INVESTMENT OBJECTIVES & STRATEGY

The Chartwell Dividend and Income Fund's [the "Fund"] primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The Fund will seek to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in income generating equity securities, including dividend paying common stocks, convertible securities, preferred stocks and other equity-related securities. In addition, the Fund may invest the balance of its total assets in non-convertible debt securities, consisting primarily of corporate bonds. The Fund attempts to minimize individual security risk by diversifying across many industries and asset classes. The Fund is a closed-end management investment company which trades on the New York Stock Exchange under the symbol CWF.

HIGH-YIELD CORPORATE BONDS

High-yield bonds are non-investment grade corporate debt obligations rated "Ba1" or lower by Moody's Investors Service, Inc. or "BB+" or lower by Standard and Poor's Ratings Group; they typically have a higher risk level than investment-grade bonds. These securities have historically compensated investors with higher levels of income for that risk. Prices usually are less sensitive to interest rate fluctuations than higher rated bonds because of the high income levels. However, the prices of these bonds are more sensitive to changes in the economy.

CONVERTIBLE SECURITIES

The Fund can invest in both convertible preferred stock and convertible bonds. Both pay fixed rates of income, but because they can be converted into common stock, they are indirectly tied to the common stock's performance. As a result, convertible securities generally offer higher income than common stocks and an opportunity for price appreciation when the value of the underlying security rises. The Fund buys convertibles when the underlying common stock offers strong growth potential as well.

COMMON STOCK

The Fund invests in the common stocks of utility companies, Real Estate Investment Trusts (REITs) and other industrial and financial companies as well as other equity securities. Both utilities and REITs tend to offer a premium dividend yield with steady growth that can lead to capital appreciation. Industrial and financial stocks are primarily purchased for capital appreciation based on the fundamental value of the underlying company.

LETTER TO SHAREHOLDERS

In 2003, equity and fixed income markets posted positive returns, gaining back some of the losses posted over the prior three years. The first quarter of the year was a continuance of the bear market as investors looked backward at corporate scandals, falling earnings, bankruptcies, and the uncertainty of the war in Iraq. However, with the end of the hot war and the passing of major tax

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

cuts, investors again took a forward looking perspective and redirected capital into equities and high yield bonds. This resurgence of investor confidence and early signs of an economic upturn were catalysts for the markets' positive results.

The investment objective of the Fund is first to provide income and secondarily to provide capital gains to our investors. To achieve this goal, the Fund primarily utilizes high-yielding stocks, an option overwrite strategy on some of these stocks and high yield, low rated, corporate bonds.

During the Fund's fiscal year ended November 30, 2003, the S&P 500 equity index advanced 15.08% and the Merrill Lynch High Yield Cash Pay bond index returned 26.2%. The Fund's total return on a net asset value basis was 28.96%, assuming reinvestment of dividends. The total market return of the Fund was 51.57% to shareholders on a market basis assuming reinvestment of dividends in additional shares of the Fund. The closing price as of November 30, 2003 was \$9.80, a premium of 15.0% to NAV. This compares to a discount to NAV as of November 30, 2002. For the Fund's fiscal year, the Fund traded between \$7.09 and \$9.88 and between a 3.9% discount and a 16.8% premium to NAV.

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2003

Our stock market outlook for 2004 is guardedly optimistic. We believe that stock market returns will approximate the dividend yield plus earnings growth, with less likelihood of significant valuation expansion. Similarly, we anticipate that high yield bond returns will approximate the current yield on bonds, with less likelihood of significant further price appreciation. We are optimistic about our style of investing in this market. The assets in the portfolio provide more income than the broad market and we believe our equity portfolio has room for reasonable earnings growth, which can provide positive returns for our holders.

At the end of the second fiscal quarter, Leslie M. Varrelman, Vice President/Portfolio Manager of the Fund's fixed income investments, resigned from the Advisor. We are pleased to welcome Paul Matlack who has replaced Leslie M.

