Note 1 - Identification and business of Sociedad Química y Minera de Chile S.A. and Subsidiaries

Historical Background

Sociedad Química y Minera de Chile S.A. (the "Company") is a shareholders' company organized in accordance with the laws in the Republic of Chile., Taxpayer ID 93.007.000-9. The Company was constituted by public deed issued on June 17, 1968 by the Notary Public of Santiago Mr. Sergio Rodríguez Garcés. Its existence was approved by Decree No. 1.164 of June 22, 1968 of the Ministry of Finance, and it was registered on June 29, 1968 in the Business Registry of Santiago, on page 4,537 N° 1,992. The Parent Company is located at El Trovador 4285, 6th Floor, Las Condes, Santiago, Chile. Its phone No. is (56-2) 425-2000.

The Company is registered with the Securities Registry of the Chilean Superintendence of Securities and Insurance (SVS) under No. 0184 dated March 18. 1983 and is subject to the inspection of the SVS.

Our products are divided into five main categories, as follows:

Specialty plant nutrients: Specialty plant nutrients include potassium nitrate, sodium potassium nitrate, sodium nitrate and specialty mixtures. These products have particular features which increase productivity and improve quality when used in certain crops and soils and are suitable for high level agricultural techniques such as hydroponics, fertigation, greenhouses and foliar applications. Farmers dedicated to high-value crops invest in this type of specialty plant nutrients, such as, potassium nitrate, because of its technical advantages over commodity fertilizers, in particular because of being a soluble fertilizer free of chlorine.

Iodine: SQM is an important producer of iodine at a worldwide level, which is a product widely used in the pharmaceutical industry, technology and nutrition. Over the last 8 years, before the world crisis, the demand for iodine grew mainly due to its use in X-ray contrast media and polarizing film for LCD displays.

Lithium: SQM's lithium is widely used in rechargeable batteries for cell phones, cameras and notebooks and other portable electronic devices. Through the preparation of products based on lithium, SQM provides significant raw material to face great challenges such as the efficient use of energy and raw material. Lithium is not only used for rechargeable batteries and in new technologies for vehicles propelled by electricity, but is also used in industrial applications to lower melting temperature and to help saving energy and costs.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 1 - Identification and business of Sociedad Química y Minera de Chile S.A. and Subsidiaries (continued)

Industrial Chemicals: Industrial chemicals are products used as supplies for a number of production processes. SQM participates in this line of business producing sodium nitrate, potassium nitrate, boric acid and potassium chloride, Industrial nitrates have increased their importance over the last few years due to their use as storage means for thermal energy at solar energy plants, which are widely used in countries as Spain and the United States in their search for decreasing CO2 emissions

Potassium: The potassium is a primary essential macro-nutrient, and even though does not form part of the plant's structure, has a significant role for the developing of its basic functions, validating the quality of a crop, increasing post-crop life, improving the crop flavor, its amount in vitamins and its physical appearance. Within this business line, SQM has also potassium chlorate and potassium sulfate, both extracted from the salt layer located under the Atacama Salar (the Atacama Saltpeter Deposit.) In this business line SQM has focused a significant part of it investments plan, allowing a significantly increase in the Company's production levels..

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.2 Basis of preparation of interim consolidated financial statements

Interim and annual consolidated financial statements of Sociedad Química y Minera de Chile S.A. and Subsidiaries, have been prepared in accordance with International Financial Reporting Standards (hereinafter "IFRS") and represent the comprehensive, explicit and unqualified adoption of these international standards as issued by the International Accounting Standards Board (IASB).

These interim and annual consolidated financial statements reflect fairly the Company's equity and financial position and the results of its operations, changes in the statement of recognized revenue and expenses and cash flows, which have occurred during the periods then ended.

IFRS establish certain alternatives for their application. Those applied by the Company and its subsidiaries are included in detail in this Note.

The accounting policies used in the preparation of these consolidated interim and annual accounts comply with each IFRS in force at their date of presentation.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

a)

Accounting pronouncements

As of the date of these interim consolidated financial statements, the following accounting pronouncements have been issued by the IASB but their application was not mandatory and were not used by the Company:

New standard

Mandatory application by:

IFRS 9

Financial instruments

January 1, 2013

IFRS 9 "Financial instruments"

This standard introduces new requirements for the classification and measurement of financial assets, allowing its early adoption. It requires that all financial assets be classified in their entirety based on the entity's business model for the management of financial assets and the characteristics of financial assets contractual cash flows. The financial assets under this standard are measured wither at amortized cost or at fair value. Solely those financial assets which are classified as measured at amortized cost should be tested for impairment. Its application is effective for the interim periods beginning on or after January 1, 2013; early adoption is allowed for 2010 financial statements.

Improvements and Amendments application by:

IFRS 7 Financial Instruments: Disclosures July 1, 2011

IAS 12 Income Taxes January 1, 2012

IFRS 7 "Financial Instruments: Disclosures"

Amendments to IFRS 7 issued in October 2010 by the IASB include certain clarifications to disclosures in the financial statements, mainly with respect to the nature and scope of risks arising from the financial statements, as well as in respect to the interaction between quantitative and qualitative disclosures. Its application is mandatory beginning on January 1, 2011.

IAS 12 – Income Taxes

On December 20, 2010, the IASB issued the document "Income tax_ recovery of Underlying Assets (amendment to IAS 12)" which regulates the determination of deferred tax of entities using the fair value as valuation model for Investment property in accordance with IAS 40 Investment Property. In addition, the new regulation includes SIC-21 "Income Taxes – Non-depreciable Assets" in the body of IAS 12. Entities are obliged to apply the amendments in the interim years which begin on January 1, 2012.

The Company's Management believes the adoption of standards, amendments and interpretations referred to above, are under assessment and it is believed that they will have no significant impact on the Company's interim consolidated financial statements.

Los Militares 4290 Las Condes, Santiago, Chile

Tel: (56 2) 425 2000

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.3 Transactions in foreign currency

(a) Functional and presentation currency

The Company's interim and annual consolidated financial statements are presented in United States dollars, which is the Company's functional and presentation currency and is the currency of the main economic environment in which it operates.

Consequently, the term foreign currency is defined as any currency other than U.S. dollar.

The interim and annual consolidated financial statements are presented in thousands of U.S. dollars with no decimals.

The conversion of the financial statements of foreign companies with functional currency other than U.S. dollar is performed as follows:

- -Assets and liabilities using the exchange rate in force at the closing date of the interim consolidated financial statements.
 - Profit or loss account items using the average exchange rate for the period.
 - Net equity is maintained at the historical exchange rate at the acquisition date.

Foreign currency translation differences which are generated in the conversion of the financial statements are recorded under "Translation differences" in Net equity.

(b) Basis of translation

Domestic subsidiaries:

Assets and liabilities in Chilean pesos and other currencies other than the functional currency (U.S. dollars) as of March 31, 2011 and December 31, 2010 have been converted to U.S. dollars at the exchange rates prevailing at those dates (the related amounts in Chilean pesos were translated at the exchange rate of Ch\$ 479.46 per US\$1.00 as of March 31, 2011 and Ch\$468.01 per US\$1.00 as of December 31, 2010.

Amounts denominated in UF – a peso-denominated, inflation-indexed monetary unit) used to convert to Chilean pesos (U.S. dollars) the assets and liabilities expressed at that inflation-linked unit as of March 31, 2011 amounted to Ch\$21,578.26 (US\$45.01) per UF 1.00 and Ch\$21,455.55 (US\$45.84) per UF 1.00 as of December 31, 2010.

SQM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

Foreign subsidiaries:

The exchange rates used to translate monetary asset and liabilities, expressed in foreign currency as of the closing date of each period in respect of U.S. dollars, were as follows:

	03/31/2011 US\$	12/31/2010 US\$
Brazilian real	1.63	1.66
New Peruvian sol	2.80	2.81
Argentine peso	4.07	3.98
Japanese yen	83.15	81.49
Euro	0.70	0.75
Mexican peso	11.92	12.38
Australian dollar	1.03	1.01
Pound sterling	0.62	0.64
South African rand	6.79	6.63
Dollar (Ecuador)	1.00	1.00
Chilean peso	479.46	468.01
UF	45.01	45.84

(c) Transactions and balances

All differences are recorded with a charge or credit to profit loss for the period except for all the monetary items from an effective hedge of an investment abroad. These differences are recognized in comprehensive income (Equity) up to the disposal of the net investment, a time at which the effects accumulated in equity are recognized in profit or loss for the period. Deferred taxes associated with foreign currency translation differences resulting from these items are also recorded in comprehensive income (Equity) as applicable.

Non-monetary items which are stated at historical cost are translated using the historical exchange rate of the initial transaction. Non-monetary items are converted using the exchange rate as of the current date when fair value is determined.

SOM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000

www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

(d) Group entities

The profit or loss, assets and liabilities of all those entities with a currency other than the presentation currency are converted to the presentation currency as follows:

- -Assets and liabilities are converted at the closing date exchange rate on the date of the statement of financial position.
 - Revenue and expenses in each profit or loss account are converted at average exchange rates.
- -All resulting foreign currency exchange differences are recognized as a component separate in foreign currency translation difference reserves.

In consolidation, foreign currency exchange differences which arise from the conversion of a net investment in foreign entities are recorded in net equity (other reserves). At the disposal date, these exchange differences are recognized in the statement of comprehensive income as part of the loss or gain from the sale.

2.4 Basis of Consolidation

(a) Subsidiaries

Subsidiaries are all those entities on which Sociedad Química y Minera de Chile S.A. has the control to lead the financial and operating policies, which, in general, is accompanied by participation greater than half the voting rights. Subsidiaries are consolidated from the date in which control is transferred to the Company and are excluded from consolidation on the date in which this control ceases to exist. The subsidiaries apply the same policies applied by its Parent.

In order to recognize the acquisition of an investment, the Company uses the acquisition method. Under this method, the acquisition cost is the fair value of assets delivered, of equity instruments issued and of liabilities incurred or assumed at the exchange date plus costs directly attributable to acquisition. Identifiable assets acquired and identifiable liabilities and contingencies assumed in a business combination are initially stated at their fair value at the acquisition date. For each business combination the Company will measure non-controlling of the acquiree either at its fair value or as a proportional amount of the acquiree's identifiable net assets.

^(*) Agrorama Callegari Ltda. was consolidated given that the Company has the control through the subsidiary Soquimich Comercial S.A

Subsidiaries are consolidated using the line-by-line method adding the items that represent assets, liabilities, revenue and expenses with similar content eliminating the related intragroup transactions.

The results from dependant companies acquired or disposed of during the year are included in consolidated income statement accounts from the effective date of acquisition or up to the effective date of disposal, as applicable.

Interest of minority partners or shareholders (non-controlling interest) represents the part which can be assigned to them of own funds and results as of March 31, 2011 and December 31, 2010 of those companies which are consolidated using the line-by-line method and are presented as "non-controlling interest" in net equity in the attached

consolidated statement of financial position and under the line "Gain (loss) attributable to non-controlling interest in the Group's attached consolidated statement of income.

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.5 Responsibility for the information and estimates made

The information contained in these interim consolidated financial statements is the responsibility of the Company's management who expressly indicate that it has applied all the principles and criteria included in IFRS issued by the International Accounting Standard Board (IASB.)

In the Company's interim consolidated financial statements judgments and estimates have been made by management to quantify certain assets, liabilities. Income, expenses and commitments recorded therein. Basically these estimates refer to the following:

- The useful lives of material and intangible assets and their residual values.
 - Impairment losses of certain assets, including trade receivables.
- -Hypotheses used for the actuarial calculation of commitments related to pensions and staff severance indemnities.
 - Provisions for commitments acquired with third parties and contingent liabilities.
- -Accrued expenses based on technical studies which cover the different variables which affect products in stock (density, humidity, among others) and allowances on slow-moving spare parts in inventories.
 - Future costs for the closure of mining facilities.
 - The determination of fair value of certain financial and non-financial assets and derivative instruments.
 - The determination and allocation of fair values in business combinations.

Although these estimates have been made considering the best possible information available on the date of preparation of these interim financial statements it is possible that events which may occur in the future obligate their modification (increases or decreases) in the next few years, which would be performed prospectively, recognizing the effects of change in estimates on the respective future interim consolidated financial statements.

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.6 Financial information by operating segment

IFRS 8 requires that companies adopt "the management approach" to disclose information on the result of its operating segments. In general, this is the information that management uses internally for the evaluation of segment performance and making the decision on how to allocate resources for this purpose.

A business segment is a group of assets and operations responsible for providing products or services subject to risks and performance different that those of other business segments. A geographical segment is responsible for providing products or services in a given economic environment subject to risks and performance different that those of other segments which operate in other economic environments.

For assets and liabilities the assignment to each segment is not possible given that these are associated to more than one segment.

