Table of Contents

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of each class Ordinary Shares, par value Rs.2 per share *	Name of each exchange on which registered The New York Stock Exchange, Inc
--	---

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 2,708,156,151 Ordinary Shares and 481,959,620 A Ordinary Shares, including 498,041,255 Ordinary Shares represented by 99,604,051 American Depositary Shares (ADS) outstanding as of March 31, 2013. (Each ADS now represents five Ordinary Shares).

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing.

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

* Not for trading, but only in connection with listed American Depositary Shares, each representing five shares of common stock.

Table of Contents

In this annual report

References to we , our and us are to Tata Motors Limited and its consolidated subsidiaries, except as the context otherwise requires;

References to dollar , US dollar and US\$ are to the lawful currency of the United States of America; references to rupees and Rs. are to the lawful currency of India; references to JPY are to the lawful currency of Japan; references to GBP are to the lawful currency of the United Kingdom; references to Euro are to the lawful currency of States of European union; references to Russian Ruble are to the lawful currency of Russia; and references to RMB and Chinese Renminbi are to the lawful currency of China;

References to US GAAP are to accounting principles generally accepted in the United States; references to Indian GAAP are to accounting principles generally accepted in India; and references to IFRS are to International Financial Reporting Standards and its interpretations as issued by International Accounting Standards Board;

References to an ADS are to an American Depository Share, each of which represents five of our Ordinary Shares of Rs.2/- each, and references to an ADR are to an American Depository Receipt evidencing one or more ADSs;

References to Share and Ordinary Share are to the Ordinary Shares and the A Ordinary Shares unless otherwise specifically mentioned to the contrary;

References to light commercial vehicles, or LCVs, refer to vehicles that have gross vehicle weight, or GVW, of up to 7.5 metric tons while references to medium and heavy commercial vehicles, or M&HCVs refer to vehicles that have GVW, of over 7.5 metric tons;

References to passenger cars are to vehicles that have a seating capacity of up to five persons, including the driver that are further classified into the following market segments: Micro length of up to 3,200 mm; Mini length of between 3,200 mm and 3,600 mm; Compact length of between 3,600 mm and 4,000 mm; Super Compact length of between 4,000 mm and 4,250 mm; Mid-size length of between 4,250 mm and 4,500mm; Executive length of between 4,500mm and 4,700 mm; Premium length of between 4,700 mm and 5,000mm; Luxury length of above 5,000 mm; Coupe Roadster- 2 Doors; 2/4 Seater, retractable/firm roof; and Exotics price greater than Rs.10 million;

References to utility vehicles, or UVs, and multi-purpose vehicles, or MPVs and Vans, are to vehicles that have a seating capacity of five to ten persons, including the driver;

References to premium cars and sports utility vehicles, or SUVs, are to a defined list of premium competitor cars and SUVs for our Jaguar Land Rover business;

Unless otherwise stated, comparative and empirical Indian industry data in this annual report have been derived from published reports of the Society of Indian Automobile Manufacturers, or SIAM; while international industry data have been derived from published reports of IHS Global Insight;

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

References to a particular Fiscal year, such as Fiscal 2012 , are to our Fiscal year ended on March 31 of that year;

Figures in tables may not add up to totals due to rounding;

Millimeters or mm are equal to 1/1000 of a meter. A meter is equal to approximately 39.37 inches and a millimeter is equal to approximately 0.039 inch;

Kilograms or kg are each equal to approximately 2.2 pounds, and metric tons are equal to 1,000 kilograms or approximately 2,200 pounds;

Liters are equivalent to 61.02 cubic inches of volume, or approximately 1.057 U.S. quarts of liquid measure; and

Revenues refers to Total Revenue net of excise duty unless stated otherwise.

Special Note Regarding Forward-looking Statements

All statements contained in this annual report that are not statements of historical fact constitute forward-looking statements . Generally, these statements can be identified by the use of forward-looking terms such as anticipate , believe , can , could , estimate , expect , intend , may , will and would or similar words. However, these words are not the exclusive means of identifying forward-looking statements. All statements regarding our expected financial condition and results of operations, business, plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, our revenue and profitability, planned projects and other matters discussed in this annual report regarding matters that are not historical fact. These forward-looking statements and any other projections contained in this annual report (whether made by us or any third party) involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements or other projections. Although we are a reporting company and will have ongoing disclosure obligations under U.S. federal securities laws, we are not undertaking to publicly update or revise any statements in this annual report, whether as a result of new information, future events or otherwise.

Table of Contents

The risks and factors that could cause our actual results, performances and achievements to be materially different from the forward-looking statements set out in Item 3.D and elsewhere in this annual report include, among others:

general political, social and economic conditions, and the competitive environment in India, the United States, the United Kingdom and the rest of Europe and other markets in which we operate and sell our products;

fluctuations in the currency exchange rate against the functional currency of the respective consolidated entities;

accidents and natural disasters;

terms on which we finance our working capital and capital and product development expenditures and investment requirements;

implementation of new projects, including mergers and acquisitions, planned by management;

contractual arrangements with suppliers;

government policies including those specifically regarding the automotive industry, including industrial licensing, environmental regulations, safety regulations, import restrictions and duties, excise duties, sales taxes, value added taxes, product range restrictions, diesel and gasoline prices and road network enhancement projects;

significant movements in the prices of key inputs such as steel, aluminum, rubber and plastics; and

other factors beyond our control.

Item 2. Offer Statistics and Expected Timetable.

Not applicable.

Item 3. Key Information.**A. Selected Financial Data.**

The following table sets forth selected financial data including selected historical financial information as of and for each of the Fiscal years ended March 31, 2013, 2012, 2011, 2010, and 2009 in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, or IFRS.

The selected IFRS consolidated financial data as of March 31, 2013, 2012 and 2011 and for each of the Fiscal years ended March 31, 2013, 2012, and 2011 are derived from our audited IFRS consolidated financial statements included in this annual report. The selected IFRS consolidated financial data as of March 31, 2010 and 2009 and for each of the Fiscal years ended March 31, 2010 and 2009 are derived from our audited IFRS consolidated financial statements not included in this annual report.

You should read our selected financial data in conjunction with Item 5 Operating and Financial Review and Prospects

Selected Financial Data Prepared in Accordance with IFRS

Table of Contents

	2013 (In US\$ millions, except share and per share amounts)	For each of the years ended March 31,					
		2013	2012	2011	2010	2009	
Dividends per share	US\$	Rs. 4.0	Rs. 20.0	Rs. 15.0	Rs. 6.0	Rs. 15.0	
Dividends per share A Ordinary Shares	US\$	Rs. 4.1	Rs. 20.5	Rs. 15.5	Rs. 6.5	Rs.	
Weighted average equity shares outstanding:							
Basic		2,706,014,707	2,706,014,707	2,691,542,867	2,588,800,690	2,318,682,314	2,065,267,345
Diluted		2,706,507,429	2,706,507,429	2,797,890,724	2,590,872,227	2,319,432,171	2,065,267,345
Weighted average A equity shares outstanding:							
Basic		481,958,717	481,958,717	481,900,898	396,669,199	320,880,139	137,142,495
Diluted		482,206,515	482,206,515	482,206,416	397,166,848	321,380,820	137,142,495
Earnings per share:							
Basic	US\$	0.5	Rs. 27.8	Rs. 36.4	Rs. 24.6	Rs. 14.4	Rs. (27.3)
Diluted	US\$	0.5	Rs. 27.8	Rs. 36.0	Rs. 24.5	Rs. 14.4	Rs. (27.3)
Earnings per share of A Ordinary Shares:							
Basic	US\$	0.5	Rs. 27.9	Rs. 36.5	Rs. 24.7	Rs. 14.5	Rs. (27.3)
Diluted	US\$	0.5	Rs. 27.9	Rs. 36.1	Rs. 24.6	Rs. 14.5	Rs. (27.3)

The face value of shares was sub-divided with effect from September 14, 2011. Post sub-division, Ordinary Shares and A Ordinary Shares have each been sub-divided from having face value of Rs.10 each into five shares having face value of Rs.2 each.

Dividend per share and Dividend per A Ordinary Share, as given above for Fiscal 2012, 2011, 2010 and 2009 are before the subdivision of Ordinary Shares and A Ordinary Shares.

Weighted average equity shares and A equity shares outstanding and earnings per share of previous years have been adjusted retrospectively, to make them comparable, pursuant to sub-division of shares.

	2013 (in US\$ millions, except number of shares)	2013	As of March 31,			2009
			2012	2011	2010	
Balance Sheet Data			(in Rs. millions, except number of shares)			
Total Assets	30,739.8	1,668,695.4	1,434,536.2	1,031,526.9	908,410.2	782,629.4
Long term debt, net of current portion	5,995.3	325,457.5	287,148.1	201,471.3	198,897.4	116,185.9
Total shareholders equity	6,887.9	373,905.7	331,343.6	211,259.3	102,222.8	38,725.8
Number of Equity shares outstanding						
- Ordinary Shares	2,708,156,151	2,708,156,151	2,691,613,455	538,272,284	506,381,170	449,832,659
- A Ordinary Shares	481,959,620	481,959,620	481,933,115	96,341,706	64,176,374	64,175,655

During Fiscal 2012, Ordinary Shares and A Ordinary Shares have each been subdivided from having face value of Rs.10 each into five shares having face value of Rs.2 each. Consequently, the number of shares as at March 31, 2011, 2010 and 2009 are not comparable to the number of shares as at March 31, 2013 and 2012.

Exchange Rate Information

For convenience, some of the financial amounts presented in this annual report have been translated from Indian rupee amounts into US dollar amounts at the rate of Rs.54.2850 = US \$1.00, based on the fixing rate in the city of Mumbai as published by the Foreign Exchange Dealers Association of India on March 30, 2013. However, such translations do not imply that the Indian rupee amounts have been could have been, or could be converted into US dollars at that or any other rate.

Table of Contents

The following table sets forth, for the Fiscal years ended March 31, 2013, 2012, 2011, 2010 and 2009 information with respect to the exchange rate between the Indian rupee and the US dollar (Rs. per US dollar) as published by Bloomberg L.P.

Fiscal year ended March 31,	Period End	Period Average	High	Low
2013	54.28	54.44	57.16	50.72
2012	50.88	47.95	53.72	44.08
2011	44.59	44.98	45.25	44.59
2010	44.92	47.42	50.64	44.92
2009	50.73	45.82	51.97	39.77

The following table sets forth information with respect to the exchange rate between the Indian rupee and the US dollar (Rs. per US dollar) for the previous six months as published by Bloomberg L.P.

Month	Period End	Period Average	High	Low
January 2013	53.23	54.27	55.23	53.23
February 2013	54.36	53.81	54.48	53.14
March 2013	54.28	54.42	54.93	54.03
April 2013	53.81	54.38	54.89	53.81
May 2013	56.51	55.05	56.51	53.82
June 2013	59.39	58.38	60.73	56.45
July 2013	60.37	59.75	60.62	59.04

Source: Bloomberg L.P

As of August 1, 2013, the value of the Indian rupee against the US dollar was Rs.60.4437 per US\$1.00, as published by Bloomberg L.P.

B. Capitalization and Indebtedness.

Not applicable.

C. Reasons for the Offer and Use of Proceeds.

Not applicable.

D. Risk Factors.

This section describes the risks that we currently believe may materially affect our business. The factors below should be considered in connection with any forward-looking statements in this annual report and the cautionary statements on page i. The risks below are not the only ones we face – some risks may be unknown to us, and some risks that we do not currently believe to be material could later turn out to be material. Although we will be making all reasonable efforts to mitigate or minimize these risks, one or more of a combination of these risks could materially impact our business, revenues, sales, and net assets, results of operations, liquidity and capital resources.

Risk associated with Our Business and the Automotive Industry.

Deterioration in global economic conditions could have a significant adverse impact on our sales and results of operations.

The impact of the fiscal cliff in the United States, the European sovereign debt crisis and economic challenges in the United Kingdom and Europe continues to be a cause of concern despite concerted efforts to contain the adverse effect of these events on global recovery.

In addition to India, we have automotive operations in the United Kingdom, South Africa, South Korea, Spain and Thailand, and have established a presence in Indonesia. The Indian automotive industry is affected materially by the general economic conditions in India and

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

around the world. The demand for automobiles in the Indian market is influenced by factors including the growth rate of the Indian economy, easy availability of credit, and increase in disposable income among Indian consumers, interest rates, freight rates and fuel prices. During the global financial crisis, the Reserve Bank of India, or RBI, had eased its monetary policy stance to stimulate economic activity. Subsequently, as the Indian economy started recovering from the downturn, inflation pressures increased substantially followed by several interest rate hikes by RBI in 2011.

Table of Contents

With inflation moderating in 2012, RBI reduced the repo rate and reverse repo rate by 100 basis points in Fiscal 2013 (50 basis points in April 2012, 25 basis points in January 2013 and further 25 basis points in March 2013). However, muted industrial growth along with continuing higher inflation and interest rates still pose risks to overall growth. The automotive industry in general is cyclical and economic slowdowns in the past have affected the manufacturing sector including the automotive and related industries. Deterioration in key economic factors such as growth rate, interest rates and inflation as well as reduced availability of financing for vehicles at competitive rates may materially and adversely affect our automotive sales in India and results of operations.

Our Jaguar Land Rover operations have significant presence in the United Kingdom, North America, continental Europe and China, as well as sales operations in many major countries across the globe. The global economic downturn significantly impacted the global automotive markets, particularly in the United States and Europe, including the United Kingdom, where our Jaguar Land Rover operations have significant sales exposure. Our strategy with respect to our Jaguar Land Rover operations, which includes new product launches and expansion into growing markets such as China, Russia and Brazil, may not be sufficient to mitigate the decrease in demand for our products in established markets and this could have a significant adverse impact on our financial performance. Our Jaguar Land Rover business, while increasing its investments towards products, capacity expansion and other initiatives, is also exploring opportunities to reduce its cost base through increased sourcing of materials from low cost countries, reduction in number of suppliers, reduction in number of platforms, reduction in engineering change costs, increased use of off-shoring and several other initiatives. While markets in the United States have shown signs of recovery and stability, the United Kingdom and Europe continue to struggle. If industry demand softens because of the impact of the debt crisis, or lower or negative economic growth in key markets, including China, or other factors, our results of operations and financial condition could be materially and adversely affected.

Restrictive covenants in our financing agreements may limit our operations and financial flexibility and adversely impact our future results and financial condition.

Some of our financing agreements and debt arrangements set limits on and/or require us to obtain lender consents before, among other things, pledging assets as security. In addition, certain financial covenants may limit our ability to borrow additional funds or to incur additional liens. In the past, we have been able to obtain required lender consents for such activities. However, there can be no assurance that we will be able to obtain such consents in the future. If our financial or growth plans require such consents and such consents are not obtained, we may be forced to forego or alter our plans, which could adversely affect our results of operations and financial condition.

In the event that we breach these covenants, the outstanding amounts due under such financing agreements could become due and payable immediately and/or result in increased costs. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such other financing agreements becoming due and payable immediately. Defaults under one or more of our financing agreements could have a material adverse effect on our results of operations and financial condition.

In Fiscal 2013, we were in breach of two financial covenants relating to our ratio of total outstanding liability to tangible networth and the other relating to our debt service coverage ratio in bank guarantees relating to our 2009 non-convertible Indian rupee debentures, which would potentially increase cost. We have requested and obtained waivers of our obligations to pay additional costs as a consequence of such breaches. However, we cannot assure you that we will succeed in obtaining consents or waivers in the future from our lenders or guarantors, or that our lenders and guarantors will not impose additional operating and financial restrictions on us, or otherwise seek to modify the terms of our existing loan agreements in ways that are materially adverse to us. See Item 5. Operating and Financial Review and Prospects B. Liquidity and Capital Resources Loan Covenants.

Table of Contents

Because of the acquisition of Jaguar Land Rover, our historical financial statements may not be comparable.

On June 2, 2008, we completed the acquisition of Jaguar Land Rover from the Ford Motor Company, or Ford. Therefore, our financial statements for the Fiscal years ended March 31, 2009 include the results of Jaguar Land Rover for the period commencing from June 2, 2008 to March 31, 2009. Neither pro forma nor historical consolidated financial statements showing our combined results of operations and financial condition, including Jaguar Land Rover, have been prepared or are being provided in this annual report.

This may make it difficult to compare our past performance and financial condition or to estimate our consolidated performance in the future. Moreover, the global disruption of the automotive industry during the financial crisis in 2009, including in Jaguar Land Rover's markets, makes past performance of the business not necessarily indicative of future demand, trends or results.

Exchange rate and interest rate fluctuations could materially and adversely affect our results of operations.

Our operations are subject to risk arising from fluctuations in exchange rates with reference to countries in which we operate. These risks primarily stem from the relative movements of the GBP, the US dollar, the Euro, the Chinese Renminbi, the Japanese Yen and the Indian rupee. In particular, as of August 1, 2013, the value of the Indian rupee against the US Dollar was Rs. 60.4437 per US\$1.00, as published by Bloomberg L.P., a depreciation of approximately 11.4%, as compared to Rs.54.2850 = US \$1.00, based on the fixing rate in the city of Mumbai as published by the Foreign Exchange Dealers' Association of India on March 30, 2013.

We import capital equipment, raw materials and components from, and also sell our vehicles in various countries. These transactions are denominated primarily in US dollars and Euros. Moreover, we have outstanding foreign currency denominated debt and are sensitive to fluctuations in foreign currency exchange rates. We have experienced and expect to continue to experience foreign exchange losses and gains on obligations denominated in foreign currencies in respect of our borrowings and foreign currency assets and liabilities due to currency fluctuations. Our Jaguar Land Rover operations have significant exchange rate exposure considering our vehicle sales in the U.S., Europe and China. In addition, Jaguar Land Rover sources a significant portion of input material from European suppliers.

Table of Contents

As compared to the previous year, the GBP has, on average, weakened against the US dollar, and strengthened against the Euro, which has positively influenced the results of our operations. The depreciation of the Indian rupee against the US dollar adversely impacted our borrowing cost and consequently, our results of operations. Our Jaguar Land Rover operations have outstanding foreign currency denominated debt in US dollars and are sensitive to fluctuations in foreign currency exchange rates.

Although we engage in currency hedging in order to decrease our foreign exchange risks, a weakening of the Indian rupee against the US dollar or other major foreign currencies may have an adverse effect on our cost of borrowing and consequently may increase our financing costs, which could have a significant adverse impact on our results of operations.

We also have interest-bearing assets (including cash balances) and interest-bearing liabilities, which earn interest at variable rates. We are therefore exposed to changes in interest rates in the various markets in which we borrow.

Financial instability in other countries could disrupt our business and cause the trading price of our Shares and ADSs to decrease.

The Indian automotive market and the Indian economy are influenced by economic and market conditions in other countries. Although economic conditions are different in each country, investors' reactions to economic developments in one country can have adverse effects on the securities of companies and the economy as a whole, in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause volatility in Indian financial markets and indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy, including the movement of exchange rates and interest rates in India. In the event the recovery of global economy is slower than expected, or if there is any significant financial disruption, this could have an adverse effect on our cost of funding, loan portfolio, business, prospects, results of operations, financial condition and the trading price of our Shares and ADSs.

Intensifying competition could materially and adversely affect our sales and results of operations.

The global automotive industry is highly competitive and competition is likely to further intensify in view of the continuing globalization and consolidation in the worldwide automotive industry. Competition is especially likely to increase in the premium automotive categories as each market participant intensifies its efforts to retain its position in established markets while also developing a presence in emerging markets, such as China. The factors affecting competition include product quality and features, innovation and product development time, ability to control costs, pricing, reliability, safety, fuel economy, environmental impact and perception thereof, customer service and financing terms. There can be no assurance that we will be able to compete successfully in the global automotive industry in the future.

