REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Rockwell Automation 1165(e) Plan

and Participants therein:

We have audited the accompanying statements of net assets available for benefits of Rockwell Automation 1165(e) Plan (the Plan) as of December 31, 2012 and 2011, and the related statements of changes in net assets available for benefits for the years then ended. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2012 and 2011, and the changes in net assets available for benefits for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedule, as listed in the Table of Contents, is presented for the purpose of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. The supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in the audit of the basic 2012 financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic 2012 financial statements taken as a whole.

ROCKWELL AUTOMATION 1165(e) PLAN

NOTES TO FINANCIAL STATEMENTS

AS OF AND FOR THE YEARS ENDED DECEMBER 31, 2012 AND 2011

1. DESCRIPTION OF THE PLAN

The following brief description of the Rockwell Automation 1165(e) Plan (the "Plan") is provided for general information purposes only. Participants should refer to the Summary Plan Description and Plan document for more complete information.

- a. *General* - The Plan is a defined contribution savings plan sponsored by Rockwell Automation, Inc. ("Rockwell Automation"). The Plan covers all employees in Puerto Rico who elect to participate in the Plan. The Rockwell Automation Employee Benefit Plan Committee and the Plan Administrator control and manage the operation and administration of the Plan. Banco Popular de Puerto Rico (the "Trustee") is the trustee of the Plan. Fidelity Management Trust Company ("Fidelity") has custody of the Plan's assets and manages the assets along with several other investment managers. Fidelity is the trustee of the Rockwell Automation Defined Contribution Master Trust (the "Master Trust"). The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974 ("ERISA").

Participants in the Plan may invest in a suite of twelve lifecycle commingled pools, seven core investment options and a brokerage option. In addition, the Rockwell Automation Stock Fund was available in 2012 and 2011 and is specific to the Plan.

- b. *Participation* - The Plan provides that eligible employees electing to become participants may contribute up to a maximum of 50% of base compensation, as defined in the Plan document. However, contributions by highly compensated participants are limited to 16% of the participant's base compensation. Participant contributions can be made either before or after Puerto Rico taxation of a participant's base compensation.

Rockwell Automation contributes an amount equal to 50% of the first 6% of base compensation contributed by the participants. All Rockwell Automation matching contributions are made to the Rockwell Automation Stock Fund. Participants may elect to transfer a portion or all of their holdings in the Rockwell Automation Stock Fund to one or more of the other investment funds.

- c. *Investment Elections* - Participants may contribute to any or all of the funds that are available for investments in 1% increments. Participants may change such investment elections on a daily basis. If a participant does not have an investment election on file, contributions were made to one of the Fidelity Freedom K Funds, based on the participant's projected retirement date.

- d. *Unit Values* - Participants do not own specific securities or other assets in the various funds, but have an interest therein represented by units valued as of the end of each business day. However, voting rights are extended to participants in proportion to their interest in each stock fund and each mutual fund, as represented by common units. Participants' accounts are charged or credited for Plan earnings or losses from investments, as the case may be, with the number of units properly attributable to each participant.

Table of Contents

- e. *Vesting* - Each participant is fully vested at all times in the portion of the participant's account that relates to the participant's contributions and earnings thereon. Rockwell Automation's matching contributions and earnings are vested after the participant has completed three years of vesting service, as defined in the Plan document.

- f. *Notes Receivable From Participants* - A participant may obtain a loan in an amount as defined in the Plan document (not less than \$1,000 and not greater than the lower of \$50,000, reduced by the participant's highest outstanding loan balance during the 12 month period before the date of the loans, or 50% of the participant's vested account balance less any outstanding loans) from the balance of the participant's account. Loans are secured by the remaining balance in the participant's account. Interest is charged at a rate equal to the prime rate plus 1% as of the last day of the month before the loan is requested. The loans can be repaid through payroll deductions over terms of 12, 24, 36, 48 or 60 months, or up to 120 months for the purchase of a primary residence, or repaid in full after a minimum of one month. Payments of principal and interest are credited to the participant's account. Participants may have up to two outstanding loans at any time from the Plan.

