PENNS WOODS BANCORP, INC. AND SUBSIDIARIES

NOTES TO

CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation

The consolidated financial statements include the accounts of Penns Woods Bancorp, Inc. (the Company) and its wholly-owned subsidiaries: Woods Investment Company, Inc., Woods Real Estate Development Company, Inc., and Jersey Shore State Bank (the Bank) and its wholly-owned subsidiary, The M Group, Inc. D/B/A The Comprehensive Financial Group (The M Group). All significant inter-company balances and transactions have been eliminated in the consolidation.

The interim financial statements are unaudited but, in the opinion of management, reflect all adjustments necessary for the fair presentation of results for such periods. The results of operations for any interim period are not necessarily indicative of results for the full year. These financial statements should be read in conjunction with the financial statements and notes thereto contained in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

The accounting policies followed in the presentation of interim financial results are the same as those followed on an annual basis. These policies are presented on pages 38 through 44 of the Annual Report on Form 10-K for the year ended December 31, 2009.

In reference to the attached financial statements, all adjustments are of a normal recurring nature pursuant to Rule 10-01(b) (8) of Regulation S-X.

Note 2. Recent Accounting Pronouncements

In December 2009, the FASB issued ASU 2009-16, *Accounting for Transfer of Financial Assets*. ASU 2009-16 provides guidance to improve the relevance, representational faithfulness, and comparability of the information that an entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor s continuing involvement, if any, in transferred financial assets. ASU 2009-16 is effective for annual periods beginning after November 15, 2009 and for interim periods within those fiscal years. The adoption of this guidance did not have a material impact on the Company s financial statements.

In January 2010, the FASB issued ASU 2010-01, *Equity (Topic 505): Accounting for Distributions to Shareholders with Components of Stock and Cash a consensus of the FASB Emerging Issues Task Force.* ASU 2010-01 clarifies that the stock portion of a distribution to shareholders

that allows them to elect to receive cash or stock with a potential limitation on the total amount of cash that all shareholders can elect to receive in the aggregate is considered a share issuance that is reflected in EPS prospectively and is not a stock dividend. ASU 2010-01 is effective for interim and annual periods ending on or after December 15, 2009 and should be

Table of Contents

applied on a retrospective basis. The adoption of this guidance did not have a material impact on the Company s financial statements.

In January 2010, the FASB issued ASU 2010-05, Compensation Stock Compensation (Topic 718): Escrowed Share Arrangements and the Presumption of Compensation. ASU 2010-05 updates existing guidance to address the SEC staff s views on overcoming the presumption that for certain shareholders escrowed share arrangements represent compensation. ASU 2010-05 is effective January 15, 2010. The adoption of this guidance did not have a material impact on the Company s financial statements.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*. ASU 2010-06 amends Subtopic 820-10 to clarify existing disclosures, require new disclosures, and includes conforming amendments to guidance on employers disclosures about postretirement benefit plan assets. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The Company has presented the necessary disclosures in Note 4 (Net Periodic Benefit Cost-Defined Benefit Plans) herein.

In February 2010, the FASB issued ASU 2010-08, *Technical Corrections to Various Topics*. ASU 2010-08 clarifies guidance on embedded derivatives and hedging. ASU 2010-08 is effective for interim and annual periods beginning after December 15, 2009. The adoption of this guidance did not have a material impact on the Company s financial position or results.

In March 2010, the FASB issued ASU 2010-11, *Derivatives and Hedging*. ASU 2010-11 provides clarification and related additional examples to improve financial reporting by resolving potential ambiguity about the breadth of the embedded credit derivative scope exception in ASC 815-15-15-8. ASU 2010-11 is effective at the beginning of the first fiscal quarter beginning after June 15, 2010. The adoption of this guidance did not have a material impact on the Company s financial statements.

