# Key to Security

## Abbreviations and

### Legend

ADR	American Depository Receipts London
LIBOR	Interbank Offered Rate
(C)	All or a portion of this security is segregated as collateral for options. Total collateral value at 7-31-16 was \$105,759,585.
(I)	Non-income producing security.

(L) A portion of this security is on loan as of 7-31-16, and is a component of the fund's leverage under the Liquidity Agreement. The value of securities on loan amounted to \$343,187,372.

(Q) Perpetual bonds have no stated maturity date. Date shown as maturity date is next call date.

(Z) A portion of this security is segregated as collateral pursuant to the Liquidity Agreement. Total collateral value at 7-31-16 was \$500,620,449.

\* Yield represents either the annualized yield at the date of purchase, the stated coupon rate or, for floating rate securities, the rate at period end.

At 7-31-16, the aggregate cost of investment securities for federal income tax purposes was \$1,113,223,518. Net unrealized appreciation aggregated to

\$266,329,976, of  
which  
\$289,381,854  
related to  
appreciated  
investment  
securities and  
\$23,051,878  
related to  
depreciated  
investment  
securities.

The fund had the following country composition as a percentage of total investments on 7-31-16:

United States	89.1
United Kingdom	6.4
Netherlands	2.5
Israel	1.8
France	0.2
<b>Total</b>	<b>100.0</b>

## Notes to Fund's investments (unaudited)

**Security valuation.** Investments are stated at value as of the scheduled close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 p.m., Eastern Time. In case of emergency or other disruption resulting in the NYSE not opening for trading or the NYSE closing at a time other than the regularly scheduled close, the net asset value may be determined as of the regularly scheduled close of the NYSE pursuant to the fund's Valuation Policies and Procedures. The time at which shares and transactions are priced and until which orders are accepted may vary to the extent permitted by the Securities and Exchange Commission and applicable regulations.

In order to value the securities, the fund uses the following valuation techniques: Equity securities held by the fund are typically valued at the last sale price or official closing price on the exchange or principal market where the security was acquired or most likely will be sold. In the event there were no sales during the day or closing prices are not available, the securities are valued using the last available bid price. Debt obligations are valued based on the evaluated prices provided by an independent pricing vendor or from broker-dealers. Independent pricing vendors utilize matrix pricing which takes into account factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data, as well as broker supplied prices. Options listed on an exchange are valued at the mean of the most recent bid and ask prices from the exchange where the option was acquired or most likely will be sold. Swaps are valued using evaluated prices obtained from an independent pricing vendor. Futures contracts are valued at settlement prices, which are the official closing prices published by the exchange on which they trade. Foreign securities are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing vendor.

In certain instances, the Pricing Committee may determine to value equity securities using prices obtained from another exchange or market if trading on the exchange or market on which prices are typically obtained did not open for trading as scheduled, or if trading closed earlier than scheduled, and trading occurred as normal on another exchange or market.

Other portfolio securities and assets, for which reliable market quotations are not readily available, are valued at fair value as determined in good faith by the fund's Pricing Committee following procedures established by the Board of Trustees. The frequency with which these fair valuation procedures are used cannot be predicted and fair value of securities may differ significantly from the value that would have been used had a ready market for such securities existed.

The fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes securities valued using quoted prices in active markets for identical securities. Level 2 includes securities valued using other significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these inputs are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes securities valued using significant unobservable inputs when market prices are not readily available or reliable, including the fund's own assumptions in determining the fair value of investments. Factors used in determining value may include market or issuer specific events or trends, changes in interest rates and credit quality. The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. Changes in valuation techniques and related inputs may result in transfers into or out of an assigned level within the disclosure hierarchy.

The following is a summary of the values by input classification of the fund's investments as of July 31, 2016, by major security category or type:

<b>Total value at</b>	<b>Level 1 quoted</b>	<b>Level 2 significant</b>	<b>Level 3 significant</b>

Interest rate swaps	(558,048	)	(\$558,048	)

**Repurchase agreements.** The fund may enter into repurchase agreements. When the fund enters into a repurchase agreement, it receives collateral that is held in a segregated account by the fund's custodian. The collateral amount is marked-to-market and monitored on a daily basis to ensure that the collateral held is in an amount

not less than the principal amount of the repurchase agreement plus any accrued interest. Collateral received by the fund for repurchase agreements is disclosed in the Fund's investments as part of the caption related to the repurchase agreement.

Repurchase agreements are typically governed by the terms and conditions of the Master Repurchase Agreement and/or Global Master Repurchase Agreement (collectively, MRA). Upon an event of default, the non-defaulting party may close out all transactions traded under the MRA and net amounts owed. Absent an event of default, assets and liabilities resulting from repurchase agreements are not offset. In the event of a default by the counterparty, realization of the collateral proceeds could be delayed, during which time the collateral value may decline or the counterparty may have insufficient assets to pay back claims resulting from close-out of the transactions.

**Derivative instruments.** The fund may invest in derivatives in order to meet its investment objectives. Derivatives include a variety of different instruments that may be traded in the over-the-counter (OTC) market, on a regulated exchange or through a clearing facility. The risks in using derivatives vary depending upon the structure of the instruments, including the use of leverage, optionality, the liquidity or lack of liquidity of the contract, the creditworthiness of the counterparty or clearing organization and the volatility of the position. Some derivatives involve risks that are potentially greater than the risks associated with investing directly in the referenced securities or other referenced underlying instrument. Specifically, the fund is exposed to the risk that the counterparty to an OTC derivatives contract will be unable or unwilling to make timely settlement payments or otherwise honor its obligations. OTC derivatives transactions typically can only be closed out with the other party to the transaction.

