(Mark One)

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE FISCAL YEAR ENDED MARCH 31, 2006

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission file number: 001-31823

RINKER GROUP LIMITED

ABN 53 003 433 118

(Exact name of Registrant as specified in its charter)

New South Wales, Australia

(Jurisdiction of incorporation or organization)

Level 8, Tower B, 799 Pacific Highway, Chatswood, NSW 2067, Australia

(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Ordinary Shares(1)	New York Stock Exchange
American Depositary Shares(2)	New York Stock Exchange

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

Edgar Filing: RINKER GROUP LTD - Form 20-F

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the Annual report:

Ordinary shares, fully paid 910,116,219

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which financial statement item the registrant has elected to follow

Edgar Filing: RINKER GROUP LTD - Form 20-F

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

(1) Not for trading but only in connection with the listing of the American Depositary Shares.

(2) Evidenced by American Depositary Receipts, each American Depositary Share representing five Ordinary Shares.

Australian Adoption of Australian Equivalents to International Financial Reporting Standards

Rinker has adopted Australian Equivalents to International Financial Reporting Standards (A-IFRS) for its current fiscal year ended March 31, 2006. Accordingly, Rinker's accounting policies have now been amended to ensure consistency with A-IFRS and results shown for fiscal year 2006 have been prepared under those A-IFRS accounting policies.

In addition, results shown for the year ended March 31, 2005 have been restated to be comparable to the current year.

The principal impact of A-IFRS on reported results is the reduction in goodwill amortization expense to zero. Prior to the adoption of A-IFRS Rinker's goodwill amortization expense during the year ended March 31, 2005 was US\$56.3 million. Additional information is included in Note 1 in the financial statements included elsewhere in this annual report.

Compliance with A-IFRS ensures compliance with International Financial Reporting Standards.

Certain definitions

The fiscal year for Rinker ends on March 31. As used throughout this annual report, unless otherwise stated or the context otherwise requires, the fiscal year ended March 31, 2006 is referred to as fiscal year 2006 and other fiscal years are referred to in a corresponding manner. All other references to years are specified and relate to calendar years.

References to tonnes herein are to metric tonnes, each of which equals approximately 2,205 pounds or 1.102 short tons. Certain measures of distance referred to herein are stated in kilometers, each of which equals approximately 0.62 miles. Certain measures of area referred to herein are stated in square kilometers or hectares; one square kilometer equals 0.3861 square miles and one hectare equals 2.47 acres. Certain measures of volume referred to herein are stated in cubic meters, each of which equals approximately 1.31 cubic yard.

Estimates with respect to market size information represent the judgment of the management of Rinker, based on records and experience of Rinker and its subsidiaries as well as information available from industry and government publications and other sources.

Any discrepancies between totals and sums of components in tables contained in this annual report are due to rounding.

Unless otherwise indicated, all references in this annual report to:

Edgar Filing: RINKER GROUP LTD - Form 20-F

A-IFRS means Australian equivalents to International Financial Reporting Standards, which are currently the accounting principles generally accepted in Australia.

ADR means American Depositary Receipt, evidencing American Depositary Shares.

American Depositary Shares or ADSs each represent five ordinary shares.

associate or associated company means in relation to Rinker, an entity other than a consolidated entity, where Rinker has the capacity to influence significantly the financial and operating policies of the entity.

ASX means the Australian Stock Exchange.

Edgar Filing: RINKER GROUP LTD - Form 20-F

consolidated entity, means an entity that Rinker is required to consolidate within the financial statements.

Consolidated means, in relation to the financial statements for the year ended March 31, 2006 and 2005, the consolidated financial statements for Rinker Group Limited and controlled entities.

CSR means CSR Limited, ABN 90 000 001 276, an Australian company.

CSR group means CSR and the entities that CSR must consolidate under A-IFRS.

EBIT means profit before finance and income tax expense in accordance with A-IFRS.

finance means borrowing costs net of interest income.

financial statements means: (i) the audited consolidated balance sheets of the Rinker group as at March 31, 2006 and 2005; and (ii) the audited consolidated income statements, statements of recognized income and expense, and cashflow statements of the Rinker group for each of the one-year periods ended March 31 for the years 2006 and 2005, together with accompanying notes included herein at pages F-1 to F-63.

fiscal year means financial year ended March 31.

GST means Australian goods and services tax.

hedge settlement rate means the 9:55 a.m. hedge settlement rate compiled by the Australian Financial Markets Association at the end of each month in the period, as displayed on the Reuters financial news service.

heritage business means the business excluding all acquisitions that have not been included in Rinker group companies prior year operations for the full prior fiscal year.

Kiewit means Rinker Materials Western, Inc. (formerly known as Kiewit Materials Company), a company incorporated in Delaware, and its subsidiaries, which was acquired by Rinker Materials in September 2002.

Edgar Filing: RINKER GROUP LTD - Form 20-F

NYSE means the New York Stock Exchange.

ordinary shares means fully paid ordinary shares in the issued capital of Rinker.

Readymix means Rinker Australia Pty Limited, ABN 87 099 732 297, an Australian corporation, and its subsidiaries.

Rinker means Rinker Group Limited, ABN 53 003 433 118, an Australian corporation.

Rinker Materials means Rinker Materials Corporation, a company incorporated in Georgia, and its subsidiaries.

Rinker group means Rinker and its consolidated entities.

SEC means the Securities and Exchange Commission.

Superseded Australian GAAP means accounting principles accepted in Australia, prior to the adoption of A-IFRS.

trading revenue means revenue received from customers (net of discounts, returns and allowances), including fees for services as agent, rents and royalties.

US GAAP means accounting principles generally accepted in the United States of America.

Where you can find more information about Rinker Group Limited

Rinker is subject to the reporting obligations contained in the Securities Exchange Act of 1934. You may read and copy any document that Rinker files at the SEC's public reference room located at 100 F Street, N.E., Washington, D.C. 20549. Rinker's filings with the SEC are available over the Internet at the SEC's website at www.sec.gov. Copies of these filings can also be obtained from Rinker upon request. Requests should be directed to Rinker Group Limited, Level 8, Tower B, 799 Pacific Highway, Chatswood, New South Wales 2067, Australia; Attention: Investor Relations. Telephone requests may be directed to the attention of Investor Relations at +61 2 9412 6608.

Forward-Looking Statements

This annual report contains a number of forward-looking statements. Such statements can be identified by the use of forward-looking words such as may, should, expect, anticipate, estimate, scheduled or continue or the negative thereof or comparable terminology. Rinker cannot provide assurances that the expected impact on financial condition, anticipated trading results or returns of entities in the Rinker group would not differ materially from the statements contained in this annual report.

Such forward-looking statements are not guarantees of future results or performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Rinker, which may cause actual results of the Rinker group or industry results to differ materially from those expressed or implied in the statements contained in this annual report. Such factors include, among other things, the following:

general economic and business conditions in the United States (including the regional economies within the United States) and Australia;

trends and business conditions in the United States and Australian building and construction industries;

changes in interest rates;

competition from other suppliers in the industries in which the Rinker group operates;

changes in the Rinker group's strategies and plans regarding acquisitions, dispositions and business development;

the Rinker group's ability to efficiently integrate past and future acquisitions;

compliance with, and potential changes to, governmental regulations related to the environment, employee safety and welfare and other matters related to the entities of the Rinker group; and

changes in exchange rates, in particular the rate of exchange between United States dollars and Australian dollars.

The foregoing list of factors is not exhaustive. When relying on forward-looking statements to make decisions with respect to investing in Rinker shares, a potential investor should carefully consider the foregoing factors and other uncertainties and potential events. Rinker does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by Rinker or on Rinker's behalf. For a discussion of certain of these factors, see Item 3.D. - Risk Factors, and see also Item 3. - Key Information, Item 4. - Information on the Rinker group, Item 5. - Operating and Financial Review and Prospects, Item 8. - Financial Information and Item 11. - Quantitative and Qualitative Disclosures about Market Risks.

PART I

Item 1 Identity of Directors, Senior Management and Advisors

Not applicable.

Item 2 Offer Statistics and Expected Timetable

Not applicable.

Item 3 Key Information

Currency of Presentation and Exchange Rates

Rinker Materials maintains its financial records in US dollars and Readymix maintains its financial records in Australian dollars. Under A-IFRS, Rinker's presentation currency is US\$, although Rinker intends to continue to disclose Readymix results in both US\$ and A\$. In this annual report, unless otherwise specified herein or the context requires, references to US\$ or US dollars are to United States dollars and references to A\$ or Australian dollars are to Australian dollars.

For the year ended March 31, 2006, around 80% of the Rinker group's trading revenue was generated by Rinker Materials in the United States. For the years ended March 31, 2006 and 2005 there were virtually no movements of currency between US dollars and Australian dollars that resulted in a material amount of realized exchange gains or losses. As a result, the only significant impact of changes in the US dollar/Australian

Edgar Filing: RINKER GROUP LTD - Form 20-F

dollar exchange rate is one of accounting translation for financial reporting purposes. An appreciation of the A\$ relative to the US\$ would be expected to have a favorable impact on the Rinker group's reported US\$ results.

The directors believe that the best measure of performance for Rinker Materials in the United States and Readymix in Australia is their respective local currencies in as much as each generates all revenue and incurs all costs in that local currency. Set out below is selected financial data for the Rinker group in US dollars.

For the purposes of this annual report, A\$ transactions are translated into US\$ at the average of the hedge settlement rate at the end of each month in the period presented and A\$ balances are translated into US\$ at the hedge settlement rate at fiscal year end, consistent with the requirements of A-IFRS and US GAAP.

Edgar Filing: RINKER GROUP LTD - Form 20-F

The following are the average of the monthly rates expressed in US dollars per A\$1.00 that have been used to translate Readymix A\$ transaction amounts in this annual report:

Year ended March 31, 2006	0.7471
Year ended March 31, 2005	0.7357

Unless otherwise stated the following year-end rates, expressed in US dollars per A\$1.00 have been used to translate Readymix A\$ balances at March 31 into US dollars in this annual report:

March 31, 2006	0.7155
March 31, 2005	0.7713

The Australian dollar is convertible into United States dollars at freely floating rates and there are currently no restrictions on the flow of Australian currency between Australia and the United States.

A. Selected Financial Data

The following table presents selected financial data of the Rinker group in United States dollars. This table should be read in conjunction with Item 5. - Operating and Financial Review and Prospects, and the audited financial statements that are included elsewhere in this annual report.

The US GAAP financial statements and other information for the fiscal years ended March 31, 2003 and 2002 have been prepared on a carve-out basis and include the balance sheet, income statement and cash flows of Rinker Materials US businesses and the Readymix businesses that were transferred to the Rinker group from CSR prior to the demerger of Rinker group from CSR effective March 28, 2003. These financial statements have been prepared from historical accounting records of the CSR group and present all of the operations of the business as if the Rinker group had been a separate economic entity inclusive of all of these businesses for all periods presented. The historical financial information presented for fiscal years prior to 2004 is not indicative of the Rinker group's future financial performance.

The balance sheet data as of March 31, 2006 and 2005 and income statement data for the years ended March 31, 2006 and 2005, set forth below are derived from, and are qualified in their entirety by reference to, the Rinker group's audited financial statements that are included elsewhere in this annual report. With respect to the US GAAP selected financial data, information for the Rinker group is provided for fiscal years 2006, 2005, 2004, 2003 and 2002.

The Rinker group's financial statements are prepared in accordance with A-IFRS, which differs in certain material respects from US GAAP. See Note 40 to the financial statements that are included elsewhere in this annual report for a description of the principal differences between A-IFRS and US GAAP as they relate to the Rinker group and a reconciliation of net profit and shareholders' equity for the years and as at the dates therein indicated.

A. Selected Financial Data

Edgar Filing: RINKER GROUP LTD - Form 20-F

As permitted by SEC Form 20-F, historical data for fiscal year 2004 and prior fiscal years has not been prepared under A-IFRS and therefore has not been presented for comparative purposes.

		As of and for the year ended March 31 in \$ millions except number of shares, per share data and employees

Basic earnings (US dollars) per share	(6) (7)	0.80	0.52	0.37	0.27	0.18
Diluted earnings (US dollars) per share	(6) (7)	0.80	0.52	0.37	0.27	0.18
Dividends provided for or paid per share	(3)	0.21	0.11	0.09	0.01	

(1) Throughout this annual report EBIT means profit before finance and income tax expense in accordance with A-IFRS.

(2) Income from continuing operations is the same as net profit attributable to members of Rinker, and income from continuing operations per share is the same as basic earnings per share.

(3) Dividends shown for 2006, 2005 and 2004 represent the amounts provided for. The dividends in 2003 represent amounts paid to CSR when Rinker was a wholly owned subsidiary. Dividend per share information for fiscal years 2003 and 2002 has therefore been based on the 944.7 million shares issued and outstanding subsequent to the demerger. These amounts are not necessarily representative of the amounts that would have been paid if Rinker had been a separate publicly listed company.

(4) Operating capital expenditure represents capital expenditure required to maintain existing operating capabilities.

(5) Development capital expenditure represents capital expenditure to acquire businesses, expand operating capabilities and extend market coverage.

(6) As a result of the demerger from CSR, 944.7 million Rinker ordinary shares were listed on the ASX on March 31, 2003 (on a deferred settlement basis), prior to being issued on April 11, 2003. Prior to that time Rinker was a 100% owned subsidiary of CSR. The weighted average number of ordinary shares assumes that same number of shares existed throughout fiscal years 2003 and 2002.

(7) During the year ended March 31, 2005 Rinker issued 0.2 million shares as part of the Employee Universal Share Plan USP . During the year ended March 31, 2006, Rinker purchased 31.1 million shares as part of an on-market buy-back. See Item 16E Purchase of Equity Securities by the Issuer and Affiliated Purchasers for further details.

B. Capitalization and Indebtedness

Not applicable.

C. Reasons for the Offer and Use of Proceeds

Not applicable.

D. Risk Factors

Rinker group entities are subject to various risks resulting from changing economic, political, social, industry, business and financial conditions, particularly in the United States and Australia. Certain of these risks are described below. Rinker group entities could also be subject to other risks that management has not anticipated.

Rinker group s operations are dependent to a significant extent on demand across the construction industry economic cycle and the Rinker group s revenues and profits in future periods may fluctuate with that cycle.

The activity of businesses in the Rinker group is dependent on the level of activity in the construction industry in the various regional markets in the United States and in Australia where Rinker group companies operate. The construction industry in a given geographic market has historically tended to be cyclical. Within each geographic region construction industry spending can vary significantly from peak to trough through the business cycle. The construction industry is also very sensitive to fluctuations in general economic activity in the particular economy. Rinker estimates that a 1% revenue change related to volumes across the Rinker group as a whole, without regard to the different cycles within each industry, region, or market, would have an annual impact on revenue of approximately US\$51 million and on EBIT of approximately US\$12 million. Rinker is not able to predict the timing, extent or duration of the business cycles or economic downturns in the construction industry in the geographic regions in which Rinker group companies operate.

Because many of Rinker group s costs are fixed, if an extended downturn in one or more segments of the construction industry occurs, particularly in Florida or Arizona in the US or in Australia, companies in the Rinker group may not readily be able to reduce their costs in proportion to the extent of the downturn. Any significant or extended downturn in the construction industry in those geographic regions will negatively affect the Rinker group s financial performance and condition where revenues fail to grow or fall and costs do not move to compensate. An overview of the United States and Australian markets is included in Item 4 Information on the Rinker group .

The Rinker group s operations are dependent to a significant extent on demand in selected key US states and the Rinker group s revenues and hence profits in future periods may fluctuate with the underlying industry economic cycle of those states.

A significant proportion of the Rinker group s revenue was generated from Florida (44%) and Arizona (13%) in the year ended March 31, 2006. As a result, fluctuations in the underlying economic cycle may result in variations in EBIT in similar proportion to the overall margin impact on Rinker as previously described for the construction industry cycle. The Rinker group is especially dependent on market demand for its heavy building materials products in those markets. A downturn in demand in the residential or other heavy building materials markets in these states could have a significant adverse impact on the Rinker group s financial performance and condition where revenues fail to grow or fall and costs do not move to compensate. Any adverse impacts on the Florida economy arising from the cessation or significant restriction of quarrying operations in the Lake Belt could also have a material adverse effect on Rinker. See Legal Proceedings in Item 8.A. Consolidated Statements and Other Financial Information on page 120.

Government funded construction activity in the US may be lower in future periods and the Rinker group s revenues and profits in future periods may fluctuate depending on the level of Government funding of civil construction.

The Rinker group s largest exposure to the US civil construction sector is in roads, highways and bridges. Approximately 13% of the Rinker group s revenue for the year ended March 31, 2006 is estimated to be related to the US civil construction sector. Any significant decrease in future US federal or state infrastructure funding levels may negatively affect the Rinker group s financial performance and condition where revenues fall and costs do not move to compensate.

Rinker group's operations depend on securing and permitting aggregate reserves that can be supplied economically to growing markets.

Construction aggregates are bulky and the cost to transport may surpass the cost of material. Generally, aggregate is supplied from local quarries. New quarry sites often take a number of years to develop and must be planned well in advance. As communities grow, existing quarry locations may be depleted, or quarry production may be restricted by additional regulation and some of the most attractive sites for new quarries may be used for other building, or may be difficult to permit for quarrying. To meet forecasted needs, Rinker's strategy is to secure additional land and permits in target markets where possible, and to develop the distribution network to transport aggregates by truck, rail and water in order to maintain economic sources of supply. Certain quarry permits in South Florida are currently being challenged. See Legal Proceedings in Item 8.A. Consolidated Statements and Other Financial Information on page 120.

The Rinker group has grown significantly through acquisitions and may be unable to continue its growth by this means if suitable opportunities cannot be identified. The Rinker group's performance is also affected by its ability to integrate any acquisitions into its existing operations.

The Rinker group has grown significantly in recent years through a series of bolt on acquisitions, the most recent major acquisition being Kiewit in September 2002. A key element of the Rinker group's growth strategy is to continue its acquisition strategy. The Rinker group's ability to realize benefits from future acquisitions depends, in large part, on its ability to integrate the acquired businesses with its existing operations in a timely and effective manner. The Rinker group's efforts to integrate any future acquisitions may not be successful. The Rinker group's acquisition strategy also depends on its ability to identify and acquire suitable assets at desirable prices. The Rinker group may not be successful in identifying or acquiring suitable assets at acceptable prices in the future. To the extent the Rinker group fails to be successful in acquiring suitable assets at acceptable prices in the future, it is unlikely to be able to continue to grow its earnings at the same rate as it has done in the recent past.

Rinker may need to pay for all or part of the purchase price for any future acquisitions with its ordinary shares. These acquisitions and investments, if they were to occur, could have a diluting effect for Rinker's shareholders and, whether they are paid for in cash or Rinker shares may cause Rinker's share price to decrease.

The Rinker group may be affected by problems in previously acquired businesses or newly constructed plants. Unforeseen problems may impact future profits.

The Rinker group has completed a number of significant acquisitions and plant construction projects as detailed in Item 4 Information on the Rinker group. The Rinker group may not have anticipated all problems of acquired businesses and plant construction, and losses associated with these acquisitions or projects may come to light prior to the expiration of any warranty and indemnity protections, or the Rinker group may be unable to enforce such provisions against the parties making the indemnities. If problems arise they may impact the Rinker group's future profit if the Rinker group is required to extinguish unforeseen liabilities or there is significant impairment of assets requiring write down at some future date.

The Rinker group may be subject to competition from existing and new market entrants and products, which could impact future revenues and profits.

Each market in which Rinker group companies operate is highly competitive. The competitive environment can be significantly affected by a number of regional factors, such as the number of competitors, production capacity, economic conditions and product demand in the relevant regional market. The pricing policies of competitors and the entry of new competitors into the regional markets in which Rinker group companies operate can have an adverse effect on demand for their products and on

their financial performance or condition where revenues fail to grow or fall and profit margins are reduced.

Rinker group companies face competition from alternative products. For example, the concrete pipe products operations of Rinker Materials and Readymix face competition from plastic, metal and fiber cement pipe products in the smaller diameter size segment of the market. Product substitution of alternative materials for Rinker group products may have an adverse effect on the Rinker group's financial performance or condition where revenues fail to grow or fall and profit margins are reduced. In many markets in which the Rinker group operates there are no significant entry barriers that would prevent new competitors from entering the market or existing competitors from expanding in the market.

Rinker group entities are subject to extensive health, environmental, land use, and other governmental laws and regulations, which could have an impact on the Rinker group's future financial performance.

Rinker group entities are subject to extensive health, environmental, land use, and other governmental laws and regulations and increasing regulatory compliance requirements. Depending on the extent of future regulations that may be enacted, Rinker group entities may be required to invest in preventive or remedial action, which could be significant, in which case it could have an adverse impact on the Rinker group's financial performance and condition.

Tighter land use or zoning restrictions affecting existing quarry permits or making new quarry permits more difficult to obtain could also restrict the ability of companies in the Rinker group to conduct their businesses economically or restrict some activities altogether. Legal challenges to existing permits could restrict the ability of the Rinker group to utilize existing quarry reserves. See Legal Proceedings in Item 8.A. Consolidated Statements and Other Financial Information on page 120 for a discussion of a challenge to certain permits issued in South Florida.

Environmental liabilities, if incurred, could have an adverse impact on the Rinker group's financial performance and condition. Stricter environmental laws and regulations, or stricter interpretation and enforcement of existing laws or regulations, may impose new liabilities on Rinker group companies or result in the need for additional investments in pollution control equipment, either of which could result in a decline in the Rinker group's profitability. Further details regarding environmental regulation and certain liability issues affecting companies within the Rinker group are contained in section Item 4 Information on the Rinker group.

Occupational health and safety risks and regulations may have an impact on future productivity and financial performance.

Rinker group entities are subject to the operating risks associated with construction materials and other manufacturing and handling risks, including the related storage and transportation of raw materials, products and wastes. These hazards include storage tank leaks and ruptures, explosions, discharges or releases of hazardous substances, manual handling, exposure to dust and the operation of mobile equipment and manufacturing machinery.

Such operating risks can cause personal injury and property damage, and may result in the imposition of civil or criminal penalties. The occurrence of any of these events may have an adverse effect on the productivity and profitability of a particular manufacturing facility and the operating results of Rinker group entities through increased costs or reduced operating flexibility and productivity.

Crystalline silica dust and its control have been identified as an occupational health issue in Rinker group entities operations in Australia and in the US. Rinker group entities use raw materials containing

silica in cement manufacturing, concrete plants, concrete products plants and asphalt plants. Many quarry products also contain silica. Rinker group entities may face future costs of engineering and compliance to meet new standards relating to crystalline silica since regulatory agencies in Australia and the US are re-examining existing standards and considering stricter exposure limits. Rinker group entities cannot reliably quantify future claims related to crystalline silica. Any future claims could have an impact on the Rinker group's profitability.

Labor disputes between Rinker group companies and unions could disrupt operations that could have an impact on the Rinker group's future financial performance.

Approximately forty percent of Rinker Materials' employees and approximately thirty per cent of Readymix employees are covered by bargaining agreements which periodically come up for renegotiation and renewal. In the next twelve months, 11 contracts, covering approximately 700 employees, are scheduled to expire in the United States. In Readymix, Australia, 18 agreements are due to be renegotiated in the next twelve months covering approximately 600 employees.

Disputes with trade unions could lead to strikes or other forms of industrial action that could disrupt operations within the Rinker group, raise costs and reduce Rinker group's revenues and profits. Any such disruptions to operations within the Rinker group may adversely affect the group's financial performance and condition through increased costs and reduced productivity.

The Rinker group may face potential liability for defective products, which could have an impact on future profits.

Due to the nature of its operations, claims against Rinker group entities could arise from defects in material or products manufactured and/or supplied by Rinker group entities. Purchasers and third parties could make claims against Rinker group entities based on their delivery of defective materials or products, or for damage or loss arising from the use of these defective materials or products. If any claims of this type are determined against Rinker group entities and if the Rinker group's existing insurance arrangements do not cover the liability, it could have an adverse effect on the financial performance and condition of the Rinker group due to increased rectification costs or liability for compensation.

Antitrust (trade practices) risks may restrict the Rinker group's business activities and its ability to grow.

Rinker group entities are subject to antitrust or trade practices laws. Antitrust or competition considerations may restrict business activities within the Rinker group and the ability to grow through acquisitions or participate in industry rationalization in particular geographic markets. This could have an adverse impact on the Rinker group's financial performance where revenues fail to grow or fall and/or profit margins are reduced.

Operation and supply failures or shortages could have an impact on the Rinker group's future revenues and profits.

The manufacturing facilities and supply of finished products to customers of Rinker group entities could be disrupted for reasons beyond their control. These disruptions include extremes of weather, fire, natural catastrophes, supplies of materials, transport logistics, services, energy or fuel, system failures, workforce actions or environmental issues. Any significant disruptions or shortages could adversely affect Rinker group entities' ability to make, sell and deliver products, which could cause revenues to decline or costs to increase and result in lower profits.

Rinker group entities may be required to provide further funds to cover the defined benefit obligations of those superannuation (pension) funds in which it participates.

Superannuation (pension) funds in which Rinker group entities participate provide both defined benefits and accumulation benefits. Any funding deficits are intended to be funded progressively by Rinker group entities and all minimum funding requirements have currently been satisfied. The estimated liability for the total defined benefit obligation, including the US\$25.7 million funding deficit for US plans under A-IFRS, is accrued on the balance sheet. There is a risk that, in the future, changes in the value of the funds' assets, changes in actuarial determinations of the funds' liabilities or changes to government legislation could require Rinker group entities to increase their current level of contributions to these funds and adversely impact financial performance. Details of Rinker group entities' defined benefit plans are included in Item 5.H. Details of defined benefit pension plans .

The Rinker group could be affected by interest rate fluctuations. If interest rates rise, borrowing costs may be higher, and higher interest rates may adversely affect construction activity levels.

The Rinker group's external borrowings at March 31, 2006 were US\$651 million of which, prior to the effect of interest rate swaps, approximately US\$356 million or 55% was paying interest at fixed rates. Taking into account around US\$250 million of variable to fixed rate interest rate swaps in place at March 31, 2006, the Rinker group's net fixed interest rate borrowings were approximately US\$606 million or 93% of gross debt. Accordingly, movements in interest rates may impact the Rinker group's debt servicing obligations and borrowing costs, impacting its financial performance. Rinker estimates that based on the amount of its outstanding indebtedness at March 31, 2006, a 1% increase in variable interest rates would have had an insignificant adverse impact on the Rinker group's net profit for the year ended March 31, 2006.

An increase in interest rates may reduce construction activity levels within both the residential and commercial segments of the market. This could have an adverse impact on the Rinker group's financial performance where revenues fail to grow or fall and costs do not move to compensate. Details on interest rate risks are included in Item 11 - Quantitative and Qualitative Disclosure about Market Risks.

General risks associated with investing in shares may impact the value of Rinker shares and ADRs.

The price of Rinker ordinary shares and ADRs is subject to many influences that may affect the broad trend in the stock market or the share prices of individual companies. The price at which Rinker ordinary shares trade on ASX and at which Rinker ADRs trade on NYSE may be affected by a number of factors unrelated to the Rinker group's financial and operating performance and over which Rinker has no control. Factors such as currency exchange rates, product prices, the level of industrial production, changes in government fiscal, monetary and regulatory policy, investor attitudes, stock market fluctuations in Australia and other stock markets around the world, changes in interest rates and inflation, and variations in general market or economic conditions could all have an adverse effect on the price of Rinker ordinary shares and ADRs.

E. Supplementary Information - Australian Dollar/Exchange Rates

Currency of Presentation and Exchange Rates

Rinker's US and Australian subsidiaries each generate virtually all revenue and incur all costs in their local currency. As a result, directors believe their performance is best measured in their local currency. At the group level, Rinker Materials represents around 80% of earnings. As a result, US\$ performance represents the most appropriate measure of Rinker's performance and value. Under A-IFRS, Rinker's

Edgar Filing: RINKER GROUP LTD - Form 20-F

selected reporting currency is US\$, although Rinker group intends to continue to disclose Readymix results in both US\$ and A\$.

Readymix Australian dollar results are translated to US dollar presentation currency using the principles set out in AASB 121 The Effects of Foreign Exchange Rates. Assets and liabilities are translated at the closing rate and income/expense items are translated using an average rate (the closing rate for the month the transactions occurred). All foreign currency translation adjustments are taken directly to equity through foreign currency translation reserve. The financial statements of the parent entity (Rinker Group Limited) have been translated into United States dollars using the methodology described above. This is consistent with both Australian Accounting Standard AASB 121 The Effects of Changes in Foreign Exchange Rates and SEC Rule 3-20(d) of Regulation S-X. The exchange rate used is the Australian 9:55 a.m. hedge settlement rate at the end of each month.

The following table sets forth, for each of the Rinker group's fiscal years indicated and for the most recent months, the high, low, average and period-end Noon Buying Rates for Australian dollars expressed in United States dollars per A\$1.00.

Year ended March 31	At Period End	Average Rate(1)	High	Low
2005	0.7729	0.7423	0.7974	0.6840
2006	0.7165	0.7531	0.7834	0.7056
<u>Month of</u>				
December, 2005	0.7342	0.7423	0.7567	0.7261
January, 2006	0.7572	0.7505	0.7572	0.7379
February, 2006	0.7430	0.7418	0.7548	0.7363
March, 2006	0.7165	0.7266	0.7458	0.7056
April, 2006	0.7593	0.7369	0.7593	0.7177
May, 2006 (to May 11)	0.7781	0.7705	0.7781	0.7607

(1) The average of the Noon Buying Rates on the last day of each month during the year or the average for each day of the month as applicable.

On May 11, 2006, the Noon Buying Rate was A\$1.00 = US\$0.7781.

The Australian dollar is convertible into United States dollars at freely floating rates and there are currently no restrictions on the flow of Australian currency between Australia and the United States.

Item 4 Information on the Rinker group

Estimates with respect to market size information represent the judgment of the management of Rinker, based on records and experience of Rinker and its subsidiaries, as well as information available from industry and government publications and other sources.

A. History and Development of the Rinker group

Background

Rinker (formerly HBM International Limited which was formerly CSR Investments Overseas Limited) was incorporated under the laws of the Commonwealth of Australia on December 23, 1987 and operates under the Corporations Act 2001. From incorporation to the date of the demerger, Rinker operated as a 100% owned subsidiary of CSR, holding principally the CSR group's non-Australian interests.

On March 28, 2003, the Federal Court of Australia approved the demerger of Rinker from CSR. On March 31, 2003, Rinker ordinary shares commenced trading on the ASX (on a deferred settlement basis). In accordance with the terms of the demerger, Rinker issued 944.7 million ordinary shares on April 11, 2003.

The effect of the demerger resulted in Rinker owning the ordinary shares of Rinker Materials and Readymix and becoming a separate company listed on the ASX. As at March 31, 2006 the Rinker group had total assets of US\$4,457 million and generated trading revenue of US\$5,108 million in the year ended March 31, 2006.

Rinker has its registered office at Level 8, Tower B, 799 Pacific Highway, Chatswood, NSW 2067, Australia, telephone (61-2) 9412 6600.

General

Rinker group companies are leading manufacturers and suppliers by revenue of heavy building materials in the US and Australia, based on published financial data of the Rinker group's competitors. In the US, Rinker's subsidiary Rinker Materials is one of the largest producers of heavy building materials, also based on published financial data of Rinker Materials' competitors, with its principal operations in Florida and Arizona, and additional operations in 27 other states. Products include aggregate, cement, concrete, concrete block, asphalt and concrete pipe. Rinker Materials also has a gypsum wallboard distribution business in Florida. Since 1998, the Rinker group has grown through a number of acquisitions, in particular through the following acquisitions by Rinker Materials:

American Limestone Company	US\$211 million	June 2000
Florida Crushed Stone Company	US\$348 million	July 2000
Kiewit Materials Company	US\$540 million	September 2002

During the year ended March 31, 2005 Rinker Materials divested its non-core Prestress and Polypipe polyethylene pipe businesses for total cash proceeds of US\$100 million.

Edgar Filing: RINKER GROUP LTD - Form 20-F

In Australia, Rinker's subsidiary Readymix is one of the leading producers of aggregate, concrete, concrete pipe and other concrete products, based on Readymix's knowledge of the industry. Readymix also holds a substantial joint venture interest in an Australian cement manufacturer. In China, Readymix operates four concrete plants in the northern cities of Tianjin and Qingdao.

During the year ended March 31, 2006 Readymix divested its non-core 50% joint venture interest in the Emoleum asphalt and road pavement maintenance business. Readymix has retained a long term aggregate supply contract with the purchaser, a subsidiary of Downer EDI Limited.

At March 31, 2006 commitments for capital expenditure totaled US\$63.8 million.

Rinker is not directly or indirectly controlled by another corporation or by any foreign government and does not know of any arrangement the operation of which may at a subsequent date result in a change of control of Rinker.

The chart above provides an overview of Rinker group companies' operations.

Business Strategy

The Rinker group aims to be in the top quartile of its construction materials industry peers with respect to growth in revenue, profits and shareholder value, and to deliver top quartile shareholder returns. Rinker group companies' strategies to achieve these goals include:

Achieving the number one or number two market position in each market served in the US

Edgar Filing: RINKER GROUP LTD - Form 20-F

The management of Rinker believes that performance is enhanced by holding the number one or number two position by market share in terms of revenue in all of the markets it serves. Rinker group companies have applied this strategy in most of their acquisitions. A substantial portion of its revenue is now generated in markets where it has leading positions. If this objective is not met after specific plans to achieve it have been implemented, the relevant business may be considered for divestment.

Overall cost leadership

Companies in the Rinker group aim to hold cost leadership positions in the majority of their markets. Rinker group companies aim to instill a culture of continuous improvement through the benchmarking of performance against competitors as well as the implementation of operational improvement projects. Businesses within the Rinker group have a track record of generating significant cost savings with total estimated savings from these initiatives for the year ended March 31, 2006 of US\$52 million.

Continued growth through acquisitions

Rinker has grown significantly in recent years through regional and bolt-on acquisitions (acquisitions of businesses which thereafter share existing administration, supply and distribution arrangements).

The Rinker group's acquisition growth strategy is to:

Hold or develop the number one or number two positions by market share in terms of revenue, in each region, with a focus on Rinker Materials' growth in US states where population growth is above the national average;

Focus on the acquisition of quarry operations in new regions with the acquisition of integrated operations considered on a case by case basis;

Consider acquisitions, such as concrete, cement and asphalt, to create vertically integrated operations, in markets where Rinker group companies have quarry operations; and

Consider small, value adding expansion opportunities in Australia, and in concrete pipe and gypsum distribution in the US.

Rinker Materials is expected to use its regional presence in the south east and western US to pursue bolt-on acquisitions with the current objective of investing an average of US\$300 million a year on acquisitions and greenfields expansion. The Rinker group continues to pursue potential major acquisitions which can generate a positive return for shareholders.

A safe workplace

Rinker group companies recognize that good safety performance is an integral part of good business performance. The Rinker group is focused on improving the safety of its companies' workplaces in the interests of all stakeholders. Rinker group companies' policies and approaches to managing health and safety are based on the key principles of management accountability, personal responsibility and training.

B. Business Overview

1. Introduction

Business segments are reported along geographic lines (Rinker Materials in the United States and Readymix in Australia and China) and within the United States, along product lines. The business segments for Rinker Materials are Aggregate; Cement; Concrete, concrete block and asphalt; Concrete pipe and products; and Other. Readymix is one segment. These segments are the same as those used for internal management as the basis for making decisions regarding the allocation of resources.

B. Business Overview

Rinker Materials business segments:

Aggregate: Rinker Materials extracts aggregate, which is crushed and sized for delivery to customers, primarily for use in the production of concrete, roadbase and asphalt. Rinker Materials' principal operations are in Florida and Arizona. Overall, Rinker Materials is the fifth largest supplier of aggregate in the US, based on US Geological Survey production output data, with 89 quarries, sand and aggregate plant operations. Rinker Materials is a market leader, as measured by production, in Florida and Arizona. Rinker Materials supplied about 101 million tons of aggregate for the year ended March 31, 2006. For the year ended March 31, 2006, Rinker Materials' estimated end markets for aggregate by trading revenue were about 40% residential and the balance equally divided between commercial and civil construction.

Cement: Cement is produced through a highly capital intensive process with limestone as the major raw material. Rinker Materials is the leading cement supplier in Florida in terms of volume sold,

based on the Portland Cement Association's production output statistics collected for the industry, operating two plants, which produced about 2.1 million tons for the year ended March 31, 2006. Rinker Materials also has two strategically located cement import terminals in Florida, which imported 2.1 million tons for the year ended March 31, 2006. For the year ended March 31, 2006, Rinker Materials' estimated external end markets for cement by trading revenue were about 65% residential, 30% commercial and 5% civil construction.

Concrete, concrete block and asphalt: Rinker Materials produces concrete by combining cement, aggregate, water and additives in batch plants for delivery to customers' sites in mixer trucks. Rinker Materials produced about 18 million cubic yards of concrete for the year ended March 31, 2006. Rinker Materials is a market leader in Florida, Arizona and Nevada, based on Rinker Materials' knowledge of the industry, and operated a total of 172 concrete plants at March 31, 2006. For the year ended March 31, 2006, Rinker Materials' estimated end markets for concrete by revenue were about 65% residential, 25% commercial and 10% civil construction.

Rinker Materials produced around 200 million units of concrete block for the year ended March 31, 2006. Concrete block is used for residential and commercial building. Rinker Materials' concrete block operations are principally located in Florida and Nevada, where it was the market leader in terms of production for the year ended March 31, 2006, based on Rinker Materials' knowledge of the industry.

Rinker Materials also produces asphalt, which is used for roads, highways and airports with plants located in Arizona, northern California, Oregon and Washington state.

Concrete pipe and products: Concrete pipe is produced by inserting concrete into a mold, which is subsequently removed. Rinker Materials, through its Concrete Pipe Division, is one of the leading suppliers of reinforced concrete pipe and pre-cast concrete products in the United States, based on Rinker Materials' knowledge of the industry, with production of around 3.7 million tons for the year ended March 31, 2006 from 49 plants located in 22 states. The principal product is concrete pipe, which is used for storm water transmission, sewerage and irrigation. For the year ended March 31, 2006, the estimated end markets for concrete pipe and products by trading revenue were about 45% residential, 20% commercial and 35% civil construction.

Other: This segment includes gypsum supply. The pre-stressed concrete products and polyethylene pipe operations were previously included in this segment and were divested during the year ended March 31, 2005.

Readymix:

In Australia, Readymix operates a vertically integrated heavy building materials business with leading market positions, based on Readymix's knowledge of the industry. As at March 31, 2006, Readymix had 348 operating plants including 84 quarries and sand mines, 247 concrete plants and 17 concrete pipe and product plants. Concrete pipe and products are produced by Readymix's Humes business.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Readymix also holds a 25% interest in Australia's largest cement manufacturer, the Cement Australia joint venture, which has the capacity to produce over three million tonnes of cement a year from three plants in Gladstone, Queensland; Railton, Tasmania; and Kandos, New South Wales. The joint venture was formed on June 1, 2003 with the merger of Australian Cement Holdings (50% Readymix, 50% Hanson Australia Pty Ltd) and Queensland Cement Limited (QCL) (a 100% owned Holcim Ltd subsidiary).

Rinker group trading revenue:

The table below sets out the Rinker group's trading revenues by segment for the fiscal years 2006 and 2005:

		2006	2005
		(Amounts in US \$ millions)	
Rinker Materials, United States	Aggregates	1,074	862
	Cement	487	389
	Concrete, block and asphalt	2,180	1,635
	Concrete pipe and products	576	472
	Other	371	462
	Eliminations(1)	(659)	(501)
	Total Rinker Materials	4,029	3,319
Readymix, Australia and China		1,079	991
Total Rinker group		5,108	4,310

(1) Eliminations represent internal revenue derived from sales by Aggregates and Cement to other segments within Rinker Materials, eliminated on consolidation.

Volumes for all market segments are sensitive to weather conditions, although historically seasonal patterns have not greatly impacted financial results. In the United States, most operations of Rinker Materials are located in regions with relatively mild climates and normal weather patterns that have historically resulted in only slightly higher activity during the first half of the fiscal year (April – September) than the second half (October – March). In Australia, although construction activity slows during the traditional summer holiday period in the months of December and January, this is largely offset by increased volumes during February and March which are historically very busy months.

2. Major Acquisitions

On September 26, 2002, Rinker Materials acquired Kiewit for US\$540 million (net of cash). Kiewit was renamed Rinker Materials Western, Inc. (Rinker Materials West) in fiscal year 2003. Rinker Materials West has significant operations in aggregates, concrete and asphalt in Arizona, representing over 75% of Rinker Materials West revenue for the fiscal year 2006. Other regions in which Rinker Materials West operates include Oregon, Washington state and northern California. These operations market to a wide variety of customers including highway contractors, commercial, industrial and residential contractors, public works contractors, wholesalers and retailers of decorative rock products, interstate railroads and manufacturers of concrete block products.

Similar to Rinker Materials' other operations, Rinker Materials West's operating results are primarily impacted by the level of construction activity in the residential, commercial and civil segments of the construction materials markets where it operates. Rinker Materials estimates that about 55% of Rinker Materials West's revenue was derived from residential construction, 25% from commercial construction, and 20% from civil construction during fiscal year 2006.

Prior acquisitions

The Rinker Materials operations that exist today were built on the substantial integrated quarrying, concrete and cement business in Florida acquired in 1988.

Since 1988, Rinker Materials has made a series of significant acquisitions in addition to Kiewit:

In 1990, it acquired the aggregate, concrete, asphalt and concrete pipe subsidiaries of ARC America Corporation for US\$650 million;

In June and July 2000, it acquired American Limestone Company and Florida Crushed Stone Company, for US\$211 million and US\$348 million, respectively.

3. United States industry overview

Based on data compiled by Dodge, a division of the McGraw-Hill Companies, the US construction and building market was estimated to have been about US\$595 billion in calendar year 2005 (about 5.3% of the US gross domestic product). Dodge figures are based on the put-in-place value of contracts for new construction projects and include the cost of all types of building and construction materials, some of which are not produced by Rinker Materials, and the cost of labor. Put-in-place figures provided by Dodge are based on data Dodge collects at the time of the contract award and allocated over the course of the performance of the contract.