In April 2010, the FASB issued ASU 2010-18, Receivables (Topic 310): Effect of a Loan Modification When the Loan is a Part of a Pool That is Accounted for as a Single Asset a consensus of the FASB Emerging Issues Task Force. ASU 2010-18 clarifies the treatment for a modified loan that was acquired as part of a pool of assets. Refinancing or restructuring the loan does not make it eligible for removal from the pool, the FASB said. The amendment will be effective for loans that are part of an asset pool and are modified during financial reporting periods that end July 15, 2010 or later. The amendment is not expected to have a significant impact on the Company s financial statements.

In July 2010, FASB issued ASU No. 2010-20, *Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses.* ASU 2010-20 is intended to provide additional information to assist financial statement users in assessing an entity s credit risk exposures and evaluating the adequacy of its allowance for credit losses. The

Table of Contents

disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. The amendments in ASU 2010-20 encourage, but do not require, comparative disclosures for earlier reporting periods that ended before initial adoption. However, an entity should provide comparative disclosures for those reporting periods ending after initial adoption. The Company is currently evaluating the impact the adoption of this guidance will have on the Company is financial position or results of operations.

Note 3. Per Share Data

There are no convertible securities which would affect the denominator in calculating basic and dilutive earnings per share. Net income as presented on the consolidated statement of income will be used as the numerator. The following table sets forth the composition of the weighted average common shares (denominator) used in the basic and dilutive per share computation.

	Three Months Er 2010	nded June 30, 2009	Six Months Er 2010	ded June 30, 2009
Weighted average common shares issued	4,013,892	4,011,548	4,013,610	4,011,163
Average treasury stock shares	(179,728)	(179,028)	(179,380)	(179,028)
Weighted average common shares and common stock equivalents used to calculate basic earnings per share	3,834,164	3,832,520	3,834,230	3,832,135
Additional common stock equivalents (stock options) used to calculate diluted earnings per share	127	76	140	38
Weighted average common shares and common stock equivalents used to calculate diluted earnings per share	3,834,291	3,832,596	3,834,370	3,832,173

Options to purchase 990 shares of common stock at a strike price of \$24.72 were outstanding during the six months ended June 30, 2010. The average market price of the Company s stock was \$31.46 for the six months ended June 30, 2010. Options to purchase 990 shares of common stock were outstanding during the six months ended June 30, 2009 but were not included in the computation of diluted earnings per share as they were anti-dilutive due to the strike price range being greater than the average market price for the six months ended June 30, 2009.

Note 4. Net Periodic Benefit Cost-Defined Benefit Plans

For a detailed disclosure on the Company s pension and employee benefits plans, please refer to Note 12 of the Company s Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 31, 2009.

Table of Contents

The following sets forth the components of the net periodic benefit cost of the domestic non-contributory defined benefit plan for the six months ended June 30, 2010 and 2009, respectively:

	Three Mor Jun	led	Six Months Ended June 30,			
(In Thousands)	2010		2009	2010		2009
Service cost	\$ 131	\$	136	\$ 263	\$	272
Interest cost	171		170	342		340
Expected return on plan assets	(160)		(127)	(321)		(254)
Amortization of transition obligation	(1)			(2)		(1)
Amortization of prior service cost	7		7	13		13
Amortization of net loss	37		84	73		169
Net periodic cost	\$ 185	\$	270	\$ 368	\$	539

The following table sets forth by level, within the fair value hierarchy detailed in Note 8 (Fair Value Measurements), the Plan s assets at fair value as of June 30, 2010:

	June 30, 2010

Employer Contributions

The Company previously disclosed in its consolidated financial statements, included in the Annual Report on Form 10-K for the year ended December 31, 2009, that it expected to contribute a minimum of \$400,000 to its defined benefit plan in 2010. As of June 30, 2010, there were contributions of \$244,000 made to the plan.

Note 5. Off Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are primarily comprised of commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit, interest rate, or liquidity risk in excess of the amount recognized in the consolidated balance sheet. The contract amounts of these instruments express the extent of involvement the Company has in particular classes of financial instruments.

Table of Contents

The Company s exposure to credit loss from nonperformance by the other party to the financial instruments for commitments to extend credit and standby letters of credit is represented by the contractual amount of these instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The Company may require collateral or other security to support financial instruments with off-balance sheet credit risk.

