Table of Contents

NETSOL TECHNOLOGIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
THREE AND NINE MONTHS ENDED MARCH 31, 2002 AND 2001 (UNAUDITED)

PRINCIPLES OF CONSOLIDATION: The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, Network Solutions (PVT), Ltd., NetSol (PVT), Limited, NetSol Connect (PVT), Ltd., NetSol UK, Limited, Network Solutions Group Ltd. and Subsidiaries, Abraxas Australia Pty, Ltd., NetSol eR, Inc., Supernet AG and NetSol USA, Inc. All material intercompany accounts have been eliminated in consolidation.

COMPANY NAME CHANGE: Effective February 8, 2002, the Company changed its name from NetSol International, Inc. to NetSol Technologies, Inc. The name change was approved by a majority of shareholders at the Company's annual shareholders meeting held on January 25, 2002.

BUSINESS ACTIVITY: The Company designs, develops, markets, and exports proprietary software products to customers in the automobile finance and leasing industry worldwide. The Company also provides consulting services in exchange for fees from customers.

USE OF ESTIMATES: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

BASIS OF PRESENTATION: The consolidated condensed interim financial statements included herein have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading.

These statements reflect all adjustments, consisting of normal recurring adjustments, which, in the opinion of management, are necessary for fair presentation of the information contained therein. It is suggested that these consolidated condensed financial statements be read in conjunction with the financial statements and notes thereto included in the Company's annual report on Form 10-KSB for the year ended June 30, 2001. The Company follows the same accounting policies in preparation of interim reports.

The results of operations for the nine months ended March 31, 2002, are not necessarily indicative of the results to be expected for the year ending June 30, 2002.

WINDING-UP ORDER: Effective November 26, 2001, Network Solutions Ltd., the operating subsidiary of Network Solutions Group Ltd., entered into a Winding-up Order with The Insolvency Service in the United Kingdom (UK). The Insolvency Service is an executive agency within the Department of Trade and Industry in the UK. The Company anticipates in the near term to also place NetSol UK Ltd, Network Solutions Group Ltd. and Network Solutions Northern Ltd. (non-operating entities) into Winding-up Order status also. The Company anticipates a final dissolution order from The Insolvency Service for these entities to be received within 90-120 days from placement date. None of the UK entities have had any operations for the year ended June 30, 2002. NetSol Technologies has negotiated a settlement agreement with the largest creditor of Network Solutions Ltd. NetSol Technologies has now assumed this debt of approximately \$129,000. This settlement was reached to remove the personal guarantee of a prior director of NetSol Technologies, subject to the terms of the agreement being satisfied. The agreement terms are for monthly payments of approximately \$3,625 for the 1st twelve months and approximately \$7,500 for the next twenty months. Payments commenced in January 2002 and monthly amounts are subject to currency exchange rate fluctuations between the Dollar and British Pound. The net assets of Network Solutions Ltd. (excluding the above amount assumed by NetSol Technologies) are presented as a separate line item under current liabilities on the consolidated March, 2002 balance sheet.

GOING CONCERN: The Company's consolidated financial statements are prepared using the accounting principles generally accepted in the United States of America applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. Without realization of additional capital, it would be unlikely for the Company to continue as a going concern. This factor raises substantial doubt about the Company's ability to continue as a going concern.

Table of Contents

Management recognizes that the Company must generate additional resources to enable it to continue operations. Management has implemented its plan, which includes closing down its loss generating UK entities, disposal of its German subsidiary, and cost cutting measures at every entity level. Additionally, management's plans also include the sale of additional equity securities and debt financing from related parties and outside third parties. However, no assurance can be given that the Company will be successful in raising additional capital. Further, there can be no assurance, assuming the Company successfully raises additional equity, that the Company will achieve profitability or positive cash flow. If management is unable to raise additional capital and expected significant revenues do not result in positive cash flow, the Company will not be able to meet its obligations and may have to cease operations.

