QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended December 31, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period From \_\_\_\_\_ to \_\_\_\_\_

Commission File Number 000-23554

---

INTL FCStone Inc.

(Exact name of registrant as specified in its charter)

---

Delaware 59-2921318

(State or other jurisdiction of (I.R.S. Employer incorporation or organization) Identification No.)

708 Third Avenue, Suite 1500

New York, NY 10017

(Address of principal executive offices) (Zip Code)

(212) 485-3500

(Registrant's telephone number, including area code)

---

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer

Non-accelerated filer  (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

Edgar Filing: INTL FCSTONE INC. - Form 10-Q

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

As of February 5, 2019, there were 19,079,389 shares of the registrant's common stock outstanding.

INTL FCStone Inc.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

Note 1 – Basis of Presentation and Consolidation and Accounting Standards Adopted

INTL FCStone Inc., a Delaware corporation, and its consolidated subsidiaries (collectively “INTL” or “the Company”), is a diversified global financial services organization providing execution, risk management and advisory services, market intelligence, and clearing services across asset classes and markets around the world. The Company’s services include comprehensive risk management advisory services for commercial clients; execution of listed futures and options on futures contracts on all major commodity exchanges; structured over-the-counter (“OTC”) products in a wide range of commodities; physical trading and hedging of precious metals and select other commodities; trading of more than 140 foreign currencies; market-making in international equities; fixed income; debt origination and asset management.

The Company provides these services to a diverse group of more than 20,000 predominantly wholesale organizations located throughout the world, including producers, processors and end-users of nearly all widely-traded physical commodities to manage their risks and enhance margins; to commercial counterparties who are end-users of the Company’s products and services; to governmental and non-governmental organizations; and to commercial banks, brokers, institutional investors and major investment banks.

Basis of Presentation and Consolidation

The accompanying unaudited condensed consolidated balance sheet as of September 30, 2018, which was derived from the audited consolidated balance sheet as of September 30, 2018, and the unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (“SEC”). Certain information and note disclosures normally included in annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) have been condensed or omitted pursuant to those rules and regulations. The Company believes that the disclosures made are adequate to make the information presented not misleading. In the opinion of management, all adjustments (primarily consisting of recurring accruals) considered necessary for a fair presentation of the condensed consolidated financial statements for the interim periods presented have been reflected as required by Rule 10-01 of Regulation S-X.

Operating results for interim periods are not necessarily indicative of the results that may be expected for the full year. These interim condensed consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements and related notes contained in the Company’s Form 10-K for the fiscal year ended September 30, 2018 filed with the SEC.

These condensed consolidated financial statements include the accounts of INTL FCStone Inc. and all other entities in which the Company has a controlling financial interest. All material intercompany transactions and balances have been eliminated in consolidation.

The Company’s fiscal year end is September 30, and the fiscal quarters end on December 31, March 31, June 30 and September 30. Unless otherwise stated, all dates refer to fiscal years and fiscal interim periods.

The preparation of condensed consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent liabilities as of the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. The most significant of these estimates and assumptions relate to fair value measurement for financial instruments and investments, revenue recognition, the provision for probable losses from bad debts, valuation of inventories, valuation of goodwill and intangible assets, incomes taxes, and contingencies. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

In the condensed consolidated income statements, the total revenues reported combine gross revenues for the physical commodities business and net revenues for all other businesses. The subtotal ‘operating revenues’ in the condensed consolidated income statements is calculated by deducting the cost of sales of physical commodities from total revenues. The subtotal ‘net operating revenues’ in the condensed consolidated income statements is calculated as

operating revenues less transaction-based clearing expenses, introducing broker commissions and interest expense. Transaction-based clearing expenses represent variable expenses paid to executing brokers, exchanges, clearing organizations and banks in relation to transactional volumes. Introducing broker commissions include commission paid to non-employee third parties that have introduced clients to the Company. Net operating revenues represent revenues available to pay variable compensation to risk management consultants and traders and direct non-variable expenses, as well as variable and non-variable expenses of operational and administrative employees.

Table of Contents

Reclassifications

During the three months ended December 31, 2018, the Company reclassified certain brokerage related revenues for which the Company earns commissions on trading activity in the capacity of an agent. In performing this reclassification, the Company has made a retrospective adjustment to the condensed consolidated income statement for the three months ended December 31, 2017. For the three months ended December 31, 2017, brokerage related revenues of \$7.5 million were reclassified from 'Trading gains, net' to 'Commissions and clearing fees'. Additionally, the Company has renamed the line item 'Trading gains, net' to 'Principal gains, net' on the condensed consolidated income statements in order to reflect the fact that these revenue streams are earned from trading financial instruments in the capacity of a principal and in order to properly segregate revenues earned from contracts with clients in connection with the adoption of the new revenue standard as discussed below.

Accounting Standards Adopted

On October 1, 2018, the Company adopted Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 606, Revenue from Contracts with Customers ("Topic 606") using the modified retrospective transition method applied to those contracts which were not completed as of October 1, 2018. Results for reporting periods beginning after October 1, 2018, are presented under Topic 606, and amounts prior to October 1, 2018 are not adjusted and continue to be reported in accordance with historical accounting standard, FASB ASC 605, Revenue Recognition ("Topic 605"). The adoption of Topic 606 had no impact to retained earnings as of October 1, 2018, or to revenue for the three months ended December 31, 2018. The Company's accounting for revenues within the scope of Topic 606 are materially consistent with those accounting principles and practices applied to accounting for revenues under Topic 605. The new revenue recognition model does not apply to revenues associated with financial instruments or contracts, including derivatives and interest income. For further information refer to Note 2.

In August 2016, the FASB issued ASU 2016-15, Statements of Cash Flows ("Topic 230"): Classification of Certain Cash Receipts and Cash Payments, which clarifies how companies present and classify certain cash receipts and cash payments in the statement of cash flows. The Company adopted the provisions of this guidance on October 1, 2018 and the adoption had no impact on its condensed consolidated financial statements.

On October 1, 2018, the Company adopted FASB Accounting Standards Update ("ASU") 2016-18, Statements of Cash Flows ("Topic 230"): Classification and Presentation of Restricted Cash in the Statements of Cash Flows, using the retrospective transition method. In accordance with the provisions of ASU 2016-18, the Company changed its condensed consolidated statements of cash flows presentation convention to explain the changes in cash and cash equivalents, as well as cash and cash equivalents segregated for regulatory purposes. U.S. Treasury obligations with original or acquired maturities of 90 days or less held with third-party banks or pledged with exchange-clearing organizations representing investments of segregated client funds, or which are held for particular clients in lieu of cash margin, are included in segregated cash equivalents. Purchases, sales, as well as client pledges and redemptions in lieu of cash margin, of U.S. Treasury obligations with original or acquired maturities of greater than 90 days representing investments of segregated client funds are presented as operating uses and sources of cash, respectively, within the operating section of the condensed consolidated statements of cash flows.

In May 2017, the FASB issued ASU No. 2017- 09, Scope of Modification Accounting ("Topic 718"), which amends the scope of modification accounting for share- based payment arrangements. ASU 2017- 09 provides guidance on the types of changes to the terms or conditions of share- based payment awards to which an entity would be required to apply modification accounting under ASC 718. Specifically, an entity would not apply modification accounting if the fair value, vesting conditions, and classification of the awards are the same immediately before and after the modification. The Company adopted ASU 2017- 09 on October 1, 2018. The adoption of the ASU had no impact on the Company's condensed consolidated financial statements and related disclosures.

Table of Contents

Note 2 – Revenue from Contracts with Clients

Beginning on October 1, 2018, the Company accounts for revenue earned from contracts with clients for services such as the execution, clearing, brokering, and custody of futures and options on futures contracts, OTC derivatives, and securities, investment management, and underwriting services under Topic 606. As such, revenues for these services are recognized when the performance obligations related to the underlying transaction are completed.

Revenues are recognized when control of the promised goods or services are transferred to clients, in an amount that reflects the consideration the Company expects to be entitled to in exchange for those goods or services. Revenues are analyzed to determine whether the Company is the principal (i.e. reports revenue on a gross basis) or agent (i.e., reports revenues on a net basis) in the contract. Principal or agent designations depend primarily on the control an entity has over the good or service before control is transferred to a client. The indicators of which party exercises control include primary responsibility over performance obligations, inventory risk before the good or service is transferred, and discretion in establishing the price.

The new revenue recognition model does not apply to revenues associated with dealing, or market-making, activities in financial instruments or contracts in the capacity of a principal, including derivative sales contracts which result in physical settlement and interest income.

The Company's revenues from contracts with clients subject to Topic 606 represent approximately 1.8% and 1.3% of the Company's total revenues for the three months ended December 31, 2018 and 2017, respectively. The Company's revenues from contracts with clients subject to Topic 606 represent approximately 44.0% and 48.0% of the Company's operating revenues for the three months ended December 31, 2018 and 2017, respectively. This includes all of the Company's commission and clearing fees and consulting, management, and account fees revenues. Revenues within the scope of Topic 606 are presented within 'Commission and clearing fees' and 'Consulting, management, and account fees' on the condensed consolidated income statements. Revenues that are not within the scope of Topic 606 are presented within 'Sales of physical commodities', 'Principal gains, net', and 'Interest income' on the condensed consolidated income statements.

Table of Contents

The following table represents a disaggregation of the Company's total revenues separated between revenues from contracts with clients and other sources of revenue for the three months ended December 31, 2018 and 2017 (in millions):

	Three Months Ended December 31,

## Table of Contents

The substantial majority of the Company's performance obligations for revenues from contracts with clients are satisfied at a point in time and are typically collected from clients by debiting their accounts with the Company. Commission and clearing fees revenue is primarily related to the Commercial Hedging and Clearing and Execution Services reportable segments. Consulting, management, and accounts fees are primarily related to the Commercial Hedging, Clearing and Execution Services, and Securities reportable segments. Principal gains, net is primarily related to the Commercial Hedging, Global Payments, and Securities reportable segments. Interest income is primarily related to the Commercial Hedging, Securities, and Clearing and Execution Services reportable segments. Precious metals trading and agricultural and energy merchandising and origination revenues are primarily related to the Physical Commodities reportable segment.

### Commission and Clearing Fees

Commission revenue represents sales and brokerage commissions generated by internal brokers, introducing broker-dealers, or registered investment advisors of introducing-broker dealers for their clients' trading activity in futures, options on futures, OTC derivatives, fixed income securities, equity securities, mutual funds, and annuities. The Company views the selling, distribution, and marketing, or any combination thereof, of mutual funds and insurance and annuity products to clients on the Company's registered investment advisor ("RIA") platform as a single performance obligation to the product sponsors.

The Company is the principal for commission revenue, as it is responsible for the execution of the clients' purchases and sales, and maintains relationships with product sponsors for trailing commission. Introducing broker dealers and registered investment advisors assist the Company in performing its obligations. Accordingly, total commission revenues are reported on a gross basis.

The Company primarily generates commission revenue on exchange-traded derivatives, OTC derivatives, and securities. Exchange-traded and OTC derivative commissions are recognized at a point in time on the trade date when the client, either directly or through the use of an internal broker or introducing broker, requests the clearance and execution of a trade. Securities commissions are either sale-based commission that are recognized at a point in time on the trade date or trailing commission that are recognized over time as earned. Sales-based securities commission is for a flat fee per security transaction or in certain instances are based on a percentage of an investment product's current market value at the time of purchase. Trailing commission revenue is generally based on a percentage of the current market value of clients' investment holdings in trail-eligible assets, and is recognized over the period during which services, such as on-going support, are performed. As trailing commission revenue is based on the market value of clients' investment holdings in trail-eligible assets, this variable consideration is constrained until the market value of trail-eligible assets is determinable.

Clearing fees generally represent transactional based fees charged by the various exchanges and clearing organizations for which the Company or one of its clearing brokers is a member for the privilege of executing and clearing trades through them. Clearing fees are generally passed through to the clients' accounts and are reported gross as the Company maintains control over the clearing and execution services provided, maintains relationships with the exchanges or clearing brokers, and has ultimate discretion in whether the fees are passed through to the clients and the rates at which they are passed through. As clearing fees are transactional based revenues they are recognized at a point in time on the trade date along with the related commission revenue when the client requests the clearance and execution of a trade.

### Trade Conversion Revenue

Trade conversion revenue includes fees earned from converting foreign ordinary equities into an American Depository Receipt ("ADR") or Global Depository Receipt ("GDR") and fees earned from converting an ADR or GDR into foreign ordinary equities on behalf of clients. Trade conversion revenue is reported on a trade date basis.

### Underwriting Fees

Revenues from investment banking consists of revenues earned from underwriting fixed income securities, primarily municipal and asset-backed securities, and are recognized in revenues upon completion of the underlying transaction, which is generally the trade date, based upon the terms of the assignment as the performance obligation is to successfully broker a specific transaction.

### Asset Management Fees

The Company earns asset management fees on Company sponsored and managed mutual funds and on the advisory accounts of independent registered investment advisors on the Company's platform. The Company provides ongoing investment advice and acts as a custodian, providing brokerage and execution services on transactions, and performs administrative services for these accounts. This series of performance obligations transfers control of the services to the client over time as the services are performed. This revenue is recognized ratably over time to match the continued delivery of the performance obligations to the client over the life of the contract. The asset management revenue generated is based on a percentage of the market value of the eligible assets in the clients' accounts. As such, the consideration for this revenue is variable and this variable consideration is constrained until the market value of eligible assets in the clients' accounts is determinable.

## Table of Contents

### Advisory and Consulting Fees

Advisory and consulting fees are primarily related to risk management consulting fees which are billed and recognized as revenue on a monthly basis when risk management services are provided. Such agreements are generally for one year periods, but are generally cancelable by either party upon providing thirty days' written notice to the other party and the amounts are not variable based on client trading activities. This revenue is generally recognized ratably over time to match the continued delivery of the performance obligation to the client over the life of the contract.

### Sweep Program Fees

The Company earns fees generated in lieu of interest income from a multi-bank sweep program with unaffiliated banks and money market funds. Pursuant to contractual arrangements with clients and their introducing-brokers, available cash balances in client accounts are swept into either Federal Deposit Insurance Corporation ("FDIC") insured cash accounts at unaffiliated banks or unaffiliated money market funds for which the Company earns a portion of the interest income generated by the client balances for administration and recordkeeping. The fees generated by the Company's multi-bank sweep program are reported net of the balances remitted to the introducing-brokers and the clients of introducing-brokers. These fees are paid and recognized over time to match the continued delivery of the administration and recordkeeping performance obligations to the life of the contract. The fees earned under this program are generally based upon the type of sweep account, prevailing interest rates, and the amount of client balances invested.

### Client Accounts Fees

Client accounts fees represent fees earned for custodial, recordkeeping, and administrative functions performed for the securities clearing accounts of clients. These include statement delivery fees, account transfer fees, safekeeping fees, errors and omission insurance fees, platform fees, and other fees. Client account fees that are transactional based, such as account transfer fees, are recognized at a point in time when the related performance obligation is satisfied. Client account fees that are related to ongoing services, such as statement delivery fees and errors and omission insurance fees, are recognized over time. Client account fees that relate to ongoing services are typically billed to clients' accounts on a monthly or quarterly basis.

### Physical Precious Metals Trading

The Company principally generates revenue from trading physical precious metals on an OTC basis. Revenues from the sale of physical precious metals are recorded on a trade date basis and generally settle on an unallocated basis. Substantially all of the Company's sales of precious metals are conducted using sales contracts that meet the definition of derivative instruments in accordance with ASC 815 - Derivatives and Hedging ("Topic 815"). The contracts underlying the Company's commitment to deliver precious metals are referred to as fixed price forward commodity contracts because the price of the commodity is fixed at the time the order is placed. Although the contracts typically are executed on a spot basis and settle on unallocated account, the client has the option to request delivery of the precious metals, the option to net settle out of the position by executing an offsetting trade, or the option to roll the transaction to a subsequent maturity date. Thus, the sales contracts contain embedded option derivatives that would be subject to the guidance in Topic 815. As the contracts are subject to the guidance in Topic 815, the fixed price derivative sales contracts are outside the scope of Topic 606. The Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606.

### Physical Agricultural Commodity Merchandising and Origination

The Company principally generates revenue from merchandising and originating physical agricultural and energy commodities from forward firm sales commitments accounted in accordance with Topic 815. The fixed and provisionally-priced derivative sales contracts that result in physical delivery are outside the scope of Topic 606. The Company recognizes revenue when control of the inventory is transferred within the meaning of Topic 606.

Table of Contents

Principal Gains, Net

Principal gains, net includes revenues on financial transactions or contracts for which the Company acts as principal that is reported on a net basis and is primarily outside the scope of ASC 606. Principal gains, net includes margins generated from OTC derivative trades, equities, fixed income, and foreign exchange executed with clients and other counterparties and are recognized on a trade-date basis. Principal gains, net, also includes realized and unrealized gains and losses derived principally from market making activities in OTC derivatives, equities, fixed income, and foreign exchange. Net dealer inventory and investment gains are recognized on a trade-date basis and include realized gains or losses and changes in unrealized gains or losses on investments at fair value. Principal gains, net also includes dividend income on long equity positions and dividend expense on short equity positions, which are recognized on the ex-dividend date.

Interest Income

Interest income is generated from client funds deposited with the Company to satisfy margin requirements which is held by third-party banks or on deposit with or pledged to exchange-clearing organizations or other FCMs. Interest income is also generated from the investment of client funds in allowable securities, primarily U.S. Treasury obligations. Interest income is also generated from trading fixed income securities that the Company holds in its market-making businesses. Interest income also includes interest generated from collateralized transactions, including securities borrowed and securities purchased under agreements to resell, and from extending margin loans to clients. Interest income is recognized on an accrual basis and is not within the scope of Topic 606.

Remaining Performance Obligations

Remaining performance obligations are services that the firm has committed to perform in the future in connection with its contracts with clients. The Company's remaining performance obligations are generally related to its risk management consulting and asset management contracts with clients. Revenues associated with remaining performance obligations related to these contracts with clients are not material to the overall consolidated results of the Company. For the Company's asset management activities, where fees are calculated based on a percentage of the market value of eligible assets in client's accounts, future revenue associated with remaining performance obligations cannot be determined as such fees are subject to fluctuations in the market value of eligible assets in clients' accounts.

