**Consolidated Financial Results**

**April 1, 2011 – September 30, 2011**

October 25, 2011

*In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with accounting principles generally accepted in the United States of America, except as modified to account for stock splits in accordance with the usual practice in Japan.*

*U.S. Dollar amounts have been calculated at Yen 76.65 to \$1.00, the approximate exchange rate prevailing at September 30, 2011.*

*These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under "Risk Factors" in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.*

*The Company believes that it will be considered a "passive foreign investment company" for United States Federal income tax purpose in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.*

Note 2: ROA is the ratio of Net Income Attributable to ORIX Corporation for the period to average Total Assets.

**Economic Environment**

The global economy continued to show moderate recovery. However, uncertainty is growing due in part to the spread of the European credit crisis, delayed economic recovery and fiscal concerns in advanced economies and tightened monetary policies in emerging economies.

In the United States, housing investment and employment remain weak, giving rise to a sense of slowdown amid a weakening business sentiment and an anticipated end to quantitative easing.

There continue to be lingering financial concerns related to the peripheral states in the European Union, which affect the financial and capital markets. Repercussions are starting to be felt in the real economy, with business confidence rapidly deteriorating even among core European Union states such as Germany. Despite the temporary avoidance of a debt crisis through the cooperation of countries around the world, the issue has yet to be resolved.

Emerging economies in Asia continue to experience stable growth, yet the specter of inflation continues to simmer beneath the surface. The rate of growth is currently expected to slow due to the slowdown of the European and United States economies.

The Japanese economy continues to tread water despite recovery from effects of the Great East Japan Earthquake (hereinafter "the earthquake") and a partial recovery in production activity. Amid the confusion in the global financial markets, the yen continues to remain at a historic high, putting a squeeze on economic recovery.

**Overview of Business Performance (April 1, 2011 to September 30, 2011)**

Revenues for the six-month period ended September 30, 2011 (hereinafter "the second consolidated period") increased 3% to ¥483,191 million compared to ¥470,886 million during the same period of the previous fiscal year. Interest on loans and investment securities decreased compared to the same period of the previous fiscal year in line with a decrease in the balance of installment loans. Meanwhile, operating lease revenues increased compared to the same period of the previous fiscal year mainly due to an increase in sales of automobiles in the Maintenance Leasing segment and an increase in aircraft operating lease revenues in the Overseas Business segment, and brokerage commissions and net gains on investment securities increased compared to the same period of the previous fiscal year due to the sale of shares of Aozora Bank.

Total expenses decreased 5% to ¥406,010 million compared to ¥425,219 million during the same period of the previous fiscal year. Both interest expense and provision for doubtful receivables and probable loan losses decreased compared to the same period of the previous fiscal year due

## Edgar Filing: ORIX CORP - Form 6-K

to a decrease in the balance of liabilities and a decrease in the amount of non-performing loans, respectively. In addition, write-downs of securities decreased mainly due to the absence of write-downs recorded for non-marketable securities during the same period of the previous fiscal year.

Equity in net income (loss) of affiliates recorded a loss of ¥2,810 million down from a profit of ¥5,871 million for the previous fiscal year. A write-down was recorded for the equity-method affiliate Monex Group, Inc..

As a result of the foregoing, income before income taxes and discontinued operations increased 47% to ¥76,193 million compared to ¥51,884 million during the same period of the previous fiscal year, and net income attributable to ORIX Corporation rose 33% to ¥45,335 million from ¥34,053 million during the same period of the previous fiscal year.

- 2 -

## **Table of Contents**

### **Segment Information**

All segments, with the exception of the Retail segment, which recognized a write-down on investment in affiliates, recorded increased profits compared to the same period of the previous fiscal year.

In line with a change in management classification, the environment and energy related businesses, which were heretofore included in the Corporate Financial Services segment have been included in the Investment Banking segment during the second consolidated period, and the Investment Banking segment has been renamed the Investment and Operation segment.