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

The high yield rally has been fueled by a number of factors, beginning with oversold conditions at the start of the year, gathering signs of economic recovery, falling interest rates, rallying stock prices, and record-breaking inflows into high yield bond funds. Additionally, the fundamental risk factor for high yield bonds is default rates, and that indicator has fallen to an annual level of just 5.3%, after peaking at 10.5% during 2001.

Returns during the fiscal year were inversely correlated with credit quality, with the riskiest credit tiers, coupon structures, and industries outperforming all others. For example, CCC-rated issues, the lowest rung on the credit ladder, returned 57.5%, compared to 23.4% and 19.5% for B's and BB's, respectively. Similarly, zero coupon high yield bonds returned 76.5% for the period, compared to 26.2% for cash pay bonds. Industry returns followed the same pattern, ranging from 55.3% for struggling electric utility companies to just 13.0% for higher quality healthcare issues. Not surprisingly, the Fund's top performers were its positions in Calpine Corp., AES Corp., and PSEG Energy Holdings, all lower quality electric utilities. The Fund's worst performing issues were Fleming and Healthsouth, which declined as a result of announced accounting irregularities at both companies. These issues have been sold.

 CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2003

OUTLOOK:

Historically, the period from the trough of the economic cycle to the mid-point

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

of the ensuing expansion has been the performance "sweet spot" for the high yield market, and we believe this scenario is just beginning to play out. While credit spreads continue to narrow as the economy expands, we believe that the most dramatic spread compression is likely behind us and returns will increasingly consist largely of income. However, we believe the relative performance of high yield bonds, particularly in the context of fixed income alternatives, will remain attractive. In particular, the relative insensitivity of high yield securities to rising interest rates (compared to higher quality bond instruments) implies that the asset class will continue to attract capital if the scenario of robust economic expansion unfolds as many expect.

Our high yield strategy is based on generating returns by conserving principal and compounding the coupon stream. We implement this by building well-diversified portfolios centered on higher quality B and BB-rated cash pay high yield securities in industries demonstrating stable to positive growth characteristics. Since our credit management process focuses heavily on downside risks, the Fund's returns may be expected to modestly underperform the broad high yield index in sharp market rallies like the one experienced since the fourth quarter of 2002. However, we believe the conservative approach to high yield investing remains the proven route to out performance over the full market cycle.

The equity markets were very strong in 2003, ending three years of very difficult returns. Wars ended, taxes were cut, mortgage rates hit 40 year lows, profits improved and the equity markets advanced. The biggest advancers for the year generally were those sectors with the worst sentiment at the height of the war in Iraq: industrials, technology, and consumer cyclicals. Surprise winners were REITs and utilities which performed very well despite lacking speculative

appeal. Hurting the Fund's performance were more `stable' sectors, such as several healthcare and Telecommunications issues.

OUTLOOK:

We have a relatively restrained outlook for equity returns in 2004. Investor friendly tax cuts will likely continue to induce investors to put money into stocks. We believe that companies with stable, growing earnings will eventually assume leadership from cyclical, economically sensitive stocks. We are carefully monitoring consumer spending while waiting for more signs of corporate capital spending.

Going forward, we expect much more moderate returns from the equity markets as contrasted to last year's surge. Earnings should improve approximately 10% for the S&P 500 according to Thomson First Call estimates. As of December 31, 2003, the P/E on the S&P 500 is 17x forward earnings estimates while the 10-year Treasury bond yields 4.2%, which should sustain current valuations. We see room for positive equity returns in 2004 roughly commensurate with earnings growth.

UTILIZATION OF LEVERAGE

The Chartwell Dividend and Income Fund has utilized leverage through the issuance of commercial paper. As of November 30, 2003, the Fund had \$50 million in leverage outstanding (out of \$60 million available) in the form of commercial paper rated A1/P1 by Moody's Investors Service, Inc./Standard & Poor's Ratings Group. These ratings should enhance the marketability and reduce the interest costs associated with the issuance of the commercial paper. However, it must be noted that the utilization of leverage involves the risk of lower portfolio returns if the cost of leverage is higher than the resulting yields on assets or if the Fund experiences capital losses in excess of the yield spread, if any. Therefore, the addition of leverage also increases the potential volatility of the Fund. The Fund has the ability to leverage to a maximum of 33% of the Fund's gross assets.