We also face strong competition in the Indian market from domestic as well as foreign automobile manufacturers. Improving infrastructure and robust growth prospects compared to other mature markets, are attracting a number of international companies to India either through joint ventures with local partners or through independently owned operations in India. International competitors bring with them decades of international experience, global scale, advanced technology and significant financial resources. Consequently, domestic competition is likely to further intensify in the future. There can be no assurance that we will be able to implement our future strategies in a way that will mitigate the effects of increased competition in the Indian automotive industry.

Our future success depends on our ability to satisfy changing customer demands by offering innovative products in a timely manner and maintaining such products' competitiveness.

Our competitors can gain significant advantages if they are able to offer products satisfying customer needs earlier than we are able to and this could adversely impact our sales and results of operations. Unanticipated delays or cost overruns in implementing new product launches, expansion plans or capacity enhancements could adversely impact our results of operations.

Customer preferences especially in many of the developed markets seem to be moving in favor of more fuel efficient vehicles. Further, in many countries there has been significant pressure on the automotive industry to reduce carbon dioxide emissions. In many markets these preferences are driven by increased government regulation and rising fuel prices. Our operations may be significantly impacted if there is a delay in developing fuel efficient products that reflect changing customer preferences, especially in the premium automotive category. There can be no assurance that the market acceptance of our future products will meet our expectations, in which case we may be unable to realize the intended economic benefits of our investments and our results of operations may be adversely affected.

Table of Contents

We are subject to risks associated with product liability, warranty and recall.

We are subject to risks and costs associated with product liability, warranties and recalls, should we supply defective products, parts, or related after-sales services, including by generating negative publicity, which may adversely affect our business, results of operations and financial condition. Such events could also require us to expend considerable resources in correcting these problems and could adversely affect demand for our products. We may also be subject to class actions or other large scale product liability or other lawsuits in various jurisdictions where we have a significant presence.

We are subject to risk associated with our automobile financing business in India.

We are subject to risks associated with our automobile financing business. During Fiscal 2013, in order to support the sale of our vehicles, our automobile financing business has increased its market share. Any default by our customers or inability to repay installments as due, could adversely affect our business, results of operations and cash flows. In addition, any downgrade in our credit ratings may increase our borrowing costs and restrict our access to the debt markets. Over time, and particularly in the event of any credit rating downgrade, market volatility, market disruption, regulatory changes or otherwise, we may need to reduce the amount of financing receivables we originate, which could adversely affect our ability to support the sale of our vehicles.

Underperformance of our distribution channels and supply chains may adversely affect our sales and results of operations.

Our products are sold and serviced through a network of authorized dealers and service centers across our domestic market, and a network of distributors and local dealers in international markets. We monitor the performance of our dealers and distributors and provide them with support to enable them to perform to our expectations. There can be no assurance, however, that our expectations will be met. Any under-performance by our dealers or distributors could adversely affect our sales and results of operations. We rely on third parties to supply us with the raw materials, parts and components used in the manufacture of our products. Furthermore, for some of these parts and components, we are dependent on a single source. Our ability to procure supplies in a cost effective and timely manner is subject to various factors, some of which are not within our control. While we manage our supply chain as part of our vendor management process, any significant problems with our supply chain in the future could affect our results of operations in an adverse manner.

Natural disasters and man-made accidents, adverse economic conditions, decline in automobile demand, and lack of access to sufficient financing arrangements, among others, could have a negative financial impact on our suppliers and distributors in turn impairing timely availability of components to us or increasing the costs of such components. Similarly, impairments to the financial condition of our distributors may adversely impact our performance in some markets. In addition, if one or more of the other global automotive manufacturers were to become insolvent, this would have an adverse effect on the supply chains and may further affect our results of operations in an adverse manner.

In respect of our Jaguar Land Rover operations, as part of a separation agreement from Ford, we have entered into supply agreements with Ford and certain other third parties for critical components. Any disruption of such services could have a material adverse effect on our operations and financial condition.

Increases in input prices may have a material adverse effect on our results of operations.

In Fiscal 2013 and 2012, consumption of raw materials, components and aggregates and purchase of products for sale constituted approximately 63.8% and 66.1% respectively, of total revenues. Prices of commodity items used in manufacturing automobiles, including steel, aluminum, copper, zinc, rubber, platinum, palladium and rhodium have become increasingly volatile in recent years. Further price movements would closely depend on the evolving economic scenarios across the globe. While we continue to pursue cost reduction initiatives, an increase in price of input materials could severely impact our profitability to the extent such increase cannot be absorbed by the market through price increases and/or could have a negative impact on the demand. In addition, because of intense price competition and our high level of fixed costs, we may not be able to adequately address changes in commodity prices even if they are foreseeable. Increases in fuel costs also pose a significant challenge to automobile manufacturers worldwide, including us, especially in the commercial and premium vehicle segments where increased fuel prices have an impact on demand.

Deterioration in the performance of any of our subsidiaries and affiliates may adversely affect our results of operations.

We have made and may continue to make capital commitments to our subsidiaries and affiliates, and if the business or operations of any of these subsidiaries and affiliates deteriorates, the value of our investments may be adversely affected.

Table of Contents

The significant reliance of Jaguar Land Rover on key mature markets increases the risk of negative impact of adverse change in customer demand in those countries

Jaguar Land Rover, which contributes approximately 72% of our revenues, has a significant presence in the United Kingdom, North American and continental European markets. The global economic downturn significantly impacted the automotive industry in these markets in Fiscal 2009. Even though sales of passenger cars were aided by government-sponsored car-scrap incentives, these incentives primarily benefited the compact and micro-compact car segments and had virtually no slowing effect on the sales declines in the premium car or all-terrain vehicle segments in which we operate. Although demand in these markets has recovered, any decline in demand for our vehicles in these major markets may in the future significantly impair our business, financial position and results of operations. In addition, our strategy, which includes new product launches and expansion into growing markets, such as China, India, Russia and Brazil, may not be sufficient to mitigate a decrease in demand for our products in mature markets in the future, which could have a significant adverse effect on our financial performance.

We are subject to risks associated with growing our business through mergers and acquisitions.

We believe that our acquisitions provide us opportunities to grow significantly in the global automobile markets by offering premium brands and products. Our acquisitions have provided us with access to technology and additional capabilities while also offering potential synergies. However, the scale, scope and nature of the integration required in connection with our acquisitions present significant challenges, and we may be unable to integrate the relevant subsidiaries, divisions and facilities effectively within our expected schedule. An acquisition may not meet our expectations and the realization of the anticipated benefits may be blocked, delayed or reduced as a result of numerous factors, some of which are outside our control.

We will continue to evaluate growth opportunities through suitable mergers and acquisitions in the future. Growth through mergers and acquisitions involves business risks, including unforeseen contingent risks or latent business liabilities that may only become apparent after the merger or acquisition is completed. The key success factors will be seamless integration and effective management of the merged/acquired entity, retention of key personnel, and generating cash flow from synergies in engineering and sourcing, joint sales and marketing efforts, and management of a larger business. If any of these factors fails to materialize or if we are unable to manage any of the associated risks successfully, our results of operations could be adversely affected.

Our business is seasonal in nature and a substantial decrease in our sales during certain quarters could have a material adverse impact on our financial performance.

The sales volumes and prices for our vehicles are influenced by the cyclicity and seasonality of demand for these products. In the Indian market, demand for our vehicles generally peaks between January and March, although there is a decrease in demand in February just before release of the Indian fiscal budget. Demand is usually lean from April to July and picks up again in the festival season from September onwards, with a decline in December due to year-end. The automotive industry has been cyclical in the past and we expect this cyclicity to continue.

Our Jaguar Land Rover business is impacted by the bi-annual registration of vehicles in the United Kingdom where the vehicle registration number changes every six months, which in turn has an impact on the resale value of vehicles. This leads to an increase in sales during the period when the aforementioned change occurs. Most other markets such as the United States are driven by introduction of new model year products which typically occurs in the autumn of each year. Furthermore, western European markets tend to be impacted by the summer and winter holidays. Markets in China tend to show higher demand for vehicles around the Chinese New Year. The resulting sales profile influences operating results on a quarter-to-quarter basis.

We rely on licensing arrangements with Tata Sons Limited to use the Tata brand. Any improper use of the associated trademarks by our licensor or any other third parties could materially and adversely affect our business, financial condition and results of operations.

Our rights to our trade names and trademarks are a crucial factor in marketing our products. Establishment of the Tata word mark and logo mark in and outside India is material to our operations. We have licensed the use of the Tata brand from Tata Sons Limited, or Tata Sons. If Tata Sons, or any of their subsidiaries or affiliated entities, or any third party uses the trade name Tata in ways that adversely affect such trade name or trademark, our reputation could suffer damage, which in turn could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

Inability to protect or preserve our intellectual property could materially and adversely affect our business, financial condition and results of operations.

With respect to our Jaguar Land Rover business, we own or otherwise have rights in respect of a number of patents relating to the products we manufacture, which have been obtained over a period of years. In connection with the design and engineering of new vehicles and the enhancement of existing models, we seek to regularly develop new technical designs for use in our vehicles. We also use technical designs which are the intellectual property of third parties with such third parties' consent. These patents and trademarks have been of value in the growth of our business and may continue to be of value in the future. Although we do not regard any of our businesses as being dependent upon any single patent or related group of patents, an inability to protect this intellectual property generally, or the illegal breach of some or a large group of our intellectual property rights, would have a materially adverse effect on our operations, business and / or financial condition. We may also be affected by restrictions on the use of intellectual property rights held by third parties and we may be held legally liable for the infringement of the intellectual property rights of others in our products.

We may be adversely affected by labor unrest.

All of our permanent employees, other than officers and managers, in India and most of our permanent employees in South Korea, Spain and the United Kingdom, including certain officers and managers, in relation to our automotive business, are members of labor unions and are covered by our wage agreements, where applicable with those labor unions.

In general, we consider our labor relations with all of our employees to be good. However, in the future we may be subject to labor unrest, which may delay or disrupt our operations in the affected regions, including the acquisition of raw materials and parts, the manufacture, sales and distribution of products and the provision of services. If work stoppages or lock-outs at our facilities or at the facilities of our major vendors occur or continue for a long period of time, our business, financial condition and results of operations may be adversely affected.

Any inability to manage our growing international business may adversely affect our results of operations.

Our growth strategy relies on the expansion of our operations by introducing certain automotive products in other parts of the world, including Europe, China, Russia, Brazil, the United States, Africa, and other parts of Asia. The costs associated with entering and establishing ourselves in new markets, and expanding such operations, may be higher than expected, and we may face significant competition in those regions. In addition, our international business is subject to many actual and potential risks and challenges, including language barriers, cultural differences and other difficulties in staffing and managing overseas operations, inherent difficulties and delays in contract enforcement and the collection of receivables under the legal systems of some foreign countries, the risk of non-tariff barriers, other restrictions on foreign trade or investment sanctions, and the burdens of complying with a wide variety of foreign laws and regulations.

If we are unable to manage risks related to our expansion and growth in other parts of the world, our business, results of operations and financial condition could be adversely affected.

Future pension obligations may prove more costly than currently anticipated and the market value of assets in our pension plans could decline.

We provide post retirement and pension benefits to our employees some of which are defined benefit plans.

Our pension liabilities are generally funded and the pension plan assets are particularly significant in respect of the Jaguar and Land Rover pension plans. All new employees in our Jaguar Land Rover operations from April 19, 2010, participate in a new defined contribution pension plan.

Lower return on pension fund assets, changes in market conditions, changes in interest rates, changes in inflation rates, and adverse changes in other critical actuarial assumptions, may impact the pension liabilities and consequently increase funding requirements, which will adversely affect our financial condition and results of operations.

Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject, and this may have a material adverse effect on our business.

While we believe that the insurance coverage that we maintain is reasonably adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under our insurance policies will be honored fully or timely. Also, to the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our financial condition may be adversely

affected.

Table of Contents**Political and Regulatory Risks.*****India's obligations under the World Trade Organization Agreement.***

India's obligations under its World Trade Organization agreement could reduce the present level of tariffs on imports of components and vehicles. Reductions of import tariffs could result in increased competition, which in turn could adversely affect our sales and results of operations.

New or changing laws, regulations and government policies regarding increased fuel economy, reduced greenhouse gas and other emissions, vehicle safety and taxes may have significant impact on our business.

As an automobile company, we are subject to extensive governmental regulations regarding vehicle emission levels, noise, safety and levels of pollutants generated by our production facilities. These regulations are likely to become more stringent and compliance costs may significantly impact our future results of operations. In particular, the United States and Europe have stringent regulations relating to vehicular emissions. The proposed tightening of vehicle emissions regulations by the European Union will require significant costs for compliance. While we are pursuing various technologies in order to meet the required standards in the various countries in which we sell our vehicles, the costs for compliance with these required standards can be significant to our operations and may adversely impact our results of operations.

Imposition of any additional taxes and levies designed to limit the use of automobiles could adversely affect the demand for our products and our results of operations. Changes in corporate and other taxation policies as well as changes in export and other incentives given by the various governments could also adversely affect our results of operations. For example, we benefit from excise duty exemptions for manufacturing facilities in the State of Uttarakhand and other incentives such as subsidies or loans from states where we have manufacturing operations. The Government of India had proposed a comprehensive national goods and services tax, or GST, regime that will combine taxes and levies by the central and state governments into one unified rate structure. While both the Government of India and other state governments of India have publicly announced that all committed incentives will be protected following the implementation of the GST, given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The implementation of this rationalized tax structure may be affected by any disagreement between certain state governments, which could create uncertainty. The timeline of the proposed transition is uncertain as at the date hereof.

The Direct Tax Code Bill 2010, or DTC, proposes to replace the existing Income Tax Act, 1961 and other direct tax laws, with a view to simplify and rationalize the tax provisions into one unified code. The various proposals included in DTC bill are subject to review by Indian parliament and as such impact if any, is not quantifiable at this stage.

Regulations in the areas of investments, taxes and levies may also have an impact on Indian securities, including our Shares and ADSs. In this regard it is important to note that DTC bill would likely have a significant impact on the current tax regime, including in respect of our Shares and ADSs. For more information, see Item 4.B Business Overview Government Regulations Indian Taxes Goods and Services Tax of this annual report.

We may be adversely impacted by political instability, wars, terrorism, multinational conflicts, natural disasters, fuel shortages/prices, epidemics and labor strikes.

Our products are exported to a number of geographical markets and we plan to expand our international operations further in the future. Consequently, we are subject to various risks associated with conducting our business outside our domestic markets and our operations may be subject to political instability in those markets, wars, terrorism, regional and/or multinational conflicts, natural disasters, fuel shortages, epidemics and labor strikes. Any significant or prolonged disruption or delay in our operations related to these risks could adversely impact our results of operations.

Compliance with new and changing corporate governance and public disclosure requirements adds uncertainty to our compliance policies and increases our costs of compliance.

We are subject to a complex and changing regime of laws, rules, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and Securities and Exchange Commission, or SEC, regulations, Securities and Exchange Board of India, or SEBI, regulations, New York Stock Exchange, or NYSE, listing rules and Indian stock market listing regulations. New or changed laws, rules, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of ongoing revisions to such governance standards. We are committed

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

to maintaining high standards of corporate governance and public disclosure. However, our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management resources and time.

Table of Contents

In addition, new laws, rules, regulations and standards regarding corporate governance may make it more difficult for us to obtain director and officer liability insurance. Further, our Board members, Executive Directors and our Chief Financial Officer could face an increased risk of personal liability in connection with the performance of their duties. As a result, we may face difficulties attracting and retaining qualified Board members and senior management, which could harm our business. If we fail to comply with new or changed laws, rules, regulations or differing standards, our business and reputation may be harmed.

Risks associated with Investments in an Indian Company.

Political changes in the Government of India could delay and/or affect the further liberalization of the Indian economy and adversely affect economic conditions in India generally and our business in particular.

Our business could be significantly influenced by economic policies adopted by the Government of India. Since 1991, successive governments have pursued policies of economic liberalization and financial sector reforms.

The Government of India has at various times announced its general intention to continue India's current economic and financial liberalization and deregulation policies. However, protests against privatizations, which have occurred in the past, could slow the pace of liberalization and deregulation. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well. While we expect any new government to continue the liberalization of India's economic and financial sectors and deregulation policies, there can be no assurance that such policies will be continued.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our ADSs and Shares may be affected by interest rates, changes in policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India.

A change in the Government of India's policies in the future could adversely affect business and economic conditions in India and could also adversely affect our financial condition and results of operations. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India generally, and specifically those of our Company, as a substantial portion of our assets are located in India.

Terrorist attacks, civil disturbances, regional conflicts and other acts of violence, particularly in India, may disrupt or otherwise adversely affect the markets in which we operate, our business and our profitability.

India has from time to time experienced social and civil unrest and hostilities, including terrorist attacks and riots and armed conflict with neighboring countries. Events of this nature in the future could influence the Indian economy and could have a material adverse effect on the market for securities of Indian companies, including our ADSs and Shares, and on the market for our vehicles.

Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

Our Articles of Association, which include regulations applicable to our Board of Directors, and Indian law, govern our corporate affairs. Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company incorporated in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions, including the United States. You may also have more difficulty in asserting your rights as a shareholder of our Company than you would as a shareholder of a corporation organized in another jurisdiction.

The market value of your investment may fluctuate due to the volatility of the Indian securities market.

The Indian stock exchanges have, in the past, experienced substantial fluctuations in the prices of their listed securities. The Indian stock exchanges, including the Bombay Stock Exchange Limited, or BSE, have experienced problems that, if they continue or recur, could affect the market price and liquidity of the securities of Indian companies, including our Shares. These problems in the past included temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

There may be a differing level of regulation and monitoring of the Indian securities markets and the activities of investors, brokers and other participants, than in the United States. SEBI received statutory powers in 1992 to assist it in carrying out its responsibility for improving disclosure and other regulatory standards for the Indian securities markets. Subsequently, SEBI has prescribed regulations and guidelines in relation to disclosure requirements, insider dealing and other matters relevant to the Indian securities market. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in the United States.

Table of Contents***Investors may have difficulty enforcing judgments against us or our management.***

We are a limited liability company incorporated under the laws of India. The majority of our directors and Executive Officers named in this annual report are residents of India and a substantial portion of our assets and the assets of these directors and Executive Officers are located in India. As a result, investors may find it difficult to (i) effect service of process upon us or these directors and Executive Officers in jurisdictions outside of India, (ii) enforce court judgments obtained outside of India, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and Executive Officers, (iii) enforce, in an Indian court, court judgments obtained outside of India, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and Executive Officers, and (iv) obtain expeditious adjudication of an original action in an Indian court to enforce liabilities, including those based upon the civil liability provisions of the U.S. federal securities laws, against us or these directors and Executive Officers.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. Recognition and enforcement of foreign judgments is provided under Section 13 of the Code of Civil Procedure, or the Civil Procedure Code.

Section 13 and Section 44A of the Civil Procedure Code provide that a foreign judgment shall be conclusive as to any matter thereby directly adjudicated upon except (i) where it has not been pronounced by a court of competent jurisdiction, (ii) where it has not been given on the merits of the case, (iii) where it appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where Indian law is applicable, (iv) where the proceedings in which the judgment was obtained were opposed to natural justice, (v) where it has been obtained by fraud or (vi) where it sustains a claim founded on a breach of any law in force in India.

Section 44A of the Civil Procedure Code provides that where a foreign judgment has been rendered by a superior court in any country or territory outside India which the Government has by notification declared to be a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the Civil Procedure Code is applicable only to monetary decrees not being in the nature of any amounts payable in respect of taxes or other charges of a like nature or in respect of a fine or other penalty.