The construction materials industry primarily operates on a regional basis due to significant transportation costs and low value products.

The regional markets for Florida and Arizona are particularly important to Rinker Materials, representing about 56% and 17% of its trading revenue, respectively, for the year ended March 31, 2006. Based on industry and Federal Government statistics, both these markets show high levels of activity and growth compared to national averages.

The construction materials industry comprises three major segments: residential, commercial (non-residential) and civil (non-building). Residential construction includes single and multi-dwelling residential housing. Commercial construction includes office buildings, hotels, shopping malls, sports stadiums, education facilities and hospitals. Civil construction involves the construction of roads, highways, bridges and dams as well as many other infrastructure projects. For calendar year 2005, Dodge estimates that the total value of new construction contracts in the US was residential 58%, commercial 27% and civil 15%. The civil construction activity has been influenced heavily by the Transportation Equity Act for the 21st Century (TEA-21, which covered the 6 year period 1998 to 2003) and the Safe, Accountable, Flexible and Efficient Transportation Equity Act (SAFETEA which covers the 6 year period 2004 to 2009).

The construction market is generally cyclical but with a general upward trend. Based on Dodge estimates, the total value of new construction contracts grew by an annual growth rate of 8.3% between calendar years 1995 and 2005. Based on Dodge estimates, the total value of new construction contracts in Florida increased by an annual growth rate of 13.0% between calendar years 1995 and 2005 and 10.6% in Arizona in the same period.

The key factors impacting on construction and building activity in the US include:

Population growth;

Economic growth;

Government infrastructure spending;

Interest rates; and

Business and consumer confidence.

4. Australian industry overview

For the year ended December 31, 2005, the Australian Bureau of Statistics estimates that total construction and building industry spending was A\$97 billion, equivalent to US\$74 billion. This comprised expenditure on construction materials such as aggregate, concrete and cement but includes other building materials such as clay bricks, roofing, plasterboard and aluminum doors and windows.

Based on Australian Bureau of Statistics estimates, total Australian construction and building market spending increased by an annual growth rate of 5.4% between the years ended December 31, 1995 and December 31, 2005. The market segments are similar to those categorized for the US market, namely residential, commercial and civil.

For the year ended December 31, 2005, the Australian Bureau of Statistics estimates that total construction spending by segment was about 40% for residential, 21% for commercial and 39% for civil.

For the year ended December 31, 2005, there was a slight increase in spending in the residential segment, however spending across the commercial and civil segments increased significantly. Total construction spending increased by 12.8% for the year ended December 31, 2005 compared to the previous year. Residential spending was up by 1.8%, commercial by 17.2% and civil by 24.3%.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Over the last three fiscal years, construction activity in the residential segment has been influenced primarily by changes in interest rates and house price affordability. Following two interest rate rises, in November 2004 and December 2004, there was a gradual decline in residential construction commencements during fiscal years 2005 and 2006. The decline, however, has been mild by historical standards with the market supported by a relatively strong economy and low levels of unemployment. According to the Australian Bureau of Statistics, total spending in the residential segment increased slightly to US\$29.5 billion (A\$38.8 billion) in the year ended December 31, 2005, from US\$28.2 billion (A\$38.1 billion) in the year ended December 31, 2004. Spending was US\$23.5 billion (A\$33.7 billion) in the year to December 2003.

The commercial segment of the construction market strengthened during fiscal year 2006 compared to fiscal year 2005. According to the Australian Bureau of Statistics total spending in the commercial segment has grown from US\$13.6 (A\$18.4) billion in the year ended December 31, 2004 to US\$16.4 (A\$21.5) billion in the year ended December 31, 2005, due to higher business investment levels, supported by the relatively strong economy. Spending was US\$11.1 (A\$15.9) billion in the year to December 2003.

Civil construction in Australia is largely dependent on government infrastructure programs. According to the Australian Bureau of Statistics spending in the civil segment has risen from US\$21.8 (A\$29.5) billion in the year ended December 31, 2004 to US\$27.9 (A\$36.7) billion in the year ended December 31, 2005. Spending was US\$18.2 (\$26.1) billion in the year to December 2003.

Several large infrastructure projects have contributed to the buoyant activity in the civil segment, including the recently completed A\$1.6 billion Westlink (Western Sydney Orbital motorway) project, and two major projects still under construction (the A\$1.1 billion Lane Cove tunnel and the A\$2.5 billion Eastlink freeway in Victoria). The level of activity in the civil sector will continue to depend upon large public and private infrastructure projects, such as the yet to be approved A\$1.4 billion Brisbane North-South Bypass tunnel.

5. Rinker Materials

Rinker Materials business segments including annual volumes as at March 31, 2006

i. Aggregate

Overview

Rinker Materials is the fifth largest supplier of aggregate by volume in the US, based on US Geological Survey statistical data, with operations principally in the southeast (Florida, Georgia, Tennessee and Kentucky) and the western US states (Arizona, Nevada, Oregon, Washington state and northern California). In total, Rinker Materials supplied about 101 million tons of aggregate for the year ended March 31, 2006.

In Florida, Rinker Materials is the market leader, based on Rinker Materials' industry knowledge, by volume sold, with a market share estimated to be more than 30% for the year ended March 31, 2006. Rinker Materials is also the market leader, by volume sold, in Arizona.

Sales

Rinker Materials' aggregate operations are often integrated with Rinker Materials' downstream concrete and asphalt operations with over one-third of Rinker Materials' aggregate production supplied for use in Rinker Materials' manufacture of concrete, concrete block, asphalt and other products. The balance is supplied to other construction companies primarily for the production of concrete, asphalt and roadbase. Rinker Materials' products are generally supplied at a local level directly to a large number of unaffiliated customers that are generally the end users. Rinker Materials has no material long-term supply contracts for aggregate other than supply contracts to specific construction projects that have been generally subject to a competitive tender process. These are typically made on the basis of competitive prices in each market area. For the year ended March 31, 2006, Rinker Materials' estimated end markets for aggregate by trading revenue were about 40% residential and the balance equally divided between commercial and civil construction.

Crushed stone and sand are largely commodity products. The basis of competition is as the lowest cost delivered supplier into the market. Distribution logistics are very important, requiring a strong transport and distribution network.

Rinker Materials' major competitors are: Florida Rock Industries, Tarmac Limited (Titan Cement Company), Vulcan Materials Company, Martin Marietta Materials, and Hanson Building Materials America, as well as smaller competitors who compete in certain regions.

Facilities, reserves and distribution

Aggregate (sand, gravel, crushed stone, and other quarry products) is used for roads, civil construction and building projects and as a raw material in the production of concrete, concrete block, cement and asphalt. Aggregate production involves extracting quarry material that is then crushed and sized. The product is then distributed by truck or rail. The choice of aggregate for a particular purpose also depends largely on the local geology or availability. As aggregate is expensive to transport relative to its price, the cost of transport will generally limit the availability of aggregate to what is readily accessible in the local area. In Florida, aggregate is transported greater distances than in other states due to construction grade aggregate only being available in certain areas of the state. This is primarily achieved using an extensive railway network

Edgar Filing: RINKER GROUP LTD - Form 20-F

serving the entire east coast of Florida and into central Florida. For example, Rinker Materials' FEC quarry near Miami in southern Florida, transports aggregate up to Jacksonville in northern Florida.

As at March 31, 2006, Rinker Materials operated 89 quarries, sand and aggregate plant operations located in 14 states. The majority of these are located in Florida (14), Tennessee (10), Arizona (38) and Washington state (12). Rinker Materials' total estimated aggregate reserves as at March 31, 2006, were 2,720 million tons with an average reserve life estimated to be 30 years at current usage levels.

Rinker Materials' estimated aggregate reserves by product type as at March 31, 2006

Regional Summary	Reserves (million tons)	Average life in years
Limestone	1,605	38
Hard rock	475	32
Sand and gravel	617	19
Other (volcanic cinder, gypsum)	23	80
Total	2,720	30

Estimates of reserves are of recoverable stone, sand and gravel and other quarry products of suitable quality for economic extraction based on drilling, studies and mine plans reviewed annually by Rinker Materials geologists and engineers, recognizing reasonable economic and operating restraints as to maximum depth of overburden and aggregate excavation. Reserves are proven (measured) or probable (indicated) based upon inspection, sampling and measurement and the geological character of the resource.

In determining the average life of aggregate reserves Rinker Materials management has used the most recent annual production rate at each quarry. The foregoing life by product type is an overall average. Certain locations, however, are subject to more limited reserves and have a relatively short life. Rinker Materials sand and gravel quarries are typically small operations producing from reserves with a shorter life.

Rinker Materials' estimated aggregate reserves by region as at March 31, 2006

Regional Summary	Reserves (million tons)	Average life in years
Florida	793	20
Southeast (GA, TN, KY, VA)	1,166	66
West	761	23
Total	2,720	30

Approximately 70% of quarry reserves are on Rinker Materials owned sites, with the remainder located on leased property. In Rinker Materials Florida operations, owned reserves constitute approximately 80% of total reserves. In Arizona, owned reserves comprise approximately 55% of total reserves. Leasehold reserves are subject to various expiry dates and renewal options. While not all of the reserves are permitted, it is Rinker's view that the ultimate permitting of the reserves is probable.

Of Rinker Materials 89 aggregate, sand and gravel quarries, the largest 4 by quarry reserves as at March 31, 2006 were as follows:

	Reserves (million tons)	Average life in years
Midway Quarry, Mascot TN	274	239
FEC Quarry, Miami FL	261	22
Macon Quarry, Macon GA	153	32
Dogwood Quarry, Augusta GA	143	70

Rinker Materials largest quarry in terms of production is the FEC Quarry in Miami, Florida. The quarry is one of the largest in the US, producing about 12.5 million tons of aggregate each year. See Legal Proceedings in Item 8.A. Consolidated Statements and Other Financial Information on page 120 for additional discussion of Rinker Materials reserves.

Rinker Materials has a continuing program to identify, acquire or lease replacement reserves and in the case of Florida to pursue offshore reserves.

ii. Cement

Overview

Rinker Materials cement operations are in Florida where it is a leading cement supplier by volume, based on Portland Cement Association data on supplier output. For the year ended March 31, 2006, Rinker Materials produced about 2.1 million tons of cement and imported 2.1 million tons of cement through two strategically located terminals. Rinker Materials supplies grey and white cement and a range of special products. Rinker Materials estimates the total Florida cement market to be about 13.5 million tons a year.

Sales

Rinker Materials supplies cement to its concrete businesses as well as to external pre-mix, masonry and pre-cast concrete producers and building supply companies. For the year ended March 31, 2006, about 55% of Rinker Materials cement production was sold internally.

Rinker Materials manages its cement business by fully utilizing its own cement production capacity and supplying any additional demand from imports and purchasing cement from other domestic producers.

For the year ended March 31, 2006, Rinker Materials estimated external end markets for cement by trading revenue were about 65% residential, 30% commercial and 5% civil construction.

Rinker Materials' competitors' positions in Florida have changed significantly during the past several years. Tarmac America has been acquired by Titan Cement Company and Southdown by Cemex. The Eastern Cement terminal on the west coast of Florida has been acquired by Schwab and Florida Rock has acquired the LaFarge import terminals on the west coast of Florida. Domestic and import capacity has also increased with both Florida Rock Industries and Votorantim (Suwanee) recently constructing new Florida cement plants. Titan Cement Company has built a new cement import terminal on the west coast of Florida in Tampa and doubled their Miami capacity. Rinker Materials' major competitors in cement are Cemex, Lehigh (Heidelberg), Titan Cement Company, and Florida Rock Industries.

Facilities and distribution

The production of cement is a highly capital intensive business. The production process starts by crushing limestone aggregate. The crushed limestone aggregate and other raw materials, depending on the type of cement to be produced, are fed into a grinding process, which mixes the various materials more thoroughly and reduces them further in size in preparation for the kiln. In the dry process, the raw materials are calcined or processed at a very high temperature in the kiln to produce clinker. Clinker is the intermediate product used to manufacture cement. Finally, clinker and gypsum are fed into a cement grinding mill where they are ground into extremely fine powder to produce finished cement.

Rinker Materials has two cement plants, located in Miami and Brooksville in Florida. The Miami plant was upgraded and commissioned in 2000 for a total cost of US\$150 million, which increased annual capacity from 0.6 million tons to about 1.3 million tons. The Brooksville plant was acquired in 2000 as part of the Florida Crushed Stone acquisition and has an annual capacity of about 0.8 million tons. Both cement plants are located adjacent to quarries owned and operated by Rinker Materials that provide the limestone raw material. The estimated limestone reserves owned by Rinker Materials exceed the currently anticipated life of the plants. Expansion plans at Brooksville have been approved which are expected to increase production by over 1.0 million tons per annum with a target date to complete the project in 2008. Both plants are dry process technology operations that utilize modern energy efficiency and emission control systems. The plants source electricity from local utilities at state-regulated prices.

The cement produced is delivered to concrete plants and other concrete product manufacturing facilities, normally within a radius of about 125 miles, by bulk cement tankers or in bagged form.

Rinker Materials imports a large volume of cement (fiscal year 2006, 2.1 million tons) through cement import terminals located at Port Everglades in southeastern Florida and Port Canaveral in central Florida. Cement is sourced primarily from Europe and the Far East on contracts that expire annually.

iii. Concrete, concrete block and asphalt

Overview

Rinker Materials produced about 17.8 million cubic yards of concrete in the year ended March 31, 2006, from 172 concrete plants. In Florida, Rinker Materials' concrete operations are integrated with its cement and aggregate operations, providing it with a number of supply advantages. Overall, Rinker Materials is the market leader in Florida with an estimated total market share by volume sold in the year ended March 31, 2006 of around 30%, based on Rinker Materials' industry knowledge. Rinker Materials also held market leadership positions, by volume sold, in Arizona and Nevada in the year ended March 31, 2006.

In concrete block, Rinker Materials produced about 200 million units for the year ended March 31, 2006, that was used for residential and commercial building. Rinker Materials' concrete block operations are principally located in Florida where it was the market leader in terms of volumes sold in the year ended March 31, 2006, based on Rinker Materials' industry knowledge.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Rinker Materials also produces asphalt, which is used for roads, highways and airports with plants located in Arizona, northern California, Oregon and Washington state.

Sales and facilities

As at March 31, 2006, Rinker Materials operated 172 concrete and 29 concrete block plants, with a delivery fleet of over 2,900 company owned vehicles. These plants are located in Arizona, California,

Florida, Nevada, New Mexico, Oregon, Tennessee and Washington state. Of the 172 concrete plants, 92 are in Florida and 48 in Arizona.

During the last two fiscal years Rinker Materials has invested in an additional 31 concrete plants and 7 block plants. Eight new readymix plants and five new block plants have been constructed in Florida to meet customer demand in growing regions of that state or to replace facilities to better meet strong demand in existing market areas. The balance of new plants have been from business acquisitions. Construction on a further ten plants in Florida is underway with completion expected during fiscal year 2007.

Concrete is produced by combining cement, aggregate, water and additives in a batch plant for delivery to the customer's site in a mixer truck. For the year ended March 31, 2006, Rinker Materials' estimated end markets for concrete by trading revenue were about 65% residential, 25% commercial and 10% civil construction. Rinker Materials' concrete operations provide a full range of products to meet a number of applications, including reinforced slabs for residential construction, high strength concrete for high rise structures and flowable fill concrete for back filling trenches.

Concrete block is manufactured in factories by a continuous process of combining cement and aggregate raw materials, which are molded and cured into required dimensions. Delivery to customers takes place on trucks, which usually have on-board material handling equipment to permit the driver to unload at the job site. Concrete block customers are primarily residential and commercial building companies.

Rinker Materials also manufactures and sells hot-mix asphalt products. These are a mixture of aggregate and asphalt oil made to the customer's specification in a batch plant. Rinker Materials produced about 4.3 million tons of asphalt for the year ended March 31, 2006. All asphalt operations are vertically integrated with Rinker Materials' aggregate businesses. In most instances the asphalt plants are located on the site of a Rinker Materials' quarry, offering significant synergies both in raw material supply and management and administration resources. Asphalt is sold to road contractors for the construction of highways, driveways and parking lots and directly to state and local authorities.

In concrete, the main competitors are a combination of large publicly listed companies and a number of small privately held regional companies. In asphalt, competitors vary between regional markets, including large public companies such as Vulcan and Granite Construction, but often include smaller local operations.

Concrete, concrete block and asphalt plants as at March 31, 2006

	Number of plants			Total
	Concrete	Concrete block	Asphalt	
Florida	92	26	0	118
Arizona	48	0	14	62
Nevada	12	2	0	14
Washington	3	0	5	8
Tennessee	7	0	0	7
California	6	0	1	7
New Mexico	0	1	0	1
Oregon	3	0	1	4
Virginia	1	0	0	1
Total	172	29	21	222

iv. Concrete pipe and products*Overview*

Rinker Materials' Concrete Pipe Division is one of the largest producers by volume of reinforced concrete pipe and concrete products in the US in the year ended March 31, 2006, with a market share in excess of 20% based on Rinker Materials' industry knowledge. Products are primarily concrete pipe, concrete box and other pre-cast products used for storm water transmission, sewerage and irrigation. Auxiliary products include manholes, drainage structures and storm water pollution prevention devices. Rinker Materials has progressively expanded the geographic presence of the concrete pipe and products business since its acquisition in 1990 with a series of small bolt-on acquisitions and investment in new plant and equipment to expand production capacity.

Sales

Sales demand is driven by the construction of roads and highways, residential and commercial developments and airports. The primary customers of the business are general and utility contractors that provide services for federal, state and local government agencies and private developers.

In most markets Rinker Materials competes with other large companies, including Hanson, CRH plc, and The Cretex Companies, Inc. Despite substantial consolidation in recent years, the industry remains fragmented and localized, with over 100 producers operating more than 300 plants. High freight costs for transporting concrete pipe limit most markets to a radius of about 150 miles from the plant site. On a national basis Hanson is Rinker Materials' principal competitor. In addition, producers of alternative plastic, metal, and fiber cement pipe products compete with Rinker Materials particularly in the market for small diameter pipes.

Edgar Filing: RINKER GROUP LTD - Form 20-F

For the year ended March 31, 2006, Rinker Material's estimated end markets by trading revenue were about 45% residential, 20% commercial and 35% civil construction.

Facilities

Rinker Materials manufactures concrete pipe primarily using the dry cast, packerhead and wet cast processes. In the dry cast manufacturing process, a dry formulation of concrete is introduced into a mold. The concrete is then compacted by an intense mechanical vibration. The mold is immediately stripped from the product and is reused repeatedly throughout the production run.

In the packerhead method, a vertical mold is filled with a dry formulation of concrete. A revolving trowel packs the concrete outward against the mold, while simultaneously forming the inside wall of the pipe. As with the dry process, the mold is stripped and reused. In the wet cast process wet concrete is introduced into a mold. Unlike the dry and packerhead methods, the product remains in the mold until sufficient strength has developed in the concrete to allow the mold to be removed.

As at March 31, 2006, Rinker Materials operated 49 concrete pipe and product plants. A program of plant upgrades, replacements and rationalization of capacity over the past several years has allowed Rinker Materials to reduce its cost structure through the benefits of more modern technology and economies of scale. During fiscal year 2006 Rinker Materials commenced construction on a new concrete pipe plant in Central Florida that will replace three aging facilities in that state. Rinker Materials also acquired the Carder Concrete Products business with locations in Colorado and Wyoming and is consolidating its existing operations with the newly acquired plants.

v. Other businesses

Gypsum supply

During the period 1992 to 1996, Rinker Materials acquired several wallboard distributors in Florida, becoming one of the state's leading distributors of gypsum wallboard, based on Rinker Materials' industry knowledge. Rinker Materials also acquired Dierco Supply, a ceiling tile and insulation distributor.

As at March 31, 2006, Rinker Materials had 30 gypsum supply outlets (in Florida (28), South Carolina (1), and Alabama (1)). An export operation in Miami sells its products for delivery in the Caribbean, and Central and South America.

Rinker Materials' principal competitor in gypsum supply is L&W Supply, owned by USG Corporation.

Pre-stressed concrete products and Polyethylene pipe

During the fiscal year 2005, Rinker Materials sold the principal assets of its small prestress concrete products business to Coreslab Structures as well as the stock of its polyethylene pipe and liner business to the Halifax Group. Both businesses were regarded as non-core operations and had

been slated for divestment for some time. During the fiscal year 2006 Rinker Materials continued to deliver and recognize revenue on completed manufactured prestressed concrete components, which were not sold to Coreslab.

6. Readymix

Readymix operates a vertically integrated heavy building materials business in Australia, with about 35% of aggregate production used internally in the concrete and concrete pipe businesses (40% including sales under a long term supply agreement to the Emoleum asphalt business sold in February 2006), which also source about 75% of their cement requirements on the east coast of Australia from the Cement Australia joint venture. Operations and investments include the production of aggregate, concrete,

cement and reinforced concrete pipe and products. Readymix subsidiaries also operate concrete businesses in Tianjin and Qingdao, China. Readymix has been involved in the supply of heavy building materials in Australia, initially through CSR, since 1965 when it and Blue Metal Industries Limited jointly acquired Ready Mixed Concrete Limited. In 1981, the operations of Ready Mixed Concrete were divided between Readymix and Blue Metal Industries.

Readymix (through its predecessor) has made a series of acquisitions to expand into new products:

In 1974, it entered the cement industry in a joint venture with Pioneer Services Limited (since acquired by Hanson), with the acquisition of Australian Cement Holdings Pty Limited (ACH);

In 1988, it acquired the reinforced concrete pipes and other concrete products business of Humes Limited;

In 1989, ACH purchased Goliath Cement of Tasmania;

In 1994, established a joint venture in Tianjin, China. In June 2003, Readymix increased its ownership to 99% with 100% rights to profits and assets in this concrete business; and

In June 2003, ACH merged with QCL to form the Cement Australia joint venture. Subsequently, Readymix acquired three aggregate operations and six concrete plants from a subsidiary of the joint venture.

Including joint ventures, Readymix operated 359 plants in Australia and four in China at March 31, 2006. An overview of Readymix's current organization structure is provided in the above chart.

i. Aggregate

Based on Readymix's knowledge of the industry, Readymix is one of the leading suppliers of aggregate in Australia, producing a range of gravel, road pavement materials and manufactured and natural sand. Readymix operates in all mainland states and territories in Australia. In the year ended March 31, 2006, Readymix produced about 26 million tonnes of aggregate. As at March 31, 2006 Readymix had estimated aggregate quarry reserves of about 1,073 million tonnes, with an average reserve life of 43 years.

Readymix's estimated aggregate reserves by product type as at March 31, 2006

Total Australia	Reserves (million tonnes)	Average life in years
Hard rock	1,001	53
Sand and gravel	72	12
Total	1,073	43

Estimates of reserves are of recoverable stone, sand and gravel of suitable quality for economic extraction, based on drilling, studies and mine plans reviewed annually by Readymix geologists and engineers, recognizing reasonable economic and operating restraints as to maximum depth of overburden and aggregate excavation. Reserves are proven (measured) or probable (indicated) based upon inspection, sampling and measurement and the geological character of the resource.

In determining the average life of aggregate reserves Readymix management has used the most recent annual production rate at each quarry. Certain locations, however, are subject to more limited reserves and have a relatively short life. The foregoing life by product type is an overall average.

Readymix's largest quarry in terms of annual production is at Penrith, New South Wales and is operated under the Penrith Lakes Development Corporation Limited (PLDC) joint venture with Boral and Hanson. The operation currently supplies about 4.5 million tonnes of the Sydney market's estimated 7.7 million tonne annual requirement for concrete aggregates, and has an estimated life of 5 years. Other quarries in the Sydney basin have limited capacity for expansion. Readymix sales volumes from Penrith for fiscal year 2006 were 1.5 million tonnes.

Readymix has a continuing program to identify, acquire or lease replacement reserves, and during fiscal year 2005 acquired property at Marulan, on the outskirts of Sydney, as a potential replacement for the Penrith quarry. During fiscal year 2006, Readymix received development consent for a 5 million tonne per annum quarry on the Marulan site.

The Australian market for aggregate was estimated to have been over 90 million tonnes in the calendar year 2005, generating in excess of US\$1.7 billion (A\$2.4 billion) in revenue. Readymix's quarry operations are highly integrated with about 40% of aggregate volumes sold internally in the year ended March 31, 2006. For the year ended March 31, 2006, Readymix's estimated aggregate end use markets were about 25% residential, 35% commercial and 40% civil construction. Readymix's major competitors are Boral and Hanson Australia.

ii. Concrete

Readymix manufactures and distributes concrete throughout all states and territories of Australia. Customers are normally located within a 20 kilometer radius of the plant. In the year ended March 31, 2006, Readymix produced in excess of 6.9 million cubic meters of concrete from 247 plants.

Edgar Filing: RINKER GROUP LTD - Form 20-F

The Australian market for concrete was estimated by the Australian Bureau of Statistics to have been 23.7 million cubic meters in the calendar year 2005, generating about US\$2.5 billion (A\$3.3 billion) in revenue. Readymix's major competitors are Boral and Hanson. For the year ended March 31, 2006, Readymix's estimated end use markets were about 40% residential, 35% commercial and 25% civil construction.

iii. Concrete pipe and reinforced concrete products

Readymix produces concrete pipe and reinforced concrete products through its Humes business. Based on Humes' knowledge of the industry, Humes is one of the two leading suppliers in Australia with production of over 510 thousand tonnes a year. As at March 31, 2006 Humes operated 17 plants producing concrete pipe, pre-cast concrete products including pre-stressed beams, storm water pollution prevention devices and other environmental products, concrete sleepers and flooring products.

The Australian civil infrastructure market was estimated, based on Humes' knowledge of the industry to be 1.3 million tonnes in calendar year 2005, generating more than US \$365 million (A\$480 million) in revenue. For the year ended March 31, 2006, Humes' estimated end use markets were about 95% civil and 5% commercial construction. Humes' main competitor is Rocla Pipeline Products, and there are also small companies who compete in individual regional sectors of the market.

iv. Cement

At the beginning of fiscal year 2004, Readymix held a 50% interest in ACH, a joint venture with Hanson Australia Pty Ltd. On June 1, 2003, ACH merged with QCL, a 100% owned Holcim subsidiary, to form Australia's largest cement manufacturer, based on Readymix's knowledge of the industry, the Cement Australia joint venture. Readymix holds a 25% interest in the joint venture, Hanson holds 25%, and QCL holds the remaining 50%. Annualized production volumes are in excess of 3.5 million tonnes of which approximately 75% is sold internally to shareholders.

The size of the Australian market for cement and cement blends was estimated by the Australian Bureau of Statistics to be about 9.3 million tonnes for the calendar year 2005, generating approximately US\$890 million (A\$1,170 million) in revenue. Cement Australia's main competitors in cement are Blue Circle Southern Cement (a 100% owned Boral subsidiary), Adelaide Brighton Limited and imported cement.

Additionally, the Cement Australia joint venture owns 100% of Pacific Lime which produces high grade lime products and a 50% interest in Australian Steel Mill Services which is responsible for processing of blast-furnace slag, a by product of iron and steel making at the BHP Steel facility at Port Kembla in New South Wales.

v. Asphalt

During the fiscal year 2006 Readymix divested its 50% interest in the Emoleum asphalt pavement and road maintenance joint venture with a subsidiary of Exxon Mobil Australia Pty. Limited to a subsidiary of the engineering services group Downer EDI Limited. The investment in Emoleum was regarded as non core. Readymix will continue its aggregate supply to the business under a long term supply contract with the purchaser.

7. Government Regulation

B. Business Overview

The business activities of Rinker group companies in each country where they operate are subject to and affected by laws and regulations relating to the environment, health and safety, and other regulatory matters.

Environment, health and safety

Rinker Materials' operations are subject to extensive regulation by US federal, state and local environmental control agencies. Environmental laws and regulations impose requirements on a broad

range of environmental matters including air emissions, effluent limitations, site remediation, the use, handling and disposal of hazardous materials and wastes, employee health and safety, groundwater quality, noise and the protection of wetlands and other natural resources. These laws require Rinker Materials to obtain and operate in compliance with the conditions of permits and other authorizations and requirements of the relevant governmental authorities.

In the United States, environmental, health and safety laws and regulations are promulgated and overseen by a variety of federal, state and local bodies. Among these are the US Environmental Protection Agency, state environmental protection agencies, the US Army Corps of Engineers, various state water management districts, the US Occupational Safety and Health Administration, the US Mine Safety and Health Administration, various state occupational health and safety agencies, and local zoning boards.

For Readymix, Australia's principal laws governing environmental and sustainable management of natural and physical resources are contained in legislation and regulations enacted by the Commonwealth Government and the states and territories of the Commonwealth of Australia. This body of legislation regulates the operations of companies principally in regard to air, water and noise emissions, waste disposal, land contamination, and the handling and storage of environmentally hazardous chemicals and dangerous goods. The principal environmental regulators in Australia are the state Environmental Protection Agencies/Authorities and, at the federal level, Environment Australia/Department of Environment and Heritage. The principal safety regulators to which Readymix is subject are the state workers' compensation authorities and state mine authorities.

Rinker Materials and Readymix have implemented comprehensive safety, health and environmental management systems. These systems are based on US, Australian and international standards and set out the requirements for managing and monitoring environmental impacts across operations. Sites are routinely audited for compliance.

As with other construction materials companies engaged in similar activities, environmental compliance obligations and liability risks are inherent in many activities within the Rinker group. From time to time Rinker group companies investigate and remediate contamination at their properties, consisting primarily of petroleum compounds associated with fuel storage and vehicle maintenance and elevated pH levels related to the processing and handling of limestone and concrete products. In the US certain environmental remediation laws, such as the federal Superfund law, can impose joint and several liability for site clean-up, regardless of fault, upon certain statutorily-defined categories of parties, including companies that sent wastes to a contaminated third party site. Rinker Materials has been named as a potentially responsible party at five sites requiring environmental remediation. These liability claims are expected to be resolved without having a material effect on Rinker group companies. The Rinker group holds provisions for anticipated clean up costs and does not expect to incur any additional material remedial obligations. Although unanticipated and unexpected remedial obligations can always arise in the course of operations, management is not aware of any remedial actions that would be expected to have a material effect on the Rinker group companies' operations or competitive positions.

Following its demerger from CSR, as between Rinker and CSR, Rinker is responsible for any liabilities and costs associated with environmental contamination and compliance in respect of the businesses it owns after the demerger. CSR has agreed to indemnify the Rinker group, to the maximum extent permitted by law, in respect of the liabilities and costs associated with environmental contamination and compliance in respect of the businesses owned by CSR group companies after the demerger. In each case, the indemnity applies irrespective of when the contamination occurred or the liabilities or costs arose.

Antitrust (trade practices) laws

Rinker group companies in the United States are subject to antitrust laws.

Rinker group companies in Australia are subject to regulation by the Australian Competition and Consumer Commission (ACCC) which administers the Trade Practices Act 1974. Rinker group entities are from time to time involved in investigations conducted by the ACCC.

Antitrust or competition considerations may restrict business activities within the Rinker group and the ability to grow through acquisitions or participate in industry rationalization in particular geographic markets.

8. Marketing channels and sales methods

Details of marketing channels and sales methods are included in the business analysis above. Customers include a range of commercial building and construction companies, government departments and a variety of trades and individuals. Sales personnel operate from central regional locations or individual operating facilities.

Rinker's management does not believe the loss of any single contract would have a material impact on the Rinker group's performance.

9. Source and availability of raw materials and inputs

A large proportion of the raw materials and inputs used in Rinker group entities' products are bulk commodities, which are either produced internally or are purchased under contract or agreements with outside vendors. Rinker's management is not aware of any restrictions on the availability of raw materials, under normal circumstances and subject to normal competitive forces, which would materially impact the Rinker group's result.

10. Corporate and securities regulation

As an Australian company, Rinker is subject to corporate regulation by (principally) the Australian Securities and Investments Commission. Because its ordinary shares are listed on the securities exchange operated by ASX, Rinker is also subject to regulation by ASX.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Rinker files periodic reports and other information with the SEC, including this annual report on Form 20-F. Rinker also furnishes to the SEC on Form 6-K its semi-annual consolidated financial statements, prepared in accordance with A-IFRS, and other material information on Form 6-K that Rinker makes public in Australia or provides to its shareholders. See Where you can find more information about Rinker Group Limited. Furthermore, as its ordinary shares are registered under the Securities Exchange Act of 1934 and American Depositary Shares (ADSs) representing its ordinary shares are listed for trading on the NYSE, Rinker is subject to various US corporate governance requirements including those resulting from the enactment of the Sarbanes-Oxley Act of 2002 and those promulgated by the NYSE.

C. Organizational Structure

Rinker group has more than 70 subsidiaries in the United States, Australia and China. The complete list of these entities, with their country of incorporation and percentage of Rinker s ownership, is listed at Note 37 to the financial statements included elsewhere in this annual report.

D. Description of Property, Plant And Equipment

Rinker's principal executive offices are located at, Level 8, Tower B, 799 Pacific Highway, Chatswood, New South Wales, 2067, Australia.

As at March 31, 2006, Rinker group entities had over 700 production facilities in the United States, Australia and China.

These sites include:

Facilities	Number
Concrete (8 are 50% owned)	419
Quarries and sand (1 is 40% owned, 3 are 50% owned)	173
Pipe & concrete products	66
Asphalt	21
Concrete block	29
Cement mills (3 are 25% owned)	5

In addition, Rinker group entities have a number of distribution sites.

As a result of the demerger, CSR's beneficial 40% interest in the PLDC joint venture, which extracts the majority of the aggregates for the Sydney region, was transferred to Readymix. Boral and Hanson own 40% and 20% respectively of PLDC. Readymix has agreed to share future profits produced from land sales equally with CSR. A significant portion of the PLDC land holdings have been identified as having potential, subject to planning approvals, for a major urban land development, creating up to 4,900 residential lots.

Management believes that the facilities of Rinker group entities are suitable and adequate for its present needs and are well maintained and in good operating condition. The Rinker group entities carry insurance covering property and casualty and certain other risks to which their facilities and operations may be subject. The Rinker group entities own most of their principal operating facilities and lease the remainder. Management does not believe the Rinker group earnings are dependent upon any single operating facility. The most significant single facility is FEC quarry, which is discussed below.

Edgar Filing: RINKER GROUP LTD - Form 20-F

The following table is a list of the principal facilities in the Rinker group. This list is not intended to be a complete list of all the Rinker group's operating locations. Principal facilities are owned by Rinker group entities unless stated otherwise.

RINKER SITE	LOCATION		PRODUCT SOLD
Chatswood (leased)	New South Wales	Australia	Administration

Fresno	California	USA	Pipe
Alexandria	Louisiana	USA	Pipe

(1) 40% beneficial interest in quarry land held through PLDC. See above.

(2) The FEC quarry near Miami is one of the largest volume quarries in the US, producing about 12.5 million tons of aggregate each year. Its in-situ reserves are estimated to be about 305 million tons of aggregate, and comprises approximately 10% of Rinker Materials' total estimated recoverable reserves as at March 31, 2006. For the fiscal year ended March 31, 2006, aggregate accounted for about 27% of Rinker Materials' trading revenue. About 13% of Rinker Materials' total aggregate trading revenue is derived from the FEC quarry in Florida. Accordingly, Rinker Materials' revenues could be materially adversely affected if its access to the aggregate reserves of FEC quarry for both internal use and external sale were restricted. See Legal Proceedings in Item 8.A. Consolidated Statements and Other Financial Information .

Environmental issues affecting properties, plant and equipment

Certain environmental issues that are potentially material to the operations of businesses in Rinker group companies are discussed below:

Lake Belt Permit Challenge. Rinker Materials holds one and is the beneficiary of one other of 12 federal quarrying permits granted for the Lake Belt area in South Florida. The permit held by Rinker Materials covers Rinker Materials' SCL and FEC quarries. Rinker Materials' Krome quarry is operated under one of the other permits. The FEC quarry is the largest of Rinker Materials' quarries measured by volume of aggregates mined and sold. The Rinker Materials' Miami cement mill is located at the SCL quarry and is supplied by that quarry. See Item 3.D. Risk Factors' Operation and supply failures or shortages could have an impact on the Rinker group's future revenues and profits and Item 3.D. Risk Factors' Rinker group's operations depend on securing and permitting aggregate reserves that can be supplied economically to growing markets . A ruling was made on March 22, 2006 by a single judge of the U.S. District Court for the Southern District of Florida in connection with litigation brought by environmental groups concerning the manner in which all 12 permits were granted. Although not named as a defendant, Rinker Materials has intervened in the proceedings to protect its interests. The judge ruled that there were deficiencies in the procedures and analysis undertaken by the relevant governmental agencies in connection with the issuance of the permits. The judge has returned the permits to the relevant governmental agencies for further review of the issues raised and has set further proceedings to determine the activities to be allowed during the period of further review, which review the

governmental agencies have indicated in recent court filings should take approximately 18 months. Rinker expects quarrying operations to be unaffected pending the outcome of a court hearing scheduled to commence on June 13, 2006. While Rinker believes Rinker Materials permits were validly issued, it is not possible to determine the likely outcome of these further proceedings or what impact that will have

on Rinker Materials' operations. If the Lake Belt permits, including the key permits for the SCL, FEC and Krome quarries were ultimately set aside or quarrying operations under them restricted, Rinker Materials and the other industry participants with quarries in the Lake Belt region would need to source aggregates, to the extent available, from other locations in Florida or import aggregates. This would likely affect Rinker Materials' ability to make, sell and deliver products, which could cause revenues to decline or costs to increase and result in lower profits. Any adverse impacts on the Florida economy arising from the cessation or significant restriction of quarrying operations in the Lake Belt could also have a material adverse effect on Rinker Materials.

Cement Kiln Dust: Like other cement manufacturing facilities, Rinker Materials' Miami cement plant has a cement kiln dust (CKD) former disposal site that could pose a risk of elevated pH levels and other impacts to surrounding groundwater. Cement kiln dusts are currently reused in the manufacturing process and as such Rinker Materials does not currently envisage a need to open a new CKD landfill. If it did so, such a site would require extensive permitting and environmental controls.

Silica Exposure: Rinker group entities are defendants in silicosis litigation in Florida at present. See Legal Proceedings in Item 8.A. Consolidated Statements and Other Financial Information. Rinker group has a comprehensive workplace silica exposure monitoring program in place with current exposure action levels in accord with the recommendations of a number of independent occupational health organizations. Rinker group's voluntary action levels are 50% below the applicable US and Australian standards.

Waste Disposal: In the United States, regulated solid and hazardous wastes are sent to licensed third party sites. Rinker Materials also operates permitted inert fill/construction and demolition debris landfills in Arizona, Nevada, Oregon, Washington and Florida. In Miami, Florida, Rinker Materials operates a facility that receives petroleum contaminated soils from outside sources, burns the soils in a kiln to remove the petroleum and uses the clean soils in its cement manufacturing process.

Quarry Reclamation: Permits for some of the Rinker group's quarries require reclamation activities to be performed when quarry activities cease. See critical accounting policies and property plant and equipment for further information and reclamation obligations.

Item 5 Operating and Financial Review and Prospects

Significant Events in fiscal year 2006

In April 2005, Rinker disposed of a property at Buffalo Road, Las Vegas, Nevada for net proceeds of US\$33.6 million. A gain on disposal of US\$19.8 million, net of tax, was recognized in the financial statements for the year ended March 31, 2006.

In December 2005, Rinker announced the sale of its 50% stake in the Emoleum Australian asphalt joint venture with Exxon Mobil Australia Pty Limited to a subsidiary of the engineering services group Downer EDI Limited. The sale was completed in February 2006. A gain on disposal of A\$18.2 million (US\$15.7 million), net of tax, was recognized in the financial statements for the year ended March 31, 2006.

Events subsequent to March 31, 2006

On May 11, 2006, the directors proposed a capital return of 50 A\$ cents per ordinary share (A\$2.50 per ADR), or approximately A\$455 million (approximately US\$341 million assuming a 0.75 exchange rate). The return is subject to receiving a favorable class ruling from the Australian Tax Office confirming that

it is a 100% capital return, and majority shareholder approval at the Annual General meeting on July 18, 2006.

Additionally, the directors declared a special dividend of 40 A\$ cents per ordinary share (A\$2.00 per ADR), or approximately A\$364 million (approximately US\$273 million assuming a 0.75 exchange rate). This special dividend is unfranked and will be paid on July 4, 2006 with a record date of June 9, 2006. The entire dividend will be paid from the Rinker group's conduit foreign income amount, thus eliminating Australian withholding tax for all overseas shareholders. The special dividend in respect of ordinary shares for the year ended March 31, 2006 has not been recognized in the financial statements because it was declared after March 31, 2006.

Basis of preparation and presentation

The financial statements for fiscal years ended 2005 and 2006 included elsewhere in this annual report include Rinker and its controlled entities.

Rinker group changed its accounting policies on April 1, 2005 to comply with Australian Equivalents to International Financial Reporting Standards (A-IFRS). The transition to A-IFRS is accounted for in accordance with Accounting Standard AASB 1 First-time Adoption of Australian Equivalents to International Financial Reporting Standards, with April 1, 2004 as the date of transition. The previous policies were in accordance with the now superseded Australian GAAP. An explanation of how the transition from superseded policies to A-IFRS has affected the consolidated entity's balance sheet, income statement and cash flows is discussed in Note 1 to the financial statements included elsewhere in this annual report.

Critical accounting policies

The financial statements included elsewhere in this annual report are prepared under A-IFRS. A description of the significant accounting policies is included in the financial statements.

A US GAAP reconciliation to A-IFRS is provided in Note 40 to the financial statements. Under superseded AGAAP, the only significant difference in the reconciliation of profit from superseded AGAAP to US GAAP was the amortization of goodwill. Under A-IFRS, goodwill is no longer amortized, and no significant differences in the reconciliation of profit between A-IFRS and US GAAP remain.

The accounting policies under A-IFRS and US GAAP that Rinker management believes are critical to understanding the Rinker group's financial performance and financial condition are discussed below.

