18. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

19. FAIR VALUE MEASUREMENTS

In September 2006, Statement of Financial Accounting Standards (SFAS) No. 157, "Fair Value Measurements," was issued. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements. FASB Staff Position (FSP) 157-2 amended SFAS No. 157 to delay the effective date of SFAS No. 157 for all nonfinancial assets and nonfinancial liabilities, except for items that are measured at fair value on a recurring basis, to fiscal years beginning after November 15, 2008.

The adoption of SFAS No. 157 for financial assets and financial liabilities, effective January 1, 2008, did not have a material impact on Titan's consolidated financial position, results of operations or cash flows. The Company is evaluating the effect the adoption of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities will have on its consolidated financial position, results of operations and cash flows.

SFAS No. 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1 – defined as quoted prices in active markets for identical instruments; Level 2 – defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3 – defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis consisted of the following (in thousands):

OVERVIEW

Titan International, Inc. and its subsidiaries are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Agricultural Market: Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

Earthmoving/Construction Market: The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. Consumer Market: Titan builds a variety of products for all-terrain vehicles (ATV), turf, golf and trailer applications. Titan's sales in the consumer market include sales to Goodyear, which are under an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company provides wheels/tires and assembles brakes, actuators and components for the domestic boat, recreational and utility trailer markets.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, Caterpillar Inc., CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 63% of inventories and the last-in, first-out (LIFO) method for approximately 37% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should experience change, adjustments to estimated provisions would be necessary.

Impairment of Goodwill

The Company reviews goodwill to assess recoverability from future operations during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company had goodwill of \$11.7 million at September 30, 2008. Significant assumptions relating to future operations must be made when estimating future cash flows in analyzing goodwill for impairment. Should unforeseen events occur or operating trends change significantly, impairment losses could occur.

Valuation of Investment Accounted for as Available-for-Sale Security

The Company has an investment in Titan Europe Plc of \$11.6 million as of September 30, 2008, representing a 17.3% ownership position. Titan Europe Plc is publicly traded on the AIM market in London, England. This investment is recorded as "Investment in Titan Europe Plc" on the consolidated balance sheet. In accordance with SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company records the Titan Europe Plc investment as an available-for-sale security and reports this investment at fair value, with unrealized gains and losses excluded from earnings and reported in a separate component of stockholders' equity. Should the fair value decline below the cost basis, the Company would be required to determine if this decline is other than temporary. If the decline in fair value were judged to be other than temporary, an impairment charge would be recorded. Should unforeseen events occur or investment trends continue or change significantly, impairment losses could occur. Declared dividends on this investment are recorded in income as a component of other income.

The September 30, 2008, fair value of \$11.6 million was below the Company's cost basis of \$40.3 million. The unrealized loss on the Titan Europe Plc investment was \$28.7 million. The unrealized loss resulted from a decline in the market price of Titan Europe Plc of over 66% in the third quarter of 2008. No impairment charge has been recorded as this decline below cost basis was judged to be temporary at September 30, 2008. Should unforeseen events occur or investment trends continue or change significantly, impairment losses could occur.

Income taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and

liabilities. The Company assesses the realizability of its deferred tax asset positions in accordance with SFAS No. 109, "Accounting for Income Taxes."

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

Asset and Business Acquisitions

The allocation of purchase price for asset and business acquisitions requires management estimates and judgment as to expectations for future cash flows of the acquired assets and business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair value for purchase price allocations. If the actual results differ from the estimates and judgments used in determining the purchase price allocations, impairment losses could occur relating to any intangibles recorded in the acquisition. To aid in establishing the value of any intangible assets at the time of acquisition, the Company typically engages a professional appraisal firm.

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that purchased a final annuity settlement in 2002. During the first nine months of 2008, the Company contributed cash funds of \$0.1 million to its frozen pension plans. Titan expects to contribute approximately \$0.1 million to these frozen defined pension plans during the remainder of 2008. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 20 to the Company's financial statements on Form 10-K for the fiscal year ended December 31, 2007.

Financial Condition and Results of Operations

Year-to-Date

Income from operations on a segment basis does not include corporate expenses or depreciation and amortization expense related to property, plant and equipment carried at the corporate level totaling \$31.7 million for the nine months ended September 30, 2008, as compared to \$30.0 million for 2007.

Corporate expenses for the nine months ended September 30, 2008, were composed of selling and marketing expenses of approximately \$14.6 million and administrative expenses of approximately \$17.1 million.

Corporate expenses for the nine months ended September 30, 2007, were composed of selling and marketing expenses of approximately \$11.6 million and administrative expenses of approximately \$18.4 million.

