VANECK VECTORS ETFs

June 30, 2017 (unaudited)

Dear Shareholder:

The first six months of 2017 were outstanding for the suite of VanEck Vectors Country/Regional ETFs. Only one fund, VanEck Vectors Russia ETF (NYSE Arca: RSX) failed to provide a positive return for the period. Particularly satisfying was to see both our China ETFs back in the black. VanEck Vectors ChinaAMC CSI 300 ETF (NYSE Arca: PEK) and VanEck Vectors ChinaAMC SME-ChiNext ETF (NYSE Arca: CNXT) posted returns of 14.83%\* and 7.36%,\* respectively.

China is an important part of the world economy and we believe the country continues to offer interesting investment opportunities. The good news at the end of the first half was the decision by MSCI starting in June 2018 to include 222 China A-share stocks in its MSCI Emerging Markets Index<sup>1</sup> and other indices.

The weights may initially be low, but they are a beginning. At the end of June 2017, based on MSCI's estimates (5% Inclusion Factor<sup>2</sup>), the pro forma weights of China A-shares will be 0.73% of MSCI Emerging Markets Index, 0.83% of MSCI AC Asia ex Japan Index,<sup>3</sup> and 0.1% of MSCI ACWI Index.<sup>4</sup> In an indication of what this may mean, even at these low levels, Goldman Sachs estimated that the inclusion is expected to trigger about US\$12 billion of net buying from emerging markets mandates.

We believe that VanEck Vectors ChinaAMC CSI 300 ETF may be an excellent way not only to capture this thematic opportunity, but also access the stocks eventually to be included by MSCI.

### **A High Correlation between the CSI 300 Index and the Proposed MSCI Constituents**

Of the proposed 222 MSCI constituents, 199 are CSI 300 Index<sup>5</sup> constituents. Those overlapping constituents weight approximately 80% in the CSI 300 Index and approximately 95% in MSCI.

Based on a static simulated list of June 19, 2017 released by MSCI, the one year performance correlation between the simulated list and the CSI 300 Index is as high as 0.99.

**Proposed MSCI Constituents are Highly Similar to the CSI 300 Index in Terms of Sector Allocation**

	<b>GICS Sector Name</b>	<b>Proposed MSCI Constituents</b>	<b>CSI 300 Index</b>
1	Consumer Discretionary	10.23%	11.76%
2	Consumer Staples	9.18%	6.52%
3	Energy	2.38%	2.41%
4	Financials	36.52%	34.53%
5	Health Care	4.28%	5.16%
6	Industrials	15.54%	15.18%
7	Information Technology	5.73%	8.80%
8	Materials	7.10%	6.57%
9	Real Estate	4.68%	5.49%
10	Telecommunication Services	0.15%	0.82%
11	Utilities	4.21%	2.75%

*Past performance is no guarantee of future results. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.*

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the fund. An index's performance is not illustrative of the fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

\* Returns based on each fund's net asset value (NAV).

Morgan Stanley Capital International (MSCI) Emerging Markets Index captures large- and mid-cap representation<sup>1</sup> across 24 Emerging Markets (EM) countries. With 845 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

<sup>2</sup> Inclusion Factor. MSCI defines the free float of a security as the proportion of shares outstanding that are deemed to be available for purchase in the public equity markets by international investors.

<sup>3</sup> MSCI AC Asia ex Japan Index captures large- and mid-cap representation across 2 of 3 Developed Markets (DM) countries (excluding Japan) and 9 Emerging Markets (EM) countries in Asia. With 639 constituents, the index

## Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

covers approximately 85% of the free float-adjusted market capitalization in each country.

MSCI ACWI Index captures large- and mid-cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. With 2,501 constituents, the index covers approximately 85% of the global investable equity opportunity set.

CSI 300 Index (CSIR0300) is a modified free-float market capitalization-weighted index compiled and managed by China Securities Index Co., Ltd. Considered to be the leading index for the Chinese equity market, the CSI 300 is a diversified index consisting of 300 constituent stocks listed on the Shenzhen Stock Exchange and/or the Shanghai Stock Exchange.

2

**Management Discussion** (unaudited)

All except one fund in the suite of VanEck Vectors Country/Regional ETFs posted positive returns during the six month period ending June 30, 2017. The top two performing funds produced solid performance: VanEck Vectors India Small-Cap ETF (NYSE Arca: SCIF) (+36.83%) and VanEck Vectors Poland ETF (NYSE Arca: PLND) (+36.81%).

The two bottom performing funds were both Russia-focused: VanEck Vectors Russia ETF (NYSE Arca: RSX) (-9.60%) and VanEck Vectors Russia Small-Cap ETF (NYSE Arca: RSXJ) (+3.17%).

**January 1 through June 30, 2017**

Current performance may be lower or higher than performance data quoted.*

**Country/Regional Overviews**

***Africa***

The financial sector, followed by the materials sector, were the two greatest contributors to the performance of the Fund (+7.07%) for the six month period. As a consequence of the fall in crude oil prices in the period under review, the energy sector was the largest detractor from performance. Midcap companies contributed the most to performance. Geographically, Canadian and U.K. gold mining companies operating in Africa, a South African media company, and Egyptian financial companies were among the most significant contributors to positive performance. Some companies outside Africa, including companies domiciled in Indonesia, the Netherlands, Switzerland, and the U.K., were

detractors from performance. Additionally, the depreciation of the Nigerian naira against the U.S. dollar, coupled with Nigerian capital controls experienced earlier in the period that delayed the Fund's ability to repatriate its Nigerian naira, had a negative impact on performance.

### *Brazil*

Despite both the economic and political challenges Brazil continues to face, the first six months of 2017 were an excellent period, bringing with it a Fund return of 21.24%. On the economic front, the first three months of the year were notable for the fact that, after eight consecutive quarters of contraction, the economy expanded by 1%.<sup>1</sup> This was the first expansion after one of the worst recessions the country has ever experienced. The boost to the economy came from a smaller drag from consumer spending and a jump in exports. However investment continued to contract and public spending fell.<sup>2</sup> On the political front, serious challenges remain and the position of President Temer could hardly be described as secure. In the last week of June, Brazil's top prosecutor indicted the president, accusing him of taking bribes from JBS, the largest meatpacker in the world.<sup>3</sup> Consequently, increasing doubt surrounds the prospect of success for the various reform measures, in particular those involving social security, he and his administration have planned.

VANECK VECTORS ETFs

(unaudited) (continued)

Perhaps continuing to anticipate a brighter future for the country, both Brazilian mid-cap and small-cap companies performed well over the period under review. The consumer discretionary sector, followed by the healthcare and materials sectors, all delivered healthy performance. Not one sector detracted from performance, but the energy sector contributed the least.

*China*

After the uncertainties faced by the two VanEck Vectors China-focused ETFs in 2016, the first six months of 2017 reversed the double digit declines seen by both, with VanEck Vectors ChinaAMC SME-ChiNext ETF (CNXT) and VanEck Vectors ChinaAMC CSI 300 ETF (PEK) returning 7.36% and 14.83%, respectively. China began the year at a furious pace. At the end of June, this led the International Monetary Fund to raise its 2017 growth outlook for the country from its 6.6% forecast in April to 6.7%. However it did recommend that the country accelerate reforms and rein in credit.<sup>4</sup>

CNXT seeks to provide not only exposure primarily to China's market for innovative, non-government owned companies, but also to the sectors that are increasingly underpinning the growth of China's "New Economy". It is, therefore, not surprising that the vast majority of the Fund's gains during the six month period came from companies in the information technology sector. Companies in the consumer discretionary sector detracted the most from performance.

All sectors contributed positively to the performance of PEK. While financial and consumer discretionary companies contributed the most to returns, telecommunications companies and energy contributed the least.