Uncertainties

On September 11, 2001, the United States was the target of terrorist attacks of unprecedented scope. These attacks have caused major instability in the U.S. and other financial markets. Leaders of the U.S. government have announced their intention to actively pursue those behind the attacks and to possibly initiate broader action against global terrorism. Due to these attacks, any response may lead to armed hostilities or to further acts of terrorism in the United States or elsewhere, and such developments would likely cause further instability in financial markets. In addition, armed hostilities and further acts of terrorism may directly impact the Company's physical facilities and operations, which are located in North America, Australia and the Southeast Asian Region (including collectively significant subsidiaries located in Pakistan), or those of their customers. Furthermore, the recent terrorist attacks and future developments may result in reduced demand from customers for services or may negatively impact the clients' ability to outsource. Currently, there are tensions involving Afghanistan, a neighbor of Pakistan. These hostilities and tensions could lead to political or economic instability in Pakistan and a possible adverse effect on operations and future financial performance. These developments will subject the Company's worldwide operations to increased risks and, depending on their magnitude, could have a material adverse effect on the Company's financial position, results of operations or liquidity.

FOREIGN CURRENCY: The accounts of Network Solutions Group Ltd. and Subsidiaries and NetSol UK, Limited use British Pounds, Network Solutions PK, Ltd., NetSol (Pvt), Limited and NetSol Connect PVT, Ltd. use Pakistan Rupees, NetSol Abraxas Australia Pty, Ltd. uses the Australian dollar and Supernet AG uses the German Mark as the functional currencies. NetSol Technologies, Inc. and subsidiaries NetSol USA, Inc. and NetSol eR, Inc. use U.S. dollars as the functional currencies. Assets and liabilities are translated at the exchange rate on the balance sheet date, and operating results are translated at the average exchange rate throughout the period. Translation gains of \$481,682 at March 31, 2002 are classified as an item of other comprehensive income in the stockholders' equity section of the consolidated balance sheet.

REVENUE RECOGNITION: Revenue is recognized when earned. The Company's revenue recognition policies are in compliance with all applicable accounting regulations, including American Institute of Certified Public Accountants (AICPA) Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended by SOP 98-4 and 98-9. Any revenues from software arrangements with multiple elements are allocated to each element of the arrangement based on the relative fair values using specific objective evidence as defined in the SOPs. If no such objective evidence exists, revenues from the arrangements are not recognized until the entire arrangement is completed and accepted by the customer. Once the amount of the revenue for each element is determined, the Company recognizes revenue as each element is completed and accepted by the customer. For arrangements that require significant production, modification or customization of software, the entire arrangement is accounted for

Table of Contents

by the percentage of completion method, in conformity with Accounting Research Bulletin (ARB) No. 45 and SOP 81-1.

PRIVATE PLACEMENT: The Company sold 504,849 shares of its restricted Rule 144 common stock in the amount of \$98,000 through private placement offerings during the quarter ended March 31, 2002 pursuant to Rule 506 of Regulation D of the Securities and Exchange Act of 1933.

STOCK OPTIONS: On February 16, 2002, the Board of Directors approved and granted a 5,866,000 stock options purchase 5,866,000 shares of common stock of the Company to officers, directors and employees at exercise prices ranging from \$0.15 to \$0.50 per share, of which, 1,950,000 vested immediately and the remaining 3,916,000 vests 25% on a quarterly basis. In addition, on April 22, 2002, the Board of Directors approved and granted a 1,000,000 stock options purchase 1,000,000 shares of common stock of the Company to officers, directors and employees at exercise prices ranging from \$0.20 to \$0.25 per share, of which, 300,000 vested immediately and the remaining 700,000 vests 25% on a quarterly basis. There were no other options granted, except for the items mentioned above. There were no shares of stock issued for services during the quarter ended March 31, 2002.

INTANGIBLES ASSETS: Accumulated amortization at March 31, 2002 was \$1,441,650 for products licenses, renewals, enhancements, copyrights, trademarks and trade name and \$1,212,727 for customer lists.

