FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains statements reflecting assumptions, expectations, projections, intentions or beliefs about future events that are intended as forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements included in this report, other than statements of historical fact, that address activities, events or developments that we expect, believe or anticipate will or may occur in the future are forward-looking statements. These statements appear in a number of places, including Management's Discussion and Analysis of Financial Condition and Results of Operations. These statements represent our reasonable judgment on the future based on various factors and using numerous assumptions and are subject to known and unknown risks, uncertainties and other factors that could cause our actual results and financial position to differ materially from those contemplated by the statements. You can identify these statements by the fact that they do not relate strictly to historical or current facts. They use words such as anticipate, believe, estimate, expect, forecast, may, should, plan, project and other words of similar meaning. In particular, these include, but are not limited to, statements relating to the following:

projected operating or financial results, including anticipated cash flows from operations and asset sale proceeds;

expectations regarding capital expenditures, interest expense and other payments;

our beliefs and assumptions relating to our liquidity position, including our ability to adapt to changing market conditions; and

our ability to compete effectively for market share with industry participants.

Any or all of our forward-looking statements may turn out to be wrong. They can be affected by inaccurate assumptions or by known or unknown risks, uncertainties and other factors including, among others:

supply, demand, prices and other market conditions for steel and other commodities;

the timing and extent of changes in commodity prices;

the effects of competition on our business lines;

the condition of the steel and metal markets generally, which will be affected by interest rates, foreign currency fluctuations and general economic conditions;

the ability of our counterparties to satisfy their financial commitments;

tariffs and other government regulations relating to our products and services;

adverse developments in our relationship with both our key employees and unionized employees;

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

operational factors affecting the ongoing commercial operations of our facilities, including catastrophic weather-related damage, regulatory approvals, permit issues, unscheduled blackouts, outages or repairs, unanticipated changes in fuel costs or availability of fuel emission credits or workforce issues;

our ability to operate our businesses efficiently, manage capital expenditures and costs (including general and administrative expenses) and generate earnings and cash flow;

restrictive covenants in our indebtedness that may adversely affect our operational flexibility;

general political conditions and developments in the United States and in foreign countries whose affairs affect supply, demand and markets for steel, other metals and metal products;

our ability to retain key employees; and

our expectations with respect to our acquisition activity.

In addition, there may be other factors that could cause our actual results to be materially different from the results referenced in the forward-looking statements, some of which are included elsewhere in this report, including Management's Discussion and Analysis of Financial Condition and Results of Operations. Many of these factors will be important in determining our actual future results. Consequently, no forward-looking statement can be guaranteed. Our actual future results may vary materially from those expressed or implied in any forward-looking statements. All forward-looking statements contained in this report are qualified in their entirety by this cautionary statement. Forward-looking statements speak only as of the date they are made, and we disclaim any obligation to update any forward-looking statements to reflect events or circumstances after the date of this report, except as otherwise required by applicable law.

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(dollars in millions)

1. Basis of Presentation and Summary of Significant Accounting Policies

Metals USA Holdings Corp. (Metals USA Holdings) and its 100% wholly owned subsidiaries, Flag Intermediate Holdings Corporation (Flag Intermediate) and Metals USA, Inc. (Metals USA) are referred to collectively herein as the Company, we or our. Metals USA prior to its November 30, 2005 acquisition by Apollo Management V L.P. (Apollo Management and together with its affiliated investment entities Apollo or Apollo V) (the Merger) is referred to herein as the Predecessor Company. The condensed consolidated financial statements include the accounts of Metals USA Holdings, Flag Intermediate, and Metals USA and its subsidiaries. Intercompany accounts and transactions have been eliminated in the condensed consolidated financial statements.

The interim condensed consolidated financial statements included herein are unaudited; however, they include adjustments of a normal recurring nature which, in our opinion, are necessary to present fairly the interim condensed consolidated financial information as of and for the periods indicated. Accounting measurements at interim dates inherently involve greater reliance on estimates than at year-end. The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for the entire year. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires management to make estimates and assumptions that affect (i) the reported amounts of assets and liabilities, (ii) the disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and (iii) the reported amount of net sales and expenses recognized during the periods presented. Adjustments made with respect to the use of estimates often relate to improved information not previously available. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of financial statements; accordingly, actual results could differ from these estimates.

Fair Value of Financial Assets and Liabilities Accounting Standards Codification (ASC) Topic 820 Fair Value Measurements and Disclosures (ASC 820) defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 classifies the inputs used to measure fair value into the following hierarchy:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. The Company's interest rate swap derivatives are valued using market data which is derived by combining certain inputs with quantitative models and processes to generate interest rate forward curves and discount factors (see Note 5).

Level 3 Unobservable inputs that are supported by little or no market activity, but which are significant to the fair value of the assets or liabilities as determined by market participants.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

Liabilities measured at fair value on a recurring basis are summarized below:

	March 31, 2011	Fair Value Measurements at Reporting Date Using		
		Level 1	Level 2	Level 3
Interest rate swaps	\$ 0.9	\$	\$ 0.9	\$

	December 31, 2010			
Interest rate swaps	\$ 2.3	\$	\$ 2.3	\$

Our receivables, payables, prepayments and accrued liabilities are current assets and obligations and, accordingly, the recorded values are believed by management to approximate fair value. Our 11 1/8% Senior Secured Notes due 2015 (the Metals USA Notes) are thinly traded public debt instruments; accordingly, their market prices at any balance sheet date may not be representative of the prices which would be derived from a more active market. The fair value of publicly traded debt is determined based on quoted market prices. The fair value of the Company's debt that is not traded and is fixed-rate is estimated by discounting the interest payments and principal amount at the Company's current borrowing rate (yield to maturity). For floating rate debt that is not traded, fair value is not sensitive to interest rates since coupons float with Treasury or London Interbank Offered Rate (LIBOR) yields, and book value is a reasonable approximation of fair value after considering the stability of the Company's default risk. The estimated fair value of current and long-term debt at March 31, 2011 and December 31, 2010 was \$492.8 and \$357.5, respectively.

New Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-29 *Business Combinations (Topic 805) Disclosure of Supplementary Pro Forma Information for Business Combinations* (ASU 2010-29) which amended ASC Topic 805 *Business Combinations* to specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the year had occurred as of the beginning of the comparable prior annual reporting period only. The ASU also expands the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and the amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The ASU is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. We have disclosed the required information in accordance with ASU 2010-29 as it relates to the Trident acquisition described in Note 2 below.

2. Acquisitions***The Richardson Trident Company***

On March 11, 2011, we acquired 100% of the outstanding common shares of The Richardson Trident Company (Trident). Trident's results of operations have been included in the condensed consolidated statement of operations since the date of acquisition. Trident is a general line metal service center with fabricating capabilities designed to service the oil and gas industry, and is also a wholesale distributor of metals, plastics and electronic parts. Trident operates under The Trident Company and The Altair Company trade names. Trident's

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

principal facility is in Richardson, Texas with branch locations in Houston, Austin, El Paso, Harlingen and Odessa, Texas; Tulsa, Oklahoma; Olathe, Kansas; Los Angeles, California; Boston, Massachusetts and Thomasville, Georgia. The Company paid \$90.7 in cash for the equity of Trident, which included \$54.2 for the repayment of Trident debt and \$1.8 in the form of a note payable. The purchase was funded with borrowings under our \$500.0 amended and restated senior secured asset-based credit facility due 2015 (the ABL facility).

The excess of the aggregate purchase price over the estimated fair value of the net assets acquired was \$8.7, which was allocated to goodwill. Goodwill arising from the acquisition consists largely of the synergies and economies of scale expected from combining the operations of Metals USA and Trident. All of the goodwill was assigned to the Company's Flat Rolled and Non-Ferrous Segment (see Note 4). The Trident acquisition was a taxable business combination and as such, the entire amount of the goodwill recognized is expected to be deductible for income tax purposes.

The estimated amount of goodwill and related allocations of the fair values assigned to assets acquired and liabilities assumed are based on preliminary data and are subject to change based on the final valuation of tangible and intangible assets. The following table presents the provisional allocation of the acquisition cost to the assets acquired and liabilities assumed, based on their estimated fair values:

	March 11, 2011
Accounts receivable, trade	\$ 17.5
Inventories	18.1
Other current assets	0.1
Property and equipment	49.0
Customer list intangible asset	18.0
Trade name intangible asset	3.3
Goodwill	8.7
 Total assets acquired	 114.7
 Accounts payable and accrued liabilities	 24.1
Note payable	1.8
 Total liabilities assumed	 25.9
 Net assets acquired	 \$ 88.8

Results for the quarter ended March 31, 2011 include operating results from the Trident acquisition from the date of the acquisition closing, which occurred on March 11, 2011. Trident contributed \$9.2 of incremental sales and \$0.6 of operating income for the quarter ended March 31, 2011. Acquisition-related costs for the period ended March 31, 2011 amounted to approximately \$1.2 million, and are included in selling, general and administrative expenses in the Company's condensed consolidated statement of operations.

Trident provides a broad range of metals and processing services with a product mix that emphasizes aluminum, stainless steel and nickel. The majority of Trident's customer base operates in the oil and gas services sector. Trident also serves customers in the aerospace, defense and transportation industries. Processing services include precision sawing, boring, honing, slitting, sheeting, shearing and tuning. Trident also offers supply chain solutions such as just-in-time delivery and value-added components required by original equipment manufacturers. As a result of the acquisition, we expect to expand our position as a leading integrated metals processor and distributor in additional markets, as well as enhance our non-ferrous and value-added processing product and service offerings.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

The following unaudited pro forma information presents our consolidated results of operations as if the Trident acquisition had occurred on January 1, 2010, after the effect of certain adjustments, including increased depreciation expense resulting from recording fixed assets at fair value, interest expense on the acquisition debt, amortization of certain identifiable intangible assets, severance costs for certain Trident employees that were terminated as of the acquisition date, certain other non-recurring costs that we will not incur after taking control of Trident, and a provision for income taxes for Trident, which was previously treated as an S-Corporation.

	Three Months Ended March 31,	
	2011	2010
Net sales	\$ 458.1	\$ 322.9
Net income	\$ 11.8	\$ 0.2
Earnings per share basic	\$ 0.32	\$ 0.1
Earnings per share diluted	\$ 0.32	\$ 0.1

Ohio River Metal Services

On December 31, 2010, we acquired all of the issued and outstanding stock of Ohio River Metal Services (ORMS), located in Jeffersonville, Indiana. The results of operations of ORMS have been included in the condensed consolidated statement of operations since the date of acquisition. ORMS operates a flat rolled metal service center that provides metal products and processing services to customers throughout the Ohio Valley. The purchase price for ORMS was \$17.8, including the assumption of \$8.4 of long-term debt, and was funded with borrowings under the ABL facility. The excess of the aggregate purchase price over the estimated fair value of the net assets acquired was \$0.4, which was allocated to goodwill. The estimated amount of goodwill and related allocations of the fair values assigned to assets acquired and liabilities assumed are based on preliminary data and are subject to change based on the final valuations. The following table presents the allocation of the acquisition cost to the assets acquired and liabilities assumed, based on their estimated fair values:

	December 31, 2010
Accounts receivable, trade	\$ 2.6
Inventories	5.0
Other current assets	0.1
Property and equipment	18.3
Fulfillment contract intangible asset	0.8
Goodwill	0.4
Total assets acquired	27.2
Accounts payable and accrued liabilities	5.6
Long-term debt	8.4
Interest rate swaps	0.5
Deferred tax liabilities	3.3
Total liabilities assumed	17.8
Net assets acquired	\$ 9.4

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

The fulfillment contract intangible asset will be amortized on a straight-line basis over fifteen years based on its estimated useful life. The pro forma effects of the ORMS acquisition would not have been material to our results of operations for the quarter ended March 31, 2011 and, therefore, are not presented.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)*****J. Rubin & Co.***

On June 28, 2010, we acquired all of the issued and outstanding stock of J. Rubin & Co. (J. Rubin) for \$19.0. J. Rubin's results of operations have been included in the condensed consolidated statement of operations since the date of acquisition. The purchase price was funded with existing cash, \$17.8 of which was paid at closing and \$1.2 of which was placed in escrow to secure the sellers' indemnity obligations. The purchase price included \$6.0 for the repayment of J. Rubin debt at closing. The excess of the aggregate purchase price over the estimated fair value of the net assets acquired was \$3.5, which was allocated to goodwill. The following table presents the allocation of the acquisition cost to the assets acquired and liabilities assumed, based on their estimated fair values:

	June 28, 2010
Accounts receivable, trade	\$ 3.8
Inventories	5.8
Other current assets	0.2
Property and equipment	9.7
Customer list intangible asset	2.0
Goodwill	3.5
Total assets acquired	25.0
Accounts payable and accrued liabilities	2.5
Deferred tax liabilities	3.5
Total liabilities assumed	6.0
Net assets acquired	\$ 19.0

The customer list intangible asset will be amortized on a straight-line basis over ten years based on its estimated useful life. The pro forma effects of the J. Rubin acquisition would not have been material to our results of operations for the three months ended March 31, 2011 and, therefore, are not presented.

J. Rubin is a metal service center business that operates in Illinois, Wisconsin and Minnesota with a broad product mix consisting of carbon steel bars, carbon plate and laser-cut flat-rolled products. J. Rubin's product mix and processing services are provided to a diverse range of end markets.

(dollars in millions)

3. Inventories

Inventories consist of the following:

	March 31, 2011	December 31, 2010
Raw materials		
Plates and Shapes	\$ 149.6	\$ 138.6
Flat Rolled and Non-Ferrous	143.4	108.3
Building Products	5.4	5.4
Total raw materials	298.4	252.3
Work-in-process and finished goods		
Plates and Shapes		
Flat Rolled and Non-Ferrous	28.9	29.3
Building Products	11.0	9.2
Total work-in-process and finished goods	39.9	38.5
Total inventories	\$ 338.3	\$ 290.8

4. Goodwill and Intangible Assets

The changes in the carrying amounts of goodwill by segment for the three months ended March 31, 2011 are as follows:

	As of December 31, 2010	Acquisitions/ Purchase Accounting Adjustments	Realization of Tax Benefits	Currency Translation	As of March 31, 2011
Plates and Shapes					
Gross Goodwill and Carrying Amount of Goodwill	\$ 14.9	\$	\$ (0.1)	\$	\$ 14.8
Flat Rolled and Non-Ferrous					
Gross Goodwill and Carrying Amount of Goodwill	24.4	8.7			33.1
Building Products					
Gross Goodwill and Carrying Amount of Goodwill	2.2			0.1	2.3
Corporate					
Gross Goodwill	10.0		(0.5)		9.5
Impairments	(4.2)				(4.2)
Carrying Amount of Goodwill	5.8		(0.5)		5.3

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

Consolidated Total						
Gross Goodwill	51.5	8.7	(0.6)	0.1	59.7	
Impairments	(4.2)				(4.2)	
Carrying Amount of Goodwill	\$ 47.3	\$ 8.7	\$ (0.6)	\$ 0.1	\$ 55.5	

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

Changes in goodwill recorded at the Flat Rolled and Non-Ferrous segment for the three months ended March 31, 2011 are attributable to the Trident acquisition, which closed on March 11, 2011, discussed in Note 2. Changes in goodwill recorded at the Corporate and Plates and Shapes segments for the three months ended March 31, 2011, are attributable to accounting for tax benefits associated with tax-deductible goodwill recognized in connection with the Merger and the acquisition of Port City Metal Services (Port City), respectively, which were taxable business combinations. Changes in goodwill recorded at the Building Products segment are attributable to the effect of foreign currency.

The carrying amounts of the Company's intangible assets are as follows:

	March 31, 2011	December 31, 2010
Customer lists	\$ 60.8	\$ 42.8
Less: Accumulated amortization	(39.5)	(38.8)
	\$ 21.3	\$ 4.0
Trade names	\$ 6.6	\$ 3.3
Less: Accumulated amortization	(0.8)	(0.7)
	\$ 5.8	\$ 2.6
Fulfillment contract	\$ 0.8	\$ 0.8
Less: Accumulated amortization		
	\$ 0.8	\$ 0.8

During the quarter ended March 31, 2011, we acquired \$18.0 of customer list intangible assets and \$3.3 of trade name intangible assets as a result of the Trident acquisition discussed in Note 2.

Aggregate amortization expense for the three months ended March 31, 2011 and 2010 was \$0.8 and \$1.1, respectively.

Aggregate remaining amortization of our intangible assets is as follows:

For the Year Ending December 31,	Estimated Amortization Expense
2011 (remaining 9 months)	\$ 2.6
2012	\$ 2.5
2013	\$ 2.0
2014	\$ 1.9
2015	\$ 1.9
Thereafter	\$ 17.0

5. Derivatives

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

In February 2008, we entered into a series of interest rate swap agreements that entitle us to receive quarterly payments of interest at a floating rate indexed to the three-month LIBOR and pay a fixed rate that ranges from 2.686% to 2.997%, thereby converting a combined \$250.0 notional amount of the outstanding borrowings on our ABL facility from a floating rate obligation to a fixed rate obligation. The agreements will be

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(dollars in millions)

fully expired as of May 16, 2011. We account for gains and losses on our interest rate swap derivatives based on realized and unrealized amounts. Realized gains and losses are determined by actual derivative settlements during the period. Unrealized gains and losses are based on the periodic mark to market valuation of our derivative contracts in place.

The primary objective for our use of these interest rate hedges is to reduce our exposure to changes in interest rates on the ABL facility. The Company endeavors to finance its investment in working capital at the lowest possible cost and to manage variable interest rate exposure to achieve greater flexibility in meeting overall financial objectives.

In November 2004 and December 2007, ORMS, which we acquired on December 31, 2010, entered into two separate interest rate swap agreements in connection with the Jeffersonville, Indiana Industrial Revenue Bonds (IRBs) discussed in Note 8. The notional amounts under these swaps correspond to the principal amounts of the IRBs, which were a combined \$7.7 as of March 31, 2011, and are reduced on an annual basis as the IRBs are redeemed. Under the swaps, the notional amounts under the Jeffersonville IRBs were swapped from a floating rate based on a rate established by the Securities Industry and Financial Market Association (SIFMA) to fixed rates of 4.00% and 3.75%, converting the outstanding borrowings on the Jeffersonville IRBs from floating rate obligations to fixed rate obligations. Pretax realized gains and losses from these derivatives are recognized in earnings as an addition or reduction to interest expense, consisting of cash settlements and changes in the fair value of derivatives.

The following table presents the location within the condensed consolidated balance sheet of all assets and liabilities associated with the Company's outstanding derivatives at March 31, 2011 and December 31, 2010.

Derivatives not designated as		Asset Derivatives		Liability Derivatives	
hedging instruments under		Fair Value at	Fair Value at	Fair Value at	Fair Value at
ASC 815	Balance Sheet Location	March 31, 2011	December 31, 2010	March 31, 2011	December 31, 2010
Interest rate swaps	Accrued liabilities	\$	\$	\$ 0.5	\$ 1.9
	Other long-term liabilities			0.4	0.4
Total derivatives not designated as hedging instruments under ASC 815		\$	\$	\$ 0.9	\$ 2.3
Total Derivatives		\$	\$	\$ 0.9	\$ 2.3

The following tables present the pretax impact of the Company's derivative instruments within the condensed consolidated statements of operations for the three months ended March 31, 2011 and 2010. Pretax realized gains and losses from derivatives which are recognized in earnings are included in interest expense in the condensed consolidated statements of operations.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

The Company's credit exposure related to interest rate swaps is represented by the fair value of swap agreements with a net positive fair value (asset position) to the Company at the reporting date. At such times, the outstanding instruments expose the Company to credit loss in the event of nonperformance by the counterparty to the agreements. However, we have not experienced any credit loss as a result of counterparty nonperformance in the past. Our credit risk exposure with respect to our interest rate swaps is limited to two counterparties, which we monitor based on credit ratings. As of March 31, 2011, our interest rate swap derivatives had net negative fair values (liability positions).

6. Other Assets

Other assets consist of the following:

	March 31, 2011	December 31, 2010
Deferred financing costs	\$ 9.1	\$ 8.9
Deferred debt offering costs	3.4	3.6
Other	1.0	1.0
Total other assets	\$ 13.5	\$ 13.5

Aggregate amortization of debt issuance costs for the three months ended March 31, 2011 and 2010 was \$0.7 and \$1.0, respectively.

7. Accrued Liabilities

Accrued liabilities consist of the following:

	March 31, 2011	December 31, 2010
Salaries and employee benefits	\$ 11.1	\$ 10.8
Income taxes	7.1	2.1
Taxes, other than income	2.0	2.8
Interest	9.9	3.3
Insurance	5.5	5.2
Audit and tax fees	0.9	0.5
Warranty liability	0.5	0.5
Lease terminations	0.3	0.4
Merger consideration Predecessor Company common shares outstanding	0.4	0.6
Current portion of interest rate swap liability	0.5	1.9
Other	5.2	2.5
Total accrued liabilities	\$ 43.4	\$ 30.6

(dollars in millions)

8. Debt

Debt consists of the following:

	March 31, 2011	December 31, 2010
Senior Secured Asset-Based Revolving Credit Facility (ABL facility)	\$ 239.4	\$ 106.0
11 1/8% Senior Secured Notes due 2015 (Metals USA Notes)	226.3	226.3
Industrial Revenue Bonds (IRBs)	13.4	13.4
Obligations under capital leases and other	2.5	0.8
Total debt	481.6	346.5
Less current portion of debt	1.5	1.1
Total long-term portion of debt	\$ 480.1	\$ 345.4

The weighted average interest rates under the ABL facility for the three months ended March 31, 2011 and 2010 were 3.27% and 2.08%, respectively.

Senior Secured Asset-Based Revolving Credit Facility

On December 17, 2010, Flag Intermediate, Metals USA, and certain subsidiaries of Metals USA entered into an amended and restated loan and security agreement (the "ABL Credit Agreement") with the lenders party thereto and Bank of America, N.A., as administrative agent and collateral agent. Flag Intermediate and Metals USA are 100% wholly-owned subsidiaries of Metals USA Holdings Corp.

The ABL Credit Agreement provides for a new \$500.0 (which may be increased up to \$750.0 at the option of Metals USA, including up to \$35.0 under a first-in last-out ("FILO") tranche)), 5-year, senior secured asset-based credit facility (the "ABL facility") that amended and restated Metals USA's then-existing \$625.0 senior secured asset-based credit facility that was scheduled to mature on November 30, 2011.

On March 9, 2011, we activated \$25.0 of the FILO tranche under the ABL facility. The ABL facility permits us to borrow on a revolving basis through the earlier of November 30, 2015 and 60 days prior to the scheduled maturity of the Metals USA Notes, unless the Metals USA Notes are refinanced to a date more than 5 years and 60 days after the closing date of the ABL facility and/or repaid prior to such date. Substantially all of our subsidiaries are borrowers under the ABL facility.

Borrowing Base. The maximum availability under the ABL facility is based on eligible receivables and eligible inventory, subject to certain reserves. Our borrowing availability fluctuates daily with changes in eligible receivables and inventory, less outstanding borrowings and letters of credit. The borrowing base is equal to:

85% of the net amount of eligible accounts receivable, plus

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

the lesser of (x) 80% of the lesser of the original cost or market value of eligible inventory and (y) 90% of the net orderly liquidation value of eligible inventory, plus

an incremental amount of the lesser of (x) the maximum commitments under the FILO tranche and (y) the sum of (i) 5% of the net amount of eligible accounts receivable and (ii) 5% of the net orderly liquidation value of eligible inventory during the effectiveness of any FILO tranche, less

reserves.

Table of Contents

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

The ABL facility provides sub-limits for up to \$25.0 of swingline loans and up to \$100.0 for the issuance of letters of credit. Both the face amount of any outstanding letters of credit and any swingline loans will reduce borrowing availability under the ABL facility on a dollar-for-dollar basis.

As of March 31, 2011, we had \$405.1 of eligible collateral, \$239.4 in outstanding advances, \$23.0 in open letters of credit and \$142.7 of additional borrowing capacity.

Guarantees and Security. Substantially all of our subsidiaries are defined as borrowers under the ABL Credit Agreement. The obligations under the ABL facility are guaranteed by Flag Intermediate and certain of our domestic subsidiaries and are secured by a first-priority lien and security interest in, among other things, accounts receivable, inventory and deposit accounts of Flag Intermediate, Metals USA and the subsidiaries of Metals USA party to the ABL Credit Agreement and a second-priority lien and security interest in, among other things, substantially all other tangible and intangible personal and real property owned by such companies, subject to certain exceptions.

Interest Rate and Fees. At Metals USA's option, interest accrues on the loans made under the ABL facility at either LIBOR plus a specified margin (set at 2.50% (3.875% for the FILO tranche) as of March 31, 2011), or the base rate (which is based off of the federal funds rate plus 0.50%, Bank of America's prime rate or LIBOR plus 1.00%), plus a specified margin (set at 1.50% (2.875% for the FILO tranche) as of March 31, 2011). The marginal rates vary based on our average monthly excess availability (as defined in the ABL Credit Agreement). The applicable base rate and the effective LIBOR rate for the loans made under the ABL facility were 3.25% and 0.3084%, respectively, as of March 31, 2011.

A commitment fee is payable on any unused commitment equal to 0.375% per annum to the lenders under the ABL facility if utilization under the facility exceeds 40.0% of the total commitments under the facility and a commitment fee equal to 0.5% per annum if utilization under the facility is less than or equal to 40.0% of the total commitments under the facility. Customary letter of credit fees are also payable, as necessary.

Certain Conditions Precedent and Covenants. As a condition precedent to any borrowing or issuance of a letter of credit, a material adverse effect shall not have occurred or exist. The ABL facility contains customary representations, warranties and covenants, including limitations on our ability to incur or guarantee additional debt, subject to certain exceptions, pay dividends, or make redemptions and repurchases, with respect to capital stock, repay debt, create or incur certain liens, make certain loans or investments, make acquisitions or investments, engage in mergers, acquisitions, asset sales, and engage in certain transactions with affiliates. The ABL facility requires a lock-box arrangement for collection of accounts receivable and proceeds from sales of inventory. Metals USA may make withdrawals from the lock-box unless an event of default exists or borrowing availability is less than the greater of (i) \$50.0 and (ii) 12.5% of the lesser of (A) the borrowing base (not to exceed \$62.5) and (B) the aggregate commitment. We do not have to maintain a minimum fixed charge coverage ratio (FCCR) as long as our borrowing availability is greater than or equal to the greater of (i) \$45.0 and (ii) 10% of the lesser of the borrowing base and the aggregate commitment (the Minimum Availability). We must maintain an FCCR of at least 1.0 to 1.0 if borrowing availability falls below the Minimum Availability. For purposes of determining covenant compliance, the FCCR is determined by dividing (i) the sum of Adjusted EBITDA (as defined in the ABL Credit Agreement) minus income taxes paid in cash (excluding certain specified deferred taxes) minus non-financed capital expenditures by (ii) the sum of certain distributions paid in cash, cash interest expense and scheduled principal reductions on debt, and is calculated based on such amounts for the most recent period of four consecutive fiscal quarters for which financial statements are available. FCCR and Adjusted EBITDA are each calculated on a pro forma basis. As of March 31, 2011, our FCCR was 2.83. We were in compliance with all covenants as of March 31, 2011.

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

Certain Events of Default and Remedies. The ABL facility contains events of default with respect to: default in payment of principal when due, default in the payment of interest, fees or other amounts after a specified grace period, material breach of the representations or warranties, default in the performance of covenants, a default that causes or permits acceleration under any indebtedness with a principal amount in excess of a specified amount, certain bankruptcy events, certain ERISA violations, invalidity of certain security agreements or guarantees, material judgments, or a change of control. In the event of default, the ABL Credit Agreement may permit a majority of the lenders to: (i) restrict the amount of or refuse to make revolving loans; (ii) cause customer receipts to be applied against borrowings under the ABL facility which would cause Metals USA to suffer a rapid loss of liquidity and restrict the ability to operate on a day-to-day basis; (iii) restrict or refuse to provide letters of credit; or ultimately: (iv) terminate the commitments and the agreement; or (v) declare any or all obligations to be immediately due and payable if such default is not cured in the specified period required. Any payment default or acceleration under the ABL facility would also result in a default under the Metals USA Notes that would provide the holders of the Metals USA Notes with the right to demand immediate repayment.

Costs related to the establishment of the ABL facility, in addition to subsequent amendments to the ABL facility, were capitalized and are being charged to interest expense over the life of the ABL facility. Unamortized financing costs of \$9.1 and \$8.9 were included in other non-current assets as of March 31, 2011 and December 31, 2010, respectively.

11¹/8% Senior Secured Notes Due 2015

On November 30, 2005, Flag Acquisition sold \$275.0 aggregate principal amount of the Metals USA Notes. The Metals USA Notes bear interest at a rate per annum equal to 11¹/8%, payable semi-annually in arrears, on June 1 and December 1 of each year, commencing on June 1, 2006. The Metals USA Notes will mature on December 1, 2015. We may redeem some or all of the Metals USA Notes at any time on or after December 1, 2010 at a predetermined redemption price plus accrued and unpaid interest and additional interest, if any, to the applicable redemption date. If we experience a change of control and we do not redeem the Metals USA Notes, we will be required to make an offer to repurchase the Metals USA Notes at a price equal to 101% of the principal amount, plus accrued and unpaid interest and additional interest, if any, to the date of repurchase.

As a result of the Merger, Metals USA assumed the obligations of Flag Acquisition including the Metals USA Notes. All domestic operating subsidiaries of Metals USA have agreed, jointly and severally with Flag Intermediate (Guarantors), to unconditionally and irrevocably guarantee Metals USA's obligations under the Metals USA Notes and Indenture dated as of November 30, 2005. Additionally, Flag Intermediate has unconditionally guaranteed to be a primary obligor of the due and punctual payment and performance of the obligations under the Indenture.

Metals USA Holdings is not a guarantor of the Metals USA Notes. There is a limitation on the amount of funds which can be transferred by the Guarantors to Metals USA Holdings in the form of dividends. Such amount available for distribution shall be increased by an amount equal to 50% of Consolidated Net Income, as defined, or reduced by an amount equal to 100% of Consolidated Net Loss, as defined. As of March 31, 2011, \$4.2 was available for general distribution under the restricted payment covenant contained in the Indenture governing the Metals USA Notes.

The indebtedness evidenced by the Metals USA Notes and the guarantees will rank: equally with all of our and the Guarantors' existing and future senior indebtedness; junior in priority as to collateral that secures the ABL facility on a first-priority lien basis with respect to our and the Guarantors' obligations under the ABL facility, any other debt incurred after December 1, 2005 that has a priority security interest relative to the Metals

Table of Contents

METALS USA HOLDINGS CORP. AND SUBSIDIARIES

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(dollars in millions)

USA Notes in the collateral that secures the ABL facility, any hedging obligations related to the foregoing debt and all cash management obligations incurred with any lender under the ABL facility; equal in priority as to collateral that secures the Metals USA Notes and the guarantees on a first-priority lien basis with respect to our and the Guarantors' obligations under any other equivalent priority lien obligations incurred after December 1, 2005; and senior to all of our and the Guarantors' existing and future subordinated indebtedness. The Metals USA Notes will also be effectively junior to the liabilities of any non-guarantor subsidiaries.

The Metals USA Notes contain covenants that are customary for debt instruments, including limitations on our or the Guarantors' ability to incur or guarantee additional debt, subject to certain exceptions, pay dividends, or make redemptions and repurchases with respect to capital stock, create or incur certain liens, make certain loans or investments, make acquisitions or investments, engage in mergers, acquisitions, asset sales and sale lease-back transactions, and engage in certain transactions with affiliates.

The Metals USA Notes indenture contains certain customary events of default, including (subject, in some cases, to customary cure periods thresholds) defaults based on (1) the failure to make payments under the Metals USA indenture when due, (2) breach of covenants, (3) cross-defaults to other material indebtedness, (4) bankruptcy events and (5) material judgments. We were in compliance with all covenants as of March 31, 2011.

Costs related to the establishment of the Metals USA Notes were capitalized and are being charged to interest expense over the life of the Metals USA Notes. Unamortized issuance costs of \$3.4 and \$3.6 were included in other non-current assets as of March 31, 2011 and December 31, 2010, respectively.

Industrial Revenue Bonds

Metals USA is a conduit bond obligor on IRBs issued by the municipalities of Muskogee, Oklahoma and Jeffersonville, Indiana. The IRBs are secured by certain real estate, leasehold improvements and equipment acquired with proceeds from the IRBs. The Muskogee IRB is due in one lump sum of \$5.7 on May 1, 2016. The Jeffersonville IRBs had principal amounts outstanding of \$3.5 and \$4.2 as of March 31, 2011, and are being redeemed in varying amounts annually through August 2021 and December 2027, respectively. The interest rates assessed on the IRBs vary from month to month. As of March 31, 2011, the weighted average variable interest rate on the IRBs was 0.51%. See Note 5 for a discussion of fixed interest rates payable on the Jeffersonville IRBs under interest rate swap agreements. The IRBs place various restrictions on certain of our subsidiaries, including but not limited to maintenance of required insurance coverage, maintenance of certain financial ratios, limits on capital expenditures and maintenance of tangible net worth and are supported by letters of credit. We were in compliance with all covenants as of March 31, 2011.

9. Stockholders' Equity

Common Stock

In accordance with our amended and restated certificate of incorporation, we are authorized to issue 140,000,000 shares of common stock, \$.01 par value. At March 31, 2011, 37,024,842 shares were issued and outstanding.

Preferred Stock

Also in accordance with our amended and restated certificate of incorporation, Metals USA Holdings is authorized to issue 10,000,000 shares of preferred stock, \$.01 par value. At March 31, 2011, no shares of preferred stock were issued and outstanding.

(dollars in millions)

10. Stock-Based Compensation

Total stock-based compensation expense recognized for the three months ended March 31, 2011 and 2010 was \$0.4 and \$0.1, respectively. Stock-based compensation expense is included in our condensed consolidated statements of operations in Selling, general and administrative expense.

2005 Stock and Incentive Plan

Metals USA Holdings Amended and Restated 2005 Stock and Incentive Plan (the 2005 Plan) permits the issuance of options and restricted stock awards to employees and directors of the Company. The 2005 Plan has reserved for issuance up to 2.4 million shares of common stock. The 2005 Plan has two tranches of options, Tranche A and Tranche B. Tranche A options vest on a pro-rata basis over five years, have a term of ten years, and expire if not exercised. Tranche B options, which include both a service and a performance condition, vest on the eighth anniversary of the date of grant or earlier dependent on the satisfaction of an internal rate of return on capital invested, have a term of ten years from date of grant, and expire if not exercised.

Tranche A Options

As of March 31, 2011, Tranche A options for 404,936 shares were outstanding, 387,505 of which were exercisable. The weighted average exercise price of these options is \$3.20 per share, with an aggregate intrinsic value of \$5.3. The Tranche A options have a weighted average remaining contractual life of approximately 4.8 years. Compensation expense associated with the Tranche A options has been fully recognized as of March 31, 2011.

Tranche B Options

As of March 31, 2011, Tranche B options for 50,816 shares were outstanding, all of which were exercisable. The weighted average exercise price of these options is \$2.30 per share, with an aggregate intrinsic value of \$0.7. The Tranche B options have a weighted average remaining contractual life of approximately 4.7 years. Compensation expense associated with the Tranche B options has been fully recognized as of March 31, 2011.

2010 Long-Term Incentive Plan

On March 19, 2010, our Board of Directors adopted, and our stockholders approved, the Metals USA Holdings 2010 Long-Term Incentive Plan (the 2010 Plan). The purposes of the 2010 Plan are to further the growth and success of Metals USA and to reward and incentivize the outstanding performance of our key employees, directors, consultants and other service providers by aligning their interests with those of stockholders through equity-based compensation and enhanced opportunities for ownership of shares of our common stock.

Subject to adjustment, the 2010 Plan authorizes the issuance of up to 2.6 million shares of common stock pursuant to the grant or exercise of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, restricted stock units and other equity-based awards.

The 2010 Plan is administered by our Board of Directors or the Compensation Committee thereof, or such other committee of the Board of Directors as the Board of Directors may designate from time to time (the Committee). Among other things, the Committee has the authority to select individuals to whom awards may be granted, to determine the type of award, to determine the terms and conditions of any such awards, including

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

vesting terms, to interpret the terms and provisions of the 2010 Plan and awards granted thereunder and to otherwise administer the plan.

Stock Options

On September 13, 2010, pursuant to the 2010 Plan, 632,000 options to acquire the Company's common stock were granted to certain members of our management and to members of our Board of Directors with an exercise price equal to the fair market value as of the date of the grant. The options granted to management vest ratably over four years and have a contractual term of ten years. The options granted to the members of our Board of Directors vest ratably over three years and also have a contractual term of ten years.

The fair value of the 2010 Plan option awards was estimated on the date of grant using a Black-Scholes option valuation model using the following valuation assumptions:

Expected dividend yield	0%
Expected stock price volatility	62.5%
Risk free interest rate	1.51%
Expected life (in years) management options	5.0
Expected life (in years) Board of Director options	4.0
Exercise price	\$ 13.17

As of March 31, 2011, outstanding options granted under the 2010 Plan had an aggregate intrinsic value of \$2.0, with approximately \$3.3 of total unrecognized compensation expense remaining to be amortized over a weighted average period of 3.1 years.

Restricted Stock

On September 13, 2010, pursuant to the 2010 Plan, 130,100 shares of restricted stock were granted to certain members of our management and to members of our Board of Directors. The awards granted to management vest ratably over four years, while the awards granted to the members of our Board of Directors vest ratably over three years. The fair value of the restricted stock granted was \$13.17 per share, determined based on the fair value of the Company's common stock on the grant date. As of March 31, 2011, approximately \$1.4 of total unrecognized compensation expense was expected to be recognized over a weighted average period of 3.1 years.

11. Income Taxes

The provision for income taxes is determined by applying an estimated annual effective income tax rate to income from continuing operations before income taxes. The rate is based on the most recent annualized forecast of pretax income, permanent book differences and tax credits. The Company's estimated annual effective tax rate for the three months ended March 31, 2011 is 40.1% compared to the estimated annual effective tax rate of 89.7% for the three months ended March 31, 2010. The decrease in the tax rate in 2011 is primarily due to the impact of state taxes and permanent items on the respective levels of pre-tax book income.

As of March 31, 2011, our unrecognized tax benefits totaled \$8.7, and based on the contingent and uncertain nature of our liability, we are unable to make an estimate of the period of potential cash settlement, if any, with the respective taxing authorities. The total amount of unrecognized tax benefits that, if recognized, would impact the Company's effective tax rate is \$0.1 for the three months ended March 31, 2011.

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

We file numerous consolidated and separate income tax returns in the United States and various foreign jurisdictions. We are no longer subject to U.S. Federal income tax examinations for years before 2002 and are no longer subject to state and local, or foreign income tax examinations for years before 2000.

We account for any applicable interest and penalties on uncertain tax positions as a component of income tax expense. As of March 31, 2011, the liability for uncertain taxes includes interest and penalties of \$2.8 of which \$0.1 is included in our statement of operations and impacted the Company's overall effective income tax rate for the three months ended March 31, 2011.

12. Segment Information

The following tables show summarized financial information for our reportable segments. The amounts shown as an operating loss under the column heading "Corporate and Other" consist primarily of general and administrative costs that are not allocated to the segments. The reconciliation of operating income to net income before income taxes is shown within the condensed consolidated statements of operations and therefore is not separately presented.

	Three Months Ended March 31,				
	Plates and Shapes	Flat Rolled and Non-Ferrous	Building Products	Corporate and Other	Total
2011:					
Net sales	\$ 190.2	\$ 228.5	\$ 16.2	\$ (2.6)	\$ 432.3
Operating income (loss)	22.0	17.1	(1.8)	(7.5)	29.8
Capital expenditures	1.6	0.2		0.2	2.0
Depreciation and amortization ⁽¹⁾	2.3	2.2	0.6	0.2	5.3
2010:					
Net sales	\$ 121.9	\$ 152.0	\$ 16.2	\$ (2.2)	\$ 287.9
Operating income (loss)	9.1	10.9	(1.7)	(5.6)	12.7
Capital expenditures	0.4	0.1			0.5

Consolidated	\$ 934.9	\$ 745.5

13. Commitments and Contingencies

Letters of Credit

Letters of credit outstanding at March 31, 2011 consist of a letter of credit in the amount of \$11.3 in conjunction with the IRBs (see Note 8) and other letters of credit aggregating \$11.7 (total letters of credit of

Table of Contents**METALS USA HOLDINGS CORP. AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(dollars in millions)**

\$23.0 at March 31, 2011). Other letters of credit consist primarily of collateral support for our property and casualty insurance program. All letters of credit reduce the amount available to borrow under the ABL facility.

Pension Fund Withdrawal Obligation

During 2007, we discontinued our participation in a multiemployer pension fund. In connection with our cessation of contributions to the plan, we were assessed a withdrawal liability of approximately \$5.6, which we are paying in monthly installments through 2021. Our total withdrawal liability, including interest and amortization charges, amounted to approximately \$6.5 and \$6.7 as of March 31, 2011 and December 31, 2010, respectively.

Contingencies

From time to time, we are involved in a variety of claims, lawsuits and other disputes arising in the ordinary course of business. We believe the resolution of these matters and the incurrence of their related costs and expenses should not have a material adverse effect on our consolidated financial position, results of operations, cash flows or liquidity.

14. Comprehensive Income

The following table sets forth comprehensive income, net of applicable taxes, for the three months ended March 31, 2011 and 2010.

	Three Months Ended March 31,	
	2011	2010
Net income	\$ 12.4	\$ 0.1
Other comprehensive income:		
Foreign currency translation adjustments	0.1	0.1
Unrealized gains on derivatives	0.1	0.3
Total comprehensive income	\$ 12.6	\$ 0.5

15. Earnings Per Share

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period, including the weighted average impact of any shares issued during the year. Diluted earnings per share calculations also include the dilutive effect of stock options and non-vested restricted stock.

The weighted average number of shares used to determine basic and diluted earnings per share was:

	Three Months Ended March 31,	
	2011	2010
Weighted average shares outstanding basic	37,024,842	25,578,027
Effect of dilution:		

Edgar Filing: METALS USA HOLDINGS CORP. - Form 10-Q

Stock options	283,747	300,575
Restricted stock	30,313	
Weighted average shares outstanding diluted	37,338,902	25,878,602
Antidilutive stock options and restricted stock excluded from calculation	632,000

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section contains statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. See disclosure presented on the inside of the front cover of this Form 10-Q for cautionary information with respect to such forward-looking statements. Readers should refer to Risk Factors included in our Annual Report on Form 10-K for risk factors that may affect future performance.

Overview

All references to the Company, we or our include Metals USA Holdings, Flag Intermediate, its 100% wholly owned subsidiary Metals USA, and the 100% wholly owned subsidiaries of Metals USA.

We believe that we are a leading provider of value-added processed carbon steel, stainless steel, aluminum and specialty metals, as well as manufactured metal components. For the three months ended March 31, 2011, approximately 96% of our revenue was derived from our metals service center and processing activities, which are segmented into two groups: Flat Rolled and Non-Ferrous Group and Plates and Shapes Group. The remaining portion of our revenue was derived from our Building Products Group, which principally manufactures and sells aluminum products related to the residential remodeling industry. We purchase metal from primary producers that generally focus on large volume sales of unprocessed metals in standard configurations and sizes. In most cases, we perform the customized, value-added processing services required to meet the specifications provided by end-users. Our Plates and Shapes Group and Flat Rolled and Non-Ferrous Group customers are in the land and marine transportation, energy, aerospace, defense, electrical and appliance manufacturing, fabrication, furniture, commercial construction, and machinery and equipment industries. Our Building Products Group customers are primarily distributors and contractors engaged in the residential remodeling industry.

Industry Trends

Metals Service Centers

World steel production resumed growth in 2009 following a moderate rise in demand and the resumption of production at idled facilities. China has emerged as a major producer and consumer of steel, accounting for roughly half of total global steel production. Chinese steel consumption continued to grow through the global economic downturn as its economy only modestly decelerated from its multi-year growth trajectory.

According to the World Steel Association (WSA), world crude steel production was 1,413.6 million metric tons (mmt) in 2010, an increase of 15.0% from 2009. The U.S. produced 80.6 mmt of crude steel in 2010, an increase of 38.5% year over year.

With the global economy in recovery mode since late 2009, the steel industry has continued its recent improvement trend. However, given its economic sensitivity, the improvement in U.S. steel demand has been modest, in line with the recovery in end user industries, especially automotive and construction. According to WSA, steel demand in the U.S. is expected to increase 5.3% in 2011. Domestic steel makers continue to add capacity and resume operations at idled facilities in expectation of a long-term growth trend in the industry.

Although steel prices have been stabilizing since the latter part of 2009, the U.S. steel industry has witnessed intermittent volatility in prices with a large spot market. The magnitude and persistence of cyclical recovery momentum, along with global macroeconomic conditions, could meaningfully alter pricing in the near-term for the sector. Price trends will depend on maintenance of the supply-demand balance over the next several months and volatility in steelmaking input costs. There can be no guarantees regarding the timing or extent of any future upward price trends or demand increases. Any number of political or general economic factors could cause prices to decline.

Table of Contents*Building Products*

The downturn in the housing and mortgage markets has caused significant contraction in the home improvement remodeling industry. Research indicates that remodeling activity is pro-cyclical with both new residential construction and the broader economy, but remodeling lags homebuilding by several quarters. The high cyclicity of remodeling activity appears to be driven by discretionary improvements, similar to the products sold by our building products business, which are quite volatile. Improvement spending is expected to be much more cyclical and more sensitive to upturns and downturns in the general economy, whereas maintenance and repair spending is expected to be fairly stable over time.

While the pace of the decline in homeowner remodeling projects appears to be moderating, increased remodeling activity does not seem likely to materialize until further signs of recovery emerge in the broader housing market. Although lower financing costs are reducing the cost of financing home improvement projects, weak home prices and decreased cost recovery for most types of remodeling projects continue to discourage upper-end remodeling improvements.

Product demand for the Company's Building Products Group may be influenced by numerous factors such as interest rates, general economic conditions, consumer confidence and other factors beyond our control. Declines in existing home sales and improvement remodeling expenditures due to such factors could continue to reduce the segment's performance.

Results of Operations

The following unaudited consolidated financial information reflects our historical financial statements.

Consolidated Results Three Months Ended March 31, 2011 Compared to March 31, 2010

	2011	%	2010	%
	(In millions, except percentages)			
Net sales	\$ 432.3	100.0%	\$ 287.9	100.0%
Cost of sales (exclusive of operating and delivery, and depreciation and amortization shown below)	329.7	76.3%	218.4	75.9%
Operating and delivery	41.1	9.5%	31.3	10.9%
Selling, general and administrative	26.8	6.2%	21.0	7.3%
Depreciation and amortization	4.8	1.1%	4.6	1.6%
Loss (gain) on sale of property and equipment	0.1	0.0%	(0.1)	0.0%
Operating income	29.8	6.9%	12.7	4.4%
Interest expense	9.0	2.1%	11.7	4.1%
Income before income taxes	20.8	4.8%	1.0	0.3%
Provision for income taxes	8.4	1.9%	0.9	0.3%
Net income	\$ 12.4	2.9%	\$ 0.1	0.0%

Net sales. Net sales increased \$144.4 million, or 50.2%, from \$287.9 million for the three months ended March 31, 2010 to \$432.3 million for the three months ended March 31, 2011. The increase was primarily attributable to a 47.8% increase in shipments, in addition to a 3.6% increase in average realized prices for our Flat Rolled and Non-Ferrous and Plates and Shapes Product Groups. Net sales for our Building Products Group remained level period-over-period. Results for the quarter ended March 31, 2011 include operating results from the Trident acquisition from the date of the acquisition closing, which occurred on March 11, 2011. In addition, results for the quarter ended March 31, 2011 include the results of operations from the J. Rubin and ORMS acquisitions which closed in June and December of 2010, respectively. Trident, J. Rubin and ORMS contributed a combined \$26.0 million of incremental sales for the quarter ended March 31, 2011. On a same store basis, shipments increased 31.7% and average realized prices increased 9.0% over the same period of 2010. The increase in volumes for our metal service center businesses occurred as a consequence of accelerating demand in

Table of Contents

the industrial economy in line with cyclical recovery momentum in durable goods, oil and gas, heavy equipment and automotive end markets, while non-residential construction markets continue to lag the general economy. We remain focused on product mix enhancement through inventory management, as well as through acquisitions, as a means to mitigate the effects of uneven demand associated with specific regions and end-use industries and to increase our footprint in markets that are showing increasing demand.

According to data from the Metals Service Center Institute, year-to-date actual shipments for the service center industry through March 2011 are up 23.5% over the same period of 2010. At the same time, inventory levels have remained relatively level through the first three months of 2011, indicating a supply-demand balance that is sufficiently tight given the current economic environment. We believe current price levels are sustainable if producers maintain production commensurate with demand; however there can be no guarantee that such trends will continue.

Cost of sales. Cost of sales increased \$111.3 million, or 51.0%, from \$218.4 million for the three months ended March 31, 2010 to \$329.7 million for the three months ended March 31, 2011. The increase was primarily attributable to a 47.8% increase in shipments for our Flat Rolled and Non-Ferrous and Plates and Shapes Product Groups, in addition to a 4.0% increase in average cost per ton. Cost of sales for our Building Products Group increased \$0.4 million, or 3.4%. The Trident, J. Rubin and ORMS acquisitions added a combined \$19.0 million of incremental cost of sales for the quarter ended March 31, 2011. On a same store basis, shipments increased 31.7% and average cost per ton increased 9.7% over the same period of 2010. The increase in volumes that contributed to higher cost of sales during the first quarter of 2011 was attributable to an increase in steel demand in certain sectors, in addition to end users restocking ahead of announced price increases from steel producers, as mills looked to maintain prices at higher levels in light of raw material prices that have risen sharply since last year and which are expected to remain firm. Cost of sales as a percentage of net sales increased from 75.9% for the three months ended March 31, 2010 to 76.3% for the same period of 2011.

Operating and delivery. Operating and delivery expenses increased \$9.8 million, or 31.3%, from \$31.3 million for the three months ended March 31, 2010 to \$41.1 million for the three months ended March 31, 2011. The increase was a result of higher variable costs associated with increased shipments, most notably higher labor costs of approximately \$3.8 million and higher freight costs of approximately \$2.8 million. As a percentage of net sales, operating and delivery expenses decreased from 10.9% for the three months ended March 31, 2010 to 9.5% for the three months ended March 31, 2011.

Selling, general and administrative. Selling, general and administrative expenses increased \$5.8 million, or 27.6%, from \$21.0 million for three months ended March 31, 2010 to \$26.8 million for the three months ended March 31, 2011. Higher costs associated with incentive compensation, which amounted to approximately \$2.3 million, contributed to the period-over-period increase. We also incurred costs of approximately \$1.2 million during the first quarter of 2011 which were primarily attributable to the Trident acquisition, which closed in March 2011. As a percentage of net sales, selling, general and administrative expenses decreased from 7.3% for the three months ended March 31, 2010 to 6.2% for the three months ended March 31, 2011.

Depreciation and amortization. Depreciation and amortization expense increased \$0.2 million, or 4.3%, from \$4.6 million for the three months ended March 31, 2010 to \$4.8 million for the three months ended March 31, 2011. The increase is primarily attributable to increases in fixed assets resulting from our growth through acquisitions over the past year and from increased capital spending, as our investments in new equipment have grown in line with higher business activity levels. Net property and equipment as of March 31, 2011 was \$244.9 million compared to \$179.8 million as of March 31, 2010.

Operating income. Operating income increased \$17.1 million, or 134.6%, from \$12.7 million for the three months ended March 31, 2010 to \$29.8 million for the three months ended March 31, 2011. The increase was primarily a result of the increase in sales discussed above, in addition to the recent acquisitions of Trident, J. Rubin and ORMS, which contributed a combined \$1.3 million of incremental operating income for the three months ended March 31, 2011. As a percentage of net sales, operating income increased from 4.4% for the three months ended March 31, 2010 to 6.9% for the three months ended March 31, 2011.

Table of Contents

Interest expense. Interest expense decreased \$2.7 million, or 23.1%, from \$11.7 million for the three months ended March 31, 2010 to \$9.0 million for the three months ended March 31, 2011. The decrease was due to the redemption of our Senior Floating Rate Toggle Notes due 2012 in May 2010, partially offset by increased interest expense associated with higher borrowings and a higher average facility rate on the ABL facility. The weighted average outstanding balance on our ABL facility increased from \$76.1 million for the three months ended March 31, 2010 to \$146.2 million for the three months ended March 31, 2011.

Income taxes. Income tax expense for the three months ended March 31, 2011 was \$8.4 million, resulting in an overall effective tax rate of 40.1%, compared to a tax provision of \$0.9 million and overall effective tax rate of 89.7% for the three months ended March 31, 2010. Our effective tax rate differs from the federal statutory rate due to state taxes, certain valuation allowances on state and Canadian deferred tax assets, as well as provisions for uncertain tax positions.

Net income. Net income increased from \$0.1 million for the three months ended March 31, 2010 to \$12.4 million for the three months ended March 31, 2011. The variance was primarily due to the improved operating performance of our metal service center businesses resulting from increases in end market demand and metal prices, ongoing and permanent cost reductions over the last year, and improved returns from a stronger balance sheet resulting from debt reductions and aggressive working capital management.

Segment Results Three Months Ended March 31, 2011 Compared to March 31, 2010

	Net Sales	Operating Costs and Expenses	Operating Income (Loss) (in millions, except tons)	Capital Spending	Tons Shipped ⁽¹⁾	
					Direct	Toll
2011:						
Plates and Shapes	\$ 190.2	\$ 168.2	\$ 22.0	\$ 1.6	151	12
Flat Rolled and Non-Ferrous	228.5	211.4	17.1	0.2	174	33
Building Products	16.2	18.0	(1.8)			
Corporate and other	(2.6)	4.9	(7.5)	0.2	(2)	
Total	\$ 432.3	\$ 402.5	\$ 29.8	\$ 2.0	323	45
2010:						
Plates and Shapes	\$ 121.9	\$ 112.8	\$ 9.1	\$ 0.4	115	2
Flat Rolled and Non-Ferrous	152.0	141.1	10.9	0.1	127	7
Building Products	16.2	17.9	(1.7)			
Corporate and other	(2.2)	3.4	(5.6)		(2)	
Total	\$ 287.9	\$ 275.2	\$ 12.7	\$ 0.5	240	9

(1) Shipments are expressed in thousands of tons and are not an applicable measure for the Building Products Group.

Plates and Shapes. Net sales increased \$68.3 million, or 56.0%, from \$121.9 million for the three months ended March 31, 2010 to \$190.2 million for the three months ended March 31, 2011. The increase was primarily attributable to a 39.3% increase in shipments, in addition to a 12.0% increase in average realized prices for the three months ended March 31, 2011 compared to the three months ended March 31, 2010. Product demand for the Plates and Shapes Group is more transactional in nature and is typically associated with industries and end markets that show strength during later stages of economic cycles. Although we experienced an increase in demand for structural steel during the first quarter of 2011, our strong shipment volumes for the period were also partially attributable to certain customers purchasing inventory to stay ahead of announced price increases and the expectation of a normal seasonal recovery. We experienced increased demand from the marine transportation, defense, and energy services end markets during the first quarter of 2011. We also experienced more stable

Table of Contents

demand from the non-residential construction sector compared to previous quarters that were affected by the global economic recession. Non-residential construction typically lags behind the general economy by approximately eighteen months, and we expect to continue to see some gradual recovery in this market during 2011, although there can be no assurance that this will be the case.

Operating costs and expenses increased \$55.4 million, or 49.1%, from \$112.8 million for the three months ended March 31, 2010 to \$168.2 million for the three months ended March 31, 2011. The increase was primarily attributable to a 39.3% increase in shipments, in addition to a 12.9% increase in the average cost per ton for the three months ended March 31, 2011 compared to the three months ended March 31, 2010. We incurred approximately \$0.6 million of facility closure and severance expenses related to the closure of a Plates and Shapes location in Hayward, California during the first quarter of 2011, which contributed to the increase in operating costs and expenses versus the prior year. Operating costs and expenses as a percentage of net sales decreased from 92.5% for the three months ended March 31, 2010 to 88.4% for the three months ended March 31, 2011.

Operating income increased by \$12.9 million, or 141.8%, from \$9.1 million for the three months ended March 31, 2010 to \$22.0 million for the three months ended March 31, 2011. The increase primarily resulted from the increase in net sales discussed above, in addition to lower operating costs and expenses as a percentage of net sales, as we continue to focus on cost control even as business conditions are improving. Operating income as a percentage of net sales increased from 7.5% for the three months ended March 31, 2010 to 11.6% for the three months ended March 31, 2011.

Flat Rolled and Non-Ferrous. Net sales increased \$76.5 million, or 50.3%, from \$152.0 million for the three months ended March 31, 2010 to \$228.5 million for the three months ended March 31, 2011. Trident, J. Rubin and ORMS contributed a combined \$26.0 million of incremental sales for the quarter ended March 31, 2011. The remaining increase was primarily attributable to a 24.6% increase in shipments, in addition to a 6.9% increase in average realized prices for the three months ended March 31, 2011 compared to the three months ended March 31, 2010. Our recent acquisitions caused shipments during the first quarter of 2011 to include a larger proportion of toll processed tonnage than our historical norm. Toll processing describes performing processing services on customer-owned material. Net sales for toll processing equates to the processing service fee charged to the customer. Sales of non-ferrous metals accounted for approximately 37% of the segment's sales product mix for the first quarter of 2011, compared to approximately 40% for the first quarter of 2010. Our Flat Rolled and Non-Ferrous Group experienced good demand in the automotive, heating and air conditioning equipment, and lawn and garden equipment markets during the first quarter of 2011, and we expect these markets to continue to do well during 2011, although there can be no assurance that this will be the case.

Operating costs and expenses increased \$70.3 million, or 49.8%, from \$141.1 million for the three months ended March 31, 2010 to \$211.4 million for the three months ended March 31, 2011. Trident, J. Rubin and ORMS contributed a combined \$24.7 million of incremental operating costs and expenses to the segment for the first quarter of 2011. The remaining increase was primarily attributable to a 24.6% increase in shipments, in addition to an 8.2% increase in average cost per ton. Operating costs and expenses as a percentage of net sales decreased from 92.8% for the three months ended March 31, 2010 to 92.5% for the three months ended March 31, 2011.

Operating income increased by \$6.2 million, or 56.9%, from \$10.9 million for the three months ended March 31, 2010 to \$17.1 million for the three months ended March 31, 2011. The increase was primarily attributable to the increase in volumes, combined with the increase in average realized prices discussed above. Operating income as a percentage of net sales increased from 7.2% for the three months ended March 31, 2010 to 7.5% for the same period of 2011.

Building Products. Net sales of \$16.2 million for the three months ended March 31, 2011 were in line with the segment's net sales for the same period of 2010. The Building Products segment continues to be affected by lower consumer spending on residential remodeling due to the effects of the economic recession and the resulting

Table of Contents

depreciation of homes, as well as decreased access to affordable credit for homeowners and residential remodeling contractors. These factors have led to significant contraction in the home improvement remodeling industry.

Operating costs and expenses showed a slight increase of \$0.1 million, or 0.5%, from \$17.9 million for the three months ended March 31, 2010 to \$18.0 million for the three months ended March 31, 2011. Operating costs and expenses as a percentage of net sales increased from 110.5% for the three months ended March 31, 2010 to 111.1% for the three months ended March 31, 2011.

Operating loss increased slightly from \$1.7 million for the three months ended March 31, 2010 to \$1.8 million for the three months ended March 31, 2011. Operating loss as a percentage of net sales was 11.1% for the quarter ended March 31, 2011 versus 10.5% for the quarter ended March 31, 2010.

Corporate and other. This category reflects certain administrative costs and expenses management has not allocated to its industry segments. These costs include compensation for executive officers, insurance, professional fees for audit, tax and legal services and data processing expenses. The negative net sales amount represents the elimination of intercompany sales. The operating loss increased \$1.9 million for the three months ended March 31, 2011 as compared to the three months ended March 31, 2010 due primarily to higher consulting fees associated with our recent acquisition of Trident and to higher accruals for incentive compensation.

Liquidity and Capital Resources

Our primary sources of short-term liquidity are borrowings under the ABL facility and our cash flow from operations. We believe these resources will be sufficient to meet our working capital and capital expenditure requirements for the next year.

Our borrowing availability fluctuates daily with changes in eligible accounts receivables and inventory, less outstanding borrowings and letters of credit. See *Financing Activities* below. As of March 31, 2011, we had \$405.1 million of eligible collateral, \$239.4 million in outstanding advances, \$23.0 million in open letters of credit and \$142.7 million of additional borrowing capacity. As of March 31, 2011, we had \$12.1 million of cash.

We generally meet long-term liquidity requirements, the repayment of debt and investment funding needs, through additional borrowings under the ABL facility and the issuance of debt securities. As of March 31, 2011, our debt consisted of \$239.4 million of outstanding borrowings under the ABL facility, \$226.3 million principal amount of the Metals USA Notes, IRBs with \$13.4 million principal amount outstanding and \$2.5 million of capital leases and other obligations. We believe that cash flow from operations, supplemented by cash available under the ABL facility, will be sufficient to enable us to meet our debt service and operational obligations as they come due for at least the next twelve months.

With respect to long-term liquidity, we believe that we will be able to meet our working capital, capital expenditures and debt service obligations. Our ability to meet long-term liquidity requirements is subject to obtaining additional debt and/or equity financing. Decisions by lenders and investors to enter into such transactions with us will depend upon a number of factors, such as our historical and projected financial performance, compliance with the terms of our current credit agreements, industry and market trends, the availability of capital, and the relative attractiveness of alternative lending or investment opportunities.

Operating and Investing Activities

Although we do not produce any metal, our financial performance is affected by changes in metal prices. When metal prices rise, the prices at which we are able to sell our products generally increase over their historical costs; accordingly, our working capital (which consists primarily of accounts receivable and inventory) tends to increase in a rising price environment. Conversely, when metal prices fall, our working capital tends to decrease. Our working capital (current assets less current liabilities) increased from \$380.2 million at December 31, 2010 to \$456.7 million at March 31, 2011.

Table of Contents

Changes in metal prices also affect our liquidity because of the time difference between our payment for our raw materials and our collection of cash from our customers. We sell our products and typically collect our accounts receivable within 45 days after the sale; however, we tend to pay for replacement materials (which are more expensive when metal prices are rising) over a much shorter period, primarily to benefit from early-payment discounts that are substantially higher than our cost of incremental debt. As a result, when metal prices are rising, we tend to draw more on the ABL facility to cover the cash flow cycle from material purchase to cash collection. When metal prices fall, we can replace our inventory at lower cost and, thus, generally do not need to access the ABL facility as much to cover the cash flow cycle. We believe our cash flow from operations, supplemented with the cash available under the ABL facility, will provide sufficient liquidity to meet the challenges and obligations we face during the current metal price environment. Additionally, we intend to look for value-added businesses that we can acquire at reasonable prices. We intend to use cash flows from operations and excess cash available under the ABL facility to fund future acquisitions.

The following discussion of the principal sources and uses of cash should be read in conjunction with our condensed consolidated statements of cash flows included in our condensed consolidated financial statements for the three months ended March 31, 2011.

During the three months ended March 31, 2011, net cash used in operating activities was \$46.4 million. During the first three months of 2011, our working capital increased as we experienced an environment of increasing prices and end-market demand. Increases of \$54.6 million in our accounts receivable balance and \$29.4 million in our inventory value were the primary contributors to operating cash outflows for the period. Accounts receivable increased due to stronger sales which were primarily driven by sharply higher shipments versus the same quarter of the prior year. During the three months ended March 31, 2010, net cash used in operating activities was \$9.6 million. This amount was primarily attributable to increases in accounts receivable and inventories. Changes in working capital during the first quarter of 2010 reflected a more gradual improvement in the business environment that began during 2009.

Net cash used in investing activities was \$90.7 million for the three months ended March 31, 2011, and consisted primarily of \$88.8 million of cash paid for the Trident acquisition, which closed on March 11, 2011, and capital expenditures of \$2.0 million. Net cash used in investing activities was \$0.4 million for the three months ended March 31, 2010, and consisted of \$0.5 million of capital expenditures partially offset by \$0.1 million of proceeds from the sale of assets.

Net cash provided by financing activities was \$132.6 million for the three months ended March 31, 2011, which consisted of borrowings on the ABL facility of \$133.4 million offset by \$0.7 million of deferred financing costs and \$0.1 million of debt repayments. Net cash provided by financing activities was \$8.9 million for the three months ended March 31, 2010, and consisted primarily of net borrowings under the ABL facility of \$9.0 million.

Covenant Compliance

Adjusted EBITDA

Adjusted EBITDA (as defined by the loan and security agreement governing the ABL facility and the Indenture governing the Metals USA Notes) is defined as EBITDA further adjusted to exclude certain non-cash and non-recurring items. Adjusted EBITDA is not a defined term under GAAP and should not be used as an alternative to net income as an indicator of operating performance or to cash flow as a measure of liquidity.

Fixed Charge Coverage Ratio

Under the ABL facility, the FCCR is determined on a rolling four-quarter period, often referred to as a last-twelve month period, by dividing (1) the sum of Adjusted EBITDA of Metals USA minus income taxes paid in cash minus non-financed capital expenditures by (2) the sum of certain distributions paid in cash, cash interest expense and scheduled principal reductions on debt paid by Metals USA. Should borrowing availability under the ABL facility fall below Minimum Availability, we must maintain a FCCR of at least 1.0 to 1.0, measured on

Table of Contents

a trailing four-quarter basis. As of March 31, 2011, our borrowing availability under the ABL facility was \$142.7 million. In addition, the FCCR also is an important measure of our liquidity and affects our ability to take certain actions, including paying dividends to stockholders and making acquisitions.

Although the Indenture governing the Metals USA Notes also contains covenants that restrict our ability to incur indebtedness and pay dividends based on our FCCR, the definition and application of the FCCR contained in the Indenture differs from the definition and application of the FCCR in the ABL facility in that the numerator of the FCCR as defined in the Indenture does not include cash income taxes or non-financed capital expenditures and the denominator of the FCCR as defined in the Indenture does not include the sum of certain distributions paid in cash and scheduled principal reductions on debt, and separate FCCRs are required under certain circumstances. See [Financing Activities](#) below.

Because access to debt capital is currently and in the future will continue to be important to us, we believe that the inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA are appropriate to provide additional information to investors to demonstrate compliance with the covenants in our debt agreements. Failure to comply with the FCCR covenant of the ABL facility can result in limiting our long-term growth prospects by hindering our ability to incur future indebtedness or grow through acquisitions. As of March 31, 2011, our FCCR was 2.83. As of March 31, 2011, we had \$142.7 million of additional borrowing capacity under the ABL facility.

The Indenture governing the Metals USA Notes contains covenants that restrict our ability to take certain actions, such as incurring additional debt and making certain acquisitions, if we are unable to meet defined Adjusted EBITDA to fixed charge coverage ratios (as defined). The covenants in the Indenture require us to have an Adjusted EBITDA to fixed charge coverage ratio (measured on a trailing four-quarter basis and calculated differently from the fixed charge coverage ratio as defined by the ABL facility) of 2.0 to 1.0 to incur ratio indebtedness. Based on the calculations for the trailing four quarters, we are able to satisfy these covenants and incur additional indebtedness under these ratios, including for acquisition purposes, under our Indenture.

Pro Forma Adjusted EBITDA

Pro Forma Adjusted EBITDA is defined as Adjusted EBITDA (as discussed above) with additions for the Adjusted EBITDA of recent acquisitions as though we owned those businesses for the twelve-month period ended March 31, 2011. Adjusted EBITDA on a Pro Forma Basis, as defined in our credit agreements, is a non-GAAP measure used in the calculation of our Consolidated Total Debt Ratio, as defined by the Indenture governing the Metals USA Notes. As of March 31, 2011, our Consolidated Total Debt Ratio was 4.1 based on a trailing twelve-month Pro Forma Adjusted EBITDA of \$116.8 million.

Our inability to satisfy the terms of the negative covenants in our debt agreements do not, by themselves, constitute covenant violations or events of default. Rather, they are event-related restrictions that may limit or prohibit the Company from taking certain corporate actions. As of March 31, 2011, we were not restricted under any of the negative covenants in our debt agreements.

Limitations of Adjusted EBITDA

There are material limitations associated with making the adjustments to our earnings to calculate Adjusted EBITDA and using such a non-GAAP financial measure as compared to the most directly comparable GAAP financial measures. For instance, Adjusted EBITDA does not include:

interest expense, and, because we have borrowed money in order to finance our operations, interest expense is a necessary element of our costs and ability to generate revenue;

income tax expense, and because the payment of taxes is part of our operations, income tax expense is a necessary element of our costs and ability to operate; and

depreciation and amortization expense, and, because we use capital assets, depreciation and amortization expense is a necessary element of our costs and ability to generate revenue.

Table of Contents

In addition, fixed charges should not be considered an alternative to interest expense.

Below is a reconciliation of net income to EBITDA, Adjusted EBITDA, Pro Forma Adjusted EBITDA, and net cash used in operating activities:

	Three Months Ended March 31,		Twelve Months Ended March 31,
	2011	2010	2011
Net income	\$ 12.4	\$ 0.1	\$ 23.8

Financing Activities

The ABL Facility

On December 17, 2010, Flag Intermediate, Metals USA, and certain subsidiaries of Metals USA entered into an amended and restated loan and security agreement (the "ABL Credit Agreement") with the lenders party thereto and Bank of America, N.A., as administrative agent and collateral agent. Flag Intermediate and Metals USA are 100% wholly-owned subsidiaries of Metals USA Holdings Corp.

The ABL Credit Agreement provides for a new \$500.0 million (which may be increased up to \$750.0 million at the option of Metals USA, including up to \$35.0 million under a first-in, last-out ("FILO") tranche), 5-year, senior secured asset-based credit facility (the "ABL facility") that amended and restated Metals USA's then-existing \$625.0 million senior secured asset-based credit facility that was scheduled to mature on November 30, 2011.

On March 9, 2011, we activated \$25.0 million of the FILO tranche, and thereafter aggregate commitments under the ABL facility. The ABL facility permits us to borrow on a revolving basis through the earlier of November 30, 2015 and 60 days prior to the scheduled maturity of the Metals USA Notes, unless the Metals USA Notes are refinanced to a date more than 5 years and 60 days after the closing date of the ABL facility and/or repaid prior to such date. Substantially all of our subsidiaries are borrowers under the ABL facility.

Borrowing Base. The maximum availability under the ABL facility is based on eligible receivables and eligible inventory, subject to certain reserves. Our borrowing availability fluctuates daily with changes in eligible receivables and inventory, less outstanding borrowings and letters of credit. The borrowing base is equal to:

85% of the net amount of eligible accounts receivable, plus

the lesser of (x) 80% of the lesser of the original cost or market value of eligible inventory and (y) 90% of the net orderly liquidation value of eligible inventory, plus

an incremental amount of the lesser of (x) the maximum commitments under the FILO tranche and (y) the sum of (i) 5% of the net amount of eligible accounts receivable and (ii) 5% of the net orderly liquidation value of eligible inventory during the effectiveness of any FILO tranche, less

reserves.

The ABL facility provides sub-limits for up to \$25.0 million of swingline loans and up to \$100.0 million for the issuance of letters of credit. Both the face amount of any outstanding letters of credit and any swingline loans will reduce borrowing availability under the ABL facility on a dollar-for-dollar basis.

As of March 31, 2011, we had \$405.1 million of eligible collateral, \$239.4 million in outstanding advances, \$23.0 million in open letters of credit and \$142.7 million of additional borrowing capacity. As of March 31, 2011, we had \$12.1 million of cash.

At May 9, 2011, we had \$402.3 million of eligible collateral, \$229.9 million in outstanding advances, \$23.0 million in open letters of credit and \$149.4 million of additional borrowing capacity. As of May 9, 2011, we had approximately \$18.7 million of cash.

Guarantees and Security. Substantially all of our subsidiaries are defined as borrowers under the ABL Credit Agreement. The obligations under the ABL facility are guaranteed by Flag Intermediate and certain of our domestic subsidiaries and are secured by a first-priority lien and security interest in, among other things, accounts receivable, inventory and deposit accounts of Flag Intermediate, Metals USA and the subsidiaries of Metals USA party to the ABL Credit Agreement and a second-priority lien and security interest in, among other things, substantially all other tangible and intangible personal and real property owned by such companies, subject to certain exceptions.

Table of Contents

Interest Rate and Fees. At Metals USA's option, interest accrues on the loans made under the ABL facility at either LIBOR plus a specified margin (set at 2.50% (3.875% for the FILO tranche) as of March 31, 2011), or the base rate (which is based off of the federal funds rate plus 0.50%, Bank of America's prime rate or LIBOR plus 1.00%), plus a specified margin (set at 1.50% (2.875% for the FILO tranche) as of March 31, 2011). The marginal rates vary based on our average monthly excess availability (as defined in the ABL Credit Agreement). The applicable base rate and the effective LIBOR rate for the loans made under the ABL facility were 3.25% and 0.3084%, respectively, as of March 31, 2011.

A commitment fee is payable on any unused commitment equal to 0.375% per annum to the lenders under the ABL facility if utilization under the facility exceeds 40.0% of the total commitments under the facility and a commitment fee equal to 0.5% per annum if utilization under the facility is less than or equal to 40.0% of the total commitments under the facility. Customary letter of credit fees are also payable, as necessary.

Certain Conditions Precedent and Covenants. As a condition precedent to any borrowing or issuance of a letter of credit, a material adverse effect shall not have occurred or exist. The ABL facility contains customary representations, warranties and covenants, including limitations on our ability to incur or guarantee additional debt, subject to certain exceptions, pay dividends, or make redemptions and repurchases, with respect to capital stock, repay debt, create or incur certain liens, make certain loans or investments, make acquisitions or investments, engage in mergers, acquisitions, asset sales, and engage in certain transactions with affiliates. The ABL facility requires a lock-box arrangement for collection of accounts receivable and proceeds from sales of inventory. Metals USA may make withdrawals from the lock-box unless an event of default exists or borrowing availability is less than the greater of (i) \$50.0 million and (ii) 12.5% of the lesser of (A) the borrowing base (not to exceed \$62.5 million) and (B) the aggregate commitment. We do not have to maintain a minimum FCCR as long as our borrowing availability is greater than or equal to the greater of (i) \$45.0 million and (ii) 10% of the lesser of the borrowing base and the aggregate commitment (the Minimum Availability). We must maintain an FCCR of at least 1.0 to 1.0 if borrowing availability falls below the Minimum Availability. For purposes of determining covenant compliance, the FCCR is determined by dividing (i) the sum of Adjusted EBITDA (as defined in the ABL Credit Agreement) minus income taxes paid in cash (excluding certain specified deferred taxes) minus non-financed capital expenditures by (ii) the sum of certain distributions paid in cash, cash interest expense and scheduled principal reductions on debt, and is calculated based on such amounts for the most recent period of four consecutive fiscal quarters for which financial statements are available. FCCR and Adjusted EBITDA are each calculated on a pro forma basis. As of March 31, 2011, our FCCR was 2.83. We were in compliance with all covenants as of March 31, 2011.

Certain Events of Default and Remedies. The ABL facility contains events of default with respect to: default in payment of principal when due, default in the payment of interest, fees or other amounts after a specified grace period, material breach of the representations or warranties, default in the performance of covenants, a default that causes or permits acceleration under any indebtedness with a principal amount in excess of a specified amount, certain bankruptcy events, certain ERISA violations, invalidity of certain security agreements or guarantees, material judgments, or a change of control. In the event of default, the ABL Credit Agreement may permit a majority of the lenders to: (i) restrict the amount of or refuse to make revolving loans; (ii) cause customer receipts to be applied against borrowings under the ABL facility which would cause Metals USA to suffer a rapid loss of liquidity and restrict the ability to operate on a day-to-day basis; (iii) restrict or refuse to provide letters of credit; or ultimately: (iv) terminate the commitments and the agreement; or (v) declare any or all obligations to be immediately due and payable if such default is not cured in the specified period required. Any payment default or acceleration under the ABL facility would also result in a default under the Metals USA Notes that would provide the holders of the Metals USA Notes with the right to demand immediate repayment.

Interest Rate Swaps. In February 2008, \$250.0 million notional amount of outstanding borrowings under the ABL facility were swapped from a floating LIBOR-based rate to a fixed rate. The swaps entitle us to receive quarterly payments of interest at a floating rate indexed to the three-month LIBOR and pay a fixed rate that ranges from 2.686% to 2.997%, converting a portion of the outstanding borrowings on our ABL facility from a floating rate obligation to a fixed rate obligation. Pretax realized gains and losses from the Company's ABL

Table of Contents

facility interest rate swaps which were recognized in earnings during the three months ended March 31, 2011 amounted to \$0.1 million of additional interest expense, consisting of \$1.4 million of settlements, offset by \$1.3 million of changes in the fair value of derivatives. The fair value of the Company's ABL facility interest rate swaps was \$0.4 million at March 31, 2011, the entire amount of which was classified as accrued liabilities in the condensed consolidated balance sheet.

The Metals USA Notes

On the closing date of the Merger, we received approximately \$268.0 million of net cash proceeds from the sale of \$275.0 million in aggregate principal amount of the Metals USA Notes, after deducting expenses of the offering. Interest on the Metals USA Notes accrues at the rate of 11 1/8% per annum and is payable semiannually in arrears on June 1 and December 1 and commenced on June 1, 2006. The Metals USA Notes will mature on December 1, 2015. We may redeem some or all of the Metals USA Notes at any time on or after December 1, 2010, at a predetermined redemption price plus accrued and unpaid interest and additional interest, if any, to the applicable redemption date. If we experience a change of control and we do not redeem the Metals USA Notes, we will be required to make an offer to repurchase the Metals USA Notes at a price equal to 101% of the principal amount, plus accrued and unpaid interest and additional interest, if any, to the date of repurchase.

Under the Indenture governing the Metals USA Notes, we are required to pay interest on overdue principal at 1% per annum in excess of the above rate and are required to pay interest on overdue installments of interest at such higher rate to the extent lawful. The Indenture governing the Metals USA Notes contains the covenants described under **Covenant Compliance** above.

The Metals USA Notes Indenture contains certain customary events of default, including (subject, in some cases, to customary cure period thresholds) defaults based on (1) the failure to make payments under the Metals USA Indenture when due, (2) breach of covenants, (3) cross-defaults to other material indebtedness, (4) bankruptcy events and (5) material judgments. We were in compliance with all covenants as of March 31, 2011.

Industrial Revenue Bonds

Metals USA is a conduit bond obligor on IRBs issued by the municipalities of Muskogee, Oklahoma and Jeffersonville, Indiana. The IRBs are secured by certain real estate, leasehold improvements and equipment acquired with proceeds from the IRBs. The Muskogee IRB is due in one lump sum of \$5.7 million on May 1, 2016. The Jeffersonville IRBs had principal amounts outstanding of \$3.5 million and \$4.2 million as of March 31, 2011, and are being redeemed in varying amounts annually through August 2021 and December 2027, respectively. The interest rates assessed on the IRBs vary from month to month. As of March 31, 2011, the weighted average variable interest rate on the IRBs was 0.51%. See below for a discussion of fixed interest rates payable on the Jeffersonville IRBs under interest rate swap agreements. The IRBs place various restrictions on certain of our subsidiaries, including but not limited to maintenance of required insurance coverage, maintenance of certain financial ratios, limits on capital expenditures and maintenance of tangible net worth and are supported by letters of credit. We were in compliance with all covenants as of March 31, 2011.

Interest Rate Swaps. In November 2004 and December 2007, ORMS, which we acquired on December 31, 2010, entered into two separate interest rate swap agreements in connection with the Jeffersonville IRBs discussed above. The notional amounts under these swaps correspond to the principal amounts of the IRBs, which were a combined \$7.7 million as of March 31, 2011, and are reduced on an annual basis as the IRBs are redeemed. Under the swaps, the notional amounts under the Jeffersonville IRBs were swapped from a floating rate based on a rate established by the Securities Industry and Financial Market Association (SIFMA) to fixed rates of 4.00% and 3.75%, converting the outstanding borrowings on the Jeffersonville IRBs from floating rate obligations to fixed rate obligations. Pretax realized gains and losses from the Company's Jeffersonville IRB interest rate swaps recognized in earnings during the three months ended March 31, 2011 were immaterial, with

Table of Contents

approximately \$0.1 million of settlements that were effectively offset by approximately the same amount of changes in the fair value of derivatives. The fair value of the Jeffersonville IRB interest rate swaps was \$0.5 million at March 31, 2011, \$0.1 million of which was classified as accrued liabilities and the remaining \$0.4 million of which was classified as other non-current liabilities in the condensed consolidated balance sheet.

Restricted Payments

Both the ABL Credit Agreement and the Indenture governing the Metals USA Notes contain restrictions as to the payment of dividends. Under the ABL Credit Agreement, general distributions are unlimited if the FCCR is at least 1.1:1.0 and availability (including a 30 day lookback) exceeds the greater of (i) \$50.0 million and (ii) 15% of the lesser of the borrowing base (not to exceed \$75.0 million) and the aggregate commitments. As of March 31, 2011, our FCCR as defined in the ABL Credit Agreement was 2.83, and our borrowing availability was \$142.7 million.

As of March 31, 2011, \$4.2 million was available for general distribution under the restricted payment covenant contained in the Indenture governing the Metals USA Notes. As of March 31, 2011, Flag Intermediate and its 100% wholly owned subsidiary, Metals USA, had \$170.6 million of total stockholder's equity.

We believe that cash flow from operations, supplemented by cash available under the ABL facility, will be sufficient to enable us to meet our debt service and operational obligations as they come due for at least the next twelve months.

Commitments and Contingencies

From time to time, we are involved in a variety of claims, lawsuits and other disputes arising in the ordinary course of business. We believe the resolution of these matters and the incurrence of their related costs and expenses should not have a material adverse effect on our consolidated financial position, results of operations, liquidity or cash flows.

Off-Balance Sheet Arrangements

We were not engaged in off-balance sheet arrangements through any unconsolidated, limited purpose entities and no material guarantees of debt or other commitments to third parties existed as of March 31, 2011.

Critical Accounting Policies and Estimates

The discussion and analysis of the Company's financial condition and results of operations is based upon the Company's condensed consolidated financial statements, which have been prepared in accordance with GAAP. The preparation of these condensed consolidated financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. Estimates are based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. The result of this process forms the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. We review our estimates and judgments on a regular, ongoing basis. Actual results may differ from these estimates due to changed circumstances and conditions.

The following accounting policies and estimates are considered critical in light of the potential material impact that the estimates, judgments and uncertainties affecting the application of these policies might have on the Company's reported financial information.

Accounts Receivable We generally recognize revenue as product is shipped (risk of loss for our products generally passes at time of shipment), net of provisions for estimated returns. Financial instruments, which potentially subject us to concentrations of credit risk, consist principally of trade accounts and notes receivable.

Table of Contents

Collections on our accounts receivable are made through several lockboxes maintained by our lenders. Credit risk associated with concentration of cash deposits is low as we have the right of offset with our lenders for a substantial portion of our cash balances. Concentrations of credit risk with respect to trade accounts receivable are within several industries. Generally, credit is extended once appropriate credit history and references have been obtained. We perform ongoing credit evaluations of customers and set credit limits based upon reviews of customers current credit information and payment history. We monitor customer payments and maintain a provision for estimated credit losses based on historical experience and specific customer collection issues that we have identified. Provisions to the allowance for doubtful accounts are made monthly and adjustments are made periodically based upon our expected ability to collect all such accounts. Generally we do not require collateral for the extension of credit.

Each month we consider all available information when assessing the adequacy of the provision for allowances, claims and doubtful accounts. Adjustments made with respect to the allowance for doubtful accounts often relate to improved information not previously available. Uncertainties with respect to the allowance for doubtful accounts are inherent in the preparation of financial statements. The rate of future credit losses may not be similar to past experience.

Inventories As of March 31, 2011 we had inventories of \$338.3 million. Inventories are stated at the lower of cost or market (LCM). Our inventories are accounted for using a variety of methods including specific identification, average cost and the first-in, first-out method of accounting. Under the LCM concept, the Company is required to recognize an additional expense in cost of sales in the current period for any inventory whose replacement cost has declined below its carrying cost.

We conduct an LCM inventory valuation annually as of December 31 or more frequently if circumstances indicate potential write-downs. The LCM valuation requires us to review product specific facts and circumstances, including current selling prices, estimated costs to complete and deliver the product, expectations for normal profit margins, costs currently in inventory, as well as current replacement costs.

In addition to making an assessment of current selling prices relative to product cost, we also review customer purchasing trends and take into consideration the current economic environment as it relates to our industry and the end-use industries of our customers.

During 2008 and 2009, the global financial crisis caused significant contraction in industrial production world-wide. The reduction in demand for metals was driven by widespread inventory destocking throughout the supply chain as industry participants looked to preserve liquidity by reducing their investment in working capital. As a direct consequence of the rapid and unprecedented decline in metals prices we experienced as a result of the economic recession discussed above, we recorded \$53.4 million of write-downs during the year ended December 31, 2009, as compared to \$6.8 million of write-downs during the year ended December 31, 2008, for inventory LCM adjustments in our metal service center businesses.

We have not recorded any LCM adjustments since 2009, as the pricing environment relative to metal costs has been more favorable since approximately the second quarter of 2009. We continue to manage our inventory by working to optimize the tradeoff between holding inventory and forgoing incremental sales.

We regularly review inventory on hand and may periodically record provisions for damaged and slow-moving inventory based on the factors discussed above. Adjustments made with respect to inventory valuation often relate to improved information not previously available. Uncertainties with respect to inventory valuation are inherent in the preparation of financial statements. The rate of future losses associated with damaged or slow moving inventory, or LCM write-downs, may not be similar to past experience.

New Accounting Pronouncements

In December 2010, the FASB issued ASU No. 2010-29 which amended ASC Topic 805 *Business Combinations* to specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the year had occurred as of the beginning of the comparable prior annual reporting period only. The ASU also expands the supplemental pro forma disclosures under ASC Topic 805 to include a description of the nature and the amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The ASU is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. We have disclosed the required information in accordance with ASU 2010-29 as it relates to the Trident acquisition described in Note 2 to our condensed consolidated financial statements for the period ended March 31, 2011.

ITEM 3. *QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*

In the normal course of our business, we are exposed to market risk, primarily from changes in interest rates and the cost of metal we hold in inventory. We continually monitor exposure to market risk and develop appropriate strategies to manage this risk. With respect to our metal purchases, there is no recognized market to purchase derivative financial instruments to reduce the inventory exposure risks. See *Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources* for a discussion of market risk relative to steel prices.

Our exposure to market risk for changes in interest rates relates primarily to the ABL facility, which is subject to variable interest rates. As of March 31, 2011, outstanding borrowings under the ABL facility were \$239.4 million. Based on the weighted average borrowings outstanding on the ABL facility during the three months ended March 31, 2011, a one percent increase or decrease in the weighted average facility rate would have resulted in a change to pretax interest expense of approximately \$0.4 million for the period.

In February 2008, \$250.0 million notional amount of outstanding borrowings under the ABL facility were swapped from a floating LIBOR-based rate to a fixed rate. The swaps entitle us to receive quarterly payments of interest at a floating rate indexed to the three-month LIBOR and pay a fixed rate that ranges from 2.686% to 2.997%, converting a portion of the outstanding borrowings on our ABL facility from a floating rate obligation to a fixed rate obligation. Pretax realized gains and losses from the Company's ABL facility interest rate swaps which were recognized in earnings during the three months ended March 31, 2011 amounted to \$0.1 million of additional interest expense, consisting of \$1.4 million of settlements, offset by \$1.3 million of changes in the fair value of derivatives. The fair value of the Company's ABL facility interest rate swaps was \$0.4 million at March 31, 2011, the entire amount of which was classified as accrued liabilities in the condensed consolidated balance sheet.

In November 2004 and December 2007, ORMS, which we acquired on December 31, 2010, entered into two separate interest rate swap agreements in connection with the Jeffersonville IRBs. The notional amounts under these swaps correspond to the principal amounts of the IRBs, which were a combined \$7.7 million as of March 31, 2011, and are reduced on an annual basis as the IRBs are redeemed. Under the swaps, the notional amounts under the Jeffersonville IRBs were swapped from a floating rate based on a rate established by the Securities Industry and Financial Market Association (SIFMA) to fixed rates of 4.00% and 3.75%, converting the outstanding borrowings on the Jeffersonville IRBs from floating rate obligations to fixed rate obligations. Pretax realized gains and losses from the Company's Jeffersonville IRB interest rate swaps recognized in earnings during the three months ended March 31, 2011 were immaterial, with approximately \$0.1 million of settlements that were effectively offset by approximately the same amount of changes in the fair value of derivatives. The fair value of the Jeffersonville IRB interest rate swaps was \$0.5 million at March 31, 2011, \$0.1 million of which was classified as accrued liabilities and the remaining \$0.4 million of which was classified as other non-current liabilities in the condensed consolidated balance sheet.

Table of Contents

At March 31, 2011, \$226.3 million aggregate principal amount of Metals USA Notes were outstanding with a fixed interest rate of 11 ¹/₈ %. Changes in market interest rates will not impact cash interest payable on the Metals USA Notes. At April 1, 2011, the Metals USA Notes were traded at approximately 105.75% of face value, based on quoted market prices.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO) of Metals USA Holdings Corp., of the effectiveness of our disclosure controls and procedures (as defined pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934).

Based on that evaluation, the CEO and CFO of Metals USA Holdings Corp. have concluded that our disclosure controls and procedures are effective to ensure that the information required to be disclosed in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.

We maintain a system of internal accounting controls that are designed to provide reasonable assurance that our books and records accurately reflect our transactions and that our policies and procedures are followed. There have been no changes in our internal controls over financial reporting or in other factors that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, we are involved in a variety of claims, lawsuits and other disputes arising in the ordinary course of business. We believe the resolution of these matters and the incurrence of their related costs and expenses should not have a material adverse effect on our consolidated financial position, results of operations, liquidity or cash flows. While it is not feasible to predict the outcome of all pending suits and claims, the ultimate resolution of these matters as well as future lawsuits could have a material adverse effect on our business, financial condition, results of operations, cash flows or reputation.

ITEM 1A. RISK FACTORS

There have been no material changes to the disclosure related to risk factors made in our Annual Report on Form 10-K for the year ended December 31, 2010.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Sales of Unregistered Securities

None.

Purchases of Equity Securities

None.

Limitations Upon the Payment of Dividends

Both the ABL Credit Agreement and the Indenture governing the Metals USA Notes contain restrictions as to the payment of dividends. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources Restricted Payments for further discussion of these restrictive covenants.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. (REMOVED AND RESERVED)

ITEM 5. OTHER INFORMATION

None.
