DIANA CONTAINERSHIPS INC. REPORTS FINANCIAL RESULTS  
FOR THE FOURTH QUARTER AND YEAR ENDED DECEMBER 31, 2014

DECLARES CASH DIVIDEND OF \$0.0025 PER SHARE  
FOR THE FOURTH QUARTER

ATHENS, GREECE, February 27, 2015 – Diana Containerships Inc. (NASDAQ: DCIX), (the "Company"), a global shipping company specializing in the ownership of containerships, today reported net income of \$0.9 million for the fourth quarter of 2014, compared to a net loss of \$19.8 million for the respective period of 2013. The loss for the fourth quarter of 2013 was mainly the result of impairment charges and direct sale and other charges totalling \$21.9 million for two vessels.

Time charter revenues, net of prepaid charter revenue amortization, were \$15.0 million for the fourth quarter of 2014, compared to \$15.5 million for the same period of 2013, mainly due to decreased average time charter rates, despite an increase in ownership days resulting from the addition to the Company's fleet of three vessels in 2014, partly offset by the disposal of two vessels in December 2013 and February 2014.

Net income for the year ended December 31, 2014 amounted to \$3.2 million, compared to a net loss of \$57.3 million for the year ended December 31, 2013. The loss for the year ended December 31, 2013 was mainly the result of impairment charges and direct sale and other charges totalling \$58.8 million for five vessels. Time charter revenues, net of prepaid charter revenue amortization, for the year ended December 31, 2014 amounted to \$54.1 million, compared to \$54.0 million for the year ended December 31, 2013.

**Dividend Declaration**

The Company has declared a cash dividend on its common stock of \$0.0025 per share with respect to the fourth quarter of 2014. The cash dividend will be payable on or around March 26, 2015 to all shareholders of record as at March 11, 2015. As of December 31, 2014 the Company had 73,158,991 shares of common stock outstanding.

6 For financial reporting purposes, we recognize revenue from time charters that have varying rates on a straight-line basis equal to the average revenue during the term of that time charter. We calculate quarterly dividends based on the available cash from operations during the relevant quarter.

7 For financial reporting purposes, revenues derived from the time charter agreement will be netted off during the term of the time charter with an amortization charge of the asset that was recognized at the delivery of the vessel, being the difference of the present value of the contractual cash flows to the fair value. However, we calculate quarterly dividends based on the available cash from operations during the relevant quarter.

8 Vessel chartered for a period of thirty-six (36) months plus or minus forty-five (45) days. The net daily charter hire rate was US\$22,750 during the first twelve (12) months, US\$22,850 during the second twelve (12) months and US\$23,250 for the third twelve (12) months of the charter.

9 Reederei Santa Containerschiffe GmbH & Co. KG has agreed to novate the time charter contract to Rudolf A. Oetker KG.

10 During January 2015, the vessel was off-hire for approximately three days.

11 In case the vessel is redelivered to the Company in any period between the earliest and the maximum redelivery period, then the charterers will pay a lump sum equivalent to US\$6,000 per day to the owners for the outstanding period between the redelivery date and up to the 30 months.

12 Charterers changed to Norasia Container Lines Limited, as per Novation Agreement signed in September 2014 with a retroactive effect from July 1, 2014. As per same Novation Agreement, with effect from February 1, 2015, charterers have changed to Hapag-Lloyd AG.

-------------------------------------	---------	----------	---------	----------

Time charter equivalent rates, or TCE rates, are defined as our time charter revenues less voyage expenses during a period divided by the number of our available days during the period, which is consistent with industry standards. Voyage expenses include port charges, bunker (fuel) expenses, canal charges and commissions. TCE is a (1) non-GAAP measure. TCE rate is a standard shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charter hire rates for vessels on voyage charters are generally not expressed in per day amounts while charter hire rates for vessels on time charters are generally expressed in such amounts.

Daily vessel operating expenses, which include crew wages and related costs, the cost of insurance and vessel registry, expenses relating to repairs and maintenance, the costs of spares and consumable stores, lubricant costs, (2) tonnage taxes, regulatory fees, environmental costs and other miscellaneous expenses, are calculated by dividing vessel operating expenses by ownership days for the relevant period.
