption of our relationship with these customers or any material adverse change in their businesses.

We depend on several large customers for a significant portion of our business. For example, sales to the top three customers in the Battery Technologies segment represented approximately half of Battery Technologies' net sales in

2013. Any disruption in our relationships with our major customers, including any adverse modification of our agreements with them or their unwillingness or inability to perform their obligations under the agreements, could adversely affect us. In addition, any material adverse change in the financial condition of any of our major customers could have similar adverse effects on us.

Table of Contents

We operate in very competitive industries.

We have many competitors. Some of our principal competitors have greater financial and other resources and greater brand recognition than we have. Accordingly, these competitors may be better able to withstand changes in conditions within the industries in which we operate and may have significantly greater operating and financial flexibility than we do. As a result of the competitive environment in the markets in which we operate, we currently face and will continue to face pressure on the sales prices of our products from competitors and large customers. With these pricing pressures, we may experience future reductions in the profit margins on our sales, or may be unable to pass on future raw material price or operating cost increases to our customers, or incur to a sudden loss of business.

We believe that industry consolidation among our peers could result in stronger competitors with greater financial and other resources that are better able to compete for customers.

Future indebtedness may impair our ability to operate our business successfully.

The terms of our Senior Secured Revolving Credit Facility (the Facility) could adversely affect our ability to finance future operations or capital needs and pursue available business opportunities. This Facility contains various provisions that limit our ability to, among other things, incur additional indebtedness, make investments, or sell assets. These restrictions could place us at a competitive disadvantage against competitors. In addition future borrowings could expose us to material increases in interest expense since future borrowings will have variable interest rate provisions.

In addition, our Facility requires us to maintain specified financial ratios, satisfy certain financial condition tests, and repay our indebtedness when it becomes due. Events beyond our control, including changes in general economic and business conditions, may affect our ability to meet these requirements. We cannot assure that we will meet those requirements or that the lenders will waive any failure to meet those requirements. A breach of any of these covenants or any other restrictive covenants contained in our Senior Secured Credit Facility would result in an event of default. An event of default could result in the holders of the affected indebtedness declaring all amounts outstanding, together with accrued interest, to be immediately due and payable. If we were unable to pay such amounts or secure new financing, Senior Secured Credit Facility lenders could proceed against the collateral pledged to them, which is a substantial portion of our assets.

Any impairment in the value of our intangible assets, including goodwill, would negatively affect our operating results and total capitalization.

Our total assets reflect substantial intangible assets, primarily goodwill. The goodwill results from our acquisitions and represents the excess of cost over the fair value of the identifiable net assets we acquired. We assess at least annually whether there has been any impairment in the value of our intangible assets. If future operating performance at one or more of our business units were to fall significantly below current levels, if competing or alternative technologies emerge, if market conditions for acquired businesses decline, if significant and prolonged negative industry or economic trends continue, if our stock price and market capitalization declines, or if future cash flow estimates decline, we could incur under current applicable accounting rules, a non-cash charge to operating earnings for goodwill impairment. Any determination requiring the write-off of a significant portion of unamortized intangible assets would negatively affect our results of operations and equity book value, the effect of which could be material.

Extended business interruption at our key facilities could have an adverse impact on operating results.

Our results of operations are dependent in large part upon our ability to produce and deliver products promptly upon receipt of orders. Our facilities in Germany, the United States, and Taiwan are critical to our business, and any damage to or other conditions significantly interfering with the operation of our facilities, such as an interruption of our supply lines or work stoppages, could have a material adverse effect on our business, financial condition and results of operations.

Failure of GTL to fully perform under the two-year cobalt supply agreement could have an adverse impact on us. We transferred our 55% equity interest in GTL to our joint venture partners as a part of the divestiture of the cobalt-based Advanced Materials business. Following the sale, to assist the buyer of the downstream business with the ownership transition, we act as an intermediary of cobalt supply between GTL and the Freeport joint venture under a two-year agreement subject to delivery of 7,000 MT of cobalt feed. If GTL fails to fully perform its obligations under that supply agreement we could be obligated to meet the supply requirements which would require us to incur additional costs and could have an adverse impact on our financial results.

Item 1B. Unresolved Staff Comments

None.

8

Table of Contents

Item 2. Properties

We believe that our plants and facilities, which are of varying ages and of different construction types, have been satisfactorily maintained, are suitable for our operations and generally provide sufficient capacity to meet the Company's production requirements.

The number, type, location and size of our properties as of December 31, 2013, by segment, are set forth below:

Segment	Number and Nature of Facilities				Square Footage (in thousands)	
	Manufacturing	Warehouse	Sales/Service	Owned	Leased	
Magnetic Technologies	6	6	15	1,966	332	
Specialty Chemicals	12	11	13	606	350	
Battery Technologies	7	8	9	408	126	

Segment	Locations				Leased Facilities Expiration Dates (years)	
	North America	Europe	Asia	Other	Minimum	Maximum
Magnetic Technologies	1	4	10	—	1	9
Specialty Chemicals	9	5	5	—	1	28
Battery Technologies	5	—	—	—	2	8

Item 3. Legal Proceedings

We are a party to various legal and administrative proceedings incidental to our business. We believe that disposition of all suits and claims related to our ordinary course of business should not in the aggregate have a material adverse effect on our financial position or results of operations.

Item 4. Mine Safety Disclosures

Not applicable.

Executive Officers of the Registrant

The information under this item is being furnished pursuant to Instruction 3 to Item 401(b) of Regulation S-K and General Instruction G of Form 10-K. Set forth below is the name, age, positions and offices held by each of our executive officers, as well as their business experience during the past five years. Dates indicate when the individual was named to or held the indicated position.

Joseph Scaminace - 60

Chairman and Chief Executive Officer (August 2005)

David B. Knowles - 53

President and Chief Operating Officer (April 2013)

Executive Vice President and Chief Operating Officer, Myers Industries, Inc. (June 2009 - March 2013)

Christopher M. Hix - 51

Vice President and Chief Financial Officer (January 2012)

Vice President and Chief Financial Officer, Robbins & Myers, Inc. (August 2006 - December 2011)

Valerie Gentile Sachs - 58

Vice President, General Counsel and Secretary (September 2005)

Gregory J. Griffith - 58

Vice President, Strategic Planning and Development (May 2012)

Vice President, Strategic Planning, Development and Investor Relations (February 2007)

Michael V. Johnson - 62

Vice President, Human Resources (November 2010)

Senior Vice President, Human Resources, FXI Foamex Innovations (January 2008 - October 2010)

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded on the New York Stock Exchange under the symbol "OMG". As of December 31, 2013, there were 922 record holders of our common stock. Please see Item 12 in this Form 10-K for information regarding our equity compensation plans.

The high and low market prices of our common stock for each quarter during the past two years are presented in the table below:

	2013			2012		
	Sales Price		Cash Dividend	Sales Price		Cash Dividend
	High	Low		High	Low	
First quarter	\$29.00	\$22.28	\$—	\$31.26	\$22.76	\$—
Second quarter	\$32.13	\$22.22	\$—	\$28.09	\$16.72	\$—
Third quarter	\$33.83	\$28.36	\$—	\$21.86	\$15.12	\$—
Fourth quarter	\$36.49	\$31.26	\$—	\$22.30	\$17.40	\$—

On February 11, 2014, our Board of Directors declared a dividend of \$0.075 per share payable on March 7, 2014 to the holders of record of all issued and outstanding shares of our Common Stock as of the close of business on February 24, 2014. This is the first quarterly dividend declared since 2002. Future payments of dividends will be based on factors such as our earnings, financial condition, debt covenant restrictions, and other factors as deemed appropriate by the Board. Our credit agreement includes certain covenants which restrict our payment of dividends generally to \$15,000,000 per year, so long as no potential default or event of default has occurred and is continuing at the time of declaration.

Comparison of Cumulative Total Shareholder Return(a)

(a) The chart above compares our cumulative total stockholder return to that of (1) the Standard & Poor's 500 index and (2) Russell 2000 index. In all cases, the information assumes \$100 invested at December 31, 2008, and is presented on a dividends-reinvested basis. The table does not forecast performance of our common stock.

Item 6. Selected Financial Data

	Year Ended December 31,				
	2013	2012	2011	2010	2009
(In millions, except per share data)					
Income Statement Data:					
Net sales	\$1,157.5	\$1,544.4	\$1,419.6	\$1,110.8	\$799.1
Amounts attributable to OM Group, Inc. common stockholders:					
Income (loss) from continuing operations before cumulative effect of change in accounting principle, net of tax	\$(71.7)	\$(38.3)	\$39.8	\$79.7	\$(3.0)
Income (loss) from discontinued operations, net of tax	(12.3)	(0.4)	2.2	3.6	(14.9)
Net income (loss)	\$(84.0)	\$(38.7)	\$42.0	\$83.3	\$(17.9)
Net income (loss) per common share attributable to OM Group, Inc. common stockholders — diluted:					
Continuing operations	\$(2.27)	\$(1.21)	\$1.28	\$2.61	\$(0.10)
Discontinued operations	(0.39)	(0.01)	0.07	0.12	(0.49)
Net income (loss)	\$(2.66)	\$(1.22)	\$1.35	\$2.73	\$(0.59)
Balance Sheet Data:					
Cash and cash equivalents	\$118.4	\$227.6	\$292.1	\$400.6	\$355.4
Total assets	\$1,783.1	\$2,499.4	\$2,873.8	\$1,772.7	\$1,441.1
Long-term debt, excluding current portion	—	454.1	\$663.2	\$90.0	\$—

Certain financial data may have been rounded. As a result of such rounding, the totals of data presented in this document may vary slightly from the actual arithmetical totals of such data. The results of our Ultra Pure Chemicals business are reported as discontinued operations in the table above.

Results for 2013 include a \$111.6 million loss on the divestiture of the Advanced Materials business within continuing operations and a \$9.8 million loss on the divestiture of the UPC business within discontinued operations.

Results for 2012 include \$55.9 million of charges related to VAC inventory purchase accounting step-up, \$2.5 million pre-tax pension settlement expense, \$2.9 million pre-tax gain recognized on the sale of property in China, \$6.5 million acceleration of deferred financing fees due to debt repayment and \$6.0 million pre-tax income from an acquisition escrow settlement. See note 3 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion.

Results for 2011 include \$111.2 million pre-tax of acquisition-related charges recorded in Magnetic Technologies, \$15.4 million of Corporate acquisition-related fees and a \$9.7 million pre-tax gain recognized from a property sale. Results for 2010 include a \$3.2 million pre-tax Battery Technology acquisition-related charge and \$2.2 million of pre-tax Corporate acquisition-related fees.

Results for 2009 include a \$37.5 million pre-tax goodwill impairment charge, a \$12.7 million pre-tax restructuring charge and a \$4.7 million pre-tax gain on termination of the retiree medical plan.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

(In millions, except as noted and share and per share amounts)

Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the consolidated financial statements and the notes thereto appearing elsewhere in this Annual Report.

Certain financial data may have been rounded. As a result of such rounding, the totals of data presented in this document may vary slightly from the actual arithmetical totals of such data.

Table of Contents

General

OM Group, Inc. (the “Company”, “we”, “our”, “us”) is a technology-driven industrial company serving attractive global markets, including automotive systems, electronic devices, aerospace and defense, industrial and renewable energy. We use innovative technologies to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product and application innovation and new market and customer development, to grow strategically through synergistic acquisitions, and to maximize total stockholder return through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value.

On March 29, 2013, we completed the divestiture of our cobalt-based Advanced Materials business. In connection with this transaction, we received net proceeds of \$329 million. As required by the Company's Senior Secured Credit agreement in place at the time, \$302 million of net proceeds received at closing were used, together with cash on hand, to repay approximately \$346 million of our Term B debt. A loss of \$112 million was recorded on the divestiture. The sale agreement for the downstream portion of the business also provides for potential future additional cash consideration of up to \$110 million based on the business achieving certain revenue targets over a period of three years. Using our projected trends of cobalt prices and volumes, it is not probable that the business will meet the revenue targets, and no value was assigned to the potential future cash consideration while calculating the loss on the divestiture or at December 31, 2013.

On May 31, 2013, we completed the divestiture of our Ultra Pure Chemicals (UPC) business for cash proceeds of \$63 million. The results of operations of the UPC business are reflected as discontinued operations in the accompanying unaudited condensed consolidated financial statements for all periods presented. A loss, net of tax, of \$9.8 million was recorded on the divestiture, which included a \$1.5 million gain on the sale of net assets offset by the realization of a loss in accumulated other comprehensive income of \$8.8 million, a \$1.5 million write-off of deferred financing fees related to the required debt pre-payment and transaction expenses of \$1.0 million. We used the proceeds of the UPC divestiture, along with cash on hand, to repay our remaining indebtedness.

We operate three strategic business platforms: Magnetic Technologies, Battery Technologies, and Specialty Chemicals. We also have limited continuing involvement in the Advanced Materials business through transition agreements with the buyer as described below. Further discussion of and financial information for these segments, including external sales, operating profit and total assets, is contained in Note 17 to the accompanying consolidated financial statements of this Annual Report on Form 10-K.

Magnetic Technologies

The Magnetic Technologies segment develops, manufactures and distributes differentiated, high-performance industrial-use magnetic materials and related products and systems with exceptional magnetic and/or physical properties for a wide array of end markets, including automotive systems, electrical installation technology, industrial, retail and renewable energy.

Battery Technologies

The Battery Technologies segment develops, manufactures and distributes specialty batteries, battery management systems, battery-related research and energetic devices for the defense, space, medical, commercial and grid energy storage markets.

Specialty Chemicals

The Specialty Chemicals segment develops, produces and supplies chemicals for electronic applications, industrial applications including coatings, composites and tire; and photomasks used by customers to produce semiconductors and related products.

Advanced Materials (divested)

As discussed above, on March 29, 2013, we exited this business. During 2012 and through the date of sale, this business manufactured inorganic products using unrefined cobalt and other metals, for the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets. It also had a 55% interest in GTL.

Following the sale, to assist in the transition of the downstream business, we entered into two agreements with the buyer pursuant to which: (1) we act as intermediary in a supply agreement between GTL and the buyer, in back-to-back arrangements for a period of at least two years, subject to delivery of 7,000 MT of cobalt feed, and extendable for up to an additional six months in order to deliver 7,000 MT of cobalt feed; and, (2) we served as the U.S. distributor

Table of Contents

for refined cobalt products in primarily back-to-back arrangements until December 31, 2013. These agreements result in minimal statement of operations or cash flow impact for us and will be reported in the Advanced Materials segment until both agreements expire or are terminated.

Executive Overview

During 2013, we divested our cobalt and UPC commodity businesses, achieved our cost reduction plan targets, repaid our outstanding indebtedness, and continued our initiatives to improve financial and operating performance, including developing and commercializing products to address new applications and markets. We also repurchased \$14.1 million of our common shares.

Consolidated net sales decreased by \$387.0 million in 2013 compared to a year ago, due primarily to the divestiture of the Advanced Materials business (\$280.8 million impact) and lower rare earth prices (\$113.3 million impact) in our Magnetic Technologies business, which are generally passed-through to customers in the business' selling prices. Excluding these two items, net sales increased 0.8% in 2013 compared to 2012, including \$16.0 million of translation benefit from a stronger Euro. Battery Technologies grew sales 5.1% due to higher sales into both defense and medical markets. Excluding the rare earth price impact and the translation benefit, sales in Magnetic Technologies were slightly lower than a year ago, due to macroeconomic weakness in Europe. Specialty Chemicals sales were down 1.6%, as weaker conditions impacting our advanced organics and photomasks product lines more than offset higher demand for our memory disk product line.

Excluding the impact of special items and the results of Advanced Materials in both years, adjusted operating profit was \$51.2 million in 2013 compared to \$44.4 million in 2012. A reconciliation of US GAAP to adjusted numbers is contained on pages 14 and 15. The increase in adjusted operating profit in 2013 was driven by cost-reduction actions, higher sales volumes in Battery Technologies, improved mix in Specialty Chemicals, insurance proceeds related to a closed Specialty Chemicals manufacturing site, and lower Corporate expenses, all partially offset by lower profitability in Magnetic Technologies due to rare earth price timing, which had a \$22 million favorable impact in 2012 compared to 2013.

Table of Contents

Consolidated Operating Results for 2013, 2012 and 2011

Set forth below is a summary of the Statements of Consolidated Operations for the years ended December 31,

	2013		2012		2011				
(percent of net sales)									
Net sales	\$1,157.5		\$1,544.4		\$1,419.6				
Cost of goods sold	899.1		1,300.8		1,178.7

Edgar Filing: OM GROUP INC - Form 10-K

Net income (loss)	\$(84.0)	\$(38.7)	\$42.0
-------------------	-----------	-----------	--------

In this report we provide adjusted operating profit (loss), adjusted EBITDA, and adjusted earnings per common share attributable to OM Group, Inc. common stockholders - assuming dilution, which are non-GAAP financial measures. The tables below present reconciliations of these amounts to the comparable US GAAP amounts. We believe that the non-GAAP financial measures presented in the tables facilitate a comparative assessment of the Company's operating performance and enhance investors' understanding of the performance of the Company's operations. The non-GAAP financial information set forth in the tables below are not alternatives to reported results determined in accordance with US GAAP.