Due to these changes, the reclassified figures are shown for the second consolidated period and the fiscal year ended March 31, 2011 (See page 11, Segment Information ).

Segment information for the second consolidated period is as follows:

### **Corporate Financial Services Segment**

This segment is involved in lending, leasing and the commission business for the sale of financial products.

Segment revenues decreased 10% to ¥36,060 million compared to ¥40,119 million during the same period of the previous fiscal year due to a decrease in installment loan revenues in line with a decrease in the average balance of installment loans as a result of selective new loan execution continuing from the previous fiscal year despite robust direct financing lease revenues.

Similarly, segment expenses decreased compared to the same period of the previous fiscal year, resulting from decreases in provision for doubtful receivables and probable loan losses and interest expense.

As a result, segment profits increased 105% to ¥8,556 million compared to ¥4,166 million during the same period of the previous fiscal year.

Segment assets decreased 8% compared to March 31, 2011 to ¥891,819 million due to a decline in investment in direct financing leases and the balance of installment loans.

### **Maintenance Leasing Segment**

This segment consists of automobile and rental operations. The automobile operations are comprised of automobile leasing, rentals and car sharing and the rental operations are comprised of leasing and rental of precision measuring and IT-related equipment.

Despite limited recovery in domestic capital expenditure and an otherwise bleak business environment outlook, Maintenance Leasing segment revenues have remained stable due to the ability to provide customers with high value-added services while meeting corporate customers' cost reduction needs.

Segment revenues remained robust, increasing 4% to ¥117,546 million compared to ¥112,511 million during the same period of the previous fiscal year due to solid revenues from operating leases including the sales of used automobiles. Segment expenses remained flat year on year.

As a result, segment profits increased 30% to ¥18,312 million compared to ¥14,041 million during the same period of the previous fiscal year.

Segment assets increased 3% compared to March 31, 2011 to ¥515,360 million due to an increase in investment in direct financing leases and operating lease assets.

## **Table of Contents**

### **Real Estate Segment**

This segment consists of development and rental of commercial real estate and office buildings; condominium development and sales; hotel, golf course and training facility operation; senior housing development and management; REIT asset management; real estate investment and advisory services and real estate finance.

A post-earthquake drop in sales was feared in the residential condominium market, but a calm is returning to the market as evidenced by contract completion rates surpassing the key benchmark level of 70% in the Tokyo metropolitan area.

Under these conditions, the number of condominiums delivered increased to 467 units compared to 437 units during the same period of the previous fiscal year.

The office building market is still in an adjustment phase. However, investors such as J-REITs and overseas investors are starting to consider the acquisition of new properties. Under this environment, the real estate investment business is pursuing a policy of turning over assets while carefully monitoring the market and making appropriate asset sales.

The real estate operating business, which consists of various businesses such as hotels, Japanese inns, golf courses and training facilities, has stable revenues despite a small portion of facilities having halted operation at the beginning of the fiscal year due to the earthquake.

Segment revenues decreased 4% to ¥95,906 million compared to ¥99,507 million during the same period of the previous fiscal year due to a decrease in the sale of real estate under operating leases and delivery of condominium units being partially offset by an increase in operating lease revenues resulting from an increase in the number of properties in operation.

Segment expenses decreased compared to the same period of the previous fiscal year due to a decrease in write-downs of securities, write-downs of long-lived assets and interest expense offsetting an increase in provision for doubtful receivables and probable loan losses.

As a result, segment profits increased 44% to ¥3,454 million compared to ¥2,392 million during the same period of the previous fiscal year due to gains on sales recorded by a real estate joint venture.

Segment assets decreased 5% compared to March 31, 2011 to ¥1,467,636 million due to the sales of real estate under operating leases and decreases in installment loans and investment in securities.

### **Investment and Operation Segment**

This segment consists of loan servicing (asset recovery), principal investment, M&A advisory, venture capital, securities brokerage and the environment and energy -related businesses.