**Futures.** A futures contract is a contractual agreement to buy or sell a particular currency or financial instrument at a pre-determined price in the future. Risks related to the use of futures contracts include possible illiquidity of the futures markets and contract prices that can be highly volatile and imperfectly correlated to movements in the underlying financial instrument. Use of long futures contracts subjects the funds to the risk of loss up to the notional value of the futures contracts. Use of short futures contracts subjects the funds to unlimited risk of loss.

During the period ended July 31, 2016, the fund used futures contracts to manage against anticipated interest rate changes. The following table summarizes the contracts held at July 31, 2016:

Open contracts	Number of contracts	Position	Expiration date	Notional basis	Notional value	Unrealized appreciation (depreciation)
10-Year U.S. Treasury Note Futures	980	Short	Sep 2016	(\$126,870,091)	(\$130,385,938)	(\$3,515,847 )
						(\$3,515,847 )

Notional basis refers to the contractual amount agreed upon at inception of open contracts; notional value represents the current value of the open contract.

**Options.** There are two types of options, put options and call options. Options are traded either OTC or on an exchange. A call option gives the purchaser of the option the right to buy (and the seller the obligation to sell) the underlying instrument at the exercise price. A put option gives the purchaser of the option the right to sell (and the writer the obligation to buy) the underlying instrument at the exercise price. Writing puts and buying calls may increase the fund's exposure to changes in the value of the underlying instrument. Buying puts and writing calls may decrease the fund's exposure to such changes. Risks related to the use of options include the loss of premiums, possible illiquidity of the options markets, trading restrictions imposed by an exchange and movements in underlying security values. In addition, OTC options are subject to the risks of all OTC derivatives contracts.

When the fund purchases an option, the premium paid by the fund is included in the portfolio of investments and subsequently "marked-to-market" to reflect current market value. When the fund writes an option, the premium

received is included as a liability and subsequently "marked-to-market" to reflect current market value of the option written.

During the period ended July 31, 2016, the fund wrote option contracts to hedge against anticipated changes in securities markets and to generate potential income. The following tables summarize the fund's written options activities during the period ended July 31, 2016 and the contracts held at July 31, 2016:

	<b>Number of contracts</b>	<b>Premiums received</b>
Outstanding, beginning of period	660	\$2,243,192
Options written	6,280	15,475,851
Option closed	(5,438	) (16,091,414 )
Options exercised		
Options expired	(365	) (283,224 )
<b>Outstanding, end of period</b>	<b>1,137</b>	<b>\$1,344,405</b>

<b>Name of issuer</b>	<b>Exercise price</b>	<b>Expiration date</b>	<b>Number of contracts</b>	<b>Premium</b>	<b>Value</b>
<b>Calls</b>					
Philadelphia Utility Index	\$660	Sep 2016	95	\$99,834	(\$109,250 )
S&P 100 Index	1,020	Sep 2016	543	40,296	(24,435 )
S&P 500 Index	2,200	Aug 2016	48	32,122	(28,560 )
S&P 500 Index	4,410	Aug 2016	96	60,404	(46,762 )
S&P 500 Index	2,210	Aug 2016	48	28,282	(17,520 )
S&P 500 Index	2,165	Sep 2016	307	1,083,467	(1,089,850)

Name of issuer	Exercise price	Expiration date	Number of contracts	Premium	Value
----------------	----------------	-----------------	---------------------	---------	-------

Calls

<b>Total</b>			<b>1,137</b>	<b>\$1,344,405</b>	<b>(\$1,316,377)</b>
--------------	--	--	--------------	--------------------	----------------------

**Interest rate swaps.** Interest rate swaps represent an agreement between the fund and a counterparty to exchange cash flows based on the difference between two interest rates applied to a notional amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other. The fund settles accrued net interest receivable or payable under the swap contracts at specified, future intervals. Swap agreements are privately negotiated in the OTC market or may be executed on a registered commodities exchange (centrally cleared swaps). Upfront payments made/received by the fund are amortized/accreted for financial reporting purposes, with the unamortized/unaccreted portion included in the Statement of assets and liabilities. (include previous sentence only if applies) Swaps are marked-to-market daily and the change in value is recorded as unrealized appreciation/depreciation of swap contracts. A termination payment by the counterparty or the fund is recorded as realized gain or loss, as well as the net periodic payments received or paid by the fund. The value of the swap will typically impose collateral posting obligations on the party that is considered out-of-the-money on the swap.

During the period ended July 31, 2016, the fund used interest rate swaps to manage against anticipated interest rate changes. The following table summarizes the interest rate swap contracts held as of July 31, 2016.

Counterparty	USD notional amount	Payments made by fund	Payments received by fund	Maturity date	Market value
Morgan Stanley Capital Services	\$86,000,000	Fixed 1.4625%	3-Month LIBOR <sup>(a)</sup>	Aug 2016	(\$494,847)
Morgan Stanley Capital Services	86,000,000	Fixed 0.8750%	3-Month LIBOR <sup>(a)</sup>	Jul 2017	(63,201 )
<b>Total</b>	<b>\$172,000,000</b>				<b>(\$558,048)</b>

<sup>(a)</sup> At 7-31-16, the 3-Month LIBOR rate was 0.7591%
