Cumulus Media Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State of Incorporation)

36-4159663

(I.R.S. Employer Identification No.)

3280 Peachtree Road, N.W.

Suite 2300

Atlanta, GA 30305

(404) 949-0700

(Address, including zip code, and telephone number, including area code, of registrant's principal offices)

Securities Registered Pursuant to Section 12(b) of the Act:

None

Securities Registered Pursuant to Section 12(g) of the Act:

Class A Common Stock, par value \$.01 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes o No þ

Edgar Filing: CUMULUS MEDIA INC - Form 10-K

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer", and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's outstanding voting and non-voting common stock held by non-affiliates of the registrant as of June 29, 2007, the last business day of the registrant's most recently completed second fiscal quarter, was approximately \$403.7 million, based on 43,180,309 shares outstanding and a last reported per share price of Class A Common Stock on the NASDAQ Global Select Market of \$9.35 on that date. As of February 29, 2008, the registrant had outstanding 43,659,722 shares of common stock consisting of (i) 37,205,660 shares of Class A Common Stock; (ii) 5,809,191 shares of Class B Common Stock; and (iii) 644,871 shares of Class C Common Stock.

Documents Incorporated by Reference:

Portions of the registrant's Proxy Statement for the 2007 Annual Meeting of Stockholders, which will be filed with the Securities and Exchange Commission not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K, have been incorporated by reference in Part III of this Annual Report on Form 10-K.

PART I

Item 1. *Business*

Certain Definitions

In this Form 10-K the terms Company, Cumulus, we, us, and our refer to Cumulus Media Inc. and its consolidated subsidiaries.

We use the term local marketing agreement (LMA) in various places in this report. A typical LMA is an agreement under which a Federal Communications Commission (FCC) licensee of a radio station makes available, for a fee, air time on its station to another party. The other party provides programming to be broadcast during the airtime and collects revenues from advertising it sells for broadcast during that programming. In addition to entering into LMAs, we will from time to time enter into management or consulting agreements that provide us with the ability, as contractually specified, to assist current owners in the management of radio station assets that we have contracted to purchase, subject to FCC approval. In such arrangements, we generally receive a contractually specified management fee or consulting fee in exchange for the services provided.

We also use the term joint services agreement (JSA) in several places in this report. A typical JSA is an agreement that authorizes one party or station to sell another station's advertising time and retain the revenue from the sale of that airtime. A JSA typically includes a periodic payment to the station whose airtime is being sold (which may include a share of the revenue being collected from the sale of airtime).

Unless otherwise indicated:

we obtained total radio industry listener and revenue levels from the Radio Advertising Bureau (the RAB);

we derived historical market revenue statistics and market revenue share percentages from data published by Miller Kaplan, Arase & Co., LLP (Miller Kaplan), a public accounting firm that specializes in serving the broadcasting industry and BIA Financial Network, Inc. (BIA), a media and telecommunications advisory services firm;

we derived all audience share data and audience rankings, including ranking by population, except where otherwise stated to the contrary, from surveys of people ages 12 and over (Adults 12+), listening Monday through Sunday, 6 a.m. to 12 midnight, and based on the Fall 2006 Arbitron Market Report, referred to as Arbitron's Market Report, pertaining to each market; and

all dollar amounts are rounded to the nearest million, unless otherwise indicated.

The term Station Operating Income, is used in various places in this document. Station Operating income consists of operating income before non-cash contract termination costs, gain on assets sold/transferred to affiliate, depreciation and amortization, LMA fees, corporate general and administrative expenses (including non-cash stock compensation), restructuring credits, costs associated with pending merger charges and impairment charges. Station operating income is not a measure of performance calculated in accordance with accounting principles generally accepted in the United States (GAAP). Station Operating Income isolates the amount of income generated solely by our stations and assists management in evaluating the earnings potential of our station portfolio. In deriving this measure, we exclude non-cash contract termination costs as the charge will never represent a cash obligation to our station operations. We

exclude gain on sale of assets due to the nature of a non-repetitive transaction not being an actual measure of on-going station performance. We exclude depreciation and amortization due to the insignificant investment in tangible assets required to operate the stations and the relatively insignificant amount of intangible assets subject to amortization. We exclude LMA fees from this measure, even though it requires a cash commitment, due to the insignificance and temporary nature of such fees. Corporate expenses, despite representing an additional significant cash commitment, are excluded in an effort to present the operating performance of our stations exclusive of the corporate resources employed. We exclude costs associated with the pending merger due to the nature of a non-repetitive transaction not being an actual measure of on-going station performance. We believe this is important to our investors because it highlights the gross margin generated by our station portfolio. Finally, we exclude restructuring charges (credits) and impairment charges from the measure as they do not represent cash payments related to the operation of the stations.

Table of Contents

We believe that Station Operating Income is the most frequently used financial measure in determining the market value of a radio station or group of stations. Our management has observed that Station Operating Income is commonly employed by firms that provide appraisal services to the broadcasting industry in valuing radio stations. Further, in each of the more than 140 radio station acquisitions we have completed since our inception, we have used Station Operating Income as the primary metric to evaluate and negotiate the purchase price to be paid. Given its relevance to the estimated value of a radio station, we believe, and our experience indicates, that investors consider the measure to be extremely useful in order to determine the value of our portfolio of stations. We believe that Station Operating Income is the most commonly used financial measure employed by the investment community to compare the performance of radio station operators. Finally, Station Operating Income is one of the measures that our management uses to evaluate the performance and results of our stations. Management uses the measure to assess the performance of our station managers and our Board (the Cumulus Board of Directors) uses it to determine the relative performance of our executive management. As a result, in disclosing Station Operating Income, we are providing our investors with an analysis of our performance that is consistent with that which is utilized by our management and Board.

Station Operating Income is not a recognized term under GAAP and does not purport to be an alternative to operating income from continuing operations as a measure of operating performance or to cash flows from operating activities as a measure of liquidity. Additionally, Station Operating Income is not intended to be a measure of free cash flow available for dividends, reinvestment in our business or other management's discretionary use, as it does not consider certain cash requirements such as interest payments, tax payments and debt service requirements. Station Operating Income should be viewed as a supplement to, and not a substitute for, results of operations presented on the basis of GAAP. Management compensates for the limitations of using station operating income by using it only to supplement our GAAP results to provide a more complete understanding of the factors and trends affecting our business than GAAP results alone. Station Operating Income has its limitations as an analytical tool, and investors should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP.

Agreement and Plan of Merger

On July 23, 2007, we entered into an Agreement and Plan of Merger (the Merger Agreement) with Cloud Acquisition Corporation, a Delaware corporation (Parent), and Cloud Merger Corporation, a Delaware corporation and a wholly owned subsidiary of Parent (Merger Sub). Under the terms of the Merger Agreement, Merger Sub will be merged with and into the Company, with the Company continuing as the surviving corporation and a wholly owned subsidiary of Parent (the Merger). Parent and Merger Sub are owned by an investor group consisting of Lewis W. Dickey Jr., who also serves as our Chairman, President and Chief Executive Officer, his brother John W. Dickey, who also serves as our Executive Vice President and Co-Chief Operating Officer, certain other members of their family and MLGPE Fund US Alternative, L.P., an affiliate of Merrill Lynch Global Private Equity.

Pursuant to the Merger Agreement, Cumulus stockholders will receive cash for each share of the Company's common stock owned. In addition, each outstanding option to acquire the Company's common stock shall be entitled to receive in exchange for such option a cash payment equal to the number of shares of the Company's common stock underlying such option, multiplied by the amount (if any) by which the per share cash merger consideration exceeds the option exercise price without interest and less any applicable withholding taxes. Further, unless otherwise agreed between a holder and Parent, each outstanding share of restricted stock that is subject to vesting or other lapse restrictions, will vest and become free of restriction and will be canceled and converted into the right to receive the per share cash merger consideration without interest, and less any applicable withholding taxes.

The consummation of the merger is subject to shareholder approval, FCC approval, and other customary closing conditions.

Company Overview

We own and operate FM and AM radio station clusters serving mid-sized markets throughout the United States. Through our investment in Cumulus Media Partners, LLC (CMP), described below, we also operate radio

Table of Contents

station clusters serving large-sized markets throughout the United States. We are the second largest radio broadcasting company in the United States based on the number of stations owned or operated. According to Arbitron's Market Report and data published by Miller Kaplan, we have assembled market-leading groups or clusters of radio stations that rank first or second in terms of revenue share or audience share in substantially all of our markets. As of December 31, 2007, we owned and operated 303 radio stations in 56 mid-sized U.S. media markets and operated the 33 radio stations in 8 markets, including San Francisco, Dallas, Houston and Atlanta that are owned by CMP. Under an LMA, we currently provide sales and marketing services for one radio station in the U.S. in exchange for a management or consulting fee. In summary, we own and operate, directly or through our investment in CMP, a total of 336 stations in 64 U.S. markets.

Our Mid-Market Focus . . .

Historically, our strategic focus has been on mid-sized markets throughout the United States. Relative to the 50 largest markets in the United States, we believe that mid-sized markets represent attractive operating environments and generally are characterized by:

a greater use of radio advertising as evidenced by the greater percentage of total media revenues captured by radio than the national average;

rising advertising revenues, as the larger national and regional retailers expand into these markets;

small independent operators, many of whom lack the capital to produce high-quality locally originated programming or to employ more sophisticated research, marketing, management and sales techniques; and

lower overall susceptibility to economic downturns.

We believe the attractive operating characteristics of mid-sized markets, together with the relaxation of radio station ownership limits under the Telecommunications Act of 1996 (the Telecom Act) and FCC rules, have created significant opportunities for growth from the formation of groups of radio stations within these markets. We have capitalized on these opportunities to acquire attractive properties at favorable purchase prices, taking advantage of the size and fragmented nature of ownership in these markets and to the greater attention historically given to the larger markets by radio station acquirers. According to the FCC's records, as of September 30, 2007 there were 9,163 FM and 4,776 AM stations in the United States (the latest date for which data are available).

. . . and Our Large-Market Opportunities

Although our historical focus has been on mid-sized radio markets in the United States, we recognize that the large-sized radio markets currently provide an attractive combination of scale, stability and opportunity for future growth. According to BIA, these markets typically have per capita and household income, and expected household after-tax effective buying income growth in excess of the national average, which we believe makes radio broadcasters in these markets attractive to a broad base of radio advertisers, and allows a radio broadcaster to reduce its dependence on any one economic sector or specific advertiser. In recognition of this, in October 2005, we announced the formation of CMP, a private partnership created by Cumulus and affiliates of Bain Capital Partners LLC, The Blackstone Group and Thomas H. Lee Partners, L.P., and in May 2006 acquired the radio broadcasting business of Susquehanna Pfaltzgraff Co. (Susquehanna) for approximately \$1.2 billion. Prior to its acquisition by CMP, Susquehanna was the largest privately owned radio broadcasting company in the United States and the 11th largest radio station operator in terms of revenue. The group of stations CMP acquired consists of 33 radio stations in 8 markets: San Francisco, Dallas, Houston, Atlanta, Cincinnati, Kansas City, Indianapolis and York, Pennsylvania.

* * *

To maximize the advertising revenues and Station Operating Income of our stations, we seek to enhance the quality of radio programs for listeners and the attractiveness of our radio stations to advertisers in a given market. We also seek to increase the amount of locally originated programming content that airs on each station. Within each market, our stations are diversified in terms of format, target audience and geographic location, enabling us to attract larger and broader listener audiences and thereby a wider range of advertisers. This diversification, coupled

Table of Contents

with our competitive advertising pricing, also has provided us with the ability to compete successfully for advertising revenue against other radio, print and television media competitors.

We believe that we are in a position to generate revenue growth, increase audience and revenue shares within our markets and, by capitalizing on economies of scale and by competing against other media for incremental advertising revenue, increase our Station Operating Income growth rates and margins. Some of our markets are still in the development stage with the potential for substantial growth as we implement our operating strategy. In our more established markets, we believe we have several significant opportunities for growth within our current business model, including growth through maturation of recently reformatted or rebranded stations, and through investment in signal upgrades, which allow for a larger audience reach, for stations that were already strong performers.

We are a Delaware corporation, organized in 2002, and successor by merger to an Illinois corporation with the same name that had been organized in 1997.

Strategy

We are focused on generating internal growth through improvement in Station Operating Income for the portfolio of stations we operate, while enhancing our station portfolio and our business as a whole, through the acquisition of individual stations or clusters that satisfy our acquisition criteria.

Operating Strategy

Our operating strategy has the following principal components:

achieve cost efficiencies associated with common infrastructure and personnel and increase revenue by offering regional coverage of key demographic groups that were previously unavailable to national and regional advertisers;

develop each station in our portfolio as a unique enterprise, marketed as an individual, local brand with its own identity, programming content, programming personnel, inventory of time slots and sales force;

use audience research and music testing to refine each station's programming content to match the preferences of the station's target demographic audience, in order to enrich our listeners' experiences by increasing both the quality and quantity of local programming; and,

position station clusters to compete with print and television advertising by combining favorable advertising pricing with diverse station formats within each market to draw a larger and broader listening audience to attract a wider range of advertisers.

Acquisition Strategy

Our acquisition strategy has the following principal components:

assemble leading radio station clusters in mid-sized markets by taking advantage of their size and fragmented nature of ownership;

acquire leading stations where we believe we can cost-effectively achieve a leading position in terms of signal coverage, revenue or audience share and acquire under-performing stations where there is significant potential to apply our management expertise to improve financial and operating performance; and

reconfigure our existing stations, or acquire new stations, located near large markets, that based on an engineering analysis of signal specifications and the likelihood of receiving FCC approval, can be redirected, or moved-in, to those larger markets.

Acquisitions and Dispositions

Completed Acquisitions

We did not complete any acquisitions during 2007.

Table of Contents***Pending Acquisitions***

As of December 31, 2007, the Company had pending a swap transaction pursuant to which it would exchange one of its Fort Walton Beach, Florida radio stations, WYZB-FM, for another owned by Star Broadcasting, Inc., WTKE-FM. Specifically, the purchase agreement provided for the exchange of WYZB-FM plus \$1.5 million in cash for WTKE-FM. Following the filing of the assignment applications with the FCC, the applications were challenged by Quantum Communications, who has some radio stations in the market and complained to the FCC that the swap would give the company an unfair competitive advantage (because the station the Company would acquire reaches more people than the station the Company would be giving up). Quantum also initiated litigation in the United States District Court for the Southern District of Florida against the current owner of WTKE-FM, and secured a court decision that would require the sale of the station to Quantum instead of the Company. Although that decision is still subject to appeal, there is a possibility that the company will be unable to consummate the exchange it had proposed with the seller.

As of December 31, 2007, the Company had pending a swap transaction pursuant to which it would exchange its Canton, OH Station, WRQK-FM, for eight stations owned by Clear Channel in Ann Arbor, Michigan (WTKA-AM, WLBY-AM, WWWW-FM, WQKL-FM) and Battle Creek, Michigan (WBFN-AM, WBCK-FM, WBCK-AM and WBXX-FM). Two of the AM stations in Battle Creek, WBCK-AM and WBFN-AM, will be disposed of by the Company simultaneously with the closing of the swap transaction to comply with the FCC's broadcast ownership limits; WBCK-AM will be placed in a trust for the sale of the station to an unrelated third party and WBFN-AM will be transferred to Family Life Broadcasting System.

Completed Dispositions

On November 20, 2007, we completed the sale of our Caribbean stations to Gem Radio 5 Limited which purchased all the operations of our Caribbean stations for \$6.0 million. The transaction resulted in the recognition of a gain of approximately \$5.9 million. We recorded the gain within continuing operations within our consolidated statement of operations for the year ended December 31, 2007. The below table contains certain operating data related to the stations sold for the periods presented (the total net assets approximated \$0.1 million for these stations):

	2007	2006	2005
Net revenue	\$ 1,764	\$ 1,918	\$ 1,687
Total expense	1,338	1,396	1,281
Operating income	\$ 426	\$ 522	\$ 406

FCC FM Frequency Auctions

Periodically, the FCC makes FM frequencies available for acquisition through an auction process. On November 3, 2004, the FCC held an auction for approximately 290 frequencies. As of the close of the auction, we were the winning bidder for seven frequencies and were obligated to pay the FCC \$8.6 million for those frequencies. During 2005, the FCC granted the final authorization on and we completed the purchase of six of the seven frequencies won in the November 2004 auction. As of December 31, 2006, we had funded our obligation with the FCC and completed the purchase of the remaining frequency from the November 2004 auction during the first half of 2006.

On January 12, 2006, the FCC held a similar auction for approximately 171 frequencies, located mostly in smaller markets, in which we actively participated. As of the close of the auction, we were the winning bidder for one frequency and were obligated to pay the FCC \$1.6 million for that frequency. During 2006, the FCC granted the final authorization on the 2006 auction. This authorization will enable us to add a station to one of our existing markets once constructed.

Table of Contents

Acquisition Shelf Registration Statement

We have registered an aggregate of 20,000,000 shares of our Class A Common Stock, pursuant to registration statements on Form S-4, for issuance from time to time in connection with our acquisition of other businesses, properties or securities in business combination transactions utilizing a shelf registration process. As of February 29, 2008, we had issued 5,666,553 of the 20,000,000 shares registered in connection with various acquisitions.

Industry Overview

The primary source of revenues for radio stations is the sale of advertising time to local, regional and national spot advertisers and national network advertisers. National spot advertisers assist advertisers in placing their advertisements in a specific market. National network advertisers place advertisements on a national network show and such advertisements will air in each market where the network has an affiliate. During the past decade, local advertising revenue as a percentage of total radio advertising revenue in a given market has ranged from approximately 72% to 87% according to the RAB. The trends in radio advertising revenue mirrored fluctuations in the current economic environment, yielding mixed results over the last three years. In 2007, advertising revenues decreased 2%, the first decline in growth in six years after increasing 1% in 2006 and remaining flat in 2005.

Radio is considered an efficient, cost-effective means of reaching specifically identified demographic groups. Stations are typically classified by their on-air format, such as country, rock, adult contemporary, oldies and news/talk. A station's format and style of presentation enables it to target specific segments of listeners sharing certain demographic features. By capturing a specific share of a market's radio listening audience with particular concentration in a targeted demographic, a station is able to market its broadcasting time to advertisers seeking to reach a specific audience. Advertisers and stations use data published by audience measuring services, such as Arbitron, to estimate how many people within particular geographical markets and demographics listen to specific stations.

The number of advertisements that can be broadcast without jeopardizing listening levels and the resulting ratings are limited in part by the format of a particular station and the local competitive environment. Although the number of advertisements broadcast during a given time period may vary, the total number of advertisements broadcast on a particular station generally does not vary significantly from year to year.

A station's local sales staff generates the majority of its local and regional advertising sales through direct solicitations of local advertising agencies and businesses. To generate national advertising sales, a station usually will engage a firm that specializes in soliciting radio-advertising sales on a national level. National sales representatives obtain advertising principally from advertising agencies located outside the station's market and receive commissions based on the revenue from the advertising they obtain.

Our stations compete for advertising revenue with other terrestrial-based radio stations in the market (including low power FM radio stations that are required to operate on a noncommercial basis) as well as other media, including newspapers, broadcast television, cable television, magazines, direct mail, coupons and outdoor advertising. In addition, the radio broadcasting industry is subject to competition from services that use new media technologies that are being developed or have already been introduced, such as the Internet and satellite-based digital radio services. Such services reach nationwide and regional audiences with multi-channel, multi-format, digital radio services that have a sound quality equivalent to that of compact discs. Competition among terrestrial-based radio stations has also been heightened by the introduction of terrestrial digital audio broadcasting (which is digital audio broadcasting delivered through earth-based equipment rather than satellites). The FCC currently allows terrestrial radio stations like ours to commence the use of digital technology through a hybrid antenna that carries both the pre-existing analog signal and the new digital signal. The FCC is conducting a proceeding that could result in a radio station's use of two antennae: one for the analog signal and one for the digital signal.

We cannot predict how existing or new sources of competition will affect the revenues generated by our stations. The radio broadcasting industry historically has grown despite the introduction of new technologies for the delivery of entertainment and information, such as television broadcasting, cable television, audio tapes and compact discs. A growing population and greater availability of radios, particularly car and portable radios, have contributed to this growth. There can be no assurance, however, that the development or introduction in the future of

Table of Contents

any new media technology will not have an adverse effect on the radio broadcasting industry in general or our stations in particular.

Advertising Sales

Virtually all of our revenue is generated from the sale of local, regional and national advertising for broadcast on our radio stations. In 2007 and 2006, approximately 88% of our net broadcasting revenue was generated from the sale of local and regional advertising, and in 2005 89% of our broadcast revenue came from these sources. Additional broadcasting revenue is generated from the sale of national advertising. The major categories of our advertisers include:

automotive dealers	telecommunications	banking and mortgage
amusement and recreation	food and beverage services	arts and entertainment
healthcare services	food and beverage stores	furniture and home furnishings

Each station's local sales staff solicits advertising either directly from the local advertiser or indirectly through an advertising agency. We employ a tiered commission structure to focus our individual sales staffs on new business development. Consistent with our operating strategy of dedicated sales forces for each of our stations, we have also increased the number of salespeople per station. We believe that we can outperform the traditional growth rates of our markets by (1) expanding our base of advertisers, (2) training newly hired sales people and, (3) providing a higher level of service to our existing customer base. This requires a larger sales staffs than most of the stations employed at the time we acquired them. We support our strategy of building local direct accounts by employing personnel in each of our markets to produce custom commercials that respond to the needs of our advertisers. In addition, in-house production provides advertisers greater flexibility in changing their commercial messages with minimal lead-time.

Our national sales are made by Katz Communications, Inc., a firm specializing in radio advertising sales on the national level, in exchange for commission that is based on our net revenue from the advertising obtained. Regional sales, which we define as sales in regions surrounding our markets to buyers that advertise in our markets, are generally made by our local sales staff and market managers. Whereas we seek to grow our local sales through larger and more customer-focused sales staffs, we seek to grow our national and regional sales by offering to key national and regional advertisers groups of stations within specific markets and regions that make our stations more attractive. Many of these large accounts have previously been reluctant to advertise in these markets because of the logistics involved in buying advertising from individual stations. Certain of our stations had no national representation before we acquired them.

The number of advertisements that can be broadcast without jeopardizing listening levels and the resulting ratings are limited in part by the format of a particular station. We estimate the optimal number of advertisements available for sale depends on the programming format of a particular station. Each of our stations has a general target level of on-air inventory available for advertising. This target level of inventory for sale may vary at different times of the day but tends to remain stable over time. Our stations strive to maximize revenue by managing their on-air inventory of advertising time and adjusting prices up or down based on supply and demand. We seek to broaden our base of advertisers in each of our markets by providing a wide array of audience demographic segments across our cluster of stations, thereby providing each of our potential advertisers with an effective means of reaching a targeted demographic group. Our selling and pricing activity is based on demand for our radio stations' on-air inventory and, in general, we respond to this demand by varying prices rather than by varying our target inventory level for a particular station. Most changes in revenue are explained by some combination of demand-driven pricing changes and changes in inventory utilization rather than by changes in the available inventory. Advertising rates charged by radio stations, which are generally highest during morning and afternoon commuting hours, are based primarily on:

a station's share of audiences and on the demographic groups targeted by advertisers (as measured by ratings surveys);

the supply and demand for radio advertising time and for time targeted at particular demographic groups; and certain additional qualitative factors.

Table of Contents

A station's listenership is reflected in ratings surveys that estimate the number of listeners tuned into the station, and the time they spend listening. Each station's ratings are used by its advertisers and advertising representatives to consider advertising with the station and are used by Cumulus to chart audience growth, set advertising rates and adjust programming. The radio broadcast industry's principal ratings service is Arbitron, which publishes periodic ratings surveys for significant domestic radio markets. These surveys are our primary source of ratings data. We have an agreement with Arbitron that gives us access to Arbitron's ratings materials in a majority of our markets through April 2009.

Competition

The radio broadcasting industry is very competitive. The success of each of our stations depends largely upon its audience ratings and its share of the overall advertising revenue within its market. Our audience ratings and advertising revenue are subject to change, and any adverse change in a particular market affecting advertising expenditures or any adverse change in the relative market share of the stations located in a particular market could have a material adverse effect on the revenue of our radio stations located in that market. There can be no assurance that any one or all of our stations will be able to maintain or increase current audience ratings or advertising revenue market share.

Our stations compete for listeners and advertising revenues directly with other radio stations within their respective markets, as well as with other advertising media as discussed below. Radio stations compete for listeners primarily on the basis of program content that appeals to a particular demographic group. By building a strong brand identity with a targeted listener base consisting of specific demographic groups in each of our markets, we are able to attract advertisers seeking to reach those listeners. Companies that operate radio stations must be alert to the possibility of another station changing its format to compete directly for listeners and advertisers. Another station's decision to convert to a format similar to that of one of our radio stations in the same geographic area or to launch an aggressive promotional campaign may result in lower ratings and advertising revenue, increased promotion and other expenses and, consequently, lower our Station Operating Income.

Factors that are material to a radio station's competitive position include station brand identity and loyalty, management experience, the station's local audience rank in its market, transmitter power and location, assigned frequency, audience characteristics, local program acceptance and the number and characteristics of other radio stations and other advertising media in the market area. We attempt to improve our competitive position in each market by extensively researching and improving our stations' programming, by implementing advertising campaigns aimed at the demographic groups for which our stations program and by managing our sales efforts to attract a larger share of advertising dollars for each station individually. However, we compete with some organizations that have substantially greater financial or other resources than we do.

In 1996, changes in federal law and FCC rules dramatically increased the number of radio stations a single party can own and operate in a local market. Our management continues to believe that companies that elect to take advantage of those changes by forming groups of commonly owned stations or joint arrangements such as LMAs in a particular market may, in certain circumstances, have lower operating costs and may be able to offer advertisers in those markets more attractive rates and services. Although we currently operate multiple stations in each of our markets and intend to pursue the creation of additional multiple station groups in particular markets, our competitors in certain markets include other parties who own and operate as many or more stations than we do. We may also compete with those other parties or broadcast groups for the purchase of additional stations in those markets or new markets. Some of those other parties and groups are owned or operated by companies that have substantially greater financial or other resources than we do.

A radio station's competitive position can be enhanced by a variety of factors, including changes in the station's format and an upgrade of the station's authorized power. However, the competitive position of existing radio stations is protected to some extent by certain regulatory barriers to new entrants. The operation of a radio broadcast station requires an FCC license, and the number of radio stations that an entity can operate in a given market is limited. Under FCC rules that became effective in 2004, the number of radio stations that a party can own in a particular market is dictated largely by whether the station is in a defined Arbitron Metro (a designation designed by a private party for use in advertising matters), and, if so, the number of stations included in that Arbitron

Table of Contents

Metro. In those markets that are not in an Arbitron Metro, the number of stations a party can own in the particular market is dictated by the number of AM and FM signals that together comprise that FCC-defined radio market. For a discussion of FCC regulation (including recent changes), see Federal Regulation of Radio Broadcasting.

Our stations also compete for advertising revenue with other media, including low power FM radio stations (that are required to operate on a noncommercial basis), newspapers, broadcast television, cable and satellite television, magazines, direct mail, coupons and outdoor advertising. In addition, the radio broadcasting industry is subject to competition from companies that use new media technologies that are being developed or have already been introduced, such as the Internet and the delivery of digital audio programming by cable television systems, by satellite radio carriers, and by terrestrial-based radio stations that broadcast digital audio signals. The FCC has authorized two companies to provide a digital audio programming service by satellite to nationwide audiences with a multi-channel, multi-format and with sound quality equivalent to that of compact discs. The FCC has also authorized FM terrestrial stations like ours to use two separate antennae to deliver both the current analog radio signal and a new digital signal. The FCC is also exploring the possibility of allowing AM stations to deliver both analog and digital signals.

We cannot predict how new sources of competition will affect our performance and income. Historically, the radio broadcasting industry has grown despite the introduction of new technologies for the delivery of entertainment and information, such as television broadcasting, cable television, audio tapes and compact discs. A growing population and greater availability of radios, particularly car and portable radios, have contributed to this growth. There can be no assurance, however, that the development or introduction of any new media technology will not have an adverse effect on the radio broadcasting industry in general or our stations in particular.

We cannot predict what other matters might be considered in the future by the FCC or Congress, nor can we assess in advance what impact, if any, the implementation of any of these proposals or changes might have on our business.

Employees

At December 31, 2007, we employed approximately 3,300 people. None of our employees are covered by collective bargaining agreements, and we consider our relations with our employees to be satisfactory.

