GOLDEN ENTERPRISES, INC. AND SUBSIDIARY

NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Golden Flake Snack Foods, Inc. is a wholly-owned subsidiary of Golden Enterprises, Inc. The accompanying unaudited interim condensed consolidated financial statements of Golden Enterprises, Inc. (the “Company”, “we”, or “our”), which includes the accounts of Golden Enterprises, Inc. and subsidiary, have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim condensed consolidated financial information and with the instructions to Form 10-Q. Accordingly, they do not include all information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting only of normal, recurring accruals) necessary for a fair presentation have been included. These unaudited interim condensed consolidated financial statements should be read in conjunction with the Consolidated Financial Statements and Notes included in our Form 10-K for the year ended May 29, 2015 which can be found on our website at www.goldenflake.com/financial.html. Our accounting policies are described in Note 1 to those Consolidated Financial Statements. There were no significant changes to these accounting policies during the thirteen weeks ended August 28, 2015.

The consolidated financial position, results of operations, and cash flows for the thirteen weeks ended August 28, 2015 are not necessarily indicative of the results to be expected for the fifty-three week fiscal year ending June 3, 2016.

Significant accounting policies:

Inventories

Raw materials and finished goods are stated at the lower of cost or market. Cost is computed on the first-in, first-out method.

Revenue Recognition

The Company recognizes sales and related costs upon delivery or shipment of products to its customers. Sales are reduced by estimated returns and allowances to customers.

Accounts Receivable

The Company records accounts receivable at the time revenue is recognized. Amounts for bad debt expense are recorded in selling, general and administrative expenses. The determination of the allowance for doubtful accounts is based on management's estimate of uncollectible accounts receivables. The Company records its reserve based on analysis of historical data while also considering general economic factors and specific reserves for receivable balances that are considered higher risk due to known facts regarding the customer.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Basic earnings per common share, as presented on the interim condensed consolidated statements of income, are computed by dividing earnings available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects per share amounts that would have resulted if dilutive potential common stock equivalents had been converted to common stock, as prescribed by Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 260, "Earnings per Share". At August 28, 2015, options on the 310,000 shares were not included in the computation of diluted earnings per share because the effect of stock options using the treasury stock method was antidilutive. At August 29, 2014, there were no options granted.

3. The following tables summarize the prepaid expenses accounts at August 28, 2015 and May 29, 2015:

	August 28, 2015	May 29, 2015
Truck shop supplies	\$ 306,359	\$ 320,622
Insurance deposit	48,548	48,548
Prepaid marketplace spending	170,787	201,373
Prepaid insurance	639,646	369,864
Prepaid taxes/licenses	88,527	113,042
Prepaid dues/supplies	166,304	-
Other	135,734	296,752
	\$ 1,555,905	\$ 1,350,201

4. The following tables summarize other accrued expenses at August 28, 2015 and May 29, 2015:

	August 28, 2015	May 29, 2015
Accrued salary and benefits	\$ 2,801,045	\$ 2,526,338
Accrued workers compensation	1,264,754	1,472,182
Accrued other	1,104,438	1,022,766
	\$ 5,170,237	\$ 5,021,286

The principal raw materials used in the manufacture of the Company's snack food products are potatoes, corn, pork skin pellets, vegetable oils, and seasoning. The principal supplies used are flexible film, cartons, trays, boxes, and bags. These raw materials and supplies are generally available in adequate quantities in the open market from sources in the United States and are generally contracted up to a year in advance.

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash equivalents and trade receivables.

The Company maintains deposit relationships with high credit quality financial institutions. The Company's trade receivables result primarily from its snack food operations and reflect a broad customer base, primarily large grocery

store chains located in the southeastern United States. The Company routinely assesses the financial strength of its customers. As a consequence, concentrations of credit risk are limited. The Company did not have any major customer write-offs this quarterly period that were not covered by credit insurance or during the quarterly period ended August 29, 2014.

6. The Company has a letter of credit with a local bank in the amount of \$1,850,000 at August 28, 2015 and May 29, 2015. The letter of credit supports the Company's commercial self-insurance program.

