VANECK VECTORS COUNTRY/REGIONAL ETFs

December 31, 2016 (unaudited)

Dear Shareholder:

2016 was certainly not short on news and surprises. Between Brexit and the U.S. election, it is easy to see how the rebound in the Russian stock market may have gone largely unnoticed. VanEck Vectors Russia ETF (NYSE Arca: RSX) returned 45.91%* in 2016, while VanEck Vectors Russia Small-Cap ETF (NYSE Arca: RSXJ) returned 101.07%,* making it one of the top performing non-leveraged/inverse equity ETFs in the United States.

We believe that the country's economic recovery has been strong for two important reasons. First, Russia has been a beneficiary of significantly improved commodity prices. At the end of 2015, we noted that our analyses suggested a bottom occurring in the commodities bear market during the first half of 2016, and more likely within the first quarter. On the evidence of the markets over the first half of 2016, it appears that we are in a normal cycle and that a bottom did, in fact, occur in the first quarter. Over the following three quarters, we saw signs of the continued rebalancing of supply and demand—particularly and importantly for Russia—for oil and gas, a process that proved positive for commodities.

While sanctions remain in place, conditions have now improved to the point that Standard & Poor's upgraded its outlook on Russian credit from negative to stable citing the easing of external risks.¹ According to the Brookings Institute, headline economic and financial trends and indicators are now picking up and Russia is now expected see positive growth in 2017–2018.

Second, as the portfolio managers of our actively managed emerging markets bond fund noted recently, the country's monetary policy set up has been, and remains, excellent. The central bank is focused on bringing inflation down while letting the currency float freely. The medium-term fiscal policy framework looks conservative and there is more evidence (for example in the latest purchasing managers' indices) that the growth outlook is gradually improving. Moreover, efforts of the central bank have been recognized by its peers: Elvira Nabiullina, the bank's head, was named the best Central Bank Governor in Europe in 2016 by the international financial magazine, *The Banker*.³

Perhaps emphasizing the continuing need for investors to take a long-term investment view, the stabilization of Russia's economy has been in the works for a while. After making five rate cuts to bring rates down from 17% to 11% in 2015, the country's central bank only reduced rates twice in 2016, from 11% to 10%⁴

Source: Bank of Russia. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. Past performance is no guarantee of future results.

Along with central banking policy Russia has also become more conservative with its fiscal budget. As recently as 2014, Russia's government had forecast oil at \$100/barrel for its 2015-2017 budget.⁵ This was obviously not the case as oil prices tumbled from above \$100 in 2014 to below \$40/barrel at the end of 2015 before rebounding to above \$50 at the end of 2016. In contrast, the revised budget for 2017 assumes a much more conservative \$40/barrel price for oil until 2019.⁶

1

VANECK VECTORS COUNTRY/REGIONAL ETFS

(unaudited) (continued)

In addition to these very encouraging developments, going forward the election results in the U.S. suggests an end to the escalation of sanctions. This would be a particularly good prospect for Russia, not least because it has simply paid down its debt and de-levered during the sanctions period.

VanEck Vectors continues to be an industry leader in offering single-country and region-specific equity ETFs. When performance varies so widely between countries and regions, it is all the more important to be able to select your focus. The suite of VanEck Vectors country and regional ETFs give you the flexibility to do just that. We at VanEck continue to look for ways to enhance your access to the markets you choose and to seek out and evaluate the most attractive opportunities for you as a shareholder in the international space.

Please stay in touch with us through our website (<https://www.vaneck.com>) on which we offer videos, email subscriptions, and educational literature, all of which are designed to keep you up to date with your investments in VanEck Vectors ETFs.

On the following pages, you will find the performance record of each of the funds for the 12 month period ending December 31, 2016. You will also find their financial statements. As always, we value your continued confidence in us and look forward to helping you meet your investment goals in the future.

*Jan F. van Eck
Trustee and President
VanEck Vectors ETF Trust*

Management Discussion (unaudited)

Half the funds in the suite of VanEck Vectors Country/Regional ETFs posted positive returns during the 12 month period ending December 31, 2016. Two of the suite's three top performing funds had a Russia focus: VanEck Vectors Russia Small-Cap ETF (NYSE Arca: RSXJ) (+101.07%*) and, investing in larger-cap Russian stocks, VanEck Vectors Russia ETF (NYSE Arca: RSX) (+45.91%*). The other top performer was the VanEck Vectors Brazil Small-Cap ETF (NYSE Arca: BRF) (+60.92%*).

The two bottom performing funds were VanEck Vectors Egypt Index ETF (NYSE Arca: EGPT) (-33.30%) and VanEck Vectors ChinaAMC SME-ChiNext ETF (NYSE Arca: CNXT) (-30.04%).

Source: VanEck. Returns based on each Fund's net asset value (NAV). The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Funds reflects temporary waivers of expenses and/or fees. Had the Funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

Country/Regional Overviews

Africa

As a result of the improvement in commodities prices over 2016, the materials sector was by far the greatest contributor to performance for the 12 month period. The consumer staples sector was the single largest detractor from performance. Mid-cap companies contributed the most to performance. Geographically Canadian and U.K. gold and copper mining companies, operating in South Africa, Egypt, Suriname, Burkina Faso, and Mali, were among the most significant contributors to positive performance. Financial companies in Egypt and Nigeria were among the most significant detractors from total returns. Additionally, the depreciation of the Egyptian pound against the U.S. dollar also had a negative impact on the Fund's performance.

Brazil

While 2016 may have been challenging for Brazil, for the VanEck Vectors Brazil Small-Cap ETF it was an excellent year, bringing with it a return of 60.92%, helped by a robust stock market and a Brazilian real that strengthened throughout most of the year. On the economic front, for the whole year the country remained in

3

VANECK VECTORS COUNTRY/REGIONAL ETFs

(unaudited) (continued)

one of the worst recessions it has ever experienced. Politically, too, despite some resolution mid-year, things remained somewhat unsettled. Having voted in May to suspend President Dilma Rousseff pending her trial and potential impeachment,¹ on August 31 in a 61-20 impeachment vote, the Senate removed her from office.² Michel Temer, the conservative former vice president who had run Brazil since her suspension in May, was sworn in³ and proceeded to spend the rest of the year trying to put the country's finances back on a more even keel. By late December, the country's current account deficit had narrowed down to 1.1% of gross domestic product (GDP) and mid-month inflation had surprised on the downside once again.

Perhaps anticipating a brighter future for the country, Brazilian small-cap companies, having hit a low point in mid-January rose steeply, if haltingly, through most of the rest of the year. However, as with stocks in a number of other emerging markets countries, Brazilian small-cap companies suffered quite a sizeable hit immediately following the victory of Donald Trump in the U.S. general election. They recovered little thereafter through what was left of the year. The consumer discretionary, healthcare, materials, and utilities sectors all delivered healthy performance. Only one sector, telecommunication services, detracted from performance, but only minimally.

China

The volatility that roiled Chinese markets in the first half of 2016 proved to be insurmountable, despite the stabilization seen in the second half of the year, resulting in double digit declines for the 12 month period in both VanEck Vectors China-focused ETFs. There were some bright spots seen in the second half of 2016. Manufacturing companies in China reported the strongest upturn in operational conditions since January 2013 as production expanded at its fastest pace in nearly six years.⁴ In addition to the positive manufacturing data, the yuan was officially added by the International Monetary Fund (IMF) as a reserve currency. This marked the first time that a new currency has been added by the IMF since the euro in 1999.