*Egypt*

Following a difficult year in 2016, things started to look up for Egypt in the first six months of 2017 and, in contrast with the prior 12 months, the Fund returned a respectable 6.96%. In the first quarter of 2017, the country's economy appeared to have stabilized. According to the Ministry of Planning, GDP increased 3.9% year-on-year. This is up from the 3.8% expansion in the fourth quarter of 2016 and above the 3.7% increase the first quarter in 2016.<sup>5</sup> A further sign of potential improvement was the 1.67% increase in urban consumer prices in May. This was down slightly from April's 1.69% increase. Perhaps demonstrating that the impact of the significant depreciation experienced by the Egyptian pound at the end of 2016 is beginning to diminish, May's figure was the lowest in eight months.<sup>6</sup> However, on June 27, in a move to help comply with the terms of the country's \$12 billion loan from the International Monetary

Fund, but which could also stoke inflation and test the popularity of the country's president, Abdel Fattah al-Sisi, fuel prices were hiked by up to 50%. While expected, the rise was more than expected.<sup>7</sup>

The top two performing sectors were materials and financials. The two greatest detractors were energy and telecommunications services. Small-cap companies, with the largest average weighting during the period under review, contributed by far the most to performance. Only large-cap companies, with the smallest average weighting over the period under review, detracted from performance.

### *India*

Despite the fact that economic growth in India slowed down sharply in the first quarter of 2017, VanEck Vectors India Small-Cap Index ETF still returned a noteworthy 36.83% for the six month period under review. At 6.1%, growth in the March quarter fell to its lowest in two years. (In the fourth quarter of 2014 growth dropped to 6.0%.)<sup>8</sup> Although many expected to see at least some residual effects of November's demonetization (when 1,000 rupee and 500 rupee notes, reportedly some 86% of all currency in circulation<sup>9</sup> at the time, were banned) in early 2017 economic activity, the sharpness of the slowdown came as a surprise. Capital investments fell an annual 2.1% during the quarter and the drivers of growth remain government and consumer spending.<sup>10</sup> Finally after 10 years, on Saturday, July 1, India will have a new system of taxes—the Goods and Services Tax (GST). Instead of a collection of duties, fees, and central and state tariffs, all goods and services will be placed in one of five different tax brackets, with each product now subject to a single tax rate across the country.<sup>11</sup> Going forward, the move is generally seen as being positive for the country's economy.

The consumer discretionary, industrial, and financial sectors all provided excellent returns. While still both making positive contributions, the telecommunications services and energy sectors contributed the least to performance.

### *Indonesia*

The Fund enjoyed a rewarding six month period, returning 12.48%. As if to confirm the good news at the end of December last year that Fitch Ratings had revised the country's credit rating outlook to positive and praised Indonesian policy makers for "strong structural reform,"<sup>2</sup> the World Bank's "June 2017 Indonesia Economic Quarterly"<sup>3</sup> described the country's economy as beginning 2017 on a "strong footing." In May, S&P Global Ratings raised Indonesia's credit rating to investment grade.<sup>14</sup> First quarter GDP growth in 2017 rose to 5.0% from 4.9% in the last quarter of 2016. It was lifted by a rebound in government consumption and surging exports. Private consumption growth in the country has been robust, supported muted inflation and a stable rupiah. "Investment growth continues to be strong on the back of the ongoing recovery in commodity prices, continued reforms to improve the business environment, lower financing rates, and better business sentiment."<sup>15</sup> In an encouraging sign, while Indonesia's consumer price index rose year-on-year in June, the annual core inflation rate (i.e., excluding government-controlled and volatile food prices) fell to 3.13% from 3.20% in May.<sup>16</sup>

All sectors, except industrials and utilities, contributed positively to performance, with financials, followed by consumer staples and telecommunication services, contributing the most. The utilities sector detracted the most from performance.

### *Israel*

Despite economic growth in the first quarter of 2017 being slower than expected, at the end of May the Bank of Israel stated that the country's economy was continuing to grow at a solid pace!<sup>17</sup> The Fund returned a healthy 14.64% for the first six months of the year. On an annualized basis, Israel's economy grew at 1.4% in the first three months of the year with the improvement in the growth of exports continuing.<sup>18</sup> However, this contrasted with an annualized growth rate of 4.7% during the last quarter of 2016. In May, exports rose 13.0% compared to May 2016. The highest for eight months, this figure contrasted with the 5.1% drop seen in April.<sup>19</sup>

Over the period under review, the performances of all sectors, except healthcare and telecommunication services, contributed positively to performance. Healthcare companies detracted the most from performance. By far the greatest contribution came from companies in the information technology sector with the largest average weighting over the period under review. Mid-cap companies made the greatest contribution to the Fund's performance.

### *Poland*

The Fund had an excellent six months, returning 36.81% in the first half of 2017. While the fourth quarter of 2016 was good for Poland's economy, with growth of 4%, the first quarter of 2017 was even better.<sup>20</sup> Drivers of this growth were private consumption (because of a tight labor market) and a recovery in EU-funded investment.<sup>21</sup> While exports grew during the quarter, so did imports—on the back of a stronger zloty. Fiscal results during the first quarter were also commendable. The country's estimated fiscal deficit for January-May was only 0.3% of the annual plan. It was reassuring, too, that such strong performance was driven by better-than-expected tax collection, signaling that domestic activity was robust.<sup>22</sup>

All sectors except one contributed positively to performance. The financial sector was by far the greatest contributor to total returns. The real estate sector was the only sector to detract from performance and, then, only minimally.

### ***Russia***

After recording excellent positive returns for calendar year 2016, the first six months of 2017 were difficult not only for VanEck Vectors Russia Small-Cap ETF (RSXJ) and its peer investing in larger cap Russian stocks, VanEck Vectors Russia ETF (RSX), but also Russia's economy. While the former fund returned a positive 3.17% for the first six months of the year, the latter lost 9.60% over the same period.

Two major factors contributing to the economy's poor performance have, not least, been the fall in oil prices and the apparent evaporation of any hope that the election of Donald Trump as U.S. president would lead to an improvement in U.S.-Russia relations. As if to confirm this last, toward the end of June, the U.S. Senate passed a bill that would, according to the Financial Times, "tighten existing sanctions and threatens to broaden the restrictions from energy and banking to metals, mining, railways and shipping."<sup>23</sup> By the end of June, however,

VANECK VECTORS ETFs

(unaudited) (continued)

the bill remained stuck in Congress, needing technical changes passed by the Senate to be passed by the House. It looked unlikely, therefore, that the legislation would be passed before President Trump had his face-to-face meeting with Russia's President Putin in early July<sup>24</sup>

Energy companies were by far the most significant detractors from performance in RSX, the large-cap fund. Only the information technology sector contributed positively to performance. For the small-cap fund, RSXJ, companies in the information technology and industrial sectors performed particularly well. However, similarly sized companies in the materials were the largest detractors from performance.

*Vietnam*

In welcome contrast to its performance in 2016, the Fund returned +14.49% for the six month period under review. Despite a slow start to the year<sup>25</sup> (growth declined to 5.1%<sup>26</sup> in the first quarter partially as a result of reduced smartphone production by Samsung and the condition of the oil market), in April and May the figures for both retail sales and industrial production were strong.<sup>27</sup> According to figures from the country's statistics office, quoted by Bloomberg, inflation eased to a nine-month low of 3.19% in May. In the first five months of the year exports rose 17.4% from a year earlier, and pledged foreign direct investment increased 10.4%.<sup>28</sup> Figures published at the end of June for the second quarter of the year showed that, on the back of a surge in exports, Vietnam had rejoined the group of those countries with a GDP growth of 6% or more.<sup>29</sup>

Small-cap companies, with the greatest average weighting, performed far better than either mid- or large-cap companies over the reporting period. The financial sector was the largest positive contributor to total returns. The energy sector was the only sector to detract from performance.

CSI 300 Index (CSIR0300) is a modified free-float market capitalization weighted index comprised of the largest and most liquid stocks in the Chinese A-share market. Constituent stocks for the Index must have been listed for more than three months (unless the stock's average daily A-share market capitalization since its initial listing ranks among the top 30 of all A-shares) and must not be experiencing what the Index Provider believes to be obvious abnormal fluctuations or market manipulation.

**Past performance is no guarantee of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption or sale of fund shares.**

See "About Fund Performance" on page 12 for more information.

