**Recent Developments**

**Acquisition of Majority Voting Interest in Embratel**

On March 12, 2004, we entered into a definitive agreement with WorldCom, Inc. and certain of its subsidiaries to purchase their entire indirect interest in Embratel Participações S.A., or Embratel. Embratel is a Brazilian telecommunications services provider with leading positions in domestic and international long distance and data services. The purchase price is U.S.\$360 million in cash. The agreement is subject to conditions precedent, including the receipt of required regulatory approvals in Brazil, the approval of the transaction by the U.S. bankruptcy court supervising the reorganization of WorldCom, and other, customary conditions precedent. Under certain circumstances, if the stock purchase agreement is terminated without our having received required regulatory approvals, WorldCom would be entitled to retain certain deposits made by us against the purchase price for the shares.

WorldCom's interest in Embratel represents approximately 51.7% of the voting stock (ordinary shares) and approximately 19.2% of the total capital stock of Embratel. The remaining ordinary shares are publicly traded on the São Paulo Stock Exchange, and the non-voting stock (preferred shares) is traded on the São Paulo Stock Exchange and in ADR form on the New York Stock Exchange. Pursuant to requirements of Brazilian law, after the closing of its purchase of WorldCom's interest in Embratel, we expect to make a cash tender offer to purchase any and all of the remaining ordinary shares at a price per share equal to 80% of the price per share paid to WorldCom. The additional cost to us if all ordinary shares are tendered would be approximately U.S.\$270 million.

**Acquisition of AT&T Latin America**

On February 24, 2004, we announced that our acquisition of substantially all of the assets of AT&T Latin America Corp. had been consummated and that all necessary regulatory approvals for the acquisition had been obtained. Pursuant to the transaction, we acquired AT&T Latin America's operating subsidiaries in Argentina, Brazil, Chile, Colombia and Peru.

**World Trade Organization Dispute Brought by the United States Against Mexico**

In August 2000, the United States initiated World Trade Organization dispute settlement against Mexico regarding alleged illegal barriers to competition in the Mexican telecommunications market. The United States and Mexican governments recently have reported that the WTO panel has reached a decision that is, at least in part, adverse to Mexico. An adverse decision by the WTO could lead to trade sanctions against Mexico and could prompt changes in regulation affecting our business. Mexican officials have stated that the WTO's resolution is expected to become publicly available in April 2004.

Comments on local financial results

The local service income statement, prepared in accordance with accounting separation principles, shows that revenues for the fourth quarter decreased 1.6% compared with the same period of the previous year. This result was due to the decrease of measured service rates in real terms, partially offset by higher interconnection revenues. For the full year, local revenues had an annual increase of 0.2% totaling 85,241 million pesos.

Operating costs and expenses increased 1.8% compared with the fourth quarter of 2002. This result was due to higher depreciation derived from the variation of the peso to the US dollar, partially offset by a decrease of 4.7% and 1.2% in cost of sales and services and commercial, administrative and general expenses, respectively. Additionally, costs related to interconnection decreased 2.0% in the fourth quarter. For the full year, total operating costs and expenses increased 1.3% totaling 59,331 million pesos

In the fourth quarter, operating income decreased 8.7% totaling 6,452 million pesos and EBITDA totaled 10,258 million pesos, similar to the amount registered in the same period of 2002. For the full year, operating income decreased 2.0% and EBITDA decreased 0.7%, totaling 25,910 and 39,977 million pesos, respectively.

### Comments on Long Distance Financial Results

The long distance income statement prepared in accordance with accounting separation principles shows that long distance revenues decreased 0.5% in the fourth quarter. The decrease in revenues was due the reduction of domestic and international long distance rates in real terms, partially offset by a recovery in international long distance traffic. For the full year, long distance revenues totaled 24,513 million pesos, a decrease of 3.6% compared with the previous year.

Operating costs and expenses in the fourth quarter decreased 4.1% compared with the same period of last year. This decrease is the result of the strict control on cost of sales and services that decreased 22.8% as well as in commercial, administrative and general expenses that also decreased 6.0%. Depreciation increased 17.1% because of the variation of the peso to the US dollar. For the full year, operating costs and expenses decreased 0.6%, totaling 17,366 million pesos.