The United States has not been declared by the Government of India to be a reciprocating territory for the purpose of Section 44A of the Civil Procedure Code. Accordingly, a judgment of a court in the United States may be enforced only by a suit upon the judgment and not by proceedings in execution. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with public policy. A party seeking to enforce a foreign judgment in India is required to obtain approval from RBI, the central bank of India, to execute such a judgment or to repatriate outside India any amount recovered.

Risks associated with our Shares and ADSs.***Fluctuations in the exchange rate between the Indian rupee and the US dollar may have a material adverse effect on the market value of our ADSs and Shares, independent of our operating results.***

Fluctuations in the exchange rate between the Indian rupee and the US dollar will affect, among others things, the US dollar equivalents of the price of the Shares in Indian rupees as quoted on the Indian stock exchanges and, as a result, may affect the market price of the ADSs. Such fluctuations will also affect the US dollar equivalent of any cash dividends in Indian rupees received on the Shares represented by the ADSs and the dollar equivalent of the proceeds in Indian rupee of a sale of Shares in India.

The exchange rate between the Indian rupee and the US dollar has changed materially in the last two decades and during last year in particular, and may materially fluctuate in the future. The value of the Indian rupee against the US dollar was Rs.60.4437 = US\$1.00 as of August 1, 2013.

Holders of ADSs have fewer rights than shareholders and must act through the depositary to exercise those rights.

Although holders of ADSs have a right to receive any dividends declared in respect of Shares underlying the ADSs, they cannot exercise voting or other direct rights as a shareholder with respect to the Shares underlying the ADSs evidenced by ADRs. Citibank, N.A. as depositary is the registered shareholder of the deposited Shares underlying our ADSs, and therefore only Citibank, N.A. can exercise the rights of shareholders in connection with the deposited Shares. Only if requested by us, will the depositary notify holders of ADSs of upcoming votes and arrange to deliver our voting materials to holders of ADSs. The depositary will try, in so far as practicable, subject to Indian laws and the provisions of our Articles of Association, to vote or have its agents vote the deposited securities as instructed by the holders of ADSs.

Table of Contents

If the depositary receives voting instructions in time from a holder of ADSs which fail to specify the manner in which the depositary is to vote the Shares underlying such holder's ADSs, such holder will be deemed to have instructed the depositary to vote in favor of the items set forth in such voting instructions. If the depositary has not received timely instructions from a holder of ADSs, the holder shall be deemed to have instructed the depositary to give a discretionary proxy to a person designated by us, subject to the conditions set forth in the Amended and Restated Deposit Agreement (as amended). If requested by us, the depositary is required to represent all shares underlying ADSs, regardless whether timely instructions have been received from the holders of such ADSs, for the sole purpose of establishing a quorum at a meeting of shareholders. Additionally, in your capacity as an ADS holder, you will not be able to bring a derivative action, examine our accounting books and records, or exercise appraisal rights. Registered holders of our Shares withdrawn from the depositary arrangements will be entitled to vote and exercise other direct shareholder rights in accordance with Indian law. However, a holder may not know about a meeting sufficiently in advance to withdraw the underlying shares in time. Furthermore, a holder of ADSs may not receive voting materials, if we do not instruct the depositary to distribute such materials, or may not receive such voting materials in time to instruct the depositary to vote.

Further, pursuant to Indian regulations, we are required to offer our shareholders preemptive rights to subscribe for a proportionate number of shares to maintain their existing ownership percentages prior to the issue of new shares. These rights may be waived by a resolution passed by at least 75% of our shareholders present and voting at a general meeting. Holders of ADSs may be unable to exercise preemptive rights for subscribing to these new Shares unless a registration statement under the Securities Act is effective or an exemption from the registration requirements is available to us. Our decision to file a registration statement would be based on the costs, timing, potential liabilities and the perceived benefits associated with any such registration statement and we do not commit that we would file such a registration statement. If any issue of securities is made to our shareholders in the future, such securities may also be issued to the depositary, which may sell such securities in the Indian securities market for the benefit of the holders of ADSs. There can be no assurance as to the value, if any, the depositary would receive upon the sale of these rights/securities. To the extent that holders of ADSs are unable to exercise preemptive rights, their proportionate interest in the Company would be reduced.

As a result of Indian Government regulation of foreign ownership the price of the ADSs could decline.

Foreign ownership of Indian securities is regulated and is partially restricted. In addition, there are restrictions on the deposit of Shares into our ADS facilities. ADSs issued by companies in certain emerging markets, including India, may trade at a discount to the underlying equity shares, in part because of the restrictions on foreign ownership of the underlying equity shares and in part because ADSs are sometimes perceived to offer less liquidity than underlying shares which can be traded freely in local markets by both local and international investors. See Item 10.D Exchange Controls. The ADSs could trade at a discount to the market price of the underlying shares.

Item 4. Information on the Company.

A. History and Development of the Company.

We were incorporated on September 1, 1945 as a public limited liability company under the Indian Companies Act VII of 1913 as Tata Locomotive and Engineering Company Limited. Our name was changed to Tata Engineering and Locomotive Company Limited on September 24, 1960, and to Tata Motors Limited on July 29, 2003. We commenced operations as a steam locomotive manufacturer. This business was discontinued in 1971. Since 1954, we have been manufacturing automotive vehicles. The automotive vehicle business commenced with the manufacture of commercial vehicles under financial and technical collaboration with Daimler-Benz AG (now Daimler AG) of Germany. This agreement ended in 1969. We produced only commercial vehicles until 1991, when we started producing passenger vehicles as well. Together with our consolidated subsidiaries we form the Tata Motors Group. Please see Item 4.C Organizational Structure for details of our subsidiaries and affiliates.

In September 2004, we became the first company from India's engineering sector to be listed on the New York Stock Exchange.

We offer a broad portfolio of automotive products, ranging from sub-1 ton to 49 ton GVW, trucks (including pickup trucks) to small, medium, and large buses and coaches to passenger cars, including the world's most affordable car—the Tata Nano, premium luxury cars and SUVs. We are India's leading automobile company and rank as the fifth largest truck manufacturer (6 ton plus) and fourth largest bus manufacturer in the world in each case, as measured by volume of vehicles produced in 2012.

We have a substantial presence in India and also have global operations in connection with production and sale of Jaguar and Land Rover premium brand passenger vehicles. We are the largest automobile manufacturer by revenue in India, the largest commercial vehicle manufacturer in terms of revenue in India and among the top four passenger vehicle manufacturers in terms of units sold in India during Fiscal 2013. We estimate that around 7.5 million vehicles produced by us are being operated in India as of the date hereof.

Table of Contents

We operate six principal automotive manufacturing facilities in India: at Jamshedpur in the state of Jharkhand, at Pune in the state of Maharashtra, at Lucknow in the state of Uttar Pradesh, at Pantnagar in the state of Uttarakhand, Sanand in the state of Gujarat and at Dharwad in the state of Karnataka. We also operate three principal automotive manufacturing facilities in the United Kingdom through our Jaguar Land Rover business: at Solihull in the West Midlands, Castle Bromwich in the West Midlands and at Halewood in Liverpool.

We have expanded our international operations through mergers and acquisitions and in India we have made strategic alliances involving non-Indian companies:

In 2004, we acquired the Daewoo Commercial Vehicles Company (renamed as Tata Daewoo Commercial Vehicle Company Limited, or TDCV), which is South Korea's second largest truck maker in terms of revenue. Together with TDCV we have developed our next generation trucks called the Prima range of trucks (earlier referred to as the World Truck).

In Fiscal 2005, we acquired a 21% equity interest in Hispano Carrocera S.A. (renamed as Tata Hispano Motors Carrocera S.A.), or Hispano, a Spanish bus and coach manufacturer. During Fiscal 2010, we acquired the remaining 79% of the remaining equity interests in Hispano.

We have also been distributing and marketing Fiat branded cars in India since March 2006. We have a joint venture agreement with Fiat Group Automobili S.p.A., Italy, or Fiat Group located at Ranjangaon in Maharashtra to manufacture passenger cars, engines and transmissions for the Indian and overseas markets. Established in April 2008, the plant currently manufactures Fiat Linea, Fiat Punto, Tata Manza, Tata Indica and Tata Indica Vista vehicles as well as components for such vehicles, such as engines and transmissions. During May 2012, both the joint-venture partners decided to re-align their Indian joint-venture. Accordingly, in March 2013, we and Fiat Group have signed a Restructuring Framework Agreement, or RFA. As per the revised agreement

- a) Joint venture shall manufacture and assemble Fiat products, Tata products and any new products (including for third parties) in accordance with the terms and conditions settled in the RFA. The current third party orders shall continue as per current terms.
- b) The distribution company, owned by Fiat Group shall be responsible for distribution of the Fiat vehicles and parts from April 1, 2013.

In May 2006, we entered into a joint venture agreement with Brazil-based Marcopolo S.A., or Marcopolo, to manufacture and assemble fully-built buses and coaches in India, wherein we have a 51% ownership, with the remainder held by Marcopolo. The joint venture, Tata Marcopolo Motors Limited, or Tata Marco Polo, commenced production during Fiscal 2009.

In December 2006, we entered into a joint venture agreement with Thonburi Automotive Assembly Plant Co. Ltd Thailand, or Thonburi, to manufacture pickup trucks in Thailand. As of March 31, 2013, we own 90.82% of the joint venture, while Thonburi owns the remaining 9.18%. The joint venture, which began vehicle production in March 2008, enabled us to access the Thailand market, which is a major market for pickup trucks, as well as other potential markets in that region.

For some of our products, we are also expanding our international export operations, which commenced in 1961. Our vehicles are being marketed in several countries in Europe, Africa, the Middle East, South East Asia and South Asia. During Fiscal 2008, Tata Motors (SA) Proprietary Ltd, or TMSA, a joint venture company in which we hold a 60% equity interest with the remaining 40% equity interest being held by Tata Africa Holdings (SA) (Pty.) Ltd, was formed for the manufacture and assembly operations of our LCVs and M&HCVs in South Africa. We have set up an assembly plant in South Africa at

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Rosslyn and commenced operations in July 2011.

In June 2008, we acquired the Jaguar Land Rover business from Ford Motor Company. Jaguar Land Rover is a global automotive business, which designs, manufactures and sells Jaguar luxury performance cars and Land Rover premium all-terrain vehicles. The Jaguar Land Rover business has internationally recognized brands, a product portfolio of award winning luxury performance cars and premium all-terrain vehicles, brand specific global distribution networks and research and development capabilities. We acquired three major manufacturing facilities located in Halewood, Solihull and Castle Bromwich and two advanced design and engineering facilities located at Whitley and Gaydon, all in the United Kingdom together with national sales companies in several countries.

In October 2010, we acquired an 80% equity interest in Trilix Srl., Turin (Italy), a design and engineering company, in line with our objective to enhance our styling/design capabilities to meet global standards. Trilix offers design and engineering services in the automotive sector, including styling, architecture, packaging, surfacing, macro- and micro-feasibility studies and detailed engineering development.

Table of Contents

In December 2011, PT Tata Motors Indonesia was established as our subsidiary, with the objective and purpose of conducting business activities of import, assembly and wholesale distribution of vehicles in Indonesia and to neighboring countries.

We produce a wide range of automotive products, including:

Passenger Cars. Our passenger cars range includes the Tata Nano, Indica, Tata Indica Vista in the hatch segment, sub-4m Tata Indigo eCS and mid sized Tata Indigo Manza in the sedan category. We have expanded our car lines with several variants and fuel options to suit various customer preferences. In October 2012, we refreshed the styling of the Tata Indica eV2, the most fuel efficient hatchback in its class, and also refreshed the Tata Indigo Manza with technological features such as a touch screen multimedia interface and a built-in GPS. In January 2013, we launched the Tata Vista D90 in the premium hatchback segment, powered by quadrajet diesel engine with Variable Geometry Turbocharger, or VGT technology. We launched the Tata Indigo Manza in South Africa in September 2012.

Jaguar has an established presence in the premium car segment. Jaguar currently produces three car lines, including the Jaguar XK sports car (coupe and convertible), the Jaguar XF sedan and the Jaguar XJ sedan. The 2013 Model Year Jaguar XF range includes for the first time an all-wheel drive version of the new V6 gasoline engine for the United States and European markets and a 2.0-liter gasoline version for the United States and Chinese markets. The 2013 Model Year for Jaguar XJ includes an all-wheel drive version and a 3.0-liter V6 gasoline version for the United States and European markets and a 2.0-liter gasoline version for the Chinese market, which benefits from lower custom duties in that market. In September 2012, the Jaguar F-TYPE was at the Paris Motorshow, a two-seat sports car that was inspired by the 2011 C-X16 concept car. The Jaguar F-TYPE has an all-aluminum structure and combines technological features such as all-aluminum double wishbone suspension and stop/start fuel economy measures with the power of Jaguar's latest 3.0-liter V6 and 5.0-liter V8 engines. The Jaguar F-TYPE was made available to retail customers from April 2013 in select markets.

Utility Vehicles. We manufacture a number of UVs, including the Sumo, an SUV, Tata Safari, and recently launched Safari Storme, the lifestyle pickup, the Xenon XT, the newly launched premium crossover vehicle, the Tata Aria, and the multipurpose utility vehicle, or MPV, the Venture. The Safari, the Sumo and the Xenon XT meet different consumer preferences such as the Safari DICOR 2.2 VTT range, powered by a new 2.2 L Direct Injection Common Rail, or DICOR, engine, the Tata Safari Storme 2.2L VariCOR engine, the Sumo Grande, an SUV with the comforts of a family car, and the new Sumo Gold, which features a BS4 3.0L diesel CR4 engine, delivering 85 PS power which was launched in November 2011. Tata Aria is India's first four-wheel drive crossover, a luxurious creation with the finesse of a sedan and the horsepower of an SUV blended in one car. We expanded the existing range of Aria with the launch of Tata Aria Pure LX in December 2012 & the SUV range with the launch of Tata Safari Storme in October 2012.

Land Rover produces six car lines under the brands of Range Rover and Land Rover, and provides us with market share in the premium all-terrain vehicles segment. Range Rover is the premium range consisting of Range Rover, Range Rover Sport and Range Rover Evoque, and the Land Rover brand comprises the Defender, Discovery 4 and Freelander 2 vehicles. The Freelander 2 was significantly enhanced for the 2013 Model Year with the introduction of a turbocharged 2.0-liter gasoline engine, offering superior performance to the 3.2-liter engine it replaces while also reducing CO₂ emissions. At the 2013 New York International Auto Show, Land Rover debuted the new 2014 Model Year Range Rover Sport built on a weight saving aluminum architecture. The Range Rover Sport's new aluminum architecture achieves a weight saving of up to 420kg, and when combined with a TDV6 engine, allows for improved agility and performance, with 15 per cent. CO₂ reduction and 24 per cent. improved fuel economy. The new Range Rover Sport is the fastest, most agile and most responsive Land Rover ever. The new aluminum Range Rover was launched in the third quarter of Fiscal 2013. A diesel hybrid Range Rover is currently being developed for introduction later in 2013. The new Range Rover was declared the world's top SUV by The Sunday Times, won Top Gear magazine's Luxury Car of the Year and was recently awarded the maximum 5-star safety rating by Euro NCAP.

Light Commercial Vehicles. We manufacture a variety of LCVs, including pickup trucks, trucks and buses with a GVW (including payload) of between 1.2 tons and 7.5 tons. This also includes the Tata Ace, India's first indigenously developed mini-truck with a 0.75 ton payload with different fuel options, Super Ace with a 1-ton payload, Ace Zip with a 0.6 ton payload, the Magic and Magic Iris, both passenger variants for commercial transportation developed on the Tata Ace platform, and the Winger.

Table of Contents

We showcased at the New Delhi Auto Expo 2012, the Tata Ultra, our new LCV and ICV range that comprises a series of variants from 5 to 14 tons. In October 2012, we launched the 1-ton diesel mini truck, the Tata Super ACE, in South Africa.

Medium and Heavy Commercial Vehicles We manufacture a variety of M&HCVs, which include trucks, tractors, buses, tippers, and multi-axled vehicles with GVW (including payload) of between 8 tons and 49 tons. In addition, through TDCV we manufacture a range of high horsepower trucks ranging from 215 horsepower to 560 horsepower, including dump trucks, tractor-trailers, mixers and cargo vehicles. During Fiscal 2010, we unveiled a new range of trucks, referred to as the Tata Prima line, to our customers in India and South Korea, and have partially extended the offering by providing various products off the Prima line. We also expect to gradually export these Prima products to other countries such as South Africa, Russia, the other SAARC countries, Middle East and various countries in Africa. We showcased at the New Delhi Auto Expo 2012, the Tata LPT 3723, India's first 5-axle rigid truck, the Tata Paradiso G7 Multi-axle Coach, jointly developed by Tata Motors and Tata Marcopolo Motors Limited, and the Tata Starbus Fuel Cell Concept (Hydrogen). In September 2012, Tata Motors Limited launched 6 first-of-its-kind heavy trucks and an intelligent vehicle and driver management solution Tata FleetMan Telematics Services. The Tata Prima range has now been further extended with the launch of two new engine capacities of 380HP and 230HP. In the 380HP range, two new models have been launched the Prima 4938 tractor and the Prima 3138K tipper. The new 230HP LX range has two new products the Prima 4923 and the Prima 4023 tractors. The Tata Motors Construck range has been further supplemented with the launch of the versatile Tata LPK 3118 tipper. We also introduced a telematics and fleet management service, branded Tata FleetMan. Targeted at commercial vehicle fleet owners and large consigners of goods, the service offers advanced telematics solutions, which will help in increasing productivity and profitability. During Fiscal 2013, in the SIAM International Bus & Utility Vehicles Show, at Greater Noida, we showcased two new exciting applications from our line-up of buses for the MCV market for intercity transportation and staff transportation: including a 45-seater front-engine luxury air-conditioned intercity coach and a luxury non-airconditioned 41-seater staff bus. Other new vehicles on display included the luxurious Divo Coach, Semi Deluxe Starbus Ultra Contract Bus, the all new Starbus Ultra intended for use as school transportation and an ambulance based on the Tata Venture platform. The new MCV buses are fully built offerings catering to both airconditioned and non-airconditioned contract and intercity applications. The world-class body has been built to meet international standards by Tata Motors Marcopolo Limited, on tested Tata LPO 1618 and LPO 1512 chassis, which are reliable and provide strong performance. In January 2013, we introduced a warranty of 4 years, on our entire range of heavy trucks with 25 tons and higher GVW.

We believe that the foundation of our growth over the last five decades has been a deep understanding of economic conditions and customer needs, and the ability to translate this understanding into desirable products through research and development. Our Engineering Research Centre, or ERC, established in 1966, has enabled us to successfully design, develop and produce our own range of vehicles. As a consequence of the acquisition of Jaguar Land Rover, we now have state-of-the-art engineering and design facilities. We believe the ERC along with the capabilities of our Jaguar Land Rover business will enhance our product engineering capability and facilitate rapid introduction of new products. Furthermore, we have a wholly-owned subsidiary, Tata Motors European Technical Centre PLC, or TMETC, in the United Kingdom, which is engaged in automobile research and engineering.

Through our other subsidiary and associate companies, we are engaged in providing engineering and automotive solutions, construction equipment manufacturing, automotive vehicle components manufacturing and supply chain activities, machine tools and factory automation solutions, high-precision tooling and plastic and electronic components for automotive and computer applications, and automotive retailing and service operations.

Tata Technologies Limited, or TTL, our 72.32% owned subsidiary, is engaged in providing specialized engineering and design services, product lifecycle management, or PLM, and product-centric IT services to leading global manufacturers. TTL's customers are among the world's premier automotive, aerospace and consumer durables manufacturers. TTL had eight subsidiary companies and one joint venture as at March 31, 2013. The consolidated revenue for TTL was Rs.20,324 million in Fiscal 2013 (including revenue from Tata Motors Group), growth of 24.8% from Rs.16,291 million in Fiscal 2012, as worldwide automotive and aerospace markets showed volume traction. TTL recorded profit after tax of Rs.3,008 million in Fiscal 2013, representing an increase of 42.8% over Rs.2,107 million in Fiscal 2012 contributed by higher offshore revenues and cost reduction measures that were implemented.