LITIGATION SETTLEMENT: The Company has reached a settlement agreement involving an ongoing litigation with Adrian Cowler and the Surrey Design Partnership Limited. Pursuant to the Terms of the settlement agreement, the Company issued 650,000 restricted shares of the Company's common stock valued at \$389,860 and will make cash payments aggregating approximately \$286,000 over the next four years (through March 31, 2006), of which \$158,360 is classified as long term on the balance sheet at March 31, 2002. The Company paid \$35,000 in February 2002.

BUSINESS COMBINATIONS ACCOUNTED FOR UNDER THE POOLING OF INTEREST METHOD:

SUPERNET AKTIENGESELLSCHAFT (SUPERNET AG)

On May 2, 2000, the Company issued 425,600 Rule 144 restricted common shares in exchange for 100% of the outstanding capital stock of Supernet Aktiengesellschaft, a German Company. This business combination was accounted for using the pooling of interest method of accounting under APB Opinion No. 16, and accordingly, the accompanying financial statements have been restated to show the results of operations as if the combination had occurred at the beginning of all periods presented. On May 1, 2001, management of the Company committed to a formal plan to dispose of Supernet AG, a division or segment of the Company, through a sale of all the issued and outstanding shares of Supernet AG. The closing date was on May 21, 2001. The Company is following the guidance of APB No. 30 in the accounting for and disclosure of this disposal. The losses from operations of this discontinued division is presented on the face on the Statement of Operations for all periods presented. There are no applicable corresponding income tax effects, which applied to this disposal. Revenues applicable to this discontinued division were \$545,534 for the nine months ended March 31, 2001. Included in accounts payable and accrued expenses at March 31, 2002 is approximately \$140,000 that the Company has accrued for, under the terms of the sale agreement.

RECLASSIFICATIONS: Certain accounts balances from the prior year comparable quarter have been reclassified to conform to present quarter presentation.

Table of Contents

PART I FINANCIAL INFORMATION

ITEM 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

The following discussion is intended to assist in an understanding of the Company's financial position and results of operations for the quarter ending March 31, 2002.

Forward-Looking Information.

This report contains certain forward-looking statements and information relating to the Company that are based on the beliefs of its management as well as assumptions made by and information currently available to its management. When used in this report, the words "anticipate", "believe", "estimate", "expect", "intend", "plan", and similar expressions as they relate to the Company or its management, are intended to identify forward-looking statements. These statements reflect management's current view of the Company with respect to future events and are subject to certain risks, uncertainties and assumptions. Should any of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in this report as anticipated, estimated or expected. The Company's realization of its business aims could be materially and adversely affected by any technical or other problems in, or difficulties with, planned funding and technologies, third party technologies which render the Company's technologies obsolete, the unavailability of required third party technology licenses on commercially reasonable terms, the loss of key research and development personnel, the inability or failure to recruit and retain qualified research and development personnel, or the adoption of technology standards which are different from technologies around which the Company's business ultimately is built. The Company does not intend to update these forward-looking statements.

GENERAL

NetSol Technologies, Inc. formally known as NetSol International, Inc. ("NetSol" or the "Company") is in the business of information technology (I/T) services. Since it was founded in 1997, the Company has developed enterprise solutions that help clients use I/T more efficiently in order to improve their operations and profitability and to achieve business results. Network Solutions Pvt. Ltd., a subsidiary of NetSol ("NetSol PK"), develops the majority of the software for the Company. NetSol PK was the first company in Pakistan to achieve the ISO 9001 accreditation. NetSol PK is the first IT company in Pakistan to receive the coveted Software Engineering Institute Capability Maturity Model (SEI CMM) Level 2 software development assessment. This is one of the highest levels of recognition for quality and best practices a software company can achieve.

Company Business Model

The Company offers a broad array of professional services to clients in the global commercial markets and specializes in the application of advanced and complex I/T enterprise solutions to achieve its customers' strategic objectives. Its service offerings include outsourcing, systems integration, customized IT solutions, project/program management and I/T management consultancy, as well as other professional services, including e-business solutions.