Financial instruments whose contract amounts represent credit risk are as follows at June 30, 2010 and December 31, 2009:

	June	June 30,				
(In Thousands)	201	10		2009		
Commitments to extend credit	\$	83,015	\$	80,061		
Standby letters of credit		1,341		1,334		

Commitments to extend credit are legally binding agreements to lend to customers. Commitments generally have fixed expiration dates or other termination clauses and may require payment of fees. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future liquidity requirements. The Company evaluates each customer s credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company, on an extension of credit is based on management s credit assessment of the counterparty.

Standby letters of credit represent conditional commitments issued by the Company to guarantee the performance of a customer to a third party. These instruments are issued primarily to support bid or performance related contracts. The coverage period for these instruments is typically a one year period with an annual renewal option subject to prior approval by management. Fees earned from the issuance of these letters are recognized upon expiration of the coverage period. For secured letters of credit, the collateral is typically Bank deposit instruments or customer business assets.

Note 6. Reclassification of Comparative Amounts

Certain comparative amounts for the prior period have been reclassified to conform to current period presentations. Such reclassifications had no effect on net income or shareholders equity.

Note 7. Employee Stock Purchase Plan

The Company maintains the Penns Woods Bancorp, Inc. 2006 Employee Stock Purchase Plan (Plan). The Plan is intended to encourage employee participation in the ownership and economic progress of the Company. The Plan allows for up to 1,000,000 shares to be purchased by employees. The purchase price of the shares is 95% of market value with an employee eligible to purchase up to the lesser of 15% of base compensation or \$12,000 in market value annually. During the six months ended June 30, 2010 and 2009, there were 1,130 and 1,457 shares issued under the plan, respectively.

Table of Contents

Note 8. Fair Value Measurements

The following disclosures show the hierarchal disclosure framework associated with the level of pricing observations utilized in measuring assets and liabilities at fair value.

Level I: Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level II: Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level III: Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

This hierarchy requires the use of observable market data when available.

The following table presents the assets reported on the balance sheet at their fair value on a recurring basis as of June 30, 2010 and December 31, 2009, by level within the fair value hierarchy. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

Note 9. Estimated Fair Value of Financial Instruments

The Company is required to disclose estimated fair values for its financial instruments. Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company s entire holdings of a particular financial instrument. Also, it is the Company s general practice and intention to hold most of its financial instruments to maturity and not to engage in trading or sales activities. Because no market exists for a significant portion of the Company s financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current

Table of Contents

economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions can significantly affect the estimates.

Estimated fair values have been determined by the Company using historical data and an estimation methodology suitable for each category of financial instruments. The Company s fair value estimates, methods, and assumptions are set forth below for the Company s other financial instruments.

As certain assets and liabilities, such as deferred tax assets, premises and equipment, and many other operational elements of the Company, are not considered financial instruments but have value, this estimated fair value of financial instruments would not represent the full market value of the Company.

The estimated fair values of the Company s financial instruments are as follows at June 30, 2010 and December 31, 2009:

	June 30, 2010			December 31, 2009		
(In Thousands)	Carrying Value		Fair Value	Carrying Value		Fair Value

Accrued interest payable	900		900	1,073		1,073

Table of Contents
Cash and Cash Equivalents, Loans Held for Sale, Accrued Interest Receivable, Short-term Borrowings, and Accrued Interest Payable:
The fair value is equal to the carrying value.
Investment Securities:
The fair value of investment securities available for sale and held to maturity is equal to the available quoted market price. If no quoted market price is available, fair value is estimated using the quoted market price for similar securities. Regulatory stocks fair value is equal to the carrying value.
Loans:
Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, commercial real estate, residential real estate, construction real estate, and other consumer. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories.
The fair value of performing loans is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan. The estimate of maturity is based on the Company s historical experience with repayments for each loan classification, modified, as required, by an estimate of the effect of current economic and lending conditions.
Fair value for significant nonperforming loans is based on recent external appraisals. If appraisals are not available, estimated cash flows are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows, and discounted rates are judgmentally determined using available market information and specific borrower information.
Bank-Owned Life Insurance:
The fair value is equal to the cash surrender value of the life insurance policies.
Deposits:

The fair value of deposits with no stated maturity, such as noninterest-bearing demand deposits, savings, NOW, and money market accounts, is equal to the amount payable on demand as of June 30, 2010 and December 31, 2009. The fair value of certificates of deposit is based on the discounted value of contractual cash flows.

