NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 — BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared by Luminex Corporation (the Company or Luminex) in accordance with United States generally accepted accounting principles (U.S. GAAP) for interim financial information and the rules and regulations of the Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. In the opinion of management, all adjustments (consisting of normal recurring entries) considered necessary for a fair presentation have been included. Operating results for the three and six months ended June 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. These financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2015 (the 2015 10-K).

The acquisition of Nanosphere, Inc. (Nanosphere) was completed on June 30, 2016; therefore, the results of operations of Nanosphere are not included in our consolidated statements of comprehensive income for the three and six months ended June 30, 2016, but the financial position of Nanosphere is included in our consolidated balance sheet as of June 30, 2016.

NOTE 2 — BUSINESS COMBINATIONS

On June 30, 2016, the Company completed its acquisition (the Acquisition) of 100% of the outstanding shares of Nanosphere, which was a publicly-held molecular diagnostic company that was founded in 1999 and based in Northbrook, Illinois. On May 15, 2016, the Company, Nanosphere and Commodore Acquisition, Inc., a Delaware corporation and wholly-owned subsidiary of the Company (Purchaser) entered into an Agreement and Plan of Merger (as amended, the Merger Agreement). In accordance with the terms of the Merger Agreement, on June 2, 2016, Purchaser commenced a cash tender offer (the Tender Offer) for all of the outstanding shares of Nanosphere's common stock, par value \$0.01 per share (the Shares), for \$1.70 per share, net to the seller in cash, without interest and less any required withholding taxes, upon the terms and conditions set forth in the Offer to Purchase dated June 2, 2016, as amended or supplemented from time to time, and in the related Letter of Transmittal. The Tender Offer expired at 12:00 midnight Eastern Daylight Time, at the end of June 29, 2016, and was not extended. Upon the completion of the Tender Offer, the Company, through Purchaser, paid \$1.70 for each Share validly tendered and not withdrawn. Following the consummation of the Tender Offer, the Company completed the Acquisition by consummating the merger of Purchaser with and into Nanosphere, pursuant to which, any Shares not purchased in the Tender Offer were automatically converted into the right to receive \$1.70 per Share. The aggregate consideration paid to Nanosphere stockholders required to acquire all outstanding Shares pursuant to the Tender Offer and the merger was approximately \$88.5 million, which was funded from cash on hand. Pursuant to the terms of the Merger Agreement, Nanosphere agreed to cancel all outstanding and exercisable Nanosphere stock options and replace each such stock option with the right to receive a cash payment equal to the number of shares subject to such option multiplied by the difference between \$1.70 and the exercise price of the options. Nanosphere also agreed to cancel all of its outstanding restricted stock and convert such restricted stock into the right to receive a cash payment equal to the number of shares of restricted stock multiplied by \$1.70. The Company paid \$1.4 million in consideration of the cancelled Nanosphere options and restricted stock. Additionally, for each Nanosphere warrant holder, the Company agreed to issue replacement warrants that are exercisable for an amount in cash equal to the product of the number of shares of stock represented by the replacement warrant and the difference between \$1.70 and the per share price of the replacement warrant. The Company purchased 1.5 million Nanosphere warrants outstanding for an additional \$2.5 million in consideration to the Nanosphere warrant holders.

The Acquisition was undertaken to expand the Company's access to the high-growth molecular microbiology market and to Nanosphere's portfolio of molecular testing solutions. Nanosphere delivers proprietary diagnostic tools that enable detection of respiratory, gastroenteric and bloodstream infections. Nanosphere shares ceased trading on the Nasdaq Capital Market as of the close of business on June 30, 2016. The results of operations for Nanosphere will be included in the Company's consolidated financial statements beginning July 1, 2016.

Immediately subsequent to the acquisition, on June 30, 2016, the Company retired approximately \$25.4 million of Nanosphere's debt, including approximately \$391,000 of accrued interest, by using the Company's existing cash reserves, including \$25.6 million of cash acquired in the Acquisition. As part of this debt retirement, we incurred \$1.5 million of related fees which have been expensed as part of the Company's second quarter 2016 results. The impact of the Acquisition on our liquidity is more fully described under "Liquidity and Capital Resources."

Table of Contents

The following table summarizes the preliminary estimated fair values of Nanosphere's assets acquired and liabilities assumed at June 30, 2016 (in thousands):

Net tangible assets assumed as of June 30, 2016	\$40,121
Intangible assets subject to amortization	34,000
Long-term debt and accrued interest	(25,391 )
Deferred tax assets, net of deferred tax liabilities	10,631
Goodwill	33,110
Total purchase price	\$92,471

The Company is in the process of obtaining third-party valuations of certain intangible assets and finalizing the calculations of the deferred tax assets and liabilities related to Nanosphere; thus the provisional measurement of net tangible assets assumed, intangible assets, deferred tax assets and liabilities and goodwill are subject to change. If information that existed prior to June 30, 2016 becomes available which would indicate adjustments are required to the purchase price allocation, such adjustments will be included in the purchase price allocations retrospectively through revisions to the net tangible assets assumed, fair values of the intangible assets, deferred tax assets and liabilities and resulting goodwill recorded.

#### Unaudited Pro forma Financial Information

The second quarter 2016 results of operations of Nanosphere are not included in our consolidated statements of comprehensive income for the three and six months ended June 30, 2016 as the Acquisition closed on June 30, 2016, but the financial position of Nanosphere is included in our consolidated balance sheet as of June 30, 2016. The unaudited pro forma financial information set forth below assumes that Nanosphere had been acquired at the beginning of 2015 fiscal years and includes the effect of estimated amortization of acquired identifiable intangible assets, removal of interest expense on Nanosphere's debt extinguished at the date of the Acquisition, removal of Acquisition costs and the impact of preliminary estimated purchase accounting adjustments, tax and inventory valuation adjustments. This unaudited pro forma financial information is presented for informational purposes only and is not necessarily indicative of the results of operations that actually would have resulted had the Acquisition been in effect at the beginning of the periods presented. In addition, the unaudited pro forma financial information is not intended to be a projection of future results and does not reflect any operating efficiencies or cost savings that might be achievable.

	Three Months Ended June 30, 2016    2015 (unaudited) (in thousands)		Six Months Ended June 30, 2016    2015 (unaudited) (in thousands)

Table of Contents

## NOTE 3 — INVESTMENTS

## Marketable Securities

The Company determines the appropriate classification of its investments in debt and equity securities at the time of purchase and re-evaluates such determinations at each balance sheet date. Marketable securities that are bought and held principally for the purpose of selling them in the near term are classified as trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Debt securities are classified as held-to-maturity when the Company has the positive intent and ability to hold the securities to maturity. Held-to-maturity securities are stated at amortized cost, which approximates the fair value of these investments. Debt securities for which the Company does not have the intent or ability to hold to maturity are classified as available-for-sale. Debt and marketable equity securities not classified as held-to-maturity or as trading are classified as available-for-sale, and are carried at fair market value, with the unrealized gains and losses included in the determination of comprehensive income and reported in stockholders' equity. As of June 30, 2016 and December 31, 2015, all of the Company's marketable securities were classified as available-for-sale. Marketable securities are recorded as either short-term or long-term on the balance sheet based on the contractual maturity date. The fair value of all securities is determined by quoted market prices, market interest rate inputs, or other than quoted prices that are observable either directly or indirectly (as of the end of the reporting period). Declines in fair value below the Company's carrying value deemed to be other than temporary are charged against net earnings. As of June 30, 2016, the Company had no short or long term investments, since those funds were used to pay for the Nanosphere acquisition.

Available-for-sale securities consisted of the following as of June 30, 2016 (in thousands):

	Amortized Cost	Gains in Accumulated Other Comprehensive Income	Losses in Accumulated Other Comprehensive Income	Estimated Fair Value
Current:				
Cash equivalents	\$ 701		\$	— \$ 701
Government sponsored debt securities	—	—	—	—
Non-government sponsored debt securities	—	—	—	—
Total current securities	701	—	—	701
Noncurrent:				
Government sponsored debt securities	—	—	—	—
Non-government sponsored debt securities	—	—	—	—
Total noncurrent securities	—	—	—	—
Total available-for-sale securities	\$ 701	\$	— \$	— \$ 701

Available-for-sale securities consisted of the following as of December 31, 2015 (in thousands):

	Amortized Cost	Gains in Accumulated Other Comprehensive Income	Losses in Accumulated Other Comprehensive Income	Estimated Fair Value
Current:				
Cash equivalents	\$ 144	\$	— \$	— \$ 144
Government sponsored debt securities	10,000	—	(10 )	9,990
Non-government sponsored debt securities	2,001	—	(3 )	1,998
Total current securities	12,145	—	(13 )	12,132

Edgar Filing: LUMINEX CORP - Form 10-Q

Noncurrent:

Government sponsored debt securities	1,998	—	(6	)	1,992
Non-government sponsored debt securities	5,491	—	(24	)	5,467
Total noncurrent securities	7,489	—	(30	)	7,459
Total available-for-sale securities	\$ 19,634	\$	— \$ (43	)	\$ 19,591

Table of Contents

Proceeds from the sales of available-for-sale securities during the three and six months ended June 30, 2016 totaled \$19.5 million and these proceeds were used to partially fund the acquisition of Nanosphere. There were no proceeds from the sales of available-for-sale securities for the three and six months ended June 30, 2015. Realized gains and losses on sales of investments are determined using the specific identification method. Realized gains and losses are included in Other income, net in the Consolidated Statements of Comprehensive Income. All of the Company's available-for-sale securities with gross unrealized holding losses as of June 30, 2016 and December 31, 2015 had been in a loss position for less than 12 months.

