 AUGUST 31, 2007 (UNAUDITED)

1. VALUATION AND INVESTMENT PRACTICES

A. PORTFOLIO VALUATION:

The net asset value ("NAV") of the Common Shares of First Trust/Gallatin Specialty Finance and Financial Opportunities Fund (the "Fund") is determined daily as of the close of regular session trading on the New York Stock Exchange ("NYSE"), normally 4:00 p.m. Eastern time, on each day the NYSE is open for

trading. Domestic debt securities and foreign securities are priced using data reflecting the earlier closing of the principal markets for those securities. The NAV per Common Share is calculated by subtracting the Fund's liabilities (including accrued expenses, dividends payable and any borrowings of the Fund) from the Fund's Total Assets (the value of the securities and other investments the Fund holds plus cash or other assets, including interest accrued but not yet received) and dividing the result by the total number of Common Shares outstanding.

The Fund's investments are valued daily at market value or, in the absence of market value with respect to any portfolio securities, at fair value according to procedures adopted by the Fund's Board of Trustees. A majority of the Fund's assets are valued using market information supplied by third parties. In the event that market quotations are not readily available, the pricing service does not provide a valuation for a particular asset, or the valuations are deemed unreliable, First Trust Advisors L.P. ("First Trust") may use a fair value method to value the Fund's securities and investments. Additionally, if events occur after the close of the principal market for particular securities (e.g., domestic debt and foreign securities), but before the Fund values its assets, that could materially affect NAV, First Trust may use a fair value method to value the Fund's securities and investments. The use of fair value pricing by the Fund is governed by valuation procedures adopted by the Fund's Board of Trustees and in accordance with the provisions of the Investment Company Act of 1940, as amended.

Portfolio securities listed on any exchange other than the NASDAQ National Market ("NASDAQ") are valued at the last sale price on the business day as of which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the most recent bid and asked prices on such day. Securities traded on the NASDAQ are valued at the NASDAQ Official Closing Price as determined by NASDAQ. Portfolio securities traded on more than one securities exchange are valued at the last sale price on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities. Portfolio securities traded in the over-the-counter market, but excluding securities traded on the NASDAQ, are valued at the closing bid prices. Short-term investments that mature in less than 60 days are valued at amortized cost.

#### B. SECURITIES TRANSACTIONS:

Securities transactions are recorded as of the trade date. Realized gains and losses from securities transactions are recorded on an identified cost basis.

#### 2. UNREALIZED APPRECIATION (DEPRECIATION)

As of August 31, 2007, the aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$345,380 and the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$39,991,132.
