Quarterly Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934
For the Quarterly Period Ended May 31, 2014

Or

Transition Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934
For the Transition Period from _____ to _____
Commission File Number 0-22496

SCHNITZER STEEL INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

OREGON

(State or other jurisdiction of
incorporation or organization)

93-0341923

(I.R.S. Employer
Identification No.)

299 SW Clay St., Suite 350

Portland, OR

(Address of principal executive offices)

(503) 224-9900

(Registrant's telephone number, including area code)

97201

(Zip Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (check one)

Large accelerated filer Accelerated filer Non-accelerated filer Smaller Reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

The Registrant had 26,381,405 shares of Class A common stock, par value of \$1.00 per share, and 305,900 shares of Class B common stock, par value of \$1.00 per share, outstanding as of June 23, 2014.

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

Basis of Presentation

The accompanying Unaudited Condensed Consolidated Financial Statements of Schnitzer Steel Industries, Inc. (the "Company") have been prepared pursuant to generally accepted accounting principles in the United States of America ("U.S. GAAP") for interim financial information and the rules and regulations of the United States Securities and Exchange Commission (the "SEC") for Form 10-Q, including Article 10 of Regulation S-X. The year-end condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by U.S. GAAP. Certain information and note disclosures normally included in annual financial statements have been condensed or omitted pursuant to the rules and regulations of the SEC. In the opinion of management, all normal, recurring adjustments considered necessary for a fair statement have been included. Management suggests that these Unaudited Condensed Consolidated Financial Statements be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended August 31, 2013. The results for the three and nine months ended May 31, 2014 and 2013 are not necessarily indicative of the results of operations for the entire fiscal year.

Revision of Previously Issued Financial Statements

In the first quarter of fiscal 2014, an error was identified in the classification of the cash outflow of \$24.7 million for the purchase of a noncontrolling interest in a subsidiary as a use of cash in investing activities that, under generally accepted accounting principles, should have been reflected as a use of cash in financing activities in the Company's consolidated statements of cash flows included in the previously reported financial statements for the nine months ended May 31, 2013 included in the Quarterly Report on Form 10-Q and for the year ended August 31, 2013 included in the 2013 Annual Report on Form 10-K.

The Company assessed the materiality of this classification error under the guidance in ASC 250-10 relating to SEC's Staff Accounting Bulletin ("SAB") No. 99, Materiality, and concluded that the previously issued financial statements for the nine months ended May 31, 2013 and the year ended August 31, 2013 were not materially misstated. The Company also evaluated the impact of correcting the error through an adjustment to its financial statements and concluded, based on the guidance within ASC 250-10 relating to SAB No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements, to revise its previously issued financial statements to reflect the impact of the correction of the classification error. The consolidated statement of cash flows for the year ended August 31, 2013 will be revised in the Company's 2014 Annual Report on Form 10-K to correct the classification error. The consolidated statement of cash flows for the nine months ended May 31, 2013 presented in the accompanying Unaudited Condensed Consolidated Financial Statements has been corrected.

The revision had no impact on the Company's consolidated balance sheets, consolidated results of operations, earnings (loss) per share and net cash provided by operating activities in the consolidated statements of cash flows.

The effect of the revision on the line items within the Company's consolidated statements of cash flows for the nine months ended May 31, 2013 and the year ended August 31, 2013 is as follows (in thousands):

	Nine Months Ended May 31, 2013		Year Ended August 31, 2013			
	As Reported	Adjustments	As Revised	As Reported	Adjustments	As Revised
Investing Activities						
Purchase of noncontrolling interest	\$(24,734)	\$24,734	\$—	\$(24,734)	\$24,734	\$—
Net cash used in investing activities	(115,089)	24,734	(90,355)	(137,184)	24,734	(112,450)
Financing Activities						
Purchase of noncontrolling interest	—	(24,734)	(24,734)	—	(24,734)	(24,734)
Net cash provided by (used in) financing	60,023	(24,734)	35,289	20,587	(24,734)	(4,147)

activities

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Accounting Changes

In February 2013, an accounting standards update was issued that amends the reporting of amounts reclassified out of accumulated other comprehensive income. This standard does not change the current requirements for reporting net income or other comprehensive income in the financial statements. However, the guidance requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component, either on the face of the financial statement where net income is presented or in the notes to the financial statements. The Company adopted the new requirement in the first quarter of fiscal 2014 with no impact to the Company's Unaudited Condensed Consolidated Financial Statements, except for the change in presentation. The Company has chosen to present amounts reclassified out of accumulated other comprehensive income in the notes to the financial statements. See Note 11 - Accumulated Other Comprehensive (Income) Loss for further detail.

During the first quarter of fiscal 2014, the Company elected to change its annual goodwill impairment testing date from February 28 to July 1 of each year. See Note 5 - Goodwill for further detail.

Cash and Cash Equivalents

Cash and cash equivalents include short-term securities that are not restricted by third parties and have an original maturity date of 90 days or less. Included in accounts payable are book overdrafts representing outstanding checks in excess of funds on deposit of \$30 million and \$31 million as of May 31, 2014 and August 31, 2013, respectively.

Other Assets

The Company's other assets, exclusive of prepaid expenses, consist primarily of receivables from insurers, notes and other contractual receivables, and assets held for sale. Other assets are reported within either prepaid expenses and other current assets or other assets in the Condensed Consolidated Balance Sheets based on their expected use either during or beyond the current operating cycle of one year from the reporting date. Other assets are reported net of an allowance for credit losses on notes and other contractual receivables of \$8 million as of May 31, 2014 and August 31, 2013.

As of May 31, 2014 and August 31, 2013, the Company reported \$4 million and \$3 million of assets held for sale within prepaid expenses and other current assets in the Condensed Consolidated Balance Sheets. During the second quarter of fiscal 2014, the Company recorded impairment charges for the initial and subsequent write-down of certain equipment held for sale to its fair value less cost to sell of \$1 million, which are reported within other asset impairment charges in the Condensed Consolidated Statements of Operations. The Company determined fair value using Level 3 inputs under the fair value hierarchy consisting of information provided by brokers and other external sources along with management's own assumptions.

Derivative Financial Instruments

The Company records derivative instruments in prepaid expenses and other current assets or other accrued liabilities in the Condensed Consolidated Balance Sheets at fair value, and changes in the fair value are either recognized in other comprehensive income (loss) in the Condensed Consolidated Statements of Comprehensive Income (Loss) or net income (loss) in the Condensed Consolidated Statements of Operations, as applicable, depending on the nature of the underlying exposure, whether the derivative has been designated as a hedge and, if designated as a hedge, the extent to which the hedge is effective. Amounts included in accumulated other comprehensive loss are reclassified to earnings in the period in which earnings are impacted by the hedged items, in the period that the hedged transaction is deemed no longer likely to occur, or in the period the derivative is terminated. For cash flow hedges, a formal assessment is made, both at the hedge's inception and on an ongoing basis, to determine whether the derivatives that are designated as hedging instruments have been highly effective in offsetting changes in the cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. To the extent the hedge is determined to be ineffective, the ineffective portion is immediately recognized in earnings. Cash flows from derivatives are recognized in the Condensed Consolidated Statements of Cash Flows in a manner consistent with the underlying transactions. See Note 12 - Fair Value Measurements and Note 13 - Derivative Financial Instruments for further detail.

Concentration of Credit Risk

Financial instruments that potentially subject the Company to significant concentration of credit risk consist primarily of cash and cash equivalents, accounts receivable, notes and other contractual receivables and derivative financial instruments. The majority of cash and cash equivalents are maintained with two major financial institutions (Bank of America and Wells Fargo Bank, N.A.). Balances in these institutions exceeded the Federal Deposit Insurance Corporation insured amount of \$250,000 as of May 31, 2014. Concentration of credit risk with respect to accounts receivable is limited because a large number of geographically diverse customers make up the Company's customer base. The Company controls credit risk through credit approvals, credit limits, letters of credit or other collateral, cash deposits and monitoring procedures. The Company is exposed to a residual credit risk with respect to open letters of credit by virtue of the possibility of the failure of a bank providing a letter of credit. The Company had \$94

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

million of open letters of credit relating to accounts receivable as of May 31, 2014 and August 31, 2013. The counterparties to the Company's derivative financial instruments are major financial institutions.

Financial Instruments

The Company's financial instruments include cash and cash equivalents, accounts receivable, accounts payable, debt and derivative contracts. The Company uses the market approach to value its financial assets and liabilities, determined using available market information. The net carrying amounts of cash and cash equivalents, accounts receivable and accounts payable approximate fair value due to the short-term nature of these instruments. For long-term debt, which is primarily at variable interest rates, fair value is estimated using observable inputs (Level 2) and approximates its carrying value. Derivative contracts are reported at fair value. See Note 12 - Fair Value Measurements and Note 13 - Derivative Financial Instruments for further detail.

Fair Value Measurements

Fair value is measured using inputs from the three levels of the fair value hierarchy. Classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement. The three levels are described as follows:

- Level 1 – Unadjusted quoted prices in active markets for identical assets and liabilities.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the determination of the fair value of the asset or liability, either directly or indirectly.
- Level 3 – Unobservable inputs that are significant to the determination of the fair value of the asset or liability.

When developing the fair value measurements, the Company uses quoted market prices whenever available or seeks to maximize the use of observable inputs and minimize the use of unobservable inputs when quoted market prices are not available. See Note 12 - Fair Value Measurements for further detail.

Restructuring Charges

Restructuring charges consist of severance, contract termination and other restructuring-related costs. A liability for severance costs is typically recognized when the plan of termination has been communicated to the affected employees and is measured at its fair value at the communication date. Contract termination costs consist primarily of costs that will continue to be incurred under operating leases for their remaining terms without economic benefit to the Company. A liability for contract termination costs is recognized at the date the Company ceases using the rights conveyed by the lease contract and is measured at its fair value, which is determined based on the remaining contractual lease rentals reduced by estimated sublease rentals. A liability for other restructuring-related costs is measured at its fair value in the period in which the liability is incurred. See Note 8 - Restructuring Charges and Other Exit-Related Costs for further detail.

