SEC rules would otherwise require that the pro forma consolidated financial information not give effect to the transactions described in the tenth bullet above, if any and the use of the proceeds from those transactions. However, in the pro forma financial statements included in this report, we are giving pro forma effect to such transactions as if they occurred in connection with the Acquisition. The pro forma financial information contained in this report has been prepared for our direct parent, Duane Reade Holdings, Inc. and all of its direct and indirect subsidiaries on a consolidated basis.

The unaudited pro forma balance sheet as of September 25, 2004 consists of the historical balance sheet as of September 25, 2004, adjusted to give pro forma effect to the transactions listed in the tenth bullet above, as if such transactions had occurred on September 25, 2004. The unaudited pro forma statements of operations for the fiscal year ended December 27, 2003 and the twelve months and the 39 weeks ended September 25, 2004 give pro forma effect to each of the above items as if it had occurred as of the first day of the fiscal year ended December 27, 2003.

The pro forma adjustments are based on preliminary estimates, available information and certain assumptions that we believe are reasonable and may be revised as additional information becomes available, some of which will be based on third-party appraisals currently being conducted. We fully expect to complete these valuations and the final allocation of the purchase price within the allowable one-year time frame from the completion of the Acquisition. The pro forma adjustments and certain assumptions are described in the accompanying notes.

The unaudited pro forma financial information set forth below should be read in conjunction with our historical financial information and "Management's Discussion and Analysis of Financial Condition and Results of Operations" which are included in documents we have filed with the SEC.

As used in this offering memorandum, Adjusted FIFO EBITDA means earnings before interest, income taxes, depreciation, amortization, expenses related to the Acquisition, labor contingency expense, non-cash charges and credits related to the LIFO inventory valuation method, extraordinary charges and other non-recurring charges. We believe that Adjusted FIFO EBITDA, as presented, represents a useful measure of assessing the performance of our ongoing operating activities, as it reflects our earnings trends without the impact of certain non-cash charges and other non-recurring items. Targets and positive trends in Adjusted FIFO EBITDA are used as performance measures for determining certain compensation of management. Adjusted FIFO EBITDA is also used by some of our creditors in assessing debt covenant compliance.

We understand that, although security analysts frequently use Adjusted FIFO EBITDA in the evaluation of companies, it is not necessarily comparable to other similarly titled captions of other companies due to potential inconsistencies in the method of calculation. Adjusted FIFO EBITDA is not intended as alternative to net income as an indicator of our operating performance, as an alternative to any other measure of performance in conformity with generally accepted accounting principles nor as an alternative to cash flow from operating activities as a measure of liquidity.