Outsourcing involves operating all or a portion of a customer's technology infrastructure, including systems analysis, system design and architecture, change management, enterprise applications development, network operations, desktop computing and data center management.

Table of Contents

Systems integration encompasses designing, developing, implementing and integrating complete information systems.

I/T and management consulting services include advising clients on the strategic acquisition and utilization of I/T and on business strategy, operations, change management and business process reengineering.

The Company also develops sophisticated software systems for the asset based lease and finance industries. NetSol has developed a complete integrated lease and finance package, which is a series of five products that can be marketed and utilized in an integrated system. These products are ePOS, PMS, SMS, CMS (under development), and WFS. These five applications form the full suite of the asset based lending Enterprise Resource Planning applications. These applications can run virtually the entire operations of a captive leasing company.

NetSol ePOS is a browser-based Point of Sale system that can be used by any front-end selling operation, including motor vehicle dealers and other outlets. ePOS users create quotations and financing applications for the customers using predefined financial products. The proposal is submitted to Back Office (PMS) for credit approval. After analysis, the proposal is sent back to ePOS system with a final decision.

Proposal Management System (PMS) provides various finance/leasing companies with the ability to quickly assess the worthiness of an applicant applying for a loan or a lease. The core of the system is driven by a strong workflow management engine with integrated links to credit rating agencies and offers an automated point scoring strategy for automatic approval/rejection/referral. It can be customized to link to any Point of Sale System, and it has the ability to integrate any vehicle data provider such as Glass Guide in Europe and Australia.

The NetSol Wholesale Finance System (WFS) is developed to automate and manage the Whole Sale Finance (Floor Plan) activities of a Finance Company. The design of the system is based on the concept of One Loan One Asset to facilitate Asset Tracking and Costing of an asset. The system covers Credit Limit Request, Payment of Loan, Billing, and Settlement, Auditing of Stocks, Dealer Information and ultimately the pay-off functions.

Settlement Management System (SMS) verifies the signed document sent by the dealer/broker/third party against the information stored in the Proposal Management System database. SMS verifies all calculations before loading the contract into the Contract Management System. Other main features are collection of first rental and disbursement of funds to dealers, insurance companies and other third parties. Workflow software is part of SMS and it enables the users of SMS to communicate with Proposal Management workflow or within its own workgroup.

The Contract Management System (CMS) manages lease/finance contracts for financing of vehicles from inception until completion and creates all the required accounting entries to interface with a general ledger. The leasing company is able to establish, maintain and terminate such financial contracts. Contracts may include added value services such as vehicle maintenance and/or insurance premiums. It furthermore incorporates functional extensions such as litigation, remarketing of vehicles, securitization of a portfolio and post dated check management.

These are traditionally complex business applications and require a great deal of industry experience both in the development as well as implementation stages. NetSol, over the years, has developed core competencies in the asset based lending software space. These are sought after skills shared in a team of approximately 30 business consultants. NetSol is able to demand a premium for these consultants and leverages this competency when bidding for new business.

Typically, the sales cycle for these products is anywhere between six to twelve months and NetSol derives its income both from selling the license to use the products as well as extensive customization, implementation, support and maintenance. License fees can vary generally between \$75,000 to \$500,000 per license depending upon the size of the customer and the complexity of the customization. The revenue for the license and the customization flows in several phases and could take from six months to two years

before its is fully recognized as income in accordance with accounting principles generally accepted in the United States of America.

STATUS OF ANY NEW PRODUCTS OR SERVICES

The Company expanded its menu of software into banking and other financial areas. NetSol PK launched new customized banking applications software. The Company has the technical know how and capability to successfully enter this vibrant banking sector. Over eight new business development and project management teams in the area of banking and finance were created in the second quarter of 2001. As a result of this new initiative, NetSol added a new fortune 500 customer such as Citibank in Pakistan. The entry in the banking sector was broadened by creating new relationships with yet new customers such as Askari Leasing Co. and a few other local customers in Asia Pacific region.

