Intelligent Systems Corporation
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Throughout this report, the terms we, us, ours, ISC and company refer to Intelligent Systems Corporation, including its subsidiaries.
2. The unaudited condensed consolidated financial statements presented in this Form 10-QSB have been prepared in accordance with accounting principles generally accepted in the United States applicable to interim financial statements. Accordingly, they do not include all of the information and notes required for complete financial statements. In the opinion of ISC management, these consolidated financial statements contain all adjustments (which comprise only normal and recurring accruals) necessary to present fairly the financial position and results of operations as of and for the three and nine month periods ended September 30, 2004 and 2003. The interim results for the three and nine months ended September 30, 2004 are not necessarily indicative of the results to be expected for the full year. These statements should be read in conjunction with our consolidated financial statements and notes thereto for the fiscal year ended December 31, 2003, as filed in our annual report on Form 10-K.
3. *Sale of Investment in Cirronet, Inc.* On May 10, 2004, we sold 1,340,990 shares of common stock of Cirronet, Inc., representing all of the Cirronet stock held by us, in a private transaction for an aggregate price of \$1,073,000, paid in cash at the closing. We recognized a gain of \$256,000 on the transaction in the quarter ended June 30, 2004, on a carrying value of \$817,000 and an original cost basis of \$525,000. This gain is included in year-to-date investment income (loss) on the Consolidated Statement of Operations.
4. *Write-down of Ardext Technologies, Inc.* In the quarter ended June 30, 2004, we wrote down the carrying value of our investment in Ardext Technologies, Inc. We recorded a charge of \$465,000 against long-term investments and \$162,000 against notes and interest receivable. In the quarter ended September 30, 2004, we reserved an additional \$12,000 for a total investment write-off of \$639,000. Although Ardext has a promising technology and is making progress in semiconductor customer trials of its initial software products, the company's timetable to and ability to fund operations to breakeven is difficult to predict. Accordingly, we believe it is unlikely we will recover our investment and accordingly have reserved against the full carrying value.
5. *Sale of Principal Asset of ISC Guernsey, Ltd.* We own a 19 percent interest in ISC Guernsey, Ltd., an entity whose principal asset was an investment in a U.K. based company. During the second quarter of 2004, we were informed that ISC Guernsey sold its investment in the U.K. company for cash and that it expected to distribute a significant portion of the proceeds to its shareholders in the future, after determining its ongoing business needs. In August 2004, we received an initial cash distribution of \$1,567,000 which is reflected in investment income in the three and nine-month periods ended September 30, 2004. Based on information we have received from ISC Guernsey, other distributions to us are likely to follow later in 2004 or early in 2005 and are expected to aggregate between \$2.0 and \$3.0 million. However, we are not in a position to exert influence over the timing or extent of such distributions. At September 30, 2004, the carrying value of our minority owned investment in ISC Guernsey is \$31,000. Based on our current projections, we do not expect to have any tax withholdings or to incur a tax liability related to these cash distributions.
6. *Deferred Gain on Sale of RF Solutions, Inc.* On September 28, 2004, we received 47,025 shares of common stock of Anadigics, Inc., a publicly traded company [NASDAQ:ANAD] as additional consideration related to the sale in March 2003 of our interest in RF Solutions, Inc. to Anadigics. At the time of the original sale, we wrote down the carrying value of our interest in RF Solutions to zero due to the uncertainty of any additional consideration receivable. Upon receipt of the shares of Anadigics stock, we recorded investment income of \$174,000 in the third quarter of 2004 and are carrying the stock at its fair market value of \$161,000 at September 30, 2004 in accordance

with Statement of Financial Accounting Standards No. 115 , Accounting for Certain Investments in Debt and Equity Securities .

7. *Settlement of Legal Matters* As explained in Part II, Item 1 Legal Matters of this report, during the quarter ended September 30, 2004, an agreement was reached in certain litigation matters relating to ownership of ChemFree patents. ChemFree secured a full assignment of interests in all of ChemFree s patents and patent applications worldwide (41 in the aggregate) from a former consultant of the company in return for periodic payments over a five year period. The payment schedule provides for four monthly payments of \$25,000, beginning August 1, 2004, and 48 monthly payments of \$8,500 beginning in August 1, 2005 for an aggregate consideration of \$508,000 (\$451,000 discounted at 6.5%). In accordance with Statement of Financial Accounting Standards No. 142, Accounting for Intangible Assets , we believe that the present value of the payment stream (\$451,000) is fully recoverable at this time. Based on our current estimations, we believe the average useful life of these patents to be 10 years, which does not exceed legal lives. In the

Page 5

Table of Contents

quarter ended September 30, 2004, amortization expense related to this asset was \$3,670. The unamortized value of the ChemFree patents is included in the category other intangibles, net on the balance sheet at September 30, 2004.