Earlier in the year, VanEck Vectors ChinaAMC CSI 300 ETF achieved some of its exposure through swap contracts, though none of these remained outstanding at December 31, 2016 and all of its exposure is now achieved through direct investment in A-share constituents of the CSI 300 Index.[†] Only two sectors, consumer staples and telecommunication services, contributed positively to performance during the period under review. All other sectors detracted from performance with the financial and industrial sectors the worst detractors.

VanEck Vectors ChinaAMC SME-ChiNext ETF seeks to provide not only exposure primarily to China's market for innovative, non-government owned companies, but also to the sectors that are increasingly underpinning the growth of China's "New Economy". It is not surprising that under the market conditions experienced in 2016, the vast majority of the Fund's losses during the 12 month period came from companies in the information technology sector, followed by

those in the consumer discretionary and industrial sectors.

Egypt

2016 was not an easy year for Egypt's economy. As the year wore on and the country continued to suffer from a debilitating U.S. dollar shortage—foreign currency that is vital for paying for imported raw materials—President Abdel Fattah El-Sisi found himself obliged to act. At the beginning of November, in an attempt to attract capital and shut down the black market for U.S. dollars, Egypt's central bank abandoned the Egyptian pound's peg of 8.8 to the U.S. dollar.⁵ Perhaps the most important effect of the move, though, was to enable Egypt to secure a \$12 billion loan from the IMF. Soon thereafter, it received its first tranche of \$2.75 billion. This will go towards restoring the country's foreign exchange reserves and helping to narrow its wide fiscal gap.⁶ By December, however, the currency had depreciated to 17.8 against the U.S. dollar⁷ and the country's non-oil business activity had fallen to a 40 month low⁸

While both the materials and telecommunication services sectors contributed positively to total returns, their contributions were overshadowed by the negative performances of the real estate and consumer staples sectors, the two greatest detractors. Small-cap companies, with the largest average weighting during the period under review, detracted the most from performance. Large-cap companies with a smaller average weighting detracted the least. Additionally, the depreciation of the Egyptian pound against the U.S. dollar coupled with Egyptian capital controls that impaired the Fund's ability to repatriate its Egyptian pounds had a material negative impact on the Fund's performance.

India

If there were any doubts earlier in the year at the Bureau of Economic and Business Affairs of the U.S. State Department⁹ about the speed with which Prime Minister Narendra Modi's government had been matching economic reforms with rhetoric, later in the year, the revolutionary nature of at least one of these reforms remained in no doubt. Mr. Modi provided ample proof of this when he abruptly announced on the evening of November 8 that, from the following morning, the country's largest denomination currency bills (1,000 rupee and 500 rupee, reportedly some 86% of all currency in circulation¹⁰), were banned.¹¹ Explained at the time by the government variously as a way to stem the flow of counterfeit money and to obstruct terrorist funding, it is also being seen not only as a way of tackling both bribery and tax avoidance, but also as a radical move towards demonetization in the country. It remains to be seen whether the short-term pain it is still inflicting will turn into a long-term gain for both the government and the country. The immediate effect, though, was for the Bombay Stock Market to fall 6.6%, between the evening of November 8 and November 21, a loss that it failed to make up fully by the end of the year. However, by the end of the year, for the first time in 150 years, India's GDP exceeded that of the U.K., its former ruler!²

For the 12 months under review, the Fund recorded a loss of 4.70%. While the financial sector provided a creditable positive return, this was more than offset by the negative performances of eight other sectors, in particular the industrial, information technology, and healthcare sectors.

Indonesia

Following a disappointing first quarter, on the back of a central bank interest rate cut, the country's stock exchange had a much stronger second quarter.¹³ In the third quarter, Indonesian equities rose 9%.¹⁴ Although the country's economy slowed slightly over the same period as a result of both deteriorating investment and slack export demand, in a good sign, private consumption remained healthy.¹⁵ In July, Sri Mulyani Indrawati, bringing her reputation as a determined reformer, was appointed finance minister.¹⁶ In October, the House of Representatives approved the 2017 State Budget, setting what is considered to be a realistic economic growth target of 5.1% year-on-year.¹⁷ In its October economic quarterly report, the World Bank forecast growth for the country's economy in 2017 of 5.3% year-on-year!⁸ Further good news came at the end of December when Fitch Ratings revised Indonesia's credit rating outlook to positive and praised Indonesian policy makers for "strong structural reform!⁹

As with many emerging markets economies, Indonesian companies took a hit following the November election of Donald Trump as the 45th U.S. president, but still ended the year returning a commendable 17.49%. All sectors, apart from materials and real estate, contributed positively to performance, with consumer staples, followed by financial and energy stocks, contributing the most. The materials sector detracted the most from performance.

Israel

While the first quarter of 2016 may have been a slow one²⁰ for Israel, according to the country's Central Bureau of Statistics, economic growth in the second quarter, driven primarily by private consumption (accompanied by strong private and state spending, investments, and exports²¹), exceeded expectations.²² On the back of moderating consumer spending and falling exports, third quarter growth may have slowed, but it still came in at an annualized rate of 3.2%.²³ Leaving its benchmark interest rate at 0.10% unchanged (since February 2015) at the end of the year, the Bank of Israel said that "based on surveys the business sector is seen growing at a similar pace in the fourth quarter as in previous quarters."²⁴ In addition, "staff revised upward their 2016 growth forecast to 3.5 percent from a previous forecast of 2.8 due to an upward revision of first half data."²⁵

Over the period under review, the performances of all sectors, whether positive or negative, were overshadowed by the negative returns of the healthcare sector, which detracted from performance the most of any sector. The greatest positive performance came from companies in information technology, financial, and real estate sectors. Both mid- and small-cap companies contributed positively to the Fund, with Fund's losses coming from large-cap companies.

VANECK VECTORS COUNTRY/REGIONAL ETFs

(unaudited) (continued)

Poland

By end of the first quarter, as a result of weakness in the external sector, tepid public spending, and a collapse in fixed investment due to reduced European Union (EU) funds, the pace of economic growth in Poland had decelerated significantly to its slowest in two years.²⁶ In the second quarter, investment in Poland experienced its biggest contraction in four years.²⁷ In the third quarter, the country's economic growth had, in annual terms, slowed to 2.5%, down from 3.1% in the second quarter, because of a continuing slump in the construction sector. This was its slowest growth rate in three years.²⁸ As earlier in the year, an uncertain political situation, reduced EU aid, and lower levels of investment were all seen as behind the slowdown.²⁹ Even as the year came to the close, a political stand-off between the country's right wing government and the opposition over proposed restrictions on media access to the country's parliament continued,³⁰ and no one knew whether the 2017 budget (voted on by government MPs in a room away from the parliament's chamber) had actually been passed.³¹

For the 12 months under review, the Fund recorded a small gain of 3.60%. All sectors except three contributed positively to performance. The materials and energy sectors were the greatest contributors to performance. The two greatest detractors from performance were the utilities and financial sectors. Small-cap companies contributed most to performance.

