1. BASIS OF PRESENTATION

Mettler-Toledo International Inc. ("Mettler-Toledo" or the "Company") is a leading global supplier of precision instruments and services. The Company manufactures weighing instruments for use in laboratory, industrial, packaging, logistics and food retailing applications. The Company also manufactures several related analytical instruments and provides automated chemistry solutions used in drug and chemical compound discovery and development. In addition, the Company manufactures metal detection and other end-of-line inspection systems used in production and packaging and provides solutions for use in certain process analytics applications. The Company's primary manufacturing facilities are located in China, Germany, Switzerland, the United Kingdom and the United States. The Company's principal executive offices are located in Columbus, Ohio and Greifensee, Switzerland. The accompanying interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") and include all entities in which the Company has control, which are its wholly-owned subsidiaries. The interim consolidated financial statements have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to such rules and regulations. The interim consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

The accompanying interim consolidated financial statements reflect all adjustments which, in the opinion of management, are necessary for a fair statement of the results of the interim periods presented. Operating results for the three and nine months ended September 30, 2015 are not necessarily indicative of the results to be expected for the full year ending December 31, 2015.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, as well as disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results may differ from those estimates. A discussion of the Company's critical accounting policies is included in Management's Discussion and Analysis of Financial Condition and Results of Operations and the Notes to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

All intercompany transactions and balances have been eliminated.

Certain reclassifications have been made to prior year amounts to conform to the current year presentation.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Trade Accounts Receivable

Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts represents the Company's best estimate of probable credit losses in its existing trade accounts receivable. The Company determines the allowance based upon a review of both specific accounts for collection and the age of the accounts receivable portfolio.

Inventories

Inventories are valued at the lower of cost or net realizable value. Cost, which includes direct materials, labor and overhead, is generally determined using the first in, first out (FIFO) method. The estimated net realizable value is based on assumptions for future demand and related pricing. Adjustments to the cost basis of the Company's inventory are made for excess and obsolete items based on usage, orders and technological obsolescence. If actual market conditions are less favorable than those projected by management, reductions in the value of inventory may be required.

Inventories consisted of the following:

	September 30, 2015	December 31, 2014
Raw materials and parts	\$101,655	\$97,969
Work-in-progress	42,184	34,973
Finished goods	81,703	71,589
	\$225,542	\$204,531

Goodwill and Other Intangible Assets

Goodwill, representing the excess of purchase price over the net asset value of companies acquired, and indefinite-lived intangible assets are not amortized, but are reviewed for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that an asset might be impaired. The annual evaluation for goodwill and indefinite-lived intangible assets are generally based on an assessment of qualitative and quantitative factors to determine whether it is more likely than not that the fair value of the asset is less than its carrying amount. Other intangible assets include indefinite-lived assets and assets subject to amortization. Where applicable, amortization is charged on a straight-line basis over the expected period of benefit. The straight-line method of amortization reflects an appropriate allocation of the cost of the intangible assets to earnings in proportion to the amount of economic benefits obtained by the Company in each reporting period. The Company assesses the initial acquisition of intangible assets in accordance with the provisions of ASC 805 "Business Combinations" and the continued accounting for previously recognized intangible assets and goodwill in accordance with the provisions of ASC 350 "Intangible - Goodwill and Other" and ASC 360 "Property, Plant and Equipment".

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

At September 30, 2015 – Unaudited (Continued)

(In thousands, except share data, unless otherwise stated)

The Company recognized amortization expense associated with the above intangible assets of \$1.5 million and \$1.6 million for the three months ended September 30, 2015 and 2014, respectively and \$4.7 million and \$4.8 million for the nine months ended September 30, 2015 and 2014, respectively. The annual aggregate amortization expense based on the current balance of other intangible assets is estimated at \$6.2 million for 2015, \$6.1 million for 2016, \$5.7 million for 2017, \$5.5 million for 2018, \$5.2 million for 2019 and \$4.9 million for 2020. Purchased intangible amortization was \$1.3 million, \$0.9 million after tax, and \$1.5 million, \$1.0 million after tax, for the three months ended September 30, 2015 and 2014, respectively and \$4.2 million, \$2.9 million after tax, and \$4.2 million, \$2.8 million after tax, for the nine months ended September 30, 2015 and 2014, respectively.

In addition to the above amortization, the Company recorded amortization expense associated with capitalized software of \$6.2 million and \$5.5 million for the three months ended September 30, 2015 and 2014, respectively and \$18.1 million and \$16.7 million for the nine months ended September 30, 2015 and 2014, respectively.