The domestic IPO market has been stagnant since the Lehman Shock, but there continue to be steady corporate realignment activities such as mergers, acquisitions and de-listings.

Segment revenues decreased 12% to ¥40,166 million compared to ¥45,892 million during the same period of the previous fiscal year in line with decreased revenues as a result of the sale of a consolidated subsidiary during the previous fiscal year despite gains on investment securities from the sale of Aozora Bank shares and robust collection and fee revenues in the servicing business.

Similarly, segment expenses decreased compared to the same period of the previous fiscal year due to the effects of the sale of a consolidated subsidiary during the previous fiscal year in addition to decreases in write-downs of securities and provision for doubtful receivables and probable loan losses.

Segment profits increased 132% to ¥14,931 million compared to ¥6,432 million during the same period of the previous fiscal year due to the foregoing in addition to increased profits from equity-method affiliates.

Segment assets remained flat at ¥511,850 million compared to March 31, 2011.

### **Retail Segment**

## Edgar Filing: ORIX CORP - Form 6-K

This segment consists of the life insurance operations, the banking business and the card loan business.

In the life insurance business, insurance-related income grew steadily due to an increase in the number of policies in force.

Both corporate lending and individual home loans steadily increased in the banking business, and both revenues and profits increased.

As a result of the foregoing, segment revenues increased 6% to ¥79,829 million compared to ¥75,237 million during the same period of the previous fiscal year. Segment expenses remained flat year on year. However, segment profits decreased 55% to ¥6,855 million compared to ¥15,175 million during the same period of the previous fiscal year resulting from the recognition of a write-down of the equity-method affiliate Monex Group, Inc..

Segment assets remained flat compared to March 31, 2011 at ¥1,670,787 million due to an increase in installment loans being offset by a decrease in investment in affiliates.

- 4 -

**Table of Contents****Overseas Business Segment**

This segment consists of leasing, lending, investment in bonds, investment banking, real estate-related operations, and ship- and aircraft-related operations in the United States, Asia, Oceania and Europe.

The moderate recovery experienced in the United States may be slowing down as housing investment and employment data continue to raise concern and quantitative easing measures are expected to conclude. Meanwhile, there is the possibility of a short-term adjustment phase in Asia, which is continuing to see strong economic performance, in response to concerns regarding inflation and the effects of European and United States economic slowdown.

Segment revenues increased 9% to ¥91,308 million compared to ¥83,897 million during the same period of the previous fiscal year due to direct financing leases in Asia, automobile and aircraft operating leases, in addition to revenue contributions from Red Capital (a loan servicing company) and Mariner Investment (a fund management company) acquired last year as well as gains on investment securities in the United States.

Segment expenses increased due to an increase in interest expense despite a decrease in provision for doubtful receivables and probable loan losses.

As a result, segment profits increased 29% to ¥29,069 million compared to ¥22,478 million during the same period of the previous fiscal year.

Segment assets decreased 9% compared to March 31, 2011 to ¥889,259 million due to the effects of the appreciated yen and sales of municipal bonds and loans in the United States, offsetting increases from new investments in a water business company in China and a life insurance company in South Korea.

ORIX has almost no exposure to assets or investments in Europe that are cause for credit risk concern and there is no direct impact on either segment profits or segment assets stemming from the European financial problems.

**(2) Qualitative Information Regarding Consolidated Financial Condition****Financial Condition**

		Fiscal Year Ended March 31, 2011	Fiscal Period Ended Sept. 30, 2011	Change	Year on Year Change
Total Assets	(millions of yen)	8,581,582	8,255,173	(326,409)	(4%)
(Segment Assets)		6,142,818	5,946,711	(196,107)	(3%)
Total Liabilities	(millions of yen)	7,206,652	6,853,677	(352,975)	(5%)
(Long- and Short-term Debt)		5,009,901	4,667,002	(342,899)	(7%)
(Deposits)		1,065,175	1,061,421	(3,754)	(0%)
Shareholders' Equity*	(millions of yen)	1,319,341	1,330,274	10,933	1%

Note 3: Shareholders' Equity refers to ORIX Corporation Shareholders' Equity.