Table of Contents

TML Distribution Company Limited, or TDCL, our wholly-owned subsidiary, was incorporated on March 28, 2008. TDCL provides distribution and logistics support for distribution of our products throughout India. TDCL commenced its operations in Fiscal 2009.

Our wholly-owned subsidiary, Tata Motors Finance Limited, or TMFL, was incorporated on June 1, 2006, with the objective of becoming a preferred financing provider for our dealer's customers by capturing customer spending over the vehicle life-cycle relating to vehicles sold by us. TMFL commenced operations on September 1, 2006. In India, TMFL is registered with the RBI as a Systemically Important Non-Deposit Taking Non-Banking Financial Company and is classified as an Asset Finance Company under the RBI's regulations on Non-Banking Financial Companies.

Our wholly-owned subsidiary, Tata Motors Insurance Broking and Advisory Services Limited, undertakes the business of insurance and reinsurance broking, and commenced business in Fiscal 2008.

As of March 31, 2013, our operations included 64 consolidated subsidiaries and 25 equity method affiliates, in respect of which we exercise significant influence.

As of March 31, 2013, we had approximately 62,716 permanent employees, including approximately 32,751 permanent employees at our consolidated subsidiaries.

Tata Incorporated serves as our authorized United States representative. The address of Tata Incorporated is 3 Park Avenue, 27th Floor, New York, NY 10016, United States of America.

Our Registered Office is located at Bombay House, 24, Homi Mody Street, Mumbai 400 001, India. Our telephone number is +91-22-6665-8282 and our website address is www.tatamotors.com. Our website does not constitute a part of this annual report.

B. Business Overview.

We primarily operate in the automotive segment. Our automotive segment operations include all activities relating to the development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. The acquisition of the Jaguar Land Rover business has enabled us to enter the premium car market in developed markets such as the United Kingdom, the United States and Europe as well as in growing markets like China, Russia and Brazil, where we were not present earlier. Going forward, we expect to focus on profitable growth opportunities in our global automotive business, through new products and market expansion. Within our automotive operations we continue to focus on integration and synergy through sharing of resources, platforms, facilities for product development and manufacturing, sourcing strategy and mutual sharing of best practices.

Our business segments are (i) automotive operations and (ii) all other operations. Our automotive operations include all activities relating to development, design, manufacture, assembly and sale of vehicles including financing thereof, as well as sale of related parts and accessories. We provide financing for vehicles sold by dealers in India. The vehicle financing is intended to drive sale of vehicles by providing financing to the dealer's customers and as such is an integral part of automotive business. Our automotive operations segment is further divided into Tata and other brand vehicles (including spares and financing thereof) and Jaguar Land Rover.

Our other operations business segment includes information technology, or IT services and machine tools and factory automation solutions.

Our Strategy

We believe that we have established a strong position in the Indian automobile industry by launching new products, investing in research and development, strengthening our financial position and expanding our manufacturing and distribution network. We have pursued the strategy of increasing our presence in the global automotive markets and enhancing our product range and capability through strategic acquisitions/alliances. Our goal is to position ourselves as a major international automotive company by offering products across various markets by combining our engineering and other strengths as well as through strategic acquisitions. Our strategy to achieve these goals consists of the following elements:

Leveraging our capabilities: We offer an extensive range of commercial vehicles (for both goods and passenger transport) as well as passenger vehicles. We have plans to expand the range of our product base further with our strong brand recognition in India, our understanding of local consumer preferences, well developed in-house engineering capabilities and extensive distribution network.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

We believe that our in-house research and development capabilities, including that of our subsidiaries Jaguar Land Rover, TDCV and Hispano, and our joint-ventures with Marcopolo of Brazil in India, with Thonburi in Thailand and Tata Africa Holdings (SA) (Pty.), Ltd in South Africa, Trilix Srl., Turin (Italy), and TMETC in the United Kingdom and our relationship with Fiat, will enable us to expand our product range and extend our geographical reach.

Table of Contents

The launches of Tata Divo Luxury Coach and Tata Starbus Ultra in Fiscal 2012 using body designs from Hispano and Tata Marcopolo demonstrate continued leveraging of our capabilities. In Fiscal 2012, we showcased at the New Delhi Auto Expo 2012: (i) the Tata Ultra, a new LCV and ICV range platform, allowing flexibility of multiple wheel bases and multiple payload points, (ii) the Tata LPT 3723, India's first 5-axle rigid truck (launched in September 2012) and the Tata Paradiso G7 multi-axle coach, jointly developed by Tata Motors and Marcopolo and (iii) our alternate fuel technology capability through the following concept vehicles - the Tata Starbus Fuel Cell (hydrogen) and the Tata Magic Iris CNG. Our portfolio already includes CNG-electric hybrid buses. During Fiscal 2013, in the SIAM International Bus & Utility Vehicles Show, at Greater Noida, we showcased two new exciting applications from our line-up of buses for the MCV market for intercity transportation and staff transportation: including a 45-seater front-engine luxury air-conditioned intercity coach and a luxury non-airconditioned 41-seater staff bus. Other new vehicles on display included the luxurious Divo Coach, Semi Deluxe Starbus Ultra Contract Bus, the all new Starbus Ultra intended for use as school transportation and an ambulance based on the Tata Venture platform. The new MCV buses are fully built offerings catering to both air conditioned and non-air conditioned contract and intercity applications. The body has been built to meet international standards by Tata Motors Marcopolo Limited, on tested Tata LPO 1618 and LPO 1512 chassis, which are reliable and provide strong performance.

In September 2012, we launched six first-of-its-kind heavy trucks. The Tata Prima range has now been further extended with the launch of two new engine capacities of 380HP and 230HP. In the 380HP range, two new models have been launched - the Prima 4938 tractor and the Prima 3138K tipper. The new 230HP LX range has two new products - the Prima 4923 and the Prima 4023 tractors. The Tata Motors Construck range has been further supplemented with the launch of the versatile Tata LPK 3118 tipper. We also introduced an intelligent vehicle and driver management telematics solution, branded Tata FleetMan. Targeted at commercial vehicle fleet owners and large consigners of goods, the service offers advanced telematics solutions, which will help in increasing productivity and profitability. In January 2013, we introduced a warranty of four years on our entire range of heavy trucks with GVW of 25 tons or higher.

Our product portfolio of Tata brand vehicles includes the Nano, Indica, Indica Vista, Indigo, Indigo Manza, Sumo, Sumo Grande, Safari, Safari Storme, Aria and Venture, enables us to compete in various market segments. As discussed above, the Company also showcased its alternate fuel technology capability at the New Delhi Auto Expo 2012 by displaying the Tata Nano CNG and the Tata Indigo Manza diesel-electric hybrid concept vehicles. In 2012, we developed the Tata Indica Vista electric vehicle, a fully electric car, in conjunction with the technology from TMETC.

We have continued modernizing our facilities to meet increasing demand for our vehicles. Our Jamshedpur plant, which manufactures our entire range of M&HCVs, including the Tata Prima, both for civilian and defense applications, was our first, set up in 1945, to manufacture steam locomotives. It led the Company's foray into commercial vehicles in 1954. The Jamshedpur plant has been modernized through the decades, with a particularly intense scale in the last 10 years. In Fiscal 2013, the Jamshedpur plant produced its two millionth truck. In June 2012, our plant at Dharwad became operational, producing the Tata ACE Zip and the Tata Magic IRIS, a move integral to maintaining market share in the commercial vehicles market, particularly in the growing LCV market.

Continuing focus on high quality and enhancing customer satisfaction: One of our principal goals is to achieve international quality standards for our products and services. We have established a procedure for ensuring quality control of outsourced components. Products purchased from approved sources undergo a supplier quality improvement process. We also have a program for assisting vendors from whom we purchase raw materials or components to maintain quality. Each vendor is reviewed on a quarterly basis on parameters of quality, cost and delivery and preference is given to vendors with TS 16949 certification. We are pursuing various quality improvement programs, both internally and at our suppliers' operations, in an effort to enhance customer satisfaction and reduce our future warranty costs. We have also established a procedure for ensuring quality control of outsourced components, and products purchased from approved sources undergo a supplier quality improvement process. Reliability and other quality targets are built into our new product introduction process. Assurance of quality is further driven by the design team, which interacts with downstream functions like process-planning, manufacturing and supplier management to ensure quality in design processes and manufacturing. Through close coordination supported by our IT systems, we monitor quality performance in the field and implement corrections on an ongoing basis to improve the performance of our products thereby improving customer satisfaction. In India, we improved our Customer Service Index, or CSI, score to 796 in 2012 from 779 in 2011. We improved in ranking to 6th in the 2012 J.D. Power India Customer Service Index survey from 7th in 2011. We continue to focus on high quality customer satisfaction. We believe our extensive sales and service network has also enabled us to provide quality and timely customer service. We are driving focused initiatives at both sales and service touch points to enhance customer experience and thrive to be best in class.

Jaguar and Land Rover collectively received over 110 awards from leading international motoring writers, magazines and commentators in 2012, reflecting the strength of its design capabilities and distinctive model line-up. The Jaguar XF is Jaguar's best-selling model across the world by volume and has received more than 100 international awards since its launch, including being named 'Best Executive Car' by What Car? Magazine for four consecutive years. The Jaguar XJ has received more than 20 international awards since its launch, including 'Best Luxury Car' from China's Auto News in 2010, 'Annual Limousine King' from Quattroroute (Italy), 'Luxury Car of the Year' from Top Gear (UK), 'Automobile Magazine's 2011 Design of the Year' and 'Best Executive Sedan' at the Bloomberg Awards in the United States.

Table of Contents

Products and environmental performance: Our strategy is to invest in products and technologies that position our products ahead of expected stricter environmental regulations and ensure that we benefit from a shift in consumer awareness of the environmental impact of the vehicles they drive. The Company is committed to continued investment in new technologies, including developing sustainable technologies to improve fuel economy and reduce CO₂ emissions. We are also committed to investing in automotive research and development in the United Kingdom. We believe that we are the leader in development of automotive green-technology in the United Kingdom. Our environmental vehicle strategy focuses on new propulsion technology, weight reduction and reducing parasitic losses through the driveline. For example, the Jaguar Range-e plug-in hybrid demonstration vehicle achieved 89g CO₂/km and won the 2011 Society of Moto Manufacturers and Traders Award For Automotive Innovation. The Jaguar C-X75 hybrid supercar was developed in partnership with Williams Advanced Engineering. Its 1.6-litre engine generates an 502bhp and is matched with 390bhp electric motors that give the Jaguar C-X75 a 220mph top speed but also an all-electric range of 60 kilometers and emissions below 89g/km. In addition to these vehicle level projects, Jaguar Land Rover has a number of collaborative research and development projects in systems such as electric motors, power electronics and energy storage. Jaguar Land Rover is also the lead OEM partner in the UK Energy Storage Centre, developing capability in next generation battery technology and alternative mobile energy storage.

Our Jaguar Land Rover business has started to introduce a new premium lightweight architecture for its products, initially launched on the new Range Rover and Range Rover Sport 2. This architecture includes a host of environmentally-friendly technologies including new aluminum alloys, down-sized power trains, sustainable materials, best CO₂ navigation routes, electronic power steering, aerodynamic features and many more technologies. These technologies enable the delivery of luxurious and high-performance products combined with low CO₂ and laid the foundations for efficient hybridization of the platform. Jaguar Land Rover's initial full-hybrid program is also in advanced stages. Our Jaguar Land Rover business already offers five aluminum vehicles, the Jaguar XJ, Jaguar XK, new Jaguar F-TYPE, the new Range Rover and the new Range Rover Sport and plans to continue to deploy its core competency in aluminum construction across more models in its range. We are also developing more efficient vehicle technologies. Our current product line-up is the most fuel-efficient it has ever been. The all-aluminum Jaguar XJ 3.0 V6 twin-turbo diesel has CO₂ emissions rated at 159 g/km. The most efficient version of the Range Rover Evoque emits less than 130 g/km. The new 3.0-liter TDV6 Range Rover offers similar performance to the previous 4.4-liter TDV8 Range Rover while fuel consumption and CO₂ emissions have been reduced to 196 g/km from (TDV6 figure) from 253 g/km (TDV8). The new downsized 2.0-liter turbocharged gasoline engine options in the Range Rover Evoque, the 2013 Model Year Freelander 2, and the Jaguar XF and Jaguar XJ also offer improved fuel efficiency. In the case of the latest Freelander Si4, fuel consumption and CO₂ emissions have been reduced over the outgoing 3.2-liter Freelander Si6. Equipped with stop-start and an 8-speed automatic transmission, the Jaguar XF 2.2-liter diesel, already the most fuel efficient Jaguar vehicle ever, was further improved for the 2013 Model Year with CO₂ emissions rate at 135 g/km.

In Fiscal 2011, some of the plug-in hybrid projects of Jaguar Land Rover were completed and have provided the technical foundation for a production development program for plug-in hybrid vehicles on a parallel basis along with traditional gasoline vehicles. In addition, Jaguar Land Rover has made significant progress on a number of ongoing collaborative research and development programs investigating a wide range of CO₂ reduction technologies. These include radical combustion engine downsizing/pressure charging, alternative power sources for hybrids, flywheel kinetic energy recovery systems and other waste energy recovery systems.

Our Jaguar Land Rover business is also taking measures to reduce emissions, waste and the use of natural resources from all of its operations. Jaguar Land Rover recognizes the need to use resources responsibly, produce less waste and reduce its carbon footprint. Against our Environmental Innovation, or Ei strategy baseline year of 2007, a 21% reduction in operational CO₂ has been achieved despite significant project work to expand our facilities. Water use was reduced by 12.7% per unit and waste to landfill was reduced by 75% per unit versus the 2007 baseline. Jaguar Land Rover has implemented life cycle techniques so that we can evaluate and reduce our environmental footprint throughout the value chain. Jaguar Land Rover has been certified to the international environmental management standard, ISO14001, since 1998. As part of its integrated CO₂ management strategy, Jaguar Land Rover has one of the largest voluntary CO₂ offset programs and has provided customer programs to enable its customers to offset the emissions from vehicle use.

Mitigating cyclicality: The automobile industry is impacted by cyclicality. To mitigate the impact of cyclicality, we plan to continually strengthen our operations through gaining market share across different segments, and offering a wide range of products in diverse geographies. We also plan to continue to strengthen our business operations other than vehicle sales, such as financing of our vehicles, spare part sales, service and maintenance contracts, sales of aggregates for non-vehicle businesses, reconditioning of aggregates and sale of castings, production aids and tooling / fixtures, to reduce the impact of cyclicality of the automotive industry.

Table of Contents

Expanding our international business: Our international expansion strategy involves strategic acquisitions and introducing our product range into select geographies, where we have an opportunity to grow in markets with similar characteristics to the Indian market. Our international business strategy has already resulted in the growth of our international operations in select markets and chosen segments over the last 5 years. For example, we were the largest competitor in the LCV bus market for the seven meter category and the second largest competitor in the LCV Truck market in the 7.5 ton category, in terms of unit sales in Ukraine in Fiscal 2013. We have also further consolidated our market share in most segments of commercial vehicles in some SAARC countries like Bangladesh, Nepal and Sri Lanka.

Our acquisition of Jaguar Land Rover has expanded our geographical presence significantly. Through Jaguar Land Rover we now offer products in the luxury performance car and premium all-terrain vehicle segments with globally recognized brands and we have diversified our business across markets and product segments. We will continue to build upon the internationally recognized brands of Jaguar Land Rover. TDCV continues to be the largest exporter of heavy commercial vehicles from South Korea. We have established a joint venture along with Thonburi in Thailand to manufacture pickup trucks. During Fiscal 2008, we established a joint venture company to undertake manufacture and assembly operations in South Africa, which has been one of our largest export markets from India in terms of unit volume. The joint venture company, Tata Motors (SA) Proprietary Limited, commenced operations in July 2011.

Reducing operating costs: We believe that our scale of operations provides us with a significant advantage in reducing costs and we plan to continue to sustain and enhance this cost advantage.

Our ability to leverage our technological capabilities and our manufacturing facilities among our commercial vehicle and passenger vehicle businesses enables us to reduce cost. For example, the diesel engine used in our Indica was modified to engineer a new variant for use in the Ace platform, which helped to reduce the project cost. Similarly, platform sharing for the manufacture of pickup trucks and UVs enables us to reduce capital investment that would otherwise be required, while allowing us to improve the utilization levels at our manufacturing facilities. Where it is advantageous for us to do so, we intend to add our existing low cost engineering and sourcing capability to vehicles manufactured under the Jaguar and Land Rover brands.

Our vendor relationships also contribute to our cost reductions. For example, we believe that the vendor rationalization program that we are undertaking will provide economies of scale to our vendors which would benefit our cost programs. We are also undertaking various internal and external benchmarking exercises that would enable us to improve the cost effectiveness of our components, systems and sub-systems.

We have intensified efforts to review and realign our cost structure through a number of measures such as reduction of manpower costs and rationalization of other fixed costs. Our Jaguar Land Rover business has undertaken several cost control and cost reduction initiatives such as increased sourcing of materials from low cost countries, reduction in number of suppliers, rationalization of marketing setup, reduction of manpower costs through increased employee flexibility between sites and several other initiatives. Further, our Jaguar Land Rover business is exploring opportunities through reduction in number of platforms, reduction in engineering costs, increased use of off-shoring and several other initiatives.

Enhancing capabilities through the adoption of superior processes: Tata Sons and the entities promoted by Tata Sons, including us, aim at improving quality of life through leadership in various sectors of national economic significance. In pursuit of this goal, Tata Sons and the Tata Sons promoted entities have institutionalized an approach, called the Tata Business Excellence Model, or TBEM, which has been formulated along the lines of the Malcolm Baldrige National Quality Award to enable us to improve performance and attain higher levels of efficiency in our businesses and in discharging our social responsibility. The model aims to nurture core values and concepts embodied in various focus areas such as leadership, strategic planning, customers, markets and human resources, and to translate them to operational performance. Our adoption and implementation of this model seeks to ensure that our business is conducted through superior processes.

We have deployed a balance score card, or BSC, management system, developed by Dr. Robert Kaplan and Dr. David Norton of the Harvard Business School for measurement based management and feedback. We have also deployed a new product introduction, or NPI, process for systematic product development and a PLM system for effective product data management across our organization. On the human resources front, we have adopted various processes to enhance the skills and competencies of our employees. We have also enhanced our performance management system, with appropriate mechanisms to recognize talent and sustain our leadership base. We believe these will enhance our way of doing business, given the dynamic and demanding global business environment.

Table of Contents

Customer financing: With financing increasingly being a critical factor in vehicle purchases and the rising aspirations of consumers in India, we intend to expand our vehicle financing activities to enhance our vehicle sales. Further, in a scenario where there is a lack of sufficient finance availability for vehicle sales in the Indian market, as was witnessed during the financial crisis, our finance business is expected to play a significant role in filling the gap created when financing from other banks and non banking financial companies dries up. In addition to improving our competitiveness in customer attraction and retention, we believe that expansion of our financing business would also contribute towards moderating the impact on our financial results from the cyclical nature of vehicle sales.

Continuing to invest in technology and technical skills: We believe we are one of the most technologically advanced indigenous vehicle manufacturers in India. Over the years, we have enhanced our technological strengths through extensive in-house research and development activities. Further, our research and development facilities at our subsidiaries, like TMETC, TDCV, TTL, and Trilix, together with the two advanced engineering and design centers of Jaguar Land Rover, have increased our capabilities in product design and engineering. In our Jaguar Land Rover business, we are committed to continue to invest in new technologies to develop products that meet the opportunities of the premium segment, including developing sustainable technologies to improve fuel economy and reduce CO₂ emissions. We consider technological leadership to be a significant factor in continued success, and therefore intend to continue to devote significant resources to upgrade our technological base.