The estimated fair value of available-for-sale debt securities as of June 30, 2016 and December 31, 2015, by contractual maturity, was as follows (in thousands):

	Estimated Fair Value	
	June 30, 2016	December 31, 2015
Due in one year or less	\$ —	\$ 11,988
Due after one year through two years	—	7,459
	\$ —	\$ 19,447

Expected maturities may differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties.

#### Non-Marketable Securities and Other-Than-Temporary Impairment

The Company owns a minority interest in a private company based in the U.S. through its investment of \$1.0 million in the third quarter of 2012. This minority interest is included at cost in other long-term assets on the Company's Consolidated Balance Sheets as the Company does not have significant influence over the investee since the Company owns less than 20% of the voting equity in the investee and the investee is not publicly traded.

The Company's other minority interest in a private company was acquired by a third party in July 2013. The Company realized a gain of \$5.4 million on the sale of this minority interest investment in the third quarter of 2013 and an additional gain of \$0.9 million in the first quarter of 2015 related to the settlement of escrowed funds.

The Company regularly evaluates the carrying value of its cost-method investment for impairment and whether any events or circumstances are identified that would significantly harm the fair value of the investment. The primary indicators the Company utilizes to identify these events and circumstances are the investee's ability to remain in business, such as the investee's liquidity and rate of cash use, and the investee's ability to secure additional funding and the value of that additional funding. In the event a decline in fair value is judged to be other-than-temporary, the Company will record an other-than-temporary impairment charge in Other income, net in the Consolidated Statements of Comprehensive Income. As the inputs utilized for the Company's periodic impairment assessment are not based on observable market data, the determination of fair value of this cost-method investment is classified within Level 3 of the fair value hierarchy. See Note 5 - Fair Value Measurement. To determine the fair value of this investment, the Company uses all available financial information related to the entities, including information based on recent or pending third-party equity investments in these entities. In certain instances, a cost-method investment's fair value is not estimated as there are no identified events or changes in the circumstances that may have a significant adverse effect on the fair value of the investment and to do so would be impractical.

## NOTE 4 — INVENTORIES, NET

Inventories are stated at the lower of cost or market, with cost determined according to the standard cost method, which approximates the first-in, first-out method. The Company routinely assesses its on-hand inventory for timely identification and measurement of obsolete, slow-moving or otherwise impaired inventory. Inventories consisted of the following (in thousands):

	June 30, 2016	December 31, 2015
Parts and supplies	\$22,684	\$ 15,296
Work-in-progress	7,823	8,797
Finished goods	11,010	7,159
	\$41,517	\$ 31,252

Table of Contents

## NOTE 5 — FAIR VALUE MEASUREMENT

The Fair Value Measurements and Disclosures Topic of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) defines fair value, establishes a framework for measuring fair value under U.S. GAAP and enhances disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The ASC describes a fair value hierarchy based on the following three levels of inputs that may be used to measure fair value, of which the first two are considered observable and the last unobservable:

Level 1 – Quoted prices in active markets for identical assets or liabilities.

Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company determines the fair value of its investment portfolio assets by obtaining non-binding market prices from its third-party portfolio managers on the last day of the quarter, whose sources may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value. There were no transfers between Level 1, Level 2, or Level 3 measurements for the three month period ended June 30, 2016.

The following table represents the Company's fair value hierarchy for its financial assets and liabilities measured at fair value on a recurring basis as of June 30, 2016 and December 31, 2015 (in thousands):

Fair Value Measurements as of June 30, 2016 Using				
	Level 1	Level 2	Level 3	Total

Assets:

Money Market funds	\$701	\$	—\$	—\$701
Government sponsored debt securities	—	—	—	—
Non-government sponsored debt securities	—	—	—	—

Fair Value Measurements as of December 31, 2015 Using				
	Level 1	Level 2	Level 3	Total

Assets:

Money Market funds	\$144	\$	—\$	—\$144
Government sponsored debt securities	—	11,988	—	\$11,988
Non-government sponsored debt securities	—	7,459	—	\$7,459

## NOTE 6 — GOODWILL AND OTHER INTANGIBLE ASSETS

On June 30, 2016, the Company completed the acquisition of Nanosphere. As a result of the Acquisition, the Company recorded approximately \$33.1 million of goodwill and \$34.0 million of other identifiable intangible assets. The goodwill is derived from expected synergies from combining operations of the Company and Nanosphere. The purchase price allocation is preliminary as the Company's determination of the fair values of the assets acquired and liabilities assumed is still in progress.

Goodwill is reviewed for impairment at least annually at the beginning of the fourth quarter, or more frequently if impairment indicators arise. The Company's goodwill is not expected to be deductible for tax purposes.

Table of Contents

The changes in the carrying amount of the Company's goodwill during the period are as follows (in thousands):

	June 30, December 31,	
	2016	2015
Balance at beginning of year	\$49,619	\$ 49,619
Acquisition of Nanosphere	33,110	—
Balance at end of period	\$82,729	\$ 49,619

The Company's intangible assets are reflected in the table below (in thousands, except weighted average lives):

	Finite-lived			Indefinite-lived	
	Technology, trade secrets and know-how	Customer lists and contracts	Other identifiable intangible assets	IP R&D	Total
<b>2015</b>					
Balance as of December 31, 2014	\$29,704	\$7,958	\$ 1,890	\$ 40,100	\$79,652
Completion of IP R&D project	40,100	—	—	(40,100 )	—
Removal of fully amortized assets	(702 )	(161 )	(238 )	—	(1,101 )
Balance as of December 31, 2015	69,102	7,797	1,652	—	78,551
Less: accumulated amortization:					
Accumulated amortization balance as of December 31, 2014	(19,325 )	(3,085 )	(860 )	—	(23,270 )
Amortization expense	(3,023 )	(743 )	(134 )	—	(3,900 )
Removal of fully amortized assets	702	161	238	—	1,101
Accumulated amortization balance as of December 31, 2015	(21,646 )	(3,667 )	(756 )	—	(26,069 )
Net balance as of December 31, 2015	\$47,456	\$4,130	\$ 896	\$ —	\$52,482
Weighted average life (in years)	10	11	11		
<b>2016</b>					
Balance as of December 31, 2015	\$69,102	\$7,797	\$ 1,652	\$ —	\$78,551
Additions due to acquisition of Nanosphere	14,000	7,000	3,000	10,000	34,000
Foreign currency translation adjustments	—	—	—	—	—
Balance as of June 30, 2016	83,102	14,797	4,652	10,000	112,551
Less: accumulated amortization:					
Accumulated amortization balance as of December 31, 2015	(21,646 )	(3,667 )	(756 )	—	(26,069 )
Amortization expense	(2,877 )	(372 )	(66 )	—	(3,315 )
Accumulated amortization balance as of June 30, 2016	(24,523 )	(4,039 )	(822 )	—	(29,384 )
Net balance as of June 30, 2016	\$58,579	\$10,758	\$ 3,830	\$ 10,000	\$83,167
Weighted average life (in years)	10	10	10		

Table of Contents

The estimated aggregate amortization expense for the next five fiscal years and thereafter is as follows (in thousands):

2016 (six months)	\$4,703
2017	8,456
2018	8,266
2019	8,266
2020	8,266
Thereafter	35,210
	\$73,167
IPR&D	10,000
	\$83,167

## NOTE 7 — OTHER COMPREHENSIVE INCOME (LOSS)

Other comprehensive income (loss) represents a measure of all changes in equity that result from recognized transactions and other economic events other than those resulting from investments by and distributions to shareholders. Other comprehensive income (loss) for the Company includes foreign currency translation adjustments and net unrealized holding gains and losses on available-for-sale investments.

The following table presents the changes in each component of accumulated other comprehensive income (loss), net of tax (in thousands):

	Foreign Currency Items	Available-for-Sale Investments	Accumulated Other Comprehensive Income (Loss) Items
Balance as of December 31, 2015	\$(1,258 )	\$ (38 )	\$ (1,296 )
Other comprehensive income before reclassifications	179	38	217
Net current-period other comprehensive income	179	38	217
Balance as of June 30, 2016	\$(1,079 )	\$ —	\$ (1,079 )

The following table presents the tax (expense) benefit allocated to each component of other comprehensive income (loss) (in thousands):

	Three Months Ended June 30, 2016			Six Months Ended June 30, 2016		
	Before Tax	Net of Tax	Benefit	Before Tax	Net of Tax	Benefit
Foreign currency translation adjustments	\$(31)	\$	—\$(31)	\$179	\$	—\$179
Unrealized gains on available-for-sale investments	(7 )	—	(7 )	44	(6 )	38
Other comprehensive income (loss)	\$(38)	\$	—\$(38)	\$223	\$	(6 )\$217

Table of Contents

## NOTE 8 — EARNINGS PER SHARE

A reconciliation of the denominators used in computing per share net income, or EPS, is as follows (in thousands, except per share amounts):

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2015	
Numerator:				
Net income	\$5,653	\$2,629	\$14,423	\$10,082
Denominator:				
Denominator for basic net income per share - weighted average common stock outstanding	42,534	42,093	42,440	41,984
Effect of dilutive securities: stock options and awards	41	197	—	162
Denominator for diluted net income per share - weighted average shares outstanding - diluted	42,575	42,290	42,440	42,146
Basic net income per share	\$0.13	\$0.06	\$0.34	\$0.24
Diluted net income per share	\$0.13	\$0.06	\$0.34	\$0.24

Basic net income per share is computed by dividing the net income for the period by the weighted average number of common shares outstanding during the period. Diluted net income per share is computed by dividing the net income for the period by the weighted average number of common and common equivalent shares outstanding during the period. Stock options to acquire approximately 0.4 million and 0.5 million shares for the three months ended June 30, 2016 and 2015, and 0.4 million and 0.5 million shares for the six months ended June 30, 2016 and 2015, respectively, were excluded from the computations of diluted EPS because the effect of including those stock options would have been anti-dilutive.