Employee Benefits

Prior to October 1, 2013, the Steelworkers Western Independent Shops Pension Plan ("WISPP"), a multiemployer plan benefiting union employees of the Steel Manufacturing Business, had an accumulated funding deficiency (i.e., a failure to satisfy the minimum funding requirements) and was certified in a Red Zone Status, as defined by the Pension Protection Act of 2006. As of October 1, 2013, the WISPP was no longer in Red Zone Status, having been certified by the plan's actuaries as being in the Green Zone.

Note 2 - Recent Accounting Pronouncements

In May 2014, an accounting standard update was issued that clarifies the principles for recognizing revenue. The guidance is applicable to all contracts with customers regardless of industry-specific or transaction-specific fact patterns. Further, the guidance requires improved disclosures to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue that is recognized. The standard is effective for the Company beginning in the first quarter of fiscal 2018, including interim periods within that fiscal year. Early application is not permitted. Upon becoming effective, the Company will apply the amendments in the updated standard either retrospectively to each prior reporting period presented, or retrospectively with the cumulative effect of initially

applying the guidance recognized at the date of initial application. The Company is evaluating the impact of adopting this standard on its consolidated financial position, results of operations and cash flows.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In April 2014, an accounting standard update was issued that amends the requirements for reporting discontinued operations, which may include a component of an entity or a group of components of an entity. The amendments limit discontinued operations reporting to disposals of components of an entity that represent strategic shifts that have, or will have, a major effect on an entity's operations and financial results. The amendments require expanded disclosure about the assets, liabilities, revenues and expenses of discontinued operations. Further, the amendments require an entity to disclose the pretax profit or loss of an individually significant component that is being disposed of that does not qualify for discontinued operations reporting. The standard is effective for the Company and is to be applied prospectively to all disposals or classifications as held for sale of components that occur beginning in the first quarter of fiscal 2016, and interim periods within that fiscal year, and all businesses that, on acquisition, are classified as held for sale that occur beginning in the first quarter of fiscal 2016, and interim periods within that fiscal year. Upon adoption, the standard will impact how the Company assesses and reports discontinued operations.

Note 3 - Inventories, net

Inventories, net consisted of the following (in thousands):

	May 31, 2014	August 31, 2013

Inventories, net	\$ 230,829	\$ 236,049

Note 4 - Business Combinations

In November 2013, the Company acquired all of the equity interests of Pick A Part, Inc., a used auto parts business with one store in the Olympia metropolitan area in Washington, which expanded the Auto Parts Business' presence in the Pacific Northwest and is near the Metals Recycling Business' operations in Tacoma, Washington. The acquisition was not material to the Company's financial position or results of operations. Pro forma operating results for the acquisition are not presented, since the aggregate results would not be significantly different than reported results.

Note 5 - Goodwill

During the first quarter of fiscal 2014, the Company changed its annual goodwill impairment testing date from February 28 to July 1 of each year. The Company believes this new testing date is preferable because it allows the Company to better align the annual goodwill impairment testing procedures with the Company's year-end financial reporting as well as its annual budgeting cycle and allows the Company visibility into fourth quarter operating results which are typically significant to its annual performance. The Company most recently performed an assessment of the goodwill in each of its reporting units during the fourth quarter of fiscal 2013. This change in accounting principle did not delay, accelerate or cause the Company to avoid an impairment charge. As a result of this change, the Company will complete its next annual goodwill impairment test during the fourth quarter of fiscal 2014.

There were no triggering events identified during the first three quarters of fiscal 2014 requiring an interim goodwill impairment test of our reporting units. Additional sustained deterioration in or a lack of recovery in market conditions from current levels, a trend of weaker than anticipated Company financial performance including the pace and extent of operating margin and volume recovery, a sustained decline in the Company's share price from current levels, or an increase in the market-based weighted-average cost of capital, among other factors, could significantly impact the impairment analysis and may result in future goodwill impairment charges that, if incurred, could have a material adverse effect on the Company's financial condition and results of operations.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The gross changes in the carrying amount of goodwill by reporting segment for the nine months ended May 31, 2014 were as follows (in thousands):

	Metals Recycling Business	Auto Parts Business	Total
Balance as of August 31, 2013	\$147,213	\$180,051	327,264
Acquisitions	—	586	586
Acquisition accounting adjustments	—	(51) (51
Foreign currency translation adjustment	\$(1,035) \$(740) (1,775
Balance as of May 31, 2014	\$146,178	\$179,846	\$326,024

Accumulated goodwill impairment charges were \$321 million as of May 31, 2014 and August 31, 2013.

Note 6 - Short-Term Borrowings

The Company has an unsecured, uncommitted \$25 million credit line with Wells Fargo Bank, N.A that expires March 1, 2015. Interest rates are set by the bank at the time of borrowing. The Company had zero and \$9 million in borrowings outstanding under this credit line as of May 31, 2014 and August 31, 2013. The credit agreement contains various representations and warranties, events of default and financial and other covenants, including covenants regarding maintenance of a minimum fixed charge ratio and a maximum leverage ratio.

Note 7 - Commitments and Contingencies

The Company evaluates the adequacy of its environmental liabilities on a quarterly basis. Adjustments to the liabilities are made when additional information becomes available that affects the estimated costs to study or remediate any environmental issues or expenditures are made for which liabilities were established.

Changes in the Company's environmental liabilities for the nine months ended May 31, 2014 were as follows (in thousands):

Reporting Segment	Balance as of August 31, 2013	Liabilities Established (Released), Net	Payments and Other	Balance as of May 31, 2014	Short-Term	Long-Term
Metals Recycling Business	\$30,520	\$8	\$(445)	\$30,083	\$ 419	\$ 29,664
Auto Parts Business	18,774	374	(103)	19,045	554	18,491
Corporate	500	—	(21)	479	179	300
Total	\$49,794	\$382	\$(569)	\$49,607	\$ 1,152	\$ 48,455

Metals Recycling Business ("MRB")

As of May 31, 2014, MRB had environmental liabilities of \$30 million for the potential remediation of locations where it has conducted business and has environmental liabilities from historical or recent activities.

Portland Harbor

In December 2000, the Company was notified by the United States Environmental Protection Agency ("EPA") under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") that it is one of the potentially responsible parties ("PRPs") that own or operate or formerly owned or operated sites which are part of or adjacent to the Portland Harbor Superfund site (the "Site"). The precise nature and extent of any cleanup of the Site, the parties to be involved, the process to be followed for any cleanup and the allocation of the costs for any cleanup among responsible parties have not yet been determined, but the process of identifying additional PRPs and beginning allocation of costs is underway. It is unclear to what extent the Company will be liable for environmental costs or natural resource

damage claims or third party contribution or damage claims with respect to the Site. While the Company participated in certain preliminary Site study efforts, it is not party to the consent order entered into by the EPA with certain other PRPs, referred to as the "Lower Willamette Group" ("LWG"), for a remedial investigation/feasibility study ("RI/FS").

During fiscal 2007, the Company and certain other parties agreed to an interim settlement with the LWG under which the Company made a cash contribution to the LWG RI/FS. The Company has also joined with more than 80 other PRPs, including the LWG, in

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

a voluntary process to establish an allocation of costs at the Site. These parties have selected an allocation team and have entered into an allocation process design agreement. The LWG has also commenced federal court litigation, which has been stayed, seeking to bring additional parties into the allocation process.

In January 2008, the Natural Resource Damages Trustee Council (“Trustees”) for Portland Harbor invited the Company and other PRPs to participate in funding and implementing the Natural Resource Injury Assessment for the Site. Following meetings among the Trustees and the PRPs, a funding and participation agreement was negotiated under which the participating PRPs agreed to fund the first phase of the natural resource damage assessment. The Company joined in that Phase I agreement and paid a portion of those costs. The Company did not participate in funding the second phase of the natural resource damage assessment.

On March 30, 2012, the LWG submitted to the EPA and made available on its website a draft feasibility study (“draft FS”) for the Site based on approximately ten years of work and \$100 million in costs classified by the LWG as investigation related. The draft FS identifies ten possible remedial alternatives which range in estimated cost from approximately \$170 million to \$250 million (net present value) for the least costly alternative to approximately \$1.08 billion to \$1.76 billion (net present value) for the most costly and estimates a range of two to 28 years to implement the remedial work, depending on the selected alternative. The draft FS does not determine who is responsible for remediation costs, define the precise cleanup boundaries or select remedies. The draft FS is being revised by the EPA and the revisions may be significant. While the draft FS is an important step in the EPA’s development of a proposed plan for addressing the Site, a final decision on the nature and extent of the required remediation will occur only after the EPA has prepared a proposed plan for public review and issued a record of decision (“ROD”). Currently available information indicates that the EPA does not expect to issue its final ROD selecting a remedy for the Site until at least 2017. Responsibility for implementing and funding the EPA’s selected remedy will be determined in a separate allocation process, which is currently underway.

Because there has not been a determination of the total cost of the investigations, the remediation that will be required, the amount of natural resource damages or how the costs of the ongoing investigations and any remedy and natural resource damages will be allocated among the PRPs, the Company believes it is not possible to reasonably estimate the amount or range of costs which it is likely or reasonably possible that the Company may incur in connection with the Site, although such costs could be material to the Company’s financial position, results of operations, cash flows and liquidity. Among the facts currently not known or available are detailed information on the history of ownership of and the nature of the uses of and activities and operations performed on each property within the Site, which are factors that will play a substantial role in determining the allocation of investigation and remedy costs among the PRPs. The Company has insurance policies that it believes will provide reimbursement for costs it incurs for defense and remediation in connection with the Site, although there is no assurance that those policies will cover all of the costs which the Company may incur. The Company previously recorded a liability for its estimated share of the costs of the investigation of \$1 million.

The Oregon Department of Environmental Quality is separately providing oversight of voluntary investigations by the Company involving the Company’s sites adjacent to the Portland Harbor which are focused on controlling any current “uplands” releases of contaminants into the Willamette River. No liabilities have been established in connection with these investigations because the extent of contamination (if any) and the Company’s responsibility for the contamination (if any) has not yet been determined.

Other MRB Sites

As of May 31, 2014, the Company had environmental liabilities related to various MRB sites other than Portland Harbor of \$29 million. The liabilities relate to the potential future remediation of soil contamination, groundwater contamination and storm water runoff issues and were not individually material at any site.