NetSol further strengthened its US presence on the West and East Coasts. NetSol's Proximity Development Center or PDC model was introduced in the US. PDC provides the Company with the ability to have on shore competencies in project management, systems analysis and design as well as customer relationship management. PDC model provides a face-to-face interaction and interfacing of project managers and high-level developers with the US based customers at very competitive prices.

NetSol USA, as a Government Suppliers Agreement (GSA) approved vendor, has the ability to participate in numerous government related contracts and projects tendered by the various government agencies.

Marketing and Selling

The objective of the Company's marketing program is to create and sustain preference and loyalty for NetSol as a leading provider of enterprise solutions, e-services consulting and software solutions provider. Marketing is performed at the corporate and business unit levels. The corporate marketing department has overall responsibility for communications, advertising, public relations and our website and also engineers and oversees central marketing and communications programs for use by each of our business units.

On April 25, 2002, the Company announced that Mark Caton had joined NetSol as Vice President of Sales in the United States. Mr. Caton will manage a team of senior level Account Executives located in Los Angeles, CA; Vienna, VA; and Chicago, IL offices and will launch an aggressive marketing campaign ramping up over the next ninety days. The Sales and Marketing team will focus on selling to both IT consulting companies as well as small to medium sized companies who are looking to substantially reduce the cost of building complex Enterprise Solutions, without compromising on quality. Our dedicated marketing personnel within the business units undertake a variety of marketing activities, including sponsoring focused client events to demonstrate our skills and products, sponsoring and participating in targeted conferences and holding private briefings with individual companies. We believe that the industry focus of our sales professionals and our business unit marketing personnel enhances their knowledge and expertise in these industries and will generate additional client engagements. As a direct result of these initiatives, the company is seeing bigger volumes of leads and prospects in its sales pipeline.

The Company generally enters into written commitment letters with clients at or around the time it commences work on a project. These commitment letters typically contemplate that NetSol and the client will subsequently enter into a more detailed agreement, although the client's obligations under the commitment letter are not conditioned upon the execution of the later agreement. These written commitments and subsequent agreements contain varying terms and conditions and the Company does not generally believe it is appropriate to characterize them as consisting of backlog. In addition, because these written commitments and agreements often provide that the arrangement can be terminated with limited advance notice or penalty, the Company does not believe the projects in process at any one time are a reliable indicator or measure of expected future revenues.

Table of Contents

NetSol provides its services primarily to clients in global commercial industries. In the global commercial area, the Company's service offerings are marketed to clients in a wide array of industries including, automotive; chemical; tiles/ceramics; Internet marketing; software; medical, banks and financial services.

Geographically, NetSol has operations in North America, the Middle East and Asia Pacific region.

CHANGES IN FINANCIAL CONDITION

Three Months Ended March 31, 2002 as compared to the Three Months Ended March 31, 2001 (restated for discontinued operation).

Net revenues were \$854,979 for the quarter ended March 31, 2002. This is a decrease from the revenues of the same quarter for the previous year of \$1,850,249 (restated for discontinued operation), which is largely as a result of the closing down of the UK operations. The current quarter revenues approximate the immediately preceding second quarter ended December 31, 2001, which evidence stabilization of the revenues of the company. The Company recently signed a \$3 million contract with the Pakistan Software Export Board, which management believes will be profitable and a new source for revenues for the new financial year. The Company is also positioning itself to market its services strongly to the North American and other global markets.

The gross profit was \$275,095 in the quarter ending March 31, 2002 as compared with \$942,019 (restated) for the same quarter of the previous year. The gross profit percentage has decreased from approximately 38% for fiscal 2001 to approximately 32% for the third quarter of fiscal 2002 as a result of the Company maintaining staffing levels to appropriately position itself for anticipated new agreements, heading into the remainder of the current fiscal year. While management is striving to negotiate better pricing on new agreements, the Company has been required to react to overall general economic factors in determining its present pricing structure.