## NOTE 9 — STOCK-BASED COMPENSATION

The Company's stock option activity for the six months ended June 30, 2016 was as follows:

Stock Options (shares in thousands)	Shares	Weighted Average Exercise Price
Outstanding as of December 31, 2015	1,692	\$ 17.47
Granted	886	19.21
Exercised	(63 )	16.81
Cancelled or expired	(82 )	18.37
Outstanding as of June 30, 2016	2,433	\$ 18.09

The Company had \$12.7 million of total unrecognized compensation costs related to stock options as of June 30, 2016, which costs are expected to be recognized over a weighted average period of 3.12 years.

Table of Contents

The Company's restricted share activity for the six months ended June 30, 2016 was as follows:

Restricted Stock Awards (shares in thousands)	Shares	Weighted Average Grant Price
Non-vested as of December 31, 2015	836	\$ 18.66
Granted	267	19.48
Vested	(203 )	19.59
Cancelled or expired	(39 )	18.12
Non-vested as of June 30, 2016	861	\$ 18.72

Restricted Stock Units (in thousands)	Shares
Non-vested as of December 31, 2015	501
Granted	99
Vested	(82 )
Cancelled or expired	(40 )
Non-vested as of June 30, 2016	478

As of June 30, 2016, there was \$16.3 million and \$4.0 million of total unrecognized compensation costs related to Restricted Stock Awards (RSAs) and Restricted Stock Units (RSUs), respectively. This cost is expected to be recognized over a weighted average period of 2.56 years for the RSAs and 2.19 years for the RSUs. The Company issues a small number of cash settled RSUs pursuant to the Company's equity incentive plan in certain foreign countries. These grants do not result in the issuance of common stock and are considered immaterial by the Company.

The following are the stock-based compensation costs recognized in the Company's condensed consolidated statements of comprehensive income (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Cost of revenue	\$320	\$270	\$569	\$504
Research and development	752	733	1,142	980
Selling, general and administrative	2,403	2,087	2,944	3,185
Stock-based compensation costs reflected in net income	\$3,475	\$3,090	\$4,655	\$4,669

**NOTE 10 — ACCRUED LIABILITIES**

Accrued liabilities consisted of the following (in thousands):

	June 30, December 31,	
	2016	2015
Compensation and employee benefits	\$10,416	\$ 10,946
Income and other taxes	1,345	1,261
Warranty costs	658	553
Other	4,203	2,392
	\$16,622	\$ 15,152

Sales of certain of the Company's systems are subject to a warranty. System warranties typically extend for a period of 12 months from the date of installation not to exceed 24 months from the date of shipment. The Company estimates the amount of warranty claims on sold products that may be incurred based on current and historical data. The actual warranty expense could differ from the estimates made by the Company based on product performance. Warranty

expenses are evaluated and adjusted periodically.

Table of Contents

The following table summarizes the changes in the warranty accrual (in thousands):

Accrued warranty costs as of December 31, 2015	\$553
Warranty adjustments/settlements	(342 )
Accrual for warranty costs	447
Accrued warranty costs as of June 30, 2016	\$658

**NOTE 11 — INCOME TAXES**

At the end of each interim reporting period, an estimate is made of the effective tax rate expected to be applicable for the full year. The estimated full year's effective tax rate is used to determine the income tax rate for each applicable interim reporting period. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period of the enactment date. The effective tax rate for the six months ended June 30, 2016 was 19.32%, including amounts recorded for discrete events. This differs from the statutory rate of 35% primarily because of the worldwide mix of consolidated earnings and losses before taxes and an assessment regarding the realizability of the Company's deferred tax assets. The Company's tax expense reflects the full federal, various state, and foreign blended statutory rates. The Company is utilizing its net operating losses and tax credits in the U.S., Canada and the Netherlands and currently expects a full year effective tax rate of less than 30%. Therefore, cash taxes to be paid are expected to continue to be less than 15% of book tax expense.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, Australia, Canada, China, Hong Kong, Japan, the Netherlands, and various states. Due to net operating losses, the U.S., Canadian and Australian tax returns dating back to 2011 can still be reviewed by the taxing authorities. No material changes to this liability are expected within the next 12 months. For the six months ended June 30, 2016, there were no material changes to the total amount of unrecognized tax benefits. The Company recognizes interest and penalties related to uncertain tax positions in the provision for income taxes.

As a result of prospective application of Accounting Standards Update No. 2015-17, "Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes", Luminex offset all deferred tax liabilities and assets, as well as any related valuation allowance, and is presenting them as a single non-current amount as of December 31, 2015 and June 30, 2016. Luminex has not retrospectively adjusted prior periods.

**NOTE 12 - COMMITMENTS AND CONTINGENCIES**

On August 30, 2012, Abbott Laboratories, Inc. (Abbott) was named as a defendant in a complaint filed by ENZO Life Sciences, Inc. (ENZO) in U.S. District Court in Delaware for alleged infringement of U.S. Patent 7,064,197 as a result of Abbott's distribution of Luminex's xTAG Respiratory Viral Panel. Luminex and Abbott entered into an agreement requiring Luminex to defend and indemnify Abbott for any alleged patent infringement resulting from its distribution of Luminex's xTAG Respiratory Viral Panel. The complaint sought unspecified monetary damages and injunctive relief. Abbott filed an answer to the complaint on October 15, 2012. On November 30, 2012, Luminex intervened in the lawsuit. On January 2, 2013, ENZO filed additional claims against Luminex, alleging infringement of U.S. Patent 7,064,197 resulting from Luminex's sale of its xTAG, FlexScript LDA, SelecTAG, and xMAP Salmonella Serotyping Assay products and alleging infringement of U.S. Patent 8,097,405 resulting from Luminex's sale of MultiCode® products. Luminex filed an answer to ENZO's additional claims on January 28, 2013. On October 2, 2013, ENZO filed additional claims against Luminex, alleging infringement of U.S. Patent 6,992,180 resulting from Luminex's sale of MultiCode® products. Luminex filed an answer to ENZO's additional claims on October 21, 2013.

Effective July 2, 2015, Luminex agreed to pay ENZO \$7.1 million to settle the litigation. This settlement resulted in the entry of orders dismissing (i) with prejudice all claims, counterclaims and causes of action asserted by ENZO against Luminex, (ii) without prejudice all claims, counterclaims and causes of action asserted by Luminex against

ENZO, (iii) with prejudice all claims, counterclaims and causes of action solely under U.S. Patent 7,064,197 asserted in the litigation by ENZO against Abbott and (iv) without prejudice all claims, counterclaims and causes of action relating solely to U.S. Patent 7,064,197 asserted by Abbott against ENZO; and resulted in the grant to the Company and its affiliates of a fully paid, non-exclusive, worldwide license under the patents asserted in the complaint. In addition, the Company and ENZO released each other from certain claims related to the above-referenced patents, including the claims and counterclaims asserted in the complaint. ENZO further released Abbott from certain claims, including those asserted in the complaint, related solely to U.S. Patent 7,064,197. The settlement was entered into solely by way of compromise and does not constitute an admission or concession by Luminex of any liability or wrongdoing.

## Table of Contents

Because Luminex (i) has never paid any royalties to ENZO in the past, (ii) will not be required to pay any future or ongoing royalties to ENZO as a result of the settlement, (iii) has never recorded any revenue or expense related to ENZO in operating revenue or in operating expenses in the past, outside of legal fees, and (iv) believes that it does not infringe on any valid and enforceable claim with respect to the asserted patents, Luminex determined that this settlement of litigation expense was outside of operations. Luminex accordingly recorded the settlement as a separate, non-operating line item in the second quarter of 2015. Luminex made the \$7.1 million payment to ENZO in July 2015.

When and if it appears probable in management's judgment, and based upon consultation with outside counsel, that we will incur monetary damages or other costs in connection with any claims or proceedings, and such costs can be reasonably estimated, we record the estimated liability in the financial statements. If only a range of estimated losses can be estimated, we record an amount within the range that, in management's judgment, reflects the most likely outcome; if none of the estimates within that range is a better estimate than any other amount, we record the liability at the low end of the range of estimates. Any such accrual would be charged to expense in the appropriate period. We disclose significant contingencies when the loss is not probable and/or the amount of the loss is not estimable, when we believe there is at least a reasonable possibility that a loss has been incurred. We recognize costs associated with legal proceedings in the period in which the services were provided.

## NOTE 13 — RECENT ACCOUNTING PRONOUNCEMENTS

### Recently adopted accounting guidance

In March 2016, the FASB issued guidance that simplifies some provisions in stock compensation accounting related to accounting for a stock payment's tax consequences. The guidance also amends how excess tax benefits and a company's payments to cover the tax bills for the shares' recipients should be classified. The amendments allow companies to estimate the number of stock awards they expect to vest, and the amendments also revise the withholding requirements for classifying stock awards as equity. This guidance is effective for annual periods beginning after December 15, 2016. Early adoption is permitted.