Auto Parts Business (“APB”)

As of May 31, 2014, the Company had environmental liabilities related to various APB sites of \$19 million. The liabilities relate to the potential future remediation of soil contamination, groundwater contamination and storm water runoff issues and were not individually material at any site.

Steel Manufacturing Business (“SMB”)

SMB’s electric arc furnace generates dust (“EAF dust”) that is classified as hazardous waste by the EPA because of its zinc and lead content. As a result, the Company captures the EAF dust and ships it in specialized rail cars to a firm that applies a treatment that allows the EAF dust to be delisted as hazardous waste so it can be disposed of as a non-hazardous solid waste.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

SMB has an operating permit issued under Title V of the Clean Air Act Amendments of 1990, which governs certain air quality standards. The permit is based on an annual production capacity of 950 thousand tons. The permit was first issued in 1998 and has since been renewed through February 1, 2018.

SMB had no environmental liabilities as of May 31, 2014.

Other than the Portland Harbor Superfund site, which is discussed above, management currently believes that adequate provision has been made for the potential impact of these issues and that the ultimate outcomes will not have a material adverse effect on the Unaudited Condensed Consolidated Financial Statements of the Company as a whole. Historically, the amounts the Company has ultimately paid for such remediation activities have not been material in any given period.

In addition, the Company is party to various legal proceedings arising in the normal course of business. Management believes that adequate provisions have been made for these contingencies. The Company does not anticipate that the resolution of legal proceedings arising in the normal course of business will have a material adverse effect on its results of operations, financial condition, or cash flows.

Note 8 - Restructuring Charges and Other Exit-Related Costs

In the fourth quarter of fiscal 2012, the Company announced and undertook a number of restructuring initiatives designed to extract greater synergies from the significant acquisitions and technology investments made in recent years, achieve further integration between MRB and APB, realign the Company's organization to support its future growth and decrease operating expenses by streamlining functions and reducing organizational layers. These initiatives were substantially completed by the end of fiscal 2013.

In the first quarter of fiscal 2014, the Company announced and began implementing additional restructuring initiatives to further reduce its annual operating expenses through headcount reductions, productivity improvements, procurement savings and other operational efficiencies. The Company expects to incur restructuring charges of \$6 million in connection with these initiatives, with substantially all of the charges expected to be incurred by the end of fiscal 2014. The vast majority of the restructuring charges will require the Company to make cash payments.

In addition to the restructuring charges recorded in connection with these initiatives, the Company incurred other exit-related costs consisting of asset impairments related to site closures.

Restructuring charges and other exit-related costs were comprised of the following (in thousands):

	Three Months Ended May 31, 2014			Three Months Ended May 31, 2013		
	Q4' 12 Plan	Q1' 14 Plan	Total Charges	Q4' 12 Plan	Q1' 14 Plan	Total Charges

Total restructuring charges and other exit-related costs	\$2,762	\$1,873	\$6,580	\$5,006	\$19,498	—

The Company does not allocate restructuring charges and other exit-related costs to the segments' operating results because management does not include this information in its measurement of the performance of the operating segments.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 9 - Redeemable Noncontrolling Interest

In March 2011, the Company, through a wholly-owned acquisition subsidiary, acquired substantially all of the metals recycling assets of a Canadian business. As part of the purchase consideration, the Company issued the seller common shares equal to 20% of the issued and outstanding capital stock of the Company's acquisition subsidiary. Under the terms of an agreement related to the acquisition, the noncontrolling interest holder had the right to require the Company to purchase its interest in the Company's acquisition subsidiary for fair value upon the occurrence of certain triggering events.

On March 8, 2013, the Company entered into an agreement with the noncontrolling interest holder for the purchase of all of the outstanding noncontrolling interest in the Company's subsidiary for \$25 million. In the second quarter of fiscal 2013, the Company adjusted the redeemable noncontrolling interest to its fair value corresponding to the purchase price of \$25 million. Prior to its purchase, the noncontrolling interest was presented at its adjusted carrying value, which approximated its fair value. The Company determined fair value using Level 3 inputs under the fair value hierarchy using an income approach based on a discounted cash flow analysis.

Following is a reconciliation of the changes in the redeemable noncontrolling interest for the nine months ended May 31, 2013 (in thousands):

	Fiscal 2013	
Balances - September 1 (Beginning of period)	\$22,248	
Net loss attributable to noncontrolling interest	(903)
Currency translation adjustment	(1,030)
Capital contributions from noncontrolling interest holder	1,970	
Adjustment to fair value	2,449	
Purchase	(24,734)
Balances - May 31 (End of period)	\$—

Reclassifications from accumulated other comprehensive income (loss), both individually and in the aggregate, were immaterial to the Unaudited Condensed Consolidated Statements of Operations.

Note 12 - Fair Value Measurements

The following table presents information about the Company's assets and liabilities measured at fair value as of May 31, 2014 and August 31, 2013, and indicates the fair value hierarchy of the valuation techniques utilized by the Company and the type of measurement.

(in thousands)	Assets (Liabilities) at Fair Value		Fair Value Measurement Level	Type of Measurement	Balance Sheet Classification
	May 31, 2014	August 31, 2013			
Assets:					
Assets held for sale	\$—	\$2,902	Level 3	Non-recurring	Prepaid expenses and other current assets
Impaired long-lived assets 745	—	—	Level 3	Non-recurring	Property, plant and equipment, net
Investment in joint venture partnership	—	3,261	Level 3	Non-recurring	Investments in joint venture partnerships
Foreign currency exchange forward contracts	370	—	Level 2	Recurring	Prepaid expenses and other current assets
Total assets	\$1,115	\$6,163			
Liabilities:					
Contract termination costs	\$(392)	\$(1,672)	Level 3	Non-recurring	Other accrued liabilities and Other long-term liabilities

Foreign currency exchange forward contracts	(23)	—	Level 2	Recurring	Other accrued liabilities
Total liabilities	\$(415)	\$(1,672)			

Note 13 - Derivative Financial Instruments

In the second quarter of fiscal 2014, the Company entered into a series of foreign currency exchange forward contracts to sell U.S. Dollars in order to hedge a portion of its exposure to fluctuating rates of exchange on anticipated U.S. Dollar-denominated sales

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

by its Canadian subsidiary with a functional currency of the Canadian Dollar. The Company utilized intercompany foreign currency derivatives and offsetting derivatives with external counterparties in order to designate the intercompany derivatives as hedging instruments. Once the U.S. Dollar-denominated sales have been recognized and the corresponding receivables collected, the Company utilized foreign currency exchange forward contracts to sell Canadian Dollars, achieving a result similar to net settling the contracts to sell U.S. Dollars. The foreign currency exchange forward contracts to sell Canadian Dollars are not designated as hedging instruments.

As of May 31, 2014, the Company had foreign currency exchange forward contracts with external counterparties to buy Canadian Dollars for a total notional amount of \$26 million, which have various settlement dates through September 30, 2014, and foreign currency exchange forward contracts with external counterparties to sell Canadian Dollars for a total notional amount of \$8 million, all of which have a settlement date of June 30, 2014. The contracts with external counterparties are reported at fair value in the Condensed Consolidated Balance Sheets measured using quoted foreign currency exchange rates. See Note 12 - Fair Value Measurements for further detail.

The fair value of derivative instruments in the Condensed Consolidated Balance Sheets are as follows (in thousands):

	Asset (Liability) Derivatives		
	Balance Sheet Location	Fair Value	
		May 31, 2014	August 31, 2013
Foreign currency exchange forward contracts	Prepaid expenses and other current assets	\$370	\$—
Foreign currency exchange forward contracts	Other accrued liabilities	\$(23) \$—

The following tables summarizes the results of foreign currency exchange derivatives for the three and nine months ended May 31, 2014 (in thousands):

	Derivative Gain (Loss) Recognized in					
	Three Months Ended May 31, 2014			Nine Months Ended May 31, 2014		
	Other Comprehensive Income	Revenues Effective Portion	Other Income (Expense), net	Other Comprehensive Income	Revenues Effective Portion	Other Income (Expense), net
Foreign currency exchange forward contracts - designated as cash flow hedges	511	37	314	205	37	314
Foreign currency exchange forward contracts - not designated as cash flow hedges	—	—	(171)	—	—	(171)

The Company did not have any material derivatives activity for the three and nine months ended May 31, 2013.

There was no hedge ineffectiveness with respect to the forward currency exchange cash flow hedges for the three and nine months ended May 31, 2014.

Note 14 - Share-Based Compensation

In the first quarter of fiscal 2014, as part of the annual awards under the Company's Long-Term Incentive Plan, the Compensation Committee of the Company's Board of Directors granted 219,504 restricted stock units ("RSUs") and 219,504 performance share awards to the Company's key employees and officers under the Company's 1993 Stock

Incentive Plan, as amended.

The RSUs have a five-year term and vest 20% per year commencing October 31, 2014. The fair value of the RSUs granted is based on the market closing price of the underlying Class A common stock on the date of grant and totaled \$7 million. The compensation expense associated with the RSUs is recognized over the requisite service period of the awards, net of forfeitures.

The performance-based awards have a two-year performance period consisting of the Company's fiscal 2014 and fiscal 2015. The performance targets are based on divisional volume metrics (weighted at 50%) and divisional operating income metrics (weighted at 50%) for the two years of the performance period, with award payouts ranging from a threshold of 50% to a maximum of 200%

18

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for each portion of the awards. Awards will be paid in Class A common stock as soon as practicable after October 31 following the end of the performance period. The estimated fair value of the performance-based awards at the date of grant was \$7 million.

In the second quarter of fiscal 2014, the Company granted a deferred stock unit ("DSU") award to each of its non-employee directors under the Company's 1993 Stock Incentive Plan. John Carter, the Company's Chairman, and Tamara Lundgren, President and Chief Executive Officer, receive compensation pursuant to their employment agreements and do not receive DSUs. One DSU gives the director the right to receive one share of Class A common stock at a future date. The grant included a total of 30,848 shares that will vest on the day before the Company's 2015 annual meeting, subject to continued Board service. The total value of these awards is not material.