Revenue Recognition

Revenue is recognized when title to a product has transferred and any significant customer obligations have been fulfilled. Standard shipping terms are generally FOB shipping point in most countries and, accordingly, title and risk of loss transfers upon shipment. In countries where title cannot legally transfer before delivery, the Company defers revenue recognition until delivery has occurred. The Company generally maintains the right to accept or reject a product return in its terms and conditions and also maintains appropriate accruals for outstanding credits. Shipping and handling costs charged to customers are included in total net sales and the associated expense is recorded in cost of sales for all periods presented. Other than a few small software applications, the Company does not sell software products without the related hardware instrument as the software is embedded in the instrument. The Company's products typically require no significant production, modification or customization of the hardware or software that is essential to the functionality of the products. To the extent the Company's solutions have a post-shipment obligation, such as customer acceptance, revenue is deferred until the obligation has been completed. The Company defers product revenue where installation is required, unless such installation is deemed perfunctory. The Company also sometimes enters into certain arrangements that require the separate delivery of multiple goods and/or services. These deliverables are accounted for separately if the deliverables have standalone value and the performance of undelivered items is probable and within the Company's control. The allocation of revenue between the separate deliverables is typically based on the relative selling price at the time of the sale in accordance with a number of factors including service technician billing rates, time to install and geographic location.

Further, certain products are also sold through indirect distribution channels whereby the distributor assumes any further obligations to the customer upon title transfer. Revenue is recognized on these products upon transfer of title and risk of loss to its distributors. Distributor discounts are offset against revenue at the time such revenue is recognized.

Service revenue not under contract is recognized upon the completion of the service performed. Spare parts sold on a stand-alone basis are recognized upon title and risk of loss transfer which is generally at the time of shipment.

Revenues from service contracts are recognized ratably over the contract period. These contracts represent an obligation to perform repair and other services including regulatory compliance qualification, calibration, certification and preventative maintenance on a customer's pre-defined equipment over the contract period. Service contracts are separately priced and payment is typically received from the customer at the beginning of the contract period.

Warranty

The Company generally offers one-year warranties on most of its products. Estimated product warranties are recorded at the time revenue is recognized. While the Company engages in extensive

product quality programs and processes, its warranty obligations are affected by product failure rates, material usage and service costs incurred in correcting a product failure.

Employee Termination Benefits

In situations where contractual termination benefits exist, the Company records accruals for employee termination benefits when it is probable that a liability has been incurred and the amount of the liability is reasonably estimable. All other employee termination arrangements are recognized and measured at their fair value at the communication date unless the employee is required to render additional service beyond the legal notification period, in which case the liability is recognized ratably over the future service period.

Share-Based Compensation

The Company recognizes share-based compensation expense within selling, general and administrative in the consolidated statements of operations and other comprehensive income with a corresponding offset to additional paid-in capital in the consolidated balance sheet. The Company recorded \$3.4 million and \$10.3 million of share-based compensation expense for the three and nine months ended September 30, 2015, respectively, compared to \$3.3 million and \$9.8 million for the corresponding periods in 2014.

Research and Development

Research and development costs primarily consist of salaries, consulting and other costs. The Company expenses these costs as incurred.

3. ACQUISITIONS

In September 2015, the Company consummated acquisitions totaling \$16.6 million, including the acquisition of a real-time monitoring water purity technology for an estimated aggregate purchase price of \$14.7 million that will be integrated into the Company's process analytics product offering. The Company may be required to pay additional cash consideration related to an earn-out period. Goodwill recorded in connection with the acquisition totaled \$8.7 million, which is included in the Company's U.S. Operations segment. The Company also recorded \$6.8 million of identified intangibles primarily pertaining to technology in connection with the acquisitions, which will be amortized on a straight-line basis over 10 years.

4. FINANCIAL INSTRUMENTS

The Company has limited involvement with derivative financial instruments and does not use them for trading purposes. The Company enters into certain interest rate swap agreements in order to manage its exposure to changes in interest rates. The amount of the Company's fixed obligation interest payments may change based upon the expiration dates of its interest rate swap agreements and the level and composition of its debt. The Company also enters into certain foreign currency forward contracts to limit the Company's exposure to currency fluctuations on the respective hedged items. As also mentioned in Note 7, the Company has designated its euro denominated debt as a hedge of a portion of its net investment in euro-denominated foreign operations. For additional disclosures on the fair value of financial instruments, see Note 5.