Use of estimates and assumptions

Edgar Filing: RINKER GROUP LTD - Form 20-F

In applying A-IFRS and US GAAP, Rinker group entities management will often be required to make individual estimates and assumptions regarding expected outcomes or uncertainties. Actual results or outcomes generally differ from estimated or assumed amounts. In the past, these differences have not been material. In the future such differences will be included in the financial statements of the Rinker group as soon as they are known. The individual estimates and assumptions generally do not involve a level of risk or uncertainty that would be material to the financial statements of the Rinker group as a whole because, although numerous, they generally are relatively immaterial in amount.

There are estimates and assumptions made by management in preparing the financial statements of the Rinker group for which actual results will emerge over long periods of time. Although there is greater risk with respect to the accuracy of these long-term estimates and assumptions because of the long period over which actual results will emerge, Rinker group s management believes that such risk is

mitigated by its ability to closely monitor and periodically adjust these estimates and assumptions over the same long period.

Property, Plant and equipment

Rinker group entities depreciate their property, plant and equipment over their estimated useful lives. This requires Rinker group entities management to make estimates as to technological and/or market redundancy issues affecting their assets as well as any potential physical asset life.

The Rinker group had US\$1,963 million of property, plant and equipment in its balance sheet as at March 31, 2006 and depreciation and depletion on those assets totaled US\$191 million for the year ended March 31, 2006, or approximately 10% of book asset value. Depreciation in fiscal year 2005 amounted to US\$181 million, or approximately 10% of book asset value. An annual review of the recoverable value of non-current assets is undertaken to determine whether there are any material errors in judgment in respect of the rate of depreciation of property, plant and equipment impacting the carrying value of those assets.

The Rinker group also has recorded obligations of US\$55 million in order to retire property, plant and equipment, including quarry reclamation obligations, at the end of their useful lives. This obligation requires Rinker group entities management to make estimates of future legal rehabilitation obligations. The associated asset retirement costs are capitalized as part of the carrying amount of the related long-lived asset and amortized over the life of the related asset using the unit-of-production method. At the end of each year, the liability is increased to reflect the passage of time (accretion expense) and adjusted (increase or decrease) to reflect changes in the estimated future cash flows underlying the initial fair value measurement. If the obligation is settled for other than the carrying amount of the liability, the Rinker group will recognize a gain or loss on settlement.

Impairment and recoverable value of assets, including goodwill

Under A-IFRS, the Rinker group reviews the carrying amounts of its tangible and intangible assets at each reporting date to determine whether there are any indications of impairment. If any such indication exists, the Rinker group is required to write-down these assets to their estimated recoverable amount, generally the higher of fair value less costs to sell and value in use. Where the asset does not generate cash flows that are independent from other assets, Rinker group estimates the recoverable amount of the cash generating unit to which the asset belongs.

Recoverable amounts involve significant judgments by Rinker group entities management and represent the estimated current value of the cash flows arising from the continued use or the sale of the assets. In calculating recoverable amounts, Rinker group entities discount cash flows to present value. Management calculates the cash flows utilizing forecasts of how the business is expected to operate based on the current performance and business environment but taking into account expected future changes. Rinker group entities management review these cash flow projections at least annually and any assets with a carrying value not supported by their discounted future cash flows are written down to their estimated recoverable amount. Impairment losses are measured as the amount by which the carrying value of the assets exceeds their recoverable amount as calculated above. Impairment losses are recognized immediately in earnings. There were no material impairment losses in fiscal years 2006 or 2005.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Sensitivity analysis is applied to the calculation of future cash flows to determine whether the asset carrying value is supported under different assumptions. Key assumptions include discount rates, sales volumes, average selling price and cost assumptions. Discount rates are based on the estimated cost of capital in the applicable country. Sales volumes, average selling price and cost assumptions all use

historical results as a base and are adjusted based on forecast assumptions derived from past experience. Adjustments include approved strategic initiatives by the Rinker group and any expected external factors, such as economic activity levels, degree of competition and the relevant Rinker group entity's position in the market for the business under review.

Goodwill and intangible assets with indefinite lives are tested for impairment annually and whenever there is an indication that the asset may be impaired. An impairment of goodwill is not subsequently reversed.

Goodwill is disclosed by Segment in Note 2 of the financial statements. Additional risk factors are discussed in item 3. D. of this annual report.

Provision for uninsured losses and future claims

Rinker group companies retain significant liability for workers compensation, automobile liability, product, and general liability claims, as well as certain liabilities for employee medical claims under benefit programs. Rinker group companies have insurance coverage above the retained liability for each claim and an aggregate amount for each year.

Management believes that adequate provision has been made for all known claims and for the value of probable future claims to the extent such claims can be measured reliably. Measurement is based on the annual report of an independent actuary.

New accounting standards

Australian Standards

The consolidated entity changed its accounting policies on April 1, 2005 to comply with Australian Equivalents to International Financial Reporting Standards (A-IFRS). The transition to A-IFRS is accounted for in accordance with Accounting Standard AASB 1 First-time Adoption of Australian Equivalents to International Financial Reporting Standards, with April 1, 2004 as the date of transition. An explanation of how the transition from superseded policies to A-IFRS has affected the consolidated entity's financial position, financial performance and cash flows is discussed in Note 1 in the financial statements included elsewhere in this report.

In August 2005, the Australian Accounting Standards Board issued AASB 7, Financial Instruments: Disclosures, for application to reporting periods beginning on or after January 1, 2007. This standard will therefore first apply to the Rinker group for the fiscal year ended March 31, 2008. AASB 7 requires additional disclosure of qualitative and quantitative information about exposure to risks arising from financial instruments. There will be no material effect on the group's financial position, results of operations, or cash flows.

Edgar Filing: RINKER GROUP LTD - Form 20-F

In June 2005, the Urgent Issues Group issued UIG Interpretation 4, Determining whether an Arrangement contains a Lease, for application to reporting periods beginning on or after January 1, 2006. This standard will therefore first apply to the Rinker group for the fiscal year ended March 31, 2007. The Interpretation specifies criteria for determining whether an arrangement is, or contains, a lease, based on an assessment of whether fulfillment of the arrangement is dependent on the use of a specific asset and a right to use that asset. Rinker group is currently evaluating the impact UIG 4 will have on its consolidated financial position, results of operations and cash flows but does not expect the interpretation to have a material impact.

In April 2006, the Urgent Issues Group issued UIG Interpretation 9, *Reassessment of Embedded Derivatives* for application to reporting periods beginning on or after June 1, 2006. This standard will therefore first apply to the Rinker group for the fiscal year ended March 31, 2008. UIG Interpretation 9 clarifies that an entity reassesses whether an embedded derivative contained in a host contract is required to be separated from a host contract and accounted for as a derivative under AASB 139, *Financial Instruments* only when there is a change in contract terms that significantly modifies the cash flows that otherwise would be required. The Rinker group does not expect UIG 9 to have a material impact on its financial position, results of operations or cash flows.

US Standards

In November 2004, the FASB issued SFAS No. 151, *Inventory Costs - An Amendment of ARB No. 43, Chapter 4* (SFAS No. 151). SFAS No. 151 amends the guidance in Accounting Research Bulletin (ARB) No. 43, Chapter 4, *Inventory Pricing* (ARB No. 43), to clarify the accounting for abnormal amounts of idle facility expense, freight, handling costs, and wasted material (spoilage). Among other provisions, the new rule requires that items such as idle facility expense, excessive spoilage, double freight, and rehandling costs be recognized as current-period charges regardless of whether they meet the criterion of *so abnormal* as stated in ARB No. 43. Additionally, SFAS No. 151 requires that the allocation of fixed production overheads to the costs of conversion be based on the normal capacity of the production facilities. SFAS No. 151 is effective for fiscal years beginning after June 15, 2005. The Rinker group is therefore required to adopt this standard with effect from April 1, 2006 but does not expect SFAS No. 151 to have a material impact.

In December 2004, the FASB, issued SFAS No. 123 (revised 2004), *Share Based Payment* (SFAS 123R), which replaces SFAS 123, *Accounting for Stock-Based Compensation* (SFAS 123) and supersedes Accounting Principle Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees* . SFAS 123R, addresses the accounting for share-based payments transactions in which an enterprise receives employee services in exchange for either equity instruments of the enterprise or liabilities that are based on the fair value on the enterprise's equity instruments or that may be settled by the issuance of such equity instruments. This statement eliminates the ability to account for share-based compensation transactions using an intrinsic value method as prescribed under APB 25, and generally requires that such transaction be accounted for using a fair value based method (based on the most appropriate model to calculate the value of the options) and recognized as an expense. Effective April 1, 2006, Rinker group will adopt SFAS 123 (R) using the modified prospective method. The Rinker group does not expect the adoption of SFAS 123 (R) to have a material impact on its consolidated balance sheet or income statement.

In December 2004, the FASB issued SFAS No. 153, *Exchanges of Nonmonetary Assets - An Amendment of APB Opinion No. 29, Accounting for Nonmonetary Transactions* (SFAS 153). SFAS 153 eliminates the exception from fair value measurement for nonmonetary exchanges of similar productive assets in paragraph 21(b) of APB Opinion No. 29, *Accounting for Nonmonetary Transactions*, and replaces it with an exception for exchanges that do not have commercial substance. SFAS 153 specifies that a nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS 153 is effective for the fiscal periods beginning after June 15, 2005. Rinker is currently evaluating the effect that the adoption of SFAS 153 will have on its consolidated financial position, results of operations or cash flows but does not expect it to have a material impact.

In March 2005, the FASB issued Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations*, an interpretation of FASB Statement No. 143 (FIN 47). FIN 47 clarifies that the term *conditional asset retirement obligations* as used in FAS 143, *Accounting for Asset Retirement Obligations*, refers to a legal obligation to perform an asset retirement activity in which the timing

and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. An entity is required to recognize a liability for the fair value of a conditional asset retirement obligation if the fair value of the liability can be reasonably estimated, even if there is uncertainty with regards to the timing and/or method of settlement. Uncertainty about the conditional outcome of the obligation is incorporated into the measurement of the fair value of the liability, not the recognition decision. FIN 47 is effective for fiscal years ending after December 15, 2005. The adoption of FIN 47 did not have a material effect on the results of operations, financial position or liquidity of Rinker group.

In May 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections a replacement of APB Opinion No. 20 and FASB Statement No. 3 (FAS 154). FAS 154 changes the method for reporting an accounting change. Under FAS 154, accounting changes must be retrospectively applied to all prior periods for which financial statements are presented, unless the change in accounting principle is due to a new pronouncement that provides other transition guidance or unless application of the retrospective method is impracticable. Under the retrospective method, we will no longer present the cumulative effect of a change in accounting principle in our earnings statements. FAS 154 carries forward APB Opinion No. 20's guidance for reporting corrections of errors in previously issued financial statements and for reporting changes in accounting estimates. FAS 154 is effective for any accounting changes and corrections of errors occurring after March 31, 2006.

A. Management discussion and analysis of the financial results

Management discussion and analysis executive summary

During the fiscal year ended March 31, 2006 the Rinker group's trading revenue increased by 19% from US\$4,310 million to US\$5,108 million, EBIT increased by 48% from US\$775 million to US\$1,146 million, and net profit attributable to members of Rinker rose by 50% from US\$493 million to US\$740 million compared to the fiscal year ended March 31, 2005.

This financial performance and the increase over the prior fiscal year has been primarily influenced by the level of activity in the US and Australian construction materials industries, the ability to acquire businesses and expand and improve heritage operations within the Rinker group, and by capitalizing on market leadership and the cost advantages of vertically integrated operations. The financial results were also assisted by two significant non-recurring transactions: the sale of a depleted quarry in Las Vegas, Nevada and the sale of the 50% joint venture share in a non-core asphalt business in Australia. A summary of these factors is contained below with further information in the detailed management discussion and analysis that follows this executive summary.

Construction materials industry

The level of construction activity in the residential, commercial and civil segments of the US and Australian construction materials industry has created a favorable environment for the Rinker business, supporting high demand for Rinker products.

In the US, Dodge estimates that total construction expenditure in calendar year 2005 was US\$594 billion, an increase of US\$43 billion or 7.8% over calendar year 2004. The level of activity is 41% higher than 5 years earlier when expenditure was US\$423 billion, in calendar year 2000. In Florida, total construction expenditure is estimated at US\$64 billion in calendar year 2005, an increase of US\$9 billion over the prior year and US\$32 billion or 100% above calendar year 2000.

A. Management discussion and analysis of the financial results

Rinker Materials, as one of the largest heavy building materials companies in the US with strong number 1 or 2 market positions in most of its served market areas, has benefited by this expansion with significant growth in volumes, trading revenue and EBIT across each of its business segments.

In Australia, the Readymix financial results have similarly benefited from increased construction activity, improving from a trough that occurred following completion of many 2000 Olympic construction projects and implementation of the GST. Total Australian construction expenditure in calendar year 2005 was A\$97.0 billion (US\$73.7 billion), an increase of 12.8% over calendar year 2004. The level of expenditure is 70% higher than 5 years earlier when expenditure was A\$57.1 billion (US\$31.7 billion).

Acquisitions and greenfield expansion

A key contributor to the improvement in Rinker's financial performance has been growth through both acquisition and greenfield expansion of heritage operations. Major acquisitions are summarized on pages 21 and 22.

Bolt-on acquisitions during the year ended March 31, 2006 are summarized on page 50. These smaller acquisitions have strengthened market positions, provided pull-through profits (from the vertically integrated business), and often represent regional expansion compared to the large step-out growth that was initiated by major acquisitions, such as Kiewit. Acquisitions that had not been included in Rinker results for a full prior fiscal year before fiscal year 2005 contributed US\$90 million to fiscal year 2006 trading revenue and US\$9 million to fiscal year 2006 EBIT.

During fiscal years 2005 and 2006 Rinker also completed the construction of 9 new concrete plants, 6 new concrete block plant, and expanded production capacity at a number of concrete, concrete block and aggregate facilities. These newly constructed, expanded or upgraded plants contributed US\$114 million of trading revenue and US\$46 EBIT during the fiscal year ended March 31, 2006.

The contribution from recent acquisitions, greenfield or significantly expanded operations to the increased trading revenues and EBIT during fiscal year 2006 is set out in the following table:

	Increase YEM06 v YEM05 (US\$ million)			
	Trading Revenue		EBIT	
Fiscal year 2005	4,310		775	
Sources of increase:				
Acquisitions	58	+ 7%	5	+ 1%
Greenfield & expansion	87	+ 11%	27	+ 7%
Heritage	653	+ 82%	339	+ 91%
Fiscal year 2006	5,108		1,146	

Managing Rinker's vertically integrated business

A key Rinker Materials operating strategy is to hold a strong number 1 or number 2 market position in terms of revenue in its served markets, and manage the businesses through integrated markets where the company's concrete, block and asphalt operations source most of their aggregate and, in Florida, cement internally. This enables operations to take a price leadership role to improve trading revenue and EBIT, offset higher input costs through price increases and create operational efficiencies across the integrated system.

During fiscal year 2006 pricing initiatives have generally achieved increases above inflation levels, and have offset significant cost increases, particularly for fuel and energy, freight and raw materials. Operating cost increases associated with the increased volumes have been minimized, and in most cases EBIT margins have improved.

In Australia, Readymix is one of the top three companies in terms of revenue in most of its markets. Following a long period of inability to recover cost inflation in selling prices and insufficient profitability, Readymix now also maintains a strategy of price leadership which has preserved operating margins and the returns on the capital invested in the business despite steep cost increases and relatively flat construction activity during fiscal year 2006.

Further detail of the contribution of price improvement to results is outlined in the segment review that follows this summary.

Operational efficiencies have also been achieved by a culture of continuous improvement through the benchmarking of performance against competitors, internal benchmarking, the sharing and application of best practices, as well as the implementation of operational improvement projects. Businesses within the Rinker group have a track record of generating significant cost reduction through operational improvement with total savings for the fiscal year 2006 estimated at US\$52 million.

There are currently more than 1,000 active operational improvement projects across the Rinker group, supported by 10 employees primarily responsible to facilitate improvement teams.

The following table highlights the Rinker group's ability to improve costs as a percentage of trading revenue during the last two fiscal years:

	2006	2005
Trading revenue	100.0%	100.0%
Cost of sales	52.2%	55.7%
Gross margin	47.8%	44.3%
Warehouse and distribution	19.9%	19.1%
Selling, general & admin	7.3%	8.0%
Other	1.8%	0.7%
Profit before finance and income tax expense	22.4%	18.0%

Edgar Filing: RINKER GROUP LTD - Form 20-F

While warehouse and distribution costs have increased, this reflects an increased proportion of Rinker operations in aggregate and concrete where the freight cost in delivered product trading revenue is relatively high compared to higher priced manufactured goods, such as concrete pipe, prestressed concrete products and building materials. Fuel and ocean freight costs have also increased at a faster rate than price increases.

The following discussion of the Rinker group's operating results uses financial data prepared under A-IFRS. See Note 40 to the financial statements included elsewhere in this annual report for a description of the principal differences between A-IFRS and US GAAP as they relate to the Rinker group and a reconciliation of net profit and shareholders' equity for the years and as of the dates therein indicated.

Significant non-recurring transaction

In April 2005 Rinker Materials completed the sale of its 147-acre former Buffalo Road quarry in Las Vegas, Nevada to one of the major homebuilders in the United States, D.R Horton for total consideration of US\$34 million and a pre-tax gain of US\$31 million.

In February 2006 Readymix completed the sale of its 50% joint venture interest in the Emoleum Australian asphalt joint venture with Exxon Mobil Australia Pty Limited to a subsidiary of the engineering services group Downer EDI Limited. The sale included a long-term aggregate supply agreement to the new owners. The investment in Emoleum was a non-core operation for Readymix and the sale will not materially impact the ongoing results of the business. A pre-tax gain of US\$22 million was recorded on the sale.

1. General factors affecting the financial results of the Rinker group

Overview

Rinker group entities are manufacturers and suppliers of heavy building materials primarily in the US and Australia. In the US, Rinker's subsidiary, Rinker Materials, has five reporting segments: Aggregates; Cement; Concrete, concrete block and asphalt; Concrete pipe and products; and Other, which includes gypsum supply, prestressed concrete (sold in December 2004), polyethylene pipe (sold in February 2005), Rinker Materials' corporate overheads.

In Australia, Rinker's subsidiary, Readymix, produces aggregate, concrete, concrete pipe and other concrete products. Readymix also holds a substantial joint venture interest in a cement manufacturer and operates a concrete business in China. A joint venture interest in asphalt operations was sold in February 2006.

Rinker Materials

Rinker Materials' operating results are primarily impacted by the level of construction activity in the residential, commercial and civil segments of the construction materials industry. For the year ended March 31, 2006, approximately 55% of Rinker Materials' trading revenue was estimated by Rinker Materials' management to have been derived from residential construction, 30% from commercial construction, and 15% from civil construction.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Economic and population growth, coupled with rising personal incomes and low mortgage rates, have resulted in substantial growth in US residential construction over the last five years. Residential housing starts in the US in calendar years 2005, 2004, 2003, 2002, 2001 and 2000 were estimated by the US Department of Commerce to have been 2.07, 1.96, 1.85, 1.71, 1.60 and 1.57 million respectively, which compares to an average annual rate of 1.61 million starts between calendar years 1994 and 2004.

In Florida, which accounted for about 55% of Rinker Materials' trading revenues for the year ended March 31, 2006, the residential construction market has outperformed the US national average. Between calendar years 1999 and 2005, Dodge estimated an average annual growth of 19.8% in Florida residential construction and building spending, compared to a US average of 11.3%.

Growth in the US economy and falling interest rates resulted in strong growth in commercial construction between 1999 and 2001. Dodge estimates that total commercial construction and building spending increased from US\$132.6 billion in calendar year 1999 to US\$139.9 billion in calendar year 2001. In calendar years 2002 and 2003, commercial construction activity softened to US\$134.2 billion and US\$126.4 billion respectively due to a number of factors principally related to the weaker economic climate, but strengthened in calendar 2004 to US\$131.0 billion and in calendar year 2005 to US\$134.0 billion. Florida construction expenditure has increased, from US\$8.9 billion in calendar year 1999 to US\$9.2 billion in calendar year 2005.

Rinker Materials' exposure to the civil construction sector primarily relates to the construction of roads, highways and bridges. Civil construction activity in the US has increased over the last six years with spending as estimated by Dodge, increasing from US\$74.6 billion in calendar year 1999 to US\$97.5 billion in calendar year 2005. This was primarily due to TEA-21 (which covered the 6 year period 1998 to 2003) and SAFETEA (which covers the 6 year period 2004 to 2009), the legislated federal government infrastructure spending program.

Between the fiscal years ended 2003 and 2006, Rinker Materials' volumes have increased as a result of acquisitions, underlying growth in key residential and non residential construction markets, and the expansion of manufacturing and delivery capacity to strengthen market positions.

The acquisition of Kiewit in September 2002 provided step-out growth for Rinker Materials into the very strong Arizona construction market, and has become a regional platform for further expansion in western US states. Arizona now accounts for approximately 17% of Rinker Materials revenue and growth in construction activity in that state continues to be high compared to national averages. Smaller regional and bolt-on acquisitions have expanded the Rinker Materials footprint and provided volume growth for the businesses in Nevada, Tennessee and Florida.

Capital investment in new manufacturing facilities has also expanded production capacity in heritage operations. In the Florida operations in particular, during the last two years Rinker Materials has constructed eight new concrete plants, five new block manufacturing lines, and has significantly expanded the fleet of concrete mixers and block delivery trucks to strengthen market positions and supply growing demand. Rinker Materials has also invested to expand quarry production capacity to supply the increased aggregate and sand requirements of the internal concrete and block operations, external manufacturers, and the buoyant road construction market.

Rinker Materials' financial performance is impacted by changes in prices for its products. Pricing is determined by the level of demand and supply and the competitive environment in the various geographic and product markets in which Rinker Materials operates. Price growth in excess of inflation has generally been achieved for the majority of products and in most markets. Price increases have been particularly strong in fiscal year 2006, including initiatives to recover steep increases in raw material, freight, fuel and energy costs.

Readymix

For the fiscal year ended March 31, 2006, Readymix' s trading revenue was estimated to have been derived approximately 25% from residential construction, 45% from civil construction and the remaining 30% from commercial construction.

Over the last three years construction activity in the residential segment has been influenced primarily by changes in interest rates and housing price affordability. Following two interest rate rises, in November 2004 and December 2004, there was a gradual decline in residential

construction commencements during fiscal years 2005 and 2006. The decline, however, has been mild by historical

standards with the market supported by a relatively strong economy and low levels of unemployment. According to the Australian Bureau of Statistics, total spending in the residential segment increased slightly to A\$38.8 billion (US\$29.5 billion) in the year ended December 31, 2005, from A\$38.1 billion (US\$28.2 billion) in the year ended December 31, 2004. Spending was A\$33.7 billion (US\$23.5 billion) in the year to December 2003.

The commercial segment of the construction market strengthened during fiscal year 2006 compared to fiscal year 2005. According to the Australian Bureau of Statistics total spending in the commercial segment has grown from US\$13.6 billion (A\$18.4 billion) in the year ended December 31, 2004 to US\$16.4 billion (A\$21.5 billion) in the year ended December 31, 2005 due to higher business investment levels, supported by the relatively strong economy. Spending in the year to December 2003 was estimated at US\$11.1 billion (A\$15.9 billion).

Civil construction in Australia is largely dependent on government infrastructure programs. According to the Australian Bureau of Statistics spending in the civil segment has risen from US\$21.8 billion (A\$29.5 billion) in the year ended December 31, 2004 to US\$27.9 billion (A\$36.7 billion) in the year ended December 31, 2005. Spending in the year to December 2003 was estimated at US\$18.2 billion (A\$26.1 billion).

Acquisitions

As discussed in Item 4 Information on the Rinker group, the Rinker group has grown by acquisition and particularly in Rinker Materials through a number of major acquisitions between June 2000 and September 2002.

Smaller bolt-on acquisitions are also regularly undertaken as part of the Rinker group's growth strategy. For the year ended March 31, 2006 bolt-on acquisitions included:

FCCI Readymix and Brooksville Concrete concrete operations in Florida

Infiniton Sand a sand supply source for the Las Vegas, Nevada market

Carder Concrete Products a concrete pipe operation with plants in Colorado and Wyoming

Charter Materials a concrete plant and sand operations in Prescott, Arizona

Numix and Harrington Concrete, on the north coast of New South Wales, Australia

Keys Concrete one of the largest independent concrete and block manufacturers in Florida

Acquisitions are integrated into Rinker Materials, as part of the Aggregate, Cement, Concrete, concrete block and asphalt, and concrete pipe and products segments, and Readymix, and included in the discussion of results that follows.

2. Exchange rates

For the year ended March 31, 2006, around 80% of the Rinker group's trading revenue was generated by Rinker Materials in the US. For the years ended March 31, 2006 and 2005, there were virtually no movements of currency between US dollars and Australian dollars that resulted in a material amount of realized exchange gains or losses. As a result, the only significant impact of changes in the US

dollar/Australian dollar exchange rate is one of accounting translation for financial reporting purposes. An appreciation of the A\$ relative to the US\$ would be expected to have a favorable impact on the Rinker group's reported US\$ results.

The directors believe that the best measure of performance for Rinker Materials in the US and Readymix in Australia is their respective local currencies in as much as each generates all revenue and incurs all costs in that local currency. Set out below is performance information in US\$. Supplementary performance information for Readymix in Australian dollars, is set out starting at page 60.

The average month end exchange rates used for translation of the Readymix A\$ transactions into US\$, for the years ended March 31, 2006 and 2005 are set out in Item 3.E. Supplementary Information Australian Dollar/Exchange Rates .

3. Overview Year ended March 31, 2006 compared to the year ended March 31, 2005

The Rinker group's trading revenue and EBIT for the years ended March 31, 2006 and 2005 are set out below in United States dollars. A further breakdown of the Rinker group's results to net profit is included in Note 2 to the financial statements, which are presented elsewhere in this annual report.

	Rinker group Trading revenues and EBIT US\$ millions Year Ended March 31,			
	2006		2005	
	Trading revenues	EBIT	Trading revenues	EBIT
Rinker Materials	4,029	979	3,319	640
Readymix	1,079	179	991	147
Corporate costs		(12)		(11)
Total Rinker group	5,108	1,146	4,310	775

As previously defined under Certain definitions, EBIT means Profit before finance and income tax expense in accordance with A-IFRS.

Trading revenue

The Rinker group's trading revenues for the fiscal year ended March 31, 2006 were US\$5,108 million compared to US\$4,310 million for the fiscal year ended March 31, 2005. This represented an increase of US\$798 million, or 19%. In Rinker Materials an increase in trading revenue of US\$710 million was primarily due to improved prices, which increased compared to fiscal year 2005 in all product categories and in most markets. Favorable economic conditions also resulted in increased volumes in most business segments. Reported US\$ trading revenues in Readymix increased by US\$88 million, reflecting a US\$75 million movement in constant currency from higher volumes due to continued growth in construction markets in Australia and China and price improvement in Australia. In addition, an increase of US\$13 million was caused by the 1.0% change in the A\$/US\$ exchange rate.

Cost of Sales

Cost of sales for the Rinker group increased by 11% to US\$2,666 million in fiscal year 2006 from US\$2,399 million in fiscal year 2005. In Rinker Materials, cost of sales increased by US\$210 million, or 12%, in fiscal year 2006, due principally to higher trading volumes, and higher costs for fuel, steel, imported cement and ocean freight which have increased at rates above general inflation.

Warehouse and distribution costs

Warehouse and distribution costs rose 23% to US\$1,015 million in fiscal year 2006 from US\$825 million in fiscal year 2005. In Rinker Materials, the increase in costs of US\$175 million in fiscal year 2006 was due principally to higher fuel costs and increased distribution costs on the higher volumes sold.

In fiscal year 2006 warehouse and distribution costs represented 19.9% of trading revenue compared to 19.1% in fiscal year 2005. The increase in warehouse and distribution costs as a percentage of trading revenue compared to the fiscal year 2005 reflects an increased proportion of Rinker operations in aggregate and concrete where the freight cost in delivered product revenue is relatively high compared to higher priced manufactured goods, such as concrete pipe, concrete products and building materials. Fuel and ocean freight costs have also increased at a faster rate than price increases.

Selling, general and administrative costs

Selling, general and administrative costs rose 9% to US\$374 million in fiscal year 2006 from US\$343 million in fiscal year 2005. Selling, general and administrative costs were 7.3% of trading revenue in fiscal year 2006 compared to 8.0% in fiscal year 2005. Increased prices and trading volumes and the integration of business acquisitions within existing administration cost structures have reduced administration and other operating costs as a percentage of trading revenue. Operating cost improvements have also contributed to offsetting upward cost pressures in existing businesses and from the addition of new businesses.

Other income and expenses

Other income and other expenses primarily relate to the divestment of non-core businesses and the disposal of property, plant and equipment and other assets. Other income was US\$68 million in fiscal year 2006, an increase from US\$21 million in fiscal year 2005. In fiscal year 2006, Rinker Materials disposed of a property at Buffalo Road, Las Vegas, Nevada for net proceeds of US\$34 million. The gain on disposal of US\$31 million was included in other income. In Readymix, the investment in the Emoleum joint venture was sold for a gain on disposal of US\$22 million, also included in other income.

In fiscal year 2005, the Prestress business was divested by Rinker Materials in December 2004 with proceeds on disposal of US\$33 million, and the Polypipe business was divested in February 2005 with proceeds on disposal of US\$67 million. All other transactions in fiscal year 2006 and 2005 related to the disposal of surplus property, plant and equipment, primarily in Rinker Materials, and were all individually less than US\$10

million.

EBIT

The Rinker group's EBIT of US\$1,146 million for the year ended March 31, 2006 represented a US\$371 million, or 48%, increase compared to EBIT for the year ended March 31, 2005 of US\$775 million. The increase was due primarily to a US\$339 million increase in Rinker Materials and a US\$32 million increase in Readymix. The increase in Rinker Materials principally reflects continuing increases in volumes and prices in the aggregate and concrete and block operations, improved gross margins in concrete pipe, and

strong volume growth in cement. The increase in Readymix principally reflects the gain on the sale of the joint venture interest in Emoleum and good returns from large project work.

Borrowing costs

Borrowing costs were US\$42 million in fiscal year 2006 and US\$54 million fiscal year 2005. Average outstanding debt was lower in fiscal year 2006 from fiscal year 2005 which resulted in the lower borrowing costs. Rinker debt is predominantly borrowed by Rinker Materials and borrowing costs are predominantly incurred in Rinker Materials.

Interest income

Interest income was unchanged at US\$22 million in both fiscal year 2006 and fiscal year 2005. Cash balances have been invested in short-term interest-bearing investments pending investment in acquisition opportunities. At the end of fiscal year 2006 Rinker had approximately US\$289 million on short-term deposit, principally in A\$ accounts earning approximately 5.5% interest.

Income tax expense

Income tax expense increased by US\$137 million to US\$382 million in fiscal year 2006, compared to US\$245 million in fiscal year 2005. The Rinker group's effective tax rate increased from 33.0% in fiscal year 2005 to 33.9 % in fiscal year 2006. The increase in the Rinker Group's effective tax rate in fiscal year 2006 principally reflects a higher proportion of the Rinker Group's EBIT being derived in the United States, where the federal rate of 35% plus state tax on earnings is higher than the corporate rate of 30% in Australia.

Net profit attributable to members of Rinker

The net profit attributable to members of Rinker increased by US\$247 million or 50% to US\$740 million for fiscal year 2006 from US\$493 million for fiscal year 2005.

Net profit attributable to members of Rinker of US\$740 million in fiscal year 2006 comprised EBIT of US\$1,146 million plus interest income of US\$22 million less borrowing costs of US\$42 million, tax expense of US\$382 million, and minority interests of US\$3 million.

Net profit attributable to members of Rinker of US\$493 million in fiscal year 2005 comprised EBIT of US\$775 million plus interest income of US\$22 million less borrowing costs of US\$54 million, tax expense of US\$245 million, and outside equity interests of US\$5 million.

4. Results of operations for Rinker Materials segments

Rinker Materials has five business segments: Aggregate; Cement; Concrete, concrete block and asphalt; Concrete pipe and products; and Other. Rinker Materials records its transactions in its own financial statements in US dollars. Results of operations in US\$ for Rinker Materials for the years ended March 31, 2006 and 2005 are set out below.

Rinker Materials
Business Segment Trading revenues and EBIT (3)
US\$ millions

Year Ended March 31,

	2006		2005	
	Trading revenues	EBIT	Trading revenues	EBIT
Aggregates	1,074.1	262.5	861.9	195.4
Cement	487.0	142.4	389.4	117.7
Concrete, concrete block and asphalt	2,180.3	374.4	1,634.9	212.4
Concrete pipe and products	575.8	133.3	472.0	89.5
Other (1)	370.9	66.4	461.6	24.6
Eliminations (2)	(658.8)		(501.0)	
Total Rinker Materials in US\$	4,029.3	979.0	3,318.8	639.6

(1) Other includes Gypsum Supply, Prestressed concrete (sold in December 2004), Polypipe (sold in February 2005), Rinker Materials corporate costs and unallocated divestment gains and losses.

(2) Aggregates and Cement sell products to other Rinker Materials segments. This internal revenue is eliminated on consolidation.

(3) EBIT means profit before finance and income tax expense in accordance with A-IFRS.

i. Aggregates

The results of operations for the Aggregates segment for the years ended March 31, 2006 and 2005 are set out below.

US\$ million	Year ended March 31	
	2006	2005
External revenue (1)	664.3	553.9
Inter segment revenue (2)	409.8	308.0
Trading revenue	1,074.1	861.9
EBIT	262.5	195.4
EBIT margin % (3)	24.4	22.7

(1) External revenue means revenue from customers not part of the Rinker group

(2) Inter segment revenue means revenue from customers within the Rinker group

(3) EBIT margin % is EBIT divided by trading revenue

Aggregates trading revenue has increased as a result of both volume and price increases. Volumes have increased with the growth of residential construction particularly in Florida and Arizona, and growth in highway spending particularly in Florida and Georgia. Prices have improved due to strong demand, a scarcity of aggregates in Florida, and initiatives to recover recent steep cost increases.

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of US\$1,074.1 million for the year ended March 31, 2006 represented a US\$212.2 million, or 25%, increase compared to trading revenue for the year ended March 31, 2005 of US\$861.9 million.

The increase principally reflects:

Increased prices and volumes in the Florida market, which accounted for increased trading revenue of approximately US\$107 million, including the pull through impact from recent acquisitions and greenfields expansion in the concrete, concrete block and asphalt segment;

Price improvement across all Rinker Materials western markets, particularly Arizona, Portland, Nevada and Everett in Washington state, with an overall increase in trading revenue of US\$86 million; and

Increased prices and volumes in Georgia, Kentucky and Tennessee where trading revenue increased by US\$19 million.

EBIT: EBIT of US\$262.5 million for the year ended March 31, 2006 represented a US\$67.1 million, or 34%, increase compared to EBIT for the year ended March 31, 2005 of US\$195.4 million. This was due principally to an increase in average prices of 16%, with improvement generally achieved across most markets and in excess of the steep increase in fuel and energy costs ahead of cost inflation. The EBIT margin increased by 1.7 percentage points to 24.4%.

ii. Cement

The results of operations for the Cement segment for the years ended March 31, 2006 and 2005 are set out below.

US\$ million	Year ended March 31	
	2006	2005
External revenue (1)	238.0	196.4
Inter segment revenue (2)	249.0	193.0
Trading revenue	487.0	389.4
EBIT	142.4	117.7
EBIT margin% (3)	29.3	30.2

- (1) External revenue means revenue from customers outside the Rinker group
- (2) Inter segment revenue means revenue from customers within the Rinker group
- (3) EBIT margin % is EBIT divided by trading revenue

Trading revenue growth was driven principally by volume increases and strong price growth during the year ended March 31, 2006.

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of US\$487.0 million for the year ended March 31, 2006 represented a US\$97.6 million, or 25%, increase compared to the trading revenue for the year ended

March 31, 2005 of US\$389.4 million. The increase in trading revenue reflected a 14% average increase in prices and a 7% increase in volumes.

Price improvement was facilitated by the strong construction market in Florida and high demand for cement, but also includes cost recovery with electricity, coal, fuel and imported cement costs all increasing above inflation. Volume increased following severe cement shortages in fiscal year 2005. Shipping shortages, which had been experienced in the prior year, were not repeated and both Rinker Materials cement mills increased production. Other major producers were also able to increase supply, increasing traded volumes.

EBIT: EBIT of US\$142.4 million for the year ended March 31, 2006 represented a US\$24.7 million, or 21%, increase compared to EBIT for the year ended March 31, 2005 of US\$117.7 million.

The increased EBIT was due to the volume increase, although margins declined, particularly in the first half of the fiscal year when cost increases outpaced price improvement.

iii. Concrete, concrete block and asphalt

The results of operations for the Concrete, concrete block and asphalt segment for the years ended March 31, 2006 and 2005 are set out below.

US\$ million	Year ended March 31	
	2006	2005
Trading revenue	2,180.3	1,634.9
EBIT	374.4	212.4
EBIT margin % (1)	17.2	13.0

(1) EBIT margin % is EBIT divided by trading revenue

Trading revenue and EBIT increased significantly in fiscal year 2006 driven by strong demand in the Florida, Arizona and Nevada residential markets, reflected in higher prices and volumes, and the expansion of operations through both bolt-on acquisitions and greenfields expansion.

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of US\$2,180.3 million for the year ended March 31, 2006 represented a US\$545.4 million, or 33%, increase compared to trading revenue for the year ended March 31, 2005 of US\$1,634.9 million. Approximately two thirds of the increased revenue was in the Florida market, where both concrete and block volumes were at record levels, mainly due to growth in the Florida residential market.

During the last two years Rinker Materials has expanded its operations in Florida to keep up with customer demand in fast growing regions of the State, through both bolt-on acquisitions and greenfields expansion, particularly in south west Florida and the Florida Panhandle.

Overall, concrete volumes were ahead of the previous year by 12% and average prices were up 20%. Average block prices increased by 25% and volumes were up by 11%.

EBIT: EBIT of US\$374.4 million for the year ended March 31, 2006 represented a US\$162.0 million, or 76%, increase compared to EBIT for the year ended March 31, 2005 of US\$212.4 million.

Approximately 70% of the EBIT increase was in the Florida market, where housing activity remained very strong and the results include a full year contribution from fiscal year 2005 acquisitions and greenfields expansions and a part year contribution from fiscal 2006 acquisitions and new plant start-ups. Operations in Arizona, Nevada, and the Pacific Northwest were also strongly ahead of the previous year.

iv. Concrete pipe and products

The results of operations for the Concrete pipe and products segment for the years ended March 31, 2006 and 2005 are set out below.

US\$ million	Year ended March 31	
	2006	2005
Trading revenue	575.8	472.0
EBIT	133.3	89.5
EBIT margin % (1)	23.1	19.0

(1) EBIT margin % is EBIT divided by trading revenue

EBIT lifted sharply and margin growth in the concrete pipe and products segment continued during the year end March 31, 2006 with favorable market conditions and a mild winter, along with significant operational cost improvements.

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of US\$575.8 million for the year ended March 31, 2006 represented a US\$103.8 million, or 22%, increase compared to trading revenue for the year ended March 31, 2005 of US\$472.0 million. This improvement was principally due to a 12% increase in price combined with a 9% increase in volumes compared to the previous year.

EBIT: EBIT of US\$133.3 million for the year ended March 31, 2006 represented a US\$43.8 million, or 49%, increase compared to EBIT for the year ended March 31, 2005 of US\$89.5 million.

This reflects principally:

Improved margins, with price increases and operational improvement more than offsetting higher costs for steel, cement, power and fuel (US\$33 million); and

Increased volume, from both improved economic conditions across most states and market share gains (US\$11 million);

v. ***Other***

The results of operations for the Other segment for the years ended March 31, 2006 and 2005 are set out below. This segment includes gypsum supply, Rinker Materials corporate unallocated costs and

Edgar Filing: RINKER GROUP LTD - Form 20-F

unallocated divestment profits, and the pre-stressed concrete and polyethylene pipe businesses, which were divested during the fiscal year ended March 31, 2005.

US\$ million	Year ended March 31	
	2006	2005
Trading revenue	370.9	461.6
EBIT excluding Rinker Materials corporate unallocated costs and unallocated divestment profits	55.1	37.8
Rinker Materials corporate unallocated costs and divestment profits	11.3	(13.2)
EBIT	66.4	24.6

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of US\$370.9 million for the year ended March 31, 2006 represented a US\$90.7 million or 20% decrease compared to the trading revenue for the year ended March 31, 2005 of US\$461.6 million, reflecting businesses divested in fiscal year 2005 partly offset by increased revenue in gypsum supply.

Gypsum supply trading revenue increased by 21%, primarily due to price increases across the range of building materials sold by the business, which include wallboard, metal framing, stucco cement and accessories. Volumes also increased, with wallboard volume 7% higher than the previous fiscal year.

Trading revenue in Prestress decreased by US\$57 million following divestment of the business in December 2004. Prior to the sale the business had contributed revenue of US\$58 million, and during the last quarter of the year ended March 31, 2005 additional revenue of US\$9 million was recorded from delivery of product manufactured prior to divestment and included in retained working capital. A further US\$11 million of trading revenue has been recorded during the year ended March 31, 2006 from the delivery of remaining product.

The Polypipe polyethylene pipe and pipe liners business was divested in February 2005 for sale proceeds of US\$67 million. Prior to the sale the business had contributed revenue of US\$96 million during the year end March 31, 2005.

EBIT: Excluding Rinker Materials corporate unallocated costs and unallocated divestment profits, EBIT was US\$55.1 million for the year ended March 31, 2006 representing a US\$17.3 million increase compared to EBIT of US\$37.8 million for the year ended March 31, 2005.

The segment EBIT includes the trading results from the gypsum supply business in fiscal years 2006 and 2005, and in fiscal year 2005 the trading results of the prestress and polypipe operations before their sale, as well as the gain/loss on their divestment during that year.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Gypsum Supply EBIT increased by 34% during the year ended March 31, 2006, primarily due to improved margins as selling prices increased faster than increasing product costs in the strong Florida residential market, and from the higher volume.

