PRIVACY NOTICE Revised September 30, 2015

FACTS What does Lazard do with your personal information?

Financial companies choose how they share your personal information. Federal law gives consumers the right

Why? to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

The types of personal information we collect and share depend on the product or service you have with us.

This information can include:

- Social Security number
- Assets and income

What?

- Account transactions
- Credit history
- Transaction history

When you are *no longer* our customer, we continue to share your information as described in this notice.

All financial companies need to share customers' personal information to run their everyday business. In the

How? section below, we list the reasons financial companies can share their customers' personal information; the reasons Lazard chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Lazard share?	Can you limit this sharing?
For our everyday business purposes — such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes — to offer our products and services to you	No	We do not share
For joint marketing with other financial companies	No	We do not share
For our affiliates' everyday business purposes – information about your transactions and experiences	Yes	No
For our affiliates' everyday business purposes — information about your creditworthiness	No	We do not share
For nonaffiliates to market to you	No	We do not share

Questions? Call 800-823-6300 or go to <http://www.LazardNet.com>

Who we are

Who is providing this notice? Lazard Asset Management LLC, Lazard Alternatives, LLC, Lazard Asset Management (Canada), Inc., Lazard Asset Management Securities LLC on their own behalf and on behalf of the funds they manage.

What we do

How does Lazard protect my personal information? To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings. We believe the measures also comply with applicable state laws. We collect your personal information, for example, when you:

- Open an account
- Seek advice about your investments

How does Lazard collect my personal information?

- Direct us to buy securities
- Direct us to sell your securities
- Enter into an investment advisory contract

We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.

Federal law gives you the right to limit only:

- Sharing for affiliates' everyday business purposes—information about your creditworthiness
- Affiliates from using your information to market to you
- Sharing for nonaffiliates to market to you

Why can't I limit all sharing?

State laws and individual companies may give you additional rights to limit sharing.

Definitions

Affiliates

Companies related by common ownership or control. They can be financial and nonfinancial companies.

Our affiliates include financial companies whose names include "Lazard."

Nonaffiliates

Companies not related by common ownership or control. They can be financial and nonfinancial companies.

Lazard does not share information with nonaffiliates so they can market to you.

Joint marketing

A formal agreement between nonaffiliated financial companies that together market financial products or services to you.

Lazard does not jointly market.

Other important information

Lazard Asset Management (Canada), Inc. does not disclose any non-public personal information about its customers or former customers to any third party, except as permitted by or required by any applicable law, including the laws of the United States and Canada.

Lazard Global Total Return and Income Fund, Inc.

Investment Overview

Dear Stockholders,

We are pleased to present this report for Lazard Global Total Return and Income Fund, Inc. (“LGI” or the “Fund”), for the year ended December 31, 2015. LGI is a diversified, closed-end management investment company that began trading on the New York Stock Exchange (“NYSE”) on April 28, 2004. Its ticker symbol is “LGI.”

We believe that the Fund has provided investors with an attractive yield and diversification, backed by the extensive experience, commitment, and professional management of Lazard Asset Management LLC (the “Investment Manager” or “Lazard”).

Portfolio Update (as of December 31, 2015)

For the fourth quarter of 2015, the Fund’s NAV returned 2.8%, underperforming the 5.5% return of its benchmark, the MSCI World® Index (the “Index”). Over the calendar year, the Fund’s NAV performance of -8.6% underperformed the Index return of -0.9%. Due to this recent weak performance, the Fund’s NAV performance over longer time periods and since inception is also lagging the benchmark. The since inception annualized return is 5.0%, versus 6.0% for the Index. Shares of LGI ended the year with a market price of \$13.08, representing a 14.3% discount to the Fund’s NAV per share of \$15.26.

The Fund’s net assets were \$146.6 million as of December 31, 2015, with total leveraged assets (net assets plus line of credit outstanding and net notional value of forward currency contracts) of \$183.4 million, representing a 20.1% leverage rate. This leverage rate of 20.1% is higher than that at the end of the third quarter of 2015 (15.6%), but below the maximum permitted leverage rate of 33 %.

Within the global equity portfolio, stock selection in the energy and industrials sectors, and within Germany, contributed positively to performance in the fourth quarter. In contrast, stock selection within the health care, information technology and consumer staples sectors, and within the US, detracted from performance for the quarter.

Performance for the smaller, short duration¹ emerging markets currency and debt portion of the Fund was very weak in the fourth quarter and for the calendar year, and has been a meaningful negative contributor to performance over the last few years. However, it has

still contributed positively to performance since the Fund's inception.

As of December 31, 2015, 81.6% of the Fund's total leveraged assets consisted of global equities and 18.4% consisted of emerging market currency and debt instruments.

Declaration of Distributions

Pursuant to LGI's Level Distribution Policy, the Fund declares, monthly, a distribution equal to 6.25% (on an annualized basis) of the Fund's NAV on the last business day of the previous year. Throughout 2015, the monthly distribution rate was \$0.09282 per share. Total distributions in 2015 represented a distribution yield of 8.5% based on the Fund's \$13.08 market price as of the close of trading on the NYSE on December 31, 2015. The 2016 monthly distribution rate per share is \$0.07948, representing a distribution yield of 7.3% based on the Fund's market price as of December 31, 2015. The \$1.11384 distributed per share in 2015 was all return of capital.

Additional Information

Please note that available on www.LazardNet.com are frequent updates on the Fund's performance, press releases, distribution information, and a monthly fact sheet that provides information about the Fund's major holdings, sector weightings, regional exposures, and other characteristics, including the notices required by Section 19(a) of the Investment Company Act of 1940, as amended (the "1940 Act"). You may also reach Lazard by phone at 1-800-823-6300.

On behalf of Lazard, we thank you for your investment in Lazard Global Total Return and Income Fund, Inc. and look forward to continuing to serve your investment needs in the future.

Message from the Portfolio Managers

Global Equity Portfolio

(81.6% of total leveraged assets)

The Fund's global equity portfolio is invested primarily in equity securities of large, well-known global companies with, we believe, strong financial productivity at attractive valuations. Examples include GlaxoSmithKline, a global research-based pharmaceutical company based in the United Kingdom; Citigroup, a US-based financial services company; Canon, a Japanese manufacturer and distributor of net-

Lazard Global Total Return and Income Fund, Inc.

Investment Overview (continued)

work digital multifunction devices, copying machines, printers and cameras; and Total, a French energy supplier that explores for, produces, refines, transports, and markets oil and natural gas.

Companies held in the global equity portfolio are all based in developed-market regions around the world. As of December 31, 2015, 48.4% of these stocks were based in North America, 28.4% were based in continental Europe (not including the United Kingdom), 14.1% were from the United Kingdom, 5.8% were from Japan, and 3.3% were from the rest of Asia (not including Japan) and Australia. The global equity portfolio is similarly well diversified across a number of industry sectors. The top two sectors, by weight, at December 31, 2015, were financials (19.4%), which includes banks, diversified financials, insurance, and real estate; and information technology (17.0%), which includes semiconductors & semiconductor equipment, software & services, and technology hardware & equipment. Other sectors in the portfolio include consumer discretionary, consumer staples, energy, health care, industrials, materials, telecom services, and utilities. The average dividend yield on the securities held in the global equity portfolio was approximately 3.5% as of December 31, 2015.

Global Equity Markets Review

Global markets rose in the fourth quarter as concerns over economic growth waned and central bank actions continued to assuage investor concerns. Two macro trends that have been in place all year continued as commodities fell to the lowest levels in over ten years and the dollar rallied to the highest levels in over twelve years. US stocks closed higher, regaining much of the ground lost in the third quarter, as fears of a “hard landing” in China subsided and investors became more comfortable with the US Federal Reserve’s first interest rate hike in nine years. The decision to raise rates at its December meeting reflected the belief that the economy is strong enough to sustain its moderate expansion. Also during the quarter, economic data exceeded expectations and the unemployment rate declined to a post-recession low. Markets in Europe and Japan were among the strongest performers globally, as the Bank of Japan and the European Central Bank continued to take actions to support growth. While positive for the quarter, China underperformed the rest of the world, as represented by the Index, as economic readings failed to instill confidence that the government’s stimulus and reforms

were effective in boosting domestic growth. Broadly, emerging markets closed flat on the period.