- g. *Forfeitures* - When certain terminations of participation in the Plan occur, the nonvested portion of the participant's account represents a forfeiture, as defined in the Plan document. Forfeitures remain in the Plan and subsequently are used to reduce Rockwell Automation's contributions to the Plan in accordance with ERISA. However, if the participant is re-employed with Rockwell Automation and fulfills certain requirements, as defined in the Plan document, the participant's account will be restored. As of December 31, 2012 and 2011, forfeited nonvested accounts were inconsequential. During the years ended December 31, 2012 and 2011, there was no reduction and a reduction of \$8,149, respectively, in Rockwell Automation's contributions from forfeited nonvested accounts.

- h. *Plan Termination* - Although Rockwell Automation has not expressed any current intent to terminate the Plan, Rockwell Automation has the authority to terminate or modify the Plan and to suspend contributions to the Plan in accordance with ERISA. If the Plan is terminated or contributions by Rockwell Automation are discontinued, each participant's employer contribution account will be fully vested. Benefits under the Plan will be provided solely from Plan assets.

- i. *Withdrawals and Distributions* - Active participants may withdraw certain amounts up to their entire vested interest when the participant attains the age of 59-1/2. Active participants may also withdraw certain amounts when financial hardship is demonstrated. Participant vested amounts are payable upon retirement, death or other termination of employment.

- j. *Expenses* - A majority of Plan fees and expenses, including fees and expenses associated with the provision of administrative services by external service providers, are paid from Plan assets with the remainder being paid by Rockwell Automation.

Table of Contents

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

- a. *Valuation of Investments* The Plan has an interest in the net assets of the Master Trust. The net assets of the Master Trust are stated at fair value. Benefit-responsive investment contracts held in the Master Trust are then adjusted and stated at contract value. Investment contracts held by a defined contribution plan are required to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan invests in investment contracts through a separate account fund (the Stable Value Fund) held by the Master Trust. The Statements of Net Assets Available for Benefits present the fair value of the investment in the separate account fund as well as the adjustment of the investment in the separate account fund from fair value to contract value relating to the investment contracts. The Statements of Changes in Net Assets Available for Benefits are presented on a contract value basis.

Purchases and sales of securities are recorded on a trade date basis. Interest income is recorded on an accrual basis. Dividends are recorded on the dividend payable date.

- b. *Notes Receivable From Participants* Notes receivable from participants are valued at their unpaid principal balance plus any accrued interest, which approximates fair value.
- c. *Fair Value Measurements* - Accounting Standards Codification (ASC) Topic 820 establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under ASC Topic 820 are described below:

Level 1 Valuation based on quoted prices in active markets for identical assets or liabilities that the Master Trust has the ability to access. Since the valuation is based on quoted prices that are readily and regularly available in the active market, valuation of these investments does not entail a significant degree of judgment.

Level 2 Valuation based on quoted prices in markets that are not active or for which all significant inputs are observable, directly or indirectly. Valuation methodology for these assets include:

Quoted prices for similar assets or liabilities in active markets;

Quoted prices for identical or similar assets or liabilities in inactive markets;

Inputs other than quoted prices that are observable for the asset or liability;

Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Valuation based on inputs that are unobservable and significant to the overall fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Table of Contents

- d. *Use of Estimates* - Estimates and assumptions made by the Plan's management affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases to Plan assets during the reporting period. Actual results could differ from those estimates.
- e. *Payment of Benefits* - Benefits are recorded when paid.
- f. *Risks and Uncertainties* - The Plan invests in various investments. In general, investments are exposed to various risks, such as interest rate, credit and overall market volatility. Due to the level of risk associated with certain investments, it is reasonably possible that changes in the values of certain investments will occur in the near term and that such changes could materially affect the amounts reported in the financial statements.
- g. *Reclassifications* - Certain reclassifications have been made to prior year amounts to conform to current year presentation.
- h. *Subsequent Events* - Management has evaluated the impact of all subsequent events through June 20, 2013, the date the Plan's financial statements were available to be issued, and determined that all subsequent events have been appropriately recognized and disclosed in the accompanying financial statements.