Prestress was divested for an amount below book value during the year ended March 31, 2005, resulting in a non-cash pre-tax book loss of approximately US\$16 million. The operations were incurring trading losses prior to the sale. During fiscal year 2006 the delivery of product made prior to the sale continued for a break-even EBIT result.

The divestment of Polypipe realized a book gain before tax of around US\$7 million during the fiscal year ended March 31, 2005. Trading operations prior to the divestment had been favorable, assisted by strong demand from the oil and gas industry for pipeline products. There was no further impact on Rinker Materials results from Polypipe during fiscal year 2006.

Rinker Materials corporate unallocated costs and unallocated divestment profits was a net gain of US\$11.3 million for the year ended March 31, 2006 compared to net costs of US\$13.2 million for the prior fiscal year. Included in fiscal year 2006 results is a pre-tax book gain of around US\$31 million from the sale of the former Buffalo Road quarry in Las Vegas, Nevada.

5. Results of the Readymix segment

Impact of currency exchange rate

As Readymix records its transactions in its own financial statements in Australian dollars and these results are translated into US dollars for the purposes of combination into the financial statements of the Rinker group, the Rinker group is then susceptible to changes in the exchange rate between the US dollar and the Australian dollar. An appreciation of the A\$ relative to the US\$ has a favorable impact on the Rinker group's reported US\$ results.

Given that Readymix records its transactions in its own financial statements in Australian dollars, the following management discussion and analysis of the financial results also identifies the impact of currency exchange rates on results.

US\$ million	Year ended March 31	
	2006	2005
Trading revenue	1,079.1	990.9
EBIT	179.1	146.9
EBIT margin % (1)	16.6	14.8

(1) EBIT margin % is EBIT divided by trading revenue

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of US\$1,079.1 million for the year ended March 31, 2006 represented a US\$88.2 million, or 9%, increase compared to trading revenue for the year ended March 31, 2005 of US\$990.9 million. This reflected a US\$75.0 million movement in constant currency and an increase of US\$13 million caused by the 1.0% change in the A\$/US\$ exchange rate.

The increase in constant currency trading revenue was due to price improvement in all Australian product lines, increased concrete volumes due to strong construction activity in the civil and commercial sectors, and higher concrete products sales to major infrastructure projects.

Australian concrete prices increased by 4%, aggregate by 6%, and concrete pipe and product prices by 3% during the fiscal year ended March 31, 2006. Price increases reflect both the recovery of cost inflation, particularly in fuel and raw materials, and the favorable market conditions in regional areas and from large infrastructure projects.

Australian concrete volumes increased by 4%, concrete pipe and products volumes by 4%, while aggregate volumes were flat in fiscal 2006. Volumes were assisted by continued growth in the Australian construction sector, especially from major road and infrastructure projects.

In China, revenue was flat with the previous year. Concrete volumes increased by 5% reflecting large project work, but intense competition resulted in a decline in average prices of 2%.

EBIT: EBIT of US\$179.1 million for the year ended March 31, 2006 represented US\$32.2 million, or 22%, increase compared to EBIT of US\$146.9 million for the year ended March 31, 2005. This reflected a US\$29.9 million movement in constant currency and an increase of US\$2.3 million caused by the 1.0% change in the A\$/US\$ exchange rate.

The increase in constant currency reflects principally:

Improvement in each of the Australian concrete, aggregate and concrete pipe and products operations from the achievement of volume and price growth (US\$4 million);

Divestment of Readymix's 50% share in the Emoleum (asphalt) joint venture giving rise to a gain of US\$22 million.

Results of operation for the Readymix segment - Australian Dollars

Readymix operations in Australia generate all revenue and incur all costs in A\$. As a result, the only impact of changes in the US dollar/Australian dollar exchange rate is one of accounting translation for financial reporting purposes. For the convenience of readers interested in Readymix results of operations in Australian dollars, set out below is management discussion and analysis of the financial results of the Readymix segment in Australian dollars.

A\$ million	Year ended March 31	
	2006	2005
Trading revenue	1,440.5	1,340.7
EBIT	236.7	199.7
EBIT Margin%(1)	16.4	14.9

(1) EBIT margin % is EBIT divided by trading revenue

Year ended March 31, 2006 compared to the year ended March 31, 2005

Trading Revenue: Trading revenue of A\$1,440.5 million for the year ended March 31, 2006 represented an A\$99.8 million, or 7%, increase compared to trading revenue for the year ended March 31, 2005 of A\$1,340.7 million. The increase was due to price improvement in all Australian product lines, increased concrete volumes due to strong construction activity in the civil and commercial sectors, and higher concrete product sales to major infrastructure projects.

Australian concrete increased by 4%, aggregate by 6%, and concrete pipe and products prices by 3% during the fiscal year ended March 31, 2006. Price increases reflect both the recovery of cost inflation, particularly in fuel and new materials, and favorable market conditions in regional areas and from large infrastructure projects.

Australian concrete volumes increased by 4%, concrete pipe and product volumes by 4%, while aggregate volumes were flat in fiscal 2006.

In China revenue was flat with the previous year. Concrete volumes increased by 5% reflecting large project work, but intense competition resulted in a decline in average prices of 2%.

EBIT: EBIT of A\$236.7 million for the year ended March 31, 2006 represented an A\$37.0 million, or 19%, increase compared to EBIT of A\$199.7 million for the year ended March 31, 2005.

The increase reflects principally:

Improvement in each of the Australian concrete, aggregate and concrete pipe and products operations from the achievement of strong volume and price growth (A\$6 million);

Divestment of Readymix's 50% share in the Emoleum (asphalt) joint venture giving rise to a gain of A\$26 million

B. Liquidity and Capital Resources

Liquidity

The Rinker group meets its funding requirements through a combination of operating cash flows and external debt raising. In management's opinion, the Rinker group's cash flows and funding arrangements are sufficient to meet the Rinker group's current liquidity requirements.

The table below sets out the Rinker group's cash flow statements for the years ended March 31, 2006 and 2005.

Cash flow Statements (1)

US\$ millions	Year ended March 31	
	2006	2005
Net cash from operating activities	942.4	678.8
Net cash (used in) investing activities	(410.3)	(177.6)
Net cash (used in) financing activities	(814.3)	(257.0)
Net increase (decrease) in cash held	(282.2)	244.2

(1) A reconciliation of net profit to net cash from operating activities (including movements in working capital) is set out in the financial statements included elsewhere in this annual report.

Cash flows from operating activities in the year ended March 31, 2006 of US\$942.4 million represented a US\$263.6 million, or 38.8%, increase compared to US\$678.8 million in the year ended March 31, 2005. This was principally due to improved EBIT of US\$370.5 million with increases in all segments primarily from selling price and volume growth, partly offset by US\$74.4 million increase in working capital and US\$129.7 million increase in income tax payments compared with the year ended March 31, 2005. Net investing cash flows consist primarily of capital expenditure necessary to maintain the productive capacity of the Rinker group, outflows relating to acquisitions (net of cash acquired), and net proceeds from divestments.

Net cash used in investing activities increased to US\$410.3 million in the year ended March 31, 2006 from the US\$177.6 million for the year ended March 31, 2005. Purchase of property plant and equipment increased by US\$102.6 million compared to the year ended March 31, 2005. Purchase of controlled entities and businesses increased by US\$127.6 million compared to the year ended March 31, 2005 primarily from the Keys Concrete acquisition in March 2006.

Net cash used in financing activities increased to US\$814.3 million in the year ended March 31, 2006 from US\$257.0 in the year ended March 31, 2005. The three largest increases included in the total US\$557.3 million increase were US\$155.5 million for net repayment of borrowings, US\$89.4 million in dividends paid, and US\$315.3 for Rinker Group on market share buyback.

Capital expenditure including purchases of controlled entities and businesses, were as follows:

US\$ millions	Year ended March 31	
	2006	2005
Rinker Materials	488	239
Readymix	57	75
Total Rinker group	545	314

Edgar Filing: RINKER GROUP LTD - Form 20-F

Acquisitions, particularly large ones, have been slow across the industry during the last two years, and Rinker's capital expenditure has mainly comprised, bolt-on acquisitions and expansion of the heritage operations, as well as operating capital expenditure to maintain capacity. In fiscal year 2006 Rinker acquired Keys Concrete, one of the largest independent concrete and block manufacturers in Florida, and six smaller concrete or concrete and quarry operations – two each in Florida and New South Wales, Australia, one in Arizona and another in Nevada. Rinker also acquired Carder Concrete Products with concrete pipe plants in Colorado and Wyoming.

Heritage operations were expanded with the completion or expansion of nine concrete plants and five block plants in Florida and associated expenditure to expand aggregate capacity and concrete mixer and block truck fleets to service these plants. Operations were also expanded in Nevada with the completion of a new concrete plant and new block manufacturing line for the fast growing Las Vegas market.

At March 31, 2006, the Rinker group had capital expenditure commitments of US\$63.8 million outstanding.

Capital resources

The Rinker group's debt profile during fiscal years 2006 and 2005 has been as follows:

Group Debt Profile as at March 31

US\$ millions, except percentage and times indicated	2006	2005
Long-term debt (1)	645.2	610.9
Total debt (2)	650.6	868.0
Net debt (3)	361.5	279.8
Net debt to EBITDA (times) (4)	0.3	0.3
EBIT to Net Interest Expense (times) (5)	77.5	32.6
Net debt to capitalization (6)	11.9%	9.9%

(1) Debt maturing in excess of 12 months from period end.

(2) Long-term debt plus short-term debt (including bank overdrafts).

Total Debt as at March 31

US\$ millions	2006	2005
Current interest-bearing debt	5.4	257.1
Non-current interest-bearing debt	645.2	610.9
Total debt	650.6	868.0

(3) Total debt less cash assets.

Net Debt as at March 31

US\$ millions	2006	2005
Total debt	650.6	868.0
Cash assets	(289.1)	(588.2)
Net debt	361.5	279.8

- (4) Ratio of net debt to EBITDA (EBITDA represents EBIT before Depreciation and Amortization)

Net debt to EBITDA as at March 31

US\$ millions, except times indicated	2006	2005
Net debt	361.5	279.8
EBITDA	1,354.5	970.1
Net debt to EBITDA (times)	0.3	0.3
EBIT	1,145.6	775.1
Depreciation and Amortization	208.9	195.0
EBITDA	1,354.5	970.1

- (5) Ratio of EBIT to net interest expense (interest expense less interest income)

EBIT to Net Interest Expense (or interest cover) as at March 31

US\$ millions, except times indicated	2006	2005
EBIT	1,145.6	775.1
Net Interest Expense	14.8	23.8
EBIT to Net Interest Expense (times)	77.5	32.6

- (6) Ratio of net debt to net debt plus total shareholders equity

Net debt to capitalization as at March 31

US\$ millions, except percentage indicated	2006	2005
Net debt	361.5	279.8
Total shareholders' equity	2,687.3	2,551.1
Net debt to capitalization	11.9%	9.9%

Rinker's management uses net debt to EBITDA, interest cover and net debt to capitalization information to assess the financial position of the Rinker group and believes these ratios are useful to investors because they relate the net debt levels of the group to the cash flows, earnings and equity of the business. Management believes the primary determinant of Rinker's debt capacity is cash flow and earnings, and therefore has greater regard to measures of Rinker's capital resources calculated using cash flow and earnings such as net debt to EBITDA and interest cover than those calculated using balance sheet measures, such as net debt to capitalization. Net debt does not include off balance sheet financial commitments, such as operating leases or other commitments. The net debt to EBITDA and net debt to capitalization calculations do not represent a measure of solvency, nor liquidity, nor Rinker's ability to pay debts or make other required payments as they fall due. These non-GAAP measures should not be considered a substitute for the balance sheet included elsewhere in this annual report.

Debt facilities

As at March 31, 2006 the Rinker group had debt facilities comprised as follows:

Type	Maturing	Limits / Outstanding US\$ million
Uncommitted bank letters of credit, guarantees and loan	Annual review	153.1
Bank loans	December 2006 April 2010	1,177.5
Commercial Paper	No fixed maturity	400.0
Rinker Materials Private Placement	August 2010	100.0
Rinker Materials Private Placement	December 2010	100.0
Rinker Materials Bonds	July 2025	149.9

As of March 31, 2006, the Rinker group is in compliance with all debt covenants.

Bank loans

Rinker Materials has established banking credit facilities of US\$1,177.5 million at March 31, 2006 (of which US\$892.5 million were undrawn at March 31, 2006). These are revolving cash advance facilities provided by the Rinker group's eight relationship banks on a bilateral basis. The borrowings under each of these bilateral facilities are guaranteed by Rinker. In total, the facilities provided have five maturities as follows:

US\$237.5 million, which mature 364 days from initial draw down notice date ranging from December 2006 to April 2007;

US\$185.0 million, which mature in April 2008.

US\$112.5 million which matures December 2008.

US\$487.5 million, which mature in April 2009.

US\$155.0 million, which mature in April 2010.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Interest is payable by Rinker Materials on amounts drawn under the facilities at LIBOR plus a margin. The margins payable under the facilities are generally consistent with that which an A-/BBB+ rated entity would expect to obtain for facilities of this size and nature and vary by tranche for each individual bank. Facilities totaling US\$595.0 million feature credit margins that are fixed over the life of the agreement, while facilities totaling US\$582.5 million feature margins that are set by reference to the actual levels of gearing (defined as net debt divided by EBITDA which means consolidated profit from ordinary activities before finance, income tax, depreciation and amortization, in accordance with A-IFRS) or interest cover (defined as EBITDA divided by net interest expense) reported by Rinker and calculated on a rolling 12 month basis, using publicly reported consolidated half yearly and annual results. Based on Rinker's results at March 31, 2006, the overall weighted average margin over LIBOR across all facilities was approximately 0.32% per annum.

The facilities contain customary provisions relating to events of default, which could trigger early repayment. The facilities also contain certain restrictive covenants and financial covenants that are customary for facilities of this nature. The restrictive covenants limit the addition of new secured debt (generally not to exceed 10% of consolidated assets of Rinker group) and the amount of debt permitted to be incurred by entities other than Rinker and Rinker Materials (not to exceed 15% of consolidated assets of Rinker group). The financial covenants specify a maximum net debt to EBITDA ratio (3 times) and a minimum EBITDA divided by net interest expense ratio (3.25 times) that must be maintained, with both covenants calculated on a rolling 12 month basis using publicly reported consolidated half yearly and annual results. Other than the requirements to comply with the limitations and satisfy the ratios set forth above, the facility agreements do not restrict the borrowing of additional amounts of unsecured debt by companies in the Rinker group as long as the loans under the credit facilities have at least the same preference in the sharing of assets upon liquidation as any additional unsecured obligations. There are no credit rating downgrade triggers that could cause early repayment under these facilities.

Commercial Paper

Rinker Materials can issue from time to time commercial paper under a US commercial paper program that was established in April 2006. This program replaces a US\$400 million commercial paper program, established in 1991, under which Rinker Materials previously issued commercial paper, which has since been terminated.

The program has no maturity and allows for a maximum of US\$1 billion of notes to be issued and outstanding at any one time. The notes have maturities up to 365 days (366 days in leap year) from the date of issuance and are issued at par less a discount representing an interest factor or, if interest bearing, at par. As at March 31, 2006, there were no notes issued and outstanding under the program.

US\$ Bonds

Rinker Materials has issued US\$149.9 million in bonds paying interest of 7.70% per annum due on July 21, 2025 guaranteed by Rinker.

The indenture governing the 2025 bonds contains customary provisions relating to events of default, which could trigger early repayment. The indenture also contains certain restrictive covenants that are customary for financings of this nature. The restrictive covenants limit the addition of new secured debt (generally not to exceed 10% of consolidated net tangible assets of Rinker group) and restrict any merger of Rinker or Rinker Materials with another party unless the bonds are assumed by the entity resulting from such merger. The indenture does not restrict the borrowing of additional amounts of unsecured debt by companies in the Rinker group. There are no credit rating downgrade triggers that could cause early repayment of the bonds.

Private Placements

Rinker Materials has privately placed US\$200 million in senior notes, in two series of US\$100 million each, maturing on August 8, 2010 and December 1, 2010, guaranteed by Rinker.

The notes contain customary provisions relating to events of default, which could trigger early repayment. The notes also contain certain restrictive covenants and financial covenants that are customary for financings of this nature. The restrictive covenants limit the addition of priority debt (generally not to exceed 25% of consolidated assets of Rinker group), where priority debt is defined as debt secured in priority to the notes and debt incurred by entities other than Rinker and Rinker Materials. The financial covenants specify a maximum net debt to EBITDA ratio (3.5 times) and a minimum EBITDA divided by net interest expense ratio (2.75 times) that must be maintained, with both covenants calculated

on a rolling 12 month basis using publicly reported consolidated half yearly and annual results. Other than the requirements to comply with the limitations and satisfy the ratios set forth above, the notes do not restrict the borrowing of additional amounts of unsecured debt by companies in the Rinker group as long as the notes have at least the same preference in the sharing of assets upon liquidation as any additional unsecured obligations. There are no credit rating downgrade triggers that could cause early repayment of the notes.

Other borrowings

At March 31, 2006 Rinker group entities had in place uncommitted facilities available for short-term cash advances and the issuance of letters of credit and bank guarantees which totaled US\$153 million. US\$91 million in letters of credit and bank guarantees were issued against these facilities at March 31, 2006.

There are no legal or economic restrictions on the ability of its subsidiaries to transfer funds to Rinker in the form of cash dividends, loans or advances. The previously existing 15 percent US dividend withholding tax was eliminated effective July 1, 2003.

Rinker is not aware of any restrictions on the use of committed borrowing facilities other than as detailed. Borrowing requirements are not normally subject to any seasonal factors.

C. Research and Development, Patents and Licenses

The dollar amounts are not significant.

D. Trend Information

Relevant industry and market trends for the Rinker group as a whole and for Rinker Materials and Readymix are discussed in Item 5.A. - Management discussion and analysis of the financial results .

Rinker is not aware of any trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on the Rinker group's trading revenues, income from continuing operations, profitability, liquidity or capital resources, or that would cause reported financial information not necessarily to be indicative of future operating results or financial condition, other than as described in this annual report, including the proposed capital return and special dividend disclosed in Item 5- Events subsequent to March 31, 2006 .

E. Off-balance sheet financial arrangements

Edgar Filing: RINKER GROUP LTD - Form 20-F

The Rinker group does not use special purpose vehicles or any other significant form of off-balance sheet financing. Details of the Rinker group's use of financial instruments are included in Item 11 - Quantitative and Qualitative Disclosures about Market Risks and Note 28 of the financial statements included elsewhere in this annual report.

Guarantees have been made in respect of self-insured workers compensation obligations and in lieu of contract retention payments, deposits for rehabilitation of quarry sites and for insurance policy deductible amounts, with the majority of terms up to one year as described in Note 38 of the financial statements, included elsewhere in this annual report.

The Rinker group has certain off-balance lease obligations in the form of operating leases as outlined in the table of Contractual Obligations and Commercial Commitments below.

F. Contractual obligations and commercial commitments

The Rinker group's short-term and long-term obligations and commitments are detailed below:

US\$ million As at March 31, 2006	Total	Payments Due by Period			
		Less than 1 year	1 to 3 years	3 to 5 years	Over 5 years
Short-term debt (excluding interest)	5.2	5.2			
Long-term debt (excluding interest)	645.1		8.0	486.4	150.7
Lease obligations - Finance leases	0.3	0.2	0.1		
Accrued interest payable	5.8	5.8			
Lease obligations - Operating leases	221.2	43.0	62.1	40.1	76.0
Contracted capital expenditure	63.8	63.8			
Other obligations	35.5	4.4	10.6	0.3	20.2
Total contractual cash obligations	976.9	122.4	80.8	526.8	246.9

Rinker believes these short-term and long-term obligations and commitments will be satisfied through cash generated from operations, together with cash on hand and, where necessary, borrowings available under the existing and proposed financing facilities described above.

Details of the long-term debt arrangements above are included in Item 5.B. - Liquidity and Capital Resources.

Rinker group entities have not entered any material long-term purchase obligations, which specify fixed or minimum quantities, although they negotiate purchase terms including price, in the ordinary course of business.

G. Major restructuring and rationalization charges

No material restructuring or rationalization charges were incurred in fiscal years 2006 or 2005.

H. Details of defined benefit pension plans

Edgar Filing: RINKER GROUP LTD - Form 20-F

Details of the Rinker group superannuation arrangements are included in Note 34 to the financial statements included elsewhere in this annual report. Rinker and its controlled entities participate in a number of superannuation funds in Australia and the United States. The funds provide benefits either on a defined benefit or cash accumulation basis, for employees on retirement, resignation, or disablement, or to their dependents on death. Employer contributions are legally enforceable, with the right to terminate, reduce or suspend those contributions upon giving adequate written notice to the participants and trustees. Rinker and its Australian controlled entities are required to provide a minimum level of superannuation support for employees under the Australian Superannuation Guarantee Legislation.

Asset Backing

The assets of the US based superannuation (pension) funds were not sufficient to satisfy all benefits which would have been vested in the event of termination of the funds, or in the event of the voluntary or compulsory termination of the employment of each employee. Under A-IFRS the total funding deficit of the US plans is US\$25.7 million as of March 31, 2006 for which the liability has been recorded at March 31, 2006 and is detailed by plan in the table below under Defined Benefit Funds sponsored by Rinker group entities . Australian superannuation funds were not in a deficit position.

Accumulation Funds

The benefits provided by accumulation funds are based on the contributions and income thereon held by the fund on behalf of the member. Contributions are made by the member and the company based on a percentage of the member's salary, as specified by the rules of the fund. These contributions are expensed in the period they are incurred.

Defined Benefit Funds

The benefits provided by defined benefit funds are based on length of service or membership and salary of the member at or near retirement. Member contributions, based on a percentage of salary, are specified by the rules of the fund.

Employer contributions generally vary based on actuarial advice and may be reduced or even cease when a fund is in actuarial surplus.

Harwood Superannuation Fund

In Australia, Rinker group entities participate in the Harwood Superannuation Fund (formerly CSR Australian Superannuation Fund) for those Rinker group employees who are currently members of that fund and any new employees who become members of that fund. CSR Limited and Rinker each separately cover, in effect, 50% of the funding of the accrued defined benefit liabilities of the Harwood Superannuation Fund as at the demerger date, which are revalued by the actuary at least annually. Rinker Group Limited is responsible for the obligations with respect to benefits accrued after the demerger relating to individuals who are employed within the Rinker group post demerger by their respective group companies.

**Defined Benefit Funds Sponsored by
Rinker Group Entities**

(US\$ million)	Accrued Benefits	Market Value of Assets	Surplus (Deficit)	Employer Contributions for the Year
Harwood Superannuation Fund Defined Benefit Division(a)				
Pre-Demerger component	8.3	11.0	2.7	0.9
Post-Demerger component	4.0	2.1	(1.9)	
Rinker Materials Corporation Defined Benefit Pension Plan(b)	18.6	12.9	(5.7)	1.7
Rinker Materials Corporation Retirement Income Plan(b)	29.8	15.3	(14.5)	1.8
United Metro/San Xavier Collectively Bargained Pension Plan(b)	22.4	16.9	(5.5)	1.4

(a) The amounts are calculated in accordance with A-IFRS methods and assumptions with a measurement date of March 31, 2006. The actuarial review was performed by K. Knapman FIAA.

The Fund was separated into two separate plans from the date of demerger, a Rinker group plan and a CSR Limited plan. Each of the plans comprises a pre and post demerger component. Shown above is information on the pre and post demerger components of the Rinker group plan.

As at March 31, 2006, the assets attributable to the Rinker group and CSR combined predemerger plan were 118% of the corresponding actuarial liabilities as calculated under Australian rules. There is an enforceable obligation for Rinker and CSR to contribute such amounts as to ensure that the assets are not less than 120% of the amount required to meet the accrued defined benefit liabilities as at the demerger date. CSR Limited has made available to the fund a bank guarantee to satisfy this obligation. The actuary revalues the accrued benefit liabilities at least annually. Rinker is required to cover, in effect, 50% of such obligations. CSR Limited is required to cover, in effect, the remaining 50%.

As at March 31, 2006, the assets attributable to the post demerger Rinker Group plan were 140% of the corresponding actuarial liabilities as calculated by the fund actuary for funding purposes under Australian rules. There is an enforceable obligation for Rinker to contribute such amounts as to ensure that the assets are not less than 120% of the amount required to meet the actuarial liabilities. The actuary revalues the accrued benefit liability at least annually.

(b) The amounts are calculated in accordance with A-IFRS methods with a measurement date of March 31, 2006. The actuarial review was performed by Michael Von Behren EA MAAA.

The key assumptions used in the calculations of pension accrued benefits and market value of assets as shown in the above table (weighted by total fund assets) were: discount rate (applicable to all plans listed above): 5.6%, compensation increase (applicable to Harwood Superannuation Fund and Rinker Materials Corporation Retirement Income Plan): 4.0% and rate of return on assets (applicable to all plans listed above): 7.9%.

Edgar Filing: RINKER GROUP LTD - Form 20-F

In addition, Rinker Materials contributes to a number of multi-employer defined benefit plans, under the terms of enterprise bargaining/union agreements. Contributions to these plans are expensed in the period incurred, and amounted to US\$12.3 million during 2006 (2005: US\$11.0 million).

US GAAP

In addition to the table above, the US GAAP impact is described in Note 40 to the financial statements included elsewhere in this annual report.

Item 6 Directors, Senior Executives, and Employees

A. Details of directors and senior executives

The board of Rinker sets the group's strategic direction and delegates responsibility for management to the Chief Executive. Rinker's constitution provides that the number of non-executive directors shall be such number from five to ten as the directors from time to time determine. In addition, the directors may appoint up to three executive directors of whom one may be the managing director of Rinker. As of the date of this annual report, the number of directors is six, one of whom is the executive managing director, as set out in further detail below.

Non-executive directors may be appointed by the board of directors to fill a vacancy on the board or to increase the number of non-executive directors. Executive directors and non-executive directors, who are appointed by the board of directors, hold office until the next general meeting unless their appointment is ratified by the shareholders at such meeting. Additionally, one third of the non-executive directors, rounded down to the nearest whole one, (or such greater number as the listing rules of the ASX may require, or the board of directors may from time to time determine) are required to retire at each annual general meeting by order of seniority of election or, if equal in seniority, as determined by directors. Directors, other than the managing director, may not continue to hold office without re-election or ratification of their appointment by the shareholders after the third annual general meeting following their last election or ratification of their appointment by the shareholders.

Additionally, each director is required by Rinker's constitution to own a minimum of 2,000 ordinary shares in Rinker.

Details of the directors in office at May 11, 2006 are as follows:

John Morschel

DipQS, FAIM

Chairman. Independent, non-executive director.

Joined the Rinker board, and was elected chairman, on February 3, 2003. Prior to Rinker's demerger from CSR Limited, John had been a member of the CSR board since 1996 and chairman since 2001. John is a director of ANZ Banking Group Limited, Singapore Telecommunications Limited and Tenix Pty Limited. A former managing director of Lend Lease Corporation Limited, he has had particular experience in the building and construction and finance industries. John is chairman of Rinker's Nominations Committee and a member of Rinker's Safety, Health & Environment Committee. Resides in Sydney, Australia.

Listed company directorships held during last three financial years:

ANZ Banking Group Limited from October 2004 (current)

CSR Limited from April 1996 to April 2003

Leighton Holdings Limited from August 2001 to March 2004

A. Management discussion and analysis of the financial results

Edgar Filing: RINKER GROUP LTD - Form 20-F

Rio Tinto Limited from November 1998 to April 2005

Rio Tinto plc from November 1998 to April 2005

Singapore Telecommunications Limited from September 2001 (current)

John was last elected at the 2004 annual general meeting. His current term will expire no later than the close of the 2007 annual general meeting.

Marshall Criser

JD

Deputy Chairman. Independent, non-executive director.

Joined the Rinker board on April 12, 2003. Prior to Rinker's demerger from CSR Limited, Marshall had been a director and a chairman of Rinker Materials since 1993. Marshall, a lawyer, is chairman of Scripps Florida Funding Corp and a director of Flagler System Inc. He is a former Chairman of the Florida Council of 100, the State Board of Regents and a former President of the Florida Bar. Marshall is a former president of the University of Florida, and a former chairman of the university's board of trustees. Marshall is the chairman of Rinker's Audit Committee and a member of Rinker's Nominations Committee and its Compensation & Human Resources Committee. Resides in Florida, USA.

Listed company directorships held during last three financial years:

None

Last elected at the 2005 annual general meeting, Marshall's current term will expire no later than the close of the 2008 annual general meeting.

David Clarke

DipEng

Chief Executive Officer. Non-independent, executive director.

Joined the Rinker board on February 3, 2003. Prior to Rinker's demerger from CSR Limited, David had been an executive director of CSR since 1996. He has been chief executive officer of Rinker Materials since 1992 and a director of Rinker Materials since 1987. David's entire career has been based in the heavy building materials industry, working extensively in the US, Australia and South East Asia. Resides in Florida, USA.

Listed company directorships held during last three financial years:

CSR Limited from July 1996 to April 2003

As provided under the ASX listing rules, David was elected as a director at the 2003 annual general meeting and as Chief Executive Officer, he is not required to seek re-election.

John Arthur

LLB

Independent, non-executive director.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Joined the Rinker board on February 3, 2003. Prior to Rinker's demerger from CSR Limited, John had been a member of the CSR board since 2001. John's background is in commercial law, with extensive experience in property development and construction, information technology, e-commerce and the financial sector. On May 1, 2006 John was appointed as chief executive of the integrated real estate group Investa Property Group. Prior to that appointment, he was a partner at law firm Gilbert + Tobin. John is a former partner of the law firm Freehills and general counsel at the Lend Lease Group. John is currently chairman of Investa Property Group and a director of CPG Australia Pty Limited. He is a former director of EDS Australia Pty Limited. John is chairman of Rinker's Safety, Health & Environment Committee and a member of Rinker's Compensation & Human Resources Committee and its Nominations Committee. Resides in Sydney, Australia.

Listed company directorships held during last three financial years:

CSR Limited from March 2001 to April 2003

Investa Property Group from July 2001 (current)

Last elected at the 2005 annual general meeting, John's current term will expire no later than the close of the 2008 annual general meeting.

John Ingram

FCPA

Independent, non-executive director.

Joined the Rinker board on October 1, 2003. John is chairman of Wattyl Limited and Nick Scali Limited. He is also a director of United Group Limited and Savings Australia Pty Limited (Superannuation Trust of Australia). John has extensive experience in manufacturing and in the building materials industry, both in Australia and overseas and was previously managing director of Crane Group Limited. John is chairman of Rinker's Compensation & Human Resources Committee and is a member of Rinker's Audit Committee and its Nominations Committee. Resides in Sydney, Australia.

Listed company directorships held during last three financial years:

Crane Group Limited from June 1984 to January 2004

Nick Scali Limited from May 2004 (current)

United Group Limited from April 2003 (current)

Wattyl Limited from December 2001 (current)

John was last elected at the 2004 annual general meeting. His current term will expire no later than the close of the 2007 annual general meeting.

Walter Revell

BS

Independent, non-executive director.

Joined the Rinker board on April 12, 2003. Prior to Rinker's demerger from CSR Limited, Walter had been a director of Rinker Materials since 2000. He is a former secretary of transportation for the State of Florida, former chairman of the Florida Chamber of Commerce, former chairman of the Florida 2020 Energy Commission and former chairman of the Greater Miami Foreign Trade Zone. Walter is a director of The St. Joe Company, International Finance Bank, NCL Corporation Limited, Edd Helms Group, Inc. and Calpine Corporation. He is a member of Rinker's Audit Committee, its Safety, Health & Environment Committee and its Nominations Committee. Resides in Florida, USA.

Listed company directorships held during last three financial years:

Calpine Corporation from September 2005 (current)

Edd Helms Group, Inc. from April 2002 (current)

Edgar Filing: RINKER GROUP LTD - Form 20-F

The St. Joe Company from May 1994 (current)

Walter was last elected at the 2003 annual general meeting. He is seeking re-election at the 2006 annual general meeting.

Senior Executives

The profiles of the Rinker group's senior executives at May 11, 2006 are set out below.

Rinker Group Limited

David Clarke Chief Executive Officer.

Peter Abraham

BEC, LLB, FCPA, FCIS, age 51

General Counsel and Company Secretary.

Prior to joining Rinker, Peter Abraham had been Company Secretary of CSR since 1994 and Legal Counsel since 2001. Previously executive assistant to the managing director, Peter held a number of senior commercial and legal roles with CSR.

David Berger

BS, MBA, age 43

Vice President Strategy and Development.

David Berger joined Rinker Materials as Vice President Gypsum Supply Division in 1999. In 2001, he also undertook responsibility for Polypipe, and for Prestress in 2002. Before joining Rinker Materials, David's experience included consulting at A.T. Kearney Inc and he has been vice president of the building products division of Georgia-Pacific.

Thomas Burmeister

BSBA, age 62

Chief Financial Officer.

Thomas Burmeister joined Rinker Materials as Chief Financial Officer in 1998. He was previously the chief financial officer of Siemens ElectroCom International for five years, after 26 years in various financial roles with the General Electric Company.

Ira Fialkow

BBA, CPA, age 47

Vice President Shared Services.

Ira Fialkow joined Rinker Materials in 1990. Prior to being responsible for the Shared Services organization in 1996, which includes Human Resources, Information Technology, and Transactional Accounting, Ira held various positions within the Finance organization of Rinker Materials. Ira started his career as a public accountant.

Debra Stirling

BA, age 47

Vice President Corporate Affairs and Investor Relations.

Prior to joining Rinker, Debra Stirling had been General Manager, Investor Relations and Corporate Affairs at CSR since 1998. Debra was previously with Coles Myer Limited for 10 years where she held a number of senior positions in investor relations and public affairs, including general manager government affairs and general manager corporate affairs.

Rinker Materials Corporation

David Clarke President and Chief Executive Officer.

Thomas Burmeister Chief Financial Officer.

Ira Fialkow - Vice President Shared Services.

Duncan Gage

BS, age 56

President Concrete Pipe Division.

Duncan Gage joined Rinker Materials in his present role in July 2002. Before then, he held a number of management positions with Lafarge Corporation since 1972, most recently as the regional president of Lafarge Asia Pacific. Effective April 1, 2006, Duncan was appointed Chief Operating Officer, Construction Materials East.

Rod Gamble

BS, age 41

Mid-Atlantic Region Manager, Concrete Pipe Division.

Rod Gamble joined Rinker Materials in his present role in April 2003. Before then, he held a number of sales and general management positions with Rogers Group, Inc. Effective April 1, 2006, upon the appointment of Duncan Gage to Chief Operating Officer, Construction Materials East, Rod has been appointed President, Concrete Pipe Division.

Karl Watson, Jr.

BS, MBA, age 41

President Rinker Materials West.

Karl Watson, Jr. was appointed President Rinker Materials West effective June 2004. Previously, he had been Chief Executive Readymix and Vice President of Florida Materials. Karl has 17 years experience in the construction materials industry, having worked his way up through Rinker Materials in a variety of roles.

Karl Watson, Sr.

AS, age 64

President and Chief Operating Officer, US Construction Materials.

Karl Watson, Sr. joined Rinker Materials of Florida in 1965 and has since held a range of senior management positions. Appointed Chief Operating Officer and President of Rinker Materials Construction Materials in 2002, he is responsible for the quarries and cement operations in Florida, Georgia, Tennessee, and Kentucky as well as the concrete operations in Tennessee, Florida Materials and Gypsum Supply Divisions. Karl announced his retirement effective March 31, 2006. He is a director of Fidelity Federal Bank & Trust.

Karl Watson, Sr. and Karl Watson, Jr. are father and son.

Readymix

Sharon DeHayes

AB, MS, age 52

Chief Executive Readymix.

Sharon DeHayes joined Rinker Materials in 1994 and has been in her present role since June 2004. Prior to her current appointment, Sharon was President of Florida Materials and Gypsum Supply Divisions. Prior to joining Rinker she was a director of technical services for California Portland Cement.

Indemnity, insurance and access for Rinker directors

Deeds of indemnity, insurance and access for directors of Rinker

At the time of their appointment, Rinker entered into deeds of indemnity, insurance and access with each of the Rinker directors. In summary, each deed provides:

an indemnity, to the extent permitted by law, in favor of the director of Rinker against liability which is incurred by the director in his or her capacity as a director of Rinker and subsidiaries of Rinker;

that Rinker must effect and maintain for the entire period for which the director is a director of Rinker and for seven years after the date they cease to be a director of Rinker, a company reimbursement insurance policy and cause a directors' and officers' insurance policy to be made available to the director, both of which are to be on terms and conditions which are appropriate for a reasonably prudent company in Rinker's circumstances which is acting fairly;

that Rinker must maintain a copy of Rinker's board papers for a period of seven years after the date of the board or committee meeting for which the board papers were prepared or for a longer period if legal proceedings are current in respect of the board papers; and

that a former director of Rinker may, after he or she ceases to be a director of Rinker, inspect and take copies of Rinker's board papers that were circulated during that former director's term as a director of Rinker, and which have been retained by Rinker, for the purpose of defending any claim made against the former director.

Indemnities under Rinker's constitution

The indemnification of Rinker directors in accordance with Rinker's constitution is summarized under Item 10.B. - Additional Information Overview of the Rinker constitution Directors' indemnity.

B. Compensation Details of Key Management Personnel

Compensation of Key Management Personnel

A. Management discussion and analysis of the financial results

The aggregate compensation paid and accrued to Key Management Personnel of Rinker group entities, including superannuation and termination payments for fiscal year 2006, was US\$16,865,379. The aggregate amount set aside or accrued by Rinker group entities during fiscal year 2006, to provide pension and retirement benefits to Key Management Personnel of Rinker was US\$1,197,852. Further compensation details are provided in Item 6.B. Section 8 and in Note 26 to the financial statements included elsewhere in this annual report.

1. Compensation & Human Resources Committee

The Compensation & Human Resources Committee (the Committee) operates under the delegated authority of Rinker's Board of Directors. The Committee's charter is available on Rinker's website (www.rinker.com).

The Committee is comprised solely of independent Non-Executive Directors, being John Ingram (Chairman), John Arthur and Marshall Criser.

The Committee met six times during the year, with all members attending each meeting.

The Committee's primary responsibility is to assist the Board in fulfilling its corporate governance and oversight responsibilities with respect to:

Providing sound compensation and employment policies and practices that enable Rinker group companies to attract and retain high quality executives and directors who are dedicated to the interests of Rinker's shareholders.

Fairly and responsibly rewarding executives, having regard to the interest of shareholders, Rinker's performance, the performance of the relevant executive and employment market conditions.

Evaluating potential candidates for executive positions, including the Chief Executive, and overseeing the development of executive succession plans.

The Committee has the resources and authority appropriate to discharge its duties and responsibilities, including the authority to engage external professionals, on terms it determines appropriate, without seeking approval of the Board or management. In this capacity, during fiscal year 2006, the Committee requested Hewitt Associates to evaluate Rinker's executive compensation programs and complete an analysis of the compensation paid to the Chief Executive. The results of this study were taken into consideration when reviewing the executive compensation programs and in setting the Chief Executive's compensation as discussed later in this report.

Additionally, Rinker engaged external advisors on matters relating to compensation. All information relevant to matters being considered by the Committee has been made available to its members.

The table below lists those advisors who were retained during the year. All advisors are independent and were engaged solely on the basis of their competency in the relevant field.

Advisor	Services Provided
Compensation Strategies Inc.	US Non-Executive Director Compensation and Benchmarking. Long-term Incentive Plan Design.
Deloitte & Touche (1)	401(k) and Pension Plan Audits.
Hewitt Associates	Evaluation of Executive Compensation programs.
Egan Associates	Australian Non-Executive Director Compensation and Benchmarking. Australian Executive Compensation and Benchmarking.
Papillon Consulting Group	Australian Executive Benchmarking.
Russell Investment Group	Actuarial Assessment of Australian Executives Superannuation.
Spencer Stuart	Director and Executive Succession Planning.
Stern Stewart & Company	Short-term Incentive Plan Design.

(1) Services provided by Deloitte & Touche were approved in advance by the Audit Committee.

2. Principles of Compensation

The Board recognizes that Rinker's performance is dependent on the quality of its people. To successfully achieve its financial and operating objectives, Rinker must be able to attract, retain, and motivate highly skilled executives dedicated to the interests of its shareholders.

To successfully accomplish the above goals, Rinker's compensation principles are:

Competitive compensation arrangements are provided to attract, retain and motivate executive talent.

A significant portion of executives' rewards is linked to performance in creating value for shareholders.

The Key Management Personnel are encouraged to adhere to Rinker's Share Ownership Guidelines (discussed in more detail under Item 6.B. Section 3).

Severance payments for executives are limited to pre-established contractual arrangements which do not require Rinker to make any unjustified payments in the event of termination for cause. (See Item 6.B. Section 5.2.2 for termination benefits for the Chief Executive and Item 6.B. Section 8-Table 1; footnotes 11 and 13 for the termination benefits for the Senior Executives.)

Full legal compliance and disclosure of executive compensation.

The Board and the Committee also recognize that although compensation is a major factor in recruiting and retaining highly talented and effective people, other factors play a substantial role, including Rinker's corporate reputation, its ethical culture and business values, its executive leadership, and its other human resources policies and practices.

3. Share Ownership Guidelines

The Committee recognizes that the interest of shareholders is supported by the establishment of Share Ownership Guidelines. Share Ownership Guidelines have been set for the Key Management Personnel and other executives of the company. The guidelines help maintain a continuous link between their financial interests and those of shareholders. A Multiple of Salary approach has been put into operation, as follows:

Edgar Filing: RINKER GROUP LTD - Form 20-F

Position	Share Ownership Guideline
Non-Executive Directors	100% of base fees
Chief Executive	300% of base salary
Senior Executives	200% of base salary

Under the Guidelines, established in November 2003, Key Management Personnel are expected to make reasonable progress toward reaching the target share ownership with the objective of meeting the guidelines by March 2008. The guidelines are based on best practices for public companies, which suggest senior management accumulate a meaningful shareholding in their employing company on a long-term basis.

At the time of this report, all Non-Executive Directors and the Chief Executive were already in full compliance with Rinker's Share Ownership Guidelines as were most of the Senior Executives. (See Note

33 to the financial statements included elsewhere in this report for a listing of the holdings for Key Management Personnel as at March 31, 2006.)

