AMERICAN TECHNICAL CERAMICS CORP. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
(In thousands, except per share data)

(1) BASIS OF PRESENTATION:

The accompanying unaudited interim consolidated financial statements of American Technical Ceramics Corp. and subsidiaries (the "Company") reflect all adjustments (consisting of normal recurring accruals) which are, in the opinion of management, necessary for a fair presentation of its consolidated financial position as of September 30, 2003, and the results of its operations for the three month periods ended September 30, 2003 and 2002. These consolidated financial statements should be read in conjunction with the summary of significant accounting policies and notes to consolidated financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended June 30, 2003. Results for the three month period ended September 30, 2003 are not necessarily indicative of results which could be expected for the entire year.

(2) IMPACT OF NEW ACCOUNTING STANDARDS:

On July 1, 2003, the Company elected to adopt Statement of Financial Accounting Standards No. 123, "Accounting for Stock Based Compensation" ("SFAS No. 123"), and to transition to a fair value-based method of accounting for stock-based employee compensation. The Company elected the prospective method for the transition as permitted by Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure" ("SFAS No. 148"). Under the prospective method, stock compensation expense will be recognized for any option grant or stock award granted on or after July 1, 2003 based upon the award's fair value. Outstanding stock options granted prior to July 1, 2003 will continue to be accounted for under the intrinsic value method. Stock compensation expense for new awards will be calculated using the

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Black-Scholes option pricing model to estimate fair value. The adoption of this standard will increase recognized stock compensation expense to the extent stock options or awards are granted after June 30, 2003. During the quarter ended September 30, 2003, the Company recorded \$1 of compensation expense for options granted after June 30, 2003.

In January 2003, the Financial Accounting Standards Board issued Interpretation No. 46, "Consolidation of Variable Interest Entities" ("FIN No. 46"). Previously, consolidation of variable interest entities was largely based on controlling voting rights. This interpretation clarifies the application of Accounting Research Bulletin No. 51, "Consolidated Financial Statements", to entities where the company is vulnerable to a majority of the entity's risk of loss or is entitled to receive a majority of the entity's residual returns even if there is no controlling voting interest. The Company will adopt the provisions of FIN No. 46 related to entities reporting prior to February 1, 2003, effective December 31, 2003. The Company is currently assessing the impact of the adoption of FIN No. 46 on its consolidated financial position and results of operations.

(3) SUPPLEMENTAL CASH FLOW INFORMATION:

During the three months ended September 30, 2003, the Company (i) granted deferred compensation stock awards with an aggregate value of \$41 with respect to which expense shall be recognized ratably throughout fiscal year 2004, (ii) granted stock options with respect to which compensation expense of \$46 will be recognized evenly over the next five years, and (iii) recognized \$116 in compensation expense (including \$44 relating to bonuses granted to defray taxes) in connection with the grant of stock awards totaling 12,250 shares of common stock.

	=====	=====

(7) INDEBTEDNESS:

The Company leases an administrative office, manufacturing and research and development complex located in Jacksonville, Florida (the "Jacksonville Facility") from a partnership controlled by the Company's President, Chief Executive Officer and principal stockholder under a capital lease. At June 30, 2003, the Jacksonville Facility has an aggregate cost of \$5,104 and a net book value of \$2,705. The lease is for a period of 30 years, was capitalized using an interest rate of 10.5% and expires on September 30, 2010. The lease provides for base rent of approximately \$719, per annum. The lease further provides for annual increases in base rent for years beginning after May 1, 1999, based on the increase in the Consumer Price Index ("CPI") since May 1, 1998 applied to base rent. The lease also provides for increases to the base rent in connection with any new construction at the Jacksonville Facility. Under the lease, upon any new construction being placed into use, the base rental is subject to increase to the fair market rental of the Jacksonville Facility, including the new construction. Effective October 1, 2003, the Company is obligated to pay approximately \$734 per annum under this lease. The payments due over the remaining seven years of this capital lease, including the portion related to interest, total approximately \$5,140.