The fair value estimates above do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market, commonly referred to as the core deposit intangible.

Long Term Borrowings:

The fair value of long term borrowings is based on the discounted value of contractual cash flows.

Table of Contents

Commitments to Extend Credit, Standby Letters of Credit, and Financial Guarantees Written:

There is no material difference between the notional amount and the estimated fair value of off-balance sheet items at June 30, 2010 and December 31, 2009. The contractual amounts of unfunded commitments and letters of credit are presented in Note 5.

Note 10. Federal Home Loan Bank Stock

The Bank is a member of the Federal Home Loan Bank of Pittsburgh (the FHLB), which is one of 12 regional Federal Home Loan Banks. Each Federal Home Loan Bank serves as a reserve or central bank for its members within its assigned region. It is funded primarily from funds deposited by member institutions and proceeds from the sale of consolidated obligations of the Federal Home Loan Bank System. It makes loans to members (i.e., advances) in accordance with policies and procedures established by the board of directors of the Federal Home Loan Bank. As a member, the Bank is required to purchase and maintain stock in the FHLB in an amount equal to the greater of 1% of its aggregate unpaid residential mortgage loans, home purchase contracts or similar obligations at the beginning of each year or 5% of its outstanding advances from the FHLB. At June 30, 2010, the Bank held \$7,271,300 in stock of the FHLB, which was in compliance with this requirement.

The Company evaluated its holding of FHLB stock for impairment and deemed the stock to not be impaired due to the expected recoverability of the par value, which equals the value reflected within the Company s financial statements. The decision was based on several items ranging from the estimated true economic losses embedded within the FHLB s mortgage portfolio to the FHLB s liquidity position and credit rating. The Company utilizes the impairment framework outlined in GAAP to evaluate FHLB stock for impairment.

The following factors were evaluated to determine the ultimate recoverability of the par value of the Company s FHLB stock holding; (i) the significance of the decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted; (ii) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB; (iii) the impact of legislative and regulatory changes on the institutions and, accordingly, on the customer base of the FHLB; (iv) the liquidity position of the FHLB; and (v) whether a decline is temporary or whether it affects the ultimate recoverability of the FHLB stock based on (a) the materiality of the carrying amount to the member institution and (b) whether an assessment of the institution s operational needs for the foreseeable future allow management to dispose of the stock.

Based on its analysis of these factors, the Company determined that its holding of FHLB stock was not impaired on June 30, 2010.

Table of Contents

At June 30, 2010 there were a total of 79 and 99 individual securities that were in a continuous unrealized loss position for less than twelve months and greater than twelve months, respectively.

The Company reviews its position quarterly and has determined that, at June 30, 2010, the declines outlined in the above table represent temporary declines and the Company does not intend to sell and does not believe they will be required to sell these securities before recovery of their cost basis, which may be at maturity. There were 178 positions that were temporarily impaired at June 30, 2010. The Company has concluded that the unrealized losses disclosed above are not other than temporary but are the result of interest rate changes, sector credit ratings changes, or company-specific ratings changes that are not expected to result in the non-collection of principal and interest during the period.

The amortized cost and estimated fair value of debt securities at June 30, 2010, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities since borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

		Available	for Sa	ale	Held to N	Aatur	ity

		388,137	\$ 13,953	\$	2,565	\$ 1,891	406,546
Less:	Net deferred loan fees	1,017					1,017
	Allowance for loan losses	4,657					4,657
Loans, net		\$ 382,463					\$ 400,872

The recorded investment in loans for which impairment has been recognized amounted to \$8,621,000 at June 30, 2010, compared to \$8,312,000 at December 31, 2009. The valuation allowance related to impaired loans amounted to \$969,000 at June 30, 2010 and \$802,000 at December 31, 2009. The increase in impaired loans and valuation allowance is primarily from a few commercial relationships.

