CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Statements in this Quarterly Report on Form 10-Q for the quarter ended June 30, 2010 (this Form 10-Q) that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are subject to known and unknown risks, uncertainties and other factors and were derived utilizing numerous important assumptions that may cause our actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Investors are cautioned not to place undue reliance on forward-looking statements.

Statements preceded by, followed by or that otherwise include the words believes, expects, anticipates, intends, projects, estimates, plans, may increase, may fluctuate and similar expressions or future or conditional verbs such as will, should, would, may and could are generally forward-looking in nature and are not historical facts.

Forward-looking statements in this Form 10-Q include, but are not limited to, statements concerning the following:

(i) our expectations regarding the impact of the adoption of recently issued accounting pronouncements on our financial statements; (ii) our belief that we would have various periods to cure an event of default if one or more notices of default were to be given by our lenders or trustees under certain of our financing agreements; (iii) our continued belief that the amount of securities held in trust related to our potential obligation from our reinsurance agreements will be significantly higher than claims expected to be paid; (iv) our belief that the Homeowner Affordability and Stability Plan (HASP) programs had a favorable impact on mortgage industry originations which may continue during the remainder of 2010; (v) our expectations regarding origination volumes, including purchase originations, and loan margins in the mortgage industry; (vi) our belief that HASP s loan modification program provides additional opportunities for our Mortgage Servicing segment and could reduce our exposure to future foreclosure-related losses; (vii) our belief that the increase in demand for new vehicle production for the remainder of 2010 projected by the United States (U.S.) automobile industry analysts may include an increase in the demand for commercial fleet vehicles; (viii) our belief that our sources of liquidity are adequate to fund operations for the next 12 months; (ix) our expected capital expenditures for 2010; (x) our expectation that the London Interbank Offered Rate and commercial paper, long-term U.S. Department of the Treasury (Treasury) and mortgage interest rates will remain our primary benchmark for market risk for the foreseeable future; and (xi) our expectation that we will continue to modify the types of mortgage loans that we originate in accordance with secondary market liquidity.

The factors and assumptions discussed below and the risks factors described in Item 1A. Risk Factors in this Form 10-Q and Part I Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009 could cause actual results to differ materially from those expressed in such forward-looking statements:

- § the effects of environmental, economic or political conditions on the international, national or regional economy, the outbreak or escalation of hostilities or terrorist attacks and the impact thereof on our businesses;
- § the effects of continued market volatility or continued economic decline on the availability and cost of our financing arrangements, the value of our assets and the price of our Common stock;
- § the effects of a continued decline in the volume or value of U.S. home sales and home prices, due to adverse economic changes or otherwise, on our Mortgage Production and Mortgage Servicing segments;
- § the effects of changes in current interest rates on our business and our financing costs;
- § our decisions regarding the use of derivatives related to mortgage servicing rights, if any, and the resulting potential volatility of the results of operations of our Mortgage Servicing segment;

Table of Contents

- § the effects of increases in our actual and projected repurchases of, indemnification given in respect of, or related losses associated with, sold mortgage loans for which we have provided representations and warranties or other contractual recourse to purchasers and insurers of such loans, including increases in our loss severity and reserves associated with such loans;
- § the effects of reinsurance claims in excess of projected levels and in excess of reinsurance premiums we are entitled to receive or amounts currently held in trust to pay such claims;
- § the effects of any significant adverse changes in the underwriting criteria of government-sponsored entities (GSEs), including the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, including any changes caused by the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act);
- § the ability to maintain our status as a GSE-approved servicer, including the ability to continue to comply with the GSEs' respective selling and servicing guides, including any changes caused by the Dodd-Frank Act;
- § changes in laws and regulations, including changes in mortgage- and real estate-related laws and regulations (including changes caused by the Dodd-Frank Act) and state, federal and foreign tax laws and accounting standards;
- § the effects of the insolvency of any of the counterparties to our significant customer contracts or financing arrangements or the inability or unwillingness of such counterparties to perform their respective obligations under, or to renew on terms favorable to us, such contracts, or our ability to continue to comply with the terms of our significant customer contracts, including service level agreements;
- § the ability to develop and implement operational, technological and financial systems to manage our operations and to achieve enhanced earnings or effect cost savings, including the ability to timely implement and successfully execute our transformation initiatives;
- § the effects of competition in our existing and potential future lines of business, including the impact of consolidation within the industries in which we operate and competitors with greater financial resources and broader product lines;
- § the willingness or ability of automobile manufacturers to make new vehicles available to us on commercially favorable terms;
- § the ability to quickly reduce overhead and infrastructure costs in response to a reduction in revenue;
- § the ability to implement fully integrated disaster recovery technology solutions in the event of a disaster;
- § the ability to obtain financing (including refinancing existing indebtedness) on acceptable terms, if at all, to finance our operations or growth strategy, to operate within the limitations imposed by our financing arrangements and to maintain the amount of cash required to service our indebtedness;
- § the ability to maintain our relationships with our existing clients and to establish relationships with new clients;
- § a deterioration in the performance of assets held as collateral for secured borrowings;
- § the impact of the failure to maintain our credit ratings;

§ any failure to comply with covenants under our financing arrangements;

3

Table of Contents

- § the effects of the consolidation of financial institutions and the related impact on the availability of credit; and
- § the impact of actions taken or to be taken by the Treasury and the Board of Governors of the Federal Reserve System on the credit markets and the U.S. economy.

Other factors and assumptions not identified above were also involved in the derivation of these forward-looking statements, and the failure of such other assumptions to be realized as well as other factors may also cause actual results to differ materially from those projected. Most of these factors are difficult to predict accurately and are generally beyond our control. In addition, we operate in a rapidly changing and competitive environment. New risk factors may emerge from time to time and it is not possible to predict all such risk factors.

The factors and assumptions discussed above may have an impact on the continued accuracy of any forward-looking statements that we make. Except for our ongoing obligations to disclose material information under the federal securities laws, we undertake no obligation to release publicly any revisions to any forward-looking statements, to report events or to report the occurrence of unanticipated events unless required by law. For any forward-looking statements contained in any document, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. Summary of Significant Accounting Policies

Basis of Presentation

PHH Corporation and subsidiaries (collectively, PHH or the Company) is a leading outsource provider of mortgage and fleet management services operating in the following business segments:

§ **Mortgage Production** provides mortgage loan origination services and sells mortgage loans.

§ **Mortgage Servicing** performs servicing activities for originated and purchased loans.

§ **Fleet Management Services** provides commercial fleet management services.

The Condensed Consolidated Financial Statements include the accounts and transactions of PHH and its subsidiaries, as well as entities in which the Company directly or indirectly has a controlling interest and variable interest entities of which the Company is the primary beneficiary. PHH Home Loans, LLC and its subsidiaries (collectively, PHH Home Loans or the Mortgage Venture) are consolidated within PHH s Condensed Consolidated Financial Statements and Realty Corporation s (Realty s) ownership interest is presented as a noncontrolling interest in the Condensed Consolidated Financial Statements.

The Condensed Consolidated Financial Statements have been prepared in conformity with accounting principles generally accepted in the United States (GAAP) for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and disclosures required by GAAP for complete financial statements. In management s opinion, the unaudited Condensed Consolidated Financial Statements contain all adjustments, which include normal and recurring adjustments necessary for a fair presentation of the financial position and results of operations for the interim periods presented. The results of operations reported for interim periods are not necessarily indicative of the results of operations for the entire year or any subsequent interim period. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions include, but are not limited to, those related to the valuation of mortgage servicing rights (MSRs), mortgage loans held for sale (MLHS), other financial instruments and goodwill and the determination of certain income tax assets and liabilities and associated valuation allowances. Actual results could differ from those estimates.

Changes in Accounting Policies

Transfers of Financial Assets. In June 2009, the Financial Accounting Standards Board (the FASB) updated Accounting Standards Codification (ASC) 860, Transfers and Servicing (ASC 860) to eliminate the concept of a qualifying special-purpose entity (QSPE), modify the criteria for applying sale accounting to transfers of financial assets or portions of financial assets, differentiate between the initial measurement of an interest held in connection with the transfer of an entire financial asset recognized as a sale and participating interests recognized as a sale and remove the provision allowing classification of interests received in a guaranteed mortgage securitization transaction that does not qualify as a sale as available-for-sale or trading

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

securities. The updates to ASC 860 clarify (i) that an entity must consider all arrangements or agreements made contemporaneously or in contemplation of a transfer, (ii) the isolation analysis related to the transferor and its consolidated subsidiaries and (iii) the principle of effective control over the transferred financial asset. The updates to ASC 860 also enhance financial statement disclosures. Revised recognition and measurement provisions are to be applied to transfers occurring on or after the effective date and the disclosure provisions are to be applied to transfers that occurred both before and after the effective date. The Company adopted the updates to ASC 860 effective January 1, 2010. Except for the elimination of QSPEs addressed in the updates to ASC 810, Consolidation (ASC 810) below, the adoption of the updates to ASC 860 did not impact the Company's Condensed Consolidated Financial Statements.

Consolidation of Variable Interest Entities. In June 2009, the FASB updated ASC 810 to modify certain characteristics that identify a VIE, revise the criteria for determining the primary beneficiary of a VIE, add an additional reconsideration event to determining whether an entity is a VIE, eliminating troubled debt restructurings as an excluded reconsideration event and enhance disclosures regarding involvement with a VIE. Additionally, with the elimination of the concept of QSPEs in the updates to ASC 860, entities previously considered QSPEs are now within the scope of ASC 810. Entities required to consolidate or deconsolidate a VIE will recognize a cumulative effect in retained earnings for any difference in the carrying amount of the interest recognized. The Company adopted the updates to ASC 810 effective January 1, 2010. As a result of the adoption of updates to ASC 810, assets of consolidated VIEs that can be used only to settle the obligations of the VIE and liabilities of consolidated VIEs for which creditors or beneficial interest holders do not have recourse to the general credit of the Company are presented separately on the face of the Company's Condensed Consolidated Balance Sheets. As a result of the updates to ASC 860 eliminating the concept of QSPEs, the Company was required to consolidate a mortgage loan securitization trust that previously met the QSPE scope exception under ASC 860. Upon consolidation, the Company elected the fair value option of measuring the assets and liabilities of the mortgage loan securitization trust at fair value under ASC 825, Financial Instruments. See Note 13, Fair Value Measurements for the transition adjustment related to the adoption of the updates to ASC 810 and ASC 860, which had no impact on Retained earnings, and Note 14, Variable Interest Entities for further discussion.

Fair Value Measurements. In January 2010, the FASB updated ASC 820, Fair Value Measurements and Disclosures (ASC 820) to add disclosures for transfers in and out of level one and level two of the valuation hierarchy and to present separately information about purchases, sales, issuances and settlements in the reconciliation for assets and liabilities classified within level three of the valuation hierarchy. The updates to ASC 820 also clarify existing disclosure requirements about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The Company adopted the disclosure provisions of the updates to ASC 820 for transfers in and out of level one and level two, level of disaggregation and inputs and valuation techniques used to measure fair value effective January 1, 2010. The additional disclosures resulting from the adoption of the updates to ASC 820 are included in Note 13, Fair Value Measurements in the Company's Notes to Condensed Consolidated Financial Statements. Certain other disclosures about the activity in the reconciliation of level three activity are effective for fiscal years and interim periods beginning after December 15, 2010, which will enhance the disclosure requirements and will not impact the Company's financial position, results of operations or cash flows.

Recently Issued Accounting Pronouncements

Revenue Recognition. In October 2009, the FASB issued Accounting Standards Update (ASU) No. 2009-13, Multiple Deliverable Arrangements (ASU No. 2009-13), an update to ASC 605, Revenue Recognition (ASC 605). ASU No. 2009-13 amends ASC 605 for how to determine whether an arrangement involving multiple deliverables (i) contains more than one unit of accounting and (ii) how the arrangement consideration should be (a) measured and (b) allocated to the separate units of accounting. ASU No. 2009-13 is effective prospectively for arrangements entered into or materially modified in fiscal years beginning on or after June 15,

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

2010. Early adoption is permitted. The Company is currently evaluating the impact of adopting ASU No. 2009-13 on its Condensed Consolidated Financial Statements.

Loan Modifications. In April 2010, the FASB issued ASU No. 2010-18, Effect of a Loan Modification When the Loan Is Part of a Pool That Is Accounted for as a Single Asset (ASU No. 2010-18), an update to ASC 310, Receivables (ASC 310). ASU No. 2010-18 amends ASC 310 for modifications of loans that are accounted for within a pool, such that these modifications do not result in the removal of loans from the pool even if the modifications would be considered a troubled debt restructuring. ASU 2010-18 is effective for modifications of loans within pools under ASC 310 occurring in the first interim or annual period ending on or after July 15, 2010. The adoption of ASU 2010-18 is not expected to impact the Company's Condensed Consolidated Financial Statements.

Financing Receivables. In July 2010, the FASB issued ASU No. 2010-20, Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses (ASU No. 2010-20), an update to ASC 310. ASU No. 2010-20 enhances the disclosure requirements of ASC 310 regarding the credit quality of financing receivables and the allowance for credit losses and requires entities to provide a greater level of disaggregated information about the credit quality of financing receivables and the allowance for credit losses. In addition, ASU No. 2010-20 requires disclosure of credit quality indicators, past due information, and modifications of its financing receivables. For public entities, the end of period disclosure requirements of ASU No. 2010-20 are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. ASU No. 2010-20 will enhance the disclosure requirements for financing receivables and credit losses, but will not impact the Company's financial position, results of operations or cash flows.

2. (Loss) Earnings Per Share

Basic (loss) earnings per share attributable to PHH Corporation was computed by dividing Net (loss) income attributable to PHH Corporation during the period by the weighted-average number of shares outstanding during the period. Diluted (loss) earnings per share attributable to PHH Corporation was computed by dividing Net (loss) income attributable to PHH Corporation by the weighted-average number of shares outstanding, assuming all potentially dilutive common shares were issued. The weighted-average computation of the dilutive effect of potentially issuable shares of Common stock under the treasury stock method for the three and six months ended June 30, 2010 excludes approximately 2.7 million outstanding stock-based compensation awards, as well as the assumed conversion of the Company's 2012 Convertible Notes and related purchased options and sold warrants as their inclusion would be anti-dilutive. Additionally, the sold warrants related to the Company's 2014 Convertible Notes were excluded from the computation of the dilutive effect of potentially issuable shares of Common stock under the treasury stock method for the three and six months ended June 30, 2010, as their inclusion would be anti-dilutive. The 2014 Convertible Notes and related purchased options are also excluded from the weighted-average computation of the dilutive effect of potentially issuable shares of Common stock under the treasury stock method for the three and six months ended June 30, 2010 as they are currently to be settled only in cash. The Company's Convertible Notes are defined and further discussed in Note 9, Debt and Borrowing Arrangements.

The weighted-average computation of the dilutive effect of potentially issuable shares of Common stock under the treasury stock method for both the three and six months ended June 30, 2009 excludes approximately 2.8 million outstanding stock-based compensation awards, as well as the assumed conversion of the Company's 2012 Convertible Notes and related purchased options and sold warrants as their inclusion would be anti-dilutive.

The following table summarizes the basic and diluted (loss) earnings per share attributable to PHH Corporation calculations for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In millions, except share and per share data)			
Net (loss) income attributable to PHH Corporation	\$ (133)	\$ 106	\$ (125)	\$ 108
Weighted-average common shares outstanding basic	55,547,650	54,502,265	55,293,111	54,441,028
Effect of potentially dilutive securities:				
Stock options		20,857		10,605
Restricted stock units		550,772		356,522
Weighted-average common shares outstanding diluted	55,547,650	55,073,894	55,293,111	54,808,155
Basic (loss) earnings per share attributable to PHH Corporation	\$ (2.40)	\$ 1.93	\$ (2.26)	\$ 1.98
Diluted (loss) earnings per share attributable to PHH Corporation	\$ (2.40)	\$ 1.91	\$ (2.26)	\$ 1.96

3. Restricted Cash, Cash Equivalents and Investments

The Company's Restricted cash, cash equivalents and investments primarily relate to (i) amounts specifically designated to purchase assets, to repay debt and/or to provide over-collateralization within the Company's asset-backed debt arrangements, (ii) funds collected and held for pending mortgage closings and (iii) accounts held in trust for the capital fund requirements of and potential claims related to the Company's wholly owned mortgage reinsurance subsidiary, Atrium Reinsurance Corporation (Atrium).

During the three months ended June 30, 2010, the Company invested in certain high credit quality debt securities using the restricted cash within Atrium. These investments remain in trust for the capital fund requirements of, and potential claims related to, Atrium. Restricted cash and cash equivalents includes marketable securities with original maturities of three months or less.

The following tables summarize certain information regarding the Company's Restricted cash, cash equivalents and investment balances:

	June 30, 2010	December 31, 2009
	(In millions)	
Restricted cash and cash equivalents	\$ 318	\$ 596
Restricted investments (at fair value)	241	
Restricted cash, cash equivalents and investments	\$ 559	\$ 596

(Unaudited)

	June 30, 2010				
	Amortized Cost	Fair Value	Unrealized Gains (In millions)	Unrealized Losses	Weighted- average remaining maturity
<i>Restricted investments classified as available-for-sale:</i>					
Corporate securities	\$ 46	\$ 46	\$	\$	31 mos.
Agency securities ⁽¹⁾	157	158	1		20 mos.
Government securities	37	37			24 mos.
Total available-for-sale securities	\$ 240	\$ 241	\$ 1	\$	23 mos.

(1) Represents bonds and notes issued by various agencies including, but not limited to, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac) and Federal Home Loan Banks.

The Company's restricted investments are recorded at fair value and classified as available-for-sale. During both the three and six months ended June 30, 2010, the amount of realized gains from the sale of available-for-sale securities was not significant. There were no available-for-sale securities outstanding during the six months ended June 30, 2009.

4. Mortgage Servicing Rights

The activity in the Company's loan servicing portfolio associated with its capitalized MSR's consisted of:

	Six Months Ended June 30, 2010 2009 (In millions)	
<i>Unpaid principal balance of capitalized loan servicing portfolio:</i>		
Balance, beginning of period	\$ 127,700	\$ 129,078

Additions	12,381	14,050
Payoffs, sales and curtailments	(9,984)	(17,141)
Balance, end of period	\$ 130,097	\$ 125,987

The activity in the Company's capitalized MSR's consisted of:

	Six Months Ended June 30, 2010 2009 (In millions)	
<i>Mortgage Servicing Rights:</i>		
Balance, beginning of period	\$ 1,413	\$ 1,282
Additions	195	268
Changes in fair value due to:		
Realization of expected cash flows	(110)	(212)
Changes in market inputs or assumptions used in the valuation model	(262)	104
Sales		(6)
Balance, end of period	\$ 1,236	\$ 1,436

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The significant assumptions used in estimating the fair value of MSR were as follows (in annual rates):

	June 30,	
	2010	2009
Weighted-average prepayment speed (CPR)	15%	16%
Option adjusted spread, in basis points (bps)	719	554
Volatility	29%	31%

The value of the Company's MSR is driven by the net positive cash flows associated with the Company's servicing activities. These cash flows include contractually specified servicing fees, late fees and other ancillary servicing revenue. The Company recorded contractually specified servicing fees, late fees and other ancillary servicing revenue within Loan servicing income in the Condensed Consolidated Statements of Operations as follows:

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2010	2009	2010	2009
	(In millions)			
Net service fee revenue	\$99	\$105	\$196	\$212
Late fees	5	4	10	9
Other ancillary servicing revenue	8	11	18	16

As of June 30, 2010, the Company's MSR had a weighted-average life of approximately 4.7 years. Approximately 69% of the MSR associated with the loan servicing portfolio as of June 30, 2010 were restricted from sale without prior approval from the Company's private-label clients or investors.

The following summarizes certain information regarding the initial and ending capitalization rates of the Company's MSR:

	Six Months	
	Ended June 30,	
	2010	2009
Initial capitalization rate of additions to MSR	1.58%	1.91%
Weighted-average servicing fee of additions to MSR (in bps)	30	37

	June 30,	
	2010	2009
Capitalized servicing rate	0.95%	1.14%
Capitalized servicing multiple	3.1	3.5
Weighted-average servicing fee (in bps)	30	33

90 or more days	1.75%	1.86%	0.89%	0.93%
Total delinquency	4.70%	4.49%	4.11%	3.83%
Foreclosure/real estate owned/bankruptcies	2.66%	2.73%	2.62%	2.72%

(1) Represents the loan servicing portfolio delinquencies as a percentage of the total number of loans and the total unpaid balance of the portfolio.

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

As of June 30, 2010 and December 31, 2009, the Company had outstanding servicing advance receivables of \$152 million and \$141 million, respectively, which were included in Accounts receivable, net in the Condensed Consolidated Balance Sheets.

6. Mortgage Loan Sales

The Company sells its residential mortgage loans through one of the following methods: (i) sales to Fannie Mae and Freddie Mac and loan sales to other investors guaranteed by the Government National Mortgage Association (collectively, Government-Sponsored entities or GSEs), or (ii) sales to private investors, or sponsored securitizations through the Company's wholly owned subsidiary, PHH Mortgage Capital, LLC (PHHMC), which maintains securities issuing capacity through a public registration statement. During the six months ended June 30, 2010, 97% of the Company's mortgage loan sales were to the GSEs and the remaining 3% were sold to private investors. The Company did not execute any sales or securitizations through PHHMC during the six months ended June 30, 2010. During the six months ended June 30, 2010, the Company retained MSR's on approximately 98% of mortgage loans sold. The Company did not retain any interests from sales or securitizations other than MSR's during the six months ended June 30, 2010.

Key economic assumptions used in measuring the fair value of the Company's MSR's at June 30, 2010 and the effect on fair value from adverse changes in those assumptions were as follows:

	MSR's (In millions)
Fair value of retained interests	\$ 1,236
Weighted-average life (in years)	4.7
Weighted-average servicing fee (in bps)	30
Weighted-average prepayment speed (annual rate)	15%
Impact on fair value of 10% adverse change	\$ (79)
Impact on fair value of 20% adverse change	(151)
Option adjusted spread (in bps)	719
Impact on fair value of 10% adverse change	\$ (46)
Impact on fair value of 20% adverse change	(90)
Volatility (annual rate)	29%
Impact on fair value of 10% adverse change	\$ (12)
Impact on fair value of 20% adverse change	(24)

These sensitivities are hypothetical and presented for illustrative purposes only. Changes in fair value based on a 10% variation in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption is calculated without changing any other assumption; in reality, changes in one assumption may result in changes in another, which may magnify or counteract the sensitivities. Further, this analysis does not assume any impact resulting from management's intervention to mitigate these variations.

(Unaudited)

The following table sets forth information regarding cash flows relating to the Company's loan sales in which it has continuing involvement.

	Six Months Ended	
	June 30,	
	2010	2009
	(In millions)	
Proceeds from new loan sales or securitizations	\$12,599	\$14,139
Servicing fees received ⁽¹⁾	196	212
Other cash flows received on retained interests ⁽²⁾	1	4
Purchases of delinquent or foreclosed loans	(50)	(52)
Servicing advances	(846)	(483)
Repayment of servicing advances	829	489

(1) Excludes late fees and other ancillary servicing revenue.

(2) Represents cash flows received on retained interests other than servicing fees.

During the three and six months ended June 30, 2010, the Company recognized pre-tax gains of \$84 million and \$198 million, respectively, related to the sale or securitization of residential mortgage loans which are recorded in Gain on mortgage loans, net in the Condensed Consolidated Statement of Operations.

During the three and six months ended June 30, 2009, the Company recognized pre-tax gains of \$235 million and \$353 million, respectively, related to the sale or securitization of residential mortgage loans which are recorded in Gain on mortgage loans, net in the Condensed Consolidated Statements of Operations.

Net fair value of derivative instruments		\$ 144			\$ 52	

(1) Represents derivative instruments that are executed with the same counterparties and subject to master netting arrangements between the Company and its counterparties.