8. *Related Party Transaction* As previously disclosed in a Form 8-K filed on May 11, 2004, the lease on our headquarters and primary facility at 4355 Shackleford Road, Norcross, Georgia expired May 31, 2004. The current landlord was unwilling to renew this lease and had instead expressed a desire to sell the facility. On June 1, 2004, ISC Properties, LLC, an entity controlled by our Chairman and Chief Executive Officer, J. Leland Strange, purchased the facility from the current landlord and leased approximately 45 percent of the facility to the company in order to allow us to stay in the present facility and to avoid the disruption and expense of a move. After careful consideration, the company's Board of Directors concluded that the lease transaction was fair to the company and in the best interests of the company and its shareholders, and approved the lease transaction between the company and ISC Properties, LLC effective June 1, 2004. Mr. Strange recused himself from deliberations concerning, and voting to approve, the lease transaction. In connection with this approval, the Board of Directors waived the conflict of interest provisions of our Code of Ethics as they apply to Mr. Strange in connection with the lease transaction. We also evaluated the arrangement to determine if ISC Properties, LLC should be considered a Variable Interest Entity (VIE) within the guidance of Financial Accounting Standards Board FIN No. 46. After carefully considering the characteristics of the relationship between the company and ISC Properties, LLC, it was determined that ISC Properties, LLC did not meet the criteria of a VIE and, as a result, ISC Properties, LLC is not consolidated with the company.
9. *Comprehensive Loss* In accordance with Financial Accounting Standards Board Statement No. 130, Reporting Comprehensive Income , comprehensive loss is the total of net loss and all other non-owner changes in equity in a period. A summary follows:

Consolidated Statements of Comprehensive Loss (unaudited, in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Net income (loss)	\$ 5,016	\$ (2,396)	\$ 1,992	\$ (3,629)
Other comprehensive income (loss):				
Foreign currency translation adjustment	2	(7)	(18)	(27)
Unrealized gain (loss) on available-for-sale securities	(13)	26	(13)	64
Comprehensive income (loss)	\$ 5,005	\$ (2,377)	\$ 1,961	\$ (3,592)

10. *Concentration of Revenue* The following table indicates the percentage of consolidated revenue represented by each customer for any period in which such customer represented more than 10% of consolidated revenue.

(unaudited, in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003

ChemFree Customer C				10%
Visaer Customer D	72%		41%	
Visaer Customer E		16%		14%
	<hr/>	<hr/>	<hr/>	<hr/>

11. *Stock-Based Compensation* At September 30, 2004, we had two stock-based compensation plans. We account for the plans under the intrinsic value recognition and measurement principles of Accounting Principles Board (APB) No. 25, Accounting for Stock Issued to Employees, and related interpretations. The intrinsic value recognition is measured by the difference between the exercise price and the market value of the underlying securities. Based on the additional disclosure requirements of Statement of Financial Accounting Standards (SFAS) No. 148, Accounting for Stock-Based Compensation Transition and Disclosure an Amendment to SFAS No. 123 , the following table illustrates the effect of net income and earnings (loss) per share if we had applied the fair value recognition provisions of SFAS No. 123, Accounting for Stock Based Compensation .