Accordingly, the following business segments have been identified for the Company:

Specialty plant nutrients
 Industrial chemicals
 Iodine and derivatives
 Lithium and derivatives
 Potassium
 Other products and services

2.7 Property, plant and equipment

Tangible fixed assets are stated at acquisition cost, net of the related accumulated amortization and impairment losses which they have experienced.

In addition to the price paid for the acquisition of tangible fixed assets, the Company has considered the following concepts as part of the acquisition cost, as applicable:

1. Accrued financial expenses during the construction period which are directly attributable to the acquisition, construction or production of qualifying assets, which are those that require a substantial period prior to being ready for use. The interest rate used is that related to the project's specific financing or, should this not exist, the average financing rate of the investor company. The amount capitalized for this concept was ThUS\$5,233 as of March 31, 2011 and ThUS\$25,947 as of December 31, 2010.

SQM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2The present value of future costs to which the Company will have to experience related to the closure of its facilities, are included in the asset's value at restated cost.

Work-in-progress is transferred to property, plant and equipment in operation once they are available for use beginning the related amortization on that date.

Extension, modernization or improvement costs which represent an increase in productivity, ability or efficiency or an extension of the useful lives of property, plant and equipment are capitalized as a higher cost of the related assets. All the remaining maintenance, preservation and repair expenses are charged to income as cost of the year in which they are incurred.

The replacement of full assets which increase the asset's useful life or its economic capacity, are recorded as a higher value of property, plant and equipment with the related derecognition of replaced or renewed elements.

Based on the impairment analysis conducted by the Company's management has been considered that the carrying value of assets do not exceed the net recoverable value of these assets.

Property, plant and equipment, net in the case of their residual value, are amortized through the straight-line distribution of cost among the estimated technical useful lives which constitute the period in which the Company expects to use them. When portions of a property, plant and equipment item have different useful lives, these are recorded as separate items. The useful life is reviewed on a regular basis (annually).

SQM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

The useful lives used for the depreciation of assets included in property, plant and equipment are presented below.

Classes of property, plant and equipment	Life or Minimum rate	Life or Maximum rate
Life or rate for buildings	3	60
Life or rate for plant and equipment	3	35
Life or rate for information technology equipment	3	10
Life or rate for fixtures and accessories	3	35
Life or rate for motor vehicles	5	10
Life or rate for other property, plant and equipment	2	30

The gains or losses which are generated in the sale or disposal of property, plant and equipment are recognized as income for the period and calculated as the difference between the asset's sales value and its net carrying value.

The Company obtains property rights and mining concessions from the Chilean State. Property rights are obtained usually without any initial cost (other than the payment of mining licenses and minor registration expenses) and when rights are obtained on these concessions, the Company retains them while it pays the related interim licenses. Such license fees, which are paid on an annually, are recorded as prepaid assets and amortized over the following twelve months. Amounts attributable to mining concessions acquired from third parties, which are not from the Chilean State are recorded at their acquisition cost in property, plant and equipment.

Costs arising from daily maintenance activities of property, plant and equipment are recognized in profit or loss as and when incurred.

2.8 Investment properties

The Company recognizes as investment properties the net values of land, buildings and other constructions which are held to exploit them under lease agreements or to obtain proceeds from their sale as a result of those increases which are generated in the future in the respective market prices. These assets are not used in the activities and are not destined for own use.

They are initially stated at their acquisition cost, which includes the acquisition price or production cost plus directly assignable expenses. Subsequently, investment properties are stated at their acquisition cost less accumulated depreciation and the possible accumulated provisions for value impairment.

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.9 Inventories

The Company states inventories for the lower of cost and net realizable value. The cost price of finished products and products in progress includes direct costs of materials and; as applicable, labor costs, indirect costs incurred to transform raw materials into finished products and general expenses incurred in carrying inventories to their current location and conditions. The method used to determine the cost of inventories is weighted average cost.

The net realizable value represents the estimate of the sales price less all finishing estimated costs and costs which will be incurred in commercialization, sales and distribution processes.

Commercial discounts, rebates obtained and other similar entries are deducted in the determination of the acquisition price.

The Company conducts an evaluation of the net realizable value of inventories at the end of each year recording an estimate with a charge to income when these are overstated. When the circumstances, which previously caused the rebate ceased to exist, or when there is clear evidence of an increase in the net realizable value due to a change in the economic circumstances or prices of main raw materials, the estimate made previously is modified.

The valuation of obsolete, impaired or slow-moving products relates to their net estimated net realizable value.

Provisions on the Company's inventories have been made based on a technical study which covers the different variables which affect products in stock (density, humidity, among others.)

Raw materials, supplies and materials are recorded at the lower of acquisition cost or market value. Acquisition cost is calculated according to the annual average price method.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.10

Trade and other receivables

Trade and other receivables relate to non-derivative financial assets with fixed payments which can be determined and are not quoted in any active market. These arise from sales operations involving the products and/or services which the Company commercializes directly to its customers with no intention of negotiating the account receivable and are not within the following categories:

- Those which the Company has the intention of selling immediately in the near future and which are held-for-sale.
- Those designated at their initial recognition as available-for-sale...
- Those which do not allow that the holder recovers substantially all its initial investment due to circumstances other than credit impairment, which will be classified as available-for-sale.

These assets are initially recognized at their fair value (which is equivalent to their face value, discounting implicit interest for installment sales) and subsequently at amortized cost according to the effective interest rate method less a provision for impairment loss. An allowance for impairment loss is established for trade receivables when there is objective evidence that the Company will not be able to collect all the amounts which are owed to it according to the original terms of receivables.

Embedded interest in installment sales is recognized as financial income when interest is accrued over the term of the operation.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.11

Revenue recognition

Revenue includes the fair value of considerations received or receivable or the sale of goods and services during performance of the Company's activities. Revenue is presented net of value added tax, returns, rebates and discounts and after the elimination of sales among subsidiaries.

Revenue is recognized when its amount can be stated reliably, it is possible that the future economic rewards flow to the entity and the specific conditions for each type of activity -related revenue are complied with, as follows:

(a)

Sale of goods

Sales of goods are recognized when the Company has delivered products to the customer, the customer has total discretion on the distribution channel and the price at which products are sold and there is no obligation pending compliance which may affect the acceptance of products by the customer. The delivery does not occur until products have been shipped to the customer or confirmed as received by customers when the related risks of obsolescence and loss have been transferred to the customer and the customer has accepted products in accordance with the conditions established in the sale, the acceptance period has ended or there is objective evidence that those criteria required for acceptance have been met.

Sales are recognized in consideration of the price set in the sales agreement, net of volume discounts and estimated returns at the date of the sale. Volume discounts are evaluated in consideration of interim foreseen purchases and in accordance with the criteria defined in agreements.

(b)

Sales of services

Revenue associated with the provision of services is recognized considering the degree of completion of the service at the date of presentation of the Statement of financial position provided that the result from the transaction can be estimated reliably.

SQM

Los Militares 4290 Las Condes, Santiago, Chile

Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

(c) Interest income

Income is recognized as and when interest is accrued in consideration of the principal which is pending payment using the effective interest rate method.

(d) Income from royalties

Income from royalties is recognized based on the accrual in accordance with the economic substance of the related agreements.

(e) Income from dividends

Income from dividends is recognized when the right to receive the payment is established.

2.12 Investments recognized using the equity method

Interest in companies in which control is exercised together with another company (joint venture) or in which the Company has significant influence (associated companies) are recorded using the equity method. Significant influence is assumed to exist when the Company has interest exceeding 20% of the investee's equity.

Under this method, the investment is recognized in the statement of financial position at cost plus changes subsequent to the acquisition in an amount proportional to the net associated company's equity using the ownership interest in the associate. The associated goodwill is included at the carrying value of the investee and it is not subject to amortization. The debit or credit to profit or loss reflects the proportional amount in the associated company's results.

Unrealized gains for transactions with affiliates or associates are eliminated considering the equity interest by the Company in them. Unrealized losses are also eliminated except if the transaction provides evidence of impairment loss of the asset transferred.

Changes in equity of the associates are recognized proportionally with a debit or credit to "Other reserves" and classified according to their origin.

The associate's and the Company's reporting dates and policies are similar for equivalent transactions and events under similar circumstances.

In the event that significant influence is lost or the investment is sold or is available-for-sale, the equity value method is discontinued suspending the recognition of proportional results.

SQM

Los Militares 4290 Las Condes, Santiago, Chile

Tel: (56 2) 425 2000

www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

If the resulting amount according to the equity method were negative, interest is reflected as zero in the interim consolidated financial statements unless the Company commits to resolve its equity position. In this case, the respective provision for risks and expenses is recorded.

Dividends received in these companies are recorded reducing the equity value and proportional profit or loss recognized in conformity with their interest, are included in the consolidated profit or loss under the caption "Equity gain (loss) in companies and joint ventures using the equity method."

2.13 Income tax and deferred taxes

Income tax expense for the year is determined as the addition of current tax from the different companies resulting from the application of the type of local tax on the taxable income for each of them. Differences between the book value of assets and liabilities and their tax basis generate the balance of deferred tax assets or liabilities which are calculated using the tax rates which are expected to be applicable when assets and liabilities are realized.

In conformity with current Chilean tax regulations, the provision for corporate income tax and taxes for the mining activity is recognized on an accrual basis presenting the net balances of accumulated monthly tax provisional payments for the fiscal period and credits associated with it. The balances of these accounts are presented in Current tax assets or liabilities, as applicable.

Tax on companies and variations on deferred tax assets or liabilities which are not the result of business combinations are recorded in profit or loss statement accounts or net equity accounts in the Consolidated Statement of Financial Position considering the origin of the gains or losses which have generated them.

At the end of each reporting period, the carrying value of deferred tax assets is reviewed and reduced as long as it is possible that there is no sufficient taxable income to allow the recovery of all or a portion of the deferred tax asset. Likewise, at the date of the statement of financial position deferred tax assets not recognized are revalued and recognized as long as it has become possible that future taxable income will allow the recovery of the deferred tax asset.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

With respect to temporary differences deductible associated with investments in subsidiaries, associated companies and interest in joint ventures, deferred tax assets are recognized solely provided that there is a possibility that temporary differences are reversed in the near future and that there will be taxable income with which they may be used.

The deferred income tax related to entries directly recognized in equity is recognized with an effect on equity and not with an effect on profit or loss.

Deferred tax assets and liabilities are offset if there is a right legally receivable of offsetting tax assets against tax liabilities and the deferred tax is related to the same tax entity and authority.

2.14

Earnings per share

The net benefit per share is calculated as the ratio between the net benefit for the period attributable to the Parent Company and the weighted average number of common shares of the Parent Company in circulation during this period.

The Company has not conducted any type of operation of potential diluted effect which assumes a diluted benefit per share other than the basic benefit per share.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.15

Non-financial asset value impairment

Assets subject to amortization are subject to test for impairment provided that an event or change in the circumstances indicates that the amounts in the accounting records may not be recoverable. An impairment loss is recognized for the excess of amount in books of the asset over its recoverable amount.

The recoverable amount of an asset is the higher between the fair value of an asset or cash generating unit ("CGU") less costs of sales and its value in use and is determined for an individual asset unless the asset does not generate any cash inflows which are clearly independent from other assets or groups of assets.

When the carrying value of an asset exceeds its recoverable amount the asset is considered an impaired asset and is reduced to its net recoverable amount.

In evaluating value in use, estimated future cash flows are discounted using a discount rate before taxes which reflects current market evaluation on the time value of money and specific asset risks.

An appropriate valuation model is used to determine the fair value less selling costs. These calculations are confirmed by valuation multiples, quoted share prices for subsidiaries quoted publicly or other available fair value indicators.

Impairment losses from continuing operations are recognized with a debit to profit or loss in the categories of expenses associated with the impaired asset function, except for properties reevaluated previously where the revaluation was taken to equity. In this case impairment is also recognized with a debit to equity up to the amount of any previous revaluation.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

For assets other than the goodwill acquired, an annual evaluation is conducted of whether there are impairment loss indicators recognized previously which might have already ceased to exist or decreased. The recoverable amount is estimated if such indicators exist. An impairment loss previously recognized is reversed only if there have been changes in estimates used to determine the asset's recoverable amount from the last time in which an impairment loss was recognized. If this is the case, the carrying value of the asset is increased to its recoverable amount. This increased amount cannot exceed the carrying value which would have been determined net of depreciation if an asset impairment loss would have not been recognized in prior years. This reversal is recognized with a credit to profit or loss unless an asset is recorded at the revaluated amount. Should this be the case, the reversal is treated as an increase in revaluation.

2.16 Financial assets

SQM S.A. and subsidiaries classify their financial statements under the following categories: at fair value through profit or loss, loans and receivables, financial assets held-to-maturity and financial assets available-for-sale. The classification depends on the purpose with which financial assets were acquired. Management determines the classification of its financial assets at the time of initial recognition.