Maintaining financial strength: Our cash flow from operating activities in Fiscal 2013 and 2012 was Rs.222,933 million and Rs.218,227 million, respectively. The improved position in our operating cash flows is primarily due to an increase in volumes at our Jaguar Land Rover business, implementation of cost reduction programs, and prudent working capital management. We have established processes for project evaluation and capital investment decisions with an objective to enhance our long term profitability.

Leveraging brand equity: We believe customers associate the Tata name with reliability, trust and ethical value, and our brand name is gaining significant international recognition due to the international growth strategies of various Tata companies. The Tata brand is used and its benefits are leveraged by Tata companies to their mutual advantage. We recognize the need for enhancing our brand recognition in highly competitive markets in which we compete with internationally recognized brands. We, along with Tata Sons and other Tata companies, will continue to promote the Tata brand and leverage its use in India, as well as in various international markets where we plan to increase our presence. Supported by the corporate level Tata brand, our product brands like Indica, Indigo, Sumo, Safari, Aria, Venture Nano, Prima, Ace, Magic along with Daewoo, Jaguar, Range Rover and Land Rover are highly regarded, and will be nurtured and promoted. At the same time, we will continue to build new brands such as the newly launched Ultra range of LCVs to further enhance our brand equity.

Automotive Operations

We sold 1,191,179, 1,269,483, and 1,078,814 vehicles in Fiscal 2013, 2012 and 2011 respectively, consisting of 819,923 units of Tata and other brand vehicles and 372,062 units of Jaguar Land Rover vehicles in Fiscal 2013. In terms of units sold our largest market is India where we sold 758,175 and 880,825 units during Fiscal 2013 and 2012, (constituting 63.6% and 69.4% of total sales in Fiscal 2013 and Fiscal 2012, respectively) followed by China in Fiscal 2013 where we sold 79,458 units and 54,532 units in Fiscal 2013 and Fiscal 2012 respectively (constituting 6.7% and 4.3% of total sales) (In Fiscal 2012 the United Kingdom was our second largest market where we sold 58,558 units and 61,796 units in Fiscal 2013 and Fiscal 2012 respectively). A geographical breakdown of our revenues is set forth in Item 5.A Operating Results Geographical breakdown .

Our total sales (including international business sales and Jaguar Land Rover sales) for Fiscal 2013, 2012 and 2011 are set forth in the table below:

Category	Fiscal 2013		Fiscal 2012		Fiscal 2011	
	Units	%	Units	%	Units	%
Passenger Cars	236,260	19.8%	352,981	27.8%	322,149	29.9%
Utility Vehicles	361,822	30.4%	316,589	24.9%	243,934	22.6%
Light Commercial Vehicles	428,708	35.9%	365,677	28.8%	311,167	28.8%
Medium and Heavy Commercial Vehicles	165,189	13.9%	234,236	18.5%	201,564	18.7%
Total	1,191,179	100.0%	1,269,483	100.0%	1,078,814	100.0%

Revenues from our automotive operations were Rs.1,878,571 million, Rs.1,654,903 million and Rs.1,223,547 million in Fiscal 2013, 2012 and 2011, respectively. Tata and other brand vehicles (including spares and financing thereof) constituted 27.3% of our total automotive revenues before inter-segment elimination in Fiscal 2013 while Jaguar Land Rover constituted 72.7%.

Table of Contents**Tata and other brand vehicles (including spares and financing thereof)**

We sold 819,923, 955,233, and 835,469 units of Tata and other brand vehicles in Fiscal 2013, 2012 and 2011 respectively. Of the 819,923 units sold in Fiscal 2013, 755,681 units were sold in India while 64,248 units were sold outside of India, compared to 878,551 units and 76,682 units respectively for Fiscal 2012. Our share of the Indian four-wheeler automotive vehicle market (i.e. automobile vehicles other than two and three wheeler categories) decreased from 25.1% in Fiscal 2012 to 22.0% in Fiscal 2013. We maintained our leadership position in the commercial vehicle segment in an industry which experienced increased competition during the year. The passenger vehicle market also continued to be subject to intense competition.

The following table sets forth our total sales of Tata and other brand vehicles:

Category	Fiscal 2013		Fiscal 2012		Fiscal 2011	
	Units	%	Units	%	Units	%
Passenger Cars	178,494	21.8%	298,991	31.3%	269,194	32.2%
Utility Vehicles	47,532	5.8%	56,329	5.9%	53,544	6.4%
Light Commercial Vehicles	428,708	52.3%	365,677	38.3%	311,167	37.2%
Medium and Heavy Commercial Vehicles	165,189	20.1%	234,236	24.5%	201,564	24.2%
Total	819,923	100.0%	955,233	100.0%	835,469	100.0%

The following table sets forth our market share in various categories in the Indian market-based on wholesale volumes:

Category@	Fiscal 2013	Fiscal 2012	Fiscal 2011
Passenger Cars*	9.5%	13.6%	14.4%
Utility Vehicles**	7.1%	10.9%	13.2%
Light Commercial Vehicles***	62.2%	60.2%	63.2%
Medium and Heavy Commercial Vehicles	53.3%	59.3%	60.1%
Total Four-Wheel Vehicles	22.0%	25.1%	24.3%

@ Passenger cars, UV and LCV market share for the Fiscal 2013 and Fiscal 2012 are not comparable with the data for Fiscal 2011 due to changes in the Industry classification by SIAM.

* Passenger cars market shares include sales of Fiat vehicles distributed by us and Jaguar Land Rover vehicles sold in India. Furthermore, passenger cars market share for Fiscal 2013 and Fiscal 2012 is based on the total cars sold in the industry, while passenger cars market shares for Fiscal 2011 are based on the segments where we offered products (i.e., small cars and midsize segments) and does not include the super compact segment where we did not offer any products.

** UV market share for Fiscal 2013 and Fiscal 2012 includes the market share for Vans V1 segment (i.e. Tata Venture) and excludes Vans V2 segment (i.e. Tata Ace Magic), while UV market shares for Fiscal 2011 are based on the segments where we are present.

*** LCV market shares include the market shares for Vans V2 segment (i.e. Tata Ace Magic) in accordance with SIAM's classification of passenger vehicles.

Our performance in various categories of the Indian market is described below:

Passenger cars: The domestic passenger cars industry grew by 0.9% in Fiscal 2013 compared with an increase of 3.6% in Fiscal 2012. Domestic passenger vehicle sales were impacted by rising interest rates, fuel price hikes and inflationary pressures.

Customer preference for diesel vehicles over gasoline vehicles continued. Marketing initiatives and network actions continued with weak industry trends. Our performance within the industry was also impacted unfavorably. During Fiscal 2013, we recorded sales of 172,824 vehicles in the domestic market; a decline of 33.2% over last year. The overall market share was lower at 8.9% as compared to 13.0% during the last fiscal year. In Fiscal 2013, we sold 48,122 Nano cars, compared with 77,394 in Fiscal 2012. We continue to focus on expanding the market penetration of the Nano, including initiatives to appeal to younger customers such as our Art in motion and Campus Brand Ambassador programs. Furthermore, we continue to identify new markets for the Nano. We are evaluating markets in South Asia, in addition to the current markets in Nepal and Sri Lanka. We also continue to offer products at a low price point in the entry level mid-size sedan market through a portfolio including the old Indigo and the Indigo eCS.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The distribution business of Fiat cars through Tata-Fiat dealer network, which started in March 2006, entered its seventh and final year of operation in Fiscal 2013. During Fiscal 2013, we sold 5,179 Fiat cars, including the Grande Punto and Linea, through our joint venture with Fiat in India. Fiat stood in the 13th position by sales volume among the major car players in India. The Tata-Fiat dealer network was operating through 170 dealer facilities across 129 cities as of March 31, 2013. Fiat was ranked 7th in the J.D. Power 2012 India Customer Service Index Survey. During May 2012, both the joint-venture partners decided to re-align their Indian joint-venture and the management control of distributing and marketing Fiat branded cars, and related commercial activities. With effect from April 1, 2013, FIAL has been restructured to a manufacturing company that manufactures vehicles, powertrains and related spare parts for us and the Fiat Group.

Table of Contents

The new distribution company of the Fiat Group will be responsible for distribution and marketing of Fiat branded vehicles. However, we are continuing to provide service support at 82 cities across India until September 30, 2013, where Fiat was unable to establish a network by March 31, 2013.

Since the commencement of distribution of Jaguar and Land Rover vehicles through our exclusive dealerships in India in June 2009, the brands have witnessed positive market responses. The sales volumes in Fiscal 2013 have grown approximately 10% to 2,494 vehicles compared to Fiscal 2012 despite the adverse impact of an increase in customs duty on imported premium cars in the March 2012 Union Budget. We commenced the local assembly of the Jaguar XF model in our facility at Pune in October 2012. We expect that additional efforts towards dealership network expansion and local assembly of Jaguar Land Rover products will enable us to further penetrate the premium/luxury automotive passenger car market in India.

Utility Vehicles: Although, the utility vehicles market recorded a healthy growth of 51.5% in Fiscal 2013, we registered decline, mainly attributable to absence of a product in the fast growing soft roader utility vehicle segment. The Safari Storme was launched in Fiscal 2013, and has received a positive response from the market.

Commercial Vehicles: The commercial vehicles market in India in Fiscal 2013 recorded a modest growth of 1.7% which resulted in sales of 594,737 units in Fiscal 2013. The M&HCV market segment decreased by 23.3% in Fiscal 2013, compared to a growth of 6.5% in Fiscal 2012. The ban on mining in the Indian states of Karnataka and Goa, coupled with the slowdown in infrastructure spending, curtailed growth, especially in M&HCV. Slowed industrial growth across many key segments adversely impacted demand. However, we registered a marginal increase in sales in Fiscal 2013, growing by 1.0% to 536,491 units, as focus shifted to growing and consolidating presence in the LCV segment.

Light Commercial Vehicles (including pickups): Our range of LCVs includes small commercial vehicles, pickup trucks, trucks and commercial passenger carriers with a GVW (including payload) of between 1.2 tons and 7.5 tons. The LCV market segment grew by 17.9% in Fiscal 2013, mainly aided by the continuing expansion of the small commercial vehicle segment. Our sales increased by 21.5% to 393,726 units from 324,069 units in Fiscal 2013.

In the LCV segment, finance offerings were launched to target specific customer segments. This had tremendous success and is being used selectively to further sales of key models going forward. The new generation LCV Starbus Ultra was launched in March 2012

We made good progress in the high growth pickup truck market, with new product offerings addressing gaps in the portfolio and financing packages.

Medium and Heavy Commercial Vehicles: Our M&HCVs have a wide range of applications and are generally configured as trucks, tippers, buses, tankers, tractors or concrete mixers. We sold 142,765 units during Fiscal 2013, resulting in a market share of 53.3%. We launched several new products and variants in this segment in 2013, one of which was the five axle rigid truck, the LPT 3723. Furthermore, we launched a four year warranty for our M&HCV products, to underscore the quality and reliability of our offerings.

Tata and other brand vehicles Sales and Distribution:

Our sales and distribution network in India as of March 2012, comprises approximately 2,600 sales contact points for our passenger and commercial vehicle business. In line with our growth strategy, we formed a 100% owned subsidiary, TDCL, in March 2008, to act as a dedicated distribution and logistics management company to support the sales and distribution operations of our vehicles in India. We believe this has improved the efficiency of our selling and distribution operations and processes.

TDCL provides distribution and logistics support for vehicles manufactured at our facilities and has set up stocking points at some of our plants and also at different places throughout India. TDCL helps us improve planning, inventory management, transport management and timely delivery. We have completed the initial rollout of a new customer relations management system, or CRM, at all our dealerships and offices across the country and have been certified by Oracle as the largest Siebel deployment in the automotive market. The combined CRM initiative supports users both within our Company and among our distributors in India and abroad.

Through our vehicle financing division and wholly owned subsidiary, TMFL we also provide financing services to purchasers of our vehicles through our independent dealers, who act as our agents for financing transactions, and through our branch network. TMFL, disbursed Rs.111,800 million and Rs.105,047 million during Fiscal 2013 and 2012 respectively. During Fiscal 2013 and 2012, approximately 33% and 27%, respectively, of our vehicle unit sales in India were made by the dealers through financing arrangements where our captive vehicle financing divisions provided the support. Total vehicle finance receivables outstanding as at March 31, 2013 and 2012 amounted to Rs.198,219 million and Rs.171,241 million respectively.

Table of Contents

We also market our commercial and passenger vehicles in several countries in Europe, Africa, the Middle East, South East Asia, South Asia and other African countries. We have a network of distributors in almost all of the countries where we export our vehicles, who work with us in appointing a local dealer for sales and servicing our product in various regions. We have also stationed overseas resident sales and service representatives in various countries to oversee our operations in their respective territories.

We use a network of service centers on highways and a toll-free customer assistance center to provide 24-hour on-road maintenance (including replacement of parts) to vehicle owners.

In Fiscal 2013, we also introduced Tata FleetMan. Targeted at commercial vehicle fleet owners and large consigners of goods, the service offers advanced telematics solutions, which will help in increasing productivity and profitability. The Tata FleetMan has been designed to address pressing concerns of the transport industry, targeted at the commercial vehicle fleet owner.

Through advanced telematics solutions like fuel management, driver management and remote diagnostics, Tata FleetMan combines information technology and telecommunications equipment and software, with Tata Motors Limited expertise in automobile technology, providing features like real time fleet tracking, SMS alerts, geo-fencing and trip management.

We believe that the reach of our sales, service and maintenance network provides us with a significant advantage over our competitors.

Tata and other brand vehicles Competition:

We face competition from various domestic and foreign automotive manufacturers in the Indian automotive market. Improving infrastructure and robust growth prospects compared to other mature markets have attracted a number of international companies to India who have either formed joint-ventures with local partners or have established independently owned operations in India. Global competitors bring with them decades of international experience, global scale, advanced technology and significant financial resources, and as a result, competition is likely to further intensify in the future. We have designed our products to suit the requirements of the Indian market based on specific customer needs such as safety, driving comfort, fuel efficiency and durability. We believe that our vehicles are suited to the general conditions of Indian roads and the local climate. The vehicles have also been designed to comply with applicable environmental regulations currently in effect. We also offer a wide range of optional configurations to meet the specific needs of our customers. We intend to develop and are developing products to strengthen our product portfolio in order to meet the increasing customer expectation of owning world class products.

Tata and other brand vehicles Seasonality:

Demand for our vehicles in the Indian market is subject to seasonal variations. Demand generally peaks between January and March, although there is a decrease in demand in February just before release of the Government of India's fiscal budget. Demand is usually lean from April to July and picks up again in the festival season from September onwards, with a decline in December due to model year change.

Tata and other brand vehicles Exports:

We are expanding our export operations, which have been ongoing since 1961. We market our commercial and passenger vehicles in several countries in Europe, Africa, the Middle East, South East Asia and South Asia. Our exports of vehicles manufactured in India decreased by 22.1% in Fiscal 2013 to 48,145 units from 61,835 units in Fiscal 2012 supported by economic improvement in our major international markets such as the Indian sub-continent and Africa.

In Fiscal 2013, our top five export destinations from India accounted for approximately 51% and 92% of our exports of commercial vehicles and passenger vehicle units, respectively. We are strengthening our position in the geographic areas we are currently operating in and exploring possibilities of entering new markets with similar market characteristics to the Indian market.

Tata Daewoo Commercial Vehicle Co. Ltd., Korea: TDCV recorded a 6.1% increase in its overall vehicle sales to 10,080 units in Fiscal 2013 from 9,500 units in Fiscal 2012. In the South Korean market, TDCV's unit sales in the M&HCV category in Fiscal 2013 decreased by 17.6% to 5,400 units compared to 6,552 units in Fiscal 2012, mainly due to a decrease in overall industry demand as a result of the economic slowdown. However, TDCV's export performance in Fiscal 2013 increased by 58.8% to 4,680 units compared to 2,948 units in Fiscal 2012. TDCV's sales increased significantly in several of its traditional export markets like Algeria, Russia, Laos, South Africa, and Vietnam. TDCV vehicles were also sold into some new markets like Indonesia, Ecuador, and Ghana.

Table of Contents**Jaguar Land Rover**

We acquired Jaguar Land Rover from Ford on June 2, 2008. As part of the acquisition, we acquired the global business relating to Jaguar Land Rover including three major manufacturing facilities and two advanced design and engineering centers in the United Kingdom, a worldwide sales and dealership network, intellectual property rights, patents and trademarks.

The strengths of the Jaguar Land Rover business include its internationally recognized brands, strong product portfolio of award winning luxury performance cars and premium all-terrain vehicles, global distribution network, strong research and development capabilities, and a strong management team. Our total sales of Jaguar Land Rover for Fiscal 2013, 2012 and 2011 are set forth in the table below:

	Fiscal 2013		Fiscal 2012		Fiscal 2011	
	Units	%	Units	%	Units	%
Jaguar	57,766	15.5%	53,990	17.2%	52,955	21.8%
Land Rover	314,290	84.5%	260,260	82.8%	190,390	78.2%
Total	372,056	100.0%	314,250	100.0%	243,345	100.0%

Jaguar:

Jaguar's principal products are the Jaguar XK sports car (coupe and convertible), Jaguar XF sedan and the Jaguar XJ sedan.

The Jaguar XK is Jaguar's premium luxury performance, GT, car, launched in 2006 with a high aluminum content to deliver fuel and CO₂ efficiency, and is available in coupe and convertible models. The Jaguar XK was significantly updated in 2009 with a new engine and exterior and interior design enhancements and further revised in 2011. The Jaguar XKR-S coupe and convertible models are the sporting flagships for Jaguar Land Rover's revitalized XK line-up. The Jaguar XKR-S is the fastest and most powerful production sports GT that Jaguar has ever built.

The Jaguar XF, launched in 2008, is a premium executive car that merges sports car styling with the sophistication of a luxury sedan. The Jaguar XF is Jaguar's best-selling model across the world by volume and has received more than 100 international awards since its launch, including being named "Best Executive Car" by What Car? Magazine for four consecutive years. In 2009, the Jaguar XF underwent a significant engine upgrade, and in 2011, we made fundamental design changes to the front and rear of the Jaguar XF, which we believe is now closer to the original C-XF concept car. In addition, the Jaguar 2012 Model Year line-up included a new four cylinder 2.2-liter diesel version of the Jaguar XF with Intelligent Stop-Start Technology, making it the most fuel-efficient Jaguar yet and allowing Jaguar to compete more effectively with competitors in the United Kingdom and European fleet and company car markets. At the Geneva Motor Show in March 2012, we unveiled the Jaguar XF Sportbrake, with the versatility of an estate car and the spirit of a sports car. The 2013 Model Year Jaguar XF range also includes for the first time an all-wheel drive version of the new V6 gasoline engine for the U.S. and European markets and a 2.0-liter gasoline version for the U.S. and Chinese markets. We started selling the 2013 Model Year Jaguar XF and Jaguar XF Sportbrake at the end of the third quarter of Fiscal 2013.