We employ various on-air personalities with large loyal audiences in their respective markets. On occasion, we enter into employment agreements with these personalities to protect our interests in those relationships that we believe to be valuable. The loss of one or more of these personalities could result in a short-term loss of audience share, but we do not believe that any such loss would have a material adverse effect on our financial condition or results of operations, taken as a whole.

We generally employ one market manager for each radio market in which we own or operate stations. Each market manager is responsible for all employees of the market and for managing all aspects of the radio operations. On occasion, we enter into employment agreements with market managers to protect our interests in those relationships that we believe to be valuable. The loss of a market manager could result in a short-term loss of performance in a market, but we do not believe that any such loss would have a material adverse effect on our financial condition or results of operations, taken as a whole.

Federal Regulation of Radio Broadcasting

General. The ownership, operation and sale of radio broadcast stations, including those licensed to us, are subject to the jurisdiction of the FCC, which acts under authority derived from the Communications Act of 1934, as amended (the Communications Act). The Telecom Act amended the Communications Act and directed the FCC to change certain of its broadcast rules. Among its other regulatory responsibilities, the FCC issues permits and licenses to

construct and operate radio stations; assigns broadcast frequencies; determines whether to approve changes in ownership or control of station licenses; regulates transmission equipment, operating power, and other technical parameters of stations; adopts and implements regulations and policies that directly or indirectly affect the ownership, operation and employment practices of stations; regulates the content of some forms of radio broadcast programming; and has the authority under the Communications Act to impose penalties for violations of its rules.

Table of Contents

The following is a brief summary of certain provisions of the Communications Act, the Telecom Act, and related FCC rules and policies (collectively, the Communications Laws). This description does not purport to be comprehensive, and reference should be made to the Communications Laws, public notices, and decisions issued by the FCC for further information concerning the nature and extent of federal regulation of radio broadcast stations. Failure to observe the provisions of the Communications Laws can result in the imposition of various sanctions, including monetary forfeitures and the grant of a short-term (less than the maximum term) license renewal. For particularly egregious violations, the FCC may deny a station's license renewal application, revoke a station's license, or deny applications in which an applicant seeks to acquire additional broadcast properties.

License Grant and Renewal. Radio broadcast licenses are generally granted and renewed for maximum terms of eight years. Licenses are renewed by filing an application with the FCC. Petitions to deny license renewal applications may be filed by interested parties, including members of the public. We are not currently aware of any facts that would prevent the renewal of our licenses to operate our radio stations, although there can be no assurance that each of our licenses will be renewed for a full term without adverse conditions.

Service Areas. The area served by AM stations is determined by a combination of frequency, transmitter power, antenna orientation, and soil conductivity. To determine the effective service area of an AM station, the station's power, operating frequency, antenna patterns and its day/night operating modes are required. The area served by an FM station is determined by a combination of transmitter power and antenna height, with stations divided into classes according to these technical parameters.

Class C FM stations operate with the equivalent of 100 kilowatts of effective radiated power (ERP) at an antenna height of up to 1,968 feet above average terrain. They are the most powerful FM stations, providing service to a large area, typically covering one or more counties within a state. Class B FM stations operate with the equivalent of 50 kilowatts ERP at an antenna height of up to 492 feet above average terrain. Class B stations typically serve large metropolitan areas as well as their associated suburbs. Class A FM stations operate with the equivalent of 6 kilowatts ERP at an antenna height of up to 328 feet above average terrain, and generally serve smaller cities and towns or suburbs of larger cities.

The minimum and maximum facilities requirements for an FM station are determined by its class. FM class designations depend upon the geographic zone in which the transmitter of the FM station is located. In general, commercial FM stations are classified as follows, in order of increasing power and antenna height: Class A, B1, C3, B, C2, C1, C0, and C.

Table of Contents

The following table sets forth the market, call letters, FCC license classification, antenna elevation above average terrain (for FM stations only), power and frequency of all owned and operated stations as of February 29, 2008, all pending station acquisitions operated under an LMA as of February 29, 2008, and all other announced pending station acquisitions as of February 29, 2008:

Regulatory Approvals. The Communications Laws prohibit the assignment or transfer of control of a broadcast license without the prior approval of the FCC. In determining whether to grant an application for assignment or transfer of control of a broadcast license, the Communications Act requires the FCC to find that the assignment or transfer would serve the public interest. The FCC considers a number of factors in making this determination, including (1) compliance with various rules limiting common ownership of media properties, (2) the financial and character qualifications of the assignee or transferee (including those parties holding an

Table of Contents

attributable interest in the assignee or transferee), (3) compliance with the Communications Act's foreign ownership restrictions, and (4) compliance with other Communications Laws, including those related to programming and filing requirements.

As discussed in greater detail below, the FCC may also review the effect of proposed assignments and transfers of broadcast licenses on economic competition and diversity. See Antitrust and Market Concentration Considerations.

We had two assignment applications, approved by the FCC, that currently are the subject of an application for review filed with the FCC by Quantum Communications. The applications involve the exchange of two of our FM stations in the Fort Walton Beach, Florida market for two other stations in that market. Quantum Communications has some radio stations in the market and has complained to the FCC that the swaps would give us an unfair competitive advantage (because the stations we would acquire reach more people than the station we would be giving up). Despite the pendency of Quantum's objection, we closed on one of the acquisitions (WPGG-FM). However Quantum initiated litigation in the United States District Court for the Southern District of Florida against the Seller with respect to the other station (WTKE-FM) and secured a court decision that would require the sale of the station to Quantum instead of us. Although that decision is still subject to appeal, there is a possibility that the Company will be unable to consummate one of the exchanges it had proposed with the seller. We cannot predict the final outcome of this matter, but we do not believe that any adverse decision will have a material adverse impact on our overall operations taken as a whole.

Ownership Matters. The Communications Act restricts us from having more than one-fourth of our capital stock owned or voted by non-U.S. persons, foreign governments or non-U.S. corporations. We are required to take appropriate steps to monitor the citizenship of our stockholders, such as through representative samplings on a periodic basis, to provide a reasonable basis for certifying compliance with the foreign ownership restrictions of the Communications Act.

The Communications Laws also generally restrict (1) the number of radio stations one person or entity may own, operate or control in a local market, (2) the common ownership, operation or control of radio broadcast stations and television broadcast stations serving the same local market, and (3) the common ownership, operation or control of a radio broadcast station and a daily newspaper serving the same local market.

None of these multiple and cross ownership rules requires any change in our current ownership of radio broadcast stations or precludes consummation of our pending acquisitions. The Communications Laws will limit the number of additional stations that we may acquire in the future in our existing markets as well as new markets.

Because of these multiple and cross ownership rules, a purchaser of our voting stock who acquires an attributable interest in us (as discussed below) may violate the Communications Laws if such purchaser also has an attributable interest in other radio or television stations, or in daily newspapers, depending on the number and location of those radio or television stations or daily newspapers. Such a purchaser also may be restricted in the companies in which it may invest to the extent that those investments give rise to an attributable interest. If one of our attributable stockholders violates any of these ownership rules, we may be unable to obtain from the FCC one or more authorizations needed to conduct our radio station business and may be unable to obtain FCC consents for certain future acquisitions.

The FCC generally applies its television/radio/newspaper cross-ownership rules and its broadcast multiple ownership rules by considering the attributable or cognizable interests held by a person or entity. With some exceptions, a person or entity will be deemed to hold an attributable interest in a radio station, television station or daily newspaper if the person or entity serves as an officer, director, partner, stockholder, member, or, in certain cases, a debt holder of a company that owns that station or newspaper. Whether that interest is attributable and thus subject to the FCC's

multiple ownership rules, is determined by the FCC's attribution rules. If an interest is attributable, the FCC treats the person or entity who holds that interest as the owner of the radio station, television station or daily newspaper in question, and that interest thus counts against the person in determining compliance with the FCC's ownership rules.

With respect to a corporation, officers, directors and persons or entities that directly or indirectly hold 5% or more of the corporation's voting stock (20% or more of such stock in the case of insurance companies, investment

Table of Contents

companies, bank trust departments and certain other passive investors that hold such stock for investment purposes only) generally are attributed with ownership of the radio stations, television stations and daily newspapers owned by the corporation. As discussed below, participation in an LMA or a JSA also may result in an attributable interest. See Local Marketing Agreements and Joint Sales Agreements.

With respect to a partnership (or limited liability company), the interest of a general partner is attributable, as is the interest of any limited partner (or limited liability company member) who is materially involved in the media-related activities of the partnership (or limited liability company). The following interests generally are not attributable: (1) debt instruments, non-voting stock, options and warrants for voting stock, partnership interests, or membership interests that have not yet been exercised; (2) limited partnership or limited liability company interests where (a) the limited partner or member is not materially involved in the media-related activities of the partnership or limited liability company, and (b) the limited partnership agreement or limited liability company agreement expressly insulates the limited partner or member from such material involvement by inclusion of provisions specified by the FCC; and (3) holders of less than 5% of an entity's voting stock. Non-voting equity and debt interests which, in the aggregate, constitute more than 33% of a station's enterprise value, which consists of the total equity and debt capitalization, are considered attributable in certain circumstances.

On June 2, 2003, the FCC adopted new rules and policies (the New Rules) which would modify the ownership rules and policies then in effect (the Current Rules). Among other changes, the New Rules would (1) change the methodology to determine the boundaries of radio markets, (2) require that JSAs involving radio stations (but not television stations) be deemed to be an attributable ownership interest under certain circumstances, (3) authorize the common ownership of radio stations and daily newspapers under certain specified circumstances, and (4) eliminate the procedural policy of flagging assignment or transfer of control applications that raised potential anticompetitive concerns (namely, those applications that would permit the buyer to control 50% or more of the radio advertising dollars in the market, or would permit two entities (including the buyer), collectively, to control 70% or more of the radio advertising dollars in the market). Certain private parties challenged the New Rules in court, and the court issued an order which prevented the New Rules from going into effect until the court issued a decision on the challenges. On June 24, 2004, the court issued a decision which upheld some of the FCC's New Rules (for the most part, those that relate to radio) and concluded that other New Rules (for the most part, those that relate to television and newspapers) required further explanation or modification. The court left in place, however, the order which precluded all of the New Rules from going into effect. On September 3, 2004, the court issued a further order which granted the FCC's request to allow certain New Rules relating to radio to go into effect. The New Rules that became effective (1) changed the definition of the radio market for those markets that are rated by Arbitron, (2) modified the Current Rules method for defining a radio market in those markets that are not rated by Arbitron, and (3) made JSAs an attributable ownership interest under certain circumstances.

On February 4, 2008, the FCC issued a *Report and Order on Reconsideration* which changed Commission rules to allow common ownership of a radio station or a television station and a daily newspaper in the top 20 Designated Market Areas (DMAs) and to consider waivers to allow cross-ownership of a radio or television station with a daily newspaper in other DMAs. The FCC retained all other rules related to radio ownership without change.

Programming and Operation. The Communications Act requires broadcasters to serve the public interest. Broadcasters are required to present programming that is responsive to community problems, needs and interests and to maintain certain records demonstrating such responsiveness. Complaints from listeners concerning a station's programming may be filed at any time and will be considered by the FCC both at the time they are filed and in connection with a licensee's renewal application. Stations also must follow various FCC rules that regulate, among other things, political advertising, the broadcast of obscene or indecent programming, sponsorship identification, the broadcast of contests and lotteries, and technical operations (including limits on radio frequency radiation). Failure to observe these or other rules and policies can result in the imposition of various sanctions, including monetary

forfeitures, the grant of a short-term (less than the maximum term) license renewal or, for particularly egregious violations, the denial of a license renewal application or the revocation of a station license.

On January 24, 2008, the FCC proposed the adoption of certain rules and other measures to enhance the ability of radio and television stations to provide programming responsive to the needs and interests of their respective

Table of Contents

communities. The measures proposed include the creation of community advisory boards, requiring a broadcaster to maintain a main studio in the community of license of each station it owns, and the establishment of processing guidelines in FCC rules to evaluate the nature and quantity of non-entertainment programming provided by the broadcaster. Those proposals are subject to public comment. We cannot predict at this time to what extent, if any, the FCC's proposals will be adopted or the impact which adoption of any one or more of those proposals will have on our Company.

Local Marketing Agreements. A number of radio stations, including certain of our stations, have entered into LMAs. In a typical LMA, the licensee of a station makes available, for a fee, airtime on its station to a party which supplies programming to be broadcast during that airtime, and collects revenues from advertising aired during such programming. LMAs are subject to compliance with the antitrust laws and the Communications Laws, including the requirement that the licensee must maintain independent control over the station and, in particular, its personnel, programming, and finances. The FCC has held that such agreements do not violate the Communications Laws as long as the licensee of the station receiving programming from another station maintains ultimate responsibility for, and control over, station operations and otherwise ensures compliance with the Communications Laws.

A station that brokers more than 15% of the weekly programming hours on another station in its market will be considered to have an attributable ownership interest in the brokered station for purposes of the FCC's ownership rules. As a result, a radio station may not enter into an LMA that allows it to program more than 15% of the weekly programming hours of another station in the same market that it could not own under the FCC's multiple ownership rules.

Joint Sales Agreements. From time to time, radio stations, including one of our stations, enter into JSAs. A typical JSA authorizes one station to sell another station's advertising time and retain the revenue from the sale of that airtime. A JSA typically includes a periodic payment to the station whose airtime is being sold (which may include a share of the revenue being collected from the sale of airtime). Like LMAs, JSAs are subject to compliance with antitrust laws and the Communications Laws, including the requirement that the licensee must maintain independent control over the station and, in particular, its personnel, programming, and finances. The FCC has held that such agreements do not violate the Communications Laws as long as the licensee of the station whose time is being sold by another station maintains ultimate responsibility for, and control over, station operations and otherwise ensures compliance with the Communications Laws.

Under the FCC's New Rules, a radio station that sells more than 15% of the weekly advertising time of another radio station in the same market will be attributed with the ownership of that other station. In that situation, a radio station cannot have a JSA with another radio station in the same market if the FCC's ownership rules would otherwise prohibit that common ownership.

New Services. In 1997, the FCC awarded two licenses to separate entities that authorize the licensees to provide satellite-delivered digital audio radio services. Both licensees have launched their respective satellite-delivered digital radio service. Those two entities XM & Sirius have proposed to merge into a single entity. That merger proposal is now being considered by the FCC and the United States Justice Department.

Digital technology also may be used by terrestrial radio broadcast stations on their existing frequencies. In October 2002, the FCC released a Report and Order in which it selected in-band, on channel (IBOC) as the technology that will permit terrestrial radio stations to introduce digital operations. The FCC now will permit operating radio stations to commence digital operation immediately on an interim basis using the IBOC systems developed by iBiquity Digital Corporation (iBiquity), called HD Radio. In March 2004, the FCC (1) approved an FM radio station's use of two separate antennas (as opposed to a single hybrid antenna) to provide both analog and digital signals of the FM owner secured Special Temporary Authorization (STA) from the FCC and (2) released a Public Notice seeking comment on

a proposal by the National Association of Broadcasters to allow all AM stations with nighttime service to provide digital service at night. In April 2004, the FCC inaugurated a rule making proceeding to establish technical, service, and licensing rules for digital broadcasting. On May 31, 2007, the FCC released a *Second Report and Order* which authorized AM stations to use an IBOC system at night, authorized FM radio stations to use separate antennas without the need for an STA, and established certain technical and service rules for digital service. The FCC also released another rulemaking notice to address other related issues. The inauguration of digital broadcasts by FM and perhaps AM stations requires us to make additional expenditures.

Table of Contents

On December 21, 2004, we entered into an agreement with iBiquity pursuant to which we committed to implement HD Radio™ systems on 240 of our stations by June, 2012. In exchange for reduced license fees and other consideration, we, along with other broadcasters, purchased perpetual licenses to utilize iBiquity's HD Radio™ technology. We cannot predict at this juncture, however, how successful our implementation of HD Radio™ technology within our platform will be, or how that implementation will affect our competitive position.

In January 2000, the FCC released a Report and Order adopting rules for a new low power FM radio service consisting of two classes of stations, one with a maximum power of 100 watts and the other with a maximum power of 10 watts. On December 11, 2007, the FCC released a *Report and Order* which made changes in the rules and provided further protection for low power FM radio stations and, in certain circumstances, required full power stations (like the ones owned by the Company) to provide assistance to low power FM stations in the event they are subject to interference or required to relocate their facilities to accommodate the inauguration of new or modified service by a full power radio station. The FCC has limited ownership and operation of low power FM stations to persons and entities which do not currently have an attributable interest in any FM station and has required that low power FM stations be operated on a non-commercial educational basis. The FCC has granted numerous construction permits for low power FM stations. We cannot predict what impact low power FM radio will have on our operations. Adverse effects of the new low power FM service on our operations could include interference with our stations and competition by low power stations for listeners and revenues.

In addition, from time to time Congress and the FCC have considered, and may in the future consider and adopt, new laws, regulations and policies regarding a wide variety of matters that could, directly or indirectly, affect the operation, ownership and profitability of our radio stations, result in the loss of audience share and advertising revenues for our radio stations, and affect the ability of Cumulus to acquire additional radio stations or finance such acquisitions.

Antitrust and Market Concentration Considerations. Potential future acquisitions, to the extent they meet specified size thresholds, will be subject to applicable waiting periods and possible review under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended (the HSR Act), by the Department of Justice or the Federal Trade Commission, either of whom can be required to evaluate a transaction to determine whether that transaction should be challenged under the federal antitrust laws. Transactions are subject to the HSR Act only if the acquisition price or fair market value of the stations to be acquired is \$63.1 million or more. Most of our acquisitions have not met this threshold. Acquisitions that are not required to be reported under the HSR Act may still be investigated by the Department of Justice or the Federal Trade Commission under the antitrust laws before or after consummation. At any time before or after the consummation of a proposed acquisition, the Department of Justice or the Federal Trade Commission could take such action under the antitrust laws as it deems necessary, including seeking to enjoin the acquisition or seeking divestiture of the business acquired or certain of our other assets. The Department of Justice has reviewed numerous radio station acquisitions where an operator proposes to acquire additional stations in its existing markets or multiple stations in new markets, and has challenged a number of such transactions. Some of these challenges have resulted in consent decrees requiring the sale of certain stations, the termination of LMAs or other relief. In general, the Department of Justice has more closely scrutinized radio mergers and acquisitions resulting in local market shares in excess of 35% of local radio advertising revenues, depending on format, signal strength and other factors. There is no precise numerical rule, however, and certain transactions resulting in more than 35% revenue shares have not been challenged, while certain other transactions may be challenged based on other criteria such as audience shares in one or more demographic groups as well as the percentage of revenue share. We estimate that we have more than a 35% share of radio advertising revenues in many of our markets.

We are aware that the Department of Justice commenced, and subsequently discontinued, investigations of several of our prior acquisitions. At that point, it requested information regarding our proposed acquisition of a radio station in Ft. Walton Beach, Florida. The Department of Justice can be expected to continue to enforce the antitrust laws in this

manner, and there can be no assurance that one or more of our pending or future acquisitions are not or will not be the subject of an investigation or enforcement action by the Department of Justice or the Federal Trade Commission. Similarly, there can be no assurance that the Department of Justice, the Federal Trade Commission or the FCC will not prohibit such acquisitions, require that they be restructured, or in appropriate cases,

Table of Contents

require that we divest stations we already own in a particular market. In addition, private parties may under certain circumstances bring legal action to challenge an acquisition under the antitrust laws.

As part of its review of certain radio station acquisitions, the Department of Justice has stated publicly that it believes that commencement of operations under LMAs, JSAs and other similar agreements customarily entered into in connection with radio station ownership transfers prior to the expiration of the waiting period under the HSR Act could violate the HSR Act. In connection with acquisitions subject to the waiting period under the HSR Act, we will not commence operation of any affected station to be acquired under an LMA, a JSA, or similar agreement until the waiting period has expired or been terminated.

Executive Officers of the Company

The following table sets forth certain information with respect to our executive officers as of February 29, 2008:

Name	Age	Position(s)
Lewis W. Dickey, Jr.	46	Chairman, President and Chief Executive Officer
John G. Pinch	59	Executive Vice President, Co-Chief Operating Officer
Martin R. Gausvik	51	Executive Vice President, Chief Financial Officer and Treasurer
John W. Dickey	41	Executive Vice President, Co-Chief Operating Officer

Lewis W. Dickey, Jr. is our Chairman, President and Chief Executive Officer. Mr. L. Dickey has served as Chairman, President and Chief Executive Officer since December 2000. Mr. Dickey was one of our founders and initial investors, and served as Executive Vice Chairman from March 1998 to December 2000. Mr. L. Dickey is a nationally regarded consultant on radio strategy and the author of *The Franchise Building Radio Brands*, published by the National Association of Broadcasters, one of the industry's leading texts on competition and strategy. Mr. L. Dickey also serves as a member of the National Association of Broadcasters Radio Board of Directors. He holds Bachelor of Arts and Master of Arts degrees from Stanford University and a Master of Business Administration degree from Harvard University. Mr. L. Dickey is the brother of John W. Dickey.

Martin R. Gausvik is our Executive Vice President, Treasurer and Chief Financial Officer. Mr. Gausvik has served as Executive Vice President, Chief Financial Officer and Treasurer since May 2000 and is a 20-year veteran of the radio industry, having served as Vice President Finance for Jacor Communications from 1996 until the merger of Jacor's 250 radio station group with Clear Channel Communications in May 1999. More recently, he was Executive Vice President and Chief Financial Officer of Latin Communications Group, the operator of 17 radio stations serving major markets in the western United States. Prior to joining Jacor, from 1984 to 1996, Mr. Gausvik held various accounting and financial positions with Taft Broadcasting, including Controller of Taft's successor company, Citicasters.

John G. Pinch is our Executive Vice President and Co-Chief Operating Officer. Mr. Pinch has served as Executive Vice President and Co-Chief Operating Officer since May 2007, and prior to that served as our Chief Operating Officer since December 2000, after serving as the President of Clear Channel International Radio (CCU International) (NYSE:CCU). At CCU International, Mr. Pinch was responsible for the management of all CCU radio operations outside of the United States, which included over 300 properties in 9 countries. Mr. Pinch is a 30-year broadcast veteran and has previously served as Owner/President of WTVK-TV Ft. Myers-Naples, Florida, General Manager of WMTX-FM/WHBO-AM Tampa, Florida, General Manager/Owner of WKLH-FM Milwaukee, and General Manager of WXJY Milwaukee.

John W. Dickey is our Executive Vice President and Co-Chief Operating Officer. Mr. J. Dickey has served as Executive Vice President since January 2000 and as Co-Chief Operating Officer since May 2007. Mr. J. Dickey joined Cumulus in 1998 and, prior to that, served as the Director of Programming for Midwestern Broadcasting from 1990 to March 1998. Mr. J. Dickey holds a Bachelor of Arts degree from Stanford University. Mr. J. Dickey is the brother of Lewis W. Dickey, Jr.

Available Information

Our Internet site address is *www.cumulus.com*. On our site, we have made available, free of charge, our most recent annual report on Form 10-K and our proxy statement. We also provide a link to an independent third-party Internet site, which makes available, free of charge, our other filings with the SEC, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

Item 1A. Risk Factors

Many statements contained in this report are forward-looking in nature. These statements are based on our current plans, intentions or expectations, and actual results could differ materially as we cannot guarantee that we will achieve these plans, intentions or expectations. See Cautionary Statement Regarding Forward-Looking Statements. Forward-looking statements are subject to numerous risks and uncertainties, including those specifically identified below.

Risks Related to the Pending Merger

We May Be Adversely Affected if the Proposed Merger is Not Completed

There is no assurance that the merger will be completed, for reasons such as the failure of our stockholders to approve the merger, the failure of other conditions including applicable regulatory approvals, to the completion of the merger to be satisfied, or any other reasons within the control or discretion of the purchasers. In the event that the merger is not completed, we may be subject to several risks including the following: the current market price of our common stock may reflect a market assumption that the merger will occur and a failure to complete the merger could result in a decline in the market price of our common stock; management's attention from our day to day business may be diverted; uncertainties with regards to the merger may adversely affect our relationships with our employees and customers; and we may be required to pay significant transactions costs related to the merger, including under certain circumstances, a termination fee of up to \$15 million, as well as legal, accounting and other fees of the proposed buyer, up to a maximum of \$7.5 million.

Risks Related to Our Business

We operate in a very competitive business environment.

The radio broadcasting industry is very competitive. Our stations compete for listeners and advertising revenues directly with other radio stations within their respective markets, and some of the owners of those competing stations may have greater financial resources than we do. Our stations also compete with other media, such as newspapers, magazines, cable and broadcast television, outdoor advertising, satellite radio, the Internet and direct mail. In addition, many of our stations compete with groups of two or more radio stations operated by a single operator in the same market.

Audience ratings and market shares fluctuate, and any adverse change in a particular market could have a material adverse effect on the revenue of stations located in that market. While we already compete with other stations with comparable programming formats in many of our markets, any one of our stations could suffer a reduction in ratings or revenue and could require increased promotion and other expenses, and, consequently, could have a lower Station Operating Income, if:

another radio station in the market was to convert its programming format to a format similar to our station or launch aggressive promotional campaigns;

a new station were to adopt a competitive format; or

an existing competitor was to strengthen its operations.

The Telecom Act allows for the consolidation of ownership of radio broadcasting stations in the markets in which we operate or may operate in the future. Some competing consolidated owners may be larger and have substantially more financial and other resources than we do. In addition, increased consolidation in our target

Table of Contents

markets may result in greater competition for acquisition properties and a corresponding increase in purchase prices we pay for these properties.

A decrease in our market ratings or market share can adversely affect our revenues.

The success of each of our radio stations, or station clusters, is primarily dependent upon its share of the overall advertising revenue within its market. Although we believe that each of our stations or clusters can compete effectively in its market, we cannot be sure that any of our stations can maintain or increase its current audience ratings or market share. In addition to competition from other radio stations and other media, shifts in population, demographics, audience tastes and other factors beyond our control could cause us to lose our audience ratings or market share. Our advertising revenue may suffer if any of our stations cannot maintain its audience ratings or market share.

We must respond to the rapid changes in technology, services and standards that characterize our industry in order to remain competitive.

The radio broadcasting industry is subject to technological change, evolving industry standards and the emergence of new media technologies and services. In some cases, our ability to compete will be dependent on our acquisition of new technologies and our provision of new services, and we cannot assure you that we will have the resources to acquire those new technologies or provide those new services; in other cases, the introduction of new technologies and services could increase competition and have an adverse effect on our revenue. Recent new media technologies and services include the following:

audio programming by cable television systems, direct broadcast satellite systems, Internet content providers (both landline and wireless), Internet-based audio radio services, satellite delivered digital audio radio service and other digital audio broadcast formats;

HD Radio[™] digital radio, which could provide multi-channel, multi-format digital radio services in the same bandwidth currently occupied by traditional AM and FM radio services; and

low power FM radio, which could result in additional FM radio broadcast stations in markets where we have stations.

We also cannot assure you that we will continue to have the resources to acquire other new technologies or to introduce new services that could compete with other new technologies. We cannot predict the effect, if any, that competition arising from new technologies may have on the radio broadcasting industry or on our business.

We face many unpredictable business risks that could have a material adverse effect on our future operations.

Our operations are subject to many business risks, including certain risks that specifically influence the radio broadcasting industry. These include:

changing economic conditions, both generally and relative to the radio broadcasting industry in particular;

shifts in population, listenership, demographics or audience tastes;

the level of competition from existing or future technologies for advertising revenues, including, but not limited to, other radio stations, satellite radio, television stations, newspapers, the Internet, and other entertainment and communications media; and

changes in laws as well as changes in governmental regulations and policies and actions of federal regulatory bodies, including the U.S. Department of Justice, the Federal Trade Commission and the FCC.

Given the inherent unpredictability of these variables, we cannot with any degree of certainty predict what effect, if any, these risks will have on our future operations. Any one or more of these variables may have a material adverse effect on our future operations.

Table of Contents

There are risks associated with our acquisition strategy.

We intend to continue to grow through internal expansion and by acquiring radio station clusters and individual radio stations primarily in mid-size markets. We cannot predict whether we will be successful in pursuing these acquisitions or what the consequences of these acquisitions will be. Consummation of our pending acquisitions and any acquisitions in the future are subject to various conditions, such as compliance with FCC and antitrust regulatory requirements. The FCC requirements include:

approval of license assignments and transfers;

limits on the number of stations a broadcaster may own in a given local market; and

other rules or policies, such as the ownership attribution rules, that could limit our ability to acquire stations in certain markets where one or more of our stockholders has other media interests.