Practical Expedients

The Company has applied Topic 606's practical expedient that permits for the non-disclosure of the value of performance obligations for (i) contracts with an original expected length of one year or less and (ii) contracts for which the Company recognizes revenue at the amount to which it has the right to invoice for services performed. The Company has also applied Topic 606's practical expedient that allows for no adjustment to consideration due to a significant financing component if the expectation at contract inception is such that the period between payment by the client and the transfer of the promised goods or services to the client will be one year or less.

Note 3 – Earnings (loss) per Share

The Company presents basic and diluted earnings (loss) per share ("EPS") using the two-class method which requires all outstanding unvested share-based payment awards that contain rights to non-forfeitable dividends and therefore participate in undistributed earnings with common stockholders be included in computing earnings (loss) per share. Under the two-class method, net earnings are reduced by the amount of dividends declared in the period for each class of common stock and participating security. The remaining undistributed earnings are then allocated to common stock and participating securities, based on their respective rights to receive dividends and any undistributed losses are solely allocated to common stockholders. Restricted stock awards granted to certain employees and directors contain non-forfeitable rights to dividends at the same rate as common stock, and are considered participating securities. Basic EPS has been computed by dividing net (loss) income by the weighted-average number of common shares outstanding.

Table of Contents

The following is a reconciliation of the numerator and denominator of the diluted earnings (loss) per share computations for the periods presented below.

(in millions, except share amounts)	Three Months Ended December 31,	
	2018	2017
Numerator:		
Net income (loss)	\$ 18.2	\$ (6.9 )
Less: Allocation to participating securities	(0.3 )	—
Net income (loss) allocated to common stockholders	\$ 17.9	\$ (6.9 )
Denominator:		
Weighted average number of:		
Common shares outstanding	18,659,748	19,072
Dilutive potential common shares outstanding:		
Share-based awards	333,298	—
Diluted weighted-average common shares	18,993,046	19,072

The dilutive effect of share-based awards is reflected in diluted earnings (loss) per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense required under the Compensation – Stock Compensation Topic of the ASC.

Options to purchase 178,958 and 489,721 shares of common stock for the three months ended December 31, 2018 and 2017, respectively, were excluded from the calculation of diluted earnings (loss) per share as they would have been anti-dilutive.

#### Note 4 – Assets and Liabilities, at Fair Value

Fair value is defined by U.S. GAAP as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between willing market participants on the measurement date.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company is required to develop a set of assumptions that reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

The Company has designed independent price verification controls and periodically performs such controls to ensure the reasonableness of such values.

In accordance with FASB ASC 820, Fair Value Measurement, the Company groups its assets and liabilities measured at fair value in three levels based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 - Valuation is based upon unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. Level 1 consists of financial assets and liabilities whose fair values are estimated using quoted market prices.

Level 2 - Valuation is based upon quoted prices for identical or similar assets or liabilities in markets that are less active, that is, markets in which there are few transactions for the asset or liability that are observable for substantially the full term. Included in Level 2 are those financial assets and liabilities for which fair values are estimated using models or other valuation methodologies. These models are primarily industry-standard models that consider various observable inputs, including time value, yield curve, volatility factors, observable current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures.

Level 3 - Valuation is based upon valuation techniques that require an input that is both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity). Level 3 comprises financial assets and

liabilities whose fair value is estimated based on internally developed models or methodologies utilizing significant inputs that are not readily observable from objective sources. The Company had no assets or liabilities classified within Level 3 of the fair value hierarchy as of December 31, 2018 and September 30, 2018.

Financial and nonfinancial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A market is active if there are sufficient transactions on an ongoing basis to provide current pricing information for the asset or liability,

Table of Contents

pricing information is released publicly, and price quotations do not vary substantially either over time or among market makers. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity.

The guidance requires the Company to consider counterparty credit risk of all parties of outstanding derivative instruments that would be considered by a market participant in the transfer or settlement of such contracts (exit price). The Company's exposure to credit risk on derivative financial instruments principally relates to the portfolio of OTC derivative contracts as all exchange-traded contracts held can be settled on an active market with a credit guarantee from the respective exchange. The Company requires each counterparty to deposit margin collateral for all OTC instruments and is also required to deposit margin collateral with counterparties. The Company has assessed the nature of these deposits and used its discretion to adjust each based on the underlying credit considerations for the counterparty and determined that the collateral deposits minimize the exposure to counterparty credit risk in the evaluation of the fair value of OTC instruments as determined by a market participant.

Fair value of financial and nonfinancial assets and liabilities that are carried on the Condensed Consolidated Balance Sheets at fair value on a recurring basis

Cash and cash equivalents reported at fair value on a recurring basis includes certificates of deposit, which are stated at cost plus accrued interest, which approximates fair value.

Cash, securities and other assets segregated under federal and other regulations reported at fair value on a recurring basis include the value of pledged investments, primarily U.S. Treasury obligations and commodities warehouse receipts.

Deposits with and receivables from broker-dealers, clearing organizations and counterparties and payable to clients and broker-dealers, clearing organizations and counterparties include the value of pledged investments, primarily U.S. Treasury obligations and foreign government obligations. These balances also include the fair value of exchange-traded options on futures and OTC forwards, swaps, and options.

Financial instruments owned and sold, not yet purchased include the fair value of equity securities, which includes common, preferred, and foreign ordinary shares, ADRs, GDRs, and exchange-traded funds ("ETFs"), corporate and municipal bonds, U.S. Treasury obligations, U.S. government agency obligations, foreign government obligations, agency mortgage-backed obligations, asset-backed obligations, OTC derivative financial instruments, commodities warehouse receipts, exchange firm common stock, and mutual funds and investments in managed funds.

Cash equivalents, securities, commodities warehouse receipts, physical commodities inventory, and derivative financial instruments are carried at fair value, on a recurring basis, and are classified and disclosed into three levels in the fair value hierarchy.

Except as disclosed in Note 7, the Company did not have any fair value adjustments for assets or liabilities measured at fair value on a non-recurring basis as of December 31, 2018 and September 30, 2018.

The following section describes the valuation methodologies used by the Company to measure classes of financial instruments at fair value and specifies the level within the fair value hierarchy where various financial instruments are classified.

The Company uses quoted prices in active markets, where available, and classifies such instruments within Level 1 of the fair value hierarchy. Examples include U.S. Treasury obligations, foreign government obligations, commodities warehouse receipts, certain equity securities traded in active markets, physical precious metals inventory, exchange firm common stock, investments in managed funds, as well as exchange-traded options on futures contracts.

When instruments are traded in secondary markets and observable prices are not available for substantially the full term, the Company generally relies on internal valuation techniques or prices obtained from third-party pricing services or brokers or a combination thereof, and accordingly, classified these instruments as Level 2. Examples include corporate and municipal bonds, U.S. government agency obligations, agency-mortgage backed obligations, asset-backed obligations, certain equity securities traded in less active markets, and OTC derivative contracts, which include purchase and sale commitments related to the Company's agricultural and energy commodities.

Certain derivatives without a quoted price in an active market and derivatives executed OTC are valued using internal valuation techniques, including pricing models which utilize significant inputs observable to market participants. The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. The key

inputs depend upon the type of derivative and the nature of the underlying instrument and include interest yield curves, foreign exchange rates, commodity prices, volatilities and correlation. These derivative instruments are included within Level 2 of the fair value hierarchy.

Physical commodities inventory includes precious metals that are a part of the trading activities of a regulated broker-dealer subsidiary and is recorded at net realizable value using exchange-quoted prices. Physical commodities inventory also includes agricultural commodities that are a part of the trading activities of a non-broker dealer subsidiary and are also recorded at net realizable value using exchange-quoted prices. The fair value of precious metals physical commodities inventory is based upon

Table of Contents

unadjusted exchange-quoted prices and is, therefore, classified within Level 1 of the fair value hierarchy. The fair value of agricultural physical commodities inventory and the related OTC firm sale and purchase commitments are generally based upon exchange-quoted prices, adjusted for basis or differences in local markets, broker or dealer quotations or market transactions in either listed or OTC markets. Exchange-quoted prices are adjusted for location and quality because the exchange-quoted prices for agricultural and energy related products represent contracts that have standardized terms for commodity, quantity, future delivery period, delivery location, and commodity quality or grade. The basis or local market adjustments are observable inputs or have an insignificant impact on the measurement of fair value and, therefore, the agricultural physical commodities inventory as well as the related OTC forward firm sale and purchase commitments have been included within Level 2 of the fair value hierarchy. With the exception of certain derivative instruments, financial instruments owned and sold are primarily valued using third-party pricing vendors. Third-party pricing vendors compile prices from various sources and often apply matrix pricing for similar securities when market-observable transactions for the instruments are not observable for substantially the full term. The Company reviews the pricing methodologies used by third-party pricing vendors in order to evaluate the fair value hierarchy classification of vendor-priced financial instruments and the accuracy of vendor pricing, which typically involves the comparison of primary vendor prices to internal trader prices or secondary vendor prices. When evaluating the propriety of vendor-priced financial instruments using secondary prices, considerations include the range and quality of vendor prices, level of observable transactions for identical and similar instruments, and judgments based upon knowledge of a particular market and asset class. If the primary vendor price does not represent fair value, justification for using a secondary price, including source data used to make the determination, is subject to review and approval by authorized personnel prior to using a secondary price. Financial instruments owned and sold that are valued using third party pricing sources are included within either Level 1 or Level 2 of the fair value hierarchy based upon the observability of the inputs used and the level of activity in the market.

The fair value estimates presented herein are based on pertinent information available to management as of December 31, 2018 and September 30, 2018. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date and current estimates of fair value may differ significantly from the amounts presented herein.

Table of Contents

The following tables set forth the Company's financial and nonfinancial assets and liabilities accounted for at fair value, on a recurring basis, as of December 31, 2018 by level in the fair value hierarchy.

(1) Represents cash collateral and the impact of netting across the levels of the fair value hierarchy. Netting among positions classified within the same level is included in that level.

Realized and unrealized gains and losses are included in 'principal gains, net', 'interest income', and 'cost of sales of physical commodities' in the condensed consolidated income statements.

Additional disclosures about the fair value of financial instruments that are not carried on the Condensed Consolidated Balance Sheets at fair value

Many, but not all, of the financial instruments that the Company holds are recorded at fair value in the Condensed Consolidated Balance Sheets. The following represents financial instruments in which the ending balance at December 31, 2018 and September 30, 2018 was not carried at fair value in accordance with U.S. GAAP in the Condensed Consolidated Balance Sheets:

Table of Contents

Short-term financial instruments: The carrying value of short-term financial instruments, including cash and cash equivalents, cash segregated under federal and other regulations, securities purchased under agreements to re-sell and securities sold under agreements to re-purchase, and securities borrowed and loaned are recorded at amounts that approximate the fair value of these instruments due to their short-term nature and level of collateralization. These financial instruments generally expose the Company to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market rates. Under the fair value hierarchy, cash and cash equivalents and cash segregated under federal and other regulations are classified as Level 1. Securities purchased under agreements to re-sell and securities sold under agreements to re-purchase, and securities borrowed and loaned are classified as Level 2 under the fair value hierarchy as they have short-term maturities and are collateralized by equity securities, U.S. Treasury obligations, U.S. government agency obligations, agency mortgage-backed obligations, and asset-backed obligations.

Receivables and other assets: Receivables from broker-dealers, clearing organizations, and counterparties, receivables from clients, net, notes receivables, net and certain other assets are recorded at amounts that approximate fair value due to their short-term nature and are classified as Level 2 under the fair value hierarchy.

Payables: Payables to clients and payables to brokers-dealers, clearing organizations, and counterparties are recorded at amounts that approximate fair value due to their short-term nature and are classified as Level 2 under the fair value hierarchy.

Lender under loans: Payables to lenders under loans carry variable rates of interest and thus approximate fair value and are classified as Level 2 under the fair value hierarchy.

Note 5 – Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk

The Company is party to certain financial instruments with off-balance sheet risk in the normal course of its business. The Company has sold financial instruments that it does not currently own and will therefore be obliged to purchase such financial instruments at a future date. The Company has recorded these obligations in the condensed consolidated financial statements as of December 31, 2018 and September 30, 2018 at the fair values of the related financial instruments. The Company will incur losses if the fair value of the underlying financial instruments increases subsequent to December 31, 2018. The total financial instruments sold, not yet purchased of \$839.7 million and \$866.5 million as of December 31, 2018 and September 30, 2018, respectively, includes \$142.6 million and \$193.4 million for derivative contracts, respectively, which represented a liability to the Company based on their fair values as of December 31, 2018 and September 30, 2018.

Derivatives

The Company utilizes derivative products in its trading capacity as a dealer in order to satisfy client needs and mitigate risk. The Company manages risks from both derivatives and non-derivative cash instruments on a consolidated basis. The risks of derivatives should not be viewed in isolation, but in aggregate with the Company's other trading activities. The majority of the Company's derivative positions are included in the condensed consolidated balance sheets in 'Deposits with and receivables from broker-dealers, clearing organizations and counterparties', 'Financial instruments owned, at fair value', 'Financial instruments sold, not yet purchased, at fair value' and 'Payables to broker-dealers, clearing organizations and counterparties'.

Table of Contents

Listed below are the fair values of the Company's derivative assets and liabilities as of December 31, 2018 and September 30, 2018. Assets represent net unrealized gains and liabilities represent net unrealized losses.

(in millions)	December 31, 2018		September 30, 2018	
	Assets <sup>(1)</sup>	Liabilities <sup>(1)</sup>	Assets <sup>(1)</sup>	Liabilities <sup>(1)</sup>
Derivative contracts not accounted for as hedges:				
Exchange-traded commodity derivatives	\$2,039.1	\$ 2,313.7	\$2,455.7	\$ 2,499.3
OTC commodity derivatives	218.1	322.6	207.0	369.9
Exchange-traded foreign exchange derivatives	57.1	51.5	49.8	37.2
OTC foreign exchange derivatives	324.1	303.8	302.5	303.9
Exchange-traded interest rate derivatives	606.3	591.4	449.3	478.7
OTC interest rate derivatives	23.5	25.6	24.8	25.9
Exchange traded equity index derivatives	2,574.1	2,655.6	4,541.8	4,794.0
TBA and forward settling securities	6.5	12.7	5.0	2.1
Gross fair value of derivative contracts	5,848.8	6,276.9	8,035.9	8,511.0
Impact of netting and collateral	(6,035.5 )	(6,121.6 )	(8,118.5 )	(8,317.6 )
Total fair value included in 'Deposits with and receivables from broker-dealers, clearing organizations, and counterparties'			\$(268.7 )	
Total fair value included in 'Financial instruments owned, at fair value'	\$ 139.3		\$ 186.1	
Total fair value included in 'Payables to broker-dealers, clearing organizations and counterparties		\$ 12.7		\$ —
Fair value included in 'Financial instruments sold, not yet purchased, at fair value'		\$ 142.6		\$ 193.4

(1) As of December 31, 2018 and September 30, 2018, the Company's derivative contract volume for open positions were approximately 9.9 million and 10.6 million contracts, respectively.

The Company's derivative contracts are principally held in its Commercial Hedging and Clearing and Execution Services segments. The Company assists its Commercial Hedging segment clients in protecting the value of their future production by entering into option or forward agreements with them on an OTC basis. The Company also provides its Commercial Hedging segment clients with option products, including combinations of buying and selling puts and calls. The Company mitigates its risk by offsetting the client's transaction simultaneously with one of the Company's trading counterparties or with a similar but not identical exchange-traded position. The risk mitigation of these offsetting trades is not within the documented hedging designation requirements of the Derivatives and Hedging Topic of the ASC. These derivative contracts are traded along with cash transactions because of the integrated nature of the markets for these products. The Company manages the risks associated with derivatives on an aggregate basis along with the risks associated with its proprietary trading and market-making activities in cash instruments as part of its firm-wide risk management policies. In particular, the risks related to derivative positions may be partially offset by inventory, unrealized gains in inventory or cash collateral paid or received.

The Company transacts in derivative instruments, which consist of mortgage-backed TBA securities and forward settling transactions that are used to manage risk exposures in the trading inventory of the Company's domestic institutional dealer in fixed income securities business. The fair value of these transactions is recorded in deposits with and receivables from or payables to broker-dealers, clearing organizations and counterparties. Realized and unrealized gains and losses on these derivative transactions are reflected in 'principal gains, net'.

Table of Contents

As of December 31, 2018 and September 30, 2018, these transactions are summarized as follows:

(in millions)	December 31, 2018		September 30, 2018	
	Gain / (Loss)	Notional Amounts	Gain / (Loss)	Notional Amounts
Unrealized gain on TBA securities purchased within deposits with and receivables from broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$3.7	\$718.4	\$1.2	\$721.5
Unrealized loss on TBA securities purchased within deposits with and receivables from broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$—	\$5.2	\$(0.6)	\$293.2
Unrealized gain on TBA securities sold within deposits with and receivables from broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$—	\$(8.3 )	\$3.2	\$(1,099.5)
Unrealized loss on TBA securities sold within payables to broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$(11.7)	\$(1,651.6)	\$—	\$—
Unrealized loss on TBA securities sold within deposits with and receivables from broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$—	\$—	\$(1.5)	\$(812.7 )
Unrealized gain on forward settling securities purchased within deposits with and receivables from broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$2.8	\$505.8	\$0.5	\$614.3
Unrealized loss on forward settling securities sold within payables to broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$(1.0 )	\$(261.8 )	\$—	\$—
Unrealized gain on forward settling securities sold within deposits with and receivables from and payables to broker-dealers, clearing organizations and counterparties and related notional amounts (1)	\$—	\$—	\$0.1	\$(427.2 )

(1) The notional amounts of these instruments reflect the extent of the Company's involvement in TBA and forward settling securities and do not represent risk of loss due to counterparty non-performance.

The following table sets forth the Company's gains (losses) related to derivative financial instruments for the three months ended December 31, 2018 and 2017 in accordance with the Derivatives and Hedging Topic of the ASC. The net gains set forth below are included in 'Cost of sales of physical commodities' and 'Principal gains, net' in the condensed consolidated income statements.

(in millions)	Three Months Ended	
	December 31, 2018	2017
Commodities	\$8.1	\$7.7
Foreign exchange	1.9	2.3
Equity	(3.3 )	—
Interest rate	—	0.4
TBA and forward settling securities	(9.3 )	(0.4 )
Net (losses) gains from derivative contracts	\$(2.6)	\$10.0
Credit Risk		

In the normal course of business, the Company purchases and sells financial instruments, commodities and foreign currencies as either principal or agent on behalf of its clients. If either the client or counterparty fails to perform, the Company may be required to discharge the obligations of the nonperforming party. In such circumstances, the Company may sustain a loss if the fair value of the financial instrument or foreign currency is different from the contract value of the transaction.