The Fund utilizes leveraging to seek to enhance the yield and net asset value of its common stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues commercial paper, which is issued at a discount equivalent to short-term interest rates, and invests the proceeds in long-term securities. The interest earned on these investments is paid to common stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's common stock. However, in order to benefit common stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit common stock shareholders. IF EITHER OF THESE CONDITIONS CHANGE, THEN THE RISKS OF LEVERAGING WILL BEGIN TO OUTWEIGH THE BENEFITS.

To illustrate these concepts, assume a fund's common stock capitalization of \$100 million and the issuance of commercial paper for an additional \$50 million, creating a total value of \$150 million available for investment in long-term securities. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays a discount on the \$50 million of commercial paper

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the discount paid to commercial paper holders is significantly lower than the income earned on the Fund's long-term investments, and therefore the common stock shareholders are the beneficiaries of the incremental yield. However, IF SHORT-TERM INTEREST RATES RISE, narrowing the differential between short-term and long-term interest rates, THE INCREMENTAL YIELD PICK-UP ON THE COMMON STOCK WILL BE REDUCED OR ELIMINATED COMPLETELY. At the same time, the market value on the Fund's common stock (that is, its price as listed on the New York Stock Exchange), may, as a result, decline. Furthermore, IF LONG-TERM INTEREST RATES RISE, THE COMMON STOCK'S NET ASSET VALUE WILL REFLECT THE FULL DECLINE IN THE PRICE OF THE PORTFOLIO'S INVESTMENTS, SINCE THE VALUE OF THE FUND'S COMMERCIAL PAPER DOES NOT FLUCTUATE. In addition to the decline in net asset value, the market value of the Fund's common stock may also decline.

Dividends and distributions, if any, are assumed for the purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment returns based on market value, which can be significantly greater or lesser than the net asset value, may result in substantially different returns. NOTES TO FINANCIAL STATEMENTS

Chartwell Dividend and Income Fund, Inc. (the "Fund") was incorporated under the laws of the State of Maryland on April 6, 1998 and is registered under the Investment Company Act of 1940 as amended, (the "Act"), as a closed-end, diversified management investment company. The Fund had no operations until June 17, 1998 when it sold 6,667 shares of common stock for \$100,005 to Chartwell Investment Partners, L.P. (the "Manager"). Investment operations commenced on June 29, 1998. The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective.

NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

USE OF ESTIMATES: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

SECURITY VALUATION: Investment securities of the Fund that are listed on a securities exchange, except for debt securities, and for which market quotations are readily available, are valued at the last quoted sales price at the close of trading on the New York Stock Exchange (normally 4:00 p.m., Eastern Time). Investment securities of the Fund that are quoted on the NASDAQ market system are valued at the official closing price, or if there is none, at the last sales price. If there is no reported sale, these securities and unlisted securities for which market quotations are not readily available, are valued at last bid price. Long-term debt securities are valued on the basis of valuations provided by a pricing service when such prices are believed to reflect the fair value of such securities. All securities and assets for which quotations are not readily available are valued at fair value as determined in good faith and pursuant to a

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

method approved by the Board of Directors. Short-term investments having a maturity of less than 60 days are valued at amortized cost, which approximates market value.

CASH AND CASH EQUIVALENTS: Idle cash is swept into a money market fund at Wachovia Bank, N.A., the Fund's custodian, and is classified as cash on the Statement of Assets and Liabilities. Amounts so invested are generally available on the same business day.

30

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2003

WRITTEN OPTIONS: When the Fund writes a covered call option, an amount equal to the premium received by the Fund is included in the Fund's Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written.