Russia

The first six months of 2016 were difficult for Russia. In the first quarter, the economy contracted 1.2% year-on-year, but this was less than was expected.³² In June, stating steady inflation as a reason, the Bank of Russia lowered its key interest rate by 50 bps to 10.5%.³³ By June 30, 2016, the stock market had risen 9.02% in local currency (ruble) terms since the beginning of the year, and 24.78% in U.S. dollar terms.

In the second half of the year, the country continued to benefit from improving commodity prices, not least those for crude oil. While the country remains in recession, the view is that it seems to have turned the corner, with growth expected to be positive in 2017-2018.³⁴ As the Brookings Institution explains, "One key reason is that over the last two years, the government's policy response package of a flexible exchange rate policy, expenditure cuts in real terms, and bank recapitalization—along with tapping the Reserve Fund—has helped buffer the economy against multiple shocks. Also, after a prolonged economic decline, headline economic and financial trends and indicators are now picking up."³⁵ In mid-December, Russia reported industrial output was well above expectations in November (2.7% year-on-year)—recovering to the pre-sanctions levels and signaling that the current orthodox policy framework brings results.³⁶

Both VanEck Vectors Russia Small-Cap ETF and its peer investing in larger cap Russian stocks, VanEck Vectors Russia ETF, recorded excellent positive returns of 101.07%* and 45.91%,* respectively, for the 12 month period. Energy, followed by the materials and financial sectors, were the three most significant contributors to positive performance in the large-cap fund. Only the healthcare sector detracted from performance. For the small-cap fund, companies in the utilities sector performed particularly well. Similarly sized companies in the materials and industrials sectors also performed well. The three sectors detracting from performance were information technology, consumer discretionary, and healthcare.

Vietnam

Following a sluggish first quarter in 2016 when economic growth slowed to 5.48%, expansion in the second quarter was similarly lackluster, with the economy growing by only 5.78%.³⁷ In the third quarter, however, economic growth accelerated significantly, with gross domestic product rising by 6.4% during the quarter from a year earlier. While below the 6.87% recorded in the same period in 2015, it was still the fastest pace since the last quarter of 2015.³⁸ In addition to a slight recovery in agriculture following a crippling drought and a chemical leak (cyanide, phenol, and ferrous hydroxide) that killed tons of fish along 200 miles of coastline in April,³⁹ the country's economy benefited from both stronger credit demand and a rise in exports and foreign direct investment.⁴⁰ A particularly bright spot was manufacturing, which saw 11% growth in January to September from a year earlier.⁴¹ Electronics also did well, with exports increasing by 29%.⁴² Figures released by the government's central statistical office at the end of December indicated that annual GDP growth for the year was estimated at 6.21%.⁴³ While this figure was slightly down on 2015's 6.68%, and below the government's target of 6.7%, the country's economy remains one of the fastest growing in Asia.⁴⁴

The Fund ended the 12 month period down 9.78%. Mid-cap companies performed positively over the reporting period. While large-cap companies detracted from performance, small-cap companies, with an average weighting of approximately 61%, were by far the greatest detractors from performance. The materials sector was the largest positive contributor to total returns. The consumer discretionary and financial sectors detracted the most from performance.

* Returns based on the fund's net asset value (NAV). Investors should be aware that recent market conditions resulting in high performance for this region may not continue.

Index data prior to June 21, 2013 reflects that of the Dow Jones Africa Titans 50 IndexSM. From June 21, 2013, forward, the index data reflects that of the MVISTM GDP Africa Index (MVAFKTR). All Index history reflects a blend of the performance of the aforementioned Indexes.

¹ MVISTM GDP Africa Index (MVAFKTR) tracks the performance of the largest and most liquid companies in Africa. The weighting of a country in the index is determined by the size of its gross domestic product.

**Hypothetical Growth of
\$10,000 (Since
Inception)**

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV and at Share Price over the past 10 fiscal year periods or since inception (for funds lacking 10-year records). The result is compared with the Fund's benchmark.

Past performance is no guarantee of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption or sale of fund shares.

See "About Fund Performance" on page 21 for more information.

VANECK VECTORS ETF TRUST

ABOUT FUND PERFORMANCE

(unaudited)

The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for each Fund reflects temporary waivers of expenses and/or fees. Had each Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell fund shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

The Africa Index, Brazil Small-Cap Index, Egypt Index, India Small-Cap Index, Indonesia Index, Poland Index, Russia Index, Russia Small-Cap Index, and Vietnam Index are published by MV Index Solutions GmbH (MVIS),

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

which is a wholly owned subsidiary of the Adviser, Van Eck Associates Corporation. The CSI 300 Index is published by China Securities Index Co., Ltd. and the SME-ChiNext Index is published by the Shenzhen Securities Information Co., Ltd, which is a subsidiary of the Shenzhen Stock Exchange. The Israel Index is published by BlueStar Global Investors, LLC (BlueStar).

BlueStar, CSI 300 Index, MVIS, and SME-ChiNext Index are “Index Providers.” The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

Premium/discount information regarding how often the closing trading price of the Shares of each Fund were above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund for each of the four previous calendar quarters and the immediately preceding five years (if applicable) can be found at www.vaneck.com.

VANECK VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2016 to December 31, 2016.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

* Expenses are equal to the Fund's annualized expense ratio (for the six months ended December 31, 2016), multiplied by the average account value over the period, multiplied by the number of days in the most recent fiscal

half year divided by the number of days in the fiscal year (to reflect the one-half year period).

** Assumes annual return of 5% before expenses

† Security fully or partially on loan. Total market value of securities on loan is \$2,853,962.

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$44,809,505 which represents 67.6% of net assets.

§ Illiquid Security — the aggregate value of illiquid securities is \$0 which represents 0.0% of net assets.

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

Total	\$21,331,339	\$47,834,396	\$ 0	\$69,165,735

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$5,844,274 and transfers from Level 2 to Level 1 were \$4,615,209. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2016:

	Common Stocks	
	South Africa	United Kingdom
Balance as of December 31, 2015	\$213	\$1,420
Realized gain (loss)	—	(1,236,572)
Net change in unrealized appreciation (depreciation)	(213)	1,235,152

*See Schedule of Investments for security type and industry sector breakouts.

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$6,580,440. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$3,400,177 and transfers from Level 2 to Level 1 were \$166,380. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$25,554,165 which represents 62.3% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

144A Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$1,914,793, or 4.7% of net assets.

Telecommunication Services	1,697,905	4,708,285	—	6,406,190
Money Market Fund	152,100	—	—	152,100
Total	\$15,406,708	\$25,554,165	\$ —	\$40,960,873

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$5,972,833 and transfers from Level 2 to Level 1 were \$6,241,572. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$4,024,302 and transfers from Level 2 to Level 1 were \$1,406,438. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the year ended December 31, 2016:

	Common Stocks	
	Consumer	
	Services	Materials
Balance as of December 31, 2015	\$44,148	\$—
Realized gain (loss)	—	—
Net change in unrealized appreciation (depreciation)	(22,631)	(550)
Purchases	—	43,960
Sales	—	—
Transfers in and/or out of level 3	—	—
Balance as of December 31, 2016	\$21,517	\$43,410

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$379,194 and transfers from Level 2 to Level 1 were \$791,326. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$6,555,732. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Portfolio turnover rate (b)	47	%	67	%	67	%	48	%	54	%

(a) Total return is calculated assuming an initial investment made at the net asset value at the beginning of the year, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the year. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.

(b) Portfolio turnover rates exclude securities received or delivered as a result of processing in-kind capital share transactions.