(2)

The notional amount of the derivative instruments related to the issuance of the 2014 Convertible Notes represents 9.6881 million shares of the Company's Common stock as of both June 30, 2010 and December 31, 2009.

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The following table summarizes the gains (losses) recorded in the Company's Condensed Consolidated Statements of Operations for derivative instruments not designated as hedging instruments:

	Statement of Operations Presentation	Three Months Ended June 30,		Six Months Ended June 30,	
		2010	2009	2010	2009
(In millions)					
IRLCs	Gain on mortgage loans, net	\$ 379	\$ 108	\$ 581	\$ 277
Option contracts related to interest rate and price risk for MLHS and IRLCs	Gain on mortgage loans, net	(12)		(12)	
Forward delivery commitments related to interest rate and price risk for MLHS and IRLCs	Gain on mortgage loans, net	(189)	9	(246)	(37)
Contracts related to interest rate risk for variable-rate debt arrangements and fixed-rate leases	Fleet interest expense	(3)		(6)	(1)
Foreign exchange contracts	Fleet interest expense	6	(19)	5	(15)
Total derivative instruments		\$ 181	\$ 98	\$ 322	\$ 224

The Company's principal market exposure is to interest rate risk, specifically long-term United States (U.S.) Department of the Treasury and mortgage interest rates due to their impact on mortgage-related assets and commitments. The Company also has exposure to the London Interbank Offered Rate (LIBOR) due to the impact on variable-rate borrowings, other interest rate sensitive liabilities and net investment in fixed-rate lease assets. From time to time, the Company uses various financial instruments, including swap contracts, forward delivery commitments on mortgage-backed securities (MBS) or whole loans, futures and options contracts to manage and reduce this risk.

Foreign Exchange. On January 27, 2010, Fleet Leasing Receivables Trust (FLRT), the Company's Canadian special purpose trust, issued approximately \$81 million of senior Class A term asset-backed notes, which were denominated in U.S. dollars, to finance a fixed pool of eligible lease assets in Canada. The notes are amortizing and the lease cash flows related to the underlying collateralized leases, which are denominated in Canadian dollars, are used to repay the principal outstanding under the notes. As such, the Company is subject to foreign exchange risk associated with Canadian dollar denominated lease assets collateralizing U.S. dollar denominated borrowings, and the Company has entered into a currency swap agreement to manage such risk.

- (1) Assets held as collateral are not available to pay the Company's general obligations.
- (2) Capacity is dependent upon maintaining compliance with, or obtaining waivers of, the terms, conditions and covenants of the respective agreements. With respect to asset-backed funding arrangements, capacity may be further limited by the availability of asset eligibility requirements under the respective agreements. The Series 2009-1, Series 2009-2, Series 2009-3 and Series 2009-4 notes (the Chesapeake Term Notes) (as defined below) have

revolving periods during which time the pro-rata share of lease cash flows pledged to Chesapeake, will create availability to fund the acquisition of vehicles to be leased to customers of the Company's Fleet Management Services segment. See Asset-Backed Debt Vehicle Management Asset-Backed Debt below for additional information.

- (3) Represents the variable interest rate as of the respective date, with the exception of Total Vehicle Management Asset-Backed Debt, Term Notes, the 2012 Convertible Notes, the 2014 Convertible Notes and the Mortgage Loan Securitization Debt Certificates.
- (4) Represents the weighted-average interest rate of the Company's vehicle management asset-backed debt arrangements as of June 30, 2010 and December 31, 2009,

respectively.

- (5) Represents the range of stated interest rates of the MTNs outstanding as of June 30, 2010 and December 31, 2009, respectively. The effective rate of interest of the outstanding MTNs was 7.2% as of both June 30, 2010 and December 31, 2009.
- (6) Represents the range of stated interest rates on the Amended Credit Facility as of June 30, 2010 and December 31, 2009, respectively, excluding per annum utilization and facility fees. The effective interest rate of the Credit Facilities was 2.9% and 1.0% as of June 30, 2010 and December 31, 2009, respectively.
- (7) The effective rate of interest of the 2012 Convertible Notes was 12.4% as of both June 30, 2010 and December 31, 2009, which represents the

4.0% semiannual
cash payment and
the non-cash
accretion of
discount and
issuance costs.

of the debt
certificates and
creditors of the
securitization
trust do not have
recourse to the
Company.

- (10) The Mortgage
Loan
Securitization
Debt
Certificates are
fixed rate.

The fair value of the Company's debt was \$6.0 billion and \$5.1 billion as of June 30, 2010 and December 31, 2009, respectively.

Asset-Backed Debt

Vehicle Management Asset-Backed Debt.

Vehicle management asset-backed debt primarily represents variable-rate debt issued by the Company's wholly owned subsidiary, Chesapeake Funding LLC (Chesapeake), to support the acquisition of vehicles used by the Fleet Management Services segment's U.S. leasing operations and debt issued by FLRT used to finance leases originated by the Company's Canadian fleet operation. The obligations of both Chesapeake and FLRT are non-recourse to the Company and are provided for by payments made by lessees under lease contracts.

As of June 30, 2010, 83% of the carrying value of the Company's fleet leases collateralized the debt issued by Chesapeake. These leases include certain eligible assets representing the borrowing base of the variable funding and term notes (the Chesapeake Lease Portfolio). Approximately 99% of the Chesapeake Lease Portfolio as of June 30, 2010 consisted of open-end leases, in which substantially all of the residual risk on the value of the vehicles at the end of the lease term remains with the lessee. As of June 30, 2010, the Chesapeake Lease Portfolio consisted of 21% and 79% fixed-rate and variable-rate leases, respectively. As of June 30, 2010, the top 25 client lessees represented approximately 52% of the Chesapeake Lease Portfolio, with no client exceeding 5%.

The maturity date for the Chesapeake Notes represents the end of the respective notes' revolving period. During the revolving period, the notes' pro-rata share of lease cash flows pledged to Chesapeake will create availability to fund the acquisition of vehicles to be leased to customers of the Company's Fleet Management Services segment. Subsequent to the revolving period, the notes' prorata share of lease cashflows will be used to pay principal amounts due in accordance with the terms of the notes.

The Chesapeake Series 2009-1 Term Notes and Chesapeake Series 2009-4 Term Notes began to amortize in accordance with their terms at the end of the respective revolving periods (commencement of the Amortization Period). During the Amortization Period, the Company will be unable to use the pro-rata share of lease cash flows to fund the acquisition of vehicles to be leased under the Chesapeake Term Notes, and monthly repayments will be made on the notes through the earlier of 125 months following the commencement of the Amortization Period, or when the respective series of notes are paid in full based on an allocable share of the collection of cash receipts of lease payments relating to the collateralized vehicle leases and related assets. The allocable share is based upon the outstanding balance of those notes relative to all other outstanding series notes issued by Chesapeake as of the commencement of the Amortization Period. After the payment of interest, servicing fees, administrator fees and servicer advance reimbursements, any monthly lease collections during the Amortization Period of a particular series would be applied to reduce the principal balance of the series notes.

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

On June 1, 2010, Chesapeake entered into the Series 2010-1 Indenture Supplement pursuant to which \$1.0 billion in aggregate principal amount of senior Class A variable funding notes may be issued under commitments provided by a syndicate of lenders. On that date, \$500 million of Class A notes were issued. This issuance was used to repay the remaining outstanding balance of the Series 2006-2 variable funding notes, increase borrowings relative to the pool of eligible lease assets and fund certain other fees and costs in connection with the issuance of the Series 2010-1 variable funding notes. As of June 30, 2010, commitments under the Series 2010-1 Indenture Supplement are scheduled to expire on May 31, 2011 (the Scheduled Expiry Date), but are renewable on or before the Scheduled Expiry Date, subject to agreement by the parties. If the agreements are not renewed, the notes' amortization period will begin and the prorata share of lease cashflows will be used to pay principal amounts due in accordance with the terms of the notes beginning in the month following the Scheduled Expiry Date and ending up to 125 months after the Scheduled Expiry Date.

On January 27, 2010, FLRT issued approximately \$119 million of senior Class A-1 term asset-backed notes which was comprised of two subclasses of senior term asset-backed notes (the FLRT Series 2010-1 Class A-1 Notes) and approximately \$224 million of senior Class A-2 term asset-backed notes which was comprised of two subclasses of senior term asset-backed notes (together with the FLRT Series 2010-1 Class A-1 Notes, collectively the FLRT Series 2010-1 Notes) to finance a fixed pool of eligible lease assets in Canada. Three of the four subclasses of FLRT Series 2010-1 Notes were denominated in Canadian dollars with the remaining subclass of FLRT Series 2010-1 Notes denominated in U.S. dollars. The FLRT Series 2010-1 Class A-1 notes and Class A-2 notes were issued as amortizing notes and have maturity dates of February 15, 2011 and November 15, 2013, respectively.

Mortgage Warehouse and Other Asset-Backed Debt.

The Company maintains a variable-rate committed mortgage repurchase facility (the RBS Repurchase Facility) with The Royal Bank of Scotland plc (RBS). The RBS Repurchase Facility was amended, effective June 25, 2010, to reduce the committed capacity from \$1.5 billion to \$800 million, and was extended to June 24, 2011, among other provisions.

On May 26, 2010, the Company entered into two committed 364-day variable-rate mortgage repurchase facilities with Credit Suisse First Boston Mortgage Capital LLC (CSFB) pursuant to master repurchase agreements. The facilities consist of a \$350 million facility (CSFB Mortgage Repurchase Facility) and a \$150 million facility entered into by the Mortgage Venture (CSFB Mortgage Venture Repurchase Facility).

On April 8, 2010, the Mortgage Venture entered into a \$150 million 356-day variable-rate committed mortgage repurchase facility with Ally Bank pursuant to a master repurchase agreement and certain related agreements (Ally Bank Mortgage Venture Repurchase Facility).

The Company's variable-rate uncommitted mortgage repurchase facilities with Fannie Mae (the Fannie Mae Repurchase Facilities) have total uncommitted capacity of approximately \$3.0 billion as of both June 30, 2010 and December 31, 2009.

Other asset-backed facilities as of June 30, 2010 and December 31, 2009 includes \$54 million and \$44 million, respectively, outstanding under a servicing advance facility and \$4 million and \$5 million, respectively, outstanding under an uncommitted variable-rate mortgage warehouse facility.

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Unsecured Debt***Term Notes***

The medium-term notes (the MTNs) were publicly issued under an indenture dated as of November 6, 2000 (as amended and supplemented, the MTN Indenture) by and between PHH and The Bank of New York, as successor trustee for Bank One Trust Company, N.A. In April 2010, \$5 million of MTNs were repaid upon maturity.

Credit Facilities

Credit facilities primarily represents an Amended and Restated Competitive Advance and Revolving Credit Agreement (the Amended Credit Facility), dated as of January 6, 2006, among PHH, a group of lenders and JPMorgan Chase Bank, N.A., as administrative agent.

On June 25, 2010, the Amended Credit Facility was further amended pursuant to which certain lenders consented to the amendments (the Extending Lenders) which extended the termination date of their respective revolving commitments from January 6, 2011 to February 29, 2012. Provided certain conditions are met, the Company may extend the revolving commitments of the Extending Lenders for an additional year at its request (the Extension Option). Effective June 25, 2010, the capacity of the Amended Credit Facility was reduced from \$1.3 billion to \$805 million and will be further reduced to \$525 million on January 6, 2011 upon the termination of the commitments related to certain lenders that did not consent to the amendments (the Non-Extending Lenders).

Pricing under the Amended Credit Facility is based upon the Company s senior unsecured long-term debt ratings. If the ratings on the Company s senior unsecured long-term debt assigned by Moody s Investors Service, Standard & Poor s and Fitch Ratings are not equivalent to each other, the second highest credit rating assigned by them determines pricing under the Amended Credit Facility. As of June 30, 2010 borrowings under the Amended Credit Facility related to commitments from the Extending Lenders bore interest at a margin of 350 bps over a benchmark index of either LIBOR or the federal funds rate (the Benchmark Rate). As of June 30, 2010 borrowings under the Amended Credit Facility related to commitments from the Non-Extending Lenders bore interest at a margin of 70 bps over the Benchmark Rate. As of December 31, 2009, borrowings under the Amended Credit Facility bore interest at a margin of 70 bps over the Benchmark Rate. The Amended Credit Facility also requires the Company to pay utilization fees related to the Non-Extending Lenders commitments if its usage exceeds 50% of the aggregate commitments under the Amended Credit Facility. There is no utilization fee associated with the borrowings related to the Extending Lenders commitments. The per annum utilization fee applied to both the borrowings related to the Non-Extending Lenders commitments as of June 30, 2010 and all borrowings under the Amended Credit Facility as of December 31, 2009 was 12.5 bps. The per annum facility fee for the Extending Lenders commitments as of June 30, 2010 was 75 bps and a per annum facility fee of 17.5 bps was paid both on the Non-Extending Lenders commitments as of June 30, 2010 and the Amended Credit Facility in its entirety as of December 31, 2009. In the event that the Extension Option is elected by the Company, the Extending Lenders will receive an immediate increase in pricing related to their commitments of an additional 25 bps per annum.

Convertible Notes

On April 2, 2008, the Company completed a private offering of the 4.0% Convertible Notes due 2012 (the 2012 Convertible Notes) with an aggregate principal amount of \$250 million and a maturity date of April 15, 2012 to certain qualified institutional buyers. The carrying amount as of June 30, 2010 and December 31, 2009 is net of an unamortized discount of \$21 million and \$29 million, respectively. There were no conversions of the 2012 Convertible Notes during the six months ended June 30, 2010.

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

On September 29, 2009, the Company completed a private offering of the 4.0% Convertible Senior Notes due 2014 (the 2014 Convertible Notes) with an aggregate principal balance of \$250 million and a maturity date of September 1, 2014 to certain qualified institutional buyers. The carrying amount as of June 30, 2010 and December 31, 2009 is net of an unamortized discount of \$64 million and \$70 million, respectively. There were no conversions of the 2014 Convertible Notes during the six months ended June 30, 2010.

Debt Maturities

The following table provides the contractual maturities of the Company's indebtedness at June 30, 2010. The maturities of the Company's vehicle management asset-backed notes, a portion of which are amortizing in accordance with their terms, represent estimated payments based on the expected cash inflows related to the securitized vehicle leases and related assets:

	Asset-Backed	Unsecured (In millions)	Total
Within one year	\$ 2,571	\$ 137	\$ 2,708
Between one and two years	1,036	512	1,548
Between two and three years	629	426	1,055
Between three and four years	392	2	394
Between four and five years	112	252	364
Thereafter	5	18	23
	\$ 4,745	\$ 1,347	\$ 6,092

As of June 30, 2010, available funding under the Company's asset-backed debt arrangements and unsecured committed credit facilities consisted of:

	Capacity⁽¹⁾	Utilized Capacity (In millions)	Available Capacity
<i>Asset-Backed Funding Arrangements</i>			
Vehicle management ⁽²⁾	\$3,501	\$3,001	\$500
Mortgage warehouse and other ⁽³⁾	2,256	1,833	423
<i>Unsecured Committed Credit Facilities⁽⁴⁾</i>	810	395	415

(1) Capacity is dependent upon maintaining compliance with, or obtaining waivers of, the terms, conditions and covenants of the respective

agreements.

With respect to asset-backed funding arrangements, capacity may be further limited by the asset eligibility requirements under the respective agreements.

- (2) The Chesapeake 2009-1 Term Notes and the 2009-4 Term Notes have entered their respective Amortization Periods. See Asset-Backed Debt Vehicle Management Asset-Backed Debt above for additional information on the revolving and amortization periods of these facilities.
- (3) Capacity does not reflect \$2.3 billion undrawn under the \$3.0 billion Fannie Mae Repurchase Facilities, as these facilities are uncommitted. Utilized capacity reflects \$97 million of mortgage loans

sold to RBS under the terms of the RBS Repurchase Facility. The mortgage loans and related debt are not included in the Company's Condensed Consolidated Balance Sheet as of June 30, 2010.

- (4) Utilized capacity reflects \$16 million of letters of credit issued under the Amended Credit Facility, which are not included in Debt in the Company's Condensed Consolidated Balance Sheet.

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Debt Covenants

Certain of the Company's debt arrangements require the maintenance of certain financial ratios and contain affirmative and negative covenants, including, but not limited to, material adverse change, liquidity maintenance, restrictions on indebtedness of the Company and its material subsidiaries, mergers, liens, liquidations and sale and leaseback transactions. Among other covenants, the Amended Credit Facility and the RBS Repurchase Facility require that the Company maintain: (i) on the last day of each fiscal quarter, net worth of \$1.0 billion and (ii) at any time, a ratio of indebtedness to tangible net worth no greater than 6.5:1. Among other covenants, the CSFB Mortgage Repurchase Facility requires that the Company maintain (i) on the last day of each fiscal quarter, net worth of \$1.0 billion plus 25% of consolidated net income for the quarter, if positive and (ii) at any time, a ratio of indebtedness to tangible net worth no greater than 10:1. The MTN Indenture requires that the Company maintain a debt to tangible equity ratio of not more than 10:1. The MTN Indenture also restricts the Company from paying dividends if, after giving effect to the dividend payment, the debt to equity ratio exceeds 6.5:1, among other covenants. The Amended Credit Facility requires the Company to maintain a minimum of \$1.0 billion in committed mortgage repurchase or warehouse facilities, with no more than \$500 million of gestation facilities, excluding the uncommitted facilities provided by Fannie Mae. In addition, the RBS Repurchase Facility and the CSFB Mortgage Repurchase Facility require PHH Mortgage Corporation to maintain a minimum of \$2.5 billion and \$2.0 billion in mortgage repurchase or warehouse facilities, respectively, comprised of any uncommitted facilities provided by Fannie Mae and any committed mortgage repurchase or warehouse facility, including the respective facility. At June 30, 2010, the Company was in compliance with all of its financial covenants related to its debt arrangements.

Under certain of the Company's financing, servicing, hedging and related agreements and instruments (collectively, the Financing Agreements), the lenders or trustees have the right to notify the Company if they believe it has breached a covenant under the operative documents and may declare an event of default. If one or more notices of default were to be given, the Company believes it would have various periods in which to cure certain of such events of default. If it does not cure the events of default or obtain necessary waivers within the required time periods, the maturity of some of its debt could be accelerated and its ability to incur additional indebtedness could be restricted. In addition, events of default or acceleration under certain of the Company's Financing Agreements would trigger cross-default provisions under certain of its other Financing Agreements.

10. Income Taxes

The Company records its interim income tax provisions or benefits by applying a projected full-year effective income tax rate to its quarterly (Loss) income before income taxes for results that it deems to be reliably estimable in accordance with ASC 740, Income Taxes. Certain results dependent on fair value adjustments of the Company's Mortgage Production and Mortgage Servicing segments are considered not to be reliably estimable and therefore the Company records discrete year-to-date income tax provisions on those results.

During the three months ended June 30, 2010, the Benefit from income taxes was \$89 million and was impacted by a \$3 million net increase in valuation allowances for deferred tax assets (primarily due to loss carryforwards generated during the three months ended June 30, 2010 for which the Company believes it is more likely than not that the loss carryforwards will not be realized).

During the three months ended June 30, 2009, the Provision for income taxes was \$75 million, and was impacted by a \$1 million net increase in valuation allowances for deferred tax assets (primarily due to loss carryforwards generated during the three months ended June 30, 2009 for which the Company believes it is more likely than not that the loss carryforwards will not be realized).

During the six months ended June 30, 2010, the Benefit from income taxes was \$78 million and was impacted by a \$5 million net increase in valuation allowances for deferred tax assets (primarily due to loss carryforwards

Table of Contents

(Unaudited)

generated during the six months ended June 30, 2010 for which the Company believes it is more likely than not that the loss carryforwards will not be realized).

During the six months ended June 30, 2009, the Provision for income taxes was \$75 million, and was impacted by a \$1 million net decrease in valuation allowances for deferred tax assets (primarily due to the reduction of loss carryforwards as a result of taxable income generated during the six months ended June 30, 2009).

11. Commitments and Contingencies***Legal Contingencies***

The Company is party to various claims and legal proceedings from time to time related to contract disputes and other commercial, employment and tax matters. The Company is not aware of any pending legal proceedings that it believes could have, individually or in the aggregate, a material adverse effect on its business, financial position, results of operations or cash flows.

Loan Recourse

The Company sells a majority of its loans on a non-recourse basis. The Company also provides representations and warranties to purchasers and insurers of the loans sold. In the event of a breach of these representations and warranties, the Company may be required to repurchase a mortgage loan or indemnify the purchaser, and any subsequent loss on the mortgage loan may be borne by the Company. If there is no breach of a representation and warranty provision, the Company has no obligation to repurchase the loan or indemnify the investor against loss. The unpaid principal balance of the loans sold by the Company represents the maximum potential exposure related to representation and warranty provisions; however, the Company cannot estimate its maximum exposure because it does not service all of the loans for which it has provided a representation or warranty. The outstanding balance of loans sold with specific recourse by the Company and those for which a breach of representation or warranty provision was identified subsequent to sale was \$215 million as of June 30, 2010, 14.46% of which were at least 90 days delinquent (calculated based upon the unpaid principal balance of the loans).

As of June 30, 2010, the Company had a liability of \$68 million, included in Other liabilities in the Condensed Consolidated Balance Sheet, for probable losses related to the Company's recourse exposure.

Mortgage Reinsurance

The Company's two contracts with primary mortgage insurance companies, through Atrium, are inactive and in runoff. Through these reinsurance contracts, the Company is exposed to losses on mortgage loans pooled by year of origination. As of March 31, 2010, the contractual reinsurance period for each pool was 10 years and the weighted-average reinsurance period was 5.5 years. Loss rates on these pools are determined based on the unpaid principal balance of the underlying loans. The Company indemnifies the primary mortgage insurers for losses that fall between a stated minimum and maximum loss rate on each annual pool. In return for absorbing this loss exposure, the Company is contractually entitled to a portion of the insurance premium from the primary mortgage insurers. The Company is required to hold securities in trust related to this potential obligation, which were \$284 million and were included in Restricted cash, cash equivalents and investments in the Condensed Consolidated Balance Sheet as of June 30, 2010. The Company's unpaid contractual reinsurance payments outstanding as of June 30, 2010 were \$4 million. As of June 30, 2010, a liability of \$128 million was included in Other liabilities in the Condensed Consolidated Balance Sheet for incurred and incurred but not reported losses associated with the Company's mortgage reinsurance activities, which was determined on an undiscounted basis.

Table of Contents

Increase in reinsurance reserves	26	26
Reinsurance-related reserves, June 30,	\$ 128	\$ 108

12. Accumulated Other Comprehensive Income

The components of total comprehensive (loss) income are summarized as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In millions)			
Net (loss) income attributable to PHH Corporation	\$ (133)	\$ 106	\$ (125)	\$ 108
Other comprehensive (loss) income:				
Currency translation adjustments	(8)	10	(2)	6
Unrealized gains on available-for-sale securities	1		1	
Total other comprehensive (loss) income	(7)	10	(1)	6
Total comprehensive (loss) income	\$ (140)	\$ 116	\$ (126)	\$ 114

The after-tax components of Accumulated other comprehensive income were as follows:

	Currency Translation	Unrealized Gains on Available- for-Sale	Pension	Accumulated Other Comprehensive
--	---------------------------------	--	----------------	--

	Adjustment	Securities	Adjustment	Income
	(In millions)			
Balance at December 31, 2009	\$ 27	\$	\$ (8)	\$ 19
Change during 2010	(2)	1		(1)
Balance at June 30, 2010	\$ 25	\$ 1	\$ (8)	\$ 18

The components of Accumulated other comprehensive income presented above are net of income taxes except for the currency translation adjustment which excludes income taxes on undistributed earnings of foreign subsidiaries that are considered to be indefinitely invested.