This new standard requires that an entity recognize excess tax benefits and tax deficiencies as income tax expense or benefit in the income statement when the awards vest or are settled. Under the previous standard, excess tax benefits and tax deficiencies were recognized in additional paid-in capital. Cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. In addition, related cash payments made on an employee's behalf for shares withheld are presented as a financing activity on the statement of cash flows.

The Company elected to early adopt the new guidance in the quarter ended June 30, 2016. The impact of the early adoption resulted in the Company recording an income tax expense of \$81,000 as a component of income taxes, rather than additional paid-in capital, for the three months ended June 30, 2016 related to the excess tax deficiency on stock compensation awards that settled during the quarter. Similarly, the impact for the quarter ended June 30, 2015 would have resulted in an income tax expense of \$991,000 resulting from the excess tax deficiency on stock compensation awards that settled during the quarter. The Company also recognized all excess tax benefits previously unrecognized of \$6.9 million, on a modified retrospective basis as a cumulative-effect adjustment to retained earnings as of June 30, 2016. We have elected to continue to estimate forfeitures expected to occur to determine the amount of compensation cost to be recognized in each period.

The Company elected to apply the presentation requirements for cash flows related to excess tax benefits on a prospective basis, and prior periods were not retrospectively adjusted. The presentation requirements for cash flows

related to employee taxes paid for withheld shares were applied retrospectively, as required, and resulted in an increase to both net cash from operations and net cash used in financing of \$35,000 and \$1,485,000 for the three and six months ended June 30, 2016, respectively, and \$29,000 and \$1,579,000 for the three and six months ended June 30, 2015, respectively.

In September 2015, the FASB issued additional guidance on business combinations. This guidance requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period with a corresponding adjustment to goodwill in the reporting period in which the adjustment amounts are determined. The effect on earnings from changes in depreciation, amortization or other income effects, if any, as a result of the change to the provisional amounts will be recorded in the same period's financial statements, calculated as if the accounting had been completed at the acquisition date. The Company has adopted this standard as of June 30, 2016, and its adoption did not have any impact on its consolidated financial statements.

## Table of Contents

### Recent accounting guidance not yet adopted

In February 2016, the FASB issued guidance requiring lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases with the exception of short-term leases. The effective date of the new guidance is for the Company's first quarter of fiscal 2019 and early adoption is permitted. The new standard must be adopted using a modified retrospective transition and requires application of the new guidance at the beginning of the earliest comparative period presented. The Company is currently evaluating the impact of the adoption of this requirement on its consolidated financial statements, but does not anticipate that adoption of this guidance will have a material impact on its consolidated financial statements.

In January 2016, the FASB issued guidance that changes how entities measure equity investments that do not result in consolidation and are not accounted for under the equity method. Entities will be required to measure these investments at fair value at the end of each reporting period and recognize changes in fair value in net income. This guidance also changes certain disclosure requirements and other aspects of current U.S. GAAP. This guidance is effective for annual periods beginning after December 15, 2017. Early adoption is permitted. The Company does not anticipate that adoption of this guidance will have a material impact on its consolidated financial statements as the only potential impact would be related to the Company's one cost-method investment discussed in Note 3 - Investments.

In July 2015, the FASB issued guidance regarding the measurement of inventory. The new guidance requires inventory to be measured at the lower of cost and net realizable value, which is defined as the estimated selling price in the ordinary course of business, less reasonably predictable costs of completion, disposal and transportation. This new guidance is effective for the Company's first quarter of fiscal 2018 and early adoption is permitted. The guidance must be applied prospectively. The Company is currently evaluating the impact of the adoption of this requirement on its consolidated financial statements, but does not anticipate that adoption of this guidance will have a material impact on its consolidated financial statements.

In May 2014, the FASB issued a new standard on revenue recognition which outlines a single comprehensive model to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry-specific guidance. The core principle of the revenue model is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In doing so, companies will need to use their judgment and make estimates more extensively than under current U.S. GAAP. These judgments may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. The standard is designed to create greater comparability for financial statement users across industries and jurisdictions and also requires enhanced disclosures. On July 9, 2015, the FASB voted in favor of delaying the effective date of the new standard by one year, with early adoption permitted as of the original effective date. The guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017. The Company is currently evaluating the impact of the adoption of this standard on its consolidated financial statements.

## Table of Contents

### ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following information should be read in conjunction with the condensed consolidated financial statements and the accompanying notes included in Part I, Item 1 of this Report, and the “Risk Factors” included in Part I, Item 1A of the 2015 10-K.

#### SAFE HARBOR CAUTIONARY STATEMENT

This quarterly report on Form 10-Q contains statements that are forward-looking statements under the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide our current expectations of forecasts of future events. All statements other than statements of current or historical fact contained in this quarterly report, including statements regarding our future financial position, business strategy, impact of the reimbursement landscape, new products including ARIES® and NxTAG®, assay sales, consumables sales patterns and bulk purchases, budgets, system sales, anticipated gross margins, liquidity, cash flows, projected costs and expenses, taxes, deferred tax assets, litigation costs, including the costs or impact of any litigation settlements or orders, regulatory approvals or the impact of any laws or regulations applicable to us, plans and objectives of management for future operations, and acquisition impact and integration and the expected benefit of our future acquisitions are forward-looking statements. The words “anticipate,” “believe,” “continue,” “should,” “estimate,” “expect,” “intend,” “may,” “project,” “will” and similar expressions as they relate to us, are intended to identify forward-looking statements. These statements are based on our current plans and actual future activities, and our financial condition and results of operations may be materially different from those set forth in the forward-looking statements as a result of known or unknown risks and uncertainties, including, among other things:

- risks and uncertainties relating to market demand and acceptance of our products and technology, including ARIES®, NxTAG®, and Verigene®;

- our ability to successfully launch new products in a timely manner;

- risks and uncertainties associated with implementing our acquisition strategy, our ability to identify suitable acquisition targets including our ability to obtain financing on acceptable terms, our ability to integrate acquired companies, including Nanosphere, or selected assets into our consolidated business operations, and the ability to fully realize the benefits of our acquisitions;

- the uncertainty relating to increased focus on direct sales to the end user;

- dependence on strategic partners for development, commercialization and distribution of products;

- concentration of our revenue in a limited number of direct customers and strategic partners, some of which may experience decreased demand for their products utilizing or incorporating our technology, budget or finance constraints in the current economic environment, or periodic variability in their purchasing patterns or practices as a result of material resource planning challenges;

- the timing of and process for regulatory approvals;

- competition and competitive technologies utilized by our competitors;

-

fluctuations in quarterly results due to a lengthy and unpredictable sales cycle, fluctuations in bulk purchases of consumables, fluctuations in product mix, and the seasonal nature of some of our assay products;

•our ability to obtain and enforce intellectual property protections on our products and technologies;

•our ability to scale manufacturing operations and manage operating expenses, gross margins and inventory levels;

the impact of the ongoing uncertainty in global finance markets and changes in government and government agency funding, including its effects on the capital spending policies of our partners and end users and their ability to finance purchases of our products;

•changes in principal members of our management staff;

## Table of Contents

potential shortages, or increases in costs, of components or other disruptions to our manufacturing operations;

our increasing dependency on information technology to enable us to improve the effectiveness of our operations and to monitor financial accuracy and efficiency;

the implementation, including any modification, of our strategic operating plans;

the uncertainty regarding the outcome or expense of any litigation brought against or initiated by us; and

risks relating to our foreign operations, including fluctuations in exchange rates, tariffs, customs and other barriers to importing/exporting materials and products in a cost effective and timely manner; difficulties in accounts receivable collections; the burden of monitoring and complying with foreign and international laws and treaties; and the burden of complying with and change in international taxation policies.

Many of these risks, uncertainties and other factors are beyond our control and are difficult to predict. Any or all of our forward-looking statements in this quarterly report may turn out to be inaccurate. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. New factors could also emerge from time to time that could adversely affect our business. The forward-looking statements herein can be affected by inaccurate assumptions we might make or by known or unknown risks, uncertainties and assumptions, including the risks, uncertainties and assumptions outlined above and described in the 2015 10-K. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this quarterly report may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. When you consider these forward-looking statements, you should keep in mind these risk factors and other cautionary statements in this quarterly report, including in this "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" and in our other annual and periodic reports.

Our forward-looking statements speak only as of the date made. We undertake no obligation to publicly update or revise forward-looking statements whether as a result of new information, future events or otherwise. All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements contained in this quarterly report.

Unless the context requires otherwise, references in this Quarterly Report on Form 10-Q to "Luminex," the "Company," "we," "us" and "our" refer to Luminex Corporation and its subsidiaries.

## OVERVIEW

We develop, manufacture and sell proprietary biological testing technologies and products with applications throughout the diagnostics, pharmaceutical and life sciences industries. These industries depend on a broad range of tests, called assays, to perform diagnostic testing and conduct life science research.