Table of Contents

(unaudited, in thousands, except per share data)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003

Pro forma net income (loss) per common share diluted	<u>\$ 1.09</u>	<u>\$ (0.53)</u>	<u>\$ 0.43</u>	<u>\$ (0.81)</u>

12. *New Accounting Pronouncements* In March 2004, the Emerging Issues Tax Force reached a consensus on Issue No. 03-16, *Accounting for Investments in Limited Liability Companies*. The consensus requires an investment in a Limited Liability Company (LLC) that maintains a specific ownership account for each investor be viewed as similar to an investment in a limited partnership for the purposes of determining whether a noncontrolling investment in an LLC should be accounted for using the cost method or equity method of accounting. The consensus was effective in the quarter beginning after June 15, 2004. The implementation of this consensus did not have a material impact on our financial position or results of operations.
13. *Commitments and Contingencies* In May 2004, our QS Technologies subsidiary was awarded a \$1.1 million, multi-year software contract with a state agency that required a performance bond for 10 percent of the contract value. No revenue has yet been recognized on this contract. To secure the performance bond, we agreed to guarantee the \$115,000 value of the bond in the event that QS Technologies defaults on the contract. Initially, we secured the guarantee with a bank Certificate of Deposit in the amount of \$115,000. In July 2004, we substituted a standby letter of credit that is tied to our \$1.5 million bank line of credit for the CD and converted the CD into unrestricted cash. Based on the successful performance record of QS Technologies over a twenty-year period, we do not presently believe the guarantee will be paid; thus no amount has been accrued with respect to this guarantee.
14. *Industry Segments* Our consolidated subsidiaries are involved in two industry segments: Information Technology products and services, and Industrial Products. Operations in Information Technology products and services include development and sales of software licenses and related professional services and software maintenance contracts provided through three subsidiaries: QS Technologies, Inc., VISaer, Inc., and CoreCard Software, Inc. Operations in the Industrial Products segment include the manufacture and sale of bio-remediating parts washing systems by our ChemFree Corporation subsidiary. Total revenue by industry segment includes sales to unaffiliated customers. Sales between our industry segments are not material. Operating profit (loss) is total

revenue less operating expenses. None of the corporate overhead expense is allocated to the individual industry segments. Identifiable assets by industry segment are those assets that are used in our subsidiaries in each industry segment. Corporate assets are principally cash, notes receivable and investments.

Table of Contents

The table following contains segment information for the three and nine months ended September 30, 2004 and 2003.

Item 2. Management's Discussion and Analysis or Plan of Operations

In addition to historical information, this Form 10-QSB may contain forward-looking statements relating to ISC. All statements, trend analysis and other information relative to markets for our products and trends in revenue, gross margins and anticipated expense levels, as well as other statements including words such as anticipate, believe, plan, estimate, expect, and intend, and other similar expressions, constitute forward-looking statements. Prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements including those factors described below under Factors That May Affect Future Performance. ISC undertakes no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes in future operating results.

For purposes of this discussion and analysis, we are assuming and relying upon the reader's familiarity with the information contained in Item 7, Management's Discussion and Analysis, in ISC's Form 10-K for the year ended December 31, 2003 as filed with the Securities and Exchange Commission.

Overview

Our consolidated subsidiaries operate in two industry segments: Information Technology Products and Services and Industrial Products. Included in the Information Technology sector are QS Technologies, Inc. (software for public health and human services), VISaer, Inc. (software for maintenance, repair and overhaul operations in the commercial aviation industry) and CoreCard Software, Inc. (software for managing credit and debit cards). The Industrial Products segment includes ChemFree Corporation (bio-remediating parts washers).

We derive our product revenue from sales of software licenses in our Information Technology sector and sales and leases of equipment and supplies in our Industrial Products sector. Our service revenue consists of fees for implementation, consulting, training, maintenance and support for software products in our Information Technology sector. Our consolidated revenue is the aggregate of the revenue generated at our four subsidiary companies. Our revenue fluctuates from period to period and our results are not necessarily indicative of the results to be expected in future periods. Period-to-period comparisons may not be meaningful and it is difficult to predict the level of consolidated revenue on a quarterly or annual basis for a number of reasons, including the following:

A change in revenue level at one of our subsidiaries may impact consolidated revenue or be offset by an opposing change at another subsidiary.

Economic and marketplace trends may impact our subsidiaries differently or not at all and two of our software subsidiaries have very limited experience in their marketplaces which makes it difficult to identify and evaluate trends that may impact their business.

Two of our software subsidiaries, CoreCard Software and VISaer, have been involved in major new product development initiatives for the past three years and have limited experience delivering and installing their new products at customer sites, making it difficult to predict with certainty when they will recognize revenue on individual software contracts.