What Helped and What Hurt LGI

Stock selection in the energy sector helped performance in the fourth quarter. Shares of Chevron, an integrated oil and gas company rose in the fourth quarter despite a very weak global oil price environment. The company is seen as a defensive play in this space due to its solid balance sheet and given that management has announced plans for significant cuts to planned capital expenditures and cost structure. Stock selection was also strong within Germany. Shares of SAP, a software developer, rose after management provided optimistic guidance with rising gross margins

and strong cash generation which could flow into share buybacks or increased dividend payments. The company benefits from a modern and relevant product mix within both on-premise and cloud computing.

In contrast, stock selection in the health care sector hurt performance. Shares of Novartis, a pharmaceutical company, declined along with the wider European pharma industry and upon the approval of a generic alternative to one of its products. We like Novartis on its attractive drug pipeline and because its margin gap versus peers should close as new, high-margin products launch and as its cost-rationalization program is expanding. Stock selection within the information technology sector and within the US also detracted from performance. Shares of Apple, a manufacturer and distributor of personal computers, smartphones and other electronics, declined on concerns that smartphone sales had peaked. Furthermore, IBM, a provider of computer solutions, reduced its 2015 earnings guidance due to pressures within its infrastructure outsourcing business. Stock selection within the consumer staples sector also hurt returns. Shares of Walmart, a chain of discount stores and supermarkets, fell after the company provided bearish guidance including declining earnings and increased wage costs.

Emerging Market Currency and Debt Portfolio

(18.4% of total leveraged assets)

The Fund also seeks income through investing in primarily high-yielding, short-duration emerging market forward currency contracts and local currency debt instruments. As of December 31, 2015, this portfolio consisted of forward currency contracts (75.5%) and sovereign debt obligations (24.5%). The average duration of the emerging market currency and debt portfo-

Lazard Global Total Return and Income Fund, Inc.

Investment Overview (continued)

lio decreased relative to the third quarter of 2015, with the December 31, 2015 duration at approximately 9 months (19 months on September 30, 2015), while the average yield increased from 9.5%² on September 30, 2015 to 11.6% on December 31, 2015.

Emerging Market Currency and Debt Market Review

Pessimism surrounding global growth and exports has led to a sharp decline in commodity prices which helped fuel sharp declines in emerging markets (EM) currencies in 2015. Many currencies weakened by more than 20% for the year. As we look ahead to 2016, there are several reasons to be optimistic on short duration EM local markets. Historically, emerging markets have had stronger growth, which is forecasted to accelerate in 2016 for the first time in several years, better debt sustainability, and fiscal maneuverability than developed markets. High yields in both real and nominal terms, improved external balances, favorable demographics, and valuations also suggest that emerging markets may be poised to recover.

What Helped and What Hurt LGI

Indonesia contributed positively, as confidence in the new administration, oversold yields, and falling inflation helped the rupiah and local bonds rally sharply in October. In Zambia, the kwacha rallied sharply (up

18%) in November due to central bank intervention to raise its overnight lending rate. In Turkey, the lira rallied on optimism that a new government would be formed following November 1 elections. We subsequently cut exposure to the lira during the quarter. A lower leverage level of 20.1% versus the maximum permitted level of 33 % helped to mitigate losses for the Fund.

Conversely, Russia and Kazakhstan lost nearly 1.5% combined. Both currencies weakened during the quarter as oil (both countries main export) tumbled by 23%. We are invested in Russia due to attractive yield and improving capital and current accounts, while Kazakhstan provides yields of over 50% and has vast currency reserves. South Africa detracted from performance as the rand was adversely impacted by portfolio outflows ahead of the US Federal Reserve rate hike which were exacerbated in December by political risks stemming from the bungled appointment and subsequent replacement of the finance minister. Mexico also hurt returns as falling crude prices dampened investment in the energy sector while the peso's low yield and ample liquidity meant it was utilized as a proxy to hedge emerging markets risk. We believe Mexico is poised to benefit from the continued strength of the US economy.

Notes to Investment Overview:

A measure of the average cash weighted term-to-maturity of the investment holdings. Duration is a measure of the price sensitivity of a bond to interest rate movements. Duration for a forward currency contract is equal to its term-to-maturity.

²The total quoted yield does not account for the implicit cost of borrowing on the forward currency contracts, which would reduce the yield shown.

Total returns reflect reinvestment of all dividends and distributions. Past performance is not indicative, or a guarantee, of future results. A period of less than one year is not annualized.

The performance data of the Index and other market data have been prepared from sources and data that the Investment Manager believes to be reliable, but no representation is made as to their accuracy. The Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The Index is unmanaged, has no fees or costs and is not available for investment.

The views of the Fund's Investment Manager and the securities described in this report are as of December 31, 2015; these views and portfolio holdings may have changed subsequent to this date. Nothing herein should be construed as a recommendation to buy, sell, or hold a particular security. There is no assurance that the securities discussed herein will remain in the Fund at the time you receive this report, or that securities sold will not have been repurchased. The specific securities discussed may, in aggregate, represent only a small percentage of the Fund's holdings. It should not be assumed that securities identified and discussed were, or will be, profitable, or that the investment decisions made in the future will be profitable, or equal the investment performance of the securities discussed herein.

The views and opinions expressed are provided for general information only, and do not constitute specific tax, legal, or investment advice to, or recommendations for, any person. There can be no guarantee as to the accuracy of any outlooks for markets, sectors and securities as discussed herein.

Comparison of Changes in Value of \$10,000 Investment in LGI and MSCI World Index*

	Value at 12/31/15
LGI at Market Price	\$15,609
LGI at Net Asset Value	14,616
MSCI World Index	16,256

Average Annual Total Returns*

Years Ended December 31, 2015

	One Year	Five Years	Ten Years
Market Price	-10.78%	4.55%	4.55%
Net Asset Value	-8.58%	4.60%	3.87%
MSCI World Index	-0.87%	7.59%	4.98%

Total returns reflect reinvestment of all dividends and distributions. The performance quoted represents past performance. Current performance may be lower or higher than the performance quoted. Past performance is not indicative, or a guarantee, of future results; the investment return, market price and net asset value of the Fund will fluctuate, so that an investor's shares in the Fund, when sold, may be worth more or less than their original cost. The returns do not reflect the deduction of taxes that a stockholder would pay on the Fund's distributions or on the sale of Fund shares.

Performance results do not include adjustments made for financial reporting purposes in accordance with accounting principles generally accepted in the United States of America ("GAAP") and may differ from amounts reported in the financial highlights.

The performance data of the Index has been prepared from sources and data that the Investment Manager believes to be reliable, but no representation is made as to its accuracy. The Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The Index is unmanaged, has no fees or costs and is not available for investment.

Bank borrowing outstanding (in thousands)	\$14,400	\$14,250	\$14,455	\$14,455	\$20,210

(a) Total return based on per share market price assumes the purchase of common shares at the closing market price on the business day immediately preceding the first day, and sales of common shares at the closing market price on the last day, of each year indicated; dividends and distributions are assumed to be reinvested in accordance with the Fund's Dividend Reinvestment Plan. The total return based on net asset value, or NAV, assumes the purchase of common shares at the "net asset value, beginning of year" and sales of common shares at the "net asset value, end of year", for each of the years indicated; distributions are assumed to be reinvested at NAV. Past performance is not indicative, or a guarantee, of future results; the investment return, market price and net asset value of the Fund will fluctuate, so that an investor's shares in the Fund, when sold, may be worth more or less than their original cost. The returns do not reflect the deduction of taxes that a stockholder would pay on the Fund's distributions or on the sale of Fund shares.