We have established a position in several segments of the life sciences industry by developing and delivering products that meet a variety of customer needs in specific market segments, including multiplexing, accuracy, precision, sensitivity, specificity, reduction of labor and ability to test for proteins and nucleic acids. These needs are addressed by our proprietary technology, which allows the end user in a laboratory to perform biological testing in a multiplexed format. Multiplexing allows for many different laboratory results to be generated from one sample with a single assay. This is important because our end user customers, which include laboratory professionals performing research and

clinical laboratories performing tests on patients as ordered by physicians and other laboratories, have a fundamental need to perform high quality testing as efficiently as possible. Until the availability of multiplexing technology such as our xMAP® (Multi-Analyte-Profilng) technology, the laboratory professional had to perform one assay at a time in a sequential manner, and if additional testing was required on a sample, a second assay would be performed to generate the second result, and so on until all the necessary tests were performed.

We have a full range of instruments using our xMAP technology: our LUMINEX 100/200™ systems offer 100-plex testing; our FLEXMAP 3D® system is our high-throughput, 500-plex testing system; and our MAGPIX® system provides 50-plex testing at a lower cost using imaging rather than flow cytometry. By using our xMAP technology, the end users are able to be more efficient by generating multiple simultaneous results per sample. We believe that this technology may also offer advantages in other industries, such as in food safety/animal health and bio-defense/bio-threat markets. Using the products Luminex has available today, up to 500 simultaneous analyte results can be determined from a single sample.

## Table of Contents

We primarily serve the diagnostics, pharmaceutical and life sciences industries by marketing products, including our testing equipment and assays, to various types of testing laboratories. We have a large installed base of systems that has grown primarily from the following:

- placements made by partners who either:
  - license our xMAP technology and develop products that incorporate our xMAP technology into products that they then sell to end users, or
  - purchase our proprietary xMAP laboratory instrumentation and our proprietary xMAP microspheres and sell xMAP-based assay products and/or xMAP-based testing services, which run on the xMAP instrumentation, and pay a royalty to us; and
- our direct sales force that focuses on the sale of molecular diagnostic assays that run on our systems.

As of June 30, 2016, Luminex had 74 strategic partners, of which 53 have released commercialized reagent-based products utilizing our technology. Our remaining partners are in various stages of development and commercialization of products that incorporate our technology.

A primary focus for our growth is the development and sale of molecular diagnostic assays utilizing our proprietary xMAP, xTAG® and NxTAG® technologies on our installed base of systems. We utilize a direct sales model for sales of these products, which is intended to take advantage of our increasing installed base of xMAP-based instrumentation. Our assays are primarily focused on multiplexed applications for the human molecular clinical diagnostics market. Our assay products are currently focused on three segments of the molecular diagnostic testing market: human genetics, personalized medicine and infectious disease.

In addition to the sales to this installed base, in the fourth quarter of 2015 we received U.S. Food and Drug Administration (FDA) clearance for our ARIES® system. The ARIES® system is a sample to answer clinical test system that automates and integrates extraction of nucleic acid from a clinical sample, performs real-time polymerase chain reaction, and detects multiple signals generated by target specific probes. The ARIES® system is used with specific assays to measure multiple analytes indicative of infectious disease. The ARIES® system uses internal barcode scanning and other advanced features to minimize operator errors. Two independent modules each support from one to six cassettes, allowing both STAT and Batch testing. The ARIES® system can run both In Vitro Diagnostics (IVD) and MultiCode® Analyte Specific Reagents simultaneously with a common Universal Assay Protocol. The ARIES® system was commercially launched in the fourth quarter of 2015. We also received FDA clearance for the ARIES® HSV (herpes simplex virus) 1&2 Assay in the fourth quarter of 2015, CE-IVD Mark in Europe for the ARIES® System and ARIES® HSV 1&2 Assay in the first quarter of 2016 and CE-IVD Mark in Europe for the ARIES® Flu A/B & RSV Assay in the second quarter of 2016.

### Second Quarter 2016 Highlights

- Acquired Nanosphere, Inc., a leader in the molecular microbiology and molecular diagnostic market for \$1.70 per share in an all-cash transaction.
- Consolidated revenue was \$64.2 million for the quarter ended June 30, 2016, representing a 9% increase over revenue for the second quarter of 2015.
- System revenue was \$9.0 million for the quarter ended June 30, 2016, representing a 37% increase over system revenue for the second quarter of 2015.
- Consumable revenue was \$13.3 million for the quarter ended June 30, 2016, representing a 12% increase over consumable revenue for the second quarter of 2015.

Assay revenue was \$25.9 million for the quarter ended June 30, 2016, representing a 7% increase over assay revenue for the second quarter of 2015.

Royalty revenue was \$11.4 million for the quarter ended June 30, 2016, representing a 3% increase over royalty revenue for the second quarter of 2015.

Received both U.S. FDA clearance and CE Marking for the Company's SYNCT™ Software for use with its ARIES® System and NxTAG® assays on the MAGPIX® System.

Received CE-IVD status under the European Directive on In Vitro Diagnostic Medical Devices for the ARIES® Flu A/B & RSV Assay on June 1, 2016.

## Table of Contents

Received Pharmaceutical and Medical Devices Agency (PMDA) registration of the ARIES® System in Japan on May 20, 2016.

Received U.S. FDA clearance for the Company's ARIES M1 System on June 30, 2016.

Shipments of 277 multiplexing analyzers, which include Luminex® 100/200™ systems, MAGPIX® systems and FLEXMAP 3D® systems.

### Recent Acquisition of Nanosphere

As previously discussed in Note 2 - Business Combinations, on June 30, 2016, we completed our acquisition of Nanosphere, a publicly-held molecular diagnostic company based in Northbrook, Illinois. The Acquisition was an all cash transaction that was undertaken to expand the Company's access to the high-growth molecular microbiology market and to Nanosphere's portfolio of molecular testing solutions. In connection with closing the Acquisition, we retired Nanosphere's \$25.4 million of debt and paid transaction and debt prepayment expenses of approximately \$3.5 million. As a result of the Acquisition and the debt payoff, our cash, cash equivalents and investments were reduced by approximately \$91.9 million during the quarter ended June 30, 2016, partially offset by operating cash flows of \$21.2 million. The results of operations for Nanosphere will be included in the Company's consolidated financial statements beginning July 1, 2016.

As a result of the dilutive nature of the acquisition of Nanosphere, we believe both profitability and operating cash flows over the next eighteen months, approximately, will be lower than our recent historical results; however, we expect to maintain profitability and positive operating cash flows. We currently anticipate that the Acquisition will be accretive to the Company's revenue, profitability, and cash flow by the end of 2017.

### Consumables Sales and Royalty Revenue Trends

We have experienced significant fluctuations in consumable revenue over the past three years. Overall, the fluctuations manifested themselves through periodic changes in volume from our largest purchasing customers. On a quarterly basis, our largest customers account for approximately 70% of our total consumable sales volume. We expect these fluctuations to continue as the ordering patterns and inventory levels of our largest bulk purchasing partners remain variable. Additionally, even though we experience variability in consumable revenue, the key indicator of the success of our partners' commercialization efforts is the rising level of royalties and reported royalty bearing sales.

### Future Operations

We expect our areas of focus over the next twelve months to be:

placement of our ARIES® system, our sample to answer platform for our MultiCode®-RTx technology, including IVD assays;

realizing the anticipated synergies of the Nanosphere acquisition and associated integration and completion of development of its next generation system;

development and commercialization of a pipeline of assays for the ARIES® system;

market acceptance of our recently launched Respiratory Viral Panel line of IVD assays;

- continued execution of our pharmacogenetic (PGx) strategy;

- continued execution of our direct sales strategy, including developing the infrastructure necessary to support our sales force and decreasing reliance on our distributors;

- commercialization, regulatory clearance and market adoption of products, including commercialization of MultiCode<sup>®</sup> assays outside of the United States;

- maintenance and improvement of our existing products and the timely development, completion and successful commercial launch of our pipeline products;

Table of Contents

- adoption and use of our platforms and consumables by our customers for their testing services;
- expansion and enhancement of our installed base of systems and our market position within our identified target market segments;
- monitoring and mitigating the effect of the ongoing uncertainty in global finance markets and changes in government funding on planned purchases by end users; and
- continued adoption and development of partner products incorporating Luminex technology through effective partner management.

We anticipate continued revenue concentration in our higher margin items (assays, consumables and royalties) contributing to favorable, but variable, gross margin percentages. Additionally, we believe that a sustained investment in research and development is necessary in order to meet the needs of our marketplace and provide a sustainable new product pipeline. We may experience volatility in research and development expenses as a percentage of revenue on a quarterly basis as a result of the timing of development expenses, clinical validation and clinical trials in advance of the commercial launch of our new products.

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP for interim financial statements. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Estimates and assumptions are reviewed periodically. Actual results may differ from these estimates under different assumptions or conditions.

Management believes there have been no significant changes during the quarter ended June 30, 2016 to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in the 2015 10-K.

## RESULTS OF OPERATIONS

### THREE MONTHS ENDED JUNE 30, 2016 COMPARED TO THREE MONTHS ENDED JUNE 30, 2015

Selected consolidated financial data for the three months ended June 30, 2016 and 2015 is as follows (dollars in thousands):

	Three Months Ended June 30,				
	2016	2015	Variance	Variance (%)	
Revenue	\$64,166	\$58,917	\$5,249	9	%
Gross profit	\$44,921	\$43,270	1,651	4	%
Gross margin percentage	70	% 73	% (3	)%	N/A
Operating expenses	\$37,421	\$33,311	4,110	12	%
Income from operations	\$7,500	\$9,959	(2,459 )	(25	)%

Total revenue increased by 9% to \$64.2 million for the three months ended June 30, 2016 from \$58.9 million for the comparable period in 2015. The increase was primarily attributable to an increase in system, assay and consumable sales, partially offset by a reduction in government contract revenue.