VANECK VECTORS ETF TRUST

ABOUT FUND PERFORMANCE

(unaudited)

The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.

**The performance data quoted represents past performance. Past performance is not a guarantee of future results.** Performance information for certain Funds reflect temporary waivers of expenses and/or fees. Had these Funds incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.

**Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect reinvestment of dividends and capital gains distributions. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.**

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market.

The "Net Asset Value" (NAV) of a VanEck Vectors exchange-traded fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell fund shares at NAV.

All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. Certain indices may take into account withholding taxes. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Results reflect past performance and do not guarantee future results.

## Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

The Africa Index, Brazil Small-Cap Index, Egypt Index, India Small-Cap Index, Indonesia Index, Poland Index, Russia Index, Russia Small-Cap Index, and Vietnam Index are published by MV Index Solutions GmbH (MVIS), which is a wholly owned subsidiary of the Adviser, Van Eck Associates Corporation. The CSI 300 Index is published by China Securities Index Co., Ltd. and the SME-ChiNext Index is published by the Shenzhen Securities Information Co., Ltd, which is a subsidiary of the Shenzhen Stock Exchange. The Israel Index is published by BlueStar Global Investors, LLC (BlueStar).

BlueStar, CSI 300 Index, MVIS, and SME-ChiNext Index are “Index Providers.” The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

Premium/discount information regarding how often the closing trading price of the Shares of each Fund were above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund for each of the four previous calendar quarters and the immediately preceding five years (if applicable) can be found at [www.vaneck.com](http://www.vaneck.com).

VANECK VECTORS ETF TRUST

EXPLANATION OF EXPENSES

(unaudited)

**Hypothetical \$1,000 investment at beginning of period**

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, January 1, 2017 to June 30, 2017.

**Actual Expenses**

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

**Hypothetical Example for Comparison Purposes**

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on your Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

\*The Nigerian securities were valued using Level 1 quoted prices, and used the Nigerian Autonomous Foreign Exchange Rate Fixing (NAFEX) to translate the Nigerian naira into U.S. dollars.

During the period ended June 30, 2017, transfers of securities from Level 1 to Level 2 were \$3,258,042 and transfers from Level 2 to Level 1 were \$14,151,649. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Schedules of Investments.

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended June 30, 2017:

† Security fully or partially on loan. Total market value of securities on loan is \$51,670.

# Indicates a fair valued security which has been valued in good faith pursuant to guidelines established by the Board of Trustees. The aggregate value of fair valued securities is \$16,582,164 which represents 28.7% of net assets.

Reg S Security was purchased pursuant to Regulation S under the Securities Act of 1933, which exempts from registration securities offered and sold outside of the United States. Such a security cannot be sold in the United States without either an effective registration statement filed pursuant to the Securities Act of 1933, or pursuant to an exemption from registration.

144A Security exempt from registration under Rule 144A of the Securities Act of 1933, as amended, or otherwise restricted. These securities may be resold in transactions exempt from registration, unless otherwise noted, and the value amounted to \$2,541,645, or 4.4% of net assets.

Summary of Investments by Sector Excluding Collateral for Securities Loaned	% of Investments	Value

During the period ended June 30, 2017, transfers of securities from Level 1 to Level 2 were \$1,670,008 and transfers from Level 2 to Level 1 were \$237,637. These transfers resulted primarily from changes in certain foreign securities valuation methodologies between the last close of the securities' primary market (Level 1) and valuation by a pricing service (Level 2), which takes into account market direction or events occurring before the Fund's pricing time but after the last local close, as described in the Notes to Schedules of Investments.

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

The following table reconciles the valuation of the Fund's Level 3 investment securities and related transactions during the period ended June 30, 2017:

	<b>Common Stocks</b>	
	<b>Consumer</b>	
	<b>Services</b>	<b>Materials</b>
Balance as of December 31, 2016	\$21,517	\$43,410
Realized gain (loss)	—	1,188

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

June 30, 2017 (unaudited)

**Note 1—Fund Organization**—VanEck Vectors ETF Trust (the “Trust”) is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and as of June 30, 2017, offers fifty-nine investment portfolios, each of which represents a separate series of the Trust.

These financial statements relate only to the following investment portfolios: Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF, ChinaAMC SME-ChiNext ETF, Egypt Index ETF, India Small-Cap Index ETF, Indonesia Index ETF, Israel ETF, Poland ETF, Russia ETF, Russia Small-Cap ETF and Vietnam ETF (each a “Fund” and, together, the “Funds”). China Asset Management (Hong Kong) Limited (the “Sub-Adviser”) is the sub-adviser to ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF. ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF seek to achieve their investment objective by primarily investing directly in A-shares through the Hong Kong-Shanghai Stock Connect program and via the A-share quota granted to the Sub-Adviser. India Small-Cap Index ETF makes its investments through the India Small-Cap Mauritius Fund (the “Subsidiary”), a wholly owned subsidiary organized in the Republic of Mauritius. Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in substantially the same weighting, in an index published by the China Securities Index Co. Ltd., BlueStar Global Investors LLC or MV Index Solutions GmbH, a wholly owned subsidiary of Van Eck Associates Corporation (the “Adviser”).

The Funds’ commencement of operations dates and their respective indices are presented below:

<b>Fund</b>	<b>Commencement of Operations</b>	<b>Index</b>
Africa Index ETF	July 10, 2008	MVIS™ GDP Africa Index*
Brazil Small-Cap ETF	May 12, 2009	MVIS™ Brazil Small-Cap Index*
ChinaAMC CSI 300 ETF	October 13, 2010	CSI 300 Index
ChinaAMC SME-ChiNext ETF	July 23, 2014	SME-ChiNext 100 Index

Vietnam ETF	August 11, 2009	MVIS™ Vietnam Index*

\*Published by MV Index Solutions GmbH.

**Note 2—Significant Accounting Policies**—The preparation of financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

The Funds are investment companies and are following accounting and reporting requirements of Accounting Standards Codification (“ASC”) 946 Financial Services—Investment Companies.

The following is a summary of significant accounting policies followed by the Funds.

**Security Valuation**—The Funds value their investments in securities and other assets and liabilities at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges or traded on the NASDAQ National Market System are valued at the last sales price as reported at the close of each business day. Securities traded on the NASDAQ Stock Market are valued at the NASDAQ official closing price.

A. Over-the-counter securities not included in the NASDAQ National Market System and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds’ pricing time (4:00 p.m. Eastern Standard Time) but after the last close of the securities’ primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of

65

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(unaudited) (continued)

Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as, when a particular foreign market is closed but the Fund is open. Debt securities are valued on the basis of evaluated prices furnished by an independent pricing service approved by the Funds' Board of Trustees or provided by securities dealers. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date and/or (ii) quotations from bond dealers to determine current value and are categorized as Level 2 in the fair value hierarchy. Short-term debt securities with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are considered to be Level 1 in the fair value hierarchy. The Pricing Committee of the Adviser provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments or other assets. If market quotations for a security or other asset is not readily available, or if the Adviser believes it does not otherwise reflect the fair value of a security or asset, the security or asset will be fair valued by the Pricing Committee in accordance with the Funds' valuation policies and procedures. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review of key inputs and assumptions, periodic comparisons to valuations provided by other independent pricing services, transactional back-testing and disposition analysis.

Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be classified either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.

The Funds utilize various methods to measure the fair value of their investments on a recurring basis which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The transfers between levels of the fair value hierarchy assume the financial instruments were transferred at the beginning of the reporting period. The three levels of the fair value hierarchy are described below:

Level 1—Quoted prices in active markets for identical securities.

Level 2—Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3—Significant unobservable inputs (including each Fund’s own assumptions in determining the fair value of investments).

A summary of the inputs, the levels used to value the Funds’ investments, and transfers between levels are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds’ Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.

**Basis for Consolidation**—The Subsidiary, an Indian exempted company, was incorporated on February 25, 2010 and acts as an investment vehicle for the India Small-Cap Index ETF (the “SCIF”) in order to effect certain investments on behalf of the SCIF. The SCIF is the sole shareholder of the Subsidiary, and it is intended that the SCIF will remain the sole shareholder and will continue to control the Subsidiary. The consolidated financial statements of the SCIF include the financial results of its wholly owned subsidiary. All material interfund account balances and transactions have been eliminated in consolidation.