7

AMERICAN TECHNICAL CERAMICS CORP. AND SUBSIDIARIES
 NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
 (In thousands, except per share data)

(8) STOCK-BASED COMPENSATION:

On April 1, 1997, the Board of Directors approved the American Technical Ceramics Corp. 1997 Stock Option Plan (the "1997 Option Plan") pursuant to which the Company may grant options to purchase up to 800,000 shares of the Company's common stock. On April 11, 2000, the Board of Directors approved the American Technical Ceramics Corp. 2000 Incentive Stock Plan (the "2000 Plan", and collectively with the 1997 Option Plan, the "Plans") pursuant to which the Company may grant options or stock awards covering up to 1,200,000 shares of the Company's common stock. Each of the Plans is administered by the Board of Directors or by a committee appointed by the Board. Options granted under the Plans may be either incentive or non-qualified stock options. The term of each incentive stock option shall not exceed ten years from the date of grant (five years for grants to employees who own 10% or more of the voting power of the Company's common stock). Options vest in accordance with a vesting schedule established by the plan administrator (traditionally 25% per year during the first four years of their term). Unless terminated earlier by the Board, the 1997 Option Plan will terminate on March 31, 2007, and the 2000 Plan will terminate on April 10, 2010.

Disposition of shares acquired pursuant to the exercise of incentive stock options under both Plans may not be made by the optionees within two years following the date that the option is granted, nor within one year after the exercise of the option, without the written consent of the Company. The Company measures compensation cost for options granted prior to July 1, 2003 pursuant to

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

	-----	-----
Net (loss)/income, as reported	\$ (783)	\$ 338
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects	63	3
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(487)	(402)
	-----	-----
Pro forma loss	\$ (1,207)	\$ (61)
(Loss)/income per share:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS
(In thousands, except per share data)

The following discussion and analysis should be read in conjunction with the consolidated financial statements, related notes and other information included in this Quarterly Report on Form 10-Q.

Statements in this Quarterly Report on Form 10-Q that are not historical fact may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All such forward-looking statements are subject to risks and uncertainties, including, but not limited to, market and economic conditions, the impact of competitive products, product demand and market acceptance risks, changes in product mix, costs and availability of raw materials, fluctuations in operating results, delays in development of highly complex products, risks associated with international sales and sales to the U.S. military, risk of customer contract or sales order cancellations and other risks detailed from time to time in the Company's filings with the Securities and Exchange Commission, including, without limitation, those contained under the caption "Item 1. BUSINESS - CAUTIONARY STATEMENTS REGARDING FORWARD - LOOKING STATEMENTS" in the Company's Annual Report on Form 10-K. These risks could cause the Company's actual results for future periods to differ materially from those expressed in any forward-looking statements made by, or on behalf of, the Company. Any forward-looking statement represents the Company's expectations or forecasts only as of the date it was made and should not be relied upon as representing its expectations or forecasts as of any subsequent date. The Company undertakes no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, even if its expectations or forecasts change.

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Overview

For more than the past two years the Company and the electronic components industry in general have been adversely affected by the economic downturn. Net sales reached their lowest point early in fiscal year 2002 and have only recovered modestly since then. The Company undertook cost reduction measures in the early part of the downturn to preserve the Company's cash while waiting for an economic recovery. During this period, sales have remained in a narrow range with no significant upswing. More recently, the Company has been taking measures designed to increase market share and further develop its business. The Company believes that these measures will lead to increased revenues when the economy rebounds. These efforts have led to selected additions to personnel which, in turn, impacts profitability.

The Company's results continue to reflect the short time horizons upon which customers are basing their orders. While historically the Company has not viewed its business as seasonal, the combination of the shortened ordering cycles and the vacation laden months of July and August impacted sales for the first quarter of fiscal year 2004. These ordering patterns are expected to continue for the foreseeable future. Accordingly, the Company's results could be adversely impacted during similar periods of reduced business activity in the future.

The Company has continued to develop its ability to respond to its customers needs quickly by identifying key products to stock in inventory for rapid delivery. Over the past year, the Company has added personnel in certain strategic areas in order to maintain and improve delivery times. The cost of the additional personnel is reflected in the expenses of the most recent quarters. The Company believes the faster delivery afforded to its customers creates goodwill and increased sales volume.

10

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

Finally, the price of palladium, a precious metal used in the Company's manufacture of capacitors, has declined significantly during the economic downturn. If palladium prices remain at current levels, it will have a positive impact on the Company's margins in quarters to follow.

RESULTS OF OPERATIONS

Three Months Ended September 30, 2003 Compared with Three Months Ended September 30, 2002

Net sales for the three months ended September 30, 2003 were \$12,549, essentially flat compared to \$12,487 in the comparable period in the prior fiscal year.