Table of Contents

A breakdown of revenue for the three months ended June 30, 2016 and 2015 is as follows (dollars in thousands):

	Three Months Ended June 30,		Variance		
	2016	2015	Variance	(%)	
System sales	\$8,993	\$6,543	\$2,450	37	%
Consumable sales	13,334	11,878	1,456	12	%
Royalty revenue	11,352	11,073	279	3	%
Assay revenue	25,885	24,238	1,647	7	%
Service revenue	2,547	2,381	166	7	%
Other revenue	2,055	2,804	(749)	(27)	%
	\$64,166	\$58,917	\$5,249	9	%

We continue to experience revenue concentration in a limited number of customers. Five customers accounted for 51% (19%, 14%, 8%, 6% and 4%, respectively) of consolidated total revenue in the second quarter of 2016. For comparative purposes, these top five customers accounted for 57% (24%, 16%, 9%, 5% and 3%, respectively) of total revenue in the second quarter of 2015. No other customer accounted for more than 10% of consolidated total revenue during those periods.

Revenue from the sale of systems and peripheral components increased 37% to \$9.0 million for the three months ended June 30, 2016 from \$6.5 million for the three months ended June 30, 2015, due to an increase in the total multiplexing analyzer placements. We sold 277 multiplexing analyzers in the second quarter of 2016, as compared to 234 multiplexing analyzers sold for the corresponding prior year period. The increase in the number of multiplexing analyzers sold is primarily attributable to increased system placements through our partners in Asia and Europe. For the three months ended June 30, 2016, five of our partners accounted for 200, or 72%, of total multiplexing analyzers sold. Five of our partners accounted for 188, or 80%, of total multiplexing analyzers sold for the three months ended June 30, 2015.

Consumable sales, comprised of microspheres and sheath fluid, increased 12% to \$13.3 million for the three months ended June 30, 2016 from \$11.9 million for the three months ended June 30, 2015. During the three months ended June 30, 2016, we had 24 bulk purchases of consumables totaling approximately \$10.7 million (80% of total consumable revenue), ranging from \$0.1 million to \$2.2 million, as compared with 15 bulk purchases totaling approximately \$9.0 million (76% of total consumable revenue), ranging from \$0.1 million to \$4.2 million, for the three months ended June 30, 2015. The increase in revenue from bulk purchases in the second quarter of 2016 is the primary driver to the increase in consumable revenue from the prior year quarter. We expect fluctuations in consumable sales on an ongoing basis. Partners who reported royalty bearing sales accounted for \$7.3 million, or 55%, of consumable sales for the three months ended June 30, 2016 compared to \$9.5 million, or 80%, of the total consumable sales for the three months ended June 30, 2015.

Royalty revenue, which results when our partners sell products or testing services incorporating our technology, increased modestly by 3% to \$11.4 million for the three months ended June 30, 2016 from \$11.1 million for the three months ended June 30, 2015. This increase is the result of an increase in base royalties of \$0.7 million, partially offset by a reduction in minimum royalty payments and royalty audit findings and other adjustments of approximately \$0.4 million. We expect modest fluctuations in the royalties submitted quarter to quarter based upon the varying contractual terms, differing reporting and payment requirements, and the addition of new partners. Our partners' end user sales may reflect volatility from quarter to quarter and therefore, that same volatility is reflected in our reported royalty revenues on a quarterly basis.

Assay revenue increased 7% to \$25.9 million for the three months ended June 30, 2016 from \$24.2 million for the three months ended June 30, 2015. The increase in assay revenue is driven mainly by an expansion in both of our primary assay portfolios: infectious disease testing and genetic testing assay products, which increased 7% and 6%, respectively, for the three months ended June 30, 2016 from the second quarter of 2015. Additionally, infectious disease testing assay products and genetic testing assay products represented 66% and 34%, respectively, of total assay revenue in both the second quarter of 2016 and 2015. Our largest customer, by revenue, accounted for 45% of total assay revenue for the three months ended June 30, 2016 compared to 52% for the three months ended June 30, 2015. No other customer accounted for more than 10% of total assay revenue during those periods. As disclosed previously, cystic fibrosis revenue from our largest assay customer is expected to transition to a competing technology and, although timing is uncertain, the loss of a significant portion of that revenue is expected by the first half of 2017.

## Table of Contents

Service revenue, comprised of extended warranty contracts earned ratably over the term of a contract and time and materials for billable service work not under an extended warranty contract, increased \$0.2 million, or 7%, to \$2.5 million for the second quarter of 2016 compared to the second quarter of 2015. As of June 30, 2016, we had 1,835 Luminex systems covered under extended service agreements and \$4.9 million in deferred revenue related to those contracts. As of June 30, 2015, we had 1,674 Luminex systems covered under extended service agreements and \$4.4 million in deferred revenue related to those contracts.

Other revenue, which includes training revenue, shipping revenue, miscellaneous part sales, amortized license fees, milestone payments from our development agreement with Merck and revenue from agreements with U.S. government agencies, decreased 27% to \$2.1 million for the three months ended June 30, 2016 compared to \$2.8 million for the three months ended June 30, 2015, primarily driven by a reduction in government contract revenue. We expect this trend to continue in the near term.

Gross Profit. Gross profit increased to \$44.9 million for the three months ended June 30, 2016, as compared to \$43.3 million for the three months ended June 30, 2015. Gross margin (gross profit as a percentage of total revenue) was 70% for the three months ended June 30, 2016, lower than the prior year quarter of 73%. As a percentage of revenue, sales in our higher margin items (assays, consumables, and royalties) was slightly lower than in the prior year quarter, representing 79% for the three months ended June 30, 2016 compared to 80% in the prior year quarter. We anticipate continued fluctuation in gross margin and related gross profit primarily as a result of variability in consumable and system purchases and seasonality effects inherent in our assay revenue.

Research and Development Expense. Research and development expense of \$11.5 million, or 18% of total revenue, for the three months ended June 30, 2016 remained consistent to the three months ended June 30, 2015. Modest increases in research and development expenses, primarily related to increased materials and activity associated with the ARIES® M1 System and LX200 product refresh, as well as clinical trials, were offset by lower personnel costs and depreciation expense. Research and development headcount as of June 30, 2016 was 208 as compared to 199 as of June 30, 2015. The focus of our research and development activities is the development and commercialization of a pipeline of assays for the ARIES® system.

Selling, General and Administrative Expense. Selling, general and administrative expenses, excluding the amortization of acquired intangible assets, increased to \$24.2 million for the three months ended June 30, 2016 from \$21.0 million for the three months ended June 30, 2015. The increase was primarily attributable to transaction costs of \$2.0 million related to the acquisition of Nanosphere, which was completed on June 30, 2016, and higher sales and marketing expenses driven by increased headcount and marketing activities. Selling, general and administrative headcount as of June 30, 2016 was 323 as compared to 292 as of June 30, 2015. As a percentage of revenue, selling, general and administrative expense, excluding the amortization of acquired intangible assets, was 38% in the second quarter of 2016, up from 36% in the second quarter of 2015.

Amortization of Acquired Intangible Assets. Amortization of acquired intangible assets increased to \$1.7 million for the three months ended June 30, 2016 from \$0.8 million for the three months ended June 30, 2015. The increase was driven by the completion of the in-process research and development project related to our ARIES® System, resulting in a change from an indefinite-lived asset to a finite-lived asset, which began amortizing in November 2015.

Other Income, net. Other income, net decreased to a loss of \$1.4 million for the three months ended June 30, 2016, as compared to income of \$0.1 million for the three months ended June 30, 2015. The decrease was attributable to debt retirement fees incurred of \$1.5 million in connection with the payoff of Nanosphere's debt.

Settlement of litigation. An expense of \$7.1 million was recorded in the second quarter of 2015 associated with the settlement of litigation with ENZO. The expense associated with the settlement was for partial consideration of a license, dismissal of litigation, releases, and covenants granted by ENZO. See Note 12 - Commitments and Contingencies to our condensed consolidated financial statements for further discussion.

Income taxes. Our effective tax rate for the three months ended June 30, 2016 was 7%, reflecting a \$0.4 million expense, as compared to 10%, or a \$0.3 million expense, for the three months ended June 30, 2015 primarily due to the impact of the Nanosphere acquisition and the inclusion of projected income tax benefits related to Nanosphere in our provisional tax rates. We expect our consolidated effective tax rate to be in the 25% to 35% range over the next several years, absent any other significant discrete items. We continue to assess our business model and its impact in various tax jurisdictions.

Table of Contents

## SIX MONTHS ENDED JUNE 30, 2016 COMPARED TO SIX MONTHS ENDED JUNE 30, 2015

Selected consolidated financial data for the six months ended June 30, 2016 and 2015 is as follows (dollars in thousands):

	Six Months Ended June 30,				
	2016	2015	Variance	Variance (%)	
Revenue	\$127,147	\$116,658	\$10,489	9	%
Gross profit	\$89,727	\$83,489	6,238	7	%
Gross margin percentage	71	% 72	(1	)	% N/A
Operating expenses	\$70,426	\$63,837	6,589	10	%
Income from operations	\$19,301	\$19,652	(351	)	(2 )%

Total revenue increased by 9% to \$127.1 million for the six months ended June 30, 2016 from \$116.7 million for the comparable period in 2015. The increase was primarily attributable to increases in system, consumable and assay sales, partially offset by decreased other revenue.