Table of Contents

	2013

Weighted average shares outstanding - diluted		31.8		32.0		31.2

The 2013 charges related to our previously-announced, enterprise-wide cost-reduction initiatives include headcount reductions, minor facility consolidation, supply chain optimization, corporate cost reductions, and other structural changes to improve profitability. These actions had a benefit of \$17.3 million in 2013. In 2013, we incurred charges of \$9.7 million associated with these actions. Excluding these charges, as well as the results from the now-divested Advanced Materials and UPC businesses (UPC is included in discontinued operations), adjusted operating profit and adjusted EBITDA for the year ended December 31, 2013 were \$51.2 million and \$121.0 million, respectively.

Magnetic Technologies acquisition-related charges in 2012 totaled \$55.9 million (net of related tax benefit), representing the step-up value for inventory in purchase accounting that turned through cost of goods sold after the business was acquired. Other items impacting operating profit included a land sale gain of \$2.9 million (net of tax) in Specialty Chemicals, and expense of \$2.5 million (net of tax) related to a settlement charge associated with lump-sum cash settlements to certain participants in one of our U.S. defined benefit pension plans. Below operating profit, we recorded \$6.0 million (net of tax) of Other income for a fourth quarter 2012 receipt of cash from an escrow account related to the 2010 Battery Technologies acquisition, and recorded Interest expense of \$6.5 million (net of tax) in the second half of 2012 related to accelerated amortization of deferred financing fees as a result of early repayments of debt.

Corporate acquisition-related charges relate to professional fees in each year.

Table of Contents

2013 Compared with 2012

The following table identifies, by segment, the components of change in net sales and operating profit in 2013 compared with 2012:

	Net sales	Operating profit - as reported	Adjusted operating profit
2012	\$1,544.4	\$(4.7) \$50.8
Increase (decrease) in 2013 from:			
Magnetic Technologies	(109.0) 44.7	(10.7
Battery Technologies	7.3	2.3	3.0
Specialty Chemicals	(5.0) 1.3	5.3
Advanced Materials	(280.8) (6.9) 4.3
Corporate	—	4.4	(6.8
Intersegment items	0.6	—	4.9
2013	\$1,157.5	\$41.1	\$50.8

Net sales decreased \$387.0 million, or 25.1%, due primarily to the divestiture of the Advanced Materials business (\$280.8 million impact) and lower rare earth prices (\$113.3 million impact) in our Magnetic Technologies business, which are generally passed-through to customers in the business' selling prices. Excluding these two items, net sales increased 0.8% in 2013 compared to 2012, including \$16.0 million of translation benefit from a stronger Euro. Battery Technologies sales grew 5.1% due to higher sales into both defense and medical markets. Excluding the rare earth price impact and the translation benefit, sales in Magnetic Technologies were slightly lower than a year ago, due to macroeconomic weakness in Europe. Specialty Chemicals sales were down 1.6%, as weaker conditions impacting our advanced organics and photomasks product lines more than offset higher demand for our memory disk product line. Gross profit increased to \$258.4 million in 2013, compared with \$243.6 million in 2012. The largest factors affecting the \$14.9 million increase in gross profit were higher sales volumes in Battery Technologies and savings from cost reductions actions net of related charges. Gross profit in 2012 was negatively impacted by VAC purchase accounting step-up charges that did not repeat in 2013. Gross profit in 2012 benefited from the full year of Advanced Materials gross profit.

Selling, general and administrative expenses ("SG&A") decreased to \$217.3 million in 2013 compared with \$251.2 million in 2012 due primarily to the Advanced Materials divestiture.

The following table summarizes the components of Other expense, net:

	Year Ended December 31,		
	2013	2012	Change
Interest expense	\$(11.3) \$(43.2) \$31.9
Accelerated amortization of deferred financing fees	(1.0) (6.5) 5.5
Foreign exchange gain (loss)	8.0	(0.8) 8.8
Loss on divestiture of Advanced Materials	(111.6) —	(111.6
Other income (expense), net	12.0	6.6	5.4
	\$(103.9) \$(43.9) \$(60.0

The decrease in interest expense is due to lower debt outstanding in 2013 compared to 2012, as we repaid our debt in the first half of 2013. The foreign exchange gain in 2013 is primarily related to movements in Euro/U.S. dollar exchange rates and the resulting impact on the revaluation of non-functional currency cash and debt balances.

Other income in 2013 is primarily comprised of a \$13 million reduction of the contingent consideration liability associated with the 2011 acquisition of Rahu. Other income in 2012 relates primarily to a receipt of \$6 million from an escrow settlement related to the 2010 Battery Technologies acquisition.

We recorded income tax expense of \$10.7 million on pre-tax loss of \$62.8 million for 2013. The effective tax rate was impacted by the loss on the divestiture of Advanced Materials, which had no income tax benefit, and other special

items. Excluding these special items, our effective income tax rate would have been 25.6%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and our financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S.)

Table of Contents

with no corresponding tax benefit.

We recorded an income tax benefit of \$3.2 million on pre-tax loss of \$48.6 million for 2012. The effective tax rate was impacted by VAC purchase accounting related inventory charges of \$55.9 million, a tax expense of \$10.4 million related to GTL which included a \$5.6 million increase in the valuation allowance for prepaid tax asset and \$6.6 million for other GTL permanent differences.

Excluding the impact of VAC purchase accounting-related inventory charges and GTL discrete and permanent items, the effective tax rate for the year ended December 31, 2012 would have been 32%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and our financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S. and Germany) with no corresponding tax benefit.

The loss attributable to the noncontrolling interest was driven by losses at GTL in 2013 and 2012 resulting from the low cobalt price and electrical problems in the DRC that negatively impacted production.

2012 Compared with 2011

The following table identifies, by segment, the components of change in net sales in 2012 compared with 2011:

	Net sales	Operating profit (loss) - as reported	Adjusted operating profit	
2011	\$ 1,419.6	\$31.2	\$148.1	
Increase (decrease) in 2012 from:				
Magnetic Technologies	355.4	44.6	(10.7)
Battery Technologies	14.2	7.5	7.5	
Specialty Chemicals	(51.4) (22.5) (15.7)
Advanced Materials	(193.8) (74.8) (3.6)
Corporate	—	9.3	(74.8)
Intersegment items	0.5	—	—	
2012	\$ 1,544.5	\$(4.7) \$50.8	

Net sales increased \$124.9 million, or 8.8%, primarily due to the VAC acquisition in August 2011, for which 2012 includes a full twelve months of sales activity. Sales in Magnetic Technologies were bolstered in 2012 by the positive effects of rare-earth pricing, which drove results higher. As rare-earth pricing retreated throughout 2012, these pricing benefits trended downward and then were essentially absent by fourth quarter 2012. In Battery Technologies, the increase in sales in 2012 was due primarily to non-US defense sales, as well as higher volumes for medical applications. In Specialty Chemicals, sales were down primarily due to lower volumes, which were negatively impacted by the 2011 Thailand floods, a weak consumer electronics market and a weak European economy. In Advanced Materials, sales were negatively impacted by lower cobalt and copper prices compared to the prior year, as well as lower volumes due to weak economic conditions in Europe.

Gross profit increased slightly to \$243.6 million in 2012, compared with \$240.9 million in 2011. Excluding VAC inventory purchase accounting step-up charges, gross profit as a percentage of net sales was 19.4% in 2012 compared with 24.5% in 2011. The percentage is higher in 2011 due primarily to the rare-earth pricing benefits in 2011 and the LCM charges in 2012.

Selling, general and administrative expenses (“SG&A”) increased to \$251.2 million in 2012 compared with \$219.4 million in 2011. The increase was primarily due to a full 12 months of VAC results, partially offset by fees associated with acquisitions in 2011 of \$17.8 million. 2012 results also include a \$2.5 million settlement charge associated with lump-sum cash settlements to certain participants in a defined benefit pension plans. As a percentage of sales, SG&A increased to 16.3% in 2012 from 15.5% in 2011, primarily due to lower sales from businesses owned for all of 2011.

Table of Contents

	Year Ended December 31,		Change	
	2012	2011		
Interest expense	\$(43.2) \$(22.1) \$(21.1)
Accelerated amortization of deferred financing fees	(6.5) —	(6.5)
Interest income	—	—	—	
Foreign exchange gain (loss)	(0.8) 11.1	(11.9)
Other expense, net	6.6	6.4	0.2	
	\$(43.9) (4.6) \$(39.3)

The increase in interest expense is due to a full twelve months of borrowings and interest expense related to the VAC acquisition in August 2011. During 2012, we made accelerated principal payments of \$197.0 million on our Euro Term B Facility using cash on hand, and as a result recorded accelerated amortization of deferred financing fees of \$6.5 million. The foreign exchange loss in 2012 is primarily related to the impact on our net Euro debt position from the weakening of the USD against the Euro in 2012; the opposite occurred in 2011. Other income (expense), net in 2012 includes the \$6.0 million escrow receipt related to the Battery Technologies acquisition as described above.

We recorded an income tax benefit of \$3.2 million on pre-tax loss of \$48.6 million for 2012, resulting in an effective tax rate of 6.5%. The effective tax rate was impacted by VAC purchase accounting related inventory charges of \$55.9 million, a tax expense of \$10.4 million related to GTL which included a \$5.6 million increase in the valuation allowance for prepaid tax asset and \$6.6 million for other GTL permanent differences.

Excluding the impact of VAC purchase accounting related inventory charges and GTL discrete and permanent items, the effective tax rate for the year ended December 31, 2012 would have been 32%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and our financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S. and Germany) with no corresponding tax benefit.

We recorded an income tax benefit of \$17.9 million on pre-tax income \$26.6 million of for 2011. The income tax benefit was due to the VAC acquisition and discrete items. The largest discrete item in 2011 was related to GTL prepaid tax allowance reversal of \$6.2 million. Excluding the impact of the VAC acquisition and discrete items, the effective income tax rate for the year ended December 31, 2011 would have been 13%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., our financing structure and a tax holiday in Malaysia, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit. The Malaysian tax holiday expired on December 31, 2011.

Segment Results and Corporate Expenses

Magnetic Technologies

In 2013 this segment was focused on (1) developing new products and applications, including leveraging its substantial patent portfolio, know-how and expertise to enter new markets and increase market share, and (2) optimizing its cost structure for expected demand levels.

The primary raw materials used by Magnetic Technologies are nickel, cobalt and certain rare earth materials, primarily dysprosium and neodymium. Rare earth prices declined significantly throughout 2012 before moderating in the second half of 2013. Rare earth materials are currently available from a limited number of suppliers, primarily in China. The Company generally passes through rare earth prices to its customers in its selling prices, typically with a lag period.

For the year ended December 31,	2013	2012	2011	
Net sales	\$522.6	\$631.6	\$276.1	
Operating income (loss)	\$22.4	\$(22.3) \$(66.9)
Charges related to cost-reduction initiatives	5.4	—	—	

Edgar Filing: OM GROUP INC - Form 10-K

VAC inventory purchase accounting step-up and LCM charges	—	55.9	106.6
Acquisition-related charges	—	—	4.6
Adjusted operating profit	\$27.8	\$33.6	\$44.3

Table of Contents

Charges related to cost-reduction initiatives of \$5.4 million in 2013 relate to the cost reduction actions previously described. Acquisition-related charges in 2012 include \$55.9 million of charges as a result of purchase accounting for acquired inventory. As of December 31, 2012, all of the inventory step-up related to the 2011 acquisition has been charged to cost of goods sold. Acquisition-related charges in 2011 included \$106.6 million of inventory purchase accounting step-up charges, \$2.4 million of transaction fees and \$2.2 million of severance charges.

2013 Compared with 2012

The following table identifies the components of change in net sales and operating profit:

	Net sales	Operating profit	Adjusted operating profit
2012	\$631.6	\$(22.3)) \$33.6
Increase (decrease) in 2013 from:			
Purchase accounting charges in 2012	—	55.9	—
Volume/mix	(6.9)) 0.1	0.1
Selling price	(4.9)) (4.9)) (4.9)
Rare earth pricing effects	(113.3)) (22.4)) (22.4)
Operating expenses, including savings from cost-reduction initiatives	—	12.7	12.7
Charges related to cost-reduction initiatives	—	(5.4)) —
Foreign currency translation effect	16.1	0.4	0.4
Other	—	8.3	8.3
2013	\$522.6	\$22.4	\$27.8

Net sales decreased \$109.0 million, primarily due to lower rare earth prices in 2013 compared to 2012. As mentioned above, the Company generally passes through these raw material price changes to its customers in its selling prices, with a lag period. Volume declines are attributed to weaker macroeconomic conditions in certain markets, primarily in Europe.

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

	Net sales	Operating profit	Adjusted operating profit
2011	\$276.1	\$(66.9)) \$44.3
Increase (decrease) in 2012 from:			
Selling price/mix	(11.1)) (2.0)) (2.0)
Volume	(23.8)) (9.4)) (9.4)
Foreign currency	(17.0)) (1.6)) (1.6)
Rare earth pricing effects including LCM	—	(30.0)) (30.0)
PPA and other charges	—	102.7	102.7
Jan-July 2012 activity	407.4	(8.9)) (8.9)
Operating expenses	—	(6.3)) (6.3)
Other	—	0.1	0.1
2012	\$631.6	\$(22.3)) \$88.9

Net sales increased \$355.4 million, primarily due to the VAC acquisition in August 2011 for which 2012 includes a full 12 months of sales activity. Sales in Magnetic Technologies were bolstered in both 2011 and 2012 by the positive effects of rare-earth pricing, which drove results higher. As rare-earth pricing retreated throughout 2012, these pricing benefits trended downward and then were essentially absent by fourth quarter 2012, when we recorded a lower of cost or market charge, at year-end excluding purchase accounting impacts, of approximately \$18 million (in addition to a \$22 million lower of cost or market charge in the second quarter) to reflect market prices at year-end. In 2012 compared to 2011, volumes were lower due to lower demand caused primarily by the weaker European economy.

2012 sales were also impacted by the weaker Euro against the USD in 2012 versus the 2011 period.

Table of Contents

Operating profit in 2012 increased \$44.6 million when compared with 2011. Adjusting for the VAC inventory step-up and other acquisition-related charges, operating profit decreased by \$10.7 million. The decrease was driven by LCM charges in 2012; lower rare-earth pricing benefits in 2012 compared to 2011; lower volumes, as customer demand was negatively impacted by the weak European economy; and higher operating expenses. These factors were partially offset by a full twelve months of profit in 2012 compared to 2011.

Battery Technologies

In 2013 this segment was focused on (1) developing new specialty battery chemistries, products and applications, (2) expanding its served markets into new or emerging markets, including grid energy storage, commercial aerospace and oil and gas, and (3) reducing its cost structure in response to the uncertainty around government spending.

For the year ended December 31,

	2013	2012	2011
Net sales	\$150.3	\$143.0	\$128.8
Operating profit	\$21.8	\$19.6	\$12.1
Charges related to cost-reduction initiatives	0.8	—	—
Adjusted operating profit	\$22.6	\$19.6	\$12.1

The Battery Technologies segment tracks backlog, which is equal to the value of unfulfilled orders for which funding is contractually obligated by the customer and for which revenue has not been recognized. At December 31, 2013, backlog was \$135.2 million as compared with \$128.0 million at December 31, 2012. \$15.1 million of the backlog at December 31, 2013 is not expected to be converted into sales during 2014 but rather in years beyond 2014.

2013 Compared with 2012

The following table identifies the components of change in net sales and operating profit:

	Sales	Operating profit	Adjusted operating profit
2012	\$143.0	\$19.6	\$19.6
Increase (decrease) in 2013 from:			
Sales volume	7.1	2.1	2.1
Price/mix	0.1	1.9	1.9
Charges related to cost-reduction initiatives	—	(0.8)) -
Other	0.1	(1.0)) (1.0)
2013	\$150.3	\$21.8	\$22.6

Battery Technologies net sales increased in 2013 due to increased sales volumes, driven primarily by increased sales into defense, where the business benefited from customer spending on programs showing continued growth, and medical markets, benefiting from new customer device qualifications. Operating profit benefited from the higher volumes, as well as favorable mix.

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

	Sales	Operating profit	Adjusted operating profit
2011	\$128.8	\$12.1	\$12.1
Increase (decrease) in 2012 from:			
Sales volume	14.6	2.1	2.1
Price/mix	(0.4)) 3.6	3.6
Other	—	1.8	1.8

2012	\$143.0	\$19.6	\$19.6
------	---------	--------	--------

21

Table of Contents

Battery Technologies net sales increased in 2012 due to increased volume, driven by non-U.S. defense sales and higher medical sales. Operating profit benefited from higher volumes and favorable mix.
Specialty Chemicals

In 2013 this segment was focused on (1) utilizing its technology to provide solutions for electronic devices with increasing demanding performance specifications and miniaturization, (2) expanding into new geographies (3) optimizing its cost structure, and (4) streamlining its product portfolio.