(Unaudited)

13. Fair Value Measurements

ASC 820 prioritizes the inputs to the valuation techniques used to measure fair value into a three-level valuation hierarchy. The valuation hierarchy is based upon the relative reliability and availability of the inputs to market participants for the valuation of an asset or liability as of the measurement date. Pursuant to ASC 820, when the fair value of an asset or liability contains inputs from different levels of the hierarchy, the level within which the fair value measurement in its entirety is categorized is based upon the lowest level input that is significant to the fair value measurement in its entirety. The three levels of this valuation hierarchy consist of the following:

Level One. Level One inputs are unadjusted, quoted prices in active markets for identical assets or liabilities which the Company has the ability to access at the measurement date.

Level Two. Level Two inputs are observable for that asset or liability, either directly or indirectly, and include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, observable inputs for the asset or liability other than quoted prices and inputs derived principally from or corroborated by observable market data by correlation or other means. If the asset or liability has a specified contractual term, the inputs must be observable for substantially the full term of the asset or liability.

Level Three. Level Three inputs are unobservable inputs for the asset or liability that reflect the Company's assessment of the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, and are developed based on the best information available.

The Company determines fair value based on quoted market prices, where available. If quoted prices are not available, fair value is estimated based upon other observable inputs. The Company uses unobservable inputs when observable inputs are not available. These inputs are based upon the Company's judgments and assumptions, which are the Company's assessment of the assumptions market participants would use in pricing the asset or liability, which may include assumptions about risk, counterparty credit quality, the Company's creditworthiness and liquidity and are developed based on the best information available. The incorporation of counterparty credit risk did not have a significant impact on the valuation of the Company's assets and liabilities recorded at fair value on a recurring basis as of June 30, 2010.

The Company has classified assets and liabilities measured at fair value on a recurring basis pursuant to the valuation hierarchy as follows:

Restricted Investments. The Company's restricted investments are classified within Level Two of the valuation hierarchy.

Restricted investments represent certain high credit quality debt securities, classified as available-for-sale, held in trust for the capital fund requirements of and potential claims related to Atrium. (See Note 3, "Restricted Cash, Cash Equivalents and Investments" for additional information). The Company estimates the fair value of its restricted investments using current broker prices from multiple pricing sources.

Mortgage Loans Held for Sale. The Company's mortgage loans are classified within Level Two and Level Three of the valuation hierarchy.

The fair value of MLHS classified in Level Two of the valuation hierarchy is estimated using a market approach by utilizing either: (i) the fair value of securities backed by similar mortgage loans, adjusted for certain factors to approximate the fair value of a whole mortgage loan, including the value attributable to mortgage servicing and credit risk, (ii) current commitments to purchase loans or (iii) recent observable market trades for

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

similar loans, adjusted for credit risk and other individual loan characteristics. The Agency MBS market is a highly liquid and active secondary market for conforming conventional loans whereby quoted prices exist for securities at the pass-through level, which are published on a regular basis. The Company has the ability to access this market and it is the market into which the Company would typically sell conforming mortgage loans.

The Company's Level Three MLHS primarily represent Scratch and Dent (as defined below), second-lien, certain non-conforming and construction loans which lack observable pricing data as the market for these loans is considered illiquid or distressed. The fair value of MLHS classified in Level Three of the valuation hierarchy is estimated utilizing either a discounted cash flow model or underlying collateral values. The prepayment speed, discount rates, yields and annualized credit loss assumptions used to measure the fair value of MLHS using a discounted cash flow valuation methodology as of June 30, 2010 were 14%, 7-10%, 3-8% and 5-33%, respectively. For MLHS that were valued using underlying collateral values as of June 30, 2010 and December 31, 2009, the Company adjusted the underlying collateral values for a pricing discount based on the most recent observable price in an active market.

The following table reflects the difference between the carrying amount of MLHS, measured at fair value, and the aggregate unpaid principal amount that the Company is contractually entitled to receive at maturity as of June 30, 2010:

	Carrying Amount	Aggregate Unpaid Principal Balance (In millions)	Aggregate Unpaid Principal Balance (Under) Over Carrying Amount
Mortgage loans held for sale:			
Total	\$2,090	\$2,049	\$(41)
Loans 90 or more days past due and on non-accrual status	13	23	10

The components of the Company's MLHS, recorded at fair value, were as follows:

	June 30, 2010 (In millions)
First mortgages:	
Conforming ⁽¹⁾	\$ 1,984
Non-conforming	38
Alt-A ⁽²⁾	1
Construction loans	13
Total first mortgages	2,036
Second lien	12
Scratch and Dent ⁽³⁾	40
Other	2
Total	\$ 2,090

- (1) Represents mortgage loans that conform to the standards of the GSEs.
- (2) Represents mortgage loans that are made to borrowers with prime credit histories, but do not meet the documentation requirements of a conforming loan.
- (3) Represents mortgage loans with origination flaws or performance issues.

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Securitized Mortgage Loans. The Company's securitized mortgage loans are classified within Level Three of the valuation hierarchy.

Securitized mortgage loans represent loans securitized through the Company's wholly owned subsidiary, PHHMC, using a trust that is consolidated as a VIE. See Note 14, *Variable Interest Entities* for additional information. The loans held in the securitization trust are fixed-rate second lien residential mortgage loans that were originated primarily in 2007, have a weighted-average coupon rate of 9% and a weighted-average maturity of 13 years.

As of June 30, 2010, the Company estimates the fair value of its securitized mortgage loans using a discounted cash flow model which projects remaining cash flows with expected prepayment speeds, loss rates and loss severities as the key drivers. The prepayment assumption of 12% (annual rate) is based on market prepayment curves from current industry data. The loss rate of 12% (cumulative rate) is based on the default curve adjusted for the actual performance of the underlying collateral. The weighted-average discount rate of 14% (annual rate) is based on an expectation of the market-risk premium for these types of securities.

Derivative Instruments. The Company's derivative instruments are classified within Level Two and Level Three of the valuation hierarchy.

Forward Delivery Commitments

The Company's forward delivery commitments are classified within Level Two of the valuation hierarchy. Forward delivery commitments fix the forward sales price that will be realized upon the sale of mortgage loans into the secondary market. The fair value of the Company's forward delivery commitments is primarily based upon the current to be announced pricing of the Agency MBS market, which for conforming loans is specific to the forward loan program, delivery coupon and delivery date of the trade. The Company also enters into best efforts sales commitments (BESCs) for certain loans at the time the borrower commitment is made. These BESCs are valued using the committed price to the counterparty against the current market price of the IRLCs or mortgage loan held for sale.

Interest Rate Lock Commitments

The Company's IRLCs are classified within Level Three of the valuation hierarchy. IRLCs represent an agreement to extend credit to a mortgage loan applicant whereby the interest rate on the loan is set prior to funding. The fair value of the Company's IRLCs is based upon the estimated fair value of the underlying mortgage loan adjusted for: (i) estimated costs to complete and originate the loan and (ii) an adjustment to reflect the estimated percentage of IRLCs that will result in a closed mortgage loan (pullthrough). See Note 7, *Derivatives and Risk Management Activities* for additional information regarding risk management policies and related market risk around IRLCs. The Company estimates pullthrough based on changes in pricing and actual borrower behavior. The average pullthrough percentage used in measuring the fair value of IRLCs was 71% as of June 30, 2010.

Option Contracts

The Company's Option contracts are classified within Level Two of the valuation hierarchy. The Option contracts represent the rights to buy or sell MBS at specified prices in the future. The fair value of the Company's Option contracts is based upon the underlying current to be announced pricing of the Agency MBS market, and a market-based volatility.

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Interest Rate Contracts

The Company's interest rate contracts are classified within Level Two of the valuation hierarchy. The Company's interest rate contracts represent interest rate cap and swap agreements which are used to mitigate the impact of increases in short-term interest rates on variable-rate debt used to fund fixed-rate leases. The fair value of the Company's interest rate contracts is based upon projected short term interest rates and a market-based volatility.

Foreign Exchange Contracts

The Company's foreign exchange contracts are classified within Level Two of the valuation hierarchy. The Company has entered into foreign exchange contracts to mitigate the exchange risk associated with Canadian dollar denominated lease assets collateralizing U.S. dollar denominated borrowings. The fair value of the Company's foreign exchange contracts is determined using current exchange rates.

Mortgage Servicing Rights. The Company's MSR's are classified within Level Three of the valuation hierarchy due to the use of significant unobservable inputs and the inactive market for such assets. See Note 6, Mortgage Loan Sales and Note 7, Derivatives and Risk Management Activities for additional information regarding the significant inputs and valuation techniques of MSR's.

Mortgage Loan Securitization Debt Certificates. The Company's mortgage loan securitization debt certificates are classified within Level Three of the valuation hierarchy. Mortgage loan securitization debt certificates represent senior securitization certificates payable through the securitization trust, which is consolidated as a VIE, to third-party holders of the certificates.

As of June 30, 2010, the Company estimates the fair value of its mortgage loan securitization debt certificates using a discounted cash flow model which projects remaining cash flows with expected prepayment speeds. The prepayment assumption of 12% (annual rate) is based on market prepayment curves from current industry data. The discount rate of 10% (annual rate) is based on an expectation of the market-risk premium for these types of securities.

------------------------	------	--------	------	--------

When a determination is made to classify an asset or liability within Level Three of the valuation hierarchy, the determination is based upon the significance of the unobservable factors to the overall fair value measurement of the asset or liability. The fair value of assets and liabilities classified within Level Three of the valuation hierarchy also typically includes observable factors. In the event that certain inputs to the valuation of assets and liabilities are actively quoted and can be validated to external sources, the realized and unrealized gains and losses included in the tables above include changes in fair value determined by observable factors.

Changes in the availability of observable inputs may result in the reclassification of certain assets or liabilities. Such reclassifications are reported as transfers in or out of Level Three as of the beginning of the period that the change occurs.

Table of Contents

PHH CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The Company's mortgage loans in foreclosure and real estate owned (REO), which are included in Other assets in the Condensed Consolidated Balance Sheets, are evaluated for impairment using fair value measurements on a non-recurring basis. The evaluation of impairment reflects an estimate of losses currently incurred at the balance sheet date, which will likely not be recoverable from guarantors, insurers or investors. The impairment of mortgage loans in foreclosure, which represents the unpaid principal balance of mortgage loans for which foreclosure proceedings have been initiated, plus recoverable advances made by the Company on those loans, is based on the fair value of the underlying collateral, determined on a loan level basis, less costs to sell. The Company estimates the fair value of the collateral by considering appraisals and broker price opinions, which are updated on a periodic basis to reflect current housing market conditions. The Company records REO, which are acquired from mortgagors in default, at the lower of adjusted carrying amount at the time the property is acquired or fair value of the property, less estimated costs to sell. The Company estimates the fair value of REO using appraisals and broker price opinions, which are updated on a periodic basis to reflect current housing market conditions.

The carrying value of the Company's mortgage loans in foreclosure and REO were as follows:

	June 30, 2010	December 31, 2009
	(In millions)	
Mortgage loans in foreclosure	\$ 116	\$ 113
Allowance for probable losses	(21)	(20)
Mortgage loans in foreclosure, net	\$ 95	\$ 93
REO	\$ 44	\$ 51
Adjustment to estimated net realizable value	(15)	(15)
REO, net	\$ 29	\$ 36

The allowance for probable losses associated with the Company's mortgage loans in foreclosure and the adjustment to record REO at their estimated net realizable value were based upon fair value measurements from Level Two of the valuation hierarchy. During the three and six months ended June 30, 2010, the Company recorded total foreclosure-related charges of \$20 million and \$43 million, respectively, in Other operating expenses in the Condensed Consolidated Statements of Operations, which included the provision for probable losses related to the Company's off-balance sheet recourse exposure in addition to the provision for valuation adjustments for mortgage loans in foreclosure and REO. During the three and six months ended June 30, 2009, the Company recorded total foreclosure-related charges of \$13 million and \$34 million, respectively, in Other operating expenses in the Condensed Consolidated Statements of Operations, which included the provision for probable losses related to the Company's off-balance sheet recourse exposure in addition to the provision for valuation adjustments for mortgage loans in foreclosure and REO. See Note 11, Commitments and Contingencies for further discussion regarding the Company's off-balance sheet recourse exposure.

(Unaudited)

14. Variable Interest Entities

The Company determines whether an entity is a VIE and whether it is the primary beneficiary at the date of initial involvement with the entity. Reconsideration of an entity's status as a VIE is based on the occurrence of certain events. With the updates to ASC 810, the Company reassesses whether it is the primary beneficiary of a VIE on an ongoing basis based on changes in facts and circumstances whereas prior to the updates to ASC 810 this assessment was made only upon the occurrence of certain events affecting the VIE's equity investment at risk and upon certain changes in the VIE's activities. In determining whether it is the primary beneficiary, the Company considers the purpose and activities of the VIE, including the variability and related risks the VIE incurs and transfers to other entities and their related parties. With the updates to ASC 810, these factors are considered in determining which entity has the power to direct activities of the VIE that most significantly impact the VIE's economic performance and whether that entity also has the obligation to absorb losses of or receive benefits from the VIE that could be potentially significant to the VIE. Prior to the updates to ASC 810, the Company considered these factors to make a qualitative assessment and, if inconclusive, a quantitative assessment of whether it would absorb a majority of the VIE's expected losses or receive a majority of the VIE's expected residual returns. If the Company determines that it is the primary beneficiary of the VIE, the VIE is consolidated within the Company's Condensed Consolidated Financial Statements.

Mortgage Venture

For the six months ended June 30, 2010, approximately 32% of the mortgage loans originated by the Company were derived from Realogy's affiliates, of which approximately 77% were originated by the Mortgage Venture. During the three and six months ended June 30, 2010, the Mortgage Venture brokered or sold \$2.7 billion and \$4.5 billion, respectively, of mortgage loans to the Company under the terms of a loan purchase agreement with the Mortgage Venture, whereby the Mortgage Venture has committed to sell or broker, and the Company has agreed to purchase or fund, certain loans originated by the Mortgage Venture. As of June 30, 2010, the Company had outstanding commitments to purchase or fund \$1.2 billion of MLHS and IRLCs that may result in closed mortgage loan from the Mortgage Venture.

During both the three and six months ended June 30, 2010, the Company received \$5 million of distributions from the Mortgage Venture. The Company did not make any capital contributions to support the Mortgage Venture during the six months ended June 30, 2010. The Company has been the primary beneficiary of the Mortgage Venture since its inception, and current period events did not change the decision regarding whether or not to consolidate the Mortgage Venture.

Total liabilities⁽³⁾	\$ 144	\$ 16

(1) See Note 9, Debt and Borrowing Arrangements for assets held as collateral related to the Mortgage Venture's borrowing arrangements, which are not available to pay the Company's general obligations.

(2) See Note 9, Debt and Borrowing Arrangements

for additional information regarding the Mortgage Ventures borrowing arrangements.

- (3) Total liabilities exclude \$61 million and \$15 million of intercompany payables as of June 30, 2010 and December 31, 2009, respectively.

As of June 30, 2010 and December 31, 2009, the Company's investment in the Mortgage Venture was \$72 million and \$77 million, respectively. In addition to this investment, the Company had \$61 million and \$15 million in receivables, from the Mortgage Venture as of June 30, 2010 and December 31, 2009, respectively.

During the three and six months ended June 30, 2010, the Mortgage Venture originated \$2.6 billion and \$4.4 billion, respectively, of residential mortgage loans. During the three and six months ended June 30, 2009, the Mortgage Venture originated \$3.4 billion and \$5.7 billion, respectively, of residential mortgage loans.

Mortgage Loan Securitization Trust

As a result of the adoption of updates to ASC 810 and ASC 860 as of January 1, 2010, the Company was required to consolidate a mortgage loan securitization trust that previously met the QSPE scope exception. The mortgage loan securitization trust included in the Company's Condensed Consolidated Balance Sheet at June 30, 2010 had \$47 million in Total assets and \$35 million in Total liabilities. Additionally, \$12 million of the trust's subordinate debt certificates are held by the Company. The Company's investment in the subordinated debt and residual interests, in connection with its function as servicer for the trust, provides the Company with a controlling financial interest in the trust.

Debt ⁽³⁾	2,675	2,859
Total liabilities	\$ 2,678	\$ 2,862

(1) Restricted cash primarily relates to amounts specifically designated to purchase assets, to repay debt and/or to provide over-collateralization related to the Company's vehicle management asset-backed debt arrangements.

(2) See Note 9, Debt and Borrowing Arrangements for assets held as collateral related to the Company's vehicle management

asset-backed debt arrangements, which are not available to pay the Company's general obligations.

- (3) See Note 9, Debt and Borrowing Arrangements for additional information regarding the variable funding and term notes issued by Chesapeake.

Fleet Leasing Receivables Trust

FLRT is a Canadian special purpose trust and its primary business activities include the acquisition, disposition and administration of purchased or acquired lease assets from our other Canadian subsidiaries and the borrowing of funds or the issuance of securities to finance such acquisitions.

The Company determined that FLRT and PHH Fleet Lease Receivables LP are VIEs. The Company considered the nature and purpose of each of the entities and how the risk transferred to interest holders through their variable interests. The Company determined on a qualitative basis that it is the primary beneficiary of each of these entities.

15. Segment Information

The Company conducts its operations through three business segments: Mortgage Production, Mortgage Servicing and Fleet Management Services. Certain income and expenses not allocated to the three reportable segments and intersegment eliminations are reported under the heading Other.

The Company's management evaluates the operating results of each of its reportable segments based upon Net revenues and segment profit or loss, which is presented as the income or loss before income tax provision or benefit and after net income or loss attributable to noncontrolling interest. The Mortgage Production segment profit or loss excludes Realogy's noncontrolling interest in the profits and losses of the Mortgage Venture.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Except as expressly indicated or unless the context otherwise requires, the Company, PHH, we, our or us means PHH Corporation, a Maryland corporation, and its subsidiaries. This Item 2 should be read in conjunction with the Cautionary Note Regarding Forward-Looking Statements, Item 1A. Risk Factors and our Condensed Consolidated Financial Statements and notes thereto included in this Quarterly Report on Form 10-Q for the quarter ended June 30, 2010 (the Form 10-Q) and Item 1. Business, Item 1A. Risk Factors, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements and the notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2009 (our 2009 Form 10-K).

Overview

We are a leading outsource provider of mortgage and fleet management services. We conduct our business through three operating segments: a Mortgage Production segment, a Mortgage Servicing segment and a Fleet Management Services segment. Our Mortgage Production segment originates, purchases and sells mortgage loans through PHH Mortgage Corporation and its subsidiaries (collectively, PHH Mortgage) which includes PHH Home Loans, LLC and its subsidiaries (collectively, PHH Home Loans or the Mortgage Venture). PHH Home Loans is a mortgage venture that we maintain with Realogy Corporation (Realogy) that began operations in October 2005. Our Mortgage Servicing segment services mortgage loans that either PHH Mortgage or PHH Home Loans originated. Our Mortgage Servicing segment also purchases mortgage servicing rights (MSRs) and acts as a subservicer for certain clients that own the underlying MSRs. Our Fleet Management Services segment provides commercial fleet management services to corporate clients and government agencies throughout the United States (U.S.) and Canada through PHH Vehicle Management Services Group LLC.

Executive Summary

During the second quarters of 2010 and 2009, our consolidated results were as follows:

	Three Months Ended June 30,	
	2010	2009
	(In millions)	
Net (loss) income attributable to PHH Corporation	\$ (133)	\$ 106
Basic (loss) earnings per share attributable to PHH Corporation	(2.40)	1.93
Diluted (loss) earnings per share attributable to PHH Corporation	(2.40)	1.91

During the second quarter of 2010 in comparison to the second quarter of 2009, segment (loss) profit was primarily driven by:

§ **Combined Mortgage Services Segments of \$(235) Million vs. \$168 Million:** an unfavorable change in the fair value of MSRs primarily resulting from a decline in mortgage interest rates during the second quarter of 2010 compared to an increase in mortgage interests rates during the second quarter of 2009 coupled with lower margins on mortgage loans and a decrease in mortgage loans closed that were partially offset by an increase in the volume of interest rate lock commitments (IRLCs) expected to close.

§ **Mortgage Production Segment of \$49 Million vs. \$82 Million:** lower margins on mortgage loans and lower volumes of more profitable first mortgage retail originations partially offset by an increase in IRLCs expected to close.

Table of Contents

§ **Mortgage Servicing Segment of \$(284) Million vs. \$86 Million:** an unfavorable change in the fair value of MSR's primarily resulting from a decline in mortgage interest rates during the second quarter of 2010 compared to an increase in mortgage interests rates during the second quarter of 2009 partially offset by lower reductions in the value of MSR's due to prepayments and credit-related adjustments.

§ **Fleet Management Services Segment of \$13 Million vs. \$18 Million:** a \$4 million unfavorable impact of the segment recapitalization and acceleration of costs associated with the execution of the transformation plan.

During the six months ended June 30, 2010 and 2009, our consolidated results were as follows:

	Six Months Ended June 30,	
	2010	2009
	(In millions)	
Net (loss) income attributable to PHH Corporation	\$ (125)	\$ 108
Basic (loss) earnings per share attributable to PHH Corporation	(2.26)	1.98
Diluted (loss) earnings per share attributable to PHH Corporation	(2.26)	1.96

During the six months ended June 30, 2010 compared to the six months ended June 30, 2009 segment (loss) profit was primarily driven by:

§ **Combined Mortgage Services Segments of \$(223) Million vs. \$163 Million:** an unfavorable change in the fair value of MSR's primarily resulting from a decline in mortgage interest rates during the six months ended June 30, 2010 compared to an increase in mortgage interests rates during the six months ended June 30, 2009 coupled with lower margins on mortgage loans and a decrease in mortgage loans closed that were partially offset by an increase in the volume of IRLC's expected to close.

§ **Mortgage Production Segment of \$74 Million vs. \$195 Million:** lower margins on mortgage loans and lower volumes of more profitable first mortgage retail originations partially offset by an increase in IRLC's expected to close.

§ **Mortgage Servicing Segment of \$(297) Million vs. \$(32) Million:** an unfavorable change in the fair value of MSR's primarily resulting from a decline in mortgage interest rates during the six months ended June 30, 2010 compared to an increase in mortgage interests rates during the six months ended June 30, 2009 partially offset by lower reductions in the value of MSR's due to prepayments and credit-related adjustments.

§ **Fleet Management Services Segment of \$21 Million vs. \$25 Million:** a \$7 million unfavorable impact of the segment recapitalization and acceleration of costs associated with the execution of the transformation plan.

Table of Contents

After assessing our cost structure and processes, we initiated a transformation program in 2009 directed towards creating greater operational efficiencies, improving scalability of our operating platforms and reducing our operating expenses. This program involves evaluating and improving operational and administrative processes, eliminating inefficiencies and targeting areas of the market where we can leverage our competitive strengths. We continue to expect our transformation initiatives to produce an annualized expense benefit of \$100 million to \$120 million beginning in 2011. We believe that had we not commenced our efforts in 2009, total projected expenses for the full year 2010 would be approximately \$34 million higher. Although this benefit is below our initial expectation of \$40 million, we have increased the scope of our initiatives to target additional revenue and cost opportunities beyond the original \$577 million of expenses previously targeted and have incurred additional costs in 2010 as a result of these efforts.

We estimate that our transformation initiatives resulted in annualized run-rate expense benefits of approximately \$61 million of the \$100 million to \$120 million 2011 goal. We believe that had we not begun our transformation program in 2009 total expenses during the six months ended June 30, 2010 would have been approximately \$16 million higher. To deliver these benefits, we incurred approximately \$21 million in expenses during the six months ending June 30, 2010. These expenses were greater than our initial plan as we moved aggressively to accelerate expense reductions, increase the scope of our transformation efforts and provide the foundation for sustained operational improvements into 2011.

Our expectation of transformation benefits represent our best estimate to date. Since the execution of certain initiatives is still in process, the amount and nature of actual benefits realized could vary from expectations.

