Dear Shareholder:

The U.S. economy began 2010 as it ended 2009: with solid growth. Gross domestic product expanded at an annualized rate of 2.7% between January and March, marking the third consecutive quarter of growth. This tangible evidence of an improving economy was accompanied by a roaring stock market, which continued to recover from the lows of March 2009. Investors responded by continuing to shift out of U.S. Treasury bonds and into higher-yielding corporate securities and stocks.

But the story changed rather dramatically between April and the end of June. Concerns that a handful of European governments would default on their debt, key emerging markets like China and Brazil may be cooling, and last but by no means least evidence that U.S. economic recovery may be running out of gas combined to spark a reversal. U.S. stocks dropped sharply, and the very same Treasury market that investors had just fled once again returned to favor. Treasury prices surged, pushing yields on the benchmark 10-year bond beneath 3% to their lowest levels in more than a year (bond prices and bond yields move in opposite directions).

Six Months in Review

In this see-saw environment, PCM Fund returned 27.10% on net asset value (NAV) and 31.09% on market price, for the fiscal six-month period ended June 30, 2010. In contrast, the U.S. Treasury market, as measured by the Barclays Capital U.S. Treasury Index, gained 13.20%. The Barclays Capital Mortgage Index, a broad measure of mortgage bond performance, advanced 4.59%, the Barclays Capital U.S. Aggregate Index, a broad measure of government and corporate bond performance, rose 5.33% and the Barclays Capital U.S. Credit Index, a measure of corporate bond performance, increased 5.62%.

Market signals of a possible U.S. slowdown were echoed by the Federal Reserve Board (the Fed). At the Fed's last meeting in late June, policymakers downgraded their expectations for growth, indicating it could take up to six years for the economy to get back to what they considered normal. They warned that additional stimulus measures may be needed if things were to worsen appreciably. Despite this cautious tone, the Fed began gingerly withdrawing some of the extraordinary measures put in place over the last few years as the economy unraveled. Some of these measures included the purchase of large amounts of mortgage-backed securities and Treasury bonds from commercial banks around the country; the purpose of these purchases was to encourage those banks to step up lending to businesses and consumers.

The Fed's warnings were themselves something of a reversal, coming just months after it raised the discount-rate the interest rate it charges banks for direct loans from 0.50% to 0.75%. The move was seen as a

Table of Contents

signal for banks to borrow money not from the government, but from a healthier private sector. The Fed continued to maintain its closely-watched Federal Funds Rate – the interest rate banks charge to lend federal funds to other banks, usually on an overnight basis – in the 0.0% to 0.25% range.

Positioned to Face Today's Challenges

The swift reversals in the markets over the last few months serve as yet another reminder that the U.S. economy, despite three consecutive quarters of growth, remains anemic. Consumers are cautious, the housing market tepid and the unemployment rate hovers stubbornly near double-digit levels. And with record deficits and already rock-bottom interest rates, the ability of the federal government to act seems more constrained than it did just a year or two ago.

There has been some concern that the U.S. economy could slip back into recession – the so-called “double-dip” scenario. Although there are no guarantees, a more likely outcome is for

the economy to continue expanding, albeit at a rather modest pace. It would not be unreasonable to expect occasional volatility along the lines of what we have seen in the past, and we urge investors to adjust expectations accordingly.

For specific information on the Fund and its performance, please review the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Fund's shareholder servicing agent at (800) 254-5197. In addition, a wide range of information and resources is available on our website, www.allianzinvestors.com/closedendfunds.

Together with Allianz Global Investors Fund Management LLC, the Fund's investment manager, and Pacific Investment Management Company LLC (PIMCO), the Fund's sub-adviser, we thank you for investing with us.

We remain dedicated to serving your investment needs.

Sincerely,

Hans W. Kertess

PCM Fund, Inc. Fund Insights/Performance & Statistics

June 30, 2010 (unaudited)

For the six month period ended June 30, 2010, PCM Fund, Inc. returned 27.10% on NAV and 31.09% on market price, as compared to a 30.47% return for the Barclays CMBS BBB Index, Leveraged 1.3 times.

Commercial mortgage-backed securities (CMBS) experienced mixed performance across the capital structure during the period, with more senior securities particularly BBBs underperforming lower rated securities. Despite the sell off in Treasury rates, AAA CMBS returned 9.78% during the reporting period while lower rated fixed-rate BBB CMBS returned 24.02%.

In the first quarter of 2010, CMBS benefitted from their inclusion in the Term Asset-Backed Securities Loan Facility (TALF), which helped restart the new-issue CMBS market as demand from the Public-Private Investment Partnership (PPIP) continued to support prices. AAA CMBS spreads tightened over 11% from their widest levels in the fall of 2008.

CMBS fundamentals continued to deteriorate with higher delinquencies and loss severities and a decline in property values. Commercial property prices have declined 41.1% from their peak in October 2007.

Drivers of performance:

Overall CMBS and Non-Agency exposure benefitted absolute returns, as the sectors rallied for most of the period due to limited supply and strong dealer and PPIP demand. In the last two months of the reporting period, both sectors returned some of their spread tightening as global concerns contributed to broader market volatility.

Although CMBS positively contributed to performance, exposure to high-quality CMBS detracted on a relative basis as senior CMBS positioning did not keep pace with the rally in lower rated CMBS.