For the year ended December 31,

	2013	2012	2011
Net sales	\$318.6	\$323.6	\$375.1
Operating profit (loss)	\$35.8	\$34.5	\$57.0
Charges related to cost-reduction initiatives	1.1	—	—
Gain on sale of property	—	(2.9)	(9.7)
Adjusted operating profit	\$36.9	\$31.6	\$47.3

2013 Compared with 2012

The following table identifies the components of change in net sales and operating profit:

	Sales	Operating profit	Adjusted operating profit
2012	\$323.6	\$34.5	\$31.6
Increase (decrease) in 2013 from:			
Volume	(3.4)	(2.6)	(2.6)
Selling price/mix	(4.3)	3.6	3.6
Foreign currency	1.8	0.2	0.2
Charges related to cost-reduction initiatives	—	(1.1)	—
Gain on sale of property	—	(2.9)	—
Other	0.9	4.1	4.1
2013	\$318.6	\$35.8	\$36.9

Sales declined in 2013 compared to a year ago, as weak economic conditions in Europe and pricing pressures in a competitive environment negatively impacted customer demand for our advanced organics and photomasks products. These decreases were partially offset by higher volumes and improved mix for the company's electronic chemicals products primarily in memory disk applications for mass data storage. The improved price/mix benefit is attributed to focused selling efforts to promote our highest performing products.

Excluding the 2012 land sale gain and charges in 2013 related to cost-reductions initiatives, adjusted operating profit in 2013 was \$5.3 million higher than in 2012, as favorable mix and increased demand in electronic chemicals more than offset weaker demand in the other product lines. In addition, the 2013 amount includes income from insurance proceeds for reimbursement of a portion of operating expenses incurred and paid in prior years for environmental matters associated with a site closure.

Table of Contents

2012 Compared with 2011

The following table identifies the components of change in net sales and operating profit:

	Sales	Operating profit	Adjusted operating profit
2011	\$375.1	\$57.0	\$47.3
Increase (decrease) in 2012 from:			
Volume	(39.5) (15.9) (15.9
Selling price/mix	(6.4) (2.9) (2.9
Foreign currency	(5.8) (0.2) (0.2
Gain on sale of property	—	(6.8) —
Other	0.2	3.3	3.3
2012	\$323.6	\$34.5	\$31.6

The sales and operating profit decrease in 2012 compared to 2011 was primarily due to decreased volume caused by weak economic conditions in Europe and continued weak consumer demand, particularly in electronics. Selling price/mix was negatively impacted by lower average selling prices in tire, coatings and chemicals markets as well as pricing pressures in the very competitive photomasks market. The segment also recorded a land sale gain in 2012 compared to 2011.

Advanced Materials

As discussed above, we divested this business as of March 29, 2013. Activity in this segment beginning in the second quarter of 2013 represents performance under the transition agreements described above, which resulted in a minimal impact on our operating profit and cash flows.

During 2012 and through the date of sale, this business manufactured inorganic products using unrefined cobalt and other metals for a range of end markets. It also had a 55% interest in GTL prior to March 29, 2013.

For the year ended December 31,

	2013	2012	2011
Net sales	\$166.3	\$447.0	\$640.9
Operating profit	\$(0.4) \$6.4	\$81.2

Corporate Expenses

Corporate expenses consist of corporate overhead supporting the operating segments but not specifically allocated to an operating segment, including certain legal, finance, human resources and strategic development activities, as well as all share-based compensation across the enterprise.

2013 Compared with 2012

Corporate expenses were \$38.5 million in 2013 compared with \$42.9 million in 2012. Corporate expenses were lower in 2013 due to a \$2.5 million settlement charge in 2012 associated with 2012 lump-sum cash settlements to certain participants in one of our U.S. defined benefit pension plans, lower incentive compensation expense and lower professional services fees in 2013 and the benefit of Corporate cost-reduction initiatives in the current year.

2012 Compared with 2011

Corporate expenses were \$42.9 million in 2012 compared with \$52.2 million in 2011. Corporate expenses in 2012 include a \$2.5 million settlement charge associated with lump-sum cash settlements to certain participants in one of our U.S. defined benefit pension plans. 2011 corporate expenses include \$15.4 million in fees related to the VAC acquisition. Excluding these special items, Corporate expenses in 2012 were higher primarily due to fees associated with exiting the Advanced Materials business.

Table of Contents

Liquidity and Capital Resources

Cash Flow Summary

Our cash flows from operating, investing and financing activities for 2013, 2012 and 2011, as reflected in the Statements of Consolidated Cash Flows, are summarized and discussed in the following tables and related narrative:

	2013	2012	2011
Net cash provided by (used for):			
Operating activities	62.9	209.5	120.6
Investing activities	310.9	(56.5)	(773.0)
Financing activities	(480.7)	(213.8)	548.0
Effect of exchange rate changes on cash	0.6	1.4	(2.0)
Increase (decrease) in cash from continuing operations	\$(106.3)	\$(59.4)	\$(106.4)

Operating Activities

In 2013, net cash flow from operating activities was \$62.9 million million compared with a cash inflow of \$209.5 million million in the prior year. The cash flows from operating activities can fluctuate significantly from period-to-period due to profitability, working capital changes and the timing of payments for items such as income taxes, pensions and other items which impact reported cash flows. The amount in 2012 benefited from declining commodity prices in the Advanced Materials business.

In 2012, net cash flow from operations was higher than 2011, benefiting from improvements in the principal element of working capital (inventory, accounts receivable, accounts payable) that contributed positive cash flow of \$70.9 million, and from the receipt of a \$37.9 million tax refund in the fourth quarter of 2012.

Investing Activities

In 2013, net cash provided by investing activities in 2013 included net proceeds of \$392.0 million from the divestitures of the Advanced Materials and UPC businesses, less capital expenditures of \$53.1 million primarily to expand capacity; to maintain and improve throughput; for compliance with environmental, health and safety regulations; and for other fixed asset additions at existing facilities. In August 2013 we remitted a payment of \$23.0 million to the seller of VAC. We remain in discussions with the seller regarding the remainder of the withheld consideration.

In 2012, net cash used in investing activities included capital expenditures of \$67.6 million primarily to expand capacity, improve productivity, comply with regulations and sustain operations.

In 2011, net cash used in investing activities included \$725.3 million for the VAC (\$686.2 million) and Rahu (\$39.1 million) acquisitions, and capital expenditures of \$50.3 million primarily to support growth and productivity programs and for sustaining operations. Investing cash flows also included proceeds of \$9.7 million from the sale of land at the former Manchester, England manufacturing facility.

Financing Activities

The increase in cash used in financing activities in 2013 compared to 2012 was primarily due to prepayment of long-term debt from funds received when we divested our Advanced Materials and UPC businesses, additional pre-payment of long-term debt utilizing cash on hand and repurchases of common stock.

Net cash used in financing activities in 2012 included \$213.5 million of debt repayments.

Net cash provided by financing activities in 2011 included borrowings of \$698 million to fund the VAC acquisition and repay the Company's former revolving credit line.

Financial Condition

Cash balances are held in numerous locations throughout the world. As of December 31, 2013, most of our cash and cash equivalents were held outside the United States, primarily in Germany. Most of the amounts held outside the U.S. could be repatriated to the U.S. but, under current law, would be subject to U.S. income taxes, less applicable foreign tax credits. Our intent is to retain the majority of our cash balances where generated and to meet U.S. liquidity needs through cash generated from operations in the U.S., limited repatriation of foreign earnings, and external borrowings. We expect our available cash, 2014 operating cash flows and availability under our credit facility described below to be adequate to fund 2014 operating needs and capital expenditures.

Table of Contents

Debt and Other Financing Activities

On September 4, 2013 we entered into a new five-year Senior Secured Revolving Credit Facility (“the Facility”), and terminated our previous credit facility dated August 2, 2011 that was scheduled to expire in August 2016. The Facility provides for \$350 million of revolving borrowing capacity and includes an expansion option of up to an additional \$150 million, subject to certain conditions. The borrowers under the agreement are the Company, Harko C.V. (“Harko”), a limited partnership organized under the laws of the Netherlands, and VAC Germany GmbH (“VAC”), a limited liability company under the laws of Germany. Harko and VAC are wholly-owned subsidiaries of the Company. The Facility matures on September 4, 2018. In the first six months of 2013 we repaid the Term A and Term B loans under the previous credit facility with the proceeds from the divestitures of the Advanced Materials and UPC businesses, as required, and cash on hand. See Note 7 in the Notes to Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of the Facility.

Pension Plans

As a result of the VAC acquisition, we hold pension obligations of \$182.7 million as of December 31, 2013, substantially all of which are unfunded. VAC sponsors various defined benefit plans for its employees, including pension, early retirement benefits and anniversary benefits, mainly in Germany. As a result of the EaglePicher acquisition, we assumed the EaglePicher defined benefit pension obligations, made up of two frozen and two active, partially-funded defined benefit pension plans. Certain non-U.S. employees are covered under other defined benefit plans. See Critical Accounting Policies below and Note 11 in the Notes to Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of our pension plans.

Contractual Obligations

We have entered into contracts with various third parties in the normal course of business that will require future payments. The following table summarizes our contractual cash obligations and their expected maturities at December 31, 2013.

	Payments due by period						Total
	2014	2015	2016	2017	2018	Thereafter	
Purchase and other obligations(1)	\$235.5	\$4.9	\$1.4	\$1.4	\$1.0	\$1.0	\$245.2
Capital lease obligations (principal and interest)	0.7	0.7	0.7	0.6	0.4	1.0	4.1
Operating lease obligations	6.1	5.7	3.9	3.5	2.8	10.2	32.2
Total	\$242.3	\$11.3	\$6.0	\$5.5	\$4.2	\$12.2	\$281.5

For 2014 through 2018, purchase obligations include raw material contractual obligations reflecting estimated future payments based on committed tons of material per the applicable contract multiplied by the reference price (1) of each metal. The price used in the computation is the average price for the month of December 2013 for each respective metal. Commitments made under these contracts represent future purchases in line with expected usage. Not included in the table above is \$63.8 million of the VAC purchase price we withheld to fund indemnification claims, if any. See Note 5 to the Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of the amount withheld.

Pension funding can vary significantly each year due to changes in the market value of plan assets, legislation and our funding decisions to contribute any excess above the minimum legislative funding requirements. As a result, pension funding has not been included in the table above. We expect to contribute \$1.1 million to our U.S. pension plans in 2014. Pension benefit payments for the U.S. pension plans are made from assets of the pension plans. We expect to make annual benefit payments of approximately \$10.8 million related to our non-U.S. pension plans in 2014.

At December 31, 2013, the liability for uncertain tax positions includes \$0.3 million for which it is reasonably possible the uncertainty will be resolved within the next twelve months. We are not able to reasonably estimate the

period in which cash outflows related to the remaining \$15.4 million of uncertain tax positions could occur, if at all. See Note 10 to the Consolidated Financial Statements included in Item 8 of this Form 10-K for further discussion of our uncertain tax positions.

Off Balance Sheet Arrangements

25

Table of Contents

We have not entered into any off balance sheet financing arrangements, other than operating leases, which are disclosed in the contractual obligations table above and in Note 16 to the Consolidated Financial Statements included in Item 8 of this Form 10-K.

Critical Accounting Policies

The preparation of these financial statements in conformity with US generally accepted accounting principles ("US GAAP") requires our management to make its best estimates, judgments and assumptions of certain amounts included in the financial statements related to the critical accounting policies described below. Actual results could differ from our estimates. In addition, other companies may utilize different estimates, which may impact the comparability of our results of operations to similar businesses.

Revenue Recognition — Revenues are recognized when the revenue is realized or realizable, and has been earned, in accordance with the U.S. Securities and Exchange Commission's Staff Accounting Bulletin No. 104, "Revenue Recognition". The majority of our sales are product sales, which are recognized when persuasive evidence of an arrangement exists, unaffiliated customers take title and assume risk of loss, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Revenue recognition generally occurs upon shipment of product or usage of consignment inventory. Freight costs and any directly related associated costs of transporting finished product to customers are recorded as Cost of goods sold.

The Battery Technologies segment uses the percentage-of-completion method to recognize the majority of its revenue. See Note 1 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion on revenue recognized under the percentage of completion method.

Inventories — Magnetic Technologies' inventories are valued using the average cost method. Cost of sales, under the average cost method, represents the weighted average cost of the items sold. We believe the average cost method provides for a better matching of inventory costs with related sales, based on Magnetic Technologies' manufacturing process. The remaining inventory held is valued using the first-in, first-out ("FIFO") method. Inventory accounted for under the percentage-of-completion method is included in work-in-process inventory and represents accumulated contract costs less the portion of such costs allocated to delivered units. The costs attributed to units delivered are based on the estimated average cost of all units expected to be produced on a contract-by-contract basis.

We evaluate the need for a lower of cost or market ("LCM") adjustment to inventories based on the selling prices of our finished products. Changes in the price of rare earth and other materials can have a significant impact on inventory valuation. Declines in the selling prices of finished goods due to decreases in the market price of raw materials or other factors can result in the inventory carrying value being written down to a lower market value.

As part of the allocation of the purchase price of VAC to the acquired assets and liabilities assumed, we recorded a step-up of inventory to its estimated fair value on the August 2, 2011 date of acquisition, as required under purchase accounting. Acquired inventory with a book value of \$194.7 million on the date of acquisition was estimated to have a fair value of \$362.8 million. This step-up was fully turned through Cost of goods sold as of December 31, 2012. See Note 3 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion on the VAC inventory step-up.

Notes Receivable from Joint Venture Partner — In years prior to 2009, we refinanced the capital contribution for a GTL joint venture partner. On March 29, 2013 we transferred our equity interests in GTL as part of the divestiture of the Advanced Materials business. We fully reserved the note receivable balance and recorded the \$16 million charge within the loss on the sale of the Advanced Material business.

GTL Prepaid Taxes — At December 31, 2012, GTL had a prepaid tax asset of \$2.0 million, net of valuation allowances of \$11.3 million. We transferred our equity interests in GTL as part of the divestiture of the Advanced Materials business See Note 10 in our Consolidated Financial Statement included in Item 8 of this Form 10-K for a more complete discussion of income taxes.

Goodwill — We had goodwill of \$432.7 million and \$528.3 million at December 31, 2013 and 2012, respectively. We test goodwill for impairment annually and more often if indicators of impairment exist. Our reporting units have been determined to be our reportable segments or one level below the reportable segments in certain instances.

We conduct our annual goodwill impairment test as of October 1. The results of the testing as of October 1, 2013 and 2012 confirmed the fair value of each of the reporting units exceeded its carrying value and therefore no impairment loss was required to be recognized for the years end December 31, 2013 and December 31, 2012.

Table of Contents

We estimated the fair value of the reporting units utilizing a discounted cash flow valuation technique (“DCF”). We selected DCF as we believe it is comparable to what would be used by market participants to estimate its fair value. The impairment test incorporates our judgment and estimates of future cash flows, future growth rates, terminal value amounts, allocations of certain assets, liabilities and cash flows among reporting units, and the applicable weighted-average cost of capital used to discount those estimated cash flows. The estimates and projections used in the estimate of fair value are consistent with our current budget and long-range plans, including anticipated changes in market conditions, industry trends, growth rates, and planned capital expenditures, among other considerations. See Note 6 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of goodwill.

Other Intangible Assets — Intangible assets consist of (i) definite-lived assets subject to amortization and (ii) indefinite-lived intangible assets not subject to amortization. At December 31, 2013, we had definite-lived intangible assets of \$288.9 million and indefinite-lived intangible assets of \$114.1 million. Definite-lived intangible assets consist principally of customer relationships, know-how, developed technology and capitalized software and are being amortized using the straight-line or other appropriate methods if applicable. Indefinite-lived intangible assets consist of trade names. The carrying value of indefinite-lived intangible assets are also evaluated for impairment annually as of October 1 and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The definite-lived intangible asset would be considered impaired if the future net undiscounted cash flows generated by the asset are less than its carrying value. The results of the testing as of October 1, 2013 and 2012 confirmed the fair value of each of the reporting units exceeded its carrying value and therefore no impairment loss was required to be recognized. See Note 6 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of other intangible assets.

Pension Plans — Our long-term pension obligations as of December 31, 2013 amounted to \$220.5 million. In addition, we have an unfunded obligation to our former chief executive officer in settlement of an unfunded supplemental executive retirement plan (“SERP”). See Note 11 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of our defined benefit pension obligations. Calculations of the amount of defined benefit pension expense and obligations depend on the assumptions used in the actuarial valuations including the discount rate used in calculating the present value of benefits, the expected long-term rate of return on defined benefit plan assets, and the rate of compensation increase. Changes in key economic indicators can result in changes in the assumptions we use. While we believe that the assumptions used in calculating our defined benefit pension expense and obligations are appropriate, differences in actual experience or changes in the assumptions may affect our results of operations or financial position.

For the VAC defined benefit pension obligations, we used a weighted average discount rate of 3.5% in computing the amount of the defined benefit pension obligations to be recorded at December 31, 2013. A 25 basis point reduction in the discount rate used for the plans would have increased the net obligation by \$4.0 million from the amount recorded in the financial statements at December 31, 2013.

For the EaglePicher defined benefit pension obligations, we used a weighted average discount rate of 4.6% and 4.4% for the two active and two frozen EaglePicher plans, respectively, in computing the amount of the defined benefit pension obligations to be recorded at December 31, 2013. A 25 basis point reduction in the discount rate used for the plans would have increased the net obligation related to the four EaglePicher plans by \$5.5 million from the amount recorded in the financial statements at December 31, 2013.

Defined benefit pension plan assets consist primarily of publicly traded stocks and government and corporate bonds. See Note 11 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of pension plans.

