Independent Accountants Review Report

Based on a report originally issued in Korean

To the Board of Directors and Stockholders

Shinhan Financial Group Co., Ltd.:

We have reviewed the accompanying non-consolidated balance sheets of Shinhan Financial Group Co., Ltd. (the Company) as of June 30, 2006 and the related non-consolidated statements of income and cash flows for the three-month and six-month periods ended June 30, 2006 and 2005. These non-consolidated financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these financial statements based on our review.

We conducted our reviews in accordance with the Review Standards for Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. These Standards require that we plan and perform the review to obtain moderate assurance as to whether the financial statements are free of material misstatement. A review consists principally of inquiries of company personnel and analytical procedures applied to financial data and, thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the non-consolidated financial statements referred to above are not presented fairly, in all material respects, in accordance with accounting principles generally accepted in the Republic of Korea.

The non-consolidated balance sheet of the Company as of December 31, 2005 and the related non-consolidated statements of income, appropriation of retained earnings and cash flows for the year then ended, which are not accompanying this report were audited by us and our report thereon, dated January 26, 2006, expressed an unqualified opinion. The accompanying non-consolidated balance sheet of the Company as of December 31, 2005, presented for comparative purposes, is not different from that audited by us in all material respects, except that the adoption of Korean Accounting Standard No. 18 resulted in an increase in retained earning and a decrease in capital adjustments of ₩1,731 million.

The accompanying non-consolidated financial statements have been translated into United States dollars solely for the convenience of the reader. We have reviewed the translation and, nothing has come to our attention to suggest that the financial statements expressed in Korean Won have not been translated into dollars on the basis set forth in note 2(b) to the financial statements.

The following matters may be helpful to the readers in their understanding of the non-consolidated financial statements:

As discussed in Note 1 to the non-consolidated financial statements, on April 1, 2006 Chohung Bank merged with Shinhan Bank with the merge ratio of 1:3.8678 and changed its name to Shinhan Bank. Additionally, Chohung Bank spun off its credit card operation and merged with Shinhan Card Co., Ltd. Each share of Chohung Bank was converted into 0.9809 shares of Shinhan Card Co., Ltd. on April 1, 2006.

Table of Contents

As discussed in Note 2(a) to the non-consolidated financial statements, accounting principles and review standards and their application in practice vary among countries. The accompanying non-consolidated financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to review such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying non-consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and review standards and their application in practice.

As discussed in Note 10 to the non-consolidated financial statements, the Company recorded assets with and interest income from related party transactions as of June 30, 2006 and December 31, 2005 and for three-month and six-month periods ended June 30, 2006 and 2005.

As discussed in Note 12 to the non-consolidated financial statements, regarding the acquisition of shares in Chohung Bank in 2003, the Company made an agreement with the Korea Deposit Insurance Corporation (the KDIC) to pay contingent consideration to the KDIC (Earn Out Payment) based on the earnings of Chohung Bank in future periods. As of June 30, 2006, the contingent consideration was not included in the acquisition cost because the amount was not determinable.

(2) **Basis of Financial Statements Presentation and Summary of Significant Accounting Policies**

(a) **Basis of Financial Statements Presentation**

The Company maintains its accounting records in Korean Won and prepares statutory non-consolidated financial statements in the Korean language in conformity with accounting principles generally accepted in the Republic of Korea. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with generally accepted accounting principles in other countries. Accordingly, these non-consolidated financial statements are intended for use only by those who are informed about Korean accounting principles and practices. The accompanying non-consolidated financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations or cash flows, is not presented in the accompanying non-consolidated financial statements.

The accompanying non-consolidated financial statements include only the accounts of the Company, and do not include the accounts of any of its subsidiaries.

(b) **Basis of Financial Statements Translation**

The non-consolidated financial statements are expressed in Korean Won and, solely for the convenience of the reader, have been translated into U.S. dollars at the rate of ₩960.30 to US\$1, the basic exchange rate on June 30, 2006. These translations should not be construed as a representation that any or all of the amounts shown could be converted into U.S. dollars at this or any other rate.

(c) **Application of the Statements of Korean Financial Accounting Standards**

The Company has adopted Statements of Korea Accounting Standards (the "SKAS") No. 18 (*Investment in Joint Venture Companies*), No. 19 (*Lease*) and No. 20 (*Related Party Disclosure*), effective from the first fiscal year beginning after December 31, 2005. Except for the adoption of the aforementioned accounting standards, the same accounting policies were applied for the non-consolidated financial statements both as of and for the six-month period ended June 30, 2006 and as of and for the year ended December 31, 2005. The non-consolidated financial statements as of and for the year ended December 31, 2005, which are presented for comparative purposes, reflect the above accounting standards. Application of these accounting standards resulted in an increase in retained earnings and decrease in equity method investment securities by ₩1,731 million.

(d) **Allowance for Loan Losses**

Allowance for doubtful accounts is estimated based on an analysis of individual accounts and past experience of collection.