When a covered written call option expires on its stipulated expiration date, or if the Fund enters into a closing purchase transaction, the Fund will realize a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the call option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option will be extinguished. When a covered written call option is exercised, the Fund will realize a gain or loss from the sale of the underlying security and the proceeds of the sale are increased by the premium originally received. The Fund as writer of an option has no control over whether the underlying securities may be sold (called) and as a result bears the market risk of an unfavorable change in the price of the securities underlying the written option.

DIVIDENDS AND DISTRIBUTIONS: The Fund will declare and pay dividends to shareholders on a monthly basis. Long-term capital gains, if any, in excess of loss carryforwards are distributed to shareholders annually. Dividends from net investment income and capital gain distributions are determined in accordance with U.S. Federal income tax regulations, which may differ from generally accepted accounting principles. Dividends and distributions to shareholders are recorded on the ex-dividend date.

The Fund currently intends to distribute a monthly fixed amount to shareholders. The Fund's final distribution for each calendar year may exceed that amount, however, to the extent necessary for the Fund to have distributed all of its net investment company taxable income and net capital gains recognized during the year, if any. If, for any calendar year, the total distributions exceed net investment company taxable income and net capital gain, the excess, distributed from the Fund's assets, will generally be treated as a tax-free return of capital and will result in a reduction in the shareholder's basis. The Board of Directors reserves the right to change the aforementioned dividend policy from time-to time.

SECURITIES PURCHASED ON A WHEN-ISSUED BASIS: Delivery and payment for securities that have been purchased by the Fund on a forward commitment or when-issued basis can take place up to a month or more after the transaction date. The purchase of securities on a when-issued or forward commitment basis may increase the volatility of the Fund's net asset value if the Fund makes such investments

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

while remaining substantially fully invested.

31

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2003

BORROWINGS: The Fund issues short-term commercial paper at a discount from par. The discount is amortized to interest expense over the life of the commercial paper using the straight line method.

SECURITY TRANSACTIONS AND INVESTMENT INCOME: Security transactions are recorded on the trade date. Realized gains and losses on sales of securities are calculated on the identified cost basis.

Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. The Fund accretes original issue discount on securities using the effective interest method.

NOTE 2. INVESTMENT MANAGEMENT, ADMINISTRATION, CUSTODIAN AGREEMENTS AND OTHER TRANSACTIONS WITH AFFILIATES

The Fund has entered into an investment management agreement with the Manager. The Manager manages the Fund's portfolio and makes investment decisions. For these services, the Fund pays the Manager a monthly fee at an annual rate of 0.95% of the Fund's Managed Assets. "Managed Assets" are the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, excluding debt related to leveraging, short-term debt and the aggregate liquidation preference of any outstanding preferred stock. The Manager has agreed to limit the investment management fee paid to it by the Fund to 0.85% of the Fund's Managed Assets. This waiver is voluntary and may be changed at any time.

The Fund has entered into an administration agreement with SEI Investments Global Funds Services (the "Administrator"). Under such agreement, the Administrator performs or arranges for the performance of certain administrative services necessary for the operation of the Fund. For these services, the Fund pays a fee to the Administrator based on the Fund's Managed Assets according to the following rates: 0.10% on the first \$250 million of such Managed Assets and 0.09% on such Managed Assets in excess of \$250 million, subject to a minimum annual fee of \$180,000, which includes fees under this agreement and fees received by the Administrator from the Chartwell Large Cap Value and Chartwell Small Cap Value Funds. The Allocation of the minimum will be assessed based upon Managed Assets of the Fund and net assets of the Chartwell Large Cap Value and Chartwell Small Cap Value Funds.

Certain officers and/or directors of the Fund are officers and/or directors of the Manager. Prior to April 16, 2003, the Fund paid to each director who is not an "affiliated person" as defined in the Act a fee of \$4,000 per year plus \$250 for each meeting attended. As of April 16, 2003, directors fees paid by the Fund consist of \$6,000 per year, plus \$1,000 per year for audit committee members and an additional fee of \$250 per year for the chairman of the audit committee.