See Results of Operations Second Quarter 2010 vs. Second Quarter 2009 and Results of Operations Six Months Ended June 30, 2010 vs. Six Months Ended June 30, 2009 for additional information regarding our consolidated results and the results of each of our reportable segments for the respective period.

Regulatory Trends

The recent economic conditions in the U.S. have resulted, and could continue to result, in increased delinquencies, home price depreciation and lower home sales. In response to these trends, the U.S. government has taken several actions that are intended to stabilize the housing market and the banking system, maintain lower interest rates, and increase liquidity for lending institutions. Certain of these actions are also intended to make it easier for borrowers to obtain mortgage financing or to avoid foreclosure on their current homes. Some of these key actions that have impacted, and may continue to impact, the U.S. mortgage industry include the enactment of the Housing and Economic Recovery Act of 2008, the conservatorship of Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac), the enactment of the Emergency Economic Stabilization Act of 2008, the Troubled Asset Relief Program, (TARP), the implementation of a streamlined loan modification program for Fannie Mae loans for qualified borrowers and enhanced economic incentive compensation for mortgage loan servicers to modify qualified loans with additional incentives for loans that continue to perform for a period of time following modification (HAMP), the Home Affordable Refinance Program as part of the Homeowner Affordability and Stability Plan (HASP), the purchase by the Federal Reserve of direct obligations of the GSEs, the enactment of the American Recovery and Reinvestment Act of 2009 and the implementation of the Public-Private Investment Program.

These specific actions by the federal government are intended, among other things, to stabilize domestic residential real estate markets by increasing the availability of credit for homebuyers and existing homeowners and reduce the foreclosure rates through mortgage loan modification programs. Although the federal government's HASP programs are intended to improve the current trends in home foreclosures, some local and state governmental authorities have taken, and others are contemplating taking, regulatory action to require increased loss mitigation outreach for borrowers, including the imposition of waiting periods prior to the filing of notices of default and the completion of foreclosure sales and, in some cases, moratoriums on foreclosures altogether. Such regulatory changes in the foreclosure process could increase servicing costs and reduce the ultimate proceeds received on these properties if real estate values continue to decline. These changes could also have a negative impact on liquidity as we may be required to repurchase loans without the ability to sell the underlying property on a timely basis.

While it is too early to determine the impact of the foregoing governmental initiatives, there can be no assurance that any of these programs will improve the effects of the recent economic conditions on our business.

Table of Contents

We also may be at a competitive disadvantage in the event that our competitors are able to participate in these federal programs and it is determined that we are not eligible to participate in these programs.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) was signed into law, certain provisions of which became effective on July 22, 2010. The Dodd-Frank Act establishes a new consumer financial protection agency with broad regulatory powers and increases federal regulatory oversight of many aspects of the financial services industry including the areas of mortgage originations and sales and asset-backed securitizations.

With respect to asset-securitizations, the Dodd-Frank Act requires sponsors and issuers of securitizations to retain a portion of the economic interest in the credit risk associated with the assets securitized by them. Federal regulators have been authorized to provide exceptions to the risk retention requirements for certain qualified mortgages and mortgages meeting certain underwriting standards prescribed in such regulations. We rely upon our ability to sell mortgage loans into securities sponsored by Fannie Mae, Freddie Mac and Government National Mortgage Association (Ginnie Mae) (collectively, Government-Sponsored entities or GSEs). If the mortgage loans we typically sell into GSE-sponsored mortgage backed securities (MBS) do not meet the definition of a qualified mortgage , then the GSEs may be required to retain a portion of the risk of assets they securitize, which may in turn substantially reduce or eliminate the GSEs ability to issue MBS. As of the date of this Form 10-Q, it is unclear whether future regulations related to the definition of qualified mortgages will include the types of conforming mortgage loans we typically sell into GSE-sponsored MBS. It is also unclear at this time what, if any, effect future regulations may have on the ability of the GSEs to issue MBS or what changes, if any, Congress may make to the structure of the GSEs. Further, there can be no assurances that the mortgage loans we typically sell to the GSEs will qualify under future regulations related to the definition of a qualified mortgage.

Our Vehicle Management Services segment utilizes asset-backed debt issued by Chesapeake to support the acquisition of vehicles used in our U.S. leasing operations. Historically, we have maintained subordinated rights to, and a first loss position in, excess of five percent of the assets supporting the securities and other indebtedness issued by Chesapeake. While we expect to retain our economic interest in the credit risk associated with the assets securitized by Chesapeake consistent with historic levels, there can be no assurances that level of our retained economic interest in Chesapeake will comply with the final risk retention regulations to be issued by federal regulators under the Dodd-Frank Act.

We are continuing to evaluate all aspects of the Dodd-Frank Act. This legislation and related regulations could lead to heightened federal regulation and oversight of our business activities, higher regulatory compliance costs and could potentially materially adversely impact our businesses.

Mortgage Production and Mortgage Servicing Segments**Mortgage Industry Trends****Overall Trends**

The aggregate demand for mortgage loans in the U.S. is a primary driver of the Mortgage Production and Mortgage Servicing segments operating results. The demand for mortgage loans is affected by external factors including prevailing mortgage rates, the strength of the U.S. housing market and investor underwriting standards for borrower credit and loan-to-value ratios (LTVs). Current economic conditions have impacted mortgage interest rates during the six months ended June 30, 2010. Mortgage rates have declined during the second quarter of 2010 and have remained at historically low levels into the third quarter of 2010, which has generated an increase in refinance activity. Although the level of interest rates is a key driver of refinancing activity, there are other factors which influence the level of refinance originations including home prices, underwriting standards and product characteristics.

The mortgage industry has continued to utilize more restrictive underwriting standards that made it more difficult for borrowers with less than prime credit records, limited funds for down payments or a high LTV to qualify for a mortgage. While there is uncertainty regarding their long-term impact, the HASP programs,

Table of Contents

discussed above under **Regulatory Trends**, expands the population of eligible borrowers by expanding the maximum LTV to 125% for existing Fannie Mae loans which we believe had a favorable impact on mortgage industry origination volumes and may continue during the remainder of 2010.

As of July 2010, Fannie Mae's *Economics and Mortgage Market Analysis* forecasted a decrease in industry loan originations of approximately 27% in 2010 from 2009 levels, which was comprised of a 41% decrease in forecasted refinance activity partially offset by a 2% increase in forecasted purchase originations.

See **Liquidity and Capital Resources - General** for a discussion of trends relating to the credit markets and the impact of these trends on our liquidity.

Mortgage Production Trends

Although Fannie Mae's *Economics and Mortgage Market Analysis* forecast projects a decline in refinance originations during the remainder of 2010, overall refinance originations for the mortgage industry and our Mortgage Production segment may be positively impacted by the recent decline in mortgage interest rates to historically low levels. Refinancing activity during the remainder of 2010 may also be impacted by many borrowers who have existing adjustable-rate mortgage loans that will have their rates reset as lower fixed interest rates may provide an incentive for those borrowers to seek to refinance loans subject to interest rate changes.

Loan margins across the industry were lower on average during the six months ended June 30, 2010 from the highs of 2009 given the decline in the industry origination volume. However, they have remained and we expect them to continue to remain higher than years prior to 2008, which we believe is reflective of a longer term view of the returns required to manage the underlying risk of a mortgage production business.

Although we continue to experience a challenging environment for purchase originations, our Mortgage Production segment's origination volumes were positively impacted by a higher level of home affordability driven by both declines in home prices and historically low mortgage interest rates, as well as the availability of tax incentives for first time homebuyers and qualified repeat buyers, which were expanded to home purchases with a binding sales contract signed by April 30, 2010. Although we expect the environment for purchase originations to continue to be challenging during the remainder of 2010, we anticipate that to the extent that this greater level of housing affordability continues, it could improve purchase originations for the mortgage industry during the remainder of 2010.

In response to the trends impacting the decline in overall industry originations and margins, we are actively working to grow our market share and improve our profitability. See **Results of Operations - Second Quarter 2010 vs. Second Quarter 2009 - Segment Results - Mortgage Production Segment** and **Results of Operations - Six Months Ended June 30, 2010 vs. Six Months Ended June 30, 2009 - Segment Results - Mortgage Production Segment** for a further discussion of these initiatives and their anticipated impact on our mortgage business.

The majority of industry loan originations during the second quarter and six months ended June 30, 2010 were fixed-rate conforming loans and substantially all of our loans closed to be sold were conforming. We continued to observe a lack of liquidity and lower valuations in the secondary mortgage market for non-conforming loans during the six months ended June 30, 2010. Although we expect this trend to continue during the remainder of 2010, we have observed that the market for prime loan production with loan amounts exceeding the GSE guidelines have begun to reemerge.

Mortgage Servicing Trends

The declining housing market and general economic conditions, including elevated unemployment rates, have continued to negatively impact our Mortgage Servicing segment. Industry-wide mortgage loan delinquency rates have increased and may continue to increase over 2009 levels in correlation with unemployment rates. We expect foreclosure costs to remain elevated during the remainder of 2010 due to an increase in loss severity, repurchase requests and declining home prices. We experienced increases in actual and projected repurchases,

Table of Contents

indemnifications and related loss severity associated with the representations and warranties that we provide to purchasers and insurers of our sold loans, which we expect to continue to remain at elevated levels during the remainder of 2010, primarily due to increased delinquency rates and a decline in housing prices. These trends are considered in the determination of our foreclosure-related reserves; however, changes in these trends and other economic factors as well as the level and composition of our mortgage production volumes will impact the balance of our foreclosure-related reserves.

A summary of the activity in foreclosure-related reserves is as follows:

	Three Months Ended June 30,	
	2010	2009
	(In millions)	
Foreclosure-related reserves, April 1,	\$ 96	\$ 88
Realized foreclosure losses ⁽¹⁾	(16)	(24)
Increase in foreclosure reserves	24	16
Foreclosure-related reserves, June 30,	\$ 104	\$ 80
	Six Months Ended June 30,	
	2010	2009
	(In millions)	
Foreclosure-related reserves, January 1,	\$ 86	\$ 81
Realized foreclosure losses ⁽¹⁾	(32)	(39)
Increase in foreclosure reserves	50	38
Foreclosure-related reserves, June 30,	\$ 104	\$ 80

⁽¹⁾ Realized foreclosure losses for both the three and six months ended June 30, 2009 include an \$11 million settlement with an individual investor for all future potential repurchase liabilities.

During the second quarter of 2010, servicer incentives received from the Treasury, under HAMP, were not significant and during the six months ended June 30, 2010, we earned \$1 million in servicer incentives from the Treasury. Servicer incentives did not significantly impact our results of operations.

As of June 30, 2010, Atrium Reinsurance Corporation (Atrium) had outstanding reinsurance agreements that were inactive and in runoff with two primary mortgage insurers. While in runoff, Atrium will continue to collect premiums

and have risk of loss on the current population of loans reinsured, but may not add to that population of loans. Although HAMP could reduce our exposure to reinsurance losses through the loan modification and refinance programs, increases in mortgage loan delinquency rates and lower home prices could continue to have a further negative impact on our reinsurance business.

A summary of the activity in reinsurance-related reserves is as follows:

	Three Months Ended June 30,	
	2010	2009
	(In millions)	
Reinsurance-related reserves, April 1,	\$ 117	\$ 97
Realized reinsurance losses	(4)	(1)
Increase in reinsurance reserves	15	12
Reinsurance-related reserves, June 30,	\$ 128	\$ 108

Table of Contents

	Six Months Ended June 30,	
	2010	2009
	(In millions)	
Reinsurance-related reserves, January 1,	\$ 108	\$ 83
Realized reinsurance losses	(6)	(1)
Increase in reinsurance reserves	26	26
Reinsurance-related reserves, June 30,	\$ 128	\$ 108

As a result of the continued weakness in the housing market and increasing delinquency and foreclosure experience, our provision for reinsurance losses may increase during the remainder of 2010 in comparison to 2009 as anticipated losses become incurred. Additionally, we expect to continue to pay claims for certain book years during the remainder of 2010. We hold securities in trust related to our potential obligation to pay such claims, which were \$284 million and were included in Restricted cash, cash equivalents and investments in the accompanying Condensed Consolidated Balance Sheet as of June 30, 2010. We continue to believe that this amount is significantly higher than the expected claims.

See Item 3. Quantitative and Qualitative Disclosures About Market Risk in this Form 10-Q for additional information regarding mortgage reinsurance and loan repurchases.

Fleet Management Services Segment**Fleet Industry Trends**

Growth in our Fleet Management Services segment is driven principally by increased market share in fleets greater than 75 units and increased fee-based services. The U.S. commercial fleet management services market has continued to experience minimal growth over the last several years as reported by *Automotive Fleet*. The North American automobile manufacturers are projecting an increase in the demand for new vehicle production during the remainder of 2010, which we believe may include an increase in the demand for commercial fleet vehicles. Despite the fact that there appears to be signs of recovery within the industry, we experienced a decline in our leased units in the first half of 2010 and we expect that this trend will also continue during the remainder of 2010 as the increase in replacement vehicles is not likely to completely offset the impact of the U.S. economic recession.

Market and Credit Risk

We are exposed to market and credit risks. See Item 3. Quantitative and Qualitative Disclosures About Market Risk in this Form 10-Q and Part I Item 1A. Risk Factors Risks Related to our Business Certain hedging strategies that we may use to manage interest rate risk associated with our MSR's and other mortgage-related assets and commitments may not be effective in mitigating those risks. in our 2009 Form 10-K for more information.

Table of Contents**Results of Operations Second Quarter 2010 vs. Second Quarter 2009****Consolidated Results**

Our consolidated results of operations for the second quarters of 2010 and 2009 were comprised of the following:

	Three Months Ended June 30,		
	2010	2009	Change
	(In millions)		
Net fee income	\$ 106	\$ 124	\$ (18)
Fleet lease income	349	360	(11)
Gain on mortgage loans, net	139	147	(8)
Mortgage net finance expense	(19)	(12)	(7)
Loan servicing income	97	100	(3)
Change in fair value of mortgage servicing rights	(320)	55	(375)
Other income (expense)	19	(6)	25
Net revenues	371	768	(397)
Depreciation on operating leases	306	322	(16)
Fleet interest expense	25	21	4
Total other expenses	255	239	16
Total expenses	586	582	4
(Loss) income before income taxes	(215)	186	(401)
(Benefit from) provision for income taxes	(89)	75	164
Net (loss) income	(126)	111	(237)
Less: net income attributable to noncontrolling interest	7	5	2
Net (loss) income attributable to PHH Corporation	\$ (133)	\$ 106	\$ (239)

During the second quarter of 2010, our Net revenues decreased by \$397 million (52%) compared to the second quarter of 2009, due to decreases of \$362 million in our Mortgage Servicing segment, \$30 million in our Mortgage Production segment and \$6 million in our Fleet Management Services segment partially offset by a \$1 million decrease in other expenses not allocated to our reportable segments. Our (Loss) income before income taxes changed unfavorably by \$401 million during the second quarter of 2010 compared to the second quarter of 2009 due to unfavorable changes of \$370 million in our Mortgage Servicing segment, \$31 million in our Mortgage Production segment and \$5 million in our Fleet Management Services segment, that were partially offset by a \$5 million decrease in other expenses not allocated to our reportable segments.

We record our interim income tax provisions or benefits by applying a projected full-year effective income tax rate to our quarterly pre-tax income or loss for results that we deem to be reliably estimable in accordance with Financial Accounting Standards Board Accounting Standards Codification (ASC) 740, Income Taxes. Certain results dependent on fair value adjustments of our Mortgage Production and Mortgage Servicing segments are considered not to be reliably estimable and therefore we record discrete year-to-date income tax provisions on those results.

During the second quarter of 2010, the Benefit from income taxes was \$89 million and was impacted by a \$3 million net increase in valuation allowances for deferred tax assets (primarily due to loss carryforwards generated during the second quarter of 2010 for which we believe it is more likely than not that the loss carryforwards will not be realized).

During the second quarter of 2009, the Provision for income taxes was \$75 million, and was impacted by a \$1 million net increase in valuation allowances for deferred tax assets (primarily due to loss carryforwards generated during the second quarter of 2009 for which we believe it is more likely than not that the loss carryforwards will not be realized).

Table of Contents**Segment Results**

Discussed below are the results of operations for each of our reportable segments. Certain income and expenses not allocated to our reportable segments and intersegment eliminations are reported under the heading Other. Our management evaluates the operating results of each of our reportable segments based upon Net revenues and segment profit or loss, which is presented as the income or loss before income tax provision or benefit and after net income or loss attributable to noncontrolling interest. The Mortgage Production segment profit or loss excludes Realogy's noncontrolling interest in the profits and losses of the Mortgage Venture.

During the first quarter of 2010, our Mortgage and Fleet businesses paid dividends to PHH Corporation in order to effect a reallocation of capital between our businesses (recapitalization). Management evaluated several data sources, including rating agency leverage benchmarks, industry comparables and asset-backed securities (ABS) market subordination levels to establish the revised equity levels in our businesses. The dividend payments impacted the balances under our intercompany funding arrangements, which are used to determine the allocation of our financing costs to our segments. Had the dividends been paid at the beginning of 2009, segment (loss) profit for our combined Mortgage Services segments and our Mortgage Production segment would have each changed favorably by \$4 million and segment profit for our Fleet Management Services segment would have decreased by \$4 million for the second quarter of 2009.

Mortgage Services

(Loss) profit for our combined Mortgage Services segments changed unfavorably by \$403 million during the second quarter of 2010 compared to the second quarter of 2009 primarily due to a \$392 million decrease in Net revenues and a \$9 million increase in Total expenses.

Net revenues for our combined Mortgage Services segments decreased by \$392 million during the second quarter of 2010 compared to the second quarter of 2009 due to a decrease of \$362 million in our Mortgage Servicing segment primarily due to a \$375 million decline in the Change in fair value of mortgage servicing rights coupled with a decrease of \$30 million in our Mortgage Production segment primarily attributable to lower volumes and margins on mortgage loans partially offset by an increase in IRLCs expected to close.

The following table presents the components of Total expenses:

	Three Months Ended June 30,			
	2010	2009	Change	% Change
	(In millions)			
Production-related expenses ⁽¹⁾	\$ 112	\$ 122	\$ (10)	(8)%
Servicing-related expenses	20	18	2	11%
Foreclosure costs	20	13	7	54%
Other expenses	40	30	10	33%
Total expenses	\$ 192	\$ 183	\$ 9	5%

⁽¹⁾ Approximately 80% of production-related expenses for the second quarter of 2010 are scalable with origination volumes.

Production-related expenses represent direct costs associated with the origination of mortgage loans, including commissions, appraisal expenses, automated underwriting and other closing costs, as well as production support costs, including underwriting, processing and secondary marketing. Due to the marginal costs associated with the origination of second-lien loan originations, production-related expenses are primarily driven by first mortgage closings. Production-related expenses decreased by 8% primarily due to a 9% decrease in the total number of first mortgage closings (units). Servicing-related expenses represent the operating costs of our Mortgage Servicing segment for performing the related servicing activities associated with our loan servicing portfolio. The increase in servicing-related expenses is primarily due to the higher costs associated with the increase in delinquencies and defaults in our loan servicing portfolio. Foreclosure costs increased by 54% primarily due to increases in actual and projected repurchases and indemnifications associated with the representations and warranties that we provide to purchasers and insurers of our sold loans. Other expenses consist of support functions, including information

Table of Contents

technology, finance, human resources, legal and corporate allocations. The increase in Other expenses is primarily attributable to outside consulting costs associated with executing our transformation plan.

The following table presents a summary of our financial results for our combined Mortgage Services segments and is followed by a discussion of each of the key components of Net revenues and Total expenses for the two reportable segments individually:

	Three Months Ended June 30,		Change	% Change
	2010	2009		
	(In millions)			
Mortgage fees	\$ 66	\$ 86	\$ (20)	(23)%
Gain on mortgage loans, net	139	147	(8)	(5)%
Mortgage interest income	22	26	(4)	(15)%
Mortgage interest expense	(41)	(40)	(1)	(3)%

Table of Contents*Mortgage Production Statistics*

The mix of total closings shifted from a higher percentage of refinance closings in the second quarter of 2009 towards more purchase closings in the second quarter of 2010. The higher percentage of refinance closings in the second quarter of 2009 was due primary to historically low interest rates during that time. The higher purchase closings in the second quarter of 2010 was driven by improvement in home sales as compared to the same period in 2009 and the acceleration of purchase closings due to the potential expiration of the home purchase tax credit which was scheduled to expire in the second quarter of 2010. Mortgage rates have declined further during the second quarter of 2010 which has resulted in an increase in IRLCs expected to close.

The decline in retail closing units was partially offset by higher wholesale/correspondent closing units. Due to the significantly higher volumes in the second quarter of 2009, there was a reduced capacity for wholesale/correspondent production. The increase in originations from our wholesale/correspondent channel during 2010 is due to our efforts to grow production in this channel and has partially offset declines in retail originations. Generally, retail closings are more profitable than wholesale/correspondent and have higher loan margins and higher expenses.

Mortgage Fees

Loans closed to be sold and fee-based closings are the key drivers of Mortgage fees. Mortgage fees consist of fee income earned on all loan originations, including loans closed to be sold and fee-based closings. Fee income consists of amounts earned related to application and underwriting fees, fees on cancelled loans and appraisal and other income generated by our appraisal services business. Fee income also consists of amounts earned from financial institutions related to brokered loan fees and origination assistance fees resulting from our private-label mortgage outsourcing activities. Fees associated with the origination and acquisition of MLHS are recognized as earned.

Mortgage fees decreased by \$20 million (23%) primarily due to the 27% decrease in the number retail closings (units) that was partially offset by the increase in fee-based originations during the second quarter of 2010 compared to the second quarter of 2009.

Gain on Mortgage Loans, Net

IRLCs expected to close are the primary driver of Gain on mortgage loans, net. Gain on mortgage loans, net includes realized and unrealized gains and losses on our MLHS, as well as the changes in fair value of our IRLCs and loan-related derivatives. The fair value of our IRLCs is based upon the estimated fair value of the underlying mortgage loan, adjusted for: (i) estimated costs to complete and originate the loan and (ii) the estimated percentage of IRLCs that will result in a closed mortgage loan. The valuation of our IRLCs and MLHS approximates a whole-loan price, which includes the value of the related MSR. MSRs are recognized and capitalized at the date the loans are sold and subsequent changes in the fair value of MSRs are recorded in Change in fair value of mortgage servicing rights in the Mortgage Servicing segment.

The components of Gain on mortgage loans, net were as follows:

	Three Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Gain on loans	\$ 140	\$ 148	\$ (8)	(5)%
Change in fair value of Scratch and Dent and certain non-conforming mortgage loans	(3)	(4)	1	25%
Economic hedge results	2	3	(1)	(33)%
Total change in fair value of MLHS and related derivatives	(1)	(1)		
Gain on mortgage loans, net	\$ 139	\$ 147	\$ (8)	(5)%

Table of Contents

Gain on mortgage loans, net decreased by \$8 million (5%) during the second quarter of 2010 compared to the second quarter of 2009 due to an \$8 million decrease in gain on loans.

The \$8 million decrease in gain on loans during the second quarter of 2010 compared to the second quarter of 2009 was primarily due to lower margins partially offset by a 22% increase in IRLCs expected to close. The significantly higher margins during the second quarter of 2009 were primarily attributable to an increase in industry refinance activity for conforming first mortgage loans, resulting from lower mortgage interest rates, coupled with lower overall industry capacity. Loan margins generally widen when mortgage interest rates decline and tighten when mortgage interest rates increase, as loan originators balance origination volume with operational capacity. The increase in IRLCs expected to close during the second quarter of 2010 was primarily attributable to a decline in mortgage interest rates in the latter portion of the second quarter of 2010, which has also generated an increase in margins on newly originated IRLCs.