The antitrust regulatory requirements include:

filing with the U.S. Department of Justice and the Federal Trade Commission under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, referred to as the HSR Act, where applicable;

expiration or termination of the waiting period under the HSR Act; and

possible review by the U.S. Department of Justice or the Federal Trade Commission of antitrust issues under the HSR Act or otherwise.

We cannot be certain that any of these conditions will be satisfied. In addition, the FCC has asserted the authority to review levels of local radio market concentration as part of its acquisition approval process, even where proposed assignments would comply with the numerical limits on local radio station ownership in the FCC's rules and the Communications Act of 1934, referred to as the Communications Act.

Our acquisition strategy involves numerous other risks, including risks associated with:

identifying acquisition candidates and negotiating definitive purchase agreements on satisfactory terms;

integrating operations and systems and managing a large and geographically diverse group of stations;

diverting our management's attention from other business concerns;

potentially losing key employees at acquired stations; and

diminishing number of properties available for sale in mid-size markets.

We cannot be certain that we will be able to successfully integrate our acquisitions or manage the resulting business effectively, or that any acquisition will achieve the benefits that we anticipate. In addition, we are not certain that we will be able to acquire properties at valuations as favorable as those of previous acquisitions. Depending upon the nature, size and timing of potential future acquisitions, we may be required to raise additional financing in order to consummate additional acquisitions. We cannot assure you that our debt agreements will permit the necessary additional financing or that additional financing will be available to us or, if available, that financing would be on terms acceptable to our management.

We may be restricted in pursuing certain strategic acquisitions because of our agreement with CMP.

Under an agreement that we entered into with CMP and the other investors in CMP in connection with the formation of CMP, we have agreed to allow CMP the right to pursue first any business opportunity primarily involving the top-50 radio markets in the United States. We are allowed to pursue such business opportunities only after CMP has declined to pursue them. As a result, we may be limited in our ability to pursue strategic acquisitions or alternatives primarily involving large-sized markets (including opportunities that primarily involve large-sized markets but also involve mid-sized markets) that may present attractive opportunities for us in the future.

Table of Contents

We have written off, and could in the future be required to write off, a significant portion of the fair market value of our FCC broadcast licenses and goodwill, which may adversely affect our financial condition and results of operations.

As of December 31, 2007, our FCC licenses and goodwill comprised 83.2% of our assets. Each year, we are required by SFAS No. 142, *Goodwill and Other Intangible Assets*, to assess the fair market value of our FCC broadcast licenses and goodwill to determine whether the fair market value of those assets is impaired. In 2007, we recorded impairment charges of approximately \$230.6 million in order to reduce the carrying value of certain broadcast licenses and goodwill to their respective fair market values. Our future impairment reviews could result in additional impairment charges. Such additional impairment charges would reduce our reported earnings for the periods in which they are recorded.

Our results of operations could be adversely affected by a downturn in the U.S. economy or in the economies of the markets in which we operate.

Revenue generated by our radio stations depends primarily upon the sale of advertising. Advertising expenditures, which we believe to be largely a discretionary business expense, generally tend to decline during an economic recession or downturn. Furthermore, because a substantial portion of our revenue is derived from local advertisers, our ability to generate advertising revenue in specific markets is directly affected by local or regional economic conditions. Consequently, a recession or downturn in the national economy or the economy of an individual geographic market in which we own or operate stations could adversely affect our advertising revenue and, therefore, our results of operations. Our broadcasting revenues could be materially adversely affected by recessions, which may be triggered by economic forces such as the business cycle or by cataclysmic human events. Future acts of war and terrorism against the United States, and the country's response thereto, could cause our advertising revenues to decline due to advertising cancellations, delays or defaults in payment for advertising time, and the adverse impact on the general economic activity in the United States.

Even in the absence of a general recession or downturn in the economy, an individual business sector that tends to spend more on advertising than other sectors might be forced to reduce its advertising expenditures if that sector experiences a downturn. If that sector's spending represents a significant portion of our advertising revenues, any reduction in its expenditures may affect our revenue.

We are dependent on key personnel.

Our business is managed by a small number of key management and operating personnel, and our loss of one or more of these individuals could have a material adverse effect on our business. We believe that our future success will depend in large part on our ability to attract and retain highly skilled and qualified personnel and to expand, train and manage our employee base. We have entered into employment agreements with some of our key management personnel that include provisions restricting their ability to compete with us under specified circumstances.

We also employ several on-air personalities with large loyal audiences in their individual markets. On occasion, we enter into employment agreements with these personalities to protect our interests in those relationships that we believe to be valuable. The loss of one or more of these personalities could result in a short-term loss of audience share in that particular market.

The broadcasting industry is subject to extensive and changing Federal regulation.

The radio broadcasting industry is subject to extensive regulation by the FCC under the Communications Act. We are required to obtain licenses from the FCC to operate our stations. Licenses are normally granted for a term of eight

years and are renewable. Although the vast majority of FCC radio station licenses are routinely renewed, we cannot assure you that the FCC will grant our existing or future renewal applications or that the renewals will not include conditions out of the ordinary course. The non-renewal or renewal with conditions, of one or more of our licenses could have a material adverse effect on us.

Table of Contents

We must also comply with the extensive FCC regulations and policies in the ownership and operation of our radio stations. FCC regulations limit the number of radio stations that a licensee can own in a market, which could restrict our ability to acquire radio stations that would be material to our financial performance in a particular market or overall.

The FCC also requires radio stations to comply with certain technical requirements to limit interference between two or more radio stations. Despite those limitations, a dispute could arise whether another station is improperly interfering with the operation of one of our stations or another radio licensee could complain to the FCC that one of our stations is improperly interfering with that licensee's station. There can be no assurance as to how the FCC might resolve that dispute. These FCC regulations and others may change over time, and we cannot assure you that those changes would not have a material adverse effect on us.

In recent years, the FCC has engaged in more vigorous enforcement of its indecency rules against the broadcast industry, which could have a material adverse effect on our business.

FCC regulations prohibit the broadcast of obscene material at any time, and indecent material between the hours of 6:00 a.m. and 10:00 p.m. The FCC has recently increased its enforcement efforts with respect to these regulations. Further, Congress has introduced legislation that would substantially increase the penalties for broadcasting indecent programming and potentially subject broadcasters to license revocation, renewal or qualification proceedings in the event that they broadcast indecent material. We may in the future become subject to inquiries or proceedings related to our stations' broadcast of allegedly indecent or obscene material. To the extent that such an inquiry or proceeding results in the imposition of fines, a settlement with the FCC, revocation of any of our station licenses or denials of license renewal applications, our results of operation and business could be materially adversely affected.

We are required to obtain prior FCC approval for each radio station acquisition.

The acquisition of a radio station requires the prior approval of the FCC. To obtain that approval, we would have to file a transfer of control or assignment application with the FCC. The Communications Act and FCC rules allow members of the public and other interested parties to file petitions to deny or other objections to the FCC grant of any transfer or assignment application. The FCC could rely on those objections or its own initiative to deny a transfer or assignment application or to require changes in the transaction as a condition to having the application granted. The FCC could also change its existing rules and policies to reduce the number of stations that we would be permitted to acquire in some markets. For these and other reasons, there can be no assurance that the FCC will approve potential future acquisitions that we deem material to our business.

Risks Related to Our Indebtedness

We have a substantial amount of indebtedness, which may adversely affect our cash flow and our ability to operate our business, remain in compliance with debt covenants and make payments on our indebtedness.

As of December 31, 2007, our long-term debt, including the current portion, was \$736.3 million, representing approximately 617% of our stockholders' equity. Our credit facilities have interest and principal repayment obligations that are substantial in amount.

Our substantial indebtedness could have important consequences, including:

requiring a substantial portion of cash flow from operations to be dedicated to the payment of principal and interest on our indebtedness, therefore reducing our ability to use our cash flow to fund our operations, capital expenditures and future business opportunities;

exposing us to the risk of increased interest rates as certain of our borrowings are at variable rates of interest;

increasing our vulnerability to general economic downturns and adverse industry conditions;

limiting our ability to obtain additional financing for working capital, capital expenditures, debt service requirements, acquisitions and general corporate or other purposes;

Table of Contents

limiting our ability to adjust to changing market conditions and placing us at a disadvantage compared to our competitors who have less debt: and

restricting us from making strategic acquisitions or causing us to make non-strategic divestitures.

We and our restricted subsidiaries may be able to incur substantial additional indebtedness in the future, subject to the restrictions contained in our credit facilities. If new indebtedness is added to our current debt levels, the related risks that we now face could intensify.

The credit agreement governing our credit facility imposes significant restrictions on us.

Our credit agreement limits or restricts, among other things, our ability to:

incur additional indebtedness or grant additional liens or security interests in our assets;

pay dividends, make payments on certain types of indebtedness or make other restricted payments;

make particular types of investments or enter into speculative hedging agreements;

enter into some types of transactions with affiliates;

merge or consolidate with any other person or make changes to our organizational documents or other material agreement to which we are a party;

sell, assign, transfer, lease, convey or otherwise dispose of our assets (except within certain limits) or enter into sale-leaseback transactions; or

make capital expenditures.

Our credit agreement also requires us to maintain specified financial ratios and to satisfy certain financial condition tests. Our ability to meet those financial ratios and financial condition tests can be affected by events beyond our control, and we cannot be sure that we will maintain those ratios or meet those tests. A breach of any of these restrictions could result in a default under our debt agreements. Our lenders have taken security interests in substantially all of our consolidated assets, and we have pledged the stock of our subsidiaries to secure the debt under our credit facility. If an event of default under our credit agreement occurs, our lenders could declare all amounts outstanding, including accrued interest, immediately due and payable. If we could not repay those amounts, those lenders could proceed against the collateral pledged to them to secure that indebtedness. If our credit facility indebtedness were accelerated, our assets may not be sufficient to repay in full that indebtedness. Our ability to comply with the covenants in our credit agreement will depend upon our future performance and various other factors, such as business, competitive, technological, legislative and regulatory factors, some of which are beyond our control. If we fail to comply with the covenants in our credit agreement, our lenders could declare all amounts owed to them immediately due and payable.

Risks Related to Our Class A Common Stock

The public market for our Class A Common Stock may be volatile.

We cannot assure you that the market price of our Class A Common Stock will not decline, and the market price could be subject to wide fluctuations in response to such factors as:

conditions and trends in the radio broadcasting industry;

actual or anticipated variations in our quarterly operating results, including audience share ratings and financial results;

changes in financial estimates by securities analysts;

technological innovations;

competitive developments;

Table of Contents

adoption of new accounting standards affecting companies in general or affecting companies in the radio broadcasting industry in particular; and

general market conditions and other factors.

Further, the stock markets, and in particular the NASDAQ Global Select Market, on which our Class A Common Stock is listed, from time to time have experienced extreme price and volume fluctuations that were not necessarily related or proportionate to the operating performance of the affected companies. In addition, general economic, political and market conditions such as recessions, interest rate movements or international currency fluctuations, may adversely affect the market price of our Class A Common Stock.

Certain stockholders control or have the ability to exert significant influence over the voting power of our capital stock.

As of February 29, 2008, and after giving effect to the exercise of all of their options exercisable within 60 days of that date, Lewis W. Dickey, Jr., our Chairman, President, Chief Executive Officer and a director, and his brother, John W. Dickey, our Executive Vice President, collectively beneficially own 6,530,620 shares, or approximately 16.3%, of our outstanding Class A Common Stock, and 2,145,561 shares, or 100%, of our outstanding Class C Common Stock, which collectively represents approximately 45.6% of the outstanding voting power of our common stock. Consequently, they have the ability to exert significant influence over our policies and management. The interests of these stockholders may differ from the interests of our other stockholders.

As of February 29, 2008, BA Capital Company, L.P., referred to as BA Capital, and its affiliate, Banc of America SBIC, L.P., referred to as BACI, together own 1,661,818 shares, or approximately 4.5%, of our Class A Common Stock and 5,809,191 shares, or 100%, of our Class B Common Stock, which is convertible into shares of Class A Common Stock. BA Capital also holds options exercisable within 60 days of March 1, 2008 to purchase 105,000 shares of our Class A Common Stock and Robert H. Sheridan, III, one of our directors and a senior vice president and managing director with an economic interest in the general partners of both BA Capital and BACI, holds options exercisable within 60 days of March 1, 2008 to purchase 167,500 shares of our Class A Common Stock. Assuming that those options were exercised for shares of our Class A Common Stock, and giving effect to the conversion into shares of our Class A Common Stock of all shares of Class B Common Stock held by BA Capital and BACI, BA Capital and BACI would hold approximately 15.6% of the total voting power of our common stock. BA Capital and BACI are both affiliates of Bank of America Corporation. BA Capital has the right to designate one member of our Board and Mr. Sheridan currently serves on our Board as BA Capital's designee. As a result, BA Capital, BACI and Mr. Sheridan have the ability to exert significant influence over our policies and management, and their interests may differ from the interests of our other stockholders.

Cautionary Statement Regarding Forward-Looking Statements

In various places in this annual report on Form 10-K, we use statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to our future plans, objectives, expectations and intentions. Although we believe that, in making any of these statements, our expectations are based on reasonable assumptions, these statements may be influenced by factors that could cause actual outcomes and results to be materially different from these projected. When used in this document, words such as anticipates, believes, expects, intends, and similar expressions, as they relate to us or our management, are intended to identify these forward-looking statements. These forward-looking statements are subject to numerous risks and uncertainties, including those referred above to under Risk Factors and as otherwise described in our periodic filings with the SEC from time to time.

Important facts that could cause actual results to differ materially from those in forward-looking statements, certain of which are beyond our control, include:

the impact of general economic conditions in the United States or in specific markets in which we currently do business;

industry conditions, including existing competition and future competitive technologies;

Table of Contents

the popularity of radio as a broadcasting and advertising medium;

cancellations, disruptions or postponements of advertising schedules in response to national or world events;

our capital expenditure requirements;

legislative or regulatory requirements;

risks and uncertainties relating to our leverage;

interest rates;

our continued ability to identify suitable acquisition targets;

consummation and integration of pending or future acquisitions;

access to capital markets; and

fluctuations in exchange rates and currency values.

Specific facts with respect to the merger that could cause actual results to differ materially from those in forward-looking statements, certain of which are beyond our control, include:

the occurrence of any event, change or other circumstances that could give rise to the termination of the merger agreement;

the outcome of any legal proceedings that have been or may be instituted against us and others relating to the merger agreement;

the inability to complete the merger due to the failure to obtain stockholder approval or the failure to satisfy other conditions to completion of the merger;

the failure to obtain the necessary financing arrangements set forth in commitment letters received in connection with the merger;

the failure of the merger to close for any other reason;

risks that the proposed transaction disrupts current plans and operations and the potential difficulties in employee retention as a result of the merger; and

the effect of the announcement of the merger on our customer relationships, operating results and business generally.

Our actual results, performance or achievements could differ materially from those expressed in, or implied by, the forward-looking statements. Accordingly, we cannot be certain that any of the events anticipated by the forward-looking statements will occur or, if any of them do occur, what impact they will have on us. We assume no obligation to update any forward-looking statements as a result of new information or future events or developments, except as required under federal securities laws. We caution you not to place undue reliance on any forward-looking

statements, which speak only as of the date of this annual report on Form 10-K.

Item 1B. *Unresolved Staff Comments*

Not applicable.

Item 2. *Properties*

The types of properties required to support each of our radio stations include offices, studios, transmitter sites and antenna sites. A station's studios are generally housed with its offices in business districts of the station's community of license or largest nearby community. The transmitter sites and antenna sites are generally located so as to provide maximum market coverage.

At December 31, 2007, we owned studio facilities in 9 of our 59 markets and we owned transmitter and antenna sites in 52 of our 59 markets. We lease additional studio and office facilities in 50 markets and additional transmitter

Table of Contents

and antenna sites in 42 markets. In addition, we lease corporate office space in Atlanta, Georgia. We do not anticipate any difficulties in renewing any facility leases or in leasing alternative or additional space, if required. We own or lease substantially all of our other equipment, consisting principally of transmitting antennae, transmitters, studio equipment and general office equipment.

No single property is material to our operations. We believe that our properties are generally in good condition and suitable for our operations; however, we continually look for opportunities to upgrade our properties and intend to upgrade studios, office space and transmission facilities in certain markets.

Item 3. *Legal Proceedings*

We from time to time are involved in various legal proceedings that are handled and defended in the ordinary course of business. While we are unable to predict the outcome of these matters, our management does not believe, based upon currently available facts, that the ultimate resolution of any of such proceedings would have a material adverse effect on our overall financial condition or results of operations.

In 2005, we were subpoenaed by the Office of the Attorney General of the State of New York, as were other radio broadcasting companies, in connection with the New York Attorney General's investigation of promotional practices related to record companies' dealings with radio stations broadcasting in New York. We cooperated with the Attorney General in this investigation. The investigation is still pending.

We are aware of three purported class action lawsuits related to the merger: Jeff Michelson, on behalf of himself and all others similarly situated v. Cumulus Media Inc., et al. (Case No. 2007CV137612, filed July 27, 2007) was filed in the Superior Court of Fulton County, Georgia against us, Lew Dickey, the other directors and the sponsor; Patricia D. Merna, on behalf of herself and all others similarly situated v. Cumulus Media Inc., et al. (Case No. 3151, filed August 8, 2007) was filed in the Chancery Court for the State of Delaware, New Castle County, against us, Lew Dickey, the other directors, the sponsor, Parent and Merger Sub; and Paul Cowles v. Cumulus Media Inc., et al. (Case No. 2007-CV-139323, filed August 31, 2007) was filed in the Superior Court of Fulton County, Georgia against us, Lew Dickey, the other directors and the sponsor.

The complaints in each of these lawsuits allege, among other things, that the merger is the product of an unfair process, that the consideration to be paid to our stockholders pursuant to the merger is inadequate, and that the defendants breached their fiduciary duties to our stockholders. The complaints further allege that we and the sponsor (and Parent and Merger Sub) aided and abetted the actions of our directors in breaching such fiduciary duties. The complaints seek, among other relief, an injunction preventing completion of the merger.

We believe that we have committed no breaches of fiduciary duties, disclosure violations or any other breaches or violations whatsoever, including in connection with the merger, the merger agreement or the proxy statement filed in connection with the merger. In addition, we have been advised that the other defendants named in the complaints similarly believe the allegations of wrongdoing in the complaints to be without merit, and deny any breach of duty to or other wrongdoing with respect to the purported plaintiff classes.

In order to resolve one of the lawsuits, we have reached an agreement along with the individual defendants in that lawsuit, without admitting any wrongdoing, pursuant to a memorandum of understanding dated November 13, 2007, to extend the statutory period in which holders of our common stock may exercise their appraisal rights and to make certain further disclosures in the proxy statement filed in connection with the merger as requested by counsel for the plaintiff in that litigation. The parties have completed confirmatory discovery and anticipate that they will cooperate in seeking dismissal of the lawsuit. Such dismissal, including an anticipated request by plaintiff's counsel for attorneys fees, will be subject to court approval. We intend to vigorously defend the remaining two lawsuits.

Item 4. *Submission of Matters To a Vote of Security Holders*

During the fourth quarter, October 1, 2007 through December 31, 2007, there were no matters submitted to a vote of security holders.

Table of Contents**PART II****Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*****Market Information For Common Stock**

Shares of our Class A Common Stock, par value \$.01 per share have been quoted on the NASDAQ Global Select Market (or its predecessor, the NASDAQ National Market) under the symbol CMLS since the consummation of the initial public offering of our Class A Common Stock on July 1, 1998. There is no established public trading market for our Class B Common Stock or our Class C Common Stock. The following table sets forth, for the calendar quarters indicated, the high and low closing sales prices of the Class A Common Stock on the NASDAQ Global Select Market, as reported in published financial sources.

Year	High	Low
2006		
First Quarter	\$ 13.51	\$ 11.16
Second Quarter	\$ 12.06	\$ 10.04
Third Quarter	\$ 10.88	\$ 8.79
Fourth Quarter	\$ 11.55	\$ 9.36
2007		
First Quarter	\$ 10.66	\$ 9.05
Second Quarter	\$ 10.40	\$ 9.03
Third Quarter	\$ 11.74	\$ 8.36
Fourth Quarter	\$ 10.59	\$ 7.09
2008		
First Quarter (through February 29, 2008)	\$ 8.07	\$ 5.00

Holder

As of February 29, 2008, there were approximately 1,190 holders of record of our Class A Common Stock, two holders of record of our Class B Common Stock and one holder of record of our Class C Common Stock. The figure for our Class A Common Stock does not include an estimate of the number of beneficial holders whose shares may be held of record by brokerage firms or clearing agencies.

Dividends

We have not declared or paid any cash dividends on our common stock since our inception and do not currently anticipate paying any cash dividends on our common stock in the foreseeable future. We intend to retain future earnings for use in our business. We are currently subject to restrictions under the terms of the credit agreement governing our credit facility that limit the amount of cash dividends that we may pay on our Class A Common Stock. We may pay cash dividends on our Class A Common Stock in the future only if we meet certain financial tests set forth in the credit agreement.

Table of Contents**Securities Authorized For Issuance Under Equity Incentive Plans**

The following table sets forth, as of December 31, 2007, the number of securities outstanding under our equity compensation plans, the weighted average exercise price of such securities and the number of securities available for grant under these plans:

Plan Category	Number of Shares to be Issued Upon Exercise of Outstanding Options, Warrants and Rights(a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights(b)	Number of Shares Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Column (a))(c)
Equity Compensation Plans Approved by Stockholders	7,262,812	\$ 15.14	3,494,437
Equity Compensation Plans Not Approved by Stockholders	1,415,848	\$ 15.21	556,401
Total	8,678,660		4,050,838

The only existing equity compensation plan not approved by our stockholders is the 2002 Stock Incentive Plan. Our Board adopted the 2002 Stock Incentive Plan on March 1, 2002, and stockholder approval of that plan was not required. For a description of all equity compensation plans, please refer to Note 11 in the accompanying notes to the consolidated financial statements.

On September 28, 2004, our Board authorized the purchase, from time to time, of up to \$100.0 million of our Class A Common Stock, subject to the terms of our credit agreement. Subsequently, on December 7, 2005, our Board of Directors authorized the purchase of a second \$100.0 million of our Class A Common Stock.

In June 2006, as part of a separate \$200.0 million Board-approved recapitalization, we completed a modified Dutch Auction tender offer and purchased 11.5 million shares of our outstanding Class A Common Stock at a price per share of \$11.50, or approximately \$132.3 million. The shares purchased represented approximately 24.1% our outstanding Class A Common Stock at the time. We also purchased 5.0 million shares of Class B Common Stock at a purchase price of \$11.50 per share or approximately \$57.5 million. The shares purchased represented approximately 43.0% of our outstanding Class B Common Stock. These Class B Common shares were subsequently retired. During the three months ended September 30, 2006, we purchased an additional 749,500 shares of our outstanding Class A Common Stock at an average price per share of \$9.25, or approximately \$6.9 million. Under these programs, we have cumulatively repurchased the following shares, which are being held in treasury:

Period	Total Number of Shares Purchased	Average Price Per Share
---------------	---	--

2004	1,004,429	\$	14.56
2005	7,766,223		12.31
2006	14,261,000		11.56
2007			
Total	22,031,652	\$	11.94

During the three months ended December 31, 2006 we purchased 500,000 Class A restricted shares from Lewis Dickey, Jr. per his amended employment agreement dated December 20, 2006. See footnote 11 to financial statements for further discussion.

We had no purchases of Class A common stock during the year ended December 31, 2007.

Table of Contents**Performance Graph**

The following graph compares the total stockholder return on our Class A Common Stock for the year ended December 31, 2007 with that of (1) the Standard & Poors 500 Stock Index (S&P 500): (2) the Nasdaq Stock Market Index the (Nasdaq Composite): and (3) an index comprised of radio broadcast and media companies. See note (1) below. The total return calculation set forth below assume \$100 invested on December 31, 2001 with reinvestment or dividends into additional shares of the same class of securities at the frequency with which dividends were paid on such securities through December 31, 2007. The stock price performance shown in the graph below should be considered indicative of future stock price performance.

CUMULATIVE TOTAL RETURN

	2002	2003	December 31,		2006	2007
			2004	2005		
Cumulus	100.00%	148.35%	101.69%	83.68%	70.06%	54.21%
S & P 500	100.00%	126.38%	137.75%	141.88%	161.20%	166.89%
NASDAQ	100.00%	150.01%	162.89%	165.13%	180.85%	198.60%
Radio Index	100.00%	117.76%	85.46%	71.99%	64.79%	44.86%

Table of Contents**Item 6. Selected Consolidated Financial Data**

The selected consolidated historical financial data presented below has been derived from our audited consolidated financial statements as of and for the years ended December 31, 2007, 2006, 2005, 2004 and 2003. Our consolidated historical financial data are not comparable from year to year because of our acquisition and disposition of various radio stations during the periods covered. This data should be read in conjunction with our audited consolidated financial statements and the related notes thereto, as set forth in Part II, Item 8 and with Management's Discussion and Analysis of Financial Conditions and Results of Operations set forth in Part II, Item 7 herein (dollars in thousands, except per share data).

	Year Ended December 31,				
	2007	2006	2005	2004	2003

(1) See Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations for a quantitative reconciliation of Station Operating Income to its most directly comparable financial measure calculated and presented in accordance with GAAP.

(2) We recorded certain immaterial adjustments to the 2006 and 2005 consolidated financial data. See Note 1 to our 2007 Consolidated Financial Statements appearing elsewhere in the document.

Table of Contents

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

The following Management's Discussion and Analysis is intended to provide the reader with an overall understanding of our financial condition, changes in financial condition, results of operations, cash flows, sources and uses of cash, contractual obligations and financial position. This section also includes general information about our business and a discussion of our management's analysis of certain trends, risks and opportunities in our industry. We also provide a discussion of accounting policies that require critical judgments and estimates as well as a description of certain risks and uncertainties that could cause our actual results to differ materially from our historical results. You should read the following information in conjunction with our consolidated financial statements and notes to our consolidated financial statements beginning on page F-1 in this Annual Report on Form 10-K as well as the information set forth in Item 1A. Risk Factors.

Agreement and Plan of Merger

On July 23, 2007, we agreed to be acquired by investor group consisting of Lewis W. Dickey Jr., who also serves as our Chairman, President and Chief Executive Officer, his brother John W. Dickey, who also serves as our Executive Vice President and Co-Chief Operating Officer, certain other members of their family and MLGPE Fund US Alternative, L.P., an affiliate of Merrill Lynch Global Private Equity. The consummation of the merger is subject to shareholder approval, FCC approval, waiver of certain conditions related to affiliates of Merrill Lynch & Co. Inc. and other customary closing conditions. For a summary of this transaction, see Item 1 above.

Overview of 2007

The advertising environment for 2007 lagged behind 2006. The RAB has reported that trends in radio advertising revenue mirrored fluctuations in the current economic environment yielding mixed results over the last three years. In 2007, advertising revenues decreased 2.0%, the first decline in growth in six years after increasing 1% in 2006 and remaining flat in 2005. However, our performance in 2007 outpaced the industry with total pro forma net revenues decreasing by only 0.7% (see the explanation of our calculation of our pro forma results and a reconciliation of pro forma results to our historical results under Results of Operations). Our local and other revenue remained stable in 2007 as pro forma local net revenues declined slightly by 0.5%. While for 2007, our pro forma net national revenues were down 2.1% versus the prior year.

In May 2005, we switched national sales representation firms to Katz Media Group. Since the switch, we have seen improvements in our national revenue stream, attributable to the systems and resources employed by Katz. We believe that as our relationship with Katz continues, we will be able to achieve greater improvement in our national revenue stream.

Our management team remains focused on our strategy of pursuing growth through acquisition. However, acquisitions are closely evaluated to ensure that they will generate stockholder value and our management is committed to completing only those acquisitions that we believe will increase our share price. The compression of publicly traded radio broadcast company multiples since 2005, combined with a market for privately held radio stations that did not see a corresponding multiples compression, translated to minimal acquisition activity for us in 2007. Given the lack of suitable acquisition opportunities in 2004 and 2005, our Board authorized us to purchase an aggregate of \$200 million in shares of our Class A Common Stock, within the limits set forth under our then-existing credit agreement and over a time frame that would mitigate any factors that would otherwise increase our leverage levels. In addition, in 2006 we completed a Board-approved recapitalization that included a modified Dutch auction tender offer for 11.5 million shares of our outstanding Class A Common Stock and a related purchase of 5.0 million shares of our outstanding Class B Common Stock.