NOTE 4. COMMERCIAL PAPER

As of November 30, 2003, \$50,000,000 of commercial paper was outstanding with an amortized cost of \$49,939,003. The average discount rate of commercial paper outstanding at November 30, 2003 was 1.24%. The average daily balance of commercial paper outstanding for the year ended November 30, 2003 was \$49,924,600 at a weighted average discount rate of 1.43%. The maximum face amount of commercial paper outstanding at any time during the year ended November 30, 2003, was \$50,000,000. In conjunction with the issuance of the commercial paper, the Fund entered into a line of credit arrangement with a bank for \$30,000,000. Interest on borrowing is based on market rates in effect at the time of borrowing. The commitment fee is computed at the rate of 0.30% per annum on the unused balance. During the year ended November 30, 2003, there were no borrowings under this arrangement.

NOTE 5. CAPITAL STOCK

There are 100,000,000 shares of \$0.01 par value common stock authorized. Of the 16,325,515 shares of common stock outstanding at November 30, 2003, the Manager owned 12,156 shares.

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2003

NOTE 6. MARKET AND CREDIT RISKS

The Fund may invest in high-yielding fixed-income securities, which carry ratings of BB or lower by S&P and/or Ba1 or lower by Moody's. Investments in these higher-yielding securities may be accompanied by a greater degree of credit risk than higher rated securities. Additionally, lower-rated securities may be more susceptible to adverse economic and competitive industry conditions than investment-grade securities. The Fund may invest up to 15% of its total assets in illiquid securities and other securities which may not be readily marketable. In addition, the Fund may purchase securities sold in reliance of Rule 144A of the Securities Act of 1933. The relative illiquidity of some of the Fund's portfolio securities may adversely affect the ability of the Fund to dispose of such securities in a timely manner and at a fair price at times when it might be necessary or advantageous for the Fund to liquidate portfolio securities.

NOTE 7. FEDERAL TAX INFORMATION

It is the Fund's intention to continue to meet the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders. Therefore, no provision for Federal income tax or excise tax is required.

In accordance with accounting pronouncements, the Fund has recorded several reclassifications in the capital accounts. These reclassifications have no impact on the net asset value of the Fund. These differences, which may result in distribution reclassifications, are primarily due to return of capital, wash sales, and market discount bonds sold at a gain. As of November 30, 2003, the Fund recorded the following reclassifications to increase (decrease) the accounts listed below:

ADDITIONAL PAID-IN- CAPITAL	UNDISTRIBUTED NET INVESTMENT INCOME/ (LOSS)	ACCUMULATED REALIZED GAIN/ (LOSS)
-----	-----	-----
\$(6,254,835)	\$6,438,230	\$(183,395)

The tax character of dividends and distributions paid during the last two fiscal years were as follows:

For Federal income tax purposes, the cost of securities owned at November 30, 2003 and the net realized gains or losses on securities sold for the year then ended were different from the amounts reported for financial reporting purposes, primarily due to wash sales which cannot be used for Federal income tax purposes in the current year and have been deferred for use in future years. The Federal tax cost, aggregate gross unrealized appreciation and depreciation on investments and options, held by the Fund at November 30, 2003 were as follows:

REPORT OF INDEPENDENT AUDITORS

To the Board of Directors and Shareholders of
Chartwell Dividend and Income Fund, Inc.:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of cash flows and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Chartwell Dividend and Income Fund, Inc. (the "Fund") at November 30, 2003, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at November 30, 2003 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

AUTOMATIC DIVIDEND REINVESTMENT PLAN (UNAUDITED)

Pursuant to the Fund's Automatic Dividend Reinvestment Plan (the "Plan"), unless a shareholder otherwise elects, all dividend and capital gains distributions will be automatically reinvested in additional shares of common stock of the Fund by PFPC Inc., as agent for shareholders in administering the Plan (the

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

"Plan Agent"). Shareholders who elect not to participate in the Plan will receive all dividends and distributions in cash, paid by check mailed directly to the shareholder of record (or, if the shares are held in street or other nominee name, then to such nominee) by PFPC Inc., as dividend paying agent. Such participants may elect not to participate in the Plan and to receive all distributions of dividends and capital gains in cash by sending written instructions to PFPC Inc., as dividend paying agent, at the address set forth below.

Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by written notice if received by the Plan Agent not less than ten days prior to any dividend record date. Otherwise such termination will be effective with respect to any subsequently declared dividend or distribution.

Whenever the Fund declares a distribution, an ordinary income dividend or a capital gain dividend (collectively referred to as "dividends") payable either in shares or in cash, non-participants in the Plan will receive cash, and participants in the Plan will receive the equivalent in shares of common stock. The shares will be acquired by the Plan Agent for the participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized shares of common stock from the Fund or (ii) by purchase of outstanding shares of common stock on the open market on the NYSE or elsewhere. If on the payment date of the dividend, the net asset value per share of the common stock is equal to or less than the market price per share plus estimated brokerage commissions (such condition being referred to herein as "market premium"), the Plan Agent will invest the dividend amount in newly issued shares on behalf of the participant. The number of newly issued shares of common stock to be credited to the participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (such condition being referred to herein as "market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases.

In the event of a market discount on the dividend payment date, the Plan Agent will have until the last business day before the next date on which the shares trade on the "ex-dividend" basis or in no event more than 30 days after the

37

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

dividend payment date to invest the dividend amount in shares acquired in open-market purchases. If, before the Plan Agent has completed its open-market purchases, the market price of a share of common stock exceeds the net asset value per share, the average per share purchase price paid by the Plan Agent may exceed the net asset value of the Fund's shares, resulting in the acquisition of fewer shares than if the dividend had been paid in newly issued shares on the dividend payment date. The Plan provides that if the Plan Agent is unable to invest the full dividend amount in open-market purchases during the purchase period or if the market discount shifts to market premium during the purchase period, the Plan Agent will cease making open-market purchases and will invest the uninvested portion of the dividend amount in newly issued shares at the close of business on the last purchase date.

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held pursuant to the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the record shareholders as representing the total amount registered in the record shareholder's name and held for the account of beneficial owners who are to participate in the Plan.

There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gain distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with reinvestment of dividends.

The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends.

Shareholders participating in the Plan may receive benefits not available to shareholders not participating in the Plan. If the market price plus commissions of the Fund's shares is above the net asset value, participants in the Plan will receive shares of the Fund at less than they could otherwise purchase them and will have shares with a cash value greater than the value of any cash distribution they would have received on their shares. If the market price plus

38

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2003

commissions is below the net asset value, participants will receive distributions in shares with a net asset value greater than the value of any cash distribution they would have received on their shares. However, there may be insufficient shares available in the market to make distributions in shares at prices below the net asset value. Also, since the Fund does not redeem its shares, the price on resale may be more or less than the net asset value.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence concerning the Plan should be directed to the Plan Agent at PFPC Inc., P.O. Box 43027, Providence, RI 02940-3027, Attn: Closed-End Department.

A description of the

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

Adviser's Proxy Voting Policies and Procedures is included as an Exhibit hereto.

CHARTWELL INVESTMENT PARTNERS PROXY VOTING POLICIES AND PROCEDURES

ADOPTED APRIL 11, 1997
AS AMENDED JUNE 24, 2003

PURPOSE. Chartwell Investment Partners ("Chartwell") has adopted these Proxy Voting Policies and Procedures ("Policies") to seek to ensure that it exercises voting authority on behalf of Chartwell clients in a manner consistent with the best interests of each client and its agreement with the client.

SCOPE. These Policies apply where clients have delegated the authority and responsibility to Chartwell to decide how to vote proxies. Chartwell does not accept or retain authority to vote proxies in accordance with individual client guidelines. Clients that wish to arrange to vote proxies in accordance with their own guidelines may elect to do so at any time by notifying Chartwell. Chartwell generally will follow these Policies if asked to make recommendations about proxy voting to clients who request that advice but have not delegated proxy voting responsibility to Chartwell.