66

- C. Federal Income Taxes**—It is each Fund’s policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.
- D. Dividends and Distributions to Shareholders**—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.
- E. Currency Translation**—Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day as quoted by one or more sources. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.
- F. Restricted Securities**—The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund’s Schedule of Investments.
- G. Repurchase Agreements**—The Funds may enter into repurchase agreements with financial institutions, deemed to be creditworthy by the Adviser, to generate income from their excess cash balances and to invest securities lending cash collateral. A repurchase agreement is an agreement under which a Fund acquires securities from a seller, subject to resale to the seller at an agreed upon price and date. A Fund, through its custodian/securities lending agent, takes possession of securities collateralizing the repurchase agreement. Pursuant to the terms of the repurchase agreement, such securities must have an aggregate market value greater than or equal to the terms of the repurchase price plus accrued interest at all times. If the value of the underlying securities falls below the value of the repurchase price plus accrued interest, the Funds will require the seller to deposit additional collateral by the next business day. If the request for additional collateral is not met, or the seller defaults on its repurchase obligation, the Funds maintain their right to sell the underlying securities at market value and may claim any resulting loss against the seller. Repurchase agreements held as of June 30, 2017 are reflected in the Schedules of Investments.
- H. Use of Derivative Instruments**—The Funds may make investments in derivative instruments, including, but not limited to, options, futures, swaps and other derivatives relating to foreign currency transactions. A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts (often referred to as over-the-counter (“OTC”) derivatives) or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount. Derivative instruments may involve a high degree of financial risk. The use of derivative instruments also involves the risk of loss if the Adviser is incorrect in its expectation of the timing or

level of fluctuations in securities prices, interest rates or currency prices. Investments in derivative instruments also include the risk of default by the counterparty, the risk that the investment may not be liquid and the risk that a small movement in the price of the underlying security or benchmark may result in a disproportionately large movement, unfavorable or favorable, in the price of the derivative instruments. The Funds held no derivative instruments during the period ended June 30, 2017.

**Offsetting Assets and Liabilities**—In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of setoff in those agreements allows the Funds to set off any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and/or securities as collateral for derivative instruments, securities lending and repurchase agreements. For financial reporting purposes,

I.

67

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

(unaudited) (continued)

the Funds present securities lending and repurchase agreement assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Collateral held at June 30, 2017 is presented in the Schedules of Investments. Refer to related disclosures in Note 2G (Repurchase Agreements) and Note 9 (Securities Lending).

**Other**—Security transactions are accounted for on trade date. Realized gains and losses are calculated on the identified cost basis. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date/rate. Interest income, including amortization of premiums and discounts, is accrued as earned.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.

At June 30, 2017, ChinaAMC CSI 300 and ChinaAMC SME-ChiNext included \$10,890 and \$7,249, respectively, in cash denominated in foreign currency, at value on the Statements of Assets and Liabilities, which represents foreign investor minimum settlement reserve funds required by China Securities Depository and Clearing Corporation Limited.

**Note 3—Investment Management and Other Agreements**—The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of 0.50% of each Fund's average daily net assets. The Adviser has agreed, until at least May 1, 2018, to waive management fees and assume expenses to prevent each Fund's total annual operating expenses (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses; and for Russia ETF and Russia Small-Cap ETF, depository receipt fees up to 0.10% and 0.08% of average daily net assets, respectively) from exceeding the expense limitations as listed in the table below.

The current expense limitations and the amounts waived/assumed by the Adviser for the period ended June 30, 2017, are as follows:

Fund	Expense Limitation	Waiver of Management Fees	Expenses Assumed by the Adviser
Africa Index ETF	0.78 %	\$6,647	\$ —
Brazil Small-Cap ETF	0.59	51,845	—
ChinaAMC CSI 300 ETF*	0.72	69,938	—

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

Indonesia Index ETF	0.57	59,186	—
Israel ETF	0.59	64,905	—
Poland ETF	0.60	39,891	6,107
Russia ETF	0.62	456,109	—
Russia Small-Cap ETF	0.67	15,135	—
Vietnam ETF	0.76	—	—

\*The Adviser paid sub-advisory fees directly to the Sub-Adviser.

In addition, Van Eck Securities Corporation (“the Distributor”), an affiliate of the Adviser, acts as the Funds’ distributor. Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

68

**Note 4—Investments**—For the period ended June 30, 2017, the cost of purchases and proceeds from sales of investments other than U.S. government obligations and short-term obligations (excluding in-kind transactions described in Note 6) were as follows:

Fund	Cost of Investments Purchased	Proceeds from Investments Sold
Africa Index ETF	\$8,208,697	\$8,253,277
Brazil Small-Cap ETF	24,391,406	29,861,669
ChinaAMC CSI 300 ETF	4,820,417	14,300,128

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

(unaudited) (continued)

The tax character of current year distributions will be determined at the end of the current fiscal year.

Qualified late year losses incurred after October 31, 2016 and within the taxable year, are deemed to arise on the first day of the Funds' next taxable year. For the year ended December 31, 2016, the Funds have deferred qualified late year losses to January 1, 2017 for federal tax purposes as follows:

Fund	Late-Year Ordinary Losses
Africa Index ETF	\$376,256
ChinaAMC CSI 300 ETF	46,852
ChinaAMC SME-ChiNext ETF	1,902
Egypt Index ETF	1,993,843
India Small-Cap Index ETF	723,328
Vietnam ETF	352,196

At December 31, 2016, the Funds had capital loss carryforwards available to offset future capital gains, as follows:

Fund	Post-Effective- No Expiration Short-Term Capital Losses	Post-Effective- No Expiration Long-Term Capital Losses	Amount Expiring in the Year Ended December 31,	
			2018	2017
Africa Index ETF	\$9,465,262	\$45,726,686	\$1,095,985	\$951,177
Brazil Small-Cap ETF	27,517,893	152,760,433	—	—
ChinaAMC CSI 300 ETF	1,625,261	—	—	—
ChinaAMC SME-ChiNext ETF	6,389,337	1,179,822	—	—
Egypt Index ETF	11,833,036	16,194,085	128,400	—
India Small-Cap Index ETF	34,949,461	2,018,000	—	—
Indonesia Index ETF	36,729,289	60,740,613	2,845,870	—
Israel ETF	875,735	2,386,023	—	—
Poland ETF	2,868,435	14,313,467	171,326	—
Russia ETF	229,409,942	997,307,007	121,306,708	349,754,000
Russia Small-Cap ETF	5,048,850	2,925,476	—	—
Vietnam ETF	62,814,041	171,290,225	1,860,199	—

The Funds recognize the tax benefits of uncertain tax positions only where the position is “more-likely-than-not” to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds’ financial statements. The Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the period ended June 30, 2017, the Funds did not incur any interest or penalties.

Uncertainties in the Chinese tax rules governing taxation of income and gains from investments in A-Shares could result in unexpected tax liabilities for the ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF. China generally imposes withholding income tax (“WHT”) at a rate of 10% on dividends and interest (excluding government bond interest) derived by non-PRC resident enterprises (including a Qualified Foreign Institutional Investor (“QFII”) and a Renminbi Qualified Foreign Institutional Investor (“RQFII”)) from issuers resident in China. China also imposes WHT at a rate of 10% on capital gains derived by non-PRC resident enterprises from the disposal in shares of PRC enterprises. Effective November 17, 2014, investments through the Hong Kong-Shanghai Stock Connect program, QFIIs and RQFIIs, which includes these Funds, are exempted temporarily from WHT with respect to gains derived from the trading of equity investments (including A-shares).

The Finance Act, 2012 introduced a general anti-avoidance rule (“GAAR”), which became effective April 1, 2017. GAAR is applicable where the main purpose of an arrangement is tax avoidance and empowers Indian tax authorities to declare such an arrangement as an impermissible avoidance arrangement.