In June 2007, the Company entered into an amendment to its existing credit agreement, dated June 7, 2006, by and among the Company, Bank of America, N.A., as administrative agent, and the lenders party thereto. The credit agreement, as amended, is referred to herein as the Amended Credit Agreement. The Amended Credit Agreement provides for a replacement term loan facility in the aggregate principal amount of \$750.0 million, which replaces the prior term loan facility that had an outstanding balance of approximately \$713.9 million at the time of refinancing, and maintains the pre-existing \$100.0 million revolving credit facility.

Table of Contents

As of December 31, 2007, the effective interest rate on the borrowings pursuant to the new credit facility was approximately 7.3%. As of December 31, 2007, our average cost of debt, including the effects of our derivative positions, was 6.6%. We remain committed to maintaining manageable debt levels, which will continue to improve our ability to generate cash flow from operations.

Our Business

We engage in the acquisition, operation, and development of commercial radio stations in mid-size radio markets in the United States. In addition, we, along with three private equity firms, formed Cumulus Media Partners, LLC (CMP), which acquired the radio broadcasting business of Susquehanna Pfaltzgraff Co. (Susquehanna) in May 2006. The acquisition included 33 radio stations in 8 markets. As a result of our investment in CMP and the acquisition of Susquehanna's radio operations, we are the second largest radio broadcasting company in the United States based on number of stations and believe we are the third largest radio broadcasting company based on net revenues. As of December 31, 2007, directly and through our investment in CMP, we owned or operated 343 stations in 66 U.S. markets and provided sales and marketing services under local marketing, management and consulting agreements (pending FCC approval of acquisition) to one additional station. The following discussion of our financial condition and results of operations includes the results of acquisitions and local marketing, management and consulting agreements.

Advertising Revenue and Station Operating Income

Our primary source of revenues is the sale of advertising time on our radio stations. Our sales of advertising time are primarily affected by the demand for advertising time from local, regional and national advertisers and the advertising rates charged by our radio stations. Advertising demand and rates are based primarily on a station's ability to attract audiences in the demographic groups targeted by its advertisers, as measured principally by Arbitron on a periodic basis, generally two or four times per year. Because audience ratings in local markets are crucial to a station's financial success, we endeavor to develop strong listener loyalty. We believe that the diversification of formats on our stations helps to insulate them from the effects of changes in the musical tastes of the public with respect to any particular format.

The number of advertisements that can be broadcast without jeopardizing listening levels and the resulting ratings is limited in part by the format of a particular station. Our stations strive to maximize revenue by managing their on-air inventory of advertising time and adjusting prices based upon local market conditions. In the broadcasting industry, radio stations sometimes utilize trade or barter agreements that exchange advertising time for goods or services such as travel or lodging, instead of for cash. Trade revenue totaled \$17.9 million in 2007, \$19.0 million in 2006, and \$18.2 million in 2005. Our advertising contracts are generally short-term. We generate most of our revenue from local and regional advertising, which is sold primarily by a station's sales staff. Local advertising represented approximately 88% of our total revenues in 2007 and 2006, and 89% in 2005.

Our revenues vary throughout the year. As is typical in the radio broadcasting industry, we expect our first calendar quarter will produce the lowest revenues for the year, and the second and fourth calendar quarters will generally produce the highest revenues for the year, with the exception of certain of our stations, such as those in Myrtle Beach, South Carolina, where the stations generally earn higher revenues in the second and third quarters of the year because of the higher seasonal population in those communities. Our operating results in any period may be affected by the incurrence of advertising and promotion expenses that typically do not have an effect on revenue generation until future periods, if at all.

Our most significant station operating expenses are employee salaries and commissions, programming expenses, advertising and promotional expenditures, technical expenses, and general and administrative expenses. We strive to

control these expenses by working closely with local market management. The performance of radio station groups, such as ours, is customarily measured by the ability to generate Station Operating Income. See the quantitative reconciliation of Station Operating Income to the most directly comparable financial measure calculated and presented in accordance with GAAP, that follows in this section.

Table of Contents**Results of Operations:**

Analysis of Consolidated Statements of Operations. The following analysis of selected data from our consolidated statements of operations should be referred to while reading the results of operations discussion that follows:

	Year Ended December 31,			Percent Change	
	2007	2006	2005	2007 vs. 2006	2006 vs. 2005
Net revenues	\$ 328,327	\$ 334,321	\$ 327,402	(1.8)%	2.1%
Station operating expenses excluding depreciation, amortization and LMA fees	210,640	214,089	227,413	(1.6)%	(5.9)%

** Calculation is not meaningful.

(1) We recorded certain immaterial adjustments to the 2006 and 2005 consolidated financial data. See Note 1 to our 2007 Consolidated Financial Statements appearing elsewhere in the document.

Our management's discussion and analysis of results of operations for the years ended December 31, 2007, 2006 and 2005 have been presented on a historical basis. Additionally, for net revenue, operating expenses, and Station

Operating Income, we have included our management's discussion and analysis of results of operations on a pro forma basis.

Year Ended December 31, 2007 versus Year Ended December 31, 2006

Net Revenues. Net revenues for the 12 months ended December 31, 2007 decreased \$6.0 million to \$328.3 million, a 1.8% decrease from the same period in 2006, primarily as a result of the contribution of our Houston and Kansas City stations to CMP, coupled with a decline in political advertising revenue.

In addition, on a same station basis, which excludes the results of the stations contributed to CMP, net revenues for the 12 months ended December 31, 2007 decreased \$2.7 million to \$328.3 million, a decrease of 0.8% from the same period in 2006. Same station operating income decreased \$2.3 million, a decrease of 1.9% from the same period in 2006, primarily due to decreased political revenues.

Table of Contents

Station Operating Expenses, excluding Depreciation, Amortization, LMA Fees and Non-cash Contract Termination Costs. Station operating expenses decreased \$3.5 million to \$210.6 million, a decrease of 1.6% over the same period in 2006. This decrease is primarily attributable to the contribution of our Houston and Kansas City stations to CMP.

In addition, on a same station basis, for the 336 stations in 64 markets operated for at least a full year, station operating expenses excluding depreciation, amortization, LMA fees and non-cash contract termination costs decreased \$0.4 million, or 0.2%, to \$210.6 million for the year ended December 31, 2007 compared to \$211.0 million for the year ended December 31, 2006. The decrease in same station operating expenses is primarily attributable to general decreases across our station platform.

Corporate, General and Administrative Expenses. Corporate operating expenses for the 12 months ended December 31, 2007 decreased \$15.0 million over the comparative period in 2006 due primarily to a decrease in non-cash stock compensation of \$15.2 million.

Depreciation and Amortization. Depreciation and amortization decreased \$2.8 million, or 16.4%, to \$14.6 million for the year ended December 31, 2007 compared to \$17.4 million for the year ended December 31, 2006.

LMA Fees. LMA fees totaled \$0.8 million and \$1.0 million for the years ended December 31, 2007 and 2006, respectively. LMA fees in the current year were comprised primarily of fees associated with LMAs in Cedar Rapids, Iowa, Muskegon, Michigan, and a station operated under a JSA in Nashville, Tennessee.

Impairment Charge. SFAS No. 142 requires us to review the recorded values of our FCC broadcast licenses and goodwill for impairment on an annual basis. We recorded total impairment charges of \$230.6 million in order to reduce the carrying value of certain broadcast licenses and goodwill.

The fair market values of our broadcast licenses and reporting units were determined primarily by using a discounted cash flows approach. We also utilized a market value approach, which included applying current acquisition multiples to broadcast cash flows, in order to validate our results. Several factors and variables contributed to the decrease in the fair market value of certain of our intangible assets, including long-term overall compression in acquisition multiples across the industry.

Other Expense (Income). Interest expense, net of interest income, increased by \$18.1 million, or 42.6%, to \$60.4 million for the year ended December 31, 2007 compared to \$42.4 million for the year ended December 31, 2006. This increase was primarily due to a higher average cost of bank debt and increased levels of bank debt outstanding during the current year. The following summary details the components of our interest expense, net of interest (income) (dollars in thousands).

	Year Ended		
	December 31,		
	2007	2006	Increase/ (Decrease)
Bank Borrowings term loan and revolving credit facilities	\$ 54,446	\$ 47,124	\$ 7,322
Bank borrowings yield adjustment interest rate swap	(5,528)	(5,594)	66
Bank Borrowings-Adjustment for amount reclassified from other comprehensive income upon hedge accounting discontinuation		(407)	407
Change in the fair value of interest rate swap and option agreement	13,039	(1,107)	14,146
Other interest expense	(868)	3,069	(3,937)
Interest income	(664)	(725)	61

Interest expense, net	\$ 60,425	\$ 42,360	\$ 18,065
-----------------------	-----------	-----------	-----------

Losses on Early Extinguishment of Debt. Losses on early extinguishments of debt totaled \$1.0 million for the year ended December 31, 2007 as compared with \$2.3 million for the year ended December 31, 2006. Losses in the current year are comprised of previously capitalized loan origination expenses. In connection with the new credit

Table of Contents

facility, we capitalized approximately \$1.0 million of debt issuance costs, which will be amortized to interest expense over the life of the debt.

Income Tax Expense. We recorded a tax benefit of \$38.0 million as compared with a \$5.8 million benefit during the prior year. The income tax benefit in both periods is primarily due to the impairment charge on intangible assets.

Station Operating Income. As a result of the factors described above, Station Operating Income decreased \$2.5 million to \$117.7 million, a decrease of 2.1% from the same period in 2006.

The following table reconciles Station Operating Income to Operating income (loss) as presented in the accompanying consolidated statements of operations (the most directly comparable financial measure calculated and presented in accordance with GAAP) (dollars in thousands):

	Year Ended December 31,	
	2007	2006
Operating income (loss)	\$ (151,078)	\$ (39)
Gain on assets sold/transferred to affiliate	(5,862)	(2,548)
Non cash stock compensation	9,212	24,447
LMA fees	755	963
Depreciation and amortization	14,567	17,420
Corporate general and administrative	16,845	16,565
Impairment charge	230,609	63,424
Cost associated with proposed merger	2,639	
Station Operating Income	\$ 117,687	\$ 120,232

Intangible Assets. Intangible assets, net of amortization, were \$881.9 million and \$1.1 billion as of December 31, 2007 and 2006, respectively. These intangible asset balances primarily consist of broadcast licenses and goodwill. Intangible assets, net, decreased from the prior year primarily due to a \$230.6 million impairment charge taken for the year ended December 31, 2007, in connection with our pending merger and annual impairment evaluation of intangible assets.

Pro Forma Year Ended December 31, 2007 versus Year Ended December 31, 2006

The pro forma results for 2007 compared to 2006 presented below exclude the results of the stations contributed to CMP for the period January 1, 2006 through May 4, 2006. The pro forma analysis presented below also excludes the performance of our non-radio subsidiary Broadcast Software International, Inc., referred to as BSI. BSI is our only non-radio broadcasting subsidiary and engages primarily in the sale of a software product utilized solely by the radio broadcasting industry. The entity's results were excluded primarily due to its immateriality and in order to provide our stockholders with standalone results of our core business: radio broadcasting. For the year ended December 31, 2007, BSI accounted for approximately .05% of our consolidated net revenue (see also the table below for a reconciliation of GAAP results to pro forma results for these periods) (dollars in thousands).

**Year Ended
December 31,**

	2007	2006
Net revenues	\$ 326,517	\$ 328,802
Station operating expenses excluding non-cash contract termination costs, depreciation and amortization and LMA fees	209,050	209,199
Station Operating Income	\$ 117,467	\$ 119,603

Table of Contents**Reconciliation Between Historical GAAP Results and Pro Forma Results**

	Year Ended December 31, 2007			Year Ended December 31, 2006		
	Historical GAAP	Adjustments (1)(2)	Pro Forma Results	Historical GAAP	Adjustments (3)(4)	Pro Forma Results
Net revenue	\$ 328,327	\$ (1,810)	\$ 326,517	\$ 334,322	\$ (5,520)	\$ 328,802
Station operating expenses excluding depreciation and amortization and LMA fees	210,640	(1,590)	209,050	214,089	(4,890)	209,199
Station Operating Income(5)	\$ 117,687	\$ (220)	\$ 117,467	\$ 120,233	\$ (630)	\$ 119,603

(1) Reflects the elimination of revenues from BSI of \$1,810.

(2) Reflects the elimination of operating expenses from BSI of \$1,590

(3) Reflects the elimination of revenues from BSI of \$1,892 and from stations contributed to CMP totaling \$3,628.

(4) Reflects the elimination of operating expenses from BSI of \$1,576 and from CMP totaling \$3,314.

(5) See the preceding quantitative reconciliation of Station Operating Income to operating income, the most directly comparable financial measure calculated and presented in accordance with GAAP.

Pro forma net revenues exclude the results of the stations contributed to CMP, for the period January through May, 2006. Pro forma net revenues for the twelve months ended December 31, 2007 decreased by \$2.3 million to \$326.5 million, a 0.7% decline from the same period in 2006, due to a general decrease in sales across our station platform. Pro forma station operating income decreased 1.8% from the same period in 2006.

Year Ended December 31, 2006 versus Year Ended December 31, 2005

Net Revenues. Net revenues for the 12 months ended December 31, 2006 increased \$6.9 million to \$334.3 million, a 2.1% increase from the same period in 2005, primarily as a result of organic growth over our existing station platform, partially offset by the contribution of our Houston and Kansas City stations to CMP on May 3, 2006.

In addition, on a same station basis, which excludes the results of the stations contributed to CMP, for the period May through December 31, 2005, net revenues for the 12 months ended December 31, 2006 increased \$13.5 million to \$334.3 million, an increase of 4.2% from the same period in 2005, due to organic growth across the station platform. Pro forma station operating income increased 6.0% from the same period in 2005.

Station Operating Expenses, excluding Depreciation, Amortization, LMA Fees and Non-cash Contract Termination Costs. Station operating expenses decreased \$13.3 million to \$214.1 million, a decrease of 5.9% over the same period in 2005. This decrease is attributable to the contribution of our Houston and Kansas City stations to CMP.

In addition, on a same station basis, for the 307 stations in 58 markets operated for at least a full year, station operating expenses excluding depreciation, amortization, LMA fees and non-cash contract termination costs increased \$0.2 million, or 0.1%, to \$214.1 million for the year ended December 31, 2006 compared to \$213.8 million for the year ended December 31, 2005. The increase in same station operating expenses is primarily attributable to general increases across our station platform.

Corporate, General and Administrative Expenses. Corporate operating expenses for the 12 months ended December 31, 2006 have increased over the comparative period in 2005 due primarily to increased personnel costs associated with the management of CMP partially offset by a decline in professional fees. In addition non-cash stock compensation increased \$21.3 million.

Depreciation and Amortization. Depreciation and amortization decreased \$3.8 million, or 17.9%, to \$17.4 million for the year ended December 31, 2006 compared to \$21.2 million for the year ended December 31, 2005.

Table of Contents

LMA Fees. LMA fees totaled \$1.0 million and \$1.0 million for the years ended December 31, 2006 and 2005, respectively. LMA fees in the current year were comprised primarily of fees associated with LMAs in Beaumont, Texas and Vinton, Iowa, and a station operated under a joint services agreement in Nashville, Tennessee.

Impairment Charge. SFAS No. 142 requires us to review the recorded values of our FCC broadcast licenses and goodwill for impairment on an annual basis. We completed our annual evaluation during the fourth quarter of 2006 and recorded an impairment charge of \$63.4 million in order to reduce the carrying value of certain broadcast licenses and goodwill.

The fair market values of our broadcast licenses and reporting units were determined primarily by using a discounted cash flows approach. We also utilized a market value approach, which included applying current acquisition multiples to broadcast cash flows, in order to validate our results. Several factors and variables contributed to the decrease in the fair market value of certain of our intangible assets, including long-term overall compression in acquisition multiples across the industry.

Other Expense (Income). Interest expense, net of interest income, increased by \$19.6 million, or 86.5%, to \$42.4 million for the year ended December 31, 2006 compared to \$22.7 million for the year ended December 31, 2005. This increase was primarily due to a higher average cost of bank debt and increased levels of bank debt outstanding during the current year, principally the result of the stock repurchase program. The following summary details the components of our interest expense, net of interest (income) (dollars in thousands).

	Year Ended		
	December 31,		
	2006	2005	Increase/ (Decrease)
Bank Borrowings term loan and revolving credit facilities	\$ 47,124	\$ 26,728	\$ 20,396
Bank borrowings yield adjustment interest rate swap	(5,594)	(3,880)	(1,714)
Bank Borrowings-Adjustment for amount reclassified from other comprehensive income upon hedge accounting discontinuation	(407)		(407)
Change in the fair value of interest rate option agreement	(1,107)	(31)	(1,076)
Other interest expense	3,069	999	2,070
Interest income	(725)	(1,101)	376
Interest expense, net	\$ 42,360	\$ 22,715	\$ 19,645

Losses on Early Extinguishment of Debt. Losses on early extinguishments of debt totaled \$2.3 million for the year ended December 31, 2006 as compared with \$1.2 million for the year ended December 31, 2005. Losses in the current year are comprised of previously capitalized loan origination expenses. In connection with the new credit facility, we capitalized approximately \$1.6 million of debt issuance costs, which will be amortized to interest expense over the life of the debt.

Income Tax Expense. We recorded a tax benefit of \$5.8 million as compared with a \$17.1 million benefit during the prior year. The income tax benefit in both periods is primarily due to the impairment charge on intangible assets.

Station Operating Income. As a result of the factors described above, Station Operating Income increased \$6.7 million to \$120.2 million, an increase of 5.8% from the same period in 2005.

Table of Contents

The following table reconciles Station Operating Income to Operating income (loss) as presented in the accompanying consolidated statements of operations (the most directly comparable financial measure calculated and presented in accordance with GAAP) (dollars in thousands):

	Year Ended December 31,	
	2006	2005
Operating income (loss)	\$ (39)	\$ (205,288)
Gain on assets sold/transferred to affiliate	(2,548)	
Non cash stock compensation	24,447	3,121
Restructuring charges (credits)		(215)
LMA fees	963	981
Depreciation and amortization	17,420	21,223
Corporate general and administrative	16,565	16,068
Non cash contract termination costs		13,571
Impairment charge	63,424	264,099
Station Operating Income	\$ 120,232	\$ 113,560

Intangible Assets. Intangible assets, net of amortization, were \$1.1 billion and \$1.2 billion as of December 31, 2006 and 2005, respectively. These intangible asset balances primarily consist of broadcast licenses and goodwill, although we possess certain other intangible assets obtained in connection with our acquisitions, such as non-compete agreements. Intangible assets, net, decreased from the prior year primarily due to a \$63.4 million impairment charge taken in the fourth quarter in connection with our annual impairment evaluation of intangible assets.

Pro Forma Year Ended December 31, 2006 versus Year Ended December 31, 2005

The pro forma results for 2006 compared to 2005 presented below exclude the results of the stations contributed to CMP, for the period May through December 31, 2005. The pro forma analysis presented below also excludes the performance of our non-radio subsidiary Broadcast Software International, Inc., referred to as BSI. BSI is our only non-radio broadcasting subsidiary and engages primarily in the sale of a software product utilized solely by the radio broadcasting industry. The entity's results were excluded primarily due to its relative immateriality and in order to provide our stockholders with standalone results of our core business: radio broadcasting. For the year ended December 31, 2006, BSI accounted for approximately 0.6% of our consolidated net revenue (see also the table below for a reconciliation of GAAP results to pro forma results for these periods) (dollars in thousands).

Reconciliation Between Historical GAAP Results and Pro Forma Results

	Year Ended	
	December 31,	
	2006	2005
Net revenues	\$ 328,802	\$ 318,937
Station operating expenses excluding non-cash contract termination costs, depreciation and amortization and LMA fees	209,199	205,750

Station Operating Income	\$ 119,603	\$ 113,187
--------------------------	------------	------------

Table of Contents**Reconciliation Between Historical GAAP Results and Pro Forma Results**

	Year Ended December 31, 2006			Year Ended December 31, 2005		
	Historical GAAP	Adjustments (1)(2)	Pro Forma Results	Historical GAAP	Adjustments (3)(4)	Pro Forma Results
Net Revenues	334,322	(5,520)	328,802	327,402	(8,465)	318,937
Station operating expenses excluding depreciation and amortization and LMA fees	214,089	(4,890)	209,199	227,413	(21,663)	205,750
Station Operating Income(5)	120,233	(630)	119,603	99,989	13,198	113,187

- (1) Reflects the elimination of revenues from BSI of \$1,892 and from stations contributed to CMP totaling \$3,628.
- (2) Reflects the elimination of operating expenses from BSI of \$1,576 and from stations contributed to CMP totaling \$3,314.
- (3) Reflects the elimination of revenues from BSI of \$1,849 and transfer of Houston and Kansas City to CMP \$6,616.
- (4) Reflects the elimination of operating expenses from BSI of \$1,654, elimination of non-cash contract termination costs of \$13,571, and stations transferred to CMP \$6,438.
- (5) See the preceding quantitative reconciliation of Station Operating Income to operating income, the most directly comparable financial measure calculated and presented in accordance with GAAP.

Pro forma net revenues exclude the results of the stations contributed to CMP, for the period May through December, 2005. Net revenues for the twelve months ended December 31, 2006 increased \$9.9 million to \$328.8 million, an increase of 3.1% from the same period in 2005, due to organic growth across our station platform. Pro forma station operating income increased 5.7% from the same period in 2005.

Seasonality

We expect that our operations and revenues will be seasonal in nature, with generally lower revenue generated in the first quarter of the year and generally higher revenue generated in the second and fourth quarters of the year. The seasonality of our business reflects the adult orientation of our formats and relationship between advertising purchases on these formats with the retail cycle. This seasonality causes and will likely continue to cause a variation in our quarterly operating results. Such variations could have an effect on the timing of our cash flows.

Liquidity and Capital Resources

On July 23, 2007, we entered into a Merger Agreement with Parent and Merger Sub. Under the terms of the Merger Agreement, Merger Sub will be merged with and into the Company, with the Company continuing as the surviving corporation and a wholly owned subsidiary of Parent.

It is anticipated that the funds necessary to consummate the merger and related transactions will be funded by new or existing credit facilities and equity financing arranged by Parent. Our capitalization, liquidity and capital resources will change substantially if the merger is approved by our stockholders and is consummated. Upon the closing of the merger, we will be highly leveraged. Our liquidity requirements will be significant, primarily due to debt service requirements and financing costs relating to the indebtedness expected to be incurred in connection with the closing of the refinancing transactions.

We have also agreed that, until the completion of the merger, except as expressly contemplated or permitted by the merger agreement, required by applicable law or consented to in writing by Parent (which consent may not be unreasonably withheld, conditioned or delayed), we will not, and will not permit any of our subsidiaries to:

except in the ordinary course of business with respect to departing employees or in connection with cashless exercises pursuant to our stock incentive plans, declare or pay any dividend, or make any other distribution on, or directly or indirectly redeem, purchase or otherwise acquire or encumber, any shares of our capital

Table of Contents

stock or other equity interests or any securities or obligations convertible into or exchangeable for any shares of our capital stock or other equity interests;

purchase, sell, lease, license, transfer, mortgage, abandon, encumber or otherwise subject to a lien or otherwise dispose of, in whole or in part, any properties, rights or assets having a value in excess of \$500,000 individually or \$2,500,000 in the aggregate, other than in the ordinary course of business;

make any capital expenditures in any fiscal year (other than those provided for in our budget) in excess of \$500,000, in the aggregate;

become liable for or guarantee any indebtedness, capital lease obligation, or any keep well or other agreement to maintain any financial statement of another person, or modify or refinance any existing indebtedness, in excess of \$1,500,000 in any transaction or series of related transactions, or in excess of \$5,000,000 in the aggregate for such indebtedness, except under specified exceptions or in the ordinary course of business and consistent with past practice;

make or agree to make any investment in excess of \$1,500,000 individually or \$5,000,000 in the aggregate in CMP, except as may be required under certain pre-existing contracts;

make or agree to make any acquisition of another person or business in excess of \$2,500,000 individually or \$10,000,000 in the aggregate or in any entity that holds, or has an attributable interest in, any license, authorization, permit or approval issued by the FCC if such acquisition or investment would reasonably be expected to delay, impede or prevent receipt of the consent by the FCC to the merger;

other than in the ordinary course of business, enter into any new lease or amend the terms of any existing lease of real property that would require payments over the remaining term of such lease in excess of \$500,000 individually or \$2,500,000 in the aggregate (excluding any renewal terms);

take any action that is intended to result in any of the conditions to effecting the merger becoming incapable of being satisfied; or

authorize, agree or commit to do any of the foregoing.

Historically, our principal need for funds has been to fund the acquisition of radio stations, expenses associated with our station and corporate operations, capital expenditures, repurchases of our Class A Common Stock, and interest and debt service payments. The following table summarizes our historical funding needs for the years ended December 31, 2007, 2006 and 2005:

	2007	2006	2005
Acquisitions and purchase of intangible assets	\$ 975	\$ 12,577	\$ 84,096
Capital expenditures	4,789	9,211	9,315
Repurchases of common stock	104	224,040	95,739
Repayments of bank borrowings	764,950	637,500	560,102
Interest payments	54,887	45,623	22,684

In the short term, our principal future need for funds will include the funding of station operating expenses, corporate general and administrative expenses and interest and debt service payments. In addition, in the long term, our funding

needs will include future acquisitions and capital expenditures associated with maintaining our station and corporate operations and implementing HD Radio™ technology.

In December 2004, we purchased 240 perpetual licenses from iBiquity, which will enable us to convert to and utilize iBiquity's HD Radio™ technology on up to 240 of our stations. Under the terms of the agreement with iBiquity, we will convert certain of our stations over a seven-year period. We anticipate that the average cost to convert each station will be between \$130,000 and \$150,000.

Our principal sources of funds for these requirements have been cash flow from operations and cash flow from financing activities, such as the proceeds from borrowings under credit facilities. We believe that our presently projected cash flow from operations and present financing arrangements, including availability under our existing credit facilities, or borrowings that would be available from future financing arrangements, will be sufficient to

Table of Contents

meet our future capital needs, and operations and debt service for the next twelve months. However, our cash flow from operations is subject to such factors as shifts in population, station listenership, demographics or audience tastes, and borrowings under financing arrangements are subject to financial covenants that can restrict our financial flexibility. Further, our ability to obtain additional equity or debt financing is also subject to market conditions and operating performance. As such, there can be no assurance that we will be able to obtain such financing at terms, and on the timetable, that may be necessary to meet our future capital needs. See Item I.A. Risk Factors.

Cash Flows from Operating Activities.

	2007	2006	2005
Net cash provided by operating activities	\$ 46,057	\$ 65,322	\$ 78,396

Net cash provided by operating activities decreased by approximately \$19.3 million or 29.5% for the year ended December 31, 2007. Excluding non-cash items, we generated comparable levels of operating income for 2007 as compared with the prior years. As a result, the decrease in cash flows from operations was primarily attributable to the timing of certain payments.

Cash Flows from Investing Activities.

	2007	2006	2005
Net cash provided by investing activities	\$ (29)	\$ (19,217)	\$ (92,763)

Net cash used in investing activities decreased \$19.2 million, for the year ended December 31, 2007. The decrease is due to the absence, in the current-year period of acquisitions and the purchases of intangible assets, \$6.0 million of proceeds from the sale of assets and a \$4.4 million reduction of capital expenditures. For the year ended December 31, 2006, net cash used in investing activities decreased \$73.6 million, to \$19.2 million, from \$92.8 million for the year ended December 31, 2005. For fiscal 2005, we invested approximately \$84.1 million in station acquisitions and the purchase of certain broadcast licenses in its Houston, Texas market.

Cash Flows from Financing Activities.

	2007	2006	2005
Net cash provided by financing activities	\$ (16,134)	\$ (48,834)	\$ (12,472)

For the year ended December 31, 2007 net cash used in financing activities decreased \$32.7 million, due to a decrease in costs associated with share repurchases offset by a decrease in net proceeds from the 2007 refinancing as compared to the 2006 refinancing. During 2006, net cash used in financing activities increased \$36.3 million. Primarily due to the repurchase of 14,261,000 shares of Class A Common Stock and 5,000,000 shares of Class B Common Stock, offset by an increase in borrowings under a new credit facility primarily used to fund these repurchases. During 2005 net cash used in financing related primarily to \$95.7 million paid to repurchase 7,766,223 shares of our Class A Common Stock, offset by net borrowings under our credit facilities of \$86.9 utilized to fund acquisitions and the share repurchases.