Gross margin for the three months ended September 30, 2003 was 23% of net sales, compared to 33% for the comparable period in the prior fiscal year. Gross margins decreased due to higher labor and overhead costs and lower precious metal recovery, partially offset by lower raw material costs. Labor and overhead expense increases primarily relate to increased headcount. As noted

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

above, the Company has recently added personnel and incurred other expenses in connection with its efforts to reduce lead times, improve market share and further develop its business in preparation for an upturn in the economy. Precious metal recovery decreased partially due to a lower amount of metal reclaimed, sending one less shipment of materials for recovery than during the comparable period last fiscal year, and the lower inventory carrying cost of palladium as compared to a year ago. The lower inventory carrying cost of palladium was also the primary reason for the decrease in raw material costs.

Selling, general and administrative expenses for the three months ended September 30, 2003 increased 8% to \$3,209, compared to \$2,962 in the comparable period in the prior fiscal year. The increase was primarily the result of salary increases, expansion of the Company's foreign sales office in China, and stock bonus awards, partially offset by lower professional fees.

Research and development expenses for the three months ended September 30, 2003 increased 6% to \$710, compared to \$669 in the comparable period in the prior fiscal year as a result of increased efforts to develop new products in response to customer needs and requests, and process improvements designed to enhance product performance and reduce costs.

Bookings for the three months ended September 30, 2003 were \$12,256, compared to \$12,233 for the three months ended September 30, 2002 and \$11,468 for the three months ended June 30, 2003. The improvement in sequential quarter bookings was due primarily to improved bookings in the military and wireless infrastructure markets.

The backlog of unfilled orders at September 30, 2003 was \$8,848, compared to \$9,035 at September 30, 2002 and \$9,129 at June 30, 2003. The backlog has remained essentially flat as customers continue to place orders with short delivery requirements.

As a result of the foregoing, net loss for the three months ended September 30, 2003 was \$783, or \$.10 per common share and per common share assuming dilution, compared to net income of \$338, or \$.04 per common share and per common share assuming dilution, for the comparable period in the prior fiscal year.

11

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

Three Months Ended September 30, 2002 Compared with Three Months Ended September 30, 2001

Net sales for the three months ended September 30, 2002 decreased 10% to \$12,487, compared to \$13,905 in the comparable period in the prior fiscal year. The decrease in net sales was primarily the result of decreased sales due to continued weakness in the telecommunication markets.

Gross margin for the three months ended September 30, 2002 was 33% of net sales, compared to 31% for the comparable period in the prior fiscal year. The increase in gross margin was principally due to lower labor and overhead costs as the result of cost reduction measures taken during fiscal year 2002. These measures included a reduction in headcount, reduced capital spending and

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

general cost controls on discretionary spending. Additionally, the Company wrote down certain inventory to net realizable value in the first quarter of fiscal year 2002. There were no significant inventory write-downs in the first quarter of fiscal year 2003.

Selling, general and administrative expenses for the three months ended September 30, 2002 decreased 2% to \$2,962, compared to \$3,021 in the comparable period in the prior fiscal year. The decrease was the result of the cost reduction measures implemented during fiscal year 2002 referred to above.

Research and development expenses for the three months ended September 30, 2002 decreased 21% to \$669, compared to \$852 in the comparable period in the prior fiscal year. A reduction in research and development spending was among the cost reduction measures referred to above. Additionally, certain costs for developing products and processes are now included in cost of sales to the extent these products and processes have entered into the production stage of their development.

Bookings for the three months ended September 30, 2002 were \$12,233, compared to \$10,157 for the three months ended September 30, 2001. Cancellations have returned to historical levels, but bookings remain low, particularly in the fiber optic and semiconductor manufacturing equipment sectors. Bookings improved in nearly all product lines as compared to the first quarter of fiscal year 2002 and have increased modestly in most product lines over the past three quarters.

The backlog of unfilled orders at September 30, 2002 was \$9,035, compared to \$12,545 at September 30, 2001 and \$9,310 at June 30, 2002. The decrease in backlog compared to September 30, 2001 is primarily the result of customers placing orders with shorter delivery requirements. During the early part of fiscal year 2002, the Company was still shipping orders from backlog that had accumulated months earlier.

As a result of the foregoing, net income for the three months ended September 30, 2002 was \$338, or \$.04 per common share and per common share assuming dilution, compared to net income of \$298, or \$.04 per common share and per common share assuming dilution, for the comparable period in the prior fiscal year.