The Jaguar XJ is Jaguar's largest luxury sedan, powered by a range of supercharged and naturally aspirated 5.0-liter V8 gasoline engines and a 3.0-liter diesel engine. Using Jaguar's aerospace inspired aluminum body architecture, the new Jaguar XJ's lightweight aluminum body provides improved agility and fuel and CO₂ efficiency. The Jaguar XJ has received more than 20 international awards since its launch, including "Best Luxury Car" from China's *Auto News*, "Annual Limousine King" from *Quattroroute* (Italy), "Luxury Car of the Year" from *Top Gear (UK)*, *Automobile Magazine*'s 2011 Design of the Year and "Best Executive Sedan" at the *Bloomberg Awards* in the United States. In 2011, the Jaguar XJ was upgraded to include a new Executive Package and a Rear Seat Comfort Package, to provide an executive limousine experience. The 2013 Model Year also includes an all-wheel drive version and a 3.0-liter V6 gasoline version for the U.S. and European markets and a 2.0-liter gasoline version for the Chinese market, which benefits from lower custom duties in that market. We started selling the 2013 Model Year Jaguar XJ in the second quarter of Fiscal 2013.

In September 2012, Jaguar unveiled the Jaguar F-TYPE at the Paris Motor show, a two-seat sports car that was inspired by the 2011 C-X16 concept cars. Like the Jaguar XK and Jaguar XJ, the Jaguar F-TYPE has an all-aluminum structure and all-aluminum double wishbone suspension and stop/start fuel economy measures, with the power of Jaguar's latest 3.0-liter V6 and 5.0-liter V8 engines. The Jaguar F-TYPE has been available to retail customers since April 2013.

Table of Contents

Land Rover:

Land Rover's principal products are the Defender, Freelander 2 (LR2), Discovery 4 (LR4), Range Rover Evoque, Range Rover Sport and Range Rover. Land Rover products offer a range of powertrains, including turbocharged V6 diesel, V6 gasoline engines and V8 naturally aspirated and supercharged gasoline engines, with manual and automatic transmissions.

The Defender is one of Land Rover's most capable SUVs, and targets extreme all-terrain capabilities and payload/towing capability. Work has begun on developing a successor to this vehicle.

The Freelander 2 is a versatile vehicle for active lifestyles, matching style with sophisticated technology and off-road capability. The Freelander 2 was significantly enhanced for the 2013 Model Year with the introduction of a turbocharged 2.0-liter gasoline engine, offering superior performance to the 3.2-liter engine it replaces while also reducing CO₂ emissions.

The Discovery 4 is a mid-size SUV that features genuine all-terrain capability and versatility, including full seven-seat capacity. Recent power train innovations for the 2012 Model Year have delivered an improvement in CO₂ for the 3.0-liter LR-TDV6 engine. The Discovery has won more than 200 awards since its introduction in 1989.

The Range Rover Evoque is the smallest, lightest and most fuel-efficient Range Rover to date. The Evoque is available in 5-door and coupe body styles and, depending on the market, in both front-wheel drive and all-wheel drive derivatives. Since its launch in September 2011, consumer interest and demand have been consistent across the globe. In its first full year of sales, we sold 103,269 total retail units of the Range Rover Evoque. The Evoque has also won over 120 international awards since its launch, reflecting its blend of design and capability.

The Range Rover Sport combines the performance of a sports tourer with the versatility of a Land Rover. The 2012 Model Year Range Rover Sport introduced a new version of the TDV6 diesel engine with an eight-speed transmission to reduce CO₂ emissions. At the 2013, New York International Auto Show, Land Rover debuted the new 2014 Model Year Range Rover Sport built on a weight saving aluminum architecture. The Sport's all-new, aluminum architecture achieves a weight saving of up to 420kg (as with the TDV6 engine) to bring agility and exceptional performance, with 15 per cent CO₂ reduction and 24 per cent improved fuel economy. The new Range Rover Sport is the fastest, most agile and most responsive Land Rover ever.

The Range Rover is the flagship product under the Land Rover brand with a unique blend of British luxury, classic design, high-quality interiors and outstanding all-terrain ability. The new all-aluminum version was launched in the third quarter of Fiscal 2013, the world's first SUV with a lightweight all-aluminum body, the new Range Rover has enhanced performance and handling on all terrains, and significant advances in environmental sustainability. The all-aluminum body shell has helped reduce the weight of the car substantially. A diesel hybrid Range Rover is currently being developed for introduction later in 2013. The new Range Rover was declared the world's top SUV by The Sunday Times, won Top Gear magazine's Luxury Car of the Year and was recently awarded the maximum 5-star safety rating by Euro NCAP.

Jaguar and Land Rover achieved relatively strong sales during Fiscal 2013, as total unit sales (wholesales) increased to 372,056 units from sales of 314,250 units in Fiscal 2012, reflecting an increase of 18.4%. Jaguar volumes increased to 57,766 units during Fiscal 2013 from 53,990 units in Fiscal 2012 reflecting an increase of 7.0%. Land Rover volumes increased to 314,290 units in Fiscal 2013 from 260,260 units in Fiscal 2012, reflecting an increase of 20.8%, as a result Range Rover Evoque and Freelander sales. The Jaguar Land Rover exported 301,534 units in Fiscal 2013 compared to 250,180 units in Fiscal 2012, an increase of 20.5%.

Jaguar Land Rover's performance in key geographical markets on retail basis

United States

The U.S. economy has recovered more favorably than other developed economies since the economic downturn, with GDP growth and falling unemployment, although the position remains fragile.

United States retail volumes for Fiscal 2013 for the combined brands totaled 62,959 units. Jaguar retail volumes for Fiscal 2013 fell by 6% compared to Fiscal 2012, leading to a decrease in market share. Despite Land Rover retail volumes for Fiscal 2013 increasing by 13% compared to Fiscal 2012, market share declined slightly.

United Kingdom

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In Fiscal 2013, there was little growth in the economy in the United Kingdom, although recent economic data suggests better news ahead. Trading conditions in the United Kingdom remain difficult, although the automotive market has grown in the period.

Table of Contents

UK retail volumes for Fiscal 2013 for the combined brands totaled 72,270 units. Jaguar retail volumes for Fiscal 2013 increased by 10% compared to Fiscal 2012, broadly maintaining market share. Land Rover retail volumes for Fiscal 2013 increased by 24% compared to Fiscal 2012, increasing market share.

Europe (excluding Russia)

The European economy continues to struggle, with austerity measures in place in a number of countries. The economic situation and recent bail out actions continue to create uncertainty around European zone stability, the Euro and borrowing costs. Credit continues to be difficult to obtain for customers and the outlook remains volatile.

European retail volumes for Fiscal 2013 for the combined Jaguar Land Rover brands totaled 80,994 units, representing a 18% increase compared to Fiscal 2012. Jaguar retail volume for Fiscal 2013 grew by 5%, and Land Rover retail volume for Fiscal 2013 increased by 21% compared to Fiscal 2012.

China

The Chinese economy has continued to grow strongly throughout Fiscal 2013. GDP growth is likely to slow in future, although projected remain above 7.5% according to general economic consensus from market commentators.

The joint venture established to manufacture cars in China with Chery Automobile Co., Limited, or Chery Automobile, a Chinese automotive manufacturer, was approved by the National Development and Reform Commission of the People's Republic of China in October 2012 and GBP 71 million was invested in Fiscal 2013. Jaguar Land Rover and Chery Automobile will now accelerate plans to build a joint venture manufacturing plant in Changshu, near Shanghai, as part of a 10.9 billion RMB investment that will also include a new research and development center and engine production facility. The project includes the creation of a new partnership brand to assemble models tailored specifically for the Chinese market, including the marketing and distribution. The two companies plan to complete the Changshu facility in Jiangsu province during 2014. Construction of a new engine plant for production of fuel efficient engines is also contemplated in the joint venture partnership agreement.

The China retail volumes for Fiscal 2013 for the combined brands totaled 77,075 units. Jaguar retail volume for Fiscal 2013 increased by 28% compared to Fiscal 2012, improving market share. Land Rover retail volume for Fiscal 2013 increased by 51% compared to Fiscal 2012, again improving market share.

Asia Pacific

The Asia Pacific region main markets are Japan, Australia and New Zealand. These regions were less affected by the economic crisis compared to the United States, the United Kingdom and Europe, and recovered more favorably during Fiscal 2013, often due to increased trade with China and other growth economies.

The Asia Pacific retail volumes for Fiscal 2013 for the combined brands totaled 17,849 units. Jaguar retail volume for Fiscal 2013 increased by 27% compared to Fiscal 2013. Land Rover retail volume for Fiscal 2013 increased by 34% compared to Fiscal 2012.

Other markets

The major constituents of the other markets category are Russia, South Africa and Brazil, along with the rest of Africa and South America. These economies were not affected as significantly by the economic crisis as more developed economies and have had continued GDP growth in recent years, partially due to increased commodity and oil prices.

The other markets retail volumes for Fiscal 2013 for the combined Jaguar and Land Rover brands totaled 63,489 units, reflecting an increase of 19% from Fiscal 2012. Jaguar retail volumes for Fiscal 2013 increased 17% from 5,460 units in Fiscal 2012 to 6,402 in Fiscal 2013, while Land Rover retail volume increased 19% from 47,919 units in Fiscal 2012 to 57,087 in Fiscal 2013.

Jaguar Land Rover Sales & Distribution:

We market Jaguar Land Rover products in 178 markets, through a global network of 17 national sales companies, or NSCs, 85 importers, 62 export partners and 2,485 franchise sales dealers, of which 689 are joint Jaguar and Land Rover dealers.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Sales locations for Jaguar Land Rover vehicles are operated as independent franchises. Jaguar Land Rover is represented in its key markets through national sales companies as well as third party importers. Jaguar Land Rover has regional offices in certain select countries that manage customer relationships, vehicle supplies and provide marketing and sales support to their regional importer markets. The remaining importer markets are managed from the United Kingdom.

Table of Contents

Jaguar Land Rover products are sold through our dealerships to retail customers. Jaguar Land Rover products are also sold to fleet customers, including daily rental car companies, commercial fleet customers, leasing companies, and governments. As a consequence, Jaguar Land Rover has a diversified customer base, which reduces its independence on any single customer or group of customers.

Jaguar Land Rover Competition:

We operate in a globally competitive environment and face competition from established premium and other vehicle manufacturers who aspire to move into the premium performance car and premium SUV markets, some of which are much larger than we are. Jaguar vehicles compete primarily against other European brands such as Audi, BMW and Mercedes Benz. Land Rover and Range Rover vehicles compete largely against SUVs manufactured by Audi, BMW, Infiniti, Lexus, Mercedes Benz, Porsche and Volkswagen. The Land Rover Defender competes with vehicles manufactured by Isuzu, Nissan and Toyota.

Jaguar Land Rover Seasonality:

Jaguar Land Rover sales volume is impacted by the bi-annual registration of vehicles in the United Kingdom where the vehicle registration number changes every six months, which in turn has an impact on the resale value of the vehicles. This leads to a concentration of sales during the periods when the change occurs. Seasonality in most other markets is driven by introduction of new model year derivatives, for example in the US market. Additionally in the US market there is some seasonality around the purchase of vehicles in northern states where the purchase of Jaguar vehicles is concentrated in the spring /summer months, and the purchase of 4x4 vehicles is concentrated in the autumn/winter months. In China there is an increase in vehicle purchases during the fourth Fiscal quarter, which includes the Chinese New Year holiday. Furthermore, western European markets tend to be impacted by summer and winter holidays. The resulting sales profile influences operating results on a quarter to quarter basis.

Research and Development:

Over the years, we have devoted significant resources towards our research and development activities. Our research and development activities focus on product development, environmental technologies and vehicle safety. Our ERC, established in 1966, is one of the few in-house automotive research and development centers in India recognized by the Government of India. ERC is integrated with all of the Tata Motors global automotive product design and development centers in South Korea, Spain, Italy and the United Kingdom. In addition to this, we leverage key competencies through various engineering service suppliers and design teams of our suppliers.

We have a crash test facility for evaluating occupant safety, which includes a vehicle level crash test facility, a sled test facility for simulating the crash environment on subsystems, a pedestrian safety testing facility, a pendulum impact test facility for goods carrier vehicles and other equipment and facilities that aid us in developing products that comply with various safety norms. This facility is also supported with computer-aided engineering infrastructure to simulate tests in a digital environment. We have a hemi-anechoic chamber testing facility for developing vehicles with lower noise and vibration levels and an engine emission and performance development facility that aid us in developing products meeting international standards. We also have an eight poster road load simulator for validation of the structural durability of M&HCVs. Other key facilities include a full vehicle environmental testing facility, heavy duty dynamometers and aggregate endurance test rigs.

Our product design and development centers are equipped with sophisticated hardware, software and other information technology infrastructure, designed to create a digital product development and virtual testing and validation environment, resulting in reduction of product development cycle-time. These centers are growing with increased vehicle development programs in breadth and depth of technology. Rapid prototype development systems, testing cycle simulators, advanced emission test laboratories and styling studios are also a part of our product development infrastructure. We have aligned our end-to-end digital product development objectives and infrastructure, with our business goals and have made significant investments to enhance the capabilities especially in the areas of product development through computer-aided design, computer-aided manufacturing, computer-aided engineering, knowledge-based engineering, PLM and specific engineering review processes like digital mockup. In order to track various issues arising in vehicle design and development processes, we have institutionalized issue tracking work flow based systems in various domains to manage such issues effectively.

In addition, our research and development activities focus on developing vehicles running on alternative fuels, including CNG, liquefied petroleum gas, bio-diesel and compressed air and electric cars. We are continuing to develop green-technology vehicles and are presently developing an electric vehicle on the Indica Vista platform. We are also pursuing alternative fuel options such as ethanol blending for development of vehicles fueled by hydrogen.

Table of Contents

We are also pursuing various initiatives, such as the introduction of premium lightweight architecture, to enable our business to comply with the existing and evolving emissions legislation in the developed world, which we believe will be a key enabler of both reduction in CO₂ and further efficiencies in manufacturing and engineering.

Initiatives in the area of vehicle electronics such as engine management systems, in-vehicle network architecture and multiplexed wiring, electronic stability programs, automated and automatic transmission systems, telematics for communication and tracking and other emerging technological areas are also being pursued, which could possibly be deployed on our future range of vehicles. Likewise, various new technologies and systems that would improve safety, performance and emissions of our product range are being implemented in our passenger cars and commercial vehicles.

We are developing an enterprise level vehicle diagnostics system for achieving faster diagnostics of complex electronics in our vehicles in order to provide prompt service to customers. Furthermore, our initiative in telematics has spanned into a fleet management, driver information and navigation system, as well as a vehicle tracking system using Global Navigation Satellite Systems, or GNSS.

We established a wholly-owned subsidiary, TMETC, in 2006, to augment the abilities of our ERC with an objective to obtain access to leading technologies to support our product development activities. In October 2010, we also acquired a design house in Italy, Trilix Srl, that has been working with us on many of our projects and which is now a part of the Tata Motors design organization.

Our Jaguar Land Rover research and development operations currently consist of a single engineering team, operating within co-managed engineering facilities, sharing premium technologies, power train designs and vehicle architecture. In our Jaguar Land Rover products, we are pursuing several initiatives including alternative energy technologies to meet the targeted reduction in CO₂ emissions in the next 5 years. Over recent years, Jaguar Land Rover has made significant progress in reducing the development cycle times. The ERC in India and Jaguar Land Rover engineering and development operations in the United Kingdom, have identified areas to leverage the facilities and resources to enhance the product development process and achieve economies of scale.

We endeavor to absorb the best of technologies for our product range to meet the requirements of a globally competitive market. All of our vehicles and engines are compliant with the prevalent regulatory norms in the respective countries in which they are sold. Our strategy to invest and develop our development capabilities have helped us in attaining significant achievements such as the design and development of India's first indigenously developed compact car, the segment creating mini-truck the Tata Ace and the world's most affordable family car the Tata Nano. In collaboration with our subsidiary TDCV, we developed the World Truck, now referred to as Prima, a sophisticated and contemporary M&HCV range with performance standards similar to those in developed markets, which we launched in India and in South Korea during Fiscal 2010. In Fiscal 2011, we launched the Tata Aria, India's first premium crossover and the Tata Venture, a multipurpose van in India. In Fiscal 2013, we launched the Indigo Manza Club Class, the Vista D90, and the Safari Storme in the passenger cars segment and launched the Xenon Pickup, the Tata LPT 3723, and the Prima tipper and tractor variants in the commercial vehicle segment.

Intellectual Property

We create, own, and maintain a wide array of intellectual property assets throughout the world that are among our most valuable assets. Our intellectual property assets include patents, trademarks, copyrights designs, trade secrets and other intellectual property rights. Patents relate to our innovations and products; trademarks secured relate to our brands and products; copyrights are secured for creative content; and designs are secured for aesthetic features of products/components. We proactively and aggressively seek to protect our intellectual property in India and other countries.

We own a number of patents and have applied for new patents which are pending for grant in India as well as in other countries. We have also filed a number of patent applications outside India under the Patent Cooperation Treaty, which we expect will be effective in other countries going forward. We also obtain new patents as part of our ongoing research and development activities.

We own registrations for a number of trademarks and have pending applications for registration of these in India as well as other countries. The registrations mainly include trademarks for our vehicle models and other promotional initiatives. We use the Tata brand, which has been licensed to us by Tata Sons. We believe that establishment of the Tata word mark and logo mark in India and around the world is material to our operations. As part of our acquisition of TDCV, we have rights to the perpetual and exclusive use of the Daewoo brand and trademarks in South Korea and overseas markets for the product range of TDCV.

Table of Contents

As part of the acquisition of Jaguar Land Rover business, ownership (or co-ownership, as applicable) of core intellectual property associated with Jaguar Land Rover was transferred to us. Additionally, perpetual royalty free licenses to use other essential intellectual property have been granted to us for use in Jaguar and Land Rover vehicles. Jaguar and Land Rover own registered designs, to protect the design of their vehicles in several countries.

In varying degrees, all our intellectual property is important to us. In particular, the Tata brand is integral to the conduct of our business, a loss of which could lead to dilution of our brand image and have a material adverse effect on our business.

License(s)

On February 22, 2013, RBI released the final guidelines on granting new banking licenses in line with the Indian government's aim to allow more companies to participate in the banking sector. On July 1, 2013, Tata Group applied to the RBI for a banking license. Tata Group, and in turn, the Company, may be required to reorganize the holding structure of its finance business in order to meet the eligibility requirements for obtaining a banking license, including by way of a divestment by the Company of its interest in TMFL. Any such reorganization or divestment of its financing business could have a material adverse effect on the Company's financial condition and results of operations. As of the date of this annual report, RBI's review of Tata Group's application remains ongoing.

Components and Raw Materials

The principal materials and components required by us for use in Tata and other brand vehicles are steel sheets (for in-house stampings) and plates; iron and steel castings and forgings; items such as alloy wheels, tires, fuel injection systems, batteries, electrical wiring systems, electronic information systems and displays; interior systems such as seats, cockpits, doors, plastic finishers and plastic functional parts, glass and consumables (paints, oils, thinner, welding consumables, chemicals, adhesives and sealants) and fuels. We also require aggregates like axles, engines, gear boxes and cabs for our vehicles, which are manufactured in-house or by our subsidiaries, affiliates and strategic suppliers. We have long term purchase agreements for some critical components such as transmissions and engines. We have established contracts with some commodity suppliers to cover our own as well as our suppliers' requirements in order to moderate the effect of volatility in commodity prices. We have also undertaken special initiatives to reduce material consumption through value engineering and value analysis techniques.

As part of our strategy to become a low-cost vehicle manufacturer, we have undertaken various initiatives to reduce our fixed and variable costs. In India we started an e-sourcing initiative in 2002, pursuant to which we procure some supplies through reverse auctions. We also use external agencies as third party logistic providers. This has resulted in space and cost savings. Our initiatives to leverage information technology in supply chain activities have resulted in improved efficiency through real time information exchange and processing with our suppliers.

