NOTES TO SCHEDULES OF INVESTMENTS

**July 31, 2016 (unaudited)**

**Security Valuation**—The Funds value their investments in securities and other assets and liabilities carried at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Debt securities are valued on the basis of evaluated prices furnished by an independent pricing service approved by the Board of Trustees or provided by securities dealers. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date or (ii) quotations from bond dealers to determine current value and are categorized as Level 2 in the fair value hierarchy. Money market fund investments are valued at net asset value and are categorized as Level 1 in the fair value hierarchy. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of Van Eck Associates Corporation, (the “Adviser”). The Pricing Committee provides oversight of the Funds’ valuation policies and procedures, which are approved by the Funds’ Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of their investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

**Income Taxes**—As of July 31, 2016, for Federal income tax purposes, the identified cost of investments owned, net unrealized appreciation (depreciation), gross unrealized appreciation, and gross unrealized depreciation of investments were as follows:

Fund	Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
Intermediate	\$1,465,631,019	\$75,093,359	\$(467,220 )	\$74,626,139
Long	170,469,592	10,740,438	(10,947 )	10,729,491
Short	265,308,379	3,160,417	(164,270 )	2,996,147
CEF Municipal	105,151,790	8,022,653	(16,301 )	8,006,352
High-Yield	2,108,688,658	143,169,198	(29,974,488)	113,194,710
Pre-Refunded	19,379,817	269,005	—	269,005
Short High-Yield	123,484,864	3,291,510	(2,005,148 )	1,286,362

**Other**—High-Yield and Short High-Yield invest in Puerto Rico municipal securities that currently experience significant financial difficulties. As a result, certain securities issued by this municipality are currently considered below-investment-grade securities. A credit rating downgrade, default, insolvency or bankruptcy of one or several municipal security issuers of this territory, could affect the market values and marketability of municipal obligations of such territory held by the Funds. The market for these investments may be limited, which may make them difficult to buy or sell.

These Funds may continue to be affected by political, economic, regulatory and other developments within Puerto Rico and by the financial condition of Puerto Rico's political subdivisions, agencies, instrumentalities and public authorities. Events, including economic and political policy changes, tax base erosion, the territory's constitutional limits on tax increases, budget deficits and other financial difficulties and changes in the credit ratings assigned to Puerto Rico's municipal issuers, are likely to affect performance. The Puerto Rican economy is reliant on manufacturing, services and tourism, and its economy and financial operations parallel the economic cycles of the United States. Economic difficulties in the United States are likely to have an adverse impact on the overall economy of Puerto Rico. Municipal obligations issued by Puerto Rico are subject to heightened risks that may adversely affect the value of these Funds' portfolios and the repayment of such bonds may be subject to significant uncertainties. Moreover, like many other U.S. states and municipalities, Puerto Rico experienced a significant downturn during the recent recession. Puerto Rico continues to face significant fiscal challenges, including persistent government deficits, underfunded public pension benefit obligations, underfunded government retirement systems, sizable debt service obligations and a high unemployment rate. Many ratings organizations previously downgraded a number of securities issued in Puerto Rico or placed them on "negative watch." If the economic situation in Puerto Rico persists or worsens, the volatility, credit quality and performance of the Funds could be adversely affected. Puerto Rico's continued financial difficulties could reduce its ability to access financial markets, potentially increasing the likelihood of a restructuring or default for Puerto Rico municipal bonds that may affect the Funds' investments and its performance.

The Adviser continues to monitor the events in Puerto Rico surrounding the \$70 billion debt crisis. The U.S. Supreme Court heard oral arguments pertaining to the validity of the Puerto Rico Public Corporations Debt Enforcement and Recovery Act on March 22, 2016. The law, which was invalidated by the U.S. District Court, provides a legal framework to restructure the debt of Puerto Rico's public corporations outside of federal bankruptcy court. On June 13, 2016, the U.S. Supreme Court affirmed the U.S. District Court decision that invalidated the law.

On April 6, 2016, the Puerto Rico legislature passed the Puerto Rico Emergency Moratorium and Financial Rehabilitation Act. Governor Alejandro García Padilla signed the bill into law. Among other provisions, the legislation authorized the governor to suspend the payment of debt service on general obligation bonds and other constitutionally-protected debt on July 1, 2016, and other bonded debt service payments immediately upon the bill being signed into law. It also modified the process for the appointment of a receiver for the Government Development Bank.

On May 2, 2016, Puerto Rico defaulted on \$370 million in payments. The Funds did not have any material exposure to these payments. On June 30, 2016, one day before the Puerto Rican government said it would default on its \$2 billion debt payments, President Obama signed into law the Puerto Rico Oversight, Management and Economic Stability ACT (PROMESA), giving Puerto Rico a stay against creditor litigation that could have triggered cuts to public service. The legislation authorized a seven-member oversight board to oversee Puerto Rico's finances and to approve any court-supervised debt restructuring.

On July 1, 2016, Puerto Rico defaulted on about \$1 billion of principal and interest due to municipal bondholders. Consequently, the Funds were affected resulting in overall increase in securities in default of interest and/or principal obligations. The Funds were not materially impacted by these defaulted payments.