Exposure to financials was negative for performance, as heightened risk aversion and uncertainty surrounding the fallout from the European sovereign debt crisis led to a broad market sell-off in the sector.

Although the Non-Agency MBS sector continued to benefit from limited supply and strong collateral performance, senior non-Agency MBS detracted from performance as the sector was unable to keep pace with the rally in BBB CMBS.

An underweight to duration detracted from performance, as rates rallied 91 basis points during the period and investors moved to flight-to-quality assets amidst global concerns.

Table of Contents

Total Return⁽¹⁾:	Market Price	NAV
Six Months	31.09%	27.10%
1 Year	82.70%	77.02%

Premium to NAV	6.52%
Market Price Yield ⁽²⁾	8.43%

Moody's Ratings

(as a % of total investments)

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) in the specified period. The calculation assumes that all income dividends and capital gain distributions if any, have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

Performance at market price will differ from its results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund's shares, or changes in Fund dividends.

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. NAV is equal to total assets less total liabilities divided by the number of shares outstanding. Holdings are subject to change daily.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

(2) Market Price Yield is determined by dividing the annualized current monthly per share dividend (comprised of net investment income) payable to shareholders by the market price per share at June 30, 2010.

Net increase in net assets resulting from investment operations \$23,343,990

Adjustments to reconcile net increase in net assets resulting from investment operations to net cash used for operating activities:

Purchases of long-term investments	(61,464,315)
Proceeds from sales of long-term investments	43,427,265
Purchases of short-term portfolio investments, net	(4,386,995)
Net change in unrealized appreciation/depreciation of investments and swaps	(17,625,723)
Net realized loss on investments and swaps	117,075
Net amortization on investments	(1,074,727)
Decrease in receivable for investments sold	403,333
Increase in interest receivable	(377,329)
Decrease in receivable for paydown principal	31,405
Increase in prepaid expenses	(11,339)
Increase in payable for investments purchased	1,666,489
Increase in payable to brokers for cash collateral received	555,000
Increase in periodic and termination payment of swaps, net	84,698
Increase in investment management fees payable	20,774
Increase in interest payable for reverse repurchase agreements	8,375
Increase in accrued expenses	6,815
Net cash used for operating activities*	(15,275,209)

Cash Flows provided by Financing Activities:

Increase in payable for reverse repurchase agreements	21,899,373
Cash dividends paid (excluding reinvestment of dividends of \$149,896)	(6,816,881)
Net cash provided by financing activities	15,082,492
Net decrease in cash	(192,717)
Cash at beginning of period	192,940
Cash at end of period	\$223

* Included in operating expenses is cash for interest primarily on reverse repurchase agreements of \$317,964.

PCM Fund, Inc. Notes to Financial Statements

June 30, 2010 (unaudited)

1. Organization and Significant Accounting Policies

PCM Fund, Inc. (the Fund) commenced operations on September 2, 1993. The Fund is registered under the Investment Company Act of 1940 (the Act), as amended, as a closed-end, non-diversified, management investment company organized as a Maryland corporation. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Fund's investment manager and is an indirect wholly-owned subsidiary of Allianz Global of America L.P. (Allianz Global). Allianz Global is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. The Fund has an unlimited amount of \$0.001 par value common stock authorized.

The Fund's primary investment objective is to achieve high current income by investing in a portfolio comprised primarily of commercial mortgage-backed securities. These securities are fixed income instruments representing an interest in mortgage loans on commercial real estate properties such as office buildings, shopping malls, hotels, apartment buildings, nursing homes and industrial properties. Capital gains from the disposition of investments is a secondary objective of the Fund.

There is no guarantee that the Fund will meet its stated objective.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the Fund's financial statements. Actual results could differ from those estimates.

In the normal course of business, the Fund enters into contracts that contain a variety of representations that provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred.

The following is a summary of significant accounting policies consistently followed by the Fund:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or for which a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to procedures established by the Board of Directors, or persons acting at their discretion pursuant to procedures established by the Board of Directors, including certain fixed income securities which may be valued with reference to securities whose prices are more readily available. The Fund's investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st

Edgar Filing: PCM FUND, INC. - Form N-CSRS

day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Fund to value securities may differ from the value that would be realized if the securities were sold and these differences could be material to the Fund's financial statements. The Fund's net asset value is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

Table of Contents**PCM Fund, Inc. Notes to Financial Statements**

June 30, 2010 (unaudited)

1. Organization and Significant Accounting Policies (continued)**(b) Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- Level 1 quoted prices in active markets for identical investments that the Fund has the ability to access
- Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges
- Level 3 valuations based on significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation technique used.

The valuation techniques used by the Fund to measure fair value during the six months ended June 30, 2010 maximized the use of observable inputs and minimized the use of unobservable inputs. When fair-valuing securities, the Fund utilized option adjusted spread pricing techniques.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Fund's policy is to recognize transfers between levels at the end of the reporting period.