(b) Calculated as the sum of the Fund's Net Assets and Line of Credit outstanding, as both figures are shown on the Fund's Statement of Assets and Liabilities, then dividing that sum by the Line of Credit outstanding and multiplying the result by 1,000.

The accompanying notes are an integral part of these financial statements.

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements

December 31, 2015

1. Organization

Lazard Global Total Return and Income Fund, Inc. (the “Fund”) was incorporated in Maryland on January 27, 2004 and is registered under the 1940 Act, as a diversified, closed-end management investment company. The Fund trades on the NYSE under the ticker symbol LGI and commenced operations on April 28, 2004. The Fund’s investment objective is total return, consisting of capital appreciation and income.

2. Significant Accounting Policies

The accompanying financial statements are presented in conformity with GAAP. The Fund is an investment company and therefore applies specialized accounting guidance in Accounting Standards Codification Topic 946. The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of the financial statements:

(a) Valuation of Investments—NAV per share for the Fund is determined on each day the NYSE is open for business, generally as of the close of regular session trading on the NYSE (normally 4:00 p.m. Eastern time, the “Regular Closing Time”). When trading on the NYSE is unexpectedly closed prior to the Regular Closing Time, or an earlier scheduled close (such as on certain days around holidays when the NYSE is scheduled to close before 4:00 p.m.), and remains closed through the time of the Regular Closing Time (or an earlier scheduled close), the NAV of the Fund may nonetheless be calculated as of the Regular Closing Time (or an earlier scheduled close) if, in the judgment of the Investment Manager, there is sufficient trading in other markets between the unexpected close and the Regular Closing Time (or an earlier scheduled close) for securities for which the NYSE is usually considered the primary market. NAV per share is determined by dividing the value of the total assets of the Fund, less all liabilities, by the total number of Fund shares outstanding.

Market values for securities listed on the NYSE, NASDAQ national market or other US or foreign exchanges or markets are generally based on the last reported sales price on the exchange or market on which the security is principally traded on each valuation date; securities not traded on the valuation date are valued at the most recent quoted bid price. The Fund values NASDAQ-traded securities at the NASDAQ Official Closing Price, which may not be the last reported sales price in certain instances. Forward currency contracts generally are valued using quotations from an independent pricing service. Investments in money market funds are valued at the fund’s NAV.

Bonds and other fixed-income securities that are not exchange-traded are valued on the basis of prices provided by independent pricing services which are based on, among other things, trading in securities with similar characteristics, brokers' quotations and/or a matrix system which considers such factors as other security prices, yields and maturities.

The Valuation Committee of the Investment Manager, which meets periodically and acts pursuant to delegated authority from the Board of Directors (the "Board"), may evaluate a variety of factors to determine the fair value of securities for which market quotations are determined not to be readily available or reliable. These factors include, but are not limited to, the type of security, the value of comparable securities, observations from financial institutions and relevant news events. Input from the Investment Manager's portfolio managers/analysts also will be considered.

If a significant event materially affecting the value of securities occurs between the close of the exchange or market on which the security is principally traded and the time when the Fund's NAV is calculated, or when current market quotations otherwise are determined not to be readily available or reliable (including restricted or other illiquid securities such as certain derivative instruments), such securities will be valued at their fair value as determined by, or in accordance with procedures approved by, the Board. Non-US securities may trade on days when the Fund is not open for business, thus affecting the value of the Fund's assets on days when Fund stockholders may not be able to buy or sell Fund shares.

The effect of using fair value pricing is that the NAV of the Fund will reflect the affected securities' values as determined in the judgment of the Board or its designee instead of being determined by the market. Using a fair value pricing methodology to price securities may result in a value that is different from the most recent closing price of a security and from the prices used by other investment companies to calculate their portfolios' NAVs.

(b) Portfolio Securities Transactions and Investment Income—Portfolio securities transactions are accounted for on trade date. Realized gain (loss) on sales of investments are recorded on a specific identification basis. Dividend income is recorded on the ex-dividend date except for certain dividends from foreign securities where the dividend rate is not available. In such cases, the dividend is recorded as soon as the information is received by the Fund. Interest income is accrued daily. The Fund amortizes premiums and accretes discounts on fixed-income securities using the effective yield method.

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

December 31, 2015

The Fund may be subject to taxes imposed by foreign countries in which it invests. Such taxes are generally based upon income earned or capital gains (realized or unrealized). The Fund accrues and applies such taxes to net investment income, net realized gains and net unrealized gains concurrent with the recognition of income earned or capital gains (realized and unrealized) from the applicable portfolio securities.

As a result of several court cases in certain countries across the European Union, the Fund has filed additional tax reclaims for previously withheld taxes on dividends earned in those countries. These additional filings are subject to various administrative proceedings by the local jurisdictions' tax authorities within the European Union, as well as a number of related judicial proceedings. Uncertainty exists as to the ultimate resolution of these proceedings, the likelihood of receipt of these claims, and the potential timing of payment, and accordingly no amounts are reflected in the financial statements. Such amounts, if and when recorded, could result in an increase in the Fund's NAV per share.

(c) Leveraging—The Fund uses leverage to invest Fund assets in currency investments, primarily using forward currency contracts and by borrowing under a credit facility with State Street Bank and Trust Company ("State Street"), up to a maximum of 33 % of the Fund's total leveraged assets. If the assets of the Fund decline due to market conditions such that this 33 % threshold will be exceeded, leverage risk will increase.

If the Fund is able to realize a higher return on the leveraged portion of its investment portfolio than the cost of such leverage together with other related expenses, the effect of the leverage will be to cause the Fund to realize a higher net return than if the Fund were not so leveraged. There is no assurance that any leveraging strategy the Fund employs will be successful.

Using leverage is a speculative investment technique and involves certain risks. These include higher volatility of NAV, the likelihood of more volatility in the market value of the Fund's common stocks and, with respect to borrowings, the possibility either that the Fund's return will fall if the interest rate on any borrowings rises, or that income will fluctuate because the interest rate of borrowings varies.

If the market value of the Fund's leveraged currency investments declines, the leverage will result in a greater decrease in NAV, or less of an increase in NAV, than if the Fund were not leveraged. To the extent that the Fund is required or elects to prepay any borrowings, the Fund may need to liquidate investments to fund such prepayments.

Liquidation at times of adverse economic conditions may result in capital losses and may reduce returns.

(d) Foreign Currency Translation and Forward Currency Contracts—The accounting records of the Fund are maintained in US dollars. Portfolio securities and other assets and liabilities denominated in a foreign currency are translated daily into US dollars at the prevailing rates of exchange. Purchases and sales of securities, income receipts and expense payments are translated into US dollars at the prevailing exchange rates on the respective transaction dates.

The Fund does not isolate the portion of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in their market prices. Such fluctuations are included in net realized and unrealized gain (loss) on investments. Net realized gain (loss) on foreign currency and forward currency contracts represents net foreign currency gain (loss) from forward currency contracts, disposition of foreign currencies, currency gain (loss) realized between the trade and settlement dates on securities transactions, and the difference between the amount of dividends, interest and foreign withholding taxes recorded on the Fund's accounting records and the US dollar equivalent amounts actually received or paid. Net change in unrealized appreciation (depreciation) on foreign currency reflects the impact of changes in exchange rates on the value of assets and liabilities, other than investments in securities, during the period.

A forward currency contract is an agreement between two parties to buy or sell currency at a set price on a future date. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of the foreign currency relative to the US dollar.

The US dollar value of forward currency contracts is determined using quotations provided by an independent pricing service. Daily fluctuations in the value of such contracts are recorded as unrealized appreciation (depreciation) on forward currency contracts. When the contract is closed, the Fund records a realized gain (loss) equal to the difference between the value at the time it was opened and the value at the time it was closed.

(e) Federal Income Taxes—The Fund's policy is to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code (the "Code") and to distribute all of its taxable income, including any net realized capital gains, to stockholders. Therefore, no federal income tax provision is required.