Our subsidiaries are relatively small in revenue size and, in the Information Technology sector, license revenue at a subsidiary in a given period may consist of a relatively small number of contracts. Consequently, even small delays in a subsidiary's delivery under a software contract (which may be out of its control) could have a significant and unpredictable impact on consolidated revenue that we can recognize in a given quarterly or annual period.

The third quarter 2004 results include \$7.4 million of revenue and approximately \$4.9 million in profit contribution related to our VISAer subsidiary's completion of a significant multi-year software contract. Although the contract had been completed in the quarter ended June 30, 2004, recognition of revenue was deferred until the third quarter of 2004 due to the delivery in July 2004 of a then optional specified upgrade right in the contract. Recognition of this revenue had a significant positive impact on the company's result of operations for the third quarter ended September 30, 2004. It is unlikely that VISAer or any of the company's subsidiaries will have another contract of the same size in the foreseeable future.

Frequently we recognize consolidated operating losses on a quarterly and annual basis and are likely to do so in the future from time to time. Our operating expenses consist of the aggregate of our four subsidiaries' expenses and the corporate office expenses. Our ChemFree and QS Technologies subsidiaries usually generate an operating profit on an annual basis but our early stage subsidiaries, VISAer and CoreCard, may not, mainly due to significant research and development expense that is invested to complete their new product offerings and the deferral of revenue recognition until such products are delivered to and accepted by customers. Depending upon the size and number of software licenses recognized in a

Table of Contents

particular period and the level of expenses incurred to support development and sales activities, our subsidiaries may report operating profits on an irregular basis as they build their customer base. A significant portion of our subsidiaries expense is related to personnel. We continually evaluate and strive to balance our financial resources with the resources required to complete products under development and support our subsidiaries' customers. For these and other reasons, our operating profits or losses may vary from quarter to quarter and at the present time are generally not predictable with any degree of certainty.

We also frequently generate income or losses from other sources and we may do so from time to time in the future. Occasionally we derive income from sales of holdings in affiliate and other minority-owned companies or we record a charge if we believe the value of a non-consolidated company is impaired. We also recognize on a quarterly basis our pro rata share of the income or losses of affiliate companies accounted for by the equity method. The timing and amount of gain or loss recognized as a result of a sale or the amount of equity in the income or losses of affiliates generally are not under our control and are not necessarily indicative of future results, either on a quarterly or annual basis. For instance, as explained in Notes 3 and 4 to the financial statements, in the quarter ended June 30, 2004, we recognized a gain of \$256,000 on the unsolicited sale of our holdings in Cirronet, Inc. and also wrote down the value of our holdings in ArdeX Technologies, Inc. by \$627,000 yielding a net investment loss of \$371,000 for the quarter. Neither of these events was predictable by us as to amount or timing with any degree of confidence in advance. Similarly, as explained in Note 5 to the financial statements, our 19 percent interest in ISC Guernsey Ltd., which is carried at \$31,000 as of September 30, 2004, resulted in a cash distribution of \$1.57 million received in the third quarter ended September 30, 2004 and additional cash distributions aggregating between \$2.0 million and \$3.0 million are expected. However, in accordance with GAAP, cost basis investments are not written up for expected cash distributions because we do not exert any control over ISC Guernsey. As such we record the positive financial impact of these cash distributions when ISC Guernsey actually makes cash distributions from the proceeds of its asset sale to us. Based on our current projections, we do not expect to have any tax withholdings or to incur a tax liability related to these cash distributions.

The net income of \$5.0 million earned by the company in the third quarter of 2004 resulted in positive stockholders equity of \$3.0 million as of September 30, 2004 compared to negative stockholders' equity of \$2.0 million at June 30, 2004. This negative equity position related to operating losses and deferral of the VISAer software contract in the first half of 2004 was a very short-term situation that was rectified in July 2004 with the recognition of the VISAer contract.

In recent years, most of our cash has been generated on an irregular basis from sales of our investments in early stage technology companies. We have used a significant amount of the cash received from these sales to support the operations of our CoreCard Software and VISAer subsidiaries. We do not expect the same level of cash investment in the future in these two entities and presently believe that customer payments on existing and pending software contracts will be sufficient to fund most of the expenses of VISAer's operations and a growing portion of CoreCard's expenses. If the business or cash flow of either subsidiary does not develop as anticipated, we would expect to reduce the personnel and overhead expenses to align their cost structure with their business resources and prospects.