A summary of the inputs used at June 30, 2010 in valuing the Fund's assets and liabilities is listed below:

	Level 1 Quoted Prices	Level 2 Other Significant Observable Inputs	Level 3 Significant Unobservable Inputs	Value at 6/30/10
Investments in Securities Assets				
Mortgaged-Backed Securities		\$ 127,560,810	\$ 6,003,343	\$ 133,564,153
Corporate Bonds & Notes:				
Airlines		4,706,000	3,365,721	8,071,721
All Other		36,757,199		36,757,199
Asset-Backed Securities		7,195,720		7,195,720
Municipal Bonds & Notes		2,209,744		2,209,744
Common Stock:				
Financial Services	\$ 534,514			534,514
Oil, Gas & Consumable Fuels			31,697	31,697

Edgar Filing: PCM FUND, INC. - Form N-CSRS

U.S. Government Agency Securities			22,652	22,652
Warrants			8,171	8,171
Short-Term Investments:				
Asset-Backed Securities			56,002	56,002
All Other		10,419,792		10,419,792
Total Investments in Securities	Assets	\$ 534,514	\$ 188,849,265	\$ 9,487,586
Other Financial Instruments*	Assets			
Credit Contracts			\$ 321,157	\$ 321,157
Other Financial Instruments*	Liabilities			
Credit Contracts			\$ (216,829)	\$ (216,829)
Total Investments		\$ 534,514	\$ 188,953,593	\$ 9,487,586
				\$ 198,975,693

* Other Financial Instruments are derivative instruments not reflected in the Schedule of Investments, such as swap agreements, which are valued at the unrealized appreciation (depreciation) of the instrument.

There were no significant transfers into and out of Levels 1 and 2 during the six months ended June 30, 2010.

Table of Contents**PCM Fund, Inc. Notes to Financial Statements**

June 30, 2010 (unaudited)

1. Organization and Significant Accounting Policies (continued)

A roll forward of fair value measurements using significant unobservable inputs (Level 3) for the six months ended June 30, 2010, was as follows:

	Beginning Balance 12/31/09	Net Purchases (Sales) and Settlements	Accrued Discounts (Premiums)	Net Realized Gain (Loss)	Net change in Unrealized Appreciation/ Depreciation	Transfers into Level 3	Transfers out of Level 3**	Ending Balance 6/30/10
Investments in Securities Assets								
Mortgaged-Backed Securities	\$ 5,440,288	\$ (562,864)	\$ 88,182	\$ 284,061	\$ 1,624,397		\$ (870,721)	\$ 6,003,343
Corporate Bonds & Notes:								
Airlines	3,298,685	(95,647)	9,762	8,836	144,085			3,365,721
Common Stock:								
Oil Gas & Consumable Fuels	33,314				(1,617)			31,697
U.S. Government Agency Securities	40,161	(17,424)	(37)	(97)	49			22,652
Warrants	6,128				2,043			8,171
Short-Term Investments:								
Asset-Backed Securities	58,579		3,422		(5,999)			56,002
Total Investments	\$ 8,877,155	\$ (675,935)	\$ 101,329	\$ 292,800	\$ 1,762,958		\$ (870,721)	\$ 9,487,586

** Transferred out of Level 3 into Level 2 because more observable inputs were available.

The net change in unrealized appreciation/depreciation of Level 3 investments which the Fund held at June 30, 2010, was \$1,314,817. Net realized gain (loss) and net change in unrealized appreciation/depreciation are reflected on the Statement of Operations.

(c) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on an identified cost basis. Interest income adjusted for the accretion of discount and amortization of premiums is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income over the lives of the respective securities. Paydown gains and losses are netted and recorded as interest income on the Statement of Operations.

(d) Federal Income Taxes

The Fund intends to distribute all of its taxable income and to comply with the other requirements of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Fund, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. Fund management has determined that its evaluation has resulted in no material impact to the Fund's financial statements at June 30,

Edgar Filing: PCM FUND, INC. - Form N-CSRS

2010. The Fund's federal tax returns for the prior three years remain subject to examination by the Internal Revenue Service.

20 PCM Fund, Inc. Semi-Annual Report 6.30.10

Table of Contents

PCM Fund, Inc. Notes to Financial Statements

June 30, 2010 (unaudited)

1. Organization and Significant Accounting Policies (continued)

(e) Dividends and Distributions

The Fund declares dividends from net investment income monthly to shareholders. Distributions of net realized capital gains, if any, are paid annually. The Fund records dividends and distributions to its shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment. Temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions of paid-in-capital in excess of par.

(f) Repurchase Agreements

The Fund enters into transactions with its custodian bank or securities brokerage firms whereby it purchases securities under agreements to resell such securities at an agreed upon price and date (repurchase agreements). The Fund, through its custodian, takes possession of securities collateralizing the repurchase agreement. Such agreements are carried at the contract amount in the financial statements, which is considered to represent fair-value. Collateral pledged (the securities received), which consists primarily of U.S. government obligations and asset-backed securities, are held by the custodian bank until maturity of the repurchase agreement. Provisions of the repurchase agreements and the procedures adopted by the Fund require that the market value of the collateral, including accrued interest thereon, be sufficient in the event of default by the counterparty. If the counterparty defaults and the value of the collateral declines or if the counterparty enters an insolvency proceeding, realization of the collateral by the Fund may be delayed or limited.

(g) Reverse Repurchase Agreements

In a reverse repurchase agreement, the Fund sells securities to a bank or broker-dealer and agrees to repurchase the securities at a mutually agreed upon date and price. Generally, the effect of such a transaction is that the Fund can recover and reinvest all or most of the cash invested in portfolio securities involved during the term of the reverse repurchase agreement and still be entitled to the returns associated with those portfolio securities. Such transactions are advantageous if the interest cost to the Fund of the reverse repurchase transaction is less than the returns it obtains on investments purchased with the cash. To the extent a Fund does not cover its positions in reverse repurchase agreements (by segregating liquid assets at least equal in amount to the forward purchase commitment), the Fund's uncovered obligations under the agreements will be subject to the Fund's limitations on borrowings. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Fund is obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of the proceeds of the agreement may be restricted pending determination by the other party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities.