Historical Acquisitions and Dispositions.

Completed Acquisitions

We did not complete any acquisitions during 2007.

Pending Acquisitions. As of December 31, 2007, we had pending a swap transaction pursuant to which it would exchange one of its Fort Walton Beach, Florida radio stations, WYZB-FM, for another owned by Star Broadcasting, Inc., WTKE-FM. Specifically, the purchase agreement provided for the exchange of WYZB-FM plus \$1.5 million in cash for WTKE-FM. Following the filing of the assignment applications with the FCC the applications were challenged by Qantum Communications, who has some radio stations in the market and complained to the FCC that the swap would give us an unfair competitive advantage (because the station we would acquire reaches more people than the station we would be giving up). Qantum also initiated litigation in the United States District Court for the Southern District of Florida against the current owner of WTKE-FM, and secured a court decision that would

Table of Contents

require the sale of the station to Quantum instead of us. Although that decision is still subject to appeal, there is a possibility that we will be unable to consummate the exchange it had proposed with the seller.

As of December 31, 2007, we had pending a swap transaction pursuant to which it would exchange its Canton, OH Station, WRQK-FM, for eight stations owned by Clear Channel in Ann Arbor, Michigan (WTKA-AM, WLBY-AM, WWWW-FM, WQKL-FM) and Battle Creek, Michigan (WBFN-AM, WBCK-FM, WBCK-AM and WBXX-FM). Two of the AM stations in Battle Creek, WBCK-AM and WBFN-AM, will be disposed of by the Company simultaneously with the closing of the swap transaction to comply with the FCC's broadcast ownership limits; WBCK-AM will be placed in a trust for the sale of the station to an unrelated third party and WBFN-AM will be transferred to Family Life Broadcasting System.

Completed Dispositions

On November 20, 2007, we completed the sale of our Caribbean stations to Gem Radio 5 Limited which purchased all the operations of our Caribbean stations for \$6.0 million. The transaction resulted in the recognition of a gain of approximately \$5.9 million. We recorded the gain within continuing operations within our consolidated statement of operations for the year ended December 31, 2007. The below table contains certain operating data related to the stations sold for the periods presented (the total net assets approximated \$0.1 million for these stations):

	2007	2006	2005
Net revenue	\$ 1,764	\$ 1,918	\$ 1,687
Total expense	1,338	1,396	1,281
Operating income	\$ 426	\$ 522	\$ 406

Sources of Liquidity. On June 11, 2007, the Company entered into an amendment to its existing credit agreement, dated June 7, 2006, by and among the Company, Bank of America, N.A., as administrative agent, and the lenders party thereto. The credit agreement, as amended, is referred to herein as the Amended Credit Agreement.

The Amended Credit Agreement provides for a replacement term loan facility, in the original aggregate principal amount of \$750.0 million, to replace the prior term loan facility, which had an outstanding balance of approximately \$713.9 million, and maintains the pre-existing \$100.0 million revolving credit facility. The proceeds of the replacement term loan facility, fully funded on June 11, 2007, were used to repay the outstanding balances under the prior term loan facility and under the revolving credit facility.

Our obligations under the Amended Credit Agreement are collateralized by substantially all of our assets in which a security interest may lawfully be granted (including FCC licenses held by its subsidiaries), including, without limitation, intellectual property and all of the capital stock of our direct and indirect domestic subsidiaries (except for Broadcast Software International, Inc.) and 65% of the capital stock of certain first-tier foreign subsidiaries. In addition, our obligations under the Amended Credit Agreement are guaranteed by certain of our subsidiaries.

The Amended Credit Agreement contains terms and conditions customary for financing arrangements of this nature. The replacement term loan facility will mature on June 11, 2014 and will amortize in equal quarterly installments beginning on September 30, 2007, with 0.25% of the initial aggregate advances payable each quarter during the first six years of the term, and 23.5% due in each quarter during the seventh year. The revolving credit facility will mature on June 7, 2012 and, except at our option, the commitment will remain unchanged up to that date.

Borrowings under the replacement term loan facility bear interest, at our option, at a rate equal to LIBOR plus 1.75% or the Alternate Base Rate (defined as the higher of the Bank of America Prime Rate and the Federal Funds rate plus 0.50%) plus 0.75%. Borrowings under the revolving credit facility bear interest, at our option, at a rate equal to LIBOR plus a margin ranging between 0.675% and 2.0% or the Alternate Base Rate plus a margin ranging between 0.0% and 1.0% (in either case dependent upon our leverage ratio).

In May 2005, we entered into a forward-starting interest rate swap agreement that became effective in March 2006, following the termination of our previous swap agreement. This swap agreement effectively fixes the interest

Table of Contents

rate, based on LIBOR, on \$400.0 million of our floating rate bank borrowings through March 2009. As of December 31, 2007, prior to the effect of the May 2005 Swap, the effective interest rate of the outstanding borrowings pursuant to the credit facility was approximately 7.325%; inclusive of the May 2005 Swap, the effective interest rate was 6.6%. At December 31, 2006, our effective interest rate, including the fixed component of the swap, on loan amounts outstanding under our credit facility was 6.8%.

Certain mandatory prepayments of the term loan facility will be required upon the occurrence of specified events, including upon the incurrence of certain additional indebtedness (other than under any incremental credit facilities under the Amended Credit Agreement) and upon the sale of certain assets.

The representations, covenants and events of default in the Amended Credit Agreement are customary for financing transactions of this nature. Events of default in the Amended Credit Agreement include, among others, (a) the failure to pay when due the obligations owing under the credit facilities; (b) the failure to perform (and not timely remedy, if applicable) certain covenants; (c) cross default and cross acceleration; (d) the occurrence of bankruptcy or insolvency events; (e) certain judgments against the Company or any of its subsidiaries; (f) the loss, revocation or suspension of, or any material impairment in the ability to use any of our material FCC licenses; (g) any representation or warranty made, or report, certificate or financial statement delivered, to the lenders subsequently proven to have been incorrect in any material respect; (h) the occurrence of a Change in Control (as defined in the Amended Credit Agreement); and (i) violation of certain financial covenants. Upon the occurrence of an event of default, the lenders may terminate the loan commitments, accelerate all loans and exercise any of their rights under the Amended Credit Agreement and the ancillary loan documents as a secured party. As of December 31, 2007, the Company was in compliance with all financial and non-financial covenants.

On March 13, 2008, we entered into a second amendment to the Amended Credit Agreement to, among other things, (i) amend the definition of Change of Control to specify that the transactions contemplated by the Merger Agreement shall not constitute a Change of Control; (ii) specify that no payment contemplated by the Merger Agreement, including the merger consideration, shall constitute a Restricted Payment as defined in the Amended Credit Agreement; (iii) modify certain financial and other covenants, including those related to mandatory prepayment based on cash flows and allowable total leverage ratios; (iv) modifies certain elements of the collateral required to be pledged to secure the Company's obligations under the Amended Credit Agreement to exclude voting stock of the Company and its subsidiaries under certain circumstances; (v) provide for an increase to the interest rates for the loans under the Amended Credit Agreement by 0.75% per year; (vi) provide that the Company will not make any revolving loan borrowings under the Amended Credit Agreement for the purpose of making any payment contemplated by the Merger Agreement, including, without limitation, payment of the merger consideration; (vii) eliminate the incremental facilities currently provided for in the existing credit agreement; and (viii) require the Company to pay an amendment fee of 2% of the revolver loan commitment and outstanding balance on term loans to those lenders under the Amended Credit Agreement who consented to the amendments. Each of the foregoing amendments and agreements shall be effective should we issue a written notice to the administrative agent specifying such effectiveness, which we may only so specify on the date of the consummation or substantial consummation of the transactions contemplated by the Merger Agreement.

In connection with the retirement of our pre-existing credit facilities, we recorded a loss on early extinguishment of debt of \$1.0 million for 2007, which was comprised of previously capitalized loan origination expenses. In connection with the new credit facility, we capitalized approximately \$1.0 million of debt issuance costs, which will be amortized to interest expense over the life of the debt.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, our management, in consultation with the Audit Committee of our Board, evaluates these estimates, including those related to bad debts, intangible assets, income taxes, restructuring and contingencies and litigation. We base our estimates on historical experience and on various assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets

Table of Contents

and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

We recognize revenue from the sale of commercial broadcast time to advertisers when the commercials are broadcast, subject to meeting certain conditions such as persuasive evidence that an arrangement exists and collection is reasonably assured. These criteria are generally met at the time an advertisement is broadcast.

We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We determine the allowance based on historical write-off experience and trends. We review our allowance for doubtful accounts monthly. Past due balances over 120 days are reviewed individually for collectability. All other balances are reviewed and evaluated on a pooled basis. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. Although our management believes that the allowance for doubtful accounts is our best estimate of the amount of probable credit losses, if the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

We have significant intangible assets recorded in our accounts. These intangible assets are comprised primarily of broadcast licenses and goodwill acquired through the acquisition of radio stations. SFAS No. 142, *Goodwill and other Intangible Assets*, requires that the carrying value of our goodwill and certain intangible assets be reviewed at least annually for impairment and charged to results of operations in the periods in which the recorded value of those assets is more than their fair market value. For 2004, we reviewed the fair market value of our broadcast licenses and goodwill and determined that their fair value exceeded their carrying amount and, as such, did not record an impairment charge. During 2007, 2006, and 2005, we recorded impairment charges of approximately \$230.6, \$63.4, and \$264.1 million, respectively in order to reduce the carrying value of certain broadcast licenses and goodwill to their respective fair market values. As of December 31, 2007, we have \$881.9 million in intangible assets and goodwill, which represent approximately 83% of our total assets.

The fair market value of our broadcast licenses and reporting units, for purposes of our annual impairment tests, was derived primarily by using a discounted cash flows approach. The fair market values derived include assumptions that contain a variety of variables. These variables are based on industry data, historical experience and estimates of future performance and include, but are not limited to, revenue and expense growth rates for each radio market, revenue and expense growth rates for our stations in each market, overall discount rates based on our weighted average cost of capital and acquisition multiples. The assumptions used in estimating the fair market value of goodwill are based on currently available data and our management's best estimates and, accordingly, a change in market conditions or other factors could have a significant effect on the estimated value. A future decrease in the fair market value of broadcast licenses or goodwill in a market could result in additional impairment charges.

In connection with the elimination of amortization of broadcast licenses upon the adoption of SFAS No. 142, the reversal of our deferred tax liabilities relating to those intangible assets is no longer assured within our net operating loss carry-forward period. We have established a valuation allowance of approximately \$170 million as of December 31, 2007 based on our assessment of whether it is more likely than not these deferred tax assets will be realized. Should we determine that we would be able to realize all or part of our net deferred tax assets in the future, reduction of the valuation allowance would be recorded in income in the period such determination was made.

Table of Contents**Summary Disclosures About Contractual Obligations and Commercial Commitments**

The following tables reflect a summary of our contractual cash obligations and other commercial commitments as of December 31, 2007 (dollars in thousands):

Payments Due By Period

Contractual Cash Obligations:	Total	Less Than 1 Year	2 to 3 Years	4 to 5 Years	After 5 Years
Long-term debt(1)(2)	\$ 736,300	\$ 13,490	\$ 14,800	\$ 14,800	\$ 693,210
Operating leases	48,175	8,751	13,360	9,029	17,025
Digital radio capital obligations(3)	27,560	1,000	8,360	10,400	7,800
Other operating contracts(4)	23,614	10,143	11,311	2,160	
Total Contractual Cash Obligations	\$ 835,649	\$ 33,384	\$ 47,831	\$ 36,399	\$ 718,035

- (1) Under our credit agreement, the maturity of our outstanding debt could be accelerated if we do not maintain certain restrictive financial and operating covenants.
- (2) Based on long-term debt amounts outstanding at December 31, 2007, scheduled annual principal amortization and the current effective interest rate on such long-term debt amounts outstanding, we would be obligated to pay approximately \$309.6 million of interest on borrowings through June 2014 (\$53.6 million due in less than one year, \$105.6 million due in years two and three, \$103.4 million due in years four and five and \$47.0 million due after five years).
- (3) Amount represents the estimated capital requirements to convert 212 of our stations to a digital broadcasting format in future periods.
- (4) Consists of contractual obligations for goods or services that are enforceable and legally binding obligations that include all significant terms. In addition, amounts include \$2.5 million of station acquisition purchase price that was deferred beyond the closing of the transaction and that is being paid monthly over a 5-year period and also includes employment contract with CEO, Mr. L. Dickey.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as of December 31, 2007.

Accounting Pronouncements

See note 1 in the accompanying notes to the audited financial statements.

Intangibles

As of December 31, 2007, approximately 83.2% of our total assets consisted of intangible assets, such as radio broadcast licenses and goodwill, the value of which depends significantly upon the operational results of our business.

We could not operate the radio stations without the related FCC license for each station. FCC licenses are renewed every eight years; consequently, we continually monitor the activities of our stations to ensure they comply with all regulatory requirements.

Historically, all of our licenses have been renewed at the end of their respective eight-year periods, and we expect that all licenses will continue to be renewed in the future.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Interest Rate Risk

At December 31, 2007, 45.7% of our long-term debt bears interest at variable rates. Accordingly, our earnings and after-tax cash flow are affected by changes in interest rates. Assuming the current level of borrowings at variable rates and assuming a one percentage point change in the 2007 average interest rate under these borrowings,

Table of Contents

it is estimated that our 2007 interest expense and net income would have changed by \$7.4 million. As part of our efforts to mitigate interest rate risk, in May 2005, we entered into a forward-starting (effective March 2006) LIBOR-based interest rate swap agreement that effectively fixed the interest rate, based on LIBOR, on \$400.0 million of our current floating rate bank borrowings for a three-year period. This agreement is intended to reduce our exposure to interest rate fluctuations and was not entered into for speculative purposes. Segregating the \$336.3 million of borrowings outstanding at December 31, 2007 that are not subject to the interest rate swap and assuming a one percentage point change in the 2007 average interest rate under these borrowings, it is estimated that our 2007 interest expense and net income would have changed by \$3.4 million.

In the event of an adverse change in interest rates, our management would likely take actions, in addition to the interest rate swap agreement discussed above, to mitigate our exposure. However, due to the uncertainty of the actions that would be taken and their possible effects, additional analysis is not possible at this time. Further, such analysis would not consider the effects of the change in the level of overall economic activity that could exist in such an environment.

Foreign Currency Risk

As a result of the sale of our two foreign subsidiaries, consummated on November 20, 2007, we no longer measure any of our operations in foreign currencies. As a result, our financial results are no longer subject to factors such as changes in foreign currency exchange rates or weak economic conditions in the foreign markets where we had operations.

Item 8. *Financial Statements and Supplementary Data*

The information in response to this item is included in our consolidated financial statements, together with the report thereon of KPMG LLP, beginning on page F-1 of this Annual Report on Form 10-K, which follows the signature page hereto.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

Not applicable.

Item 9A. *Controls and Procedures*

(a) Evaluation of Disclosure Controls and Procedures

We maintain a set of disclosure controls and procedures designed to ensure that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. Such disclosure controls and procedures are designed to ensure that information required to be disclosed in reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chairman, President and Chief Executive Officer (CEO) and Executive Vice President, Treasurer and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure. At the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including our CEO and CFO, of the effectiveness of our disclosure controls and procedures. Based on that evaluation, the CEO and CFO have concluded our disclosure controls and procedures were effective as of December 31, 2007.

(b) Management's Report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). The Company's management assessed the effectiveness of its internal control over financial reporting as of December 31, 2007. In making this assessment, the Company's management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. The

Table of Contents

Company's management has concluded that, as of December 31, 2007, its internal control over financial reporting is effective based on these criteria.

KPMG LLP, the Company's independent registered public accounting firm, has issued an attestation report on the effectiveness of internal control over financial reporting as of December 31, 2007, which is included in Item 9A(d).

Lewis W. Dickey, Jr.

Martin R. Gausvik

Chairman, President, Chief Executive Officer and Director

Executive Vice President, Treasurer and Chief Financial Officer

(c) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended December 31, 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

(d) Report of Independent Registered Public Accounting Firm

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Cumulus Media, Inc.:

We have audited Cumulus Media, Inc.'s (the Company) internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Cumulus Media Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, as set forth in Item 9A(b) on the Company's Annual Report on Form 10K for the year ended December 31, 2007. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have

a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that

Table of Contents

controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Cumulus Media, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Cumulus Media, Inc. as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders' equity and comprehensive income (loss), and cash flows for each of the years in the three-year period ended December 31, 2007, and our report dated March 17, 2008 expressed an unqualified opinion on those consolidated financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
Cumulus Media, Inc.:

We have audited the accompanying consolidated balance sheets of Cumulus Media, Inc. (the Company) and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of operations, stockholders equity and comprehensive income (loss), and cash flows for each of the years in the three-year period ended December 31, 2007. In connection with our audits of the consolidated financial statements, we also have audited the accompanying financial statement schedule for the years ended December 31, 2007, 2006, and 2005. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Cumulus Media, Inc. and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 1 to the consolidated financial statements, effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123R, *Share Based Payment*.

As discussed in Note 1 to the consolidated financial statements, effective January 1, 2007, the Company adopted the Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109*.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 17, 2008 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies:

Description of Business

Cumulus Media Inc., (we, Cumulus or the Company) is a radio broadcasting corporation incorporated in the state of Delaware, focused on acquiring, operating and developing commercial radio stations in mid-size radio markets in the United States.

Principles of Consolidation

The consolidated financial statements include the accounts of Cumulus and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Reclassification

A reclassification related to non-cash stock compensation has been made to the consolidated financial statements for the year ended December 31, 2005 in the amount of \$15.1 million to make them comparable to those presented for the years ended December 31, 2007 and 2006.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to bad debts, intangible assets, derivative financial instruments, income taxes, restructuring and contingencies and litigation. The Company bases its estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates under different assumptions or conditions.

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Accounts Receivable and Concentration of Credit Risks

Accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company determines the allowance based on historical write-off experience and trends. The Company reviews its allowance for doubtful accounts monthly. Past due balances over 120 days are reviewed individually for collectability. All other balances are reviewed and evaluated on a pooled basis. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company does not have any off-balance-sheet credit exposure related to its customers.

In the opinion of management, credit risk with respect to accounts receivable is limited due to the large number of diversified customers and the geographic diversification of the Company's customer base. The Company performs ongoing credit evaluations of its customers and believes that adequate allowances for any uncollectible accounts receivable are maintained.

F-7

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Property and Equipment

Property and equipment are stated at cost. Property and equipment acquired in business combinations are recorded at their estimated fair values on the date of acquisition under the purchase method of accounting. Equipment under capital leases is stated at the present value of minimum lease payments.

Depreciation of property and equipment is computed using the straight-line method over the estimated useful lives of the assets. Equipment held under capital leases and leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life of the asset or the remaining term of the lease. Routine maintenance and repairs are expensed as incurred. Depreciation of construction in progress is not recorded until the assets are placed into service.

Capitalized Software Costs

The Company capitalizes certain internal software development costs under the provisions of Statement of Position No. 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use* (SOP 98-1). SOP 98-1 requires computer software costs associated with internal use software to be charged to operations as incurred until certain capitalization criteria are met. Costs incurred during the preliminary project stage and the post-implementation stages are expensed as incurred. Certain qualifying costs incurred during the application development stage are capitalized. These costs generally consist of coding, and testing activities. Capitalization begins when the preliminary project stage is complete, management with the relevant authority authorizes and commits to the funding of the software project, and it is probable that the project will be completed and the software will be used to perform the function intended. These costs are amortized using the straight-line method over the estimated useful life of the software, generally three years.

Asset Retirement Obligations

The Company adopted SFAS No. 143, *Accounting for Asset Retirement Obligations* in 2003. This statement requires that the fair value of a legal liability for an asset retirement obligation be recorded in the period in which it is incurred if a reasonable estimate of fair value can be made. Upon recognition of a liability, the asset retirement cost is recorded as an increase in the carrying value of the related long-lived asset and then depreciated over the life of the asset. The Company determined that certain obligations under lease agreements for studio, transmitter sites and tower sites meet the scope requirements of SFAS No. 143 and, accordingly, determined the fair value of our obligation in accordance with the statement. The resulting obligation fair value was estimated to be inconsequential and, as a result, an asset retirement obligation was not recorded by the Company.

Goodwill and Intangible Assets

Our intangible assets are comprised of broadcast licenses, goodwill and certain other intangible assets. Goodwill represents the excess of costs over fair value of assets of businesses acquired. In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life, which include our broadcast licenses, are not amortized, but instead tested for impairment at least annually. SFAS No. 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for

impairment in accordance with SFAS No. 144, *Accounting for Impairment or Disposal of Long-Lived Assets*.

In determining that our broadcast licenses qualified as indefinite lived intangibles, management considered a variety of factors including the Federal Communications Commission's historical track record of renewing broadcast licenses, the very low cost to us of renewing the applications, the relative stability and predictability of the radio industry, and the relatively low level of capital investment required to maintain the physical plant of a radio station.

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Impairment of Goodwill and Indefinite Life Intangible Assets

SFAS No. 142 requires the Company to test goodwill and indefinite life intangible assets for impairment on an annual basis and more frequently if events or circumstances indicate that the asset may be impaired. The Company performs its annual test in the fourth quarter of each year and, in doing so, SFAS No. 142 requires that the Company determine the appropriate reporting unit and compare the fair value of the reporting unit or indefinite life intangible assets with its carrying amount.

Debt Issuance Costs

The costs related to the issuance of debt are capitalized and amortized to interest expense over the life of the related debt. During the years ended December 31, 2007, 2006 and 2005 the Company recognized amortization expense of debt issuance costs of \$0.4 million, \$0.2 million, and \$0.4 million, respectively.

Extinguishment of Debt

The Company's losses on extinguishment of debt have been reflected as a component of income (loss) from continuing operations, consistent with the provisions of SFAS No. 145, *Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections*. Losses recognized during 2007, 2006 and 2005 relate to the retirement of certain term loan borrowings under the Company's credit facilities.

Derivative Financial Instruments

The Company accounts for derivative financial instruments in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This standard requires the Company to recognize all derivatives on the balance sheet at fair value. Fair value changes are recorded in income for any contracts not classified as qualifying hedging instruments. For derivatives qualifying as cash flow hedge instruments, the effective portion of the derivative fair value change must be recorded through other comprehensive income, a component of stockholders' equity.

Revenue Recognition

Revenue is derived primarily from the sale of commercial airtime to local and national advertisers. Revenue is recognized as commercials are broadcast.

Trade Agreements

The Company trades commercial airtime for goods and services used principally for promotional, sales and other business activities. An asset and liability is recorded at the fair market value of the goods or services received, which approximates the fair value of the air time surrendered in the trade. Trade revenue is recorded and the liability is relieved when commercials are broadcast and trade expense is recorded and the asset relieved when goods or services are consumed.

Local Marketing Agreements

In certain circumstances, the Company enters into a local marketing agreement (LMA) or time brokerage agreement with a Federal Communications Commission (FCC) licensee of a radio station. In a typical LMA, the licensee of the station makes available, for a fee, airtime on its station to a party, which supplies programming to be broadcast on that airtime, and collects revenues from advertising aired during such programming. Revenues earned and LMA fees incurred pursuant to local marketing agreements or time brokerage agreements are recognized at their gross amounts in the accompanying consolidated statements of operations.

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As of December 31, 2007, 2006, and 2005, we operated seven, one and twelve radio stations under LMAs. The stations operated under LMAs contributed \$5.0 million, \$1.0 million and \$2.2 million, in years 2007, 2006, and 2005, respectively, to the consolidated net revenues of the Company.

Investment in Affiliate

As of December 31, 2007 the Company had a 25% ownership interest in Cumulus Media Partners (CMP), which it entered into in May 2006. The investment is accounted for under the equity method (see note 8). The Company's consolidated operating results include its proportionate share of CMP's losses for the years ended December 31, 2007 and 2006. As of December 31, 2007, our investment in CMP in the aggregate did not exceed our proportionate share of the net assets of CMP.

Stock-based Compensation

Effective January 1 2006, the Company adopted SFAS No. 123R. The Company currently uses the Black-Scholes option pricing model to determine the fair value of its stock options. The determination of the fair value of the awards on the date of grant using an option-pricing model is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables. These variables include the expected stock price volatility over the term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rates and estimated expected dividends .

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases, operating loss and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years when those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income in the period that includes the enactment date.

Impairment of Long-Lived Assets

In accordance with SFAS No. 144, long-lived assets, such as property and equipment and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of would be separately presented in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of a disposed group classified as held for sale would be presented separately in the appropriate asset and liability sections of the balance sheet.

Comprehensive Income

SFAS No. 130, *Reporting Comprehensive Income*, establishes standards for reporting comprehensive income. Comprehensive income includes net income as currently reported under accounting principles generally accepted in the United States of America, and also considers the effect of additional economic events that are not required to be reported in determining net income, but rather are reported as a separate component of stockholders' equity. The Company reports changes in the fair value of derivatives qualifying as cash flow hedges as a component of comprehensive income.

F-10

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Earnings Per Share

Basic and diluted income (loss) per share is computed in accordance with SFAS No. 128, *Earnings Per Share*. Basic income (loss) per share is computed on the basis of the weighted average number of common shares outstanding. Diluted income (loss) per share is computed on the basis of the weighted average number of common shares outstanding plus the effect of outstanding stock options and restricted stock using the treasury stock method.

Fair Values of Financial Instruments

The carrying values of receivables, payables, and accrued expenses approximate fair value due to the short maturity of these instruments. The carrying value of our long term debt approximates its fair value.

Accounting for National Advertising Agency Contract

During the second quarter of 2005, the Company was released from its pre-existing national advertising sales agency contract and engaged Katz Media Group, Inc. (Katz) as its new national advertising sales agent. The contract has several economic elements which principally reduce the overall expected commission rate below the stated base rate. The Company estimates the overall expected commission rate over the entire contract period and applies that rate to commissionable revenue throughout the contract period with the goal of estimating and recording a stable commission rate over the life of the contract.

The following are the principal economic elements of the contract that can affect the base commission rate:

A \$13.6 million non-cash charge recorded by the Company in 2005 related to the termination of our contract with our former national advertising agent.

Potential commission rebates from Katz if national revenue does not meet certain targets for certain periods during the contract term. These amounts are measured annually with settlement to occur shortly thereafter. The rebate amounts currently deemed probable of settlement relate to the first three years of the contract.

Potential additional commissions in excess of the base rates if Katz should exceed certain revenue target. No additional commission payments have been assumed.

The potential commission adjustments are estimated and combined in the balance sheet with the contractual termination liability. That liability is accreted to commission expense to effectuate the stable commission rate over the course of the Katz contract.

The Company's accounting for and calculation of commission expense to be realized over the life of the Katz contract requires management to make estimates and judgments that affect reported amounts of commission expense. Actual results may differ from management's estimates. Over the course of the Company's contractual relationship with Katz, management will continually update its assessment of the effective commission expense attributable to national sales in an effort to record a consistent commission rate over the term of the Katz contract.

Variable Interest Entities

The Company accounts for entities qualifying as variable interest entities (VIEs) in accordance with FASB Interpretation No. 46R (FIN 46R), *Consolidation of Variable Interest Entities, an interpretation of ARB No. 51*. FIN 46R addresses the consolidation by business enterprises of VIEs as defined in the Interpretation.

Immaterial Adjustments to 2006

The Company made an immaterial correction to the accompanying December 31, 2006 consolidated balance sheet by reducing AOCI and decreasing the accumulated deficit by \$0.4 million and an immaterial adjustment to

F-11

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

reduce the 2006 interest expense and net loss by \$0.4 million related to the adjustment for the amount reclassified from other comprehensive income upon hedge accounting discontinuation as more fully disclosed in Note 7.

New Accounting Pronouncements

FIN 48. In July 2006, the FASB issued SFAS Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* an interpretation of SFAS Statement No. 109. The interpretation became effective for the Company in the first quarter of 2007. FIN 48 applies to all tax positions accounted for under SFAS 109. FIN 48 refers to tax positions as positions taken in a previously filed tax return or positions expected to be taken in a future tax return that are reflected in measuring current or deferred income tax assets and liabilities reported in the financial statements. FIN 48 further clarifies a tax position to include the following:

- a decision not to file a tax return in a particular jurisdiction where a return might be required,
- an allocation or a shift of income between taxing jurisdictions,
- the characterization of income or a decision to exclude reporting taxable income in a tax return, or
- a decision to classify a transaction, entity, or other position in a tax return as tax exempt.

