NORTHERN OIL & GAS, INC. Form 8-K April 12, 2010

UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549

FORM 8-K

CURRENT REPORT

Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported): April 12, 2010

NORTHERN OIL AND GAS, INC.

(Exact name of Registrant as specified in its charter)

Nevada 001-33999 95-3848122 (State or other jurisdiction (Commission File Number) (IRS Employer of incorporation) Identification No.)

315 Manitoba Avenue – Suite 200
Wayzata, Minnesota 55391
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code (952) 476-9800

[Missing Graphic Reference]

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

- o Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- o Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17CFR 240.14a-12)
- o Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

SECTION 2 – FINANCIAL INFORMATION

Item 2.02 – Results of Operations and Financial Condition.

On April 12, 2010, Northern Oil and Gas, Inc. (the "Company") provided an operations update related to drilling and completion activity in the Williston Basin Bakken and Three Forks play. In connection with this operations update, the Company also provided information regarding its preliminary financial results for first quarter 2010.

2010 DRILLING ACTIVITY

Since January 1, 2010, the Company has spud 5.15 net wells. Of those wells, 1.76 net wells are currently drilling but have not reached total depth and 2.05 net wells have been drilled to total depth and are awaiting fracture stimulation to commence production. This high number of wells awaiting completion was caused by longer time delays from completion of drilling to commencement of oil sales, primarily due to the seasonal backlog of fracture stimulations that typically occurs in early spring as a result of reduced completion activities during the coldest months in North Dakota.

The Company now expects to spud up to 18 net wells in 2010, which represents an increase from previous guidance of 15 net wells. The Company believes the increase in expected wells is based upon the increasing rig count, which is now at an all-time high of 108 drillings rigs in the North Dakota Bakken play. The Company's Chief Executive Officer, Michael Reger, commented "The pace of drilling in the Bakken and Three Forks plays continues to increase. Given recent announcements by key operators in the plays, we expect 2010 drilling to increase by up to 20% to a total of 18 net Bakken and Three Forks wells."

FIRST QUARTER 2010 PRODUCTION AND PRELIMINARY FINANCIAL RESULTS

The Company's first quarter 2010 production increased approximately 10% and oil and gas sales increased approximately 20% compared to fourth quarter 2009. First quarter 2010 production approximated 125,000 barrels of oil equivalent ("BOE"), an increase from 114,000 BOE in fourth quarter 2009. First quarter 2010 oil and gas sales were approximately \$8.4 million, an increase of approximately 20% from fourth quarter 2009 oil and gas sales of \$6,965,622. First quarter 2010 net earnings are expected to be approximately \$0.03 per outstanding share.

COMPLETION ACTIVITY

The Company has experienced significant delays in fracture stimulation appointments for wells across all operators with whom it participates. The Company believes this trend has been driven primarily by seasonal issues and increased costs of completing during the coldest winter months. Additionally, the Company believes there has been some constraint in moving fracture stimulation supplies, such as frac sand, into the field due to seasonal conditions. The Company expects that for the next quarter delay between fracture stimulation and completion may average as much as six weeks. This is not affecting the pace of drilling and the Company continues to see wells drilled to total depth at an accelerated pace. However, delays in fracture stimulation have the effect of delaying production additions.

RECENT COMPLETION HIGHLIGHTS

The Company continues to believe that early 24 hour rates are not useful in determining the economics of a well. The Company is focused on well payout, which, in its core Slawson Exploration drilling program, the Company expects to occur four months on average following commencement of production. As previously guided, the Company will

begin to report well flow rates as far out as 60 days, when available.

The following table outlines well completions as of April 11, 2010.

SAFE HARBOR

This report contains forward-looking statements regarding future events and our future results that are subject to the safe harbors created under the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act"). All statements other than statements of historical facts included in this report regarding the Company's financial position, business strategy, plans and objectives of management for future operations and industry conditions are forward-looking statements. When used in this report, forward-looking statements are generally accompanied by terms or phrases such as "estimate," "project," "predict," "believe," "expect," "anticipate," "target," "intend," "seek," "goal," "will," "should," "may" or other words and similar expressions that convey the uncertainty of future events or outcomes. Items contemplating or making assumptions about, actual or potential future sales, market size, collaborations, and trends or operating results also constitute such forward-looking statements.

Forward-looking statements involve inherent risks and uncertainties, and important factors (many of which are beyond the Company's control) that could cause actual results to differ materially from those set forth in the forward-looking statements, including the following, general economic or industry conditions, nationally and/or in the communities in which the Company conducts business, changes in the interest rate environment, legislation or regulatory requirements, conditions of the securities markets, our ability to raise capital, changes in accounting principles, policies or guidelines, financial or political instability, acts of war or terrorism, other economic, competitive, governmental, regulatory and technical factors affecting our Company's operations, products, services and prices.

The Company has based these forward-looking statements on its current expectations and assumptions about future events. While the Company's management considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond the Company's control.

A copy of the press release which the Company issued reporting the foregoing information is attached as Exhibit 99.1. The information in this Item 2.02, and the press release attached hereto as Exhibit 99.1, shall be deemed to be "filed" under the Securities Exchange Act of 1934, as amended.