Additionally, on May 10, 2016, the Governments of India and Mauritius signed the Protocol for amending the tax treaty between India and Mauritius. The renegotiation of the Treaty clarifies the applicability of GAAR to a Mauritius subsidiary deemed a tax resident of Mauritius. As per the Protocol, India commenced taxation on capital gains arising from disposition of shares acquired on or after April 1, 2017 in a company resident in India, with shares acquired on or before March 31, 2017 being grandfathered as exempt from capital gains taxation. The Protocol could reduce the return to the Fund on its investments made after April 1, 2017 and the return received by Fund shareholders.

**Note 6—Capital Share Transactions**—As of June 30, 2017, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Fund shares are not individually redeemable and are issued and redeemed at their net asset value per share only through certain authorized broker-dealers (“Authorized Participants”) in blocks of shares (“Creation Units”), consisting of 50,000 shares or multiples thereof.

The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds’ underlying index (“Deposit Securities”) plus a balancing cash component to equate the transaction to the net asset value per share of the Fund on the transaction date. Cash may also be substituted in an amount equivalent to the value of certain Deposit Securities, generally as a result of market circumstances, or when the securities are not available in sufficient quantity for delivery, or are not eligible for trading by the Authorized Participant. The Funds may issue Creation Units in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit at the Custodian for the benefit of the Funds, collateral consisting of cash in the form of U.S. dollars at least equal to 115% of the daily marked to market value of the missing Deposit Securities.

Authorized Participants purchasing and redeeming Creation Units may pay transaction fees directly to The Bank of New York Mellon. In addition, the Funds may impose certain variable fees for creations and redemptions with respect to transactions in Creation Units for cash, or on transactions effected outside the clearing process, which are treated as increases in capital. These variable fees, if any, are reflected in share transactions in the Statements of Changes in Net Assets.

For the year ended June 30, 2017, the Funds had in-kind contributions and redemptions as follows:

Fund	In-Kind Contributions	In-Kind Redemptions
Africa Index ETF	\$—	\$ 742,072
Brazil Small-Cap ETF	334,941	974,458
ChinaAMC CSI 300 ETF	—	—
ChinaAMC SME-ChiNext ETF	—	—
Egypt Index ETF	5,216,402	881,995
India Small-Cap Index ETF	474,352	163,420

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

Indonesia Index ETF	—	17,635,567
Israel ETF	1,526,850	—
Poland ETF	—	886,939
Russia ETF	285,839,133	650,875,332
Russia Small-Cap ETF	6,772,199	33,522,648
Vietnam ETF	3,203,635	2,239,229

The in-kind contributions and in-kind redemptions in this table represent the accumulation of each Fund’s daily net shareholder transactions including rebalancing activity, while the Statements of Changes in Net Assets reflect shareholder transactions including any cash component of the transactions.

**Note 7—Concentration of Risk**—The investment objective of each Fund is to seek investment results that correspond generally to the price and yield performance, before fees and expenses, of its underlying index, as indicated in the name of each Fund. The Adviser uses a “passive” or index approach to achieve each Fund’s investment objective by investing in a portfolio of securities that generally replicates the Funds’ index. Each of the Funds (except Africa Index ETF, Brazil Small-Cap ETF, ChinaAMC CSI 300 ETF and India Small-Cap Index ETF) is classified as a non-diversified fund under the 1940 Act. Non-diversified funds generally hold securities of fewer issuers than diversified funds and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks

VANECK VECTORS ETF TRUST

NOTES TO FINANCIAL STATEMENTS

(unaudited) (continued)

include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse political and economic developments and local/regional conflicts. These risks are heightened for investments in emerging market countries. Moreover, securities of many foreign issuers and their markets may be less liquid and their prices more volatile than those of comparable U.S. issuers. In addition, for Africa Index ETF and Egypt Index ETF there may be limitations or delays in the convertibility or repatriation of certain African currencies, which would adversely affect the U.S. dollar value and/or liquidity of the Fund's investments denominated in such African currencies, may impair the Fund's ability to achieve its investment objective and/or may impede the Fund's ability to satisfy redemption requests in timely manner.

As a result of events involving Ukraine and the Russian Federation, the United States and the European Union ("EU") have imposed sanctions on certain Russian individuals and companies. These sanctions do not currently impact the Funds. Additional economic sanctions may be imposed or other actions may be taken that may adversely affect the value and liquidity of the Russian-related issuers' held by Russia ETF and Russia Small-Cap ETF.

In March 2017, the United Kingdom triggered Article 50, and is now scheduled to leave the EU by the end of March 2019. There is uncertainty on exactly how the withdrawal will take place and the terms of the Brexit deal. This may further impact the value of the Euro and the British pound sterling, and has caused volatility and uncertainty in European and global markets.

Should the Chinese government impose restrictions on the ability of ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF to repatriate funds associated with direct investment in A-Shares, the Funds may be unable to satisfy distribution requirements applicable to regulated investment companies ("RICs") under the Internal Revenue Code of 1986, as amended, and the Funds may therefore be subject to Fund-level U.S. federal taxes.

A more complete description of risks is included in each Fund's prospectus and Statement of Additional Information.

**Note 8—Trustee Deferred Compensation Plan**—The Trust has a Deferred Compensation Plan (the "Plan") for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in “Trustees’ fees and expenses” in the Statements of Operations. The liability for the Plan is shown as “Deferred Trustee fees” in the Statements of Assets and Liabilities.

**Note 9—Securities Lending**—To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with The Bank of New York Mellon, the securities lending agent and also the Funds’ custodian. Each Fund may lend up to 33% of its investments requiring that the loan be continuously collateralized by cash, U.S. government or U.S. government agency securities, shares of an investment trust or mutual fund, or any combination of cash and such securities at all times equal to at least 102% (105% for foreign securities) of the market value plus accrued interest on the securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and/or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. The Funds may pay reasonable finders’, administrative and custodial fees in connection with a loan of its securities. Securities lending income is disclosed as such in the Statements of Operations. The collateral for securities loaned is recognized in the Schedules of Investments and the Statements of Assets and Liabilities. The cash collateral is maintained on the Funds’ behalf by the lending agent and is invested in repurchase agreements collateralized by obligations of the U.S. Treasury and/or Government Agencies. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the lender securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related collateral outstanding at June 30, 2017 are presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities.

The following table presents the amount of repurchase agreements held as collateral by type of security on loan pledged as of June 30, 2017:

**Gross Amount of Recognized  
Liabilities for Securities  
Loaned in the Statements  
of Assets and Liabilities\***

<b>Fund</b>	<b>Equity Securities</b>
Africa Index ETF	\$ 1,155,415
Brazil Small-Cap ETF	2,320
Egypt Index ETF	54,688
Israel ETF	1,688,381
Poland ETF	1,610,941
Vietnam ETF	1,093,729

\*Remaining contractual maturity of the agreements: overnight and continuous

**Note 10—Share Split**—On July 1, 2013, the Board of Trustees of the Trust approved a 1 for 3 reverse share split for Russia Small-Cap ETF, and 1 for 4 reverse share splits for Egypt Index ETF and India Small-Cap Index ETF. Fund shares began trading on the split adjusted NAV on July 1, 2013. The Financial Highlights prior to July 1, 2013 for the Funds have been adjusted to reflect these reverse share splits.