(c) Effective May 1, 2016, the Fund excludes depositary receipt fees in excess of 0.08% of average daily net assets (See Note 3).

On July 1, 2013, the Fund effected a 1 for 3 reverse share split as described in the Notes to Financial Statements (See Note 10). Per share data has been adjusted to give effect to the share split.

See Notes to Financial Statements

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

December 31, 2016

Note 1—Fund Organization—VanEck Vectors ETF Trust (the “Trust”) (formerly known as Market Vectors ETF Trust) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of December 31, 2016, offers fifty-eight investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF (formerly ChinaAMC A-Share ETF**), ChinaAMC SME-ChiNext ETF, Egypt Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF and Vietnam ETF (each a “Fund” and, together, the “Funds”). China Asset Management (Hong Kong) Limited (the “Sub-Adviser”) is the sub-adviser to ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF. ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF seek to achieve their investment objective by primarily investing directly in A-shares through the Hong Kong-Shanghai Stock Connect program and via the A-share quota granted to the Sub-Adviser. India Small-Cap Index ETF makes its investments through the India Small-Cap Mauritius Fund (the “Subsidiary”), a wholly owned subsidiary organized in the Republic of Mauritius. Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by the China Securities Index Co. Ltd., BlueStar Global Investors LLC or MV Index Solutions GmbH (formerly Market Vectors Index Solutions GmbH), a wholly owned subsidiary of Van Eck Associates Corporation (the “Adviser”).

The Funds’ commencement of operations dates and their respective indices are presented below:

<u>Fund</u>	<u>Commencement of Operations</u>	<u>Index</u>

** Effective May 1, 2016, ChinaAMC A-Share ETF changed its name to ChinaAMC CSI 300 ETF.

Note 2—Significant Accounting Policies—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification (“ASC”) 946 Financial Services—Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

Security Valuation—The Funds value their investments in securities and other assets and liabilities at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Short-term obligations with more than sixty days remaining to maturity are valued at market value. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. Securities for which quotations are not available are stated at fair value as determined by the Pricing Committee of the Adviser. The Pricing Committee provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments for which market prices are not readily available. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of their investments on a recurring basis, which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1 — Quoted prices in active markets for identical securities.

Level 2 — Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 — Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds' investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and

that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

B. Basis for Consolidation—The Subsidiary, an Indian exempted company, was incorporated on February 25, 2010 and acts as an investment vehicle for the India Small-Cap Index ETF (the “SCIF”) in order to effect certain investments on behalf of the SCIF. The SCIF is the sole shareholder of the Subsidiary, and it is intended that the SCIF will remain the sole shareholder and will continue to control the Subsidiary. The consolidated financial statements of the SCIF include the financial results of its wholly owned subsidiary. All material interfund account balances and transactions have been eliminated in consolidation.

C. Federal Income Taxes—It is each Fund’s policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

78

D. Dividends and Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.

E. Currency Translation—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.

F. Restricted Securities—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.

G. Repurchase Agreements—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of December 31, 2016 are reflected in the Schedules of Investments.

H. Use of Derivative Instruments—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. GAAP requires enhanced disclosures about the Funds' derivative instruments and hedging activities. Details of this

disclosure are found below.

Swap Agreements—The Funds may enter into swap transactions to gain investment exposure for total return or for hedging purposes. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net payment to be received by the Funds and/or the termination value at the end of the contract. Therefore, the Funds consider the creditworthiness of each counterparty to a contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying reference asset or index. Entering into these agreements involves, to varying degrees, market risk,

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

liquidity risk and elements of credit, legal and documentation risk in excess of amounts recognized in the Statements of Assets and Liabilities. The Funds may pay or receive cash as collateral on these contracts which may be recorded as an asset and/or liability. The Funds must set aside liquid assets, or engage in other appropriate measures, to cover their obligations under these contracts. Swap contracts are marked to market daily and the change in value, if any, is recorded as unrealized appreciation or depreciation. Upfront payments, if any, made and/or received by the Funds are recorded as an asset and/or liability and realized gains or losses are recognized over the contract's term/event. Periodic payments received or made on swap contracts are recorded as realized gains or losses. Gains or losses are realized upon termination of a swap contract and are recorded in the Statements of Operations. The Funds, other than ChinaAMC CSI 300 ETF, held no swap contracts during the year ended December 31, 2016. ChinaAMC CSI 300 ETF invested in the following type of swap during the year ended December 31, 2016:

A total return swap is an agreement that gives a Fund the right to receive the appreciation in the value of a specified security index or other instrument in return for a fee paid to the counterparty, which will typically be an agreed upon interest rate. If the underlying asset declines in value over the term of the swap, the Fund may also be required to pay the dollar value of that decline to the counterparty. During the year ended December 31, 2016, the average daily notional amount of the total return swap contracts held by ChinaAMC CSI 300 ETF was \$2,155,028. The Fund held no total return swap contracts at December 31, 2016.

For ChinaAMC CSI 300 ETF, the impact of transactions in derivative instruments during the year ended December 31, 2016, was as follows:

	Equity Risk
Realized gain (loss):	
Swap contracts ¹	\$(356,054)
Net change in unrealized appreciation (depreciation):	
Swap contracts ²	(95,211)

¹Statements of Operations location: Net realized gain (loss) on swap contracts

²Statements of Operations location: Net change in unrealized appreciation (depreciation) on swap contracts

Offsetting Assets and Liabilities—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes, the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at December 31, 2016 is presented in the Schedules of Investments. Refer to related disclosure in Note 2G (Repurchase Agreements) and Note 9 (Securities Lending).

Other—Security transactions are accounted for on trade date. Transactions in certain securities may take longer than the customary settlement cycle to be completed. The counterparty is required to collateralize such trades with cash in excess of the market value of the transaction, which is held at the custodian and marked to market daily. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

Note 3—Investment Management and Other Agreements—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets. The Adviser has agreed, until at least May 1, 2017, to voluntarily waive management fees and assume expenses to prevent each Fund's total annual operating expenses (excluding acquired fund fees and expenses, interest expense, offering costs, trading expenses, taxes and extraordinary expenses; and for

Russia ETF and Russia Small-Cap ETF, depositary receipt fees up to 0.10% and 0.08% of average daily net assets, respectively) from exceeding the expense limitations listed in the table below.

The current management fee rates/expense limitations and the amounts waived/assumed by the Adviser for the year ended December 31, 2016, are as follows:

Fund	Expense Limitation	Waiver of Management Fees	Expenses Assumed by the Adviser
Africa Index ETF	0.78 %	\$26,955	\$ —
Brazil Small-Cap ETF	0.59	77,846	—
ChinaAMC CSI 300 ETF*	0.72	258,282	—
ChinaAMC SME-ChiNext ETF*	0.78	122,757	—

India Small-Cap Index ETF	0.85	—	—
Indonesia Index ETF	0.57	109,340	—
Israel ETF	0.59	132,673	—
Poland ETF	0.60	69,859	28,072
Russia ETF	0.62	2,547,000	—
Russia Small-Cap ETF	0.67	63,067	—
Vietnam ETF	0.76	—	—

*The Adviser paid sub-advisory fees directly to the Sub-Adviser.

During the year ended December 31, 2016, the Adviser purchased and sold shares of Egypt Index ETF. These purchases and sales aggregated \$3,840,764 and \$2,377,528, respectively.