The higher selling and marketing costs for the nine months ended September 30, 2008, as compared to 2007 resulted from the record year-to-date sales levels. Administrative costs showed a slight reduction for the nine months ended September 30, 2008, as compared to 2007.

MARKET RISK SENSITIVE INSTRUMENTS

The Company's risks related to foreign currencies, commodity prices and interest rates are consistent with those for 2007. For more information, see the "Market Risk Sensitive Instruments" discussion in the Company's Form 10-K for the fiscal year ended December 31, 2007.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

As of September 30, 2008, the Company had \$35.6 million of cash balances. This cash balance decreased by \$22.7 million from December 31, 2007, due to the following cash flow items.

Operating cash flows

Summary of cash flows from operating activities (amounts in thousands):

	Nine months ended September 30,		
	2008	2007	Change
Net income	\$ 31,743	\$ 1,601	\$ 30,142

Noncash debt charge	0	13,376	(13,376)
Accounts receivable	(50,080)	(43,577)	(6,503)
Inventories	(15,651)	22,051	(37,702)
Accounts payable	40,954	28,762	12,192
Other current liabilities	6,082	9,737	(3,655)
Other operating activities	(11,960)	(189)	(11,771)
Cash provided by operating activities	\$ 30,168	\$ 55,135	\$ (24,967)

In the first nine months of 2008, operating activities provided cash of \$30.2 million. This cash was primarily provided by net income of \$31.7 million and a higher accounts payable balance of \$41.0 million due to higher and additional material costs. Included in net income were noncash charges of \$21.5 million for depreciation and amortization and a

\$7.5 million deferred income tax provision. Positive cash flows were offset by an increase in the accounts receivable balance of \$50.1 million due to record sales levels and an increase in inventories of \$15.7 million.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

For the first nine months of 2007, positive cash flows from operating activities of \$55.1 million resulted primarily from net income of \$1.6 million, increases of \$28.8 million in accounts payable and \$9.7 million in other current liabilities along with a decrease of \$22.1 million in inventories. Included as a reduction to net income were noncash charges of \$13.4 million for a debt conversion charge and \$21.5 million of depreciation and amortization. Positive cash flows were offset by an increase in accounts receivable balance of \$43.6 million.

Operating cash flows decreased \$25.0 million when comparing the nine months ended September 30, 2008, to the nine months ended September 30, 2007. The net income in the first nine months of 2008 was a \$30.1 million increase from the first nine months of 2007. However, the income for the first nine months of 2007 included a \$13.4 million noncash charge, which offset the increase in income. Also, the cash flows from inventories decreased \$37.7 million when comparing the nine months ended September 30, 2008, to the nine months ended September 30, 2007, as the result of increasing inventories. This increase in inventories was the result of higher raw material prices and the required inventory to meet higher sales demands.

Investing cash flows

Net cash used for investing activities was \$60.0 million in the first nine months of 2008, as compared to \$29.3 million in the first nine months of 2007. The Company invested a total of \$60.1 million in capital expenditures in the first nine months of 2008, compared to \$20.9 million in 2007. Of the \$60.1 million of capital expenditures in the first nine months of 2008, approximately \$47 million relates to the Company's Giant OTR Project and the remaining expenditures of approximately \$13 million represent various equipment purchases and improvements to enhance production capabilities.

The Company estimates that costs related to the Giant OTR Project at this time are approximately \$93 million, of which approximately \$69 million was disbursed from inception of the Giant OTR Project through September 30, 2008. The large increase in cash used for investing activities in the first nine months of 2008, as compared to the first nine months of 2007, was a result of the capital expenditures on the Giant OTR Project. In addition to the Giant OTR Project, the Company estimates that its capital expenditures for other projects for the remainder of 2008 could be approximately \$5 million.

Financing cash flows

In the first nine months of 2008, cash of \$7.2 million was provided by financing activities. This cash was primarily provided by \$3.5 million in proceeds from the exercise of stock options and \$4.1 million of excess tax benefit from stock options exercised.

In the first nine months of 2007, cash of \$3.9 million was used for financing activities. This cash use was primarily the result of net debt payment of \$10.2 million offset by \$6.1 million in proceeds from stock option exercises.

Financing cash flows increased \$11.1 million when comparing the first nine months of 2008 to the first nine months of 2007. This increase resulted primarily from a decrease in the cash used for debt payment.

Debt Covenants

The Company's revolving credit facility contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.