GUIDING PRINCIPLES. Chartwell believes that voting proxies in the best interests of each client means making a judgment as to what voting decision is most likely to maximize total return to the client as an investor in the securities being voted, and casting the vote accordingly. For this reason, Chartwell's evaluation of the possible impact of a proxy vote on the economic interests of company shareholders similarly situated to Chartwell's clients will be the primary factor governing Chartwell's proxy voting decisions.

USE OF INDEPENDENT PROXY VOTING SERVICE. Chartwell has retained Institutional Shareholder Services, Inc., ("ISS") an independent proxy voting service, to assist it in analyzing specific proxy votes with respect to securities held by Chartwell clients and to handle the mechanical aspects of casting votes. Historically, Chartwell has placed substantial reliance on ISS' analyses and recommendations and generally gives instructions to ISS to vote proxies in accordance with ISS' recommendations, unless Chartwell reaches a different conclusion than ISS about how a particular matter should be voted. ISS proxy voting recommendations typically are made available to Chartwell about a week before the proxy must be voted, and are reviewed and monitored by members of the Proxy Voting Committee (and, in certain cases, by Chartwell portfolio managers), with a view to determining whether it is in the best interests of Chartwell's clients to vote proxies as recommended by ISS, or whether client proxies should be voted on a particular proposal in another manner.

ADMINISTRATION OF POLICIES. Chartwell has established a Proxy Voting Committee to oversee and administer the voting of proxies on behalf of clients, comprised of approximately five representatives of the firm's compliance and operations departments. The Committee's responsibilities include reviewing and updating these Policies as may be appropriate from time to time; identifying and resolving any material conflicts of interest on the part of Chartwell or its personnel that may affect particular proxy votes; evaluating and monitoring,

1

on an ongoing basis, the analyses, recommendations and other services provided by ISS or another third party retained to assist Chartwell in carrying out its proxy voting responsibilities; when deemed appropriate by the Committee, consulting with Chartwell portfolio managers and investment professionals on particular proposals or categories of proposals presented for vote; and

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

determining when and how client proxies should be voted other than in accordance with the general rules and criteria set forth in Chartwell's Proxy Voting Guidelines or with the recommendations of ISS or another independent proxy voting service retained by Chartwell..

CONFLICTS OF INTEREST. It is Chartwell's policy not to exercise its authority to decide how to vote a proxy if there is a material conflict of interest between Chartwell's interests and the interests of the client that owns the shares to be voted that could affect the vote on that matter. To seek to identify any such material conflicts, a representative of the Proxy Voting Committee screens all proxies and presents any potential conflicts identified to the Committee for determination of whether the conflict exists and if so, whether it is material. Conflicts of interest could result from a variety of circumstances, including, but not limited to, significant personal relationships between executive officers of an issuer and Chartwell personnel, a current or prospective investment adviser-client relationship between an issuer or a pension plan sponsored by an issuer and Chartwell, a significant ownership interest by Chartwell or its personnel in the issuer and various other business, personal or investment relationships. Generally, a current or prospective adviser-client relationship will not be considered material for these purposes if the net advisory revenues to Chartwell have not in the most recent fiscal year and are not expected in the current fiscal year to exceed _ of 1 percent of Chartwell's annual advisory revenue.

In the event the Committee determines that there is a material conflict of interest that may affect a particular proxy vote, Chartwell will NOT make the decision how to vote the proxy in accordance with these Policies unless the Policies specify how votes shall be cast on that particular type of matter, i.e., "for" or "against" the proposal. Where the Policies provide that the voting decision will be made on a "case-by-case" basis, Chartwell will either request the client to make the voting decision, or the vote will be cast in accordance with the recommendations of ISS or another independent proxy voting service retained by Chartwell for that purpose. Chartwell also will not provide advice to clients on proxy votes without first disclosing any material conflicts to the client requesting such advice.

WHEN CHARTWELL DOES NOT VOTE PROXIES. Chartwell may not vote proxies respecting client securities in certain circumstances, including, but not limited to, situations where (a) the securities are no longer held in a client's account; (b) the proxy and other relevant materials are not received in sufficient time to allow analysis or an informed vote by the voting deadline; (c) Chartwell concludes that the cost of voting the proxy will exceed the expected potential benefit to the client; or (d) the securities have been loaned out pursuant to a client's securities lending program and are unavailable to vote.