7. The Company has a line-of-credit agreement with a local bank that permits borrowing up to \$3,000,000 at August 28, 2015 and May 29, 2015. The line-of-credit is subject to the Company's continued credit worthiness and compliance at August 28, 2015 and at August 29, 2014 with the terms and conditions of the loan agreement. The Company's line-of-credit debt as of August 28, 2015 was \$831,169 with an interest rate of 3.25%, leaving the Company with \$2,168,831 of credit availability. The Company's line-of-credit debt as of May 29, 2015 was \$2,823,477 with an interest rate of 3.25%, leaving the Company with \$176,523 of credit availability.

8. The Company has two notes payable with a local bank as of August 28, 2015. The first note was established as a construction loan in March 2009 to help fund the construction of a process water treatment facility. In September 2009, the note converted to a 10-year fixed-rate note at 4.25% for \$4,000,000. In March 2011, the loan was modified by taking the remaining balance of \$3,532,700 and adding another \$2,900,000 to finance the purchase and implementation of a new Enterprise Resource Planning computer software system. At that time, the interest rate on the loan was adjusted to 3.52% and the terms were re-established at 15 years for the repayment of the loan. The Company has been making monthly payments on the note and intends to repay it at the earliest practicable date, as there are no prepayment penalties. The balance of the note was \$4,850,013 as of August 28, 2015, and \$4,944,233 as of May 29, 2015. The second note was established in order to fund the purchase of 440,875 shares of treasury stock. The \$2,204,375 note is dated January 30, 2015 and is to be repaid over 5 years at 3.3%. The balance of the note was \$1,965,213 as of August 28, 2015, and \$2,068,484 as of May 29, 2015. In July 2015, a capital lease obligation of \$98,586 was incurred when the Company entered into a 36 month lease for new server equipment. The balance of the obligation was \$93,357 as of August 28, 2015, and \$0 as of May 29, 2015.

9. The Company's effective tax rate for the thirteen weeks ended August 28, 2015 was 38.6% compared to 37.0% for the thirteen weeks ended August 29, 2014. These rates differ from the Federal statutory rate primarily due to the effect of state taxes and the permanent non-deductibility of certain expenses for income tax purposes.

ITEM 2

**MANAGEMENT’S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Management’s discussion and analysis of our consolidated financial condition, results of operations and cash flows are based upon the interim condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States (GAAP). This discussion should be read in conjunction with our recent SEC filings, including our Form 10-K for the year ended May 29, 2015. The preparation of these consolidated financial statements requires us to make estimates and judgments about future events that affect the reported amounts of assets, liabilities, revenues and expenses, and the related disclosures. Future events and their effects cannot be determined with absolute certainty. Therefore, management’s determination of estimates and judgments about the carrying values of assets and liabilities requires the exercise of judgment in the selection and application of assumptions based on various factors, including historical experience, current and expected economic conditions and other factors believed to be reasonable under the circumstances. We routinely evaluate our estimates including those considered significant and discussed in detail in our Form 10-K for the year ended May 29, 2015. Actual results may differ from these estimates under different assumptions or conditions and such differences may be material.

Overview

Golden Enterprises, Inc. (the “Company”, “we”, or “our”) is a holding company that owns all of the issued and outstanding capital stock of Golden Flake Snack Foods, Inc., a wholly-owned subsidiary (“Golden Flake”). The Company manufactures and distributes a full line of snack items, such as potato chips, tortilla chips, corn chips, fried pork skins, baked and fried cheese curls, onion rings, and puff corn. The products are all packaged in flexible bags or other suitable wrapping material. The Company also sells canned dips, pretzels, peanut butter crackers, cheese crackers, dried meat products, and nuts packaged by other manufacturers using the Golden Flake label.

No single product or product line accounts for more than 50% of the Company’s sales, which affords some protection against loss of volume due to a crop failure of major agricultural raw materials or failure to procure an adequate supply of pork skin pellets. Raw materials used in manufacturing and processing the Company’s snack food products are purchased on the open market and under contract through brokers and directly from growers. A large part of the raw materials used by the Company consists of farm commodities which are subject to precipitous changes in supply and price. Weather varies from season to season and directly affects both the quality and supply of farm commodities available. The Company has no control of the agricultural aspects and its profits are affected accordingly.