Total assets decreased 4% to ¥8,255,173 million from ¥8,581,582 million on March 31, 2011. Investment in operating leases increased due to the completion of large properties under operating leases. However, installment loans decreased as a result of selective loan execution, continuing from the previous fiscal year. Also, investment in securities decreased due to a decrease in trading securities overseas and specified bonds in Japan which offset increases resulting from new transactions overseas in addition to a decrease in investment in affiliates due to the recognition of a write-down. Segment assets decreased 3% compared to March 31, 2011 to ¥5,946,711 million.

The balance of interest bearing liabilities is controlled at an appropriate level depending on assets, cash flow and liquidity on-hand in addition to the domestic and overseas financial environment. As a result, long- and short-term debt and deposits decreased compared to March 31, 2011.

Shareholders' equity increased 1% compared to March 31, 2011 to ¥1,330,274 million primarily due to an increase in retained earnings.

**Table of Contents**

**(3) Qualitative Information Regarding Forecasts for Consolidated Financial Results**

**Financial Highlights for the Fiscal Year Ending March 31, 2012**

Based on the operating environment described above, ORIX Corporation forecasts total revenues of ¥980,000 million (up 1% year on year) and net income attributable to ORIX Corporation of ¥77,500 million (up 15% year on year) for the fiscal year ending March 31, 2012.

The Corporate Financial Services segment is aiming to further accelerate the Finance + Services strategy.

Maintenance Leasing segment revenues are forecasted to be stable through the expansion of high value-added services.

The Real Estate segment is seeking to strengthen its stable revenue base by continuous asset turnover, joint investments with overseas investors and promotion of its real estate-related asset management business.

The Investment and Operation segment aims for stable revenues through business expansion capitalizing on loan servicing expertise and promotion of equity investments.

Retail segment forecasts profit contributions with the expansion of the life insurance and banking businesses.

The Overseas Business segment aims to expand stable revenues centered around subsidiaries added to the Group during the previous fiscal year in the United States. In addition, it will embrace growth in emerging markets such as Asia, while capitalizing on the network and operating base that it has established over the years.

Although forward-looking statements in this document such as forecasts are attributable to current information available to ORIX Corporation and are based on assumptions deemed rational by ORIX Corporation, actual financial results may differ materially due to various factors. Therefore, readers are urged not to place undue reliance on these figures.

Various factors that could cause these figures to differ materially include, but are not limited to, those described under Risk Factors in the March 31, 2011 Form 20-F submitted to the U.S. Securities and Exchange Commission.

**Note 1:** The Company evaluates the performance of segments based on income before income taxes and discontinued operations, adjusted for results of discontinued operations, net income attributable to the noncontrolling interests and net income attributable to the redeemable noncontrolling interests before applicable tax effect. Tax expenses are not included in segment profits.

**Note 2:** For certain VIEs used for securitization which are consolidated in accordance with ASC 810-10 ( Consolidations ), for which the VIE s assets can be used only to settle related obligations of those VIEs and the creditors (or beneficial interest holders) do not have recourse to other assets of the Company or its subsidiaries, segment assets are measured based on the amount of the Company and its subsidiaries net investments in the VIEs, which is different from the amount of total assets of the VIEs, and accordingly, segment revenues are also measured at a net amount representing the revenues earned on the net investments in the VIEs.

In line with a change in management classification, the environment and energy related businesses, which were heretofore included in the Corporate Financial Services segment have been included in the Investment Banking segment during the second consolidated period, and the Investment Banking segment has been renamed the Investment and Operation segment.

Due to these changes, the reclassified figures are shown for the six months ended September 30, 2010 and as of March 31, 2011