FIN 48 clarifies that a tax benefit may be reflected in the financial statements only if it is more likely than not that a company will be able to sustain the tax return position, based on its technical merits. If a tax benefit meets this criterion, it should be measured and recognized based on the largest amount of benefit that is cumulatively greater than 50% likely to be realized. This is a change from the past practice, whereby companies could recognize a tax benefit only if it was probable a tax position would be sustained.

FIN 48 also requires the Company to make qualitative and quantitative disclosures, including a discussion of reasonably possible changes that might occur in unrecognized tax benefits over the next 12 months; a description of open tax years by major jurisdictions; and a roll-forward of all unrecognized tax benefits, presented as a reconciliation of the beginning and ending balances of the unrecognized tax benefits on an aggregated basis (see Note 12).

SFAS No. 141(R). Statement of Financial Accounting Standards No. 141(R), *Business Combinations* (Statement 141(R)), was issued in December 2007. Statement 141(R) requires that upon initially obtaining control, an acquirer should recognize 100% of the fair values of acquired assets, including goodwill and assumed liabilities with only limited exceptions even if the acquirer has not acquired 100% of its target. Additionally, contingent consideration arrangements will be fair valued at the acquisition date and included on that basis in the purchase price consideration and transaction costs will be expensed as incurred. Statement 141(R) also modifies the recognition for preacquisition contingencies, such as environmental or legal issues, restructuring plans and acquired research and development value in purchase accounting. Statement 141(R) amends Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*, to require the acquirer to recognize changes in the amount of its deferred tax benefits that are recognizable because of a business combination either in income from continuing operations in the period of the combination or directly in contributed capital, depending on the circumstances. Statement 141(R) is effective for fiscal years beginning after December 15, 2008. Adoption is prospective and early adoption is not permitted. The Company expects to adopt Statement 141(R) on January 1, 2009. Statement 141(R) s impact on accounting for business

combinations is dependent upon acquisitions at that time.

SFAS No. 155. In February 2006, the Financial Accounting Standards Board issued SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments*, which amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* and FASB Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities* SFAS 155 (1) permits fair value re-measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, (2) clarifies which interest-only and principal-only strips are not subject to the requirements of SFAS 133, (3) establishes a

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, (4) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives and (5) amends SFAS 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. SFAS 155 is effective for all financial instruments acquired or issued after the beginning of an entity's fiscal year that begins after September 15, 2006. At adoption, the fair value election may also be applied to hybrid financial instruments that have been bifurcated under SFAS 133 prior to adoption of this Statement. Any changes resulting from the adoption of this Statement should be recognized as a cumulative effect adjustment to beginning retained earnings. This statement is effective for all financial instruments acquired or issued after the beginning of the Company's fiscal year 2008 and is not expected to have a material impact on consolidated results of operations, cash flows or financial position.

SFAS 157. In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurement*. SFAS 157 establishes a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. SFAS 157 does not require any new fair value measurements. However, it eliminates inconsistencies in the guidance provided in previous accounting pronouncements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including financial statements for an interim period within that fiscal year. All valuation adjustments will be recognized as cumulative-effect adjustments to the opening balance of retained earnings for the fiscal year in which SFAS 157 is initially applied. The Company is currently evaluating the impact that SFAS 157 will have on its consolidated results of operations, cash flows and financial position.

SFAS No. 159. In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115*, which becomes effective for fiscal periods beginning after November 15, 2007. Under SFAS No. 159, companies may elect to measure specified financial instruments and warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. The election called the fair value option will enable some companies to reduce volatility in reported earnings caused by measuring related assets and liabilities differently. The Company does not expect this issue to have a material impact on its consolidated financial statements.

SFAS 160 In December 2007, the FASB issued SFAS 160, *Noncontrolling Interests in Consolidated Financial Statements - an amendment of ARB No. 51*, which is effective for fiscal years beginning after December 15, 2008. Early adoption is prohibited. SFAS 160 will require Companies to present minority interest separately within the equity section of the balance sheet. The Company will adopt SFAS 160 as of January 1, 2009.

2. Acquisitions and Dispositions***Pending Acquisitions***

As of December 31, 2007, the Company had pending a swap transaction pursuant to which it would exchange one of its Fort Walton Beach, Florida radio stations, WYZB-FM, for another station owned by Star Broadcasting, Inc., WTKE-FM. Specifically, the purchase agreement provided for the exchange of WYZB-FM plus \$1.5 million in cash for WTKE-FM. Following the filing of the assignment applications with the FCC, the applications were challenged by

Qantum Communications, which has radio stations in the market and complained to the FCC that the swap would give the Company an unfair competitive advantage (because the station the Company would acquire reaches more people than the station the Company would be giving up). Qantum also initiated litigation in the United States District Court for the Southern District of Florida against the seller and secured a court decision that would require the sale of the station to Qantum instead of the Company. Although that decision is still subject to appeal, there is a possibility that the Company will be unable to consummate the exchange it had proposed with the seller.

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As of December 31, 2007, the Company had pending a swap transaction pursuant to which it would exchange its Canton, OH Station, WRQK-FM, for eight (8) stations owned by Clear Channel in Ann Arbor, MI (WTKA-AM, WLBY-AM, WWWW-FM, WQKL-FM) and Battle Creek, MI (WBFN-AM, WBCK-FM, WBCK-AM and WBXX-FM). Two of the AM stations in Battle Creek, WBCK-AM and WBFN-AM, will be disposed of by the Company simultaneously with the closing of the swap transaction to comply with the FCC's broadcast ownership limits; WBCK-AM will be placed in a trust for sale to an unrelated third party and WBFN-AM will be transferred to Family Life Broadcasting System.

2007 Acquisitions

The company did not complete any acquisitions during 2007.

2007 Dispositions

On November 20, 2007, CMI completed the sale of its Caribbean stations to Gem Radio 5 Limited which purchased all the operations of CMI's Caribbean stations for \$6.0 million. The transaction resulted in the recognition of a gain by the Company of approximately \$5.9 million. The Company recorded the gain within continuing operations within the Company's consolidated statement of operations for the year ended December 31, 2007. The below table contains certain operating data related to the stations sold for the periods presented (the total net assets approximated \$0.1 million for these stations):

	2007	2006	2005
Net revenue	1,764	1,918	1,687
Total expense	1,338	1,396	1,281
Operating income	\$ 426	\$ 522	\$ 406

2006 Acquisitions

For the year ended December 31, 2006, the Company completed the acquisitions of two stations, WWXQ-FM and WXQW-FM, serving Huntsville, Alabama; and one station, KAYD-FM serving Beaumont, Texas. The total purchase price associated with these acquisitions was \$5.5 million and was principally allocated to broadcast licenses. The Company also completed an asset transfer where it transferred WNCV-FM plus \$1.5 million cash to Star Broadcasting in exchange for WPGG-FM, in the Ft. Walton Beach, Florida market. These stations were primarily acquired as they complemented the station portfolio and increased both the state and regional coverage of the United States.

As of December 31, 2007, 2006 and 2005, the Company operated seven stations, one station, and 12 stations under LMAs, respectively. The statements of operations for the years ended December 31, 2007, 2006 and 2005 include the revenue and broadcast operating expenses of these radio stations and any related fees associated with the LMAs from the effective date of the LMAs through the earlier of the acquisition date or December 31.

2005 Acquisitions

The Company completed three acquisitions of ten radio stations in four markets and the acquisition of a studio facility during the year ended December 31, 2005. Of the \$47.8 million required to fund these acquisitions, \$47.4 million was funded in cash, and \$0.4 million represented capitalizable external acquisition costs. These aggregate acquisition amounts include the assets acquired pursuant to the select transactions highlighted below.

On March 4, 2005, the Company completed the asset acquisition of KFRU-AM, KBXR-FM, KOQL-FM and KPLA-FM serving Columbia, Missouri and KLIK-AM, KBBM-FM and KJMO-FM serving Jefferson City, Missouri from Premier Radio Group. In connection with the acquisition, the Company paid \$38.7 million in cash and incurred \$0.1 million in capitalizable external acquisition costs. The Columbia, Missouri and Jefferson

F-14

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

City, Missouri stations were acquired primarily because they complemented the Company's station portfolio and increased both its state and regional coverage of the United States.

In connection with the acquisition, the Company recorded \$9.0 million of goodwill, all of which is expected to be fully deductible for tax purposes.

The following table summarizes the estimated fair value of the assets acquired and liabilities assumed in connection with all of the 2005 acquisitions (dollars in thousands):

Property and equipment	\$ 5,860
Unamortized intangible assets:	
Broadcast licenses	30,645
Goodwill	11,294
Total assets acquired	47,799
Current liabilities	(14)
Total liabilities assumed	(14)
Net assets acquired	\$ 47,785

3. Restructuring Charges (Credits)

During June 2000 we implemented two separate Board-approved restructuring programs. During the second quarter of 2000, we recorded a \$9.3 million charge to operating expenses related to the restructuring costs.

The June 2000 restructuring programs were the result of Board-approved mandates to discontinue the operations of Cumulus Internet Services and to centralize the Company's corporate and administrative organization and employees in Atlanta, Georgia. The programs included severance and related costs and costs for vacated leased facilities, impaired leasehold improvements at vacated leased facilities, and impaired assets related to the Internet businesses. As of June 30, 2001, the Company had completed the restructuring programs. The remaining portion of the unpaid balance as of that date represented lease obligations and various contractual obligations for services related to the Internet business and have been paid by us through the present day consistent with the contracted terms.

During 2002, the Company successfully negotiated and executed sublease agreements for a majority of the vacated corporate office space in Milwaukee, Wisconsin and Chicago, Illinois. During the years ended December 31, 2005, 2004 and 2003, the Company reversed \$0.2 million, \$0.1 million and \$0.3 million, respectively, of the remaining liability related to lease obligations. The amount reversed in each period represents the Company's estimate of the reduction of the remaining lease obligations as a result of offsetting contractual sublease income. The reversal of liability related to the subleases has been presented in the Consolidated Statements of Operations as a component of restructuring charges (credits), consistent with the presentation of the original restructuring charge.

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table presents the restructuring liability at December 31, 2005, 2004, and 2003 and the related activity applied to the balances for the years ended December 31, 2005, 2004 and 2003 (dollars in thousands):

Expense Category	December 31, 2003	Liability Utilized in 2004	Liability Reversed in 2004	December 31, 2004	Liability Utilized in 2005	Liability Reversed in 2005	December 31, 2005
Lease termination costs							
office relocation	\$ 321	\$ (189)	\$ (73)	\$ 59	\$ (42)	\$ (17)	\$
Accrued internet contractual obligations	228	(45)		183		(183)	
Internet lease termination costs	155	(73)	(35)	47	(32)	(15)	
Restructuring liability totals	\$ 704	\$ (307)	\$ (108)	\$ 289	\$ (74)	\$ (215)	\$

4. Property and Equipment

Property and equipment consists of the following as of December 31, 2007 and 2006 (dollars in thousands):

	Estimated Useful Life	2007	2006
Land		\$ 10,456	\$ 10,456
Broadcasting and other equipment	3 to 7 years	121,670	119,017
Computer and capitalized software costs	1 to 3 years	10,045	8,799
Furniture and fixtures	5 years	11,835	11,282
Leasehold improvements	5 years	8,667	8,555
Buildings	20 years	27,693	27,693
Construction in progress		2,073	2,154
		192,439	187,956
Less accumulated depreciation		(130,704)	(116,482)
		\$ 61,735	\$ 71,474

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****5. Goodwill and Other Intangible Assets**

The following tables summarize the December 31, 2007, 2006, and 2005 gross carrying amounts and accumulated amortization of amortized and unamortized intangible assets, amortization expense for the years ended December 31, 2007, 2006, and 2005 and the estimated amortization expense for the five succeeding fiscal years (dollars in thousands):

	As of December 31,		
	2007	2006	2005
Amortized Intangible Assets: Non-Compete Agreements Gross Carrying Value	\$ 3,100	\$ 3,100	\$ 3,100
Accumulated Amortization	(3,088)	(3,078)	(2,787)
Net Value	12	22	313
Unamortized Intangible Assets:			
Licenses for Digital Broadcasting Technology	1,200	1,200	1,200
FCC Broadcast Licenses	782,426	932,918	1,039,827
	\$ 783,638	\$ 934,140	\$ 1,041,340
Aggregate Amortization Expense for Non-Compete Agreements:			
Year ended December 31, 2005	\$ 669		
Year ended December 31, 2006	\$ 292		
Year ended December 31, 2007	\$ 10		
Estimated Amortization Expense:			
For the year ending December 31, 2008	\$ 10		
For the year ending December 31, 2009	\$ 2		

A summary of changes in the carrying amount of goodwill for the years ended December 31, 2007 and 2006 follows (dollars in thousands):

	Goodwill
Balance as of December 31, 2005	\$ 185,105
Acquisitions	336
Dispositions	
Impairment charge	(8,650)
Balance as of December 31, 2006	\$ 176,791

Acquisitions	
Dispositions	
Impairment charge	(78,491)
Balance as of December 31, 2007	\$ 98,300

Goodwill

SFAS No. 142 requires the Company to test goodwill for impairment on an annual basis and more frequently if events or circumstances indicate that the asset may be impaired. The Company performs its annual test in the fourth quarter of each year and, in doing so, SFAS No. 142 requires that the Company determine the appropriate reporting unit and compare the fair value of the reporting unit with its carrying amount. If the fair value of any reporting unit is less than the carrying amount, an indication exists that the amount of goodwill attributed to the reporting unit may be impaired and the Company is required to perform a second step of the impairment test. In the second step, the Company compares the implied fair value of each reporting unit's goodwill, determined by allocating the reporting

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

unit's fair value to all of its assets and liabilities, to the carrying amount of the reporting unit. Consistent with prior years, for 2007 the Company determined the reporting unit as a radio market.

The fair value of reporting units was determined primarily by using a discounted cash flows approach. The fair values derived are based on assumptions that contain a variety of variables. These variables are based on industry data, historical experience and estimates of future performance and include, but are not limited to, revenue and expense growth rates for each radio market, revenue and expense growth rates for the Company's stations in each market, overall discount rates based on the Company's weighted average cost of capital and acquisition multiples. The assumptions used in estimating the fair values of goodwill are based on currently available data and management's best estimates and, accordingly, a change in market conditions or other factors could have a material effect on the estimated values.

For the year ended December 31, 2007, 2006, and 2005, the Company determined that the carrying value of certain reporting units exceeded their fair values. Accordingly, the Company recorded an impairment charge of \$78.5 million, \$8.6 million, and \$100.4 million, respectively, as reflected in the Consolidated Statements of Operations, to reduce the carrying value of goodwill.

Several factors and variables contributed to the decrease in the fair value of certain of its reporting units, including overall compression in acquisition multiples associated with comparable radio station sales in the industry.

Licenses for Digital Broadcasting Technology

On December 21, 2004, the Company purchased 240 perpetual licenses from iBiquity Digital Corporation (iBiquity) for \$1.2 million in cash. These licenses permit the Company to convert to and utilize iBiquity's HD Radio™ technology, which will allow us to broadcast in a digital format on 240 of our stations.

Under the agreement with iBiquity, the Company is obligated to convert the 240 stations to HD Radio™ technology over a seven-year period. Each station conversion will require an investment in certain capital equipment necessary to broadcast the technology. During the years ended December 31, 2007 and 2006, the Company converted zero stations and 18 stations, respectively, to the HD Radio™ technology. In the event the Company does not fulfill the HD conversion requirements within the seven year period set forth in the agreement, once the conversions are completed the Company will be subject to license fees higher than those currently provided for under the agreement.

Purchase of Station License

On March 31, 2005, the Company purchased the broadcast license for KVST-FM, licensed to LaPorte, Texas and serving Houston, Texas, for \$34.8 million. Of the \$34.8 million required to purchase the broadcast license, the Company funded in \$31.1 million in cash, \$1.0 million had been previously funded in the form of a cash escrow deposit and \$2.7 million was paid in capitalizable acquisition costs. During the second quarter of 2005, the Company completed the construction of a broadcast tower and transmitter site for this station and commenced broadcasting and operations. This station was contributed to CMP as part of our Investment in Affiliate (see Note 8).

Broadcast Licenses

SFAS No. 142 requires the Company to test FCC broadcast licenses for impairment on an annual basis and more frequently if events or circumstances indicate that the asset may be impaired. The Company performs its annual impairment evaluation of existing intangible assets with indefinite lives during the fourth quarter of each year. Accordingly, we determine the appropriate reporting unit and then compare the carrying amount of each reporting unit's broadcast licenses with their fair value. Consistent with prior years, for 2007 we determined the reporting unit as a radio market.

F-18

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The fair value of broadcast licenses was determined primarily by using a discounted cash flows approach. The fair values derived are based on assumptions that contain a variety of variables. These variables are based on available industry data, historical experience and estimates of future performance and include, but are not limited to, revenue and expense growth rates for each radio market, revenue and expense growth rates for our stations in each market, overall discount rates based on our weighted average cost of capital and acquisition multiples. The assumptions used in estimating the fair values of broadcast licenses are based on currently available data and management's best estimates and, accordingly, a change in market conditions or other factors could have a material effect on the estimated value.

For the years ended December 31, 2007, 2006, and 2005, the Company determined that the carrying value of broadcast licenses in certain of its reporting units exceeded their fair value. Accordingly, the Company recorded an impairment charge of \$152.1 million, \$54.8 million, and \$162.4 million, respectively, as reflected in the consolidated statements of operations, to reduce the carrying value of broadcast licenses.

Several factors and variables contributed to the decrease in the fair value of certain of our broadcast licenses, including an overall compression in acquisition multiples associated with comparable broadcast license sales in the industry.

6. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses consist of the following as of December 31, 2007 and 2006 (dollars in thousands):

	2007	2006
Accounts payable	\$ 1,129	\$ 2,625
Accrued compensation	1,702	2,285
Accrued commissions	2,421	2,519
Accrued taxes	3,212	7,872
Barter payable	2,486	2,858
Accrued professional fees	1,006	1,409
Due to seller of acquired companies	461	343
Accrued interest	2,621	2,689
Accrued employee benefits	855	2,176
Non-cash contract termination liability	1,954	1,896
Accrued other	3,607	3,905
Deferred revenue	220	249
Tax withheld on executive compensation	2,242	
Total accounts payable and accrued expenses	\$ 23,916	\$ 30,826

7. Derivative Instruments

The Company accounts for derivative financial instruments in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. This standard requires the Company to recognize all derivatives on the balance sheet at fair value. Fair value changes are recorded in income for any contracts not classified as qualifying hedging instruments. For derivatives qualifying as cash flow hedge instruments, the effective portion of the derivative fair value change must be recorded through other comprehensive income, a component of stockholders' equity.

F-19

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****May 2005 Swap***

In May 2005, the Company entered into a forward-starting LIBOR based interest rate swap arrangement (the May 2005 Swap) to manage fluctuations in cash flows resulting from interest rate risk attributable to changes in the benchmark interest rate of LIBOR. The May 2005 Swap, effective from March 2006 through March 2009, changes the variable-rate cash flow exposure on \$400 million of the Company's long-term bank borrowings to fixed-rate cash flows by entering into a receive-variable, pay-fixed interest rate swap. Under the May 2005 Swap, Cumulus receives LIBOR-based variable interest rate payments and makes fixed interest rate payments, thereby creating fixed-rate long-term debt. The May 2005 Swap was previously accounted for as a qualifying cash flow hedge of the future variable rate interest payments in accordance with SFAS No. 133. Starting in June 2006, the May 2005 Swap no longer qualified as a cash flow hedging instrument. Accordingly, the changes in its fair value have since been reflected in the statement of operations instead of AOCI. The Company recorded a \$0.4 million adjustment to accumulated deficit and accumulated other comprehensive income and interest expense in the balance sheet and consolidated statement of operations for the year ended December 31, 2006 to properly reflect the change in accounting for the May 2005 swap, as described in Note 1.

The fair value of the May 2005 Swap is determined periodically by obtaining quotations from the financial institution that is the counterparty of the Company in the swap arrangement. The fair value represents an estimate of the net amount that the Company would receive if the agreement was transferred to another party or cancelled as of the date of the valuation. The balance sheet as of December 31, 2007 and 2006 reflects a liability of \$0.4 and other long-term assets of \$9.4 million for the fair value of the May 2005 Swap. During the years ended 2007 and 2006 the Company recorded \$9.8 million and \$0.4 million of increased interest expense related to the change in value of the swap.

The Company effectively paid \$3.2 million for the 2005 swap by issuance of the May 2005 option as described below; this amount is being reclassified out of AOCI into interest expense on a straight-line basis.

During the years ended December 31, 2007, 2006, and 2005, \$5.5 million, \$5.6 million, and \$3.9 million, respectively, was reported as a reduction of interest expense which represents yield adjustments on the hedged obligation.

May 2005 Option

In May 2005, we also entered into an interest rate option agreement (the May 2005 Option), which provides for the counterparty to the May 2005 Swap, Bank of America, to unilaterally extend the period of the swap for two additional years, from March of 2009 through March of 2011. This option may only be exercised in March of 2009. This instrument is not highly effective in mitigating the risks in cash flows, and therefore is deemed speculative and its changes in value are accounted for as a current element of non-operating results. Interest expense for the years ended December 31, 2007, 2006, and 2005 includes \$3.2 million expense, \$1.1 million credit, and \$0.9 million credit, respectively, and the balance sheet, as of December 31, 2007 and 2006, reflects other long-term liabilities of \$4.4 million and \$1.2 million, respectively, to reflect the fair value of the May 2005 Option.

March 2003 Swap

The Company terminated the March 2003 Option in connection with the execution of the May 2005 Option. As of the termination date, the balance sheet reflected a long-term liability of less than \$0.1 million, which the Company eliminated and recorded as a component of interest expense as a net gain. For the year ended December 31, 2005, interest expense includes net gains of \$0.1 million to record the change in the value of the March 2003 Option.

The Company previously entered into a LIBOR-based interest rate swap arrangement in March 2003 (the March 2003 Swap) to manage fluctuations in cash flows resulting from interest rate risk attributable to changes in the benchmark interest rate of LIBOR. The March 2003 Swap changed the variable-rate cash flow exposure on

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

\$300.0 million of the Company's long-term bank borrowings to fixed-rate cash flows by entering into a receive-variable, pay-fixed interest rate swap. Under the interest rate swap, Cumulus received LIBOR-based variable interest rate payments and made fixed interest rate payments, thereby creating fixed-rate long-term debt. The March 2003 Swap was accounted for as a qualifying cash flow hedge of the future variable rate interest payments in accordance with SFAS No. 133, whereby changes in the fair market value were reflected as adjustments to the fair value of the derivative instrument as reflected on the accompanying consolidated balance sheets.

The fair value of the March 2003 Swap was determined periodically by obtaining quotations from the financial institution that was the counterparty to the March 2003 Swap. The fair value represents an estimate of the net amount that we would receive if the agreement was transferred to another party or cancelled as of the date of the valuation. Changes in the fair value of the March 2003 Swap were reported in accumulated other comprehensive income, or AOCI, which is an element of stockholders' equity. During the year ended December 31, 2005, \$3.9 million of income related to the March 2003 Swap was reported as a reduction of interest expense and represented a yield adjustment of the hedged debt obligation. The balance sheet as of December 31, 2005 reflects other long-term assets of \$1.5 million to reflect the fair value of the March 2003 Swap.

In March 2003, the Company also entered into an interest rate option agreement (the March 2003 Option), which provided for the counterparty to the agreement, Bank of America, to unilaterally extend the period of the Swap for two additional years, from March of 2006 through March of 2008. The March 2003 Option was never exercised. This instrument was not highly effective in mitigating the risks in cash flows, and therefore was deemed speculative and its changes in value were accounted for as a current element of non-operating results.

8. Investment in Affiliate

On October 31, 2005, the Company announced that, together with Bain Capital Partners, The Blackstone Group and Thomas H. Lee Partners, we had formed a new private partnership, Cumulus Media Partners, LLC (CMP). CMP was created by the Company and the equity partners to acquire the radio broadcasting business of Susquehanna Pfaltzgraff Co. Each of the Company and the equity partners initially holds a 25% equity ownership in CMP.

On May 5, 2006, the Company announced the consummation of the acquisition of the radio broadcasting business of Susquehanna Pfaltzgraff Co. by CMP for a purchase price of approximately \$1.2 billion. Susquehanna's radio broadcasting business consisted of 33 radio stations in 8 markets: San Francisco, Dallas, Houston, Atlanta, Cincinnati, Kansas City, Indianapolis and York, Pennsylvania.

In connection with the formation of CMP, Cumulus contributed four radio stations (including related licenses and assets) in the Houston, Texas and Kansas City, Missouri markets with a book value of approximately \$71.6 million and approximately \$6.2 million in cash in exchange for its membership interests. Cumulus recognized a gain of \$2.5 million from the transfer of assets to CMP. In addition, upon consummation of the acquisition, the Company received a payment of approximately \$3.5 million as consideration for advisory services provided in connection with the acquisition. The Company recorded the payment as a reduction in its investment in CMP.

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company's investment in CMP is accounted for under the equity method of accounting. For the year ended December 31, 2007, we recorded approximately \$49.4 million as equity in losses of affiliate. This amount is presented as part of non-operating income (loss) on the accompanying condensed consolidated statement of operations. For the year ended December 31, 2007, the affiliate generated revenues of \$234.5 million, operating expenses of \$134.0 million and a net loss of \$196.5 million. At December 31, 2007 CMP had total assets, liabilities and shareholders' equity of \$1.4 billion, \$1.3 billion and \$0.1 billion respectively. For the period May through December 2006, the Company recorded approximately \$5.2 million as equity in losses of affiliate. During this time, the affiliate generated revenues of \$163.6 million, operating expense of \$97.4 million and a net loss of \$20.8 million. At December 31, 2006, CMP had total assets, liabilities and shareholders' equity of \$1.7 billion, \$1.3 billion and \$0.4 billion, respectively. The table below summarizes the Company's investment in CMP as of December 31, 2007:

	December 31, 2007
Book basis of radio stations contributed to Affiliate	\$ 71,623
Gain on radio stations contributed to Affiliate	2,548
Cash contributed to Affiliate	6,250
Receipt of advisory fee from Affiliate	(3,537)
Equity losses in Affiliate	(5,200)
Investment in Affiliate at December 31, 2006	\$ 71,684
Equity losses in Affiliate in 2007	(49,432)
Investment in Affiliate at December 31, 2007	\$ 22,252

Concurrently with the consummation of the acquisition, the Company entered into a management agreement with a subsidiary of CMP, pursuant to which the Company's management manages the operations of CMP's radio markets. The agreement provides for the Company to receive, on a quarterly basis, a management fee that is 1% of the subsidiaries' annual EBITDA or \$4.0 million, whichever is greater. For the year ended December 31, 2007 and 2006, the Company recorded as net revenues approximately \$4.0 million and \$2.6 million, respectively, in management fees from CMP.

9. Long-Term Debt

The Company's long-term debt consists of the following at December 31, 2007 and 2006 (dollars in thousands):

	2007	2006
Term loan and revolving credit facilities	\$ 736,300	\$ 751,250
Less: Current portion of long-term debt	13,490	7,500

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of the future maturities of long-term debt follows (dollars in thousands):

2008	\$ 13,490
2009	7,400
2010	7,400
2011	7,400
2012	7,400
Thereafter	693,210
	\$ 736,300

2007 Refinancing

On June 11, 2007, the Company entered into an amendment to its existing credit agreement, dated June 7, 2006, by and among the Company, Bank of America, N.A., as administrative agent, and the lenders party thereto. The credit agreement, as amended, is referred to herein as the Amended Credit Agreement.

The Amended Credit Agreement provides for a replacement term loan facility, in the original aggregate principal amount of \$750.0 million, to replace the prior term loan facility, which had an outstanding balance at the time of refinancing of approximately \$713.9 million, and maintains the pre-existing \$100.0 million revolving credit facility. The proceeds of the replacement term loan facility, fully funded on June 11, 2007, were used to repay the outstanding balances under the prior term loan facility and under the revolving credit facility.

The Company's obligations under the Amended Credit Agreement are collateralized by substantially all of its assets in which a security interest may lawfully be granted (including FCC licenses held by its subsidiaries), including, without limitation, intellectual property and all of the capital stock of the Company's direct and indirect domestic subsidiaries (except for Broadcast Software International, Inc.). In addition, the Company's obligations under the Amended Credit Agreement are guaranteed by certain of its subsidiaries.