At each reporting date, the Company assesses whether there is objective evidence that an asset or group of financial assets is impaired or has been impaired. An asset or group of financial assets is impaired if and only if, there is objective evidence of impairment as a result of one or more events occurred after the initial recognition of the asset or group of assets. The recognition of impairment necessitates that the loss event has an impact on the estimate of the future cash flows from the asset or group of financial assets.

(a) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are financial assets held for trading. A financial asset is classified in this category if it is acquired mainly with the purpose of being sold in the short-term. Derivatives are also classified as acquired for trading unless they are designated as hedge accounting. Assets under this category are classified as current assets and variations generated in fair value are directly recognized in profit or loss.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

(b) Loans and receivables

Loans and accounts receivable are non-derivative financial assets with fixed payments or payments which can be determined and are not quoted in any active market. These are included in current assets, except for those with expiration dates which exceed 12 months from the closing date which are classified as non-current assets. Loans and receivables are included under the caption "Trade and other receivables" in the Statement of financial position and are stated at amortized cost. The subsequent measurement at amortized cost I used for its calculation the effective interest rate less impairment.

(c) Financial assets held-to-maturity

Financial assets held-to-maturity are non-derivative financial assets with fixed payments or payments which can be determined and fixed expiration dates which management has the positive intention and ability of holding to maturity. If an amount which was not insignificant of financial assets held to maturity was sold, the full category would be reclassified as available for sale. Assets in this category are stated at amortized cost.

(d) Financial assets available for sale

Financial assets available for sale are non-derivative instruments which are designated in this category or are not classified in any of the other categories. They are included in non-current assets unless the Company intends to dispose of the investment in the 12 months following the closing date. These assets are stated at fair value recognizing under other reserves those variations in fair value, if any.

2.17 Financial liabilities

The Company classifies its financial liabilities under the following categories: at fair value through profit or loss, trade payables, interest-bearing loans or derivatives designated as hedging instruments.

The Company's management determines the classification of its financial liabilities at the time of initial recognition.

Financial debt obligations are recorded at nominal amount as non-current when its expiration term exceeds twelve months and as current when it is lower than that term. Interest expenses are computed in the year in which they are accrued following a financial criterion.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

In conformity with IAS 32 and IAS 39, borrowing costs are recorded in the attached Consolidated Statement of Financial Position discounting the associated debt and are debited to profit or loss for the year in the same term that the debt using the effective interest rate method.

Financial liabilities are derecognized when the obligation is repaid, settled or it expires.

(a) Financial liabilities at fair value through profit or loss

Financial liabilities are classified at fair value when these are held for trading or designated in their initial recognition at fair value through profit or loss. This category includes derivative instruments not designated for hedge accounting.

(b) Trade payables

Trade payables to suppliers are subsequently stated at their amortized cost using the effective interest rate method.

(c) Interest-bearing loans

Loans are subsequently stated at amortized cost using the effective interest rate method. Amortized cost is calculated considering any premium or discount from the acquisition and includes costs of transactions which are an integral part of the effective interest rate.

SQM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000

www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.18 The Environment

In general, the Group companies follow the criterion of considering amounts destined to environmental protection and improvement as environmental expenses. However, amounts of elements included in facilities, machinery and equipment destined to the same purpose are considered property, plant and equipment as the case may be.

2.19 Minimum Dividend

As required by the Shareholders' Company Act unless otherwise decided by the shareholders through unanimous vote of the holders of those shares issued and subscribed, a public shareholders' company must distribute a minimum dividend of 30% of its profit for the period, except in the event that the Company has losses not absorbed in prior years.

2.20 Consolidated statement of cash flows

Cash equivalents relate to short-term highly liquid investments which are readily convertible into known amounts of cash are subject to low risk of change in their value and expire in less than three months from the date of acquisition of the instrument.

For the purposes of the preparation of the statement of cash flows, cash has been defined as cash and cash equivalents as defined above.

The statement of cash flows includes cash movements performed during the year determined by the indirect method.

In these statements of cash flows, the following expressions are used in the sense which is shown as follows:

-Cash flows: cash and financial asset equivalent inflows and outflows understanding as such those short-term highly-liquid investments with low risk of change in their value.

SQM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011 Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

- -Operating activities: common activities related to the operation of the Group's business as well as other activities which cannot be classified as investing or financing activities.
- -Investing activities: investing activities relate to the acquisition, disposition or disposal related to other long-term assets and other investments not included in cash and cash equivalents.
- -Financing activities: activities which generate changes in the size and composition of net equity and of liabilities which are not part of operating activities.
 - 2.21 Obligations related to staff severance indemnities and pension commitments

Obligations with the Company's employees are in accordance with that established in the collective bargaining agreements in force formalized through collective employment agreements and individual employment contracts, except for the United States, which is regulated by employment pensions plans.

These obligations are valued using the actuarial calculation, which considers such hypotheses as the mortality rate, employee turnover, interest rates, retirement dates, effects related to increases in employees' salaries, as well as the effects on variations in services derived from variations in the inflation rate.

Actuarial losses and gains which may be generated by variations in previously defined obligations are directly recorded in profit or loss.

Actuarial losses and gains have their origin in deviations between the estimate and the actual behavior of actuarial hypotheses or in the reformulation of those actuarial hypotheses established.

The discount rate used by the Company for the calculation of the obligation was 6% for the periods ended as of March 31, 2011 and December 31, 2010.

Our subsidiary SQM North America has established with its employees pensions plans for retired employees, which are calculated measuring the forecasted liability for expected future severance indemnities using the salary progression rate net of adjustments for inflation, mortality and turnover assumptions discounting the amount resulting at the present value using an interest rate of 6.5% for 2010 and 2009. The net balance of this liability is presented under non-current provisions for employee benefits.

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.22 Financial derivatives and hedging transactions

Derivatives are recognized initially at fair value at the date in which the derivatives contract has been signed and subsequently they are valued again at fair value. The method for recognizing the resulting loss or gain depends on whether the derivative has been designated as an accounting hedging instrument and, if so, depends on the type of hedging performed by the Company, which may be as follows:

- (a) Fair value hedge of assets and liabilities recognized (fair value hedges);
- (b) Hedging of a single risk associated with an asset or liability recognized or a highly possible foreseen transaction (cash flow hedge);

At the beginning of the transaction, the Company documents the relationship existing between hedging instruments and those entries hedged, as well as their objectives for risk management purposes and the strategy to conduct different hedging operations.

The Company also documents its evaluation both at the beginning and the end of each period of whether derivatives which are used in hedging transactions are highly effective to offset changes in the fair value or in cash flows of hedged entries.

The fair value of derivative instruments used for hedging purposes is shown in Note 8.3 (Hedging assets.) Movements in the hedging operation reserve are classified as a non-current asset or liability if the remaining expiration period of the hedged entry is higher than 12 months and as a current asset or liability if the remaining expiration period of the entry is lower than 12 months.

Investment derivatives are classified as a current asset or liability and the change in their fair value is recognized directly in profit or loss.

(a) Fair value hedge

The change in the fair value of a derivative is recognized with a debit or credit to profit or loss, as applicable. The change in the fair value of the hedged entry attributable to hedged risk is recognized as part of the carrying value of the hedged entry and is also recognized with a debit or credit to profit or loss.

SQM

Los Militares 4290 Las Condes, Santiago, Chile

Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

For fair value hedging related to items recorded at amortized cost, the adjustment of the fair value is amortized against income on the remaining year to its expiration. Any adjustment to the carrying value of a hedged financial instrument for which effective rate is used is amortized with a debit or credit to profit or loss at its fair value attributable to the risk being covered.

If the hedged entry is derecognized, the fair value not amortized is immediately recognized with a debit or credit to profit or loss.

(b) Cash flow hedge

The cash portion of gains or losses from the hedging instrument is initially recognized with a debit or credit to other reserves whereas any non-cash portion is immediately recognized with a debit or credit to profit or loss. as applicable.

Amounts taken to equity are transferred to profit or loss when the hedged transaction affects profit for the period as when the hedged finance income or expense is recognized when a forecasted sale occurs. When the hedged entry is the cost of a non-financial asset or liability, amounts recorded in other reserves are transferred to the initial carrying value of the non-financial asset or liability.

Should the expected firm transaction or commitment not longer be expected to occur, the amounts previously recognized in equity are transferred to profit or loss. If a hedging instrument expires is sold, finished, and exercised without any replacement or a rollover is performed or if its designation as hedging is revoked. Amounts previously recognized in other reserves are maintained in equity until the expected firm transaction or commitment occurs.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.23 Lease

(a) Leases - Finance lease

Leases are classified as finance leases when the Company has substantially all the risks and rewards derived from the ownership. Finance leases are capitalized at the beginning of the lease at the lower of the fair value of the leased asset or the present value of minimum lease payments.

Each lease payment is distributed between the liability and financial debt to obtain ongoing interest type on the debt pending balance. The respective lease obligations, net of financial debt, are included in other non-current liabilities. The interest element of finance cost is debited in the statement of comprehensive income during the lease period so that a regular ongoing interest rate is obtained on the remaining balance of the liability for each year. The asset acquired through a finance lease is subject to depreciation over the lower of its useful life or the life of the agreement.

(b) Lessee – Operating lease

Leases in which the lesser maintains a significant part of risks and rewards derived from the ownership are classified as operating leases. Operating lease payments (net of any incentive received from the lesser) are debited to the statement of comprehensive income or capitalized (as applicable) on a straight-line basis over the lease period.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

2.24

Exploration and assessment expenses

Those exploration and assessment expenses associated with mineral reserves which are being exploited are included under Inventories and amortized according to the estimated mineral content reserves. Expenses associated with future reserves are presented under Other non-current non-financial assets as and when minerals included in the future reserve have ore-grade which makes the mining property economically exploitable.

Those expenses incurred on properties in which the product has low ore-grade which is not economically exploitable, are directly debited to profit or loss.

2.25 Other provisions

Provisions are recognized when:

- * The Company has a present obligation as a result of a past event.
- * It is possible that certain resources are used, including benefits, to settle the obligation.
 - * A reliable estimate can be made of the obligation amount.

In the event that the provision or a portion of it is reimbursed, the reimbursement is recognized as a separate asset solely if there is certainty of income.

In the statement of comprehensive income, the expense for any provision is presented net of any reimbursement.

Should the effect of the time value of money be significant, provisions are discounted using a discount rate before taxes which reflects the liability's specific risks. When a discount rate is used, the increase in the provision over time is recognized as a finance cost.

The Company's policy is maintaining accruals to cover risks and expenses based on a better estimate to deal with possible or certain and quantifiable responsibilities from litigation in force, compensations or obligations, pending expenses the amount of which has not been determined, collaterals and other similar guarantees for which the Company is responsible. These are recorded at the time in which the responsibility or the obligation which determines the compensation or payment is generated.

Los Militares 4290 Las Condes, Santiago, Chile

Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

The Company determines and recognizes the cost related to employee vacation on an accrual basis.

As a result of this policy, the Company has recorded accruals for:

- -Employee vacation: The Company determines and recognizes the cost related to employee vacation on an accrual basis.
- -Employee benefits agreed with employees other than staff severance indemnities and option plan, which the Company and its subsidiaries will have to pay to its employees by virtue of the agreements entered have been recognized on an accrual basis.
 - Legal expenses related to the estimate of future payments for lawsuits maintained with third parties.

2.26

Compensation Plans

Compensation plans implemented through benefits in share-based payments settled in cash, which have been provided are recognized in the financial statements at their fair value, in accordance with International Financial Reporting Standard No. 2 "Share-based payments." Variations in the fair value of options granted are recognized with a charge to remuneration on a straight-line basis during the period between the date in which these options are granted and the payment date. (See Note 16).

2.27

Good and service insurance expenses

Payments for the different insurance policies which the Company contracts are recognized in expenses considering the proportional amount related to the time that they cover, regardless of payment terms. Amounts paid and not consumed are recognized as prepaid expenses within Current assets.

Costs of claims are recognized in profit or loss immediately after being known, net of the recoverable amounts from Insurance Companies. Recoverable amounts are recorded as an asset reimbursable from the Insurance Company under "Trade and other receivables", calculated as established in the respective insurance policies.

2.28

Intangible Assets

Intangible assets mainly relate to goodwill acquired, water rights, broadcasting rights, trademarks, and rights of way related to electric lines and development expenses, and computer software licenses.

(a)

Goodwill acquired

Goodwill acquired represents the excess in acquisition cost on the fair value of them Company's ownership on the net identifiable assets of the subsidiary on the acquisition date. Goodwill acquired related to acquisitions of subsidiaries is included in intangible assets, which is subject to value impairment tests every time that the Company issues interim consolidated financial statements and is stated at cost plus accumulated impairment losses. Gains and losses related to the sale of an entity include the carrying value of goodwill related to the entity sold.