We have an established supplier quality improvement process in order to ensure quality of outsourced components. We also have a program for assisting vendors from whom we purchase raw materials or components to maintain quality. Each vendor is reviewed on a quarterly basis on parameters of quality, cost and delivery. Preference is given to vendors with TS 16949 certification. We also maintain a stringent quality assurance program that includes random testing of production samples, frequent re-calibration of production equipment and analysis of post-production vehicle performance, as well as an ongoing dialogue with workers to reduce production defects. Further, we have established a Strategic Sourcing Group to consolidate, strategize and monitor our supply chain activities with respect to major items of purchase as well as major inputs on new technology and services. The Strategic Sourcing Group is responsible for recommending the long-term strategy, purchase decisions, and negotiations and relationships with vendors with regard to these items. In addition, the Strategic Sourcing Group is responsible for formulating and overseeing our purchasing policies and norms, evolving guidelines for vendor quality improvement, vendor rating and performance monitoring and undertaking company-wide initiatives such as e-sourcing and supply chain management/policies with respect to vehicle spare parts.

Table of Contents

We are also exploring opportunities for increasing the global sourcing of parts and components from low cost countries, and have in place a vendor management program that includes vendor base rationalization, vendor quality improvement and vendor satisfaction surveys. We have begun to include our supply chain in our initiatives on social accountability and environment management activities, including supply chain carbon footprint measurement and knowledge sharing on various environmental aspects.

The principal materials and components required by us for use in our Jaguar and Land Rover vehicles are steel and aluminum sheets (for in-house stamping) or externally pre-stamped form, aluminum castings and extrusions, iron and steel castings and forgings and items such as alloy wheels, tires, fuel injection systems, batteries, electrical wiring systems, electronic information systems and displays, leather trimmed interior systems such as seats, cockpits, doors, plastic finishers and plastic functional parts, glass and consumables (paints, oils, thinner, welding consumables, chemicals, adhesives and sealants) and fuels. We also require certain critical components such as axles, engines and gear boxes for our vehicles, which are mainly manufactured by external suppliers. We have long term purchase agreements for critical components with key suppliers. The raw materials used in our cars include steel, aluminum, copper, platinum and other commodities. We have entered into contracts with certain commodity suppliers to cover our own and our suppliers' requirements to mitigate the effect of volatility in commodity prices. Special initiatives were also undertaken to reduce material consumption through value engineering and value analysis techniques.

The Jaguar Land Rover business works with a range of strategic suppliers to meet its requirements for parts and components. The Jaguar Land Rover business has established quality control programs to ensure that externally purchased raw materials and components are monitored and meet its quality standards. Such programs include on-site engineers from Jaguar Land Rover who regularly interface with suppliers and carry out visits to supplier sites to ensure that they adhere to applicable quality standards. On-site engineers are also supported by persons in other functions, such as program engineers who interface with new model teams as well as resident engineers co-located at Jaguar Land Rover plants, who provide the link between the on-site engineers and the Jaguar Land Rover plants.

Table of Contents

Suppliers

We have an extensive supply chain for procuring various components. We also outsource many manufacturing processes and activities to various suppliers. In such cases, we provide training to external suppliers who design and manufacture the required tools and fixtures.

Our associate company Tata AutoComp Systems Ltd., or TACO, manufactures automotive components and encourages the entry of internationally acclaimed automotive component manufacturers into India by setting up joint ventures with them. Some of these joint ventures includes : Tata Toyo Radiators Ltd for radiator assemblies, which supply components for our products in India.

Our other suppliers include some of the large Indian automotive supplier groups with multiple product offerings, such as the Anand Group, the Sona Group, and the TVS Group, as well as large multinational suppliers, such as Bosch, Continental, Delphi and Denso, Tata Johnson Controls Limited for seats, Tata Yazaki AutoComp Limited for wiring harnesses. We continue to work with our suppliers for our Jaguar Land Rover business to optimize procurements and enhance our supplier base, including the sourcing of certain of our raw material and component requirements from low cost countries. Additionally co-development of a few aggregates is also being evaluated which we believe may lead to the development of a low cost supplier base for Jaguar Land Rover.

In India, we have established vendor parks in the vicinity of our manufacturing operations and vendor clusters have been formed at our facilities at Pantnagar (Uttarakhand) and Sanand (Gujarat). This initiative is aimed at ensuring flow of component supplies on a real-time basis, thereby reducing logistics and inventory costs as well as reducing uncertainties in the long distance supply chain. Efforts are being taken to replicate the model at new upcoming locations as well as a few existing plant locations.

As part of our pursuit of continued improvement in procurement, we have integrated our system for electronic interchange of data with our suppliers with the Enterprise Resource Planning. This has facilitated real time information exchange and processing, which enables us to manage our supply chain more effectively.

We have established processes to encourage improvements via knowledge sharing among our vendors through an initiative called Vendor Council consisting of our senior executives and representatives of major suppliers. The Vendor Council also helps in addressing common concerns through joint deliberations. The Vendor Council works on four critical aspects of engagement between us and the suppliers (i.e., quality, efficiency, relationship and new technology development).

We import some components that are either not available in the domestic market or when equivalent domestically-available components do not meet our quality standards. We also import products to take advantage of lower prices in foreign markets, such as special steels, wheel rims and power steering assemblies.

Ford has been and continues to be a major supplier of parts and services to Jaguar Land Rover. In connection with our acquisition of Jaguar Land Rover in June 2008, supply agreements have been entered into with Ford, ranging in duration from seven to nine years, as further set out below:

Long term agreements have been entered with Ford for technology sharing and joint development providing technical support across a range of technologies focused mainly around power train engineering such that we may continue to operate according to our existing business plan. Supply agreements, ranging for duration of seven to nine years, were entered into with Ford for (i) the long term supply of engines developed by Ford, (ii) engines developed by us but manufactured by Ford and (iii) engines from Ford-PSA co-operation.

Based on learning from the global financial crisis and its cascading effect on the financial health of our suppliers, we have commenced efforts to assess supplier financial risk.

Suppliers are appraised based on or long term requirements through a number of platforms such as Vendor Council meetings, council regional chapter meetings, national vendor meets and location-specific vendor meets.

Capital and Product Development Expenditures

Our capital expenditure totaled Rs.210,956 million, Rs.147,164 million and Rs.90,719 million during Fiscal 2013, 2012 and 2011, respectively. Our capital expenditure during the past Fiscal years related primarily to new product development and capacity expansion for new and existing products to meet market demand as well as investments towards improving quality, reliability and productivity that are each aimed at increasing operational efficiency.

Table of Contents

We intend to continue to invest in our business units in general, and in research and product development in particular, over the next several years in order to improve our existing product range, develop new products and platforms and to build and expand our portfolio in the passenger vehicle and commercial vehicle categories. We believe this would strengthen our position in the Indian automotive market and help us to grow our market share internationally.

As part of this future growth strategy, we plan to make investments in product development, capital expenditure in capacity enhancement, plant renewal and modernization and to pursue other growth opportunities. Our subsidiaries also have their individual growth plans and related capital expenditure plans. These expenditures are expected to be funded largely through cash generated from operations, existing investible surplus in the form of cash and cash equivalents, investment securities and other external financing sources.

Other Operations

In addition to our automotive operations, we are also involved in other business activities, including information technology services. Net revenues, before inter-segment elimination, from these activities totaled Rs.22,179 million, Rs.18,905 million and Rs.14,916 million in Fiscal 2013, 2012 and 2011, respectively, representing nearly 1.2%, 1.1% and 1.2% of our total revenues before inter-segment elimination in the corresponding Fiscal periods.

Information Technology Services:

As of March 31, 2013, we owned a 72.32% equity interest in our subsidiary, TTL. TTL, founded in 1994 and a part of Tata Group, is a global leader in Engineering Services Outsourcing, and product development IT services solutions for PLM and Enterprise Resource Management, or ERM, to the world's leading automotive, aerospace and consumer durables manufacturers and their suppliers. The Company's services include product design, analysis and production engineering, knowledge-based engineering, PLM, ERM and CRM systems. The Company also distributes, implements and supports PLM products from leading solution providers in the world such as Dassault Systems and Autodesk.

TTL has its international headquarters in Singapore, with regional headquarters in the United States (Novi, Michigan), India (Pune) and the United Kingdom (Coventry). TTL has a combined global workforce of around 6,000 professionals serving clients worldwide from facilities in the North America, Europe and Asia-Pacific regions. TTL responds to customers' needs through its subsidiary companies and through its three offshore development centers. TTL had eight functional subsidiary companies and one joint venture as of March 31, 2013.

The consolidated revenues of TTL for Fiscal 2013 were Rs.20,324 million (including sales to Tata Motors Group) reflecting a growth of 24.8% against Rs.16,291 million in the previous with traction in the automotive and aerospace markets. TTL recorded profit after tax of Rs.3,008 million in Fiscal 2013, reflecting growth of 42.8% over Rs.2,107 million in Fiscal 2012 resulting from higher offshore revenues and cost reduction measures implemented by TTL.

Table of Contents

Government Regulations

Indian Automotive Sector

Automotive Mission Plan, 2006-2016

The automotive mission plan, or Plan 2006, promulgated by the Ministry of Heavy Industries and Public Enterprises of the Government of India in December 2006, consists of recommendations to the task force of the Development Council on Automobile and Allied Industries constituted by the Government of India, in relation to the preparation of the mission plan for the Indian automotive industry. Plan 2006 recommends that a negative list of items, such as no duty concession for import of used or re-manufactured vehicles, or treatment of remanufactured automotive products as old products, should be negotiated for free trade agreements or regional trade agreements, on a case-by-case basis with other countries. It recommends the adoption of appropriate tariff policies to attract more investment into the automobile industry, the improvement of power infrastructure to facilitate faster growth of the automotive sector both domestically and internationally, policy initiatives such as encouragement of collaboration between the automotive industry and research and academic institutions, tax concessions and incentives to enhance competitiveness in manufacturing and promotion of research and technology development. For the promotion of exports in the automotive components sector, among other things, it recommends the creation of special automotive component parks in special economic zones and the creation of virtual special economic zones, which would enjoy certain exemptions on sales tax, excise and customs duty. Strengthening the inspection and certification system by encouraging public-private partnerships and rationalization of the motor vehicles regulations, are also among the major recommendations of the plan.

A committee set up under the chairmanship of the Secretary of the Ministry of Heavy Industries and Public Enterprises consisting of all stakeholders including representatives of the Ministry of Finance, and of other interested parties relating to road transport, the environment, commerce, industrial policy and promotion, labor, shipping, railways, human resource development, science and technology, new and renewable energy, petroleum and natural gas and the automotive industry, will monitor the implementation and progress of Plan 2006.

Plan 2006 is being reviewed by Ministry of Heavy Industries and Public Enterprises of the Government of India.

The Auto Policy, 2002

The Auto Policy was introduced by the Department of Heavy Industry, Ministry of Heavy Industries and Public Enterprises of the Government of India in March 2002, with the aims, among others, of promoting a globally competitive automotive industry that would emerge as a global source for automotive components, establishing an international hub for manufacturing small, affordable passenger cars, ensuring a balanced transition to open trade at a minimal risk to the Indian economy and local industry, encouraging modernization of the industry and facilitating indigenous design, research and development, as well as developing domestic safety and environment standards on par with international standards.

Auto Fuel Policy, 2003

In 1992, the Government of India issued emission and safety standards, which were further tightened in April 1996, under the Indian Motor Vehicle Act. Currently Bharat Stage IV norms (equivalent to Euro IV norms) are in force for four wheelers in 13 cities and Bharat Stage III norms (equivalent to Euro III norms) are in effect in the rest of India. Our vehicles comply with these norms. The next change in emission regulations remains to be discussed by Government of India.

The Ministry of Road Transport and Highways of Government of India has set up a new task force to review the Auto Fuel policy.

Central Motors Vehicles Rules, 1989

Chapter V of the Central Motor Vehicle Rules, 1989, or the CMV rules, lays down provisions relating to construction and maintenance of motor vehicles. Among specifications pertaining to dimensions, gears, indicators, reflectors, lights, horns, safety belts and others. The CMV rules govern emission standards for vehicles operating on compressed natural gas or CNG, gasoline, liquefied petroleum gas and diesel.

Additionally, pursuant to the CMV rules, every manufacturer must also submit the prototype of every vehicle to be manufactured by it for testing by the Vehicle Research and Development Establishment of the Ministry of Defence of the Government of India, or Automotive Research Association of India, Pune, or the Central Machinery Testing and Training Institute, Budni (MP), or the Indian Institute of Petroleum, Dehradun, or the Central Institute of Road Transport, Pune, or the International Center for Automotive Technology, Manesar or such other agencies as may be specified by the central government for granting a certificate by that agency as to the compliance of provisions of the Motor

Vehicles Act, 1988 and these rules.

Table of Contents

In case of CNG fitments by vehicle manufacturers on new gasoline vehicles, each model manufactured must be of a type approved pursuant to the prevailing mass emission norms as applicable for the category of new vehicle in respect of the place of its use.

The CMV Rules also require the manufacturers to comply with notifications in the Official Gazette, issued by central government to use such parts, components or assemblies in manufacture of such vehicle, of such standards as may be specified or the relevant standards as specified by the Bureau of Indian Standards.

Emission and Safety in India

In 1992, the Government of India issued emission and safety standards, which were further tightened in April 1996 under the Indian Motor Vehicle Act.

We are also working towards meeting all applicable regulations which we believe are likely to come into effect in various markets in the near future. Our vehicle exports to Europe comply with Euro V norms, and we believe our vehicles also comply with the various safety regulations in effect in the other international markets where we operate.

The Indian automobile industry is progressively harmonizing its safety regulations with international standards in order to facilitate sustained growth of the Indian automobile industry as well as to encourage export of automobiles from India.

India has been a signatory to the 1998 UNECE Agreement on Global Technical Regulations since April 22, 2006 and has voted in favor of all eleven Global Technical Regulations. We work closely with the Government of India to participate in WP 29 World Forum Harmonization activities.

India has a well-established regulatory framework administered by the Indian Ministry of Road Transport and Highways. The Ministry issues notifications under the CMV Rules and the Motor Vehicles Act. Vehicles manufactured in India must comply with applicable Indian standards and automotive industry standards. In January 2002, the Indian Ministry of Road Transport and Highways has finalized plans on implementing on automobile safety standards. The plans are based on traffic conditions, traffic density, driving habits and road user behavior in India and is generally aimed at increasing safety requirements for vehicles under consideration for Indian markets.

The Essential Commodities Act, 1955

The Essential Commodities Act, 1955, as amended by the Essential Commodities (Amendment and Validation) Act, 2009, or the Essential Commodities Act, authorizes the Government of India, if it finds it necessary or expedient to do so, to provide for regulating or prohibiting the production, supply, distribution, trade and commerce in the specified commodities under the Essential Commodities Act, in order to maintain or increase supplies of any essential commodity or to secure their equitable distribution and availability at fair prices, or to secure any essential commodity for the defense of India or the efficient conduct of military operations. The definition of essential commodity under the Essential Commodities Act includes component parts and accessories of automobiles .

Environmental Regulations

Manufacturing units or plants must ensure compliance with environmental legislation, such as the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Environment Protection Act, 1986 and the Hazardous Wastes (Management and Handling) Rules, 1989. The basic purpose of these statutes is to control, abate and prevent pollution. In order to achieve these objectives, Pollution Control Boards, or PCBs, which are vested with diverse powers to deal with water and air pollution, have been set up in each state. The PCBs are responsible for setting the standards for maintenance of clean air and water, directing the installation of pollution control devices in industries and undertaking inspection to ensure that units or plants are functioning in compliance with the standards prescribed. These authorities also have the power of search, seizure and investigation.

Our manufacturing plants have received or are in the process of obtaining the Government of India's environmental clearances required for our operations. We are fully committed to our role as a responsible corporate citizen with respect to reducing environmental pollution. We treat effluents at our plants and have made significant investments towards lowering the emissions from our products.

Table of Contents

In addition, the Ministry of Environment and Forests conducts environment impact assessments. The Ministry receives proposals for expansion, modernization and establishment of projects and the impact of such projects on the environment are assessed by the Ministry, before it grants clearances for the proposed projects.

Regulation of Imports and Exports

Quantitative restrictions on imports into India were removed with effect from April 1, 2001, pursuant to India's World Trade Organization obligations, and imports of capital goods and automotive components were placed under the open general license category.

Automobiles and automotive components may, generally, be imported into India without a license from the Government of India subject to their meeting Indian standards and regulations, as specified by designated testing agencies. As a general matter, cars, UVs and SUVs in completely built up, or CBU, condition may be imported at 60% basic customs duty. However, cars with CIF value more than US\$40,000 or with engine capacity more than 3000 cc for diesel variant and 2500 cc for petrol variant, may be imported at 100% basic customs duty. Commercial vehicles may be imported at basic customs duty of 10% and components may be imported at basic customs duty ranging from at 10% to 7.5% (for engine component).

The FDI Policy

Automatic approval for foreign equity investments up to 100% is allowed in the automobile manufacturing sector under the FDI Policy.

Indian Taxes

See Item 10.E Taxation for additional information relating to our taxation.

Excise Duty:

The Government of India imposes excise duty on cars and other motor vehicles and their chassis, which rates vary from time to time and across vehicle categories reflecting the policies of the Government of India. The chart below sets forth a summary of historical changes and the current rates of excise duty.

Change of Tax Rate	Excise Duty (per vehicle or chassis)						
	Small cars*	Cars other than small cars**	Motor vehicles for more than 13 persons	Chassis fitted with engines for vehicles of more than 13 persons	Trucks	Chassis with engines fitted for trucks	Safari, SUVs and UVs
March 2008		22% or 22% + Rs. 15,000*		12% + Rs. 10,000	14%	14% + Rs. 10,000	20% + Rs. 20,000
December 2008	12%		12%	8% + Rs.		10%+ Rs.	
March 2009	8%	-	8%	10,000	10%	10,000 8% + Rs.	-
July 2009	-	-	-	-	8%	10,000	- 20% + Rs.
February 2010	10%	-	10%	10% + Rs.	10%	10% + Rs.	15,000 22% + Rs.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

				10,000		10,000	15,000
March 2012		24% or					
	12%	27%*	12%	15%	12%	15%	27%
May 2012	-	-	-	-	-	14%	-
March 2013	-	-	-	-	-	13%	27% or 30%

* Small cars - cars with length not exceeding 4,000mm and an engine capacity not exceeding 1,500cc for cars with diesel engines and not exceeding 1,200cc for cars with gasoline engines. The higher rate is applicable if engine capacity exceeds 1,500cc.

** Cars other than small cars - motor vehicles for transport of more than 13 persons, trucks, jeeps, SUVs and UVs and chassis fitted with such engines.

(-) indicates no change during the relevant year.

Table of Contents

All vehicles / chassis are subjected to Automobile Cess assessed at 0.125%, Education Cess assessed at 2% and Secondary and Higher Education Cess assessed at 1% in addition to the excise duty indicated above. Certain vehicles are also subject to National Calamity Contingent Duty, or NCCD, assessed at 1%.

Valued Added Tax:

The Value Added Tax, or VAT, has been implemented throughout India. VAT enables set-off from sales tax paid on inputs by traders and manufacturers against the sales tax collected by them on behalf of the Government of India, thereby eliminating the cascading effect of taxation. Two main brackets of 5% and 12.5%, along with special brackets of 0%, 1%, 3%, 4%, 13.5%, 14%, 14.5%, 15%, 20% and 23% have been announced for various categories of goods and commodities sold in the country and certain states have also introduced additional VAT of 1% to 3% on specified commodities, including automobiles. In some of the states, surcharge of 5% to 10% on VAT has been introduced on automobiles. Since its implementation, VAT has had a positive impact on us. Prior to the implementation of VAT, a major portion of sales tax paid on purchases formed part of our total cost of materials. However, the implementation of VAT has resulted in savings on the sales tax component, as VAT paid on inputs may generally be set-off against tax paid on outputs.