4. Executive Compensation

4.1. Compensation Structure

All compensation received by the Chief Executive and Senior Executives is detailed in Item 6.B. Section 8-Table 1 of this report.

The compensation structure for the Chief Executive, Senior Executives and other executives comprises policies and programs for both fixed and variable compensation.

Fixed compensation is made up of base salary and welfare, retirement, and incidental other benefits.

Variable compensation consists of an annual short-term incentive plan and long-term incentives that are tied to performance and are at risk, depending upon performance.

The compensation structure is designed to strike an appropriate balance between fixed and variable compensation. To accomplish this, the Committee considers, in addition to the performance of individual executives, external benchmarking data and Rinker's relative performance against a group of peer companies. The peer group focuses on companies in the construction materials business. After this review, the Committee determines the base salary for the Chief Executive and Senior Executives and determines the parameters for variable compensation.

4.2. Fixed Compensation

4.2.1 Fixed Compensation - Base Salary

Base salaries are reviewed annually and are determined by reference to appropriate benchmark information, taking into account an individual's responsibilities, performance, qualifications, experience and geographic location. The broad objective is to ensure that the base salary is set at median market levels. For fiscal year 2006, the base salary of Rinker's Chief Executive was slightly below the 50th percentile of salaries of chief executives of a broad sample of comparable companies. For the Senior Executives as a group, the base salaries were also slightly below the 50th percentile of their peers in comparable companies.

4.2.2 Fixed Compensation Other Benefits

Rinker provides the Chief Executive, Senior Executives and other executives with other benefits commonly provided at their peer management level. These may include life insurance, tax preparation fees, vehicle allowance, and club membership fees. Additionally, if applicable, it may include relocation and expatriate related expenses. All such benefits are included in the compensation disclosed for the Chief Executive and Senior Executives in Item 6.B. Section 8-Table 1.

4.3 Variable Compensation

The Committee and the Board believe that well designed and managed short-term and long-term incentive plans are important elements of employee compensation, providing tangible incentives for employees to strive to improve Rinker's performance both in the short-term and long-term for the benefit of shareholders. Participation in these plans encourages employees within the Rinker group to enjoy a greater involvement and share in the future growth, prosperity and profitability of the company in a way that gives them a common interest with shareholders.

The proportions of total compensation that may be received in variable form differ between Rinker group managers but are consistent with local practices in each country and take into account individuals' responsibilities, performance and experience. All variable compensation is tied to performance. (See Item 6.B. Section 8-Table 1 for the proportion of variable compensation for the Chief Executive and Senior Executives.)

4.3.1 Variable Compensation - Short-Term Incentive Plan

The Short-Term Incentive Plan (STI) is designed to directly link variable compensation to financial performance. It is an integral part of the Rinker high performance culture and is designed to drive continuous performance improvement in each business in the Rinker group.

Under the STI, performance is measured through generation of Economic Profit (EP), a measure of profit after taking into account the cost of invested capital required to produce that profit (that is, the profit after tax less the cost of capital). The Committee chose this measure as it is closely linked to the creation of additional value for shareholders. If EP is positive, shareholder value is being created. Through its design, the STI encourages participants to both sustain and improve upon performance levels reached in the prior year. Since EP is measured at the operating unit level, each manager in the organisation has an incentive to maximise the EP of his or her operating unit.

Effective fiscal year 2005, Rinker redesigned the STI Plan to reward for sustained improvements in EP, clearly aligning participants' interests with those of shareholders. A goal of this design was to segregate the internal planning process from incentive plan targets by building in mechanisms that ensure that rewards are only paid for sustainable improvements in EP. This plan design was further reviewed during fiscal year 2006 to determine if it was fulfilling the Committee's goals. During this review the Committee determined that it would be appropriate to slightly modify the original plan design for the Chief Executive and Senior Executives as described below.

Effective fiscal year 2006, the Committee recommended and the Board approved eliminating the Contingent Bonus Reserve (including the balances existing at March 31, 2005 as disclosed in last year's annual report) for the Chief Executive, Senior Executives and a limited number of other executives. Additionally, the Committee recommended and the Board approved increasing the annual STI target incentive and the maximum annual payment limitation (plan limit) for the Chief Executive, US Senior Executives and a limited number of other US executives. Elimination of the Contingent Bonus Reserve was made in order to align the timing of rewards for performance under the STI with the timing of that performance; while increasing the STI target percentages and plan limits for the US executives mentioned above will bring them more in line with Rinker's peers. The plan design has not changed for the remaining group of other executives who participate in the STI.

For fiscal year 2006, the target bonus for the Chief Executive remains at 75% for performance at or below target. For above target performance, his target bonus increases to 90% of base salary and his annual plan limit increased to 200% from 150% of his base salary as at March 31, 2006. For the US Senior Executives, their target bonus remains at 55% for performance at or below target. For above target performance, their target bonus increases to 65% of base salary and their annual plan limit increased to 130% from 100% of their base salary as at March 31, 2006. No changes were made to the target bonus or plan limit for the Australian Senior Executives. Their target bonus remains at 55% with a plan limit of 100% of their base salary as at March 31, 2006. All other executives who participate in the STI continue to be subject to the plan limit of 100% of their base salary as at March 31, 2006.

Other key components of the STI for the Chief Executive and Senior Executives include:

- a. EP improvement targets are set for multiple years to encourage longer-term decision making and continuous improvement.
- b. The Committee has discretion to adjust the calculated awards for the Chief Executive and Senior Executives based on company performance related to safety, health and environmental issues; and their overall compliance with policies and commitment to Rinker's Code of Business Ethics and to the organization's values.

The responsibility for recommending final STI awards has been delegated to the Committee by the Board since they are in the most appropriate position to assess the performance of the Chief Executive and Senior Executives. Each year, the calculated results are reviewed by an independent third party and submitted to the Committee. The Committee then assesses Rinker's actual performance against targets and determines if discretionary adjustments are merited for the Chief Executive or Senior Executives. Once this review is complete, the Committee will recommend to the Board the final values of the STI to be paid to the Chief Executive and Senior Executives.

Based on the excellent performance of Rinker during fiscal year 2006, as measured by improvement in EP and achievement of individual goals, the Board has approved for the Chief Executive and Senior Executives incentive awards equal to US\$5,289,844. This represents the maximum payout allowed under the STI for the Chief Executive and for most of the Senior Executives. These amounts are fully accrued and expensed in Rinker's accounts during the year in which they are earned.

4.3.2 Variable Compensation - Long-Term Incentive Plans

Rinker currently has two Long-Term Incentive Plans outstanding: the Performance Share Plan (PSP) which was introduced effective fiscal year 2005 and the Cash Award Share Plan (CASP), a legacy plan that has one grant issued (and is still outstanding). The CASP will continue until the completion of its performance period that will conclude between August 11, 2006 and August 11, 2008. Upon the conclusion of CASP, the PSP will be the only Long-Term Plan under which incentives may be offered.

The appropriate proportions of the outstanding awards granted under the PSP and CASP related to fiscal years 2005 and 2006, have been included in Item 6.B. Section 8-Table 1 under the heading Share Based Incentives.

4.3.2a Long-Term Incentive Plans - Performance Share Plan

The PSP is a long-term equity incentive plan for Rinker's Chief Executive, Senior Executives and other executives making key contributions in Australia or the United States. The PSP is designed to align participant's interests with those of shareholders by increasing the total returns to Rinker's shareholders. Under the PSP, performance is measured by comparing Rinker's Total Shareholder Return (TSR)

(which takes into account share price appreciation and dividends received over the relevant period) with a group of peer companies. (See Item 6.B. Section 4.3.2c for the lists of peer companies.) This is an equity based plan under which participants can earn Rinker shares or ADRs or both. The Committee believes this best aligns the interests of participants in the PSP with those of its shareholders as it measures Rinker's performance in generating returns to shareholders against its peer group of companies.

During fiscal year 2006 the Committee undertook a review of the PSP design. Among other factors considered during this review, the Committee also took into account concerns expressed by shareholders when considering the adoption of last year's remuneration report. After this review, the Committee

recommended and the Board approved modifications to future grants. Effective with grants awarded during fiscal year 2007 and thereafter, a portion of the award will vest at 50th percentile performance and increase up to 100% vesting at 75th percentile performance versus the group of peer companies. No portion of the awards will vest for performance below the 50th percentile when compared to the peer group of companies. (See Item 6.B. Section 4.3.2c for list of peer companies.)

Although the maximum number of shares that could vest for each individual participant is limited by the number of shares granted, as the market price of the shares increases (or decreases) so does the value of the grant to the participants.

The initial value of the award that can potentially be earned by a participant is based on market data, Rinker's financial performance, as well as level of responsibility and individual performance. In establishing the grants related to fiscal year 2006, the Board also took into consideration the Contingent Bonus Reserve amounts eliminated for the Chief Executive and Senior Executives as described in Item 6.B. Section 4.3.1. Shares are acquired on market, on behalf of participants. The shares only vest if performance and time qualifications are met.

The initial value of the potential award, as referred above, is applied under the PSP to purchase Rinker shares (or ADRs or both) on market in the ordinary course of trading on the Australian Stock Exchange (ASX) or the New York Stock Exchange (NYSE) or both. Once the shares are purchased on market, participants are entitled to any dividends, return of capital or other distribution made in respect of Rinker shares (and/or ADRs) held on their behalf, prior to vesting. Each participant may direct the plan trustee how to vote any shares held on the participant's behalf. In the absence of those directions the shares will not be voted.

As at March 31, 2006 there were two grant cycles outstanding under the PSP. The performance period for the PSP begins on April 1 of each cycle. The vesting hurdle for both cycles is Rinker's TSR percentile ranking within a group of peer companies between:

April 1, 2004 and March 31, 2007 for the grant made during fiscal year 2005; and

April 1, 2005 and March 31, 2008 for the grants made during fiscal year 2006.

The following summarizes the performance for the two cycles currently issued and outstanding:

Fiscal Year	Share Price at Start of Performance Period	Share Price as at March 31, 2006	Increase Over Share Price at Start of Performance Period	TSR Average as at March 31, 2006*	Percentile Ranking When Compared to a Peer Group of Companies
2005	A\$7.05 on April 1, 2004	A\$19.85	182%	64.4%	92nd percentile
2006	A\$10.90 on April 1, 2005	A\$19.85	82%	65.2%	70th percentile

*See Item 6.B. section 4.3.2c footnote 1 for details pertaining to the TSR calculation.

To ensure objectivity in assessing performance, at the end of each performance period, an independent third party will review Rinker's TSR performance and its ranking against the group of peer companies. For both cycles, 20% of the award will vest at 25th percentile performance and increase up to 100% vesting at 75th percentile performance versus the group of peer companies (see Long-term incentive plans-summary under Item 6.B. Section 4.3.2c).

The charts below show Rinker's Total Shareholder Return compared with its group of peer companies for the grants issued during fiscal year 2005 and fiscal year 2006.

Performance of Rinker for Fiscal Year 2005 Performance Share Plan

From April 1, 2004 to March 31, 2006

Performance of Rinker for Fiscal Year 2006 Performance Share Plan

From April 1, 2005 to March 31, 2006

Participants who have not already reached the target share ownership levels established under Rinker's Share Ownership guidelines (as discussed in Item 6.B. Section 3) will be encouraged to retain at least 25% of vested shares.

4.3.2b Long-Term incentive Plans - Cash Award Share Plan

The CASP is a long-term equity incentive plan for Australian-based Senior Executives and other executives making key contributions that was also designed to promote the total shareholder return of Rinker shares. This plan mirrored a similar plan operating in CSR Limited at the time of Rinker's demerger from CSR and was introduced shortly following the demerger. CASP was superseded by the Performance Share Plan, effective from April 1, 2004.

Under CASP, eligible participants were offered the opportunity to qualify for Rinker shares based on the achievement of TSR goals. The value of the potential incentive was based on level of responsibility and performance. The shares were acquired on behalf of a participant by the plan trustee and are being held by the trustee subject to performance and time qualifications being met. The performance hurdle for shares offered in August 2003 (the only offer made under CASP) was for the percentage increase in Rinker TSR to exceed the percentage increase in the S&P/ASX 200 TSR between August 11, 2003 and any time between August 11, 2006 and August 11, 2008. To ensure objectivity in assessing performance, prior to the end of the performance period, an independent third party will review Rinker's TSR performance and its ranking against the S&P/ASX200.

Each offer is also subject to a minimum holding period. Shares cannot be withdrawn from CASP until 10 years from the date of grant or until the participant is no longer an employee of any member of the Rinker group, whichever occurs first.

Except as provided in the plan rules, participants are entitled to any dividend, return of capital or other distribution made in respect of Rinker shares held on their behalf, prior to vesting. The plan rules specify the basis on which any bonus shares issued in respect of shares received under CASP, or shares received on behalf of a participant on exercise of rights issues, will be held.

Each participant may direct the trustee how to vote any shares held on the participant's behalf. In the absence of those directions, the shares will not be voted.

The chart below illustrates the performance of Rinker relative to the S&P/ASX 200.

Performance* of Rinker for Cash Award Share Plan

From August 11, 2003 to March 31, 2006

Rinker's Total Shareholder Return compared to the S&P/ASX 200

* The performance period for the CASP began August 11, 2003 when Rinker's share price was A\$5.40. As at March 31, 2006, Rinker's share price was A\$19.85; an increase of 267.6%; and Rinker's Total Shareholder Return for this period is 285.5%.

4.3.2c Long-Term Incentive Plans - Summary

Vulcan Materials
Company.

Vulcan Materials
Company.

Company.

(1) For the PSP, the annual TSR takes into account share price appreciation and dividends received over the relevant period.

Beginning and ending share prices will be calculated from a 30-day trading average. The TSR for the three-year performance cycle will be calculated as the average for the three annual TSRs.

(2) At the discretion of the Committee, the companies listed as members of the peer group under the PSP may be added to or deleted for purposes of calculating performance under each grant. As a result of consolidation in the construction materials industry during fiscal year 2005, Aggregate Industries plc and RMC Group plc have been removed from the peer group and Cemex SA de CV has been added. Effective with the fiscal year 2007 grant, the Committee added Eagle Materials, Inc., Granite Construction, Inc. and Texas Industries, Inc. to the peer group.

4.4 Company Performance

Rinker's strong performance over the past three years has resulted in high levels of compensation being paid to some employees participating in the short-term incentive plan. If performance is maintained, we anticipate the current long-term plans to vest. Because these plans are designed to align participant's interest with those of shareholders, both have benefited from Rinker's strong performance to date.

The performance charts included under Item 6.B. Sections 4.3.2a and 4.3.2b illustrate the relationship of Rinker's long-term incentive plans to current performance. As described in each of these sections, the long-term incentive plans measure performance through total shareholder return as compared to the S&P/ASX 200 or a peer group of companies.

The charts below illustrate the performance of Rinker's ordinary shares since they began trading on March 31, 2003 after the demerger from CSR Limited. Rinker's share price has increased 303% over the subsequent three-year period, during which Rinker paid six dividends totaling A\$0.56 per share. Final and special dividends of A\$0.24 and A\$0.40 respectively per share have been declared for fiscal year 2006. Additionally, shareholders will consider a return of capital of A\$0.50 per share at the annual general meeting to be held on July 18, 2006.

Rinker's Share Price Appreciation Compared to a Group of Peer Companies, S&P/ASX200 and S&P 500 Index

From March 31, 2003 to March 31, 2006

Rinker's Share Price Performance**Fiscal Year 2004, 2005 and 2006**

(amounts in A\$ unless noted)	Fiscal Year 2004	Fiscal Year 2005	Fiscal Year 2006
Share Price - High	\$ 7.34	\$ 11.92	\$ 20.00
Share Price - Low	\$ 4.50	\$ 6.62	\$ 10.61
Share Price - Close	\$ 6.95	\$ 10.80	\$ 19.85
Dividends Paid Per Share (1)	\$ 0.13	\$ 0.15	\$ 0.28
Earnings Per Share (2)	NA	US\$ 0.523	US\$ 0.802

(1) Final and special dividends of A\$0.24 and A\$0.40 respectively per share have been declared for fiscal year 2006. This will bring the total dividends paid per share since Rinker began trading on March 31, 2003, after the demerger from CSR Limited, to A\$1.20 per share. Additionally, shareholders will consider a return of capital of A\$0.50 per share at the annual general meeting to be held on July 18, 2006.

(2) Represents diluted earnings per share prepared in accordance with A-IFRS. Earnings per share for fiscal year 2004 is unavailable since it was not prepared under A-IFRS.

4.5 Retirement and Superannuation Benefits

Edgar Filing: RINKER GROUP LTD - Form 20-F

Rinker provides retirement and superannuation benefits for its employees, including the Chief Executive and Senior Executives as discussed in more detail below. All such benefits are included in the compensation disclosed for the Chief Executive and Senior Executives in Item 6.B. Section 8-Table 1.

4.5.1 Benefits for Australian Employees

Employees in Australia, including the applicable Senior Executives, are members of one of the two divisions of a Rinker group sponsored superannuation pension fund. The defined benefit division fund (a long-established plan available only to a limited number of former CSR employees, which ceased accepting new members from 1987) provides lump sum benefits on withdrawal prior to the age of 52, and lump sum or pension benefits, or a combination of the two, on retirement from the age of 52. The accumulation division fund provides a lump sum benefit equal to the balance of a member's account, which includes contributions made by the member and the relevant Rinker group entity, together with net fund earnings.

4.5.2 Benefits for United States Employees

Employees in the US, including the applicable Senior Executives, may participate in the Rinker Materials 401(k) Plan and the Rinker Materials Benefit Restoration and Voluntary Deferral Plan. Both Plans are defined contribution plans, with contributions made by both the employee and the company.

The Rinker Materials 401(k) Plan, which is open to US employees, allows participants to make contributions up to the annual IRS deferral limits. The company will then match, subject to IRS limits, up to 3% of eligible compensation and will annually make a profit sharing contribution to eligible participant accounts.

The Rinker Materials Benefit Restoration and Voluntary Deferral Plan is open to the chief executive, senior executives and other executives of Rinker Materials. (Additionally, this plan is open to US-based non-executive directors as discussed in more detail under section 7.) This plan allows eligible participants to defer a portion of their base salary and incentive awards. If applicable, company matching and profit sharing contributions are made to eligible participants to restore company contributions that would have been made under the Rinker Materials 401(k) Plan had that plan not been subject to annual IRS deferral limits. Both the company matching and profit sharing contributions are determined based on base salary and short-term incentive compensation and, additionally, are limited to:

3% for the company matching contribution, and

the annual profit sharing contribution percentage approved under the Rinker Materials 401(k) Plan.

These limits are inclusive of any contributions made under the Rinker Materials 401(k) Plan and represents Rinker's full commitment (or obligation) to the eligible participants. The company does not make any other contributions to the participants on behalf of this plan.

Under Item 6.B. Section 8-Table 1, the amounts deferred are included under the headings base salary and short-term incentive and the company matching and profit sharing contributions are included under other post employment. At the time of this report, there were no long-term incentive deferrals made into the Plan.

4.6 Retirement of a Senior Executive

The President and Chief Operating officer US Construction Materials, Karl Watson, Sr., announced his retirement effective March 31, 2006. In accordance with his employment contract, Mr. Watson, Sr. has a two-year non-compete agreement and may not work with any person or entity that is engaged in the construction materials industry that directly or indirectly competes with Rinker.

His retirement does not trigger any severance or other payments. Upon his retirement, he will forfeit one-third (or 40,000 shares) of the PSP shares granted to him during fiscal year 2005 and two-thirds (or 75,335 shares) of the PSP shares granted to him during fiscal year 2006. To ensure a smooth transition, effective April 1, 2006, Mr. Watson, Sr. will consult as needed for a three-year period. Mr. Watson, Sr. has agreed to have no conflicting interests with Rinker while he is engaged as a consultant.

5. Executive Director

At the date of this report there is one Executive Director on the Board of Directors, Mr. David Clarke, age 62, Chief Executive.

Mr. Clarke was appointed by the Board as President and Chief Executive Officer of Rinker on April 1, 2003. Prior to the demerger from CSR Limited, Mr. Clarke had been an executive director of CSR since 1996. He has been chief executive officer of Rinker Materials since 1992 and a director of Rinker Materials since 1987. Mr. Clarke's entire professional career has been in the heavy building materials industry, and he has worked extensively in the US, Australia and South East Asia.

5.1 Retirement and Superannuation Benefits for the Chief Executive

In addition to the retirement benefits outlined in Item 6.B. Section 4.5.2, Mr. Clarke participates in the Rinker group sponsored Australian defined benefit division fund. Under this fund, he is entitled to a one-time lump sum payment upon his retirement. Other than this one-time lump sum payment, no additional superannuation or pension benefits are payable to Mr. Clarke under this plan.

The defined benefit division fund provides a lump sum, initially calculated by multiplying a member's years of service by 25% of their average base compensation over their final three years of service. This lump sum calculation is based on an assumed company contribution level of 12% of base compensation. To the extent that actual contribution levels are greater or less than 12% (typically as a result of salary sacrifice elections by members, transfers from other funds and any applicable superannuation surcharge taxes), the value of that difference (and earnings or interest thereon) is, respectively, added to or deducted from the lump sum calculation. In Mr. Clarke's case, no company contributions have been made since he became eligible to participate in Rinker Materials 401(k) Plan and the Rinker Materials Benefit Restoration and Voluntary Deferral Plan for US employees.

5.2 Employment and Termination Arrangements for the Chief Executive

5.2.1 Employment Contract

Mr. Clarke has a three-year employment contract with the company that automatically extends the employment term by one year on the anniversary date of his contract unless written notice is given by either Mr. Clarke or Rinker that the contract is not to be extended. This notice must be given at least 180 days prior to the anniversary date. Under the contract, Mr. Clarke receives an annual salary, participation in both short and long-term incentive plans, regular company retirement, health and welfare plans, and reasonable perquisites that are similar to those of

comparable chief executive officers.

A copy of Mr. Clarke's employment contract was filed with the SEC as an exhibit to Rinker's 2004 Form 20-F and is available on the Rinker website.

5.2.2 Termination Arrangement

After considering independent advice, the Board is satisfied that Mr. Clarke's termination benefits, as set out below, are reasonable, having regard to current US employment practices.

If Mr. Clarke resigns from his employment, he is entitled to the full amount of his salary through termination date and any unpaid amounts accrued for unused leave. The Board may, in its sole discretion, also elect to pay Mr. Clarke a pro rata portion of his short-term incentive for the period of his active employment during the financial year.

If during his Employment Period (as defined in Mr. Clarke's employment contract), the company terminates the employment of Mr. Clarke other than for Cause (as defined in Mr. Clarke's employment contract), or Mr. Clarke resigns from his employment for Good Reason (as defined in Mr. Clarke's employment contract) the company is required to:

Pay Mr. Clarke, in a lump sum, a pro rata portion of his short-term incentive and amounts accrued for unused leave.

Determine Mr. Clarke's eligibility to vest in a pro rata share of long-term incentives in progress at the time of his termination, in accordance with plan rules.

Pay Mr. Clarke amounts he would have received in the following 24 months, at the times indicated in his employment contract, for his base salary and short-term incentive at target performance. Additionally, Mr. Clarke would continue to receive any other benefits, with the exception of new long-term incentive opportunities, he was entitled to at time of termination for the following 24 months.

Provide Mr. Clarke with professional outplacement services valued up to US\$15,000.

If, during the Employment Period, Mr. Clarke is terminated for Cause, Rinker will have no further obligations, other than the amount of base pay due to Mr. Clarke through his termination date and any unpaid amounts of accrued leave.

Upon termination of Mr. Clarke's employment for any reason, Mr. Clarke is prohibited from engaging in any activity that would compete with Rinker for a period of 24 months.

6. Employee Share Plans

6.1 Rinker Employee Share Acquisition Plan

Edgar Filing: RINKER GROUP LTD - Form 20-F

The Rinker Employee Share Acquisition Plan (ESAP) enables directors and employees of Rinker in Australia to purchase Rinker shares with pre-tax compensation or bonuses. Those shares are purchased on market, in the ordinary course of trading on ASX, by the ESAP trustee and held in trust for the participant. These shares are not subject to performance conditions since they are being purchased in lieu of receiving bonuses where the performance condition has already been satisfied or are being purchased with fixed compensation. The value of the shares purchased is included under base salary , fees and/or short-term incentive under Item 6.B. Section 8-Table 1.

Eligibility to participate in ESAP is determined by the Rinker Board.

Shares may be retained in Rinker ESAP for an indefinite period while a participant remains an employee of a Rinker group company. However, taxation deferral benefits currently only apply for a maximum of 10 years. If a participant ceases to be employed by any Rinker group company, the Rinker ESAP trustee must either transfer the relevant shares to the participant or sell the shares and distribute the proceeds of sale (less authorized deductions) to them.

Withdrawal of shares from Rinker ESAP and transfer to a participant or sale requires the approval of the Rinker Board.

Participants are entitled to any dividend, return of capital or other distribution made in respect of Rinker shares held in the plan on their behalf. The Rinker ESAP trustee may allow participants to participate in any pro rata rights and bonus issues of shares made by Rinker or sell such rights (if renounceable) or bonus shares on behalf of the participants and distribute the cash proceeds of such sale (less authorized deductions).

Participants may direct the trustee how to vote any shares held on the participant's behalf. In the absence of those directions, the shares will not be voted.

6.2 Rinker Universal Share Plan

Rinker's Universal Share Plan (USP) is open to all Australian employees who have been employed for at least one year. The plan encourages general employee share ownership and enables participants to qualify for the limited favorable tax treatment available in Australia for broad-based employee share plans. For this reason, this plan is not subject to performance conditions. Employees may acquire a parcel of shares at market price and receive an equal number of additional shares for no further consideration.

Prior to fiscal year 2006, the maximum number of shares available for each employee under the plan was set by the Board on the recommendation of the Committee and was issued annually. Effective fiscal year 2006, the Committee recommended and the Board approved changing from the maximum number of shares to a dollar amount that would be applied to acquire the shares on market during the year. Commencing July 1, 2005, the maximum level an employee could contribute was set at A\$1,000 (US\$749) per year.

No loan facility is offered under USP.

Shares acquired under USP are ordinary shares, equivalent in all respects to, and ranking equally with, existing fully paid ordinary shares, and they are purchased on-market during appropriate trading windows. During fiscal year 2006, 69,840 (2005: 237,900) shares were purchased in total for the 1,565 employees (2005: 1,259) who participated in USP.

Shares acquired under USP may not be disposed of before the earlier of the end of three years after the time of acquisition of the shares, or when the participant ceases to be employed by any Rinker group company. After that time, the participant may retain ownership of the shares or sell them.

7. Non-Executive Directors Compensation Structure

All compensation received by the Non-Executive Directors is detailed in Item 6.B. Section 8-Table 1 of this report.

Fees for Non-Executive Directors are based on the nature of their work and their responsibilities. In determining the level of fees, survey data on comparable companies is considered in detail. Non-Executive Directors' fees are recommended by the Compensation & Human Resources Committee and determined by the Board within the aggregate annual limit of A\$1,250,000 (US\$936,375) approved by shareholders at the July 2004 annual general meeting.

At the July 2006 Annual General Meeting, the Board will be seeking shareholder approval to increase the aggregate annual limit from A\$1,250,000 (US\$936,375) to A\$1,700,000 (US\$1,273,470). This request is

being made in consideration of future board succession planning needs, and the potential to add new directors.

For fiscal year 2006, Rinker paid non-executive directors base fees of A\$120,000 (US\$89,892) per year. The Chairman received A\$330,000 (US\$247,203) per year (inclusive of committee fees) and the Deputy Chairman received a base fee of A\$240,000 (US\$179,784) (inclusive of committee fees). Non-Executive Directors, other than the Chairman and Deputy Chairman, who were members of committees (other than the Nominations Committee) received additional compensation. Members of the Audit Committee received an additional A\$12,000 (US\$8,989) (were the position of Audit Committee chair not occupied by the Deputy Chairman, A\$18,000 (US\$13,484) would be payable for that role) and members of both the Safety, Health & Environment Committee and the Compensation and Human Resources Committee received an additional A\$8,000 (US\$5,993) (A\$12,000 (US\$8,989) for those committee chairs).

Rinker's Non-Executive Directors (other than John Ingram, who joined the Board on October 1, 2003) were, prior to Rinker's demerger from CSR, previously Non-Executive Directors of either CSR or Rinker Materials and were entitled to retirement benefits under those companies Non-Executive Directors' retirement plans. Those plans provided for payment on retirement of a maximum amount equal to a director's last three years compensation after five years of service (pro rata for a lesser period). At the time of demerger, Rinker adopted a similar retirement plan under which periods of service as a director of CSR or Rinker Materials were treated as periods of service with Rinker for the purposes of calculating benefits under that plan. In response to the publication of the ASX Corporate Governance Council Guidelines, in April 2003 the Board closed the plan to new directors and the then current directors agreed to freeze their entitlements with effect from March 31, 2004. Rinker has accrued a provision of A\$1,362,384 (US\$1,020,562) in respect of those benefits.

Consistent with the freezing of retirement benefits, fees are now inclusive of any compulsory superannuation guarantee contributions (these were previously deducted from retirement allowances). Rinker will also take those contributions into account in calculating the total amount able to be paid to Non-Executive Directors, even though Rinker's constitution excludes these amounts.

During fiscal year 2006, the Committee recommended and the Board approved a recommendation for U.S.-based Non-Executive Directors of Rinker to be eligible to defer all or a portion of their board and committee fees into the Rinker Materials Benefit Restoration and Voluntary Deferral Plan. This is a defined contribution plan open to senior level executives in the United States and U.S.-based Non-Executive Directors. Unlike executives in the U.S., where Rinker will contribute matching and profit sharing contributions (as described in Item 6.B. Section 4.5.2) Rinker does not match any contribution made by Non-Executive Directors. Amounts deferred are included under 'fees' in Item 6.B. Section 8-Table 1.

In conjunction with external advice, the committee recommended and the Board approved an increase for non-executive director base and committee fees effective from April 1, 2006 as listed below.

Base Fees:

Chairman base fees increased to A\$375,000 (US\$280,913) inclusive of committee fees

Deputy Chairman base fees increased to A\$270,000 (US\$202,257) inclusive of committee fees

Non-executive directors base fees increased to A\$135,000 (US\$101,129)

Committee Fees (for non-executive directors other than the Chairman and Deputy Chairman):

93

Audit committee member fees increased to A\$15,000 (US\$11,237) (the audit committee chair fee increased to A\$30,000 (US\$22,473) were the position of audit committee chair not occupied by the Deputy Chairman)

Safety, Health & Environment committee member fees and the compensation & human resources committee member fees increased to A\$12,000 (US\$8,989) (the chairman fee for both committees increased to A\$24,000 (US\$17,978))

Nomination committee members and chairman do not receive any additional compensation

The compensation of Non-Executive Directors is fixed. They do not participate in any incentive plans available to executives and do not receive any Non-Monetary and Other Benefits; however, they may participate in the Rinker ESAP or the Rinker Materials Benefit Restoration and Voluntary Deferral Plan.

8. Key Management Personnel Compensation Details

The tables below set out compensation details for all Key Management Personnel.

(1) For the US Senior Executives and Directors, includes amounts deferred into Rinker's 401(k) Plan and/or Rinker's Benefit Restoration and Voluntary Deferral Plan. For the Australian Senior Executives and Directors, includes shares purchased under the Rinker Employee Share Acquisition Plan.

(2) Amounts shown for 2006 represent the amount of the short-term incentive awards earned by each named executive for performance.

(3) For fiscal year 2006, non-monetary and other benefits comprise the costs of life insurance, vehicle allowance, and club membership fees. For Mr. Clarke, it also includes tax preparation fees. For Ms. DeHayes and Mr. Watson, Jr. this column also contains expatriate and/or relocation related expenses.

Additionally, non-monetary and other benefits include interest imputed on a loan of US\$59,000 to Mr. Burmeister that dates back to 1998. The loan relates to a relocation benefit and, at the time, was a customary benefit for relocating executives. The loan is interest free and is payable upon his termination of employment. There were no loans made to any key management personnel during the fiscal year 2006.

(4) Other post employment includes the company matching and profit sharing contributions under the Company's 401(k) Plan and/or the Benefit Restoration and Voluntary Deferral Plan as discussed in Item 6.B. Section 4.5.2. Under the Benefit Restoration and Voluntary Deferral Plan, the company matching and profit sharing contributions included in the table represent Rinker's full commitment (or obligation) to the named executives under this plan.

(5) Annual grants are amortized over a three-year period.

Amounts shown for 2005 include the pro rata value (one-third) of the fair value of the CASP grant and the fiscal year 2005 PSP grant.

Amounts shown for 2006 include the pro-rata value (one-third) of the fair value of:

the CASP grant,

the fiscal year 2005 PSP grant; and

the fiscal year 2006 PSP grants.

Amounts shown will increase further next year with the issuance of the 2007 PSP grant and pro rata value (one-third) of the fair value of each of the 2005, 2006 and 2007 PSP grants included.

Both 2005 and 2006 are calculated in accordance with A-IFRS as required under Australian Accounting Standard AASB 124.

For the May 11, 2005 grant, the fair value was calculated at US\$6.41 and for the February 16, 2006 grant, the fair value was calculated at US\$9.40. The fair values were calculated by independent external advisors using the binomial pricing model and are not necessarily indicative of the eventual value that may or may not be realized by the executive.

Total dividends received by the executives are included in the above amounts. For fiscal year 2006, dividends were paid on CASP and PSP grants totaling US\$418,588.

(6) All amounts shown for the non-executive directors, Mr. Abraham, Ms. Stirling and a portion of the Non-Monetary and Other Benefits for Ms. DeHayes were paid in Australian dollars and have been converted at an exchange rate of .74910 (US\$/A\$1.00) for fiscal year 2006 and .73972 (US\$/A\$1.00) for fiscal year 2005.

(7) Mr. Arthur, Mr. Ingram and Mr. Morschel all participated in ESAP during the year. Of the above totals Mr. Arthur received A\$122,000 (US\$91,390), Mr. Ingram received A\$24,000 (US\$17,978) and Mr. Morschel received A\$90,000 (US\$67,419) in the form of ESAP shares, with the balance in cash. These amounts are included under fees.

(8) Included in Mr. Criser's fees are the amounts deferred into Rinker Materials Benefit Restoration and Voluntary Deferral Plan.

(9) Included in Mr. Arthur's fees are compulsory superannuation contributions of A\$11,466 (US\$8,589).

(10) The Pension and Superannuation amounts shown for Mr. Clarke and Mr. Abraham represent the increase during fiscal year 2006 in the actuarial value (of their one-time lump sum benefits payable upon retirement) of amounts accrued in the defined benefit superannuation plan. The actuarial amounts include projections of future salary, vested years of service and retirement date. These amounts are discounted based on the latest available current ten-year government bond yields.

In 2006, an increase was made in the salary used to calculate Mr. Clarke's superannuation. The previous calculation adjusted a notional salary (established before Rinker demerged from CSR Limited) by the annual base salary percentage increase. This resulted in a calculation that was significantly below both actual salary and market based benchmark data. Effective with fiscal year 2006, his actual US base salary is being used for the calculation converted to Australian dollars at the current exchange rate at the time of any change in that base salary. (See Item 6.B. Section 5.1 additional details regarding this benefit.)

(11) After considering independent advice, the Board is satisfied that the termination benefits of the relevant executives, as set out below, are reasonable, having regard to current US employment practices.

The duration of employment agreements with the relevant executives are for three years, which automatically extends by one year on the anniversary date of the agreement unless written notice is given by either the named executive or Rinker that the agreement is not to be extended. This notice must be given at least 180 days prior to the anniversary date.

If the executive resigns from his or her employment, the company is required to pay the executive the full amount of his or her salary through to his or her termination date and any unpaid amounts accrued for unused leave. The board may in its sole discretion also elect to pay the executive a pro rata portion of his or her short-term incentive for the period of his or her active employment during the financial year.

If, during the employment period (as defined in the executive's employment contract), the company terminates the employment of the executive other than for cause (as defined in the executive's employment contract), or the executive resigns from his or her employment for good reason (as defined in the executive's employment contract) the company is required to:

Pay the executive, in a lump sum, a pro rata portion of his or her short-term incentive and amounts accrued for unused leave.

Determine the executives' eligibility to vest in a pro rata share of long-term incentives in progress at the time of his or her termination, in accordance with plan rules.

Pay the executive amounts he or she would have received in the following 24 months, at the times indicated in his or her employment contract, for his or her base salary and short-term incentive at target performance. Additionally, the executive would continue to receive any

other benefits, with the exception of new long-term incentive opportunities, he or she was entitled to at time of termination for the following 24 months.

Provide the executive with professional outplacement services valued up to US\$10,000.

If, during the employment period, the company terminates the employment of the executive for cause, the company shall have no further obligations to the executive except the amount of base pay due through his or her termination date and any unpaid amounts of accrued leave.

Upon termination of the executive's employment for any reason, the executive is prohibited from engaging in any activity that would compete with Rinker for a period of 24 months.

(12) Karl Watson, Sr. announced his retirement effective March 31, 2006.

(13) Termination benefits for Mr. Abraham and Ms. Stirling are the greater of 12 months total compensation (including target incentives) or three months base compensation (base compensation is equivalent to approximately 75% of fixed compensation) plus 0.7 months base compensation per year of service, not to exceed 24 months. As at March 31, 2006, Mr. Abraham had 26 years of service and Ms. Stirling had seven years.

Should Mr. Abraham or Ms. Stirling resign or be terminated for cause, the company shall have no further obligations to them except the amount of base pay due up to the termination date and any unpaid amounts of accrued leave.

(14) For Ms. Stirling, Pension and Superannuation Benefits represent the company's contributions made to accumulation superannuation plans in Australia. (See Item 6.B. Section 4.5.1 for additional details.)

8.1 Payment Details of Performance Related Compensation

8.1.1 Short-Term Incentive Plan

Awards under the STI are made in each fiscal year and relate only to performance in that fiscal year. Accordingly, 100% of the STI awards to the Chief Executive and Senior Executives for fiscal year 2006 (2006 STI) vested in that year and will be paid during fiscal year 2007. No part of the 2006 STI awards for the Chief Executive and Senior Executives are payable in, or in respect of performance in, any other fiscal year. For the Chief Executive and Senior Executives, zero percent of the 2006 STI awards were forfeited in fiscal year 2006 (based on the STI award for

target performance).

A description of the STI is contained in section 4.3.1 above, which includes a description of the elimination of the contingent bonus reserve applicable to STI awards from previous years for the Chief Executive, Senior Executives and a limited number of other executives. As described in section 4.3.2a above, the elimination of the contingent bonus reserve was taken into account in establishing the PSP grants for fiscal year 2006.

8.1.2 Long-Term Incentive Plans

A description of the Company's long-term incentive plans (PSP and CASP) is contained in Item 6.B Sections 4.3.2a and 4.3.2b above. As noted in those sections, zero percent of each outstanding grant under PSP and CASP was paid, vested or forfeited during fiscal year 2006 because the performance period for each of those grants extends beyond March 31, 2006.

For fiscal year 2006, the following table sets out a summary of the PSP shares granted; no CASP shares were granted and is, therefore, not included in the table.

Table 2: Fiscal Year 2006 Performance Share Plan Awards for the Chief Executive and Senior Executives

	Fiscal Year 2006 Total Number of Shares Granted(1)	Performance below 25th Percentile 0% Vesting	Performance at 50th Percentile Target Level 40% Vesting	Performance at or above 75th Percentile 100% Vesting
David Clarke	493,000	0	197,200	493,000
Karl Watson, Jr.	107,000	0	42,800	107,000
Karl Watson, Sr.	113,000	0	45,200	113,000
Thomas Burmeister	113,000	0	45,200	113,000
David Berger	111,000	0	44,400	111,000
Sharon DeHayes	110,000	0	44,000	110,000
Duncan Gage	110,000	0	44,000	110,000
Ira Fialkow	105,000	0	42,000	105,000
Peter Abraham	45,000	0	18,000	45,000
Debra Stirling	31,000	0	12,400	31,000

(1) Total Number of Shares Granted represents the maximum number of shares that may vest if Rinker's TSR reaches 75th percentile performance or above when compared to a specified group of peer companies. The Chief Executive and Senior Executives are also eligible to receive dividends, returns on capital or other distributions made with respect to these shares. Once the shares are purchased, they may also direct the trustee how to vote these shares. (See Item 6.B. Sections 4.3.2a and 4.3.2c for additional details.)

C. Board Practices and Corporate Governance

Details of directors and their term of office are included in Item 6.A. - Details of directors and senior management.

CORPORATE GOVERNANCE

A well-established corporate governance structure

Rinker has an entrenched, highly developed governance culture based on strong ethical values and a commitment to openness and transparency.

First listed on the Australian Stock Exchange (ASX) on March 31, 2003, following its demerger from CSR Limited (CSR), Rinker commenced with well-established corporate governance practices developed over many years at CSR.

Rinker has further extended and refined its corporate governance practices to reflect its circumstances (including, in particular, its strong presence in the United States and its listing on the New York Stock Exchange (NYSE)).

Documents that are italicized and underlined in this statement (for example *Board Charter*) are available on Rinker's internet site, (www.rinker.com) under the heading "Corporate Governance".

ASX Principles and Recommendations

The ASX Corporate Governance Council has published *Principles of Good Corporate Governance and Best Practice Recommendations* (ASX Principles and Recommendations). One of the features of the ASX Principles and Recommendations is an if not, why not disclosure obligation in relation to practices that differ from the ASX recommendations.

During fiscal year 2006, Rinker's Universal Share Plan was amended so that shares made available under that plan could be purchased on-market, enabling the company to avoid having to issue new shares under the plan. Following that amendment, Rinker's corporate governance practices accord with all of the ASX recommendations.

A table cross-referencing each of the ASX Principles and Recommendations to the relevant section of this statement appears on Rinker's internet site, under the heading Corporate governance .

1. Rinker's board

1.1 Accountability and approach to governance

Rinker's board is accountable to shareholders for the activities and performance of the Rinker group.

The board's key responsibility is to oversee the building of sustainable value for shareholders within an appropriate risk framework, having regard to the interests of other stakeholders.