This intangible asset is assigned to cash generating units with the purpose of testing impairment losses. It is allocated based on cash generating units which are expected to obtain benefits from the business combination from which the aforementioned goodwill acquired arose.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 2 - Bases of presentation of interim consolidated financial statements and accounting criteria applied (continued)

(b) Water rights

Water rights acquired by the Company relate to the water from natural sources and are recorded at acquisition cost. Given that these assets represent rights granted on a perpetual basis to the Company, these are not amortized. However, they are subject to an impairment assessment on an annual basis.

(c) Right of way for electric lines

As required for the operation of industrial plants, the Company has paid rights of way in order to install wires for the different electric lines in third party land. These rights are presented under Intangible assets. Amounts paid are capitalized at the date of the agreement and charged to income according to the life of the right of way.

(d) Computer software

Licenses for IT programs acquired are capitalized based on costs which have been incurred to acquire them and prepare them to use the specific program. These costs are amortized over their estimated useful lives.

Expenses related to the development or maintenance of IT programs are recognized as an expense as and when incurred. Costs directly related to the production of unique and identifiable IT programs controlled by the Group and which probably will generate economic benefits which are higher than costs during more than a year, are recognized as intangible assets. Direct costs include expenses incurred for employees who develop IT programs and an adequate percentage of general expenses.

The costs of development of IT programs recognized as assets are amortized over their estimated useful lives.

2.29 Research and development expenses

Research and development expenses are debited to profit or loss in the period in which the disbursement is made except for property, plant and equipment acquired to be used in research and development, which are recognized in accounting under the respective item within property, plant and equipment.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 3 – Financial Risk Management

3.1 Risk Management Policy

The Company's Risk Management Strategy is focused on safeguarding the Company and its subsidiaries' stability and sustainability with respect to those relevant financial uncertainty components.

The Company's operations are subject to certain risk factors which may affect its financial position or results. The most significant among these are market, liquidity, exchange rate, uncollectible and interest rate risks.

There may be additional risks affecting the Company's trading operations, its business, financial position or results, which are not significant through the present date.

The financial risk management structure includes the identification, determination, analysis, quantification, measurement and control of these events. The Company's management and, in particular, the Finance Management is responsible for the ongoing evaluation of financial risk. The Company uses derivatives to hedge a significant portion of these risks.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 3 – Financial Risk Management (continued)

3.2 Risk Factors

3.2.1 Market risk

Market risks relate to those uncertainties associated with variations in market variables affecting the Company's assets and liabilities among which we may highlight the following:

- a) Country Risk: The economic condition of countries where the Company operates may affect its financial position. For instance, sales by the Company to emerging markets expose it to risks related to economic conditions and trends in those countries. In addition, inventory levels may also be affected by the economic condition in these countries and/or the global economy, among other possible economic impacts.
- b) Price volatility risk: The Company's product prices are affected by variations in international prices of fertilizers and chemicals and changes in production capacities or in the demand for these might affect our business, financial condition and results from operations.
- c)Commodity price risk: The Company is exposed to changes in prices of raw materials and energy which may have an impact on its production costs and generate unstable results.

Currently, the Company incurs annual direct expenses of approximately US\$ 70 million for fuels, gas and equivalents and approximately US\$50 million for direct use of electric energy. Variations of 10% in the prices of energy required for the Company's activities may give rise to variations of US\$12 million in costs.

3.2.2 Uncollectibility Risk

As evidenced by the last financial crisis, the global economic downturn and its potential negative effects on the financial position of our customers may extend the terms for the payment of accounts receivable. may increase our bad debt exposure. Although we take steps to minimize risk, this global economic situation may result in losses which might have a material adverse effect on our business, financial condition or results of operations.

In order to mitigate these risks, the Company uses such actions as the use of credit insurance, letters of credit and advance payments for a portion of trade receivables.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000

www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 3 – Financial Risk Management (continued)

3.2.3

Exchange rate risk

As a result of the influence in the determination of price levels, its relationship to selling costs and given that a significant portion of the Company's business is traded in that currency, the Company has defined U.S. dollar as its functional currency. However, the global nature of the Company's business generates exposure to exchange rates of different currencies with respect to U.S. dollars. Accordingly, the Company maintains hedging agreements to cover its main uncovered positions (net assets from liabilities) in currencies other than U.S. dollar against the variation in the exchange rate and regularly updates these agreements depending on the uncovered position to be hedged in those currencies.

A significant portion of the Company's costs, especially payroll, relates to Chilean peso. Accordingly, an increase or decrease in the exchange rate for U.S. dollar would affect the Company's profit o loss. Approximately between US\$ 350 million and US\$370 million of the Company's costs relate to Chilean pesos which are hedged by operations in derivative instruments covering the unhedged position of balance in this currency.

As of December 31, 2010, the Company had derivative instruments classified as exchange and interest rate hedges associated with all the Company's obligations related to bonds payable denominated in Chilean pesos and UF, for a fair value of US\$97.5 million. As of March 31, 2011, this balance amounts to US\$83.4 millions both in favor of SQM.

As of March 31, 2011, the exchange rate for U.S. dollar was Ch\$ 479.46 per US\$1.00 and Ch\$ 468.01 per US\$1.00 as of December 31, 2010.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 3 – Financial Risk Management (continued)

3.2.4 Interest rate risk

Interest rate fluctuations, mainly due to the uncertainty related to the future market behavior may have a material impact on the Company's financial statements.

The Company has short and current and non-current financial debt valued at LIBOR + a spread. The Company is subject to fluctuations in such a rate as it does not currently have any derivative instruments to hedge variations in the LIBOR rate.

As of March 31, 2011, the Company has approximately 19% of its financial obligations valued at LIBOR rate and therefore, significant increases in this rate might have an impact on its financial condition. A 100 base point variation on this rate may result in variations in finance costs close to an annual amount of US\$ 2.2 million. However, it is actually significantly offset by the returns from the Company's investments which are also highly related to the LIBOR rate.

Additionally, as of March 31, 2011, on total financial debt principal, the Company maintains a percentage near 12% expiring in less than 12 months, decreasing its exposure to interest rate variations.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000

www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 3 – Financial Risk Management (continued)

3.2.5 Liquidity risk

Liquidity risk is related to the needs for funds to deal with payment obligations. The Company's objective is maintaining financial flexibility through a comfortable balance between fund requirements and cash flows from normal operating activities, bank loans, public bonds payable, short-term investments and marketable securities, among others.

The Company maintains a significant capital expenditure program which is subject to risks and uncertainties. Mainly the exploration and exploitation of reserves, mining and processing costs and compliance with applicable standards, require significant capital which are subject to variations throughout time.

In addition, world financial markets are subject to downturn and expansion periods, which cannot be foreseen at long-term and may affect access to financial resources by the Company.

These factors may have a material adverse impact on our business, financial condition and the Company's results of operations.

Accordingly, conducts an ongoing follow-up of the reconciliation of its investments and as part of its risk management strategy, looks after the expiration dates of both from a conservative perspective. As of March 31, 2011, the Company had unused credit facilities available for a total of US\$637 million and additional credit facilities committed of US\$40 million, available should it require any additional fund.

The other cash and cash equivalents position generated by the Company is invested in highly liquid mutual fund units with AAA risk rating.

3.3 Risk Measurement

The Company has methods to measure the effectiveness and efficiency of risk strategies both in prospective and retrospective manner. These methods are consistent with the Group's risk management profile.

SQM

Los Militares 4290

Las Condes, Santiago, Chile

Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 6 - Inventories

The composition of inventories at each period-end is as follows:

Class of inventories	03/31/2011 ThUS\$	12/31/2010 ThUS\$
Raw materials	7,027	7,120
Supplies for production	23,886	21,398
Products-in-progress	303,425	291,536
Finished products	291,001	285,047
Total	625,339	605,101

Inventory provisions recognized as of March 31, 2011 amount to ThUS\$60,899 and as of December 31, 2010 amounted to ThUS\$63,597. Provisions have been made based on a technical study which covers the different variables which affect products in stock (density, humidity, among others.) Additionally, provisions have been recognized for goodwill in the sale of products and inventory difference.

As of March 31, 2011, the amount recognized as expense in the statement of comprehensive income is ThUS\$223,417 and as of March 31, 2010 is ThUS\$200,943.

The breakdown of these provisions is as follows:

Class of inventories	03/31/2011	12/31/2010
	ThUS\$	ThUS\$
D (11	1 002	1.002
Raw materials	1,093	1,093
Supplies for production	-	-
Products-in-progress	37,519	43,115
Finished products	22,287	19,389
Total	60,899	63,597

The Company has not pledged inventories as collateral for the periods indicated above.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 7 – Related Parties: Disclosures

7.1 Disclosures on related parties

Balances pending at year-end are not guaranteed, accrue no interest and are settled in cash. No guarantees have been delivered or received for trade and other receivables due from related parties or trade and other payables due to related parties. For the period ended March 31, 2011, the Group has not recorded any impairment in receivables related to amounts owed by related parties. This evaluation is conducted every year through an examination of the financial position of the related party in the market in which it operates.

7.2 Relationships between the parent company and the entity

According to that provided in the by-laws of SQM S.A., no shareholder can concentrate more than 32% of the Company's voting right capital.

Sociedad de Inversiones Pampa Calichera S.A. and Global Mining Investments (Chile) S.A. and collectively, the Pampa Group, are the owners of a number of shares which is equivalent to 29.44% as of March 31, 2011 of the current total amount of shares issued, subscribed and paid of SQM S.A. In addition, Kowa Company Ltd., Inversiones La Esperanza (Chile) Limitada, Kochi S.A. and La Esperanza Delaware Corporation, collectively Kowa Group, are the owners of a number of shares equivalent to 2.08% of the total amount of shares issued, subscribed and paid of SQM S.A.

The Pampa Group and the Kowa Group have informed SQM S.A., the Chilean SVS and the pertinent stock exchanges in Chile and abroad that they are not and have never been related parties between them. In addition, this is regardless of the fact that both Groups on December 21, 2006 have subscribed a joint venture agreement with respect to those shares. Consequently, the Pampa Group, by itself, does not concentrate more than 32% of voting right capital of SQM S.A. and the Kowa Group does not concentrate by itself more than 32% of voting right capital of SQM S.A.

Likewise, the joint venture agreement has not transformed the Pampa Group and the Kowa Group in related companies between them. The joint venture agreement has only transformed the current controller of SQM S.A. composed of the Pampa Group and the Kowa Group into related parties of SQM S.A.

7.8 Board of directors and senior management

1) Board of Directors

SQM S.A. is managed by a Board of Directors which is composed of eight regular directors who are elected for a four-year period. The present Board of Directors was elected by the shareholders at the Ordinary Shareholders' Meeting of April 30, 2008.

As of March 31, 2011, the Company has an Audit Committee which is composed of three members of the Board of Directors. This Committee performs those duties provided in Article 50 bis of Law No. 18,046, the Public Company Act.

During the periods covered by these financial statements, there are no pending balances receivable and payable between the Company, its directors or members of Senior Management other than those related to remuneration, fee allowances and profit participation. In addition, there were no transactions conducted between the Company, its directors or members of Senior Management.

2) Directors' Compensation

2.1 2010

2.1.1 Board of Directors

Director's compensation is detailed as follows:

- a) A payment of a monthly fixed gross amount of UF 300 in favor of SQM Chairman and UF 50 in favor of the seven remaining board members regardless of their attendance to Board meetings or the number of meetings to which they attend.
- b) A payment in domestic currency and in favor of the Chairman of the Board of Directors consisting in variable and gross amount equivalent to 0.35% of total profit for the period which SQM S.A. effectively obtains during fiscal year 2011.
- c) A payment in domestic currency in favor of each Company's directors excluding the Chairman of the Board, consisting of variable and gross amount equivalent to 0.04% of the total profit for the period which SQM S.A. effectively obtain during fiscal year 2011.
- d)Fixed and variable amounts indicated will not be subject to any charge between them and those expressed in percentage will be paid immediately after the shareholders at the respective Annual General Shareholders' Meeting of SQM approve the balance, financial statements, annual report, report by the account inspectors and report of external auditors for the commercial year ending December 31, 2011.
- e) Accordingly, remuneration and profit-sharing paid to the members of the Board of Directors during 2011 amount to ThUS\$ 76.

2.1.2 Audit Committee

The remuneration of the Audit Committee is detailed as follows:

- a) A payment of a monthly, fixed and gross amount of UF 17 in favor of each of the 3 Directors who are a part of the Company's Audit Committee regardless of the number of meetings which are conducted during the respective month.
- b) A payment in domestic currency and in favor of each of the 3 Directors of a variable and gross amount equivalent to 0.0013% of the Company's total profit for the period, which SQM S.A. effectively obtains during fiscal year 2011.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 7 – Related Parties: Disclosures (continued)

- 3) No guarantees have been constituted in favor of directors.
- 4) Senior Management remuneration

As of March 31, 2011, the overall remuneration paid to the 112 main executives amounts to ThUS\$9,236. (ThUS\$21,809 as of December 31,. 2010.) This includes monthly fixed remuneration and variable performance bonuses.