(h) Mortgage-Related and Other Asset-Backed Securities

Investments in mortgage-related or other asset-backed securities include mortgage pass-through securities, collateralized mortgage obligations (CMOs), commercial mortgage-backed securities, mortgage dollar rolls, CMO residuals, stripped mortgage-backed securities (SMBSs) and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. The value of some mortgage-related or asset-backed securities may be particularly sensitive to changes in prevailing interest rates. Early repayment of principal on some mortgage-related securities may expose the Fund to a lower rate of return upon reinvestment of principal. The value of these securities may fluctuate in response to the market's perception of the creditworthiness of the issuers. The decline in liquidity and prices of these types of securities may have made it more difficult to determine fair market value. Additionally, although mortgages and mortgage-related securities are generally supported by some form of government or private guarantee and/or insurance, there is no assurance that private guarantors or insurers will meet their obligations.

Table of Contents

PCM Fund, Inc. Notes to Financial Statements

June 30, 2010 (unaudited)

1. Organization and Significant Accounting Policies (continued)

(i) U.S. Government Agencies or Government-Sponsored Enterprises

Securities issued by U.S. Government agencies or government-sponsored enterprises may not be guaranteed by the U.S. Treasury. The Government National Mortgage Association (GNMA or Ginnie Mae), a wholly-owned U.S. Government corporation, is authorized to guarantee, with the full faith and credit of the U.S. Government, the timely payment of principal and interest on securities issued by institutions approved by GNMA and backed by pools of mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Government-related guarantors not backed by the full faith and credit of the U.S. Government include the Federal National Mortgage Association (FNMA or Fannie Mae) and the Federal Home Loan Mortgage Corporation (FHLMC or Freddie Mac). Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. Government. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but its participation certificates are not backed by the full faith and credit of the U.S. Government.

(j) Interest Expense

Interest expense relates primarily to the Fund's liability in connection with reverse repurchase agreements. Interest expense is recorded as it is incurred.

2. Principal Risks

In the normal course of business, the Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Fund also is exposed to various risks such as, but not limited to, interest rate, market price and credit risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by the Fund is likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.* yield) movements.

Mortgage-related and other asset-backed securities often involve risks that are different from or more acute than risks associated with other types of debt instruments. Generally, rising interest rates tend to extend the duration of fixed rate mortgage-related securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, if a Fund holds mortgage-related securities, it may exhibit additional volatility. This is known as extension risk. In addition, adjustable and fixed rate mortgage-related securities are subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce the returns of a Fund because the Fund may have to reinvest that money at the lower prevailing interest rates. A Fund's investments in other asset-backed securities are subject to risks similar to those associated with mortgage-related securities, as well as additional risks associated with the nature of the assets and the servicing of those assets.

Variable and floating rate securities generally are less sensitive to interest rate changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, floating rate securities will not generally increase in value if interest rates decline. Inverse floating rate securities may decrease in value if interest rates increase. Inverse floating rate securities may also exhibit greater price volatility than a fixed rate obligation with similar credit quality. When a Fund holds variable or floating rate securities, a decrease (or, in the case of inverse floating rate securities, an increase) in market interest rates will adversely affect the income received from such securities and the net asset value of the Fund's shares.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

The market values of equity securities, such as common and preferred stock may decline due to general market conditions which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse

22 PCM Fund, Inc. Semi-Annual Report 6.30.10

Table of Contents

PCM Fund, Inc. Notes to Financial Statements

June 30, 2010 (unaudited)

2. Principal Risks (continued)

investor sentiment. They may also decline due to factors which affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities generally have greater market price volatility than fixed income securities.

The Fund is exposed to credit risk which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

Similar to credit risk, the Fund is exposed to counterparty risk, or the risk that an institution or other entity with which the Fund has unsettled or open transactions will default. The potential loss to the Fund could exceed the value of the financial assets recorded in the Fund's financial statements. Financial assets, which potentially expose the Fund to counterparty risk, consist principally of cash due from counterparties and investments. The Fund's sub-adviser, Pacific Investment Management Company LLC (the "Sub-Adviser"), an affiliate of the Investment Manager, seeks to minimize the Fund's counterparty risk by performing reviews of each counterparty and by minimizing concentration of credit risk by undertaking transactions with a large number of customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Fund has received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

The Fund is party to International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") with select counterparties that govern transactions, over-the-counter derivative and foreign exchange contracts, entered into by the Fund and those counterparties. The ISDA Master Agreements contain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements of the Fund.

The Fund is also a party to Master Repurchase Agreements ("Master Repo Agreements") with select counterparties. The Master Repo Agreements maintain provision for, initiation, income payments, events of default, and maintenance of collateral.