Note 15 - Income Taxes

The effective tax rate for the Company's operations for the three and nine months ended May 31, 2014 was a benefit of 1,182.4% and 148.1%, respectively, compared to an expense of 65.8% and 32.1%, respectively, for the three and nine months ended May 31, 2013.

A reconciliation of the difference between the federal statutory rate and the Company's effective rate is as follows:

	Three Months Ended		Nine Months Ended	
	May 31,		May 31,	
	2014 ⁽¹⁾	2013	2014 ⁽¹⁾	2013
Federal statutory rate	35.0	% 35.0	% 35.0	% 35.0
State taxes, net of credits	(38.7)) (1.3)) (0.3)) (1.1)
Foreign income taxed at different rates	197.4	41.0	10.1	14.7
Section 199 deduction	—	(10.4)) —	(12.0)
Non-deductible officers' compensation	25.6	3.0	3.1	1.4
Noncontrolling interests	(105.4)) (5.7)) (12.9)) (5.3)
Research and development credits	—	(3.9)) —	(3.7)
Fixed asset tax basis adjustment	601.2	—	78.8	—
Tax return to provision adjustment	47.8	—	6.3	—
Valuation allowance on deferred tax assets	226.0	—	4.2	—
Unrecognized tax benefits	167.4	—	20.2	—
Other non-deductible expenses	20.2	9.3	2.5	3.4
Other	5.9	(1.2)) 1.1	(0.3)
Effective tax rate	1,182.4	% 65.8	% 148.1	% 32.1

(1) For periods with reported pre-tax losses, the effect of reconciling items with positive signs is tax benefit in excess of the benefit calculated by applying the federal statutory rate to the pre-tax loss.

The effective tax rate for the first nine months of fiscal 2014 was impacted primarily by a discrete tax benefit of \$2 million related to the adjustment of the tax basis in certain fixed assets, as well as the impact of applying a projected annual effective tax rate in excess of the federal statutory rate to the low absolute level of pre-tax results for the period. The effective tax rate for the third quarter of fiscal 2014 benefited primarily from the fixed asset tax basis adjustment of \$2 million and the partial realization of previously reserved tax benefits as a result of taxable income in a foreign jurisdiction generated during the period.

The effective tax rate for the third quarter of fiscal 2013 was higher than the federal statutory rate due to the impact of the low level of pre-tax income in the quarter and lower financial performance in foreign operations, which are taxed

at more favorable rates. The effective tax rate for the first nine months of fiscal 2013 also benefited from the recognition of certain discrete tax benefits of \$1 million in the second quarter of fiscal 2013.

The Company will continue to regularly assess the realizability of deferred tax assets. Changes in historical earnings performance and future earnings projections, among other factors, may cause the Company to adjust its valuation allowance on deferred tax assets, which would impact its results of operations in the period it determines that these factors have changed.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

The Company files federal and state income tax returns in the U.S. and foreign tax returns in Puerto Rico and Canada. The federal statute of limitations has expired for fiscal 2009 and prior years. The Canadian and several state tax authorities are currently examining returns for fiscal years 2005 to 2012.

Note 16 - Net Income (Loss) Per Share

The following table sets forth the information used to compute basic and diluted net income (loss) per share attributable to SSI (in thousands):

	Three Months Ended May 31,		Nine Months Ended May 31,	
	2014	2013	2014	2013
Net income	\$4,124	\$1,554	\$1,398	\$8,855
Net income attributable to noncontrolling interests	(1,014) (734) (2,726) (1,063
Net income (loss) attributable to SSI	\$3,110	\$820	\$(1,328) \$7,792
Computation of shares:				
Weighted average common shares outstanding, basic	26,853	26,671	26,811	26,629
Incremental common shares attributable to dilutive stock options, performance share awards, DSUs and RSUs	164	142	—	148
Weighted average common shares outstanding, diluted	27,017	26,813	26,811	26,777

Common stock equivalent shares of 501,511 and 1,184,755 were considered antidilutive and were excluded from the calculation of diluted net income (loss) per share for the three and nine months ended May 31, 2014, respectively, compared to 601,547 and 583,747 common stock equivalent shares for the three and nine months ended May 31, 2013, respectively.

Note 17 - Related Party Transactions

The Company purchases recycled metal from its joint venture operations at prices that approximate fair market value. These purchases totaled \$8 million for the three months ended May 31, 2014 and 2013, and \$22 million and \$20 million for the nine months ended May 31, 2014 and 2013, respectively. Net advances to these joint ventures were \$2 million and \$1 million for the three months ended May 31, 2014 and 2013, respectively, and \$4 million and \$2 million for the nine months ended May 31, 2014 and 2013. Amounts receivable from joint ventures were less than \$1 million and amounts payable to joint ventures were \$3 million as of May 31, 2014 and August 31, 2013, respectively. Amounts receivable from joint venture partners were \$1 million as of May 31, 2014 and August 31, 2013.

In connection with the acquisition of the assets of a metals recycling business in March 2011, the Company had entered into a series of agreements to obtain barging and other services and lease property with entities owned by the minority shareholder of the Company's subsidiary that operates its MRB facilities in British Columbia and Alberta, Canada. On March 8, 2013, the Company purchased the noncontrolling interest in that subsidiary and, as a result, those entities under common ownership of the former minority shareholder ceased to be related parties of the Company. The Company paid less than \$1 million and \$5 million, primarily for barging services, under these agreements for the three and nine months ended May 31, 2013.

Thomas D. Klauer, Jr., President of the Company's Auto Parts Business, is the sole shareholder of a corporation that is the 25% minority partner in a partnership in which the Company is the 75% partner and which operates five

self-service stores in Northern California. Mr. Klauer's 25% share of the profits of this partnership totaled \$1 million and less than \$1 million for the three months ended May 31, 2014 and 2013, respectively, and \$2 million and \$1 million for the nine months ended May 31, 2014 and 2013, respectively. The partnership leases properties from entities in which Mr. Klauer has ownership interests under agreements that expire in March 2016 with options to renew the leases, upon expiration, for multiple periods. The rent paid by the partnership to the entities in which Mr. Klauer has ownership interests was less than \$1 million for the three and nine months ended May 31, 2014 and 2013.

Certain members of the Schnitzer family own significant interests in, or are related to owners of, MMGL Corp ("MMGL," formerly known as Schnitzer Investment Corp.), which is engaged in the real estate business and was a subsidiary of the Company prior to 1989. MMGL is considered a related party for financial reporting purposes. The Company and MMGL are both potentially responsible parties with respect to Portland Harbor, which has been designated as a Superfund site since December 2000. The Company and MMGL have worked together in response to Portland Harbor matters, and the Company has paid all of the legal and consulting fees for the joint defense, in part due to its environmental indemnity obligation to MMGL with respect to the Portland scrap metal operations property. The Company and MMGL have agreed to an equitable cost sharing arrangement with respect to defense costs under which MMGL will pay 50% of the legal and consulting costs, net of insurance recoveries. The amounts receivable from (payable to) MMGL vary from period to period because of the timing of incurring legal and consulting fees, payments for cost reimbursements and insurance recoveries. Amounts receivable from MMGL under this agreement were \$1 million and less than \$1 million as of May 31, 2014 and August 31, 2013.

Note 18 - Segment Information

The accounting standards for reporting information about operating segments define operating segments as components of an enterprise that engages in business activities from which it may earn revenues and incur expenses and for which discrete financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Company's chief operating decision maker is the Chief Executive Officer. The Company is organized by line of business. While the Chief Executive Officer evaluates results in a number of different ways, the line of business management structure is the primary basis for which the allocation of resources and financial results are assessed. Under the aforementioned criteria, the Company operates in three operating and reporting segments: metal purchasing, processing, recycling and selling (MRB), used auto parts (APB) and mini-mill steel manufacturing (SMB). Additionally, the Company is a noncontrolling partner in joint ventures, which are either in the metals recycling business or are suppliers of unprocessed metal.

MRB buys and processes ferrous and nonferrous metal for sale to foreign and other domestic steel producers or their representatives and to SMB. MRB also purchases ferrous metal from other processors for shipment directly to SMB.

APB purchases used and salvaged vehicles, sells parts from those vehicles through its retail facilities and wholesale operations, and sells the remaining portion of the vehicles to metal recyclers, including MRB.

SMB operates a steel mini-mill that produces a wide range of finished steel products using recycled metal and other raw materials.

Intersegment sales from MRB to SMB are made at rates that approximate export market prices for shipments from the West Coast of the U.S. In addition, the Company has intersegment sales of autobody parts from APB to MRB at rates that approximate market prices. These intercompany sales tend to produce intercompany profits which are not recognized until the finished products are ultimately sold to third parties.

The information provided below is obtained from internal information that is provided to the Company's chief operating decision maker for the purpose of corporate management. The Company uses operating income to measure segment performance. The Company does not allocate corporate interest income and expense, income taxes, other

income and expenses related to corporate activity or corporate expense for management and administrative services that benefit all three segments. In addition, the Company does not allocate restructuring charges and other exit-related costs to the segment operating income because management does not include this information in its measurement of the performance of the operating segments. Because of this unallocated income and expense, the operating income of each reporting segment does not reflect the operating income the reporting segment would report as a stand-alone business.

SCHNITZER STEEL INDUSTRIES, INC.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section includes a discussion of our operations for the three and nine months ended May 31, 2014 and 2013. The following discussion and analysis provides information which management believes is relevant to an assessment and understanding of our results of operations and financial condition. The discussion should be read in conjunction with our Annual Report on Form 10-K for the year ended August 31, 2013 and the Unaudited Condensed Consolidated Financial Statements and the related Notes thereto included in Part I, Item 1 of this report.

Forward-Looking Statements

Statements and information included in this Quarterly Report on Form 10-Q by Schnitzer Steel Industries, Inc. (the "Company") that are not purely historical are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 and are made pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. Except as noted herein or as the context may otherwise require, all references to "we," "our," "us" and "SSI" refer to the Company and its consolidated subsidiaries.