Mortgage Net Finance Expense

Mortgage net finance expense allocable to the Mortgage Production segment consists of interest income on MLHS and interest expense allocated on debt used to fund MLHS and is driven by the average balance of loans held for sale, the average volume of outstanding borrowings, the note rate on loans held for sale and the cost of funds rate of our outstanding borrowings. Mortgage net finance expense allocable to the Mortgage Production segment increased by \$2 million during the second quarter of 2010 compared to the second quarter of 2009 due to a \$4 million (18%) decrease in Mortgage interest income that was partially offset by a \$2 million (8%) decrease in Mortgage interest expense. The \$4 million decrease in Mortgage interest income was primarily due to lower average volume of loans held for sale primarily due to a 15% decrease in loans closed to be sold. The \$2 million decrease in Mortgage interest expense was primarily attributable to the reallocation of capital between businesses, as discussed above.

Salaries and Related Expenses

Salaries and related expenses allocable to the Mortgage Production segment consist of commissions paid to employees involved in the loan origination process, as well as compensation, payroll taxes and benefits paid to employees in our mortgage production operations and allocations for overhead. Salaries and related expenses decreased by \$7 million (8%) during the second quarter of 2010 compared to the second quarter of 2009, due to a \$5 million decrease in commissions expense and a \$3 million decrease in management incentives partially offset by a \$1 million increase in salaries and related benefits. The decrease in commissions expense was primarily attributable to an 8% decrease in total closings and a decrease in first mortgage retail originations during the second quarter of 2010 compared to the second quarter of 2009, as there is higher commission cost associated with these loans. The increase in salaries and related benefits was primarily attributable to an increase in severance and other benefit costs in the second quarter of 2010 compared to the second quarter of 2009.

Other Operating Expenses

Other operating expenses allocable to the Mortgage Production segment consist of production-related direct expenses, appraisal expense and allocations for overhead. Other operating expenses increased by \$7 million (16%) during the second quarter of 2010 compared to the second quarter of 2009 primarily due to a \$6 million increase in corporate overhead costs associated with executing our transformation plan.

Table of Contents**Mortgage Servicing Segment**

The following tables present a summary of our financial results and a key related driver for the Mortgage Servicing segment, and are followed by a discussion of each of the key components of Net revenues and Total expenses:

	Three Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Average loan servicing portfolio	\$ 154,392	\$ 148,971	\$ 5,421	4%

Mortgage Net Finance Expense

Mortgage net finance expense allocable to the Mortgage Servicing segment consists of interest income credits from escrow balances, income from investment balances (including investments held by Atrium) and interest expense allocated on debt used to fund our MSR's, which is driven by the average volume of outstanding borrowings and the cost of funds rate of our outstanding borrowings.

Mortgage net finance expense increased by \$3 million (25%) during the second quarter of 2010 compared to the second quarter of 2009 due to a \$3 million (19%) increase in Mortgage interest expense. The increase in Mortgage

interest expense was due to a \$2 million increase in the interest expense allocated to fund our MSR's resulting from a higher average MSR balance in the second quarter of 2010 compared to the second quarter of 2009 and a \$1 million increase related to mortgage loan securitization debt certificates held by a mortgage loan securitization trust that was consolidated due to the adoption of updates to ASC 810, Consolidation (ASC 810) in the first quarter of 2010. Mortgage interest income for the second quarter of 2010 was consistent with the second quarter of 2009 due to a \$1 million increase related to securitized mortgage loans held by the mortgage loan securitization trust offset by lower short-term interest rates. Escrow balances earn income based on one-month LIBOR, which was 5 bps lower, on average, during the second quarter of 2010 compared to the second quarter of 2009. The ending one-month LIBOR rate at June 30, 2010 was 35 bps, which has significantly reduced the earnings opportunity related to our escrow balances, consistent with the second quarter of 2009.

Table of Contents*Loan Servicing Income*

Loan servicing income includes recurring servicing fees, other ancillary fees and net reinsurance loss from Atrium. Recurring servicing fees are recognized upon receipt of the coupon payment from the borrower and recorded net of guaranty fees. Net reinsurance loss represents premiums earned on reinsurance contracts, net of ceding commission and adjustments to the reserves for reinsurance losses. The primary driver for Loan servicing income is the average loan servicing portfolio.

The components of Loan servicing income were as follows:

	Three Months Ended June 30,			% Change
	2010	2009	Change	
		(In millions)		
Net service fee revenue	\$ 99	\$ 105	\$ (6)	(6)%
Late fees and other ancillary servicing revenue	13	15	(2)	(13)%
Curtailed interest paid to investors	(6)	(15)	9	60%
Net reinsurance loss	(9)	(5)	(4)	(80)%
Loan servicing income	\$ 97	\$ 100	\$ (3)	(3)%

Loan servicing income decreased by \$3 million (3%) during the second quarter of 2010 compared to the second quarter of 2009 primarily due to decreases in net service fee revenue and late fees and other ancillary servicing revenue and an increase in net reinsurance loss which were partially offset by a decrease in curtailment interest paid to investors. The \$6 million decrease in net service fee revenue was primarily due to the sale of excess servicing associated with a portion of our MSR's executed during the fourth quarter of 2009 and an increase in guarantee fees as a result of a greater composition of loans sold to the GSEs included in our capitalized loan servicing portfolio partially offset by a 4% increase in the average loan servicing portfolio. The \$9 million decrease in curtailment interest paid to investors was primarily due to a 47% decrease in loans included in our loan servicing portfolio that paid off during the second quarter of 2010 compared to the second quarter of 2009.

Change in Fair Value of Mortgage Servicing Rights

The fair value of our MSR's is estimated based upon projections of expected future cash flows from our MSR's considering prepayment estimates, our historical prepayment rates, portfolio characteristics, interest rates based on interest rate yield curves, implied volatility and other economic factors. Generally, the value of our MSR's is expected to increase when interest rates rise and decrease when interest rates decline due to the effect those changes in interest rates have on prepayment estimates. Other factors noted above as well as the overall market demand for MSR's may also affect the MSR's valuation.

The components of Change in fair value of mortgage servicing rights were as follows:

	Three Months Ended June 30,			% Change
	2010	2009	Change	
		(In millions)		
Actual prepayments of the underlying mortgage loans	\$ (35)	\$ (85)	\$ 50	59%
Actual receipts of recurring cash flows	(11)	(13)	2	15%
Credit-related fair value adjustments ⁽¹⁾	(1)	(22)	21	95%
Market-related fair value adjustments ⁽²⁾	(273)	175	(448)	n/m ⁽³⁾
Change in fair value of mortgage servicing rights	\$ (320)	\$ 55	\$ (375)	n/m ⁽³⁾

- (1) Represents the change in fair value of MSRs primarily due to changes in portfolio delinquencies and foreclosures.
- (2) Represents the change in fair value of MSRs due to changes in market inputs and assumptions used in the valuation model.
- (3) n/m Not meaningful.

Table of Contents

The fluctuation in the decline in value of our MSR's due to actual prepayments during the second quarter of 2010 in comparison to the second quarter of 2009 was primarily attributable to lower prepayment rates. The actual prepayment rate of mortgage loans in our capitalized servicing portfolio was 12% and 24% of the unpaid principal balance of the underlying mortgage loans, on an annualized basis, during the second quarter of 2010 and 2009, respectively.

Credit-related fair value adjustments were relatively unchanged during the second quarter of 2010 as portfolio delinquencies and foreclosures were consistent with first quarter levels. The \$22 million decline during the second quarter of 2009 was primarily due to the continued deteriorating economic conditions in the broader U.S. economy which resulted in an increase in total delinquencies attributable to the capitalized servicing portfolio.

The \$273 million unfavorable change during the second quarter of 2010 due to market-related fair value adjustments was primarily due to a significant decrease in mortgage interest rates during the second quarter of 2010 coupled with a flattening of the yield curve which led to higher expected prepayments. The \$175 million favorable change during the second quarter of 2009 was primarily due to an increase in mortgage interest rates and a decrease in expected short-term prepayment speeds.

Although we continued not to use derivative instruments to hedge our MSR's during both the second quarters of 2010 and 2009, we were able to effectively replenish the lost servicing value from payoffs with new originations. During the second quarter of 2010, we experienced \$4.0 billion in loan payoffs in our capitalized servicing portfolio, representing \$35 million of MSR's, whereas we were able to add \$6.7 billion mortgage loans to our capitalized loan servicing portfolio, with an initial MSR value of \$98 million.

Other Income (Expense)

Other income (expense) allocable to the Mortgage Servicing segment consists primarily of net gains or losses on Investment securities and changed favorably by \$19 million during the second quarter of 2010 compared to the second quarter of 2009. This favorable change was primarily due to unrealized losses on Investment securities during the second quarter of 2009, which were primarily attributable to significant increases in the delinquency of the underlying mortgage loans and an acceleration of our assumption of projected losses, which caused a decline in the expected cash flows from the underlying securities.

Other Operating Expenses

Other operating expenses allocable to the Mortgage Servicing segment include servicing-related direct expenses, costs associated with mortgage loans in foreclosure and REO and allocations for overhead. Other operating expenses increased by \$6 million (21%) during the second quarter of 2010 compared to the second quarter of 2009 primarily related to an increase in foreclosure costs attributable to increases in actual and projected repurchases and indemnifications associated with the representations and warranties that we provide to purchasers and insurers of our sold loans coupled with increased direct expenses associated with mortgage loans in foreclosure and REO resulting from the increase in delinquencies and defaults in our loan servicing portfolio.

Fleet Management Services Segment

Net revenues decreased by \$6 million (1%) during the second quarter of 2010 compared to the second quarter of 2009. As discussed in greater detail below, the decrease in Net revenues was due to a decrease of \$11 million in Fleet lease income partially offset by a \$3 million increase in Other income and a \$2 million increase in Fleet management fees.

Segment profit decreased by \$5 million (28%) during the second quarter of 2010 compared to the second quarter of 2009, \$4 million of which was due to the segment recapitalization. The remaining \$1 million decline in segment profit was primarily due to a \$6 million decrease in Net revenues partially offset by a \$5 million decrease in Total expenses. The individual components of Net revenues and Total expenses are discussed in more detail below.

Table of Contents

The following tables present a summary of our financial results and related drivers for the Fleet Management Services segment, and are followed by a discussion of each of the key components of our Net revenues and Total expenses:

	Average for the Three Months Ended June 30,			%
	2010	2009	Change	Change
	(In thousands of units)			
Leased vehicles	291	318	(27)	(8)%
Maintenance service cards	275	277	(2)	(1)%
Fuel cards	275	285	(10)	(4)%
Accident management vehicles	291	313	(22)	(7)%

	Three Months Ended June 30,			%
	2010	2009	Change	Change
	(In millions)			
Fleet management fees	\$ 40	\$ 38	\$ 2	5%
Fleet lease income	349	360	(11)	(3)%
Other income	18	15	3	20%
Net revenues	407	413	(6)	(1)%
Salaries and related expenses	19	20	(1)	(5)%
Occupancy and other office expenses	4	5	(1)	(20)%
Depreciation on operating leases	306	322	(16)	(5)%
Fleet interest expense	25	22	3	14%
Other depreciation and amortization	2	3	(1)	(33)%
Other operating expenses	38	23	15	65%
Total expenses	394	395	(1)	
Segment profit	\$ 13	\$ 18	\$ (5)	(28)%

Fleet Management Fees

Fleet management fees consist primarily of the revenues of our principal fee-based products: fuel cards, maintenance services, accident management services and monthly management fees for leased vehicles. Fleet management fees increased by \$2 million (5%) during the second quarter of 2010 compared to the second quarter of 2009 primarily due to higher usage of fleet management fee-based services which offset the impact from lower unit volumes.

Fleet Lease Income

Fleet lease income decreased by \$11 million (3%) during the second quarter of 2010 compared to the second quarter of 2009, primarily due to decreases in billings partially offset by an increase in lease syndication volume. The decrease in billings was primarily attributable to lower interest rates on variable-rate leases and a decline in average leased vehicles, as detailed in the chart above.

Other Income

Other income increased by \$3 million (20%) during the second quarter of 2010 compared to the second quarter of 2009 primarily due to increased vehicle sales at our dealerships.

Depreciation on Operating Leases

Depreciation on operating leases is the depreciation expense associated with our leased asset portfolio. Depreciation on operating leases during the second quarter of 2010 decreased by \$16 million (5%) compared to the second quarter of 2009 primarily due to an 8% decrease in vehicles under operating leases.

Table of Contents*Fleet Interest Expense*

Fleet interest expense increased by \$3 million (14%) during the second quarter of 2010 compared to the second quarter of 2009 due to a \$3 million unfavorable change in the market value of interest rate cap agreements related to vehicle management asset backed debt.

Other Operating Expenses

Other operating expenses increased \$15 million (65%) during the second quarter of 2010 compared to the second quarter of 2009 primarily due to an increase in the cost of goods sold from an increase in lease syndication volume, increased vehicle purchases at our dealerships and costs associated with the execution of the transformation plan.

Results of Operations Six Months Ended June 30, 2010 vs. Six Months Ended June 30, 2009**Consolidated Results**

Our consolidated results of operations for the six months ended June 30, 2010 and 2009 were comprised of the following:

	Six Months Ended June 30,		
	2010	2009	Change
	(In millions)		
Net fee income	\$ 196	\$ 222	\$ (26)
Fleet lease income	688	724	(36)
Gain on mortgage loans, net	244	335	(91)
Mortgage net finance expense	(39)	(23)	(16)
Loan servicing income	198	200	(2)
Change in fair value of mortgage servicing rights	(372)	(108)	(264)
Other income	33	5	28
Net revenues	948	1,355	(407)
Depreciation on operating leases	614	647	(33)
Fleet interest expense	48	51	(3)
Total other expenses	482	466	16
Total expenses	1,144	1,164	(20)
(Loss) income before income taxes	(196)	191	(387)
(Benefit from) provision for income taxes	(78)	75	(153)
Net (loss) income	(118)	116	(234)
Less: net income attributable to noncontrolling interest	7	8	(1)
Net (loss) income attributable to PHH Corporation	\$ (125)	\$ 108	\$ (233)

During the six months ended June 30, 2010, our Net revenues decreased by \$407 million (30%) compared to the six months ended June 30, 2009, due to decreases of \$252 million in our Mortgage Servicing segment, \$126 million in our Mortgage Production segment and \$30 million in our Fleet Management Services segment partially offset by a \$1 million decrease in other expenses not allocated to our reportable segments. Our (Loss) income before income taxes changed unfavorably by \$387 million during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 due to unfavorable changes of \$265 million in our Mortgage Servicing segment, \$122 million in our Mortgage Production segment and \$4 million in our Fleet Management Services segment, that were partially offset by a \$4 million decrease in other expenses not allocated to our reportable segments.

Table of Contents

We record our interim income tax provisions or benefits by applying a projected full-year effective income tax rate to our quarterly pre-tax income or loss for results that we deem to be reliably estimable in accordance with Financial Accounting Standards Board Accounting Standards Codification (ASC) 740, Income Taxes. Certain results dependent on fair value adjustments of our Mortgage Production and Mortgage Servicing segments are considered not to be reliably estimable and therefore we record discrete year-to-date income tax provisions on those results.

During the six months ended June 30, 2010, the Benefit from income taxes was \$78 million and was impacted by a \$5 million net increase in valuation allowances for deferred tax assets (primarily due to loss carryforwards generated during the six months ended June 30, 2010 for which we believe it is more likely than not that the loss carryforwards will not be realized).

During the six months ended June 30, 2009, the Provision for income taxes was \$75 million, and was impacted by a \$1 million net decrease in valuation allowances for deferred tax assets (primarily due to the reduction of loss carryforwards as a result of taxable income generated during the six months ended June 30, 2009).

Segment Results

Discussed below are the results of operations for each of our reportable segments. Certain income and expenses not allocated to our reportable segments and intersegment eliminations are reported under the heading Other. Our management evaluates the operating results of each of our reportable segments based upon Net revenues and segment profit or loss, which is presented as the income or loss before income tax provision or benefit and after net income or loss attributable to noncontrolling interest. The Mortgage Production segment profit or loss excludes Realogy's noncontrolling interest in the profits and losses of the Mortgage Venture.

During the first quarter of 2010, our Mortgage and Fleet businesses paid dividends to PHH Corporation in order to effect a reallocation of capital between our businesses. Management evaluated several data sources, including rating agency leverage benchmarks, industry comparables and ABS market subordination levels to establish the revised equity levels in our businesses. The dividend payments impact the balances under our intercompany funding arrangements, which are used to determine the allocation of our financing costs to our segments. Had the dividends been paid at the beginning of 2009, segment (loss) profit for our combined Mortgage Services segments and our Mortgage Production segment would have each changed favorably by \$7 million and segment profit for our Fleet Management Services segment would have decreased by \$7 million for the six months ended June 30, 2009.

Mortgage Services

(Loss) profit for our combined Mortgage Services segments changed unfavorably by \$386 million during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to a \$378 million decrease in Net revenues and a \$9 million increase in Total expenses.

Net revenues for our combined Mortgage Services segments decreased by \$378 million during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 due to a decrease of \$252 million in our Mortgage Servicing segment primarily due to a \$264 million increase in an unfavorable Change in the fair value of mortgage servicing rights coupled with a decrease of \$126 million in our Mortgage Production segment primarily attributable to lower volumes and margins on mortgage loans partially offset by an increase in IRLCs expected to close.

Table of Contents

The following table presents the components of Total expenses:

	Six Months Ended June 30,			%
	2010	2009 (In millions)	Change	Change
Production-related expenses ⁽¹⁾	\$ 206	\$ 223	\$ (17)	(8)%
Servicing-related expenses	39	35	4	11%
Foreclosure costs	43	34	9	26%
Other expenses	80	67	13	19%
Total expenses	\$ 368	\$ 359	\$ 9	3%

(1) Approximately 79% of production-related expenses for the six months ended June 30, 2010 are scalable with origination volumes.

Production-related expenses represent direct costs associated with the origination of mortgage loans, including commissions, appraisal expenses, automated underwriting and other closing costs, as well as production support costs, including underwriting, processing and secondary marketing. Due to the marginal costs associated with the origination of second-lien loan originations, production-related expenses are primarily driven by first mortgage closings. Production-related expenses decreased by 8% primarily due to a 12% decrease in the total number of first mortgage closings (units). Servicing-related expenses represent the operating costs of our Mortgage Servicing segment for performing the related servicing activities associated with our loan servicing portfolio. The increase in servicing-related expenses is primarily due to the higher costs associated with the increase in delinquencies and defaults in our loan servicing portfolio. Foreclosure costs increased by 26% primarily due to increases in actual and projected repurchases and indemnifications associated with the representations and warranties that we provide to purchasers and insurers of our sold loans. Other expenses consist of support functions, including information technology, finance, human resources, legal and corporate allocations. The increase in Other expenses is primarily attributable to outside consulting costs associated with our transformation plan.

Table of Contents

The following table presents a summary of our financial results for our combined Mortgage Services segments and is followed by a discussion of each of the key components of Net revenues and Total expenses for the two reportable segments individually:

	Six Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Mortgage fees	\$ 118	\$ 147	\$ (29)	(20)%

Table of Contents*Mortgage Production Statistics*

The mix of total closings shifted from a higher percentage of refinance closings in the six months ended June 30, 2009 towards more purchase closings in the six months ended June 30, 2010. The higher percentage of refinance closings in the six months ended June 30, 2009 was due primary to historically low interest rates during that time. The higher purchase closings for the six months ended June 30, 2010 was driven by improvement in home sales as compared to the same period in 2009 and the acceleration of purchase closings due to the potential expiration of the home purchase tax credit which was scheduled to expire in the second quarter of 2010. Mortgage rates have declined further during the six months ended June 30, 2010 which has generated an increase in IRLCs expected to close.

The decline in retail closing units was partially offset by higher wholesale/correspondent closing units. Due to the significantly higher volumes in the six months ended June 30, 2009, there was a reduced capacity for wholesale/correspondent production. The increase in originations from our wholesale/correspondent channel during 2010 is due to our efforts to grow production in this channel and has partially offset declines in retail originations. Generally, retail closings are more profitable than wholesale/correspondent and have higher loan margins and higher expenses.

Mortgage Fees

Loans closed to be sold and fee-based closings are key drivers of Mortgage fees. Mortgage fees consist of fee income earned on all loan originations, including loans closed to be sold and fee-based closings. Fee income consists of amounts earned related to application and underwriting fees, fees on cancelled loans and appraisal and other income generated by our appraisal services business. Fee income also consists of amounts earned from financial institutions related to brokered loan fees and origination assistance fees resulting from our private-label mortgage outsourcing activities. Fees associated with the origination and acquisition of MLHS are recognized as earned.

Mortgage fees decreased by \$29 million (20%) primarily due to the 28% decrease in the total number of retail closings (units) that was partially offset by the increase in fee-based originations during the six months ended June 30, 2010 compared to the six months ended June 30, 2009.

Gain on Mortgage Loans, Net

IRLCs expected to close are the primary driver of Gain on mortgage loans, net. Gain on mortgage loans, net includes realized and unrealized gains and losses on our MLHS, as well as the changes in fair value of our IRLCs and loan-related derivatives. The fair value of our IRLCs is based upon the estimated fair value of the underlying mortgage loan, adjusted for: (i) estimated costs to complete and originate the loan and (ii) the estimated percentage of IRLCs that will result in a closed mortgage loan. The valuation of our IRLCs and MLHS approximates a whole-loan price, which includes the value of the related MSR. MSRs are recognized and capitalized at the date the loans are sold and subsequent changes in the fair value of MSRs are recorded in Change in fair value of mortgage servicing rights in the Mortgage Servicing segment.

Table of Contents

The components of Gain on mortgage loans, net were as follows:

	Six Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Gain on loans	\$ 234	\$ 347	\$ (113)	(33)%
Change in fair value of Scratch and Dent and certain non-conforming mortgage loans	(4)	(14)	10	71%
Economic hedge results	14	2	12	600%
Total change in fair value of MLHS and related derivatives	10	(12)	22	n/m ⁽¹⁾
Gain on mortgage loans, net	\$ 244	\$ 335	\$ (91)	(27)%

⁽¹⁾ n/m Not meaningful.

Gain on mortgage loans, net decreased by \$91 million (27%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 due to a \$113 million decrease in gain on loans that was partially offset by a \$22 million favorable variance from the change in fair value of MLHS and related derivatives.

The \$113 million decrease in gain on loans during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 was primarily due to lower margins partially offset by a 2% increase in IRLCs expected to close. The significantly higher margins during the six months ended June 30, 2009 were primarily attributable to an increase in industry refinance activity for conforming first mortgage loans, resulting from lower mortgage interest rates, coupled with lower overall industry capacity. Loan margins generally widen when mortgage interest rates decline and tighten when mortgage interest rates increase, as loan originators balance origination volume with operational capacity. The increase in IRLCs expected to close was primarily attributable to an increase in refinance activity resulting from then-historically low interest rates during the six months ended June 30, 2009. Mortgage interest rates have since declined further during the latter portion of the second quarter of 2010, which has also generated an increase in margins on newly originated IRLCs.

The \$22 million favorable variance from the change in fair value of MLHS and related derivatives was due to a \$12 million favorable variance from economic hedge results and a \$10 million reduction in unfavorable valuation adjustments for certain non-conforming mortgage loans. The favorable variance from economic hedge results was primarily due to changes in mortgage interest rates and greater actual and expected pullthrough whereby the increase in value of IRLCs and MLHS exceeded the decrease in value of the related derivatives. The reduction in unfavorable valuation adjustments for Scratch and Dent and certain non-conforming mortgage loans was primarily due to a decrease in collateral value and credit performance for these loans during the six months ended June 30, 2009.

Mortgage Net Finance Expense

Mortgage net finance expense allocable to the Mortgage Production segment consists of interest income on MLHS and interest expense allocated on debt used to fund MLHS and is driven by the average balance of loans held for sale, the average volume of outstanding borrowings, the note rate on loans held for sale and the cost of funds rate of our outstanding borrowings.