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

December 31, 2015

At December 31, 2015, the Fund had unused realized capital loss carryovers which, for federal income tax purposes, could be used to offset future realized capital gains with no expiration date as follows:

Short-Term	Long-Term
\$ 126,507	\$ 1,536,127

Under current tax law, certain late year losses, as defined by the Code, within the taxable year may be deferred and treated as occurring on the first day of the following tax year. For the tax year ended December 31, 2015, the Fund elected to defer such losses as follows:

Post October Capital Loss Deferral	Late Year Ordinary Loss Deferral
\$51,305	\$507,843

Management has analyzed the Fund's tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years (2012-2014), or expected to be taken in the Fund's 2015 tax returns.

(f) Dividends and Distributions—The Fund intends to declare and to pay dividends monthly from net investment income. Distributions to stockholders are recorded on the ex-dividend date. During any particular year, net realized gains from investment transactions in excess of available capital loss carryforwards would be taxable to the Fund, if not distributed. The Fund intends to declare and distribute these amounts, at least annually, to stockholders; however, to avoid taxation, a second distribution may be required.

Income and capital gains distributions are determined in accordance with federal income tax regulations which may differ from GAAP. These book/tax differences, which may result in distribution reclassifications, are primarily due to differing treatments of foreign currency and fixed-income transactions and wash sales. The book/tax differences relating to stockholder distributions resulted in reclassifications among certain capital accounts as follows:

Edgar Filing: LAZARD GLOBAL TOTAL RETURN & INCOME FUND INC - Form N-CSR

	Undistributed	
	(Distributions	Accumulated
Paid in	in	Net
Capital	Excess of) Net	Realized
	Investment	Gain
	Income	
\$(10,919,729)	\$ 7,484,761	\$ 3,434,968

The Fund has implemented a level distribution policy to seek to maintain a stable monthly distribution, subject to oversight of the Fund’s Board. Under the Fund’s level distribution policy, the Fund intends to make regular monthly distributions at a fixed rate per share. If for any monthly distribution, net investment income and net realized short-term capital gain were less than the amount of the

distribution, the difference would generally be distributed from the Fund’s assets. In addition, in order to make such distributions, the Fund might have to sell a portion of its investment portfolio at a time when independent investment judgment might not dictate such actions.

In July 2010, the Investment Manager, on behalf of itself and the Fund, received an exemptive order from the Securities and Exchange Commission (the “SEC”) facilitating the implementation of a distribution policy that may include multiple long-term capital gains distributions (“Managed Distribution Policy”). As a result, the Fund may, subject to the determination of its Board, implement a Managed Distribution Policy.

Concurrent with the monthly distributions paid from January 2015 through December 2015, the Fund issued notices pursuant to Section 19(a) of the 1940 Act (the “Section 19(a) Notices”) each stating that the Fund had currently estimated that it had distributed more than its net investment income and realized capital gains. For 2015, the \$1.11384 distributed per share was all return of capital. The Section 19(a) Notices may also be viewed at www.LazardNet.com.

The actual amounts and sources of distributions shown on the Section 19(a) Notices are only estimates and are not provided for tax reporting purposes. The actual amounts and sources of the cumulative distributions for tax reporting purposes will depend upon the Fund’s investment experience during the year and may be subject to changes based on tax regulations. The Fund will send stockholders a Form 1099-DIV for the calendar year explaining how to report these distributions for federal income tax purposes.

The tax character of dividends and distributions paid during the years ended December 31, were as follows:

	2015	2014
Ordinary Income	\$—	\$833,813
Long-Term Capital Gain	—	10,805,869
Return of Capital	10,698,697	331,517

Total \$10,698,697 \$11,971,199

At December 31, 2015, the components of distributable earnings and unrealized appreciation, on a tax basis, were as follows:

Deferred Late Year Ordinary Losses	Deferred Capital Losses	Net Unrealized Appreciation including Foreign Currency
\$(507,843)	\$(1,713,939)	\$(953,381)

(g) *Estimates*—The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

December 31, 2015

liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

3. Investment Management Agreement

The Fund has entered into a management agreement (the “Management Agreement”) with the Investment Manager. Pursuant to the Management Agreement, the Investment Manager regularly provides the Fund with investment research, advice and supervision and furnishes continuously an investment program for the Fund consistent with its investment objective and policies, including the purchase, retention and disposition of securities.

The Fund has agreed to pay the Investment Manager an annual investment management fee of 0.85% of the Fund’s average daily “Total Leveraged Assets” (the Fund’s total assets including Financial Leverage (defined below)) for the services and facilities provided by the Investment Manager, payable on a monthly basis. For the year ended December 31, 2015, the effective management fee, as a percentage of the Fund’s average net assets, was 1.04%.

The fee paid to the Investment Manager will be higher when the Investment Manager uses Currency Commitments (defined below) and Borrowings (defined below) (“Financial Leverage”) to make Currency Investments (defined below), rather than by reducing the percentage of “Net Assets” (the Fund’s assets without taking into account Financial Leverage) invested in Global Equity Investments for the purposes of making Currency Investments. “Global Equity Investments” refers to investments in the Fund’s global equity strategy consisting of equity securities of companies with market capitalizations of \$5 billion or greater domiciled in those countries that comprise the Index. “Currency Investments” refers to investments in the Fund’s emerging income strategy, consisting of emerging market currencies (primarily by entering into forward currency contracts), or instruments whose value is derived from the performance of an underlying emerging market currency, but also may invest in debt obligations, including government, government agency and corporate obligations and structured notes denominated in emerging market currencies. “Currency Commitments” are the aggregate financial exposures created by forward currency contracts in excess of that represented in the Fund’s Net Assets, and “Borrowings” refers to the borrowings under the Fund’s credit facility. Assuming Financial Leverage in the amount of 33 % of the Fund’s Total Leveraged Assets, the annual fee payable to the Investment Manager would be 1.28% of Net Assets (i.e., not including amounts attributable to Financial Leverage).

The following is an example of this calculation of the Investment Manager’s fee, using very simple illustrations. If the Fund had assets of \$1,000, it could invest \$1,000 in Global Equity Investments and enter into \$500 in forward currency contracts (because the Fund would not have to pay money at the time it enters into the currency contracts). Similarly, the Fund could invest \$1,000 in Global Equity Investments, borrow \$500 and invest the \$500 in foreign

currency denominated bonds. In either case, the Investment Manager's fee would be calculated based on \$1,500 of assets, because the fee is calculated based on Total Leveraged Assets (Net Assets plus Financial Leverage). In our example, the Financial Leverage is in the form of either the forward currency contracts (Currency Commitments) or investments from Borrowings. The amount of the Financial Leverage outstanding, and therefore the amount of Total Leveraged Assets on which the Investment Manager's fee is based, fluctuates daily based on changes in value of the Fund's portfolio holdings, including changes in value of the currency involved in the forward currency contracts and foreign currency denominated bonds acquired with the proceeds of Borrowings. However, the Investment Manager's fee will be the same regardless of whether Currency Investments are made with Currency Commitments or with Borrowings (without taking into account the cost of Borrowings).

This method of calculating the Investment Manager's fee is different than the way closed-end investment companies typically calculate management fees. Traditionally, closed end investment companies calculate management fees based on Net Assets plus Borrowings (excluding Financial Leverage obtained through Currency Commitments). The Investment Manager's fee is different because the Fund's leverage strategy is different than the leverage strategy employed by many other closed-end investment companies. Although the Fund may employ Borrowings in making Currency Investments, the Fund's leverage strategy relies primarily on Currency Commitments, rather than relying exclusively on borrowing money and/or issuing preferred stock, as is the strategy employed by most closed-end investment companies. The Investment Manager's fee would be lower if its fee were calculated only on Net Assets plus Borrowings, because the Investment Manager would not earn fees on Currency Investments made with Currency Commitments (forward currency contracts). Using the example above, where the Fund has assets of \$1,000 and invests \$1,000 in Global Equity Investments and \$500 in forward currency contracts, the following table illustrates how the Investment Manager's fee would be different if it did not earn management fees on these types of Currency Investments. A dis-

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

December 31, 2015

discussion of the most recent review and approval by the Fund's Board of the Management Agreement (including the method of calculating the Investment Manager's fee) is included under "Other Information—Board Consideration of Management Agreement" in the Fund's semi-annual report for the period ended June 30, 2015.