Cash Flow Hedges

In July 2012, the Company began entering into foreign currency forward contracts, designated as cash flow hedges, to hedge certain forecasted intercompany sales denominated in euro with its Swiss-based business. The notional amount of foreign currency forward contracts outstanding at September 30,

2015 were \$29.9 million (Euro 26.7 million) for contracts that mature in 2015 and \$74.5 million (Euro 66.5 million) for contracts that mature in 2016. The notional amount of foreign currency forward contracts outstanding at December 31, 2014 was \$87.0 million (Euro 72.0 million) for contracts that mature in 2015. The amount recognized in other comprehensive income (loss) during the three months period ended September 30, 2015 and 2014 was a loss of \$6.1 million and a gain of \$0.5 million, respectively. The amount recognized in other comprehensive income (loss) during the nine months period ended September 30, 2015 and 2014 was a gain of \$18.1 million and \$0.9 million, respectively.

The Company has an interest rate swap agreement designated as a cash flow hedge. The agreement is a swap which has the effect of changing the floating rate LIBOR-based interest payments associated with \$100 million in forecasted borrowings under the Company's credit facility to a fixed obligation of 3.24%. The swap began in October 2010 and matures in October 2015.

In June 2013, the Company entered into a forward-starting interest rate swap agreement, designated as a cash flow hedge. The agreement will change the floating rate LIBOR-based interest payments associated with \$50 million in forecasted borrowings under the Company's credit agreement to a fixed obligation of 2.52% beginning in October 2015 and matures in October 2020.

In March 2015, the Company entered into a forward-starting interest rate swap agreement. The agreement will change the floating rate LIBOR-based interest payments associated with \$100 million in forecasted borrowings under the Company's credit agreement to a fixed obligation of 2.25% beginning in February 2017 and matures in February 2022. The Company's cash flow hedges are recorded gross at fair value in the consolidated balance sheet at September 30, 2015 and December 31, 2014, respectively, and disclosed in Note 5. Amounts reclassified into other comprehensive income and the effective portions of the cash flow hedges are further disclosed in Note 9. A derivative gain of \$5.0 million based upon interest rates and foreign currency rates at September 30, 2015, is expected to be reclassified from other comprehensive income (loss) to earnings in the next 12 months. Through September 30, 2015, no hedge ineffectiveness has occurred in relation to the cash flow hedges.

Other Derivatives

The Company enters into foreign currency forward contracts in order to economically hedge short-term trade and non-trade intercompany balances largely denominated in Swiss franc, other major European currencies, and the Chinese Renminbi with its foreign businesses. In accordance with U.S. GAAP, these contracts are considered "derivatives not designated as hedging instruments." Gains or losses on these instruments are reported in current earnings. The foreign currency forward contracts are recorded at fair value in the consolidated balance sheet at September 30, 2015 and December 31, 2014, respectively, and disclosed in Note 5. The Company recognized in other charges (income), a net gain of \$4.7 million and a net loss of \$2.0 million during the three months ended September 30, 2015 and 2014, respectively, and a net loss of \$4.8 million and \$3.0 million during the nine months ended September 30, 2015 and 2014, respectively. The gains and losses are primarily offset by the underlying transaction gains on the related intercompany balances. At September 30, 2015 and December 31, 2014, these contracts had a notional value of \$335.5 million and \$325.4 million, respectively.

5. FAIR VALUE MEASUREMENTS

At September 30, 2015 and December 31, 2014, the Company had derivative assets totaling \$10.1 million and \$2.2 million, respectively, and derivative liabilities totaling \$6.5 million and \$5.6 million, respectively. The fair values of the interest rate swap agreements, foreign currency forward contracts designated as cash flow hedges and foreign currency forward contracts that economically hedge short-term intercompany balances are estimated based upon inputs from current valuation information obtained from dealer quotes and priced with observable market assumptions and appropriate valuation adjustments

for credit risk. The Company has evaluated the valuation methodologies used to develop the fair values by dealers in order to determine whether such valuations are representative of an exit price in the Company's principal market. In addition, the Company uses an internally developed model to perform testing on the valuations received from brokers. The Company has also considered both its own credit risk and counterparty credit risk in determining fair value and determined these adjustments were insignificant at September 30, 2015 and December 31, 2014.

At September 30, 2015 and December 31, 2014, the Company had \$17.3 million and \$14.2 million of cash equivalents, respectively, the fair value of which is determined through quoted and corroborated prices in active markets. The fair value of cash equivalents approximates cost.

The fair value of the Company's fixed interest rate debt was estimated using Level 2 inputs, primarily discounted cash flow models, based on estimated current rates offered for similar debt under current market conditions for the Company. The carrying value of the Company's debt exceeds the fair value by approximately \$6.9 million as of September 30, 2015. The fair value of the Company's debt exceeds the carrying value by approximately \$17.8 million as of December 31, 2014, respectively.

Under U.S. GAAP, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement consists of observable and unobservable inputs that reflect the assumptions that a market participant would use in pricing an asset or liability.