The majority of the Company's transactions and, consequently, the concentration of its credit exposure are with commodity exchanges, clients, broker-dealers and other financial institutions. These activities primarily involve collateralized and uncollateralized arrangements and may result in credit exposure in the event that a counterparty fails to meet its contractual obligations. The Company's exposure to credit risk can be directly impacted by volatile financial markets, which may impair the ability of counterparties to satisfy their contractual obligations. The Company seeks to control its credit risk through a variety of reporting and control procedures, including establishing credit and/or position limits based upon a review of the counterparties' financial condition and credit ratings. The Company monitors collateral levels on a daily basis for compliance with regulatory and internal guidelines and requests changes in collateral levels as appropriate.

The Company is a party to financial instruments in the normal course of its business through client and proprietary trading accounts in exchange-traded and OTC derivative instruments. These instruments are primarily the result of the execution of orders for commodity futures, options on futures, OTC swaps and options and spot and forward foreign currency contracts on behalf of its clients, substantially all of which are transacted on a margin basis. Such transactions may expose the Company to significant credit risk in the event margin requirements are not sufficient to fully cover losses which clients may incur. The

Table of Contents

Company controls the risks associated with these transactions by requiring clients to maintain margin deposits in compliance with individual exchange regulations and internal guidelines. The Company monitors required margin levels daily and, therefore, may require clients to deposit additional collateral or reduce positions when necessary. The Company also establishes credit limits for clients, which are monitored daily. The Company evaluates each client's creditworthiness on a case by case basis. Clearing, financing, and settlement activities may require the Company to maintain funds with or pledge securities as collateral with other financial institutions. Generally, these exposures to both clients and exchanges are subject to master netting, or client agreements, which reduce the exposure to the Company by permitting receivables and payables with such clients to be offset in the event of a client default. Management believes that the margin deposits held as of December 31, 2018 were adequate to minimize the risk of material loss that could be created by positions held at that time. Additionally, the Company monitors collateral fair value on a daily basis and adjusts collateral levels in the event of excess market exposure. Generally, these exposures to both clients and counterparties are subject to master netting or client agreements which reduce the exposure to the Company.

Derivative financial instruments involve varying degrees of off-balance sheet market risk whereby changes in the fair values of underlying financial instruments may result in changes in the fair value of the financial instruments in excess of the amounts reflected in the condensed consolidated balance sheets. Exposure to market risk is influenced by a number of factors, including the relationships between the financial instruments and the Company's positions, as well as the volatility and liquidity in the markets in which the financial instruments are traded. The principal risk components of financial instruments include, among other things, interest rate volatility, the duration of the underlying instruments and changes in foreign exchange rates. The Company attempts to manage its exposure to market risk through various techniques. Aggregate market limits have been established and market risk measures are routinely monitored against these limits.

#### Note 6 – Allowance for Doubtful Accounts

The allowance for doubtful accounts related to receivables from clients was \$11.3 million and \$10.2 million as of December 31, 2018 and September 30, 2018, respectively. The allowance for doubtful accounts related to deposits with and receivables from broker-dealers, clearing organizations, and counterparties was \$45.6 million and \$48.0 million, as of December 31, 2018 and September 30, 2018, respectively.

During the three months ended December 31, 2018, the Company recorded bad debt expense of \$0.3 million. Additionally, during the three months ended December 31, 2018, the Company reached settlements with clients, paying \$8.4 million related to demurrage, dead freight, and other penalty charges regarding coal supplied during fiscal 2017. The settlement amount paid was less than the accrued liability for the transactions recorded during fiscal 2017 and fiscal 2018, and accordingly the Company recorded a recovery on the bad debt on physical coal of \$2.4 million in the three months ended December 31, 2018.

During the three months ended December 31, 2017, the Company recorded bad debt expense of \$0.1 million. Additionally, within the Company's Physical Commodities segment, it recorded an additional provision of \$1.0 million related to the bad debt on physical coal for amounts due to the Company from a coal supplier for demurrage and other charges related to contracts with delivery dates subsequent to September 30, 2017.

#### Note 7 – Physical Commodities Inventory

The Company's inventories consist of finished physical commodities. Inventories by component of the Company's Physical Commodities segment are shown below.

(in millions)	December 31, September 30,	
	2018	2018
Physical Ag & Energy <sup>(1)</sup>	\$ 151.1	\$ 114.7
Precious metals - held by broker-dealer subsidiary <sup>(2)</sup>	13.3	42.1
Precious metals - held by non-broker-dealer subsidiaries <sup>(3)</sup>	58.1	65.7
Physical commodities inventory	\$ 222.5	\$ 222.5

<sup>(1)</sup> Physical Ag & Energy maintains agricultural commodity inventories, including corn, soybeans, wheat, dried distillers grain, canola, sorghum, coffee, cocoa, cotton, and others. The agricultural commodity inventories are carried at net realizable value, which approximates fair value less disposal costs, with changes in net realizable value included

as a component of 'cost of sales of physical commodities' on the condensed consolidated income statements. The agricultural inventories have reliable, readily determinable and realizable market prices, have relatively insignificant costs of disposal and are available for immediate delivery. Physical Ag & Energy also maintains energy related inventory, primarily kerosene, which is valued at the lower of cost or net realizable value.

Table of Contents

(2) Precious metals held by the Company's subsidiary, INTL FCStone Ltd, a United Kingdom based broker-dealer subsidiary, is measured at fair value, with changes in fair value included as a component of 'principal gains, net' on the condensed consolidated income statements, in accordance with U.S. GAAP accounting requirements for broker-dealers.

(3) Precious metals inventory held by subsidiaries that are not broker-dealers are valued at the lower of cost or net realizable value.

The Company has recorded lower of cost or net realizable value adjustments for certain precious metals inventory of \$2.0 million and \$0.4 million as of December 31 and September 30, 2018, respectively. The adjustments are included in 'cost of sales of physical commodities' in the condensed consolidated income statements.

## Note 8 – Goodwill

The carrying value of goodwill is allocated to the Company's operating segments as follows:

(in millions)	December 31, 2018	September 30, 2018
Commercial Hedging	\$ 30.3	\$ 30.3
Global Payments	8.9	8.9
Physical Commodities	2.4	2.4
Securities	7.0	6.8
Goodwill	\$ 48.6	\$ 48.4

The Company recorded zero and \$1.2 million in foreign exchange translation losses on goodwill within the Commercial Hedging and Securities operating segments for the three months ended December 31, 2018 and 2017, respectively. The Company also recorded additional goodwill of \$0.2 million for the three months ended December 31, 2018 within the Securities operating segment related to the acquisition of Carl Kliem S.A. as discussed further in Note 17.

## Note 9 – Intangible Assets

The gross and net carrying values of intangible assets as of the balance sheet dates, by major intangible asset class are as follows (in millions):

	December 31, 2018			September 30, 2018		
	Gross Amount	Accumulated Amortization	Net Amount	Gross Amount	Accumulated Amortization	Net Amount
Intangible assets subject to amortization:						
Software programs/platforms	\$2.7	\$ (2.6 )	\$ 0.1	\$2.7	\$ (2.6 )	\$ 0.1
Customer base	21.4	(10.8 )	10.6	21.4	(10.1 )	11.3
Total intangible assets	\$24.1	\$ (13.4 )	\$ 10.7	\$24.1	\$ (12.7 )	\$ 11.4

Amortization expense related to intangible assets was \$0.6 million for the three months ended December 31, 2018 and 2017.

As of December 31, 2018, the estimated future amortization expense was as follows:

(in millions)	
Fiscal 2019 (remaining nine months)	\$1.9
Fiscal 2020	2.2
Fiscal 2021	2.2
Fiscal 2022	1.0
Fiscal 2023 and thereafter	3.4
	\$10.7

Table of Contents

Note 10 – Credit Facilities

Variable-Rate Credit Facilities

The Company has four committed credit facilities under which the Company and its subsidiaries may borrow up to \$594.5 million, subject to the terms and conditions for these facilities. The amounts outstanding under these credit facilities are short term borrowings and carry variable rates of interest, thus approximating fair value. The Company's committed credit facilities are as follows:

\$262.0 million facility available to INTL FCStone Inc. for general working capital requirements.

\$75.0 million facility available to the Company's wholly owned subsidiary, INTL FCStone Financial Inc., for short-term funding of margin to commodity exchanges. The facility is subject to annual review and guaranteed by INTL FCStone Inc.

\$232.5 million facility available to the Company's wholly owned subsidiary, FCStone Merchant Services, LLC, for financing traditional commodity financing arrangements and commodity repurchase agreements. The facility is subject to annual review and is guaranteed by INTL FCStone Inc.

\$25.0 million facility available to the Company's wholly owned subsidiary, INTL FCStone Ltd, for short-term funding of margin to commodity exchanges. The facility is subject to annual review and is guaranteed by INTL FCStone Inc. The Company also has a secured, uncommitted loan facility, under which the Company's wholly owned subsidiary, INTL FCStone Ltd may borrow up to £20.0 million, collateralized by commodities warehouse receipts, to facilitate financing of commodities under repurchase agreement services to its clients, subject to certain terms and conditions of the credit agreement.

The Company also has a secured, uncommitted loan facility, under which INTL FCStone Financial Inc. may borrow up to \$75.0 million, collateralized by commodities warehouse receipts, to facilitate U.S. commodity exchange deliveries of its clients, subject to certain terms and conditions of the credit agreement. There were no borrowings outstanding under this credit facility at December 31, 2018, and September 30, 2018.

The Company also has a secured uncommitted loan facility under which INTL FCStone Financial Inc. may borrow for short term funding of firm and client securities margin requirements, subject to certain terms and conditions of the agreement. The uncommitted amount available to be borrowed is not specified, and all requests for borrowing are subject to the sole discretion of the lender. The borrowings are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to the Company. The amounts borrowed under the facilities are payable on demand. As of December 31, 2018 and September 30, 2018, there were \$20.0 million and \$14.0 million, respectively, in borrowings outstanding under this credit facility.

The Company also has a secured uncommitted loan facilities, under which INTL FCStone Financial Inc. may borrow up to \$150.0 million for short term funding of firm and client securities margin requirements, subject to certain terms and conditions of the agreement. The borrowings are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to the Company. The amounts borrowed under the facilities are payable on demand. There were no borrowings outstanding under this credit facility at December 31, 2018, and September 30, 2018, respectively.

The Company also has a secured uncommitted loan facility under which FCStone Merchant Services, LLC can borrow up to \$20.0 million to facilitate the financing of inventory of commodities and other products or goods approved by the lender in its sole discretion, subject to certain terms and conditions of the loan facility agreement. The loan facility is collateralized by a first priority security interest in goods and inventory of FCStone Merchant Services, LLC that is (a) either located outside of the U.S. and Canada or in transit to a destination outside the U.S. or Canada and (b) acquired with any extension of credit (whether in the form of a loan or by the issuance of a letter of credit) under the loan facility. As of December 31, 2018 and September 30, 2018, there were \$5.9 million and \$3.8 million, respectively, in borrowings outstanding under this credit facility.

Note Payable to Bank

The Company has a loan from a commercial bank, secured by equipment purchased with the proceeds. The note is payable in monthly installments, ending in March 2020.

Table of Contents

The following table sets forth a listing of credit facilities, the current committed amounts as of the report date on the facilities, outstanding borrowings on the facilities, as well as indebtedness on a promissory note as of December 31, 2018 and September 30, 2018.

(in millions)

Borrower	Security	Renewal / Expiration Date	Total Commitment	Amounts Outstanding	
				December 31, 2018	September 30, 2018
<b>Credit Facilities</b>					
<b>Committed Credit Facilities</b>					
INTL FCStone Inc.	Pledged shares of certain subsidiaries	March 18, 2019	\$ 262.0	\$220.0	\$ 208.2
INTL FCStone Financial Inc.	None	April 4, 2019	75.0	—	—
FCStone Merchant Services, LLC	Certain commodities assets	November 1, 2019	232.5	163.5	128.0
INTL FCStone Ltd.	None	February 28, 2019	25.0	25.0	—
			\$ 594.5	\$408.5	\$ 336.2
<b>Uncommitted Credit Facilities</b>					
INTL FCStone Financial Inc.	Commodities warehouse receipts and certain pledged securities	n/a	n/a	\$20.0	\$ 14.0
INTL FCStone Ltd.	Commodities warehouse receipts	n/a	n/a	\$—	\$ —
FCStone Merchant Services, LLC	Certain commodities assets	n/a	n/a	\$5.9	\$ 3.8
<b>Note Payable to Bank</b>					
	Monthly installments, due March 2020 and secured by certain equipment			1.0	1.2
	Total Payables to lenders under loans			\$435.4	\$ 355.2

As reflected above, \$594.5 million of the Company's committed credit facilities are scheduled to expire within twelve months of this filing. The Company intends to renew or replace these facilities when they expire, and based on the Company's liquidity position and capital structure, the Company believes it will be able to do so.

The Company's credit facility agreements contain financial covenants relating to financial measures on a consolidated basis, as well as on a certain stand-alone subsidiary basis, including minimum tangible net worth, minimum regulatory capital, minimum net unencumbered liquid assets, maximum net loss, minimum fixed charge coverage ratio and maximum funded debt to net worth ratio. Failure to comply with these covenants could result in the debt becoming payable on demand. As of December 31, 2018, the Company was in compliance with all of its financial covenants under its credit facilities.

#### Note 11 – Securities and Commodity Financing Transactions

The Company's outstanding notes receivable in connection with repurchase agreements for agricultural and energy commodities, whereby the clients sell to the Company certain commodity inventory and agree to repurchase the commodity inventory at a future date at a fixed price were \$0.7 million and \$1.9 million as of December 31, 2018 and September 30 2018, respectively.

The Company enters into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed and securities loaned transactions to, among other things, finance financial instruments, acquire securities to cover short positions, acquire securities for settlement, and to accommodate counterparties' needs. These agreements are recorded as collateralized financings at their contractual amounts plus accrued interest. The related interest is recorded in the consolidated income statements as interest income or interest expense, as applicable. In connection with these agreements and transactions, it is the policy of the Company to

receive or pledge cash or securities to adequately collateralize such agreements and transactions in accordance with general industry guidelines and practices. The value of the collateral is valued daily and the Company may require counterparties to deposit additional collateral or return collateral pledged, when appropriate. The carrying amounts of these agreements and transactions approximate fair value due to their short-term nature and the level of collateralization.

The Company pledges financial instruments owned to collateralize repurchase agreements. At December 31, 2018, and September 30, 2018, financial instruments owned, at fair value of \$320.9 million and \$123.0 million, respectively, were pledged as collateral under repurchase agreements. The counterparty has the right to repledge the collateral in connection with these transactions. These financial instruments owned have been pledged as collateral and have been parenthetically disclosed on the condensed consolidated balance sheets.

Table of Contents

In addition, as of December 31, 2018, and September 30, 2018, the Company pledged financial instruments owned, at fair value of \$1,212.2 million and \$1,481.1 million, respectively, and securities received under reverse repurchase agreements of \$752.6 million and \$369.8 million, respectively, to cover collateral requirements for tri-party repurchase agreements. For these securities, the counterparties do not have the right to sell or repledge the collateral and, therefore, they have not been parenthetically disclosed on the condensed consolidated balance sheets.

The Company also has repledged securities borrowed and client securities held under custodial clearing arrangements to collateralize securities loaned agreements with a fair value of \$1,018.1 million and \$267.9 million as of December 31, 2018 and September 30, 2018, respectively. Additionally, the Company has also pledged financial instruments owned of \$37.5 million and \$27.1 million as of December 31, 2018 and September 30, 2018, respectively, to collateralize uncommitted loan facilities with certain banks as discussed further in Note 10.

At December 31, 2018, and September 30, 2018, the Company had accepted collateral that it is permitted by contract to sell or repledge. This collateral consists primarily of securities received in reverse repurchase agreements, securities borrowed agreements, and margin securities held on behalf of correspondent brokers. The fair value of such collateral at December 31, 2018, and September 30, 2018, was \$1,959.7 million and \$1,294.8 million, respectively, of which \$429.7 million and \$473.9 million, respectively, was used to cover securities sold short which are recorded in financial instruments sold, not yet purchased on the consolidated balance sheet. In the normal course of business, this collateral is used by the Company to cover financial instruments sold, not yet purchased, to obtain financing in the form of repurchase agreements, and to meet counterparties' needs under lending arrangements.

The following tables provide the contractual maturities of gross obligations under repurchase and securities lending agreements as of December 31, 2018 and September 30, 2018 (in millions):

	December 31, 2018			
	Overnight and Open Days	Less than 30 Days	30-90 Days	Total
Securities sold under agreements to repurchase	\$1,593.8	\$370.0	\$275.5	\$2,239.3
Securities loaned	1031.0	—	—	1031.0
Gross amount of secured financing	\$2,624.8	\$370.0	\$275.5	\$3,270.3

	September 30, 2018			
	Overnight and Open Days	Less than 30 Days	30-90 Days	Total
Securities sold under agreements to repurchase	\$934.9	\$661.3	\$340.5	\$1,936.7
Securities loaned	277.9	—	—	277.9
Gross amount of secured financing	\$1,212.8	\$661.3	\$340.5	\$2,214.6

The following table provides the underlying collateral types of the gross obligations under repurchase and securities lending agreements as of December 31, 2018 and September 30, 2018 (in millions):

	December 31, September 30, 2018 2018	
Securities sold under agreements to repurchase:		
U.S. Treasury obligations	\$ 103.1	\$ 39.6
U.S. government agency obligations	449.9	461.7
Asset-backed obligations	65.0	50.0
Agency mortgage-backed obligations	1,621.3	1,385.4
Total securities sold under agreements to repurchase	\$ 2,239.3	\$ 1,936.7
Securities loaned:		
Equity securities	1,031.0	277.9
Total securities loaned	1,031.0	277.9

Gross amount of secured financing	\$ 3,270.3	\$ 2,214.6

### Note 12 – Commitments and Contingencies

#### Contingencies

During the week ended November 16, 2018, balances in approximately 300 accounts of the FCM division of the Company's wholly owned subsidiary, INTL FCStone Financial Inc., declined below required maintenance margin levels, primarily as a result of significant and unexpected price fluctuations in the natural gas markets. All positions in these accounts, which were managed by OptionSellers.com Inc. ("OptionSellers"), an independent Commodity Trading Advisor ("CTA"), were liquidated in accordance with the INTL FCStone Financial Inc.'s client agreements and obligations under market regulation standards.