Mortgage net finance expense allocable to the Mortgage Production segment increased by \$5 million during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 due to a \$10 million (23%) decrease in Mortgage interest income that was partially offset by a \$5 million (10%) decrease in Mortgage interest expense. The decrease in Mortgage interest income was primarily due to a lower average volume of loans held for sale primarily

due to an 18% decrease in loans closed to be sold. The \$5 million decrease in Mortgage interest expense was primarily attributable to a lower cost of funds from our outstanding borrowings and lower average outstanding borrowings. The lower cost of funds from our outstanding borrowings was primarily attributable to a decrease in short-term interest rates. A significant portion of our loan originations are funded with variable-rate

Table of Contents

short-term debt. The average daily one-month London Interbank Offered Rate (LIBOR), which is used as a benchmark for short-term rates, was 14 basis points (bps) lower during the six months ended June 30, 2010 compared to the six months ended June 30, 2009. The lower average outstanding borrowings were primarily attributable to the lower average volume of loans held for sale. Additionally, Mortgage net finance expense in comparison to the six months ended June 30, 2009 was impacted by \$7 million as a result of the reallocation of capital between businesses, as discussed above.

Salaries and Related Expenses

Salaries and related expenses allocable to the Mortgage Production segment consist of commissions paid to employees involved in the loan origination process, as well as compensation, payroll taxes and benefits paid to employees in our mortgage production operations and allocations for overhead. Salaries and related expenses decreased by \$10 million (6%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009, due to a \$9 million decrease in commissions expense and a \$6 million decrease in management incentives partially offset by a \$5 million increase in salaries and related benefits. The decrease in commissions expense was primarily attributable to a 10% decrease in total closings and a decrease in first mortgage retail originations during the six months ended June 30, 2010 compared to the six months ended June 30, 2009, as there is higher commission cost associated with these loans. The increase in salaries and related benefits was primarily attributable to an increase in severance and other benefit costs in the six months ended June 30, 2010 compared to the six months ended June 30, 2009.

Other Operating Expenses

Other operating expenses allocable to the Mortgage Production segment consist of production-related direct expenses, appraisal expense and allocations for overhead. Other operating expenses increased by \$5 million (6%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to an \$11 million increase in corporate overhead costs associated with executing our transformation plan partially offset by a decrease in production-related direct expenses due to the 13% decrease in the number of loan units closed during the six months ended June 30, 2010 compared to the six months ended June 30, 2009.

Table of Contents**Mortgage Servicing Segment**

The following tables present a summary of our financial results and a key related driver for the Mortgage Servicing segment, and are followed by a discussion of each of the key components of Net revenues and Total expenses:

	Six Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Average loan servicing portfolio	\$ 153,381	\$ 149,117	\$ 4,264	3%

	Six Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Mortgage interest income	\$ 7	\$ 7	\$

Other operating expenses	70	59	11	19%
Total expenses	95	82	13	16%
Segment loss	\$ (297)	\$ (32)	\$ (265)	n/m ⁽¹⁾

⁽¹⁾ n/m Not meaningful.

Mortgage Net Finance Expense

Mortgage net finance expense allocable to the Mortgage Servicing segment consists of interest income credits from escrow balances, income from investment balances (including investments held by Atrium) and interest expense allocated on debt used to fund our MSR's, which is driven by the average volume of outstanding borrowings and the cost of funds rate of our outstanding borrowings.

Mortgage net finance expense increased by \$8 million (38%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 due to an \$8 million (29%) increase in Mortgage interest expense. The increase in Mortgage interest expense was due to a \$5 million increase in the interest expense allocated to fund our MSRs resulting from a higher average MSR balance in the six months ended June 30, 2010 compared to the six months ended June 30, 2009 and a \$3 million increase related to mortgage loan securitization debt certificates held by a mortgage loan securitization trust that was consolidated due to the adoption of updates to ASC 810 in the first quarter of 2010. Mortgage interest income was consistent in the six months ended June 30, 2010 compared to the six months ended June 30, 2009 due to a \$3 million increase related to securitized mortgage loans held by the mortgage loan securitization trust offset by lower short-term interest rates. Escrow balances earn income based on one-month LIBOR, which was 14 bps lower, on average, during the six months ended June 30, 2010 compared to the six months ended June 30, 2009. The ending one-month LIBOR rate at June 30, 2010 was 35 bps, which has significantly reduced the earnings opportunity related to our escrow balances, consistent with the six months ended June 30, 2009.

Table of Contents*Loan Servicing Income*

Loan servicing income includes recurring servicing fees, other ancillary fees and net reinsurance loss from Atrium. Recurring servicing fees are recognized upon receipt of the coupon payment from the borrower and recorded net of guaranty fees. Net reinsurance loss represents premiums earned on reinsurance contracts, net of ceding commission and adjustments to the reserves for reinsurance losses. The primary driver for Loan servicing income is the average loan servicing portfolio.

The components of Loan servicing income were as follows:

	Six Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Net service fee revenue	\$ 196	\$ 212	\$ (16)	(8)%
Late fees and other ancillary servicing revenue	28	25	3	12%
Curtailed interest paid to investors	(13)	(27)	14	(52)%
Net reinsurance loss	(13)	(10)	(3)	30%
Loan servicing income	\$ 198	\$ 200	\$ (2)	(1)%

Loan servicing income decreased by \$2 million (1%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to a decrease in net service fee revenue and an increase in net reinsurance loss partially offset by a decrease in curtailment interest paid to investors and an increase in late fees and other ancillary servicing revenue. The \$16 million decrease in net service fee revenue was primarily due to the sale of excess servicing associated with a portion of our MSR's executed during the fourth quarter of 2009 and an increase in guarantee fees as a result of a greater composition of loans sold to the GSEs included in our capitalized loan servicing portfolio partially offset by a 3% increase in the average loan servicing portfolio. The \$14 million decrease in curtailment interest paid to investors was primarily due to a 44% decrease in loans included in our loan servicing portfolio that paid off during the six months ended June 30, 2010 compared to the six months ended June 30, 2009.

Change in Fair Value of Mortgage Servicing Rights

The fair value of our MSR's is estimated based upon projections of expected future cash flows from our MSR's considering prepayment estimates, our historical prepayment rates, portfolio characteristics, interest rates based on interest rate yield curves, implied volatility and other economic factors. Generally, the value of our MSR's is expected to increase when interest rates rise and decrease when interest rates decline due to the effect those changes in interest rates have on prepayment estimates. Other factors noted above as well as the overall market demand for MSR's may also affect the MSR's valuation.

The components of Change in fair value of mortgage servicing rights were as follows:

	Six Months Ended June 30,			% Change
	2010	2009 (In millions)	Change	
Actual prepayments of the underlying mortgage loans	\$ (69)	\$ (150)	\$ 81	54%
Actual receipts of recurring cash flows	(22)	(27)	5	19%
Credit-related fair value adjustments ⁽¹⁾	(19)	(35)	16	46%
Market-related fair value adjustments ⁽²⁾	(262)	104	(366)	n/m ⁽³⁾
Change in fair value of mortgage servicing rights	\$ (372)	\$ (108)	\$ (264)	(244)%

- (1) Represents the change in fair value of MSRs primarily due to changes in portfolio delinquencies and foreclosures.
- (2) Represents the change in fair value of MSRs due to changes in market inputs and assumptions used in the valuation model.
- (3) n/m Not meaningful.

Table of Contents

The fluctuation in the decline in value of our MSR's due to actual prepayments during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 was primarily attributable to lower prepayment rates. The actual prepayment rate of mortgage loans in our capitalized servicing portfolio was 12% and 22% of the unpaid principal balance of the underlying mortgage loans, on an annualized basis, during the six months ended June 30, 2010 and 2009, respectively.

Credit-related fair value adjustments reduced the value of our MSR's by \$19 million during the six months ended June 30, 2010 as portfolio delinquencies and foreclosures increased from year end levels. The \$35 million decline during the first half of 2009 was primarily due to the continued deteriorating economic conditions in the broader U.S. economy which resulted in an increase in total delinquencies attributable to the capitalized servicing portfolio.

The \$262 million unfavorable change during the six months ended June 30, 2010 due to market-related fair value adjustments was primarily due to a significant decrease in mortgage interest rates coupled with a flattening of the yield curve which led to higher expected prepayments. The \$104 million favorable change during the first half of 2009 was primarily due to an increase in mortgage interest rates and a decrease in expected short-term prepayment speeds.

Although we continued not to use derivative instruments to hedge our MSR's during both the six months ended June 30, 2010 and 2009, we were able to effectively replenish the lost servicing value from payoffs with new originations. During the six months ended June 30, 2010, we experienced \$7.7 billion in loan payoffs in our capitalized servicing portfolio, representing \$69 million of MSR's, whereas we were able to add \$12.4 billion mortgage loans to our capitalized loan servicing portfolio, with an initial MSR value of \$195 million.

Other Income (Expense)

Other income (expense) allocable to the Mortgage Servicing segment consists primarily of net gains or losses on Investment securities and changed favorably by \$22 million during the six months ended June 30, 2010 compared to the six months ended June 30, 2009. This favorable change was primarily due to unrealized losses on Investment securities during the six months ended June 30, 2009, which were primarily attributable to significant increases in the delinquency of the underlying mortgage loans and an acceleration of our assumption of projected losses, which caused a decline in the expected cash flows from the underlying securities.

Other Operating Expenses

Other operating expenses allocable to the Mortgage Servicing segment include servicing-related direct expenses, costs associated with mortgage loans in foreclosure and REO and allocations for overhead. Other operating expenses increased by \$11 million (19%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily related to an increase in foreclosure costs attributable to increases in actual and projected repurchases and indemnifications associated with the representations and warranties that we provide to purchasers and insurers of our sold loans coupled with increased direct expenses associated with mortgage loans in foreclosure and REO resulting from the increase in delinquencies and defaults in our loan servicing portfolio.

Fleet Management Services Segment

Net revenues decreased by \$30 million (4%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009. As discussed in greater detail below, the decrease in Net revenues was due to decreases of \$36 million in Fleet lease income partially offset by a \$3 million increase in both Fleet management fees and Other income.

Segment profit decreased by \$4 million (16%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009, \$7 million of which was due to segment recapitalization. The resulting \$3 million increase in segment profit was primarily due to a \$33 million decrease in Total expenses partially offset by a \$30

Table of Contents

million decrease in Net revenues. The individual components of Net revenues and Total expenses are discussed in more detail below.

The following tables present a summary of our financial results and related drivers for the Fleet Management Services segment, and are followed by a discussion of each of the key components of our Net revenues and Total expenses:

	Average for the Six Months Ended June 30,			%
	2010	2009	Change	Change
	(In thousands of units)			
Leased vehicles	294	323	(29)	(9)%
Maintenance service cards	273	279	(6)	(2)%
Fuel cards	273	285	(12)	(4)%
Accident management vehicles	289	316	(27)	(9)%
	Six Months Ended June 30,			%
	2010	2009	Change	Change
	(In millions)			
Fleet management fees	\$ 78	\$ 75	\$ 3	4%
Fleet lease income	688	724	(36)	(5)%
Other income	31	28	3	11%
Net revenues	797	827	(30)	(4)%
Salaries and related expenses	41	42	(1)	(2)%
Occupancy and other office expenses	8	9	(1)	(11)%
Depreciation on operating leases	614	647	(33)	(5)%
Fleet interest expense	49	54	(5)	(9)%
Other depreciation and amortization	5	6	(1)	(17)%
Other operating expenses	59	44	15	34%
Total expenses	776	802	(26)	(3)%
Segment profit	\$ 21	\$ 25	\$ (4)	(16)%

Fleet Management Fees

Fleet management fees consist primarily of the revenues of our principal fee-based products: fuel cards, maintenance services, accident management services and monthly management fees for leased vehicles. Fleet management fees increased by \$3 million (4%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to higher usage of fleet management fee-based services which offset the impact from lower unit volumes.

Fleet Lease Income

Fleet lease income decreased by \$36 million (5%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to decreases in billings. The decrease in billings was primarily attributable to lower interest rates on variable-rate leases and a decline in average leased vehicles, as detailed in the chart above.

Other Income

Other income increased by \$3 million (11%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to increased vehicle sales at our dealerships.

75

Table of Contents*Depreciation on Operating Leases*

Depreciation on operating leases is the depreciation expense associated with our leased asset portfolio. Depreciation on operating leases during the six months ended June 30, 2010 decreased by \$33 million (5%) compared to the six months ended June 30, 2009 primarily due to a 9% decrease in vehicles under operating leases.

Fleet Interest Expense

Fleet interest expense decreased by \$5 million (9%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009 primarily due to the impact of lower average outstanding borrowings and a decrease in short-term interest rates that were partially offset by a \$5 million unfavorable change in the market value of interest rate cap agreements related to vehicle management asset backed debt during the six months ended June 30, 2010 as compared to the six months ended June 30, 2009.

Other Operating Expenses

Other operating expenses increased by \$15 million (34%) during the six months ended June 30, 2010 compared to the six months ended June 30, 2009, primarily due to an increase in the cost of goods sold from an increase in lease syndication volume, increased vehicle purchases at our dealerships and costs associated with the execution of the transformation plan.

Liquidity and Capital Resources*General*

Our liquidity is dependent upon our ability to fund maturities of our indebtedness, to fund growth in assets under management and business operations and to meet contractual obligations. We estimate how these liquidity needs may be impacted by a number of factors including fluctuations in asset and liability levels due to changes in our business operations, levels of interest rates and unanticipated events. Our primary operating funding needs arise from the origination and warehousing of mortgage loans, the purchase and funding of vehicles under management and the retention of MSR. Sources of liquidity include equity capital including retained earnings, the unsecured debt markets, committed and uncommitted credit facilities, secured borrowings, including the asset-backed debt markets, and the liquidity provided by the sale or securitization of assets.

Conditions in the ABS markets in the U.S. and Canada and the credit markets generally impact our access and the costs to fund our business. In order to provide adequate liquidity throughout a broad array of operating environments, our funding plan relies upon multiple sources of liquidity and considers our projected cash needs to fund mortgage loan originations, purchase vehicles for lease, hedge our MSR (if any) and meet various other obligations. We maintain liquidity at the parent company level through access to the unsecured debt markets and through unsecured committed bank facilities. These various unsecured sources of funds are utilized to provide for a portion of the operating needs of our mortgage and fleet management businesses. In addition, secured borrowings, including asset-backed debt, asset sales and securitization of assets, are utilized to fund both vehicles under management and mortgages held for resale. We continue to evaluate our funding strategies, including additional opportunities to access the markets to extend maturities and enhance liquidity to finance our business growth.

On July 23, 2010, we entered into a Mortgage Loan Participation Purchase and Sale Agreement (the MLPPSA) with Bank of America, N.A.(BOA). The MLPPSA provides us with committed mortgage gestation capacity and requires BOA to purchase from us up to \$500 million of participation certificates evidencing a 100% undivided beneficial ownership interest in pools of fully amortizing first lien residential mortgage loans that are to be included in residential mortgage-backed securities issued or guaranteed by Ginnie Mae, Fannie Mae or Freddie Mac.

Given our expectation for business volumes, we believe that our sources of liquidity are adequate to fund our operations for the next 12 months. We expect aggregate capital expenditures for 2010 to be between \$13 million and \$24 million, in comparison to \$11 million for 2009.

Table of Contents**Cash Flows**

At June 30, 2010, we had \$184 million of Cash and cash equivalents, an increase of \$34 million from \$150 million at December 31, 2009. The following table summarizes the changes in Cash and cash equivalents during the six months ended June 30, 2010 and 2009:

	Six Months Ended June 30,		Change
	2010	2009	
	(In millions)		
Cash (used in) provided by:			
Operating activities	\$ (197)	\$ 82	\$ (279)
Investing activities	(562)	(423)	(139)
Financing activities	793	389	404
Effect of changes in exchange rates on Cash and cash equivalents		(11)	11
Net increase in Cash and cash equivalents	\$ 34	\$ 37	\$ (3)

Operating Activities

During the six months ended June 30, 2010 net cash used in operating activities was \$197 million primarily due to net cash outflows used to fund the increase in mortgage loans held for sale that was partially offset by net cash provided by the operating activities of our Fleet Management Services segment. During the six months ended June 30, 2010, we generated \$279 million less cash from our operating activities than during the six months ended June 30, 2009 primarily due to a \$143 million increase in cash outflows related to the origination and sale of mortgage loans held for sale coupled with lower cash flows from operations from our Mortgage Production and Fleet Management Services segments. Cash flows related to the origination and sale of mortgage loans may fluctuate significantly from period to period due to the timing of the underlying transactions.

Investing Activities

During the six months ended June 30, 2010, we used \$139 million more cash in our investing activities than during the six months ended June 30, 2009. The increase in cash used in investing activities was primarily attributable to a \$301 million increase in net cash outflows related to an increase in vehicle purchases, partially offset by the sale of investment vehicles that was partially offset by a \$158 million increase in cash flows associated with Restricted cash, cash equivalents and investments primarily related to our Vehicle Management Asset-Backed debt facilities. Cash flows related to the acquisition and sale of vehicles fluctuate significantly from period to period due to the timing of the underlying transactions.

Financing Activities

During the six months ended June 30, 2010, we generated \$404 million more cash in our financing activities than during the six months ended June 30, 2009 primarily due to a \$389 million increase in proceeds from borrowings, net of principal payments on borrowings and a \$13 million decrease in cash paid for debt issuance costs. The fluctuations in the components of Cash provided by financing activities during the six months ended June 30, 2010 in comparison to the six months ended June 30, 2009 were primarily due to an increase in the funding requirements for assets under management programs. See *Liquidity and Capital Resources* *Indebtedness* below for further discussion regarding our borrowing arrangements.

Secondary Mortgage Market

We rely on the secondary mortgage market for a substantial amount of liquidity to support our mortgage operations. Nearly all mortgage loans that we originate are sold in the secondary mortgage market, primarily in the form of MBS, ABS and whole-loan transactions. A large component of the MBS we sell is guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae (collectively, *Agency MBS*). Historically, we have also issued non-agency (or non-conforming) MBS and ABS. We have also publicly issued both non-conforming MBS and ABS

Table of Contents

that are registered with the Securities and Exchange Commission (SEC), in addition to private non-conforming MBS and ABS. However, secondary market liquidity for all non-conforming products has been severely limited since the second quarter of 2007. Generally, these types of securities have their own credit ratings and require some form of credit enhancement, such as over-collateralization, senior-subordinated structures, primary mortgage insurance (PMI), and/or private surety guarantees.

The Agency MBS, whole-loan and non-conforming markets for mortgage loans have historically provided substantial liquidity for our mortgage loan production operations. We focus our business process on consistently producing quality mortgage loans that meet investor requirements to continue to access these markets. Substantially all of our loans closed to be sold originated during the six months ended June 30, 2010 were conforming.

See Overview Mortgage Production and Mortgage Servicing Segments Mortgage Industry Trends included in this Form 10-Q and Part I Item 1A. Risk Factors Risks Related to our Business Adverse developments in the secondary mortgage market could have a material adverse effect on our business, financial position, results of operations or cash flows. included in our 2009 Form 10-K for more information regarding the secondary mortgage market.

Indebtedness

We utilize both secured and unsecured debt as key components of our financing strategy. Our primary financing needs arise from our assets under management programs which are summarized in the table below:

	June 30, 2010	December 31, 2009
	(In millions)	
Restricted cash, cash equivalents and investments	\$ 559	\$ 596
Mortgage loans held for sale	2,090	1,218
Net investment in fleet leases	3,574	3,610
Mortgage servicing rights	1,236	1,413
Assets under management programs	\$ 7,459	\$ 6,837

Table of Contents

The following table summarizes the components of our indebtedness as of June 30, 2010:

	June 30, 2010		Interest Rate ⁽³⁾	Maturity/Expiry Date	Assets Held as Collateral ⁽¹⁾			
					Account Receivable	Restricted Cash	Mortgage Loans Held for Sale	Net Investment in Fleet Leases

- (1) Assets held as collateral are not available to pay our general obligations.

- (2) Capacity is dependent upon maintaining compliance with, or obtaining waivers of, the terms, conditions and covenants of the respective agreements. With respect to asset-backed funding arrangements, capacity may be further limited by the availability of asset eligibility requirements under the respective agreements. The Series 2009-1, Series 2009-2, Series 2009-3 and Series 2009-4 notes (the Chesapeake Term Notes) (as defined below) have revolving periods during which time the pro-rata share of lease cash flows pledged to Chesapeake will create availability to fund the acquisition of vehicles to be leased to customers of our Fleet Management Services segment.

See Asset-Backed

Asset-Backed
Debt below for
additional
information.

- (3) Represents the variable interest rate as of the respective date, with the exception of Total Vehicle Management Asset-Backed Debt, Term Notes, the 2012 Convertible Notes, the 2014 Convertible Notes and the Mortgage Loan Securitization Debt Certificates.
- (4) Represents the weighted-average interest rate of our vehicle management asset-backed debt arrangements as of June 30, 2010.

Table of Contents

- (5) Represents the range of stated interest rates of the MTNs outstanding as of June 30, 2010. The effective rate of interest of the outstanding MTNs was 7.2% as of June 30, 2010.

- (6) Represents the range of stated interest rates on the Amended Credit Facility as of June 30, 2010, excluding per annum utilization and facility fees. The effective interest rate of the Credit Facilities was 2.9% as of June 30, 2010.

- (7) The effective rate of interest of the 2012 Convertible Notes was 12.4% as of June 30, 2010, which represents the 4.0% semiannual cash payment and the non-cash accretion of discount and issuance costs.

- (8)

The effective rate of interest of the 2014 Convertible Notes was 13.0% as of June 30, 2010, which represents the 4.0% semiannual cash payment and the non-cash accretion of discount and issuance costs.

- (9) The Mortgage Loan Securitization Debt Certificates were consolidated as a result of the adoption of updates to ASC 810 with \$47 million of Securitized Mortgage Loans, included in Other Assets. See Note 1, Summary of Significant Accounting Policies in the accompanying Notes to Condensed Consolidated Financial Statements included in this form 10-Q for additional information. The cashflows of the Securitized

Mortgage Loans support payment of the debt certificates and creditors of the Securitization trust do not have recourse to us.

- (10) The Mortgage Loan Securitization Debt Certificates are fixed rate.

Asset-Backed Debt

Vehicle Management Asset-Backed Debt

Vehicle management asset-backed debt primarily represents variable-rate debt issued by our wholly owned subsidiary, Chesapeake Funding LLC (Chesapeake), to support the acquisition of vehicles used by our Fleet Management Services segment s U.S. leasing operations and debt issued by Fleet Leasing Receivables Trust (FLRT), our Canadian special purpose trust, used to finance leases originated by our Canadian fleet operation. The obligations of both Chesapeake and FLRT are non-recourse to us and are provided for by payments made by lessees under lease contracts.

As of June 30, 2010, 83% of the carrying value of our fleet leases collateralized the debt issued by Chesapeake. These leases include certain eligible assets representing the borrowing base of the variable funding and term notes (the Chesapeake Lease Portfolio). Approximately 99% of the Chesapeake Lease Portfolio as of June 30, 2010 consisted of open-end leases, in which substantially all of the residual risk on the value of the vehicles at the end of the lease term remains with the lessee. As of June 30, 2010, the Chesapeake Lease Portfolio consisted of 21% and 79% fixed-rate and variable-rate leases, respectively. As of June 30, 2010, the top 25 client lessees represented approximately 52% of the Chesapeake Lease Portfolio, with no client exceeding 5%.

The maturity date for the Chesapeake Notes represents the end of the respective notes revolving period. During the revolving period, the notes pro-rata share of lease cash flows pledged to Chesapeake will create availability to fund the acquisition of vehicles to be leased to customers of our Fleet Management Services segment. Subsequent to the revolving period, the notes prorata share of lease cashflows will be used to pay principal amounts due in accordance with the terms of the notes.