Results of Operations

The following discussion should be read in conjunction with the Consolidated Financial Statements and the Notes to Consolidated Financial Statements presented in this quarterly report.

Revenue Total revenue in the three and nine month periods ended September 30, 2004 was \$10,416,000 and \$18,371,000, a 279 percent and 110 percent increase, respectively, compared to the same periods in 2003. Revenue from products, which includes sales of equipment in our Industrial Products segment as well as software license fees related to the Information Technology segment, was \$4,291,000 and \$9,303,000 in the three and nine month periods of 2004, representing increases of 148 percent and 78 percent, respectively, compared to the same periods in 2003.

The increase in product revenue in both periods is due mainly to the recognition of \$2,656,000 in software license revenue related to the VISAer contract with UPS. Additionally, the nine-month period ended September 30, 2004 includes \$1,377,000 in software license revenue at the CoreCard subsidiary due to completion of its first major customer installation in the first quarter of 2004. Revenue from ChemFree industrial products represented 31 percent and 50 percent of total product revenue in the three and nine month periods of 2004 compared to approximately 90 percent of product revenue in the three and nine month periods ended September 30, 2003. The change in percent of product revenue attributable to ChemFree products is due to the fact that the total revenue from ChemFree sales was slightly lower in the third quarter and approximately flat in the year-to-date periods in 2004 compared to the same periods last year. The decline in ChemFree revenue in the third quarter of 2004 reflects mainly lower unit volume sales in the domestic market of SmartWasher machines offset in part by increased revenue from leased machines and international sales.

Table of Contents

We do not expect that revenue and profit contribution from software licenses in the last quarter of 2004 or in the foreseeable future will approach that of the third quarter of 2004 since the multi-year VISAer software contract recognized in the third quarter was significantly larger than the average software sale at any of the software subsidiaries. At the end of September 30, 2004, we have \$4.7 million in net deferred revenue included on our balance sheet as a liability in the category of current deferred revenue that is expected to be recognized over the next 12 months. However, the specific timing of revenue recognition for software licenses is difficult to predict with certainty due to a number of factors such as acceptance criteria or scheduling delays due to customer changes in funding or program priorities.

Service revenue increased by 500 percent and 158 percent in the three and nine month periods ended September 30, 2004, respectively, compared to the same periods in 2003. The principal factor contributing to the increase in 2004 was a higher level of professional services and reimbursable expenses at the VISAer subsidiary related to the UPS contract. In addition, consolidated service revenue increased during the three and nine-month periods of 2004 as compared to the same periods in 2003 due to a more billable professional services and annual maintenance fees due to a larger installed base of software customers at all of the software subsidiaries.

Cost of Revenue In the three and nine month periods ended September 30, 2004, total cost of revenue was 37 percent and 39 percent, respectively, of consolidated revenue compared to 59 percent in each of the comparative periods in 2003.

Cost of product revenue was 25 percent of product revenue in the three month period ended September 30, 2004 compared to 50 percent in the corresponding three month period in 2003. Cost of product revenue was 31 percent of product revenue in the nine month period ended September 30, 2004 compared to 48 percent in the same period last year. The principal reason for the difference in the three and nine-month periods is due to the fact that software license revenue, which represented a significantly higher proportion of product revenue in 2004, has a much lower cost of sales than ChemFree industrial products, which represented almost 90 percent of product revenue in the three and nine-month periods of 2003 and which have an average cost of sales of approximately 52 percent.

Cost of service revenue (which relates to the software subsidiaries only) was 45 percent in the three month period ended September 30, 2004 compared to 74 percent in the corresponding period in 2003. For the nine month period ended September 30, 2004, cost of service revenue was 47 percent of service revenue compared to 74 percent of service revenue in the same period of 2003. The period-to-period decrease as a percentage of service revenue reflects mainly lower average cost allocable to the VISAer service revenue related to the UPS contract and more efficient utilization of professional services employees at the VISAer subsidiary, partially offset by a slight increase in year-to-date personnel costs at the QS Technologies subsidiary due to a larger installed base of customers requiring support and maintenance services.