	Fund's management fee based on Total Leveraged Assets (includes Currency Commitments)	Typical management fee formula, calculated excluding Currency Commitments
Beginning assets of \$1,000		
Global Equity Investments (Net Assets)	\$ 1,000	\$ 1,000
Currency Commitments	\$ 500	\$ 500
Assets used to calculate management fee	\$ 1,500	\$ 1,000
Management fee (0.85%)	\$ 12.75	\$ 8.50

Investment Manager Fee Conflict Risk—The fee paid to the Investment Manager for investment management services will be higher when the Fund uses Financial Leverage, whether through forward currency contracts or Borrowings, because the fee paid will be calculated on the basis of the Fund's assets including this Financial Leverage. Consequently, the Investment Manager may have a financial interest for the Fund to utilize such Financial Leverage, which may create a conflict of interest between the Investment Manager and the stockholders of the Fund.

The Fund has implemented procedures to monitor this potential conflict.

4. Administration Agreement

The Fund has entered into an administration agreement with State Street to provide certain administrative services. The Fund bears the cost of such services at a fixed annual rate of \$42,500, plus 0.02% of average daily net assets up to \$1 billion and 0.01% of average daily net assets over \$1 billion.

5. Directors' Compensation

Certain Directors of the Fund are officers of the Investment Manager. For the year ended December 31, 2015, each Director who is not an affiliated person of the Investment Manager or any of its affiliates was paid by the Fund, The Lazard Funds, Inc., Lazard Retirement Series, Inc. and Lazard World Dividend & Income Fund, Inc. (collectively with the Fund, the "Lazard Fund Complex"), each a registered management investment company advised by the Investment Manager, and Lazard Alternative Emerging Markets 1099 Fund, a closed-end registered management investment company advised by an affiliate of the

Investment Manager: (1) an annual retainer of \$190,000, (2) an additional annual fee of \$20,000 to the lead Independent Director, and (3) an additional annual fee of \$10,000 to the Audit Committee Chair. The Directors also are reimbursed for travel and other out-of-pocket expenses for attending Board and committee meetings. The Directors do not receive benefits from the Fund pursuant to any pension, retirement or similar arrangement. Directors' fees were allocated among the funds in the Lazard Fund Complex and Lazard Alternative Emerging Markets 1099 Fund at a rate of \$5,000 per fund with the remainder allocated based upon each fund's proportionate share of combined net assets. The Statement of Operations shows the Directors' fees and expenses paid by the Fund.

6. Securities Transactions and Transactions with Affiliates

Purchases and sales of portfolio securities (excluding short-term investments) for the year ended December 31, 2015 were \$28,524,637 and \$27,685,305, respectively.

For the year ended December 31, 2015, no brokerage commissions were paid to affiliates of the Investment Manager or other affiliates of the Fund for portfolio transactions executed on behalf of the Fund.

7. Line of Credit

The Fund has a \$30 million Line of Credit Agreement (the "Agreement") with State Street primarily to borrow to invest Fund assets in Currency Investments. The Fund may borrow the lesser of \$30 million or 33 % of its Total Leveraged Assets. Interest on borrowings was payable: from January 1, 2015 to June 28, 2015, at the higher of the Federal Funds rate or Overnight LIBOR rate plus 0.75%, and from June 29, 2015 to December 31, 2015, at the higher of the Federal Funds rate or the reserve adjusted LIBOR rate plus 0.85%, on an annualized basis. Under the Agreement, the Fund has also agreed to pay a 0.15% per annum fee on the unused portion of the commitment (effective June 29, 2015, 0.25% per annum if the unused portion is equal to or exceeds 50% of the committed line amount), payable quarterly in arrears. During the year ended December 31, 2015, the Fund had borrowings under the Agreement as follows:

Maximum Daily

Average Daily Loan Balance*	Loan Outstanding	Weighted Average Interest Rate
\$15,182,438	\$16,950,000	0.95 %

* For the 365 days borrowings were outstanding.

Management believes that the fair value of the liabilities under the line of credit is equivalent to the recorded amount based on its short term maturity and interest rate, which fluctuates with LIBOR. The line of credit outstanding as of December 31, 2015 is categorized as Level 2 (see Note 10).

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

December 31, 2015

8. Investment Risks

(a) Non-US Securities Risk—The Fund invests in securities of foreign entities and in instruments denominated in foreign currencies which involve risks not typically associated with investments in US securities. The Fund's performance will be influenced by political, social and economic factors affecting the non-US countries and companies in which the Fund invests. Non-US securities carry special risks, such as less developed or less efficient trading markets, political instability, a lack of company information, differing auditing and legal standards, and, potentially, less liquidity. In addition, investments denominated in currencies other than US dollars may experience a decline in value, in US dollar terms, due solely to fluctuations in currency exchange rates. The Fund's investments could be adversely affected by delays in, or a refusal to grant, repatriation of funds or conversion of emerging market currencies. Emerging market countries can generally have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries. The economies of countries with emerging markets may be based predominantly on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme debt burdens or volatile inflation rates. The securities markets of emerging market countries have historically been extremely volatile. These market conditions may continue or worsen. Significant devaluation of emerging market currencies against the US dollar may occur subsequent to acquisition of investments denominated in emerging market currencies. Investments in these countries may be subject to political, economic, legal, market and currency risks. The risks may include less protection of property rights and uncertain political and economic policies, the imposition of capital controls and/or foreign investment limitations by a country, nationalization of businesses and the imposition of sanctions by other countries, such as the US.

(b) Fixed-Income and Debt Securities Risk—The market value of a debt security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The debt securities market can be susceptible to increases in volatility and decreases in liquidity. Prices of bonds and other debt securities tend to move inversely with changes in interest rates. Increases in volatility and decreases in liquidity may be caused by a rise in interest rates (or the expectation of a rise in interest rates). Interest rate risk is usually greater for fixed-income securities with longer maturities or durations.

The Fund's investments in lower-rated, higher-yielding securities ("junk bonds") are subject to greater credit risk than its higher rated investments. Credit risk is the risk that the issuer will not make interest or principal payments, or will not make payments on a timely basis. Non-investment grade securities tend to be more volatile, less liquid and are considered speculative. If there is a decline, or perceived decline, in the credit quality of a debt security (or any guarantor of payment on such security), the security's value could fall, potentially lowering the Fund's share price. The prices of non-investment grade securities, unlike investment grade debt securities, may fluctuate unpredictably and not necessarily inversely with changes in interest rates. The market for these securities may be less liquid and therefore these securities may be harder to value or sell at an acceptable price, especially during times of market volatility or decline. Liquidity can decline unpredictably in response to overall economic conditions or credit tightening.

9. Contractual Obligations

The Fund enters into contracts in the normal course of business that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

10. Fair Value Measurements

Fair value is defined as the price that the Fund would receive to sell an asset, or would pay to transfer a liability, in an orderly transaction between market participants at the date of measurement. The Fair Value Measurements and Disclosures provisions of GAAP also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurement that is based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer, broadly, to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. Each investment's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the overall fair value measurement. The three-level hierarchy of inputs is summarized below:

Level 1—unadjusted quoted prices in active markets for identical investments

*Lazard Global Total Return and Income Fund, Inc.***Notes to Financial Statements (continued)****December 31, 2015**

• Level 2—other significant observable inputs (including unadjusted quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

• Level 3—significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

Changes in valuation technique may result in transfer into or out of the current assigned level within the hierarchy.

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in these securities.