In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' distributor ("the Distributor"). Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

Note 4—Investments—For the year ended December 31, 2016, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Cost of Investments	Proceeds from

*Includes short-term capital gains

Qualified late year losses incurred after October 31, 2016, and within the taxable year, are deemed to arise on the first day of the Funds' next taxable year. For the year ended December 31, 2016, the Funds' intend to defer to January 1, 2017 for federal tax purposes qualified late-year losses as follows:

Fund	Late-Year Ordinary Losses	Post-October Capital Losses
Africa Index ETF	\$376,256	\$ —
ChinaAMC CSI 300 ETF	46,852	—
ChinaAMC SME-ChiNext ETF	1,902	—
Egypt Index ETF	1,993,843	—
India Small-Cap Index ETF	723,328	—
Vietnam ETF	352,196	—

At December 31, 2016, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Fund	Post-Effective- No Expiration Short-Term Capital Losses	Post-Effective- No Expiration Long-Term Capital Losses	Amount Expiring in the Year Ended December 31,	
			2018	2017
Africa Index ETF	\$9,465,262	\$45,726,686	\$1,095,985	\$951,177
Brazil Small-Cap ETF	27,517,893	152,760,433	—	—
ChinaAMC CSI 300 ETF	1,625,261	—	—	—
ChinaAMC SME-ChiNext ETF	6,389,337	1,179,822	—	—
Egypt Index ETF	11,833,036	16,194,085	128,400	—
India Small-Cap Index EF	34,949,461	2,018,000	—	—
Indonesia Index ETF	36,729,289	60,740,613	2,845,870	—
Israel ETF	875,735	2,386,023	—	—

Russia ETF	229,409,942	997,307,007	121,306,708	349,754,000
Russia Small-Cap ETF	5,048,850	2,925,476	—	—
Vietnam ETF	62,814,041	171,290,225	1,860,199	—

During the year ended December 31, 2016, the following Funds had a portion of their accumulated capital loss carryforwards expire: \$163,267 from Africa Index ETF and \$19,808,213 from Russia ETF.

During the year ended December 31, 2016, the following Funds utilized a portion of their accumulated capital loss carryforwards: \$8,799,592 from India Small-Cap Index ETF and \$10,089,752 from Russia Small-Cap ETF.

During the year ended December 31, 2016, as a result of permanent book to tax differences, primarily due to investments in Passive Foreign Investment Companies, foreign currency gains and losses, net operating losses, expiration of capital loss carryforwards and tax treatment of in-kind redemptions, the Funds incurred differences that affected undistributed (accumulated) net investment income (loss), accumulated net realized gain (loss) on investments and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

Fund	Increase (Decrease) in Accumulated Net Investment Income/Loss	Increase (Decrease) in Accumulated Net Realized Gain/Loss	Increase (Decrease) in Aggregate Paid in Capital
Africa Index ETF	\$(623,129)	\$(145,830)	\$768,959
Brazil Small-Cap ETF	525,048	(741,449)	216,401
ChinaAMC CSI 300 ETF	(549,044)	549,043	1
ChinaAMC SME-ChiNext ETF	90,289	145,489	(235,778)
Egypt Index ETF	(1,530,021)	2,296,359	(766,338)

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements. The Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2016, the Funds did not incur any interest or penalties.

Uncertainties in the Chinese tax rules governing taxation of income and gains from investments in A-Shares could result in unexpected tax liabilities for the ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF. China generally imposes withholding income tax (“WHT”) at a rate of 10% on dividends and interest (excluding government bond interest) derived by non-PRC resident enterprises (including a Qualified Foreign Institutional Investor (“QFII”) and a Renminbi Qualified Foreign Institutional Investor (“RQFII”)) from issuers resident in China. China also imposes WHT at a rate of 10% on capital gains derived by non-PRC resident enterprises from the disposal in shares of PRC enterprises. Effective November 17, 2014, investments through the Hong Kong-Shanghai Stock Connect program, QFIIs and RQFIIs, which includes these Funds, are exempted temporarily from WHT with respect to gains derived from the trading of equity investments (including A-shares).

The Finance Act, 2012 introduced a general anti-avoidance rule (“GAAR”), which is slated to be effective from April 1, 2017. GAAR is applicable where the main purpose of an arrangement is tax avoidance and empowers Indian tax authorities to declare such an arrangement as an impermissible avoidance arrangement.

Additionally, on May 10, 2016, the Governments of India and Mauritius signed the Protocol for amending the tax treaty between India and Mauritius. The renegotiation of the Treaty clarifies the applicability of GAAR to a Mauritius subsidiary deemed a tax resident of Mauritius. As per the Protocol, India shall have the right to tax capital gains arising from disposition of shares acquired on or after April 1, 2017 in a company resident in India, with shares acquired on or before March 31, 2017 being grandfathered as exempt from capital gains taxation. The Protocol could reduce the return to the Fund on its investments made after April 1, 2017 and the return received by Fund shareholders.

Note 6—Capital Share Transactions—As of December 31, 2016, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Shares are issued and redeemed by the Funds only in Creation Units, consisting of 50,000 shares, or multiples thereof. The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index plus a small amount of cash. For the year ended December 31, 2016, the Funds had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
Africa Index ETF	\$7,261,861	\$6,995,628
Brazil Small-Cap ETF	97,139	1,784,892
Egypt Index ETF	13,409,424	4,073,596
India Small-Cap Index ETF	332,738	31,438
Indonesia Index ETF	25,565,074	40,974,371
Israel ETF	—	6,674,851
Poland ETF	606,683	2,740,873
Russia ETF	821,802,899	648,956,238
Russia Small-Cap ETF	11,062,128	1,616,336
Vietnam ETF	1,344,752	9,779,377

84

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund's daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect shareholder transactions including any cash component of the transactions.

Note 7—Concentration of Risk—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund's investment objective by investing in a portfolio of securities that generally replicates the Funds' index. Each of the Funds (except Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF) is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers. In addition, for Egypt Index ETF and Africa Index ETF there may be limitations or delays in the convertibility or repatriation of certain African currencies, which would adversely affect the U.S. dollar value and/or liquidity of the Fund's investments denominated in such African currencies, may impair the Fund's ability to achieve its investment objective and/or may impede the Fund's ability to satisfy redemption requests in timely manner.

During the year, Egypt and Nigeria, which have been economically unstable, experienced currency liquidity issues following a fall in global oil prices that ultimately led to a considerable decrease in both country's foreign currency reserves. As a result, certain foreign exchange transactions repatriating Nigerian naira (“NGN”) and Egyptian Pound (“EGP”) back to US dollars (“USD”) were delayed as sub-custodian banks were not receiving execution allocations in either the Central Bank of Egypt (“CBE”) or the Central Bank of Nigeria (“CBN”) currency auctions.

In November 2016, the International Monetary Fund approved a \$12 billion loan to help Egypt restore macroeconomic stability and promote inclusive growth. In addition, Egypt introduced a series of economic reforms, including, among others, widening of the tax base, increasing energy subsidiaries, and allowing the EGP to float. These measures resulted in a currency devaluation which adversely impacted the Funds that held securities denominated in EGP and EGP currency. While these measures were intended to foster Egypt's economic growth and development, there is no guarantee that they will be successful. Egypt Index ETF and Africa Index ETF did not have any pending EGP transactions for repatriation to USD at December 31, 2016. However, Africa Index ETF had approximately, \$5,369,855 worth of NGN awaiting repatriation to USD at December 31, 2016.