- SQM S.A. for its executives has defined interim and bi-interim bonus plan related to goal achievement and level of individual contribution to the Company's income. These incentives are structured in a minimum and maximum of gross remuneration which are paid once a year or every two years.
- 5) Additionally, the Company has retention bonuses for the Company's executives. The amount of these bonuses is linked to the price of the Company's share and is payable in cash between 2011 and 2016 (see Note 16).
- 6) No guarantees have been constituted in favor of the Company's management.
- 7) The Company's Managers and Directors do not receive or have not received any benefit during the 4th quarter ended as of March 31, 2011 or retribution for the concept of pensions, life insurance, paid time off, profit sharing, incentives, benefits due to disability other than those mentioned in the preceding numbers.
- 8) In accordance with IAS 24 we must inform that our Director Wolf Von Appen B. is a part of the Ultramar Group. As of March 31, 2011, the amount of operations with this Group is approximately ThUS\$1,119 (ThUS\$11,532 as of December 31, 2010).

Notes to the interim consolidated financial statements as of March 31, 2011

Note 8 - Financial Instruments (continued)

8.2 Trade and other receivables (continued)

The Company's policy is to require guarantee (such as bank drafts, guarantee clauses and others) and/or maintaining insurance policies for certain accounts as deemed necessary by the Company's Management. Renegotiated debts are immaterial and are limited to debtors in Chile.

Trade receivables	03/31/2011 ThUS\$	12/31/2010 ThUS\$
Gross debt receivables	418,048	395,929
Past due debt	(71,239)	(88,911)
Impaired debt	(19,164)	(18,882)
Debt pending expiration and free of impairment	327,645	288,136

8.2 Hedging assets

The balance relates to derivative financial instruments measured at fair value, which have been classified as foreign currency translation hedging and interest rate hedges associated with all the Company's obligations related to bonds payable in Chilean pesos and in UF. As of March 31, 2011, the face value of cross currency swap contracts amounted to ThUS\$410,618, as of December 31, 2010 amounted to ThUS\$410,618.

Hedging assets. current	Derivative instruments (CCS) ThUS\$	Effect on profit or loss for the period, derivative Instruments ThUS\$		Deferred income Hedging reserve in equity ThUS\$	Hedging reserve in equity ThUS\$
March 31, 2011	83,443	(10,346)	(13,993)	2,466	(11,527)
December 31, 2010	97,553	46,936	(11,093)	1,886	(9,207)

Balances in the column, Effects on profit or loss consider the interim effects of contracts which were in force as of March 31, 2011 and December 31, 2010.

The detail of expiration dates of hedges by bond series is as follows:

Series	Agreement amount ThUS\$	Currency	Expiration date

Note 8 - Financial Instruments (continued)

8.3

Hedging assets (continued)

The Company uses cross currency swap derivative instruments to hedge the possible financial risk associated with the volatility of the exchange rate associated with Chilean pesos and UF. The objective is hedging the exchange rate financial risks associated with bonds payable. Hedges are documented and tested to measure its effectiveness.

Based on a comparison of critical terms, hedging is highly effective given that the hedged amount is consistent with obligations maintained for bonds denominated in Chilean pesos and UF. Likewise, hedging contracts are denominated in the same currencies and have the same expiration dates of bond principal payments.

Hedge accounting

SQM classifies derivative instruments as hedges which may include derivatives or embedded derivatives, either as fair value hedging derivative instruments, cash flow derivative instruments or net hedging derivative instruments in business abroad.

a) Fair value hedges

The change in the derivative instruments denominated at fair values which qualify as fair value hedging instruments are recorded immediately in profit or loss together with any change in the fair value of the hedged item attributable to the hedged risk.

The Company documents the relationship between hedging instruments and the hedged item together with the objectives of its risk management and its strategy to perform different hedging transactions. In addition, at the beginning of the hedge and then quarterly the Company documents whether the hedge has been efficient in its objective of hedging market variations for which we use an effectiveness test. Cash is considered the hedging instrument in the event that the test obtains an effectiveness result between 80% and 120%.

Effectiveness tests show results which make consider hedge as effective or ineffective. To-date, effectiveness tests have defined hedges as effective. This note presents the detail of fair values of derivative instruments qualified as hedges.

b) Cash flow hedges

These hedge the variation of cash flows attributed to a risk associated, in particular, to a transaction with high probability of execution, which may have material effects on the Company's profit or loss. To-date, the Company has not classified any such hedges.

Isapre Norte Grande Ltda.	505	514
SQM Brasil Limitada	-	-
Total	505	514

8.9 Estimated fair value of financial instruments and derivative financial instruments

As required by IFRS, the following information is presented for the disclosure of the estimated fair value of financial assets and liabilities.

Although inputs represent Management's best estimate, they are subjective and involve significant estimates related to the current economic and market conditions, as well as risk features.

Methodologies and assumptions used depend on the risk terms and characteristics of instruments and include the following as a summary:

- Cash equivalent approximates fair value due to the short-term maturities of these instruments.
- Other current financial liabilities are considered at fair value equal to their carrying values.
- -For interest-bearing liabilities with original maturity of more than a year, fair values are calculated at discounting contractual cash flows at their original current market rates with similar terms.
- -For forward and swap contracts, fair value is determined using quoted market prices of financial instruments with similar characteristics.

Fair value hierarchy

In accordance with IFRS 7 paragraph 27 a and b provides the obligation of disclosing the hierarchy level used to determine the value measurement techniques. Fair value hierarchies correspond to:

- Level 1: when only quoted (unadjusted) prices have been used in active markets.
- -Level 2: when in a phase in the valuation process variable other than prices quoted in Level 1 have been used which are directly observable in markets.
- -Level 3: when in a phase in the valuation process variable which are not based in observable market data have been used.

The valuation technique used to determine the fair value of our hedging instruments are those indicated in level 2.

a) Estimated useful lives or amortization rates used for finite identifiable intangible assets

Finite useful life, measures the lifetime or the number of productive units or other similar which constitute its useful life.

The estimated useful life for software is 3 years for other finite useful life assets, the period in which they are amortized relate to periods defined by contracts or rights which generate them.

Indefinite useful life intangible assets mainly relate to water rights and rights of way, which were obtained as indefinite.

b) Method used to express the amortization of identifiable intangible assets (life or rate)

The method used to express the amortization is useful life.

Note 15 Employee benefits (continued)

15.2

Policies on defined benefit plan

This policy is applied to all benefits recognized received for services provided by the Company's employees.

Short-term benefits for active employees are represented by salaries, social welfare benefits, paid time-off, sickness leaves and other leaves, profit sharing and incentives and non-monetary benefits; e.g., healthcare service, housing, subsidized or free goods or services. These will be paid in a term which does not exceed twelve months.

The Company only provides compensation and benefits to active employees, except for SQM North America which is explained in 16.4.

For each incentive bonus delivered to the Company's employees, there will be a disbursement in the first quarter of the following year and this will be calculated based on Profit for the period at the end of each period applying a factor obtained subsequent to the employee appraisal process.

The personnel benefits includes withholding bonds for the Company's executives which relates to the Company's share prices that is payable in cash, the short-term portion is expressed as current provision for employee benefits and the long-term as non-current provision for employee benefits.

The personnel benefits include a bonus provided to the Company's directors is calculated based on Profit for the period at each year-end and will consider the application of a percentage factor.

The benefit relates to vacations (short-term (current) benefits to employees), which is provided in the Labor Code which indicates that employees with more than a year of service will be entitled to annual holidays for a period not lower than fifteen paid business days. The Company provides the benefit of two additional vacation days.

Staff severance indemnities are agreed and payable based on the last salary for each year of service for the Company or with certain maximum limits in respect to the number of years to be considered or in respect to monetary terms. In general, this benefit is payable when the employee or worker ceases to provide his/her services to the Company and the right for its collection can be acquired because of different causes, as indicated in the respective agreements; e.g., retirement, dismissal, voluntary retirement, incapacity or disability, death, etc.

Law No. 19,728 published on May 14, 2001 which became effective on October 1, 2002 required "Compulsory Unemployment Insurance" in favor of all depending employees regulated by the Chilean Labor Code. Article 5 of this law provided the financing of this insurance through monthly contribution payments by both the employee and the employer.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 15 Employee benefits (continued)

15.3 Other long-term benefits

The other long-term benefits relate to staff severance indemnities and are recorded at their actuarial value.

Staff severance indemnities at actuarial value Staff severance indemnities, Chile Other obligations in companies elsewhere Total other non-current liabilities	3/31/2011 ThUS\$ 26,495 630 27,125	12/31/2010 ThUS\$ 26,577 631 27,208
SQM North America's pensions plan	702	702
Total post employment obligations	702	702

Staff severance indemnities have been calculated under the actuarial assessment method of the Company's obligations with respect to staff severance indemnities, which relate to defined benefit plans which consist of days of remuneration per year served at the time of retirement under conditions agreed in the respective agreements established between the Company and its employees.

The methodology followed to determine the accrual for all the employees adhered to agreements considers turnover and salary increase rates according to the valuation method referred to as Accumulated Benefit Valuation or Accrued Cost of the Benefit Method. This methodology is established in IAS 19.

SQM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 15 - Employee benefits (continued)

About the characteristics of the indemnity fund

Under this benefit plan, the Company retains the obligation for the payment of staff severance indemnities related to retirements without establishing a separate fund with specific assets, which is referred to as not funded. The discount interest rate of expected flows to be used was 6%.

Benefit payment conditions

The staff severance indemnity benefit relates to remuneration days for year worked for the Company with no limit of salary or years of services for the Company, when employees cease to work for the Company due to turnover or death. In this case, the maximum age for men is 65 years and 60 years old for women, which are the usual ages for retirement due to achieving the senior citizen age according to the Chilean pensions system provided in Decree Law 3,500 of 1980.

Methodology

The determination of the obligation for benefits under IAS 19, Projected Benefit Obligation (PBO) is described as follows:

To determine the Company's total liability, we used a mathematical simulation model which was programmed using a computer and which processed the situation of each employee on an individual basis.

This model considered months as discrete time; i.e., the Company determined the age of each person and his/her salary on a monthly basis according to the growth rate. Thus, information on each person was simulated from the beginning of the life of his/her employment contract or when he/she started earning benefits up to the month in which it reaches the normal retirement age, generating in each period the possible retirement according to the Company's turnover rate and the mortality rate according to the age reached. When he/she reaches the retirement age, the employee finishes his/her service for the Company and receives indemnity related to retirement due to old age.

The methodology followed to determine the accrual for all the employees adhered to agreements has considered turnover rates and the mortality rate RV-2010 established by the Chilean Superintendence of Securities and Insurance to calculate pension-related life insurance reserves in Chile according to the Accumulated Benefit Valuation or Accrued Cost of Benefit Method. This methodology is established in IAS 19 Retirement Benefit Costs.

15.4

Employee post-retirement liabilities

Our subsidiary, SQM North America has established with its employees certain pension plans for retired employees, which are calculated measuring the expected future forecasted staff severance indemnity obligation using a net salary gradual rate of restatements for inflation, mortality and turnover assumptions discounting the resulting amounts at present value using an interest rate of 6.5%. for 2011 and 2010. The net balance of this liability is presented under non-current provisions for employee benefits.

The table below establishes the status of the plan financing and the amounts recognized in the consolidated balance sheet:

Reconciliation table	2011		2010	
Variation in the benefit liability:	ThUS\$		ThUS\$

Note 16 – Executive compensation plan

In order to retain the Company's executives, SQM implemented a compensation plan. This plan operates through granting payments based on changes in the price of SQM's shares, settled in cash, allowing these executives to exercise their right up to 2016.

Plan features

This compensation plan is linked to the Company's performance through SQM' Series B shares (The Santiago Stock Exchange)

Executives included in this plan:

This compensation plan considers 42 Company's executives, which are entitled to this benefit, provided that they stay working for the Company during the implementation dates related to these options. The exercise dates of these options will be the first 7 calendar days of May of the current fiscal year.

Compensation:

The compensation of each executive corresponds to the difference between the share's average price during April of each year compared to the base price appointed by Company's' management. The base price established by the Company for this compensation plan is US\$ 50 per share, for those granted in 2010 and US\$ 9.30 for those granted in 2005.

Method and valuation model for this compensation plan:

In order to determine the weighted average fair value of these options, the Company used the following variables:

Variables and sensitivities of

the model	2011		2010	
Expected volatility (%)				
Annualized for SQM (*)	2.,51	%	21.51	%
Annualized for CLP/USD (*)	10.00	%	10.00	%
Free interest rate risk (%)	2.40	%	2.40	%
Option expected life (years)	3.3 years	3.3	3 years	
Weighted average price of the share (US\$)	57		57	
Dividend rate (%)	1.61	%	1.61	%
Period covered	60 months	60	months	
Model used	Binomial	Bi	nomial	

(*) calculated based on 252 trading days.