There is no guarantee the actual return on the plans' assets will equal the expected long-term rate of return on plan assets or that the plans will not incur investment losses. For 2013, the expected long-term rate of return assumptions

applicable to assets held in the four EaglePicher plans offsetting the obligation was an estimated 6.5% for the two active and two frozen plans. These expected rates of return reflect the asset allocation of the plans and the expected long-term returns on equity and debt investments included in plan assets. If the expected long-term rates of return on plan assets in the four EaglePicher plans were reduced by 0.5%, pension expense for 2013 would have increased by \$0.8 million.

Table of Contents

Income Taxes — Significant judgment is required in determining our income tax expense and in evaluating tax positions. Deferred income tax assets and liabilities have been recorded for the differences between the financial accounting and income tax basis of assets and liabilities. When we determine, based on all available evidence, that it is more likely than not that deferred tax assets will not be realized, a valuation allowance is established. We assess our income tax positions and record accruals when we determine that a position is more likely than not to be unsustainable. The ultimate resolution of these events could result in adjustments to our financial statements and such adjustments could be material. We believe the current assumptions, judgments and other considerations used to estimate the current year accrued and deferred tax positions are appropriate. If the actual outcome of future tax consequences differs from these estimates and assumptions, due to changes or future events, the resulting change to the provision for income taxes could have a material impact on our results of operations and financial position. We review our tax positions on a regular basis and adjust the balances as new information becomes available. See Note 10 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of income taxes.

Share-Based Compensation — We use a Black-Scholes option pricing model to calculate the fair value of our stock options. The fair value of time-based and performance-based restricted stock grants is calculated based upon the market value of an unrestricted share of our common stock at the date of grant. The performance-based restricted stock vests solely upon our achievement of specific measurable performance objectives over a three-year performance period, and the related compensation expense is based upon current performance projections. See Note 14 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for a more complete discussion of share-based compensation. This requires the use of assumptions, including estimating the length of time employees will retain their vested stock options before exercising and the volatility of the our common stock price. Expected stock price volatility is based on historical volatility of our stock price. Changes in these assumptions may result in a material change to the fair value calculation of share-based awards.

Acquisitions - The allocation of the purchase price to the tangible assets and liabilities and identifiable intangible assets acquired requires management to make significant estimates in determining the fair values of assets acquired and liabilities assumed, especially with respect to intangible assets in the VAC, Rahu, and EaglePicher acquisitions; inventory in the VAC acquisition; and the contingent consideration in the Rahu acquisition. These estimates are based on historical experience, information obtained from management of the acquired companies, and future volume forecasts with respect to the contingent consideration. These estimates are dependent on assumptions that are difficult to predict, and if different estimates were used, the purchase price for the acquisition may have been allocated to the acquired assets differently from the current allocation. Although we believe the assumptions, judgments and estimates used are reasonable and appropriate, different assumptions, judgments and estimates could materially affect the value ascribed to an acquired asset and, potentially, our results of operations and financial position if impairment charges were required to be recorded.

Recently Issued Accounting Standards

See Note 2 in our Consolidated Financial Statements included in Item 8 of this Form 10-K for recently issued accounting standards and the effects, in any, on our financial statements.

Effects of Foreign Currency

See Item 7A for a discussion of our foreign currency effects and related risks.

Environmental Matters

We are subject to a wide variety of environmental laws and regulations in the United States and in other countries as a result of our operations and use of certain substances that are, or have been, used, produced or discharged by our plants. In addition, soil and/or groundwater contamination presently exists and may in the future be discovered at levels that require remediation under environmental laws at properties we now or previously owned, operated or used. Due to the ongoing development and understanding of facts and remedial options and due to the possibility of unanticipated regulatory developments, the amount and timing of future environmental expenditures could vary significantly. Although it is difficult to quantify the potential impact of compliance with or liability under

environmental protection laws, based on presently available information, we believe that our ultimate aggregate cost of environmental remediation as well as liability under environmental protection laws will not result in a material adverse effect upon our financial condition or results of operations.

See Item I of this Annual Report on Form 10-K for further discussion of these matters.

Cautionary Statement for “Safe Harbor” Purposes under the Private Securities Litigation Reform Act of 1995
The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by or on behalf of the Company. This report contains statements that we believe may be “forward-looking statements” within the meaning of Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are not historical facts and generally can be identified by use of statements that include words such as “believe,” “expect,” “anticipate,” “intend,” “plan,” “foresee” or other words or phrases of similar import. Similarly, statements that describe our business objectives, plans or goals also are forward-looking statements. These forward-looking statements are based upon specific assumptions and are subject to uncertainties and factors relating to the company's operations and business environment, all of which are difficult to predict and many of which are beyond our control. These uncertainties and factors could cause actual results of the company to differ materially from those expressed or implied in the forward-looking statements. We undertake no obligation to publicly revise these forward-looking statements to reflect events or circumstances that arise after the date hereof. Significant factors affecting these expectations are set forth under Item 1A — Risk Factors in this Annual Report on Form 10-K.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Quantitative and Qualitative Disclosures about Market Risk

As a result of our global operating and financing activities, we are exposed to changes in raw material prices, interest rates and foreign currency exchange rates, which may have a material adverse effect on our business, financial condition and results of operation. In seeking to minimize the risks and/or costs associated with such activities, we manage exposures to changes in raw material prices, interest rates and foreign currency exchange rates through our regular operating and financing activities, which may include the use of derivative instruments. By using derivative instruments to hedge exposures to changes commodity prices, foreign exchange rates and interest rates, we become exposed to market risk. Market risk is the change in value of a derivative instrument that results from a change in material prices or interest rates. The market risk associated with raw material prices and interest is managed by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken.

Raw Material Price Risk

The primary raw materials used by Magnetic Technologies are nickel, cobalt and certain rare earth materials, mostly dysprosium and neodymium. The cost of raw materials fluctuates due to changes in the reference prices (rare earths), actual or perceived changes in supply and demand of raw materials and changes in availability from suppliers. Fluctuations in the price of rare earth materials and other raw materials have been significant in the past and we believe price fluctuations could occur in the future.

We attempt to mitigate increases in raw material prices by passing through such increases to our customers in the prices of our products and, when possible, by entering into sales contracts that contain variable pricing that adjusts based on changes in the price of certain raw materials. During periods of rapidly changing metal prices there may be price lags that can positively or negatively impact the short-term profitability and cash flow from operations of the Company. Declines in the selling prices of our finished goods, which can result from decreases in the market price of raw materials or other factors, can result in our inventory carrying value being written down to a lower market value.

From time to time we employ derivative instruments in connection with certain purchases and sales of nickel in order to establish a fixed margin and mitigate the risk of price volatility. This hedging limits our ability to participate in gains from favorable commodity price fluctuations and it limits the risk of loss from adverse commodity price fluctuations.

Interest Rate Risk

We are exposed to interest rate risk primarily through our borrowing activities. There is an inherent rollover risk for borrowings as they mature and are renewed at current market rates. The extent of this risk is not quantifiable or predictable because of the variability of future interest rates and business financing requirements (see Note 7 to the consolidated financial statements contained in Item 8 of this Annual Report).

From time-to-time, we enter into derivative instruments and hedging activities to manage interest rate risk related to borrowings. We use interest rate swap agreements to partially reduce risks related to floating rate financing agreements that are subject to changes in the market rate of interest. Terms of the interest rate swap agreements require us to receive a variable interest rate and pay a fixed interest rate. Our interest rate swap agreements and our variable rate financings were based upon the three-month LIBOR. We had an interest rate swap with notional values that totaled \$115 million at December 31, 2012. The outstanding contracts as of December 31, 2012 had maturities ranging up to 12 months. We had no outstanding borrowings under our credit facility as of December 31, 2013.

Foreign Currency Exchange Rate Risk

We manufacture and sell our products worldwide. Prices of certain raw materials, non-U.S. operating expenses and income taxes are denominated in local currencies. As such, the results of operations are subject to the variability that arises from exchange rate movements (particularly the Euro). In addition, fluctuations in exchange rates may affect product demand and profitability in U.S. dollars of products we provide in foreign markets in cases where payments for our products are made in local currency. Accordingly, fluctuations in currency prices affect the Company's operating results. The primary currencies for which we have foreign currency rate exposure are the European Union Euro, Taiwanese Dollar, Malaysian Ringgit, Singapore Dollar, British Pound Sterling, Japanese Yen, Congolese Franc, Chinese Renminbi and the Canadian Dollar.

Credit Risk

The use of derivative instruments to hedge exposures to changes in commodity prices, foreign exchange rates and interest rates exposes us to credit risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes us, which creates credit risk for us. To mitigate credit risk, it is our policy to execute such instruments with creditworthy banks and not enter into derivative instruments for speculative purposes. There were no counterparty defaults during the years ended December 31, 2013, 2012 and 2011.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of OM Group, Inc. and subsidiaries

We have audited the accompanying consolidated balance sheets of OM Group, Inc. and subsidiaries as of December 31, 2013 and 2012, and the related statements of consolidated operations, consolidated comprehensive loss, consolidated total equity, and consolidated cash flows for each of the three years in the period ended December 31, 2013. Our audits also included the financial statement schedule listed in the index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of OM Group, Inc. and subsidiaries at December 31, 2013 and 2012, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2013, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), OM Group, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (1992 framework) and our report dated February 26, 2014, expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of OM Group, Inc. and subsidiaries

We have audited OM Group, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission "(1992 framework)" (the COSO criteria). OM Group, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, OM Group, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2013 and 2012, and the related statements of consolidated operations, consolidated comprehensive loss, consolidated total equity, and consolidated cash flows for each of the three years in the period ended December 31, 2013 of OM Group, Inc. and subsidiaries and our report dated February 26, 2014 expressed an unqualified opinion thereon.

Notes to Consolidated Financial Statements

OM Group, Inc. and Subsidiaries

(In millions, except as noted and share and per share amounts)

Note 1 — Significant Accounting Policies

Principles of Consolidation — OM Group, Inc. ("OM Group", the "Company", "we", "our", "us") is a technology-based industrial growth company serving attractive global markets, including automotive systems, electronic devices, aerospace, industrial and renewable energy. We use innovative technologies to address customers' complex applications and demanding requirements. Our strategy is to grow organically through product innovation and new market and customer development; to grow strategically through synergistic acquisitions; and to maximize total stockholder return through a combination of business growth, financial discipline, optimal deployment of capital and continued operational excellence. Our objective is to deliver sustainable, profitable growth and create long-term stockholder value. The consolidated financial statements include the accounts of OM Group and its consolidated subsidiaries. We were formed in 1991 as a Delaware Corporation. Intercompany accounts and transactions have been eliminated in consolidation.

Certain financial data may have been rounded. As a result of such rounding, the totals of data presented in this document may vary slightly from the actual arithmetical totals of such data.

On May 31, 2013 we completed the sale of our Ultra Pure Chemicals business. The results of our Ultra Pure Chemicals business are reported as discontinued operations in the accompanying unaudited condensed consolidated financial statements and Notes to Consolidated Financial Statements for all periods presented. See note 5 - Acquisitions and Divestitures.

On March 29, 2013, we completed the divestiture of our cobalt-based business. The transaction comprised the sale of the downstream portion of the business, (including its cobalt refinery assets in Kokkola, Finland) and the transfer of our 55% equity interests in the DRC-based joint venture known as GTL to the joint venture partners, subject to a security interest in favor of OM Group with respect to the joint venture's performance related to certain supply agreements. Until March 29, 2013, we consolidated the GTL joint venture because we had a controlling interest. Non-controlling interest was recorded for the remaining 45% interest. See note 5 - Acquisitions and Divestitures.

On December 22, 2011, the Company completed the acquisition of Rahu Catalytics Limited ("Rahu"), which is included in the Company's Specialty Chemicals segment.

On August 2, 2011, the Company completed the acquisition of VAC Holding GmbH "VAC". The Company's Magnetic Technologies segment consists of VAC.

The financial position, results of operations and cash flows of acquisitions are included in the Consolidated Financial Statements from the dates of acquisition.

Unless otherwise indicated, all disclosures and amounts in the Notes to Consolidated Financial Statements relate to the Company's continuing operations.

Equity Investment - In the fourth quarter of 2012, we changed from the cost method to the equity method of accounting for Magnetic Technologies investment in China due to changes in our management and the strategic nature of the operation that allowed us to exercise significant influence. Accordingly, the results of operations and retained earnings reflect this treatment for all periods presented since August 2011 in which the investment was acquired.

Use of Estimates — The preparation of financial statements, in conformity with US generally accepted accounting policies ("US GAAP"), requires management to make estimates and assumptions in certain circumstances that affect the amounts reported in the accompanying consolidated financial statements and notes. Actual results could differ

from these estimates.

Cash Equivalents — All highly-liquid investments, with a maturity of three months or less when purchased, are considered to be cash equivalents.

Allowance for Doubtful Accounts — We have recorded an allowance for doubtful accounts to record accounts receivable at their estimated net realizable value. The allowance is based upon an analysis of historical bad debts, a review of the aging of accounts receivable and the current creditworthiness of customers. Accounts are written off against the

37

Table of Contents

allowance when it becomes probable that collections will not occur. Trade credit is generally extended on a short-term basis and accounts receivable generally do not bear interest.

Inventories - Magnetic Technologies' inventories are valued using the average cost method. Cost of sales under the average cost method represents the weighted average cost of the items sold. We believe the average cost method provides for a better matching of inventory costs with related sales based on Magnetic Technologies' manufacturing process. Our remaining inventory is valued using First in, First out (FIFO). Inventory costs include raw materials, labor and manufacturing overhead. Inventory accounted for under the percentage-of-completion method is included in work-in-process inventory and represents accumulated contract costs less the portion of such costs allocated to delivered units. The costs attributed to units delivered are based on the estimated average cost of all units expected to be produced on a contract-by-contract basis.

Changes in the price of rare earth and other materials can have a significant impact on inventory valuation. We evaluate the need for a lower of cost or market ("LCM") adjustment to inventories based on the selling prices of our finished products generally at the end of the period. To the extent raw material prices increase subsequent to the balance sheet date, we consider these price movements in our LCM evaluation. Declines in the selling prices of our finished goods, which can result from decreases in the market price of raw materials or other factors, can result in our inventory carrying value being written down to a lower market value.

Property, Plant and Equipment - Property, plant and equipment is recorded at historical cost less accumulated depreciation. Depreciation of plant and equipment, including assets recorded under capital leases, is provided by the straight-line method over the useful lives of 5 to 25 years for land improvements, 5 to 40 years for buildings and improvements, 5 to 15 years for machinery and equipment (with the majority in the range of 5 to 10 years), 5 to 10 years for furniture and fixtures and 3 to 5 years for vehicles and computers and related equipment. Leasehold improvements are depreciated over the shorter of the estimated useful life or the term of the lease.

Long-lived Assets other than Goodwill - Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount may not be recoverable. Events or circumstances that would result in an impairment review primarily include operating losses, a significant change in the use of an asset, or the planned disposal or sale of the asset. The asset would be considered impaired when the future net undiscounted cash flows generated by the asset are less than its carrying value. An impairment loss would be recognized based on the amount by which the carrying value of the asset exceeds its estimated fair value.

Goodwill and Intangible Assets - We evaluate the carrying value of goodwill and indefinite-lived intangible assets for impairment annually as of October 1 and between annual evaluations if changes in circumstances or the occurrence of certain events indicate potential impairment. If the carrying value of goodwill or an indefinite-lived intangible asset exceeds its fair value, an impairment loss is recognized.

Intangible assets consist of (i) definite-lived assets subject to amortization and (ii) indefinite-lived intangible assets not subject to amortization. Definite-lived intangible assets consist principally of customer relationships, developed technology, know-how, capitalized software and license agreements and are being amortized using the straight-line or other appropriate method, if applicable. Indefinite-lived intangible assets consist of trade names.

Retained Liabilities of Businesses Sold - Retained liabilities of businesses sold include obligations related to our former Precious Metals Group ("PMG"), which was sold in 2003. Under terms of the sale agreement, we will reimburse the buyer of this business for certain items that become due and payable by the buyer subsequent to the sale date. Such items are principally comprised of taxes payable related to periods during which we owned PMG. The net liability was \$9.0 million and \$8.2 million as of December 31, 2013 and December 31, 2012, respectively.

Revenue Recognition — Except for revenue recognized under the percentage of completion method of accounting in Battery Technologies (see discussion below), we recognize revenue when persuasive evidence of an arrangement exists, unaffiliated customers take title and assume risk of loss, the sales price is fixed or determinable and collection of the related receivable is reasonably assured. Revenue recognition generally occurs upon shipment of product or usage of inventory consigned to customers. All amounts in a sales transaction billed to a customer related to shipping and handling are reported as sales.

The Battery Technologies segment uses the percentage of completion method to recognize most of its revenue. Most defense contracts use the units-of-delivery method while most space contracts use the cost-to-cost method as the basis to measure progress toward completing a contract. Under the units-of-delivery method, revenues are recognized

Table of Contents

based on the contract price of units delivered. Under the cost-to-cost method, revenue is recognized based on the ratio of cost incurred compared to management's estimate of total costs expected to be incurred under the contract. The percentage of completion method requires substantial judgment on the part of management due to the duration of the contracts as well as the technical nature of the products involved. Contract revenues and cost estimates are reviewed at least quarterly and adjustments are reflected in the accounting period such amounts are determined. Billings in excess of amounts earned are deferred. Anticipated losses on contracts are recorded in full in the period in which the loss becomes evident.