The Chesapeake Series 2009-1 Term Notes and Chesapeake Series 2009-4 Term Notes began to amortize in accordance with their terms at the end of the respective revolving periods (commencement of the Amortization Period). During the Amortization Period, we will be unable to use the pro-rata share of lease cash flows to fund the acquisition of vehicles to be leased under the Chesapeake Term Notes, and monthly repayments will be made on the notes through the earlier of 125 months following the commencement of the Amortization Period, or when the respective series of notes are paid in full based on an allocable share of the collection of cash receipts of lease payments relating to the collateralized vehicle leases and related assets. The allocable share is based upon the outstanding balance of those notes relative to all other outstanding series notes issued by Chesapeake as of the commencement of the Amortization Period. After the payment of interest, servicing fees, administrator fees and servicer advance reimbursements, any monthly lease collections during the Amortization Period of a particular series would be applied to reduce the principal balance of the series notes.

Table of Contents

On June 1, 2010, Chesapeake entered into the Series 2010-1 Indenture Supplement pursuant to which \$1.0 billion in aggregate principal amount of senior Class A variable funding notes may be issued under commitments provided by a syndicate of lenders. On that date, \$500 million of Class A notes were issued. This issuance was used to repay the remaining outstanding balance of the Series 2006-2 variable funding notes, increase borrowings relative to the pool of eligible lease assets and fund certain other fees and costs in connection with the issuance of the Series 2010-1 variable funding notes. As of June 30, 2010, commitments under the Series 2010-1 Indenture Supplement are scheduled to expire on May 31, 2011 (the Scheduled Expiry Date), but are renewable on or before the Scheduled Expiry Date, subject to agreement by the parties. If the agreements are not renewed, the notes' amortization period will begin and the prorata share of lease cashflows will be used to pay principal amounts due in accordance with the terms of the notes beginning in the month following the Scheduled Expiry Date and ending up to 125 months after the Scheduled Expiry Date.

On January 27, 2010, FLRT, issued approximately \$119 million of senior Class A-1 term asset-backed notes which was comprised of two subclasses of senior term asset-backed notes (the FLRT Series 2010-1 Class A-1 Notes) and approximately \$224 million of senior Class A-2 term asset-backed notes which was comprised of two subclasses of senior term asset-backed notes (together with the FLRT Series 2010-1 Class A-1 Notes, collectively the FLRT Series 2010-1 Notes) to finance a fixed pool of eligible lease assets in Canada. Three of the four subclasses of FLRT Series 2010-1 Notes were denominated in Canadian dollars with the remaining subclass of FLRT Series 2010-1 Notes denominated in U.S. dollars. The FLRT Series 2010-1 Class A-1 notes and Class A-2 notes were issued as amortizing notes and have maturity dates of February 15, 2011 and November 15, 2013, respectively.

Renewal of existing series or issuance of new series of Chesapeake notes on terms acceptable to us, or our ability to enter into alternative vehicle management asset-backed debt arrangements could be adversely affected in the event of: (i) the deterioration in the quality of the assets underlying the asset-backed debt arrangement; (ii) increased costs associated with accessing or our inability to access the asset-backed debt market in the U.S. and Canada; (iii) termination of our role as servicer of the underlying lease assets in the event that we default in the performance of our servicing obligations or we declare bankruptcy or become insolvent or (iv) our failure to maintain a sufficient level of eligible assets or credit enhancements, including collateral intended to provide for any differential between variable-rate lease revenues and the underlying variable-rate debt costs. (See Part I Item 1A. Risk Factors Adverse developments in the asset-backed securities market have negatively affected the availability of funding and our costs of funds, which could have a material and adverse effect on our business, financial position, results of operations or cash flows. in our 2009 Form 10-K for more information.)

Mortgage Warehouse and Other Asset-Backed Debt

We maintain a variable-rate committed mortgage repurchase facility (the RBS Repurchase Facility) with The Royal Bank of Scotland plc (RBS). The RBS Repurchase Facility was amended, effective June 25, 2010, to reduce the committed capacity from \$1.5 billion to \$800 million, and was extended to June 24, 2011, among other provisions.

On May 26, 2010, we entered into two committed 364-day variable-rate mortgage repurchase facilities with Credit Suisse First Boston Mortgage Capital LLC (CSFB) pursuant to master repurchase agreements. The facilities consist of a \$350 million facility (CSFB Mortgage Repurchase Facility) and a \$150 million facility entered into by the Mortgage Venture (CSFB Mortgage Venture Repurchase Facility).

On April 8, 2010, the Mortgage Venture entered into a \$150 million 356-day variable-rate committed mortgage repurchase facility with Ally Bank pursuant to a master repurchase agreement and certain related agreements (Ally Bank Mortgage Venture Repurchase Facility).

Our variable-rate uncommitted mortgage repurchase facilities with Fannie Mae (the Fannie Mae Repurchase Facilities) have total uncommitted capacity of approximately \$3.0 billion as of both June 30, 2010 and December 31, 2009.

Table of Contents

Other asset-backed facilities as of June 30, 2010 and December 31, 2009 includes \$54 million and \$44 million, respectively, outstanding under a servicing advance facility and \$4 million and \$5 million, respectively, outstanding under an uncommitted variable-rate mortgage warehouse facility.

The availability of the mortgage warehouse asset-backed debt could suffer in the event of: (i) the continued deterioration in the performance of the mortgage loans underlying the asset-backed debt arrangement; (ii) our failure to maintain sufficient levels of eligible assets or credit enhancements; (iii) our inability to access the asset-backed debt market to refinance maturing debt; (iv) our inability to access the secondary market for mortgage loans; (v) termination of our role as servicer of the underlying mortgage assets in the event that (a) we default in the performance of our servicing obligations or (b) we declare bankruptcy or become insolvent or (vi) our failure to comply with certain financial covenants (see Debt Covenants below for additional information). (See Part I Item 1A. Risk Factors Risks Related to our Business Adverse developments in the asset-backed securities market have negatively affected the availability of funding and our costs of funds, which could have a material and adverse effect on our business, financial position, results of operations or cash flows. in our 2009 Form 10-K for more information.)

Unsecured Debt

Historically, the public debt markets have been an important source of financing for us, due to their efficiency and low cost relative to certain other sources of financing. The credit markets have experienced extreme volatility and disruption, which has resulted in a significant tightening of credit, including with respect to unsecured debt. Prior to the disruption in the credit market, we typically accessed these markets by issuing unsecured commercial paper and MTNs. During the six months ended June 30, 2010, there was no funding available to us in the commercial paper markets, and availability is unlikely given our short-term credit ratings. It is our policy to maintain available capacity under our committed unsecured credit facilities to fully support our outstanding unsecured commercial paper. However, given that the commercial paper markets are unavailable to us, our committed unsecured credit facilities have provided us with an alternative source of liquidity. As of June 30, 2010, we had a total of approximately \$848 million in unsecured public and institutional debt outstanding.

Our credit ratings as of July 21, 2010 were as follows:

	Moody's Investors Service	Standard & Poor's	Fitch Ratings
Senior debt	Ba2	BB+	BB+
Short-term debt	NP	B	B

As of July 21, 2010, the rating outlook on our senior unsecured debt provided by Moody's Investors Service was Stable, and the rating outlook on our senior unsecured debt provided by Standard & Poor's and Fitch Ratings were Negative. There can be no assurance that the rating and rating outlook of our senior unsecured long-term debt and other debt will remain at these levels.

A security rating is not a recommendation to buy, sell or hold securities, may not reflect all of the risks associated with an investment in our debt securities and is subject to revision or withdrawal by the assigning rating organization. Each rating should be evaluated independently of any other rating.

As a result of our senior unsecured long-term debt no longer being investment grade, our access to the public debt markets may be severely limited. We may be required to rely upon alternative sources of financing, such as bank lines and private debt placements and pledge otherwise unencumbered assets. There can be no assurance that we will be able to find such alternative financing on terms acceptable to us, if at all. Furthermore, we may be unable to retain all of our existing bank credit commitments beyond the then-existing maturity dates. As a consequence, our cost of financing could rise significantly, thereby negatively impacting our ability to finance some of our capital-intensive activities, such as our ongoing investment in MSRs and other retained interests.

Table of Contents***Term Notes***

The medium-term notes (the MTNs) were publicly issued under an indenture dated as of November 6, 2000 (as amended and supplemented, the MTN Indenture) by and between PHH and The Bank of New York, as successor trustee for Bank One Trust Company, N.A. In April 2010, \$5 million of MTNs were repaid upon maturity.

Credit Facilities

Credit facilities primarily represents an Amended and Restated Competitive Advance and Revolving Credit Agreement (the Amended Credit Facility), dated as of January 6, 2006, among PHH, a group of lenders and JPMorgan Chase Bank, N.A., as administrative agent.

On June 25, 2010, the Amended Credit Facility was further amended pursuant to which certain lenders consented to the amendments (the Extending Lenders) which extended the termination date of their respective revolving commitments from January 6, 2011 to February 29, 2012. Provided certain conditions are met, we may extend the revolving commitments of the Extending Lenders for an additional year at our request (the Extension Option). Effective June 25, 2010, the capacity of the Amended Credit Facility was reduced from \$1.3 billion to \$805 million and will be further reduced to \$525 million on January 6, 2011 upon the termination of the commitments related to certain lenders that did not consent to the amendments (the Non-Extending Lenders).

Pricing under the Amended Credit Facility is based upon our senior unsecured long-term debt ratings. If the ratings on our senior unsecured long-term debt assigned by Moody's Investors Service, Standard & Poor's and Fitch Ratings are not equivalent to each other, the second highest credit rating assigned by them determines pricing under the Amended Credit Facility. As of June 30, 2010, borrowings under the Amended Credit Facility related to commitments from the Extending Lenders bore interest at a margin of 350 bps over a benchmark index of either LIBOR or the federal funds rate (the Benchmark Rate). As of June 30, 2010 borrowings under the Amended Credit Facility related to commitments from the Non-Extending Lenders bore interest at a margin of 70 bps over the Benchmark Rate. As of December 31, 2009, borrowings under the Amended Credit Facility bore interest at a margin of 70 bps over the Benchmark Rate. The Amended Credit Facility also requires us to pay utilization fees related to the Non-Extending Lenders' commitments if our usage exceeds 50% of the aggregate commitments under the Amended Credit Facility. There is no utilization fee associated with the borrowings related to the Extending Lenders' commitments. The per annum utilization fee applied to both the borrowings related to the Non-Extending Lenders' commitments as of June 30, 2010 and all borrowings under the Amended Credit Facility as of December 31, 2009 was 12.5 bps. The per annum facility fee for the Extending Lenders' commitments as of June 30, 2010 was 75 bps and a per annum facility fee of 17.5 bps was paid both on the Non-Extending Lenders' commitments as of June 30, 2010 and the Amended Credit Facility in its entirety as of December 31, 2009. In the event that we elect the Extension Option, the Extending Lenders will receive an immediate increase in pricing related to their commitments of an additional 25 bps per annum.

Convertible Notes

On April 2, 2008, we completed a private offering of the 4.0% Convertible Notes due 2012 (the 2012 Convertible Notes) with an aggregate principal amount of \$250 million and a maturity date of April 15, 2012 to certain qualified institutional buyers. The carrying amount as of June 30, 2010 and December 31, 2009 is net of an unamortized discount of \$21 million and \$29 million, respectively. There were no conversions of the 2012 Convertible Notes during the six months ended June 30, 2010.

On September 29, 2009, we completed a private offering of the 4.0% Convertible Senior Notes due 2014 (the 2014 Convertible Notes) with an aggregate principal balance of \$250 million and a maturity date of September 1, 2014 to certain qualified institutional buyers. The carrying amount as of June 30, 2010 and December 31, 2009 is net of an unamortized discount of \$64 million and \$70 million, respectively. There were no conversions of the 2014 Convertible Notes during the six months ended June 30, 2010.

Table of Contents**Debt Maturities**

The following table provides the contractual maturities of our indebtedness at June 30, 2010. The maturities of our vehicle management asset-backed notes, a portion of which are amortizing in accordance with their terms, represent estimated payments based on the expected cash inflows related to the securitized vehicle leases and related assets:

	Asset-Backed	Unsecured (In millions)	Total
Within one year	\$ 2,571	\$ 137	\$ 2,708
Between one and two years	1,036	512	1,548
Between two and three years	629	426	1,055
Between three and four years	392	2	394
Between four and five years	112	252	364
Thereafter	5	18	23
	\$ 4,745	\$ 1,347	\$ 6,092

As of June 30, 2010, available funding under our asset-backed debt arrangements and unsecured committed credit facilities consisted of:

	Capacity⁽¹⁾	Utilized Capacity (In millions)	Available Capacity
<i>Asset-Backed Funding Arrangements</i>			
Vehicle management ⁽²⁾	\$3,501	\$ 3,001	\$ 500
Mortgage warehouse and other ⁽³⁾	2,256	1,833	423
<i>Unsecured Committed Credit Facilities⁽⁴⁾</i>	810	395	415

- (1) Capacity is dependent upon maintaining compliance with, or obtaining waivers of, the terms, conditions and covenants of the respective agreements. With respect to asset-backed funding arrangements, capacity may be further limited by the asset eligibility requirements

under the
respective
agreements.

- (2) The Chesapeake 2009-1 Term Notes and the 2009-4 Term Notes have entered their respective Amortization Periods. See Asset-Backed Debt Vehicle Management Asset-Backed Debt above for additional information on the revolving and amortization periods of these facilities.
- (3) Capacity does not reflect \$2.3 billion undrawn under the \$3.0 billion Fannie Mae Repurchase Facilities, as these facilities are uncommitted. Utilized capacity reflects \$97 million of mortgage loans sold to RBS under the terms of the RBS Repurchase Facility. The mortgage loans and related debt are not included in our Condensed

Consolidated
Balance Sheet
as of June 30,
2010.

- (4) Utilized capacity reflects \$16 million of letters of credit issued under the Amended Credit Facility, which are not included in Debt in our Condensed Consolidated Balance Sheet.

Debt Covenants

Certain of our debt arrangements require the maintenance of certain financial ratios and contain affirmative and negative covenants, including, but not limited to, material adverse change, liquidity maintenance, restrictions on our indebtedness and the indebtedness of our material subsidiaries, mergers, liens, liquidations and sale and leaseback transactions. Among other covenants, the Amended Credit Facility and the RBS Repurchase Facility require that we maintain: (i) on the last day of each fiscal quarter, net worth of \$1.0 billion and (ii) at any time, a ratio of indebtedness to tangible net worth no greater than 6.5:1. Among other covenants, the CSFB Mortgage Repurchase Facility required that we maintain (i) on the last day of each fiscal quarter, net worth of \$1.0 billion plus 25% of consolidated net income for the quarter, if positive and (ii) at any time, a ratio of indebtedness to tangible net worth no greater than 10:1. Effective July 27, 2010, the financial covenants under the CSFB Mortgage Repurchase Facility were amended such that we are required to maintain: (i) on the last day of each fiscal quarter, net worth of \$1.0 billion and (ii) at any time, a ratio of indebtedness to tangible net worth no greater than 6.5:1. The MTN Indenture requires that we maintain a debt to tangible equity ratio of not more than 10:1. The Amended Credit Facility requires us to maintain a minimum of \$1.0 billion in committed mortgage repurchase or warehouse facilities, with no more than \$500

Table of Contents

million of gestation facilities and excluding, uncommitted facilities provided by Fannie Mae. In addition, the RBS Repurchase Facility and the CSFB Mortgage Repurchase Facility require PHH Mortgage to maintain a minimum of \$2.5 billion and \$2.0 billion in mortgage repurchase or warehouse facilities, respectively, comprised of any uncommitted facilities provided by Fannie Mae and any committed mortgage repurchase or warehouse facility, including the respective facility. At June 30, 2010, we were in compliance with all of our financial covenants related to our debt arrangements.

Pursuant to the Amended Credit Facility, we may not declare or pay any dividend, other than dividends payable solely in our common stock, without the written consent of the lenders representing more than 50% of the aggregate commitments in effect at such time. Such restrictions under the Amended Credit Facility related to our ability to declare or pay dividends will be suspended so long as our corporate ratings are equal to or better than at least two of the following: Baa3 from Moody's Investors Service, BBB- from Standard & Poor's and BBB- from Fitch Ratings (in each case on stable outlook or better). The MTN Indenture also restricts us from paying dividends if, after giving effect to the dividend payment, the debt to equity ratio exceeds 6.5:1, among other covenants.

Under certain of our financing, servicing, hedging and related agreements and instruments (collectively, the Financing Agreements), the lenders or trustees have the right to notify us if they believe we have breached a covenant under the operative documents and may declare an event of default. If one or more notices of default were to be given, we believe we would have various periods in which to cure certain of such events of default. If we do not cure the events of default or obtain necessary waivers within the required time periods, the maturity of some of our debt could be accelerated and our ability to incur additional indebtedness could be restricted. In addition, events of default or acceleration under certain of our Financing Agreements would trigger cross-default provisions under certain of our other Financing Agreements.

Critical Accounting Policies

There have not been any significant changes to the critical accounting policies discussed under Part II Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies of our 2009 Form 10-K.

Recently Issued Accounting Pronouncements

For detailed information regarding recently issued accounting pronouncements and the expected impact on our financial statements, see Note 1, Summary of Significant Accounting Policies in the accompanying Notes to Condensed Consolidated Financial Statements included in this Form 10-Q.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our principal market exposure is to interest rate risk, specifically long-term Treasury and mortgage interest rates due to their impact on mortgage-related assets and commitments. We also have exposure to LIBOR interest rates due to their impact on variable-rate borrowings, other interest rate sensitive liabilities and net investment in variable-rate lease assets. We anticipate that such interest rates will remain our primary benchmark for market risk for the foreseeable future.

Interest Rate Risk***Mortgage Servicing Rights***

Our MSR's are subject to substantial interest rate risk as the mortgage notes underlying the MSR's permit the borrowers to prepay the loans. Therefore, the value of MSR's generally tends to diminish in periods of declining interest rates (as prepayments increase) and increase in periods of rising interest rates (as prepayments decrease). Although the level of interest rates is a key driver of prepayment activity, there are other factors that influence prepayments, including home prices, underwriting standards and product characteristics. Since our Mortgage Production segment's results of operations are positively impacted when interest rates decline, our Mortgage

Table of Contents

Production segment's results of operations may fully or partially offset the change in fair value of MSR's either negating or minimizing the need to hedge the change in fair value of our MSR's with derivatives.

In order to estimate the benefit on our Mortgage Production segment's results of operations from a decline in interest rates, we continuously evaluate our ability to replenish lost MSR value and cash flow due to increased prepayments. The key drivers of our Mortgage Production segment's results of operations are production volume, loan margins and production costs.

As of June 30, 2010, there were no open derivatives related to our MSR's. Our decisions regarding the use of derivatives related to MSR's, if any, could result in continued volatility in the results of operations for our Mortgage Servicing segment during the remainder of 2010.

Other Mortgage-Related Assets

Our other mortgage-related assets that are subject to interest rate and price risk include (i) our IRLCs and (ii) loans held in inventory awaiting sale into the secondary market (which are presented as Mortgage loans held for sale in the accompanying Condensed Consolidated Balance Sheets). We use forward delivery commitments on MBS or whole loans and options on MBS to economically hedge our commitments to fund mortgages and MLHS. These forward delivery commitments fix the forward sales price that will be realized in the secondary market and thereby reduce the interest rate and price risk to us.

Indebtedness

The debt used to finance much of our operations is also exposed to interest rate fluctuations. We use various hedging strategies and derivative financial instruments to create a desired mix of fixed- and variable-rate assets and liabilities. Derivative instruments used in these hedging strategies may include swaps and interest rate caps.

Consumer Credit Risk

Loan Recourse

We sell a majority of our loans on a non-recourse basis. We also provide representations and warranties to purchasers and insurers of the loans sold. In the event of a breach of these representations and warranties, we may be required to repurchase a mortgage loan or indemnify the purchaser, and any subsequent loss on the mortgage loan may be borne by us. If there is no breach of a representation and warranty provision, we have no obligation to repurchase the loan or indemnify the investor against loss. The unpaid principal balance of loans sold by us represents the maximum potential exposure related to representation and warranty provisions; however, we cannot estimate our maximum exposure because we do not service all of the loans for which we have provided a representation or warranty. As of June 30, 2010, we had a liability of \$68 million, included in Other liabilities in the accompanying Condensed Consolidated Balance Sheet, for probable losses related to our recourse exposure.

Mortgage Loans in Foreclosure

Mortgage loans in foreclosure represent the unpaid principal balance of mortgage loans for which foreclosure proceedings have been initiated, plus recoverable advances made by us on those loans. These amounts are recorded net of an allowance for probable losses on such mortgage loans and related advances. As of June 30, 2010, mortgage loans in foreclosure were \$95 million, net of an allowance for probable losses of \$21 million, and were included in Other assets in the accompanying Condensed Consolidated Balance Sheet.

Table of Contents**Real Estate Owned**

Real Estate Owned (REO), which are acquired from mortgagors in default, are recorded at the lower of the adjusted carrying amount at the time the property is acquired or fair value. Fair value is determined based upon the estimated net realizable value of the underlying collateral less the estimated costs to sell. As of June 30, 2010, REO were \$29 million, net of a \$15 million adjustment to record these amounts at their estimated net realizable value, and were included in Other assets in the accompanying Condensed Consolidated Balance Sheet.

Mortgage Reinsurance

We have two contracts with primary mortgage insurance companies, through Atrium, that are inactive and in runoff. Through these reinsurance contracts, we are exposed to losses on mortgage loans pooled by year of origination. As of March 31, 2010, the contractual reinsurance period for each pool was 10 years and the weighted-average remaining reinsurance period was 5.5 years. Loss rates on these pools are determined based on the unpaid principal balance of the underlying loans. We indemnify the primary mortgage insurers for losses that fall between a stated minimum and maximum loss rate on each annual pool. In return for absorbing this loss exposure, we are contractually entitled to a portion of the insurance premium from the primary mortgage insurers. We are required to hold securities in trust related to this potential obligation, which were \$284 million and were included in Restricted cash, cash equivalents and investments in the accompanying Condensed Consolidated Balance Sheet as of June 30, 2010. As of June 30, 2010, a liability of \$128 million was included in Other liabilities in the accompanying Condensed Consolidated Balance Sheet for incurred and incurred but not reported losses associated with our mortgage reinsurance activities, which was determined on an undiscounted basis. During the three and six months ended June 30, 2010, we recorded expense associated with the liability for estimated losses of \$15 million and \$26 million, respectively, within Loan servicing income in the accompanying Condensed Consolidated Statement of Operations. The following table summarizes certain information regarding mortgage loans that are subject to reinsurance by year of origination as of March 31, 2010:

	Year of Origination							
	2003 and Prior	2004	2005	2006	2007	2008	2009	Total
	(Dollars in millions)							
Unpaid principal balance	\$ 1,900	\$ 1,101	\$ 1,050	\$ 706	\$ 1,430	\$ 2,504	\$ 487	\$ 9,178
Unpaid principal balance as a percentage of original unpaid principal balance	10%	30%	50%	59%	77%	83%	97%	N/A
Maximum potential exposure to reinsurance losses	\$ 284	\$ 104	\$ 60	\$ 30	\$ 49	\$ 63	\$ 7	\$ 597
Average FICO score	696	693	695	692	701	727	758	708
Delinquencies ⁽¹⁾	6.61%	5.51%	6.35%	9.02%	7.93%	4.88%	0.07%	6.09%
Foreclosures/ REO/ bankruptcies ⁽²⁾	5.40%	9.26%	12.35%	15.88%	13.89%	3.30%	0.00%	8.06%

(1) Represents delinquent mortgage loans for which payments are 60 days or more outstanding as a percentage of the total unpaid principal

balance.

- (2) Calculated as a percentage of the total unpaid principal balance.

Table of Contents

The projections used in the development of our liability for mortgage reinsurance assume we will incur losses related to reinsured mortgage loans originated from 2003 through 2009. Based on these projections, we expect the cumulative losses for the loans originated from 2005 through 2007 will reach their maximum potential exposure for each respective year.