3. MASTER TRUST

The Plan's investments are held in the Master Trust account at the Trustee. Use of the Master Trust permits the commingling of the trust assets of a number of benefit plans of Rockwell Automation and its subsidiaries for investment and administrative purposes. Although assets are commingled in the Master Trust, the Trustee maintains supporting records for the purpose of allocating the net earnings or loss of the investment accounts to the various participating plans.

The Master Trust investments are valued at fair value at the end of each day. If available, quoted market prices are used to value investments. If quoted market prices are not available, the fair value of investments is estimated primarily by independent investment brokerage firms and insurance companies.

The net earnings or loss of the accounts for each day are allocated by the Trustee to each participating plan based on the relationship of the interest of each plan to the total of the interests of all participating plans.

Table of Contents

The net assets of the Master Trust at December 31, 2012 and 2011 are summarized as follows:

	2012	2011
Investments:		
Mutual funds	\$ 94,951,998	\$ 221,655,583
Lifecycle commingled pools	624,021,138	580,329,951
Common collective trusts	358,316,078	92,518,601
Separate account funds	1,272,006,848	1,310,493,342
Brokerage accounts	41,180,331	31,595,001
Total investments at fair value	2,390,476,393	2,236,592,478
Pending trades, net		1,118,325
Accrued loss		(98)
Accrued fees	(217,048)	(400,048)
Net assets at fair value	2,390,259,345	2,237,310,657
Adjustment from fair value to contract value for fully benefit-responsive investment contracts	(19,545,604)	(20,242,408)
Net assets	\$ 2,370,713,741	\$ 2,217,068,249

The following is a description of the valuation methodologies used for the Master Trust's investments measured at fair value. There have been no changes in the methodologies during the years ended December 31, 2012 and 2011.

Mutual funds Valued at the closing price reported on the active market on which the individual funds are traded.

Lifecycle commingled pools Valued at the net asset value (NAV) as determined by the custodian of the fund. The NAV is based on the fair value of the underlying assets owned by the fund, minus its liabilities, then divided by the number of units outstanding. The investment objective of these funds is to match performance of the appropriate custom target date fund index.

Brokerage accounts Consist primarily of equity and fixed income investments valued at the most recent closing price reported on the market on which the individual securities are traded.

Separate account funds; Stable Value fund Valued at fair value, based on information provided by the trustee, by discounting the related cash flows based on current yields of similar instruments with comparable durations and considering the credit-worthiness of the issuer of the specific instruments held by the fund at year end. The fair value of the interests in the stable value fund is based upon the net asset value of the fund reflecting all investments at fair value, including interests in fully benefit-responsive contracts as reported by the fund's manager. The investment objective of the stable value fund is to provide for preservation of capital, stability and predictability of returns.

Separate account funds; Rockwell Automation Stock fund Valued at the NAV of shares held at year end based on the fair value of the underlying investments, primarily Rockwell Automation common stock and short-term investments. The fund seeks to increase value of the participant investments over the long-term by investing in Rockwell Automation common stock. Short-term investments provide needed liquidity to the fund.

Table of Contents

Separate account funds; Other Valued at the NAV of shares held at year end based on the fair value of the underlying investments. The objective of these funds is to provide long-term capital growth and current income (Diversified fund) and to outperform the benchmark Russell 2500 Index over the long-term (Small & Mid Cap Equity fund).

Common collective trusts Valued at NAV, as reported by the fund manager based on the fair value of the underlying investments. The investment objective of the funds is to match the performance, adjusted for investment fees, of the S&P 500 Index (Northern Trust S&P 500 Index fund), Barclays Capital US Aggregate Bond Index (Northern Trust Collective Aggregate Index Bond Fund), and Morgan Stanley All Country World ex-US Investable Market Index (Northern Trust ACWI ex-US Investable Market Fund).