The following table summarizes the valuation of the Fund’s investments by each fair value hierarchy level as of December 31, 2015:

Description	Unadjusted Quoted Prices in Active Markets for Identical Investments (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of December 31, 2015
Assets:				
Common Stocks*	\$ 150,069,525	\$—	\$ —	\$ 150,069,525
Foreign Government Obligations*	—	11,229,036	—	11,229,036
Short-Term Investment	383,675	—	—	383,675
Other Financial Instruments**				
Forward Currency Contracts	—	793,868	—	793,868
Total	\$ 150,453,200	\$ 12,022,904	\$ —	\$ 162,476,104
Liabilities:				
Other Financial Instruments**				
Forward Currency Contracts	\$—	\$(2,025,892)	\$ —	\$(2,025,892)

* Please refer to Portfolio of Investments (page 7 through 8) and Notes to Portfolio of Investments (page 12) for portfolio holdings by country and industry.

** Other financial instruments are derivative instruments which are valued at their respective unrealized appreciation/depreciation.

The Fund recognizes all transfers between levels as though they were transferred at the beginning of the reporting period. There were no transfers into or out of Levels 1, 2 or 3 during the year ended December 31, 2015.

For further information regarding security characteristics see Portfolio of Investments.

11. Derivative Instruments

The Fund may use derivative instruments, including forward currency contracts, to gain exposure to the local currency and interest rates of emerging markets or to hedge certain types of currency exposure.

During the year ended December 31, 2015, the notional amounts of purchases and sales of forward currency contracts were \$602,899,039 and \$602,883,564, respectively, with average monthly notional exposure of approximately \$94,600,000.

The following table summarizes the fair value of derivative instruments on the Statement of Assets and Liabilities as of December 31, 2015:

	Fair Value
Asset Derivatives	
Foreign Exchange Risk:	
Gross unrealized appreciation on forward currency contracts	\$793,868
Liability Derivatives	
Foreign Exchange Risk:	
Gross unrealized depreciation on forward currency contracts	\$2,025,892

The effect of derivative instruments on the Statement of Operations for the year ended December 31, 2015 was:

	Amount
Realized Gain (Loss) on Derivatives Recognized <u>in Income</u>	
Foreign Exchange Risk:	
Net realized loss on forward currency contracts	\$(1,457,417)
Net Change in Unrealized Appreciation (Depreciation) on Derivatives Recognized <u>in Income</u>	
Foreign Exchange Risk:	

Net change in unrealized depreciation on forward currency contracts \$(1,038,064)

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

December 31, 2015

See Note 2(d) and the Portfolio of Investments for additional disclosures about derivative instruments.

As of December 31, 2015, the Fund holds derivative instruments that are eligible for offset in the Statement of Assets and Liabilities and are subject to master netting arrange-

ments. A master netting arrangement is an agreement between two counterparties who have multiple contracts with each other that provides for the net settlement of all contracts, as well as any cash collateral, through a single payment in the event of default on, or termination of, any one contract.

The required information for the Fund is presented in the below table, as of December 31, 2015:

Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Assets and Liabilities	Net Amounts of Assets Presented in the Statement of Assets and Liabilities
Forward Currency Contracts	\$ 793,868	\$ —	\$ 793,868

12. Subsequent Events

Management has evaluated subsequent events affecting the Fund through the issuance of the financial statements and has determined that there were no subsequent events that required adjustment or disclosure.

Lazard Global Total Return and Income Fund, Inc.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Lazard Global Total Return and Income Fund, Inc.:

We have audited the accompanying statement of assets and liabilities of Lazard Global Total Return and Income Fund, Inc. (the "Fund"), including the portfolio of investments, as of December 31, 2015, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2015, by correspondence with the custodian and brokers; where replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Lazard Global Total Return and Income Fund, Inc. as of December 31, 2015, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

DELOITTE & TOUCHE LLP

Lazard Global Total Return and Income Fund, Inc.

Dividend Reinvestment Plan

(unaudited)

Unless you elect to receive distributions in cash (i.e., opt-out), all dividends, including any capital gain distributions, on your common stock will be automatically reinvested by Computershare, Inc., as dividend disbursing agent (the “Plan Agent”), in additional common stock under the Fund’s Dividend Reinvestment Plan (the “Plan”). You may elect not to participate in the Plan by contacting the Plan Agent. If you do not participate, you will receive all distributions in cash, paid by check mailed directly to you by the Plan Agent.

Under the Plan, the number of shares of common stock you will receive will be determined on the dividend or distribution payment date, as follows:

If the common stock is trading at or above net asset value at the time of valuation, the Fund will issue new shares at (1) a price equal to the greater of (i) net asset value per common share on that date or (ii) 95% of the common stock’s market price on that date.

If the common stock is trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase common stock in the open market, on the NYSE or elsewhere, for the participants’ accounts. It is possible that the market price for the common stock may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may (2) exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in common stock issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase common stock in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account

under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus an initial \$15 service fee plus \$0.12 per share being liquidated (for processing and brokerage expenses).

The Plan Agent maintains all stockholders’ accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Shares of common stock in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all common stock you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in newly-issued shares of common stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your common stock with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board, the change is warranted. There is no direct service charge to participants in the Plan (other than the service charge when you direct the Plan Agent to sell your common stock held in a dividend reinvestment account); however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170.

Tax and Other Information

(unaudited)

Tax Information

Year Ended December 31, 2015

The following tax information represents year end disclosures of the tax benefits passed through to stockholders for 2015:

Of the dividends paid by the Fund, 49.61% of the dividends are qualified dividend income.

Of the dividends paid by the Fund, no dividends qualify for the dividends received deduction available to corporate shareholders.

Pursuant to Section 871 of the Code, the Fund has no designated qualified short-term gains for purposes of exempting withholding of tax on such distributions to US nonresident shareholders.

Proxy Voting

A description of the policies and procedures used to determine how proxies relating to Fund portfolio securities are voted is available (1) without charge, upon request, by calling (800) 823-6300 or (2) on the SEC's website at <http://www.sec.gov>.

The Fund's proxy voting record for the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling (800) 823-6300 or (2) on the SEC's website at <http://www.sec.gov>. Information as of June 30 each year will generally be available by the following August 31.

Form N-Q

The Fund files a complete schedule of its portfolio holdings for the first and third quarters of its fiscal year with the SEC on Form N-Q. The Fund's Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC-0330.

Lazard Asset Management LLC • 30 Rockefeller Plaza • New York, NY 10112 • www.lazardnet.com

ITEM 2. CODE OF ETHICS.

The Registrant has adopted a code of ethics that applies to the Registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The Registrant's Board of Directors (the "Board") has determined that Robert M. Solmson and Nancy A. Eckl, members of the Audit Committee of the Board, are audit committee financial experts as defined by the Securities and Exchange Commission (the "SEC"). Mr. Solmson and Ms. Eckl are "independent" as defined by the SEC for purposes of audit committee financial expert determinations.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

(a) Audit Fees. The aggregate fees billed for each of the last two fiscal years (the "Reporting Periods") for professional services rendered by the Registrant's principal accountant (the "Auditor") for the audit of the Registrant's annual financial statements, or services that are normally provided by the Auditor in connection with the statutory and regulatory filings or engagements for the Reporting Periods, were \$37,000 in 2014 and \$37,960 in 2015.

(b) Audit-Related Fees. There were no fees billed in the Reporting Periods by the Auditor to the Registrant for assurance and related services that are reasonably related to the performance of the audit of the Registrant's financial statements and are not reported under paragraph (a) of this Item 4.

(c) Tax Fees. The aggregate fees billed in the Reporting Periods by the Auditor to the Registrant for professional services rendered by the Auditor for tax compliance, tax advice and tax planning ("Tax Services") were \$6,800 in 2014 and \$28,925 in 2015. These services consisted of (i) review or preparation of U.S. federal, state, local and excise tax returns; and (ii) U.S. federal, state and local tax planning, advice and assistance regarding statutory, regulatory or administrative developments. There were no fees billed in the Reporting Periods for Tax Services by the Auditor to Lazard Asset Management LLC, the Registrant's investment manager ("Lazard"), and any entity controlling, controlled by or under common control with Lazard that provides ongoing services to the Registrant ("Service Affiliates").