To fulfil that responsibility, the board strives to ensure that a strong performance culture continues to be driven throughout the Rinker group, within a structure of governance and ethical values that warrant the trust, respect and confidence of shareholders, employees, customers, suppliers, regulators and the communities within which Rinker group companies operate.

1.2 The board's duties

The board has identified key duties that it has reserved for itself and will not delegate to management. These duties, many of which are carried out with the assistance of the board's committees, are set out in Rinker's Board Charter. The duties include:

Promote and oversee the maintenance of Rinker's high integrity and high performance culture.

Review and confirm the strategic direction of the Rinker group.

Approve business plans, budgets and financial policies.

Consider management recommendations on key issues, including proposed acquisitions, divestments and significant capital expenditure.

Fulfill its responsibilities in relation to safety, occupational health and environmental matters arising out of Rinker group activities and the impact of those activities on employees, contractors, customers, visitors and the communities and environments within which Rinker group companies operate.

Oversee proper processes and controls to maintain the integrity of accounting and financial records and reporting.

Reward executives fairly and responsibly, having regard to the interests of shareholders, Rinker's performance, the performance of those executives and employment market conditions.

Determine dividend policy and the amount, timing and nature of dividends to be paid to shareholders.

Oversee corporate governance practices that represent best practice in Rinker's particular circumstances from time to time.

Oversee capital management and financing strategies.

Oversee appropriate and effective risk management policies and strategies.

Determine the scope of authority (and limits on that authority) delegated to the Chief Executive Officer (CEO).

Strive to ensure that the board is comprised of strongly performing individuals of the utmost integrity with complementary skills, experience, qualifications and personal characteristics that are highly suited to Rinker's present and anticipated future needs, with regular performance reviews supporting this objective.

Appoint, evaluate, reward and determine the duration of appointment of the CEO and approve the appointments and remuneration (sometimes referred to in this statement as "compensation") of those reporting to the CEO, including the chief financial officer and the company secretary.

1.3 Powers delegated to Rinker's management

The board has delegated to the CEO the authority and powers necessary to implement the strategies approved by the board and to manage the business affairs of the Rinker group within the policies and limits to delegation specified by the board from time to time. The CEO may further delegate within those specific policies and delegation limits, but remains accountable for all authority delegated to executive management.

1.4 Rinker's chairman and deputy chairman

The chairman is appointed by the board and must be an independent, non-executive director.

The role of the chairman includes:

Leading the board, including ensuring that board meetings are conducted in an open and professional manner and that all directors know that they are expected to be well informed and are encouraged to express their views forthrightly, without fear or favor, leading to objective, robust analysis and debate.

Representing the views of the board to shareholders and the public.

Conducting meetings of shareholders in an open, democratic manner and providing a reasonable opportunity for shareholders (as a whole) to express their views and to ask questions of the board, management and the external auditors.

Ensuring that new directors are properly briefed on the terms of their appointment and their rights, duties and responsibilities.

Setting an example of the culture and values for which Rinker stands.

If appropriate, the board may also appoint a deputy chairman to assist the chairman from time to time and to act as chairman in his absence. In Rinker's current circumstances, the board has determined it appropriate that Marshall Criser, a US-based director, perform that role.

1.5 The composition of Rinker's board

Rinker's constitution provides for a minimum of five and a maximum of 10 non-executive directors. The board has determined that currently, the appropriate number of non-executive directors is five. All five non-executive directors have been determined by the board to be independent.

Edgar Filing: RINKER GROUP LTD - Form 20-F

The constitution also provides for a maximum of three executive directors. In Rinker's current circumstances, the board has determined it appropriate that the CEO be the only executive director on the board.

The Board Charter specifies that the majority of Rinker's directors must be independent (see criteria below). Under Rinker's constitution, non-executive directors will always comprise a majority of the board.

With assistance from the nominations committee, the board strives to ensure that it is comprised of strongly performing individuals of the utmost integrity and whose complementary skills, experience, qualifications and personal characteristics are highly suited to Rinker's present and expected needs. Specific duties have been assigned to the nominations committee (as set out in the Nominations Committee Charter) to support that objective. Membership of the nominations committee (all members are independent non-executive directors) and attendance at its meetings is set out on page 116.

Details of current directors, including their skills, experience, qualifications, length of service and current term of office are on pages 71-73.

1.5.1 Assessing the independence of directors

The board's policy on assessing independence is based on criteria established in Australia and the United States, including that established by the:

ASX Corporate Governance Council.

Australian Investment and Financial Services Association (the IFSA Blue Book).

US *Sarbanes-Oxley Act of 2002* and Securities Exchange Commission (SEC) rules.

Corporate Governance Rules of the NYSE.

The board's overarching test for independence is whether a director is:

Independent of management and free from any business or other relationship that could materially interfere with (or could reasonably be perceived to materially interfere with) the exercise of their unfettered and independent judgment.

In determining whether this test is satisfied, the board applies the criteria set out (in section 1.5.2) below to determine whether there are any indicators of matters that may impair a director's unfettered and independent judgment.

The board may determine that a director is independent even though one or more of the threshold criteria below are not met, in which case the board will publicly disclose its reasons for making that determination.

Similarly, the board recognizes that in certain circumstances it is possible that a director may not be independent, even if the criteria are met.

In considering independence, the board will distinguish between:

a relationship that may, on isolated occasions, potentially give rise to a narrow, discrete and immediately identifiable conflict of interest (that can be completely quarantined by the board's conflict of interest procedures); and

a relationship that may potentially affect a director's underlying objectivity or independence of mind.

The board tests the independence of directors at least annually. In addition, each director is required to promptly provide the board with any new information that may be relevant to that director's independence. The board will promptly consider any such information and then re-assesses its determination of that director's independence.

The board will disclose, in each annual report, its determination of whether or not each director is independent. The board has recently determined that each of its non-executive directors is, in fact, independent and that none of the criteria set out below have been triggered.

1.5.2 Criteria for assessing independence

Rinker has established the following criteria as a key part of the process for assessing the independence of its directors:

The director is not a member of Rinker group management.

The director is not a substantial shareholder (as defined in section 9 of the *Corporations Act 2001*) of Rinker or an officer of (or otherwise associated directly with) a substantial shareholder of Rinker.

Within the past three years neither the director, nor an immediate family member (as defined in the *Board Charter*), has been employed in an executive capacity by any company in the Rinker group or has been a director after ceasing to hold such employment.

Within the past three years neither the director, nor an immediate family member, has been a principal of an auditor or of any material professional adviser or consultant to any company in the Rinker group or has been an employee materially associated with any such service provided.

Within the past three years neither the director, nor an immediate family member, has been employed by an entity that had an executive officer of a company in the Rinker group on its compensation committee.

The director does not hold cross-directorships or have other significant links with fellow directors through involvement in other companies or bodies where those cross-directorships or links could materially interfere with the director's unfettered and independent judgment.

Neither the director, nor an immediate family member, is a material supplier or customer of the Rinker group or an officer of, or otherwise associated directly or indirectly with, a material supplier or customer. In this context the supplier or customer shall be deemed to be material if payments to or from that customer or supplier exceed two per cent of the consolidated gross revenue of either the Rinker group or of that customer or supplier.

The director has no material contractual relationship with a company in the Rinker group other than as a director, nor does the director receive additional compensation from any such company, apart from approved director's and committee fees.

The director has not served on the board for a period which could, or could reasonably be perceived to, materially interfere with the director's ability to act in the best interests of the Rinker group.

The director satisfies the independence criteria specified from time to time by the NYSE.

Critically, in addition to the above criteria, the board is required to determine whether the director is independent in character and judgment.

Directors who currently sit on Rinker's audit committee satisfy the additional independence criteria specified under the US *Sarbanes-Oxley Act of 2002*.

1.5.3 Materiality of relationships

The board, in part, determines whether a relationship with a professional adviser or consultant is material by assessing whether payment for the services provided is five per cent or more of the expenditure by the Rinker group on professional or consulting services or is five per cent or more of the revenue of the relevant professional adviser or consultant.

Because there are inherent weaknesses in mechanically applying quantitative criteria, the board will always strive to determine the true substance of any relationship that may call a director's independence into question. Qualitative aspects of materiality will be closely considered, including the strategic significance and underlying nature of the relationship.

While Rinker will automatically disclose relationships if the quantitative threshold is exceeded, a relationship will not be regarded as immaterial simply because it involves payments that fall below that quantitative threshold.

Until May 1, 2006 John Arthur was a partner in the law firm Gilbert + Tobin (G+T). Mr. Arthur's spouse remains a partner of G+T. The board specifically examined the fact that in the past G+T had undertaken matters relating to businesses now conducted by companies in the Rinker group (commencing many years prior to Mr Arthur joining G+T) and could potentially do so in the future. In recognising the potential sensitivity of the connection, the board undertook that examination even though the materiality threshold outlined above had not been remotely approached.

The board determined that:

Neither Mr. Arthur nor his spouse had ever personally acted in any such matters and would not do so in future.

Mr. Arthur had not and would not seek to influence any decision on whether or not a company in the Rinker group should use G+T.

Mr. Arthur had never received, nor would in future receive, any additional financial benefit (that is, apart from normal partnership distributions – there being more than 40 partners in G+T) or other recognition or benefit of any nature whatsoever by G+T in connection with any matters carried out by G+T for a company in the Rinker group.

There were no other aspects of the relationship with G+T that could materially interfere with, or could reasonably be perceived to materially interfere with, the exercise of Mr. Arthur's unfettered and independent judgment.

It would be against Rinker's best interests to restrict its long-standing policy that in each case the most appropriate lawyer for a particular matter be engaged, by refusing to consider any lawyer working for G+T.

1.6 Appointment, election and re-election of Rinker directors

The board's nominations committee has specific duties (set out in its charter) to assist the board in assessing the skills required by the board from time to time and in identifying candidates for potential appointment to the board.

When it is appropriate to appoint a new director and a suitable candidate has been found, the Chairman ensures that prior to appointment, the candidate understands, and agrees to, the board's expectations of that candidate including, in particular, the time commitment and nature and quality of the contribution required. A formal letter of appointment is provided to the proposed director which includes (among other matters) the terms and conditions of appointment, the *Board Charter* and the charters of each committee, *Rinker's Constitution*, details of future board and committee meetings, indemnity and insurance arrangements and details regarding remuneration, expenses and superannuation.

In accordance with ASX Listing Rules, the *Corporations Act 2001* and *Rinker's Constitution*, non-executive directors are subject to re-election by rotation at least every three years and new directors appointed by the board are required to seek election at the first general meeting of shareholders following their appointment. Non-executive directors are required to agree not to seek re-election after serving three three-year terms, unless the board specifically requests the director to remain, to enable the board to accommodate unforeseen and unusual circumstances that may exist at the time the director would otherwise leave the board.

Before each general meeting the nominations committee is required to make recommendations to the board regarding the board's support for the re-nomination of each non-executive director who will retire at that meeting. Notices of the meetings at which directors are standing for election or re-election will provide details of the relevant directors' skills, experience, age and qualifications, the board's assessment of their independence, other directorships they hold, their time in office and a statement as to whether the board recommends the individual's election or re-election. Each director standing for election or re-election will be invited to briefly introduce themselves to shareholders at the general meeting.

Rinker's Constitution provides that an executive director's office automatically becomes vacant when he or she ceases employment with Rinker, unless the board determines (prior to that cessation of employment) that the director will remain in office as a director for a specified period that may not exceed 12 months.

1.7 Rinker's board meetings

The board meets as often as the directors determine is necessary to fulfil their responsibilities and duties. Details of board and committee meetings held during Rinker's most recent financial year and each director's attendance at those meetings is set out in the table on page 116. Because of the international nature of the Rinker group's operations, Rinker's directors are required to travel substantially. The dates and locations of scheduled meetings are generally agreed at least a year in advance. However the board always retains flexibility to reschedule meetings or to schedule additional meetings if significant issues arise outside the planned program of meetings.

The board aims to strike an appropriate mix between meetings held in Australia, meetings held in the United States and meetings conducted by video-conference or other electronic means.

Board and committee papers are distributed sufficiently in advance of each meeting to afford directors adequate time to fully consider those papers before the meeting.

The board reviews the overall content of its meeting agendas and board and committee papers at least annually as part of the board's process for reviewing its performance (this must also be done at any other time on the request of any director). The company secretary prepares a draft

agenda for each meeting, which is finalised by the Chairman in consultation with the CEO. In addition, any director may require a matter to be placed on the board's agenda.

Independent, non-executive directors meet on a regular basis, without any executive director or other member of management present. The Chairman presides over these meetings. Interested persons may raise issues with the Chairman for consideration by non-executive directors. Contact details are available on Rinker's internet site.

Whenever necessary to ensure that discussion on sensitive matters may be conducted openly and forthrightly, the Chairman will request executive directors and other members of management who may be present to temporarily leave a board meeting. If necessary, the Chairman will call a separate formal meeting of non-executive directors.

Subject to any need for the directors to meet in private, the company secretary and, at the Chairman's invitation, the chief financial officer, attend all board meetings.

Senior managers who report to the CEO are expected to make personal presentations to the board regularly including at the board's annual budget and strategy meeting with management and on other appropriate occasions to provide an in-depth review of the performance and issues of the business for which they are responsible. Other managers are invited to attend such sessions when appropriate.

Directors are expected to participate actively at board meetings and to bring independent judgment to bear. Constructive differences of opinion and robust debate are fundamental to the effective operation of the board. Any director may request matters of concern to be recorded in board minutes.

In accordance with the board's *Policy for Obtaining Independent Professional Advice*, the board, each board committee, and each director have the right to obtain independent professional advice at Rinker's expense to assist them to carry out their duties. For a director, the prior approval of the Chairman is required, but may not be unreasonably withheld. If such consent is withheld, the board must be promptly informed and the director may then seek board approval to obtain such advice. This right to obtain independent professional advice was neither exercised nor sought to be exercised during the year.

1.8 Rinker's board committees

The board has established the following committees to advise and support the board in carrying out its duties:

Audit committee (see *charter*).

Safety, health & environment committee (see *charter*).

Compensation & human resources committee (see *charter*).

Nominations committee (see *charter*).

Each committee has a written charter which addresses the committee's composition, overall responsibilities, specific duties, reporting obligations, meeting frequency and arrangements, authority and resources available and provisions for reviewing the committee's charter.

The composition of each committee and the attendance of their members at meetings is set out in the table on page 116.

1.9 Induction, access to information and continuing education for directors

Upon joining the board, and in addition to their letter of appointment, new directors are provided with a comprehensive information pack and special briefings from management. At the earliest practical opportunity, they take part in visits to key operations in the United States and Australia to assist them to rapidly understand the Rinker group's businesses, strategies, people, culture, policies and other key issues.

With the consent of the Chairman, which may not be unreasonably withheld, directors may attend (at Rinker's expense) briefings, lectures or courses that they believe will assist in further developing their knowledge and understanding of their duties and responsibilities as directors or of issues clearly pertinent to the Rinker group's businesses.

To assist directors to maintain their understanding of the group's businesses and to assess the people running them, senior managers brief the board regularly in person. Site visits and briefings are organised as frequently as practical. Subject to safety requirements, directors have unrestricted access to employees during such visits. External professionals and consultants also brief the board when appropriate.

All directors have direct access to the company secretary and general counsel, for guidance on corporate governance issues and developments and to provide assistance on all other matters reasonably requested by directors. The company secretary and general counsel monitors compliance with the Board Charter and other policies and procedures and is accountable to the board, through the Chairman, on all corporate governance matters.

Directors have unrestricted access to Rinker's records and information. If the board or an individual director seeks information, the CEO is required to take all reasonable steps to ensure that no material information is withheld and that no misleading impressions are conveyed.

Comprehensive performance reports are provided to directors monthly, regardless of whether a board meeting is scheduled for that month.

1.10 Performance reviews of the board

Through its nominations committee, and using the services of an independent third party, the board annually formally reviews the performance of the board, its committees, and of each non-executive director. A review was undertaken in March/April 2006, and a report on its findings and recommendations was presented to the board in May 2006. The review was initially conducted by way of questionnaire, with the opportunity for follow-up discussions if any director, or the independent third party, thought it would be beneficial to do so. The review indicated that the board was continuing to perform soundly.

Matters canvassed in the performance review included:

The effectiveness of the board and each committee in meeting the requirements of their charters, as well as any amendments that should be made to those charters.

The contribution, effort and time commitment made by individual directors, both at board meetings and in their other responsibilities.

The effectiveness of the Chairman in leading the board.

The quality of debate and discussion at board meetings.

The quality of the relationship between non-executive directors and management.

The quality and timeliness of board agendas, board papers and secretarial support services.

The suitability of the blend of skills, experience, qualifications and personal characteristics represented on the board and an identification of any current or potential gaps.

Any other significant matters that arose during the process.

Through the remuneration & human resources committee, the performance of the CEO (and other executive directors, if any) is separately and formally reviewed each year. The review evaluates performance against pre-set financial and non-financial goals.

1.11 Safeguards against conflicts of interest

Rinker's directors are required to take all reasonable steps to avoid any action, position or interest that conflicts with an interest of the Rinker group, or could reasonably be perceived to represent a conflict. This is one of the elements of Rinker's Code of Business Ethics a code that applies to all directors, management and other employees.

If directors have a material personal interest in any matter that concerns the affairs of the Rinker group, they must give the other directors immediate notice of such interest. Such notice is to be provided in writing (although the director may first advise the matter personally) to the company secretary, who shall ensure it is brought to the attention of other directors.

If a potential conflict of interest arises, the director concerned does not receive the relevant board papers and is required to withdraw from the board meeting while the matter is considered. The director must not endeavour, in any other manner, to influence the board's consideration of the matter.

If a significant conflict of interest arises that is not capable of being completely quarantined by the above procedure, and which has the potential to affect a director's underlying objectivity or independence of mind, the chairman, after consultation with the director, may request the director to resign.

1.12 Shareholding requirements for directors

Rinker's constitution requires each director to hold a minimum of 2,000 Rinker ordinary shares (or the equivalent in Rinker ADRs) in their own name.

In addition, the board's policy is that each non-executive director be encouraged to acquire Rinker shares or ADRs, with a value equivalent to not less than one year's base director's fees, within a reasonable time of joining the board, and that such Rinker shares or ADRs continue to be held while remaining on the board.

The board's policy also encourages the CEO to acquire Rinker shares or ADRs, with a value equivalent to three years of the CEO's base remuneration, within a reasonable time and that such Rinker shares or ADRs continue to be held while remaining as CEO.

Details of directors' shareholdings are set out in the table on page 116.

1.13 Restrictions on share dealings by directors and employees

Directors and employees are subject to Australian and US legal restrictions on buying or selling Rinker securities while in possession of price sensitive information that has not been disclosed to the market (known as insider trading).

Rinker has adopted a *Policy on Dealings in Shares by Rinker Directors and Employees* that places additional restrictions on the ability of directors and employees to buy or sell Rinker's shares, designed to minimise the risk of actual or perceived insider trading.

Also, on a one-off basis this year, as a consequence of Rinker's early announcement to the market (on April 8, 2006) of its expected financial results for the year ended March 31, 2006, directors brought forward and extended (in each case by one month) the trading window that normally opens with the formal announcement of those results in May.

In accordance with ASX Listing Rules, Rinker is required to notify ASX, within five business days, of any sale or purchase of Rinker securities by a director. This notification is also filed publicly by Rinker with the US SEC (on Form 6-K). To enable Rinker to fulfil this obligation, each director has entered into an agreement with Rinker under which the director is required to notify the company of any such sale or purchase as soon as reasonably practicable, and in any event within three business days.

2. Rinker's shareholders

2.1 Communication strategy

Rinker is committed to providing shareholders with extensive, transparent, accessible and timely communications on company activities, strategy and performance.

The main method used to communicate with shareholders include:

Releases to ASX and SEC/NYSE in accordance with continuous disclosure obligations.

The extensive use of Rinker's internet site (www.rinker.com).

The annual report.

The half-yearly results summary published on internet.

Rinker's annual general meeting (AGM).

Email distribution of company releases, reports and other communications.

Media coverage of significant announcements.

Rinker's communication program includes:

Posting on Rinker's internet site of all announcements and reports to the market, immediately following release by ASX.

Mailing annual report to shareholders (unless requested otherwise) and posting on Rinker's internet site for downloading.

Email alerts to shareholders (upon request) informing about significant announcements and the availability of reports on Rinker's internet site.

AGM, results briefings to media and analysts, and conference calls with analysts are all webcast live and may also be viewed later on Rinker's internet site.

Other major briefings, presentations and management speeches are immediately posted on Rinker's internet site.

Site visits and strategy briefings are provided for investment fund managers and analysts. All new presentations made during those visits and briefings are released to ASX and SEC and immediately posted on Rinker's internet site.

My Rinker employee newsletters posted on Rinker's internet site.

Shareholder questions about Rinker:

Shareholders can send questions by

Sending emails to Rinker.

Contacting Rinker by telephone, facsimile or mail.

Contact details are provided on Rinker's internet site.

Shareholder participation at Rinker's AGMs:

Shareholders are encouraged to attend Rinker's AGM each year, to ask questions and to exercise their voting right.

At Rinker's request, our external auditor has undertaken to attend each Rinker AGM to be available to answer relevant shareholder questions.

Shareholders who cannot attend in person are encouraged to lodge a proxy and to view the live webcast.

Addresses by the Chairman and the CEO, together with presentation materials, are released to ASX and the SEC and posted on Rinker's internet site concurrently with the AGM.

Voting results (including a summary of proxy voting) on matters considered at the AGM are released to ASX and the SEC and posted on Rinker's internet site as soon as they are determined.

A report on the AGM is provided to shareholders on request and is posted on Rinker's internet site.

2.2 Market disclosure policy

Rinker's ordinary shares are listed on ASX and its ADRs are listed on NYSE. Rinker must comply with disclosure obligations in both Australia and the US.

Rinker's Market Disclosure Policy, coupled with its communication strategy referred to above, is designed to put into practice Rinker's commitment to:

Provide relevant information about the company, its performance and activities to the market in strict compliance with its disclosure obligations under Australian and US law.

Avoid selectively disclosing price sensitive information.

Take all reasonable steps to provide all shareholders and other interested parties with equal access to information that is made available to the market.

3. Rinker's ethical culture

Rinker's Code of Business Ethics applies to all directors, management and employees within the Rinker group.

The key elements of the code include:

Acting within the law and in full compliance with Rinker's policies.

Acting with integrity.

Acting responsibly with respect to all stakeholders, including fellow employees, customers, communities, shareholders and suppliers.

Conflicts of interest.

Integrity in financial and all other reporting.

Respecting the value and confidentiality of information.

A drug-free, safe and healthy working environment.

Safeguarding company assets and resources.

Over 3,000 middle ranking and senior employees are required to certify in writing annually their knowledge of and compliance with the code. A hotline telephone number is available for confidential reporting of concerns or suspected violations. Anonymous reports may also be made. The code protects any employee who makes a report in good faith from indignity or retaliation.

Rinker has also established a separate *Policy on Dealings in Shares by Rinker Directors and Employees*.

4. Rinker's remuneration

A. Management discussion and analysis of the financial results

Rinker's board has established a compensation & human resources committee, the main role of which (as set out in its *charter*) is to assist the board in fulfilling its corporate governance and oversight responsibilities with respect to:

Providing sound employment and remuneration policies and practices that enable Rinker group companies to attract and retain high quality executives and directors who are dedicated to the interests of Rinker's shareholders.

Fairly and responsibly rewarding executives, having regard to the interests of shareholders, Rinker's performance, the performance of each executive and employment market conditions.

Evaluating potential candidates for executive positions, including that of the CEO, and overseeing executive succession plans.

All members of the committee are independent non-executive directors. Its charter is available on Rinker's internet site. Attendance at its meetings is set out on page 116.

The board and the committee recognize that while remuneration is important in recruiting, retaining and motivating highly talented and effective people other factors also play a major role. These include Rinker's corporate reputation, its ethical culture and business values, its executive leadership, and its other human resources policies.

Rinker has prepared a separate Compensation Report, set out on pages 76-99 of this annual report. Among other things, the report:

Explains the board's policies in relation to the nature and level of remuneration paid to directors, secretaries and senior managers within the Rinker group.

Discusses the link between the board's policies and Rinker's performance.

Provides a detailed summary of performance conditions, explaining why they were chosen and how performance is measured against them.

Identifies the companies that Rinker's performance is measured against for the purpose of its long-term incentive plan.

Sets out remuneration details for each director and for each member of Rinker's senior executive management team.

No current or proposed equity-based remuneration within Rinker involves the issue of new shares. All shares for equity plans are purchased on-market and the relevant cost expensed in accordance with accounting standards. The board has noted clarification that ASX Recommendation 9.4, relating to shareholder approval of equity-based executive remuneration plans, is intended to apply only to plans involving the issue of new shares, that is, plans that dilute the holdings of existing shareholders.

5. Integrity of Rinker's financial reporting

A. Management discussion and analysis of the financial results

The primary responsibility of the audit committee is to assist the board in fulfilling its corporate governance and oversight responsibilities with respect to:

The integrity of Rinker's financial reporting.

Compliance with legal and regulatory requirements, and with Rinker's *Code of Business Ethics*.

The external auditor's qualifications and independence.

The system of risk management and internal controls that management has established and the process of internal and external auditor review of internal control.

The performance of Rinker's internal audit function and external auditors.

All members of the audit committee are independent non-executive directors. Its *charter* is available on Rinker's internet site. Attendance at its meetings is set out on page 116.

Because Rinker is registered with the SEC, under US law the audit committee is required to be directly responsible for the appointment, compensation, retention and oversight of the external auditor and the pre-approval of all auditing, audit-related and permitted non-audit services performed by the external auditor. Under the *Corporations Act 2001* the company in general meeting must approve the removal of external auditors and the appointment of new external auditors, giving rise to a potential inconsistency. Rinker will give effect to the provisions of the *Corporations Act 2001* to the extent of any inconsistency, giving shareholders ultimate authority in such circumstances.

The audit committee annually reviews the qualifications, performance and independence of the external auditor. Further details of the matters taken into account in reviewing performance and assessing independence are set out in the committee's *charter*. Those matters, together with a review of the external auditor's proposed work plan for the coming year and an assessment of the external auditor's ability to conduct an effective, comprehensive and complete audit for an agreed fee, are the key factors in determining whether to appoint the incumbent external auditor for a further year or to seek the appointment of a new external auditor.

The lead and concurring partners of Rinker's external auditor must be rotated at least every five years, followed by a five-year minimum *time out* period during which those partners may not take part in the Rinker audit. Other audit partners on the engagement team must be rotated at least every seven years, followed by a minimum two-year *time out* period.

Rinker's chief executive officer and chief financial officer are required to state to the board in writing that Rinker's financial reports present a true and fair view, in all material respects, of Rinker's financial position and performance and are in accordance with relevant accounting standards.

6. Oversight of risk

The board is responsible for the Rinker group's system of internal control and for reviewing its effectiveness in meeting Rinker's objectives, with the goal of achieving a responsible assessment and mitigation of risks. This includes reviewing financial, operational and compliance controls and risk management procedures.

The board has established a process for identifying, evaluating and managing significant risks faced by Rinker. The process is reviewed annually and operated during the year ending March 31, 2006 and up to and including the date of approval of the 2006 annual report and financial statements.

Rather than having a single risk policy, Rinker has specific policies and processes for addressing the key areas of business risk, financial risk, financial integrity risk and compliance risk. Relevant policies cover areas such as limits of authority, ethics and integrity, compliance with laws and regulations, treasury management, safety, health and environment, and human resources.

Rinker's management is responsible to the board for managing, reporting upon and implementing strategies to address those risks. In addition to formal strategic planning sessions, monthly reports to the board identify issues that represent business, financial and compliance risks, and include updated information on key economic indicators. The audit committee reports to the board on financial and financial integrity risks and the group's risk management systems overall. The safety, health & environment committee and the remuneration & human resources committee report to the board on risks (mainly business and compliance risks) relating to matters within their charters.

Rinker is subject to economic risks in its markets, including variations in demand across the construction industry economic cycle, the level of government funded construction projects, interest rates, competition, and sources and prices for purchased goods and services. An important part of

Rinker's strategy is growth through acquisitions. There is risk that future acquisition opportunities may not be as attractive as past opportunities or may fail to achieve target returns. Disruptive events such as labour disputes, severe weather, natural disasters, or terrorist activities could affect day-to-day operations. Rinker must also manage risks of breaches of compliance with health, safety, environmental, land use, trade practices, and other laws and regulations, and contractual obligations.

Rinker has adopted the Committee of Sponsoring Organizations framework (1992 COSO framework) as its risk management and internal control framework. Controls are assessed at both the entity and activity levels.

Assurance functions including internal auditors and health, safety and environmental auditors perform reviews of control activities and provide regular written and face-to-face reports to the board, its committees, and to senior management. The board receives and reviews minutes of the meetings of each board committee.

Some risks, such as natural disasters, cannot be mitigated to an acceptable degree using internal controls. Such major risks are transferred to third parties through insurance coverage, to the extent considered appropriate.

Rinker has established a disclosure committee, drawn from management, which is responsible for reviewing the effectiveness of the group's controls and procedures for the public disclosure of financial and related information. This committee presents the results of its review to executive management, the audit committee and the board.

In the course of approving Rinker's financial statements and notes thereto for the year ended March 31, 2006, the board considered certificates from the chief executive officer and the chief financial officer stating that, in the opinion of those officers:

The integrity of Rinker's financial statements and notes thereto was founded on a sound system of risk management and internal compliance and control systems which, in all material respects, implement the policies adopted by the board.

Rinker's risk management and internal compliance and control systems, to the extent they relate to financial reporting, were operating effectively in all material respects, based on the 1992 COSO framework.

7. NYSE corporate governance rules

Because Rinker's ADRs are listed on the NYSE, Rinker is required to disclose any significant differences between its corporate governance practices and the NYSE corporate governance rules. There are two potentially significant differences.

Under the NYSE rules, a company's nominations committee is required to develop and recommend to the board a set of corporate governance principles applicable to the corporation. In Rinker's case, the board as a whole has developed and adopted Rinker's corporate governance principles. The board believes that this is appropriate for Rinker, particularly given that five of Rinker's six directors, including the Chairman and Deputy Chairman, are independent, non-executive directors.

To provide checks and balances on the potential dilution of shareholders' equity in Rinker resulting from the process of earmarking shares to be used for equity-based awards to employees and directors, the NYSE rules generally require that all equity-compensation

plans be approved by shareholders. The NYSE rules define an equity-compensation plan broadly to include plans involving both newly issued shares and shares acquired on-market.

All of Rinker's share plans now involve shares acquired on-market and, therefore, are non-dilutive to shareholders. Full disclosure is made of shares purchased under these plans and the costs are expensed and disclosed in accordance with accounting standards.

Rinker has not obtained shareholder approval for its share plans open to employees and directors. However, Rinker's Remuneration Report, which includes details of all share plans, will be put to shareholders for adoption by way of a non-binding resolution at Rinker's annual general meeting on July 18, 2006.

Directors' attendance at board and committee meetings

Edgar Filing: RINKER GROUP LTD - Form 20-F

Year ended March 31, 2006 Name	Board		Audit Committee		Compensation & HR Committee		Nominations Committee		Safety, Health & Environment Committee

Walter Revell	10	9*	4	4			2	2	4	4

Legend:

Current member	Current Chairman
----------------	------------------

Notes:

A shows number of meetings held during the period the director was a member of the board and/or committee

B shows number of meetings attended during the period the director was a member of the board and/or committee

(I) As an executive director, David Clarke is not a member of any committees.

* Meeting not attended by Mr. Revell, was unscheduled and at short notice.

Directors' interests in Rinker shares (including Rinker ADRs) are set out below.

As at May 11, 2006	Relevant Interest 2006	Relevant Interest 2005
John Arthur	40,964	34,700
David Clarke*	1,503,519	1,010,519
Marshall Criser	52,282	34,000
John Ingram	18,401	17,175
John Morschel	64,081	59,487
Walter Revell	20,000	20,000

* Includes 500,000 PSP shares granted to Mr. Clarke during fiscal year 2005 and 493,000 PSP shares granted to Mr. Clarke during fiscal year 2006. These shares are at risk and will be eligible to vest if performance and time

qualifications are met.

D. Employees

As at March 31, 2006, Rinker group companies had a total of 14,358 employees. A breakdown of employees by geographic location is set out below.

Employee numbers for Rinker Group Limited at March 31:

	2006	2005	2005-2006 % CHANGE
United States	11,193	10,186	10%
Australia	2,683	2,600	3%
China	482	493	-2%
Total	14,358	13,279	8%

Note: Represents full time equivalent employees. The increase in the number of US employees at March 31, 2006 is primarily the result of acquisitions, including Keys Concrete, a major supplier of concrete and block in the Tampa region as well as fleet expansion at existing plants and several greenfield plant startups.

In the US, Rinker Materials provides certain union and non-union employees with a defined contribution retirement plan that allows employees to defer a portion of their salary in accordance with US Internal Revenue Service guidelines. Pursuant to the plan, Rinker Materials matches a percentage of the employee contribution and annually makes a discretionary profit sharing contribution. Additionally, in connection with certain acquisitions, Rinker Materials is obligated to maintain defined benefit retirement plans. Rinker Materials funds these defined benefit plans in accordance with government guidelines. On March 31, 2006 an unaudited actuarial review was performed on the defined benefit pension plans. The actuarial review reflected an estimated funding shortfall of US\$25.7 million. This deficit is being funded progressively by Rinker Materials and all minimum funding requirements have currently been satisfied. The full amount of the liability has been accrued at March 31, 2006. Funding details are provided in Item 5 Operating and Financial Review and Prospects.

Rinker Materials has approximately 46 different collective bargaining agreements with a number of unions. These agreements, most of which have been in place for many years, cover approximately 4,400 employees. Of these 4,400 employees, approximately 1,800 are covered by various chapters of the International Brotherhood of Teamsters each of which negotiates different agreements for its members, and approximately 1,500 are covered by various chapters of the Laborers International Union, each of which negotiates different agreements for its members. The terms of ongoing collective bargaining contracts vary with expirations ranging from 2006 to 2010. Rinker Materials, while covered by these various collective bargaining agreements, has experienced a relatively low level of industrial disruption over the past four years. Rinker group's relationship with its various labor unions may be characterized as mature and productive.

U.S. employees covered by collective bargaining agreements, not covered by single employer pension plans, generally receive pension and health benefits directly from multiemployer trust funds jointly managed by trustees appointed by labor and management.

Readymix in Australia has approximately 61 enterprise bargaining agreements and certified agreements covering approximately 2,300 employees. Major respondent unions include the CSR & Rinker Salaried Staff Association, the Australian Workers Union, the Australian Manufacturing Workers Union and the Transport Workers Union. Readymix administration, production, maintenance and transport employees are eligible for membership in these various unions. The Readymix enterprise agreements or enterprise awards are registered with either the Australian Industrial Relations Commission or Queensland or New South Wales Industrial Relations Commissions. The enterprise agreements and awards are underpinned by relevant industry awards and operate for fixed terms of various lengths (although they continue to operate after the expiry of those terms unless replaced by another agreement/award). Salaried staff are employed under individual contracts of employment, which are underpinned by an award of the Australian Industrial Relations Commission and, in some cases, by certified agreements (which comprise about 23 of the total number of 61 mentioned above). Over the past four fiscal years, industrial disputation has been minimal and Readymix believes that it has good relationships with its employees.

In Australia, Rinker group entities participate in superannuation (pension) plans that will continue to provide ongoing benefits for employees. Harwood Superannuation Fund (formerly the CSR Australian Superannuation Fund) provides ongoing benefits for the employees of the Rinker Group entities in Australia (including expatriates in China), with Rinker assuming responsibility to fund defined benefits and accumulation benefits for Rinker group employees. Readymix is also a participating employer in the Monier PGH Superannuation Fund, which provides superannuation benefits for some employees.

Rinker group entities have comprehensive safety and health management systems. These systems are designed to improve overall safety performance in all operations. Rinker continues to focus on safety, health and environment management training for business managers and other frontline people, improving root cause analysis, advancing risk assessment processes, addressing potential occupational health hazards and integrating new acquisitions into the Rinker group management system approach. In addition, the current safety, health and environment audit program is being revised and strengthened although many of Readymix sites continue to be audited externally to be in compliance with self-insurance requirements.

E. Share Ownership

No director or senior manager has beneficial ownership of one percent or more of the voting securities. Note 33 to the financial statements included elsewhere in this annual report shows actual shareholdings of directors, each of whom is required by Rinker's constitution to own a minimum of 2,000 shares in his or her name. As at March 31, 2006 the holdings of directors and senior management of Rinker, as a group, of Rinker's voting securities were as follows:

Title of Class	Identity of Person or Group	Number Owned	Percent of Class
Ordinary shares	Directors and senior executives	4,692,965	0.52%

No options to acquire Rinker shares are held by any directors, members of senior management or other employees as at May 11, 2006.

Item 7 Major Shareholders and Related Party Transactions

A. Major Shareholders

Rinker is not directly or indirectly controlled by another corporation or by any foreign government and does not know of any arrangement the operation of which may at a subsequent date result in a change of control of Rinker.

As at May 11, 2006 there were four registered holders known to Rinker of more than 5 percent of Rinker's outstanding voting securities. Westpac Custodian Nominees Limited held 173.5 million ordinary shares or 19.1 percent of Rinker's issued capital. J P Morgan Nominees Australia Limited held 121.9 million ordinary shares or 13.4 percent of Rinker's issued capital. National Nominees Limited held 107.0 million ordinary shares or 11.8 percent of Rinker's issued capital. ANZ Nominees Limited held 47.9 million ordinary shares, or 5.3 percent of Rinker's issued capital. The shares are held as nominee for numerous beneficiaries, most of whom are believed to be pension funds but whose identity is not known to Rinker.

In addition, as at May 11, 2006, three beneficial owners of more than 5 percent of Rinker's outstanding voting shares were known to Rinker. These were Perpetual Trustees Australia Limited, holding 76.3 million ordinary shares or 8.4 percent of Rinker's issued capital, Barclays Global Investors Australia Limited, holding 47.8 million ordinary shares or 5.3 percent of Rinker's issued capital, and Capital Group Companies, Inc., holding 47.1 million ordinary shares or 5.2 percent of Rinker's issued capital. None of these holders of larger blocks of shares have voting rights that are different from the rights of other shareholders.

As at May 11, 2006, 480,425 (0.1% of the total ordinary shares outstanding) fully paid ordinary shares are held by 841 shareholders who, on record, are resident in the United States.

Based on inquiries made of registered holders, Rinker estimates that as at April 30, 2006 approximately 208 million fully paid ordinary shares representing approximately 23% of total ordinary shares outstanding were beneficially owned by residents in the United States.

B. Related Party Transactions

Relationship of directors

As at March 31, 2006, there were no interest free loans to the directors of Rinker and its subsidiary entities other than one interest free loan to a director of a subsidiary as noted at page 96. During fiscal year 2006, no directors of Rinker or any of its subsidiaries and their director-related entities have received or are entitled to receive any additional benefit, other than a benefit shown in Item 6.B. - Compensation details of executive directors and senior management or the accompanying financial statements (specifically, Note 26 Key Management Personnel Compensation, Note 12 Receivables and Note 33 Related party information) by reason of a contract made by Rinker or a related party with the directors, or with a firm or company in which they have a substantial financial interest or over which they have a significant influence.

C. Interests of Experts and Counsel

Not applicable.

Item 8 Financial Information

A. Consolidated Statements and Other Financial Information

See Item 18. Financial Statements.

Legal Proceedings

Except as set out below, no company in the Rinker group is involved in any litigation the outcome of which is likely to have a material adverse effect on the business, financial position or financial performance of the Rinker group.

Rinker Materials holds one and is the beneficiary of one other of 12 federal quarrying permits granted for the Lake Belt area in South Florida. The permit held by Rinker Materials covers Rinker Materials' SCL and FEC quarries. Rinker Materials' Krome quarry is operated under one of the other permits. The FEC quarry is the largest of Rinker Materials' quarries measured by volume of aggregates mined and sold. The Rinker Materials' Miami cement mill is located at the SCL quarry and is supplied by that quarry. See Item 3.D. Risk Factors' Operation and supply failures or shortages could have an impact on the Rinker group's future revenues and profits' and Item 3.D. Risk Factors' Rinker group's operations depend on securing and permitting aggregate reserves that can be supplied economically to growing markets'. A ruling was made on March 22, 2006 by a single judge of the U.S. District Court for the Southern District of Florida in connection with litigation brought by environmental groups concerning the manner in which all 12 permits were granted. Although not named as a defendant, Rinker Materials has intervened in the proceedings to protect its interests. The judge ruled that there were deficiencies in the procedures and analysis undertaken by the relevant governmental agencies in connection with the issuance of the permits. The judge has returned the permits to the relevant governmental agencies for further review of the issues raised and has set further proceedings to determine the activities to be allowed during the period of further review, which review the governmental agencies have indicated in recent court filings should take approximately 18 months. Rinker expects quarrying operations to be unaffected pending the outcome of a court hearing scheduled to commence on June 13, 2006. While Rinker believes Rinker Materials permits were validly issued, it is not possible to determine the likely outcome of these further proceedings or what impact that will have on Rinker Materials' operations. If the Lake Belt permits, including the key permits for the SCL, FEC and Krome quarries were ultimately set aside or quarrying operations under them restricted, Rinker Materials and the other industry participants with quarries in the Lake Belt region would need to source aggregates, to the extent available, from other locations in Florida or import aggregates. This would likely affect Rinker Materials' ability to make, sell and deliver products, which could cause revenues to decline or costs to increase and result in lower profits. Any adverse impacts on the Florida economy arising from the cessation or significant restriction of quarrying operations in the Lake Belt could also have a material adverse effect on Rinker Materials.

Rinker Materials has been served with two lawsuits filed in Hillsborough County, Florida Circuit Court which name Rinker Materials and several other parties, relating to an animal feed supplement processing site formerly operated by an entity that was later merged into an existing Rinker Materials subsidiary. The site was sold in 1993 prior to Rinker Materials ownership of the subsidiary. The lawsuits are filed on behalf of multiple residents of Hillsborough County living near the site and allege various injuries related to alleged exposure to toxic chemicals. At this time, the Rinker group has inadequate information from which to estimate a potential range of liability, if any.