- If the 30-day average of the outstanding revolver balance exceeds \$225 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
- Limitations on investments, dispositions of assets and guarantees of indebtedness.
- Other customary affirmative and negative covenants.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company is in compliance with these covenants and restrictions as of September 30, 2008. The collateral coverage was calculated to be approximately 73 times the outstanding revolver balance at September 30, 2008.

The fixed charge coverage ratio did not apply for the quarter ended September 30, 2008. The credit facility usage was \$6.1 million at September 30, 2008, consisting exclusively of letters of credit of \$6.1 million with no cash borrowings.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters of the year.

Liquidity Outlook

At September 30, 2008, the Company had \$35.6 million of cash and cash equivalents and \$243.9 million of unused availability under the terms of its revolving credit facility (credit facility). The availability under the Company's \$250 million credit facility was reduced by \$6.1 million for outstanding letters of credit. The Company expects to contribute approximately \$0.1 million to its frozen defined benefit pension plans during the remainder of 2008. At December 31, 2007, the Company had a net operating loss carryforward of approximately \$13 million, which is expected to be utilized to reduce the Company's income tax payments in 2008.

In May 2007, Titan's Board of Directors approved funding for the Company to increase giant OTR mining tire production capacity to include 57-inch and 63-inch giant radial tires (the "Giant OTR Project"). The Company estimates that current commitments related to the Giant OTR Project at this time are approximately \$93 million, of which approximately \$69 million was disbursed from inception of the Giant OTR Project through September 30, 2008. Additional capital expenditure commitments will be incurred through 2008 as the Giant OTR Project moves to completion. The final cost of these additional OTR capital items have not been finalized at this time.

The Company currently anticipates that cash on hand and anticipated internal cash flows from operations will allow the Company sufficient funds for completion of the Giant OTR Project. In addition to the Giant OTR Project, Titan estimates that its capital expenditures for other projects for remainder of 2008 could be approximately \$5 million.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs and capital expenditures. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding may be negatively impacted.

PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that purchased a final annuity settlement in 2002. These plans are described in Note 20 of the Company's Notes to Consolidated Financial Statements in the 2007 Annual Report on Form 10-K.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$0.1 million to these frozen defined pension plans during the remainder of 2008.

MARKET CONDITIONS AND OUTLOOK

Titan is experiencing strong demand for the Company's agricultural and earthmoving/construction products. This strong demand is expected to continue through 2008. The strength in the agricultural market is the result of higher commodity prices which have resulted from the continuing use of biofuels. High prices for metals, oil and gas have created a large demand for the Company's earthmoving and mining products.

In May 2007, Titan's Board of Directors approved funding for the Company to increase giant OTR mining tire production capacity to include 57-inch and 63-inch giant radial tires. The Company began start-up production of these giant mining tires in July 2008.

Higher energy, raw material and petroleum-based product costs may continue to negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales are forecasted to remain robust through 2008. The farm economy is being helped by strong commodity prices. However, the farm economy is also affected by high input costs for fuel and fertilizer and the current banking and credit crisis. The increasing demand for grain-based ethanol and soybean-based biodiesel fuel has increased commodity prices and should support farm income levels in the long-term. Ethanol production is projected to continue to expand sharply through 2009/2010. The increasing demand for biofuels has supported all agricultural commodity prices as acreage has been shifted from other crops to those used in biofuels. In April 2008, Titan signed a three-year agreement to supply farm tires to various John Deere affiliates. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Sales for the earthmoving/construction market are expected to remain strong in 2008. Metals, oil and gas prices have remained high and at levels that are attractive for continued investment, which will maintain support for earthmoving and mining sales. However, the decline in the United States housing market has caused a decline in equipment used for housing construction. The giant OTR project should begin to add significant capacity for giant mining tires in the remainder of 2008. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the current banking and credit crisis.

CONSUMER MARKET OUTLOOK

The current overall uncertainty in consumer spending resulting from the current banking and credit crisis, housing market decline, and high energy and food costs makes consumer market projections especially difficult. Titan's sales in the consumer market include sales to Goodyear, which includes an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company's consumer market sales will fluctuate significantly related to sales volumes under the off-take/mixing agreement with Goodyear which have been significantly lower in 2008 as compared to the previous year. The Company expects challenging conditions for the consumer market for the remainder of 2008. Many factors affect the consumer market including weather, competitive pricing, energy prices and consumer attitude.

NEW ACCOUNTING STANDARDS

Statement of Financial Accounting Standards Number 141 (revised 2007)

This statement requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. This statement is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.

Statement of Financial Accounting Standards Number 160

In December 2007, SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements," was issued. The Company is evaluating the effect the adoption of this standard will have on its consolidated financial position, results of operations and cash flows.