The Company sells its products through both its own sales organization and independent distributors principally to commercial establishments that sell food products primarily in the Southeastern United States. The products are distributed through the independent distributors and Company route representatives who are supplied with selling inventory by the Company's trucking fleet. All of the route representatives are employees of the Company and use the Company's direct-store delivery system.

Accounts Receivable and Allowance for Doubtful Accounts

At August 28, 2015 and May 29, 2015 the Company had accounts receivables in the amount of \$10,460,387 and \$11,085,689 respectively, net of an allowance for doubtful accounts of \$70,000. The change in accounts receivable is primarily due to the timing of collections from some of our largest customers. The Company monitors accounts receivable and collects on a daily basis and strives to keep customer accounts as current as possible.

Operating Results

For the thirteen weeks ended August 28, 2015, net sales decreased 1.2% from the thirteen weeks ended August 29, 2014 due principally to a 3rd party contract that expired at the end of the first quarter 2014. This year's first quarter cost of sales was 49.0% of net sales compared to 49.8% for last year's first quarter. This year's first quarter, selling, general and administrative expenses were 46.4% of net sales compared to 47.0% for last year's first quarter. We do not expect to see a continuing trend of declining sales going forward.

The Company did not have a gain or loss on sale of assets for the thirteen weeks ended August 28, 2015. For last year's thirteen weeks, the gain on sale of assets was \$243,944 which primarily consists of \$229,044 from the sale of real property in Decatur, Georgia.

Liquidity and Capital Resources

At August 28, 2015 and May 29, 2015, working capital was \$7,887,394 and \$6,584,930, respectively. The Company's current ratio was 1.65 to 1.00 at August 28, 2015 compared to 1.47 to 1.00 at May 29, 2015. The improvement is due to an increase of operating cash flows of approximately \$2.7 million, primarily arising from increased collections from customers and decreased expenses. The Company used approximately \$2 million of \$2.7 million in additional cash flows to substantially reduce its line of credit outstanding during the quarter ended August 28, 2015. We anticipate a continued reduction in the line of credit as cash flows allow.

Available cash, cash from operations and available credit under the line-of-credit are expected to be sufficient to meet anticipated cash expenditures and normal operating requirements for the foreseeable future.

Market Risk

The principal market risks (i.e., the risk of loss arising from adverse changes in market rates and prices), to which the Company is exposed, are interest rates on its cash equivalents and bank loans, fuel costs, and commodity prices affecting the cost of its raw materials.

The Company is subject to market risk with respect to commodities because its ability to recover increased costs through higher pricing may be limited by the competitive environment in which it operates. The Company purchases its raw materials on the open market and under contract through brokers or directly from growers. Future contracts have been used occasionally to hedge immaterial amounts of commodity purchases, but none are presently being used.

Inflation

Certain costs and expenses of the Company are affected by inflation. The Company's prices for its products over the past several years have remained relatively flat. The Company plans to contend with the effect of further inflation through efficient purchasing, improved manufacturing methods, pricing, and by monitoring and controlling expenses.

Environmental Matters

Golden Flake's waste water treatment plant is an environmentally-friendly way to dispose of process water at the Birmingham plant. The treatment plant has allowed Golden Flake to release the processing water into a neighboring creek which, we believe, has improved the flow of water in the creek and has positively impacted the environment in the area surrounding the plant. This treatment plant, we believe, has also helped to reduce expenses associated with sewer charges by the elimination of the disposal of process water through the public sewer system.

Forward-Looking Statements

This discussion contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those forward-looking statements. Factors that may cause actual results to differ materially include, but are not limited to, price competition, industry consolidation, raw material costs, and effectiveness of sales and marketing activities, as described in the Company's filings with the Securities and Exchange Commission.

ITEM 3

QUANTITATIVE AND QUALITATIVE

DISCLOSURE ABOUT MARKET RISK

Pursuant to Item 305(e) of Regulation S-K (Section 229.305(e)) the Company is not required to provide the Information under this item, as it is a "Smaller Reporting Company" as defined by Rule 229.10(f)(1).

ITEM 4

CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), as of the end of the period covered by this report. Any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of achieving the desired control objectives. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures provided reasonable assurance that the disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act and in accumulating and communicating such information to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the Company's first fiscal quarter ended August 28, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, there has been no such change during the period covered by this report.