A loan is considered impaired, based on current information and events, if it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The measurement of impaired loans is generally based on the present value of expected future cash flows discounted at the historical effective interest rate, except that all collateral-dependent loans are measured for impairment based on the fair value of the collateral.

CAUTIONARY STATEMENT FOR PURPOSES OF THE PRIVATE

SECURITIES LITIGATION REFORM ACT OF 1995

This Report contains certain forward-looking statements including statements concerning plans, objectives, future events or performance and assumptions and other statements which are other than statements of historical fact. The Company cautions readers that the following important factors, among others, may have affected and could in the future affect the Company s actual results and could cause the Company s actual results for subsequent periods to differ materially from those expressed in any forward-looking statement made by or on behalf of the Company herein: (i) the effect of changes in laws and regulations, including federal and state banking laws and regulations, with which the Company must comply, and the associated costs of compliance with such laws and regulations either currently or in the future as applicable; (ii) the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies as well as by the Financial Accounting Standards Board, or of changes in the Company s organization, compensation and benefit plans; (iii) the effect on the Company s competitive position within its market area of the increasing consolidation within the banking and financial services industries, including the increased competition from larger regional and out-of-state banking organizations as well as non-bank providers of various financial services; (iv) the effect of changes in interest rates; and (v) the effect of changes in the business cycle and downturns in the local, regional or national economies.

You should not put undue reliance on any forward-looking statements. These statements speak only as of the date of this Quarterly Report on Form 10-Q, even if subsequently made available by the Company on its website or otherwise. The Company undertakes no obligation to update or revise these statements to reflect events or circumstances occurring after the date of this Quarterly Report on Form 10-Q.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operation

EARNINGS SUMMARY

Comparison of the Three and Six Months Ended June 30, 2010 and 2009

Summary Results

Net income for the three months ended June 30, 2010 was \$2,772,000 compared to \$832,000 for the same period of 2009 as after-tax securities losses decreased \$1,413,000 (from a loss of \$1,376,000 to a gain of \$37,000). Included within the change in after-tax securities losses for the three months ended June 30, 2009 was an other than temporary impairment charge relating to certain equity securities held in the investment portfolio of \$2,251,000. Basic and diluted earnings per share for the three months ended June 30, 2010 were \$0.72 compared to \$0.22 for the three months ended June 30, 2009. Return on average assets and return on average equity were 1.58% and 15.76% for the three months ended June 30, 2010 compared to 0.51% and 5.45% for the corresponding period of 2009. Net income from core operations (operating earnings) increased to \$2,735,000 for the three months ended June 30, 2010 compared to \$2,208,000 for the same period of 2009. Operating earnings per share for the three months ended June 30, 2010 were \$0.71 basic and dilutive compared to \$0.58 basic and dilutive for the three months ended June 30, 2009.

The six months ended June 30, 2010 generated net income of \$5,220,000 compared to \$1,671,000 for the same period of 2009. Comparable results were impacted by a decrease in after-tax securities losses of \$2,975,000 (from a loss of \$2,940,000 for the 2009 period to a gain of \$35,000 for the 2010 period). Earnings per share, basic and diluted, for the six months ended June 30, 2010 were \$1.36 as compared to \$0.44 for the comparable period of 2009. Return on average assets and return on average equity were 1.50% and 15.05% for the six months ended June 30, 2010 compared to 0.51% and 5.54% for the corresponding period of 2009. Operating earnings increased 12.4% to \$5,185,000 for the six months ended June 30, 2010 compared to \$4,611,000 for the comparable period of 2009, resulting in basic and dilutive operating earnings per share increasing 12.5% to \$1.35 from \$1.20 for the six month periods ended June 30, 2010 and 2009, respectively.