The lifecycle commingled pools, separate account funds, and common collective trusts provide daily liquidity; therefore, the redemption frequency is immediate for the participant, with no redemption notice period. The funds do not have any unfunded commitments.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Master Trust believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

The following tables set forth by level, within the fair value hierarchy, the fair value of the Master Trust's investments as of December 31, 2012 and 2011:

Investments at Fair Value as of December 31, 2012

	Level 1	Level 2	Level 3	Total
Mutual funds	\$ 94,951,998	\$	\$	\$ 94,951,998
Lifecycle commingled pools		624,021,138		624,021,138
Common collective trusts		358,316,078		358,316,078

Other	549,881			549,881
	\$ 553,579,453	\$ 1,135,641,063	\$ 547,371,962	\$ 2,236,592,478

Rockwell Automation has corrected the classification of certain savings plan investments related to the fair value hierarchy and/or the investment category as of and for the year ended December 31, 2011. Within the fair value hierarchy in the table above, level 1 decreased and level 2 increased by \$342 million. Level 3 remained unchanged.

The Stable Value fund, a level 3 investment, was valued using an income approach, as described earlier in this footnote. Unobservable inputs impacting fair value primarily relate to discount rates of underlying contracts ranging from 1.89% to 2.08%. Discount rates are determined based on inputs that market participants would use when pricing investments, including credit and liquidity risk. An increase in the discount rate would result in a decrease in fair value.

The table below sets forth a summary of changes in fair market value of the Master Trust's level 3 investments for the years ended December 31, 2012 and 2011:

	Separate Account Fund Stable Value Fund December 31, 2012	Separate Account Fund Stable Value Fund December 31, 2011
Balance, beginning of year	\$ 547,371,962	\$ 532,448,255
Change in adjustment to fair value from contract value	(696,804)	5,315,515
Sales	(152,031,480)	(93,213,891)
Purchases	145,120,597	91,109,084
Interest	10,803,813	12,828,619
Fees	(1,340,443)	(1,115,620)
Balance, end of year	\$ 549,227,645	\$ 547,371,962

Table of Contents

The Plan offers a Stable Value Fund option which, through the Master Trust, invests primarily in guaranteed investment contracts (GICs) and money market investments. The GICs are fully benefit-responsive and are designed to allow the Stable Value Fund to maintain a constant NAV and to protect the funds in extreme circumstances. The contracts accrue interest using a formula called the crediting rate. The contracts use the crediting rate formula to convert fair value changes in the covered assets into income distributions in order to minimize the difference between the fair and contract value of the covered assets over time. Using the crediting rate formula, an estimated future fair value is calculated by compounding the fund's current fair value at the fund's current yield to maturity for a period equal to the fund's duration. The crediting rate is the discount rate that equates that estimated future fair value with the fund's current contract value. Crediting rates are reset quarterly. The contracts provide a guarantee that the crediting rate will not fall below 0%. The crediting interest rate for the Stable Value Fund was 1.82% and 2.29% at December 31, 2012 and 2011, respectively. The crediting interest rates on the underlying investments are reviewed on a quarterly basis for resetting. The average yield for the years ended December 31, 2012 and 2011 was 2.08% and 2.25%, respectively.

The fair value of the Stable Value Fund equals the fair value of the underlying assets in the related separate account fund reported to the Plan by the Trustee. In determining the net assets available for benefits, the Stable Value Fund is recorded at contract value. An investment contract is generally valued at contract value, rather than fair value, to the extent it is fully benefit-responsive. Contract value represents contributions made under the contract, plus earnings, less participant withdrawals and administrative expenses. Participants may ordinarily direct the withdrawal or transfer of all or a portion of their investment at contract value. There are currently no reserves against contract values for credit risk of the contract issuers or otherwise.

Certain events limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (i) amendments to the Plan documents (including complete or partial plan termination or merger with another plan); (ii) changes to the Plan's prohibition on competing investment options or deletion of equity wash provisions; (iii) bankruptcy of the plan sponsor or other plan sponsor events (e.g. divestitures or spin-offs of a subsidiary) which cause a significant withdrawal from the Plan; or (iv) the failure of the trust to qualify for exemption from federal income taxes or any required prohibited transaction exemption under ERISA. The Plan Administrator does not believe that the occurrence of any such event, which would limit the Plan's ability to transact at contract value with participants, is probable.