A CTA is registered with the U.S. Commodity Futures Trading Commission ("CFTC") and a member of, and subject to audit by, the National Futures Association ("NFA"). OptionSellers is registered under a CFTC Rule 4.7 exemption for "qualified eligible persons," which requires the account holders authorizing OptionSellers to act as their CTA to meet or exceed certain minimum financial requirements. OptionSellers, in its role as a CTA, had been granted by each of its clients full discretionary authority to manage the trading in the client accounts, while INTL FCStone Financial Inc. acted solely as the clearing firm in its role as the FCM.

INTL FCStone Financial Inc.'s client agreements hold account holders liable for all losses in their accounts and obligate the account holders to reimburse INTL FCStone Financial for any account deficits in their accounts. As of February 5, 2019 and December 31, 2018, the aggregate receivable from these client accounts, net of collections and other allowable deductions, was \$29.4 million and \$30.0 million, respectively, with no individual account receivable exceeding \$1.4 million. INTL FCStone Financial Inc. continues to pursue collection of these receivables and intends both to enforce and to defend its rights aggressively, and to claim interest and costs of collection where applicable. The Company has done an assessment of the collectability of these accounts and has concluded that it does not have a sufficient basis to determine an allowance against these uncollected balances. As the Company moves through the collection process and additional information becomes available, the Company will continue to evaluate the likelihood of collection and consider the need for an allowance against the carrying value of these uncollected balances. Depending on future collections and its ongoing assessments, any provisions for bad debts and actual losses ultimately may or may not be material to the Company's financial results. Currently, the Company does not believe that any potential losses from amounts not collected would impact its ability to comply with its ongoing liquidity, capital, and regulatory requirements.

INTL FCStone Financial Inc. has been named in arbitrations brought by clients seeking damages relating to the trading losses in these accounts. The Company believes that such cases are without merit and intend to defend them vigorously. However, the arbitrations are in the very early stages of the process and no prediction can be made regarding the ultimate outcome of the arbitrators' decisions.

#### Legal Proceedings

From time to time and in the ordinary course of business, the Company is involved in various legal actions and proceedings, including tort claims, contractual disputes, employment matters, workers' compensation claims and collections. The Company carries insurance that provides protection against certain types of claims, up to the policy limits of the insurance.

As of December 31, 2018 and September 30, 2018, the condensed consolidated balance sheets include loss contingency accruals, which are not material, individually or in the aggregate, to the Company's financial position or liquidity. In the opinion of management, possible exposure from loss contingencies in excess of the amounts accrued, is not likely to be material to the Company's earnings, financial position or liquidity.

There have been no material changes to the legal actions and proceedings compared to September 30, 2018.

#### Contractual Commitments

##### Self-Insurance

The Company self-insures its costs related to medical and dental claims. The Company is self-insured, up to a stop loss amount, for eligible participating employees and retirees, and for qualified dependent medical and dental claims, subject to deductibles and limitations. As of December 31, 2018, the Company had \$0.8 million accrued for self-insured medical and dental claims included in 'accounts payable and other liabilities' in the condensed consolidated balance sheet.

## Note 13 – Capital and Other Regulatory Requirements

The Company's activities are subject to significant governmental regulation, both in the United States and overseas. The subsidiaries of the Company were in compliance with all of their regulatory requirements as of December 31, 2018, as follows:

(in millions)		As of December 31, 2018			
Subsidiary	Regulatory Authority	Jurisdiction	Requirement Type	Actual	Minimum Requirement
INTL FCStone Financial Inc.	SEC and CFTC	United States	Net capital	\$ 158.0	\$ 89.4
INTL FCStone Financial Inc.	CFTC	United States	Segregated funds	\$ 2,211.0	\$ 2,151.6
INTL FCStone Financial Inc.	CFTC	United States	Secured funds	\$ 133.6	\$ 118.0
INTL FCStone Financial Inc.	SEC	United States	Customer reserve	\$—	\$—
INTL FCStone Financial Inc.	SEC	United States	PAB reserve	\$—	\$—
SA Stone Wealth Management Inc.	SEC	United States	Net capital	\$ 5.1	\$ 0.4
INTL FCStone Ltd <sup>(1)</sup>	Financial Conduct Authority ("FCA")	United Kingdom	Net capital	\$ 186.5	\$ 183.4
INTL FCStone Ltd	FCA	United Kingdom	Segregated funds	\$ 237.5	\$ 97.6
INTL Netherlands BV <sup>(1)</sup>	FCA	United Kingdom	Net capital	\$ 236.5	\$ 98.5
INTL FCStone DTVM Ltda.	Brazilian Central Bank and Securities and Exchange Commission of Brazil	Brazil	Capital adequacy	\$ 12.1	\$ 2.2
INTL Gainvest S.A.	National Securities Commission ("CNV")	Argentina	Capital adequacy	\$ 4.1	\$ 0.1
INTL Gainvest S.A.	CNV	Argentina	Net capital	\$ 1.8	\$ 0.1
INTL CIBSA S.A.	CNV	Argentina	Capital adequacy	\$ 4.8	\$ 0.5
INTL CIBSA S.A.	CNV	Argentina	Net capital	\$ 0.9	\$ 0.3

<sup>(1)</sup> INTL Netherlands BV is a holding company that includes the ownership equity of INTL FCStone Ltd. The associated net capital amounts and minimum requirements should not be considered in aggregate.

Certain other non-U.S. subsidiaries of the Company are also subject to capital adequacy requirements promulgated by authorities of the countries in which they operate. As of December 31, 2018, these subsidiaries were in compliance with their local capital adequacy requirements.

## Note 14 – Other Expenses

Other expenses for the three months ended December 31, 2018 and 2017 consisted of the following:

(in millions)	Three Months Ended December 31,	
	2018	2017
Insurance	\$ 0.8	\$ 0.6
Advertising, meetings and conferences	1.4	0.9

Table of Contents

## Note 15 – Accumulated Other Comprehensive Loss, Net

Comprehensive income (loss) consists of net income (loss) and other gains and losses affecting stockholders' equity that, under U.S. GAAP, are excluded from net income (loss). Other comprehensive income (loss) includes net actuarial losses from defined benefit pension plans and foreign currency translation adjustments.

The following table summarizes the changes in accumulated other comprehensive loss, net for the three months ended December 31, 2018.

(in millions)	Foreign Currency Translation Adjustment	Pension Benefits Adjustment	Accumulated Other Comprehensive Loss
Balances as of September 30, 2018	\$ (30.5 )	\$ (2.6 )	\$ (33.1 )
Other comprehensive income, net of tax	0.3	—	0.3
Balances as of December 31, 2018	\$ (30.2 )	\$ (2.6 )	\$ (32.8 )

## Note 16 – Income Taxes

The income tax provision for interim periods is comprised of tax on ordinary income (loss) provided at the most recent estimated annual effective tax rate, adjusted for the tax effect of discrete items. Management uses an estimated annual effective tax rate based on the forecasted pretax income (loss) and statutory tax rates in the various jurisdictions in which it operates. The Company's effective tax rate differs from the U.S. statutory rate primarily due to state and local taxes, global intangible low taxed income and differing statutory tax rates applied to the income of non-U.S. subsidiaries. The Company records the tax effect of certain discrete items, including the effects of changes in tax laws, tax rates and adjustments with respect to valuation allowances or other unusual or nonrecurring tax adjustments, in the interim period in which they occur, as an addition to, or reduction from, the income tax provision, rather than being included in the estimated effective annual income tax rate. In addition, jurisdictions with a projected loss for the year or a year-to-date loss where no tax benefit can be recognized are excluded from the estimated annual effective income tax rate.

The Company is required to assess its deferred tax assets and the need for a valuation allowance at each reporting period. This assessment requires judgment on the part of management with respect to benefits that may be realized. The Company will record a valuation allowance against deferred tax assets when it is considered more likely than not that all or a portion of the deferred tax assets will not be realized.

## Effects of the Tax Cuts and Jobs Act

On December 22, 2017, the President of the United States signed and enacted into law H.R. 1, the Tax Cuts and Jobs Act ("the Tax Reform"). Among the significant changes to the U.S. Internal Revenue Code, the Tax Reform lowered the U.S. federal corporate income tax rate from 35% to 21%, effective January 1, 2018. The Company will compute its income tax expense (benefit) for the September 30, 2019 tax year using a U.S. statutory tax rate of 21.0%. The Company computed income tax expense for the year ended September 30, 2018 using a U.S. statutory tax rate of 24.5%. The Tax Reform imposed a one-time mandatory repatriation transition tax on previously untaxed accumulated and current earnings and profits ("E&P") of certain foreign subsidiaries.

The Tax Reform also establishes new tax laws that will affect the fiscal year ending September 30, 2019, including, but not limited to, (1) elimination of the corporate alternative minimum tax, (2) a new provision designed to tax global intangible low-taxed income ("GILTI"), (3) limitations on the utilization of net operating losses incurred in tax years beginning after September 30, 2018 to 80% of taxable income per tax year, (4) the creation of the base erosion anti-abuse tax ("BEAT"), (5) a general elimination of U.S. federal income taxes on dividends from foreign subsidiaries, and (6) limitations on the deductibility of interest expense and certain executive compensation. The Company made the policy election to treat GILTI as a current period expense when incurred. The estimated impact of GILTI is included in the forecasted effective tax rate and increases the effective rate by approximately 2%.

The SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118"), which provides guidance on accounting for the tax effects of the Tax Reform. SAB 118 provides a provisional measurement period that should not extend beyond one year from the Tax Reform enactment date for companies to complete the accounting under ASC 740, Income Taxes.

The Company's income tax accounting provisional measurement period for the Tax Reform concluded during the three months ended December 31, 2018 with no adjustments to the provisional amounts previously recorded.

For the three months ended December 31, 2017, the Company recorded tax expense of \$8.9 million related to the remeasurement of deferred tax assets and liabilities based on the information available. As a result of additional information becoming available after December 31, 2017, the Company recorded a benefit of \$0.3 million during the remainder of fiscal

Table of Contents

2018 related to the remeasurement of deferred tax assets and liabilities, and as of September 30, 2018, the accounting for the remeasurement of the deferred tax assets and liabilities was complete.

The Tax Reform also included a one-time mandatory repatriation transition tax on previously untaxed accumulated and current E&P of certain of the Company's foreign subsidiaries. To determine the amount of the transition tax, the Company determined, in addition to other factors, the amount of post 1986 E&P of the relevant subsidiaries, as well as the amount of non-U.S. income taxes paid on such earnings. The Company made a reasonable estimate of the transition tax and recorded a provisional transition tax obligation of \$12.0 million in the three months ended December 31, 2017. The Company recorded a benefit of \$0.8 million during the remainder of fiscal 2018 due to revised E&P computations, refinement of the net operating loss carryforward available, and revised non-US income taxes paid. As of December 31, 2018, the accounting for the one-time mandatory repatriation transition tax on previously untaxed accumulated and current E&P of certain of the Company's foreign subsidiaries is complete.

**Current and Prior Period Tax Expense**

Income tax expense of \$6.2 million and \$25.5 million for the three months ended December 31, 2018 and 2017, respectively, reflect estimated federal, foreign, state and local taxes. Due to the Tax Reform, the Company recorded discrete expense of \$20.9 million during the three months ended December 31, 2017. Tax expense, excluding the discrete expense related to the Tax Reform, was \$4.6 million for the three months ended December 31, 2017. For the three months ended December 31, 2018 and 2017, the Company's effective tax rate was 25% and 137%, respectively. For the three months ended December 31, 2018, the effective rate was higher than the U.S. federal statutory rate of 21% due to U.S. state and local taxes, GILTI, and US and foreign permanent differences. The estimated GILTI tax expense increased the effective rate approximately 2%. The effective rate for the three months ended December 31, 2017 was 25%, excluding the impacts of Tax Reform, and was higher than the blended statutory rate of 24.5% due to U.S. state and local taxes and foreign permanent differences. For the three months ended December 31, 2017, the recorded discrete expense of \$20.9 million related to Tax Reform, increased the effective tax rate by 112%. Further, the Company's effective tax rate decreased 1.0% and 1.2% for the three months ended December 31, 2018 and 2017, respectively, due to excess tax benefits on share-based compensation recognized due to the adoption of ASU 2016-09.

Deferred income tax balances reflect the effects of temporary differences between the carrying amounts of assets and liabilities and their tax bases and are stated at enacted tax rates expected to be in effect when taxes are actually paid or recovered. As of December 31, 2018 and September 30, 2018, the Company has net operating loss carryforwards for U.S. federal, state, local, and foreign income tax purposes of \$9.4 million, net of valuation allowances, which are available to offset future taxable income in these jurisdictions. The state and local net operating loss carryforwards of \$5.7 million, net of valuation allowance, begin to expire after September 2020. INTL Asia Pte. Ltd. has a Singapore net operating loss carryforward of \$2.9 million. This Singapore net operating loss has an indefinite carryforward and, in the judgment of management, is more likely than not to be realized. As a result of Tax Reform, the alternative minimum tax ("AMT") credit carryforward deferred tax asset has been reclassified to income taxes receivable. The Company can continue to utilize AMT credits to offset regular income tax liability in fiscal years 2019 through 2021. Any remaining amount is fully refundable by fiscal year 2022. In fiscal 2018, the Company generated \$6.5 million in foreign tax credit carryforwards as part of the mandatory repatriation transition tax. These credits expire in fiscal year 2028. In the judgment of management, the Company believes that sufficient taxable income will be earned to utilize the foreign tax credit carryforwards within 10 years.

The valuation allowance for deferred tax assets as of December 31, 2018 and September 30, 2018 was \$3.5 million. The valuation allowances as of December 31, 2018 and September 30, 2018 were primarily related to acquired U.S. state and local net operating loss carryforwards and foreign net operating loss carryforwards that, in the judgment of management, are not more likely than not to be realized.

When evaluating if U.S. federal, state, and local deferred taxes are realizable, the Company considers when deferred tax liabilities are scheduled to reverse as well as deferred tax liabilities associated with unrealized gains in securities which the Company could sell, if necessary. Furthermore, the Company considers its ability to implement business and tax planning strategies that would allow the remaining U.S. federal, state, and local deferred tax assets, net of valuation allowances, to be realized in less than 10 years. Based on the current and projected profitability of the

Company, as well as tax planning strategies that can be implemented, management believes that it is more likely than not that the Company will realize the tax benefit of the deferred tax assets, net of the existing valuation allowances, in the future.

As of December 31, 2018 and September 30, 2018, the Company has accumulated undistributed earnings generated by its foreign subsidiaries of approximately \$360.1 million and \$354.7 million, respectively. The Company recognized the mandatory repatriation tax related to these undistributed earnings as part of the Tax Reform and, as a result, repatriation of these amounts would not be subject to additional U.S. federal income tax but may be subject to applicable foreign withholding and state taxes in the relevant jurisdictions. With the exception of a \$13.0 million dividend that was paid in the first quarter of fiscal year 2019, the Company intends to indefinitely reinvest these earnings outside of the United States as the Company expects future

Table of Contents

U.S. cash generation to be sufficient to meet future U.S. cash needs. Foreign withholding tax is not applicable to the first quarter distribution.

The Company and its subsidiaries file income tax returns with the U.S. federal jurisdiction and various state, local and foreign jurisdictions. The Company has open tax years ranging from September 30, 2010 through September 30, 2018 with U.S. federal and state and local taxing authorities. The Company is currently under examination by the U.S. Internal Revenue Service for the 2016 fiscal tax year; however, no additional tax liability is expected. In the United Kingdom (“U.K.”), the Company has open tax years ending September 30, 2017 to September 30, 2018. In Brazil, the Company has open tax years ranging from December 31, 2013 through December 31, 2018. In Argentina, the Company has open tax years ranging from September 30, 2011 to September 30, 2018. In Singapore, the Company has open tax years ranging from September 30, 2014 to September 30, 2018.

Note 17 - Acquisitions

Carl Kliem S.A.

On June 12, 2018, the Company executed a sale and purchase agreement to acquire the entire issued and outstanding share capital of Carl Kliem S.A. Carl Kliem S.A. is an independent interdealer broker based in Luxembourg, which provides foreign exchange, interest rate and fixed income products to institutional clients across the European Union. Carl Kliem S.A. employs approximately 40 people and has over 400 active institutional clients. This acquisition provides the Company with access to additional European institutional clients that can benefit from the Company’s full suite of financial services and a European Union-based entity in anticipation of the U.K.’s planned exit from the European Union. The closing of the agreement was conditional upon approval of the Luxembourg financial sector supervisory authority, the Commission de Surveillance du Secteur Financier (“CSSF”). In November 2018, the Company received regulatory approval from the CSSF to complete the acquisition and the acquisition closed effective November 30, 2018. The purchase price was \$2.4 million of cash consideration and was equal to the net tangible book value on the closing date less restructuring costs.

The initial purchase price allocation resulted in cash and cash equivalents of \$1.7 million, receivables from clients of \$1.1 million, property and equipment of \$0.1 million, income tax receivables of \$0.1 million, accounts payable and other accrued liabilities of \$0.6 million, and payable to broker-dealers, clearing organizations, and counterparties of \$0.2 million. The fair value of the consideration transferred exceeded the fair value of identifiable assets acquired and liabilities assumed as of the acquisition date. The excess of the purchase consideration over the fair value of identifiable assets acquired and liabilities assumed of \$0.2 million was recorded as goodwill. The business activities of Carl Kleim S.A. have been included within the Company’s Securities and Clearing and Execution Services reportable segments. The Company’s condensed consolidated income statement for the three months ended December 31, 2018 includes a net loss of \$0.2 million for the post-acquisition results of the acquired business.

Note 18 – Segment Analysis

The Company reports its operating segments based on services provided to clients. The Company’s business activities are managed as operating segments and organized into reportable segments as follows:

• Commercial Hedging (includes components Financial Agricultural (Ag) & Energy and LME Metals)

• Global Payments

• Securities (includes components Equity Capital Markets, Debt Capital Markets and Asset Management)

• Physical Commodities (includes components Precious Metals and Physical Ag & Energy)

• Clearing and Execution Services (includes components Exchange-Traded Futures & Options, FX Prime Brokerage,

• Correspondent Clearing, Independent Wealth Management and Derivative Voice Brokerage)

The total revenues reported combine gross revenues for the physical commodities business for subsidiaries that are not broker-dealers and net revenues for all other businesses. In order to reflect the way that the Company’s management views the results, the table below also reflects the segment contribution to ‘operating revenues’, which is shown on the face of the condensed consolidated income statements and which is calculated by deducting physical commodities cost of sales from total revenues.