Cost of Goods Sold — Cost of goods sold is comprised of raw material costs, direct production, maintenance and utility costs, depreciation, other overhead costs and shipping and handling costs.

Research and Development — Research and development costs are charged to expense when incurred, are included in selling, general and administrative expenses and amounted to \$26.3 million, \$32.2 million and \$24.4 million in 2013, 2012 and 2011, respectively. These amounts do not include development and application engineering costs incurred in conjunction with fulfilling customer orders and executing projects.

Accounting for Operating Leases — Lease expense is recorded on a straight-line basis. The noncancellable lease term used to calculate the amount of the straight-line expense is generally determined to be the initial lease term, including any optional renewal terms that are reasonably assured. Certain leases include escalating rent provisions and lease incentives which are recognized as lease expense on a straight-line basis over the lease term. Lease payments that depend on an existing index or rate are included in our minimum lease payments that are recognized as lease expense on a straight-line basis over the minimum lease term.

Income Taxes — Deferred income taxes are provided to recognize the effect of temporary differences between financial and tax reporting. Deferred income taxes are not provided for undistributed earnings of foreign consolidated subsidiaries, to the extent such earnings are determined to be reinvested for an indefinite period of time.

Foreign Currency Translation — The functional currency for most of our operating subsidiaries outside of the United States is the applicable local currency. For those operations, assets and liabilities are translated into U.S. dollars at period-ending exchange rates and revenues and expenses are translated into U.S. dollars using average exchange rates. The resulting translation adjustments are recorded as a component of Accumulated other comprehensive income (loss) in stockholders' equity. Accordingly, foreign currency exchange gains and losses related to assets, liabilities and transactions denominated in other currencies (principally the Euro) are included in the Statements of Consolidated Operations.

Derivative Instruments — We enter into derivative instruments and hedging activities to manage, where possible and economically efficient, commodity price risk, foreign currency exchange rate risk and interest rate risk related to borrowings. It is our policy to execute such instruments with creditworthy banks and not enter into derivative instruments for speculative purposes. All derivatives are reflected at their fair value and recorded in other current assets and other current liabilities as of December 31, 2013 and 2012. The accounting for the fair value of a derivative depends upon whether it has been designated as a hedge and on the type of hedging relationship. To qualify for designation in a hedging relationship, specific criteria must be met and appropriate documentation prepared. Changes in the fair values of derivatives not designated in a hedging relationship are recognized in earnings.

From time to time we employ derivative instruments in connection with purchases and sales of inventory in order to establish a fixed margin and mitigate the risk of price volatility. Some customers request fixed pricing and we may use a derivative to mitigate price risk. While this hedging may limit our ability to participate in gains from favorable commodity price fluctuations, it eliminates the risk of loss from adverse commodity price fluctuations.

Periodically, we enter into certain derivative instruments designated as cash flow hedges. For these hedges, the effective portion of the gain or loss from the financial instrument is initially reported as a component of Accumulated other comprehensive income (loss) in stockholders' equity and subsequently reclassified into earnings in the same line as the hedged item in the same period or periods during which the hedged item affects earnings.

Note 2 — Recently Issued Accounting Guidance

In February 2013, the FASB issued amendments to the comprehensive income guidance to improve the transparency of reporting reclassifications out of Accumulated Other Comprehensive Income (AOCI). The update requires companies to disclose items reclassified out of AOCI and into net income in a single location either in the notes to the consolidated financial statements or on the face of the Consolidated Statements of Operations. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2012. We adopted this guidance

Table of Contents

as of March 31, 2013 and elected to include the disclosure in the notes to the consolidated financial statements. Such adoption did not have any effect on our results of operations or financial position.

Note 3 — Inventories

Inventories consist of the following as of December 31,

	2013	2012
Raw materials and supplies	\$83.3	\$133.9
Work-in-process	122.2	187.6
Finished goods	35.4	131.2
	\$240.9	\$452.7

On March 29, 2013, we completed the divestiture of our Advanced Materials business. Total inventory in this segment as of December 31, 2012 was \$189.2 million.

As part of the allocation of the purchase price of VAC to the acquired assets and liabilities assumed, we recorded a \$168.1 million step-up of inventory to its estimated fair value on the date of acquisition. In 2012 we recognized \$38.0 million of lower of cost or market charges related to the VAC purchase accounting step-up and additional lower of cost or market charges of \$40.4 million. At December 31, 2012 all of the inventory step-up had been recognized in cost of goods sold.

Note 4 — Property, Plant and Equipment, net

Property, plant and equipment, net consists of the following as of December 31,

	2013	2012
Land and improvements	\$39.6	44.7
Buildings and improvements	145.8	229.0
Machinery and equipment	350.4	686.5
Furniture and fixtures	7.6	15.9
Property, plant and equipment, at cost	543.4	976.1
Less accumulated depreciation	197.8	501.8
	\$345.6	474.3

On March 29, 2013, we completed the divestiture of our Advanced Materials business. Total net property, plant and equipment in this segment as of December 31, 2012 was \$141.3 million.

Total depreciation expense on property, plant and equipment was \$47.7 million in 2013, \$58.7 million in 2012 and \$47.9 million in 2011.

Table of Contents

Note 5 — Acquisitions and Divestitures

(a) Acquisitions

VAC

On August 2, 2011, we acquired the equity interest in VAC Holding GmbH ("VAC") and the financial position, results of operations and cash flows of VAC are included in the Consolidated Financial Statements from that date. VAC is engaged in the development, manufacturing and distribution of high-performance industrial-use magnetic materials and related products and systems with exceptional magnetic and/or physical properties for a wide array of end markets, including automotive systems, energy conversion and distribution, electrical installation technology, industrial automation, aerospace and renewable energy. Our Magnetic Technologies segment consists of VAC.

The total purchase price of \$812.2 million included cash consideration of \$686.2 million, withheld consideration of \$86.3 million, and the issuance of Company shares valued at \$39.7 million. The withheld consideration relates to potential indemnification claims made by OM Group and accepted by the seller, if any, within two years of the closing date of the acquisition with certain exceptions related to tax matters. In August 2013 we remitted a payment of \$23.0 million to the seller of VAC. We remain in discussions with the seller regarding the remainder of the withheld consideration.

Rahu

On December 22, 2011, we acquired the shares of Rahu Catalytics Limited ("Rahu"), a developer of a unique iron ligand-based chemistry for use in environmentally-friendly coatings, composites and inks. We previously had a license and supply agreement with Rahu. The purchase price included a \$39.1 million cash payment and contingent consideration of up to an additional €20.0 million (\$27.6 million at December 31, 2013) based on achieving certain volume targets over a fifteen year period ending on December 31, 2026. The estimated fair value of the contingent consideration of \$10.8 million as of the acquisition date based on the probability of future anticipated payouts was recorded at the net present value of those future anticipated cash flows. Subsequent to the date of acquisition the estimated fair value of the contingent consideration was reduced to €1.0 million (\$1.4 million) as of December 31, 2013 after an evaluation of new information available in the fourth quarter of 2013. The change is reflected within Other income in the Consolidated Statement of Operations. During 2012 and 2013, \$1.4 million and \$1.5 million of accretion expense was recognized (included in interest expense in the Statement of Consolidated Operations) for the passage of time prior to the reduction made in the fourth quarter 2013.

In 2011, we incurred \$17.8 million of expenses in conjunction with the acquisitions of VAC and Rahu that are included in Selling, general and administrative expense in the Statements of Consolidated Operations; \$2.4 million of these expenses were included in the results of the Magnetic Technologies segment, and the balance was included in Corporate expenses.

(b) Divestitures

Advanced Materials

On March 29, 2013, we completed the divestiture of our cobalt-based business. The transaction comprised the sale of the downstream portion of the business (including our cobalt refinery assets in Kokkola, Finland), and the transfer of equity interests in the DRC-based joint venture, known as GTL, to the joint venture partners, subject to a security interest in favor of OM Group with respect to the joint venture's performance related to certain supply arrangements. In connection with this transaction we received cash proceeds of \$329 million. At closing, net proceeds of \$302 million were received, and we received additional proceeds of \$27 million as an adjustment to the purchase price based on a post-closing analysis of the closing balance sheet in July 2013. Including the adjustment to the purchase

price, a loss of \$112 million was recorded on the divestiture, which included a \$10 million write-off of deferred financing fees related to the required debt pre-payment, a reserve for a note receivable from joint venture partner of \$16 million and transaction expenses of \$9 million.

The sale agreement for the downstream portion of the business also provides for potential future additional cash consideration of up to \$110 million based on the business achieving certain revenue targets over a period of three years. Using our projected trends of cobalt prices and volumes, it is not probable that the business will meet the revenue targets, and no value was assigned to the potential future cash consideration while calculating the loss on the divestiture or at December 31, 2013.

Table of Contents

Following the sale, to assist in the transition of the downstream business, we entered into two agreements with the buyer pursuant to which: (1) we act as an intermediary in a supply agreement between GTL and the buyer, in back-to-back arrangements for a period of at least two years, subject to delivery of 7,000 MT of cobalt feed, and extendable for up to an additional six months in order to deliver 7,000 MT of cobalt feed; and, (2) we served as the U.S. distributor for refined cobalt products in primarily back-to-back arrangements until December 31, 2013. These agreements result in minimal statement of operations or cash flow impact for us and will be reported in the Advanced Materials segment until both agreements expire or are terminated.

Ultra Pure Chemicals

On May 31, 2013, we completed the sale of our Ultra Pure Chemicals (UPC) business. In connection with this transaction we received cash proceeds of \$63 million, which included an estimated \$3 million for excess working capital. A loss, net of tax, of \$9.8 million was recorded on the divestiture, which included a gain of \$1.5 million on the sale of net assets offset by the realization of a loss in accumulated other comprehensive income of \$8.8 million, a \$1.5 million write-off of deferred financing fees related to the required debt pre-payment and transaction expenses of \$1.0 million.

The results of our UPC business are reported in discontinued operations in the accompanying consolidated financial statements and notes to the consolidated financial statements for all periods prior to the UPC sale. As required, annual interest expense of \$1.0 million, \$2.5 million, and \$1.0 million for the periods ending December 31, 2013, 2012 and 2011, respectively, related to the debt repaid with the proceeds from the sale of the business was allocated to discontinued operations for all periods prior to the UPC sale.

A summary of our discontinued operations activity is as follows:

(In millions except per share data)	Twelve Months Ended December 31		
	2013	2012	2011
Net Sales	\$38.3	\$93.4	\$94.9
(Loss) Income from operations of divested business (net of tax)	\$(2.5)) \$(0.4)) \$2.2
Loss on disposal of business (net of tax)	(9.8)) —) —
(Loss) Income from discontinued operations (net of tax)	\$(12.3)) \$(0.4)) \$2.2
(Loss) Income per share from discontinued operations (net of tax)			
Basic	\$(0.39)) \$(0.01)) \$0.07
Diluted	\$(0.39)) \$(0.01)) \$0.07

Details related to the net assets (excluding cash) and liabilities of our discontinued operations at December 31, 2012 are as follows:

	December 31, 2012
Accounts receivable	\$20.4
Inventories	10.4
Other current assets	2.4
Property, plant and equipment, net	22.4
Other long term assets	15.8
Goodwill	15.0
Total assets of discontinued operations (excluding cash)	\$86.4

Accounts payable	\$15.6
Other current liabilities	5.1
Long-term liabilities	4.7
Total liabilities of discontinued operations	\$25.4

42

Table of Contents

Note 6 — Goodwill and Other Intangible Assets

Goodwill is tested for our reporting units on an annual basis, or more frequently as impairment indicators arise. We have the option to perform a qualitative evaluation about the likelihood of goodwill and indefinite lived intangible impairment to determine whether we should quantitatively calculate the fair value of each of its reporting units. If, after considering all events and circumstances that support a qualitative evaluation, we determine that it is not more-likely-than-not that the fair value of its reporting units is less than the respective carrying value, then performing the two-step quantitative approach would be considered unnecessary. Conversely, if applying the qualitative evaluation indicates that it is more-likely-than-not that the fair value is less than the carrying value, then we would proceed with the first step of the two-step quantitative approach and continue with the quantitative analysis to determine if in fact the reporting unit or units are impaired.

We estimate the fair value of a reporting unit (including goodwill) and compare that amount to the carrying value of that reporting unit. If the estimated fair value of the reporting unit is less than its carrying value, a second step would be undertaken to determine the implied fair value of goodwill of the reporting unit, which is then compared with the carrying value of the goodwill of the reporting unit. This second step would include valuing all of the tangible and intangible assets and liabilities of the reporting unit as if they had been acquired in a business combination on the testing date. We have developed a model to estimate the fair value of the reporting units utilizing a discounted cash flow valuation technique (“DCF model”). We selected the DCF model as we believe it is comparable to what would be used by market participants to estimate fair value of our reporting units. The DCF model incorporates our estimates of future cash flows; future growth rates; terminal value amounts; allocations of certain assets, liabilities and cash flows among reporting units; and the applicable weighted-average cost of capital (the “WACC”) used to discount those estimated cash flows. These estimates require significant judgment and are consistent with our forecast and long-range plans.

We conduct our annual goodwill impairment test as of October 1. The results of testing as of October 1, 2013, 2012 and 2011 confirmed that the estimated fair value of each of the reporting units exceeded its carrying value and therefore no impairment loss was required to be recognized. We believe the assumptions used in our impairment testing were consistent with the risk inherent in the business models of the reporting unit at the time the impairment test was performed. Although we believe the assumptions, judgments and estimates used are reasonable and appropriate, different assumptions, judgments and estimates could materially affect the goodwill test and, potentially, our results of operations and financial position. The change in the carrying amount of goodwill is as follows:

	Magnetic Technologies	Advanced Materials	Specialty Chemicals	Battery Technologies	Continuing Operations	Discontinued Operations	Consolidated
Balance at January 1, 2012	\$ 201.6	\$ 103.3	\$ 160.0	\$ 65.3	\$ 530.2	\$ 14.3	\$ 544.5
Acquisitions and adjustments	—	—	(9.2)	—	(9.2)	—	(9.2)
Foreign currency translation adjustments	3.6	—	3.6	0.1	7.3	0.7	8.0
Balance at December 31, 2012	205.2	103.3	154.4	65.4	528.3	15.0	543.3
Divestitures and adjustments	—	(103.3)	—	—	(103.3)	(15.0)	(118.3)
Foreign currency translation adjustments	9.3	—	(1.3)	(0.3)	7.7	—	7.7
Balance at December 31, 2013	\$ 214.5	\$—	\$ 153.1	\$ 65.1	\$ 432.7	\$—	\$ 432.7

Intangible assets consist of (i) definite-lived assets subject to amortization and (ii) indefinite-lived intangible assets not subject to amortization. All intangible assets subject to amortization are amortized on a straight-line basis over the estimated useful lives or other appropriate methods if applicable.

Table of Contents

A summary of intangible assets follows:

	2013			2012		
	Carrying Value	Accumulated Amortization (a)	Net	Carrying Value	Accumulated Amortization (a)	Net
Tradenames	\$117.0	\$(2.9)) \$114.1	\$117.0	\$(6.6)) \$110.4

Developed technology	136.5	(19.9)) 116.6	136.5	(17.0)) 119.5
Know-how	18.6	(3.6)) 15.0	18.6	(2.7)) 15.9
Capitalized software	22.0	(17.4)) 4.6	20.9	(14.7)) 6.2
Other intangibles	4.2	(3.6)) 0.6	4.4	(3.4)) 1.0
Total	\$532.8	\$(129.8)) \$403.0	\$531.9	\$(114.8)) \$417.1

(a) - Actual amounts of amortization expense may differ from the estimated amounts due to changes in foreign currency exchange rates, impairment of intangible assets, intangible assets additions, accelerated amortization of intangible assets, acquisition and divestiture and other factors.

The weighted average amortization period is 11 years for customer relationships, 11 years for developed technology, 16 years for know-how and 1 year for capitalized software. Indefinite-lived intangible assets are tested for impairment annually and between annual evaluations if changes in circumstances or the occurrence of certain events indicate potential impairment.

Amortization expense related to intangible assets for the years ended December 31, 2013, 2012 and 2011 was \$26.1 million, \$25.5 million and \$17.1 million, respectively. In 2013 we divested the UPC business which had intangible assets with a carrying value of \$17.2 million. The December 31, 2012 UPC balances are included within non-current assets of discontinued operations and include \$6.7 million of accumulated amortization and \$1.4 million of foreign currency translation.

We estimate that the annual pre-tax amortization expense will be approximately \$25.6 million for 2014, \$25.6 million for 2015, \$25.7 million for 2016, \$24.2 million for 2017 and \$24.6 million for 2018.

Note 7 — Debt

On September 4, 2013 we entered into a new five-year Senior Secured Revolving Credit Facility (“the Facility”), and terminated our previous credit facility dated August 2, 2011 that was scheduled to expire in August 2016. The Facility provides for \$350 million of revolving borrowing capacity and includes an expansion option of up to an additional \$150 million, subject to certain conditions. The borrowers under the agreement are the Company, Harko C.V. (“Harko”), a limited partnership organized under the laws of the Netherlands, and VAC Germany GmbH (“VAC”), a limited liability company under the laws of Germany. Harko and VAC are wholly-owned subsidiaries of the Company. The Facility matures on September 4, 2018.