A fair value hierarchy has been established that categorizes these inputs into three levels:

Level 1: Quoted prices in active markets for identical assets and liabilities

Level 2: Observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3: Unobservable inputs

The following table presents for each of these hierarchy levels, the Company's assets and liabilities that are measured at fair value on a recurring basis at September 30, 2015 and December 31, 2014:

6. INCOME TAXES

The provision for taxes is based upon using the Company's projected annual effective tax rate of 24% for both the three and nine month periods ended September 30, 2015 and 2014.

7. DEBT

Debt consisted of the following at September 30, 2015:

	September 30, 2015

As of September 30, 2015, the Company had \$683.4 million of availability remaining under its Credit Agreement. The Company was in compliance with its covenants at September 30, 2015.

1.47% Euro Senior Notes

The Company has designated the 1.47% Euro Senior Notes as a hedge of a portion of its net investment in euro-denominated foreign subsidiaries to reduce foreign currency risk associated with the net investment in these operations. Changes in the carrying value of this debt resulting from fluctuations in the euro to U.S. dollar exchange rate are recorded as foreign currency translation adjustments within other comprehensive income (loss). The unrealized gain recorded in other comprehensive income (loss) related to this net investment hedge was \$0.3 million for the periods ended September 30, 2015.

4.24% Senior Notes

In June 2014, the Company entered into an agreement to issue and sell \$250 million of ten-year Senior Notes in a private placement. The Company issued \$125 million with a fixed interest rate of 3.84% ("3.84% Senior Notes") in September 2014 and issued an additional \$125 million with a fixed interest rate of 4.24% ("4.24% Senior Notes") in June 2015. The Senior Notes are senior unsecured obligations of the Company. The 4.24% Senior Notes were used to repay \$100 million of 6.30% Senior Notes which were due June 25, 2015.

8. SHARE REPURCHASE PROGRAM AND TREASURY STOCK

As of September 30, 2015, the Company had \$107.2 million of remaining availability under the Company's share repurchase program. In November 2015, the Company's Board of Directors authorized an additional \$1.5 billion to the share repurchase program. The share repurchases are expected to be

funded from cash balances, borrowings and cash generated from operating activities. Repurchases will be made through open market transactions, and the amount and timing of purchases will depend on business and market conditions, the stock price, trading restrictions, the level of acquisition activity and other factors.

The Company has purchased 24.2 million shares since the inception of the program through September 30, 2015. During the nine months ended September 30, 2015 and 2014, the Company spent \$371.2 million and \$296.5 million on the repurchase of 1,167,796 shares and 1,186,215 shares at an average price per share of \$317.86 and \$249.91, respectively. The Company also reissued 281,627 shares and 246,551 shares held in treasury for the exercise of stock options and restricted stock units during the nine months ended September 30, 2015 and 2014, respectively.

15. CONTINGENCIES

The Company is party to various legal proceedings, including certain environmental matters, incidental to the normal course of business. Management does not expect that any of such proceedings, either individually or in the aggregate, will have a material adverse effect on the Company's financial condition, results of operations or cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with the Unaudited Interim Consolidated Financial Statements included herein.

General

Our interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Operating results for the three and nine months ended September 30, 2015 are not necessarily indicative of the results to be expected for the full year ending December 31, 2015.

Changes in local currency exclude the effect of currency exchange rate fluctuations. Local currency amounts are determined by translating current and previous year consolidated financial information at an index utilizing historical currency exchange rates. We believe local currency information provides a helpful assessment of business performance and a useful measure of results between periods. We do not, nor do we suggest that investors should, consider such non-GAAP financial measures in isolation from, or as a substitute for, financial information prepared in accordance with GAAP. We present non-GAAP financial measures in reporting our financial results to provide investors with an additional analytical tool to evaluate our operating results.

Results of Operations – Consolidated

The following tables set forth certain items from our interim consolidated statements of operations for the three and nine month periods ended September 30, 2015 and 2014 (amounts in thousands).

Net sales

Net sales were \$604.2 million and \$629.1 million for the three months ended September 30, 2015 and 2014, respectively, and \$1.722 billion and \$1.789 billion for the nine months ended September 30, 2015 and 2014. This represents a decrease of 4% in U.S. dollars for both the three and nine months ended September 30, 2015. Excluding the effect of currency exchange rate fluctuations, or in local currencies, net sales increased 3% and 4% for the three and nine months ended September 30, 2015, as compared to prior year comparable periods. Currency exchange rate fluctuations negatively impacted net sales as most of our non-U.S. dollar trading currencies, especially the euro, have weakened against the U.S. dollar. While market conditions remain stable in most parts of the world, we see unfavorable market conditions in China, Russia and Brazil, where customer investments have slowed due to a variety of economic factors. We remain cautious about