Segment data includes the profitability measure of net contribution by segment. Net contribution is one of the key measures used by management to assess the performance of each segment and for decisions regarding the allocation of the Company’s resources. Net contribution is calculated as revenue less direct cost of sales, transaction-based

clearing expenses, variable compensation, introducing broker commissions, and interest expense. Variable compensation paid to risk management consultants/traders generally represents a fixed percentage of an amount equal to revenues generated, and in some cases, revenues produced less transaction-based clearing charges, base salaries and an overhead allocation.

Table of Contents

Segment data also includes segment income which is calculated as net contribution less non-variable direct expenses of the segment. These non-variable direct expenses include trader base compensation and benefits, operational employee compensation and benefits, communication and data services, business development, professional fees, bad debt expense and other direct expenses.

Inter-segment revenues, charges, receivables and payables are eliminated upon consolidation, except revenues and costs related to foreign currency transactions undertaken on an arm's length basis by the foreign exchange trading business for the securities business. The foreign exchange trading business competes for this business as it does any other business. If its rates are not competitive, the securities businesses buy or sell their foreign currency through other market counterparties.

On a recurring basis, the Company sweeps excess cash from certain operating segments to a centralized corporate treasury function in exchange for an intercompany receivable asset. The intercompany receivable asset is eliminated during consolidation, and therefore this practice may impact reported total assets between segments.

Table of Contents

Information for the reportable segments is shown in accordance with the Segment Reporting Topic of the ASC as follows:

(in millions)	Three Months Ended	
	2018	2017
Total revenues:

## Table of Contents

### Note 19 - Subsequent Event

On December 11, 2018 the Company executed a stock purchase agreement with GMP International Holdings Corp., a wholly-owned subsidiary of Canada-based GMP Capital Inc., to acquire its U.S.-based broker-dealer subsidiary, GMP Securities LLC (“GMP”), formerly known as Miller Tabak Securities, LLC, an independent, SEC-registered broker-dealer and FINRA member. GMP has an institutional fixed-income trading business which deals in high yield, convertible and emerging market debt and makes markets in certain equity securities. This transaction also involved the purchase of GMP’s U.S.-based parent. This acquisition allows the Company to expand its fixed income product offerings to clients and adds over 2,400 new institutional clients who can benefit from the Company’s full suite of financial services.

The transaction was subject to regulatory approval which was obtained in January 2019 with the acquisition closing on January 15, 2019. The aggregate purchase price for all of the outstanding shares of GMP and its U.S.-based parent is equal to the final tangible asset value determined as of the acquisition date less \$2.0 million. On the acquisition date, the Company paid \$8.2 million in cash consideration based upon estimated tangible book value. The initial cash consideration paid for the acquisition is subject to adjustment upon the final tangible book value to be agreed upon within a period of 90 days. The initial fair value allocation of the purchase price is not yet complete.

### Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Throughout this document, unless the context otherwise requires, the terms “Company”, “we”, “us” and “our” refer to INTL FCStone Inc. and its consolidated subsidiaries. INTL FCStone Inc. is a Delaware corporation.

The following discussion and analysis should be read in conjunction with the condensed consolidated financial statements and notes thereto appearing elsewhere in this report. This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements involve known and unknown risks and uncertainties, many of which are beyond the control of INTL FCStone Inc. and its subsidiaries, including adverse changes in economic, political and market conditions, losses from our market-making and trading activities arising from counter-party failures and changes in market conditions, the possible loss of key personnel, the impact of increasing competition, the impact of changes in government regulation, the possibility of liabilities arising from violations of foreign, federal and state securities laws and the impact of changes in technology in the securities and commodities trading industries. Although we believe that our forward-looking statements are based upon reasonable assumptions regarding our business and future market conditions, there can be no assurances that our actual results will not differ materially from any results expressed or implied by our forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. We caution readers that any forward-looking statements are not guarantees of future performance.

#### Overview

We are a diversified global brokerage and financial services firm providing execution, risk management and advisory services, market intelligence and clearing services with significant asset class coverage and significant market coverage globally. We help our clients to access market liquidity, maximize profits and manage risk. Our revenues are derived primarily from financial products and advisory services intended to fulfill our clients’ commercial needs and provide bottom-line benefits to their businesses. Our businesses are supported by our global infrastructure of regulated operating subsidiaries, our advanced technology platform and our team of more than 1,700 employees as of December 31, 2018. We believe our client-first approach differentiates us from large banking institutions, engenders trust, and has enabled us to establish leadership positions in a number of complex fields in financial markets around the world. We report our operating segments based on services provided to clients. Our business activities are managed as operating segments and organized into five reportable segments, including Commercial Hedging and Physical Commodities, which are commercial client focused; Clearing & Execution Services (“CES”) and Securities, which are institutional client focused; and Global Payments. See Segment Information for a listing of our operating segment components.

#### Effects of the Tax Cuts and Jobs Act

On December 22, 2017, the President of the United States (“U.S.”) signed and enacted into law H.R. 1, the Tax Cuts and Jobs Act (“the Tax Reform”). Among the significant changes to the U.S. Internal Revenue Code, the Tax Reform

lowered the U.S. federal corporate income tax rate from 35% to 21%, effective January 1, 2018. We will compute our income tax expense (benefit) for the September 30, 2019 tax year using a U.S. statutory tax rate of 21%. We computed income tax expense for the year ended September 30, 2018 using a U.S. statutory tax rate of 24.5%. See Note 16 of the Condensed Consolidated Financial Statements for additional information.

For the three months ended December 31, 2017, we recorded tax expense of \$8.9 million related to the remeasurement of deferred tax assets and liabilities based on the information available. The Tax Reform also included a one-time mandatory

## Table of Contents

repatriation transition tax on previously untaxed accumulated and current E&P of certain of our foreign subsidiaries. We made a reasonable estimate of the transition tax and recorded a provisional transition tax obligation of \$12.0 million in the three months ended December 31, 2017.

### Recent Events Affecting the Company

During the week ended November 16, 2018, balances in approximately 300 accounts of the FCM division of our wholly owned subsidiary, INTL FCStone Financial, declined below required maintenance margin levels, primarily as a result of significant and unexpected price fluctuations in the natural gas markets. All positions in these accounts, which were managed by OptionSellers.com Inc. (“OptionSellers”), an independent Commodity Trading Advisor (“CTA”), were liquidated in accordance with the INTL FCStone Financial’s client agreements and obligations under market regulation standards.

A CTA is registered with the CFTC and a member of, and subject to audit by, the NFA. OptionSellers is registered under a CFTC Rule 4.7 exemption for “qualified eligible persons,” which requires the account holders authorizing OptionSellers to act as their CTA to meet or exceed certain minimum financial requirements. OptionSellers, in its role as a CTA, had been granted by each of its clients full discretionary authority to manage the trading in the client accounts, while INTL FCStone Financial acted solely as the clearing firm in its role as the FCM.

INTL FCStone Financial’s client agreements hold account holders liable for all losses in their accounts and obligate the account holders to reimburse INTL FCStone Financial for any account deficits in their accounts. As of February 5, 2019 and December 31, 2018, the aggregate receivable from these client accounts, net of collections and other allowable deductions, was \$29.4 million and \$30.0 million, respectively, with no individual account receivable exceeding \$1.4 million. INTL FCStone Financial continues to pursue collection of these receivables and intends both to enforce and to defend its rights aggressively, and to claim interest and costs of collection where applicable.

We have done an assessment of the collectability of these accounts and have concluded that we do not have a sufficient basis to determine an allowance against these uncollected balances. As we move through the collection process and additional information becomes available, we will continue to evaluate the likelihood of collection and consider the need for an allowance against the carrying value of these uncollected balances. Depending on future collections and our ongoing assessments, any provisions for bad debts and actual losses ultimately may or may not be material to our financial results. Currently, we do not believe that any potential losses from amounts not collected would impact our ability to comply with our ongoing liquidity, capital, and regulatory requirements.

We have been named in arbitrations brought by clients seeking damages relating to the trading losses in these accounts. We believe that such cases are without merit and intend to defend them vigorously. However, the arbitrations are in the very early stages of the process and no prediction can be made regarding the ultimate outcome of the arbitrators’ decisions.

### Executive Summary

In the first quarter of fiscal 2019, we achieved strong operating revenue growth, adding \$52.1 million, or 25%, compared to the prior year to \$264.7 million. With the exception of our Commercial Hedging segment, which saw operating revenues decline a modest 3.0%, all of our operating segments recorded double digit operating revenue growth versus the prior year.

The growth in operating revenues was led by our Securities and Clearing and Execution Services segments, which increased \$26.0 million and \$23.0 million, respectively versus the prior year. Global Payments achieved record operating revenues, adding \$5.1 million, while our Physical Commodities segment added \$3.7 million in operating revenues versus the prior year. Overall, segment income increased 23%, or \$13.2 million to \$71.5 million in the first quarter.

Commercial Hedging segment income declined 37%, primarily as a result of a \$7.8 million decline in OTC revenues as well as a \$1.9 million increase in non-variable direct expenses, primarily non-variable compensation and benefits and trade system costs.

Global Payments segment income increased 27%, primarily as a result of the increase in operating revenues, driven by a 7% increase in the number of payments made and a 13% increase in the average revenue per payment versus the prior year period. The operating revenue growth was partially offset by a \$0.6 million increase in non-variable compensation and benefits.

Securities segment income increased 45%, primarily as a result of strong performance in our Equity Capital Markets business which added \$20.0 million or 113% in operating revenue versus the prior year driven by a 75% increase in the gross dollar volume traded.

Physical Commodities segment income increased \$4.8 million to \$5.9 million in the first quarter of fiscal 2019. This was driven by a \$3.7 million increase in operating revenues as well as a \$3.3 million decline in non-variable direct expenses. The decline in non-variable direct expenses was driven by a \$2.4 million recovery on the bad debt on physical coal in the first quarter of fiscal 2019 compared to the prior year period which included a \$1.0 million bad debt on physical coal.

Table of Contents

CES segment income increased 69%, primarily as a result of a \$23.0 million increase in operating revenues, most notably in the Exchange-Traded Futures & Options business which added \$14.5 million in operating revenues. This increase was driven by both a 57% increase in exchange traded volumes and an increase in interest income. In addition, during the first quarter, in our FX Prime Brokerage business, we recorded a \$2.7 million settlement received in the first quarter related to the Barclays PLC 'last look' class action matter. In addition, we recorded \$0.7 million in legal fees related to this settlement.

On the expense side, we continue to focus on maintaining our variable cost model and limiting the growth of our non-variable expenses. To that end, variable expenses were 63% of total expenses in the current period compared to 58% in the prior year period. Non-variable expenses increased 3%, or \$2.1 million year-over-year.

For the first quarter of fiscal 2019, we recorded a net income of \$18.2 million compared to a net loss of \$6.9 million in the prior year period. The prior year period includes an estimated income tax charge of \$20.9 million related to the enactment of the Tax Reform.

## Selected Summary Financial Information

## Results of Operations

Total revenues reported combine gross revenues for the physical commodities business and net revenues for all other businesses. In order to reflect the way that we view the results, the table below reflects the calculation of the subtotal 'operating revenues', which is calculated by deducting physical commodities cost of sales from total revenues. Set forth below is our discussion of the results of our operations, as viewed by management, for the three month periods ended December 31, 2018 and 2017.

## Financial Information (Unaudited)

**Operating Revenues**

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Operating revenues increased 25% to a record \$264.7 million in the first quarter compared to \$212.6 million in the prior year. All operating segments recorded growth in operating revenues, with the exception of the Commercial Hedging segment which declined \$1.7 million versus the prior year. The growth in operating revenues was led by our Securities segment which added \$26.0 million versus the prior year, while our Clearing and Execution Services segment added \$23.0 million. The Global Payments and Physical Commodities segments added \$5.1 million and \$3.7 million, respectively, in operating revenues versus the prior year.

Operating revenues in our Securities segment increased 60% to \$69.0 million in the first quarter compared to the prior year. The Equity Capital Markets business added \$20.0 million, as the gross dollar volume traded increased 75% as a result of an increase in market volatility and market share. Operating revenues in our Debt Capital Markets business increased \$6.3 million versus the prior year, driven by an increase in interest income within our domestic institutional dealer in fixed income securities, which was partially offset by lower revenues in our Argentinian and domestic municipal securities businesses. Asset Management operating revenues declined \$0.3 million compared to the prior year period as a result of a 40% decline in average assets under management.

Operating revenues in our CES segment increased 32% to \$95.2 million in the first quarter, primarily as a result of 40% growth in Exchange-Traded Futures & Options revenues to \$50.4 million, driven by increases in contract volumes and interest income. Our Correspondent Clearing business added \$2.3 million in operating revenues, compared to the prior year, to \$8.3 million as a result of a \$2.7 million increase in interest and fee income related to client assets under administration. Our Independent Wealth Management business added \$1.7 million versus the prior year, while our Derivative Voice Brokerage and FX Prime Brokerage businesses added \$1.7 million and \$2.8 million, respectively. The increase in FX Prime Brokerage operating revenues was primarily driven by a \$2.7 million settlement received related to the Barclays PLC 'last look' class action matter.

Operating revenues in Commercial Hedging declined 3% compared to the prior year to \$59.8 million as a result of a \$7.8 million decline in OTC revenues, which was partially offset by a \$2.1 million increase in exchange-traded revenues and a \$3.5 million increase in interest income. Exchange-traded volumes and OTC volumes increased 8% and 25%, respectively, and the average client equity increased 14% to \$1.0 billion.

Operating revenues in our Global Payments segment increased 21% in the first quarter to a record \$29.7 million, as a result of a 7% increase in the number of global payments and a 13% increase in the average revenue per trade compared to the prior year period.

Our Physical Commodity segment operating revenues increased 35% to \$14.3 million. This increase was driven by a \$2.4 million increase in Precious Metals operating revenues as well as a \$1.3 million increase in Physical Ag & Energy operating revenues, both of which resulted from increased client activity.

Interest income increased \$21.0 million, or 88%, to \$45.0 million in the first quarter compared to \$24.0 million in the prior year, as a result of the effect of increases in short term interest rates as well as increases in client balances in our Commercial Hedging and CES segments and volumes in our Debt Capital Markets business. Interest income in our Securities segment increased \$12.0 million in the first quarter over the prior year, of which \$8.5 million was related to increased trading activity within our domestic institutional dealer in fixed income securities and \$3.5 million was related to an increase in securities lending activities. In addition, average client equity in the Financial Ag & Energy and Exchange-Traded Futures & Options

Table of Contents

components of our Commercial Hedging and CES segments increased 10% to \$2.3 billion in the first quarter compared to the prior year, which combined with the increases in short-term interest rates resulted in an aggregate \$7.4 million increase in interest income in these businesses.

See Segment Information below for additional information on activity in each of the segments.

Interest and Transactional Expenses

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Transaction-based clearing expenses: Transaction-based clearing expenses increased 36% to \$50.1 million in the first quarter compared to \$36.9 million in the prior year, and were 19% of operating revenues in the first quarter compared to 17% in the prior year. The increase in expense is primarily related to higher volumes in our Exchange-Traded Futures & Options and Financial Ag & Energy components, and significant growth in our Equity Capital Markets activity.

Introducing broker commissions: Introducing broker commissions increased 5% to \$32.6 million in the first quarter compared to \$31.1 million in the prior year, and were 12% of operating revenues in the first quarter compared to 15% in the prior year. The increase in expense is primarily due to increased activity in our Exchange-Traded Futures & Options, Independent Wealth Management and Financial Ag & Energy components, partially offset by lower costs in our Argentinian Debt Capital Markets business.

Interest expense: Interest expense increased \$18.7 million, or 131%, to \$33.0 million in the first quarter compared to \$14.3 million in the prior year. During the first quarter and the prior year, interest expense directly attributable to trading activities, including interest on short-term financing facilities of subsidiaries, was \$30.2 million and \$12.1 million, respectively, and interest expense related to corporate funding purposes was \$2.8 million and \$2.2 million, respectively.

The increase in interest expense is primarily related to the trading activities of our institutional dealer in fixed income securities, which resulted in higher interest expense of \$10.0 million, and the increased activity of our securities lending business in our Equity Capital Markets component, which resulted in higher interest expense of \$3.3 million. Also, an increase in short-term interest rates resulted in higher interest costs in our Exchange-Traded Futures & Options and Financial Ag & Energy components. Additionally, higher short-term interest rates along with higher average borrowings outstanding on physical commodities financing facilities resulted in increased interest expense.

Net Operating Revenues

Net operating revenues is one of the key measures used by management to assess the performance of our operating segments. Net operating revenue is calculated as operating revenue less transaction-based clearing expenses, introducing broker commissions and interest expense. Transaction-based clearing expenses represent variable expenses paid to executing brokers, exchanges, clearing organizations and banks in relation to our transactional volumes. Introducing broker commissions include commission paid to non-employee third parties that have introduced clients to us. Net operating revenues represent revenues available to pay variable compensation to risk management consultants and traders and direct non-variable expenses, as well as variable and non-variable expenses of operational and administrative employees.

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Net operating revenues increased 14% to \$149.0 million in the first quarter compared to \$130.3 million in the prior year.

Table of Contents

## Compensation and Other Expenses

The following table shows a summary of expenses, other than interest and transactional expenses.

(in millions)	Three Months Ended		
	December 31,		
	2018	% Change	2017
Compensation and benefits:			
Fixed compensation and benefits	\$41.4	3 %	\$40.3
Variable compensation and benefits	47.7	29 %	36.9
	89.1	15 %	77.2
Other non-compensation expenses:			
Trading systems and market information	9.2	12 %	8.2
Occupancy and equipment rental	4.4	7 %	4.1
Professional fees	5.3	13 %	4.7
Travel and business development	3.8	9 %	3.5
Non-trading technology and support	4.2	35 %	3.1
Depreciation and amortization	2.9	7 %	2.7
Communications	1.3	(7) %	1.4
Bad debts	0.3	200 %	0.1
(Recovery) bad debt on physical coal	(2.4)	n/m	1.0
Other expense	6.5	14 %	5.7
	35.5	3 %	34.5
Total compensation and other expenses	\$124.6	12 %	\$111.7

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Compensation and Other Expenses: Compensation and other expenses increased 12%, to \$124.6 million in the first quarter compared to \$111.7 million in the prior year.