**Note 11—Bank Line of Credit**—The Funds may participate in a \$200 million committed credit facility (the “Facility”) to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds at rates based on prevailing market rates in effect at the time of borrowings. During the period ended June 30, 2017, the following Funds borrowed under this Facility:

<b>Fund</b>	<b>Days Outstanding</b>	<b>Average Daily Loan Balance</b>	<b>Average Interest Rate</b>	<b>Outstanding Loan Balance as of June 30, 2017</b>
Africa Index ETF	181	\$3,348,676	2.22 %	\$1,117,811
Brazil Small-Cap ETF	137	290,949	2.21	457,112
ChinaAMC CSI 300 ETF	178	885,325	2.22	2,772,052
ChinaAMC SME-ChiNext ETF	150	235,604	2.21	409,149
Egypt Index ETF	36	462,979	2.29	—
India Small-Cap Index ETF	107	2,271,051	2.26	4,237,424
Indonesia Index ETF	24	262,285	2.38	—
Israel ETF	34	185,642	2.33	—
Poland ETF	175	254,614	2.23	650,488

Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

Russia ETF	84	8,124,104	2.29	23,714,226
Russia Small-Cap ETF	62	310,922	2.27	261,840
Vietnam ETF	160	3,782,556	2.25	1,298,794

**Note 12—Custodian Fees**—The Funds have entered into an expense offset agreement with the custodian wherein they receive a credit toward the reduction of custodian fees whenever there are uninvested cash balances. The Funds could have invested their cash balances elsewhere if they had not agreed to a reduction in fees under the expense offset agreement with the custodian. For the period ended June 30, 2017, there were offsets to custodian fees and these amounts are reflected in custody expense in the Statements of Operations.

**Note 13—Recent Accounting Pronouncements and Regulatory Requirements**—In October 2016, the U.S. Securities and Exchange Commission (“SEC”) adopted new rules and forms, and amendments to certain current rules and forms, to modernize reporting and disclosure of information by registered investment companies. The amendments to Regulation S-X will require standardized, enhanced disclosure about derivatives in investment company financial statements, and will also change the rules governing the form and content of such financial statements. The compliance date for the amendments to Regulation S-X is August 1, 2017. Management has evaluated the impact that the adoption of the amendments to Regulation S-X will have on the Fund’s financial statements and related disclosures. Any required changes will be implemented for interim and annual periods after August 1, 2017.

**Note 14—Subsequent Event Review**—The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

VANECK VECTORS ETF TRUST

APPROVAL OF INVESTMENT MANAGEMENT AGREEMENTS

June 30, 2017 (unaudited)

At a meeting held on June 9, 2017 (the “Renewal Meeting”), the Board of Trustees (the “Board”) of VanEck Vectors ETF Trust (the “Trust”), including all of the Trustees that are not interested persons of the Trust (the “Independent Trustees”), approved the continuation of (i) the investment management agreements between the Trust and Van Eck Associates Corporation (the “Adviser”) (the “Investment Management Agreements”) with respect to the VanEck Vectors Africa Index ETF, Agribusiness ETF, Agriculture Producers ETF, Brazil Small-Cap ETF, China All-Cap ETF, China Consumer Discretionary ETF, China Consumer Staples ETF, China Energy ETF, China Financials ETF, China Health Care ETF, China Industrials ETF, China Information Technology ETF, China Materials ETF, China Small-Cap ETF, China Utilities ETF, ChinaAMC All China Consumer ETF, ChinaAMC CSI 300 ETF, ChinaAMC Environmental Protection ETF, ChinaAMC Private-Owned Enterprises ETF, ChinaAMC MSCI All China ETF, ChinaAMC MSCI All China Small Cap ETF, ChinaAMC SME-ChiNext ETF, Coal ETF, Egypt Index ETF, Emerging Europe ex-Russia Index ETF, Energy Producers ETF, GDP Weighted Emerging Markets ETF, GDP Weighted Emerging Markets Small-Cap ETF, GDP Weighted International ex-US ETF, Germany Mid-Cap ETF, Global Alternative Energy ETF, Global Frontier Index ETF, Gold Miners ETF, Hard Assets Producers Extra Liquid ETF, India Small-Cap Index ETF, Indonesia Index ETF, Internet ETF, Israel ETF, Junior Gold Miners ETF, Kuwait Index ETF, Metals ETF, MLP ETF, Mongolia ETF, Natural Resources ETF, Ned Davis Long/Flat International Equity ETF, Ned Davis Long/Flat US Equity ETF, Ned Davis Long/Flat US Small Cap Equity ETF, Nigeria ETF, Nigeria-Focused West Africa ETF, Oil Refiners ETF, Oil Services ETF, Poland ETF, Rare Earth/Strategic Metals ETF, Russia ETF, Russia Small-Cap ETF, Saudi Arabia ETF, Saudi Arabia Small-Cap ETF, Software ETF, Solar Energy ETF, Steel ETF, Telecom ETF, Unconventional Oil & Gas ETF, Uranium+Nuclear Energy ETF and Vietnam ETF (each, a “Fund” and together, the “Funds”) and (ii) a sub-advisory agreement between the Adviser and China Asset Management (Hong Kong) Limited (the “Sub-Adviser”) (the “Sub-Advisory Agreement”) with respect to each of VanEck Vectors ChinaAMC CSI 300 ETF and ChinaAMC SME-ChiNext ETF (the “China Funds”). The Investment Management Agreements and the Sub-Advisory Agreement are collectively referred to as the “Agreements.”

The Board’s approval of the Agreements was based on a comprehensive consideration of all of the information available to the Trustees and was not the result of any single factor. Some of the factors that figured particularly in the Trustees’ deliberations and how the Trustees considered those factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors.

In preparation for the Renewal Meeting, the Trustees held a meeting on May 8, 2017. At that meeting, the Trustees discussed the information the Adviser, the Sub-Adviser (with respect to the China Funds) and Broadridge Financial Solutions, Inc. (“Broadridge”), an independent third party data provider, had provided to them in advance. The information provided to the Trustees included, among other things, information about the performance (for those Funds which had begun operations) and expenses of the Funds and the Funds’ peer funds (other index-based exchange-traded funds (“ETFs”)), information about the advisory services provided to the Funds and the personnel providing those services, and the profitability and other benefits enjoyed by the Adviser and its affiliates as a result of the Adviser’s relationship with the Funds. In reviewing performance information for the Funds against their peer groups, the Trustees considered that each Fund except for the VanEck Vectors ChinaAMC CSI 300 ETF generally invests in a different group of issuers than the funds in its designated peer group. In addition, as noted below, the

Trustees reviewed certain performance information for each Fund that was not provided by Broadridge. For these and other reasons, the Trustees noted that the peer group performance information did not necessarily provide meaningful direct comparisons to the Funds.

The Independent Trustees' consideration of the Agreements was based, in part, on their review of information obtained through discussions with the Adviser at the Renewal Meeting and with the Adviser at the May 8, 2017 meeting regarding the management of the Funds and information obtained at other meetings of the Trustees and/or based on their review of the materials provided by the Adviser and the Sub-Adviser (with respect to the China Funds), including the background and experience of the portfolio manager(s) and others involved in the management and administration of the Funds. The Trustees considered the terms of, and scope of services that the Adviser and the Sub-Adviser (with respect to the China Funds) provide under, the Agreements, including the Adviser's commitment to waive certain fees and/or pay expenses of each of the Funds to the extent necessary to prevent the operating expenses of each of the Funds from exceeding

agreed upon limits for a period of time. With respect to the Sub-Advisory Agreement, the Trustees took into account the unique legal and operational aspects of the China Funds and the Sub-Adviser's experience with respect to Renminbi Qualified Institutional Investors Scheme funds. The Trustees also noted that the Sub-Adviser is a wholly-owned subsidiary of China Asset Management Co. Ltd., China's largest asset management company measured by fund assets under management.

The Trustees concluded that the Adviser, the Sub-Adviser (with respect to the China Funds) and their personnel have the requisite expertise and skill to manage the Funds' portfolios. In evaluating the performance over relevant periods of each of the Funds that had commenced operations prior to the date of the Renewal Meeting (the "Operating Funds"), the Trustees reviewed various performance metrics but relied principally on a comparison of the "gross" performance of each Operating Fund (*i.e.*, measured without regard to the impact of fees and expenses) to the performance of its benchmark index, in each case incorporating any systematic fair value adjustments to the underlying securities. Based on the foregoing, the Trustees concluded that the investment performance of the Operating Funds was satisfactory.

The Trustees also considered information relating to the financial condition of the Adviser and the Sub-Adviser (with respect to the China Funds) and the current status, as they understood it, of the Adviser's and Sub-Adviser's (with respect to the China Funds) compliance environment.