our sales outlook as the timing of a market stabilization or recovery in these three countries remains uncertain. Net sales by geographic destination for the three and nine months ended September 30, 2015 in U.S. dollars increased in the Americas 8% and 6%, in Europe decreased 13% for both periods, and in Asia/Rest of World decreased 8% and 4%, respectively. Our net sales by geographic destination for the three and nine months ended September 30, 2015 in local currencies increased in the Americas 10% and 7%, in Europe 1% and 3%, and in Asia/Rest of World decreased 1% and increased 1%, respectively. Net sales were impacted by significant sales declines in China, Russia and Brazil. A discussion of sales by operating segment is included below.

As described in Note 16 to our consolidated financial statements for the year ended December 31, 2014, our net sales comprise product sales of precision instruments and related services. Service revenues are primarily derived from repair and other services, including regulatory compliance qualification, calibration, certification, preventative maintenance and spare parts.

Net sales of products decreased 4% in U.S. dollars and increased 3% in local currencies for the three months ended September 30, 2015 and decreased 3% in U.S. dollars and increased 4% local currencies for the nine months ended September 30, 2015, compared to the corresponding periods in 2014. Service revenue (including spare parts) decreased by 4% in U.S. dollars and increased 5% in local currencies for the three months ended September 30, 2015 and decreased 5% in U.S. dollars and increased 4% in local currencies for the nine months ended September 30, 2015, compared to the corresponding periods in 2014.

Net sales of our laboratory-related products, which represented approximately 48% of our total net sales decreased 1% in U.S. dollars and increased 7% in local currencies for both the three and nine months ended September 30, 2015. The local currency increase in net sales of our laboratory-related products for the three and nine months ended September 30, 2015 was driven by strong volume and favorable price realization in most product categories, including strong growth in pipettes, and laboratory balances for the three month period. These results were offset in part by significant sales volume declines in Brazil and Russia.

Net sales of our industrial-related products, which represented approximately 43% of our total net sales decreased 8% in U.S. dollars and 1% in local currencies for the three months ended September 30, 2015, and decreased 7% in U.S. dollars and were flat in local currencies for the nine months ended September 30, 2015, compared to the corresponding prior year periods. The decrease in local currency net sales of our industrial-related products for the three and nine months ended September 30, 2015 includes significant sales volume declines of industrial-related products in China, Russia and Brazil offset in part by strong growth in the United States primarily due to increased volume.

Net sales in our food retailing products, which represented approximately 9% of our total net sales, were flat in U.S. dollars and increased 7% in local currencies for the three months ended September 30, 2015, and decreased 2% in U.S. dollars and increased 6% in local currencies for the nine months ended September 30, 2015, compared to the corresponding prior year periods. The increase in net sales in local currencies of our food retailing products for the three months ended September 30, 2015 is driven by strong project activity in the Americas offset in part by reduced net sales in Europe.

Gross profit

Gross profit as a percentage of net sales was 56.2% and 54.6% for the three months ended September 30, 2015 and 2014, respectively, and 55.8% and 53.9% for the nine months ended September 30, 2015 and 2014, respectively.

Gross profit as a percentage of net sales for products was 59.8% and 57.8% for the three months ended September 30, 2015 and 2014, respectively, and 59.7% and 57.5% for the nine months ended September 30, 2015 and 2014, respectively.

Gross profit as a percentage of net sales for services (including spare parts) was 43.6% and 43.5% for the three months ended September 30, 2015 and 2014, respectively, and 42.5% and 42.0% for the nine months ended September 30, 2015 and 2014, respectively.

The increase in gross profit as a percentage of net sales for the three and nine months ended September 30, 2015 includes the benefit of hedging gains and currency translation, favorable price realization, increased sales volume, and reduced material costs, offset in part by investments in our field service organization.

Research and development and selling, general and administrative expenses

Research and development expenses as a percentage of net sales was 4.9% and 4.8% for the three months ended September 30, 2015 and 2014, respectively, and 5.1% for both the nine months ended September 30, 2015 and 2014.

Research and development expenses decreased 2% in U.S. dollars and increased 3% in local currencies for the three months ended September 30, 2015, and decreased 4% in U.S. dollars and increased 1% in local currencies for the nine months ended September 30, 2015, respectively, compared to the corresponding periods in 2014, relating to the timing of research and development project activity.