Note 17. Disclosures on net equity

The detail and movements in the funds of net shareholders' equity accounts are shown in the Consolidated statement of changes in net shareholders' equity.

17.1 Disclosures on capital management

The main objective of capital management, related to the management of the Company's equity is as follows

- Ensuring its regular operation and the business continuity in the long-term.
- Ensuring the financing of new investments in order to maintain sustainable growth throughout time.
- -Maintaining proper capital structure in accordance with the economic cycles impacting the business and to the nature of the industry.
 - Maximizing the value of SQM Group in the medium and long-term.

In line with that indicated above, the capital requirements are included based on the Group's financing needs, to maintain a proper liquidity level and comply with the financial safeguards established in the debt covenants in force. SQM Group manages its capital structure and makes adjustments based on the economic conditions currently prevailing, in order to mitigate the risks associated with adverse market conditions and to take advantage of the opportunities which could be generated to improve the Company's liquidity position.

The management of SQM Group controls capital management based on the ratios indicated as follows:

CAPITAL MANAGEMENT	3/31/2011	12/3	31/2010	Description (1)	Calculation (1)
Net financial debt	561,083	5	84,357	Financial Debt - Financial Resources	Other current financial liabilities + Other non-current financial liabilities - Cash and cash equivalents - Other current financial assets
Liquidity	3.60	3	.55	Current Asset Divided by Current Liability	Total Current Assets /Total Current Liabilities
Net debt / Capitalization	0.24	0	.26	Net Financial Debt Divided by Total Equity	Net financial debt / (Net financial debt + Total Equity)
ROE	23.7	% 2	3.2 %	Profit Divided by Total Equity	Profit / Total Equity
ROA	22.1	% 2	0.9 %	EBITDA – Depreciation Divided by Total Assets net of financial resources less investments in related companies	(Gross profit – Administrative expenses)/ (Total assets – Cash and cash equivalents – Other current financial assets – investments accounted

			for using the equity method)
DFN/ EBITDA	0.74	0.85	EBITDA = Gross Profit + Depreciation – Administrative expenses

(1) Assumes absolute value of the different accounts

Notes to the interim consolidated financial statements as of March 31, 2011

Note 17. Disclosures on net equity (continued)

The consolidated maximum indebtedness level of SQM S.A. will relate to the Debt/Equity ratio of "one point five". This limit can only be exceeded provided that the Management of SQM S.A. has an authorization previously granted by the shareholders at the respective General Extraordinary Meeting of Shareholders.

No changes have been recorded in the objectives or capital management policies within the reported periods.

17.2

Disclosures on preferred share capital

Issued share capital is divided into 263,196,524 fully paid and subscribed shares with no par value composed of a Series "A" with142,819,552 shares and Series "B" shares with 120,376,972 shares, where both series are preferred shares.

The preferential voting rights of each series are as follows:

Series "A":

If the election of the President of the Company results in a tied vote, the Company's directors may vote once again, without the vote of the director elected by the Series B shareholders

Series "B":

- 1) A general or extraordinary shareholders' meeting may be called at the request of shareholders representing 5% of the Company's Series B shares.
- 2) An extraordinary meeting of the Board of Directors may be called with or without the agreement of the Company's President, at the request of the director elected by Series B shareholders.

As of March 31, 2011 and as of December 31, 2010, the Group does not maintain any dominant company's shares either directly or through investees.

Note 17. Disclosures on net equity (continued)

17.3 Dividend policy

As required by the Chilean Companies Act, unless otherwise decided by unanimous vote of the holders of issued and subscribed shares, we must distribute a cash dividend in an amount equal to at least 30% of our consolidated Profit for the period for year ended as of December 31, 2009 unless and except to the extent it has a deficit in retained earnings (losses not absorbed in prior years.)

The Company's dividend policy for 2010 is as follows:

- -Distribution and payment in favor of each shareholder of a final dividend which will be equivalent to 50% of Profit for the period obtained in 2010.
- -Distribution and payment, if possible during 2010, of a provisional dividend which will be recorded against the aforementioned final dividend. This provisional dividend will be paid probably during the last quarter of 2010 and its amount could not exceed 50% of the retained earnings for distribution obtained during 2010, which are reflected in the Company's financial statements as of September 30, 2010.
- -The distribution and payment by the Company of the remaining balance of the final dividend related to Profit for the period for the 2010 commercial year in up to two installments, which will have to be effectively paid and distributed prior to June 30, 2011.
- -An amount equivalent to the remaining 50% of the Company's Profit for the period for 2010 will be retained and destined to the financing of operations of one or more of the Company's investment projects with no prejudice of the possible future capitalization of the entirety or a portion of this
 - The Board of Directors does not consider the payment of any additional or interim dividends.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 17. Disclosures on net equity (continued)

17.4 Provisional Dividends

On November 23, 2010, the Company's Board agreed to pay a provisional dividend amounting to ThUS\$ 110,000, payable beginning on December 15, 2010.

At a Board of Directors meeting held on April 29, 2010, the Directors unanimously agreed to reduce the dividend distribution which implies to pay a final dividend of US\$ 0.62131 per share as a result of such profit for the period. Notwithstanding the above, a deduction amounting to US\$ 0.37994 per share should be applied to this final dividend, which was already paid as a provisional dividend. In line with this, the balance amounting to US\$ 0.24137 per share, will be paid and distributed in favor of those Company's shareholders registered with the respective shareholders registry as of the fifth business day prior to the day in which this dividend will be paid.

At a Board of Directors meeting held on November 17, 2009, the Directors agreed to pay and distribute an interim dividend of US\$0.37994 per share. This dividend totals approximately ThUS\$100,000 and is equivalent to 40% of distributable Profit for the period for 2009, accumulated as of December 31, 2010. This dividend is payable with a charge to Profit for the period for that commercial year to SQM shareholders registered in the respective shareholders' registry as of the fifth business day prior to December 16, 2009, in its equivalent in Chilean pesos, based on the observed dollar exchange rate as published in the Official Gazette of December 10, 2009.

The dividends which are presented deducted from equity are:

18.5

Detail of main classes of provisions

Legal expenses: this provision depends on the pending resolution of a lawsuit to conduct the disbursement for expenses associated with and incurred for this purpose.

Tax accrual in tax litigation: this accrual relates to lawsuits pending resolution related to taxes in Brazil for two of our subsidiaries, SQM Brazil and NNC.

Royalties CORFO (Economic Development Agency) agreement: relates to the exploitation of mining properties which SQM Salar S.A. pays on a quarterly basis to the Economic Development Agency. The amount of the lease payable is calculated based on sales of products extracted from the Atacama Saltpeter deposit.

The settlement of these will be performed on a quarterly basis.

Temporary closure of El Toco operation: The Company's Board of Directors unanimously agreed to approve the temporary closure of Toco and Pampa Blanca mining sectors. The Company accrued the legal severance indemnity for the employees subject to this closure.

Retirement plan: corresponds to a benefit agreed with employees to retire from the Company. Those employees who invoked the agreed plan signed their consent as of December 31, 2010 and a portion of the effective retirement date took place during 2010 and the remaining portion will take place during 2011.

Through the present date, SQM and its subsidiaries do not present any uncertainty on the timing and amount of a class of accrual.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 19 – Contingencies and restrictions (continued)

19.1 Lawsuits and other relevant events (continued).

SQM S.A. and its subsidiaries have been participating and probably will continue to participate habitually as plaintiffs or defendants in various judicial proceedings that have been and will be filed and are subject to the decisions of the Ordinary Courts of Justice. Those proceedings, which are regulated by the applicable legal provision, mainly seek to exercise or oppose certain actions or exceptions related to certain mining concessions constituted or in the process of being constituted and do not and will not essentially affect the development of SQM S.A. and its subsidiaries.

Soquimich Comercial S.A. has been participating and probably will continue to participate habitually as a plaintiff in various judicial proceedings through which it seeks mainly to collect and receive the amounts owed to it. As of March 31, 2011 the total estimated nominal amount claimed in such proceedings is approximately ThUS \$700.

SQM S.A. and its subsidiaries have tried and currently continue to try to obtain payment of certain amounts still owed to them for their normal business activities. Those amounts will continue to be judicially and non-judicially demanded by the plaintiffs and the actions exercised in relation to them are currently in full force.

SQM S.A. and its subsidiaries have not been legally notified of other complaints other than those listed above and which pursue the voidance of certain mining properties purchased by SQM S.A. and its subsidiaries and whose proportional purchase price, in respect to the part affected by the respective overlap, exceeds the nominal and approximate amount of ThUS\$150 or which seek to obtain payment of certain amounts allegedly owed from exercising their own activities and which exceed the nominal individual amount of approximately ThUS\$150.

19.2 Restrictions:

Bank loans of SQM S.A. and its subsidiaries contain restrictions similar to those of other comparable loans existing at the dates when those debt agreements were entered into. These restrictions involve maximum indebtedness and minimum equity. Other than these restrictions, SQM S.A. is not exposed to any other management restrictions or limits to financial ratios in contracts or agreements with creditors.

SQM

Los Militares 4290, Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Nota 19 – Contingencies and restrictions (continued)

19.3 Commitments:

The subsidiary SQM Salar S.A. has signed a rental contract with the Economic Development Agency (CORFO) which establishes that such subsidiary, will pay to CORFO, for the concept of exploitation of certain mining properties owned by CORFO and for the products resulting from such exploitation, the annual rent stated in the aforementioned contract, the amount of which is calculated on the basis of the sales of each type of product. The contract is in force until 2030 and rent began being paid in 1996 reflecting in profit or loss an amount of ThUS\$ 5,024 as of March 31, 2011 (ThUS\$ 18,717 as of December 31, 2010).

19.4 Restricted or pledged cash

The subsidiary Isapre Norte Grande S.A. in compliance with that established by the Chilean Superintendence of Healthcare, which regulates the running of pension-related health institutions, maintains a guarantee in financial instruments, delivered in deposits, custody and administration to Banco de Chile.

This guarantee, according to the regulations issued by the Chilean Superintendence of Healthcare is equivalent to the total sum owed to its members and medical providers. Banco de Chile on a daily basis reports the present value of the guarantee to the Chilean Superintendence of Healthcare and Isapre Norte Grande Ltda. As of March 31, 2011, the guarantee amounts to ThUS\$ 505.

19.5 Sureties obtained from third parties

The main sureties received from third parties (distributors) to guarantee Soquimich Comercial S.A. the compliance with obligations in contracts of commercial mandates for the distribution and sale of fertilizers amounted to ThUS\$4,129 as of March 31, 2011; as of December 31, 2010 amounted to ThUS\$6,389 which are detailed as follows:

Entity name	3/31/2011 ThUS\$	12/31/2010 ThUS\$
Llanos y Wammes Soc. Com. Ltda	2,086	2,037
Fertglobal Chile Ltda.	1,043	3,352
Tattersall Agroinsumos S.A.	1,000	1,000

Notes to the interim consolidated financial statements as of March 31, 2011

Note 20 - Revenue

As of March 31, 2011 and 2010, ordinary profit is detailed as follows:

Classes of ordinary profits	3/31/2011 ThUS\$	3/31/2010 ThUS\$
Sale of goods	478,584	387,110
Provision of services	1,451	1,413
Interest income	-	-
Income from royalties	-	-
Income from dividends	-	-
Total	480,035	388,523

Note 21 – Earnings per share

Basic earnings per share will be calculated dividing Profit for the period for the period attributable to the Company's shareholders by the weighted average of the number of shares in circulation during that period.

As expressed, basic earnings per share is as follows:

Basic earnings per share	3/31/2011 ThUS\$	3/31/2010 ThUS\$
Earnings (loss) attributable to the holders of instruments in the net equity of the		
controlling entity	111,395	76,493
	3/31/2011	3/31/2010
	Units	Units
Number of common shares in circulation	263,196,524	263,196,524
	3/31/2011	3/31/2010
Basic earnings per share	0.4232	0.2906

The Company has not made any operation with a potential diluted effect which assumes a diluted benefit per share different from the basic benefit per share.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 22 – Borrowing costs

The costs of interest are recognized as expenses in the year in which they are incurred except for those which are directly related to the acquisition and construction of tangible fixed assets and which comply with the requirements in IAS 23. As of March 31, 2011, total financial expenses incurred amount to ThUS\$10,627 (ThUS\$7,812 as of March 31, 2010)

The Company capitalizes all interest costs which directly relate to the construction or the acquisition of property, plant and equipment, which require a substantial time to be suitable for use.

Costs of capitalized interest, property, plant and equipment

The cost of capitalized interest is determined applying weighted average or mean of all financing incurred by the Company to the final monthly balances of work-in-progress and which meet the requirements of IAS 23.