Compensation and Benefits: Total compensation and benefits expense increased 15% to \$89.1 million in the first quarter compared to \$77.2 million in the prior year. Total compensation and benefits were 34% of operating revenues in the first quarter compared to 36% in the prior year. The variable portion of compensation and benefits increased by 29% to \$47.7 million in the first quarter compared to \$36.9 million in the prior year. Variable compensation and benefits were 32% of net operating revenues in the first quarter compared to 28% in the prior year. Administrative, centralized operations and executive incentive compensation was \$6.3 million in the first quarter compared to \$4.3 million in the prior year.

The fixed portion of compensation and benefits increased 3% to \$41.4 million in the first quarter compared to \$40.3 million in the prior year. Non-variable salaries increased \$1.1 million, or 4%, primarily due to the increased headcount across administrative areas. Employee benefits, excluding share-based compensation, increased \$0.9 million in the first quarter, primarily related to higher healthcare and other benefit costs from the increased headcount. Share-based compensation is a component of the fixed portion, and includes stock option and restricted stock expense. Share-based compensation was \$1.9 million in the first quarter compared to \$1.6 million in the prior year. The number of employees increased 4% to 1,763 at the end of the first quarter compared to 1,701 at the beginning of the first quarter. The number of employees at the end of the prior year period was 1,595.

Other Non-Compensation Expenses: Other non-compensation expenses increased 3% to \$35.5 million in the first quarter compared to \$34.5 million in the prior year. Trade systems and market information increased \$1.0 million, as higher market information costs were experienced in the Financial Ag & Energy component and among our operational and administrative departments. Non-trading technology and support increased \$1.1 million, primarily due to higher support and maintenance costs related to various IT and client engagement systems.

During the quarter ended December 31, 2018, we reached settlements with clients, paying \$8.4 million related to demurrage, dead freight, and other penalty charges regarding coal supplied during fiscal 2017. The settlement amount paid was less than the accrued liability for the transactions recorded during fiscal 2017 and fiscal 2018, and

accordingly we recorded a recovery on the bad debt on physical coal of \$2.4 million in the quarter ended December 31, 2018. During the prior year period, we recorded additional bad debt expense of \$1.0 million related to reimbursement due the Company from a coal supplier following our recorded charge of \$47.0 million during the fourth quarter of fiscal 2017. The expense related to reimbursement for demurrage and other charges related to contracts with delivery dates during the first quarter of fiscal 2018.

Provision for Taxes: The effective income tax rate was 25% in the first quarter compared to 137% in the prior year. For the three months ended December 31, 2018, the effective rate was higher than the U.S. federal statutory rate of 21% due to U.S. state and local taxes, GILTI, and US and foreign permanent differences. The estimated GILTI tax expense increased the

Table of Contents

effective rate approximately 2%. The effective rate for the three months ended December 31, 2017 was 25%, excluding the impacts of Tax Reform, and was higher than the blended statutory rate of 24.5% due to U.S. state and local taxes and foreign permanent differences. For the three months ended December 31, 2017, the Company recorded discrete expense of \$20.9 million related to Tax Reform, which increased the effective tax rate by 112%. Further, the Company's effective tax rate decreased 1.0% and 1.2% for the three months ended December 31, 2018 and 2017, respectively, due to excess tax benefits on share-based compensation recognized due to the adoption of Accounting Standards Update ("ASU") 2016-09.

## Unallocated Costs and Expenses

The following table is a breakout of our unallocated costs and expenses from the total costs and expenses shown above. The unallocated costs and expenses include certain shared services such as information technology, accounting and treasury, credit and risk, legal and compliance, and human resources and other activities.

(in millions)	Three Months Ended December 31,		
	2018	% Change	2017
Compensation and benefits:			
Fixed compensation and benefits	\$17.1	4 %	\$16.5
Variable compensation and benefits	5.6	47 %	3.8
	22.7	12 %	20.3
Other non-compensation expenses:			
Communication and data services	0.4	(33 )%	0.6
Occupancy and equipment rental	4.4	7 %	4.1
Professional fees	3.3	18 %	2.8
Travel and business development	1.1	38 %	0.8
Non-trading technology and support	3.0	20 %	2.5
Depreciation and amortization	2.3	5 %	2.2
Communications	1.2	(8 )%	1.3
Other expense	3.6	(10 )%	4.0
	19.3	5 %	18.3
Total compensation and other expenses	\$42.0	9 %	\$38.6

Total unallocated costs and other expenses increased \$3.4 million to \$42.0 million in the first quarter compared to \$38.6 million in the prior year. Compensation and benefits increased \$2.4 million, or 12% to \$22.7 million in the first quarter compared to \$20.3 million in the prior year. During the first quarter, the increase in variable compensation and benefits is primarily related to headcount increases across several administrative departments.

## Variable vs. Fixed Expenses

(in millions)	Three Months Ended December 31,			
	2018	% of Total	2017	% of Total
Variable compensation and benefits	\$47.7	23 %	\$36.9	21 %
Transaction-based clearing expenses	50.1	24 %	36.9	21 %
Introducing broker commissions	32.6	16 %	31.1	16 %
Total variable expenses	130.4	63 %	104.9	58 %
Fixed compensation and benefits	41.4	20 %	40.3	22 %
Other fixed expenses	37.6	18 %	33.4	19 %
Bad debts	0.3	— %	0.1	— %
(Recovery) bad debt on physical coal	(2.4 )	(1 )%	1.0	1 %
Total non-variable expenses	76.9	37 %	74.8	42 %
Total non-interest expenses	\$207.3	100 %	\$179.7	100 %

We seek to make our non-interest expenses variable to the greatest extent possible, and to keep our fixed costs as low as possible. The table above shows an analysis of our variable expenses and non-variable expenses as a percentage of total non-interest expenses for the three months ended December 31, 2018 and 2017, respectively.

Our variable expenses consist of variable compensation paid to traders and risk management consultants, bonuses paid to operational, administrative and executive employees, transaction-based clearing expenses and introducing broker commissions. As a percentage of total non-interest expenses, variable expenses were 63% in the first quarter compared to 58% in the prior year.

Table of Contents

Segment Information

Our business activities are managed as operating segments and organized into reportable segments as follows:  
INTL FCStone Inc.

Global Payments & Energy	Securities	Physical Commodities	Clearing and Execution Services (“CES”)
Components:	Components:	Components:	Components:
- Financial - Global Ag & Energy	- Equity Capital Markets	- Precious Metals	- Exchange-traded Futures & Options
- LME Metals	- Debt Capital Markets  - Asset Management	- Physical Ag & Energy	- FX Prime Brokerage - Correspondent Clearing - Independent Wealth Management - Derivative Voice Brokerage

We report our operating segments based on services provided to clients. Net contribution is one of the key measures used by management to assess the performance of each segment and for decisions regarding the allocation of our resources. Net contribution is calculated as revenues less direct cost of sales, transaction-based clearing expenses, introducing broker commissions, interest expense and variable compensation. Variable compensation paid to risk management consultants and traders generally represents a fixed percentage of an amount equal to revenues generated, and in some cases, revenues generated less transaction-based clearing expenses and related charges, base salaries and an overhead allocation.

Segment income is calculated as net contribution less non-variable direct expenses of the segment. These non-variable direct expenses include trader base compensation and benefits, operational charges, communication and data services, business development, professional fees, bad debt expense, trade errors and direct marketing expenses.

Bad debts	0.3		0.1	
Bad debt on physical coal	(2.4 )		1.0	
Total non-variable direct expenses	40.8	15%	40.5	19%
Segment income	\$ 71.5		\$ 58.3	

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Net contribution for all of our business segments increased 14% to \$112.3 million in the first quarter compared to \$98.8 million in the prior year. Segment income increased 23% to \$71.5 million in the first quarter compared to \$58.3 million in the prior year.

## Commercial Hedging

We serve our commercial clients through our team of risk management consultants, providing a high-value-added service that we believe differentiates us from our competitors and maximizes the opportunity to retain our clients. Our risk management consulting services are designed to quantify and monitor commercial entities' exposure to commodity and financial risk. Upon assessing this exposure, we develop a plan to control and hedge these risks with post-trade reporting against specific client objectives. Our clients are assisted in the execution of their hedging strategies through a wide range of products from listed exchange-traded futures and options, to basic OTC instruments that offer greater flexibility and structured OTC products designed for customized solutions.

Our services span virtually all traded commodity markets, with the largest concentrations in agricultural and energy commodities (consisting primarily of grains, energy and renewable fuels, coffee, sugar, cotton, and food service) and base metals products listed on the LME. Our base metals business includes a position as a Category One ring dealing member of the LME, providing execution, clearing and advisory services in exchange-traded futures and OTC products. We also provide execution of foreign currency forwards and options and interest rate swaps as well as a wide range of structured product solutions to our commercial clients who are seeking cost-effective hedging strategies. Generally, our clients direct their own trading activity, and our risk management consultants do not have discretionary authority to transact trades on behalf of our clients.

Selected data:

Volume (contracts, 000's)	409.3	25%	327.9
Average rate per contract	\$27.85	(52)%	\$58.55

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Operating revenues decreased 3% to \$59.8 million in the first quarter compared to \$61.5 million in the prior year. Exchange-traded revenues increased 6%, to \$35.6 million in the first quarter, primarily driven by increased client activity in the domestic grain markets, Latin America soft commodities and in our LME business. Overall exchange-traded contract volumes increased 8%, however the average rate per contract declined 2% to \$5.20.

Table of Contents

OTC revenues declined 39%, to \$12.3 million in the first quarter, compared to \$20.1 million in the prior year, despite a 25% increase in OTC volumes. OTC revenues were negatively effected by marked-to-market declines, which we believe in part are temporary in nature, related to certain longer tenor positions which are directionally hedged but suffered declines in value during periods of lower market activity at the end of the calendar year. These declines were partially offset by increased client activity in the energy, grain and soft commodity markets.

Consulting, management, and account fees increased 8% over the prior year, to \$4.0 million in the first quarter.

Interest income, increased 83%, to \$7.7 million compared to \$4.2 million in the prior year. The increase in interest income was driven by an increase in short-term interest rates, as well as a 14% increase in average equity for exchange-traded futures and options clients versus the prior year to \$1,003.5 million in the first quarter.

Segment income decreased 37% to \$13.3 million in the first quarter compared to \$21.1 million in the prior year, primarily as a result of the \$1.7 million decline in operating revenues discussed above, a \$4.1 million increase in variable expenses excluding interest expense, and a \$1.9 million increase in non-variable direct expenses. The increase in variable expenses is principally driven by the increase in exchange-traded and OTC contract volumes. The increase in non-variable direct expenses was driven by increases in both non-variable compensation and benefits and trade system costs. Variable expenses, excluding interest, expressed as a percentage of operating revenues increased to 48% compared to 40% in the prior year, primarily as the result of the decline in OTC revenues.

**Global Payments**

We provide global payment solutions to banks and commercial businesses as well as charities and non-governmental and government organizations. We offer payments services in more than 170 countries and 140 currencies, which we believe is more than any other payments solution provider, and provide transparent pricing.

Our proprietary FXecute global payments platform is integrated with a financial information exchange (“FIX”) protocol. This FIX protocol is an electronic communication method for the real-time exchange of information, and we believe it represents one of the first FIX offerings for cross-border payments in exotic currencies. FIX functionality allows clients to view real time market rates for various currencies, execute and manage orders in real-time, and view the status of their payments through the easy-to-use portal.

Additionally, as a member of the Society for Worldwide Interbank Financial Telecommunication (“SWIFT”), we are able to offer our services to large money center and global banks seeking more competitive international payment services.

Through this single comprehensive platform and our commitment to client service, we believe we are able to provide simple and fast execution, ensuring delivery of funds in any of these countries quickly through our global network of approximately 300 correspondent banks. In this business, we primarily act as a principal in buying and selling foreign currencies on a spot basis. We derive revenue from the difference between the purchase and sale prices.

We believe our clients value our ability to provide exchange rates that are significantly more competitive than those offered by large international banks, a competitive advantage that stems from our years of foreign exchange expertise focused on smaller, less liquid currencies.

Table of Contents

The following table provides the financial performance and selected data for Global Payments for the periods indicated.

(in millions)	Three Months Ended		
	2018	% Change	2017

Fixed compensation and benefits	2.1	40%	1.5
Other fixed expenses	2.4	4%	2.3
Bad debts	—	n/m	—
Total non-variable direct expenses	4.5	18%	3.8
Segment income	\$18.6	27%	\$14.6
Selected data:			
Global Payments (# of payments, 000's)	166.6	7%	156.3
Average revenue per trade	\$178.27	13%	\$157.39

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Operating revenues increased 21% to a record \$29.7 million in the first quarter compared to \$24.6 million in the prior year, driven by 7% growth in the volume of payments made and a 13% increase in the average revenue per trade compared to the prior year. This growth was driven by increased activity from our international banking clients, particularly related to capital transactions, mergers and acquisitions, and smaller recurring payments.

Segment income increased 27% to \$18.6 million in the first quarter compared to \$14.6 million in the prior year. This increase primarily resulted from the increase in operating revenues, partially offset by a \$0.7 million increase in non-variable direct expenses versus the prior year period, primarily driven by higher non-variable compensation.

Variable expenses, excluding interest, expressed as a percentage of operating revenues decreased to 22% in the first quarter compared to 25% in the prior year, primarily as a result of a decrease in introducing broker commissions.

#### Securities

We provide value-added solutions that facilitate cross-border trading and believe our clients value our ability to manage complex transactions, including foreign exchange, utilizing our understanding of local market convention, liquidity and settlement protocols around the world. Our clients include U.S.-based regional and national broker-dealers and institutions investing or executing client transactions in international markets and foreign institutions seeking access to the U.S. securities markets. We are one of the leading market makers in foreign securities, including unlisted American Depositary Receipts (“ADRs”), Global Depositary Receipts (“GDRs”) and foreign ordinary shares. We make markets in over 5,000 ADRs, GDRs and foreign ordinary shares, of which over 3,600 trade in the OTC market. In addition, we will, on request, make prices in more than 10,000 unlisted foreign securities. We are also a broker-dealer in Argentina and Brazil, where we are active in providing institutional executions in the local capital markets.

We act as an institutional dealer in fixed income securities, including U.S. Treasury, U.S. government agency, agency mortgage-backed and asset-backed securities to a client base including asset managers, commercial bank trust and investment departments, broker-dealers, and insurance companies.

We originate, structure and place debt instruments in the international and domestic capital markets. These instruments include complex asset-backed securities (primarily in Argentina) and domestic municipal securities. On occasion, we may invest our own capital in debt instruments before selling them. We also actively trade in a variety of international debt instruments as well as operate an asset management business in which we earn fees, commissions and other revenues for management of third

The following table sets forth operating revenues by product line and selected data for Securities for the periods indicated.

Operating revenues by product line (in millions):	Three Months Ended December		
	2018	% Change	2017
Equity Capital Markets	\$37.7	113%	\$17.7
Debt Capital Markets	29.1	28%	22.8
Asset Management	2.2	(12)%	2.5
	\$69.0	60%	\$43.0
Selected data:			
Equity Capital Markets (gross U.S. dollar volume, millions)	\$43,308.7	75%	\$24,734.3
Equity Capital Markets revenue per \$1,000 traded	\$0.75	15%	\$0.65
Debt Capital Markets (gross U.S. dollar volume, millions)	\$60,677.2	83%	\$33,233.7
Debt Capital Markets revenue per \$1,000 traded	\$0.48	(30)%	\$0.69
Average assets under management in Argentina (U.S. dollar, millions)	\$282.8	(40)%	\$473.7

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Operating revenues increased 60% to \$69.0 million in the first quarter compared to \$43.0 million in the prior year. Operating revenues in Equity Capital Markets increased 113% in the first quarter compared to the prior year period. Gross dollar volume traded increased 75% driven both by increased market volatility and an increase in market share. The increased volatility also contributed to the 15% increase in the average revenue per \$1,000 traded. Equity Capital Markets operating revenues include the trading profits we earn before the related expense deduction for ADR conversion fees. These ADR fees are included in the consolidated income statements as 'transaction-based clearing

expenses'.

Operating revenues in Debt Capital Markets increased 28% in the first quarter compared to the prior year, primarily driven by an increase in interest income in our domestic institutional dealer in fixed income securities business, which was partially offset by a decline in operating revenues in our Argentina and municipal securities businesses. Asset Management operating revenues decreased 12% in the first quarter compared to the prior year as assets under management decreased 40% to \$282.8 million in the first quarter compared to \$473.7 million in the prior year. The decline in both Asset Management operating revenues and assets under management are primarily driven by difficult market conditions in Argentina including the devaluation of the Argentine Peso.

Table of Contents

Segment income increased 45% to \$16.0 million in the first quarter compared to \$11.0 million in the prior year, primarily as a result of the increase in Equity Capital Markets operating revenues as the increase in Debt Capital Markets operating revenues was more than offset by higher interest expense. Variable expenses, excluding interest, expressed as a percentage of operating revenues decreased to 34% in the first quarter compared to 37% in the prior year, primarily as the result of a decrease in introducing broker commissions.

**Physical Commodities**

This segment consists of our physical Precious Metals trading and Physical Ag & Energy commodity businesses. In Precious Metals, we provide a full range of trading and hedging capabilities, including OTC products, to select producers, consumers, and investors. In our trading activities, we act as a principal, committing our own capital to buy and sell precious metals on a spot and forward basis.

In our Physical Ag & Energy commodity business, we act as a principal to facilitate financing, structured pricing and logistics services to clients across the commodity complex, including energy commodities, grains, oil seeds, cotton, coffee, cocoa, edible oils and feed products. We provide financing to commercial commodity-related companies against physical inventories. We use sale and repurchase agreements to purchase commodities evidenced by warehouse receipts, subject to a simultaneous agreement to sell such commodities back to the original seller at a later date.

We generally mitigate the price risk associated with commodities held in inventory through the use of derivatives. We do not elect hedge accounting under U.S. GAAP in accounting for this price risk mitigation. Management continues to evaluate performance and allocate resources on an operating revenue basis.

The following table provides the financial performance for Physical Commodities for the periods indicated.