Selling, general and administrative expenses as a percentage of net sales were 29.1% and 29.6% for the three months ended September 30, 2015 and 2014, respectively, and were 30.4% and 30.3% for the nine months ended September 30, 2015 and 2014. Selling, general and administrative expenses decreased 6% in U.S. dollars and increased 1% in local currencies for the three months ended September 30, 2015, and decreased 3% in U.S. dollars and increased 3% in local currencies for the nine months ended September 30, 2015, compared to the corresponding periods in 2014. The increase includes additional investments in our field sales organization and higher employee benefit costs, offset in part by lower cash incentive expense and benefits from our cost savings programs during the three months ended September 30, 2015.

Amortization, interest expense, other charges (income), net and taxes

Amortization expense was \$7.8 million and \$7.2 million for the three months ended September 30, 2015 and 2014, respectively, and \$22.9 million and \$21.6 million for the nine months ended September 30, 2015 and 2014, respectively.

Interest expense was \$7.0 million and \$6.0 million for the three months ended September 30, 2015 and 2014, respectively, and \$20.7 million and \$17.6 million for the nine months ended September 30, 2015 and 2014, respectively. The increase in interest expense for the three and nine month periods ended September 30, 2015 is primarily a result of an increase in average borrowings.

Other charges (income), net consist primarily of (gains) losses from foreign currency transactions and hedging activity, interest income and other items.

The provision for taxes is based upon using our projected annual effective tax rate of 24% for the three and nine months periods ended September 30, 2015 and 2014. Our consolidated income tax rate is lower than the U.S. statutory rate primarily because of benefits from lower-taxed non-U.S. operations. The most significant of these lower-taxed operations are in Switzerland and China.

Results of Operations – by Operating Segment

The following is a discussion of the financial results of our operating segments. We currently have five reportable segments: U.S. Operations, Swiss Operations, Western European Operations, Chinese Operations and Other. A more detailed description of these segments is outlined in Note 16 to our consolidated financial statements for the year ended December 31, 2014.

U.S. Operations (amounts in thousands)

	Three months ended September 30,			Nine months ended September 30,		
	2015	2014	%	2015	2014	%
Total net sales	\$238,934	\$216,299	10	% \$661,636	\$615,559	7
Net sales to external customers	\$217,713	\$196,241	11	% \$599,283	\$553,590	8
Segment profit	\$40,529	\$30,695	32	% \$101,719	\$84,715	20

Total net sales increased 10% and 7% for the three and nine months ended September 30, 2015 compared with the corresponding periods in 2014. Net sales to external customers increased 11% and 8% for the three and nine months ended September 30, 2015, respectively. The increase in total net sales and net sales to external customers for the three months ended September 30, 2015 reflects strong sales growth in most product categories.

Segment profit increased \$9.8 million and \$17.0 million for the three and nine months ended September 30, 2015, respectively, compared to the corresponding periods in 2014. The increase in segment profit for the three months ended September 30, 2015 primarily related to increased sales and benefits from our cost savings programs, offset in part by increased sales and service investments.

1)Represents U.S. dollar growth for net sales and segment profit.

Total net sales decreased 5% in U.S. dollars and was flat in local currency for the three months ended September 30, 2015, compared to the corresponding periods in 2014, and decreased 6% in U.S. dollars and 1% in local currency for the nine months ended September 30, 2015. Net sales to external customers decreased 7% in U.S. dollars and 3% in local currency for the three months ended September 30, 2015 and decreased 5% in U.S. dollars and 1% in local currency for the nine months ended September 30, 2015, compared to the corresponding periods in 2014. The decrease in local currency net sales to external customers for the three month period ended September 30, 2015 includes volume declines in industrial-related products related to soft market conditions, offset in part by growth in our laboratory-related products.

Segment profit increased \$3.8 million and \$9.9 million for the three and nine month periods ended September 30, 2015, respectively, compared to the corresponding periods in 2014. Segment profit includes the benefit of currency hedging, the impact of favorable inter-segment price realization and reduced material costs, offset in part by unfavorable foreign currency translation.

1)Represents U.S. dollar growth for net sales and segment profit.

Total net sales decreased 11% in U.S. dollars and increased 4% in local currencies for the three months ended September 30, 2015 and decreased 11% in U.S. dollars and increased 7% in local currencies for the nine months ended September 30, 2015, compared to the corresponding periods in 2014. Net sales to external customers decreased 14% in U.S. dollars and increased 2% in local currencies for the three months ended September 30, 2015, and decreased 12% in U.S. dollars and increased 6% in local currencies for the nine months ended September 30, 2015, compared to the corresponding periods in 2014. Total net sales and net sales to external customers for the three and nine months ended September 30, 2015 includes strong growth across most laboratory-related products due to volume increases and favorable price realization, offset in part by a decline in product inspection for the three months ended September 30, 2015.