The rates and costs for capitalized interest of property, plant and equipment are detailed as follows:

	3/31/20	11	3/31/20	10
Capitalization rate of costs for interest capitalized, property, plant				
and equipment	7	%	7	%
Amount of costs for interest capitalized in ThUS\$	5,232		5,756

Notes to the interim consolidated financial statements as of March 31, 2011

Note 23 - Effect of variations in foreign currency Exchange rates

a) Foreign currency translation differences recognized in profit or loss except for financial instruments measured at fair value through income:

	3/31/2011 ThUS\$		3/31/2010 ThUS\$	
Profits (losses) on foreign currency translation difference recognized				
in profit for the period	(2,899)	(3,133)
Reserves for translation differences attributable to the Parent's				
owners	(77)	(179)
Reserves for translation differences attributable to entities other than				
the Parent's owners	(23)	(51)

b) Translation reserves:

As of March 31, 2011 and as of December 31, 2010, translations reserves are detailed as follows:

Detail	3/31/2011 ThUS\$	12/31/2010 ThUS\$
Changes in equity generated through the proportional equity method for conversion:		
Comercial Hydro S.A.	937	937
SQMC Internacional Ltda.	37	41
Proinsa Ltda.	28	31
Agrorama Callegari Ltda.	147	161
Isapre Cruz del Norte Ltda.	88	99
Almacenes y Depósitos Ltda.	81	90
Sales de Magnesio Ltda.	100	132
Sociedad de Servicios de Salud S.A.	35	39
Total	1,453	1,530

c) Functional and presentation currency

The functional currency of these subsidiaries is Chilean peso and its presentation currency is United States Dollar.

- d) Reasons which explain the use of a presentation currency other than the functional currency
- All income from these subsidiaries are associated to Chilean peso.
- These companies' structure of operating costs is impacted by local currency.
- Equities of these Companies are expressed in local currency (Chilean peso).

Notes to the interim consolidated financial statements as of March 31, 2011

Note 24 – The Environment

24.1 Disclosures on disbursements related to the environment

The Company is continuously concerned with protecting the environment both in its production processes and with respect to products manufactured. This commitment is supported by the principles indicated in the Company's Sustainable Development Policy.

SQM is currently operating under an Environmental Management System (EMS) which has allowed strengthening its environmental performance through the effective application of the Company's Sustainable Development Policy

Operations that use caliche as a raw material are carried out in desert areas with climatic conditions that are favorable for drying solids and evaporating liquids using solar energy. Operations involving the open-pit extraction of minerals, due to their low waste-to-mineral ratio, generate remaining deposits that slightly alter the environment. During the extraction process and subsequent crushing of ore, particle emissions occur, which is normal for this type of operation. Caliche extractive operations are performed at an open-sky.

A portion of the ore extracted is crashed, a process in which particle emissions occur; currently this operation is conducted only in the worksite of Pedro de Valdivia. Nearby María Elena, crushing units used to operate which affected the air quality. The Company has implemented a series of measures that have shown notable improvement in air quality at Maria Elena and beginning on March 2010, no ore crushing process is conducted in the aforementioned location.

A large part of our products are shipped in bulk at the Tocopilla Port. In 2007, Tocopilla was declared as a Zone Saturated by Breathable Particulate Matter (MP10), mainly caused by the emissions by electric power plants operating in areas nearby. In October 2010, a plan referred to as "Decontamination Plan of Tocopilla" became effective, to which SQM has committed to apply several measures in order to mitigate this particulate matter that may generate the movement of products in bulk in our port. These measures have been successfully implemented from 2007 to the present date.

The Company carries out environmental follow-up and monitoring plans based on specialized scientific studies, and it also provides an annual training program in environmental matters to both its direct employees and its contractors' employees. Within this context, SQM entered into a contract with the National Forestry Corporation (CONAF) aimed at researching the activities of flamingo groups that live in the Salar de Atacama (Atacama Saltpeter Deposit) lagoons. Such research includes a population count of the birds, as well as breeding research. Environmental monitoring activities carried out by the Company at the Salar de Atacama and other systems in which it operates are supported by a number of studies that have integrated diverse scientific efforts from prestigious research centers, including Dictuc from Pontificia Universidad Católica in Santiago and the School of Agricultural Science of Universidad de Chile. Furthermore, within the framework of the environmental studies which the Company is conducting, the Company is performing significant activities in relation to the recording of Pre-Columbian and historical cultural heritage, as well as the protection of heritage sites, in accordance with current Chilean laws. These activities have been especially performed in the areas surrounding María Elena and the Nueva Victoria plants. This effort is being accompanied by cultural initiatives within the community and the organization of exhibits in local and regional museums.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 24 – The Environment (continued)

24.1 Disclosures on disbursements related to the environment (continued)

As emphasized in its Sustainable Development Policy, the Company strives to maintain positive relationships with the communities surrounding the locations in which it carries out its operations, as well as to participate in communities' development by supporting joint projects and activities which help to improve the quality of life for residents. For this purpose, the Company has focused its efforts on activities involving the rescue of historical heritage, education and culture, as well as development, and in order to do so, it acts both individually and in conjunction with private and public entities.

24.2 Detail of information on disbursements related to the environment.

The accumulated disbursements associated to environmental matters which SQM and its subsidiaries have incurred as of March 31, 2011 for the concept of investments in production processes, verification and control of compliance with ordinances and laws relative to industrial processes and facilities, including prior years disbursements related to this projects amounted to ThUS\$ 10,278 and their detail is as follows:

Los Militares 4290

Las Condes, Santiago, Chile

Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 24 – The Environment (continued)

24.3 Description of each project indicating whether these are in process or have been finished.

SQM Industrial S.A.

ANMI: Compliance with technical, legal aspects and specific standards required with respect to warehousing, signaling, safety and main factors associated with materials, products and supplies which are handled in the mine site. In addition, the Company will implement an improvement in the warehouse infrastructure for the storage of hazardous chemicals. This project is in the process of closure.

FNWR: Preparation and processing of EIP (Environmental Impact Performance) for the Pampa Blanca discard yard. This project is in the process of closure.

FP55 – FPXA: These two projects have a common final objective which relate to the installation of the 87 kilometer sea water adductor system from the Mejillones zone to the Company's facilities in Pampa Blanca. Expenses considered relate solely to environmental processing in EIA (Environmental Impact Assessment) PB Mine Zone and EIA PB Extension. These projects are being executed.

JNTU: Assessment of the environmental impact of San Isidro water. This project is in the process of closure.

JPX9: The final objective of this project is to perform testing on two processes in order to eliminate the perchlorate from certain products. However, the related expenses solely relate to the processing of EIP (Environmental Impact Performance), Improvement in the granulation prilling plant in Coya Sur. The project is being executed.

MNYS: Preparation and execution of the geoglyphs preservation project. Edition and publishing of a book in addition to implementing a dissemination center. Construction and habilitation of a collection deposit. All offsetting steps for the Technological Change at Maria Elena project. This project is being executed.

MP17: A study and identification will be conducted in respect to the current water chlorination system at Maria Elena, Coya Sur and Pedro de Valdivia facilities for the subsequent implementation and start-up of water chlorination in accordance with standards in force. This project is in the process of closure.

MP5W: Normalization of the system for the storage and distribution of fuel at the Company's facilities. This project is being executed.

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 24 – The Environment (continued)

24.3 Description of each Project indicating whether these are in process or have been finished (continued)

MPIS: Improve the urban situation at Maria Elena, placing a stabilization layer with product at the streets and anti-dust treatment with product in sidewalks. This project is in the process of closure.

MPL5: Improvement of a portion of the water network infrastructure and sewage system at Maria Elena. This project is in the process of closure.

MPLS: Implement alarms via emails as to peak concentration of particle materials and change in the recording of information from text files to database for the implementation of reports. This project is being executed. This project is in the process of closure.

MQ51: The objective of this project is to generate the reference terms to implement the equity measure established in RCA N°0076/2000 which environmentally approves the EID of María Elena's project. This project is being executed.

PPNK: Project to ensure the control of ammonia gas in crystal plant stoppage. This project is in the process of closure.

PPZU: Will be conducted all actions required to standardize and certify the fuel tanks in plants located in María Elena, Coya Sur and Pedro de Valdivia. This project is being executed.

Minera Nueva Victoria S.A.

IPMN: Extend the sanitary capacity of the IRIS camp through the construction of 3 wells. This project is in the process of closure.

IPNW: Relates to the replacement or impaired sanitary in order to improve the hygiene conditions. This project is in the process of closure.

SIT S.A.

TPLR: The objective of the process is being able to discharge waste water generated in the Tocopilla port to the public sewage system. This project is in the process of closure.

TPM7: Meshes will be acquired which will be installed in yards 3 and 4 to control dust emissions in sieving operations and protect product from emissions generated by the power plant. This project is in the process of closure.

TPR8: This project is intended to decrease riles generation by means of using non-wash and vacuum technologies, through the implementation of a vacuum system which avoid the use of water and therefore, the generation of riles. This project is being executed.

SOM

Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Note 24 – The Environment (continued)

24.3 Description of each project indicating whether these are in process or have been finished (continued)

SQM S.A.

AQ0A: Being able to use the water rights which were granted in several pits within the reserve of Conaf Pampa del Tamarugal and take them out of both, the tamarugal forests and the reserve, mitigating the environmental impact of its exploitation. This project is being executed.

IPFT: This project contemplates the implementation of heritage steps committed in the projects referred to as Nueva Victoria Mine Zone, Nueva Victoria Operation Updates, Iris Duct and Evaporation Pools. This project is being executed.

IPXE: This Project contemplates the implementation of an environmental monitoring plan referred to as Project Pampa Hermosa in Salar de Llamara. This project is being executed.

IPXF: Implement the environmental monitoring plan of the Project referred to as Pampa Hermosa in Pampa del Tamarugal. This project is being executed.

IQ08: The Project considers the following work for aquifers of Pampa del Tamarugal and Salar de Llamara: Construction and Preparation of observation and monitoring wells, pumping tests, construction of roads on terrain referred to as chusca and crust Salar. This project is being executed.

IQOC: This Project contemplates implementing an improvement program for an area which is adjacent to Route 5, which will allow developing a self-guided path of the area referred to as Cantón de Lagunas within the historical saltpeter context. This project is being executed.

IQ1M: Implementing the environmental commitment included in the EIS of the Project referred to as "Pampa Hermosa" in order to protect the area of springs existing in the Aquifer Salar de Llamara. This project is being executed.

IQ54: This project contemplates the implementation of the environmental heritage commitment obtained through the environmental evaluation on Project Pampa Hermosa (RCA N°890/2010). This project is being executed.

SCI6: This project is intended to obtain environmental licenses for the Development projects in Region I of Chile including all pieces of work related to initial environmental requirements which allow that Operations execute the project's construction and operation. The environmental evaluation to obtain the related license would be conducted through EIA, which contemplates the preparation and processing of the document and also includes specific environmental study activities (the study of tamarugos in Llamara and P. Tamarugal, archeological mitigation steps, environmental study of Loa river, hydro geological studies.) This project is in the process of closure.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 24 – The Environment (continued)

24.3 Description of each project indicating whether these are in process or have been finished (continued)

SQM Nitratos S.A.

IP6W: Design and construct pouring off tanks for mud, water, oil and a pool with a pump to re-use poured off water, metallic pools to remove mud. This project is in the closure process.

PPOV: Installation of a container for hazardous waste at workshops for maintenance and removal of liquid industrial waste from hydraulic filters, workshop for mine maintenance at Maria Elena, Pedro de Valdivia, Nueva Victoria and Pampa Blanca. This project is in the process of closure.

SQM Salar S.A.

CPTP: This Project contemplates changing the current industrial water supply into drinking water in order to comply with the regulation in force of DS 72. This project is being executed.

CPZH: The objective of this Project is the safe and fast recover of the LiOH cake and discard, not discharging it to the ground, avoiding splashing it to surrounding areas which would expose the operators working nearby to harm. This project is being executed.

LP5J: Conduct analyses to define the hydrological units in the basin, quantify the reload to the aquifer through environmental isotopic techniques. This project is being executed.

LP82: Support for the development of demonstration estate, technical support for the application of improvements in watering and agricultural practices. This project is being executed.

LPIK: The final Project contemplates the construction of a new MOP dryer. Due to the fact that in the Salar de Atacama location, the current plant of Drying Compacted will be used for other purposes. The expenses considered only correspond to the processing of the EID Dryer Plant Potassium Chloride. This project is in the closure process.

LPN3: Perform conceptual engineering and construction of a new plant of granulated –compacting in Salar de Atacama. The expenses considered only correspond to the processing of the EIP New Dryer and Compacting Plant. This project is being executed.