As noted above, the Trustees were also provided various data from Broadridge comparing the Operating Funds' expenses and performance to that of other ETFs. The Trustees noted that the information provided showed that each Operating Fund had management fees (after the effect of any applicable fee waiver) below or equal to the average and median of its respective peer group of funds, except for each of VanEck Vectors Agribusiness ETF, Coal ETF, Global Alternative Energy ETF, Russia ETF, Russia Small-Cap ETF and Steel ETF, which had management fees (after the effect of any applicable fee waiver) greater than the average and/or the median, of its peer group of funds. The Trustees also noted that the information provided showed that each Operating Fund had a total expense ratio (after the effect of any applicable expense limitation) below or equal to the average and median of its respective peer group of funds, except for each of VanEck Vectors Africa Index ETF, ChinaAMC SME-ChiNext ETF, Egypt Index ETF, Global Alternative Energy ETF, Israel ETF, Rare Earth/Strategic Metals ETF, Russia Small-Cap ETF, Solar Energy ETF, Steel ETF, Unconventional Oil & Gas ETF and Vietnam ETF, which had a total expense ratio (after the effect of any applicable expense limitation) greater than the average and/or median of its peer group of funds. With respect to these Operating Funds, the Trustees reviewed the amount by which these Operating Funds' management fees and/or total expense ratios (after the effect of any applicable expense limitation) exceeded the average and/or median of their respective peer groups and information provided by the Adviser providing context for these comparisons. The Trustees concluded, in light of this information and the other information available to them, that the fees paid by the Operating Funds were reasonable in light of the performance of the Operating Funds and the quality of services received.

The Trustees also considered the benefits, other than the fees under the Investment Management Agreements, received by the Adviser from serving as adviser to the Funds.

The Trustees also considered information provided by the Adviser about the overall profitability of the Adviser and its profitability or loss in respect of each Operating Fund. The Trustees reviewed each Fund's asset size, expense ratio and expense cap and noted that the Investment Management Agreements do not include breakpoints in the advisory fee rates as asset levels in a Fund increase. The Trustees considered the volatility of the asset classes in which certain of the Operating Funds invest, potential variability in the net assets of these Funds and the sustainability of any potential economies of scale which may exist given where fees are currently set. The Trustees also evaluated the extent to which management fees for the Operating Funds effectively incorporate the benefits of economies of scale. The Trustees noted that the Adviser has capped expenses on each Operating Fund since its inception. Based on the foregoing and the other information available to them, the Trustees determined that the advisory fee rate for each Fund and the sub-advisory fee rates for the China Funds are reasonable and appropriate in relation to the current asset size of each Fund and the other factors discussed above and that the advisory fee rate for each Fund currently reflects an appropriate sharing with shareholders of any economies of scale which may exist. The Trustees also determined that the profits earned by the Adviser with respect to the Funds that were profitable to the Adviser

VANECK VECTORS ETF TRUST

APPROVAL OF INVESTMENT MANAGEMENT AGREEMENTS

June 30, 2017 (unaudited) (continued)

were reasonable in light of the nature and quality of the services received by such Funds. Due to the relatively small size of the China Funds during the period, the Sub-Adviser did not provide the Trustees with profitability information and, therefore, the Trustees did not consider such information.

The Trustees did not consider historical information about the cost of the services provided by the Adviser or the profitability to the Adviser of VanEck Vectors Agriculture Producers ETF, China All-Cap ETF, China Consumer Discretionary ETF, China Consumer Staples ETF, China Energy ETF, China Financials ETF, China Health Care ETF, China Industrials ETF, China Information Technology ETF, China Materials ETF, China Small-Cap ETF, China Utilities ETF, ChinaAMC All China Consumer ETF, ChinaAMC Environmental Protection ETF, ChinaAMC Private-Owned Enterprises ETF, ChinaAMC MSCI All China ETF, ChinaAMC MSCI All China Small Cap ETF, Emerging Europe ex-Russia Index ETF, Energy Producers ETF, GDP Weighted Emerging Markets ETF, GDP Weighted Emerging Markets Small-Cap ETF, GDP Weighted International ex-US ETF, Germany Mid-Cap ETF, Global Frontier Index ETF, Hard Assets Producers Extra Liquid ETF, Internet ETF, Kuwait Index ETF, Metals ETF, MLP ETF, Mongolia ETF, Ned Davis Long/Flat International Equity ETF, Ned Davis Long/Flat US Equity ETF, Ned Davis Long/Flat US Small Cap Equity ETF, Nigeria ETF, Nigeria-Focused West Africa ETF, Saudi Arabia ETF, Saudi Arabia Small-Cap ETF, Software ETF and Telecom ETF because the Funds had not yet commenced operations at the time of the Renewal Meeting. The Trustees could not consider the historical performance or the quality of services previously provided to each of these Funds although they concluded that the nature, quality and extent of the services to be provided by the Adviser (and the Sub-Adviser, with respect to those Funds in respect of which the Sub-Adviser had been retained) were appropriate based on the Trustees' knowledge of the Adviser and its personnel and the operations of the other series of the Trust.

The Independent Trustees were advised by and met in executive session with their independent counsel at the Renewal Meeting and at their May 8, 2017 meeting as part of their consideration of the Agreements.

In voting to approve the continuation of the Agreements, the Trustees, including the Independent Trustees, concluded that the terms of each Agreement are reasonable and fair in light of the services to be performed, expenses to be incurred and such other matters as the Trustees considered relevant in the exercise of their reasonable judgment. The Trustees further concluded that each Agreement is in the best interest of each Fund and such Fund's shareholders.

VANECK VECTORS ETFs

June 30, 2017 (unaudited)

Dear Shareholder:

2016 saw crude oil prices rising fitfully but decisively during the year. The first six months of 2017 saw a significant reversal. We continue to believe, however, that we are in a commodities bull market and that the current doldrums, especially for crude oil, are indicative of an early pause/correction in that market.

We also continue to believe that commodity markets, and especially the crude oil market, are rebalancing. Demand for oil remains robust, but, after the huge capex cuts that oil producers have been forced to make over the past several years, the longer-term outlook for supply looks anything but rosy.

*Source: FactSet as of June 30, 2017. WTI = West Texas Intermediate. Not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue.*

Depending upon their particular outlooks, investors with a focus on energy will find that a number of funds in the suite of VanEck Vectors Hard Assets ETFs may offer interesting opportunities.

For those with a bullish outlook, there are two funds in particular that should be considered: VanEck Vectors Oil Services ETF (NYSE Arca: OIH) and VanEck Vectors Unconventional Oil & Gas ETF (NYSE Arca: FRAK). For those who might take a contrarian view there is VanEck Vectors Oil Refiners ETF (NYSE Arca: CRAK).

Three other ETFs provide alternative energy exposure: VanEck Vectors Uranium+Nuclear Energy ETF (NYSE Arca: NLR), VanEck Vectors Global Alternative Energy ETF (NYSE Arca: GEX), and VanEck Vectors Solar Energy ETF (NYSE Arca: KWT). In the first six months of 2017, GEX and KWT were the top two performers in the suite of funds, with GEX posting a return of 17.56% and KWT a return of 15.27% for the period.

Going forward, we will, of course, continue to seek out and evaluate the most attractive opportunities for you as a shareholder in the hard assets space.

**Management Discussion** (unaudited)**Hard Assets Market Overview**

The VanEck® Natural Resources Index (RVEIT)<sup>‡</sup> tracked by VanEck Vectors Natural Resources ETF (NYSE Arca: HAP), which includes equities of the world's largest and most prominent hard assets producers, remains the most comprehensive index in this space. For the six month period ending June 30, 2017, the index returned +1.51%.

The table below shows average sector weightings within this index and the total return of each sector for the six month period ending June 30, 2017.