A breakdown of revenue for the six months ended June 30, 2016 and 2015 is as follows (dollars in thousands):

	Six Months Ended June 30,				
	2016	2015	Variance	Variance (%)	
System sales	\$17,311	\$12,507	\$4,804	38	%
Consumable sales	25,184	21,774	3,410	16	%
Royalty revenue	22,820	21,775	1,045	5	%
Assay revenue	52,924	49,684	3,240	7	%
Service revenue	4,958	4,722	236	5	%
Other revenue	3,950	6,196	(2,246	)	(36 )%
	\$127,147	\$116,658	\$10,489	9	%

We continue to experience revenue concentration in a limited number of customers. Five customers accounted for 53% (21%, 14%, 7%, 7% and 4%, respectively) of consolidated total revenue in the six months ended June 30, 2016. For comparative purposes, these top five customers accounted for 53% (23%, 13%, 7%, 7% and 3%, respectively) of total revenue in the six months ended June 30, 2015. No other customer accounted for more than 10% of consolidated total revenue during those periods.

Revenue from the sale of systems and peripheral components increased 38% to \$17.3 million for the six months ended June 30, 2016 from \$12.5 million for the six months ended June 30, 2015, due to the increase in the total multiplexing analyzer placements. We sold 532 multiplexing analyzers in the six months ended June 30, 2016, as compared to 427 multiplexing analyzers sold for the corresponding prior year period. For the six months ended June 30, 2016, five of our partners accounted for 391, or 74%, of total multiplexing analyzers sold. Five of our partners accounted for 345, or 81%, of total multiplexing analyzers sold for the six months ended June 30, 2015.

Consumable sales increased to \$25.2 million for the six months ended June 30, 2016 compared to \$21.8 million for the six months ended June 30, 2015. During the six months ended June 30, 2016, we had 42 bulk purchases of consumables totaling approximately \$19.8 million (79% of total consumable revenue), ranging from \$0.1 million to \$3.4 million, as compared with 31 bulk purchases totaling approximately \$16.2 million (74% of total consumable

revenue), ranging from \$0.1 million to \$4.2 million, for the six months ended June 30, 2015. The increase in revenue from bulk purchases in the six months ended June 30, 2016 is the main driver to the increase in consumable revenue from the prior year period and is primarily due to overall growth across our partners. We anticipate a modest decline in our consumable sales in the second half of 2016 primarily attributable to the timing of purchases by our largest partner. However, excluding consumables from our largest partner for the six months ended June 30, 2016 and 2015, consumables from our remaining customers grew by 17% for the six months ended June 30, 2016 as compared to the prior year period. We expect fluctuations in consumable sales on an ongoing basis. Partners who reported royalty bearing sales accounted for \$16.0 million, or 63%, of consumable sales for the six months ended June 30, 2016 compared to \$14.7 million, or 68%, of the total consumable sales for the six months ended June 30, 2015.

Table of Contents

Royalty revenue, which results when our partners sell products or services incorporating our technology, increased 5% to \$22.8 million for the six months ended June 30, 2016 from \$21.8 million for the six months ended June 30, 2015. This increase is primarily attributable to an increase in base royalties of approximately \$0.9 million as a result of continued menu expansion and increased utilization of our partners' assays on our technology. We expect modest fluctuations in the royalties submitted quarter to quarter based upon the varying contractual terms, differing reporting and payment requirements, and the addition of new partners. Our partners' end user sales may reflect volatility from quarter to quarter and therefore, that same volatility is reflected in our reported royalty revenues on a quarterly basis.

Assay revenue increased 7% to \$52.9 million for the six months ended June 30, 2016 from \$49.7 million for the six months ended June 30, 2015. The increase in assay revenue is driven primarily by an increase in our infectious disease testing assay portfolio, which increased 14%, partially offset by a decrease in our genetic testing assay portfolio of 7%, from the first six months of 2015. Additionally, infectious disease testing and genetic testing assay products represented 69% and 31%, respectively, of total assay revenue in the six months ended June 30, 2016, compared to 65% and 35%, respectively, in the six months ended June 30, 2015. Our largest customer, by revenue, accounted for 48% of total assay revenue for the six months ended June 30, 2016 compared to 50% for the six months ended June 30, 2015. No other customer accounted for more than 10% of total assay revenue during those periods. As disclosed previously, cystic fibrosis revenue from our largest assay customer is expected to transition to a competing technology and, although timing is uncertain, the loss of a significant portion of that revenue is expected by the first half of 2017.

Service revenue, comprised of extended warranty contracts earned ratably over the term of a contract and time and materials for billable service work not under an extended warranty contract, increased 5% to \$5.0 million for the six months ended June 30, 2016 compared to \$4.7 million for the six months ended June 30, 2015.

Other revenue, which includes training revenue, shipping revenue, miscellaneous part sales, amortized license fees, milestone payments from our development agreement with Merck and revenue from agreements with U.S. government agencies, decreased to \$4.0 million for the six months ended June 30, 2016 compared to \$6.2 million for the six months ended June 30, 2015, primarily driven by a Merck milestone payment in 2015, which did not recur in 2016, in addition to a decrease in revenue from U.S. government contracts in the first half of 2016.

Gross Profit. Gross profit increased to \$89.7 million for the six months ended June 30, 2016, as compared to \$83.5 million for the six months ended June 30, 2015. Gross margin (gross profit as a percentage of total revenue) was 71% for the six months ended June 30, 2016, a decrease from 72% for the six months ended June 30, 2015, primarily driven by the lower concentration of sales in our higher margin items (assays, consumables and royalties) as compared to the prior year period. Such sales represented 79% of revenue for the six months ended June 30, 2016 compared to 80% for the six months ended June 30, 2015. We anticipate continued fluctuation in gross margin and related gross profit primarily as a result of variability in consumable and system purchases and seasonality effects inherent in our assay revenue.

Research and Development Expense. Research and development expense increased to \$22.6 million, or 18% of total revenue, for the six months ended June 30, 2016 from \$21.7 million, or 19% of total revenue, for the six months ended June 30, 2015. The increase in research and development expense was primarily the result of one-time employee separation costs of \$0.5 million and increased material and expenses associated with the ARIES<sup>®</sup> M1 system, LX200 product refresh, and clinical trials. Research and development headcount as of June 30, 2016 was 208 as compared to 199 as of June 30, 2015. The focus of our research and development activities has been the development and clinical validation of our next generation sample to answer platform for our ARIES<sup>®</sup> system.

**Selling, General and Administrative Expense.** Selling, general and administrative expenses, excluding the amortization of acquired intangible assets, increased to \$44.5 million for the six months ended June 30, 2016 from \$40.5 million for the six months ended June 30, 2015, resulting from increases in personnel costs, as well as due to transaction costs of \$2.0 million related to the acquisition of Nanosphere, partially offset by decreases in legal and professional fees with the settlement of the ENZO litigation in the second quarter of 2015. Selling, general and administrative headcount as of June 30, 2016 was 323 as compared to 292 as of June 30, 2015. As a percentage of revenue, selling, general and administrative expense, excluding the amortization of acquired intangible assets, was 35% in the first six months of 2016, consistent with the first six months of 2015.

**Amortization of Acquired Intangible Assets.** Amortization of acquired intangible assets increased to \$3.3 million for the six months ended June 30, 2016 from \$1.7 million for the six months ended June 30, 2015. The increase was driven by the completion of the in-process research and development project related to our ARIES® System, resulting in a change from an indefinite-lived asset to a finite-lived asset, which began amortizing in November 2015.

Table of Contents

Other Income, net. Other income, net decreased to a loss of \$1.4 million for the six months ended June 30, 2016 from income of \$1.0 million for the six months ended June 30, 2015. The decrease was primarily due to the \$1.5 million debt retirement fees in connection with the payoff of Nanosphere's debt.

Settlement of litigation. An expense of \$7.1 million was recorded in the second quarter of 2015 associated with the settlement of litigation with ENZO. The expense associated with the settlement was for partial consideration of a license, dismissal of litigation, releases, and covenants granted by ENZO. See Note 12 - Commitments and Contingencies to our condensed consolidated financial statements for further discussion.

Income taxes. Our effective tax rate for the six months ended June 30, 2016 was 19%, reflecting a \$3.5 million expense, as compared to 24%, or a \$3.2 million expense, for the six months ended June 30, 2015 primarily due to the impact of the Nanosphere acquisition and the inclusion of projected income tax benefits related to Nanosphere in our provisional tax rates in 2016. We expect our consolidated effective tax rate to be in the 25% to 35% range over the next several years, absent any other significant discrete items. We continue to assess our business model and its impact in various tax jurisdictions.

**LIQUIDITY AND CAPITAL RESOURCES**

	June 30, December 31,	
	2016	2015
	(in thousands)	
Cash and cash equivalents	\$81,718	\$ 128,546
Short-term investments	—	11,988
Long-term investments	—	7,459
	\$81,718	\$ 147,993

As of June 30, 2016, we held cash and cash equivalents, short-term investments and long-term investments of \$81.7 million and had working capital of \$125.9 million. At December 31, 2015, we held cash and cash equivalents, short-term investments and long-term investments of \$148.0 million and had working capital of \$182.3 million. The \$66.3 million decrease in cash, cash equivalents and investments is primarily attributable to the cash payment of approximately \$92.5 million in connection with the acquisition of Nanosphere, and the subsequent retirement of approximately \$25.4 million of Nanosphere's debt. These payments were partially offset by the cash acquired from Nanosphere of \$25.6 million and operating cash flows of the Company in the amount of \$30.9 million for the six months ended June 30, 2016, coupled with \$1.8 million in proceeds from our employee stock purchase plan, which partially funded our capital expenditures of \$5.7 million during the first six months of 2016.