LPPJ: This Project is intended to enlarge the dual plant of Salar de Atacama. This will allow the plant to produce simultaneously MOP and SOP, thus, increasing its capacity. The expenses considered only correspond to the processing of the EIP Enlargement SOP. This project is being executed.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 25 - Other current and non-current non-financial assets

As of March 31, 2011 and as of December 31, 2010, the composition of the other current and non-current assets is detailed as follows:

Other current assets	3/31/2011 ThUS\$	12/31/2010 ThUS\$
Agreement termination bonus	2,072	2,108
Domestic Value Added Tax	19,581	30,795
Foreign Value Added Tax	5,562	4,167
Mine licenses prepaid	6,854	1,281
Prepaid insurances	4,353	4,575
Prepaid leases	30	30
Sea concessions	-	48
Other prepaid	1,000	86
Other assets	975	1,352
Total	40,427	44,442
Other non-current assets	3/31/2011 ThUS\$	12/31/2010 ThUS\$
Agreement termination bonus	1,070	1,538
Stain development expenses and prospecting expenses (1)	18,928	21,350
Income taxes recoverable	648	651
Deposits held in guarantee	505	514
Other assets	85	104
Total	21,236	24,157

(1) Assets for the exploration and evaluation of mineral resources are amortized when the explored or evaluated sector is exploited. For this purpose, a variable rate is applied to extracted tons, which is determined based on the measured initial reserve and evaluation cost. The Company presents expenses associated with Exploration and Evaluation of Mineral Resources. Of these expenses those that are under exploitation are included under Inventories and are amortized according to the estimated contained ore reserves and expenses associated with future reserves are presented under Other non-current assets. Those expenses incurred on properties with low ore grade which is not economically exploitable are directly charged to income. As of March 31, 2011, balances associated with the exploration and evaluation of mineral resources are presented under Inventories for ThUS\$ 5.178 (ThUS\$ 1,723 as of December 31, 2010)

SQM Los Militares 4290 Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

Nota 25 - Other current and non-current non-financial assets (continued)

Reconciliation of changes in assets for exploration and mineral resource evaluation, by classes

Movements in assets for the exploration and evaluation of mineral resources as of March 31, 2011 and December 31, 2010:

Reconciliation	3/31/2011 ThUS\$	12/31/2010 ThUS\$
Assets for the exploration and evaluation of mineral resources, net, beginning balance	21,350	26,832
Changes in assets for exploration and evaluation of mineral resources:		
Additions, different from business combinations	1,452	-
Depreciation and amortization	(449	(2,044)
Increase (decrease) for transfers and other charges	(3,425	(3,438)
Assets for exploration and evaluation of mineral resources, net, final balance	18,928	21,350

At the date of presentation, no reevaluations of assets for exploration and evaluation of mineral resources have been conducted.

Note 26 – Operating segments

26.1

Operating segments

In accordance with IFRS 8 "Operating segments", the Company provides financial and descriptive information about the segments it has defined in consideration of available annual separate financial information, which is regularly evaluated by the maximum authority in making operating decisions with the purpose of deciding how to assign resources and evaluate performance.

Operating segments relate to the following groups of products which provide profit from the performance of ordinary activities, for which the Company incurs expenses and the result of which is regularly reviewed by the Company's maximum authority in the decision-making process:

- 1.- Specialty plant nutrients
- 2.- Iodine and its derivatives
- 3.- Lithium and its derivatives
- 4.- Industrial chemicals
- 5.- Potassium chloride
- 6.- Other products and services

Information relative to assets, liabilities and profit and expenses which cannot be assigned to the segments indicated above, due to the nature of production processes, is included under the "Corporate Unit" category of information disclosed.

26.9 Information on the main customers

In respect to the degree of dependency of the Company on its customers, in accordance with paragraph 34 of IFRS 8, the Company has no external customers which individually represent 10% or more of its profit from ordinary activities. Credit risk concentrations with respect to trade and other receivables are limited due to the significant number of entities which compose the Company's portfolio and its worldwide distribution. The Company's policy is requiring guarantees (such as letters of credit, guarantee clauses and others) and/or maintaining insurance policies for certain accounts as deemed necessary by the Company's Management.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 28 – Income and deferred taxes (continued)

28.4

Income and deferred taxes

Assets and liabilities recognized in the Statement of Financial Position are offset when and only if:

1 The Company has legally recognized before the tax authority the right to offset the amounts recognized in these entries; and

2Deferred income tax assets and liabilities are derived from income tax related to the same tax authority on:

(i)the same entity of tax subject; or

(ii)different entities or subjects to tax effects who intend either to settle current fiscal assets and liabilities for their net amount, either realize assets or pay liabilities simultaneously in each of the future periods in which the Company expects to settle or recover significant amounts of deferred tax assets or liabilities.

Deferred income tax assets recognized are those income taxes to be recovered in future periods, related to:

- (a) deductible temporary differences;
- (b) the compensation of losses obtained in prior periods, which have not yet been subject to tax deduction; and
- (c) the compensation of unused credits from prior periods.

The Company recognizes a deferred tax asset when there is certainty that these can be offset with fiscal income from subsequent periods, losses or credits.

Fiscal amounts not yet used but solely as long as it is possible that there will be tax earnings in the future to charge to these losses or unused fiscal credits against them.

Deferred tax liabilities recognized are the amounts of income taxes payable in future periods related to taxable temporary differences.

d.7 Participation in taxation attributable to investments recognized according to the equity method:

The Company does not recognize any deferred income tax liability in all cases of taxable temporary differences associated with investments in subsidiaries, branches and associated companies or participations in joint ventures, because as indicated in the standard, the following two conditions are jointly met:

- (a) the controller, investor or participant is able to control the time for reversal of the temporary difference; and
 - (b) it is possible that the temporary difference is not reversed in the foreseeable future.

In addition, the Company does not recognize deferred income tax assets for all deductible temporary differences from investments in subsidiaries, branches and associated companies or participations in joint ventures because it is not possible that the following requirements are met:

- (a) temporary differences are reversed in a foreseeable future; and
- (b) the Company has tax earnings against which temporary differences can be used.

d.9 Explanation of the relationship between expense (income) for taxes and accounting income

In accordance with paragraph No. 81, letter c) of IAS 12, the Company has estimated that the method which discloses more significant information for the users of its financial statements is the reconciliation of tax expense (income) to the result of multiplying income for accounting purposes by the rate in force in Chile. This option is based on the fact that the Parent Company and its subsidiaries incorporated in Chile generate almost the total amount of tax expense (income) and the fact that amounts of subsidiaries incorporated in foreign countries have no relevant significance within the context of the total amount of tax expense (income.)

Reconciliation of tax expense (income) on tax and the result of multiplying income for accounting purposes by the rate in force in Chile

	3/31/2011 ThUS\$		3/31/2010 ThUS\$	
	Profit		Profit	
	(losses)		(losses)

d.10 Tax periods potentially subject to verification:

The Group companies are potentially subject to tax audits for income taxes by tax authorities in each country. These audits are limited to a number of annual tax periods, which, in general, when they elapse, give rise to the expiration of these inspections.

Tax audits, due to their nature, are often complex and may require several years. Below, we provide a summary of tax periods which are potentially subject to verification, in accordance with tax regulations in force in the country of origin:

a) Chile

According to article 200 of Decree Law No.830 in Chile, the tax authority may review any tax returns and perform verifications on deficiencies on its settlement and taxes applicable of up to 3 years from the expiration date of the legal term in which the payment should have been made. Additionally, this prescription will be extended to 6 years for tax reviews subject to tax returns, when this was not presented or if file presenting maliciously false information.

b) United States of America

In the United States the tax authority may review tax returns of up to 3 years old from the expiration date of the tax return. In the event of detecting an omission or error in the tax return of revenue or cost of sales, the review can be extended up to a period of 6 years.

c) Mexico:

In Mexico, the tax authority can review tax returns up to 5 years old from the expiration date of the tax return.

d) Spain:

In Spain, the tax authority can review tax returns up to 4 years old from the expiration date of the tax return.

e) Belgium:

In Belgium, the tax authority may review tax returns of up to 3 years old, from the expiration date of the tax return if no tax losses exist. In the event of detecting an omission or error in the tax return, the review can be extended up to a period of 5 years.

f) South Africa:

In South Africa, the tax authority may review tax returns of up to 3 years old, from the expiration date of the tax return. In the event of detecting an omission or error in the tax return, the review can be extended up to a period of 5 years.

Note 28 – Income and deferred taxes (continued)

28.5 Amendments to the Income Tax Law and Specific Tax on Mining (Royalty) in Chile

a) Amendment on first category income tax

Law No. 20,455 was published in the Official Gazette dated July 31, 2010 through its article No. 1., temporarily increases the First Category Income Tax established in article 20, of the Income Tax Law, for income received or accrued during 2011 and 2012.

According to the aforementioned temporary increase, the referred rate increases from 17% to 20% for income received or accrued 2011 (taxable year 2012); and to 18.5% for income received or accrued during 2012 (taxable year 2013).

For this purpose the Company identified all those temporary that would be affected as a result from this change in the tax rate, generating a charge to profit or loss for deferred taxes amounting to ThUS\$11,385

b) Amendment of the specific tax on mining activities (tax royalty)

Law No. 20,469 was published in the Official Gazette of October 21, 2010 related to the following matters:

- a. Superseded article 64 bis of Income Tax Law, which provides a specific tax to the revenue from mining activities obtained by a mining operator; and
- b. Included a new article 64 ter to the legal document referred to above related to how to determine the taxable profit for mining operations that, prior to the date of this amendment was dealt with in the article 64 bis replaced by the aforementioned law;
- c. Amendment of article 11 ter of Decree Law 600, of 1974, and
- d. Established temporary and optional standards, which investors may invoke provided that they are subject to articles 7, 11 bis and 11 ter of Decree Law 600, of 1974; transitional article 5 of Law 20,026, and can also be invoked by companies that do not receive contributions from foreign investors and are regulated by transitional article 4.

The subsidiaries SQM Salar S.A. and SQM Nitratos S.A. requested the approval to be entitled to invoke the transitional article 4 from the Ministry of Economy in order to opt beginning in 2013 and up to 5 years, to an non-variable rate of 5% as specific tax on mine. As of the date of these financial statements, the approval process is in process.

Consequently, for 2010, 2011 and 2012, there is a change in the method to determine the tax applicable to the mining activity, paying based on the mining operating margin obtained by these Companies. As of March 31, 2011, for this purpose, the Company made a provision with a charge to profit or loss of ThUS\$13,565.

Notes to the interim consolidated financial statements as of March 31, 2011

Note 30 – Impairment of assets

Assets value impairment

The Company assesses on an annual basis any impairment on the amount of Buildings, plant and equipment, intangible assets, goodwill and investments accounted for using the equity method of accounting, in accordance with IAS 36. Assets to which this methodology applies are as follows:

Investments recognized using the equity method of accounting
 Property, plant and equipment
 Intangible assets
 Goodwill

a)Impairment of investments recognized using the equity method of accounting, property, plant and equipment, intangible assets and goodwill.

Assets are reviewed for impairment as to the existence of any indication that the carrying value is lower than the recoverable amount. If such an indication exists, the asset recoverable amount is calculated in order to determine the extent of this impairment, if any. In the event that asset does not generate any cash flows independent from other assets, the Company determines the recoverable amount of the cash generating unit to which this asset belongs according to the business segment (specialty plant nutrient, iodine and derivatives, lithium and derivatives, industrial chemicals, potassium and other products and services.)

The Company conducts impairment tests to intangible assets and goodwill with indefinite useful life on an annual basis and every time there is indication of impairment.

If the recoverable value of an asset is estimated in an amount lower than its carrying value, the latter decreases to its recoverable amount.

Note 30 – Impairment of assets (continued)

b)Impairment of financial assets: For the case of financial assets with a trading origin, the Company has defined a policy for the recognition of provision for impairment in consideration of the age of the past due balance.

SQM Los Militares 4290, Las Condes, Santiago, Chile Tel: (56 2) 425 2000 www.sqm.com

Notes to the interim consolidated financial statements as of March 31, 2011

An allowance is made for impairment losses related to trade receivables when there is objective evidence that the Company will be not able to collect all the amounts owed in accordance with the original terms of receivables.

In accordance with the information presented and evaluating the indication of value impairment of any asset related to the cash flow generating unit, we may conclude that there is no evidence of indication which supports any impairment in the value of assets. Depending on value impairment indication, for the entity:

- -There are no indications of value impairment in each of intangible assets with an indefinite useful life, as well as intangible assets which are not yet available for their use, comparing their carrying amounts to their recoverable amounts.
 - There are no indications of value impairment on goodwill acquired in a business combination

Note 31 - Events occurred subsequent to the reporting date

31.1 Authorization of the financial statements

The interim consolidated financial statements of Sociedad Química y Minera S.A. and subsidiaries, prepared in accordance with IFRS for the period ended as of March 31, 2011 were approved and authorized for issuance by the Board of Directors at their meeting held on May 24, 2011

31.2 Disclosures of events occurred subsequent to the reporting date

Management is not aware of any significant events occurred between March 31, 2011 and the date of issuance of these interim consolidated financial statements which may significantly affect them.

31.3 Detail of dividends declared after the reporting date

As of the closing date of these interim consolidated financial statements, there are no dividends declared after the reporting sheet date.