(in millions)	Three Months Ended December		
	31, 2018	% Change	2017

Table of Contents

The following tables set forth operating revenue by product line and selected data for Physical Commodities for the periods indicated.

	Precious Metals		
	Three Months Ended		
	December 31,		
	2018	% Change	2017
Total revenues	\$5,960.9	(21)%	\$7,530.1
Cost of sales of physical commodities	5,953.2	(21)%	7,524.8
Operating revenues	\$7.7	45%	\$5.3
Selected data:			
Gold equivalent ounces traded (000's)	95,219.6	184%	33,503.1
Average revenue per ounce traded	\$0.08	(50)%	\$0.16
	Physical Ag & Energy		
	Three Months Ended		
	December 31,		
	2018	% Change	2017
Total revenues	\$340.9	83%	\$186.5
Cost of sales of physical commodities	334.3	84%	181.2
Operating revenues	\$6.6	25%	\$5.3

Three Months Ended December 31, 2018 Compared to Three Months Ended December 31, 2017

Operating revenues for Physical Commodities increased 35% to \$14.3 million in the first quarter compared to \$10.6 million in the prior year.

Precious Metals operating revenues increased 45% to \$7.7 million in the first quarter compared to \$5.3 million in the prior year, driven by a 184% increase in the number of ounces traded, particularly in the Far East, but tempered by narrower spreads. The increase in both operating revenues and the number of ounces traded were driven by increased activity in the gold and silver auctions as well as increased client activity driven by market volatility. Operating revenues in the first quarter include a \$1.6 million unrealized loss on derivative positions held against precious metals inventory carried at the lower of cost or net realizable value in our non-broker dealer subsidiaries, while the prior year includes a \$1.3 million unrealized loss on derivative positions held against precious metals inventory.

Operating revenues in Physical Ag & Energy increased 25% to \$6.6 million in the first quarter compared to the prior year. The increase in operating revenues is primarily due to an increase in client activity in the energy and metals markets along with an increase in commodity financing program revenues.

During the quarter ended December 31, 2018, we reached settlements with clients, paying \$8.4 million related to demurrage, dead freight, and other penalty charges regarding coal supplied during fiscal 2017. The settlement amount paid was less than the accrued liability for the transactions recorded during fiscal 2017 and fiscal 2018, and accordingly we recorded a recovery on the bad debt on physical coal of \$2.4 million in the quarter ended December 31, 2018. The prior year period included \$1.0 million of bad debt on physical coal related to our exit of the physical coal business.

Segment income increased 436% to \$5.9 million in the first quarter compared to \$1.1 million in the prior year. This was primarily driven by the increase in operating revenues as well as the recovery on the bad debt on physical coal.

#### Clearing and Execution Services

We provide competitive and efficient clearing and execution in all major futures and securities exchanges globally as well as prime brokerage in all major foreign currency pairs and swap transactions. Through our platform, client orders are accepted and directed to the appropriate exchange for execution. We then facilitate the clearing of client transactions. Clearing involves the matching of client trades with the exchange, the collection and management of client margin deposits to support the transactions, and the accounting and reporting of the transactions to clients.

As of December 31, 2018, we held \$2.2 billion in required client segregated assets, which we believe makes us the third largest non-bank futures commission merchant ("FCM") in the United States, as measured by required client segregated assets. We seek to leverage our capabilities and capacity by offering facilities management or outsourcing

solutions to other FCM's.

We are an independent full-service provider to introducing broker-dealers ("IBD's") of clearing, custody, research, syndicated and security-based lending products and services, including a proprietary technology platform which offers seamless connectivity to ensure a positive client experience through the clearing and settlement process. Our independent wealth management business, which offers a comprehensive product suite to retail clients nationwide, clears through this platform. We

48

---

Table of Contents

believe we are one of the leading mid-market clearers in the securities industry, with over 70 correspondent clearing relationships with over \$13 billion in assets under management or administration as of December 31, 2018.

Within this segment, we also maintain what we believe is one of the largest non-bank prime brokers and swap dealers in the world. Through this offering, we provide prime brokerage foreign exchange (“FX”) services to financial institutions and professional traders. We provide our clients with the full range of OTC products, including 24-hour a day execution of spot, forwards and options as well as non-deliverable forwards in both liquid and exotic currencies. We also operate a proprietary foreign exchange desk that arbitrages the exchange-traded foreign exchange markets with the cash markets.

Through our London-based Europe, Middle East and Africa (“EMEA”) oil voice brokerage business, we employ over 30 employees providing brokerage services across the fuel, crude, and middle distillates markets with over 200 well known commercial and institutional clients throughout EMEA.

---

Table of Contents

Operating revenues in our Exchange-Traded Futures & Options business increased 40% to \$50.4 million in the first quarter compared to \$35.9 million in the prior year as a result of a 57% increase in exchange-traded volumes which was partially offset by a 15% decline in the average rate per contract compared to the prior year period. In addition, interest income in the Exchange-Traded Futures & Options business increased \$4.3 million to \$7.9 million in the first quarter as a result of an increase in short-term interest rates and a 7% increase in average client equity to \$1.3 billion. Operating revenues in our FX Prime Brokerage increased 60% compared to the prior year to \$7.5 million in the first quarter. This increase was primarily driven by a \$2.7 million settlement received in the first quarter related to the Barclays PLC 'last look' class action. Excluding this settlement, FX Prime Brokerage operating revenues were flat with the prior year, despite a 21% decline in foreign exchange volumes as market volatility drove a widening of spreads in this business.

Correspondent Clearing operating revenues increased 38% compared to the prior year to \$8.3 million in the first quarter, while operating revenues in Independent Wealth Management increased 9% versus the prior year to \$20.2 million. In the Correspondent Clearing business, interest income increased \$1.1 million to \$2.6 million the first quarter and fee income related to money market/FDIC sweep balances increased \$1.6 million to \$3.3 million, both of which were primarily driven by an increase in short term interest rates. Operating revenues in Derivative Voice Brokerage increased 24% to \$8.8 million in the first quarter compared to the prior year.

Segment income increased to \$17.7 million in the first quarter compared to \$10.5 million in the prior year, primarily as a result of the increase in operating revenues, which was partially offset by a \$2.0 million increase in non-variable direct expenses, primarily driven by a \$0.7 million increase in professional fees related to the Barclays settlement as well as higher non-variable compensation and benefits and trade system costs. Variable expenses, excluding interest, as a percentage of operating revenues were 64% in the first quarter compared to 70% in the prior year, down primarily due to the growth in interest income.

#### Liquidity, Financial Condition and Capital Resources

##### Overview

Liquidity is defined as our ability to generate sufficient amounts of cash to meet all of our cash needs. Liquidity is of critical importance to us and imperative to maintain our operations on a daily basis. Our senior management establishes liquidity and capital policies, and monitors liquidity on a daily basis. Senior management reviews business performance relative to these policies and monitors the availability of our internal and external sources of financing. Liquidity and capital matters are reported regularly to our board of directors.

INTL FCStone Financial is registered as a broker-dealer with the Securities and Exchange Commission ("SEC") and is a member of the Financial Industry Regulatory Authority ("FINRA") and the Municipal Securities Rulemaking Board ("MSRB"). In addition, INTL FCStone Financial is registered as a futures commission merchant with the CFTC and NFA, and a member of various commodities and futures exchanges in the U.S. and abroad. INTL FCStone Financial has a responsibility to meet margin calls at all exchanges on a daily basis and intra-day basis, if necessary. We require our clients to make any required margin deposits the next business day, and we require our largest clients to make intra-day margin payments during periods of significant price movement. Margin required to be posted to the exchanges is a function of the net open positions of our clients and the required margin per contract. INTL FCStone Financial is subject to minimum capital requirements under Section 4(f)(b) of the Commodity Exchange Act, Part 1.17 of the rules and regulations of the CFTC and the SEC Uniform Net Capital Rule 15c3-1 under the Securities Exchange Act of 1934. These rules specify the minimum amount of capital that must be available to support our clients' open trading positions, including the amount of assets that INTL FCStone Financial must maintain in relatively liquid form, and are designed to measure general financial integrity and liquidity. INTL FCStone Financial is also subject to the Rule 15c3-3 of the Securities Exchange Act of 1934, as amended ("Customer Protection Rule"). INTL FCStone Ltd, our U.K. regulated subsidiary, is required to be compliant with the U.K.'s Individual Liquidity Adequacy Standards ("ILAS"). To comply with these standards, we have implemented daily liquidity procedures, conduct periodic reviews of liquidity by stressed scenarios, and have created liquidity buffers.

Our wholly owned subsidiary, SA Stone Wealth Management Inc. (formerly Sterne Agee Financial Services, Inc.), is subject to the SEC Uniform Net Capital Rule 15c3-1 under the Securities Exchange Act of 1934.

In addition, in our physical commodities trading, commercial hedging OTC, securities and foreign exchange trading activities, we may be called upon to meet margin calls with our various trading counterparties based upon the underlying open transactions we have in place with those counterparties.

We continuously review our overall credit and capital needs to ensure that our capital needs to ensure that our capital base, both stockholders' equity and debt, as well as available credit facilities can appropriately support the anticipated financing needs of our operating subsidiaries.

As of December 31, 2018, we had total equity capital of \$526.0 million and outstanding bank loans of \$435.4 million.

## Table of Contents

A substantial portion of our assets are liquid. As of December 31, 2018, approximately 98% of our assets consisted of cash; securities purchased under agreements to resell; securities borrowed; deposits with and receivables from exchange-clearing organizations, broker-dealers, clearing organizations and counterparties; client receivables, marketable financial instruments and investments, and physical commodities inventory. All assets that are not client and counterparty deposits are financed by our equity capital, bank loans, short-term borrowings from financial instruments sold, not yet purchased and under repurchase agreements, securities loaned, and other payables.

### Client and Counterparty Credit and Liquidity Risk

Our operations expose us to credit risk of default of our clients and counterparties. The risk includes liquidity risk to the extent our clients or counterparties are unable to make timely payment of margin or other credit support. These risks expose us indirectly to the financing and liquidity risks of our clients and counterparties, including the risks that our clients and counterparties may not be able to finance their operations.

As a clearing broker, we act on behalf of our clients for all trades consummated on exchanges. We must pay initial and variation margin to the exchanges, on a net basis, before we receive the required payments from our clients.

Accordingly, we are responsible for our clients' obligations with respect to these transactions, which exposes us to significant credit risk. Our clients are required to make any required margin deposits the next business day, and we require our largest clients to make intra-day margin payments during periods of significant price movement. Our clients are required to maintain initial margin requirements at the level set by the respective exchanges, but we have the ability to increase the margin requirements for clients based on their open positions, trading activity, or market conditions.

With OTC derivative transactions, we act as a principal, which exposes us to the credit risk of both our clients and the counterparties with which we offset our client positions. As with exchange-traded transactions, our OTC transactions require that we meet initial and variation margin payments on behalf of our clients before we receive the required payment from our clients. OTC clients are required to post sufficient collateral to meet margin requirements based on Value-at-Risk models as well as variation margin requirement based on the price movement of the commodity or security in which they transact. Our clients are required to make any required margin deposits the next business day, and we may require our largest clients to make intra-day margin payments during periods of significant price movement. We have the ability to increase the margin requirements for clients based on their open positions, trading activity, or market conditions. On a limited basis, we provide credit thresholds to certain clients, based on internal evaluations and monitoring of client creditworthiness.

In addition, with OTC transactions, we are at risk that a counterparty will fail to meet its obligations when due. We would then be exposed to the risk that the settlement of a transaction which is due a client will not be collected from the respective counterparty with which the transaction was offset. We continuously monitor the credit quality of our respective counterparties and mark our positions held with each counterparty to market on a daily basis.

We enter into securities purchased under agreements to resell, securities sold under agreements to repurchase, securities borrowed and securities loaned transactions to, among other things, finance financial instruments, acquire securities to cover short positions, acquire securities for settlement, and to accommodate counterparties' needs. In connection with these agreements and transactions, it is our policy to receive or pledge cash or securities to adequately collateralize such agreements and transactions in accordance with general industry guidelines and practices. The value of the collateral is valued daily and we may require counterparties to deposit additional collateral or return collateral pledged, when appropriate.

In our Physical Commodities business we act as a principal, which exposes us to the credit risk of both our clients and our suppliers with which we offset our client positions as well as provide financing to commercial commodity-related companies against physical inventories. We mitigate this risk by securing warehouse receipts and or insurance against potential default by either party. Information related to bad debt expense for the three months ended December 31, 2018 and 2017 can be found in Note 6 of the Condensed Consolidated Financial Statements.

### Primary Sources and Uses of Cash

Our assets and liabilities may vary significantly from period to period due to changing client requirements, economic and market conditions and our growth. Our total assets as of December 31, 2018 and September 30, 2018, were \$8.7 billion and \$7.8 billion, respectively. Our operating activities generate or utilize cash as a result of net income or loss

earned or incurred during each period and fluctuations in our assets and liabilities. The most significant fluctuations arise from changes in the level of client activity, commodities prices and changes in the balances of financial instruments and commodities inventory. INTL FCStone Financial and INTL FCStone Ltd occasionally utilize their margin line credit facilities, on a short-term basis, to meet intraday settlements with the commodity exchanges prior to collecting margin funds from their clients.

The majority of the assets of INTL FCStone Financial and INTL FCStone Ltd are restricted from being transferred to its parent or other affiliates due to specific regulatory requirements. This restriction has no impact on our ability to meet our cash obligations, and no impact is expected in the future.

Table of Contents

We have liquidity and funding policies and processes in place that are intended to maintain significant flexibility to address both company-specific and industry liquidity needs. The majority of our excess funds are held with high quality institutions, under highly-liquid reverse repurchase agreements, U.S. government obligations, interest earning cash deposits and AA-rated money market investments. We do not hold any direct investments in the general obligations of any sovereign nations.

As of December 31, 2018, we had \$360.1 million in undistributed foreign earnings. The Company recognized the one-time U.S. repatriation tax due under Tax Reform and, as a result, repatriation of these amounts is not subject to additional U.S. federal income tax but would be subject to applicable withholding taxes in the relevant jurisdictions. Our intent is to permanently reinvest these funds outside of the United States, with the exception of \$13.0 million that was paid in the first quarter of fiscal year 2019. Foreign withholding tax is not applicable to this distribution.

As of December 31, 2018, we had four committed bank credit facilities, totaling \$594.5 million, of which \$408.5 million was outstanding. Additional information regarding our bank credit facilities can be found in Note 10 of the Condensed Consolidated Financial Statements. The credit facilities include:

A three-year syndicated loan facility, committed until March 18, 2019, under which we are entitled to borrow up to \$262.0 million, subject to certain terms and conditions of the credit agreement. The loan proceeds are used to finance our working capital needs of us and certain subsidiaries. The agreement contains financial covenants related to consolidated tangible net worth, consolidated funded debt to net worth ratio, consolidated fixed charge coverage ratio and consolidated net unencumbered liquid assets, as defined.

An unsecured syndicated loan facility, committed until April 4, 2019, under which our subsidiary, INTL FCStone Financial is entitled to borrow up to \$75.0 million, subject to certain terms and conditions of the credit agreement. This facility is intended to provide short-term funding of margin to commodity exchanges as necessary.

A syndicated loan facility, committed until November 1, 2019, under which our subsidiary, FCStone Merchant Services, LLC is entitled to borrow up to \$232.5 million, subject to certain terms and conditions of the credit agreement. The loan proceeds are used to finance traditional commodity financing arrangements and commodity repurchase agreements.

- An unsecured syndicated loan facility, committed until February 28, 2019, under which our subsidiary, INTL FCStone Ltd is entitled to borrow up to \$25.0 million, subject to certain terms and conditions of the credit agreement. This facility is intended to provide short-term funding of margin to commodity exchanges as necessary.

As reflected above, \$594.5 million of our committed credit facilities are scheduled to expire during the 12-month period beginning with the filing date of this Quarterly Report on Form 10-Q. We intend to renew or replace these facilities as they expire, and based on our liquidity position and capital structure, we believe we will be able to do so. As of December 31, 2018, we had six uncommitted bank credit facilities with an outstanding balance \$25.9 million. The credit facilities include:

A secured uncommitted loan facility under which INTL FCStone Financial may borrow up to \$75.0 million, collateralized by commodities warehouse receipts, to facilitate U.S. commodity exchange deliveries of its clients, subject to certain terms and conditions of the credit agreement.

A secured uncommitted loan facility under which INTL FCStone Financial may borrow up to \$100.0 million for short term funding of firm and client margin requirements, subject to certain terms and conditions of the agreement. The borrowings are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to us under a clearing arrangement.

A secured uncommitted loan facility under which INTL FCStone Financial may borrow up to \$50.0 million for short term funding of firm and client margin requirements, subject to certain terms and conditions of the agreement. The borrowings are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to us under a clearing arrangement.

A secured uncommitted loan facility under which INTL FCStone Financial may borrow requested amounts for short term funding of firm and client margin requirements. The uncommitted maximum amount available to be borrowed is not specified, and all requests for borrowing are subject to the sole discretion of the lender. The borrowing are secured by first liens on firm owned marketable securities or client owned securities which have been pledged to us under a

clearing arrangement.

A secured uncommitted loan facility under which INTL FCStone Ltd may borrow up to £20.0 million, collateralized by commodities warehouse receipts, to facilitate financing of commodities under repurchase agreement services to its clients, subject to certain terms and conditions of the credit agreement.

52

---

## Table of Contents

A secured uncommitted loan facility under which FCStone Merchant Services, LLC may borrow up to \$20.0 million, collateralized by a first priority security interest in the goods and inventory of FCStone Merchant Services, LLC that is either located outside of the U.S. and Canada or in transit to a destination outside the U.S. or Canada, to facilitate the financing of inventory of commodities and other products or goods approved by the lender in its sole discretion, subject to certain terms and conditions of the loan facility agreement.

Our facility agreements contain certain financial covenants relating to financial measures on a consolidated basis, as well as on a certain stand-alone subsidiary basis, including minimum tangible net worth, minimum regulatory capital, minimum net unencumbered liquid assets, maximum net loss, minimum fixed charge coverage ratio and maximum funded debt to net worth ratio. Failure to comply with any such covenants could result in the debt becoming payable on demand. As of December 31, 2018, we and our subsidiaries are in compliance with all of our financial covenants under the outstanding facilities.

### Other Capital Considerations

Our activities are subject to various significant governmental regulations and capital adequacy requirements, both in the U.S. and overseas. Certain of our other non-U.S. subsidiaries are also subject to capital adequacy requirements promulgated by authorities of the countries in which they operate.