Forward-looking statements in this Quarterly Report on Form 10-Q include statements regarding our expectations, intentions, beliefs and strategies regarding the future, which may include statements regarding trends, cyclicalities and changes in the markets we sell into; strategic direction; changes to manufacturing and production processes; the cost of and the status of any agreements or actions related to our compliance with environmental and other laws; expected tax rates, deductions and credits; the realization of deferred tax assets; planned capital expenditures; liquidity positions; ability to generate cash from continuing operations; the potential impact of adopting new accounting pronouncements; expected results, including pricing, sales volumes and profitability; obligations under our retirement plans; benefits, savings or additional costs from business realignment and cost containment programs; and the adequacy of accruals.

When used in this report, the words "believes," "expects," "anticipates," "intends," "assumes," "estimates," "evaluates," "may," "opinions," "forecasts," "future," "forward," "potential," "probable," and similar expressions are intended to identify forward-looking statements.

We may make other forward-looking statements from time to time, including in reports filed with the Securities and Exchange Commission, press releases and public conference calls. All forward-looking statements we make are based on information available to us at the time the statements are made, and we assume no obligation to update any forward-looking statements, except as may be required by law. Our business is subject to the effects of changes in domestic and global economic conditions and a number of other risks and uncertainties that could cause actual results to differ materially from those included in, or implied by, such forward-looking statements. Some of these risks and uncertainties are discussed in "Item 1A. Risk Factors" of Part I of our most recent annual report on Form 10-K.

Examples of these risks include: potential environmental cleanup costs related to the Portland Harbor Superfund site; the impact of general economic conditions; volatile supply and demand conditions affecting prices and volumes in the markets for both our products and raw materials we purchase; difficulties associated with acquisitions and integration of acquired businesses; the impact of goodwill impairment charges; the impact of long-lived asset impairment charges; the realization of expected cost reductions related to restructuring initiatives; the inability of customers to fulfill their contractual obligations; the impact of foreign currency fluctuations; potential limitations on our ability to access capital resources and existing credit facilities; restrictions on our business and financial covenants under our bank credit agreement; the impact of the consolidation in the steel industry; the impact of imports of foreign steel into the U.S.; inability to realize expected benefits from investments in technology; freight rates and availability of transportation; impact of equipment upgrades and failures on production; product liability claims; the impact of impairment of our deferred tax assets; costs associated with compliance with environmental regulations; the adverse impact of climate change; inability to obtain or renew business licenses and permits; compliance with greenhouse gas emission regulations; reliance on employees subject to collective bargaining agreements; and the impact of the underfunded status of multiemployer plans in which we participate.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

General

Founded in 1906, Schnitzer Steel Industries, Inc., an Oregon corporation, is one of North America's largest recyclers of ferrous and nonferrous scrap metal, a leading recycler of used and salvaged vehicles and a manufacturer of finished steel products.

We operate in three reporting segments: the Metals Recycling Business (“MRB”), the Auto Parts Business (“APB”) and the Steel Manufacturing Business (“SMB”), which collectively provide an end-of-life cycle solution for a variety of products through our integrated businesses. We use operating income to measure our segments’ performance. Restructuring charges are not allocated to segment operating income because we do not include this information in our measurement of the segments’ performance. Corporate expense consists primarily of unallocated expense for management and administrative services that benefit all three reporting segments. As a result of this unallocated expense, the operating income of each reporting segment does not reflect the operating income the reporting segment would report as a stand-alone business. For further information regarding our reporting segments, see Note 18 - Segment Information in the Notes to the Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this report.

Our results of operations depend in large part on the demand and prices for recycled metal in foreign and domestic markets and on the supply of raw materials, including end-of-life vehicles, available to be processed at our facilities. Our deep water port facilities on both the East and West coasts of the U.S. (in Everett, Massachusetts; Providence, Rhode Island; Oakland, California; Portland, Oregon; and Tacoma, Washington), access to public deep water port facilities (in Kapolei, Hawaii and Salinas, Puerto Rico) and water access for transportation purposes (in Surrey, British Columbia) allow us to efficiently meet the global demand for recycled and processed ferrous metal by shipping bulk cargoes to steel manufacturers located in Europe, Asia, Central America and Africa. Our exports of recycled and processed nonferrous metal are shipped in containers through various public docks to specialty steelmakers, foundries, aluminum sheet and ingot manufacturers, copper refineries and smelters, brass and bronze ingot manufacturers and wire and cable producers globally. We also transport both ferrous and nonferrous metals by truck and rail in order to transfer scrap metal between our facilities for further processing, to load shipments at our export facilities and to meet regional domestic demand.

Executive Overview of Financial Results for the Third Quarter of Fiscal 2014

We generated consolidated revenues of \$638 million in the third quarter of fiscal 2014, a decrease of 10% from the \$710 million of revenues in the third quarter of fiscal 2013. Overall consolidated revenues decreased primarily due to lower average net selling prices for ferrous and nonferrous metal and reduced sales volumes of export ferrous metal as a result of continued weak economic conditions that negatively impacted export demand for recycled metal, which was only partially offset by higher volumes for domestic sales of recycled ferrous metal and finished steel products. Consolidated operating income was \$2 million in the third quarter of fiscal 2014, compared to \$7 million in the third quarter of fiscal 2013. Adjusted consolidated operating income in the third quarter of fiscal 2014, excluding restructuring and other exit-related costs and other asset impairment charges, was \$5 million compared to adjusted consolidated operating income of \$9 million in the third quarter of fiscal 2013 (see reconciliation of adjusted consolidated operating income in Non-GAAP Financial Measures at the end of Item 2). Export selling prices for shipments at the start of the third quarter of fiscal 2014 declined sharply as a result of weaker global demand before a partial recovery later in the third quarter, resulting in significantly lower average export selling prices compared to the third quarter of fiscal 2013. In the environment of declining selling prices as experienced in the third quarter of fiscal 2014, average inventory costs did not decrease as quickly as purchase costs for raw materials, resulting in an adverse effect on cost of goods sold and further compression of operating margins compared to the immediately preceding quarter. Operating results for the third quarter and first nine months of fiscal 2014 were also negatively impacted by continued challenging ferrous and nonferrous market conditions and the impact of prolonged constrained supply conditions for raw materials which more than offset the benefits from productivity improvements, contributing to a compression in operating margins at MRB compared to the prior year quarter. These decreases were partially offset by an increase in operating income at SMB of \$5 million compared to the third quarter of fiscal 2013, primarily as a result of improved demand leading to higher sales volumes and benefits from productivity improvements, and by a

reduction in consolidated selling, general and administrative ("SG&A") expenses by \$3 million compared to the prior year quarter primarily due to reduced employee compensation from headcount reductions and professional and outside services costs.

For the third quarter of fiscal 2014, net income attributable to SSI was \$3 million, or \$0.12 per diluted share, compared to \$1 million, or \$0.03 per diluted share, in the prior year quarter. Results in the current quarter included \$5 million of income tax benefit, primarily reflecting the allocation of the projected annual tax rate on third quarter results and including the recognition of a discrete tax benefit of \$2 million. Adjusted net income attributable to SSI, excluding restructuring and other exit-related costs and other asset impairment charges, was \$4 million, or \$0.16 per diluted share, compared to \$2 million, or \$0.09 per diluted share, in the third quarter of fiscal 2013, and included \$2 million in tax benefits primarily related to the discrete tax benefit item.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

In the third quarter of fiscal 2014, we achieved \$9 million in cost savings related to the restructuring and productivity initiatives announced and initiated in the first quarter and expanded in the second quarter of fiscal 2014 to reduce our annual operating expenses by approximately \$40 million. Of this amount, approximately 70% is expected to benefit fiscal 2014 results with the full annual benefit expected to be achieved in fiscal 2015. The reduction in expenses is expected to result from a combination of headcount reductions, implementation of operational efficiencies, reduced lease costs and other productivity improvements.

The following items summarize our consolidated financial results for the third quarter of fiscal 2014:

Revenues of \$638 million, compared to \$710 million in the third quarter of fiscal 2013;

Consolidated operating income of \$2 million, compared to \$7 million in the third quarter of fiscal 2013;

Adjusted consolidated operating income of \$5 million, compared to adjusted consolidated operating income of \$9 million in the third quarter of fiscal 2013 (see reconciliation of adjusted consolidated operating income in Non-GAAP Financial Measures at the end of Item 2);

Net income attributable to SSI of \$3 million, or \$0.12 per diluted share, compared to \$1 million, or \$0.03 per diluted share, in the third quarter of fiscal 2013;

Adjusted net income attributable to SSI of \$4 million, or \$0.16 per diluted share, compared to \$2 million, or \$0.09 per diluted share, in the third quarter of fiscal 2013 (see the reconciliation of adjusted net income and adjusted diluted earnings per share in Non-GAAP Financial Measures at the end of Item 2);

For the first nine months of fiscal 2014, net cash provided by operating activities of \$73 million, compared to \$2 million in the prior year period; and

Debt, net of cash, of \$347 million as of May 31, 2014, compared to \$368 million as of August 31, 2013 (see the reconciliation of debt, net of cash in Non-GAAP Financial Measures at the end of Item 2).

The following items highlight the financial results for our reporting segments for the third quarter of fiscal 2014:

MRB revenues and operating income of \$517 million and \$4 million, respectively, compared to \$605 million and \$9 million in the third quarter of fiscal 2013, respectively;

- APB revenues and operating income of \$84 million and \$7 million, respectively, compared to \$86 million and \$8 million in the third quarter of fiscal 2013, respectively; and

SMB revenues and operating income of \$102 million and \$5 million, respectively, compared to \$93 million and approximately break-even results in the third quarter of fiscal 2013, respectively.

NM = Not Meaningful

(1) MRB sells ferrous recycled metal to SMB at rates per ton that approximate West Coast U.S. export market prices.

In addition, APB sells ferrous and nonferrous material to MRB at prices that approximate local market rates. These

intercompany revenues and cost of goods sold are eliminated in consolidation.

Corporate expense consists primarily of unallocated expenses for services that benefit all three reporting segments.

(2) As a consequence of this unallocated expense, the operating income of each segment does not reflect the operating income the segment would have as a stand-alone business.

The joint ventures sell recycled metal to MRB at prices that approximate local market rates, which produces (3) intercompany profit. This intercompany profit is eliminated while the products remain in inventory and is not recognized until the finished products are sold to third parties.