The Amended Credit Agreement contains terms and conditions customary for financing arrangements of this nature. The replacement term loan facility will mature on June 11, 2014 and has been decreasing in equal quarterly installments since September 30, 2007, with 0.25% of the then current aggregate principal payable each quarter during the first six years of the term, and 23.5% due in each quarter during the seventh year. The revolving credit facility will mature on June 7, 2012 and, except at the option of the Company, the commitment will remain unchanged up to that date.

Borrowings under the replacement term loan facility bear interest, at the Company's option, at a rate equal to LIBOR plus 1.75% or the Alternate Base Rate (defined as the higher of the Bank of America Prime Rate and the Federal Funds rate plus 0.50%) plus 0.75%. Borrowings under the revolving credit facility bear interest, at the Company's option, at a rate equal to LIBOR plus a margin ranging between 0.675% and 2.0% or the Alternate Base Rate plus a margin ranging between 0.0% and 1.0% (in either case dependent upon the Company's leverage ratio).

As of December 31, 2007, prior to the effect of the May 2005 Swap, the effective interest rate of the outstanding borrowings pursuant to the credit facility was approximately 7.325%. As of December 31, 2007, the effective interest rate inclusive of the May 2005 Swap is 6.567%.

Certain mandatory prepayments of the term loan facility will be required upon the occurrence of specified events, including upon the incurrence of certain additional indebtedness (other than under any incremental credit facilities under the Amended Credit Agreement) and upon the sale of certain assets.

Additionally, certain excess cash flow payments are required annually. The current portion of long term debt at December 31, 2007 includes approximately \$6.1 million for the expected excess cash flow payment to be made during the first quarter of 2008.

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The representations, covenants and events of default in the Amended Credit Agreement are customary for financing transactions of this nature. Events of default in the Amended Credit Agreement include, among others, (a) the failure to pay when due the obligations owing under the credit facilities; (b) the failure to perform (and not timely remedy, if applicable) certain covenants; (c) cross default and cross acceleration; (d) the occurrence of bankruptcy or insolvency events; (e) certain judgments against the Company or any of its subsidiaries; (f) the loss, revocation or suspension of, or any material impairment in the ability to use any of our material FCC licenses; (g) any representation or warranty made, or report, certificate or financial statement delivered, to the lenders subsequently proven to have been incorrect in any material respect; (h) the occurrence of a Change in Control (as defined in the Amended Credit Agreement); and (i) violation of certain financial covenants. Upon the occurrence of an event of default, the lenders may terminate the loan commitments, accelerate all loans and exercise any of their rights under the Amended Credit Agreement and the ancillary loan documents as a secured party. As of December 31, 2007, the Company was in compliance with all financial and non-financial covenants.

In connection with the retirement of the Company's pre-existing credit facilities, the Company recorded a loss on early extinguishment of debt of \$1.0 million for 2007, which was comprised of previously deferred loan origination expenses. In connection with the 2007 refinancing, the Company deferred approximately \$1.0 million of debt issuance costs, which is being amortized to interest expense over the life of the debt.

2006 Refinancing

On June 23, 2006, the Company announced the completion of a tender offer for 11.5 million outstanding shares of our Class A Common Stock. In connection with the tender offer, we also agreed to repurchase 5.0 million shares of our outstanding Class B Common Stock (see note 10 Stockholders' Equity).

In connection with the tender offer and common stock repurchase, on June 7, 2006, the Company entered into a new \$850 million credit facility, which provided for a \$100.0 million six-year revolving credit facility and a seven-year \$750.0 million term loan facility. The proceeds were used by the Company to repay all amounts outstanding under its 2005 credit facility (approximately \$588.2 million) and to purchase the 11.5 million shares of the Company's Class A Common Stock and 5.0 million shares of the Company's Class B Common Stock, which occurred on June 23, 2006 and June 29, 2006, respectively, and to pay fees and expenses related to the foregoing. The remaining proceeds were used to provide ongoing working capital and other general corporate purposes, including, including capital expenditures. As of December 31, 2006, there was \$5.0 million outstanding under the revolving credit facility.

The credit facility also provided for additional, incremental revolving credit or term loan facilities in an aggregate principal amount of up to an additional \$200.0 million, subject to the satisfaction of certain conditions and upon the Company providing notice prior to June 30, 2009. These incremental credit facilities were permitted from time to time, and may have been used to fund future acquisitions of radio stations and for other general corporate purposes, including capital expenditures. Any incremental credit facilities would have been secured and guaranteed on the same basis as the term loan and revolving credit facility.

In connection with the retirement of the Company's pre-existing credit facilities, in June 2006 the Company recorded a loss on early extinguishment of debt of \$2.3 million, which was comprised of previously capitalized loan origination expenses. In connection with the new credit facility, the Company capitalized approximately \$1.6 million of debt issuance costs, which are amortized to interest expense over the life of the debt.

2005 Refinancing

On July 14, 2005, the Company secured a new \$800 million credit facility, which provided for a seven year, \$400.0 million revolving credit facility and a seven-year \$400.0 million term loan facility. We used the proceeds of the term loan facility, fully funded on July 14, 2005, and drawings on that date of \$123.0 million on the revolving credit facility, primarily to repay all amounts owed under our prior credit facility.

F-24

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In connection with the retirement of our pre-existing credit facilities, we recorded a loss on early extinguishment of debt of \$1.2 million, which was comprised entirely of previously capitalized debt issuance costs. In connection with the 2005 credit facility, we capitalized approximately \$4.3 million of debt issuance costs which were amortized to interest expense over the life of the debt.

10. Stockholders Equity

(a) Common Stock

Each share of Class A Common Stock entitles its holder to one vote.

Except upon the occurrence of certain events, holders of the Class B Common Stock are not entitled to vote. The Class B Common Stock is convertible at any time, or from time to time, at the option of the holder of such Class B Common Stock (provided that the prior consent of any governmental authority required to make such conversion lawful shall have been obtained) without cost to such holder (except any transfer taxes that may be payable if certificates are to be issued in a name other than that in which the certificate surrendered is registered), into Class A Common Stock on a share-for-share basis; provided that the Board of Directors has determined that the holder of Class A Common Stock at the time of conversion would not disqualify the Company under, or violate, any rules and regulations of the FCC.

Subject to certain exceptions, each share of Class C Common Stock entitles its holders to ten votes. The Class C Common Stock is convertible at any time, or from time to time, at the option of the holder of such Class C Common Stock (provided that the prior consent of any governmental authority required to make such conversion lawful shall have been obtained) without cost to such holder (except any transfer taxes that may be payable if certificates are to be issued in a name other than that in which the certificate surrendered is registered), into Class A Common Stock on a share-for-share basis; provided that the Board of Directors has determined that the holder of Class A Common Stock at the time of conversion would not disqualify the Company under, or violate, any rules and regulations of the FCC.

(b) Share Repurchases

On September 28, 2004, our Board authorized the purchase, from time to time, of up to \$100.0 million of its Class A Common Stock, subject to the terms of our then-existing credit agreement. Subsequently, on December 7, 2005, our Board authorized the purchase of up to an additional \$100.0 million of our Class A Common Stock, again subject to the terms of the Company's then-existing credit agreement. Through March 31, 2006, the Company repurchased 2,011,500 shares, or \$25.7 million in aggregate value, of our Class A Common Stock pursuant to these Board-approved stock repurchase plans.

In addition, during June, 2006, as part of a separate \$200.0 million Board-approved recapitalization, the Company completed a modified Dutch Auction tender offer and purchased 11,500,000 shares of our outstanding Class A Common Stock at a price per share of \$11.50, or approximately \$132.3 million. The shares purchased represented approximately 24.1% of the Company's outstanding Class A Common Stock at the time. The Company also purchased 5,000,000 million shares of Class B Common Stock at a purchase price of \$11.50 per share or approximately \$57.5 million. The shares purchased represented approximately 43.0% of the Company's outstanding Class B Common Stock. These Class B Common shares were subsequently retired.

In addition, during July and August, 2006, the Company repurchased 749,500 shares of its outstanding Class A Common Stock at an average price per share of \$9.25, or approximately \$6.9 million.

Cumulatively, during 2006, the Company repurchased 14,261,000 shares of its outstanding Class A Common Stock (exclusive of the purchase of 500,000 restricted shares from the Company's Chief Executive Officer in December 2006 described in Note 11) at an average price per share of \$11.56, or approximately \$164.9 million and

F-25

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

5,000,000 shares of our outstanding Class B Common Stock at an average price per share of \$11.50, or approximately \$57.5 million.

For the year ended December 31, 2005, under the share repurchase plans described above, we repurchased 7,766,223 shares of our Class A Common Stock in the open market at an average price of \$12.31.

As of December 31, 2007, the Company had authority to repurchase an additional \$57.0 million of its Class A Common Stock.

(c) Stock Purchase Plan

In 1999, the Company's Board adopted and its stockholders subsequently approved the Employee Stock Purchase Plan. The Employee Stock Purchase Plan is designed to qualify for certain income tax benefits for employees under Section 423 of the Internal Revenue Code. The plan allows qualifying employees to purchase Class A Common Stock at the end of each calendar year, commencing with the calendar year beginning January 1, 1999, at 85% of the lesser of the fair market value of the Class A Common Stock on the first and last trading days of the year. The amount each employee can purchase is limited to the lesser of (i) 15% of pay or (ii) \$0.025 million of stock value on the first trading day of the year. An employee must be employed at least six months as of the first trading day of the year in order to participate in the Employee Stock Purchase Plan.

In June 2002, the Company's stockholders approved an amendment to the Employee Stock Purchase Plan which increased the aggregate number of shares of Class A Common Stock available for purchase under the plan from 1,000,000 shares to 2,000,000, an increase of 1,000,000 shares.

The following table summarizes the number of shares of Class A Common stock issued as a result of employee participation in the Employee Stock Purchase Plan since its inception in 1999 (in thousands, except per share amounts):

Issue Date	Issue Price	Class A Common Shares Issued
January 10, 2000	\$ 14.18	17,674
January 17, 2001	\$ 3.08	50,194
January 8-23, 2002	\$ 3.19	558,161
January 2-24, 2003	\$ 12.61	124,876
January 26-30, 2004	\$ 13.05	130,194
January 2-28, 2005	\$ 12.82	136,110
January 2-31, 2006	\$ 10.55	124,598
March 2-31, 2007	\$ 8.83	108,575
February 1-29, 2008	\$ 6.83	96,006

Following the issuance of shares in February 2008, related to the 2007 plan year, there remain 653,612 shares of Class A Common Stock authorized and available under the Employee Stock Purchase Plan. However, as of July 23, 2007, pursuant to the Agreement and Plan of Merger (the Merger Agreement), the Company halted future participation in the ESPP, and has terminated the plan as of the end of the 2007 plan year.

11. Stock Options and Restricted Stock

Effective January 1, 2006, the Company adopted SFAS No. 123R using the modified prospective method. The Company uses the Black-Scholes option pricing model to determine the fair value of its stock options. The determination of the fair value of the awards on the date of grant, using an option-pricing model, is affected by the Company's stock price, as well as assumptions regarding a number of complex and subjective variables and is based principally on the historical volatility. These variables include its expected stock price volatility over the expected

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rates and expected dividends.

Stock options of 10,000 and 431,050 shares were granted during 2007 and 2006 respectively. Stock options vest over four years and have a maximum contractual term of ten years. The Company estimates the volatility of its common stock by using a weighted average of historical stock price volatility over the expected term of the options. Management believes historical volatility is a better measure than implied volatility. The Company bases the risk-free interest rate that it uses in its option pricing model on U.S. Treasury Zero Coupon strip issues with remaining terms similar to the expected term of the options. The Company does not anticipate paying any cash dividends in the foreseeable future and therefore uses an expected dividend yield of zero in the option pricing model. The Company is required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from estimates. Similar to the expected-term assumption used in the valuation of awards, the Company splits its population into two categories, (1) executives and directors and (2) non-executive employees. Stock-based compensation expense is recorded only for those awards that are expected to vest. All stock-based payment awards are amortized on a straight-line basis over the requisite service periods of the awards, which are generally the vesting periods.

The assumptions used for valuation of the 2006 option awards were an expected term of 7.0 (for certain key employees the expected term is ten years); volatility of 74.5%; risk-free rate of 4.99%; and an expected dividend rate of 0%. The assumptions used for valuation of the 2007 option awards were similar to those described for the 2006 awards.

For the year ended December 31, 2007, the Company recognized approximately \$6.6 million in non-cash stock-based compensation expense relating to stock options. There is no tax benefit associated with this expense due to the Company's net operating loss position. As of December 31, 2007, there was unrecognized compensation costs, adjusted for estimated forfeitures (with a range from approximately 0% to 40%), of approximately \$4.1 million related to non-vested stock options that will be recognized over 3.3 years. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures.

The Company has also issued restricted stock awards to certain key employees. Generally, the restricted stock vests over a four-year period, thus the Company recognizes compensation expense over the four-year period equal to the grant date value of the shares awarded to the employees. To the extent the non-vested stock awards include performance or market conditions, management examines the appropriate requisite service period to recognize the cost associated with the award on a case-by-case basis. The Company has different plans under which stock options or restricted stock awards have been or may be granted. A general description of these plans is included in this footnote.

The compensation committee of the Board granted 110,000, 110,000, and 145,000 restricted shares of its Class A Common Stock in 2007, 2006, and 2005, respectively, to certain officers, pursuant to the 2004 Equity Incentive Plan. Consistent with the terms of the awards, one-half of the shares granted will vest after two years of continuous employment. An additional one-eighth of the remaining restricted shares will vest each quarter during the third and fourth years following the date of grant. The fair value at the date of grant of these shares was \$1.1 million for the 2007 grant, \$1.3 million for the 2006 grant and \$1.9 million for the 2005 grant. Stock compensation expense for these awards will be recognized on a straight-line basis over each award's vesting period. For the year ended December 31, 2007, 2006 and 2005, we recognized \$1.0 million, \$0.8 million, and \$0.3 million, respectively, of non-cash stock

compensation expense related to these restricted shares.

As of December 31, 2007 and 2006, there were unrecognized compensation costs of approximately \$2.2 million and \$2.1 million, respectively, related to restricted stock that will be recognized over 3.2 years. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures. There have been no forfeitures.

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On December 20, 2006, we entered into a Third Amended and Restated Employment agreement with our Chairman, President and Chief Executive Officer, Lewis W. Dickey, Jr. The agreement has an initial term through May 31, 2013 and is subject to automatic extensions of one-year terms thereafter unless terminated by advance notice by either party in accordance with the terms of the agreement.

The agreement provides among other matters that Mr. L. Dickey shall be granted 160,000 shares of time-vested restricted Class A common stock and 160,000 shares of performance vested restricted Class A common stock in each fiscal year during his employment term. The time-vested restricted shares shall vest in three installments, with one-half vesting on the second anniversary of the date of grant, and one-quarter vesting on each of the third and fourth anniversaries of the date of grant, in each case contingent upon Mr. L. Dickey's continued employment with us. Vesting of performance restricted shares is dependent upon achievement of Compensation Committee-approved criteria for the three-year period beginning on January 1 of the fiscal year of the date of grant, in each case contingent upon Mr. L. Dickey's continued employment with us. For 2007, the Company recognized \$0.5 million of expense related to the performance restricted awards issued in March 2007, whose vesting is subject to the achievement of the Compensation Committee approved criteria.

In the event that there is a change in control, as defined in the agreement, then any issued but unvested portion of the restricted stock grants held by Mr. L. Dickey shall become immediately and fully vested. In addition, upon such a change in control, we shall issue Mr. L. Dickey an award of 360,000 shares of Class A common stock, such number of shares decreasing by 70,000 shares upon each of the first four anniversaries of the date of the agreement.

As an inducement to entering into the agreement, the agreement provided for a signing bonus grant of 685,000 deferred shares of Class A Common Stock. Of the 685,000 deferred bonus shares, 94,875 were treated as replacement shares pertaining to the old employment agreement. The remaining 590,125 shares valued at \$6.2 million were charged to non-cash stock compensation in 2006.

The agreement also provides that, should Mr. L. Dickey resign his employment or the Company terminate his employment, in each case other than under certain permissible circumstances, Mr. Dickey shall pay to the Company, in cash, \$5.5 million (such amount decreasing by \$1.0 million on each of the first five anniversaries of the date of the agreement). This potential payment would only be accounted for if and when it occurs similar to a "clawback" feature. This payment is automatically waived upon a change in control. As further inducement, the agreement provided for the repurchase, as of the effective date of the agreement, by the Company of all of Mr. L. Dickey's rights and interests in and to (a) options to purchase 500,000 shares of Class A common stock, previously granted to Mr. L. Dickey at an exercise price per share of \$6.4375, options to purchase 500,000 shares of Class A common stock, previously granted to Mr. L. Dickey at an exercise price per share of \$5.92 and options to purchase 150,000 shares of Class A common stock, previously granted to Mr. L. Dickey at an exercise price per share of \$14.03, for an aggregate purchase price of \$6,849,950 and (b) 500,000 shares of Class A common stock, previously awarded to Mr. L. Dickey as restricted stock, for an aggregate purchase price of \$5,275,000. Each purchase price was paid in a lump-sum cash payment at the time of purchase. The purchase was completed on December 20, 2006.

As of the date of his new employment agreement, Mr. L. Dickey had 250,000 partially vested, restricted shares that were being amortized under FAS 123R. At December 20, 2006 there was an unamortized balance, under FAS 123R, of \$2.0 million associated with these shares. The Company replaced these shares with 94,875 deferred shares of Class A Common Stock and 155,125 time-vested restricted shares of Class A Common Stock. In accordance with

FAS 123R, the Company recognized non-cash stock compensation expense of \$0.8 million in 2006, related to the 94,875 replacement deferred shares. The Company will recognize future non-cash stock compensation of \$1.3 million associated with the-time vested restricted shares, ratably over the employment contract through May 31, 2013.

Mr. L. Dickey was granted 160,000 time-vested, restricted shares of Class A Common Stock in 2007 and will be granted 160,000 time-vested, restricted shares each year for the next six years or 1,120,000 shares in the

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

aggregate. Of the 1,120,000 shares to be issued, non-cash stock compensation expense of \$6.8 million related to 524,875 of the shares is being amortized ratably to non-cash stock compensation expense over the period of the employment agreement ending May 31, 2013. These shares represent the number of shares that will legally vest during the employment agreement reduced by the 155,125 shares which were treated as replacement shares for the pre-existing 250,000 partially vested restricted shares discussed above.

As previously mentioned, in 2006, the Company repurchased 1,150,000 outstanding shares of Mr. L. Dickey's fully vested Class A Common Stock options and recorded a charge to equity for \$6.8 million. In addition the Company purchased 500,000 partially vested restricted shares for \$5.3 million which was charged to treasury stock in shareholder's equity. The unamortized grant date fair value of \$3.2 million was recorded to non-cash stock compensation within the 2006 consolidated statement of operations. The number of signing bonus restricted deferred shares and time-vested restricted shares committed for grant to Mr. L. Dickey and the restricted shares previously granted exceeded the number of restricted or deferred shares approved for grant at December 31, 2006. Accordingly, 15,000 of the signing bonus shares and all of the time-vested restricted shares were accounted for as liability classified awards which required revaluation at the end of each accounting period as of December 31, 2006. Following the modification of the 2004 Equity Incentive Plan in May 2007, all stock based compensation awards are equity classified as of December 31, 2007.

The Company recognized approximately \$10.4 million of non-cash compensation expense in the fourth quarter of 2006 in conjunction with amending Mr. L. Dickey's employment agreement as described below:

	2006
Compensation cost related to the original repurchased grant	\$ 3,378
Deferred bonus shares expensed	6,986
Current year FAS 123 R amortization of time vested restricted shares	30
Total non-cash compensation costs	\$ 10,394

On December 20, 2007, the Company issued the 685,000 signing bonus restricted shares of Class A Common Stock to Mr. L. Dickey in accordance with his current employment agreement, as described above. As previously stated, these shares, valued at \$7.0 million, were expensed in 2006 to non-cash stock compensation. In 2007, the Company recorded \$1.0 million to the non-cash stock compensation associated with the time vested awards under Mr. L. Dickey's Third Amended and Restated Employment Agreement. Included in the Treasury Stock buyback for 2007 is \$2.6 million for shares withheld representing the minimum statutory tax liability of which \$0.3 million was paid during 2007. At December 31, 2007, there was \$5.7 million of unrecognized compensation costs for the time vested restricted shares to be amortized ratably through May 31, 2013 associated with Mr. L. Dickey's December 2006 amended employment agreement.

The Company also has an Employee Stock Purchase Plan (ESPP) that allows qualifying employees to purchase shares of Class A Common Stock at the end of each calendar year at 85% of the lesser of the fair market value of the Class A Common Stock on the first or last trading day of the year. Due to the significant discount offered and the inclusion of

a look-back feature, the Company's current ESPP is considered compensatory upon adoption of SFAS No. 123R. As of July 23, 2007 and pursuant to the Agreement and Plan of Merger, the Company halted future participation in the ESPP, and has terminated the plan as of the end of the 2007 plan year.

Prior to the adoption of SFAS No. 123R, the Company applied the intrinsic value-based method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees*, and related interpretations, including FASB Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation, an interpretation of APB Opinion No. 25*. The following table illustrates the pro forma effect on net

2004 Equity Incentive Plan

Our Board adopted the 2004 Equity Incentive Plan on March 19, 2004. The 2004 Equity Incentive Plan was subsequently approved by our stockholders on April 30, 2004 and amended with stockholder approval on May 10, 2007. The purpose of the 2004 Equity Incentive Plan is to attract and retain officers, key employees, non-employee directors and consultants for us and our subsidiaries and to provide such persons incentives and rewards for superior performance. The aggregate number of shares of Class A Common Stock subject to the 2004 Equity Incentive Plan is 3,665,000. Of the aggregate number of shares of Class A Common Stock available, up to 1,400,000 shares may be granted as incentive stock options, or ISOs, and up to 1,795,000 shares may be awarded as either restricted or deferred shares. In addition, no one person may receive options exercisable for more than 500,000 shares of Class A Common Stock in any one calendar year.

The 2004 Equity Incentive Plan permits us to grant nonqualified stock options and ISOs, as defined in Section 422 of the Code. The exercise price of an option awarded under the 2004 Equity Incentive Plan may not be less than the closing price of the Class A Common Stock on the last trading day before the grant. Options will be exercisable during the period specified in each award agreement and will be exercisable in installments pursuant to a Board-designated vesting schedule. The Board may also provide for acceleration of options awarded in the event of a change in control, as defined by the 2004 Equity Incentive Plan.

The Board may also authorize the grant or sale of restricted stock to participants. Each such grant will constitute an immediate transfer of the ownership of the restricted shares to the participant, entitling the participant to voting, dividend and other ownership rights, but subject to substantial risk of forfeiture for a period of not less than two years (to be determined by the Board at the time of the grant) and restrictions on transfer (to be determined by the Board at the time of the grant). The Board may also provide for the elimination of restrictions in the event of a change in control.

Finally, the Board may authorize the grant or sale of deferred stock to participants. Awards of deferred stock constitute an agreement we make to deliver shares of our Class A Common Stock to the participant in the future, in consideration of the performance of services, but subject to the fulfillment of such conditions during the deferral period as the Board may specify. The grants or sales of deferred stock will be subject to a deferral period of at least one year. During the deferral period, the participant will have no right to transfer any rights under the award and will have no rights of ownership in the deferred shares, including no right to vote such shares, though the Board may authorize the payment of any dividend equivalents on the shares. The Board may also provide for the elimination of the deferral period in the event of a change in control.

No grant, of any type, may be awarded under the 2004 Equity Incentive Plan after April 30, 2014.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The Board of Directors administers the 2004 Equity Incentive Plan. The Board of Directors may from time to time delegate all or any part of its authority under the 2004 Plan to the Compensation Committee. The Board of Directors has full and exclusive power to interpret the 2004 Equity Incentive Plan and to adopt rules, regulations and guidelines.

Under the 2004 Equity Incentive Plan, current and prospective employees, non-employee directors, consultants or other persons who provide us services are eligible to participate.

As of December 31, 2007, there were outstanding options to purchase a total of 1,740,525 shares of Class A Common Stock at exercise prices ranging from \$9.40 to \$19.38 per share under the 2004 Equity Incentive Plan. These options vest quarterly over four years, with the possible acceleration of vesting for some options if certain performance criteria are met. In addition, all options vest upon a change of control as more fully described in the 2004 Equity Incentive Plan.

2002 Stock Incentive Plan

Our Board adopted the 2002 Stock Incentive Plan on March 1, 2002. The purpose of the 2002 Stock Incentive Plan is to attract and retain certain selected officers, key employees, non-employee directors and consultants whose skills and talents are important to our operations and reward them for making major contributions to our success. The aggregate number of shares of Class A Common Stock subject to the 2002 Stock Incentive Plan is 2,000,000, all of which may be granted as incentive stock options. In addition, no one person may receive options for more than 500,000 shares of Class A Common Stock in any one calendar year.

The 2002 Stock Incentive Plan permits us to grant nonqualified stock options and incentive stock options (ISOs), as defined in Sections 422 of the Internal Revenue Code of 1986, as amended (the Code). No options may be granted under the 2002 Stock Incentive Plan after May 3, 2012.

The Compensation Committee administers the 2002 Stock Incentive Plan. The Compensation Committee has full and exclusive power to interpret the 2002 Stock Incentive Plan and to adopt rules, regulations and guidelines for carrying out the 2002 Stock Incentive Plan as it may deem necessary or proper.

Under the 2002 Stock Incentive Plan, current and prospective employees, non-employee directors, consultants or other persons who provide services to us are eligible to participate. As of December 31, 2007, there were outstanding options to purchase a total of 1,415,848 shares of Class A Common Stock at exercise prices ranging from \$14.03 to \$19.38 per share under the 2002 Stock Incentive Plan. These options vest quarterly over four years, with the possible acceleration of vesting for some options if certain performance criteria are met. In addition, all options vest upon a change of control as more fully described in the 2002 Stock Incentive Plan.

2000 Stock Incentive Plan

Our Board adopted the 2000 Stock Incentive Plan on July 31, 2000, and subsequently amended the Plan on February 23, 2001. The 2000 Stock Incentive Plan was subsequently approved by our stockholders on May 4, 2001. The purpose of the 2000 Stock Incentive Plan is to attract and retain certain selected officers, key employees, non-employee directors and consultants whose skills and talents are important to our operations and reward them for making major contributions to our success. The aggregate number of shares of Class A Common Stock subject to the

2000 Stock Incentive Plan is 2,750,000, all of which may be granted as incentive stock options. In addition, no one person may receive options for more than 500,000 shares of Class A Common Stock in any one calendar year.

The 2000 Stock Incentive Plan permits us to grant nonqualified stock options and ISOs, as defined in Sections 422 of the Code. No options may be granted under the 2000 Stock Incentive Plan after October 4, 2010.

The Compensation Committee administers the 2000 Stock Incentive Plan. The Compensation Committee has full and exclusive power to interpret the 2000 Stock Incentive Plan and to adopt rules, regulations and guidelines for carrying out the 2000 Stock Incentive Plan as it may deem necessary or proper.

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Under the 2000 Stock Incentive Plan, current and prospective employees, non-employee directors, consultants or other persons who provide services to us are eligible to participate. As of December 31, 2007, there were outstanding options to purchase a total of 1,521,446 shares of Class A Common Stock at exercise prices ranging from \$3.94 to \$14.62 per share under the 2000 Stock Incentive Plan. These options vest, in general, quarterly over four years, with the possible acceleration of vesting for some options if certain performance criteria are met. In addition, all options vest upon a change of control as more fully described in the 2000 Stock Incentive Plan.

1999 Stock Incentive Plan

In 1999, our Board and our stockholders adopted the 1999 Stock Incentive Plan to provide our officers, other key employees and non-employee directors (other than participants in our 1999 Executive Stock Incentive Plan described below), as well as our consultants, with additional incentives by increasing their proprietary interest in us. An aggregate of 900,000 shares of Class A Common Stock are subject to the 1999 Stock Incentive Plan, all of which may be awarded as incentive stock options. In addition, subject to certain equitable adjustments, no one person will be eligible to receive options for more than 300,000 shares in any one calendar year.