The counterparty risk associated with certain contracts may be reduced by master netting arrangements to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Fund's overall exposure to counterparty risk with respect to transactions subject to master netting arrangements can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

On September 15, 2008, Lehman Brothers Holdings Inc. filed for protection under Chapter 11 of the United States Bankruptcy Code. On September 19, 2008, a proceeding under the Securities Investor Protection Act ("SIPA") was commenced with respect to Lehman Brothers Inc. ("SLH"), a broker-dealer. A trustee appointed under SIPA is administering the bankruptcy estate of SLH. Lehman Brothers International (Europe) ("LBI") was placed in administration under the UK Insolvency Act on September 15, 2008. Lehman Brothers Special Financing Inc. ("LBSF") filed for protection under Chapter 11 of the United States Bankruptcy Code on October 3, 2008. In connection with these filings, the Lehman Brothers group of companies (collectively "Lehman Brothers") will be reorganized and/or liquidated in an orderly fashion, subject to court approval. Each Lehman Brothers entity is a separate legal entity that is subject to its own bankruptcy proceeding.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

The Fund had select holdings, credit default swap agreements, securities and derivatives transactions outstanding with Lehman Brothers entities as issuer, referenced entity, counterparty or guarantor at the time the relevant Lehman Brothers entity filed for protection or was placed in administration. The security holdings, credit default swap agreements, securities and derivatives transactions associated with LBSF as counterparty were written down to their

6.30.10 PCM Fund, Inc. Semi-Annual Report 23

Table of Contents

PCM Fund, Inc. Notes to Financial Statements

June 30, 2010 (unaudited)

2. Principal Risks (continued)

estimated recoverable values. The remaining balances due from SLH are included in receivable from broker on the Fund's Statement of Assets and Liabilities. A facilitated auction occurred on October 10, 2008 comprising multiple pre-approved brokerage agencies to determine the estimated recovery rate for holdings and credit default swap agreements with Lehman Brothers Holdings Inc. as the referenced entity. These recovery rates, as well as the current value of Senior Lehman bonds, were utilized in determining estimated recovery values for certain holdings. On September 23, 2009, LBSF returned all cash collateral to the Fund and the Fund paid all outstanding liabilities owed.

3. Financial Derivative Instruments

Disclosure about derivative instruments and hedging activities requires qualitative disclosure regarding objectives and strategies for using derivatives, quantitative disclosure about fair value amounts of gains and losses on derivative instruments, and disclosure about credit-risk-related contingent features in derivative agreements. The disclosure requirements distinguish between derivatives which are accounted for as hedges and those that do not qualify for such accounting. Although the Fund may sometimes use derivatives for hedging purposes, the Fund reflects derivatives at fair value and recognizes changes in fair value through the Fund's Statement of Operations, and such derivatives do not qualify for hedge accounting treatment. Derivative notional amounts and values as of June 30, 2010, which are disclosed in the accompanying Notes to Financial Statements, are indicative of the volume of the Fund's derivatives activities over the reporting period.

(a) Swap Agreements

Swap agreements are privately negotiated agreements between the Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified, future intervals. The Fund enters into credit default, cross-currency, interest rate, total return, variance and other forms of swap agreements in order to manage its exposure to credit, currency and interest rate risk. In connection with these agreements, securities may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Payments received or made at the beginning of the measurement period are reflected as such on the Fund's Statement of Assets and Liabilities and represent payments made or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). These upfront payments are recorded as realized gains or losses on the Fund's Statement of Operations upon termination or maturity of the swap. A liquidation payment received or made at the termination of the swap is recorded as realized gain or loss on the Fund's Statement of Operations. Net periodic payments received or paid by the Fund are included as part of realized gains or losses on the Fund's Statement of Operations.

Entering into these agreements involves, to varying degrees, elements of credit, legal, market and documentation risk in excess of the amounts recognized on the Fund's Statement of Assets and Liabilities. Such risks include the possibility that there will be no liquid market for these agreements, that the counterparties to the agreements may default on their obligation to perform or disagree as to the meaning of contractual terms in the agreements and that there may be unfavorable changes in interest rates.

Credit Default Swap Agreements Credit default swap agreements involve one party (referred to as the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive a specified return in the event of a default or other credit event for the referenced entity, obligation or index. As a seller of protection on credit default swap agreements, the Fund will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the

24 PCM Fund, Inc. Semi-Annual Report 6.30.10

Table of Contents

PCM Fund, Inc. Notes to Financial Statements

June 30, 2010 (unaudited)

3. Financial Derivative Instruments (continued)

swap and take delivery of the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation, other deliverable obligations or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. Recovery values are assumed by market makers considering either industry standard recovery rates or entity specific factors and considerations until a credit event occurs. If a credit event has occurred, the recovery value is determined by a facilitated auction whereby a minimum number of allowable broker bids, together with a specified valuation method, are used to calculate the settlement value.

Credit default swap agreements on corporate issues or sovereign issues of an emerging country involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit event. If a credit event occurs and cash settlement is not elected, a variety of other deliverable obligations may be delivered in lieu of the specific referenced obligation. The ability to deliver other obligations may result in a cheapest-to-deliver option (the buyer of protection's right to choose the deliverable obligation with the lowest value following a credit event). The Fund uses credit default swaps on corporate issues or sovereign issues of an emerging country to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where the Fund owns or has exposure to the referenced obligation) or to take an active long or short position with respect to the likelihood of a particular issuer's default.