An issuer may terminate a contract at any time. In the event that the fair value of the fund's covered assets is below their contract value at the time of such termination, the Trustee may elect to keep the wrap contract in place until such time as the fair value of the fund's covered assets is equal to their contract value. A wrap issuer may also terminate a wrap contract if the Trustee's investment management authority over the fund is limited or terminated as well as if all of the terms of the wrap contract fail to be met. In the event that the fair value of the fund's covered assets is below their contract value at the time of such termination, the terminating wrap provider would not be required to make a payment to the fund.

The Plan's interest in the Stable Value Fund was less than 1% at December 31, 2012 and 2011.

Table of Contents

The net investment income of the Master Trust for the years ended December 31, 2012 and 2011 is summarized as follows:

	2012	2011
Interest	\$ 11,766,227	\$ 11,576,995
Dividends	9,904,462	20,153,405
Net appreciation (depreciation) in fair value of investments:		
Mutual funds	37,050,521	(22,657,852)
Lifecycle commingled pools	59,454,483	(12,326,376)
Common collective trusts	15,908,675	1,945,750
Separate account funds	98,923,515	23,821,895
Brokerage accounts	1,965,334	(1,443,579)
Net investment income	\$ 234,973,217	\$ 21,070,238

The Plan's interest in the Master Trust, as a percentage of net assets held by the Master Trust, was less than 1% at December 31, 2012 and 2011. While the Plan participates in the Master Trust, the investment portfolio is not ratable among the various participating plans. As a result, those plans with smaller participation in the common stock funds recognized a disproportionately lesser amount of net appreciation in 2012 and 2011.

The Master Trust's investments that exceeded 5% of net assets as of December 31, 2012 and 2011 are as follows:

Description of Investment	2012	2011
Stable Value fund	\$ 549,227,645	\$ 547,371,962
Diversified fund	333,173,451	340,727,322
Rockwell Automation Stock fund	301,009,633	297,298,615
NorthernTrust S&P 500 Index fund	225,601,406

Table of Contents**5. TAX STATUS**

The Commonwealth of Puerto Rico Treasury Department has determined and informed Rockwell Automation by letter dated February 11, 2010, that the Plan and related trust are designed in accordance with section 1165 (e) of the Puerto Rico Internal Revenue Code of 1994, as amended (the PR Code). The Plan Administrator believes that the Plan is currently designed and is being operated in compliance with the applicable provisions of the PR Code and the Plan continues to be tax-exempt. Therefore, no provision for income taxes has been included in the Plan's financial statements.

Accounting principles generally accepted in the United States of America require the Plan's management to evaluate uncertain tax positions taken by the Plan. The financial statement effects of a tax position are recognized when the position is more likely than not, based on the technical merits to be sustained upon examination by the Commonwealth of Puerto Rico Treasury Department. The Plan Administrator has analyzed the tax positions taken by the Plan, and has concluded that as of December 31, 2012 and 2011, there were no uncertain positions taken or expected to be taken. The Plan has recognized no interest or penalties related to uncertain tax positions. The Plan is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. The plan administrator believes the Plan is no longer subject to income tax examinations for years prior to 2009.

6. RELATED-PARTY TRANSACTIONS

Certain Master Trust investments are shares of mutual funds managed by Fidelity Management Trust Company. Fidelity is the recordkeeper as defined by the Master Trust; therefore, these transactions qualify as party-in-interest transactions. Fees paid by the Master Trust for investment management services were included as a reduction of the return earned on each fund. Banco Popular de Puerto Rico is the trustee and trustee fees have been paid from the settlement account of the plan.

At December 31, 2012 and 2011, the Master Trust held 3,553,886 and 4,052,046 shares, respectively, of common stock of Rockwell Automation, the sponsoring employer, with a cost basis of \$76,696,863 and \$74,987,404, respectively, and a fair value of \$298,490,885 and \$297,298,615, respectively.

During 2012 and 2011, dividends on Rockwell Automation common stock, held in the Master Trust, paid and/or credited to eligible plan participants' accounts totaled \$7,021,821 and \$6,451,575, respectively.