Operating Expenses In the three and nine month periods ended September 30, 2004, total consolidated operating expenses decreased by ten percent and six percent, respectively, compared to the corresponding periods in 2003. Marketing expense declined by 11 percent and nine percent in the three and nine-month periods of 2004 compared to 2003 principally due to lower sales personnel costs at VISAer. General and administrative costs were 13 percent higher in the third quarter of 2004 but four percent lower year-to-date in 2004 compared to the corresponding periods in 2003. Of the \$113,000 increase in the third quarter, approximately \$54,000 relates to higher legal fees at ChemFree and the balance is due to higher facility rent and insurance expenses. Year-to-date, the decline of \$113,000 includes lower amortization and personnel expenses at VISAer and QS Technologies offset in part by increased legal fees at ChemFree and higher rent expenses. Research and development expenses were 19 percent and six percent lower in the three and nine month periods ended September 30, 2004 compared to the same periods last year. Most of the decline is due to lower personnel costs reflecting fewer employees at VISAer and CoreCard and more use of lower cost testing personnel at the CoreCard's offshore subsidiary.

Investment Income In the three and nine month periods ended September 30, 2004, we recorded net investment income \$1,728,000 and \$1,357,000, respectively. In the three and nine month periods, investment income includes \$1,567,000 related to the ISC Guernsey distribution and \$174,000 related to the deferred gain on the RF Solutions sale, as described in more detail in Notes 5 and 6, respectively, to the financial statements. In the year-to-date period of 2004, the net investment income also includes an investment gain of \$256,000 on the sale of our Cirronet stock offset by a write-down of our investment and notes receivable totaling \$639,000 related to Ardext Technologies, Inc., as more fully explained in Notes 3 and 4 to the financial statements. In the corresponding periods of 2003, we recorded an investment loss of \$24,000 and a net investment gain of \$3,645,000, respectively. Included in the year-to-date investment income in 2003 is income related to the settlement of an escrow fund in the first and second quarters of 2003 arising from the sale of our ownership interest in PaySys International, Inc., offset in part by a write-down in the first quarter of 2003 to reduce the carrying value of our

Table of Contents

investment in RF Solutions, Inc., as more fully explained in Note 3 to the consolidated financial statements in our Form 10-K for 2003.

Equity Earnings (Losses) of Affiliate Companies On a quarterly basis, we recognize our pro rata share of the earnings or losses of affiliate companies that we record on the equity method. We recorded \$46,000 and \$59,000 in net equity in income of affiliate companies in the three and nine month periods ended September 30, 2004, respectively, compared to \$80,000 and \$47,000 in net equity in income of affiliate companies in the corresponding periods in 2003. These results include our pro rata share of the net earnings and losses reported by five affiliate companies (Alliance Technology Ventures, CoreXpand, Riverside Software, Cirronet and Horizon Software) in 2004 and four affiliate companies (CoreXpand, Riverside Software, MediZeus, and Horizon Software) in 2003.

Other Income (Expense), Net We recorded \$33,000 in other expense and \$17,000 in other income in the three and nine month periods ended September 30, 2004, respectively, compared to other income of \$74,000 and \$288,000 in the corresponding periods in 2003. In the third quarter of 2004, the amount reflects foreign currency exchange losses. Year-to-date 2004 figures also include recognition of \$34,000 in deferred gain related to a VISAer product line sale in July 2000 and \$17,000 in other miscellaneous income, the majority of which relates to foreign currency exchange gains. In 2003, the year-to-date amounts include \$99,000 deferred gain related to the VISAer product line sale in July 2000, \$118,000 in foreign currency exchange gain and approximately \$71,000 in non-recurring miscellaneous income.

Income Taxes We did not accrue for any income tax liability in year-to-date 2004 because we currently estimate the company will not incur income tax liability in 2004 and we believe the deferred tax assets should be fully reserved given their character and our historical losses. The income tax benefit of \$104,000 recorded in 2003 reflects a refund of alternative minimum taxes paid by the VISAer subsidiary in a prior year.