Credit default swap agreements on asset-backed securities involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default or other credit events. Unlike credit default swaps on corporate issues or sovereign issues of an emerging country, deliverable obligations in most instances would be limited to the specific referenced obligation as performance for asset-backed securities can vary across deals. Prepayments, principal paydowns, and other writedown or loss events on the underlying mortgage loans will reduce the outstanding principal balance of the referenced obligation. These reductions may be temporary or permanent as defined under the terms of the swap agreement and the notional amount for the swap agreement will be adjusted by corresponding amounts. The Fund uses credit default swaps on asset-backed securities to provide a measure of protection against defaults of the referenced obligation or to take an active long or short position with respect to the likelihood of a particular referenced obligation's default.

Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. These indices are made up of reference credits that are judged by a poll of dealers to be the most liquid entities in the credit default swap market based on the sector of the index. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardized terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index, or in the case of a tranching index credit default swap, the credit event is settled based on the name's weight in the index that falls within the tranche for which the Fund bears exposure. The composition of the indices changes periodically, usually every six months, and for most indices, each name has an equal weight in the index. The Fund uses credit default swaps on credit indices to hedge a portfolio of credit default swaps or bonds with a credit default swap on indices which is less expensive than it would be to buy many credit default swaps to achieve a

3. Financial Derivative Instruments (continued)

similar effect. Credit-default swaps on indices are benchmarks for protecting investors owning bonds against default, and traders use them to speculate on changes in credit quality.

Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements on corporate issues or sovereign issues of an emerging country as of period end are disclosed later in the Notes to Financial Statements (see 5(a)) and serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values serve as the indicator of the current status of the payment/performance risk. Wider credit spreads and increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

The maximum potential amount of future payments (undiscounted) that the Fund as a seller of protection could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. Notional amounts of all credit default swap agreements outstanding as of June 30, 2010 for which the Fund is the seller of protection are disclosed later in the Notes to Financial Statements (see 5(a)). These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap agreements entered into by the Fund for the same referenced entity or entities.

Fair Value of Derivative Instruments at June 30, 2010

The following is a summary of the fair valuation of the Fund's derivative instruments categorized by risk exposure.

The effect of derivative instruments on the Fund's Statement of Assets and Liabilities at June 30, 2010:

Location	Credit Contracts
Asset derivatives:	
Unrealized appreciation of swaps	\$ 321,157
Liability derivatives:	
Unrealized depreciation of swaps	\$ (216,829)

The effect of derivative instruments on the Fund's Statement of Operations for the six months ended June 30, 2010:

Location	Credit Contracts
----------	---------------------

Net realized gain on:

Swaps	\$ 104,305
-------	------------

Net change in unrealized appreciation/depreciation of:

Swaps	\$ (40,883)
-------	-------------

4. Investment Manager /Sub-Adviser

The Fund has an Investment Management Agreement (the "Agreement") with the Investment Manager. Subject to the supervision of the Fund's Board of Directors, the Investment Manager is responsible for managing, either directly or through others selected by it, the Fund's investment activities, business affairs and administrative matters. Pursuant to the Agreement, the Investment Manager receives an annual fee, payable monthly, at an annual rate of 0.80% of the Fund's average daily total managed assets. Total managed assets refers to the total assets of the Fund (including assets attributable to any reverse repurchase agreements and borrowings), minus accrued liabilities (other than liabilities representing reverse repurchase agreements and borrowings).

Table of Contents**PCM Fund, Inc. Notes to Financial Statements**

June 30, 2010 (unaudited)

4. Investment Manager /Sub-Adviser (continued)

The Investment Manager has retained the Sub-Adviser to manage the Fund's investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Fund's investment decisions. The Investment Manager, and not the Fund, pays a portion of the fees it receives as Investment Manager to the Sub-Adviser in return for its services.

5. Investments in Securities

Purchases and sales of investments, other than short-term securities and U.S. government obligations for the six months ended June 30, 2010, were \$61,368,815 and \$38,550,168, respectively. Purchases and sales in U.S. government obligations were \$95,500 and \$742,542, respectively.

					\$ (273,672)	\$ (378,000)	\$ 104,328

(1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) Implied credit spreads, represented in absolute terms, utilized in determining the market value of credit default swap agreements as of year end serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for the credit derivative. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Wider credit spreads represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

(3) The maximum potential amount the Fund could be required to make available as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

- (4) The quoted market prices and resulting values for credit default swap agreements serve as an indicator of the status at June 30, 2010 of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement been closed/sold as of the period end. Increasing market values, in absolute terms when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

collateral (refer to the Schedule of Investments for positions segregated as collateral for reverse repurchase agreements) for open reverse repurchase agreements at June 30, 2010 was \$101,563,760.

The Fund received \$666,247 in principal value of Corporate Bonds and \$555,000 in cash as collateral for reverse repurchase agreements outstanding. Cash collateral received may be invested in accordance with the Fund's investment strategy. Collateral received in the form of securities will not be pledged.

6. Income Tax Information

Net investment income and net realized gains differ for financial statement and federal income tax purposes primarily due to the treatment of amounts received under swap agreements. For the six months ended June 30, 2010, the Fund received \$170,752 from swap agreements, which are treated as net realized gain (loss) for financial statement purposes and as net income (loss) for federal income tax purposes.