Segment profit decreased \$2.8 million and \$3.7 million for the three and nine month periods ended September 30, 2015, respectively, compared to the corresponding periods in 2014 primarily due to unfavorable foreign currency translation and increased sales and service investments, offset in part by increased total net sales in local currencies.

1)Represents U.S. dollar growth for net sales and segment profit.

Total net sales decreased 2% in U.S. dollars and was flat in local currency for the three months ended September 30, 2015 and was flat in both U.S. dollars and local currency for the nine months ended September 30, 2015, compared to the corresponding periods in 2014. Net sales to external customers decreased 10% in U.S. dollars and 9% in local currency for the three months ended September 30, 2015 and decreased 8% in both U.S. dollars and local currency during the nine months ended September 30, 2015, compared to the corresponding periods in 2014. The decrease in net sales to external customers during the three and nine months ended September 30, 2015 reflects a significant sales volume decline in industrial-related products offset in part by growth in laboratory-related products and food retailing. Net sales to external customers in local currency for our industrial-related products decreased 19% for both the three and nine months ended September 30, 2015.

Segment profit decreased \$1.8 million and \$2.7 million for the three and nine month periods ended September 30, 2015, respectively, compared to the corresponding periods in 2014. The decrease in segment profit for the three and nine months ended September 30, 2015 includes a reduction in net sales to external customers, and increased sales and service investments, offset in part by favorable price realization and favorable business mix.

1)Represents U.S. dollar growth (decline) for net sales and segment profit.

Total net sales and net sales to external customers decreased 8% in U.S. dollars and increased 7% in local currencies for the three months ended September 30, 2015 and decreased 6% in U.S. dollars and increased 5% in local currencies for the nine months ended September 30, 2015 compared to the corresponding periods in 2014. The increase in local currency total net sales and net sales to external customers includes strong volume growth and increased price realization in several countries, offset in part by a significant sales volume declines in Russia and Brazil.

Segment profit increased \$0.3 million and decreased \$0.9 million for the three and nine months ended September 30, 2015, respectively, compared to the corresponding periods in 2014. The increase in segment profit for the three months ended September 30, 2015 includes increased local currency sales offset by unfavorable currency translation and increased sales and service investments.

Liquidity and Capital Resources

Liquidity is our ability to generate sufficient cash flows from operating activities to meet our obligations and commitments. In addition, liquidity includes the ability to obtain appropriate financing. Currently, our financing requirements are primarily driven by working capital requirements, capital expenditures, share repurchases and acquisitions.

Cash provided by operating activities totaled \$289.8 million during the nine months ended September 30, 2015, compared to \$278.2 million in the corresponding period in 2014. The increase in 2015 includes higher net earnings and the timing of tax payments in the prior year, offset in part by the timing of accounts receivables collections in the prior year and increased cash incentive payments of approximately \$14 million.

Capital expenditures are made primarily for investments in information systems and technology, machinery, equipment and the purchase and expansion of facilities. Our capital expenditures totaled \$56.8 million for the nine months ended September 30, 2015 compared to \$61.4 million in the corresponding period in 2014.

We continue to explore potential acquisitions. In connection with any acquisition, we may incur additional indebtedness. In September 2015, we consummated acquisitions totaling \$16.6 million, including the acquisition of a real-time monitoring water purity technology for an estimated aggregate purchase price of \$14.7 million that will be integrated into our process analytics product offering. We may be required to pay additional cash consideration related to an earn-out period. Goodwill recorded in connection with the acquisition totaled \$8.7 million, which is included in the our U.S. Operations segment. We also recorded \$6.8 million of identified intangibles primarily pertaining to technology in connection with the acquisitions, which will be amortized on a straight-line basis over 10 years.

We plan to repatriate earnings from China, Switzerland, Germany, the United Kingdom and certain other countries in future years and expect the only additional cost associated with the repatriation of such earnings outside the United States will be withholding taxes. All other undistributed earnings are considered to be permanently reinvested. As of September 30, 2015, we have an immaterial amount of cash and cash equivalents outside the United States where undistributed earnings are considered permanently reinvested. Accordingly, we believe the tax

impact associated with repatriating our undistributed foreign earnings will not have a material effect on our liquidity.

Total debt	450,283	172,509	622,792
Less: current portion	(283)	(20,778)	(21,061)
Total long-term debt	\$450,000	\$151,731	\$601,731

As of September 30, 2015, we had \$683.4 million available under our credit agreement. Changes in exchange rates between the currencies in which we generate cash flows and the currencies in which our borrowings are denominated affect our liquidity. In addition, because we borrow in a variety of currencies, our debt balances fluctuate due to changes in exchange rates.