Restructuring charges consist of expense for severance, contract termination and other restructuring costs that (4) management does not include in its measurement of the performance of the operating segments. Other exit-related costs consist of asset impairments related to site closures.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

- (5) Intercompany profits are not recognized until the finished products are sold to third parties; therefore, intercompany profit is eliminated while the products remain in inventory.

Revenues

Consolidated revenues in the third quarter and first nine months of fiscal 2014 were \$638 million and \$1.9 billion, respectively, representing decreases of 10% and 6% compared to the same periods in the prior year. The decreases were primarily due to lower average net selling prices for ferrous and nonferrous metal and reduced sales volumes of export ferrous metal as a result of continued weak economic conditions that negatively impacted export demand for recycled metal, which were only partially offset by higher volumes for domestic sales of recycled ferrous metal and finished steel products. In addition, the pace of economic recovery continued to adversely impact the supply of scrap metal and contributed to the lower sales volumes compared to the prior year periods.

Operating Income

Consolidated operating income in the third quarter and first nine months of fiscal 2014 was \$2 million and \$5 million, respectively, compared to \$7 million and \$20 million in the same periods in the prior year. Adjusted consolidated operating income in the third quarter and first nine months of fiscal 2014, excluding restructuring and other exit-related costs and other asset impairment charges, was \$5 million and \$13 million, respectively, compared to \$9 million and \$25 million, respectively, in the third quarter and first nine months of fiscal 2013 (see reconciliation of adjusted consolidated operating income in Non-GAAP Financial Measures at the end of Item 2). Export selling prices were subject to significant downward pressure in the first nine months of fiscal 2014, including a sharp decline for shipments at the start of the third quarter of fiscal 2014 primarily as a result of weaker global demand resulting in significantly lower average export selling prices compared to the prior year periods. In the environment of declining selling prices experienced in the third quarter of fiscal 2014, average inventory costs did not decrease as quickly as purchase costs for raw materials, resulting in an adverse effect on cost of goods sold and further compression of operating margins compared to the immediately preceding quarter. Operating results for the third quarter and first nine months of fiscal 2014 were also negatively impacted by continued challenging ferrous and nonferrous market conditions and the impact of prolonged constrained supply conditions for raw materials, which more than offset the benefits from both productivity improvements and, for the first nine months of fiscal 2014, a less adverse impact from average inventory costing, contributing to a compression in operating margins compared to the prior year periods. The impact of purchase costs of end-of-life vehicles at APB decreasing at a slower rate than commodity selling prices during the first nine months of fiscal 2014 also contributed to the compression in operating margins compared to the prior year period. These decreases were partially offset by an increase in operating income at SMB of \$5 million and \$6 million for the third quarter and first nine months of fiscal 2014, respectively, compared to the prior year periods, primarily as a result of improved demand leading to higher sales volumes and benefits from productivity improvements. In addition, consolidated SG&A expenses decreased by \$3 million and \$6 million compared to the third quarter and first nine months of fiscal 2013 primarily due to reduced employee compensation from headcount reduction and professional and outside services costs.

Consolidated operating income in the third quarter and first nine months of fiscal 2014 included restructuring charges and other exit-related costs of \$3 million and \$7 million, respectively, consisting of severance, contract termination, other restructuring costs and exit-related asset impairments, compared to charges of \$2 million and \$5 million, respectively, in the prior year periods. These charges are related to restructuring initiatives under two separate plans announced in the fourth quarter of fiscal 2012 (the "Q4'12 Plan") and the first quarter of fiscal 2014 (the "Q1'14 Plan"), respectively.

In the first quarter of fiscal 2014, we initiated the Q1'14 Plan and began implementing restructuring and productivity initiatives to reduce our annual operating expenses by approximately \$30 million, of which the majority is reflected in cost of goods sold. In the second quarter of fiscal 2014, we identified an additional \$10 million in targeted annualized cost savings benefiting mainly SG&A expenses, bringing the total targeted reduction in annual operating expenses to approximately \$40 million. Of this amount, approximately 70% is expected to benefit fiscal 2014 results with the full annual benefit expected to be achieved in fiscal 2015. In the third quarter and first nine months of fiscal 2014, we achieved \$9 million and \$20 million, respectively, in cost savings related to these initiatives. The majority of the

reduction in operating expenses will occur at MRB and is expected to result from a combination of headcount reductions, implementation of operational efficiencies, reduced lease costs and other productivity improvements. We expect to incur restructuring charges of approximately \$6 million, substantially all in fiscal 2014, in connection with these initiatives, the vast majority of which will require us to make cash payments. In addition to the restructuring charges recorded in connection with these initiatives, during the first nine months of fiscal 2014 the Company incurred other exit-related costs of \$1 million consisting of asset impairments related to site closures.

The Q4'12 Plan included restructuring initiatives designed to extract greater synergies from the significant acquisitions and technology investments made in recent years, to achieve further integration between MRB and APB, to realign our organization to support future growth and to decrease operating expenses by streamlining functions and reducing organizational layers. These initiatives, which were completed by the end of fiscal 2013, achieved a reduction in operating costs of approximately \$25 million

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

on an annualized basis, comprising approximately \$18 million of selling, general and administrative expense and \$7 million of cost of goods sold.

Restructuring charges and other exit-related costs for the three months ended May 31, 2014 and 2013 were comprised of the following (in thousands):

	Three Months Ended May 31, 2014			Three Months Ended May 31, 2013		
	Q4'12 Plan	Q1'14 Plan	Total Charges	Q4'12 Plan	Q1'14 Plan	Total Charges
Restructuring charges:						
Severance costs	\$(31) \$2,192	\$2,161	\$1,419	\$—	\$1,419
Contract termination costs	107	494	601	158	—	158

Total restructuring charges	76	2,686	2,762	1,873	—	1,873
Other exit-related costs:						
Asset impairments	—	—	—	—	—	—
Total exit-related costs	—	—	—	—	—	—
Total restructuring charges and other exit-related costs	\$76	\$2,686	\$2,762	\$1,873	\$—	\$1,873
Total restructuring charges to date	\$13,549	\$5,383	\$18,932	\$10,018	\$—	\$10,018

See Note 8 - Restructuring Charges and Other Exit-Related Costs in the Notes to the Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this report for additional details on restructuring charges.

Income Tax Expense

Our effective tax rate for the third quarter and first nine months of fiscal 2014 was a benefit of 1,182.4% and 148.1%, respectively, compared to an expense of 65.8% and 32.1%, respectively, for the same periods in the prior year.

The effective tax rate for the first nine months of fiscal 2014 was impacted primarily by a discrete tax benefit of \$2 million related to the adjustment of the tax basis in certain of our fixed assets, as well as the impact of applying a projected annual effective tax rate in excess of the federal statutory rate to the low absolute level of pre-tax results for the period. The effective tax rate for the third quarter of fiscal 2014 benefited primarily from the fixed asset tax basis adjustment of \$2 million and the partial realization of previously reserved tax benefits as a result of taxable income generated by a foreign jurisdiction during the period.

The effective tax rate for the third quarter of fiscal 2013 was higher than the statutory rate due to the impact of the low level of pre-tax income in the quarter and lower financial performance in foreign operations, which are taxed at more favorable rates. The effective tax rate for the first nine months of fiscal 2013 also benefited from the recognition of certain discrete tax benefits of \$1 million in the second quarter of fiscal 2013.

We will continue to regularly assess the realizability of deferred tax assets. Changes in historical earnings performance and future earnings projections, among other factors, may cause us to adjust our valuation allowance on deferred tax assets, which would impact our results of operations in the period we determine that these factors have changed.

The effective tax rate for fiscal 2014 is expected to be approximately 29%, subject to financial performance for the remainder of the year.

Financial Results by Segment

We operate our business across three reporting segments: MRB, APB and SMB. Additional financial information relating to these reporting segments is contained in Note 18 - Segment Information in the Notes to the Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this report.

Revenues

Revenues in the third quarter and first nine months of fiscal 2014 decreased by 15% and 8%, respectively, compared to the prior year periods due to lower average export sales prices and export sales volumes as a result of continued weak economic conditions that negatively impacted export demand for recycled metal, which were only partially offset by higher domestic ferrous sales volumes. In addition, the pace of economic recovery continued to adversely impact the supply of scrap metal and also contributed to the lower sales volumes compared to the prior year periods.

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

Segment Operating Income

Operating income for each of the third quarter and first nine months of fiscal 2014 was \$4 million and \$15 million compared to \$9 million and \$29 million, respectively, in the comparable prior year periods. Export selling prices were subject to significant downward pressure in the first nine months of fiscal 2014, including a sharp decline for shipments at the start of the third quarter of fiscal 2014, primarily as a result of weaker global demand, resulting in significantly lower average export selling prices compared to the prior year periods. In the environment of declining selling prices experienced in the third quarter of fiscal 2014, average inventory costs did not decrease as quickly as purchase costs for raw materials, resulting in an adverse effect on cost of goods sold and further compression of operating margins compared to the immediately preceding quarter. Operating results for the third quarter and first nine months of fiscal 2014 were also negatively impacted by continued challenging ferrous and nonferrous market conditions and the impact of prolonged constrained supply conditions for raw materials, which more than offset the benefits from both productivity improvements and, for the first nine months of fiscal 2014, a less adverse impact from average inventory costing, contributing to a compression in operating margins compared to the prior year periods. SG&A expenses in the third quarter and first nine months of fiscal 2014 decreased by \$6 million and \$9 million, respectively, compared to the prior year periods primarily due to reduced employee compensation from headcount reductions and professional and outside service costs.

Further, during the first nine months of fiscal 2014, we recorded \$1 million in other asset impairment charges.

Auto Parts Business

(\$ in thousands)	Three Months Ended May 31,			Nine Months Ended May 31,		
	2014	2013	% Change	2014	2013	% Change

Number of stores at period end	61	61	—%	61	61	—%
Cars purchased (in thousands)	98	95	3%	274	262	5%

Revenues

Revenues in the third quarter of fiscal 2014 decreased by 3% compared to the prior year period primarily due to lower commodity selling prices partially offset by benefits from higher volumes. Revenues in the first nine months of fiscal 2014 increased by 2% compared to the prior year period primarily due to additional volumes in the first three months of the period from stores acquired or opened during the prior twelve-month period.