Rinker Materials is aware that it has been named as one of numerous defendants in 62 lawsuits filed in Broward County, Florida however, no complaint has been served on Rinker Materials. The

plaintiffs in these lawsuits allege personal injury relating to exposure to silica and assert that Rinker Materials and various other companies (including other mining companies) are liable for negligence under a number of theories. At this time Rinker has inadequate information from which to estimate a potential range of liability, if any.

Although Rinker Materials is currently named as a defendant in a number of asbestos claims in the United States (approximately 359 as at May 10, 2006) relating to the alleged sale of raw asbestos by CSR, and has been named in other such claims in the past, to date it has never been held liable in response to any such claims and all resolved claims have been dismissed for no payment by Rinker Materials, usually with express agreement from claimant's attorneys that Rinker Materials was not a proper party (CSR ceased such sales in 1966 and Rinker Materials was not formed until 1981). Rinker has no reason to believe that these circumstances will change and does not believe such claims present a material risk of material liability. Furthermore, CSR has agreed to indemnify Rinker group companies in the event of any asbestos-related liabilities being imposed on them in respect of CSR's alleged torts. Accordingly, Rinker does not believe asbestos litigation against CSR will have a material impact on the business, financial position or financial performance of the Rinker group.

Dividend Policy

The directors adopted a dividend policy for Rinker of distributing around 35% of available net profit after finance and income tax in the form of dividends, with an interim dividend payable in December of each year and a final dividend in July. Rinker has declared the following dividends:

	2006	2005
Dividends Declared		
In respect of fiscal years ending March 31		
Amount per share		
Interim dividend (A\$ cents per share) (1)	14.0	7.0
Final dividend (A\$ cents per share) (2)	24.0	14.0
Total	38.0	21.0
Franking		
Interim dividend (1)	60%	100%
Final dividend (2)	60%	60%
Payout Ratio (3)	35%	34%

Notes:

- (1) Interim dividends are paid in December of the current fiscal year.
- (2) Final dividends are paid in July of the following fiscal year.
- (3) Defined as dividends declared in respect of a given fiscal year divided by net profit attributable to Rinker shareholders for that corresponding fiscal year.

Rinker declared a final dividend in respect of the year ended March 31, 2006 of Australian dollar 24 cents (A\$0.24) per share, 60% franked, totaling approximately A\$218 million, payable on July 4, 2006. The unfranked portion of this dividend will be paid from Rinker's conduit foreign income amount (previously the foreign dividend account).

The total dividend for the year ended March 31, 2006 at A\$0.38 represents a payout ratio of 35 % of net profit adjusted to exclude non-recurring gains on divestments of US\$36 million described in Note 4 to the financial statements that are included elsewhere in this annual report.

Subject to the Australian Corporations Act 2001, the directors of Rinker may declare a dividend and set the amount and date for its payment. The payment of dividends is subject to the discretion of the Rinker board. Dividends are payable to shareholders of fully paid shares equally. Generally, shares rank for dividend from their date of allotment.

The level of dividends declared by the Rinker board is subject to a number of factors, including the financial results of the Rinker group, the general business environment, ongoing capital expenditure requirements, ongoing cash requirements, applicable law and any other factors the Rinker board may consider relevant.

Holders of Rinker ADRs, which each represent five Rinker ordinary shares, are each entitled to a final US\$ dividend equivalent of A\$1.20 per share, or five times the final dividend per ordinary share.

Refer to Note 39 to the financial statements included elsewhere in this annual report for information regarding a special dividend declared subsequent to March 31, 2006.

B. Significant Changes

Except as otherwise disclosed in Note 39 to the audited financial statements, no significant change has occurred to the Rinker group entities, since the date of the financial statements.

Item 9 The Offer and Listing

A. Listing Details

Not applicable

Nature of Trading Market

Edgar Filing: RINKER GROUP LTD - Form 20-F

The principal trading market for Rinker's fully paid ordinary shares is conducted by the ASX. Rinker ordinary shares were listed on the ASX (ticker symbol RIN) for the first time on March 31, 2003 (on a deferred settlement basis).

In the United States, JP Morgan Chase Bank, N.A. as Depositary (the Depositary), issues ADRs evidencing ADSs. Effective April 27, 2005, each ADS represents 5 ordinary shares. The ADRs commenced trading on the NYSE on October 28, 2003.

The following table sets forth, for the months indicated, the high and low sales prices in A\$ per ordinary share as reported by the ASX and the high and low sales prices in US\$ per ADS as reported by the NYSE.

	Month	Per Ordinary Share (A\$)		Per ADS (1) (US\$)		
		High	Low	High	Low	
2004	April to June	8.09	6.62	28.05	23.75	
	July to September	8.80	7.74	31.32	28.02	
	October to December	10.75	8.48	41.59	31.10	
2005	January to March	11.92	10.25	47.00	39.50	
	April	11.65	10.61	44.97	41.08	
	May	12.73	10.81	47.64	42.68	
	June	14.15	12.34	54.80	47.15	
	July	15.30	13.32	58.11	49.71	
	August	15.13	14.13	58.05	52.84	
	September	16.78	14.30	65.00	57.37	
	October	16.89	15.74	61.78	58.35	
	November	15.99	14.71	58.55	55.10	
	December	16.89	15.74	61.78	58.35	
	2006	January	17.18	15.60	64.97	59.03
		February	18.08	16.60	66.63	61.75
March		20.00	17.34	70.71	63.68	
April		22.22	19.60	83.30	71.00	
May (through May 11)		21.54	20.16	83.46	77.74	

(1) Effective April 27, 2005, ordinary shares represented by each ADR changed to 5 from 10. The table above as been adjusted to reflect the new ratio.

At May 11, 2006, 910,116,219 ordinary shares were outstanding and were held by 95,704 holders of record. As at May 11, 2006, 4,495,961 ADRs representing 22,479,805 ordinary shares, or 2.5 percent of the ordinary shares outstanding on such date, were held by an estimated 5,100 beneficial holders in the United States based on inquiries made of registered holders.

B. Plan of Distribution

Not applicable.

C. Markets

Rinker ordinary shares are listed on the ASX. Rinker ADRs, representing its ADSs, are listed for trading on the NYSE.

D. Selling Shareholders

Not applicable.

E. Dilution

Not applicable.

F. Expenses of the Issue

Not applicable.

Item 10 Additional Information

A. Share Capital

During the year ended March 31, 2004, Rinker issued 944.7 million ordinary shares on April 11, 2003 (as a result of the demerger from CSR Limited) and 0.3 million ordinary shares in August and September 2003 under the Employee Universal Share Plan (USP).

During the year ended March 31, 2005, Rinker repurchased and immediately cancelled 4.0 million ordinary shares as part of the on-market buyback. In August and September 2004, 0.2 million ordinary shares were issued under the Employee Universal Share Plan (USP).

During the year ended March 31, 2006, Rinker repurchased and immediately cancelled 31.1 million ordinary shares as part of the on-market buyback.

B. Overview of the Rinker constitution

Rinker's corporate organization and conduct is governed by its constitution (the Constitution). Set forth below is a summary of the provisions of the principal terms of the Constitution.

Company Objects & Purposes

Edgar Filing: RINKER GROUP LTD - Form 20-F

Rinker is taken to be registered as a public company limited by shares under the Corporations Act 2001 of the Commonwealth of Australia (the Corporations Act) and is registered with Australian Business Number 53 003 433 118.

The Constitution became effective on March 28, 2003. The Constitution does not specify Rinker's objects and purposes. Rather, under section 124 of the Corporations Act, Rinker has the legal capacity and powers of an individual person.

Directors Powers & Qualifications

- (a) No director is permitted to vote or be counted in the quorum as a director in respect of any matter in which the director has a personal material interest unless permitted by the Corporations Act (clause 71.5).

- (b) Directors remuneration is to be determined by them from time to time and in such proportions and manner as they determine, provided that the aggregate remuneration paid to directors in any year must not exceed the amount approved in general meeting (clause 58).

- (c) In addition, every director is entitled to be paid all traveling, hotel and other expenses properly incurred by them in attending and returning from meetings of directors of Rinker or any committee of the directors or general meetings of Rinker (clause 58.6).

- (d) Directors may exercise all the powers of Rinker to borrow money, charge property, issue debentures (or give other security) and provide guarantees for the company s purposes (rule 47).

- (e) The Constitution does not contain any age limit requirement on the retirement of directors.

(f) A director must hold 2,000 fully paid shares in Rinker in his or her own name as a qualification for office (clause 64).

(g) At each Annual General Meeting one third of the directors (or the nearest number to one third, rounded down) retire from the office and are subject to re-election. In any event, a director, other than the managing director, shall retire from office at the conclusion of the third Annual General Meeting after the general meeting at which he or she was last elected or re-elected.

Rights & Restrictions Attaching to Each Class of Shares

- (a) Rinker has only one class of shares, the ordinary class. The rights attached to ordinary shares include the right to dividends in the event that the directors declare them. Directors may determine that a dividend is payable, fix the amount, the date at which the entitlement accrues, date for payment and the method of payment.
- (b) Dividends, which have not been claimed for one year after having been declared, may be invested or otherwise made use of by the directors for the benefit of Rinker until claimed or disposed of according to law (clause 97).
- (c) The voting right attached to ordinary shares is the right to vote in person, by representative, attorney or proxy in general meeting. There is no power to approve corporate matters by written consent.
- (d) On a show of hands each shareholder (regardless of the number of shares held) has one vote. On a poll each shareholder may exercise one vote for each fully paid ordinary share held. Shareholders may not cumulate their votes. In respect of partly paid shares, the shareholder has a vote equivalent to the proportion which the amount paid up bears to the total amounts paid and payable, whether or not called, on the share when the poll is taken (clause 43.1).
- (e) In the event of a winding up, ordinary shares rank equally in the division of any surplus.
- (f) Shareholders cannot redeem ordinary shares.
- (g) The holders of fully paid ordinary shares have no further liability to Rinker in respect of those shares. The holders of partly paid shares are liable to Rinker once a call is made for the payment of the unpaid amount.
- (h) There is no provision in the Constitution that discriminates against an existing or prospective shareholder as a result of that shareholder owning a substantial number of shares unless such ownership leads to a partial takeover offer (see heading [Partial Takeover Approval](#) below).
- (i) The rights attached to any class of shares may be varied in accordance with the Corporations Act (clause 8.1). Under the Corporations Act, rights of shareholders may be varied or cancelled only by a special resolution (75% majority of votes cast) of all shareholders, together with either a special resolution of the relevant class or with the written consent of shareholders with at least 75% of the votes in the class. Any variation of class rights is subject to challenge by shareholders with at least 10% of the votes on grounds of unfair prejudice.

(j) There are no provisions in the Constitution that provide a shareholder owning 5% or more of Rinker's ordinary shares with access to corporate records. However, under the Corporations Act, shareholders have rights of access to the register of shareholders and minutes of general meetings of shareholders.

General Meetings of Rinker

The board may convene general meetings of Rinker to be held at such times and places and in the manner determined by the Board. No shareholder or director may convene a general meeting unless entitled to do so under the Corporations Act.

Subject to the Corporations Act and the ASX Listing Rules, notices of a general meeting convened by the board may be given in the form and in the manner determined by the board. At least 28 days notice must be given of a general meeting (section 249HA of the Corporations Act).

All shareholders may attend general meetings in person, or be represented by the attendance of a representative, attorney or by proxy (who need not be shareholders of Rinker in their own right).

The quorum for a general meeting is twelve shareholders entitled to vote, present in person, by proxy or attorney or by representative, together holding not fewer than 80,000 shares (clause 34.2). If within 30 minutes of the time appointed for holding the meeting a quorum is not present, the meeting, if convened by requisition, is dissolved, but in all other cases stands adjourned to the same day in the next week at the same time and place or to another day, time and place determined by directors (clause 34.3). If at the adjourned meeting a quorum is not present within 30 minutes from the time appointed for holding the meeting, two shareholders shall constitute a quorum.

Limitations on the Right to Own Securities

Rinker's Constitution does not impose limitations on the right to own securities except those provisions relating to minimum holdings (known as an Unmarketable Parcel, as described below).

Unmarketable Parcel Rationalization Scheme

The Constitution contains a procedure whereby Rinker can sell the shares of shareholders who hold a parcel of shares in Rinker of less than A\$500 value (an Unmarketable Parcel). The procedure sets out notice requirements that Rinker must comply with prior to selling any shares and also includes the right of shareholders (who hold an Unmarketable Parcel) to exempt their holdings from its operation. The procedure can only be invoked once in any 12-month period with respect to any particular member (clause 22).

Other Takeover Limitations

The rights of non-resident or foreign shareholders to hold or exercise voting rights on Rinker's securities are subject to the Foreign Acquisitions and Takeovers Act 1975 (Cth). The Treasurer of the Australian Federal Government has the power to prohibit the acquisition of a controlling interest in any Australian company by a foreign person or foreign persons, if the Treasurer is of the opinion that the acquisition would be

Edgar Filing: RINKER GROUP LTD - Form 20-F

contrary to the national interest. For this purpose, a shareholding of 15% or more held by a single foreign person or 40% or more held by two or more foreign persons is deemed to constitute a controlling interest.

Section 50 of the Trade Practices Act 1974 (Cth) prohibits an acquisition of shares that would have the effect, or be likely to have the effect, of substantially lessening competition in a substantial market for goods or services, unless the acquisition is authorized by the Australian Competition and Consumer Commission.

There are no provisions to allow for the issuance of preferred stock or other poison pill measures that could prevent a takeover attempt.

Partial Takeover Approval

In the event that there is an offer made under a proportional takeover bid (being an off-market bid for a specified proportion of the securities in the bid class) to acquire shares in Rinker, the registration of a transfer giving effect to a contract resulting from the acceptance of the bid, is prohibited unless and until a resolution to approve the proportional takeover bid is passed in accordance with clause 23 of Rinker's Constitution. This resolution is to be voted on at a meeting convened and conducted by Rinker, of the persons entitled to vote on the resolution. The resolution is taken to have been passed if the proportion that the number of votes in favor of the resolution bears to the total number of votes on the resolution is greater than one-half. The provisions of clause 23 of Rinker's Constitution cease to have effect on the third anniversary of the date of their adoption or last renewal.

Disclosure of Share Ownership

The Constitution does not prescribe an ownership threshold above which shareholders must disclose their holding to Rinker. However, Part 6C.1 of the Corporations Act imposes disclosure requirements on persons who acquire or cease to hold a substantial holding (see section 9 of the Corporations Act) in Rinker. The disclosure must be given to Rinker and the ASX within the prescribed time.

Changes in Share Capital

Rinker may alter its share capital in one or more of the ways provided for, and in the manner prescribed by, the Corporations Act.

C. Material Contracts

Demerger Deed

On March 27, 2003, Rinker and CSR entered into a Demerger Deed to facilitate the orderly separation of the Rinker group companies from CSR. The arrangements were intended to assist Rinker to function as an independent company after the demerger. The key terms of the deed of continued relevance to Rinker are summarized below.

Demerger Principle

The underlying principle of the demerger is that, following its implementation the Rinker group will have the entire economic benefit, commercial risk and liabilities of the businesses to be conducted by the Rinker group companies after the demerger as though the Rinker group companies had always owned and operated those businesses. The CSR group will have the entire economic benefit, commercial risk and liabilities of the businesses to be conducted by the CSR group after the demerger. Rinker and CSR acknowledged in the deed that the restructure

of the Rinker group within the CSR group prior to the demerger occurred in accordance with the internal restructure agreements and the demerger principle.

Limited Rights in Accordance with the Demerger Principle

Rinker and CSR acknowledged that once the demerger was complete, no member of the CSR group will have any rights against, or obligations to, a member of the Rinker group and no member of the Rinker group will have any rights against, or obligations to, a member of the CSR group except those rights and obligations expressly contained in or conferred by the Demerger Deed, the agreements effecting the internal restructure or any agreement between a member of the Rinker group and a member of the CSR group executed after the Demerger Deed. The release of rights included a release of rights to

make a claim for loss or damage arising in relation to the internal restructure of the Rinker group within the CSR group that occurred prior to the demerger and the demerger generally.

Additional Liabilities

Each of Rinker and CSR agreed to accept any liabilities that in accordance with the demerger principle should have been assigned to, or assumed by, it pursuant to the internal restructure, but which were not so assigned or assumed.

Indemnity and Claims Management

CSR has granted Rinker, its subsidiaries, directors, officers and employees and the directors, officers and employees of its subsidiaries an indemnity against liability (to the extent it is not covered by Rinker's insurance) arising from any claim made against any of them arising from any actions or omissions, including negligence and other alleged torts, breach of contract or law or any other act committed, omitted or done by CSR or any of the businesses being conducted by members of the CSR group after the demerger (or businesses that would have been conducted by any member of the CSR group after the demerger except that those businesses have been closed before the demerger), regardless of when the liability or loss to which the claim relates arises. Rinker has granted CSR, its subsidiaries, directors, officers and employees and the directors, officers and employees of its subsidiaries an indemnity against liability (to the extent it is not covered by CSR's insurance) arising from any claim made against any of them arising from any actions or omissions, including negligence and other alleged torts, breach of contract or law or any other act committed, omitted or done by Rinker or any of the businesses being conducted by members of the Rinker group after the demerger (or businesses that would have been conducted by any member of the Rinker group after the demerger except that those businesses have been closed before the demerger), regardless of when the liability or loss to which the claim relates arises.

It is not clear at law whether these indemnities would be enforceable in respect of fines or pecuniary penalties of a penal nature.

In accordance with the indemnity, CSR and Rinker have agreed arrangements pursuant to which the economic and management responsibility for claims will be determined. CSR and Rinker have agreed to assist each other in respect of the conduct of claims to which the indemnity relates.

Further, CSR has agreed to indemnify Rinker, its subsidiaries, directors, officers and employees and the directors, officers and employees of its subsidiaries against liability incurred by them arising from any claim made against them arising from a failure of the demerger booklet, Rinker's listing memorandum to the ASX or marketing or other material distributed or published in connection with the demerger (including any associated refinancing) to comply with any applicable legal requirement where the failure is caused by, or arises out of, information about the businesses which are to be conducted by any member of the CSR group after the demerger (or businesses that would have been conducted by any member of the CSR group after the demerger except that those businesses have been closed before the demerger).

Rinker has agreed to indemnify CSR, its subsidiaries, directors, officers and employees and the directors, officers and employees of its subsidiaries against liability incurred by them arising from any claim made against them arising from a failure of the demerger booklet, Rinker's listing memorandum to the ASX or marketing or other material distributed or published in connection with the demerger (including any associated refinancing) to comply with any applicable legal requirement where the failure is caused by, or arises out of, information about the

Edgar Filing: RINKER GROUP LTD - Form 20-F

businesses which are to be conducted by any member of the Rinker group after the demerger (or businesses that would have been conducted by any member of the Rinker group after the demerger except that those businesses have been closed before the demerger.)

D. Exchange Controls

There are no foreign exchange controls or other governmental laws, decrees or regulations, other than in relation to withholding taxes (see Taxation below), which affect the remittance of dividends, interest or other payments by Rinker to non-resident holders of Rinker securities in the United States.

Subject to the exceptions referred to below, there are no limitations on the right of United States residents or owners to hold or vote Rinker ordinary shares imposed by Australian law or Rinker's constitution.

Changes in interests held by foreign persons in Australian companies may be subject to review and approval by the Treasurer of the Commonwealth of Australia under the Foreign Acquisitions and Takeovers Act 1975. Generally, that statute requires prior notification of any acquisition which would result in a foreign person together with any associates either holding interests in 15 percent or more of an Australian company's issued shares or controlling 15 percent or more of the voting power in the company. The statute also requires prior notification of any acquisition resulting in two or more foreign persons and their associates similarly holding interests in 40 percent or more of an Australian company's issued shares or controlling, in the aggregate, 40 percent or more of its total voting power. In each case, the Treasurer may prohibit any part of the acquisition if the Treasurer is satisfied it would be contrary to the national interest of Australia.

Further, the Corporations Act 2001 regulates the acquisition of shares in public companies in Australia. Subject to certain exceptions, it prohibits such an acquisition if (1) after the acquisition the acquirer and the acquirer's associates would be entitled to more than 20 percent of the company's issued ordinary shares and (2) the acquisition does not satisfy one of a number of specified exceptions. The more significant exceptions are: a formal, registered takeover offer to all the shareholders in the target company, acquisitions by a broker on the stock market under a formal takeover announcement, acquisitions of no more than three percent of the target company's voting share capital every six months or acquisitions approved by the target company's shareholders in general meeting.

E. Taxation

This section describes the material United States federal income and Australian tax consequences of United States residents owning Rinker's ordinary shares. Investors contemplating the purchase of shares are advised to consult their own tax advisers with respect to the tax consequences relevant to their specific situations.

Except as otherwise noted, the statements of Australian tax laws set out below are based on the laws in force as of the date of this annual report, and are subject to any changes in Australian law, and in any double taxation convention between the United States and Australia occurring after that date.

Commonwealth of Australia Taxation

Edgar Filing: RINKER GROUP LTD - Form 20-F

With effect from July 1, 2002, Australia introduced a revised dividend imputation system relating to company tax.

Broadly, the new dividend imputation system simplifies the old dividend system and it is intended to produce the same tax outcomes as the old system. The dividend imputation system of company tax relieves double taxation on dividends paid by Australian resident corporations. Under this system, companies are required to identify dividends paid as either franked or unfranked dividends. Franked dividends are those paid out of profits that have borne Australian corporate tax (i.e. to which franking credits have been allocated) while unfranked dividends are paid out of untaxed profits. The Australian

corporate tax rate is 30%. Franked dividends paid to non-residents are exempt from withholding tax. Unfranked dividends paid from a Conduit Foreign Income (CFI) amount are also exempt from Australian withholding tax. CFI amounts comprise certain non-assessable dividends received by an Australian parent company from foreign subsidiaries and associates and certain foreign sourced income. However, unfranked (or partly franked) dividends that are not paid out of a CFI amount are subject to withholding tax, generally at 15% on the unfranked amount. Notices are provided to shareholders that specify the amount (if any) of dividend withholding tax deducted.

All ordinary shareholders will be advised as to the extent to which each future dividend will be franked as dividends are declared.

The current Australian tax rules require taxpayers to hold shares at risk for certain periods before obtaining the benefit of the dividend imputation system. The minimum period for holding ordinary shares at risk is currently 45 days. Failure to satisfy these requirements may result in the deduction of Australian withholding tax from dividends paid to non-residents of Australia. There is an exemption from these rules for defined small transactions.

The tax rules classify interests that satisfy a financial arrangements test as either debt or equity. An interest that is classified as equity will be frankable, whereas an interest that is classified as debt will not be frankable. Ordinary shares are likely to be classified as equity on the basis that the return is contingent on Rinker's performance or at the discretion of Rinker. Ordinary shareholders will be advised, by public announcement to the market at the time each future dividend is determined, of the extent to which each such dividend is franked and if unfranked, whether any amount will be paid out of the CFI amount.

Under the provisions of the current Convention between the Government of the United States of America and the Government of Australia for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income (the Treaty), the Australian tax withheld on unfranked dividends paid by Rinker to which a resident of the United States is beneficially entitled is limited to 15%. However, where the recipient's shareholding is effectively connected with a permanent establishment in Australia or a fixed base in Australia from which independent personal services are carried out, the recipient will generally be subject to ordinary income tax for dividends received under the Australian tax rules. Australia and the United States have agreed to reduce the withholding tax rate to 5% for holders of more than 10% of the shares in a company and 0% for holders of 80% or more of the shares in a company. In all other cases the 15% rate limit will continue to apply. These changes took effect on July 1, 2003.

Some foreign shareholders are exempt from Australian dividend withholding tax on dividends that are not franked; most notably, foreign superannuation/pension funds that are exempt from income tax in their home jurisdiction.

A United States citizen who is resident in Australia, or a United States corporation that is resident in Australia (by reason of carrying on business in Australia and being managed or controlled in Australia or having its voting power controlled by shareholders who are residents of Australia) holding ordinary shares as capital assets, may be liable for Australian capital gains tax (CGT) on the disposal of Rinker ordinary shares. In calculating the amount of a capital gain that may be subject to Australian CGT, special rules apply to individuals, trusts and certain superannuation funds. For ordinary shares acquired after September 21, 1999 and held for at least 12 months, these taxpayers will pay tax on half of the gain (calculated in nominal terms or two-thirds of the gain for certain superannuation funds) after allowing for any offsetting capital losses which are applied against the whole nominal gain. For ordinary shares acquired before that time and held for at least 12 months, these taxpayers may choose between paying CGT on half of the gain (or two-thirds of the gain for certain superannuation funds), or paying CGT on all of the gain with the gain being calculated on the basis of the cost of the shares being indexed for inflation up to September 30, 1999. For all types of taxpayers, the legislation freezes the indexation (for inflation)

of the cost of ordinary shares as at September 30, 1999, and abolishes such indexation for ordinary shares acquired after September 21, 1999.

Under current Australian law, no income or other tax is payable on any profit on disposal of the ordinary shares held by persons who are residents of the United States within the meaning of the Treaty except:

(a) if the person (together with associates, if any) owns or owned ordinary shares at any time during the period of five years preceding the disposal, representing 10% or more of the issued share capital of Rinker (excluding share capital carrying no right to participate beyond a specified amount in distribution of profits or capital). However, in these circumstances there may be relief from Australian tax for residents of the United States under the Treaty; or

(b) if the ordinary shares have been used by the person in carrying on a trade or business wholly or partly at or through a permanent establishment in Australia.

Different rules will apply to persons and corporations that are not residents of the United States.

Australia does not impose gift, estate or inheritance taxes in relation to gifts of shares or upon the death of a shareholder.

Neither the issue nor transfer of Rinker's ordinary shares or the payment of a dividend will give rise to a liability to goods and services tax in Australia.

Australian Stamp Duty

No Australian stamp duty will be payable on the issue or the transfer of Rinker's ordinary shares.

United States Federal income tax consequences

This section describes the material United States federal income tax consequences of owning ordinary shares or ADSs. It applies only to holders who hold ordinary shares or ADSs as capital assets for tax purposes. This section does not apply to a member of a special class of holders subject to special rules, including:

a dealer in securities,

a trader in securities that elects to use a mark-to-market method of accounting for the securities holdings,

a tax-exempt organization,

a life insurance company,

a person liable for alternative minimum tax,

a person that actually or constructively owns 10% or more of the voting stock of Rinker,

a person that holds ordinary shares or ADSs as part of a straddle or a hedging or conversion transaction, or

a US holder (as defined below) whose functional currency is not the US dollar.

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions all as currently in effect, as well as on the Treaty. These laws are subject to change, possibly on a retroactive basis. In addition, this section is based in part upon the representations of the Depositary and the assumption that each obligation in the Deposit Agreement and any related agreement will be performed in accordance with its terms.

A US holder is a beneficial owner of ordinary shares or ADSs and:

a citizen or resident of the United States,

a domestic corporation,

an estate whose income is subject to United States federal income tax regardless of its source,

a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

US Holders should consult their own tax advisor regarding the United States federal, state, local and other tax consequences of owning and disposing of ordinary shares or ADSs in their particular circumstances.

This discussion addresses only United States federal income taxation.

In general, and taking into account the earlier assumptions, for United States federal income and Australian tax purposes, if a Holder holds ADRs evidencing ADSs, a Holder will be treated as the owner of the shares represented by those ADRs. Exchanges of shares for ADRs, and ADRs for shares, generally will not be subject to United States federal income or to Australian tax.

Taxation of Dividends

Under the United States federal income tax laws, and subject to the passive foreign investment company, or PFIC, rules discussed below, the gross amount of any dividend paid by Rinker out of its current or accumulated earnings and profits (as determined for United States federal income tax purposes) is subject to United States federal income taxation. Dividends paid to a noncorporate US holder and before January 1, 2009 that constitute qualified dividend income will be taxable at a maximum tax rate of 15% provided that the US holder holds the ordinary shares or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meets other holding period requirements. Dividends Rinker pays with respect to the ordinary shares will generally be qualified dividend income.

A US holder must include any Australian tax withheld from the dividend payment in this gross amount even though the amount withheld was not in fact received. The dividend is taxable when the dividend is actually or constructively received by the US holder in the case of ordinary shares, or by the Depositary, in the case of ADSs. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend distribution that must be included in income as a US holder will be the US dollar value of the Australian dollar payments made, determined at the spot Australian dollar/US dollar rate on the date the dividend distribution is includible in income, regardless of whether the payment is in fact converted into US dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date the dividend payment is included in income to the date the payment is converted into US dollars will be treated as ordinary income or loss and will not be

eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for United States federal income tax purposes, will be treated as a non-taxable return of capital to the extent of the basis in the ordinary shares and thereafter as capital gain.

Subject to generally applicable limitations that limit the availability of the US foreign tax credit depending on the nature of the income received by the US holder and that particular US holder's proportion of foreign source income to worldwide income, the Australian tax withheld in accordance with the Treaty and paid over to Australia will generally be creditable against that holder's United States federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the maximum 15% rate.

Dividends will be income from sources outside the United States, but dividends paid in taxable years beginning before January 1, 2007 generally will be passive or financial services income and dividends paid in taxable years beginning after December 31, 2006 will, depending on your circumstances, be passive or general income which, in either case, is treated separately from other types of income for purposes of computing the foreign tax credit allowable.

Distributions of additional ordinary shares or ADSs with respect to ordinary shares that are made as part of a pro rata distribution to all shareholders of Rinker generally will not be subject to United States federal income tax.

Taxation of Capital Gains

Subject to the PFIC rules discussed below, a US holder who sells or otherwise disposes of ordinary shares or ADSs will recognize capital gain or loss for United States federal income tax purposes equal to the difference between the US dollar value of the amount realized and the tax basis, determined in US dollars, in ordinary shares or ADSs. The capital gain of a noncorporate US holder that is recognized before January 1, 2009 is generally taxed at a maximum rate of 15% where the holder has a holding period greater than one year. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

PFIC Rules

We believe that Rinker's ordinary shares and ADSs should not be treated as stock of a PFIC for United States federal income tax purposes, but this conclusion is a factual determination that is made annually and thus may be subject to change. If Rinker were to be treated as a PFIC, unless a US holder makes a valid election to be taxed annually on a mark-to-market basis with respect to the ordinary shares or ADSs, gain realized on the sale or other disposition of ordinary shares or ADSs would in general not be treated as capital gain. Instead, a US holder would be treated as if the US holder had realized such gain and certain excess distributions ratably over the holding period for the ordinary shares or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, together with an interest charge in respect of the tax attributable to each such year. With certain exceptions, ordinary shares or ADSs received by a holder will be treated as stock in a PFIC if Rinker were a PFIC at any time during the holder's holding period in the ordinary shares or ADSs. Dividends that you receive from us will not be eligible for the special tax rates applicable to qualified dividend income if we are a PFIC either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

Edgar Filing: RINKER GROUP LTD - Form 20-F

If a holder owns shares or ADSs in any year that Rinker is a PFIC, the holder must file Internal Revenue Service Form 8621.

F. Dividends and Paying Agents

Not Applicable.

G. Statement by Experts

Not Applicable.

H. Documents on Display

It is possible to read and copy documents referred to in the annual report on Form 20-F that have been filed with the SEC at the SEC's public reference room located at 100 F Street, N.E., Washington DC 20549 and over the internet at the SEC's website at www.sec.gov. Please telephone the SEC at 1-800-SEC-0330 to obtain information on the operation of the public reference room. Copies of these documents may also be obtained from Rinker on request.

I. Subsidiary Information

All controlled entities are 100% owned, unless otherwise indicated. Rinker's significant subsidiaries are described in Note 37 to the financial statements.

J. Enforcement of Civil Liabilities

Rinker is a corporation organized under the laws of the Commonwealth of Australia. Some of the directors and certain of the senior managers of Rinker, and some of the experts named in this document reside outside the United States, principally in Australia. Some of the assets of Rinker, and the assets of some of Rinker's directors, officers and experts, are located outside the United States. Therefore, it may not be possible to effect service of process within the United States upon Rinker or these persons so as to enforce judgments of United States courts against them based on the civil liability provisions of the United States federal securities laws. In addition, it may be difficult to bring an original action in an Australian court to enforce liabilities against some or any of these persons based on US federal securities laws.

Item 11 Quantitative and Qualitative Disclosures about Market Risks

A. Management discussion and analysis of the financial results

Edgar Filing: RINKER GROUP LTD - Form 20-F

The Rinker group is exposed to the following types of market risk: (i) interest rates, and (ii) foreign currencies.

The Rinker group has in place principles and policies approved by Rinker's Board of Directors designed to manage financial risks associated with exposures to interest rates and foreign currencies. These risks are managed through a variety of means including natural hedges, forward contracts, swaps, caps, collars and other options. Rinker's policies prohibit speculative transactions, restrict hedging transactions to preset limits, require senior management approval of hedging instruments and set out requirements for accounting for hedges. In addition, the policies limit who may authorize transactions and segregate relevant functions among different individuals.

Rinker group has established a Finance Committee consisting of the Chief Financial Officer; Vice President Strategy & Development; Vice President Finance Quarries & Cement, Group Manager Treasury which is responsible for managing exposures in accordance with the policies.

Rinker group entities utilize a variety of domestic and international financial institutions as counter parties for hedging transactions. Transaction limits based on credit ratings are placed on each financial

institution and reviewed regularly. Predominantly, Rinker group entities will only utilize counter parties with a Moody's or Standard & Poors A3/A - equivalent rating or higher. In a few instances where no Moody's or Standard & Poors rating is available, management may assign a small limit based on alternative arrangements.

It is management's opinion that Rinker group entities in the past year have not engaged in any financial transactions of a trading or speculative nature.

Interest Rate Sensitivity and Risk Management

Interest rate exposure is managed with an objective of reducing year-to-year volatility in interest costs to obtain a stable and predictable interest expense outcome. To achieve this result, Rinker group entities enter into interest rate hedges, including interest rate swaps, swaptions, caps and collars.

As at March 31, 2006 approximately 98 percent of the Rinker group's gross debt is US dollar denominated. For the year ended March 31, 2006, the proportion of the Rinker group's gross interest rate exposure that was subject to fixed interest rates averaged 97 percent. It is estimated that a hypothetical 100 basis point movement in interest rates would have an US\$0.2 million impact on the Rinker group's net profit, based on average debt levels.

Specific information concerning interest rate exposure and financial instruments used to limit that exposure is disclosed in Note 21 and 28 of the financial statements.

Foreign Exchange Sensitivity and Risk Management

As Readymix records its transactions in its own financial statements in Australian dollars and these results are translated into US dollars for the purposes of consolidation into the financial statements of the Rinker group for US dollar reporting purposes, the Rinker group is susceptible to changes in the exchange rate between the US dollar and the Australian dollar.

Active financial management through hedging transactions of either profit or net asset translation exposures is not permitted as a matter of Rinker policy. Management believes that the Rinker group's investment in its international entities, mainly in the United States, provides it with a natural hedge against exchange rate fluctuations with respect to US dollar-denominated obligations. On the exposed portion, a hypothetical one cent movement from the US\$/A\$ exchange rate used in the accompanying financial statements (US\$0.72 per A\$1.00, which approximates the exchange rate at March 31, 2006) would result in an approximate US\$1.9 million change in the Rinker group's reported US\$ net profit. Larger movements are an extrapolation of this amount.

Specific information concerning the currency exposure and financial instruments used to limit that exposure is reviewed in Note 28 of the financial statements included elsewhere in this annual report.

Item 12 Description of Securities Other Than Equity Securities

Not applicable.

PART II

Item 13 Defaults, Dividend Arrearages and Delinquencies

None.

PART III

Item 15 Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Rinker maintains a system of controls and procedures designed to ensure that information required to be disclosed in reports Rinker files with the SEC is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms. These disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer, with the participation of management officials, evaluated the effectiveness of the design and operation of the disclosure controls and procedures as of March 31, 2006. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in timely alerting them to material information required to be included in our periodic SEC filings.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined under the U.S. Securities Exchange Act of 1934 (the "Exchange Act") in Rule 13a-15(f). Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of our internal control over financial reporting was conducted using the criteria set forth in Internal Control - Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO Framework") and also the standards of the Public Company Accounting Oversight Board.

In the opinion of management, the overall system of internal accounting control provides reasonable assurance that the assets of Rinker group entities are safeguarded and that transactions are executed in accordance with management's authorization and are properly recorded for the preparation of financial statements. In addition, management believes the overall system of internal accounting control provides reasonable assurance that material errors or irregularities would be prevented or detected on a timely basis by employees in the normal course of their duties.

The system of internal accounting control is supported by written policies and guidelines, the selection and training of qualified employees, an organizational structure that provides an appropriate division of responsibility, regular reviews of our financial statements by qualified individuals, and a program of internal audits. Rinker's written policies include a Code of Business Ethics, which is communicated throughout the

Edgar Filing: RINKER GROUP LTD - Form 20-F

company. Compliance with the Code of Business Ethics is confirmed annually by over 3,000 middle ranking and senior employees.

Based on our evaluation under the COSO Framework, our management concluded that our internal control over financial reporting was effective as of March 31, 2006.

Our management's assessment of the effectiveness of our internal control over financial reporting as of March 31, 2006 has been audited by Deloitte Touche Tohmatsu, an independent registered public

accounting firm, as stated in their report which is shown at page F-2 and is included elsewhere in this annual report on Form 20-F.

Changes in Internal Control over Financial Reporting

During the period covered by this report, we have not made any change to our internal control over financial reporting, as defined in Rule 13a-15(f) under the Exchange Act, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 16 Other matters

A. Audit Committee Financial Expert

The board has determined that John Ingram is an audit committee financial expert and is independent as defined in the listing standards of the NYSE. Although the board has determined that this individual has the requisite attributes defined under the rules of the SEC, his responsibilities are the same as those of the other audit committee members. He is not acting as an auditor or an accountant, does not perform field work and is not a full-time employee. The SEC has determined that an audit committee member who is designated as an audit committee financial expert will not be deemed to be an expert for any purpose as a result of being identified as an audit committee financial expert. The audit committee is responsible for oversight of management in the preparation of Rinker's financial statements and financial disclosures. The audit committee relies on the information provided by management and the external auditor. The audit committee does not have the duty to plan or conduct audits to determine that Rinker's financial statements and disclosures are complete and accurate. Rinker's audit committee charter provides that these are the responsibility of management and the external auditors.

B. Code of Ethics

Our Chief Executive Officer, Chief Financial Officer, and other senior executives and principal accounting officers are bound to adhere to the company's code of ethics, which applies to all employees in Rinker Group companies.

A copy of the Code of Business Ethics is included as Exhibit 11.1 filed as part of Rinker's annual report on Form 20-F for fiscal year 2004 and is available at www.rinker.com in the Corporate Governance section.

C. Principal Accountant Fees and Services

During the fiscal years 2006 and 2005, Deloitte Touche Tohmatsu has acted as the Rinker group's independent registered public accounting firm.

A. Management discussion and analysis of the financial results

Deloitte Touche Tohmatsu's fees have been as follows:

Thousands of dollars	US\$	US\$
Year ended March 31	2006	2005
Auditors remuneration		
Audit fees (1)		
In Australia	788	697
Outside of Australia	1,313	1,245
	2,101	1,942
Audit-related fees (2)		
In Australia		4
Outside of Australia	55	72
	55	76
Tax fees (3)		
In Australia		
Outside of Australia		122
		122
Other fees (4)		
In Australia	184	
Outside of Australia	79	
	263	
Total auditors remuneration	2,419	2,140

(1) Fees related to the audit of the financial report of the Parent entity (including consolidated entity) and controlled entities, statutory and other audits of subsidiary companies where required, the half year review and the attestation of internal control over financial reporting as required by Sarbanes-Oxley Section 404.

(2) Fees for the audit of superannuation funds and the audit of bonus payments.

(3) Taxation fees include fees for regular tax compliance services.

(4) Other fees relate to acquisition due diligence work and scrutineering.

Pre approval for non-audit services

Prior to the engagement of Deloitte Touche Tohmatsu each year, the engagement is approved by the Board Audit Committee. The Board Audit Committee has established a policy by which either the committee or a delegate body approves in advance all services, including non-audit services, to be performed by the independent registered public accounting firm. The approval process requires full disclosure of the objectives

and scope of services to be performed, including the fee structure. The

committee reviews all approved services and fees at subsequent meetings. During fiscal year 2006, all services provided by Deloitte Touche Tohmatsu were approved by the committee.

D. Exemptions from the Listing Standards for Audit Committee

Not applicable.

E. Purchase of Equity Securities by the Issuer and Affiliated Purchasers

Period (identify beginning and ending dates)	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Units)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs

September 1 to September 30, 2005	3,390,909	A\$ 14.86	3,390,909	80,093,078
October 1 to October 31, 2005	4,187,428	A\$ 14.78	4,187,428	75,905,650
November 1 to November 30, 2005	4,223,317	A\$ 15.58	4,223,317	71,682,333
December 1 to December 31, 2005	2,986,340	A\$ 16.02	2,986,340	68,695,993
January 1 to January 31, 2006	1,179,958	A\$ 16.24	1,179,958	67,516,035
February 1 to February 28, 2006	573,729	A\$ 17.14	573,729	66,942,306
March 1 to March 31, 2006	146,109	A\$ 17.63	146,109	66,796,197
Total	31,116,149	A\$ 14.44	31,116,149	

On February 20, 2004, Rinker announced the commencement of a 12 month on-market share buyback of up to 10% of its ordinary shares outstanding at that date. On May 12, 2005, Rinker announced the commencement of a 12 month on-market share buyback of up to 10% of its ordinary shares outstanding at that date. A total of 31,116,149 shares were repurchased under the on-market buybacks during the year to March 31, 2006, of which 26,203,823 related to the buyback announced May 12, 2005 and the remainder related to the previous buyback program which ended May 26, 2005. The May 12, 2005

buyback expires on May 26, 2006. Shares repurchased were cancelled immediately on receipt. During the year ended March 31, 2005, 4,000,028 shares were repurchased under the previous buyback program.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Rinker Group Limited:

We have audited the accompanying consolidated balance sheets of Rinker Group Limited (a company incorporated in New South Wales, Australia) and its controlled entities (the Company) as at March 31, 2006 and 2005, and the related consolidated statements of income, cash flows, and recognised income and expense for each of the two years in the period ended March 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2006 and 2005, and the results of their operations and their cash flows for each of the two years in the period ended March 31, 2006, in conformity with the Australian Equivalents to International Financial Reporting Standards.