Operating expenses were \$1,369,704 for the quarter ending March 31, 2002 as compared to \$3,418,137 (restated) for the quarter ending March 31, 2001. The decrease in the current fiscal year is largely attributable to the focus on reduction of all non-essential costs. Depreciation and amortization expense increased to \$445,506 for the quarter ended March 31, 2002 as compared to \$277,733 for the quarter ended March 31, 2001. Combined general and administrative and salaries and wage costs were \$791,463 for the quarter ended March 31, 2002, or a decrease of \$694,044 from \$1,485,507 for the quarter ended March 31, 2001. Non-cash expense of \$170,603 related to options granted at below fair value, as accounted for under APB 25, is included in salaries and wages expense for the quarter ended March 31, 2002. This decrease is attributable to reduced operational expenses as the company was in the process of working to reducing costs across the Company. Selling and marketing expenses were comparable for both quarters as the Company has yet to aggressively launch its global marketing efforts.

Net loss was \$1,121,998 for the quarter ended March 31, 2002 as compared to \$3,256,260 for the quarter ended March 31, 2001. The current quarter loss is also a 19% decrease from the second quarter loss of the current fiscal year of \$1,386,356. This resulted in a net loss per share from continuing operations, basic and diluted, of \$0.07 for the quarter ended March 31, 2002 as compared with \$0.21 (restated) for continuing operations and \$0.08 for discontinued operations for the quarter ended March 31, 2001. The current quarter loss per share also represents a significant decrease from the loss per share from continuing operations of \$0.10 for the last quarter.

Nine Months Ended March 31, 2002 as compared to the Nine Months Ended March 31, 2001 (restated for discontinued operation).

Net revenues were \$2,841,749 for the nine months ended March 31, 2002. This is a decrease from the revenues of the same period for the previous year of \$5,761,234 (restated for discontinued operation), which is largely as a result of the closing down of the UK operations. The Company recently signed a \$3 million contract with the Pakistan Software Export Board, which management believes will be profitable

Table of Contents

and a new source for revenues for the new financial year. The Company is also positioning itself to market its services strongly to the North American and other global markets.

The gross profit was \$534,119 for the nine months ended March 31, 2002 as compared with \$3,036,392 (restated) for the same period of the previous year. The gross profit percentage has decreased from approximately 38% for fiscal 2001 to approximately 19% for the nine months of fiscal 2002, as a result of the Company maintaining staffing levels to appropriately position itself for anticipated new agreements, heading into the remainder of the current fiscal year. While management is striving to negotiate better pricing on new agreements, the Company has been required to react to overall general economic factors in determining its present pricing structure.

Operating expenses were \$4,728,780 for the nine months ended March 31, 2002 as compared to \$7,247,651 (restated) for the period ended March 31, 2001. The decrease in the current fiscal year is largely attributable to the focus on reduction of all non-essential costs. Depreciation and amortization expense increased to \$1,263,169 for the nine months ended March 31, 2002 as compared to \$916,097 for the same period ended March 31, 2001. Combined general and administrative and salaries and wage costs were \$2,185,561 for the nine months ended March 31, 2002, or a decrease of \$1,645,084 from \$3,830,645 for the same period ended March 31, 2001. Non-cash expense of \$529,256 related to shares given for services and options granted at below fair value, as accounted for under APB 25, is included in salaries and wages expense for the nine months ended March 31, 2002, as compared to \$64,800 for the same period in the previous year. This decrease is attributable to reduced operational expenses as the company was in the process of working to reducing costs across the Company.

Net loss was \$4,354,873 for the nine months ended March 31, 2002 as compared to \$5,258,674 for the same period ended March 31, 2001. This resulted in a net loss per share from continuing operations, basic and diluted, of \$0.30 for the nine months ended March 31, 2002 as compared with \$0.36 (restated) for continuing operations and \$0.11 for discontinued operations for the same period ended March 31, 2001.