Segment Operating Income

Operating income for the third quarter and first nine months of fiscal 2014 decreased by 19% and 21%, respectively, compared to the same periods in the prior year. The benefits on operating margins from higher volumes and productivity improvements achieved in fiscal 2014 were more than offset by a compression in operating margins, primarily due to lower ferrous and nonferrous commodity selling prices, and increased SG&A expense, primarily due to the addition of new stores, compared to the prior year periods. Operating income for the third quarter and first nine months of fiscal 2013 also included operating losses of \$1 million and \$3 million, respectively, including integration and startup costs, related to store locations with twelve months or less of operations.

Rolling mill utilization	72 %	60 %		68 %	64 %	

(1) Price information is shown after netting the cost of freight incurred to deliver the product to the customer.

Revenues

Revenues for the third quarter and first nine months of fiscal 2014 increased by 10% and 6% compared to the same periods in the prior year due to increased sales volumes for finished steel products as a result of higher demand in our West Coast markets mainly driven by improved non-residential construction. For the first nine months of fiscal 2014, the benefits from increased sales volumes were partially offset by lower average selling prices as a result of the impact of reduced costs of raw materials.

Segment Operating Income

Operating income for the third quarter and first nine months of fiscal 2014 increased significantly compared to the respective prior year periods due to higher sales volumes, the impact of raw material costs within cost of goods sold decreasing at a faster rate than the average sales price for finished steel products and benefits from operational efficiencies and productivity improvements. For the first nine months of fiscal 2014, these benefits were partially offset by the recognition of bad debt expense of \$1 million in the first quarter of fiscal 2014.

Liquidity and Capital Resources

We rely on cash provided by operating activities as a primary source of liquidity, supplemented by current cash on hand and borrowings under our existing credit facilities.

Sources and Uses of Cash

We had cash balances of \$29 million and \$13 million as of May 31, 2014 and August 31, 2013, respectively. Cash balances are intended to be used primarily for working capital, capital expenditures, acquisitions, dividends and share repurchases. We use excess cash on hand to reduce amounts outstanding under our credit facilities. As of May 31, 2014, debt, net of cash, was \$347 million compared to \$368 million as of August 31, 2013 (refer to Non-GAAP Financial Measures below), a decrease of \$21 million primarily as a result of the positive cash flows generated by operating activities. Our cash balances as of May 31, 2014 and August 31, 2013 include \$5 million and \$7 million, respectively, which are indefinitely reinvested in Puerto Rico and Canada.

Operating Activities

Net cash provided by operating activities in the first nine months of fiscal 2014 was \$73 million, compared to \$2 million in the first nine months of fiscal 2013.

Sources of cash in the first nine months of fiscal 2014 included an \$18 million decrease in inventories due to lower volumes of material on hand. Uses of cash included a \$17 million increase in accounts receivable due to the timing of sales and collections.

Cash used in operating activities in the first nine months of fiscal 2013 included a \$43 million increase in accounts receivable due to the timing of sales and collections, a \$20 million increase in inventory due to higher volumes on hand including the impact of timing on sales and a \$10 million decrease in accounts payable due to the timing of payments.

30

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

Investing Activities

Net cash used in investing activities in the first nine months of fiscal 2014 was \$33 million, compared to \$90 million in the first nine months of fiscal 2013.

Cash used in investing activities in the first nine months of fiscal 2014 included capital expenditures of \$29 million to upgrade our equipment and infrastructure.

Cash used in investing activities in the first nine months of fiscal 2013 included capital expenditures of \$67 million, including investments in the construction of a new shredder, advanced processing equipment and related infrastructure for our facility in Surrey, British Columbia, which commenced shredding operations in the third quarter of fiscal 2013. Cash used for investing activities also included \$23 million related to the acquisition of eight used auto parts facilities.

Financing Activities

Net cash used in financing activities in the first nine months of fiscal 2014 was \$24 million, compared to net cash provided by financing activities of \$35 million in the first nine months of fiscal 2013.

Cash used in financing activities in the first nine months of fiscal 2014 was primarily due to \$15 million for dividends and \$7 million in net repayments of debt (refer to Non-GAAP Financial Measures below).

Cash provided by financing activities in the first nine months of fiscal 2013 was primarily due to \$75 million in net borrowings of debt (refer to Non-GAAP Financial Measures below) mainly used to support higher working capital requirements, acquisitions and the purchase of the redeemable noncontrolling interest. Uses of cash included \$15 million for dividends and \$25 million for the purchase of the redeemable noncontrolling interest in the third quarter of fiscal 2013.

Credit Facilities

Our unsecured committed bank credit facility, which provides for revolving loans of \$670 million and C\$30 million, matures in April 2017 pursuant to a credit agreement with Bank of America, N.A. as administrative agent, and other lenders party thereto. Interest rates on outstanding indebtedness under the agreement are based, at our option, on either the London Interbank Offered Rate (or the Canadian equivalent) plus a spread of between 1.25% and 2.25%, with the amount of the spread based on a pricing grid tied to our leverage ratio, or the greater of the prime rate, the federal funds rate plus 0.5% or the British Bankers Association LIBOR Rate plus 1.75%. In addition, annual commitment fees are payable on the unused portion of the credit facility at rates between 0.15% and 0.35% based on a pricing grid tied to our leverage ratio.

We had borrowings outstanding under the credit facility of \$362 million as of May 31, 2014 and \$360 million as of August 31, 2013. The weighted average interest rate on amounts outstanding under this facility was 1.93% and 1.98% as of May 31, 2014 and August 31, 2013, respectively.

We also have an unsecured, uncommitted \$25 million credit line with Wells Fargo Bank, N.A. that expires March 1, 2015. Interest rates are set by the bank at the time of borrowing. We had zero and \$9 million of borrowings outstanding under this line of credit as of May 31, 2014 and August 31, 2013.

We use these credit facilities to fund working capital requirements, acquisitions, capital expenditures, dividends and share repurchases. The two bank credit agreements contain various representations and warranties, events of default and financial and other covenants which could limit or restrict our ability to create liens, raise additional capital, enter into transactions with affiliates, acquire and dispose of businesses, guarantee debt, and consolidate or merge. The financial covenants include a consolidated fixed charge coverage ratio, defined as the four-quarter rolling sum of

consolidated adjusted EBITDA less defined maintenance capital expenditures divided by consolidated fixed charges, and a consolidated leverage ratio, defined as consolidated funded indebtedness divided by the sum of consolidated net worth and consolidated funded indebtedness. We refer to the Forms 8-K dated February 14, 2011 and April 16, 2012, which include as attachments copies of the unsecured committed bank credit agreement, as amended, for the detailed methodology for calculating the financial covenants.

As of May 31, 2014, we were in compliance with these financial covenants. The consolidated fixed charge coverage ratio is required to be no less than 1.50 to 1 and was 1.84 to 1 as of May 31, 2014. The consolidated leverage ratio is required to be no more than 0.55 to 1 and was 0.34 to 1 as of May 31, 2014. While we expect to remain in compliance with these covenants, there can be no assurances that we will be able to do so in the event of a sustained deterioration from current market conditions or other negative factors which adversely impact our results of operations and financial position, and lead to a trend of consolidated net losses. If we do not maintain compliance with our financial covenants and are unable to obtain an amendment or waiver from our

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

lenders, a breach of either covenant would constitute an event of default and allow the lenders to exercise remedies under the agreements, the most severe of which is the termination of the credit facility under our committed bank credit agreement and acceleration of the amounts owed under both agreements. In such case, we would be required to evaluate available alternatives and take appropriate steps to obtain alternative funds. There can be no assurance that any such alternative funds, if sought, could be obtained or, if obtained, would be adequate or on acceptable terms.

In addition, as of May 31, 2014 and August 31, 2013, we had \$8 million of long-term tax-exempt bonds outstanding that mature in January 2021.

Capital Expenditures

Capital expenditures totaled \$29 million for the first nine months of fiscal 2014, compared to \$67 million for the same period in the prior year. During the first quarter of fiscal 2014, we completed our investment in the construction of a new nonferrous processing facility in Puerto Rico, which commenced operations in September 2013. We plan to invest up to \$40 million in capital expenditures in fiscal 2014, including capital expenditures associated with APB acquisitions and greenfield store developments made or commenced in fiscal 2013 or fiscal 2014.

Dividends

On April 30, 2014 our Board of Directors declared a dividend for the third quarter of fiscal 2014 of \$0.1875 per common share, which equates to an annual cash dividend of \$0.75 per common share. The dividend was paid on May 27, 2014.

Environmental Compliance

Our commitment to sustainable recycling and to operating our business in an environmentally responsible manner requires us to continue to invest in facilities that improve our environmental presence in the communities in which we operate. As part of our capital expenditures, we invested \$4 million in capital expenditures for environmental projects during the first nine months of fiscal 2014, and plan to invest up to \$9 million for such projects in fiscal 2014.

We have been identified by the United States Environmental Protection Agency (“EPA”) as one of the potentially responsible parties (“PRPs”) that own or operate or formerly owned or operated sites which are part of or adjacent to the Portland Harbor Superfund site (“the Site”). A group of PRPs is conducting an investigation and study to identify and characterize the contamination at the Site and develop alternative approaches to remediation of the contamination. On March 30, 2012 the group submitted to the EPA a draft feasibility study (“draft FS”) based on approximately ten years of work and \$100 million in costs classified as investigation-related. The draft FS identifies ten possible remedial alternatives which range in estimated cost from approximately \$170 million to \$250 million (net present value) for the least costly alternative to approximately \$1.08 billion to \$1.76 billion (net present value) for the most costly and estimates a range of two to 28 years to implement the remedial work, depending on the selected alternative. The draft FS does not determine who is responsible for remediation costs, define the precise cleanup boundaries or select remedies. The draft FS is being revised by the EPA and the revisions may be significant. A final decision on the nature and extent of the required remediation will occur only after the EPA has prepared a proposed plan for public review and issued a record of decision (“ROD”). Currently available information indicates that the EPA does not expect to issue its final ROD selecting a remedy for the Site until at least 2017. Responsibility for implementing and funding the EPA’s selected remedy will be determined in a separate allocation process, which is currently underway. Because there has not been a determination of the total cost of the investigations, the remediation that will be required, the amount of natural resource damages or how the costs of the ongoing investigations and any remedy and natural resource damages will be allocated among the PRPs, we believe it is not reasonably possible to estimate the amount or range of costs which we are likely or which are reasonably possible to incur in connection with the Site, although such costs could be material to our financial position, results of operations, future cash flows and liquidity. Any material liabilities recorded in the future related to the Site could result in our failure to maintain compliance with certain covenants in our debt agreements. Significant cash outflows in the future related to the Site could reduce the amounts

available for borrowing that could otherwise be used for investment in capital expenditures, acquisitions, dividends and share repurchases. See Note 7 - Commitments and Contingencies in the Notes to the Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this report.