Liquidity and Capital Resources

Our cash balance at September 30, 2004 was \$1,215,000 compared to \$1,133,000 at December 31, 2003. The company's principal uses of cash during the nine months ended September 30, 2004 were for corporate expenses of \$629,000, an increase of \$584,000 in accounts receivable mainly at the QS Technologies and ChemFree subsidiaries, \$125,000 to reduce the balance of the line of credit, and \$2,500,000 to support operations at the VISAer and CoreCard subsidiaries. Sources of cash included \$1,572,000 related to the distribution from ISC Guernsey, \$1,073,000 from the sale of our investment in Cirronet, Inc., a net increase of \$2,090,000 in current deferred revenue related to payments by customers for software licenses and annual software maintenance contracts for which the related revenue will be recognized within 12 months, offset by a reduction of \$206,000 in accrued payroll mainly for bonuses earned in 2003 and paid in 2004 and other minor items.

We have several near-term sources of cash to support any negative cash flow from consolidated operations, including the remaining cash distributions expected related to the ISC Guernsey transaction as explained in Note 5 to the financial statements and periodic draws against our bank line of credit, if needed. As of September 30, 2004, the outstanding balance on our line of credit was \$125,000 (which has been subsequently paid down to zero) and the current availability under the line of credit is \$1,385,000. Our bank line of credit was renewed in September 2004 on terms and conditions substantially the same as for the expiring line. We believe the anticipated cash distributions from the ISC Guernsey transaction and cash flow from consolidated operations will provide for our cash requirements for at least the next twelve months. In addition, if our subsidiaries' business operations or cash flows do not develop as anticipated, we would expect to reduce personnel and overhead expenses to align their cost structure with their business resources and prospects.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses. We consider certain accounting policies related to revenue recognition, valuation of acquired intangibles and impairment of long-lived assets, and valuation of investments to be critical policies due to the estimation processes involved in each. Management discusses its estimates and judgments with the Audit Committee of the Board of Directors. For a detailed description on the application of these and other accounting policies, see Note 1 to the Consolidated Financial Statements contained in our annual report on Form 10-K for the fiscal year ended December 31, 2003. Reference is also made to the discussion of the application of these critical accounting policies and estimates contained in Management's Discussion and Analysis in our annual report on Form 10-K for 2003. During the nine months

Table of Contents

ended September 30, 2004, there were no significant or material changes in the application of critical accounting policies that would require an update to the information provided in the Form 10-K for 2003.

Long-Term Contractual Obligations

We entered into a new five-year facility lease on our principal facility in Norcross, GA in June 2004 and our VISaer subsidiary entered into a new three year lease on its facility in Andover, MA in July 2004, both of which are included in the table below for our operating lease obligations. Additionally, in the quarter ended September 30, 2004, our ChemFree subsidiary reached a settlement with respect to two long-standing legal matters related to patent issues. The agreement provides for assignment of disputed patent rights to ChemFree in exchange for payments spread over a five year period aggregating \$508,000 as explained in more detail in Part II, Item 1 of this report. Payments totaling \$50,000 were made in the quarter ended September 30, 2004, payments totaling \$50,000 are due in the fourth quarter of 2004 and the remaining payments are due in equal monthly increments of \$8,500 beginning August 2005. We have no other long-term contractual obligations.

Payment Due By Period

Contractual Obligations (in thousands)	Payment Due By Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating Lease Obligations	\$ 2,300	\$ 157	\$ 1,586	\$ 557	
ChemFree Patent Payments	458	50	238	170	
Total	\$ 2,758	\$ 207	\$ 1,824	\$ 727	

Off-Balance Sheet Arrangements

We do not currently have any off balance sheet arrangements that are reasonably likely to have a current or future material effect on our financial condition, liquidity, capital expenditures or resources or results of operations.

Factors That May Affect Future Operations

Our operations are subject to risks and uncertainties that may negatively impact our future results of operations or projected cash requirements. It is difficult to predict future quarterly and annual results with any certainty mainly because several of our subsidiaries are early stage companies with limited revenue and experience in their respective markets, all are relatively small in size and, particularly for our software subsidiaries, revenue tends to be associated with fewer and larger sales than for our industrial products subsidiary. Thus any trend or delay that affects even one of our subsidiaries could have a negative impact on the company's consolidated results of operations or cash requirements on a quarterly or annual basis. In addition, the carrying value of our investments is impacted by a number of factors which are generally beyond our control since we are typically a non-control shareholder in a private company with limited liquidity. Among the numerous factors that may affect our consolidated results of operations or financial condition are the following:

Delays in software development projects which could cause our customers to delay implementations, delay

payments or cancel contracts, which would increase our costs and reduce our revenue.