Our subsidiaries are in compliance with all of their capital regulatory requirements as of December 31, 2018.

Additional information on these net capital and minimum net capital requirements can be found in Note 13 of the Condensed Consolidated Financial Statements.

The Dodd-Frank Act created a comprehensive new regulatory regime governing the OTC and listed derivatives markets and their participants by requiring, among other things: centralized clearing of standardized derivatives (with certain stated exceptions); the trading of clearable derivatives on swap execution facilities or exchanges; and registration and comprehensive regulation of new categories of market participants as “swap dealers” and swap “introducing brokers.” Our subsidiary, INTL FCStone Markets, LLC, is a provisionally registered swap dealer. We will continue to monitor all applicable developments in the ongoing implementation of the Dodd-Frank Act.

### Cash Flows

Following the adoption of Accounting Standards Update (“ASU”) 2016-18 on October 1, 2018, we now include client cash and securities segregated for regulatory purposes in our consolidated cash flow statements. We hold a significant amount of U.S. Treasury obligations which represent investment of client funds or client-owned investments pledged in lieu of cash margin. U.S. Treasury securities held with third-party banks or pledged with exchange-clearing organizations representing investments of client funds or which are held for particular clients in lieu of cash margin are included in the beginning and ending cash balances reconciled on our consolidated cash flow statements to the extent that they have an original maturity of 90 days or less and, therefore, meet the definition of a cash equivalent. Purchases and sales of U.S. Treasury securities representing investment of clients’ funds and U.S. Treasury securities pledged or redeemed by particular clients in lieu of cash margin are presented as operating uses and sources of cash, respectively, within the operating section of the cash flow statement if they have an original maturity of greater than 90 days. Typically, there is an offsetting use or source of cash related to the change in the payable to the client.

However, we will report a use of cash in periods where segregated U.S. Treasury securities mature and are replaced with U.S. Treasury securities which have original maturities greater than 90 days.

Our cash and cash equivalents decreased from \$2,190.1 million as of September 30, 2018 to \$2,051.8 million as of December 31, 2018, a net decrease of \$138.3 million. Net cash of \$213.0 million was used in operating activities, \$5.2 million was used in investing activities and net cash of \$79.6 million was provided by financing activities, of which \$80.4 million was borrowed from lines of credit and increased the amounts payable to lenders under loans.

Fluctuations in exchange rates increased our cash and cash equivalents by \$0.3 million.

In the broker-dealer industry, companies report trading activities in the operating section of the statement of cash flows. Due to the daily price volatility in the markets, as well as changes in margin requirements, fluctuations in the balances of deposits held at various exchanges that are not subject to segregation requirements, marketable securities and client commodity accounts may occur from day-to-day. A use of cash, as calculated on the consolidated statement of cash flows, includes unrestricted cash transferred and pledged to the exchanges or guarantee funds that is not subject to regulatory segregation requirements. These funds are held in interest-bearing deposit accounts at the

exchanges, and based on daily exchange requirements, may be withdrawn and returned to unrestricted cash. Additionally, in our unregulated OTC and foreign exchange operations which are not subject to segregation requirements, cash deposits received from clients are reflected as cash provided from operations. Subsequent transfer of these cash deposits to counterparties or exchanges to margin their open positions will be reflected as an operating use of cash to the extent the transfer occurs in a different period than the cash deposit was received.

We continuously evaluate opportunities to expand our business. Investing activities include \$4.5 million in capital expenditures for property, plant and equipment in the first quarter compared to \$3.2 million in the prior year.

Fluctuations in capital

## Table of Contents

expenditures are primarily due to the timing of purchases of IT equipment and trade system software as well as the timing on leasehold improvement projects.

Apart from what has been disclosed above, there are no known trends, events or uncertainties that have had or are likely to have a material impact on our liquidity, financial condition and capital resources. Based upon our current operations, we believe that cash flows from operations, available cash and available borrowings under our credit facilities will be adequate to meet our future liquidity needs.

### Commitments

Information about our commitments and contingent liabilities is contained in Note 12 of the Condensed Consolidated Financial Statements.

### Off Balance Sheet Arrangements

We are party to certain financial instruments with off-balance sheet risk in the normal course of business as a registered securities broker-dealer, futures commission merchant, U.K. based financial services firm, provisionally registered swap dealer and from our market-making and proprietary trading in the foreign exchange and commodities trading activities. These financial instruments include futures, forward and foreign exchange contracts, exchange-traded and OTC options, mortgage-backed To Be Announced (“TBA”) securities and interest rate swaps. Derivative financial instruments involve varying degrees of off-balance sheet market risk whereby changes in the fair values of underlying financial instruments may result in changes in the fair value of the financial instruments in excess of the amounts reflected in the balance sheet. Exposure to market risk is influenced by a number of factors, including the relationships between the financial instruments and our positions, as well as the volatility and liquidity in the markets in which the financial instruments are traded. The principal risk components of financial instruments include, among other things, interest rate volatility, the duration of the underlying instruments and changes in commodity pricing and foreign exchange rates. We attempt to manage our exposure to market risk through various techniques. Aggregate market limits have been established and market risk measures are routinely monitored against these limits. Derivative contracts are traded along with cash transactions because of the integrated nature of the markets for such products. We manage the risks associated with derivatives on an aggregate basis along with the risks associated with our proprietary trading and market-making activities in cash instruments as part of our firm-wide risk management policies.

A significant portion of these instruments are primarily the execution of orders for commodity futures and options on futures contracts on behalf of our clients, substantially all of which are transacted on a margin basis. Such transactions may expose us to significant credit risk in the event margin requirements are not sufficient to fully cover losses which clients may incur. We control the risks associated with these transactions by requiring clients to maintain margin deposits in compliance with individual exchange regulations and internal guidelines. We monitor required margin levels daily and, therefore, may require clients to deposit additional collateral or reduce positions when necessary. We also establish contract limits for clients, which are monitored daily. We evaluate each client’s creditworthiness on a case-by-case basis. Clearing, financing, and settlement activities may require us to maintain funds with or pledge securities as collateral with other financial institutions. Generally, these exposures to exchanges are subject to netting of open positions and collateral, while exposures to clients are subject to netting, per the terms of the client agreements, which reduce the exposure to us by permitting receivables and payables with such clients to be offset in the event of a client default. Management believes that the margin deposits held as of December 31, 2018 are adequate to minimize the risk of material loss that could be created by positions held at that time. Additionally, we monitor collateral fair value on a daily basis and adjust collateral levels in the event of excess market exposure. Generally, these exposures to both counterparties and clients are subject to master netting agreements and the terms of the client agreements, which reduce our exposure.

As a broker-dealer in U.S. Treasury obligations, U.S. government agency obligations, agency mortgage-backed obligations, and asset-backed obligations, we are engaged in various securities trading, borrowing and lending activities servicing solely institutional counterparties. Our exposure to credit risk associated with the nonperformance of counterparties in fulfilling their contractual obligations pursuant to these securities transactions and market risk associated with the sale of securities not yet purchased can be directly impacted by volatile trading markets which may impair their ability to satisfy outstanding obligations to us. In the event of non-performance and unfavorable

market price movements, we may be required to purchase or sell financial instruments, which may result in a loss to us.

We transact OTC and foreign exchange contracts with our clients, and our OTC and foreign exchange trade desks will generally offset the client's transaction simultaneously with one of our trading counterparties or will offset that transaction with a similar, but not identical, position on the exchange. These unmatched transactions are intended to be short-term in nature and are conducted to facilitate the most effective transaction for our client.

Additionally, we hold options and futures on options contracts resulting from market-making and proprietary trading activities in these product lines. We assist clients in our commodities trading business to protect the value of their future production (precious or base metals) by selling them put options on an OTC basis. We also provide our physical commodities trading

## Table of Contents

business clients with sophisticated option products, including combinations of buying and selling puts and calls. We mitigate our risk by effecting offsetting options with market counterparties or through the purchase or sale of exchange-traded commodities futures.

As part of the activities discussed above, we carry short positions. We sell financial instruments that we do not own, borrow the financial instruments to make good delivery, and therefore are obliged to purchase such financial instruments at a future date in order to return the borrowed financial instruments. We record these obligations in the condensed consolidated financial statements as of December 31, 2018 and September 30, 2018, at fair value of the related financial instruments, totaling \$839.7 million and \$866.5 million, respectively. These positions are held to offset the risks related to financial assets owned, and reported in our condensed consolidated balance sheets in ‘financial instruments owned, at fair value’, and ‘physical commodities inventory, net’. We will incur losses if the fair value of the financial instruments sold, not yet purchased, increases subsequent to December 31, 2018, which might be partially or wholly offset by gains in the value of assets held as of December 31, 2018. The totals of \$839.7 million and \$866.5 million include a net liability of \$142.6 million and \$193.4 million for derivatives, based on their fair value as of December 31, 2018 and September 30, 2018, respectively.

We do not anticipate non-performance by counterparties in the above situations. We have a policy of reviewing the credit standing of each counterparty with which we conduct business. We have credit guidelines that limit our current and potential credit exposure to any one counterparty. We administer limits, monitor credit exposure, and periodically review the financial soundness of counterparties. We manage the credit exposure relating to our trading activities in various ways, including entering into collateral arrangements and limiting the duration of exposure. Risk is mitigated in certain cases by closing out transactions and entering into risk reducing transactions.

We are a member of various exchanges that trade and clear futures and option contracts. We are also a member of and provide guarantees to securities clearinghouses and exchanges in connection with client trading activities. Associated with our memberships, we may be required to pay a proportionate share of the financial obligations of another member who may default on its obligations to the exchanges. While the rules governing different exchange memberships vary, in general our guarantee obligations would arise only if the exchange had previously exhausted its resources. In addition, any such guarantee obligation would be apportioned among the other non-defaulting members of the exchange. Our liability under these arrangements is not quantifiable and could exceed the cash and securities we have posted as collateral at the exchanges. However, management believes that the potential for us to be required to make payments under these arrangements is remote. Accordingly, no contingent liability for these arrangements has been recorded in the condensed consolidated balance sheets as of December 31, 2018 and September 30, 2018.

### Effects of Inflation

Because our assets are, to a large extent, liquid in nature, they are not significantly affected by inflation. Increases in our expenses, such as compensation and benefits, transaction-based clearing expenses, occupancy and equipment rental, due to inflation, may not be readily recoverable from increasing the prices of our services. While rising interest rates are generally favorable for us, to the extent that inflation has other adverse effects on the financial markets and on the value of the financial instruments held in inventory, it may adversely affect our financial position and results of operations.

### Critical Accounting Policies

See our critical accounting policies discussed in the Management’s Discussion and Analysis of the most recent annual report filed on Form 10-K. There have been no material changes to these policies, except as described below.

### Accounting Development Updates

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842)”, which supersedes ASC 840, Leases. We will adopt this guidance starting with the first quarter of fiscal year 2020 using a modified retrospective transition approach. This accounting update will require the Company as a lessee to recognize on the consolidated balance sheet all leases with terms exceeding one year, which results in the recognition of a right of use asset and corresponding lease liability, including for those leases that we currently classify as operating leases. The right of use asset and lease liability will initially be measured using the present value of the remaining rental payments. In July 2018, the FASB issued ASU No. 2018-10, “Codification Improvements to Topic 842, Leases” and ASU No. 2018-11, “Leases (Topic 842) Targeted Improvements”. ASU 2018-10 provides certain amendments that affect narrow aspects of the guidance

issued in ASU 2016-02. ASU 2018-11 allows all entities adopting ASU 2016-02 to choose an additional (and optional) transition method of adoption, under which an entity initially applies the new leases standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. ASU 2018-11 also allows lessors to not separate non-lease components from the associated lease component if certain conditions are met. We are in the process of identifying the population of leases affected by the guidance and evaluating the impact ASU 2016-02 will have on our consolidated financial statements and related disclosures.

Table of Contents

In June 2016, the FASB issued ASU 2016-13, Measurement of Credit Losses on Financial Instruments, which significantly changes the ways entities recognize credit losses on financial instruments. The guidance is effective for public business entities for annual and interim periods in fiscal years beginning after December 15, 2019, with early adoption permitted in annual and interim periods in fiscal years beginning after December 15, 2018. The Company expects to adopt this guidance starting with the first quarter of fiscal year 2021. The guidance introduces a new credit reserving model known as the Current Expected Credit Loss (“CECL”) model, which is based on expected losses, and differs significantly from the incurred loss approach used today. The CECL model requires measurement of expected credit losses not only based on historical experience and current conditions, but also by including reasonable and supportable forecasts incorporating forward-looking information and will likely result in earlier recognition of credit reserves. The Company is currently in the process of establishing a cross-functional team to assess the required changes to our credit loss methodologies and systems, as well as determine additional data and resources required to comply with the new guidance. We are evaluating the impact that this new guidance will have on our financial position and results of operations, which will depend on, among other things, the current and expected macroeconomic conditions and the nature and characteristics of financial assets held by us on the date of adoption.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Credit Risk

See Note 5 to the Condensed Consolidated Financial Statements, ‘Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk’.

Market Risk

We conduct our market-making and trading activities predominantly as a principal, which subjects our capital to significant risks. These risks include, but are not limited to, absolute and relative price movements, price volatility and changes in liquidity, over which we have virtually no control. Our exposure to market risk varies in accordance with the volume of client-driven market-making transactions, the size of the proprietary positions and the volatility of the financial instruments traded.

We seek to mitigate exposure to market risk by utilizing a variety of qualitative and quantitative techniques:

• Diversification of business activities and instruments;

• Limitations on positions;

• Allocation of capital and limits based on estimated weighted risks; and

• Daily monitoring of positions and mark-to-market profitability.

We utilize derivative products in a trading capacity as a dealer to satisfy client needs and mitigate risk. We manage risks from both derivatives and non-derivative cash instruments on a consolidated basis. The risks of derivatives should not be viewed in isolation, but in aggregate with our other trading activities.

Table of Contents

Management believes that the volatility of revenues is a key indicator of the effectiveness of our risk management techniques. The graph below summarizes volatility of our daily revenue, determined on a marked-to-market basis, during the three months ended December 31, 2018.

In our Securities market-making and trading activities, we maintain inventories of equity and debt securities. In our Physical Commodities segment, our positions include physical inventories, forwards, futures and options on futures, and OTC derivatives. Our commodity trading activities are managed as one consolidated book for each commodity encompassing both cash positions and derivative instruments. We monitor the aggregate position for each commodity in equivalent physical ounces, metric tons or other relevant unit.

**Interest Rate Risk**

In the ordinary course of our operations, we have interest rate risk from the possibility that changes in interest rates will affect the values of financial instruments and impact interest income earned. Within our domestic institutional dealer in fixed income securities business, we maintain a significant amount of trading assets and liabilities which are sensitive to changes in interest rates. These trading activities consists primarily of securities trading in connection with U.S. Treasury, U.S. government agency, agency mortgage-backed and agency asset-backed obligations. Derivative instruments, which consist of futures, mortgage-backed “to be announced” (TBA) securities and forward settling transactions, are used to manage risk exposures in the trading inventory. We enter into TBA securities transactions for the sole purpose of managing risk associated with the purchase of mortgage pass-through securities.

In addition, we generate interest income from the positive spread earned on client deposits. We typically invest in U.S. Treasury bills, notes, and obligations issued by government sponsored entities, reverse repurchase agreements involving U.S. Treasury bills and government obligations or AA-rated money market funds. In some instances, we maintain interest earning cash deposits with banks, clearing organizations and counterparties. We have an investment policy which establishes acceptable standards of credit quality and limits the amount of funds that can be invested within a particular fund, institution, clearing organization and counterparty.

We manage interest expense using a combination of variable and fixed rate debt as well as including the average outstanding borrowings in our calculations of the notional value of interest rate swaps to be entered into as part of our interest rate management strategy discussed above. The debt instruments are carried at their unpaid principal balance which approximates fair value. At December 31, 2018, \$434.4 million of our debt was variable-rate debt. We are subject to earnings and liquidity risks for changes in the interest rate on this debt. As of December 31, 2018, we had \$1.0 million outstanding in fixed-rate long-term debt. There are no earnings or liquidity risks associated with our fixed-rate debt.

Table of Contents

## Item 4. Controls and Procedures

In connection with the filing of this Form 10-Q, our management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of December 31, 2018. Our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of December 31, 2018.

There are limitations inherent in any internal control, such as the possibility of human error and the circumvention or overriding of controls. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met, and may not prevent or detect misstatements. As conditions change over time, so too may the effectiveness of internal controls. As a result, there can be no assurance that a control system will succeed in preventing all possible instances of error and fraud. Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, and the conclusions our Chief Executive Officer and Chief Financial Officer are made at the “reasonable assurance” level.

There were no changes in our internal controls over financial reporting during the quarter ended December 31, 2018 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II

## Item 1. Legal Proceedings

From time to time and in the ordinary course of business, we are involved in various legal and regulatory actions and proceedings, including tort claims, contractual disputes, employment matters, workers’ compensation claims and collections. We carry insurance that provides protection against certain types of claims, up to the policy limits of our insurance.

There have been no material changes to our disclosures included in Item 3. Legal Proceedings of our Annual Report on Form 10-K for the fiscal year ended September 30, 2017.

## Item 1A. Risk Factors

In addition to the other information set forth in this report, information regarding risks affecting us appears in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended September 30, 2017. These are not the only risks we face. Additional risks and uncertainties not currently known to us or that management currently considers to be non-material may in the future adversely affect our business, financial condition and operating results. There have been no material changes to our risk factors since the filing of our Form 10-K.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On September 30, 2018, the previously authorized repurchase of up to 1.0 million shares of our outstanding common stock from time to time in open market purchase and private transactions expired. As of the date of this filing, no additional authorization by our Board of Directors has occurred. Previously approved plans were subject to the discretion of the senior management team to implement our stock repurchase plan, and subject to market conditions and as permitted by securities laws and other legal, regulatory and contractual requirements and covenants.

Our common stock repurchase program activity for the three months ended December 31, 2018 was as follows.

Period	Total Number of Shares Purchased <sup>(1)</sup>	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Maximum Number of Shares Remaining to be Purchased Under the Program
October 1, 2018 to October 31, 2018	—	\$	—	1,000,000
November 1, 2018 to November 30, 2018	—	—	—	1,000,000
December 1, 2018 to December 31, 2018	—	—	—	1,000,000
Total	—	\$	—
