**Our Company**

We believe we are one of the largest providers of proprietary intervention curricula, educational technologies and other research-based education solutions for students in the Pre-K through 12th grade education market in the United States. The intervention market, where we focus, provides supplemental education solutions to at-risk and special education students. We offer a distinctive blended intervention solution that combines different forms of current instruction techniques, including text books, education games, data management and e-learning. We believe that our approach builds a more effective learning environment that combines teacher-led instruction and technology and that this approach sets us apart from our competitors, as we believe it better engages at-risk students, leading to more favorable student results. Our solutions are designed to enable the most challenged learners to achieve their potential by utilizing a range of content that primarily focuses on reading and math.

We take a holistic approach to learning and our intervention solutions address both the behavioral and cognitive needs of the students we serve. We believe our focus on the Pre-K through 12th grade intervention market and our significantly greater scale and scope of operations compared to those other companies primarily focused on the intervention market gives us a competitive edge relative to our peers. Further, our products and services are highly results-oriented and enable school districts and parents across the country to improve student performance and better satisfy rigorous accountability standards.

We believe that school districts have become increasingly accountable for student performance. As a result, they have increased both focus and funding to address underperformance. To this end, our research-based intervention programs have demonstrated consistent success with at-risk and special education student populations and have established us as one of the most readily recognized companies exclusively serving this market.

Our primary business units include:

*Voyager.* Our Voyager unit offers reading, math and professional development programs targeted towards the at-risk and special education student populations. Voyager materials, offered in print form and increasingly in online format,

are tailored to meet the needs of these students and differ considerably from traditional instructional materials in design, approach and intensity. Lessons are based on scientific research and are carefully designed to effectively and efficiently address each of the strategies and skills necessary to improve the abilities of struggling students.

## **Table of Contents**

*Cambium Learning Technologies.* Our Cambium Learning Technologies ( CLT ) unit utilizes technology to deliver subscription-based websites, online libraries, software and equipment designed to help students reach their potential in grades K through 12 and beyond. CLT products are offered under four different industry leading brands: Learning A-Z, Explore Learning, Kurzweil Educational Systems and IntelliTools.

*Sopris.* Our Sopris unit focuses on providing a diverse, yet comprehensive collection of printed and electronic supplemental education materials to complement core programs and to provide intense remediation aimed at specific skill deficits. When compared to products offered by our other business units, Sopris products tend to be more narrowly-tailored and target a smaller, more specific audience.

## **Strategy for Growth and Development**

Our strategy for growth and development is based upon the following:

*Continued Focus on the Pre-K Through 12th Grade Intervention Market:* The intervention market is highly attractive and is characterized by favorable long-term growth trends and historically strong government support. We devote most of our resources to better serve this market and we believe that our concentrated focus positions us to capture a greater market share over time. We are a leading provider that offers comprehensive instructional material, professional development and learning technology solutions specifically designed for the intervention market. We also believe that this focus allows us to deliver better designed products to our customers, ultimately resulting in more favorable student outcomes. We plan to continue to employ a broad-based approach to compete across segments and build scale and market share.

*Increased Offering of Technology-Based Learning Solutions:* We have a wide range of technology-based learning solutions offered as either standalone tools or as part of our blended model (which integrates these technology-based learning solutions with our print-based products). Our standalone technology-based solutions include online supplemental reading, writing and vocabulary lessons and books as well as interactive simulations in math and science. Such solutions are employed by our customers for at-risk students and are more commonly used by, and are equally as effective for, on-track students to enhance their proficiency levels. Across much of our product offering, we utilize a comprehensive student data reporting system with multiple years of results. We believe this ability to assess, track and report results is crucial to providing educators with the tools required to achieve and provide accountability for student outcomes.

*Leverage Nationally Recognized Brands, Sales Force and Scalable Platform:* We believe our portfolio of premier brands and research-based products and services has consistently delivered superior learning outcomes for school districts. We plan to leverage our reputation for quality and our experienced sales force to generate new business and capture a greater share of business from existing customers across our national footprint. Further, we plan to utilize our portfolio of technology-driven products and services and an easily replicable implementation model to rapidly meet customer needs.

*Invest in Key Growth Initiatives:* In 2010, we made specific investments in certain key areas intended to facilitate growth in 2011 and beyond. In the Voyager business unit, we integrated two large sales forces (pre-combination Cambium and VLCY) into one national model and we consolidated the student reporting systems of the two previously separate companies. In the Sopris business unit, we built a nationwide field sales force, made significant investments in marketing and introduced two substantial new products. In the CLT unit, we have increased our investment in sales, marketing and product development to enhance continued growth products. Across all business units, we have substantially upgraded our e-commerce and e-marketing capabilities in order to facilitate greater demand pull for our products. We intend to increase market penetration and market share through these investments, enabling us to recognize greater revenues per student.

### **Our Industry**

The intervention market is focused on administering supplemental education solutions to at-risk and special education students within the Pre-K through 12th grade student segment. At-risk and special education students are those students that are underperforming when evaluated against their peers and current academic standing, which is defined as the bottom 40% of learners. Students in need of intervention are often found in three distinct groups: English language learners ( ELL ), Special Education ( SPED ) and impoverished students. The ELL group is made up of those students whose first language is not English. SPED students are individuals with special needs, including learning and communication challenges, emotional and behavioral disorders, physical disabilities and developmental disorders. Impoverished students are from families with low socioeconomic status and are at an academic disadvantage due to their families' financial hardships.

We believe that educating at-risk and special education students requires a different approach than relying on traditional instructional materials since these intervention programs often require detailed implementation and training. Key federal and state programs, such as the Title I portion ( Title I ) of the reauthorized Elementary Secondary Education Act ( ESEA ), School Improvement Grants program ( SIG ), Individuals with Disabilities Education Act ( IDEA ) and the Race to the Top Program enacted under the American Recovery and Reinvestment Act of 2009 ( ARRA ) have been key drivers in pushing school districts to address the needs of this student population.

While school districts use a variety of government funding sources in order to procure our products and services, our industry receives proportionally more federally provided funds than education services and products as a whole, which tend to rely more heavily on state and local funding. Title I (and the Title 111 portion of the ESEA) and IDEA have existed for decades and have experienced steady increases since their inception. Further augmenting these traditional funding sources in 2009 and 2010 was the ARRA, which allocated an additional \$10 billion for Title I and an additional \$11.3 billion for IDEA over the fiscal years ending September 2010 and September 2011. Additional federal funds are also being made available through the ARRA's Race to the Top program, which is expected to provide over \$4 billion in additional education funding.

Over the long-term, we expect growth in the overall intervention market will be driven by the following key factors:

*Large and Growing Addressable Market:* Total Pre-K through 12th grade enrollment was 56 million in 2008, with enrollments rising. It is estimated that at least 40% of these students require intervention and represent a large addressable market for us. Demand for intervention is expected to continue to increase since intervention is typically more cost effective than special education programs. We believe that, with more attention in general, increased analysis of U.S. student outcomes versus other countries, focus and likely inclusion of the graduation rate in the ESEA, and movement to national standards, the number of children deemed to need intervention is likely to increase from 40% to over 50%, as indicated by proficiency rates of the National Assessment of Educational Progress.

*Historically Stable Federal Funding Landscape:* The funding environment for Pre-K through 12th grade education has historically been stable across economic cycles. While the recent downturn has pressured state and local budgets, the primary sources of federal funding for education (Title I and IDEA) have been maintained at historically high levels. Traditional federal funding sources for education have been temporarily augmented by ARRA funding from 2009 to 2011, including the Race to the Top program.

*Increasing Emphasis on Accountability and Measurement:* The No Child Left Behind Act ( NCLB ) has been a key driver for increased accountability and a measurement of student performance. School districts are required to demonstrate adequate yearly progress ( AYP ) or risk a cut in funding. Intervention products help schools improve performance of the most challenged learners and meet stringent AYP criteria. Furthermore, there is

greater emphasis on evaluating educators based on the performance of their students. The combination of these factors will continue to drive the demand for intervention and professional development products.

**Table of Contents**

*Proven Return on Investment of Intervention Products:* Numerous studies have demonstrated and quantified the benefits of intervention products for at-risk and special education students. We believe traditional educational materials are inadequate and not designed to meet their learning needs. Also, teachers are becoming better trained at utilizing intervention materials, which we expect will contribute to greater demand for such products.

**RISK FACTORS**

*You should carefully consider the following risk factors and the risk factors set forth in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, which is incorporated herein by reference, as well as all other information contained or incorporated by reference in this prospectus before participating in the exchange offer.*

**Risks Related to Ownership of our Common Stock**

*Shares eligible for future sale may adversely affect the market price of our common stock, as the future sale of a substantial amount of outstanding stock in the public marketplace could reduce the price of our common stock and dilute the percentage of ownership of our stockholders.*

The market price of our common stock could decline as a result of sales of a large number of shares of common stock in the market after this offering, or the perception that such sales could occur. These sales, or the possibility that these sales may occur, also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate. As of the date of this prospectus, we had approximately 43,913,660 shares of common stock outstanding. VSS-Cambium Holdings III, LLC, the selling stockholder in this offering, owns 24,338,024 shares of our common stock and also holds a warrant that is currently exercisable for up to 596,668 shares of our common stock and may become exercisable for more shares in the future. Moreover, the selling stockholder has a contractual right to purchase up to an additional 7,500,000 shares of common stock. If the selling stockholder decides to sell its shares of common stock being registered in this offering, exercise its right to purchase shares of our common stock or exercise its warrant, it could result in a reduction to the price of our common stock.

Forward-looking statements speak only as of the date they are made, and except for our ongoing obligations under the federal securities laws, we undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise or to update the reasons actual results could differ materially from those anticipated in these forward-looking statements.

Accordingly, you are cautioned that any such forward-looking statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Although we believe that the expectations reflected in such forward-looking statements are reasonable as of the date made, expectations may prove to have been materially different from the results expressed or implied by such forward-looking statements as it is impossible for us to anticipate all factor that could affect our actual results. **PLAN OF DISTRIBUTION**

We are registering the shares of common stock previously issued to permit the resale of these shares of common stock by the holders of the common stock from time to time after the date of this prospectus.

The selling stockholder may sell all or a portion of the shares of common stock beneficially owned by it and offered hereby from time to time directly or through one or more underwriters, broker-dealers or agents. If the shares of common stock are sold through underwriters or broker-dealers, the selling stockholder will be responsible for underwriting discounts or commissions or agent's commissions. The shares of common stock may be sold in one or more transactions at fixed prices, at prevailing market prices at the time of the sale, at varying prices determined at the time of sale, or at negotiated prices. These sales may be effected in transactions, which may involve crosses or block transactions,

on any national securities exchange or quotation service on which the securities may be listed or quoted at the time of sale;

in the over-the-counter market;

in transactions otherwise than on these exchanges or systems or in the over-the-counter market;

through the writing of options, whether such options are listed on an options exchange or otherwise;

ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

purchases by a broker-dealer as principal and resale by the broker-dealer for its account;

an exchange distribution in accordance with the rules of the applicable exchange;

privately negotiated transactions;

short sales;

sales pursuant to Rule 144;

broker-dealers may agree with the selling securityholders to sell a specified number of such shares at a stipulated price per share;

a combination of any such methods of sale; and

any other method permitted pursuant to applicable law.

If the selling stockholder affects such transactions by selling shares of common stock to or through underwriters, broker-dealers or agents, such underwriters, broker-dealers or agents may receive commissions in the form of discounts, concessions or commissions from the selling stockholder or commissions from purchasers of the shares of common stock for whom they may act as agent or to whom they may sell as principal (which discounts, concessions or commissions as to particular underwriters, broker-dealers or agents may be in excess of those customary in the types of transactions involved). In connection with sales of the shares of common stock or otherwise, the selling stockholder may enter into hedging transactions with broker-dealers, which may in turn engage in short sales of the shares of common stock in the course of hedging in positions they assume. The selling stockholder may also sell shares of common stock short and deliver shares of common stock covered by this prospectus to close out short positions and to return borrowed shares in connection with such short sales. The selling stockholder may also loan or pledge shares of common stock to broker-dealers that in turn may sell such shares.

The selling stockholder may pledge or grant a security interest in some or all of the shares of common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock from time to time pursuant to this prospectus or any amendment to this prospectus under Rule 424(b)(3) or other applicable provision of the Securities Act of 1933, as amended, amending, if necessary, the list of selling stockholders to include the pledgee, transferee or other successors in interest as selling stockholder under this prospectus. The selling stockholder also may transfer and donate the shares of common stock in other circumstances in which case the transferees, donees, pledgees or other successors in interest will be the selling beneficial owners for purposes of this prospectus.

The selling stockholder and any broker-dealer participating in the distribution of the shares of common stock may be deemed to be underwriters within the meaning of the Securities Act, and any commission paid, or any discounts or concessions allowed to, any such broker-dealer may be deemed to be underwriting commissions or discounts under the Securities Act. At the time a particular offering of the shares of common stock is made, a prospectus supplement, if required, will be distributed which will set forth the aggregate amount of shares of common stock being offered and the terms of the offering, including the name or names of any broker-dealers or agents, any discounts, commissions and other terms constituting compensation from the selling stockholder and any discounts, commissions or concessions allowed or re-allowed or paid to broker-dealers.

Under the securities laws of some states, the shares of common stock may be sold in such states only through registered or licensed brokers or dealers. In addition, in some states the shares of common stock may not be sold unless such shares have been registered or qualified for sale in such state or an exemption from registration or qualification is available and is complied with.

There can be no assurance that the selling stockholder will sell any or all of the shares of common stock registered pursuant to the resale registration statement, of which this prospectus forms a part.

The selling stockholder and any other person participating in such distribution will be subject to applicable provisions of the Securities Exchange Act of 1934, as amended, and the rules and regulations thereunder, including, without limitation, Regulation M of the Exchange Act, which may limit the timing of purchases and sales of any of the shares of common stock by the selling stockholder and any other participating person. Regulation M may also restrict the ability of any person engaged in the distribution of the shares of common stock to engage in market-making activities with respect to the shares of common stock. All of the foregoing may affect the marketability of the shares of common

stock and the ability of any person or entity to engage in market-making activities with respect to the shares of common stock.

We will pay all expenses of the registration of the shares of common stock, including, without limitation, Securities and Exchange Commission filing fees and expenses of compliance with state securities or "blue sky" laws; provided, however, that the selling stockholder will pay all underwriting discounts and selling

commissions, if any. We will indemnify the selling stockholder against liabilities, including liabilities under the Securities Act.