(2) **Basis of Financial Statements Presentation and Summary of Significant Accounting Policies, Continued**(e) **Equity Method Investment Securities**

Equity securities held for investment in companies in which the Company is able to exercise significant control over the investees are accounted for using the equity method.

Under the equity method, the Company's initial investment is recorded at cost and is subsequently increased to reflect the Company's share of the investee income and reduced to reflect the Company's share of the investee losses or dividends received. Any excess in the Company's acquisition cost over the Company's share of the investee's identifiable net assets is considered as goodwill (negative goodwill) and amortized by the straight-line method over a reasonable period, generally less than 20 years. The amortization of goodwill is recorded against the equity income of affiliates. When events or circumstances indicate that the carrying amount may not be recoverable, the Company reviews goodwill for any impairment.

Under the equity method, the Company does not record its share of loss of an affiliate company when such loss would make the Company's investment in such entity less than zero. If the Company holds preferred stock or long-term debt issued by the affiliate, the Company's share of loss of the affiliate remains recorded until such investment is reduced to zero.

(f) **Joint Venture**

Investments in jointly controlled entities are accounted for using the equity method.

(g) **Fixed Assets**ii) **Property and equipment**

Property and equipment are stated at cost. Assets acquired through exchange, investment in kind or donation are recorded at their fair value.

Depreciation is computed by the declining-balance method using rates based on the useful lives of the respective assets or using the straight-line method over the estimated useful lives of the assets as follows:

Descriptions	Depreciation method	Useful lives
Vehicles	Declining-balance	Five years
Furniture, fixtures and other Leasehold improvement	Straight-line	

Significant additions or improvements extending useful lives of assets are capitalized. However, normal maintenance and repairs are charged to expense as incurred.

iii) **Intangible Assets**

Intangible assets are stated at cost less accumulated amortization and impairment losses. Intangible assets are amortized using the straight-line method over five years.

(2) **Basis of Financial Statements Presentation and Summary of Significant Accounting Policies, Continued**

(h) **Income Taxes**

Income tax on the income or loss for the year comprises current and deferred tax. Income tax is recognized in the statement of income. Deferred tax is recognized in the statement of income except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity.

Deferred tax is provided using the asset and liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the balance sheet date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable income will be available against which the unused tax losses and credits can be utilized. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

(i) **Discount (Premium) on Debentures**

Discount (premium) on debentures issued, which represents the difference between the face value and issuance price of debentures, is amortized using the effective interest method over the life of the debentures. The amount amortized is included in interest expense.

(j) **Retirement and Severance Benefits**

Employees who have been with the Company for more than one year are entitled to lump-sum payments based on current rates of pay and length of service when they leave the Company. The Company's estimated liability under the plan which would be payable if all employees left on the balance sheet date is accrued in the accompanying balance sheets. A portion of the liability is covered by an employees' severance benefits trust where the employees have a vested interest in the deposit with the insurance company (or the bank) in trust. The deposit for severance benefits held in trust is, therefore, reflected in the accompanying non-consolidated balance sheets as a reduction of the liability for retirement and severance benefits.

(k) **Translation of Foreign Currency Denominated Assets and Liabilities**

Monetary assets and liabilities denominated in foreign currencies are translated into Korean Won at the balance sheet dates, with the resulting gains and losses recognized in current results of operations. Monetary assets and liabilities denominated in foreign currencies are translated into Korean Won at ₩960.30 and ₩1,013.0 to US\$1, the rates of exchange on June 30, 2006 and December 31, 2005, respectively, that are permitted by Financial Accounting Standards. Non-monetary assets and liabilities denominated in foreign currencies, which are stated at historical cost, are translated into Korean Won at the foreign exchange rate ruling at the date of the transaction.

(2) **Basis of Financial Statements Presentation and Summary of Significant Accounting Policies, Continued**

(l) **Stock Options**

The stock option program allows the Company's employees to acquire shares of the Company for a specified price at specified times. The option exercise price is generally fixed at below the market price of the underlying shares at the date of the grant. The Company values equity-settled stock options based upon an option pricing model under the fair value method and recognizes this value as an expense and capital adjustment over the period in which the options vest. When the options are exercised, equity is increased by the amount of the proceeds received which is equal to the exercise price. However, compensation cost for cash-settled stock options is measured each period based on the current stock price and is recognized as an expense and a liability over the service period.

(m) **Provision**

Provisions are recognized when all of the following are met: (1) an entity has a present obligation as a result of a past event, (2) it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and (3) a reliable estimate can be made of the amount of the obligation. Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Where the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized as a separate asset when, and only when, it is virtually certain that reimbursement will be received if the Company settles the obligation. The expense relating to a provision is presented net of the amount recognized for a reimbursement.

(n) **Use of Estimates**

The preparation of non-consolidated financial statements in accordance with accounting principles generally accepted in the Republic of Korea requires management to make estimates and assumptions that affect the amounts reported in the non-consolidated financial statements and related notes to financial statements. Actual results could differ from those estimates.