The 1999 Stock Incentive Plan permits us to grant awards in the form of non-qualified stock options and ISO s. All stock options awarded under the plan will be granted at an exercise price of not less than fair market value of the Class A Common Stock on the date of grant. No award will be granted under the 1999 Stock Incentive Plan after August 30, 2009.

The 1999 Stock Incentive Plan is administered by the Compensation Committee, which has exclusive authority to grant awards under the plan and to make all interpretations and determinations affecting the plan. The Compensation Committee has discretion to determine the individuals to whom awards are granted, the amount of such award, any applicable vesting schedule, whether awards vest upon the occurrence of a Change in Control (as defined in the plan) and other terms of any award. The Compensation Committee may delegate to certain of our senior officers its duties under the plan subject to such conditions or limitations as the Compensation Committee may establish. Any award made to a non-employee director must be approved by our Board. In the event of any changes in our capital structure, the Compensation Committee will make proportional adjustments to outstanding awards so that the net value of the award is not changed.

As of December 31, 2007, there were outstanding options to purchase a total of 811,754 shares of Class A Common Stock exercisable at prices ranging from \$6.44 to \$27.88 per share under the 1999 Stock Incentive Plan. These options vest, in general, over five years, with the possible acceleration of vesting for some options if certain performance criteria are met. In addition, all options vest upon a change of control as more fully described in the 1999 Executive Stock Incentive Plan.

1998 Stock Incentive Plan

In 1998, we adopted the 1998 Stock Incentive Plan. An aggregate of 1,288,834 shares of Class A Common Stock are subject to the 1998 Stock Incentive Plan, all of which may be awarded as incentive stock options, and a maximum of 100,000 shares of Class A Common Stock may be awarded as restricted stock. In addition, subject to certain equitable adjustments, no one person will be eligible to receive options for more than 300,000 shares in any one calendar year and the maximum amount of restricted stock which will be awarded to any one person during any calendar year is

\$0.5 million.

The 1998 Stock Incentive Plan permits us to grant awards in the form of non-qualified stock options and ISO s and restricted shares of Class A Common Stock. All stock options awarded under the plan will be granted at an exercise price of not less than fair market value of the Class A Common Stock on the date of grant. No award will be granted under the 1998 Stock Incentive Plan after June 22, 2008.

The 1998 Stock Incentive Plan is administered by the Compensation Committee, which has exclusive authority to grant awards under the plan and to make all interpretations and determinations affecting the plan. The

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Compensation Committee has discretion to determine the individuals to whom awards are granted, the amount of such award, any applicable vesting schedule, whether awards vest upon the occurrence of a Change in Control (as defined in the 1998 Stock Incentive Plan) and other terms of any award. The Compensation Committee may delegate to certain of our senior officers its duties under the plan subject to such conditions or limitations as the Compensation Committee may establish. Any award made to a non-employee director must be approved by our Board. In the event of any changes in our capital structure, the Compensation Committee will make proportional adjustments to outstanding awards so that the net value of the award is not changed.

As of December 31, 2007, there were outstanding options to purchase a total of 1,043,508 shares of Class A Common Stock exercisable at prices ranging from \$5.92 to \$14.62 per share under the 1998 Stock Incentive Plan. These options vest, in general, over five years, with the possible acceleration of vesting for some options if certain performance criteria are met. In addition, all options vest upon a change of control as more fully described in the 1998 Stock Incentive Plan.

1999 Executive Stock Incentive Plan

In 1999, our Board and our stockholders adopted the 1999 Executive Stock Incentive Plan (the 1999 Executive Plan) to provide certain of our key executives with additional incentives by increasing their proprietary interest in us. An aggregate of 1,000,000 shares of Class A Common Stock or C Common Stock are subject to the 1999 Executive Plan. In addition, no one person will be eligible to receive options for more than 500,000 shares in any one calendar year. In accordance with the terms of the 1999 Executive Plan, Mr. L. Dickey is the sole remaining participant in the 1999 Executive Plan.

The 1999 Executive Plan permits us to grant awards in the form of non-qualified stock options and ISO s.

Stock options under the 1999 Executive Plan were granted on August 30, 1999 and April 12, 2001 with an exercise price of \$27.875 per share and generally vest quarterly in equal installments over a four-year period (subject to accelerated vesting in certain circumstances).

The 1999 Executive Plan is administered by the Compensation Committee, which has exclusive authority to grant awards under the 1999 Executive Plan and to make all interpretations and determinations affecting the 1999 Executive Plan. In the event of any changes in our capital structure, the Compensation Committee will make proportional adjustments to outstanding awards granted under the 1999 Executive Plan so that the net value of the award is not changed. As of December 31, 2007, there were outstanding options to purchase a total of 500,000 shares of Class C Common Stock and 125,000 shares of Class A Common Stock under the 1999 Executive Plan.

1998 Executive Stock Incentive Plan

In 1998, our Board of Directors adopted the 1998 Executive Stock Incentive Plan (the 1998 Executive Plan). An aggregate of 2,001,380 shares of Class A or C Common Stock are subject to the 1998 Executive Plan. In addition, no one person will be eligible to receive options for more than 1,000,690 shares in any one calendar year. In accordance with the terms of the 1998 Executive Plan, Mr. L. Dickey is the sole remaining participant in the 1998 Executive Plan.

The 1998 Executive Plan permits us to grant awards in the form of non-qualified stock options and ISO s.

Stock options under the 1998 Executive Plan were granted on July 1, 1998 and are divided into three groups. Group 1 consists of time vested options with an exercise price equal to \$14.00 per share and vest quarterly in equal installments over a four-year period (subject to accelerated vesting in certain circumstances). Group 2 and Group 3 also consist of time-based options which vest in four equal annual installments on July 1, 1999, July 1, 2000, July 1, 2001 and July 1, 2002 (subject to accelerated vesting in certain circumstances). The first installment of both the Group 2 options and Group 3 options were exercisable at a price of \$14.00 per share on July 1, 1999 and subsequent

F-33

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

installments are exercisable at a price 15% (or 20% in the case of Group 3 options) greater than the prior year's exercise price for each of the next three years. Stock options under the 1998 Executive Plan were also granted on April 12, 2001. These options vest quarterly in equal installments over a four year period and were issued with an exercise price of \$5.92.

The 1998 Executive Plan is administered by the Compensation Committee, which has exclusive authority to grant awards under the 1998 Executive Plan and to make all interpretations and determinations affecting the 1998 Executive Plan. In the event of any changes in our capital structure, the Compensation Committee will make proportional adjustments to outstanding awards granted under the 1998 Executive Plan so that the net value of the award is not changed. As of December 31, 2007, there were outstanding options to purchase a total of 1,000,690 shares of Class C Common Stock and 519,889 shares of Class A Common Stock under the 1998 Executive Plan.

The following tables represent a summary of options outstanding and exercisable at and activity during the years ended December 31, 2007, 2006 and 2005:

	Shares	Weighted Average Exercise Price
Outstanding at December 31, 2004	9,847,180	\$ 14.40

Aggregate intrinsic value	\$ 2,716,000			\$ 2,716,000	

The weighted average grant date fair value of options granted during the years 2007, 2006 and 2005 was \$0.1 million, \$2.9 million and \$5.4 million respectively. The total intrinsic value of options exercised during the years ended December 31, 2007, 2006 and 2005 was \$0.2 million, \$0.3 million and \$0.5 million, respectively.

12. Income Taxes

Income tax expense (benefit) for the years ended December 31, 2007, 2006, and 2005 consisted of the following (dollars in thousands):

	2007	2006	2005
Current tax expense (benefit):			
Federal	\$ 107	\$	\$
State and local	(3,953)	(2,193)	5,911
Total current expense	\$ (3,846)	\$ (2,193)	\$ 5,911
Deferred tax expense (benefit):			

Edgar Filing: CUMULUS MEDIA INC - Form 10-K

Federal	\$ (29,175)	\$ (291)	\$ (17,509)
State and local	(6,648)	(33)	(2,437)

Total deferred expense (benefit)	(34,154)	(3,607)	(23,011)
Total income tax expense (benefit)	\$ (38,000)	\$ (5,800)	\$ (17,100)

F-35

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Total income tax expense (benefit) differed from the amount computed by applying the federal statutory tax rate of 35% for the years ended December 31, 2007, 2006 and 2005 due to the following (dollars in thousands):

	2007	2006	2005
Pretax income (loss) at federal statutory rate	\$ (91,631)	\$ (17,635)	\$ (80,302)
State income tax expense (benefit), net of federal benefit	(10,436)	(1,860)	(8,420)
Reserve for contingencies	(4,731)	(2,193)	5,911
Change in state tax rates	1,669	(3,283)	(3,065)
Other	(1,540)	1,951	572
Non cash stock compensation & Section 162 Disallowance	4,626	8,420	
Impairment charges on goodwill with no tax basis	23,200		21,200
Increase in valuation allowance	40,843	8,800	47,004
Net income tax expense (benefit)	\$ (38,000)	\$ (5,800)	\$ (17,100)

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and liabilities at December 31, 2007 and 2006 are presented below:

	2007	2006
Current deferred tax assets:		
Accounts receivable	\$ 717	\$ 834
Accrued expenses and other	2,358	2,705
Current deferred tax assets	3,075	3,539
Less: valuation allowance	(3,075)	(3,539)
Net current deferred tax assets		
Noncurrent deferred tax assets:		
Intangible and other assets	70,086	38,143
Other liabilities	8,415	8,501
Net operating loss	91,352	80,318
Noncurrent deferred tax assets	169,853	126,962
Less: valuation allowance	(166,627)	(125,731)
Net noncurrent deferred tax assets	3,226	1,231
Noncurrent deferred tax liabilities:		
Intangible assets	162,890	197,044

Property and equipment	697	1,178
Other	2,529	53
Noncurrent deferred tax liabilities	166,116	198,275
Net noncurrent deferred tax liabilities	162,890	197,044
Net deferred tax liabilities	\$ 162,890	\$ 197,044

Deferred tax assets and liabilities are computed by applying the Federal income and estimated state tax rate in effect to the gross amounts of temporary differences and other tax attributes, such as net operating loss carry-forwards. In assessing if the deferred tax assets will be realized, the Company considers whether it is more likely than not that some or all of these deferred tax assets will be realized. The ultimate realization of deferred tax assets

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

is dependent upon the generation of future taxable income during the period in which these temporary differences become deductible.

During the year ended December 31, 2007, the Company recorded deferred tax expense of \$18.8 million generated during the current year, resulting from amortization of goodwill and broadcast licenses that is deductible for tax purposes, but is not amortized in the financial statements. This charge was offset by a \$54.4 million deferred tax benefit resulting from the reversal of deferred tax liabilities in connection with the impairment of certain broadcast licenses and goodwill and investment in affiliates. Also during the year ended December 31, 2007, the Company revised its estimate for potential tax exposure at the state and local level and, accordingly, recorded \$4.7 million reversal against the previously established reserve for these contingencies.

During the year ended December 31, 2006, the Company recorded deferred tax expense of \$21.0 million generated during the current year, resulting from amortization of goodwill and broadcast licenses that is deductible for tax purposes, but is not amortized in the financial statements. This charge was offset by a \$24.3 million deferred tax benefit resulting from the reversal of deferred tax liabilities in connection with the impairment of certain broadcast licenses and goodwill and investment in affiliates. Also during the year ended December 31, 2006, the Company revised its estimate for potential tax exposure at the state and local level and, accordingly, recorded \$2.2 million reversal against the previously established reserve for these contingencies.

During the year ended December 31, 2005, the Company recorded deferred tax expense of \$24.4 million generated during the current year, resulting from amortization of goodwill and broadcast licenses that is deductible for tax purposes, but is not amortized in the financial statements. This charge was offset by a \$47.4 million deferred tax benefit resulting from the reversal of deferred tax liabilities in connection with the impairment of certain broadcast licenses and goodwill. Also during the year ended December 31, 2005, the Company revised its estimate for potential tax exposure at the state and local level and, accordingly, recorded \$5.9 million to reserve for these contingencies.

At December 31, 2007, the Company has federal net operating loss carry forwards available to offset future income of approximately \$234.5 million, of which \$3.4 million will expire in 2012 and the remaining \$231.1 will expire in the years 2018 through 2026. A portion of these losses may be subject to limitations due to ownership changes.

The Company adopted Financial Accounting Standard Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48) on January 1, 2007. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the financial statements. FIN 48 prescribes a recognition threshold for the financial statement recognition and measurement of a tax position taken or expected to be taken within an income tax return. The Company did not have any transition adjustment upon adoption of FIN 48. The total amount of unrecognized tax benefits at January 1, 2007 was \$5.7 million, inclusive of \$1.4 million for penalties and interest. Of this total, \$5.7 million represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in future periods.

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company continues to record interest and penalties related to unrecognized tax benefits in current income tax expense. The total amount of interest accrued at December 31, 2007 was \$0.3 million. The total amount of unrecognized tax benefits and accrued interest and penalties at December 31, 2007 was \$0.9 million. Of this total, \$0.9 million represents the amount of unrecognized tax benefits and accrued interest and penalties that, if recognized, would favorably affect the effective income tax rate in future periods. The entire amount of \$0.9 million relates to the state of Texas and that state has begun an examination which is expected to be completed within the next 12 months. Substantially all federal, state, local and foreign income tax years have been closed for the tax years through 2003; however, the various tax jurisdictions may adjust the Company's net operating loss carry forwards.

	Unrecognized Tax Benefits	Accrued Interest & Penalties (In thousands)	Gross Unrecognized Tax Benefits
Balance at January 1, 2007	\$ 4,228	\$ 1,441	\$ 5,669
Increases due to tax positions taken during current years			
Increase due to tax positions taken in previous years		253	253
Decreases due to settlements with taxing authorities	(286)	(314)	(600)
Decreases due to lapse of statute of limitations	(3,261)	(1,123)	(4,384)
Balance at December 31, 2007	\$ 681	\$ 257	\$ 938

The Company and its subsidiaries file income tax returns in the United States federal jurisdiction and various state and foreign jurisdictions.

13. Earnings Per Share

The following table sets forth the computation of basic and diluted income (loss) per share for the years ended December 31, 2007, 2006 and 2005 (amounts in thousands, except per share amounts):

	2007	2006	2005
Numerator:			
Numerator for basic and diluted loss per common share	\$ (223,804)	\$ (44,181)	\$ (212,334)
Denominator:			
Denominator for basic loss per common share			
Weighted average common shares outstanding	43,187	50,824	66,911
Effect of dilutive securities:			
Options			

Restricted shares
 Note payable

Denominator for diluted income loss per common share	43,187	50,824	66,911
Basic and diluted loss per common share	\$ (5.18)	\$ (0.87)	\$ (3.17)

Stock options to purchase 6,835,721 shares, 7,020,743, shares and 2,696,754 shares of common stock were outstanding during the years ended December 31, 2007, 2006 and 2005, respectively, but not included in the computation of diluted income (loss) per common share because the option exercise price was greater than the average market price of the common shares for the period and their effect would be anti-dilutive.

Additionally, unvested restricted common shares as discussed in Note 11 are not included in the computation of diluted income (loss) per common share for the period because their effect would be anti-dilutive.

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****14. Leases**

The Company has non-cancelable operating leases, primarily for land, tower space, office space, certain office equipment and vehicles. The operating leases generally contain renewal options for periods ranging from one to ten years and require the Company to pay all executory costs such as maintenance and insurance. Rental expense for operating leases was approximately \$9.9 million, \$8.9 million, and \$8.6 million for the years ended December 31, 2007, 2006 and 2005, respectively.

Future minimum lease payments under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) as of December 31, 2007 are as follows:

Year Ending December 31:

2008	\$ 8,751
2009	7,368
2010	5,992
2011	4,811
2012	4,228
Thereafter	17,025
	\$ 48,175

15. Commitments and Contingencies

The radio broadcast industry's principal ratings service is Arbitron, which publishes periodic ratings surveys for domestic radio markets. The Company has a five-year agreement with Arbitron under which it receives programming ratings materials in a majority of its markets. The Company's remaining obligation under the agreement with Arbitron totals approximately \$9.9 million as of December 31, 2007, and will be paid in accordance with the agreement through April 2009.

The contract with Katz contains termination provisions which, if exercised by the Company during the term of the contract, would obligate the Company to pay a termination fee to Katz, calculated based upon a formula set forth in the contract.

In December 2004, the Company purchased 240 perpetual licenses from iBiquity Digital Corporation, which will enable it to convert to and utilize digital broadcasting technology on 240 of its stations. Under the terms of the agreement, the Company has committed to convert the 240 stations over a seven year period. The conversion of stations to the digital technology will require an investment in certain capital equipment over the next 4 years. Management estimates its investment will be approximately \$0.1 million per station converted.

The Company has been subpoenaed by the Office of the Attorney General of the State of New York, as were other radio broadcasting companies, in connection with the New York Attorney General's investigation of promotional

practices related to record companies' dealings with radio stations broadcasting in New York. The Company is cooperating with the Attorney General in this investigation.

The Company is aware of three purported class action lawsuits related to the merger (See Note 18): Jeff Michelson, on behalf of himself and all others similarly situated v. Cumulus Media Inc., et al. (Case No. 2007CV137612, filed July 27, 2007) was filed in the Superior Court of Fulton County, Georgia against the Company, Lew Dickey, the other directors and the sponsor; Patricia D. Merna, on behalf of herself and all others similarly situated v. Cumulus Media Inc., et al. (Case No. 3151, filed August 8, 2007) was filed in the Chancery Court for the State of Delaware, New Castle County, against the Company, Lew Dickey, the other directors, the sponsor, Parent and Merger Sub; and Paul Cowles v. Cumulus Media Inc., et al. (Case No. 2007-CV-139323, filed August 31, 2007) was filed in the Superior Court of Fulton County, Georgia against the Company, Lew Dickey, the other directors and the sponsor.

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The complaints in each of these lawsuits allege, among other things, that the merger is the product of an unfair process, that the consideration to be paid to the Company's stockholders pursuant to the merger is inadequate, and that the defendants breached their fiduciary duties to the Company's stockholders. The complaints further allege that the Company and the sponsor (and Parent and Merger Sub) aided and abetted the actions of the Company's directors in breaching such fiduciary duties. The complaints seek, among other relief, an injunction preventing completion of the merger.

The Company believes that it has committed no breaches of fiduciary duties, disclosure violations or any other breaches or violations whatsoever, including in connection with the merger, the merger agreement or the proxy statement filed in connection with the merger. In addition, the Company has been advised that the other defendants named in the complaints similarly believe the allegations of wrongdoing in the complaints to be without merit, and deny any breach of duty to or other wrongdoing with respect to the purported plaintiff classes.

In order to resolve one of the lawsuits, the Company has reached an agreement along with the individual defendants in that lawsuit, without admitting any wrongdoing, pursuant to a memorandum of understanding dated November 13, 2007, to extend the statutory period in which holders of our common stock may exercise their appraisal rights and to make certain further disclosures in the proxy statement filed in connection with the merger as requested by counsel for the plaintiff in that litigation.. The parties have completed confirmatory discovery and anticipate that they will cooperate in seeking dismissal of the lawsuit. Such dismissal, including an anticipated request by plaintiff's counsel for attorneys' fees, will be subject to court approval. The Company intends to vigorously defend the remaining two lawsuits.

In May 2007, the Company received a request for information and documents from the FCC related to the Company's sponsorship of identification policies and sponsorship identification practices at certain of its radio stations as requested by the FCC. The Company is cooperating with the FCC in this investigation and is in the process of producing documents and other information requested by the FCC. The Company has not yet determined what effect the inquiry will have, if any, on its financial position, results of operations or cash flows.

The Company is also a defendant from time to time in various other lawsuits, which are generally incidental to its business. The Company is vigorously contesting all such matters and believes that their ultimate resolution will not have a material adverse effect on its consolidated financial position, results of operations or cash flows. Cumulus is not a party to any lawsuit or proceeding which, in management's opinion, is likely to have a material adverse effect.

16. Related Party Transactions

Loan to Executive. On February 2, 2000 the Company loaned Mr. L. Dickey \$5.0 million, respectively for the purpose of enabling him to purchase 128,000 shares of newly issued Class C Common Stock from the Company. The price of the shares was \$39.00 each, which was the approximate market price for the Company's Class A Common Stock on that date. The loan was represented by a recourse promissory note executed by Mr. L. Dickey that provided for the payment of interest at 9.0% per annum or the peak rate the Company paid under the its credit facility and a note maturity date of December 31, 2003. Pursuant to Mr. L. Dickey's Amended and Restated Employment Agreement dated July 1, 2001, the Company reduced the per annum interest rate on his note to 7% and extended the maturity date of the note to December 31, 2006. On December 20, 2006 Mr. L. Dickey repaid the entire balance of the note, plus accrued interest.

17. Defined Contribution Plan

Effective January 1, 1998, the Company adopted a qualified profit sharing plan under Section 401(k) of the Internal Revenue Code. All employees meeting eligibility requirements are qualified for participation in the plan. Participants in the plan may contribute 1% to 15% of their annual compensation through payroll deductions. Under the plan, the Company will provide a matching contribution of 25% of the first 6% of each participant's

F-40

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

contribution. The Company remits matching contributions to the plan monthly. During 2007, 2006, and 2005 the Company contributed approximately \$0.7 million, \$0.7 million and \$0.7 million to the plan, respectively.

18. Merger

On July 23, 2007, the Company entered into an Agreement and Plan of Merger (the Merger Agreement) with Cloud Acquisition Corporation, a Delaware corporation (Parent), and Cloud Merger Corporation, a Delaware corporation and a wholly owned subsidiary of Parent (Merger Sub). Under the terms of the Merger Agreement, Merger Sub will be merged with and into the Company, with the Company continuing as the surviving corporation and a wholly owned subsidiary of Parent (the Merger).

Parent is owned by an investment group consisting of Mr. Lewis W. Dickey, Jr., the Company's Chairman, President and Chief Executive Officer, his brother John W. Dickey, the Company's Executive Vice President and Co-Chief Operating Officer, other members of their family (collectively with Messrs. L. Dickey and J. Dickey, the Dickeys), and an affiliate of Merrill Lynch Global Private Equity (the Sponsor).

The Dickeys have agreed, at the request of the Sponsor, to contribute a portion of their Company equity to Parent or an affiliate thereof (such contributed equity, the Rollover Shares). Parent has obtained equity and debt financing commitments for the transactions contemplated by the Merger Agreement, the aggregate proceeds of which will be sufficient for Parent to pay the aggregate merger consideration and all related fees and expenses.

At the effective time of the Merger, each outstanding share of Class A Common Stock, other than (a) the Rollover Shares, (b) shares owned by the Company, Parent or any wholly owned subsidiaries of the Company or Parent, or (c) shares owned by any stockholders who are entitled to and who have properly exercised appraisal rights under Delaware law, will be cancelled and converted into the right to receive \$11.75 per share in cash.

19. Variable Interest Entities and Off-Balance Sheet Arrangements

Current FCC and antitrust regulatory requirements limit the number of stations a broadcaster may own in a given local market. In order to comply with all applicable regulations, during the second quarter of 2006 the Company entered into a trust agreement to place station KMAJ-AM into a trust (the KMAJ Trust) that comports with FCC rules and policies and thereby reduces the number of attributable ownership interests which the Company has in radio stations in the Topeka, Kansas Arbitron Metropolitan area.

Pursuant to the terms and conditions of the trust agreement, the Company has determined that it is the primary beneficiary of the KMAJ Trust and should absorb a majority of the trust's expected returns. As a result, in accordance with the guidance provided by Financial Interpretation No. 46 (Revised), *Consolidation of Variable Interest Entities*, the Company has included the accounts of the KMAJ Trust in its condensed consolidated financial statements as of and for the years ended December 31, 2007 and 2006.

As of December 31, 2007, the Company had no off-balance sheet arrangements.

20. Subsequent Event

On March 13, 2008, the Company entered into a second amendment to the Amended Credit Agreement to, among other things, (i) amend the definition of "Change of Control" to specify that the transactions contemplated by the Merger Agreement shall not constitute a Change of Control; (ii) specify that no payment contemplated by the Merger Agreement, including the merger consideration, shall constitute a "Restricted Payment" as defined in the Amended Credit Agreement; (iii) modify certain financial and other covenants, including those related to mandatory prepayment based on cash flows and allowable total leverage ratios; (iv) modifies certain elements of the collateral required to be pledged to secure the Company's obligations under the Amended Credit Agreement to exclude voting stock of the Company and its subsidiaries under certain circumstances; (v) provide for an increase to the interest rates for the loans under the Amended Credit Agreement by 0.75% per year; (vi) provide that the

Table of Contents**CUMULUS MEDIA INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Company will not make any revolving loan borrowings under the Amended Credit Agreement for the purpose of making any payment contemplated by the Merger Agreement, including, without limitation, payment of the merger consideration; (vii) eliminate the incremental facilities currently provided for in the existing credit agreement; and (viii) require the Company to pay an amendment fee of 2% of the revolver loan commitment and outstanding balance on term loans to those lenders under the Amended Credit Agreement who consented to the amendments. Each of the foregoing amendments and agreements shall be effective should the Company issue a written notice to the administrative agent specifying such effectiveness, which the Company may only so specify on the date of the consummation or substantial consummation of the transactions contemplated by the Merger Agreement.

21. Quarterly Results (Unaudited)

The following table presents the Company's selected unaudited quarterly results for the eight quarters ended December 31, 2007 (in thousands, except per share data).

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
FOR THE YEAR ENDED DECEMBER 31, 2007				
Net revenue	\$ 72,401	\$ 87,338	\$ 84,183	\$ 84,405
Operating income (loss)	9,991	23,850	(62,574)	(122,345)
Net income (loss)(1)	(1,813)	2,539	(70,530)	(154,000)
Basic income (loss) per common share	\$ (0.04)	\$ 0.06	\$ (1.63)	\$ (3.56)
Diluted income (loss) per common share	\$ (0.04)	\$ 0.06	\$ (1.63)	\$ (3.56)
FOR THE YEAR ENDED DECEMBER 31, 2006				
		(As Restated)	(As Restated)	
Net revenue	\$ 75,269	\$ 87,342	\$ 83,951	\$ 87,759
Operating income (loss)	8,995	21,942	20,361	(51,337)
Net income (loss)(2)	857	6,737	(669)	(51,106)
Basic income (loss) per common share	\$ 0.01	\$ 0.12	\$ (0.02)	\$ (1.20)
Diluted income (loss) per common share	\$ 0.01	\$ 0.11	\$ (0.02)	\$ (1.20)

(1) The quarter ended June 30, 2007 includes a loss on the early extinguishment of debt of \$1.0 million, which was recorded in connection with the completion of a new \$850 million credit agreement in June 2007 and the related retirement of the term and revolving loans under its pre-existing credit agreement. The quarters ended September 30, 2007 and December 31, 2007 include impairment charges of \$81.3 million and \$149.3 million, respectively. Additionally, the quarter ended December 31, 2007 includes a \$5.9 million gain on the sale of certain assets in the Caribbean.

(2) The quarter ended June 30, 2006 includes a loss on the early extinguishment of debt of \$2.3 million, which was recorded in connection with the completion of a new \$850 million credit agreement in June 2006 and the related retirement of the term and revolving loans under its pre-existing credit agreement. Additionally, the Company

recorded a gain of \$2.5 million during the same quarter related to the contribution of assets to our affiliate CMP. The quarter ended December 31, 2006 includes an impairment charge of \$63.4 million, which was recorded in connection with the Company's annual impairment evaluation of intangible assets. In addition, there was non-cash stock compensation charge of \$10.4 million related to the amendment of the CEO's employment agreement in December, 2006.

Subsequent to the filing of the Company's annual report on Form 10-K for the year ended December 31, 2006, management discovered that beginning June 15, 2006, in connection with the refinancing of the Company's debt, based on the interest rate elections made by the Company at this time, the May 2005 Swap no longer qualified as a cash flow hedging instrument. Accordingly, the changes in its fair value should have been

Table of Contents

CUMULUS MEDIA INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

reflected in the statement of operations instead of AOCI. In addition, as of June 15, 2006, certain amounts included in AOCI should have been reversed and recognized in the statement of operations.

As a result of the corrections of the error discussed above, the Company's income before income tax benefit and equity loss of affiliate for the three months ended June 30, 2006 and September 30, 2006 increased approximately \$6.3 million and decreased approximately \$5.8 million, respectively, resulting primarily from the reclassification of a portion of AOCI to the statement of operations. Net income for the three months ended June 30, 2006 and September 30, 2006 increased approximately \$2.0 million and decreased approximately \$1.9 million, respectively.