In the first six months of 2013 we repaid the Term A and Term B loans under the previous credit facility with the proceeds from the divestitures of the Advanced Materials and UPC businesses, as required, and cash on hand. Related to these required pre-payments, we included the write-off of \$10.3 million and \$1.5 million of deferred financing fees in the losses on divestitures of the Advanced Materials and UPC businesses, respectively.

The obligations of the Company under the Facility are guaranteed by certain of the Company’s material U.S. subsidiaries. The obligations of Harko and VAC under the Facility are guaranteed by the Company and certain of the Company’s material subsidiaries, subject to certain exceptions including financial assistance limitations in certain foreign jurisdictions. In addition, the obligations of the Company under the Facility are secured by a first priority security interest in substantially all of the existing and future personal property of the Company and certain of the Company’s material U.S. subsidiaries, including 65% of the voting capital stock of certain of the Company’s direct

foreign subsidiaries. The obligations of Harko and VAC under the Facility are secured by a first priority security interest in certain of the existing and future personal property of Harko, VAC and certain of the Company's subsidiaries and a 100% pledge of the voting capital stock of certain of the Company's subsidiaries, subject to certain exceptions, including financial assistance limitations in certain foreign jurisdictions.

The interest rates applicable to loans under the Facility will be at our option and equal to either a base rate or a LIBOR rate, in each case plus an applicable margin percentage. The base rate will be the highest of (i) the federal funds rate plus 0.50%, (ii) the prime rate or (iii) the LIBOR rate with a maturity of one month plus 1.00%. The applicable margin

Table of Contents

percentage is based on the leverage ratio of the Company. The range of the applicable margin percentage is 1.125% to 2.000% in the case of LIBOR advances and 0.125% to 1.000% in the case of base rate advances.

The Facility contains customary representations and warranties and certain covenants that limit the ability of the Company and its restricted subsidiaries to, among other things: (i) incur or guarantee additional indebtedness; (ii) redeem, repurchase or pay distributions on capital stock or redeem or repurchase subordinated debt; (iii) make investments; (iv) sell assets; (v) enter into agreements that restrict distributions or other payments from restricted subsidiaries to the Company; (vi) incur or suffer to exist liens securing indebtedness; (vii) consolidate, merge or transfer all or substantially all of their assets; and (viii) engage in transactions with affiliates. In addition, the Facility contains financial covenants that limit capital expenditures in any fiscal year and that measure (i) the ratio of the Company's total funded indebtedness net of certain cash to the amount of the Company's consolidated EBITDA and (ii) the ratio of the amount of the Company's consolidated EBITDA to the Company's cash interest expense, as defined in the agreement.

We incurred fees and expenses of \$2.3 million related to the Facility. These fees and expenses were deferred and will be amortized to interest expense over the term of the Facility. Previously deferred fees of \$0.5 million were written off to interest expense when the Facility was signed due to a reduction in the number of banks in the bank syndication. The remaining \$2.9 million of the previously deferred fees will be amortized over the term of the Facility.

As of December 31, 2013, we have no obligations outstanding under the Facility, and we are in compliance with all of the covenants.

Interest paid on long-term debt was \$6.9 million, \$38.4 million and \$18.9 million for 2013, 2012 and 2011, respectively. As required, interest expense of \$1.0 million, \$2.5 million, and \$1.0 million has been allocated to discontinued operations for 2013, 2012 and 2011, respectively. No interest was capitalized in 2013, 2012 or 2011.

Note 8 — Derivative Instruments

All derivatives are reflected on the balance sheet at fair value and recorded in other current assets and other current liabilities in the Consolidated Balance Sheets. The accounting for the fair value of a derivative depends upon whether it has been designated as a hedge and on the type of hedging relationship. Changes in the fair value of derivative instruments are recognized immediately in earnings, unless the derivative is designated as a hedge and qualifies for hedge accounting. Under hedge accounting, recognition of derivative gains and losses can be matched in the same period with that of the hedged exposure and thereby minimize earnings volatility.

For a fair value hedge, the change in fair value of the hedging instrument and the change in fair value of the hedged item attributable to the risk being hedged are both recognized currently in earnings. For a cash flow hedge, the effective portion of the change in fair value of a hedging instrument is initially recognized in Accumulated other comprehensive income (loss) ("AOCI(L)") in stockholders' equity and subsequently reclassified to earnings when the hedged item affects income. Any ineffective portion of the change in fair value of a cash flow hedge is recognized immediately in earnings.

Commodity Price Risk

From time to time we employ derivative instruments in connection with certain purchases of certain commodities in order to establish a fixed margin and mitigate the risk of price volatility. This hedging limits our ability to participate in gains from favorable commodity price fluctuations and it limits the risk of loss from adverse commodity price fluctuations.

Derivative instruments employed to manage commodity price risk include some contracts designated as cash flow hedges as well as some other contracts that are not designated as hedges for accounting purposes.

In May 2013, we entered into nickel forward derivative contracts to establish a fixed margin and mitigate the risk of price volatility related to certain sales expected in 2013 and 2014 of nickel-containing finished products that were priced on a formula that included a fixed nickel price component. In October 2012, we entered into nickel forward

derivative contracts to establish a fixed margin and mitigate the risk of price volatility related to certain sales expected in 2013 of nickel-containing finished products that were priced based on a formula that included a fixed nickel price component. These forward derivative contracts have been designated as cash flow hedges for accounting purposes.

Table of Contents

Other Forward Contracts

In 2011, we entered into nickel forward purchase contracts to establish a fixed margin and mitigate the risk of price volatility related to certain sales expected in 2012 of nickel-containing finished products that were priced based on a formula that included a fixed nickel price component. These forward purchase contracts were not designated as cash flow hedges for accounting purposes. Accordingly, these contracts were adjusted to fair value as of the end of each reporting period, with the gain or loss recorded in Cost of goods sold. The amount recorded in Cost of goods sold in 2011 was less than \$0.1 million. As of December 31, 2013 and 2012, there were no nickel forward purchase contracts outstanding that were not designated as cash flow hedges.

Foreign Currency Exchange Rate Risk

Our primary Finnish operating subsidiary was included in the divestiture of our cobalt-based business on March 29, 2013. The functional currency for this subsidiary was the U.S. dollar since a majority of its purchases and sales were denominated in U.S. dollars. While a majority of the subsidiary's raw material purchases were in U.S. dollars, it had some Euro-denominated operating expenses. From time to time, we entered into foreign currency forward contracts to mitigate a portion of the earnings volatility in those Euro-denominated cash flows due to changes in the Euro/U.S. dollar exchange rate. As of December 31, 2013 and 2012, we had no Euro forward contracts outstanding. As of December 31, 2011, we had Euro forward contracts with notional values that totaled 90.0 million Euros with maturities ranging up to twelve months. AOCI(L) included a cumulative loss related to these contracts of \$3.7 million, all of which was reclassified to earnings within 2012. We designated these foreign currency derivatives as cash flow hedges of the subsidiary's forecasted Euro-denominated expenses.

No hedge ineffectiveness was recorded in income in the years ended December 31, 2013, 2012 or 2011 for these hedges.

Interest Rate Risk

From time to time we utilized interest rate swap agreements to partially reduce risks related to variable rate financing agreements that are subject to changes in the market rate of interest.

We had interest rate swaps with notional values that totaled \$115.0 million at December 31, 2012 and AOCI(L) included a cumulative loss of \$0.1 million related to these contracts. Following the full repayment of the Term B facility at the end of March 2013, we elected in April 2013 to terminate all the remaining interest swaps contracts. The AOCI at the time of the termination represented an immaterial cumulative loss related to these contracts which was reclassified to earnings in the second quarter 2013.

There was no hedge ineffectiveness in 2013, 2012 or 2011 for hedges. The fair value of commodity contracts of \$0.2 million is recorded in Other current liabilities in the Consolidated Balance Sheet as of December 31, 2013.

The following table summarizes the effect of derivative instruments as recorded in the Statement of Consolidated Operations:

Derivatives in Cash Flow Hedging Relationships

	Amount of Gain (Loss) on Derivative Recognized in AOCI(L) (Effective Portion) for the Year Ended December 31,			
	2013	2012	2011	
Euro forward contracts	\$—	\$6.0	\$(3.7)
Commodity contracts	(0.3) —	0.4)
Interest rate swap agreements	—	(0.1) (0.3)
Total	\$(0.3) \$5.9	\$(3.6)
	Location of Gain (Loss) Reclassified	Amount of Gain (Loss) Reclassified from AOCI(L) into Income (Effective Portion) for the Year Ended		

Edgar Filing: OM GROUP INC - Form 10-K

	from AOCI(L) into Income (Effective Portion)	2013	2012	2011

Commodity contracts	Net sales	(0.2) —	0.4
Interest rate swap agreements	Interest expense	—	(0.4) (0.3
Total		\$(0.2) \$1.9	\$0.1

46

Table of Contents

Note 9 — Fair Value Disclosures

The following table shows the Company's assets and liabilities accounted for at fair value on a recurring basis:

Description	December 31, 2013	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:				
Commodity contracts	\$0.2	\$—	0.2	\$—
Contingent consideration payable	\$1.4	—	—	1.4
Total	\$1.6	\$—	\$0.2	\$1.4

The fair value of the derivative instruments have been determined based on the market equivalents at the balance sheet date, taking into account current commodity forward rates, therefore, they are classified within Level 2 of the valuation hierarchy. Our valuation techniques and Level 3 inputs used to estimate the fair value of the contingent consideration payable in connection with our acquisition of Rahu Catalytics Limited ("Rahu") are described below. There were no transfers into or out of Levels 1, 2 or 3 in 2013 or 2012.

The following table summarizes changes in Level 3 liabilities measure at fair value on a recurring basis:

		Contingent Consideration
Fair Value at	December 31, 2012	\$12.4
Change in estimate		(13.0)
Accretion expense		1.5
Foreign exchange		0.5
Fair Value at	December 31, 2013	\$1.4

We acquired Rahu on December 22, 2011. The purchase price included contingent consideration of up to an additional €20.0 million (\$27.6 million at December 31, 2013) based on achieving certain volume targets over a fifteen year period ending on December 31, 2026. We estimated the fair value of the contingent consideration liability using probability-weighted expected future cash flows and applied a discount rate that appropriately captured a market participant's view of the risk associated with the liability. The liability for contingent consideration is included in Other non-current liabilities in the Consolidated Balance Sheet. The valuation of contingent consideration is classified utilizing Level 3 inputs consistent with reasonably available assumptions which would be made by other market participants. There are many factors that could impact the likelihood that we will pay the contingent consideration and therefore its value, including overall economic conditions and our ability to drive sales volumes as planned. After completing our annual forecasting process and evaluating new regulatory information obtained in the fourth quarter of 2013, we adjusted the expected timing of achieving the volume targets. As a result of the volume timing change, the estimated fair value of the contingent consideration was reduced to €1.0 million (\$1.4 million) as of December 31, 2013 with the change reflected within Other income in the Consolidated Statement of Operations. A change in a market participant view of risks could also impact the value of the contingent consideration.

We also hold financial instruments consisting of cash, accounts receivable, and accounts payable. The carrying amounts of cash, accounts receivable and accounts payable approximate fair value due to the short-term maturities of these instruments. Long-term debt and the current portion of long-term debt had a carrying value of \$467.4 million and a fair value of \$470.4 million at December 31, 2012, based on quoted market prices which are Level 1 inputs.

There was no long-term debt outstanding as of December 31, 2013. Derivative instruments are recorded at fair value as indicated above.

We utilize a “relief from royalty” methodology in estimating fair values for indefinite-lived trade names. The methodology estimates the fair value of each trade name by determining the present value of the royalty payments that are avoided as a result of owning the trade name and includes judgmental assumptions about sales growth that are consistent with the assumptions used to determine the fair value of reporting units in our goodwill testing. The fair value measurements were calculated using unobservable inputs, classified as Level 3, requiring significant management judgment due to the absence of quoted market prices or observable inputs for assets of a similar nature.

Table of Contents

Accounts receivable potentially subjects us to a concentration of credit risk. We maintain significant accounts receivable balances with several large customers. At December 31, 2013 and 2012 the accounts receivable balance from our largest customer represented 3% of the Company's net accounts receivable, respectively. Generally, we do not obtain security from our customers in support of accounts receivable.

Sales to the top three customers in the Battery Technologies segment represented approximately 48%, 52% and 54% of Battery Technologies' net sales in 2013, 2012 and 2010, respectively. The loss of one or more of these customers could have a material adverse effect on Battery Technologies' business, results of operations or financial position.

Note 10 — Income Taxes

Income (loss) from continuing operations before income tax expense consists of the following:

	Year Ended December 31			
	2013	2012	2011	
United States	\$(13.6) \$(12.3) \$(7.1)
Outside the United States	(49.2) (36.3) 33.7	
	\$(62.8) \$(48.6) \$26.6	

Income tax expense is summarized as follows:

	Year Ended December 31			
	2013	2012	2011	
Current tax provision (benefit):				
United States:				
Federal	\$0.6	\$(3.1) \$2.0	
State and local	—	—	0.2	
Outside the United States	17.4	30.1	11.1	
Total current	18.0	27.0	13.3	
Deferred tax provision (benefit):				
United States	0.6	2.4	0.5	
Outside the United States	(7.9) (32.6) (31.7)
Total deferred	(7.3) (30.2) (31.2)
	\$10.7	\$(3.2) \$(17.9)

A reconciliation of income taxes computed using the United States statutory rate to income taxes computed using our effective income tax rate is as follows:

	Year Ended December 31			
	2013	2012	2011	
Income (loss) from continuing operations before income tax expense	\$(62.8) \$(48.6) \$26.6	
Income taxes at the United States statutory rate (35)%	(21.9) (17.1) 9.3	
Increase (decrease) in taxes resulting from:				
Effective tax rate differential on income outside of the United States	19.3	(3.3) (26.8)
Repatriation of foreign earnings	(1.7) 7.4	6.5	
Malaysian tax holiday	—	—	(3.7)
Valuation allowance	13.2	3.7	3.0	
Uncertain tax positions	0.1	(1.9) (1.6)
Allowance (reversal) on GTL prepaid tax asset	0.4	5.6	(6.2)
Other, net	1.3	2.4	1.6	
Income tax (benefit) expense	\$10.7	\$(3.2) \$(17.9)

Effective income tax rate	(a)	6.5	% (a)
(a)not meaningful			

The effective income tax rate for the year ended December 31, 2013 is impacted by the loss of \$111.6 million related to the divestiture of the Advanced Materials business. There was no tax benefit on the loss on divestiture of the Advanced Materials business due to our legal entity and tax structure.

48

Table of Contents

Excluding the impact of loss on sale of advanced materials business of \$111.6 million, the effective tax rate for the year ended December 31, 2013 would have been 22%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and our financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S. and Germany) with no corresponding tax benefit.

The effective income tax rate for the year ended December 31, 2012 was impacted by VAC purchase accounting related inventory charges of \$55.9 million and GTL. During 2012, we recorded a tax expense of \$10.4 million related to GTL. This includes a \$5.6 million tax expense related to GTL prepaid tax asset impairment and \$6.6 million related to other GTL permanent differences, of which our share was 55%, or \$6.7 million.

Excluding the impact of VAC purchase accounting related inventory charges and GTL discrete and permanent items, the effective tax rate for the year ended December 31, 2012 would have been 32%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., and our internal financing structure, partially offset by losses and carry-forwards in certain jurisdictions (including the U.S. and Germany) with no corresponding tax benefit.

The effective income tax rate for the year ended December 31, 2011 was affected by the acquisition of VAC, including the impact of acquisition-related charges of \$126.6 million. Also during 2011, we recorded a net discrete tax benefit of \$7.4 million, which included a \$6.2 million discrete tax benefit related to GTL, of which our share was 55%, or \$3.4 million.

Excluding the impact of the VAC acquisition and discrete items, the effective income tax rate for the year ended December 31, 2011 would have been 13%. This rate is lower than the U.S. statutory tax rate primarily due to income earned in tax jurisdictions with lower statutory rates than the U.S., a tax holiday in Malaysia and our financing structure, partially offset by losses in certain jurisdictions (including the U.S.) with no corresponding tax benefit. During fourth quarter of 2012, the Company received \$37.9 million tax refund which was included in the Refundable and prepaid income tax on the Consolidated Balance Sheet as of December 31, 2011.

We intend to repatriate only future earnings and therefore have not provided additional United States income taxes on approximately \$380 million of undistributed earnings of consolidated foreign subsidiaries. Such earnings could become taxable upon the sale or liquidation of these foreign subsidiaries or upon dividend repatriation. Our intent is for such earnings to be permanently reinvested by the foreign subsidiaries. It is not practicable to estimate the amount of unrecognized withholding taxes and tax liability on such earnings.

In connection with an investment incentive arrangement, we had a "tax holiday" from income taxes in Malaysia that expired on December 31, 2011. This arrangement reduced income tax expense by \$3.7 million in 2011. The benefit of the tax holiday on net income per diluted share was approximately \$0.12 in 2011.

We file income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. Our major tax jurisdictions include the U.S. and Germany. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2006. The Internal Revenue Service completed the examination of our 2010 U.S. federal income tax return, and Finnish tax authorities are currently examining our Finnish tax returns for the years 2007-2011. VAC's German tax returns have been audited through 2005. We are indemnified, subject to certain limitations, for any pre-acquisition income tax liabilities of VAC. German tax authorities are currently examining VAC's income tax returns for the years 2006-2011.