The cost basis of portfolio securities of \$196,237,096 is substantially the same for both federal income tax purposes and financial reporting purposes. Aggregate gross unrealized appreciation for securities in which there is an excess of value over tax cost is \$14,307,123; aggregate gross unrealized depreciation for securities in which there is an excess of tax cost over value is \$11,672,854; and net unrealized appreciation for federal income tax purposes is \$2,634,269.

7. Legal Proceedings

In June and September 2004, the Investment Manager and certain of its affiliates (including PEA Capital LLC ("PEA"), Allianz Global Investors Distributors LLC and Allianz Global Investors of America, L.P.), agreed to settle, without admitting or denying the allegations, claims brought by the Securities and Exchange Commission ("SEC") and the New Jersey Attorney General alleging violations of federal and state securities laws with respect to certain open-end funds for which the Investment Manager serves as investment adviser. The settlements related to an alleged market timing arrangement in certain open-end funds formerly sub-advised by PEA. The Investment Manager and its affiliates agreed to pay a total of \$68 million to settle the claims. In addition to monetary payments, the settling parties agreed to undertake certain corporate governance, compliance and disclosure reforms related to market timing, and consented to cease and desist orders and censures. Subsequent to these events, PEA deregistered as an investment adviser and dissolved. None of the settlements alleged that any inappropriate activity took place with respect to the Fund.

Since February 2004, the Investment Manager and certain of its affiliates and their employees have been named as defendants in a number of pending lawsuits concerning market timing, which allege the same or similar conduct underlying the regulatory settlements discussed above. The market timing lawsuits have been consolidated in a multi-district litigation proceeding in the U.S. District Court for the District of Maryland (the "MDL Court"). After a number of claims in the lawsuits were dismissed by the MDL Court, the parties entered into a stipulation of settlement, which was publicly filed with the MDL Court in April 2010, resolving all remaining claims, but the settlement remains subject to the approval of the MDL Court.

In addition, the Sub-Adviser is the subject of a lawsuit in the Northern District of Illinois Eastern Division in which the complaint alleges that plaintiffs each purchased and sold a 10-year Treasury note futures contract and suffered damages from an alleged shortage when the Sub-Adviser held both physical and futures positions in 10-year Treasury notes for its client accounts. In July 2007, the court granted class certification of a class consisting of those persons who purchased futures contracts to offset short positions between May 9, 2005 and June 30, 2005. The Sub-Adviser currently believes that the complaint is without merit and the Sub-Adviser intends to vigorously defend against this action.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

The Investment Manager and the Sub-Adviser believe that these matters are not likely to have a material adverse effect on the Fund or on their ability to perform their respective investment advisory activities relating to the Fund.

PCM Fund, Inc. Matters Relating to the Directors – Consideration of the Investment

Management and Portfolio Management Agreements (unaudited)

The Investment Company Act of 1940, as amended, requires that both the full Board of Directors (the “Directors”) and a majority of the non-interested Directors (the “Independent Directors”), voting separately, annually approve the continuance of the Fund’s Management Agreements with the Investment Manager (the “Advisory Agreement”) and Portfolio Management Agreement (the “Sub-Advisory Agreement”, and together with the Advisory Agreement, the “Agreements”) between the Investment Manager and the Sub-Adviser. The Directors met in person on June 22-23, 2010 (the “contract review meeting”) for the specific purpose of considering whether to approve the continuation of the Advisory Agreement and the Sub-Advisory Agreement. The Independent Directors were assisted in their evaluation of the Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the contract review meeting.

Based on their evaluation of factors that they deemed to be material, including those factors described below, the Board of Directors, including a majority of the Independent Directors, concluded that the continuation of the Fund’s Advisory Agreement and the Sub-Advisory Agreement should be approved for a one-year period commencing July 1, 2010.

In connection with their deliberations regarding the continuation of the Agreements, the Directors, including the Independent Directors, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Directors considered the nature, quality, and extent of the various investment management, administrative and other services performed by the Investment Manager or the Sub-Adviser under the applicable Agreements.

In connection with contract review meeting, the Directors received and relied upon materials provided by the Investment Manager which included, among other items: (i) information provided by Lipper Inc. (“Lipper”) on the total return investment performance (based on net assets) of the Fund for various time periods, the investment performance of a group of funds with substantially similar investment classifications/objectives as the Fund identified by Lipper and the performance of applicable benchmark indices, (ii) information provided by Lipper on the Fund’s management fees and other expenses and the management fees and other expenses of comparable funds identified by Lipper, (iii) information regarding the investment performance and management fees of comparable portfolios of other clients of the Sub-Adviser, (iv) the estimated profitability to the Investment Manager and the Sub-Adviser from their relationship with the Fund for the one year period ended March 31, 2010, (v) descriptions of various functions performed by the Investment Manager and the Sub-Adviser for the Fund, such as portfolio management, compliance monitoring and portfolio trading practices, and (vi) information regarding the overall organization of the Investment Manager and the Sub-Adviser, including information regarding senior management, portfolio managers and other personnel providing investment management, administrative and other services to the Fund.

The Directors’ conclusions as to the continuation of the Agreements were based on a comprehensive consideration of all information provided to the Directors and were not the result of any single factor. Some of the factors that figured particularly in the Directors’ deliberations are described below, although individual Directors may have evaluated the information presented differently from one another, attributing different weights to various factors.