Undetected software errors which may delay product releases, increase our costs, result in non-acceptance of our software by customers or delay revenue recognition.

Competitive pressures (including pricing, changes in customer requirements and preferences, and competitor product offerings) which may cause prospective customers to choose an alternative product solution, resulting in lower revenue and profits (or increased losses).

The inability of our CoreCard or VISAer subsidiaries to establish a base of referenceable customers for their new product offerings, resulting in lower revenue and profits (or increased losses), increased cash needs and possibly leading to restructuring or cutting back of the subsidiary's operations.

Failure of our products' specifications and features to achieve market acceptance.

Delays in anticipated customer payments for any reason which would increase our cash requirements and possibly our losses.

Declines in performance, financial condition or valuation of minority-owned companies which could cause us to write-down the carrying value of our investment or postpone an anticipated liquidity event, which could negatively impact our earnings and cash.

A reversal of the improving trend in the commercial aviation industry worldwide which could impact VISAer's short-term customer purchases, thus increasing its losses and need for cash.

Table of Contents

The relatively limited sales and marketing experience of our VISAer and CoreCard subsidiaries in their respective markets could cause them to misinterpret or fail to interpret or adjust to a trend in the market or to underestimate the sales cycle time frame.

In the Industrial Products market, failure by ChemFree to achieve anticipated growth in the European market or in the domestic national accounts and non-automotive markets for their products could cause lower than anticipated sales and profits.

An insufficient number of potential CoreCard customers decide to purchase and run an in-house software system and instead choose to outsource their account transaction processing which could result in low revenue, increased costs and greater cash requirements.

Budget reductions by state and local governments for information technology products that delay award of contracts or implementations for our QS Technologies subsidiary.

The recurrence of some incidence such as the SARS epidemic in 2003 that has a negative impact on the aviation industry, resulting in delays in contract awards and customer implementations similar to the unforeseen negative impact on cash and profits experienced by VISAer during the SARS epidemic.

A significant increase in the costs associated with audits, reviews and activities to comply with the provisions of the Sarbanes-Oxley Act of 2002, particularly with respect to Section 404.

Other general economic and political conditions, particularly those that may cause international business and domestic government customers to delay or cancel software purchase decisions.

Item 3. Controls and Procedures

As of the end of the period covered by this report, the company carried out an evaluation, under the supervision and with the participation of the company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the company's disclosure controls and procedures pursuant to Rule 13a-15(b) under the Exchange Act. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the company's disclosure controls and the procedures are effective. There were no changes in the company's internal controls over financial reporting or in other factors identified in connection with this evaluation that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Matters

During the quarter ended September 30, 2004, a court order was entered in the United States District Court for the Northern District of Georgia approving an agreement reached by the company's ChemFree subsidiary with a former consultant related to certain patent ownership matters that was the subject of a lawsuit pending in the Federal courts for a number of years. The agreement between the parties provided for assignment to ChemFree of all interests that the consultant may have had in all of ChemFree's patents and patent applications worldwide in return for periodic payments aggregating \$508,000 over five years and dismissal of a related lawsuit initiated by the consultant. Accordingly, on October 5, 2004, a mutual dismissal of the related lawsuit was entered in the Superior Court of Gwinnett County for the State of Georgia. The accounting treatment of this agreement relating to patent ownership is

explained in note 7 to the financial statements.

Item 6. Exhibits and Reports on Form 8-K

We filed the following reports on Form 8-K during the quarter ended September 30, 2004:

Form 8-K filed on August 10, 2004 furnishing a press release on August 9, 2004 announcing our financial results for the three month period ended June 30, 2004.

The following exhibits are filed or furnished with this report:

- 3(i) Amended and Restated Articles of Incorporation of the Registrant dated November 14, 1991, as amended November 25, 1997. (Incorporated by reference to Exhibit 3.1 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 1991 and to Exhibit 3.1 to the Registrant's Report on Form 8-K dated November 25, 1997.)
- 3(ii) Bylaws of the Registrant dated June 6, 1997. (Incorporated by reference to Exhibit 3(ii) of the Registrant's Form 10-K/A for the year ended December 31, 1997.)

Page 14