As a result of events involving Ukraine and the Russian Federation, the United States and the European Union (“EU”) have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be imposed that may adversely affect the value and liquidity of the Russian-related issuers’ held by Russia ETF and Russia Small-Cap ETF.

Further, the United Kingdom recently decided to leave the EU, creating economic and political uncertainty in its wake. Significant uncertainty exists regarding the timing of the United Kingdom’s withdrawal from the EU and the effects that such withdrawal will have on the Euro, European economies and the global markets. This may further impact the value of the Euro and the British pound sterling, and has caused volatility and uncertainty in European and global markets.

Should the Chinese government impose restrictions on the ability of ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF to repatriate funds associated with direct investment in A-Shares, the Funds may be unable to satisfy distribution requirements applicable to regulated investment companies (“RICs”) under the Internal Revenue Code of 1986, as amended, and the Funds may therefore be subject to Fund-level U.S. federal taxes.

At December 31, 2016, the Adviser owned approximately 4.3% of ChinaAMC CSI 300 ETF and 12.5% of ChinaAMC SME-ChiNext ETF.

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(continued)

Note 8—Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the “Plan”) for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

Note 9—Securities Lending—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds’ behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at December 31, 2016 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

The following table presents repurchase agreements held as collateral by type of security on loan pledged as of December 31, 2016:

Gross Amount of Recognized
Liabilities for Securities
Loaned in the Statements

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

Fund	of Assets and Liabilities* Equity Securities
Africa Index ETF	\$ 3,024,891
Brazil Small-Cap ETF	78,176
Indonesia Index ETF	140,200
Israel ETF	2,264,420
Poland ETF	1,917,810
Vietnam ETF	493,872

*Remaining contractual maturity of the agreements: overnight and continuous

Note 10—Share Split—On July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Russia Small-Cap ETF, and 1 for 4 reverse share splits for Egypt Index ETF and India Small-Cap Index ETF. Fund shares began trading on the split adjusted NAV on July 1, 2013. The Financial Highlights prior to July 1, 2013 for the Funds have been adjusted to reflect these reverse share splits.

Note 11—Bank Line of Credit—The Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2016, the following Funds borrowed under this Facility:

Fund	Days Outstanding	Average Daily Loan Balance	Average Interest Rate	Outstanding Loan Balance as of December 31, 2016
Africa Index ETF	300	\$804,529	1.80 %	\$5,037,733
Brazil Small-Cap ETF	294	478,401	1.78	—
ChinaAMC CSI 300 ETF	178	762,849	1.81	532,463
ChinaAMC SME-ChiNext ETF	256	821,367	1.79	243,518
Egypt Index ETF	173	2,270,982	1.79	—
India Small-Cap Index ETF	185	1,173,596	1.80	—
Indonesia Index ETF	245	452,897	1.78	—
Israel ETF	265	276,632	1.79	—
Poland ETF	27	73,987	1.80	—
Russia ETF	263	7,747,596	1.79	6,692,463
Russia Small-Cap ETF	165	396,667	1.80	249,298
Vietnam ETF	350	6,535,163	1.80	4,326,022

Note 12—Custodian Fees—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the year ended December 31, 2016, there were offsets to custodian fees and these amounts are reflected in custody expense in the Statement of Operations.

Note 13—Recent Accounting Pronouncements and Regulatory Requirements—The Funds adopted Accounting Standards Update No. 2014-15 (“ASU 2014-15”), *Disclosure of Uncertainties about an Entity’s Ability to Continue as a Going Concern*, which requires management to assess the Funds’ ability to continue as a going concern and to provide related disclosures in certain circumstances. Under the new standard, disclosures are required when conditions give rise to substantial doubt about a company’s ability to continue as a going concern within one year from the financial statement issuance date. Based on management’s evaluation, there are no conditions or events that could adversely affect the Funds’ ability to meet their obligations within one year after the date the financial statements are issued. Accordingly, no disclosures are required specific to going concern uncertainties in the Funds’ financial statements.

In October 2016, the Securities and Exchange Commission (the “SEC”) released its Final Rule on Investment Company Reporting Modernization (the “Rule”). The Rule, which introduces two new regulatory reporting forms for investment companies—Form N-PORT and Form N-CEN—also contains amendments to Regulation S-X which impact financial statement presentation, particularly the presentation of derivative investments. Although still evaluating the impact of the Rule, management believes that many of the Regulation S-X amendments are consistent with the Portfolios’ current financial statement presentation and expects that the Funds will be able to comply with the Rule’s Regulation S-X amendments by the August 1, 2017 compliance date.

Note 14—Subsequent Event Review—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

VANECK VECTORS ETF TRUST

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders of VanEck Vectors ETF Trust

We have audited the accompanying statements of assets and liabilities (consolidated as it relates to India Small-Cap Index ETF), including the schedules of investments (consolidated as it relates to India Small-Cap Index ETF), of Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF, ChinaAMC SME-ChiNext ETF, Egypt Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF, and Vietnam ETF (twelve of the series constituting VanEck Vectors ETF Trust) (the “Funds”) as of December 31, 2016, and the related statements of operations (consolidated as it relates to India Small-Cap Index ETF) for the year then ended, the statements of changes in net assets (consolidated as it relates to India Small-Cap Index ETF) for each of the two years in the period then ended and the financial highlights for the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds’ management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds’ internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds’ internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of December 31, 2016, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position (consolidated as it relates to India Small-Cap Index ETF) of Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF, ChinaAMC SME-ChiNext ETF, Egypt Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF, and Vietnam ETF (twelve of the series constituting VanEck Vectors ETF Trust) at December 31, 2016, and the results of their operations (consolidated as it relates to India Small-Cap Index ETF) for the year then ended, the changes in their net assets (consolidated as it relates to India Small-Cap Index ETF) for each of the two years in the period then ended and the financial highlights for the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

VANECK VECTORS HARD ASSETS ETFs

December 31, 2016 (unaudited)

Dear Shareholder:

2016 was certainly an eventful year, with hard assets and the commodities space affected by factors both internal and external.

At the end of 2015, we noted that our analyses suggested a bottom occurring in the commodities bear market during the first half of 2016, and more likely within the first quarter. On the evidence of the markets over the first half of 2016, it appears that we are in a normal cycle and that a bottom did, in fact, occur in the first quarter. Over the following three quarters, we saw signs of the continued rebalancing of supply and demand, particularly for oil and gas, a process that proved, for the most part, positive for commodities.

Source: FactSet. WTI = West Texas Intermediate. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.

While we believe that it is still too early to predict just what the long-term fall out from Britain's forthcoming exit from the European Union is likely to be, two further events in 2016 certainly had, and have the potential to continue to have significant effect on the markets.

The first was the six-month agreement by the Organization of Petroleum Exporting Countries (OPEC) to cut oil production 1.2 million barrels per day (MMbbl/d) to 32.5 MMbbl/d until its next meeting in May. We believe this should likely move the market into balance in the first quarter of 2017 and increase the floor on energy prices from US\$40 to US\$45 with prices likely settling above US\$50.

The second was the election of Donald Trump as 45th U.S. president. We see his election as having the following possible impacts on various energy markets:

1.