Management uses the non-GAAP measure of net income from core operations, or operating earnings, in its analysis of the Company s performance. This measure, as used by the Company, adjusts net income by excluding significant gains or losses that are unusual in nature. Because certain of these items and their impact on the Company s performance are difficult to predict, management believes the presentation of financial measures excluding the impact of such items provides useful supplemental information in evaluating the operating results of the Company s core businesses. For purposes of this Quarterly Report on Form 10-Q, net income from core operations, or operating earnings, means net income adjusted to exclude after-tax net securities gains or losses. These disclosures should not be viewed as a substitute for net income determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies.

Interest and Dividend Income

Interest and dividend income for the three months ended June 30, 2010 increased \$111,000 to \$9,124,000 compared to \$9,013,000 for the same period of 2009. The increase in interest income was led by an increase in loan interest resulting from growth in the average gross loan portfolio of \$23,480,000. The growth offset a decline in the average taxable equivalent yield of 31 basis points (bp) caused by the low interest rate environment that has existed over the past year. The increase in investment portfolio income was the result of portfolio growth that offset a decline of 30 bp in yield.

During the six months ended June 30, 2010, interest and dividend income was \$18,113,000, an increase of \$183,000 over the same period in 2009. Interest income on the loan portfolio

Table of Contents

increased as the growth in the portfolio countered a 28 bp decline in average yield. The investment portfolio interest income remained steady as the increase in portfolio size was offset by a decline in yield and a reduction in dividends received. The reduced level of dividend income is the result of a decreased level of equity investment and general decline in dividends paid by the holdings in our portfolio.

Interest and dividend income composition for the three and six months ended June 30, 2010 and 2009 was as follows:

		For The Three Months Ended										
	June 30, 2010				June 30, 20	009	Change					
(In Thousands)		Amount	% Total		Amount	% Total		Amount	%

Interest Expense

Interest expense for the three months ended June 30, 2010 decreased \$674,000 to \$2,534,000 compared to \$3,208,000 for the same period of 2009. The substantial decrease associated with deposits is primarily the result of a reduction of 76 bp in rate paid and a shift from higher cost time deposits to core deposits. Factors that led to the rate decreases include, but are not limited to, Federal Open Market Committee (FOMC) interest rate actions and campaigns conducted by the Company during the past two years to attract short-term CDs resulting in an increased repricing frequency. In addition, the Marcellus Shale natural gas exploration in north central Pennsylvania is creating opportunities to create new and build upon existing deposit relationships. Short-term borrowings interest expense decreased as the average balance of such borrowings decreased with current short-term borrowings consisting solely of customer repurchase agreements. Long-term borrowing interest expense remained stable, as there have been no changes to the composition of long-term borrowings.

Interest expense for the six months ended June 30, 2010 decreased 16.9% from the same period of 2009. The reasons noted for the decline in interest expense for the three month period comparison also apply to the six month period.

Net Interest Margin

The net interest margin (NIM) for the three months ended June 30, 2010 was 4.56% compared to 4.36% for the corresponding period of 2009. The increase in the NIM was driven by a 63 bp decline in the rate paid on interest bearing liabilities that more than compensated for a 40 bp decline in the yield on interest earning assets. The decrease in earning asset yield is due to the impact on the loan and investment portfolios of the current low rate environment. The decrease in the cost of interest bearing liabilities to 1.87% from 2.50% was driven by a reduction in the rate paid on time deposits of 75 bp. The reduction in the rate paid on time deposits was the result of a shortening of the time deposit portfolio that has resulted in an increasing repricing frequency during this period of decreasing rates. The duration of the time deposit portfolio has been lengthening due to the apparent bottoming or near bottoming of deposit rates.

The NIM for the six months ended June 30, 2010 was 4.52% compared to 4.42% for the same period of 2009. The impact of the items mentioned in the three month discussion also applies to the six month period. A 77 bp decline in the rate paid on time deposits served as the foundation for a 71 bp decline in rate paid on deposits, while the FOMC and general market actions affected the yield on earning assets and cost of borrowings.

The following is a schedule of average balances and associated yields for the three and six months ended June 30, 2010 and 2009:
