Item 2.06 Material Impairments.

On September 30, 2016, Veeco Instruments Inc. decided to significantly reduce future investments in its Atomic Layer Deposition (ALD) technology development and, as a result, concluded that a material charge for impairment of its ALD assets would be required.

The impaired assets include the fast array scanning ALD technology for flexible organic light-emitting diode (OLED) and semiconductor markets acquired in connection with the acquisition of Synos Technology, Inc. on October 1, 2013. The decision to reduce future investments in ALD reflects the company's ongoing focus to balance technology investments with the potential for associated revenue realization. Although the Company has continued to make progress with ALD technology development for advanced semiconductor applications, the expected timing for revenue realization has been delayed.

In the third quarter, Veeco expects to record total asset impairment and restructuring charges of between \$56 and \$62 million, or \$1.44 to \$1.59 per share. The vast majority of these charges relate to the non-cash impairment of the intangible ALD asset. Veeco expects future cash expenditures related to the ALD impairment of between \$1 and 2 million, representing severance and other costs.

A copy of the press release announcing these matters is furnished as Exhibit 99.1 to this report.

Item 9.01 Financial Statements and Exhibits.