(d) All Other Fees. There were no fees billed in the Reporting Periods for products and services provided by the Auditor to the Registrant, other than the services reported in paragraphs (a) through (c) above. There were no fees billed in the Reporting Periods for non-audit services by the Auditor to Service Affiliates, other than the services reported in paragraphs (a) through (c) above.

(e) Audit Committee Pre-Approval Policies and Procedures. The Registrant's Audit Committee pre-approves the Auditor's engagements for audit and non-audit services to the Registrant and, as required, non-audit services to Service Affiliates on a case-by-case basis. Pre-approval considerations include whether the proposed services are compatible with maintaining the Auditor's independence. There were no services provided by the Auditor to the Registrant that were approved pursuant to (c)(7)(i)(C) of Rule 2-01 of Regulation S-X during the Reporting Periods.

(f) None.

(g) Non-Audit Fees. The aggregate non-audit fees billed by the Auditor for services rendered to the Registrant and Service Affiliates for the Reporting Periods were \$1,290,951 in 2014 and \$906,230 in 2015.

(h) Auditor Independence. The Audit Committee considered whether provision of non-audit services to Service Affiliates that were not required to be pre-approved is compatible with maintaining the Auditor's independence.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

The Registrant has a separately-designated standing Audit Committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934, as amended. It is composed of the following Directors, each of whom is not an "interested person" (as defined in the Investment Company Act of 1940) of the Registrant ("Independent Directors"):

Nancy A. Eckl, Audit Committee Chair
Franci J. Blassberg
Kenneth S. Davidson
Trevor W. Morrison
Richard Reiss, Jr.
Robert M. Solmson

ITEM 6. INVESTMENTS

Not applicable.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED END MANAGEMENT INVESTMENT COMPANIES.

The Registrant has delegated voting of proxies in respect of portfolio holdings to Lazard, to vote the Registrant's proxies in accordance with Lazard's proxy voting policy and guidelines (the "Voting Guidelines") that provide as follows:

- Lazard votes proxies in the best interests of its clients.

Edgar Filing: LAZARD GLOBAL TOTAL RETURN & INCOME FUND INC - Form N-CSR

Unless Lazard's Proxy Committee otherwise determines, Lazard votes proxies in a manner consistent with the Voting Guidelines.

To avoid conflicts of interest, Lazard votes proxies where a material conflict has been deemed to exist in accordance with specific proxy voting guidelines regarding various standard proxy proposals ("Approved Guidelines") or, if the Approved Guideline is to vote case-by-case, in accordance with the recommendation of an independent source.

Lazard also may determine not to vote proxies in respect of securities of any issuer if it determines that it would be in the client's overall best interests not to vote.

The Voting Guidelines address how it will vote proxies on particular types of matters such as the election for directors, adoption of option plans and anti-takeover proposals. For example, Lazard generally will:

- vote as recommended by management in routine election or re-election of directors;

- favor programs intended to reward management and employees for positive, long-term performance, evaluating whether Lazard believes, under the circumstances, that the level of compensation is appropriate or excessive; and

- vote against anti-takeover measures, such as adopting supermajority voting requirements, shareholder rights plans and fair price provisions.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Principal Portfolio Managers

As of the date of the filing of this Report on Form N-CSR, the following persons are responsible for the management of the Registrant's portfolio:

James Donald is responsible for allocation of the Registrant's assets between Global Equity Investments and Currency Investments (each, as defined in the notes to the Registrant's annual report to shareholders contained in Item 1) and overall management of the Registrant's portfolio. Global Equity Investments and Currency Investments are each managed on a team basis, with each member of the team involved at all levels of the investment process.

Mr. Donald, a Managing Director of Lazard, is a portfolio manager/analyst on Lazard's Emerging Markets Equity team and Head of the Emerging Markets Group. Prior to joining Lazard in 1996, Mr. Donald was a portfolio manager with Mercury Asset Management. Mr. Donald is a CFA Charterholder.

Global Equity Investments. Michael G. Fry, Michael Powers, Ronald Temple and Andrew Lacey are the portfolio managers responsible for investing the Registrant's assets allocated to Global Equity Investments.

Michael G. Fry, a Managing Director of Lazard, is a portfolio manager/analyst on Lazard's Global Equity and International Equity teams. Prior to joining Lazard in 2005, Mr. Fry held several positions at UBS Global Asset Management, including Head of Global Equity Portfolio Management, Global Head of Equity Research and Head of Australian Equities. Mr. Fry began working in the investment field in 1981.

Ronald Temple, a Managing Director of Lazard, is a portfolio manager/analyst on various of Lazard's US Equity teams and the Global Equity Select team. Mr. Temple is a Co-Director of Research and has primary research coverage of the financials sector. Mr. Temple joined Lazard in 2001 and had been working in the investment field since 1991.

Mr. Lacey, a Deputy Chairman of Lazard, is responsible for oversight of US and Global strategies. He also is a portfolio manager/analyst on various of Lazard's US Equity and Global Equity teams. Mr. Lacey joined Lazard in 1996, and has been working in the investment field since 1995.

Mr. Powers, a Managing Director of Lazard, is a portfolio manager/analyst on Lazard's Global Equity and International Equity teams. He began working in the investment field in 1990 when he joined Lazard.

Currency Investments. Ardra Belitz and Ganesh Ramachandran are jointly responsible for investment of the Registrant's assets allocated to Currency Investments.

Ms. Belitz, a Managing Director of Lazard and a portfolio manager/analyst on Lazard's Emerging Markets Income team, joined the team in 1998. Prior to joining Lazard in 1996, Ms. Belitz was with Bankers Trust Company. She began working in the investment industry in 1994.

Mr. Ramachandran, a Managing Director of Lazard and a portfolio manager/analyst on Lazard's Emerging Markets Income team, joined the team in 2001. Mr. Ramachandran began working in the investment field in 1997 when he joined Lazard.

Portfolio Management

Team Management. Portfolio managers at Lazard manage multiple accounts for a diverse client base, including private clients, institutions and investment funds. Lazard manages all portfolios on a team basis. The team is involved at all levels of the investment process. This team approach allows for every portfolio manager to benefit from his/her peers, and for clients to receive the firm's best thinking, not that of a single portfolio manager. Lazard manages all like investment mandates against a model portfolio. Specific client objectives, guidelines or limitations then are applied against the model, and any necessary adjustments are made.

Material Conflicts Related to Management of Similar Accounts. Although the potential for conflicts of interest exist when an investment adviser and portfolio managers manage other accounts that invest in securities in which the Registrant may invest or that may pursue a strategy similar to the Registrant's component strategies (collectively, "Similar Accounts"), the Lazard has procedures in place that are designed to ensure that all accounts are treated fairly and that the Registrant is not disadvantaged, including procedures regarding trade allocations and "conflicting trades" (e.g., long and short positions in the same or similar securities, as described below). In addition, the Registrant, as a registered investment company, is

subject to different regulations than certain of the Similar Accounts, and, consequently, may not be permitted to engage in all the investment techniques or transactions, or to engage in such techniques or transactions to the same degree, as the Similar Accounts.

Potential conflicts of interest may arise because of Lazard's management of the Registrant and Similar Accounts, including the following:

Similar Accounts may have investment objectives, strategies and risks that differ from those of the Registrant. In addition, the Registrant, as a registered investment company, is subject to different regulations than certain of the Similar Accounts and, consequently, may not be permitted to engage in all the investment techniques or transactions, or to engage in such techniques or transaction to the same degree, as the Similar Accounts. For these or other reasons, the portfolio managers may purchase different securities for the Registrant and the corresponding Similar Accounts, and the performance of securities purchased for the Registrant may vary from the performance of securities purchased for Similar Accounts.