12

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (CONTINUED) (In thousands, except per share data)

LIQUIDITY AND CAPITAL RESOURCES

The Company's financial position at September 30, 2003 remains strong as evidenced by working capital of \$31,252, and stockholders' equity of \$51,324. The Company's current ratio at September 30, 2003 was 7.4:1, compared to a current ratio of 7.3:1 at June 30, 2003. The Company's quick ratio was 3.7:1, at September 30, 2003 and June 30, 2003.

Cash, cash equivalents and investments decreased by \$365 to \$11,331 at September 30, 2003 from \$11,696 at June 30, 2003, primarily as a result of capital expenditures in excess of positive operating cash flows. Accounts receivable decreased by \$225 to \$6,496 at September 30, 2003 from \$6,721 at June 30, 2003, due to lower sales in the quarter ended September 30, 2003.

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

Inventories increased by \$192 to \$15,336 at September 30, 2003 from \$15,144 at June 30, 2003. Accounts payable and accrued expenses increased by \$209 to \$4,077 at September 30, 2003 from \$3,868 at June 30, 2003. Income taxes payable decreased by \$360 to \$422 at September 30, 2003 from \$782 at June 30, 2003 due to the effect of the net loss incurred in the first quarter.

The Company leases a facility in Jacksonville, Florida from a partnership controlled by the Company's President, Chief Executive Officer and principal stockholder under a capital lease. The rental payments under this lease have been adjusted several times, most recently as of October 2003, primarily to reflect fair market rental adjustments as a result of certain additions or improvements to the facility or annual increases based on the consumer price index as required by the terms of the lease. Each fair market rental adjustment has been based upon an independent appraisal of the fair market rental of the facility giving effect to the addition or improvement at issue. Effective October 1, 2003, the Company is obligated to pay approximately \$734 per annum under this lease. The payments due over the remaining seven years of this capital lease, including the portion related to interest, total approximately \$5,140.

Capital expenditures for the three months ended September 30, 2003 totaled \$868, including expenditures for machinery and equipment and planned leasehold improvements. The Company intends to use cash on hand to finance budgeted capital expenditures of approximately \$3,000 for the remainder of fiscal year 2004, primarily for equipment acquisitions.

Aggregate contractual obligations as of September 30, 2003 mature as follows:

Contractual Obligations	Payments Due by Period (in 000's)				
	Total	Less than 1 year	1- 3 years	4- 5 years	After 5 years
Bank Debt	\$ --	\$ --	\$ --	\$ --	\$ --
Capital Lease Obligations	3,559	364	1,350	1,165	680
Operating Leases	1,656	426	1,230	--	--
Total Contractual Obligations	\$ 5,215	\$ 790	\$ 2,580	\$ 1,165	\$ 680
	=====	=====	=====	=====	=====

The Company currently has no outstanding long-term bank debt or available committed lines of credit.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL
CONDITION AND RESULTS OF OPERATIONS (CONTINUED)
(In thousands, except per share data)

The Company routinely enters into binding and non-binding purchase obligations in the ordinary course of business, primarily covering anticipated

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

purchases of inventory and equipment. The terms of these commitments generally do not extend beyond six months. None of these obligations are individually significant. The Company does not expect that these commitments will materially adversely affect its liquidity in the foreseeable future.

CRITICAL ACCOUNTING POLICIES

The Securities and Exchange Commission (the "SEC") issued disclosure guidance for "critical accounting policies." The SEC defines "critical accounting policies" as those that require the application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods. The Company's significant accounting policies are described in Note 1 to its consolidated financial statements contained in its Annual Report on Form 10-K for the fiscal year ended June 30, 2003. The Company believes that the following accounting policies require the application of management's most difficult, subjective or complex judgments:

Allowances for Doubtful Accounts Receivable

The Company performs ongoing credit evaluations of its customers and adjusts credit limits based upon payment history and a customer's current creditworthiness, as determined by its review of the customer's current credit information. The Company continuously monitors collections and payments from its customers and maintains an allowance for estimated credit losses based upon its historical experience and any specific customer collection issues that the Company has identified. While such credit losses have historically been within the Company's expectations and the allowances established, the Company cannot guarantee that it will continue to experience the same credit loss rates that it has in the past. Should the financial position of its customers deteriorate resulting in an impairment of their ability to pay amounts due, the Company's revised estimate of such losses and any actual losses in excess of previous estimates may negatively impact its operating results.

Sales Returns and Allowances

In the ordinary course of business, the Company accepts returns of products sold for various reasons and grants sales allowances to customers. While the Company engages in extensive product quality control programs and processes, its level of sales returns is affected by, among other things, the quality of its manufacturing process. The Company maintains an allowance for sales returns and allowances based upon historical returns and allowances granted. While such returns and allowances have historically been within the Company's expectations, actual return and allowance rates in the future may differ from current estimates, which could negatively impact its operating results.

Inventory Valuation

Edgar Filing: AMERICAN TECHNICAL CERAMICS CORP - Form 10-Q

The Company values inventory at the lower of aggregate cost (first-in, first-out) or market. When the cost of inventory is determined by management to be in excess of its market value, such inventory is written down to its estimated net realizable value. This requires the Company to make estimates and assumptions about several factors (e.g., future sales quantities and selling prices, and percentage complete and failure rates for work in process) based upon historical experience and its projections for future periods. Changes in factors such as the level of order bookings, the product mix of order bookings and the Company's manufacturing processes could have a material impact on the Company's assessment of the net realizable value of inventory in the future.

Valuation of Deferred Tax Assets

The Company regularly evaluates its ability to recover the reported amount of its deferred income taxes considering several factors, including its estimate of the likelihood of the Company generating sufficient taxable income in future years during the period over which temporary differences reverse. Presently, the Company believes that it is more likely than not that it will realize the benefits of its deferred tax assets based primarily on its history of and projections for taxable income in the future, and its intention to carry back net operating losses to generate refunds of income taxes previously paid. In the event that actual results differ from its estimates or the Company adjusts these estimates in future periods, the Company may need to establish a valuation allowance against a portion or all of its deferred tax assets, which could materially impact its financial position or results of operations in future periods.

Valuation of Long-lived Assets

The Company assesses the recoverability of long-lived assets whenever the Company determines that events or changes in circumstances indicate that the carrying amount may not be recoverable. Its assessment is primarily based upon its estimate of future cash flows associated with these assets. The Company believes that the carrying amount of its long-lived assets is recoverable. However, should its operating results deteriorate, or anticipated new product launches not occur or not attain the commercial acceptance that the Company anticipates, the Company may determine that some portion of its long-lived assets are impaired. Such determination could result in non-cash charges to income that could materially affect its financial position or results of operations for that period.

INFLATION

The Company does not expect the effects of inflation to have a significant impact on its liquidity or results of operations.

IMPACT OF NEW ACCOUNTING STANDARDS

In December 2002, the Financial Accounting Standards Board issued SFAS No. 148 - an amendment of FASB Statement No. 123, which provides alternative methods of transition for a voluntary change to the fair value-based method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of FASB Statement 123 to require more prominent and more frequent disclosures in financial statements about the effects of stock-based compensation. The Company adopted the disclosure provisions of SFAS No. 148 effective, January 1, 2003. The Company continued to apply the intrinsic value-based method to account for stock options through fiscal year 2003.

On July 1, 2003, the Company elected to adopt SFAS No. 123 and to transition to a fair value-based method of accounting for stock-based employee compensation. The Company elected the prospective method for the transition as permitted by SFAS 148. Under the prospective method, stock compensation expense for new awards will be recognized for any new option grants or stock awards granted on or after July 1, 2003 based upon the award's fair value. Outstanding stock options granted prior to July 1, 2003 will continue to be accounted for under the intrinsic value method. Stock compensation expense for new awards will be calculated using the Black-Scholes option pricing model to estimate fair value. The adoption of this standard will increase recognized stock compensation expense to the extent stock options or awards are granted after June 30, 2003. In the quarter ended September 30, 2003, the Company recorded \$1 of stock compensation expense related to stock options granted during the quarter.

In January 2003, the Financial Accounting Standards Board issued FIN No. 46. Previously, consolidation of variable interest entities was largely based on controlling voting rights. This interpretation clarifies the application of Accounting Research Bulletin No. 51, "Consolidated Financial Statements", to entities where the company is vulnerable to a majority of the entity's risk of loss or is entitled to receive a majority of the entity's residual returns even if there is no controlling voting interest. The Company will adopt the provisions of FIN No. 46 related to entities reporting prior to February 1, 2003, effective December 31, 2003. The Company is currently assessing the impact of the adoption of FIN No. 46 on its consolidated financial position and results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's market risk exposure at September 30, 2003 is consistent with the types of market risk and amount of exposures, including foreign currency exchange rate, commodity price and security price risks, presented in its Annual Report on Form 10-K for the fiscal year ended June 30, 2003.