Fracking—While a Clinton win would have added a degree of risk regarding fracking, with president-elect Trump there is nothing negative, but also likely nothing overly net positive. Fracking regulations are controlled by individual states and the industry had not made its future drilling/fracking plans dependent on the election.

2. **Pipelines**—We would expect support and approval of major pipelines that require federal approval. However, this will not stop local opposition which could hold up or even prohibit projects.

3. **Renewable Fuel Standards/RINs**¹—Not much is likely to happen on the broad mandate, but there is the serious possibility of “point of obligation” (vis-à-vis RINs) being changed, which could be positive for refiners.

4. **Alternative Energy**—We don’t see much chance of a change in investment tax credits (ITCs), but we also do not see unfettered support. Mr. Trump has basically said he believes in “all of the above.” These would include not only alternatives, but also a non-discriminatory approach to clean coal.” Adherence to the 2015 United Nations Climate Change Conference obligations will come, but very slowly and will likely be intertwined with some trade items.

Management Discussion (unaudited)**Hard Assets Market Overview**

The *Rogers*TM-Van Eck Natural Resources Index (RVEIT)[‡] tracked by VanEck Vectors Natural Resources ETF (NYSE Arca: HAP), which includes equities of the world's largest and most prominent hard assets producers, remains the most comprehensive index in this space. For the 12 month period ending December 31, 2016, the index returned +25.04%.

The table below shows average sector weightings within this index and the total return of each sector for the 12 month period ending December 31, 2016.

RVEIT Sector[‡]	Average Sector Weighting	12 Month Total Return for Period Ending December 31, 2016
Agriculture	35.77 %	11.52 %
Energy	34.87 %	29.59 %
Base/Industrial Metals	13.97 %	48.87 %
Precious Metals	7.44 %	59.24 %
Paper & Forest Products	4.02 %	11.46 %
Alternatives	3.93 %	-10.12 %

Source: VanEck; FactSet; S-Network Global Indexes, LLC. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an Index.

Five out of the six sectors — agriculture, base/industrial metals, energy, paper & forest products, and precious metals — had positive returns over the 12 months ended December 31, 2016. While the precious metals sector, with the fourth largest average weighting, posted the highest total return for the 12-month period, the third largest sector by average weighting, base and industrial metals, posted the second highest return for the same period. The alternatives sector, with the lowest average weighting, was the only sector to post a negative return.

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

Eleven of the suite of 13 VanEck Vectors Hard Assets ETFs posted positive total returns during the 12 month period, with VanEck Vectors Coal ETF (NYSE Arca: KOL) (+99.10%) and VanEck Vectors Steel ETF (NYSE Arca: SLX) (+95.77%) each producing excellent performance with gains of nearly 100%. VanEck Vectors Global Alternative Energy ETF (NYSE Arca: GEX) (-5.26%) and VanEck Vectors Solar Energy ETF (NYSE Arca: KWT) (-42.22%) were the two worst performing Hard Assets ETFs.

Source: VanEck. Returns based on each fund's net asset value (NAV). The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the funds reflects temporary waivers of expenses and/or fees. Had the funds incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the funds will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than performance data quoted.

(unaudited) (continued)

Agribusiness

The performance of the agribusiness industry during the 12 month period was resilient if unspectacular. The primary drivers of positive performance were companies in the consumer staples sector and, in particular, those in the food products segment. Geographically, the greatest positive returns came from companies in the U.S., while the greatest negative returns came from those in China. The financial sector was the primary sector to detract from performance.

Coal

From a nadir in mid-January 2016, coal stocks staged a welcome comeback between then and early November and the U.S. general election, following which they declined slightly through the end of the year. As with other raw materials, coal benefitted not only from better supply and demand fundamentals, but also, for much of the first three quarters of the year, a weaker U.S. dollar. Coal prices rebounded in 2016, after a four-year decline, mainly on the back of policy changes in China intended to cut capacity and curb oversupply.¹ There was, in addition, a very significant rally during the year in the price of metallurgical coal, i.e., the coal used in steel making. Coal continues to be the world's most important fuel for making cement, producing steel, and generating energy.²

Canada was the single largest contributor to returns, followed by the U.S. The Philippines and Russia detracted most from the sector's performance, albeit minimally.

Global Alternative Energy

The performance of global alternative energy stocks during the 12 month period was lackluster and the Fund recorded a negative return for whole period. While the utilities, energy, and industrials sectors all recorded positive performance, the strongest negative performance came from companies involved in semiconductors and semiconductor equipment. Companies in Spain, Brazil, Italy, and Japan contributed the most positively to performance. Companies from France, Germany, and the U.S. detracted the most from performance.

Gold Miners

Both major gold miners and their junior peers had a spectacular first half to the year, with performance in the final week of June particularly strong (following the largely unexpected result of the Brexit vote that backed the U.K. exiting the EU). However, from very early August, as the value of the U.S. dollar rose, both funds started on a continued decline through the end of the year. This was exacerbated by both the stock market exuberance and investor confidence following the election of Donald Trump as U.S. president in early November and the U.S. Federal Reserve Bank's rate hike in early December.

Among the major mining stocks, Canadian companies, with the largest average sector weighting, were also the strongest contributors to performance. Their performance far surpassed, both individually and together, the positive performance of companies in South Africa, U.S., and Australia. The situation was similar among the juniors, with Canada the strongest contributor, followed by Australia, U.S., and South Africa. China was the country to detract most from performance, but only minimally.

Natural Resources

Five sectors contributed positively to performance (see chart on previous page). Precious metals, constituting the fourth largest segment of the natural resources industry, provided the largest positive returns. Only one sector, alternatives, contributed negatively to performance during the period under review, but only minimally.

Oil Refiners

The first six months of the year were particularly tempestuous for the refining stocks in the VanEck Vectors Oil Refiners ETF. Much of this was related to the changes that occurred in the crude oil market. Refiners ceased to benefit from continuing low crude oil prices, and suffered subsequently from higher refinery feedstock prices. For the rest of the year, however, on the back of continuing solid gasoline demand, and in the U.S. a welcome growth in demand from Mexico,³ refining stocks rose throughout the rest of the year. Peaking in early- to mid-

December, they still ended the year up and the Fund returned 9.55% for the 12 month period. While exposure to refiners in Japan, Taiwan, and Finland contributed most to performance, refiners out of the U.S., with the largest average weighting in the sector, detracted most from performance for the period.

Oil Services

From late January through the end of the first half of 2016, oil services stocks embarked on a steady rise, benefitting, in particular, from the rise in oil prices during the first half of the year. Thereafter, there was little sustained movement either up or down until the OPEC, and non-OPEC producers', deals to reduce production were struck at the very end of November and in early December, at which point stocks rose immediately and significantly. Thereafter, from mid-month, they drifted sideways and down through the end of December and the year. Drilling activity during the year in the U.S. continued to be muted. At the end of 2015, the U.S. rig count stood at 698. In mid-May, the count hit the lowest level ever recorded by Baker Hughes since it started tracking the number in 1949. Thereafter it rose during the year to reach 658, i.e., just 40 below the level 2015 ended. Oil service stocks in the U.S., with the largest average weighting in the sector, contributed the most to performance. Companies in the U.K. and Switzerland detracted from performance.