As a result of the dilutive nature of the acquisition of Nanosphere, we believe both profitability and operating cash flows over the next eighteen months, approximately, will be lower than our recent historical results; however, we expect to maintain profitability and positive operating cash flows. We currently anticipate that the Acquisition will be accretive to the Company's revenue, profitability, and cash flow by the end of 2017.

We have funded our operations to date primarily through the issuance of equity securities (in conjunction with an initial public offering in 2000, subsequent option exercises, and our secondary public offering in 2008) and cash generated from operations. Our cash reserves are typically held directly or indirectly in a variety of short-term, interest-bearing instruments, including non-government sponsored debt securities. We do not have any investments in asset-backed commercial paper, auction rate securities, or mortgage backed or sub-prime style investments.

Our future capital requirements will depend on a number of factors, including our success in developing and expanding markets for our products, payments under possible future strategic arrangements, continued progress of our research and development of potential products, the timing and outcome of regulatory approvals, the need to acquire

licenses to new technology, costs associated with strategic acquisitions including integration costs and assumed liabilities, the status of competitive products and potential cost associated with both protecting and defending our intellectual property. We believe that our existing cash and cash equivalents are sufficient to fund our operating expenses, capital equipment requirements and other expected liquidity requirements for the coming twelve months. Factors that could affect our capital requirements, in addition to those listed above, include, without limitation: (i) continued collections of accounts receivable consistent with our historical experience; (ii) our ability to manage our inventory levels consistent with past practices; (iii) volatility in our key partners' consumable purchasing patterns; (iv) execution of partnership agreements that include significant up front license fees; (v) our stock repurchase programs from time to time and (vi) executing strategic investment or acquisition agreements requiring significant cash consideration. See also the "Safe Harbor Cautionary Statement" of this report and the risk factors in the 2015 10-K and our other filings with the SEC.

## Table of Contents

To the extent our capital resources are insufficient to meet future capital requirements we will have to raise additional funds to continue the development and deployment of our technologies, or to supplement our position through strategic acquisitions. There can be no assurance that debt or equity funds will be available on favorable terms, if at all. Any downgrade in our credit rating could adversely affect our ability to raise debt capital on favorable terms, or at all. To the extent that additional capital is raised through the sale of equity or convertible debt securities, the issuance of those securities could result in dilution to our stockholders. Moreover, incurring debt financing could result in a substantial portion of our operating cash flow being dedicated to the payment of principal and interest on such indebtedness, could render us more vulnerable to competitive pressures and economic downturns and could impose restrictions on our operations. If adequate funds are not available, we may be required to curtail operations significantly or to obtain funds through entering into agreements on unattractive terms.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

**Interest Rate Risk.** Our interest income is sensitive to changes in the general level of domestic interest rates, particularly since our investments are in short-term instruments available-for-sale. A 50 basis point fluctuation from average investment returns as of June 30, 2016 would yield a less than 0.5% variance in overall investment return, which would not have a material effect on our financial condition.

**Foreign Currency Risk.** Our international business is subject to risks, including, but not limited to: foreign exchange rate volatility, differing tax structures, unique economic conditions, other regulations and restrictions, and changes in political climate. Accordingly, our future results could be materially adversely impacted by changes in these and other factors.

As of June 30, 2016, as a result of our foreign operations, we have costs, assets and liabilities that are denominated in foreign currencies, primarily Canadian dollars and to a lesser extent the Euro, Renminbi, Hong Kong dollar and Yen. For example, some fixed asset purchases and certain expenses in our Canadian subsidiary are denominated in Canadian dollars while sales of products are primarily denominated in U.S. dollars. Transactions in our Netherlands, Japanese and Hong Kong subsidiaries are primarily denominated in Euros, Yen and Hong Kong dollars, respectively. The majority of transactions, with the exception of our initial capital investment, in our Chinese subsidiary are denominated in Renminbi. As a consequence, movements in exchange rates could cause our foreign currency denominated expenses to fluctuate as a percentage of net revenue, affecting our profitability and cash flows. A significant majority of our revenues are denominated in U.S. dollars. The impact of foreign exchange rates on foreign denominated balances will vary in relation to changes between the U.S. dollar, Canadian dollar, Euro, Yen, Renminbi and Hong Kong dollar exchange rates. A 10% change in these exchange rates in relation to the U.S. dollar would result in an income statement impact of approximately \$1.1 million on foreign currency denominated asset and liability balances as of June 30, 2016. As a result of our efforts to expand globally, in the future we will be exposed to additional foreign currency risk in multiple currencies; however, at this time, our exposure to foreign currency fluctuations is not material. We regularly assess the market to determine if additional strategies are appropriate to mitigate future risks.

In addition, the indirect effect of fluctuations in interest rates and foreign currency exchange rates could have a material adverse effect on our business financial condition and results of operations. For example, currency exchange rate fluctuations could affect international demand for our products. In addition, interest rate fluctuations could affect our customers' buying patterns. Furthermore, interest rate and currency exchange rate fluctuations may broadly influence the United States and foreign economies resulting in a material adverse effect on our business, financial condition and results of operations. As a result, we cannot give any assurance as to the effect that future changes in foreign currency rates will have on our consolidated financial position, results of operations or cash flows. Our aggregate foreign currency transaction gain of approximately \$222,000 was included in determining our consolidated

results for the quarter ended June 30, 2016.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (Exchange Act), which are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as of the end of the period covered by this quarterly report. Based on the evaluation and criteria of these disclosure controls and procedures, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by Exchange Act Rule 13a-15(d) during the quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

## PART II. OTHER INFORMATION

## ITEM 1. LEGAL PROCEEDINGS

When and if it appears probable in management's judgment, and based upon consultation with outside counsel, that we will incur monetary damages or other costs in connection with any claims or proceedings, and such costs can be reasonably estimated, we record the estimated liability in the financial statements. If only a range of estimated losses can be estimated, we record an amount within the range that, in management's judgment, reflects the most likely outcome; if none of the estimates within that range is a better estimate than any other amount, we record the liability at the low end of the range of estimates. Any such accrual would be charged to expense in the appropriate period. We disclose significant contingencies when the loss is not probable and/or the amount of the loss is not estimable, when we believe there is at least a reasonable possibility that a loss has been incurred. We recognize costs associated with legal proceedings in the period in which the services were provided.

## ITEM 1A. RISK FACTORS

Reference is made to the factors set forth under the caption "Safe Harbor Cautionary Statement" in Part I, Item 2 of this report and other risk factors described in Part I, Item 1A of the 2015 10-K, which are incorporated herein by reference. There have been no material changes from the risk factors previously disclosed in the 2015 10-K.

## ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The stock repurchase activity for the second quarter of 2016 was as follows:

## ISSUER PURCHASES OF EQUITY SECURITIES

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
4/1/16 - 4/30/16	108	\$ 19.61	—	\$ —
5/1/16 - 5/31/16	166	20.34	—	—
6/1/16 - 6/30/16	1,181	20.51	—	—
Total Second Quarter	1,455	\$ 20.42	—	\$ —

<sup>(1)</sup> Total shares purchased are attributable to the withholding of shares by Luminex to satisfy the payment of tax obligations related to the vesting of restricted shares.

ITEM 6. EXHIBITS

The following exhibits are filed herewith:

Exhibit

Number Description of Documents

2.1 Agreement and Plan of Merger, dated as of May 15, 2016, among Luminex Corporation, Commodore Acquisition, Inc., and Nanosphere, Inc. (Previously filed as an Exhibit to the Company's Current Report on Form 8-K (File No. 000-30109), filed on May 16, 2016).\*

2.2 First Amendment to the Agreement and Plan of Merger, dated as of May 22, 2016, among Luminex Corporation, Commodore Acquisition, Inc., and Nanosphere, Inc. (Previously filed as an Exhibit to the Company's Current Report on Form 8-K (File No. 000-30109), filed on May 23, 2016).

2.3 Second Amendment to the Agreement and Plan of Merger, dated as of June 1, 2016, among Luminex Corporation, Commodore Acquisition, Inc., and Nanosphere, Inc. (incorporated by reference to Exhibit 2.1 to the Current Report on Form 8-K filed by Nanosphere, Inc. with the Securities and Exchange Commission on June 2, 2016).

31.1 Certification by CEO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification by CFO pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification by CEO pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification by CFO pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

101 The following materials from Luminex Corporation's Quarterly Report on Form 10-Q for the three and six months ended June 30, 2016, formatted in XBRL: (i) Condensed Consolidated Balance Sheets; (ii) Condensed Consolidated Statements of Comprehensive Income; (iii) Condensed Consolidated Statement of Cash Flows; and (iv) Notes to Condensed Consolidated Financial Statements.

\* Exhibits and schedules have been omitted pursuant to Item 601(b)(2) of Regulation S-K. The Company hereby undertakes to furnish supplemental copies of any of the omitted exhibits and schedules upon request by the SEC; provided, however, that the Company may request confidential treatment pursuant to Rule 24b-2 of the Securities Exchange Act of 1934 for any exhibits or schedule so furnished. A list identifying the contents of all omitted exhibits and schedules can be found in Exhibit 2.1.