We currently believe that cash flow from operating activities, together with liquidity available under our credit facility and local working capital facilities, will be sufficient to fund currently anticipated working capital needs and capital spending requirements for at least the foreseeable future.

Share Repurchase Program

As of September 30, 2015, we had \$107.2 million of remaining availability under the Company's share repurchase program. In November 2015, the Company's Board of Directors authorized an additional \$1.5 billion to the share repurchase program. The share repurchases are expected to be funded from cash balances, borrowings and cash generated from operating activities. Repurchases will be made through open market transactions, and the amount and timing of purchases will depend on business and market conditions, the stock price, trading restrictions, the level of acquisition activity and other factors.

We have purchased 24.2 million shares since the inception of the program through September 30, 2015. During the nine months ended September 30, 2015 and 2014, we spent \$371.2 million and \$296.5 million on the repurchase of 1,167,796 shares and 1,186,215 shares at an average price per share of \$317.86 and \$249.91, respectively. We also reissued 281,627 shares and 246,551 shares held in treasury for the exercise of stock options and restricted stock units during the nine months ended September 30, 2015 and 2014, respectively.

Effect of Currency on Results of Operations

Our earnings are affected by changing exchange rates. We are most sensitive to changes in the exchange rates between the Swiss franc, euro, and U.S. dollar. We have more Swiss franc expenses than we do Swiss franc sales because we develop and manufacture products in Switzerland that we sell globally, and have a number of corporate functions located in Switzerland. When the Swiss franc strengthens against our other trading currencies, particularly the U.S. dollar and euro, our earnings go down. We also have significantly more sales in the euro than we do expenses. When the euro weakens against the U.S. dollar and Swiss franc, our earnings also go down.

We entered into foreign currency forward contracts that reduce our exposure from the Swiss franc strengthening against the euro through 2016. The notional amount and average forward rate of our foreign currency forward contracts at September 30, 2015 is Euro 26.7 million and 1.20 for contracts that mature in 2015, and Euro 66.5 million and 1.19 for contracts that mature in 2016, respectively. In September 2011, the Swiss National Bank established an exchange rate floor of 1.2 Swiss francs per euro which was abandoned in January 2015 after we entered into the previously mentioned foreign currency forward contracts. The Swiss National Bank's abandonment of the euro exchange rate floor resulted in an immediate strengthening of the Swiss franc against the euro and U.S. dollar. Absent these forward currency contracts, we estimate a 1% strengthening of the Swiss franc against the euro would reduce our earnings before tax by approximately \$1.1 million to \$1.3 million annually. We also estimate a 1% strengthening of the Swiss franc against the U.S. dollar would reduce our earnings before tax by approximately \$0.5 million to \$0.7 million annually in addition to the previously mentioned strengthening of the Swiss franc against the euro impact. We also conduct business in many geographies throughout the world, including Asia Pacific, the United Kingdom, Eastern Europe, Latin America, and Canada. Fluctuations in these currency exchange rates against the U.S. dollar can also affect our operating results. The most significant of these currency exposures is the Chinese Renminbi. The impact on our earnings before tax of the Chinese Renminbi weakening 1% against the U.S. dollar is a reduction of approximately \$0.7 million to \$0.9 million annually.

In addition to the effects of exchange rate movements on operating profits, our debt levels can fluctuate due to changes in exchange rates, particularly between the U.S. dollar and the Euro. Based on our outstanding debt at September 30, 2015, we estimate that a 10% weakening of the U.S. dollar against the currencies in which our debt is denominated would result in an increase of approximately \$19.2 million in the reported U.S. dollar value of our debt.

Recent Accounting Pronouncements

In April 2015, the FASB issued ASU 2015-03, to ASC 835-30 "Interest - Imputation of Interest." ASU 2015-03 will require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. In August 2015, the FASB issued ASU 2015-15 and update to ASU 2015-03, which addresses the accounting for debt issuance costs related to line-of-credit arrangements as an asset and subsequently amortized over the term of the arrangements. The guidance becomes effective for financial statements issued for fiscal years beginning January 1, 2016, with early adoption permitted. We do not believe the adoption of this guidance will have a material impact on the consolidated financial position of the Company.

In May 2014, the FASB issued ASU 2014-09, to ASC 606 "Revenue from Contracts with Customers." ASU 2014-09 provides authoritative guidance clarifying the principles for recognizing revenue and developing a common revenue standard for U.S. GAAP. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. Additionally, the guidance requires improved disclosure to help users of financial statements better understand the nature, amount, timing and uncertainty of revenue that is recognized. The guidance becomes effective for the Company for the

year beginning January 1, 2018. We are currently evaluating the impact the adoption of this guidance will have on the consolidated results of operations, financial position and disclosures.