Income tax payments were \$47.2 million, \$33.9 million and \$23.8 million in 2013, 2012 and 2011, respectively.

Table of Contents

Significant components of our deferred income taxes are as follows:

	December 31	
	2013	2012
Employee benefit accruals	\$44.7	\$50.2
Foreign operating loss carryforwards	8.3	12.6
Foreign tax credit carryforwards	23.1	12.2
State operating loss carryforwards	7.7	7.1
Operating accruals	42.3	32.7
Investment credit carryforwards	3.3	3.4
Valuation allowance	(83.6) (78.0
Deferred tax assets	45.7	40.2
Depreciation	(37.5) (44.7
Amortization	(107.7) (105.3
Other	(1.0) —
Deferred tax liabilities	(146.2) (150.0
Net deferred tax liabilities	\$(100.5) \$(109.8

Deferred income taxes are recorded in the Consolidated Balance Sheets in the following accounts:

	December 31	
	2013	2012
Other current assets	\$2.4	\$7.5
Other non-current assets	6.4	5.1
Other current liabilities	(6.8) (4.7
Deferred income taxes — non-current liabilities	(102.5) (117.7
	\$(100.5) \$(109.8

We have a U.S. net deferred tax asset of \$1.3 million which is expected to be recovered based on temporary differences that will reverse in 2014-2015. At December 31, 2013 and 2012, we had U.S. state net operating loss carryforwards representing a potential future tax benefit of \$7.7 million and \$7.1 million, respectively. These carryforwards expire at various dates from 2014 through 2033. We have recorded a full valuation allowance against the U.S. state net operating loss carryforwards. We have foreign net operating loss carryforwards of \$38.2 million, representing a potential future tax benefit of \$8.3 million in various jurisdictions, some of which expire in 2018 through 2031, and some of which have no expiration. We have established a \$2.5 million valuation allowance against the foreign net operating loss carryforwards as we believe that some of these assets will more likely than not be realized. We have foreign investment tax credit and allowance carryforwards of \$3.3 million, of which \$2.2 million expire in 2028, while the remaining \$1.1 million have no expiration. We have recorded a \$2.2 million valuation allowance against the foreign investment tax credit and allowance carryforwards as we believe that a portion of these assets will not be realized.

For the year ended December 31, 2013, our valuation allowance increased primarily due to the increase in foreign carryforwards. Realization of deferred tax assets is dependent on generating sufficient taxable income within the carryback or carryforward period under the relevant tax laws. It is reasonably possible that a portion of the valuation allowance against deferred tax asset in certain tax jurisdictions could be released in the near term if estimated increases of future taxable income during the carry-forward period can be more likely than not realized.

Table of Contents

A reconciliation of the beginning and ending amount of uncertain tax positions is as follows:

Balance at January 1, 2012	\$25.0	
Additions for tax positions related to the current year	0.9	
Additions for tax positions of prior years	0.4	
Reductions for tax positions of prior years	(8.4)
Reductions for lapses of statute of limitations	(0.1)
Foreign currency translation	0.2	
Balance at December 31, 2012	18.0	
Additions for tax positions related to the current year	0.6	
Reductions for tax positions of prior years	(3.4)
Foreign currency translation	0.3	
Balance at December 31, 2013	\$15.5	

With the exception of those relating to the VAC acquisition, all uncertain tax positions would affect the effective tax rate if recognized. However, \$6.0 million of the uncertain tax positions relate to foreign tax credit carryforwards, which, if recognized, would be offset by an adjustment to the valuation allowance. At December 31, 2013, there are no uncertain tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. The decrease in uncertain tax positions in 2013 primarily results from effective settlements during 2013 in various tax jurisdictions and the transfer of our equity interests in GTL as part of the divestiture of the Advanced Materials business. The decrease in uncertain tax positions in 2012 primarily results from the effective settlements during 2012 in various tax jurisdictions. At December 31, 2013, the liability for uncertain tax positions includes \$0.3 million for which it is reasonably possible that the uncertain tax position will decrease within the next twelve months. These uncertain tax positions primarily relate to transfer pricing and may decrease upon expiration of the statute of limitations.

We recognize interest accrued related to uncertain tax positions and penalties as a component of income tax expense. During 2013 we recognized an immaterial benefit related to interest and penalties. During 2012 and 2011, we recognized a \$0.4 million benefit and \$0.1 million expense related to interest and penalties, respectively. At December 31, 2013 and 2012, we had \$0.8 million accrued for interest and penalties.

Note 11 — Pension and Other Post-Retirement Benefit Plans

We have defined contribution plans covering substantially all eligible U.S. employees. Contributions are directed by the employee into various investment options. These defined contribution plans do not have any direct ownership of the Company's common stock. Under these plans, we match participants' contributions based on plan provisions. Certain plans provide for a discretionary Company contribution based on employee compensation. We maintain additional defined contribution plans in certain locations outside the United States. Aggregate defined contribution plan expenses were \$4.7 million, \$4.9 million and \$4.6 million in 2013, 2012 and 2011, respectively.

We have defined benefit pension obligations at VAC, substantially all of which are unfunded. VAC sponsors various defined benefits plans for its employees, including pension, early retirement benefits and anniversary benefits, mainly in Germany.

The EaglePicher Technologies("EPT") pension plans consist of four, non-contributory, defined benefit pension plans. The Technologies Salaried Plan is a defined benefit, cash balance plan that covers EaglePicher Technologies salaried employees hired prior to January 1, 2007. The Technologies Hourly Plan is a defined benefit plan that covers EaglePicher Technologies non-union hourly employees hired prior to January 1, 2007 and union hourly employees hired prior to May 3, 2008. We also hold the liabilities of two frozen defined benefit pension plans. Pension benefits are paid to plan participants directly from pension plan assets.

In addition to the pension liabilities for VAC and EPT, we have a non-contributory, defined benefit pension plan for certain retired employees in the United States related to a divested business. Pension benefits under this plan are paid to plan participants directly from pension plan assets.

Certain other non-U.S. employees are covered under other defined benefit plans. These other non-U.S. plans are not material.

We also have an obligation to our former chief executive officer in settlement of an unfunded supplemental executive retirement plan (“SERP”). Payments under the SERP are made directly from the Company.

Table of Contents

The following table sets forth the changes in the benefit obligation and the plan assets during the year and reconciles the funded status of the defined benefit plans with the amounts recognized in the Consolidated Balance Sheet at December 31:

	Pension Benefits		Non-U.S. Plans	
	U.S. Plans

Table of Contents

Set forth below is a detail of the net periodic pension and other post-retirement benefit expense for the defined benefit plans for the years ended December 31:

	Pension Benefits			
	Non-U.S. Plans			
	2013	2012	2011	
Service cost	\$5.1	\$4.0	\$2.0	
Interest cost	6.1	7.6	3.5	
Amortization of unrecognized net loss	1.8	0.8	—	
Net periodic benefit cost	13.0	12.4	5.5	
Net (gain) loss arising during the year	0.3	29.8	1.1	
Net (gain) loss recognized during the year	(1.8) (0.8) —	
Exchange rate gain (loss)	1.4	0.8	(0.1)
Total recognized in other comprehensive income	(0.1) 29.8	1.0	
Total recognized in net periodic benefit cost and other comprehensive income	\$12.9	\$42.2	\$6.5	

Future pension benefit payments expected to be paid are as follows:

Expected benefit payments	Pension	
	U.S. Plans	Non-U.S. Plans
2014	\$14.3	\$10.8
2015	\$14.2	\$12.3
2016	\$14.3	\$13.8
2017	\$14.2	\$13.4
2018	\$14.0	\$13.0
2019-2023	\$72.7	\$57.3

Pension benefit payments for the U.S. pension plans are made from assets of the pension plans. We expect to contribute \$1.1 million to our U.S. pension plans, in 2014. Expected contributions are dependent on many variables, including the variability of the market value of the assets as compared to the obligation and other market or regulatory conditions. Accordingly, actual funding may differ significantly from current estimates. We expect to make annual benefit payments of approximately \$10.8 million related to our non-U.S. pension plans in 2014.

The amounts in Accumulated other comprehensive income (loss) that are expected to be recognized as components of net periodic benefit cost during 2014 are as follows:

	U.S. Plans	Non-U.S. Plans	Total
Net actuarial loss	\$0.4	\$1.1	\$1.5

The following weighted-average assumptions were used to determine the Company's pension benefit obligations for the year ended December 31:

Expected return on pension plan assets — Divested Business Plans	6.0%	6.5%
Non U.S. Plans		
Discount rate	3.5%	5.5%
Expected return on pension plan assets	3.7%	3.4%

Our investment objective for defined benefit plan assets is to meet the plan's benefit obligations, without undue exposure to risk. The investment strategy focuses on asset class diversification, liquidity to meet benefit payments and an appropriate balance of long-term investment return and risk. The Investment Committee oversees the investment allocation process, which includes the selection and evaluation of the investment manager, the determination of investment objectives and risk guidelines, and the monitoring of actual investment performance. In determining the expected long-term rate of return on defined benefit pension plan assets, management considers the historical rates of return over a period of time that is consistent with the long-term nature of the underlying obligations of these plans, the nature of investments and an expectation of future investment strategies.

We utilize the services of independent third-party investment managers to oversee the management of U.S. pension plan assets. The investment managers are allowed to exercise investment discretion, subject to limitations established by the Company.

Below are our actual and established target allocations for the EPT pension plans, representing 94% of U.S. pension plan assets:

	Actual Allocation	Target Allocation	
U.S. equity securities	12	% 13	%
Non-U.S. equity securities	12	% 12	%
Fixed income	61	% 60	%
High yield	5	% 5	%
TIPS	5	% 5	%
Global REITS	4	% 5	%
Cash	1	% —	%
Total assets	100	% 100	%

Active plan investments include U.S. equity securities which are invested broadly in U.S. companies in various industries using the Wilshire 5000 Index as the asset class benchmark. Non-U.S. equity securities are invested broadly in non-U.S. companies in various industries using the MSCI ACWI ex-U.S. Index as the asset class benchmark. Long duration fixed income consists primarily of investment grade corporate fixed income bonds benchmarked against the Barclays Capital Long Credit Index. Intermediate government fixed income consists of U.S. government bonds using the Barclays Capital Intermediate Government Index as the asset class benchmark. U.S. Treasury Inflation Protected Fixed Income ("TIPS") invests in the U.S. Treasury inflation protected securities market using the Barclays U.S. TIPS Index as the asset class benchmark. Global REITS investments are invested in the broad global real estate securities market with the FTSE EPRA/NAREIT Developed RE Index (or other comparable index) as the asset class benchmark. High Yield Fixed Income ("High yield") invests in broad U.S. non-investment grade fixed income bonds using the Merrill Lynch U.S. High Yield Master II as the asset class benchmark.

Table of Contents

Our asset allocations by asset category for the Divested business and non-U.S. plans are as follows:

	December 31, 2013	December 31, 2012
	Actual Allocation	Actual Allocation
U.S. Equity securities	38 %	35 %
Corporate bonds	10 %	9 %
Government bonds	10 %	12 %
Other fixed income	13 %	15 %
Non-U.S. assets	27 %	27 %
Cash	2 %	2 %
Total assets	100 %	100 %

Equity securities are invested broadly in U.S. companies in various industries. Non-U.S. assets consist of equity securities of non-U.S. companies in various industries as well as foreign mutual funds.

The fair value measurements of defined benefit pension plan assets by category at December 31, 2013 are as follows:

Category	December 31, 2013	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Equity securities — US	\$26.0	\$4.3	\$21.7	\$—
Equity securities — Non US	20.9	—	20.9	—
Fixed income:				
Bonds	103.6	—	103.6	—
Other fixed income	2.1	—	2.1	—
High yield	8.1	—	8.1	—
TIPS	7.6	—	7.6	—
Global REITS	7.5	—	7.5	—
Non-U.S. assets	4.1	—	4.1	—
Cash and cash equivalents	1.7	1.7	—	—
Total	\$181.6	\$6.0	\$175.6	\$—

Equity securities and fixed income, high-yield, TIPS and Global REITS investments are primarily comprised of mutual funds and common/collective trust funds. Investments in mutual funds and common/collective trust funds are valued at the net asset value per share or unit multiplied by the number of shares or units held as of the measurement date.

The defined benefit pension plans do not have any direct ownership of the Company's common stock.

Weighted average shares outstanding — assuming dilution	31.6	31.9	31.2

56

Table of Contents

We use the treasury stock method to calculate the effect of outstanding share-based compensation awards, which requires the computation of total employee proceeds as the sum of (a) the amount the employee must pay upon exercise of the award, (b) the amount of unearned share-based compensation costs attributed to future services and (c) the amount of tax benefits, if any, that would be credited to additional paid-in capital assuming exercise of the award. Shares, under share-based compensation awards, for which the total employee proceeds exceed the average market price over the applicable period have an anti-dilutive effect on earnings per share, and accordingly, are excluded from the calculation of diluted earnings per share.

In the years ended December 31, 2013 and 2012, stock options to purchase 0.1 million shares and 0.6 million shares, respectively, of common stock were excluded from the calculation of dilutive earnings per share because the options' exercise prices were greater than the average market price of the common shares and, therefore, the effect would have been anti-dilutive. As we had a loss from continuing operations for the years ended December 31, 2013 and 2012, the effect of including dilutive securities in the earnings per share calculation would have been anti-dilutive. Accordingly, all shares under share-based compensation awards were excluded from the calculation of loss from continuing operations attributable to OM Group, Inc. common stockholders assuming dilution and net loss attributable to OM Group, Inc. common stockholders assuming dilution.

Note 14 — Share-Based Compensation

On May 8, 2007, our stockholders approved the 2007 Incentive Compensation Plan (the "2007 Plan"). Under the 2007 Plan, we may grant stock options, stock appreciation rights, restricted stock awards and phantom stock and restricted stock unit awards to selected employees and non-employee directors. The 2007 Plan also provides for the issuance of common stock to non-employee directors as all or part of their annual compensation for serving as directors, as may be determined by the board of directors. The total number of shares of common stock available for awards under the 2007 Plan (including any annual stock issuances made to non-employee directors) is 3,000,000. The 2007 Plan provides that no more than 1,500,000 shares of common stock may be the subject of awards that are not stock options or stock appreciation rights. In addition, no more than 250,000 shares of common stock may be awarded to any one person in any calendar year, whether in the form of stock options, restricted stock or another form of award. The 2007 Plan provides that all options granted must have an exercise price of not less than the per share fair market value on the date of grant and that no option may have a term of more than ten years. We satisfy stock option exercises and restricted stock awards through the issuance of authorized but unissued shares or treasury shares.

Set forth below is a summary of share-based compensation expense for option grants, restricted stock awards and restricted stock unit awards included as a component of Selling, general and administrative expenses in the Statements of Consolidated Operations for the year ended December 31:

	2013	2012	2011
Stock options and restricted stock awards	\$5.4	\$5.0	\$6.1
Restricted stock unit awards	0.3	0.2	0.1
Share-based compensation expense - employees	\$5.7	\$5.2	\$6.2

Share-based compensation expense - non-employee directors	\$0.5	\$0.5	\$0.4
---	-------	-------	-------

No tax benefit for share-based compensation was realized during 2013, 2012 or 2011 as a result of the valuation allowance against U.S. deferred tax assets.

At December 31, 2013, there was \$7.4 million of unrecognized compensation expense related to unvested share-based awards. That cost is expected to be recognized as follows: \$4.4 million in 2014, \$2.8 million in 2015 and \$0.2 million in 2016 as a component of Selling, general and administrative expenses. Unearned compensation expense is recognized over the vesting period for the particular grant. Total unrecognized compensation cost will be adjusted for future changes in actual and estimated forfeitures, updated vesting assumptions for the performance awards, and fluctuations in the fair value of restricted stock unit awards.

Our non-employee directors are paid a portion of their annual retainer in unrestricted shares of common stock. For purposes of determining the number of shares of common stock to be issued, the 2007 Plan provides that shares are to

be valued at the average of the high and low sale price of the Company's common stock on the NYSE on the last trading date of the quarter. Pursuant to this plan, we issued 18,069 shares in 2013, 23,752 shares in 2012 and 10,239 shares in 2011 to non-employee directors.

Table of Contents

Stock Options

Options granted generally vest in equal increments over a three-year period from the grant date. Upon any change in control of the Company, as defined in the applicable plan, or upon death, disability or retirement, the stock options become 100% vested and exercisable. We account for options that vest over more than one year as one award and recognizes expense related to those awards on a straight-line basis over the vesting period.

During 2013, 2012 and 2011 we granted stock options to purchase 273,200, 238,319 and 217,489 shares of common stock, respectively. Included in the 2012 and 2011 grants are stock options to purchase 4,419 and 5,289 shares of common stock with a vesting period of one year, which were granted to our Chief Executive Officer (“CEO”) in connection with achievement of financial performance criteria in 2011 and 2010 under our high-performance incentive plan.