<b>RVEIT Sector<sup>‡</sup></b>	<b>Average Sector Weighting</b>	<b>Six Month Total Return for Period Ending June 30, 2017</b>
Agriculture	40.85%	4.84%
Energy	29.11%	-7.97%
Base/Industrial Metals	13.94%	4.54%
Precious Metals	7.28%	3.72%
Alternatives	4.73%	16.54%
Paper & Forest Products	4.10%	19.40%

*Source: VanEck; FactSet; S-Network Global Indexes, Inc. Past performance is no guarantee of future results; current performance may be lower or higher than the performance data quoted. Index performance is not illustrative of fund performance. Investors cannot invest directly in an index.*

Five out of the six sectors—agriculture, base/industrial metals, precious metals, alternatives, and paper & forest products—had positive returns over the six months ending June 30, 2017. While the paper and forest products sector, with the smallest average weighting, posted the highest total return for the six month period, the second smallest by average weighting, alternatives, posted the next highest return for the same period. The precious metals sector, with the fourth largest average weighting, posted the second lowest positive return. The energy sector, with the second highest average weighting, was the only sector to post a negative return.

Eleven of the suite of 13 VanEck Vectors Hard Assets ETFs posted positive total returns during the six month period, with VanEck Vectors Global Alternative Energy ETF (NYSE Arca: GEX) (+17.56%) and VanEck Vectors Solar ETF

## Edgar Filing: VanEck Vectors ETF Trust - Form N-CSRS

(NYSE Arca: KWT) (+15.27%), the two top performing funds, each producing solid performance. VanEck Vectors Oil Services ETF (NYSE Arca: OIH) (-25.69%) and the VanEck Vectors Unconventional Oil and Gas ETF (NYSE Arca: FRAK) (-23.51%) were the two worst performing Hard Assets ETFs.

VANECK VECTORS ETFs

(unaudited) (continued)

***Agribusiness***

The performance of the agribusiness industry during the first six months of 2017 remained resilient, with the Fund returning 7.24%. The primary drivers of positive performance were companies in the industrial sector and, in particular, those in the machinery segment. The greatest positive returns came from companies in the U.S., while the greatest negative returns came from those in Canada. The consumer discretionary sector was the only sector to detract from performance.

***Coal***

The performance of coal stocks was lackluster in the first six months of 2017 with the Fund returning 7.03%. The 2017 edition of BP's annual report "Statistical Review of World Energy" noted that: "Coal consumption fell sharply for the second consecutive year, with its share within primary energy falling to its lowest level since 2004.<sup>1</sup> Globally coal production fell by 6.2%, and in the U.S. and China, declined 19% and 7.9%, respectively, during the year.<sup>2</sup> However, according to the U.S. Energy Information Agency: "Coal exports for the first quarter of 2017 were 58% higher than in the same quarter last year, with steam coal exports increasing by 6 million short tons.<sup>3</sup> Coal remains the world's most important fuel for making cement, producing steel, and generating energy.<sup>4</sup>

China was the single largest contributor to returns, followed by Australia. Canada, followed by the U.S., detracted most from the sector's performance.

***Global Alternative Energy***

The performance of global alternative energy stocks during the six month period was particularly notable and the Fund recorded a strong positive return of 17.56% for the six month period. Companies in the consumer discretionary and industrials sectors contributed the most to performance. The strongest negative performance came from companies involved oil, gas, and consumable fuels. Companies in the U.S. and Denmark contributed the most positively to performance. Companies from Germany and Brazil detracted the most from performance.

***Gold Miners***

Both major gold miners and their junior peers had a choppy six months. Despite the price of gold rising steadily if fitfully during the period, the larger gold miners (VanEck Vectors Gold Miners ETF) posted a positive return of 5.40%; junior gold miners (VanEck Vectors Junior Gold Miners ETF) posted a similar return of 5.39% for the period.

Among the larger mining stocks, Canadian companies, with the largest average sector weighting, were also the strongest contributors to performance. Companies in both China and South Africa detracted from performance. The situation was similar among the juniors, with Canada the strongest contributor, followed by Australia and Peru. China and South Africa were the two countries to detract most from performance.

### *Natural Resources*

The Fund returned 1.55% over the six month period under review. Five sectors contributed positively to performance. Paper and forest products, constituting the second smallest segment of the natural resources industry, provided the largest positive returns. Energy and consumer discretionary sectors contributed negatively to performance during the period under review.

### *Oil Refiners*

The first six months of the year were particularly positive for the refining stocks in the Fund. Much of this was related to the changes that occurred in the crude oil market. Refiners were helped by the fall in crude oil prices over the six month period, but especially in the four months from March through June, and subsequently benefited from lower refinery feedstock prices. The Fund returned 11.12% for the six month period. While exposure to refiners in India, Poland, Turkey, and Japan contributed most to performance, refiners in the U.S., with the largest average weighting in the sector, detracted most from performance for the period, albeit minimally.

### *Oil Services*

From early January through June, oil services stocks embarked on a steady decline, suffering from the fall in oil prices during the first half of the year. While onshore drilling activity in the U.S. during the first six months of 2017 may have continued to pick up, oil services companies have lagged the recovery of U.S. shale oil producers.<sup>5</sup> At the end of 2016, the U.S. rig count stood at 658. At the end of June, the count had hit 940.<sup>6</sup> The Fund declined 25.69% for the six month period. Oil service stocks in the U.S., with the largest average weighting in the sector, detracted the most from performance. Companies in the U.K., the Netherlands, and Switzerland also all detracted from performance.

### *Rare Earth and Strategic Metals*

Having peaked in late February, the Fund then declined, but still ended the six month period with a gain of 4.08%. The greatest contributors to performance were companies with mining operations in South Africa, Australia, and China mining rare earths, molybdenum, and titanium feedstock. The greatest detractors included companies involved in lithium and rare earths. Mid-cap companies performed better than their large- and small-cap peers during the period under review.

### *Solar Energy*

In stark contrast to their poor performance in 2016, solar energy stocks posted a solid total return of 15.27% for the first six months of 2017. Within the sector, the greatest contributors to performance were companies involved in semiconductors and semiconductor equipment in the U.S., followed by solar companies in Switzerland, Spain, and China. Only companies in Thailand detracted from performance.

### *Steel*

Having hit a high for the six month period in late February, steel stocks gave back those earlier gains and the Fund rose 1.82% over the period under review. At 143.3 million tonnes, May 2017 global steel production was up 2.0% compared with May 2016 and up 1.2 million tonnes (0.8%) from April 2017. Although capacity utilization rose from 67.6% in December 2016 to 73.6% in April 2017, it fell to 71.8% in May 2017.<sup>7</sup> In an article at the end of May, *Bloomberg* reported that: “Chief executive officers of America’s largest steelmakers said global overcapacity of the metal is at crisis levels as they urged the U.S. to determine that cheap steel imports are a threat to national security.”<sup>8</sup> Despite this, according to *Bloomberg*, “American steel producers are benefiting from many trade cases last year that

helped boost many companies to their biggest gains in at least a decade.<sup>9</sup> Even with the benefit of these cases, companies in the U.S., with the largest average sector weighting during the period under review, were the greatest negative contributors to total return. Steel companies in Russia also detracted from performance. Geographically, the U.K. was the largest positive contributor to performance.

### *Unconventional Oil & Gas*

During the first half of 2017, unconventional energy companies suffered from the continuing decline in oil prices and the Fund lost 23.51% over the period under review. This was despite the fact that OPEC and non-OPEC producers struck deals the end of November and early in December 2016 to reduce production and agreed to extend these same production cuts at the end of May 2017. Over the period under review, West Texas Intermediate (WTI) front month crude prices fell from \$53.72/barrel to end June at \$46.04/barrel. Unconventional energy, particularly shale oil, companies suffered accordingly. U.S. stocks (on average approximately 83% of the Fund by weight during the period under review) detracted the most from performance.

### *Uranium and Nuclear Energy*

Performance in the first half of 2017 was positive and the Fund returned 5.78% for the period. Utility companies, with the largest average weighting over the period, produced all the Fund's positive total return, with the energy and industrial sectors both detracting from performance. Geographically, companies in the U.S. contributed the most to performance, while Canada was the greatest detractor from performance.

According to the World Nuclear Association at the start of May, there were some 447 operable nuclear power reactors in 30 countries and 59 power reactors currently under construction in 14 countries, notably China, India, and Russia.<sup>10</sup>