PROXY VOTING GUIDELINES

Generally, Chartwell votes all proxies in accordance with the following guidelines. These guidelines may be changed or supplemented from time to time. Votes on matters not covered

2

by these guidelines will be determined in accordance with the principles set forth above. Client guidelines may be inconsistent with these guidelines and may cause Chartwell to vote differently for different clients on the same matter.

H. DEBT RESTRUCTURINGS

Vote on a CASE-BY-CASE basis proposals to increase common and/or preferred shares and to issue shares as part of a debt restructuring plan. We consider the following issues:

- o DILUTION - How much will ownership interest of existing shareholders be reduced, and how extreme will dilution to any future earnings be?
- o CHANGE IN CONTROL - Will the transaction result in a change in control of the company?
- o BANKRUPTCY - Is the threat of bankruptcy, which would result in severe losses in shareholder value, the main factor driving the debt restructuring?

Generally, we approve proposals that facilitate debt restructurings unless there are clear signs of self-dealing or other abuses.

I. SHARE REPURCHASE PROGRAMS

Vote FOR management proposals to institute open-market share repurchase plans in which all shareholders may participate on equal terms.

VIII. EXECUTIVE AND DIRECTOR COMPENSATION

In general, we vote on a CASE-BY-CASE basis on executive and director compensation plans, with the view that viable compensation programs reward the creation of stockholder wealth by having a high payout sensitivity to increases in shareholder value.

In evaluating a pay plan, we measure its dilutive effect both on shareholder wealth and on voting power. We value equity-based compensation along with cash components of pay. We estimate the present value of short- and long-term incentives, derivative awards, and

10

cash/bonus compensation - which enables us to assign a dollar value to the amount of potential shareholder wealth transfer.

Our vote is based, in part, on a comparison of company-specific adjusted

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

allowable dilution cap and a weighted average estimate of shareholder wealth transfer and voting power dilution. Administrative features are also factored into our vote. For example, our policy is that the plan should be [administered] DO YOU MEAN OVERSEEN? WHO WOULD BE DISINTERESTED OTHER THAN THE INDEPENDENT DIRECTORS, AND THEY SHOULDN'T BE ADMINISTERING. by a committee of [disinterested persons] independent directors; insiders should not serve on compensation committees.

Other factors, such as repricing underwater stock options without shareholder approval, would cause us to vote against a plan. Additionally, in some cases we would vote against a plan deemed unnecessary.

A. OBRA-RELATED COMPENSATION PROPOSALS

anticipated with any high degree of confidence.

In most cases, however, we vote for proposals that seek additional disclosure or reports, particularly when it appears companies have not adequately addressed shareholders' social and environmental concerns.

In determining our vote on social and environmental proposals, we also analyze the following factors:

- o whether adoption of the proposal would have either a positive or negative impact on the company's short-term or long-term share value;
- o the percentage of sales, assets and earnings affected;
- o the degree to which the company's stated position on the issues could affect its reputation or sales, or leave it vulnerable to boycott or selective purchasing;
- o whether the issues presented should be dealt with through government or company-specific action;
- o whether the company has already responded in some appropriate manner to the request embodied in a proposal;
- o whether the company's analysis and voting recommendation to shareholders is persuasive;
- o what other companies have done in response to the issue;
- o whether the proposal itself is well framed and reasonable;
- o whether implementation of the proposal would achieve the objectives sought in the proposal; and
- o whether the subject of the proposal is best left to the discretion of the board.

The following list includes some of the social and environmental issues to which this analysis is applied:

14

- o energy and environment
- o South Africa
- o Northern Ireland
- o military business
- o maquiladora standards and international operations policies
- o world debt crisis
- o equal employment opportunity and discrimination
- o animal rights
- o product integrity and marketing
- o human resources issues