The fair value of options was estimated at the date of grant using a Black-Scholes options pricing model with the following weighted-average assumptions:

	2013		2012		2011	
Risk-free interest rate	1.09	%	1.1	%	2.7	%
Dividend yield	—		—		—	
Volatility factor of Company common stock	54	%	55	%	56	%
Weighted-average expected option term (years)	6		6		6	
Weighted-average grant-date fair value	\$13.49		\$15.29		\$19.93	

The risk-free interest rate assumption is based upon the U.S. Treasury yield curve appropriate for the term of the options being valued. The dividend yield assumption was zero for the awards in all years presented as we intended to continue to retain earnings for use in the operations as of the time of the award issuances. Expected volatilities are based on historical volatility of our common stock. The expected term of options granted is determined using the simplified method allowed by Staff Accounting Bulletin (“SAB”) No. 110 as historical data was not sufficient to provide a reasonable estimate. Under this approach, the expected term is presumed to be the mid-point between the vesting date and the end of the contractual term.

The following table sets forth the number of option shares and weighted-average grant-date fair value:

	Shares	Weighted-Average Fair Value at Grant Date
Non-vested at December 31, 2011	425,246	\$ 18.17
Granted during 2012	238,319	15.29
Vested during 2012	(205,087)) 16.85
Forfeited during 2012	(15,852)) 19.03
Non-vested at December 31, 2012	442,626	17.20
Granted during 2013	273,200	13.49
Vested during 2013	(214,816)) 17.37
Forfeited during 2013	(64,983)) 16.02
Non-vested at December 31, 2013	436,027	\$ 14.78

A summary of our stock option activity for 2013 is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2013	1,393,186	\$34.81		
Granted	273,200	13.49		
Exercised	(105,908)) 26.52		
Expired unexercised	(186,922)) 20.91		

Edgar Filing: OM GROUP INC - Form 10-K

Forfeited	(64,983) 16.02		
Outstanding at December 31, 2013	1,308,573	\$33.17	5.75	\$7,799
Vested or expected to vest at December 31, 2013	1,288,056	\$33.22	5.71	\$7,668
Exercisable at December 31, 2013	872,546	\$35.44	4.33	\$4,456

58

Table of Contents

The fair value of options that vested during 2013, 2012 and 2011 was \$3.7 million, \$3.5 million and \$3.4 million, respectively. The intrinsic value of options exercised in 2013 and 2011 was \$1.2 million and \$0.1 million, respectively. No stock options were exercised in 2012. The intrinsic value of an option represents the amount by which the market value of the stock exceeds the exercise price of the option.

We received cash payments of \$2.8 million and \$0.4 million in 2013 and 2011, respectively, in connection with the exercise of stock options previously granted. The Company does not settle stock options for cash.

Restricted Stock

We issue restricted stock and, beginning in 2012, issue stock-settled restricted stock units to our employees in the U.S. ("Restricted Stock," and "US-Based RSUs," respectively). We issue restricted stock units to employees outside the U.S. ("International RSUs"). Certain of the Restricted Stock, US-Based RSUs, and International RSU awards contain time-based vesting conditions and certain of the awards contain performance-based vesting conditions.

The Restricted Stock and US-Based RSU awards are in all cases settled in our common stock. The value of the Restricted Stock and US-Based RSU awards are based upon the market price of an unrestricted share of our common stock at the date of grant. We recognize compensation expense ratably over the requisite performance period based upon the number of awards that are anticipated to vest. The number of awards anticipated to vest is evaluated quarterly and compensation expense is adjusted accordingly. We may withhold shares issued upon vesting if directed by individual employees as a means of meeting minimum statutory tax withholding requirements. We hold the surrendered shares as treasury stock.

The International RSUs are settled in a cash payment that is based on the market price of an unrestricted share of our common stock at the vesting date. Since the awards will be settled in cash, they are treated as a liability award in accordance with the "Stock Compensation" topic of the ASC and are presented as a component of Other non-current liabilities on the Consolidated Balance Sheets. During the vesting period we remeasure the fair value of the International RSUs at each reporting date until the award is settled. Fluctuations in the fair value of the International RSUs are recorded as increases or decreases to compensation expense. Over the life of these awards, the cumulative amount of compensation expense recognized will match the actual cash paid.

Performance-Based Awards

During 2013, 2012 and 2011, we awarded 245,950, 130,500 and 117,770 shares, respectively, of performance-based Restricted stock to U.S. employees and 35,150, 33,450, and 31,125 performance-based International RSUs, respectively, to employees outside the U.S. (collectively "Performance-Based Awards").

The number of Performance-Based Awards that ultimately vest is based upon our achievement of specific measurable financial performance criteria. A recipient of Performance-Based Awards may earn a total award ranging from 0% to 100% of the initial grant, with the target being 50% of the initial grant. The Performance-Based Awards granted during 2013 will vest upon the satisfaction of established performance criteria based on average return on net assets and the performance of our share price as compared to the performance of the Russell 2000 unweighted index over a three-year performance period ending December 31, 2015. The Performance-Based Awards granted during 2012 will vest upon the satisfaction of established performance criteria based on consolidated EBITDA margin percentage (defined as adjusted operating profit plus depreciation and amortization expense divided by net sales) percentage and average return on net assets, in each case over a three-year performance period ending December 31, 2014. The performance period for Performance-Based Awards granted during 2011 ended on December 31, 2013. The vesting of these awards was based on the achievement of consolidated EBITDA margin percentage (as defined above) measured against a predetermined peer group, and average return on net assets, in each case over three-year performance periods ending December 31, 2013. Based upon our performance against the stated performance objectives, 20% of the Performance-Based Awards granted in 2011 remain available to vest, or roughly 18,539 shares of Restricted Stock and 3,716 International RSUs. Vesting is conditional on approval from the Compensation Committee that the performance objectives were satisfied. The Compensation Committee makes this determination in

the first quarter of 2014.

Upon any change in control of the Company, as defined in the plan, the Performance-Based Awards become vested at the target level. In the event of retirement, death, or disability, a pro rata number of Performance-Based Awards shall remain eligible for vesting at the end of the performance period.

59

Table of Contents

A summary of our Performance-Based Awards for 2013 is as follows:

	Restricted Stock Units	Shares of Restricted Stock	Weighted Average Grant Date Fair Value
Non-vested at January 1, 2013	82,389	341,210	\$32.26
Granted	35,150	245,950	26.72
Vested	(87) (512) 30.69
Forfeited	(55,777) (151,558) 31.03
Non-vested at December 31, 2013	61,675	435,090	\$29.56
Expected to vest as of December 31, 2013	8,889	77,498	

For awards granted prior to 2010, the following performance-based shares vested and were issued for the year ended December 31:

	2013	2012	2011
Vested based on meeting performance criteria	—	—	1,773
Shares surrendered to pay withholding taxes	—	—	(578

Time-Based Awards

In 2013 and 2012 we awarded 60,000 and 69,327 time-based restricted stock units (RSUs); in 2012 and 2011 we issued 20,000 and 63,592 shares of time-based restricted stock, respectively (collectively "US Time-Based Awards"). Included in the 2012 and 2011 grants are 2,177 and 2,767 units, respectively, of time-based awards with a vesting period of one year, which were granted to our Chief Executive Officer ("CEO") in connection with achievement of financial performance criteria under our then high performance annual incentive program. The value of the restricted stock units and restricted stock awarded in 2013, 2012 and 2011, based upon the market price of an unrestricted share of our common stock at the date of grant, was \$1.5 million, \$2.6 million and \$2.3 million, respectively. During 2013, 2012 and 2011, we also awarded 7,950, 17,060, and 9,095 Time-Based International RSUs, respectively.

The US Time-Based Awards and Time-Based International RSUs have similar terms and vest three years from the date of grant, subject to the recipient remaining employed by the Company on that date. Upon any change in control of the Company, as defined in the plan, or upon retirement, the Time-Based Awards become 100% vested. A pro rata number of Time-Based Awards will vest in the event of death or disability prior to the stated vesting date.

A summary of our Time-Based awards for 2013 is as follows:

	Time-Based International RSUs	Shares of US Time-Based Awards	Weighted Average Grant Date Fair Value - US Time-Based Awards
Non-vested at January 1, 2013	35,505	198,637	\$31.46
Granted - three year vesting	7,950	60,000	24.39
Granted - one year vesting	—	—	—
Vested	(9,750) (56,477) 30.65
Forfeitures	(17,225) (21,600) 32.36
Non-vested at December 31, 2013	16,480	180,560	\$29.26
Expected to vest as of December 31, 2013	13,245	176,476	

The following US Time-Based Awards vested and were issued in the respective years ended December 31:

Edgar Filing: OM GROUP INC - Form 10-K

	2013	2012	2011
Vested - three year vesting period	54,300	22,100	15,575
Vested -one year vesting period	2,177	2,767	—
Shares surrendered to pay withholding taxes	(19,645) (8,538) (5,023
Net shares issued	36,832	16,329	10,552

Note 15 — Commitments and Contingencies

During 2009 and 2010, GTL was served in Jersey, Channel Islands, with injunctions that prohibited GTL from making payments of up to \$108.3 million to Gécamines, a minority partner in GTL, including amounts payable for raw material purchases, and restrained Gécamines from removing any of its assets from the island of Jersey up to the amount of 14.5 million British Pounds. In both matters, payments which we would typically have made to Gécamines were instead placed on deposit with the Royal Court of Jersey ("Court"). As of December 31, 2012, \$22.8 million remained on deposit with the Court and was recorded as Restricted cash on deposit and Liability related to joint venture partner injunction in the Consolidated Balance Sheets. In January 2013, the case related to the second injunction was dropped, and remaining funds on deposit with the Court were released by GTL to Gécamines in March 2013. In connection with the divestiture of the cobalt-based business, our interest in GTL was transferred to the joint venture partners on March 29, 2013.

We have potential contingent liabilities with respect to environmental matters related to our former operations in Brazil and Germany which were sold in 2003. Environmental cost-sharing arrangements are in place between the original owner and operator of these operations and between the Company and the subsequent purchaser of these operations. We have reviewed the limited information made available to us on the environmental conditions and are awaiting more detailed information from the purchaser. We cannot currently evaluate whether or not, or to what extent, we will be responsible for any remediation costs until more detailed information is received.

From time to time, we are subject to various legal and regulatory proceedings, claims and assessments that arise in the normal course of business. The ultimate resolution of such proceedings, claims and assessments is inherently unpredictable and, as a result, our estimates of liability, if any, are subject to change and actual results may materially differ from such estimates. Our estimate of any costs to be incurred as a result of these proceedings, claims and assessments are accrued when the liability is considered probable and the amount can be reasonably estimated. We believe the amount of any current potential liability with respect to legal and regulatory proceedings, claims and assessments will not have a material adverse effect upon our financial condition, results of operations, or cash flows.

Note 16 — Lease Obligations

We rent office space, equipment, and land under long-term operating leases. Our operating lease expense was \$8.8 million in 2013, \$9.6 million in 2012 and \$10.7 million in 2011.

Future minimum payments under noncancellable operating leases at December 31, 2013 are as follows for the years ending December 31:

2014	\$6.1
2015	5.7
2016	3.9
2017	3.5
2018	2.8
Thereafter	10.2
Total minimum lease payments	\$32.2

Note 17 — Reportable Segments and Geographic Information

We determine our segments based on how the chief operating decision maker makes decisions about allocating resources to segments and measuring their performance. We operate and report our results in four operating segments: Magnetic Technologies, Battery Technologies, Specialty Chemicals and Advanced Materials. Intersegment transactions are generally recognized based on current market prices and are eliminated in consolidation. Corporate is comprised of general and administrative expenses not allocated to the operating segments.

The Magnetic Technologies segment is engaged in the development, manufacturing and distribution of industrial-use magnetic products and systems for electronic equipment markets, including the renewable energy, automotive

systems, construction & mining and industrial sectors.

The Specialty Chemicals segment develops, produces and supplies chemicals for electronic applications, industrial applications including coatings, composites and tire; and photomasks used by customers to produce semiconductors and related products.

The Battery Technologies segment provides advanced batteries, battery management systems, battery-related research and energetic devices for defense, space and medical markets.

61

Table of Contents

The Advanced Materials segment manufactured inorganic products using unrefined cobalt and other metals and served the mobile energy storage, renewable energy, automotive systems, construction and mining, and industrial end markets. After the divestiture of the business in March 2013, we entered into two agreements to 1) act as intermediary in a cobalt feed supply agreement and 2) serve as the U.S. distribution for refined cobalt products, an agreement that was concluded December 31, 2013.

There are a limited number of supply sources for rare earth materials. Production problems, incurred demand, and instability in some supplier countries may affect supply and market price of these materials. The following table reflects the results of our reportable segments:

Table of Contents

The first quarter of 2012 includes a pre-tax gain of \$2.9 million recognized on the sale of property. The fourth quarter of 2012 includes a \$3.1 million discrete tax loss (excluding noncontrolling interests) to increase the allowance against GTL's prepaid tax asset.

The VAC inventory purchase accounting step-up and related LCM charges were \$15.7 million, \$31.5 million, \$0.2 million and \$8.4 million for the first, second, third and fourth quarter of 2012, respectively.

The third and fourth quarter of 2012 include \$1.2 million and \$5.3 million and of accelerated amortization of deferred financing fees, respectively.

The third quarter of 2012 includes a \$2.5 million settlement charge associated with the lump-sum cash settlement to certain participants in our defined benefit pension plans.

Note 19 - Subsequent Events

On February 11, 2014, our Board of Directors declared a dividend of \$0.075 per share payable on March 7, 2014 to the holders of record of all issued and outstanding shares of our Common Stock as of the close of business on February 24, 2014.

Table of Contents

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There are no such changes or disagreements.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2013. As defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act"), disclosure controls and procedures are controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported on a timely basis, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Our disclosure controls and procedures include components of our internal control over financial reporting.

Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of December 31, 2013.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision of the Chief Executive Officer and Chief Financial Officer, management conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2013 based on the framework set forth in 1992 by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control-Integrated Framework". Based on that evaluation, management has concluded that our internal control over financial reporting was effective as of December 31, 2013.

The Company's independent registered public accounting firm, Ernst & Young LLP, audited the Company's internal control over financial reporting and, based on that audit, issued an attestation report regarding the Company's internal control over financial reporting, which is included in this Annual Report.

Changes in Internal Controls

There were no changes in the Company's internal control over financial reporting, identified in connection with management's evaluation of internal control over financial reporting, that occurred during the three months ended December 31, 2013 and materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

Table of Contents

PART III

Item 10. Directors, Executive Officers of the Registrant and Corporate Governance

Information with respect to our directors will be set forth under the heading “Proposal 1. Election of Directors” in the Company’s proxy statement to be filed pursuant to Regulation 14A under the Exchange Act in connection with the 2014 Annual Meeting of Stockholders of the Company (the “2014 Proxy Statement”) and is incorporated herein by reference. For information with respect to our executive officers, see “Executive Officers of the Registrant” in Part I of this Form 10-K.

Information with respect to the our audit committee, nominating and governance committee, compensation committee and the audit committee financial experts will be set forth in the 2014 Proxy Statement under the heading “Corporate Governance and Board Matters” and is incorporated herein by reference.

Information with respect to compliance with Section 16(a) of the Exchange Act will be set forth in the 2014 Proxy Statement under the heading “Section 16(a) Beneficial Ownership Reporting Compliance” and is incorporated herein by reference.

We have adopted a Code of Conduct and Ethics that applies to all of our employees, including the principal executive officer, the principal financial officer and the principal accounting officer. The Code of Conduct and Ethics, our corporate governance principles and all committee charters are posted on the “Corporate Governance” portion of the our website (www.omgi.com). A copy of any of these documents is available in print free of charge to any stockholder who requests a copy, by writing to OM Group, Inc., 950 Main Avenue, Suite 1300, Cleveland, Ohio 44113 USA, Attention: Rob Pierce, Vice President, Finance.

Table of Contents

On June 3, 2013, we filed the annual certification by our CEO that, as of the date of the certification, he was unaware of any violation by the Company of the corporate governance listing standards of the New York Stock Exchange.

Item 11. Executive Compensation

Information with respect to executive and director compensation and compensation committee interlocks and insider participation, together with the report of the compensation committee regarding the compensation discussion and analysis will be set forth in the 2014 Proxy Statement under the headings “Executive Compensation,” “Corporate Governance and Board Matters — Compensation Committee Interlocks and Insider Participation” and “Compensation Committee Report” and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information with respect to security ownership of certain beneficial owners and management will be set forth in the 2014 Proxy Statement under the heading “Security Ownership of Directors, Executive Officers and Certain Beneficial Owners — Beneficial Ownership” and is incorporated herein by reference.

Equity Compensation Plan Information

The following table sets forth information concerning common stock issuable pursuant to our equity compensation plans as of December 31, 2013.

	Number of securities to be issued upon exercise of outstanding options	Weighted-average exercise price of outstanding options	Number of securities remaining available for future issuance under equity compensation plans (excluding securities issuable under outstanding options)
Equity Compensation Plans Approved by the Stockholders	1,219,639	\$33.17	799,342
Equity Compensation Plans Not Approved by the Stockholders(a)	88,934	\$33.67	—
Total	1,308,573	\$33.17	799,342

As an inducement to join the Company, on June 13, 2005, the Chief Executive Officer was granted options to purchase 88,934 shares of common stock that are not covered by the equity compensation plans approved by the (a) our stockholders. These options have an exercise price of \$33.67 per share (the market price of our stock on the grant date was \$24.89) and became exercisable on May 31, 2008. The options have an expiration date of June 13, 2015.