See Note 11, Commitments and Contingencies in the accompanying Notes to Condensed Consolidated Financial Statements included in this Form 10-Q.

Counterparty Credit Risk

We are exposed to counterparty credit risk in the event of non-performance by counterparties to various agreements and sales transactions. We manage such risk by evaluating the financial position and creditworthiness of such counterparties and/or requiring collateral, typically cash, in instances in which financing is provided. We attempt to mitigate counterparty credit risk associated with our derivative contracts by monitoring the amount for which we are at risk with each counterparty to such contracts, requiring collateral posting, typically cash, above established credit limits, periodically evaluating counterparty creditworthiness and financial position, and where possible, dispersing the risk among multiple counterparties. However, there can be no assurance that we will manage or mitigate our counterparty credit risk effectively.

As of June 30, 2010, there were no significant concentrations of credit risk with any individual counterparty or group of counterparties with respect to our derivative transactions. Concentrations of credit risk associated with receivables are considered minimal due to our diverse client base. With the exception of the financing provided to customers of our mortgage business, we do not normally require collateral or other security to support credit sales.

Fair Value Measurements

Approximately 42% of our assets and liabilities measured at fair value were valued using significant unobservable inputs and were categorized within Level Three of the valuation hierarchy. Approximately 74% of our assets and liabilities categorized within Level Three of the valuation hierarchy are comprised of our MSRs. The remainder of our assets and liabilities categorized within Level Three of the valuation hierarchy is comprised of certain MLHS, derivative instruments related to the issuance of the 2014 Convertible Notes, IRLCs, securitized mortgage loans and mortgage loan securitization debt certificates. See Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations Second Quarter 2010 vs. Second Quarter 2009 Segment Results Mortgage Servicing Segment and Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations Six Months Ended June 30, 2010 vs. Six Months Ended June 30, 2009 Segment Results Mortgage Servicing Segment for further discussion regarding the impact of Change in fair value of mortgage servicing rights on our results of operations.

Sensitivity Analysis

We assess our market risk based on changes in interest rates utilizing a sensitivity analysis. The sensitivity analysis measures the potential impact on fair values based on hypothetical changes (increases and decreases) in interest rates.

We use a duration-based model in determining the impact of interest rate shifts on our debt portfolio, certain other interest-bearing liabilities and interest rate derivatives portfolios. The primary assumption used in these models is that an increase or decrease in the benchmark interest rate produces a parallel shift in the yield curve across all maturities.

We utilize a probability weighted option adjusted spread (OAS) model to determine the fair value of MSRs and the impact of parallel interest rate shifts on MSRs. The primary assumptions in this model are prepayment speeds, OAS (discount rate) and implied volatility. However, this analysis ignores the impact of interest rate changes on certain material variables, such as the benefit or detriment on the value of future loan originations, non-parallel shifts in the spread relationships between MBS, swaps and Treasury rates and changes in primary and

Table of Contents

secondary mortgage market spreads. For mortgage loans, IRLCs, forward delivery commitments on MBS or whole loans and options, we rely on market sources in determining the impact of interest rate shifts. In addition, for IRLCs, the borrower's propensity to close their mortgage loans under the commitment is used as a primary assumption.

Our total market risk is influenced by a wide variety of factors including market volatility and the liquidity of the markets. There are certain limitations inherent in the sensitivity analysis presented, including the necessity to conduct the analysis based on a single point in time and the inability to include the complex market reactions that normally would arise from the market shifts modeled.

We used June 30, 2010 market rates on our instruments to perform the sensitivity analysis. The estimates are based on the market risk sensitive portfolios described in the preceding paragraphs and assume instantaneous, parallel shifts in interest rate yield curves. These sensitivities are hypothetical and presented for illustrative purposes only. Changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship of the change in fair value may not be linear.

The following table summarizes the estimated change in the fair value of our assets and liabilities sensitive to interest rates as of June 30, 2010 given hypothetical instantaneous parallel shifts in the yield curve:

	Change in fair value					
	Down 100 bps	Down 50 bps	Down 25 bps	Up 25 bps	Up 50 bps	Up 100 bps
	(In millions)					
Mortgage assets:						
Mortgage loans held for sale	\$ 34	\$ 20	\$ 11	\$ (15)	\$ (33)	\$ (78)
Interest rate lock commitments	55	34	20	(33)	(76)	(194)
Forward loan sale commitments	(83)	(52)	(29)	39	84	189
Option contracts	(3)	(2)	(2)	6	17	65
Total Mortgage loans held for sale, interest rate lock commitments and related derivatives	3			(3)	(8)	(18)
Mortgage servicing rights	(383)	(177)	(83)	84	168	319
Other assets	1	1			(1)	(1)
Total mortgage assets	(379)	(176)	(83)	81	159	300
Total vehicle assets	14	7	3	(3)	(7)	(14)
Total liabilities	(26)	(13)	(6)	6	13	25
Total, net	\$ (391)	\$ (182)	\$ (86)	\$ 84	\$ 165	\$ 311

Item 4. Controls and Procedures**Disclosure Controls and Procedures**

As of the end of the period covered by this Form 10-Q, management performed, with the participation of our Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures. Based on that evaluation, management concluded that our disclosure controls and procedures were effective as of June 30,

2010.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended June 30, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

90

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

There have been no material changes from the legal proceedings disclosed in Part I Item 3. Legal Proceedings of our 2009 Form 10-K.

Item 1A. Risk Factors

This Item 1A should be read in conjunction with Part I Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009. Other than with respect to the risk factors discussed below, there have been no material changes from the risk factors disclosed in Part I Item 1A. Risk Factors of our 2009 Form 10-K.

Risks Related to our Business

We are highly dependent upon programs administered by GSEs such as Fannie Mae, Freddie Mac and Ginnie Mae to generate revenues through mortgage loan sales to institutional investors and for our mortgage servicing business. Changes in existing U.S. government-sponsored mortgage programs or servicing eligibility standards could materially and adversely affect our business, financial position, results of operations or cash flows.

Our ability to generate revenues through mortgage loan sales to institutional investors depends to a significant degree on programs administered by GSEs such as Fannie Mae, Freddie Mac, Ginnie Mae and others that facilitate the issuance of mortgage-backed securities in the secondary market. These GSEs play a powerful role in the residential mortgage industry, and we have significant business relationships with them. Almost all of the conforming loans that we originate for sale qualify under existing standards for inclusion in guaranteed mortgage securities backed by GSEs. We also derive other material financial benefits from these relationships, including the assumption of credit risk by these GSEs on loans included in such mortgage securities in exchange for our payment of guarantee fees and the ability to avoid certain loan inventory finance costs through streamlined loan funding and sale procedures. Any discontinuation of, or significant reduction or material change in, the operation of these GSEs or any significant adverse change in the level of activity in the secondary mortgage market or the underwriting criteria of these GSEs could have a material adverse effect on our business, financial position, results of operations or cash flows. In addition, we service GSE-owned loans on behalf of the GSEs, as well as loans that have been securitized pursuant to GSE sponsored securitizations in connection with the issuance of GSE guaranteed MBS. Our status as a GSE-approved seller/servicer is subject to compliance with each of the GSEs' respective selling and servicing guides. Loss of our approved seller/servicer status with a GSE could have a material adverse impact on our business, financial position, results of operations, or cash flows.

We are exposed to counterparty risk and the insolvency of one or more of our significant counterparties or the unwillingness or inability of a significant counterparty to perform its obligations under, or to renew on commercially reasonable terms, their respective contractual relationships with us, including, without limitation, as a result of the rejection of an agreement or transaction by a counterparty in bankruptcy proceedings, could have a material adverse effect on our business, financial position, results of operations or cash flows.

We are exposed to counterparty risk in the event of non-performance by counterparties to our various contracts. In addition, we have relationships with several counterparties that represent a significant portion of our revenues, mortgage loan originations and financing arrangements, such as Merrill Lynch and Realty, which may exacerbate our counterparty risk. The insolvency of one or more of our significant counterparties or the unwillingness or inability of a significant counterparty to perform its obligations under, or to renew on commercially reasonable terms, their respective contractual relationships with us, including, without limitation, as a result of the rejection of an agreement or transaction by a counterparty in bankruptcy proceedings, could have a material adverse effect on our business, financial position, results of operations or cash flows. Some of our counterparties, including certain our significant counterparties, are

Table of Contents

highly leveraged and have been adversely affected by the recent economic decline in the United States, including the pronounced downturn in the debt and equity capital markets and the U.S. housing market, and unprecedented levels of credit market volatility. Many financial institutions, real estate companies and companies within the industries served by our Fleet Management Services segment have consolidated with competitors, commenced bankruptcy proceedings, shut down or severely curtailed their activities due to the recent economic decline.

In connection with our spin-off from Cendant Corporation in 2005, we entered into various agreements with Realogy, including the Mortgage Venture Operating Agreement, the Strategic Relationship Agreement, the management services agreement between PHH Mortgage and the Mortgage Venture, the Trademark Licensing Agreements and the Marketing Agreement (collectively, the Realogy Agreements). During the six months ended June 30, 2010 and the year ended December 31, 2009, approximately 32% and 37% of our mortgage loan originations, respectively, were derived through our relationship with Realogy and its affiliates pursuant to the Realogy Agreements.

In January 2009, Bank of America Corporation announced the completion of its merger with Merrill Lynch & Co., Inc., the parent company of Merrill Lynch, which is one of our largest private-label clients, accounting for approximately 16% of our mortgage loan originations during the six months ended June 30, 2010 and during the year ended December 31, 2009. We have several agreements with Merrill Lynch, including the Origination Assistance Agreement, dated as of December 15, 2000 (the OAA), pursuant to which we provide Merrill Lynch mortgage origination services on a private-label basis. The initial terms of the OAA expire on December 31, 2010; however, provided we comply with its terms, including certain service level standards, the OAA will automatically renew for an additional five-year term, expiring on December 31, 2015.

There can be no assurances, however, that our agreements with Realogy, Merrill Lynch or any of our other private-label or other customers or counterparties will be renewed on commercially reasonable terms or will not be terminated in accordance with their terms. Any non-renewal or termination of our significant counterparty contracts, including, without limitation, our agreements with Realogy, Merrill Lynch, each of the GSEs and the counterparties to our financing agreements, could have a material adverse effect on our business, financial position, results of operations or cash flows.

The businesses in which we engage are complex and heavily regulated, and changes in the regulatory environment affecting our businesses could have a material adverse effect on our business, financial position, results of operations or cash flows.

Our Mortgage Production and Mortgage Servicing segments are subject to numerous federal, state and local laws and regulations and may be subject to various judicial and administrative decisions imposing various requirements and restrictions on our business. These laws, regulations and judicial and administrative decisions to which our Mortgage Production and Mortgage Servicing segments are subject include those pertaining to: real estate settlement procedures; fair lending; fair credit reporting; truth in lending; compliance with net worth and financial statement delivery requirements; compliance with federal and state disclosure and licensing requirements; the establishment of maximum interest rates, finance charges and other charges; secured transactions; collection, foreclosure, repossession and claims-handling procedures; other trade practices and privacy regulations providing for the use and safeguarding of non-public personal financial information of borrowers and guidance on non-traditional mortgage loans issued by the federal financial regulatory agencies. By agreement with our financial institution clients, we are required to comply with additional requirements that our clients may be subject to through their regulators.

We are also subject to privacy regulations. We manage highly sensitive non-public personal information in all of our operating segments, which is regulated by law. Problems with the safeguarding and proper use of this information could result in regulatory actions and negative publicity, which could materially and adversely affect our reputation, business, financial position, results of operations or cash flows. Some local and state governmental authorities have taken, and others are contemplating taking, regulatory action to require increased loss mitigation outreach for borrowers, including the imposition of waiting periods prior to the filing of notices of default and the completion of foreclosure sales and, in some

Table of Contents

cases, moratoriums on foreclosures altogether. Such regulatory changes in the foreclosure process could increase servicing costs and reduce the ultimate proceeds received on these properties if real estate values continue to decline. These changes could also have a negative impact on liquidity as we may be required to repurchase loans without the ability to sell the underlying property on a timely basis. With respect to our Fleet Management Services segment, we could be subject to unlimited liability as the owner of leased vehicles in Alberta, Canada and are subject to limited liability in two major provinces, Ontario and British Columbia, and as many as fifteen jurisdictions in the United States under the legal theory of vicarious liability.

Congress, state legislatures, federal and state regulatory agencies and other professional and regulatory entities review existing laws, rules, regulations and policies and periodically propose changes that could significantly affect or restrict the manner in which we conduct our business. It is possible that one or more legislative proposals may be adopted or one or more regulatory changes, changes in interpretations of laws and regulations, judicial decisions or governmental enforcement actions may be implemented that could have a material adverse effect on our business, financial position, results of operations or cash flows. For example, certain trends in the regulatory environment could result in increased pressure from our clients for us to assume more residual risk on the value of the vehicles at the end of the lease term. If this were to occur, it could have a material adverse effect on our results of operations.

Our failure to comply with such laws, rules or regulations, whether actual or alleged, could expose us to fines, penalties or potential litigation liabilities, including costs, settlements and judgments, any of which could have a material adverse effect on our business, financial position, results of operations or cash flows. The U.S. economic recession has resulted, and could continue to result, in increased delinquencies, home price depreciation and lower home sales. In response to these trends, the U.S. government has taken several actions that are intended to stabilize the housing market and the banking system, maintain lower interest rates, and increase liquidity for lending institutions. Certain of these actions are also intended to make it easier for borrowers to obtain mortgage financing or to avoid foreclosure on their current homes. Some of these key actions that have impacted, and may continue to impact, the U.S. mortgage industry include the enactment of the Housing and Economic Recovery Act of 2008, the conservatorship of Fannie Mae and Freddie Mac, the enactment of the Emergency Economic Stabilization Act of 2008, the implementation of the TARP, the implementation of HAMP and the Home Affordable Refinance Program as part of the HASP, the purchase by the Federal Reserve of direct obligations of the GSEs, the enactment of the American Recovery and Reinvestment Act of 2009, and the implementation of the Public-Private Investment Program. These specific actions by the federal government are intended, among other things, to stabilize domestic residential real estate markets by increasing the availability of credit for homebuyers and existing homeowners and reduce the foreclosure rates through mortgage loan modification programs. Although the federal government's HASP programs are intended to improve the current trends in home foreclosures, some local and state governmental authorities have taken, and others are contemplating taking, regulatory action to require increased loss mitigation outreach for borrowers, including the imposition of waiting periods prior to the filing of notices of default and the completion of foreclosure sales and, in some cases, moratoriums on foreclosures altogether. Such regulatory changes in the foreclosure process could increase servicing costs and reduce the ultimate proceeds received on these properties if real estate values continue to decline. These changes could also have a negative impact on liquidity as we may be required to repurchase loans without the ability to sell the underlying property on a timely basis.

While it is too early to determine the impact of the foregoing governmental initiatives, there can be no assurance that any of these programs will improve the effects of the current economic recession on our business. We also may be at a competitive disadvantage in the event that our competitors are able to participate in these federal programs and it is determined that we are not eligible to participate in these programs.

Additionally, on July 21, 2010, the Dodd-Frank Act was signed into law for the express purpose of further regulating the financial services industry, including mortgage origination, sales, and securitization. Certain provisions of the Dodd-Frank Act may impact the operation and practices of Fannie Mae and Freddie Mac and require sponsors of securitizations to retain a portion of the economic interest in the credit risk associated with the assets securitized by them. Federal regulators have been authorized to

Table of Contents

provide exceptions to the risk retention requirements for certain qualified mortgages and mortgages meeting certain underwriting standards prescribed in such regulations. Our combined Mortgage segments rely upon the ability to sell mortgage loans into securities sponsored by Fannie Mae, Freddie Mac and Ginnie Mae. If the mortgage loans we typically sell into GSE-sponsored MBS do not meet the definition of a qualified mortgage, then the GSEs may be required to retain a portion of the risk of assets they securitize, which may in turn substantially reduce or eliminate the GSEs ability to issue MBS. Substantial reduction in, or the elimination of, GSE demand for the mortgage loans we originate could have a material adverse effect on our business, financial condition, results of operations or cash flows. It is unclear whether future regulations related to the definition of qualified mortgages will include the types of conforming mortgage loans we typically sell into GSE-sponsored MBS. It is also unclear what effect future laws or regulations may have on the ability of the GSEs to issue MBS and it is not currently possible to determine what changes, if any, Congress may make to the structure of the GSEs. Further, there can be no assurances that the mortgage loans we typically sell to the GSEs will qualify under future regulations related to the definition of a qualified mortgage.

The Dodd-Frank Act also establishes an independent federal bureau of consumer financial protection to enforce laws involving consumer financial products and services, including mortgage finance. The bureau is empowered with examination and enforcement authority. The Dodd-Frank Act also establishes new standards and practices for mortgage originators, including determining a prospective borrower's ability to repay their mortgage, removing incentives for higher cost mortgages, prohibiting prepayment penalties for non-qualified mortgages, prohibiting mandatory arbitration clauses, requiring additional disclosures to potential borrowers and restricting the fees that mortgage originators may collect. In addition, our ability to enter into future ABS transactions may be impacted by the Dodd-Frank Act and other proposed reforms related thereto, the effect of which on the ABS market is currently uncertain. While we are continuing to evaluate all aspects of the Dodd-Frank Act, such legislation and regulations promulgated pursuant to such legislation could materially and adversely affect the manner in which we conduct our businesses, result in heightened federal regulation and oversight of our business activities, and result in increased litigation and compliance costs.

We may be unable to fully or successfully execute or implement our business strategies or achieve our objectives, including our transformation initiatives and goals, and we may be unable to effectively manage the inherent risks of our businesses, including market, credit, operational, and legal and compliance risks, any failure of which could have a material adverse effect on our business, financial position, results of operations or cash flows.

The businesses in which we engage are complex and heavily regulated and we are exposed to various market, credit, operational and legal and compliance risks. Due, in part, to these regulatory constraints and risks, we may be unable to fully or successfully execute or implement our business strategies or achieve our objectives, including our transformation initiatives and goals, and we may be unable to effectively manage the inherent risks of our businesses, including market, credit, operational, and legal and compliance risks, any failure of which could have a material adverse effect on our business, financial position, results of operations or cash flows.

In 2009, after assessing our cost structure and processes, we initiated a transformation effort directed towards creating greater operational efficiencies, improving scalability of our operating platforms and reducing our operating expenses. This effort involves evaluating and improving operational and administrative processes, eliminating inefficiencies and targeting areas of the market where we can leverage our competitive strengths. We may be unable to fully or successfully execute or implement our transformation initiatives and objectives, in whole or in part, and, if we are successful, there can be no assurances that we can implement these initiatives in a cost efficient manner or that these initiatives will have the impact that we intend on our business activities and results of operations. Our inability to achieve the goals targeted by our transformation efforts, or to implement and execute these initiatives within the timeframe we have projected, could result in us not achieving our stated goals.

Table of Contents***Continued or worsening conditions in the real estate market could adversely impact our business, financial position, results of operations or cash flows.***

The U.S. economic recession has resulted and could continue to result in further increased delinquencies, home price depreciation and lower home sales. In response to these trends, the U.S. government has taken several actions that are intended to stabilize the housing market and the banking system, maintain lower interest rates, and increase liquidity for lending institutions. These specific actions by the federal government are intended, among other things, to stabilize domestic residential real estate markets by increasing the availability of credit for homebuyers and existing homeowners and reduce the foreclosure rates through mortgage loan modification programs. Although the federal government's HASP programs are intended to improve the current trends in home foreclosures, some local and state governmental authorities have taken, and others are contemplating taking, regulatory action to require increased loss mitigation outreach for borrowers, including the imposition of waiting periods prior to the filing of notices of default and the completion of foreclosure sales and, in some cases, moratoriums on foreclosures altogether. Such regulatory changes in the foreclosure process could increase servicing costs and reduce the ultimate proceeds received on these properties if real estate values continue to decline. These changes could also have a negative impact on liquidity as we may be required to repurchase loans without the ability to sell the underlying property on a timely basis.

The level of interest rates is a key driver of refinancing activity; however, there are other factors which influence the level of refinance originations, including home prices, underwriting standards and product characteristics. We anticipate a continued challenging environment for purchase originations in 2010 as an excess inventory of homes, declining home values and increased foreclosures may make it difficult for many homeowners to sell their homes or qualify for a new mortgage. The declining housing market and general economic conditions, including elevated unemployment rates, have continued to negatively impact our Mortgage Servicing segment. Industry-wide mortgage loan delinquency rates have increased and we expect they will continue to increase over 2009 levels in correlation with unemployment rates. We expect foreclosure costs to remain elevated during the remainder of 2010 due to an increase in loss severity and repurchase requests and declining home prices. We experienced increases in actual and projected repurchases, indemnifications and related loss severity associated with the representations and warranties that we provide to purchasers and insurers of our sold loans, which we expect to continue to remain at elevated levels during the remainder of 2010, primarily due to increased delinquency rates and a decline in housing prices. These trends are considered in the determination of our foreclosure-related reserves; however, changes in these trends and other economic factors as well as the level and composition of our mortgage production volumes will impact the balance of our foreclosure-related reserves. As a result of the continued weakness in the housing market and increasing delinquency and foreclosure experience, our provision for reinsurance losses may increase during the remainder of 2010 in comparison to 2009 as anticipated losses become incurred. Additionally, we expect to continue to pay claims for certain book years during the remainder of 2010.

These factors could have a material adverse effect on our business, financial position, results of operations or cash flows.

Risks Related to our Common Stock***Provisions in our charter and bylaws, the Maryland General Corporation Law (the MGCL), and the indentures for the 2012 Convertible Notes and 2014 Convertible Notes may delay or prevent our acquisition by a third party.***

Our charter and by-laws contain several provisions that may make it more difficult for a third party to acquire control of us without the approval of our Board of Directors. These provisions include, among other things, a classified Board of Directors, advance notice for raising business or making nominations at meetings and blank check preferred stock. Blank check preferred stock enables our Board of Directors, without stockholder approval, to designate and issue additional series of preferred stock with such dividend, liquidation, conversion, voting or other rights, including the right to issue convertible securities with no limitations on conversion, as our Board of Directors may determine, including rights to dividends and proceeds in a liquidation that are senior to the Common stock.

Table of Contents

We are also subject to certain provisions of the MGCL which could delay, prevent or deter a merger, acquisition, tender offer, proxy contest or other transaction that might otherwise result in our stockholders receiving a premium over the market price for their Common stock or may otherwise be in the best interest of our stockholders. These include, among other provisions:

The business combinations statute which prohibits transactions between a Maryland corporation and an interested stockholder or an affiliate of an interested stockholder for five years after the most recent date on which the interested stockholder becomes an interested stockholder and

The control share acquisition statute which provides that control shares of a Maryland corporation acquired in a control share acquisition have no voting rights except to the extent approved by a vote of two-thirds of the votes entitled to be cast on the matter.

Our by-laws contain a provision exempting any share of our capital stock from the control share acquisition statute to the fullest extent permitted by the MGCL. However, our Board of Directors has the exclusive right to amend our by-laws and, subject to their fiduciary duties, could at any time in the future amend the by-laws to remove this exemption provision.

Finally, if certain changes in control or other fundamental changes under the terms of the Convertible Notes occur prior to their respective maturity date, holders of the Convertible Notes will have the right, at their option, to require us to repurchase all or a portion of their Convertible Notes and, in some cases, such a transaction will cause an increase in the conversion rate for a holder that elects to convert its Convertible Notes in connection with such a transaction. In addition, the indentures for the 2012 Convertible Notes and 2014 Convertible Notes (the 2012 Convertible Notes Indenture and the 2014 Convertible Notes Indenture, respectively and the Convertible Notes Indentures, collectively) prohibit us from engaging in certain changes in control unless, among other things, the surviving entity assumes our obligations under the Convertible Notes. These and other provisions of the Convertible Notes Indentures could prevent or deter potential acquirers and reduce the likelihood that stockholders receive a premium for our Common stock in an acquisition.