The Australian Equivalents to International Financial Reporting Standards vary in certain significant respects from accounting principles generally accepted in the United States of America. Information relating to the nature and effect of such differences is presented in Note 40 to the consolidated financial statements.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of March 31, 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated May 22, 2006 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Rinker Group Limited:

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting, that Rinker Group Limited (a company incorporated in New South Wales, Australia) and its controlled entities (the Company) maintained effective internal control over financial reporting as of March 31, 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of March 31, 2006, is fairly stated, in all material respects, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2006, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as of and for the year ended March 31, 2006 and our report dated May 11, 2006, except for Note 40, as to which the date is May 22, 2006, expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding differences between the Australian Equivalents to International Financial Reporting Standards and accounting principles generally accepted in the United States of America.

SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES

This Full Year Report is a general purpose financial report prepared in accordance with the requirements of the Corporations Act 2001, Australian Equivalents to International Financial Reporting Standards (A-IFRS), Urgent Issues Group Interpretations and complies with other requirements of the law and the Listing Rules of the Australian Stock Exchange Limited.

The financial report has been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets.

In the application of A-IFRS management is required to make judgments, estimates and assumptions about carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstance, the results of which form the basis of making the judgments. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgments made by management in the application of A-IFRS that have significant effects on the financial statements and estimates with a significant risk of material adjustments in the next year are disclosed, where applicable, in the relevant notes to the financial statements.

Accounting policies are selected and applied in a manner which ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported.

The consolidated entity changed its accounting policies on 1 April 2005 to comply with Australian Equivalents to International Financial Reporting Standards (A-IFRS). The transition to A-IFRS is accounted for in accordance with Accounting Standard AASB 1 First-time Adoption of Australian Equivalents to International Financial Reporting Standards , with 1 April 2004 as the date of transition. The superseded policies were in accordance with Australian Generally Accepted Accounting Principles (AGAAP). An explanation of how the transition from superseded policies to A-IFRS has affected the consolidated entity s balance sheet, income statement and cash flows is discussed in Note 1.

Edgar Filing: RINKER GROUP LTD - Form 20-F

The accounting policies set out below have been applied in preparing the financial statements for the year ended 31 March 2006, the comparative information presented in these financial statements, and in the preparation of the opening A-IFRS balance sheet at 1 April 2004 (as disclosed in Note 1), the consolidated entity's date of transition, except for the accounting policies in respect of financial instruments. The consolidated entity has not restated comparative information for financial instruments including derivatives, as permitted under the first time adoption transitional provisions. The accounting policies for financial instruments applicable to the comparative information are consistent with those adopted and disclosed in the 2005 full financial report. The impact of changes in these accounting policies on 1 April 2005, the date of transition for financial instruments, is discussed further under comparative information below.

Compliance with Australian Equivalents to International Financial Reporting Standards ensures compliance with International Financial Reporting Standards.

FUNCTIONAL AND PRESENTATION CURRENCY

Results of Rinker Materials and results of Rinker Australia Pty Limited's (Readymix) operations are recorded in their local currencies, which are deemed to be their functional currency. Rinker Materials' US dollar denominated performance represents approximately 80% of the total Rinker result. Consequently, the directors believe US dollar reporting represents the best measure of the overall Rinker group result.

Readymix's Australian dollar results are translated to US dollar presentation currency using the principles set out in AASB 121 'The Effects of Changes in Foreign Exchange Rates'. Assets and liabilities are translated at the closing rate and income/expense items are translated using an average rate (the closing rate for the month the transactions occurred). All foreign currency translation adjustments are taken directly to the foreign currency translation reserve. The financial statements of the parent entity (Rinker Group Limited) have been translated into United States dollars using the methodology described above. This is consistent with both Australian Accounting Standard AASB 121 'The Effects of Changes in Foreign Exchange Rates' and the United States Securities and Exchange Commission Rule 3-20(d) of Regulation S-X. The exchange rate used is the Australian 9:55 a.m. hedge settlement rate at the end of each month.

FOREIGN CURRENCY TRANSACTIONS

All foreign currency transactions during the year have been brought to account using the exchange rate in effect at the date of the transaction. Foreign currency monetary items at the reporting date are translated at the exchange rate existing at that date. Exchange differences are brought to account in net profit or loss in the period in which they arise except if designated as hedges.

ROUNDING

Unless otherwise shown, the amounts have been rounded to the nearest tenth of a million dollars and are shown by US\$ million. Rinker is a company of the kind referred to in Australian Securities and Investments Commission Class Order 98/100 issued 10 July 1998.

PRINCIPLES OF CONSOLIDATION

The financial report is prepared for the consolidated entity, being Rinker Group Limited (parent entity) and the entities it controls (the group). In these financial statements:

results of each subsidiary are included from the date Rinker Group Limited obtains control and until such time as it ceases to control the entity; and

all intercompany balances and transactions are eliminated.

Controlled entities are under no obligation to accept responsibility for liabilities of other common subsidiaries except where such an obligation has been specifically undertaken.

F-8

SIGNIFICANT ACCOUNTING POLICIES (continued)

REVENUE RECOGNITION

Revenue from the sale of goods is recognised when the consolidated entity has transferred to the buyer the significant risks and rewards of ownership of the goods.

In particular, trading revenue is measured at the fair value of the consideration received, and is recognised when each of the following conditions are met:

- (i) Persuasive evidence of an arrangement exists, which is usually in the form of a contractual arrangement.
- (ii) Title in the product has transferred to the buyer.
- (iii) The seller's price to the buyer is fixed or determinable.
- (iv) Collectibility is reasonably assured.

Dividend revenue is recognised on a receivable basis. Interest income is recognised using the effective interest rate method.

Gain or loss on the disposal of an item of property, plant and equipment is recognised on a net basis as other income or other expense.

SIGNIFICANT ITEMS

Significant items are those which by their size, nature or incidence are relevant in explaining the financial performance of the consolidated entity, and as such are disclosed separately.

CASH AND CASH EQUIVALENTS

Cash is defined as cash at banks and on hand and cash equivalents with maturities of 90 days or less. Cash equivalents include highly liquid investments which are readily convertible to cash.

RECEIVABLES

Edgar Filing: RINKER GROUP LTD - Form 20-F

Trade receivables and other receivables are recorded at amortised cost less impairment, if any. The collectability of receivables is assessed at balance sheet date and specific allowance is made for any doubtful accounts.

INVENTORIES

Inventories including work in progress are valued at the lower of cost or net realisable value. Costs included in inventories consist of materials, labour, and manufacturing overheads which are related to the purchase and production of inventories. The value of inventory is derived by the method most appropriate to each particular class of inventory. The major portion is valued on either a first-in-first-out or average cost basis.

ASSETS HELD FOR SALE

Assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell. Assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable, the asset (or disposal group) is available for immediate sale in its present condition, and the sale of the asset (or disposal group) is expected to be completed within one year from the date of classification.

ASSOCIATES AND PARTNERSHIPS

Investments in associates and partnerships have been accounted for under the equity method in the financial statements as the Rinker group has significant influence over the investees.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are stated at cost less accumulated depreciation and impairment, if any. Costs include expenditure that is directly attributable to the acquisition of an item. In the event that settlement of all or part of the purchase price is deferred, cost is determined by discounting amounts payable in the future to their present value at date of acquisition. Depreciation is calculated on a straight-line basis so as to write off the net cost of each asset over its expected useful life to its estimated residual value. Depreciation is provided on property, plant and equipment, including freehold buildings but excluding land. Quarry and other raw material reserves are depleted after taking into account the life of the quarry and its estimated residual value. Depletion is determined by production for the year as a proportion of recoverable (proven and probable) reserves. The estimated useful lives over which assets are depreciated is: Buildings - up to 40 years, Plant and equipment - up to 30 years; Quarry and other raw material reserves - up to 40 years. The estimated useful lives, residual values and depreciation method are reviewed at the end of each annual reporting period.

CAPITALISATION OF INTEREST

Interest is expensed as incurred except where it relates to the financing of major projects constructed for internal use, where it is capitalised up to the date of commissioning. Following commissioning, the total capitalised cost including interest is amortised over the expected useful life of the project.

INTANGIBLES

Goodwill arising from the purchase of subsidiaries or businesses is recognised as an asset and not amortised, but tested for impairment annually and whenever there is an indication that the goodwill may be impaired. Trademarks acquired are valued at the lower of cost or recoverable amount and not amortised but tested at least annually for impairment.

SOFTWARE AND SYSTEM DEVELOPMENT

The cost of purchasing new software is capitalised. Development expenditures for internally generated software is capitalised when the project is technologically feasible, completion for the intended use is probable, and future recoverability of the economic benefits is reasonably assured.

Capitalised internal-use software costs include only:

- i) External direct costs of materials and services consumed in developing or obtaining the software,
- ii) Payroll and payroll-related costs for employees who are directly associated with and who devote time to the project, and
- iii) Interest costs incurred on qualifying assets, when material, while developing the software.

Capitalisation of these costs ceases no later than the point at which the project is substantially complete and ready for its intended purpose. Depreciation is calculated on a straight-line basis over the estimated useful life (3-7 years).

SIGNIFICANT ACCOUNTING POLICIES (continued)

RESEARCH

All expenditures on research activities are expensed in the year incurred.

QUARRY DEVELOPMENT

Quarry development costs are expensed when incurred unless the following can be demonstrated:

- the technical feasibility of completing the quarry so that it will be available for use or sale;
- the intention to complete the quarry development and use or sell it;
- how the quarry development costs will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the quarry; and
- the ability to reliably measure the expenditure attributable to the quarry development costs.

Quarry development costs are stated at cost less accumulated amortisation and impairment and are amortised on a production basis over their useful lives.

ACQUISITION OF ASSETS

Assets acquired are recorded at the cost of acquisition, being the purchase consideration determined as at the date of acquisition plus costs incidental to the acquisition. In the event that settlement of all or part of the cash consideration given in the acquisition of an asset is deferred, the fair value of the purchase consideration is determined by discounting the amounts payable in the future to their present value as at the date of acquisition.

IMPAIRMENT OF ASSETS

Edgar Filing: RINKER GROUP LTD - Form 20-F

Assets are reviewed annually to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the consolidated entity estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated pre-tax future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. An impairment loss is recognised in profit and loss immediately. Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised in profit and loss immediately.

Goodwill, intangible assets with indefinite useful lives, and intangible assets not yet available for use are tested for impairment annually and whenever there is an indication that the asset may be impaired. An impairment of goodwill is not subsequently reversed.

LEASED ASSETS

Leased assets under contracts classified as finance leases are recognised as assets. The amount initially brought to account is the present value of minimum lease payments. A finance lease is one which effectively transfers from the lessor to the lessee substantially all the risks and benefits incidental to ownership of the leased property. Finance leased assets are amortised on a straight-line basis over the estimated useful life of the asset. Finance lease payments are allocated between interest expense and reduction of lease liability over the term of the lease. The interest expense is determined by applying the interest rate implicit in the lease to the outstanding lease liability at the beginning of each lease payment period.

Operating lease payments are recognised as an expense on a straight-line basis except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

ACCOUNTS PAYABLE

Trade creditors and other accounts payable are recognised when the consolidated entity becomes obliged to make future payments resulting from the purchase of goods and services.

BORROWINGS

Bank loans and other loans are recorded initially at fair value, net of transaction costs. Subsequent to initial recognition, bank loans and other loans are measured at amortised cost with any difference between the initial recognised amount and the redemption value being recognised in profit and loss over the period of the borrowing using the effective interest rate method. Interest expense is recognised using the effective interest rate method.

TAX EFFECT ACCOUNTING

Current tax is calculated by reference to the amount of income taxes payable or recoverable in respect of the taxable profit or tax loss for the period. It is calculated using tax rates and tax laws that have been enacted or substantively enacted by the reporting date. Current tax for current and prior periods is recognised as a liability (or asset) to the extent that it is unpaid (or refundable).

Deferred tax is accounted for using the comprehensive balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax base of those items. Deferred tax liabilities are recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that sufficient taxable amounts will be available against which deductible temporary differences or unused losses can be utilised.

SIGNIFICANT ACCOUNTING POLICIES (continued)

TAX EFFECT ACCOUNTING (continued)

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates except where the consolidated entity is able to control the reversal of the temporary differences and it is probable that the temporary differences will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with these investments are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Current and deferred tax is recognised as an expense or income in the income statement. When deferred tax items are credited or debited directly to equity, the deferred tax is also recognised directly in equity. When deferred tax arises from the initial accounting for a business combination, it is taken into account in the determination of goodwill.

No provision for withholding tax has been made on undistributed earnings of overseas subsidiaries where there is no intention to distribute those earnings or where the distribution of earnings does not attract withholding tax under both the tax laws of the country where the overseas subsidiary is domiciled and the tax laws of Australia.

TAX CONSOLIDATION

The parent entity and its Australian wholly-owned entities are part of a tax-consolidated group under Australian taxation law. The head entity within the tax consolidation group for the purposes of the tax consolidation system is Rinker Group Limited.

EMPLOYEE ENTITLEMENTS

Provision is made for benefits accruing to employees in respect of wages and salaries, annual leave, long service leave and other employee benefits when it is probable that settlement will be required and they are capable of being reliably measured. Provisions made in respect of wages and salaries, annual leave, long service leave, and other employee benefits expected to be settled within 12 months, are measured at their nominal values using the remuneration rate expected to apply at the time of settlement. Provisions made in respect of wages and salaries, annual leave and long service leave and other employee benefits, which are not expected to be settled within 12 months are measured as the present value of the estimated future cash outflows to be made in respect of services provided by employees up to reporting date.

DEFINED BENEFIT SUPERANNUATION PLANS

The Rinker group participates in several superannuation funds which provide benefits upon the disability, retirement, resignation, or death of employees. The cost of providing benefits is recorded in the income statement. The cost of providing benefits recorded in the income statement is based on the actuarial estimate of the annual cost of funding members' benefits using the Projected Unit Credit Method. Actuarial valuations are carried out at each reporting date. Differences between actuarial estimates and actual results are recorded directly in equity and presented in the Statement of Recognised Income and Expense. These differences, also known as actuarial gains and losses, arise from changes in discount rates, market investment performance or other actuarial assumptions representing the difference between actual fund performance and the actuarially determined expense.

The liability or asset recognised in the balance sheet generally represents the net of the present value of the defined benefit obligation and the fair value of the plan assets.

The directors have elected under s.334(5) of the Corporations Act 2001 to apply Accounting Standard AASB 119 Employee Benefits and AASB 2004-3 Amendments to Australian Accounting Standards, effective 1 April 2004, although the Standard is not required to be applied until the annual reporting period beginning on 1 April 2006.

DEFINED CONTRIBUTION SUPERANNUATION PLANS

Contributions to defined contribution superannuation plans or US 401K plans are expensed when incurred.

RESTORATION AND ENVIRONMENTAL REHABILITATION

Provision is made to recognise the fair value of the liability for restoration and environmental rehabilitation of areas from which natural resources are extracted. The associated asset retirement costs are capitalised as part of the carrying amount of the related long-lived asset and amortised over the life of the related asset using the unit-of-production method. At the end of each year, the liability is increased to reflect the passage of time (accretion expense) and adjusted (increase or decrease) to reflect changes in the estimated future cash flows underlying the initial fair value measurement. If the obligation is settled for other than the carrying amount of the liability, the Rinker group will recognise a gain or loss on settlement.

RESTRUCTURING PROVISIONS

Provision for restructurings are recognised when the consolidated entity has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by:

A. Management discussion and analysis of the financial results

starting to implement the plan; or

announcing its main features to those affected by it.

UNINSURED LOSSES AND FUTURE CLAIMS

Provisions for uninsured losses and future claims include retained losses within insurance policies for workers compensation, product liability, general liability, automobile liability and employee medical plan claims. The provisions are based on actuarial calculations and include amounts for claims incurred but not reported as well as increases in claims that have been reported.

F-11

SIGNIFICANT ACCOUNTING POLICIES (continued)

OTHER PROVISIONS

Provisions are recognised when the consolidated entity has a present obligation, the future sacrifice of economic benefits is probable, and the amount of the provision can be measured reliably. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. A provision is recognised for dividends when they have been declared.

SHARE-BASED PAYMENTS

Equity-settled share-based payments granted after 7 November 2002 that were unvested as of 1 January 2005, are measured at fair value at the date of grant. Fair value is measured by use of a Monte Carlo simulation (binomial pricing model). The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on an estimate of shares that will eventually vest.

When the expense is recorded, a corresponding increase in equity is also recorded. In order to settle share-based payment plans, shares are purchased and included in an employee trust. The shares purchased are recorded as a reduction in equity.

DERIVATIVE AND HEDGING ACTIVITIES

The consolidated entity uses derivative financial instruments (derivatives) to hedge exposures to interest rate risk. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event, the timing of the recognition in profit or loss depends on the nature of the hedge relationship. In order to be designated as a hedge, at inception and during the term of the hedging instrument, it must be expected that the hedge will be effective in reducing exposure to the risks being hedged. With the passage of time, it must be able to be demonstrated that the hedging instrument has actually been effective in reducing risk. The hedge items include recognised liabilities and forecast transactions that are probable of occurring. Interest rate swaps are designated as cash flow hedges and are used to eliminate the variability in the consolidated entity's interest payments arising from changes in interest rates. The effective portion of changes in fair value of interest rate swaps that are designated and qualify as cash flow hedges are deferred in equity. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss. Amounts deferred in equity are recorded

in profit or loss in the periods when the hedged item is recognised in profit and loss.

Hedge accounting is discontinued when the interest rate swap expires, is sold, terminated or no longer qualifies for hedge accounting. At that time, any cumulative gain or loss deferred in equity remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur the cumulative gain or loss that was deferred in equity is recognised immediately in profit or loss.

COMPARATIVE INFORMATION - FINANCIAL INSTRUMENTS

Accounting Standard AASB 139, Financial Instruments: Recognition and Measurement, is effective for reporting periods beginning on or after 1 January 2005 and early adoption is not permitted. The consolidated entity has elected not to restate comparative information for financial instruments within the scope of AASB 139, as permitted on the first-time adoption of A-IFRS. The change in accounting policy calls for the recognition and measurement of derivative financial instruments at fair value. The effect of the change in accounting policy has been an increase in other non-current assets, an increase in deferred tax liabilities, and a corresponding increase in equity reserves at the beginning of the year of \$1.9 million, net of tax. The change in current year profits was not significant.

The main adjustments necessary to make the comparative financial statements comply with AASB 139 include:

- the recognition and measurement of derivatives at fair value

- the deferral in equity of the effective portion of the movement in fair value of derivatives accounted for as a cash flow hedge

- the recognition in profit or loss of the ineffective portion of the movement in fair value of derivatives accounted for as a cash flow hedge

- the recognition of any current or deferred taxes in relation to the adjustments described above

GOODS AND SERVICES TAX (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except:

- where the GST incurred on a purchase of goods and services is not recoverable from the taxation authority, in which case the GST is recognised as part of the cost of acquisition of the asset or as part of the expense item as applicable;
- and

- receivables and payables are stated with the amount of GST included.

The net amount of GST recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

Cash flows are included in the Cash Flow Statement on a gross basis and the GST component of cash flows arising from investing and financing activities, which is recoverable from, or payable to, the taxation authority are classified as operating cash flows. Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the taxation authority.

AASB ACCOUNTING STANDARDS NOT YET EFFECTIVE

The Australian Accounting Standards Board (AASB) and Urgent Issues Group (UIG) issued additional standards and interpretations which are effective for periods commencing after the date of these financial statements. The following standards and interpretations have not yet been adopted by the group.

AASB 7 Financial Instruments: Disclosures - applicable to annual reporting periods beginning on or after 1 January 2007

UIG 4 Determining Whether an Arrangement Contains a Lease - applicable to annual reporting periods beginning on or after 1 January 2006

UIG 9 Reassessment of Embedded Derivatives - applicable to annual reporting periods beginning on or after 1 June 2006

The group does not anticipate that the adoption of these standards and interpretations will have a material effect on its financial statements on initial adoption. Upon adoption of AASB 7, the group will be required to disclose additional information about financial instruments, including greater detail as to its risk disclosure. There will be no effect on reported earnings or net assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1 IMPACTS OF THE ADOPTION OF A-IFRS

The consolidated entity changed its accounting policies on 1 April 2005 to comply with A-IFRS. The transition to A-IFRS is accounted for in accordance with Accounting Standard AASB 1 First-time Adoption of Australian Equivalents to International Financial Reporting Standards, with 1 April 2004 as the date of transition, except financial instruments, where the date of transition is 1 April 2005.

An explanation of how the transition from superseded policies to A-IFRS has affected the consolidated entity's balance sheet, income statement and cash flows for the year ended 31 March 2005 is set out in the following tables and the notes that accompany the tables.

Reconciliation of profit before finance and income tax expense under previous AGAAP to that under A-IFRS

(US\$ MILLIONS)	NOTE	TWELVE MONTHS ENDED 31 MARCH 2005

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

1 IMPACTS OF THE ADOPTION OF A-IFRS (continued)

Effect of A-IFRS on the Cash Flow Statement for the financial year ended 31 March 2005

The adoption of A-IFRS has not resulted in any material adjustments to the Cash Flow Statement for the financial year ended 31 March 2005 other than the reclassification of payments for shares purchased for long-term employee incentive plans for a cost of \$19.4 million from net cash from operating activities to cash flows from financing activities.

Notes to the reconciliations of income and equity

a Goodwill

Under superseded AGAAP, goodwill was amortised over the period benefits were expected to be received, up to a maximum of 20 years.

Under A-IFRS, goodwill is not amortised, but is tested at least annually for impairment. The consolidated entity has elected not to restate business combinations that occurred prior to the date of transition under A-IFRS, and accordingly, the carrying amount of goodwill at the date of transition has not changed and there is no impact on opening retained earnings at transition.

The impact on the income statement for the financial year ended 31 March 2005 reflects the reversal of goodwill amortisation previously recorded under AGAAP.

b Employee benefits

Under superseded AGAAP, contributions to defined benefit plans were expensed when paid, and no assets or liabilities were recognised in relation to defined benefit plans.

Under A-IFRS, an entity is required to recognise the net surplus or deficit of each defined benefit plan, and annually remeasure the surplus/deficit based on actuarial valuation. The annual expense is based on an actuarial estimate of the funding cost of members benefits. Actuarial gains or losses arising from changes in discount rates, market investment performance, or other actuarial assumptions are recorded directly against retained earnings.

The opening retained earnings adjustment reflects the net effect of the recognition of the surplus/deficit at the date of transition and the removal of a payable set up under previous AGAAP to reflect contributions owed. The income statement adjustments for the financial year ended 31 March 2005 reflect the actuarially estimated expense of funding cost of members' benefits and the reversal of contributions expensed under AGAAP. The impact on retained earnings for the financial year ended 31 March 2005 reflects the gain arising from changes in discount rates, market investment performance, or other actuarial assumptions.

c Restoration and environmental provisions

Under superseded AGAAP, restoration and environmental rehabilitation costs were recognised over the period in which quarry reserves were extracted.

Under A-IFRS, the fair value of the liability is recognised as works requiring rehabilitation are undertaken and the associated asset retirement cost is capitalised as part of the carrying amount of the asset and amortised over the economic life of the relevant quarry. During the year, the liability is increased to reflect the passage of time (accretion expense) and adjusted to reflect changes in the estimated future cash flows underlying the initial fair value measurement.

The opening balance retained earnings adjustment reflects the recognition of the provision for restoration and rehabilitation and the capitalisation of the associated asset retirement cost. The income statement adjustments for the financial year ended 31 March 2005 reflect depreciation of the capitalised asset retirement cost, accretion of the restoration and rehabilitation provision, and reversal of operating expenses recognised under AGAAP.

d Share-based payment

Under superseded AGAAP, Rinker recognised an expense in respect of the cash paid for shares acquired to settle Rinker's obligation under share-based incentive plans. The cost of the shares purchased in conjunction with these plans was recognised as a deferred cost and amortised over the vesting period.

Under A-IFRS, compensation expense related to share-based payments is recognised over the vesting period based on the fair value of the equity instrument at grant date. The compensation expense is included in employee benefits expense with a corresponding increase in the equity-based compensation reserve. Shares purchased in the name of employees and held in trust are accounted for as a reduction of equity (shares held in trust).

The income statement adjustments for the financial year ended 31 March 2005 reflect the recognition of share-based payments expense and the reversal of expense recognised under AGAAP. Adjustments to equity during the financial year ended 31 March 2005 reflect the increase in reserves corresponding with the share-based payment expense and the reallocation of shares held in trust from deferred costs to equity.

e Associates accounting

The increase in associates' net profit represents the consolidated entity's share of associates' impact of adoption of A-IFRS, primarily resulting from the cessation of goodwill amortisation under A-IFRS, recognition of quarry rehabilitation provisions and adjustments to deferred tax balances.

f Income taxes

Under superseded AGAAP, income tax expense was calculated on pre-tax accounting profits after adjustment for permanent differences. Certain timing differences, which occur when items were included or allowed for income tax purposes in a period different to that for accounting, were recognised at current taxation rates as deferred tax assets and deferred tax liabilities, as applicable.

Under A-IFRS, deferred tax is determined using the balance sheet liability method. This method requires recording all temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and their corresponding tax bases. This resulted in the recognition of additional deferred tax liabilities not previously recognised under AGAAP. Additional deferred tax liabilities were recorded for prior revaluation of non-current assets, land revalued upon

acquisition, and non-deductible quarry reserves.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

1 IMPACTS OF THE ADOPTION OF A-IFRS (continued)

The effect of the above adjustments on the deferred tax balances is as follows:

US\$ MILLIONS AS AT	1 APRIL 2004	31 MARCH 2005
Cessation of goodwill amortisation		(6.5)
Recognition of defined benefit obligations	8.4	9.2
Recognition of restoration and environmental rehabilitation obligations	2.0	2.0
Expensing share-based payments		(2.3)
Deferred tax not recognised under previous AGAAP	(64.0)	(61.3)
Foreign exchange movements on adjustments on deferred tax		(0.5)
Net (decrease) in deferred tax balances	(53.6)	(59.4)

The effect of the above adjustments on tax expense is as follows:

US\$ MILLIONS	TWELVE MONTHS ENDED 31 MARCH 2005
Cessation of goodwill amortisation	(6.5)
Recognition of defined benefit obligations	(0.8)
Expensing share-based payments	(3.5)
Deferred tax not recognised under previous AGAAP	2.7
Net (increase) in tax expense	(8.1)

g Other

Other adjustments, not individually material, include adjustment to the net gain/loss on divestments resulting from the cessation of goodwill amortisation, reclassification of finance charges on overdue receivables from trading revenue to interest income, and the cessation of tradename amortisation.

h Revenue on sale of assets

Under superseded AGAAP policies, the consolidated entity recognised the gain or loss on disposal of property, plant and equipment on a gross basis by recognising the proceeds from sale as revenue and the carrying amount of the property, plant and equipment disposed as expense. Under

Edgar Filing: RINKER GROUP LTD - Form 20-F

A-IFRS, the gain or loss on disposal is recognised on a net basis, and net gains are classified as income, rather than revenue. Accordingly, the gross amounts have been reclassified within the income statement for A-IFRS reporting purposes. There is no impact on either profit or equity.

PRODUCTS AND SERVICES OF SEGMENTS

Business segments are reported along geographic lines (Rinker Materials in the United States; and Readymix in Australia and China) and within the United States, along product lines. These segments are the same as those used for internal management as the basis for making decisions regarding the allocation of resources.

Rinker Materials

Aggregates

Cement

Concrete, block and asphalt

Concrete pipe and products

Other: gypsum supply, pre-stressed concrete (d), polyethylene pipe (d), Rinker Materials corporate costs

Readymix

Aggregates, concrete, asphalt (e), cement, concrete pipe and other reinforced concrete products

(d) The pre-stressed concrete and polyethylene pipe businesses were disposed of during the year ended 31 March 2005.

(e) The asphalt business was disposed of during the year ended 31 March 2006.

Net losses on disposals of operating property, plant and equipment and other assets	(8.4)	(6.2)
Net loss on sale of assets	(8.4)	(23.3)
Other restructuring and impairment costs	(0.1)	(0.3)
Other		(0.3)
Total other expenses	(8.5)	(23.9)

4 SIGNIFICANT ITEMS

During the year ended 31 March 2006, Readymix disposed of its partnership interest in Emoleum. A gain on disposal of US\$15.7 million, net of tax, was recognised in the financial statements. In addition, Rinker Materials disposed of a property at Buffalo Road, Las Vegas, Nevada. The gain on disposal of US\$19.8 million, net of tax, was recognised in the financial statements and included within the Rinker Materials Other segment in Note 2.

During the year ended 31 March 2005, Rinker Materials disposed of its pre-stressed concrete (Prestress) and polyethylene pipe (Polypipe) businesses. A gain on the disposal of Polypipe of US\$7.0 million and a loss on the disposal of Prestress of (US\$13.9 million), net of tax, were recognised in the financial statements. The impact was included within the Rinker Materials Other segment in Note 2.

5 OPERATING COSTS

Operating Costs include:		
Mining royalties paid to governments	3.1	2.9
Operating lease and rental payments	41.1	38.9
Employee benefits expense (a)	921.7	842.9
Repairs and maintenance	116.5	115.2

(a) Employee benefits expense includes salaries and wages, defined benefits expense (see Note 34) and share-based

payments expense (see Note 26).

6 NET FINANCE EXPENSE AND INTEREST INCOME

Interest paid or payable on debt	36.5	46.0
Total interest expense	36.5	46.0
Add		
other borrowing costs	5.5	7.9
foreign exchange (gain) loss	(0.2)	0.3
Finance costs	41.8	54.2
Less interest income	21.7	22.2
Net finance expense	20.1	32.0

F-19

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

YEAR ENDED 31 MARCH	US\$ MILLION 2006	US\$ MILLION 2005
7 DEPRECIATION, DEPLETION AND AMORTISATION		
Amounts incurred for depreciation, depletion and amortisation of prepayments and other non-current assets	17.3	10.5
property, plant and equipment	190.5	181.1
other intangibles	1.1	3.4
Total depreciation, depletion and amortisation	208.9	195.0

8 EARNINGS PER ORDINARY SHARE

The following reflects the income and share data used in the basic and diluted earnings per share calculations:

	Number of shares (million)	
	2006	2005
Weighted average number of ordinary shares outstanding	923.9	942.1
Less: Weighted average shares held in trust	(4.1)	(0.9)
Weighted average number of ordinary shares for basic earnings per share	919.8	941.2
Effect of dilution:		
Long-term incentive plan	2.8	1.0
Weighted average number of ordinary shares adjusted for the effect of dilution	922.6	942.2

	US\$ MILLION (except per share amounts)	
	2006	2005
Net profit attributable to members of Rinker Group Limited		
Net profit attributable to members	740.2	493.2
Earnings per share (US dollars)		
Basic	0.80	0.52
Diluted	0.80	0.52

The basic earnings per share figure is calculated by dividing the net profit attributable to members of Rinker Group Limited for the financial year by the weighted average ordinary shares outstanding, after deducting shares held in employee trusts under long-term compensation arrangements.

The diluted earnings per share figure is calculated by dividing the net profit attributable to members of Rinker Group Limited by the basic number of shares above plus the notional exercise of outstanding long-term incentive awards, where these would be deemed to have a dilutive impact.

9 DIVIDENDS

	DATE DECLARED	DATE PAID / PAYABLE	AMOUNT PER SHARE (AUSTRALIAN CENTS)	TOTAL AMOUNT (A\$ MILLION)
RECOGNISED IN 2005				
Final dividend year ended 31 March 2004 (a)	25 May 2004	2 July 2004	8	75.5
Interim dividend year ended 31 March 2005 (a)	16 November 2004	13 December 2004	7	65.9
Total recognised			15	141.4
RECOGNISED IN 2006				
Final dividend year ended 31 March 2005 (b)	12 May 2005	1 July 2005	14	131.1
Interim dividend year ended 31 March 2006 (b)	9 November 2005	12 December 2005	14	128.3
Total recognised			28	259.4
UNRECOGNISED				
Final dividend year ended 31 March 2006 (b)	11 May 2006	4 July 2006	24	218.4

(a) 100 per cent franked at the Australian corporate tax rate of 30 per cent.

(b) 60 per cent franked at the Australian corporate tax rate of 30 per cent. The unfranked portion of this dividend will be paid from Rinker's conduit foreign income amount. This is substantially the same as the foreign dividend account that dividends were paid from under now superseded legislation.

Dividends declared during the year ended 31 March 2006 have been recognised in the financial report. The final dividend in respect of ordinary shares for the year ended 31 March 2006 has not been recognised in this financial report because it was declared after 31 March 2006.

Effective 27 April 2005, ADRs, which previously represented 10 Rinker ordinary shares now represent five Rinker ordinary shares. This change had no impact on the contributed equity of Rinker Group Limited. Holders of Rinker American Depositary Receipts (ADRs) in the United States, will receive a dividend of five times the dividend per ordinary share noted above.

The adjusted franking credit balance as of 31 March 2006 is A\$25.8 million (2005: A\$16.8 million). The partially franked dividend announced subsequent to 31 March 2006 and to be paid in the fiscal year ended 2007 will reduce the adjusted franking credit balance by A\$56.2 million. The group will generate further franking credits during the fiscal year ended 2007 as additional tax installments are paid.

Refer to Note 39, Subsequent Events, for information regarding a special dividend declared subsequent to 31 March 2006.

Profit before income tax expense	1,125.5	743.1
Income tax expense calculated at 30%	337.7	222.9
Increase (decrease) in income tax expense due to		
Overseas tax rate differential	64.8	42.4
US Federal domestic production credits	(5.7)	
Non-tax deductible other expenditures	2.7	4.9
Income tax (over) provided in previous years	(2.9)	(9.7)
Tax depletion of quarry reserves	(6.5)	(7.2)
Equity accounted associates profit/rebate on dividends received	(5.7)	(6.2)
Other items	(2.5)	(2.2)
Total income tax expense on profit	381.9	244.9

Tax consolidation

Rinker and its wholly-owned Australian resident entities have formed a tax-consolidated group with effect from 12 April 2003 and are therefore taxed as a single entity from that date. The head entity within the tax-consolidated group is Rinker Group Limited. Tax expense, deferred tax liabilities and deferred tax assets arising from temporary differences for the entities within the tax-consolidated group are calculated using the stand alone taxpayer basis. Current tax liabilities and tax assets of the entities within the tax-consolidated group are recognised by the head entity in the tax-consolidated group (Rinker Group Limited).

Entities within the tax-consolidated group have entered into a tax funding arrangement and a tax-sharing agreement with the head entity. Under the terms of the tax funding arrangement, each of the entities in the tax-consolidated group has agreed to pay to or receive from the head entity its current year tax liability or tax asset. Such amounts are recorded in the balance sheet of the head entity in amounts receivable from or payable to other entities in the tax-consolidated group.

The tax sharing agreement provides for the allocation of income tax liabilities between the members of the tax consolidated group should the head entity default on its tax payment obligations. No amounts have been recognised in the financial statements in respect of this agreement as payment of any amounts under the tax sharing agreement is considered remote.

The components of income tax expense consist of the following:

Current		
Australian	59.7	45.3
US	344.1	183.1
Total current income tax expense	403.8	228.4
Deferred		
Australian	(7.4)	0.2

Investments at valuation (a)	32.6	22.5
Total other financial assets	32.6	22.5

(a) These investments relate to the Rinker Materials Benefit Restoration and Voluntary Deferral Plan, under which participating employees are allowed to defer salary and incentive awards. Deferred funds are invested in assets at the direction of participants. These investments are accounted for at fair value through profit or loss, which is based on quoted market prices. These amounts will generally be paid to participants upon their retirement. An equivalent liability is included in non-current payables to record the current obligation to the participants. In the event of Rinker group insolvency, these assets will be available to creditors.

bank facilities (US dollar debt) (average rate 2006: 5.0%)	285.0	
bank facilities (CNY) (average rate 2006: 5.1%, 2005: 5.2%)	6.2	6.0
other facilities (Australian dollar debt) (average rate 2006: 1.2%, 2005: 0.8%)	2.4	4.3
Total non-current borrowings	645.2	610.9

- (a) Secured or collateralised by a charge over property, plant and equipment. The net carrying value of the assets subject to charge as at 31 March 2006 is US\$6.7 million (31 March 2005: US\$7.1 million).
- (b) Certain US\$ debt has a floating interest rate. (Refer to note 28 to the financial statements for details). Interest on this debt is based upon LIBOR plus a margin. The margins payable under the facilities are generally consistent with that which an A-/BBB+ rated entity would expect to obtain for facilities of this size and nature.
- (c) Maturities of bonds and notes are as follows: US\$100.0 million (2006: 4.6%, 2005: 4.6%) maturing August 2010, US\$100.0 million (2006: 4.6%, 2005: 4.6%) maturing in December 2010, and US\$149.9 million (2006: 7.7%, 2005: 7.7%) maturing July 2025.
- (d) During the year ended 31 March 2006 US\$827.6 million was drawn and US\$1,075.8 million was repaid on commercial paper borrowings.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**21 BORROWINGS (continued)****COMMERCIAL PAPER**

Rinker group has a commercial paper program based in the United States. The program totals US\$400.0 million (2005: US\$400.0 million). In April 2006 the facility was expanded to US\$1,000.0 million and is an evergreen facility. Drawings on the program are backed by the standby facilities referred to below. As at 31 March 2006, there were no amounts drawn under the facility.

BANK FACILITIES

Rinker group had total committed credit facilities of US\$1,177.5 million (2005: US\$1,177.5 million), of which US\$892.5 million were undrawn at 31 March 2006. These facilities have fixed maturity dates ranging between December 2006 and April 2010. The weighted average commitment fee is 0.11% of the total committed credit facilities. Commitments can be withdrawn following an event of default under the facility agreements.

OTHER

At 31 March 2006, Rinker group entities had in place uncommitted facilities available for short-term cash advances and the issuance of letters of credit and bank guarantees of US\$153.1 million (2005: US\$131.3 million). US\$91.0 million in letters of credit or bank guarantees were issued against these facilities at 31 March 2006 (2005: US\$74.9 million).

23 CONTRIBUTED EQUITY

YEAR ENDED 31 MARCH	ORDINARY SHARES FULLY PAID (a) (NUMBER OF SHARES)		CONTRIBUTED EQUITY (US\$ MILLION)	
	2006	2005	2006	2005
PARTICULARS OF SHARES ISSUED DURING THE YEAR BY RINKER GROUP LIMITED				
On issue 31 March	941,232,368	944,994,496	1,475.9	1,497.1
Share buyback (b)	(31,116,149)	(4,000,028)	(337.2)	(21.9)
Universal Share Plan (c)		237,900		0.7
Total movements during the period	(31,116,149)	(3,762,128)	(337.2)	(21.2)
On issue 31 March	910,116,219	941,232,368	1,138.7	1,475.9

(a) Fully paid ordinary shares are listed on the Australian Stock Exchange, and carry one vote per share and the right to dividends.

(b) On 12 May 2005, Rinker announced the commencement of a 12 month on-market share buyback of up to 10 per cent of its ordinary shares outstanding at that date. 31,116,149 shares were repurchased under the on-market buyback during the year to 31 March 2006, of which 26,203,823 related to the buyback announced 12 May 2005 and the remainder related to a previous buyback program ended 26 May 2005. Shares repurchased were cancelled immediately on receipt. During the year ended 31 March 2005, 4,000,028 shares were repurchased under the previous buyback program.

(c) Rinker's Universal Share Plan (USP) is open to all Australian employees who have been employed for at least one year. The plan encourages general employee share ownership and enables participants to qualify for the limited favorable tax treatment available in Australia for broad-based employee share plans. Employees may acquire a parcel of shares at market price and receive an equal number of additional shares for no further consideration. For this reason, this plan is not subject to performance conditions.

Prior to fiscal year 2006, the maximum number of shares available for each employee under the plan was set by the board on the recommendation of the compensation & human resources committee (the committee) and was issued annually. No loan facility is offered under USP.

During fiscal year 2005, 237,900 were issued in total to the 1,259 employees who participated in USP. During 2006, the shares were purchased on-market during appropriate trading windows, and had no impact on shares outstanding.

Edgar Filing: RINKER GROUP LTD - Form 20-F

Shares acquired under USP may not be disposed of before the earlier of the end of three years after the time of acquisition of the shares, or when the participant ceases to be employed by any Rinker group company. After that time, the participant may retain ownership of the shares or sell them.

Rinker Employee Share Acquisition Plan (Rinker ESAP)

The Employee Share Acquisition Plan (ESAP) enables directors and employees of Rinker in Australia to purchase Rinker shares with pre-tax compensation or bonuses. Those shares are purchased on market, in the ordinary course of trading on ASX, by the ESAP trustee and held on trust for the participant. These shares are not subject to performance conditions since they are being purchased in lieu of receiving bonuses where the performance condition has already been satisfied or are being purchased with fixed compensation.

Eligibility to participate in ESAP is determined by the Rinker board. Shares may be retained in Rinker ESAP for an indefinite period while a participant remains an employee of a Rinker group company. However, taxation deferral benefits only currently apply for a maximum of 10 years. If a participant ceases to be employed by any Rinker group company, the Rinker ESAP trustee must either transfer the relevant shares to the participant or sell the shares and distribute the proceeds of sale (less authorised deductions) to them. Withdrawal of shares from Rinker ESAP and their transfer to a participant or sale requires the approval of the Rinker board. Participants are entitled to any dividend, return of capital or other distribution made in respect of Rinker shares held in the plan on their behalf. The Rinker ESAP trustee may allow participants to participate in any pro rata rights and bonus issues of shares made by Rinker or sell such rights (if renounceable) or bonus shares on behalf of the participants and distribute the cash proceeds of such sale (less authorised deductions). Participants may direct the trustee how to vote any shares held on the participant's behalf. In the absence of such direction, the shares will not be voted.