As part of their review, the Directors examined the Investment Manager’s and the Sub-Adviser’s abilities to provide high quality investment management and other services to the Fund. The Directors considered the investment philosophy and research and decision-making processes of the Sub-Adviser; the experience of key advisory personnel of the Sub-Adviser responsible for portfolio management of the Fund; the ability of the Investment Manager and the Sub-Adviser to attract and retain capable personnel; the capability and integrity of the senior management and staff of the Investment Manager and the Sub-Adviser; and the level of skill required to manage the Fund. In addition, the Directors reviewed the quality of the Investment Manager’s and the Sub-Adviser’s services with respect to regulatory compliance and compliance with the investment policies of the Fund; the nature and quality of certain administrative services the Investment Manager is responsible for providing to the Fund; and

Table of Contents

PCM Fund, Inc. Matters Relating to the Directors Consideration of the Investment

Management and Portfolio Management Agreements (unaudited)

conditions that might affect the Investment Manager's or the Sub-Adviser's ability to provide high quality services to the Fund in the future under the Agreements, including each organization's respective business reputation, financial condition and operational stability. Based on the foregoing, the Directors concluded that the Sub-Adviser's investment process, research capabilities and philosophy were well suited to the Fund given its investment objective and policies, and that the Investment Manager and the Sub-Adviser would be able to continue to meet any reasonably foreseeable obligations under the Agreements.

Based on information provided by Lipper, the Directors also reviewed the Fund's total return investment performance as well as the performance of comparable funds identified by Lipper. In the course of their deliberations, the Directors took into account information provided by the Investment Manager in connection with the contract review meeting, as well as during investment review meetings conducted with portfolio management personnel during the course of the year regarding the Fund's performance.

In assessing the reasonableness of the Fund's fees under the Agreements, the Directors considered, among other information, the Fund's management fee and the total expense ratio as a percentage of average net assets attributable to common shares and the management fee and total expense ratios of comparable funds identified by Lipper.

The Directors specifically took note of how the Fund compared to its Lipper peers as to performance, management fee expense and total expenses. The Directors noted that the Investment Manager had provided a memorandum containing comparative information on the performance and expenses information of the Fund compared to the its Lipper peer categories. The Directors noted that while the Fund is not charged a separate administration fee, it was not clear whether the peer funds in the Lipper categories were charged such a fee by their investment managers.

The Directors noted that the expense group for the Fund provided by Lipper is small, consisting of a total of seven leveraged closed-end funds, including the Fund. The Directors also noted that average net assets of the common shares of the seven funds ranged from \$58.7 million to \$225.1 million, and that four of the funds are larger in asset size than the Fund. The Directors also noted that the Fund was ranked fifth out of seven funds in the expense peer group for actual management fees and third out of seven funds for actual total expenses (with funds ranked first having the lowest fees/expenses and ranked seventh having the highest fees/expenses in the peer group).

With respect to performance, the Directors also noted that the Fund's performance had recently improved. Specifically, the Directors noted that the Fund outperformed its benchmark and had top quintile performance for the one-year period ended March 31, 2010. The Directors also noted that the Fund had fourth quintile performance for the three-year and five-year periods ended March 31, 2010 and third quintile performance for the ten-year period ended March 31, 2010. At the request of the Directors, the Investment Manager and Sub-Adviser agreed to continue to provide performance information related to the Fund on a monthly basis.

Because the Sub-Adviser does not manage any funds or institutional separate accounts with investment strategies similar to the Fund, the Directors did not consider the management fees charged by the Sub-Adviser to other clients.

Based on a profitability analysis provided by the Investment Manager, the Directors also considered the estimated profitability of the Investment Manager and the Sub-Adviser from their relationship with the Fund and determined that such profitability was down from last year and did not appear to be excessive.

Edgar Filing: PCM FUND, INC. - Form N-CSRS

The Directors also took into account that, as a closed-end investment company, the Fund does not currently intend to raise additional assets, so the assets of the Fund will grow (if at all) only through the investment performance of the Fund. Therefore, the Directors did not consider potential economies of scale as a principal factor in assessing the fee rates payable under the Agreements.

Management and Portfolio Management Agreements (unaudited)

Additionally, the Directors considered so-called “fall-out benefits” to the Investment Manager and the Sub-Adviser, such as reputational value derived from serving as Investment Manager and Sub-Adviser to the Fund.

After reviewing these and other factors described herein, the Directors concluded with respect to the Fund, within the context of their overall conclusions regarding the Agreements and based on the information provided and related representations made by management, that the fees payable under the Agreements represent reasonable compensation in light of the nature and quality of the services being provided by the Investment Manager and Sub-Adviser to the Fund.

ITEM 2. CODE OF ETHICS

(A) N/A

(B) The CODE OF ETHICS PURUANT TO SECTION 406 OF THE SARBANES-OXLEY ACT OF 2002 FOR PRINICIPAL EXECUTIVE AND SENIOR FINANCIAL OFFICERS (THE Code) was updated to remove interested trustees from being subject to the Code, which is not required under Section 406 of the Sarbanes-Oxley Act of 2002. The Code also was updated to remove examples of specific conflict of interest situations and to add an annual certification requirement for Covered Officers. In addition, the approval or ratification process for material amendments to the Code was clarified to include approval by a majority of the independent trustees. The registrant undertakes to provide a copy of such code of ethics to any person upon request, without charge, by calling 1-800-254-5197. The Investment Manager s code of ethics is included as an exhibit Exhibit 99.CODE ETH hereto.