The Company's cash position was \$770,039 at March 31, 2002. This is presented on the financial statements as \$52,070 as cash and cash equivalents, and a total of \$717,969 as certificates of deposit, which is included in other assets.

LIQUIDITY AND CAPITAL RESOURCES

Net cash used for operating activities amounted to \$717,189 for the nine months ended March 31, 2002, as compared to \$4,431,264 for the nine months ended March 31, 2001, representing an improvement in cash used for operations.

Net cash used for investing activities amounted to \$55,789 for the nine months ended March 31, 2002, as compared to \$78,784 for the nine months ended March 31, 2001, representing an improvement in cash used for investing activities.

Net cash provided by financing activities amounted to \$518,923 for the nine months ended March 31, 2002, as compared to \$3,236,026 for the nine months ended March 31, 2001.

The Company's cash position was \$770,039 at March 31, 2002. This is presented on the financial statements as \$52,070 as cash and cash equivalents, and a total of \$717,969 as certificates of deposit, which is included in other assets.

The Company is continuing to take action to re-focus on its self-sustaining operating subsidiaries, while scaling back significantly on loss making operations and anticipated capital expenditures. The majority of the contracts for NetSol eR and NetSol USA (North American operations) are time and materials contracts which provides good liquidity to fund specific working capital requirements for those entities. In generating this revenue growth, the Company continues to anticipate that capital expenditures requirements will be kept at very low levels throughout fiscal 2002 and into first half of fiscal 2003. The Company presently estimates that it will be able to reduce its current monthly rate of using working capital beginning in its

Table of Contents

fiscal 4th quarter. In the opinion of management, the Company believes that the impact from certain software sales contracts within its Pakistan subsidiary operations will have an impact upon its liquidity in the short term; however, management does believe that its anticipated positive cash flows from re-focusing on its profitable operations, a reduction in the Company's projected capital expenditure requirements for the next twelve months, along with the financing options being pursued, cash flows will be sufficient for the foreseeable future to manage the short term liquidity impact from these specific software contracts and finance anticipated working capital requirements. The Company believes that certain of its needed capital will result from the continuing successful collection of its accounts receivable balances as projects are completed throughout the remainder of fiscal 2002.

The company faces a major challenge in continuing to fund its cash losses of around \$500,000 a quarter. It uses many different instruments to raise the required capital. One of the most effective has been the exercise of options by employees. This is the cheapest form of capital that the company can raise. Additionally, it further breeds loyalty amongst the company's 300 strong employees. The Company remains confident it can continue to raise sufficient additional funds through private placements of its common stock as was pursued and achieved in the first quarter.

ADDITIONAL RAISE OF CAPITAL

The Company sold 504,849 shares of its restricted Rule 144 common stock in the amount of \$98,000 through private placement offerings during the quarter ended March 31, 2002 pursuant to Rule 506 of Regulation D of the Securities and Exchange Act of 1933.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Except as referenced in our Form 10-KSB for the year ended June 30, 2001, there are no material, pending legal proceedings to which we or our affiliates is a party or of which any of our or their property is subject which, if adversely decided, would have a material adverse effect on our financial position, results of operations or cash flows.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

During December 2001 through March 2002, the Company issued and sold 186,667 shares of common stock for aggregate gross proceeds of \$28,000 in a private placement under Rule 506, Regulation D. The class of investors to which the Company sold shares to was accredited investors.

On December 7, 2001, the Company entered into a new funding and business development alliance with Red Sea, Ltd., a private investment company investing in small cap technology businesses. The agreement was for the purchase of 2,000,000 restricted Rule 144 shares and 1,000,000 warrants at an average price of \$0.38. The shares and the underlying shares of the warrants would be restricted for a period of one year. Red Sea, Ltd. paid a total of \$70,000 to the Company but failed to provide the rest of the contracted amount within the time frame required. Based on Red Sea's breach of the Agreement, NetSol terminated the contract issuing a total of 318,182 shares for the amount paid.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.