Assessment of Liquidity and Capital Resources

Historically, our available cash resources, internally generated funds, credit facilities and equity offerings have financed our acquisitions, capital expenditures, working capital and other financing needs.

We generally believe our current cash resources, internally generated funds, existing credit facilities and access to the capital markets will provide adequate short-term and long-term liquidity needs for acquisitions, capital expenditures, working capital, dividends, share repurchases, joint ventures, debt service requirements and environmental obligations. However, in the event of

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

a sustained deterioration from current market conditions, we may need additional liquidity, which would require us to evaluate available alternatives and take appropriate steps to obtain sufficient additional funds. There can be no assurance that any such supplemental funding, if sought, could be obtained or, if obtained, would be adequate or on acceptable terms.

Off-Balance Sheet Arrangements

None.

Contractual Obligations

There were no material changes related to contractual obligations and commitments from the information provided in our Annual Report on Form 10-K for the fiscal year ended August 31, 2013.

We maintain stand-by letters of credit to provide support for certain obligations, including workers' compensation and performance bonds. At May 31, 2014, we had \$17 million outstanding under these arrangements.

Critical Accounting Policies and Estimates

We reaffirm our critical accounting policies and estimates as described in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" section of our Annual Report on Form 10-K for the year ended August 31, 2013, except for the following:

Goodwill

During the first quarter of fiscal 2014, we changed the annual impairment testing date of goodwill allocated to our reporting units from February 28 to July 1 of each year. There were no triggering events identified during the first three quarters of fiscal 2014 requiring an interim goodwill impairment test allocated to our reporting units. Additional sustained declines or a lack of recovery in market conditions from current levels, a trend of weaker than anticipated Company financial performance including the pace and extent of operating margin and volume recovery, a sustained decline in the Company's share price from current levels, or an increase in the market-based weighted-average cost of capital, among other factors, could significantly impact the impairment analysis and may result in future goodwill impairment charges that, if incurred, could have a material adverse effect on the Company's financial condition and results of operations. See Note 5 - Goodwill in the Notes to the Unaudited Condensed Consolidated Financial Statements, Part 1, Item 1 of this report for further detail.

Recently Issued Accounting Standards

For a description of recent accounting pronouncements that may have an impact on our financial condition, results of operations or cash flows, see Note 2 - Recent Accounting Pronouncements in the Notes to the Unaudited Condensed Consolidated Financial Statements in Part I, Item 1 of this report.

Non-GAAP Financial Measures

Debt, net of cash

Debt, net of cash is the difference between (i) the sum of long-term debt and short-term debt (i.e., total debt) and (ii) cash and cash equivalents. Management believes that debt, net of cash is a useful measure for investors because, as cash and cash equivalents can be used, among other things, to repay indebtedness, netting this against total debt is a useful measure of our leverage.

The following is a reconciliation of debt, net of cash (in thousands):

	May 31, 2014	August 31, 2013
Short-term borrowings	\$601	\$9,174
Long-term debt, net of current maturities	375,797	372,663
Total debt	376,398	381,837
Less: cash and cash equivalents	29,362	13,481
Total debt, net of cash	\$347,036	\$368,356

Net borrowings (repayments) of debt

Net borrowings (repayments) of debt is the sum of borrowings from long-term debt, repayments of long-term debt, proceeds from line of credit, and repayment of line of credit. Management presents this amount as the net change in

borrowings (repayments) for the period because it believes it is useful for investors as a meaningful presentation of the change in debt.

33

Table of Contents

SCHNITZER STEEL INDUSTRIES, INC.

The following is a reconciliation of net borrowings (repayments) of debt (in thousands):

	Nine Months Ended May 31,	
	2014	2013
Borrowings from long-term debt	\$259,323	\$234,484
Proceeds from line of credit	327,000	432,000
Repayment of long-term debt	(257,535) (159,028
Repayment of line of credit	(335,500) (432,000
Net borrowings (repayments) of debt	\$ (6,712) \$75,456

Adjusted consolidated operating income, adjusted net income (loss) and adjusted diluted earnings per share Management presents adjusted consolidated operating income, adjusted net income (loss) attributable to SSI and adjusted diluted earnings per share attributable to SSI because it believes these measures provide a meaningful presentation of our results from core business operations excluding adjustments for restructuring charges and other exit-related costs and other asset impairment charges that are not related to core underlying business operations and improve the period-to-period comparability of our results from core business operations.

The following is a reconciliation of the adjusted consolidated operating income, adjusted net income (loss) attributable to SSI and adjusted diluted earnings per share attributable to SSI (in thousands, except per share data):

	Three Months Ended		Nine Months Ended	
	May 31,		May 31,	
	2014	2013	2014	2013
Consolidated operating income:				
As reported	1,629	\$7,187	\$4,588	\$19,791
Other asset impairment charges	532	—	1,460	—
Restructuring charges and other exit-related costs	2,762	1,873	6,580	5,006
Adjusted	\$4,923	\$9,060	\$12,628	\$24,797
Net income (loss) attributable to SSI:				
As reported	\$3,110	\$820	\$(1,328) \$7,792
Other asset impairment charges, net of tax	207	—	1,159	—
Restructuring charges and other exit-related costs, net of tax	1,072	1,490	5,394	3,528
Adjusted	\$4,389	\$2,310	\$5,225	\$11,320
Diluted earnings per share attributable to SSI:				
As reported	\$0.12	\$0.03	\$(0.05) \$0.29
Other asset impairment charges, net of tax, per share	0.01	—	0.04	—
Restructuring charges and other exit-related costs, net of tax, per share	0.04	0.06	0.20	0.13
Adjusted ⁽¹⁾	\$0.16	\$0.09	\$0.19	\$0.42

(1) Does not foot due to rounding.

Management believes that these non-GAAP financial measures allow for a better understanding of our operating and financial performance. These non-GAAP financial measures should be considered in addition to, but not as a substitute for, the most directly comparable U.S. GAAP measures. Although we find these non-GAAP financial measures useful in evaluating the performance of our business, our reliance on these measures is limited because the adjustments often have a material impact on our condensed consolidated financial statements presented in accordance with GAAP. Therefore, we typically use these adjusted amounts in conjunction with our GAAP results to address these limitations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Commodity Price Risk

We are exposed to commodity price risk, mainly associated with variations in the market price for finished steel products, ferrous and nonferrous metals, including scrap metal, autobody and other commodities. The timing and magnitude of industry cycles are difficult to predict and are impacted by general economic conditions. We respond to increases and decreases in forward selling prices by adjusting purchase prices on a timely basis. We actively manage our exposure to commodity price risk and monitor the actual and expected spread between forward selling prices and purchase costs and processing and shipping expense. Sales contracts are based on prices negotiated with our customers, and generally orders are placed 30 to 60 days ahead of the shipment date. However, financial results may be negatively impacted when forward selling prices fall more quickly than we can adjust purchase prices or when customers fail to meet their contractual obligations. We assess the net realizable value of inventory (“NRV”) each quarter based upon contracted sales orders and estimated future selling prices. Based on contracted sales and estimates of future selling prices at May 31, 2014, a 10% decrease in the selling price per ton of finished steel products or in the selling price of inventory would not have had a material NRV impact on any of our operating segments as of May 31, 2014.

Interest Rate Risk

There have been no material changes to our disclosure regarding interest rate risk set forth in Item 7A. Quantitative and Qualitative Disclosures About Market Risk included in our Annual Report on Form 10-K for the year ended August 31, 2013.

Credit Risk

As of May 31, 2014 and August 31, 2013, 48% and 49%, respectively, of our trade accounts receivable balance was covered by letters of credit. Of the remaining balance as of May 31, 2014, 97% was less than 60 days past due, compared to 95% as of August 31, 2013.

Foreign Currency Exchange Rate Risk

We are exposed to foreign currency exchange rate risk, mainly associated with sales transactions and related accounts receivable denominated in the U.S. Dollar by our Canadian subsidiary with a functional currency of the Canadian Dollar. In certain instances, we use derivatives to manage some portion of this risk. Our derivatives are agreements with independent counterparties that provide for payments based on a notional amount. As of May 31, 2014, all of our derivative transactions were related to actual or anticipated economic transactions in the normal course of business. A change in foreign exchange rates by 10% would have changed the fair value of these contracts reported in our Condensed Consolidated Balance Sheets by \$2 million at May 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities and Exchange Act of 1934, as amended (the “Exchange Act”)) that are designed to ensure that information we are required to disclose in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission’s rules and forms and that such information is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving the desired control objectives. Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, has completed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of May 31, 2014, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting (as that term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Note 7 - Commitments and Contingencies in the Notes to the Unaudited Condensed Consolidated Financial Statements in Part I, Item I, incorporated by reference herein.

In fiscal 2013, the Commonwealth of Massachusetts advised us of alleged violations of environmental requirements, including but not limited to those related to air emissions and hazardous waste management, at our operations in the Commonwealth. We have been discussing resolution of the alleged violations with the Commonwealth representatives and have reached an agreement in principle to resolve certain of the alleged violations. No enforcement proceeding has been filed to date and we do not believe that the outcome of this matter will be material to our financial position, results of operations, cash flows or liquidity.

ITEM 1A. RISK FACTORS

There have been no material changes to our risk factors reported or new factors identified since the filing of our Annual Report on Form 10-K for the year ended August 31, 2013, which was filed with the Securities and Exchange Commission on October 29, 2013.