Rare Earth and Strategic Metals

Having sunk to an all-time low in late January 2016, the VanEck Vectors Rare Earth/Strategic Metals ETF, rose slowly and sporadically over the following 11 months to end the 12 month period with a creditable gain of 26.35%. The greatest contributors to performance were companies operating in South Africa, Australia, and Argentina mining manganese and chrome, titanium feedstock, and lithium and boron. The greatest detractors included companies involved in titanium and molybdenum. Small-cap companies performed considerably better than their large- and mid-cap peers during the period under review.

Solar Energy

Continuing weakened performance over the second half of 2015, notwithstanding the unexpected further December 2015 five year extension of the Solar Investment Tax Credit, solar energy stocks remained on a downward trajectory throughout the whole of 2016. Within the sector, the greatest detractors from performance were companies in the U.S., followed by those in China. Only companies in Spain contributed positively to performance.

Steel

Following a generally strong first half in 2016, in which the steel industry in the U.S. benefitted from both solid demand and the imposition of significant tariffs on dumped Chinese steel by the country's Department of Commerce, steel company stocks continued to rise throughout the rest of the year. According to a recent article in the *Financial Times*, "The U.S. steel industry is expected to return to growth next year, with production predicted to rise on lower imports and buoyant demand from the construction and energy sectors.*" The U.S. had the largest average sector weighting during the period under review and was the greatest contributor to total return. Brazil was the second largest contributor to performance. Companies operating in India detracted from performance.

Unconventional Oil & Gas

During the first half of 2016, unconventional energy companies benefitted from more robust oil prices. Over the period, in addition to a tightening in supply, demand also remained healthy. Forest fires in Canada, pipeline outages in Nigeria, and reduced supplies from Libya all contributed to further balancing of the market. By the time West Texas Intermediate (WTI) front month crude prices hit \$37.13 at the end of December 2015, oil had fallen 30% over the previous 12 month period. When it finished the first half on June 30, 2016, front month WTI at \$48.27 was up 30% on the year. Thereafter, oil prices moved more or less sideways until the end of November and early in December, when the OPEC and non-OPEC producers' deals to reduce production were struck. This provided an immediate boost for unconventional energy (particularly shale oil) companies. U.S. stocks (on average approximately 82% of the Fund by weight during the period under review) contributed the most to performance.

VANECK VECTORS HARD ASSETS ETFs

(unaudited) (continued)

Uranium and Nuclear Energy

While performance in the first half of 2016 was positive, the second half of the year disappointed and the Fund ended the 12 month period returning 8.87%. Utility companies, with the largest average weighting over the period, produced all the Fund's positive total return, with the energy and industrial sectors both detracting from performance. Geographically, companies in the U.S. contributed the most to performance, while Japan was the greatest detractor from performance.

According to the World Nuclear Association at the start of November, there were some 448 operable nuclear power reactors (excluding those shutdown in Germany) in 29 countries and 58 power reactors currently under construction in 14 countries, notably China, India, and Russia.⁵

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance.

Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

The *Rogers*TM-Van Eck Natural Resources Index (RVEIT) is a rules based, modified capitalization weighted, float adjusted index comprising publicly traded companies engaged in the production and distribution of commodities and commodity-related products and services in the following sectors: 1) Agriculture; 2) Alternatives (Water & Alternative Energy); 3) Base and Industrial Metals; 4) Energy; 5) Forest Products; and 6) Precious Metals.

VANECK VECTORS ETF TRUST

ABOUT FUND PERFORMANCE

(unaudited)

The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for each Fund reflects temporary waivers of expenses and/or fees. Had each Fund incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell fund shares at NAV.

Index returns assume the reinvestment of all income and do not reflect any management fees or brokerage expenses associated with Fund returns. Investors cannot invest directly in the Index. Returns for actual Fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

The Gold Miners Index and Steel Index are published by NYSE Arca, Inc. The Agribusiness Index, Coal Index, Junior Gold Miners Index, Oil & Gas Index, Oil Refiners Index, Oil Services Index, Rare Earth/Strategic Metals

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSR

Index, Solar Energy Index, and Nuclear Energy Index are published by MV Index Solutions GmbH (MVIS), which is a wholly owned subsidiary of the Adviser, Van Eck Associates Corporation. The Natural Resources Index is published by S-Network Global Indexes, LLC (S-Network). The Ardour Global Index is published by Ardour Global Indexes LLC (Ardour).

NYSE, MVIS, S-Network, and Ardour are referred to herein as the “Index Providers”. The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

Premium/discount information regarding how often the closing trading price of the Shares of each Fund were above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund for each of the four previous calendar quarters and the immediately preceding five years (if applicable) can be found at www.vaneck.com.

VANECK VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, July 1, 2016 to December 31, 2016.

Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During the Period.”

Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as program fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

During the period ended December 31, 2016, transfers of securities from Level 2 to Level 1 were \$11,485,788. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The summary of inputs used to value the Fund's investments as of December 31, 2016 is as follows:

	Level 1 Quoted Prices	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value
Common Stocks				
Austria	\$—	\$659,819	\$ —	\$659,819
Brazil	1,231,174	—	—	1,231,174
Canada	1,547,779	—	—	1,547,779
China / Hong Kong	1,349,001	4,644,269	—	5,993,270
Denmark	—	7,135,829	—	7,135,829
Germany	—	1,578,540	—	1,578,540
Japan	—	2,469,235	—	2,469,235
Spain	—	5,810,563	—	5,810,563
Sweden	—	3,262,526	—	3,262,526
United States	35,139,727	—	—	35,139,727
Money Market Fund	106,737	—	—	106,737
Repurchase Agreements	—	17,417,924	—	17,417,924
Total	\$39,374,418	\$42,978,705	\$ —	\$82,353,123

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$615,677. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account

market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

Repurchase Agreements	—	155,740,221	—	155,740,221
Total	\$2,936,496,462	\$664,064,156	\$1,881,213	\$3,602,441,831

During the year ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$ 7,294,616. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended December 31, 2016:

	Common Stocks China / Hong Kong
Balance as of December 31, 2015	\$0
Realized gain (loss)	—
Change in unrealized appreciation (depreciation)	1,881,213
Purchases	—
Sales	—
Transfers in and/or out of level 3	—
Balance as of December 31, 2016	\$1,881,213

† Security fully or partially on loan. Total market value of securities on loan is \$4,712,962.

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the

Board of Trustees. The aggregate value of fair valued securities is \$37,521,985 which represents 39.4% of net assets.

§ Illiquid Security — the aggregate value of illiquid securities is \$0 which represents 0.0% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from

Reg S registration securities offered and sold outside of the United States. Such a security cannot be sold in the

Reg S United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

144A Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise

144A restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$475,774, or 0.5% of net assets.

During the period ended December 31, 2016, transfers of securities from Level 1 to Level 2 were \$ 102,132, transfers of securities from Level 2 to Level 1 were \$ 705,217. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial Statements.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended December 31, 2016:

*See Schedule of Investments for security type and geographic sector breakouts.

During the year ended December 31, 2016, transfers of securities from Level 2 to Level 1 were \$1,204,038. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Financial of Statements.

† Security fully or partially on loan. Total market value of securities on loan is \$2,614,882.

Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$11,067,639 which represents 32.5% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

144A Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$447,743, or 1.3% of net assets.

Summary of Investments by Sector Excluding Collateral for Securities Loaned (unaudited)	% of Investments	Value