Conflicts of interest may arise with both the aggregation and allocation of securities transactions and allocation of limited investment opportunities, as Lazard may be perceived as causing accounts it manages to participate in an offering to increase Lazard's overall allocation of securities in that offering, or to increase Lazard's ability to participate in future offerings by the same underwriter or issuer. Allocations of bunched trades, particularly trade orders that were only partially filled due to limited availability, and allocation of investment opportunities generally, could raise a potential conflict of interest, as Lazard may have an incentive to allocate securities that are expected to increase in value to preferred accounts. Initial public offerings, in particular, are frequently of very limited availability. A potential conflict of interest may be perceived to arise if transactions in one account closely follow related transactions in a different account, such as when a purchase increases the value of securities previously purchased by the other account, or when a sale in one account lowers the sale price received in a sale by a second account.

Portfolio managers may be perceived to have a conflict of interest because of the large number of Similar Accounts, in addition to the Registrant, that they are managing on behalf of Lazard. Although Lazard does not track each individual portfolio manager's time dedicated to each account, Lazard periodically reviews each portfolio manager's overall responsibilities to ensure that he or she is able to allocate the necessary time and resources to effectively manage the Registrant. As illustrated in the table below, most of the portfolio managers manage a significant number of Similar Accounts (10 or more) in addition to the Registrant.

Generally, Lazard and/or some or all of the Registrant's portfolio managers have investments in Similar Accounts. This could be viewed as creating a potential conflict of interest, since certain of the portfolio managers do not invest in the Registrant or may invest more significantly in a Similar Account.

The portfolio managers noted in footnote (#) to the table below manage Similar Accounts with respect to which the advisory fee is based on the performance of the account, which could give the portfolio managers and the Investment Manger an incentive to favor such Similar Accounts over the corresponding Portfolios.

The Registrant's portfolio managers may place transactions on behalf of Similar Accounts that are directly or indirectly contrary to investment decisions made for the Registrant, which could have the potential to adversely impact the Registrant, depending on market conditions. In addition, if the Registrant's investment in an issuer is at a different level of the issuer's capital structure than an investment in the issuer by Similar Accounts, in the event of credit deterioration of the issuer, there may be a conflict of interest between the Registrant's and such Similar Accounts' investments in the issuer. If Lazard sells securities short, including on behalf of a registered investment company, it may be seen as harmful to the performance of any Similar Accounts or other client accounts investing "long" in the same or similar securities whose market values fall as a result of short-selling activities.

Accounts Managed by the Portfolio Managers. The chart below includes information regarding the members of the portfolio management team responsible for managing the Registrant. Specifically, it shows the number of portfolios and assets managed by management teams of which each of the Registrant's portfolio managers is a member. Regardless of the number of accounts, the portfolio management team still manages each account based on a model portfolio as described above.

Portfolio Manager	Registered Investment Companies (\$*)#	Other Pooled Investment Vehicles (\$*)#	Other Accounts (\$*)#, +
Ardra Belitz	2 (29.6 million)	3 (447.9 million)	2 (136.6 million)
Michael G. Fry	10 (6.6 billion)	8 (1.9 billion)	163 (13.9 billion)
Ronald Temple	10 (9.5 billion)	14 (1.6 billion)	156 (6.1 billion)
James M. Donald	10 (14.6 billion)	18 (6.8 billion)	157 (13.8 billion)
Andrew D. Lacey	8 (9.5 billion)	10 (1.4 billion)	150 (6.0 billion)
Ganesh Ramachandran	2 (29.6 million)	3 (448 million)	2 (136.6 million)
Michael Powers	10 (6.6 billion)	8 (1.9 billion)	163 (13.9 billion)

* Total assets in accounts as of December 31, 2015.

The following portfolio managers manage accounts with respect to which the advisory fee is based on the performance of the account:

(1) Mr. Donald manages four other accounts and one registered investment company with assets under management of approximately \$2.5 billion and \$3.1 billion, respectively.

(2) Mr. Fry and Mr. Powers manage one registered investment company and one other account with assets under management of approximately \$3.1 billion and \$91.3 million, respectively.

(3) Mr. Lacey and Mr. Temple manage one registered investment company and one other account with assets under management of approximately \$8.0 billion and \$463.5 million, respectively.

(4) Ms. Belitz and Mr. Ramachandran manage two other pooled investment vehicles with assets under management of approximately \$445.6 million.

+ Includes an aggregation of any Similar Accounts within managed account programs where the third party program sponsor is responsible for applying specific client objectives, guidelines and limitations against the model portfolio managed by the portfolio management team.

Compensation for Portfolio Managers

Lazard's portfolio managers are generally responsible for managing multiple types of accounts that may, or may not, invest in securities in which the Registrant may invest or pursue a strategy similar to one of the Registrant's component strategies. Portfolio managers responsible for managing the Registrant may also manage sub-advised registered investment companies, collective investment trusts, unregistered funds and/or other pooled investment vehicles, separate accounts, separately managed account programs (often referred to as "wrap accounts") and model portfolios.

During the fiscal year covered by this Report on Form N-CSR, Lazard compensates portfolio managers by a competitive salary and bonus structure, which is determined both quantitatively and qualitatively. Salary and bonus are paid in cash, stock and restricted fund interests. Portfolio managers are compensated on the performance of the aggregate group of portfolios managed by the teams of which they are a member rather than for a specific fund or account. Various factors are considered in the determination of a portfolio manager's compensation. All of the

portfolios managed by a portfolio manager are comprehensively evaluated to determine his or her positive and consistent performance contribution over time. Further factors include the amount of assets in the portfolios as well as qualitative aspects that reinforce Lazard's investment philosophy.

Total compensation is generally not fixed, but rather is based on the following factors: (i) leadership, teamwork and commitment, (ii) maintenance of current knowledge and opinions on companies owned in the portfolio; (iii) generation and development of new investment ideas, including the quality of security analysis and identification of appreciation catalysts; (iv) ability and willingness to develop and share ideas on a team basis; and (v) the performance results of the portfolios managed by the investment teams of which the portfolio manager is a member.

Variable bonus is based on the portfolio manager's quantitative performance as measured by his or her ability to make investment decisions that contribute to the pre-tax absolute and relative returns of the accounts managed by the teams of which the portfolio manager is a member, by comparison of each account to a predetermined benchmark (as set forth in the prospectus or other governing document) over the current fiscal year and the longer-term performance (3-, 5- or 10-year, if applicable) of such account, as well as performance of the account relative to peers. The variable bonus for the Registrant's portfolio management team in respect of its management of the Registrant is determined by reference to the MSCI World[®] Index. The portfolio manager's bonus also can be influenced by subjective measurement of the manager's ability to help others make investment decisions. Portfolio managers managing accounts that pay performance fees may receive a portion of the performance fee as part of their compensation.

Ownership of Registrant Securities

As of December 31, 2015, the portfolio managers of the Registrant owned the following shares of Common Stock of the Registrant.

<u>Portfolio Manager</u>	<u>Market Value of Shares</u>
Ardra Belitz	None
James M. Donald	\$100,001-\$500,000
Andrew D. Lacey	\$100,001-\$500,000
Ganesh Ramachandran	\$10,001-\$50,000
Michael Powers	None
Michael G. Fry	None
Ronald Temple	\$50,001-\$100,000

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

Not applicable.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There were no material changes to the procedures by which shareholders may recommend nominees to the Registrant's Board during the period covered by this report. A description of these procedures can be found in the proxy statement for the Registrant's most recent shareholder meeting, which is available at www.sec.gov.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The Registrant's principal executive and principal financial officers have concluded, based on their evaluation of the Registrant's disclosure controls and procedures as of a date within 90 days of the filing date of this report, that the Registrant's disclosure controls and procedures are reasonably designed to ensure that information required to be disclosed by the Registrant on Form N-CSR is recorded, processed, summarized and reported within the required time periods and that information required to be disclosed by the Registrant in the reports that it files or submits on Form N-CSR is accumulated and communicated to the Registrant's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

(b) There were no changes to the Registrant's internal control over financial reporting that occurred during the second fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

(a)(1) Code of Ethics referred to in Item 2.