In addition to VAT, a Central Sales Tax, however, continues to exist, although it is proposed to be abolished in a phased manner. In the Indian Union Budget 2008-09, the Central Sales Tax rate was reduced to 2% which remained unchanged for Fiscal 2013.

Goods and Services Tax:

The Government of India is proposing to reform the indirect tax system in India with a comprehensive national goods and services tax, or GST, covering the manufacture, sale and consumption of goods and services. The date of introduction of GST is not yet known. The proposed GST regime will combine taxes and levies by the central and state governments into one unified rate structure. The Government of India has publicly expressed the view that following the implementation of the GST, indirect tax on domestically manufactured goods is expected to decrease along with prices on such goods.

We have benefitted and continue to benefit from excise duty exemptions for manufacturing facilities in the state of Uttarakhand and other incentives such as subsidies or loans from other states where we have manufacturing operations. While both the Government of India and other state governments of India have publicly announced that all committed incentives will be protected following the implementation of the GST. Given the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to the effect of this or any other aspect of the tax regime following implementation of the GST.

Direct Tax Code:

The Direct Tax Code Bill 2010, or DTC, proposes to replace the existing Income Tax Act, 1961 and other direct tax laws, with a view to simplify and rationalize the tax provisions into one unified code. The various proposals included in DTC bill are subject to review by Indian parliament and as such impact if any, is not quantifiable at this stage.

Insurance Coverage:

The Indian insurance industry is predominantly state-owned and insurance tariffs are regulated by the Indian Insurance Regulatory and Development Authority. We have insurance coverage which we consider reasonably sufficient to cover all normal risks associated with our operations (including business interruptions) and which we believe are in accordance with industry standards in India. We have obtained coverage for product liability for some of our vehicle models in several countries to which we export vehicles. TDCV has insurance coverage as is required and applicable to cover all normal risks in accordance with industry standards in South Korea, including product liability. We have also taken insurance coverage on Directors and Officers liability to minimize risks associated with international litigations for us and our subsidiaries.

Jaguar Land Rover has global insurance coverage which we consider to be reasonably sufficient to cover normal risks associated with our operations and insurance risks (including property, business interruption, marine and product/general liability) and which we believe is in accordance with commercial industry standards and statutory requirements.

Economic Stimulus Package and Incentives:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In January 2009, the Government of India announced an economic stimulus package targeting the automotive industry. Public sector banks were encouraged to fund the automotive sector along with providing a line of credit to non-bank financial companies, specifically aimed at commercial vehicles. The states were to be provided a onetime assistance to purchase 15,000 buses for their urban transport systems.

Table of Contents

There was a 4% cut in the central value added tax rate, or Cenvat, on cars and trucks and a 2% cut in Cenvat rate on motor vehicles for transport of more than 13 persons, including the driver. Further, in February 2009, the Cenvat rate was reduced from 10% to 8% for Trucks and buses and service tax was also reduced from 12% to 10%. The Government of India has also provided for an accelerated tax depreciation of 50% for commercial vehicles purchased between January 1 and September 30, 2009. The Cenvat rate was restored to 10% since April 1, 2010 and was further revised to 12% with effect from March 16, 2012. Cenvat for chassis which was increased from 12% to 14% in the budget for the fiscal year 2012-2013, has since been revised to 13% in the budget for the fiscal year 2013-2014.

In the United Kingdom, interest rates have been maintained at an historic low of 0.5% since March 2009, interest rates have been kept at this level in order to provide stimulus to the economy. The European Central Bank increased its base rate to 1.25% in April 2011, following no changes for just under two years, in response to the risk of accelerating inflation. Within Europe there is still concern regarding the sovereign debt issues within Greece, Ireland, Portugal, Spain and Italy. Continued high unemployment in the US has led to the use of fiscal stimuli, quantitative easing and lower interest rates despite positive GDP outlook, which could lead to higher inflation.

In June 2010, the Chinese government announced a subsidy program of RMB3,000 for each energy-conserving passenger vehicle with an engine capacity of 1.6 liters or less. The Government of China also provided a subsidy for private purchases of new energy vehicles (hybrid electric vehicle up to RMB 50,000 and battery electric vehicle up to RMB 60,000) along with additional subsidy from local government. Furthermore, a ten-year Development Plan for the Energy-Saving and New Energy Vehicle Industry was approved and will be the blueprint for China automotive industry development until 2020.

For emission reduction and environmental protection, China plans to adopt Fuel Consumption Stage III with stringent fuel economy requirements soon. It requires automakers to invest in and accelerate development of smaller and more fuel efficient vehicles for the Chinese automotive market.

The Government of India has launched a National Electric Mobility Mission plan 2020, or NEMMP, to encourage reliable, affordable and efficient Electric Vehicles that meet consumer performance and price expectations. Through collaboration between the government and industry for promotion and development of indigenous manufacturing capabilities, required infrastructure, consumer awareness and technology, the NEMMP aims to help India to emerge as a leader in the Electric Vehicle market in the world by 2020 and contribute towards National Fuel security.

The Government of India's plan to encourage India's transition to hybrid / electric mobility consists of the following initiatives:

- a) **Demand Side:** Mandate use of electric vehicles in areas such as public transportation and government fleets in order to create initial demand for OEMs and provide incentives for the sales of electric vehicles to consumers.
- b) **Supply Side:** Link incentives to localization of the production of key components of electric vehicle in a phased manner.
- c) **Research & Development:** Fund research and development, or R&D, programs along with OEMs / component suppliers to develop optimal solutions for India at low cost.
- d) **Infrastructure support:** Roll out pilot programs to support hybrid/electric vehicles and test their effectiveness and make modest investments to build public charging infrastructure to support electric vehicles (especially for buses).

Environmental, Fiscal and Other Governmental regulations around the world:

Our Jaguar Land Rover business has significant operations in the United States and Europe, which have stringent regulations relating to vehicular emissions. The proposed tightening of vehicle emissions regulations by the European Union will require significant costs of compliance for Jaguar Land Rover. While we are pursuing various technologies in order to meet the required standards in the various countries in which we operate, the costs of compliance with these required standards can be significant to our operations and may adversely impact our results of operations.

Greenhouse gas / CO₂ / fuel economy legislation: Legislation is now in place limiting the manufacturer fleet average greenhouse gas emissions in Europe for passenger cars starting January 2012. Similarly, the U.S. federal government imposes greenhouse gas emissions standards that apply to 2012-2016 model year vehicles. In addition, many other markets either have or will shortly define similar greenhouse gas emissions standards (some of these include Canada, China, Japan, Korea, Switzerland, Australia, and South Africa). In Europe, implementation of LCV CO₂ standards would impact the Defender and a small number of Freelander and Discovery vehicles. In India, fuel efficiency labeling legislation is being finalized by the Ministry of Road Transport and Highways and the Bureau of Energy Efficiency, under the Ministry of Power. This matter is also being discussed under the Auto Policy committee in order to create a framework for implementation in 2025.

Table of Contents

In Europe, monetary fines are imposed as penalties for non-compliance with emissions standards. In the United States, noncompliance results in monetary fines and can result in market exclusion.

California is currently developing a new zero emissions vehicle regulation mandating increased penetration of electric and plug in hybrid electric vehicles from 2018 Model Year above that are more stringent than the requirements of the U.S. federal greenhouse gas standards.

Jaguar Land Rover undertakes technology deployment plans directed to achieving these standards. These plans include the use of lightweight materials, including aluminum, which will contribute to the manufacture of lighter vehicles with improved fuel-efficiency, reducing parasitic losses through the driveline and improvements in aerodynamics. They also include the development and installation of smaller engines in our existing vehicles and other drive train efficiency improvements, including the introduction of eight-speed transmissions in some of our vehicles. We also plan to introduce smaller vehicles, commencing with the introduction of the Range Rover Evoque, the most fuel-efficient vehicle in the Land Rover line-up. The technology deployment plans include the research, development and deployment of hybrid electric vehicles initially in Europe and the United States, which require significant investment. Additionally, local excise tax initiatives are also a key consideration in ensuring our products meet customer needs for environmental footprint and cost of ownership concerns.

Non-greenhouse gas emissions legislation: Existing European Union 5, or EU5 regulations and planned EU6 and EU7 regulations in Europe, and existing Low Emission Vehicle 2, or LEV2 regulations and planned LEV3 regulations in California, place ever stricter limits on particulate emissions, oxides of nitrogen and hydrocarbons for passenger and light duty trucks. These regulations require ever increasing levels of technology in engine control systems, on-board diagnostics and after treatment systems that increase the base costs of our power trains. The stringency of such evaporative emissions regulations also require more advanced materials and joints solutions to eliminate fuel evaporative losses, all for much longer warranted periods (up to 150,000 miles in the United States). While Europe and California lead the implementation of these emissions programs, other nations and states tend to follow with adoption of these regulations within a short period thereafter.

To comply with the current and future environmental laws, rules, regulations and standards, we may have to incur substantial capital expenditure and research and development expenditure, to upgrade products and manufacturing facilities, which would have an impact on our cost of production and results of operation.

Imposition of any additional taxes and levies by the Government of India designed to limit the use of automobiles could adversely affect the demand for our products and our results of operations.

Vehicle safety: Vehicles sold in Europe are subject to vehicle safety regulations established by the European Union or by individual member states. In 2009, the European Union enacted a new regulation to establish a simplified framework for vehicle safety, repealing more than 50 existing directives and replacing them with a single regulation aimed at incorporating relevant United Nations standards. Further new regulations on advanced safety systems are to be introduced. The European Commission plans to require (i) new model cars from 2011 to have electronic stability control systems; (ii) to introduce regulations relating to low-rolling resistance tires in 2013; (iii) to require tire pressure monitoring systems starting in 2012; and (iv) to require heavy vehicles to have advanced emergency braking systems and lane departure warning systems from 2013. From April 2009, the criteria for whole vehicle type approval were extended to cover all new road vehicles, to be phased in over five years depending on vehicle category. The extension clarifies the criteria applicable to small commercial vehicles.

In the United States, the National Highway Traffic Safety Administration, or NHTSA, issues federal motor vehicle safety standards covering a wide range of vehicle components and systems such as airbags, seatbelts, brakes, windshields, tires, steering columns, displays, lights, door locks, side impact protection and fuel systems. We are required to test new vehicles and equipment and assure their compliance with these standards before selling them in the United States. We are also required to recall vehicles found to have defects that present an unreasonable risk to safety or which do not conform to the required Federal Motor Vehicle Safety Standards, and to repair them without charge to the owner. The financial cost and impact on consumer confidence of such recalls can be significant depending on the repair required and the number of vehicles affected. We have no pending investigations relating to alleged safety defects or potential compliance issues before the NHTSA.

These standards add to the cost and complexity of designing and producing vehicles and equipment. In recent years the NHTSA has mandated, among other things:

a system for collecting information relating to vehicle performance and customer complaints, and foreign recalls to assist in the early identification of potential vehicle defects as required by the Transportation Recall Enhancement, Accountability, and Documentation Act; and

enhanced requirements for frontal and side impact, including a lateral pole impact.

Table of Contents

Furthermore, the Cameron Gulbransen Kids Transportation Safety Act of 2007, or Kids and Cars Safety Act, passed into law in 2008, and requires the NHTSA to enact regulations related to rearward visibility and brake-to-shift interlock and requires the NHTSA to consider regulating the automatic reversal functions on power windows. The costs to meet these proposed regulatory requirements may be significant.

Vehicle safety regulations in Canada are similar to those in the United States. However, many other countries have vehicle regulatory requirements which differ from those in the United States. The differing requirements among various countries creates complexity and increases costs such that the development of a common product that meets the country regulatory requirements of all countries is not possible. Global Technical Regulations, developed under the auspices of the United Nations, continue to have an increasing impact on automotive safety activities, as indicated by EU legislation. In 2008, Global Technical Regulations on electronic stability control, head restraints and pedestrian protection, were adopted by the UN World Forum for the Harmonization of Vehicle Regulations, and are now in different stages of national implementation. While global harmonization is fundamentally supported by the automobile industry in order to reduce complexity, national implementation may still introduce subtle differences into the system.

At present, India is a signatory of the 1998 UNECE Agreement on Global Technical Regulations, which makes the global technical regulations alternate standards to national regulations. The transition of finalized global technical regulations into national standards remains in progress.

Export Promotion Capital Goods: Since Fiscal 1997, we have benefited from participation in the Export Promotion Capital Goods Scheme, or the EPCG Scheme, which permits us to import capital equipment under a special license at a substantially reduced customs duty. Our participation in this scheme is subject to us fulfilling an obligation to export goods manufactured or produced by the use of capital equipment imported under the EPCG Scheme to the value of a multiple of the cost plus insurance and freight value of these imports or customs duty saved over a period of 6, 8 and 12 years from the date of obtaining the special license. We currently hold 92 licenses which require us to export our products of a value of approximately Rs.71.71 billion between the years 2002 to 2019, and we carefully monitor our progress in meeting our incremental milestones. After fulfilling some of the export obligations as per provisions of Foreign Trade Policy, as on March 31, 2013 we have remaining obligations to export products of a value of approximately Rs.4.66 billion by March 2019. In the event that the export obligation under the EPCG Scheme is not fulfilled, we would have to pay the differential between the reduced and normal duty on the goods imported along with interest. In view of our past record of exceeding our export milestones, and our current plans with respect to our export markets, we do not currently foresee any impediments to meeting our export obligation in the required time frame.

Legal Proceedings

In the normal course of business, we face claims and assertions by various parties. We assess such claims and assertions and monitor the legal environment on an ongoing basis, with the assistance of external legal counsel where appropriate. We record a liability for any claims where a potential loss is probable and capable of being estimated and disclose such matters in our financial statements, if material. For potential losses which are considered reasonably possible, but not probable, we provide disclosure in the financial statements, but do not record a liability in our financial statements unless the loss becomes probable. Should any new developments arise, such as a change in law or rulings against us, we may need to make provisions in our financial statements, which could adversely impact our reported financial condition and results of operations. Furthermore, if significant claims are determined against us and we are required to pay all or a portion of the disputed amounts, there could be a material adverse effect on our business and profitability. Certain claims that are above Rs.200 million in value are described in Note 33 to our consolidated financial statements included in this annual report. Certain claims that are below Rs.200 million in value pertain to indirect taxes, labor and other civil cases. There are other claims against us which pertain to motor accident claims in India (involving vehicles that were damaged in accidents while being transferred from our manufacturing plants to regional sales offices), product liability claims and consumer complaints. Some of these cases relate to replacement of parts of vehicles and/or compensation for deficiency in services provided by us or our dealers.

In June 2011, the newly elected state government of West Bengal, or the West Bengal State Government, enacted legislation to cancel our land lease agreement entered into for the purpose of establishing a manufacturing facility for automobiles at Singur. We subsequently challenged the legal validity of the legislation. In June 2012, the High Court of Calcutta, or the Calcutta High Court, ruled against the validity of the legislation and restored our rights under the land lease agreement. The West Bengal State Government appealed to the Supreme Court of India. Proceedings at the Supreme Court are continuing as of the date of this annual report, and a hearing has been scheduled for August 13, 2013. We expect that the Calcutta High Court's judgment, which we believe to be based on an established position of law, will be upheld.

In South Korea, our union employees had filed a lawsuit to include some elements of non-ordinary salary and bonus as part of ordinary wages. The district court ruled in favor of the union employees on January 2013 and ordered TDCV to pay the employees KRW 17.2 billion and interest, upto the period of lawsuit. We have recorded a provision of Rs.2,124 million (through March 31, 2013) in Fiscal 2013 in respect of this lawsuit. TDCV has filed an appeal against the order.

Table of Contents

We believe that none of the contingencies, would have a material adverse effect on our financial condition, results of operations or cash flows.

C. Organizational Structure.**I. Tata Sons- Promoter and its Promoted Entities**

Tata Sons holds equity interests in a range of businesses. The various companies promoted by Tata Sons, including us, are based substantially in India and had combined revenues of approximately US\$96.79 billion for Fiscal 2013. The operations of Tata Sons promoted entities are highly diversified and can be categorized under seven business sectors, namely, engineering, materials, energy, chemicals, consumer products, services, communications and information systems. These companies do not constitute a group under Indian Law.

Tata Sons promoted entities have its origins in the trading business founded by Mr. Jamsetji Tata in 1874, that was developed and expanded in furtherance of his ideals by his two sons, Sir Dorabji Tata and Sir Ratan Tata, following their father's death in 1904. The family interests subsequently vested largely in the Sir Ratan Tata Trust, the Sir Dorabji Tata Trust and other related trusts. These trusts were established for philanthropic and charitable purposes and together own a substantial majority of the shares of Tata Sons Limited.

By 1970, the operations of Tata Sons promoted entities had expanded to encompass a number of major industrial and commercial enterprises including Indian Hotels Company Limited (1902), Tata Steel Limited, or Tata Steel (1907), which became the sixth largest steel maker in the world after it acquired Corus, Tata Power Company Limited (1910), Tata Chemicals Limited, or Tata chemicals (1939), which is the world's second largest manufacturer of soda ash, and Tata Motors Limited (1945), which is among the top five medium and heavy commercial vehicle manufacturers in the world and which acquired Jaguar Land Rover in 2008. Tata Motors Limited made India's first indigenously developed car, the Indica, in 1998, and introduced the world's lowest-cost car, the Tata Nano in Fiscal 2010. Other Tata entities include Voltas Limited (1954), and Tata Global Beverages Ltd, or Tata Global Chemicals (1962), which is the second largest branded tea company in the world, through its UK-based subsidiary Tetley.

Tata Sons also promoted India's first airline, Tata Airlines, which later became Air India (India's national carrier), as well as India's largest general insurance company, New India Assurance Company Limited, both of which were subsequently taken over by the government as part of the Government of India's nationalization program. Tata Consultancy Services Limited, or TCS, is Asia's leading software services provider and the first Indian software firm to exceed sales of US\$4 billion. TCS has delivery centers in the United States, the United Kingdom, Hungary, Brazil, Uruguay and China, as well as India. In 1999, Tata Sons also invested in several telephone and telecommunication ventures, including acquiring a portion of the Indian Government's equity stake in the state owned Tata Communications Limited which is one of the world's largest wholesale voice carriers. Tata companies are building multinational businesses that will achieve growth through excellence and innovation, while balancing the interests of shareholders, employees and society.

We have for many years been a licensed user of the Tata brand owned by Tata Sons, and thus have both gained from the use of the Tata brand as well as helped to sustain its brand equity. Tata Sons along with the Tata Sons promoted entities instituted a corporate identity program to re-position the brand to compete in a global environment. A substantial ongoing investment and recurring expenditure is planned to develop and promote a strong, well-recognized and common brand equity, which is intended to represent for the consumer a level of quality, service and reliability associated with products and services offered by the Tata Sons promoted entities.

Each of the Tata Sons promoted consenting entities pays a subscription fee to participate in and gain from the Tata brand identity. We believe that we benefit from the association with the Tata brand identity and accordingly, Tata Motors Limited and certain of our subsidiaries have agreed to pay an annual subscription fee to Tata Sons which is equal to 0.15%-0.25% of annual net income (defined as net revenues exclusive of excise duties and other governmental taxes and non-operating income), subject to a ceiling of 5% of annual profit before tax (defined as profit after interest and depreciation but before income tax). In the past, Tata Sons has lowered the subscription fee, considering its requirement of outlay for activities related to brand promotion and protection. In Fiscal 2012 and 2013, Tata Motors Limited on a standalone basis paid an amount less than 0.25% of its annual net income as per Indian GAAP. Pursuant to our licensing agreement with Tata Sons, we have also undertaken certain obligations for the promotion and protection of the new Tata brand identity licensed to us under the agreement. The agreement can be terminated by written agreement between the parties, by Tata Sons upon our breach of the agreement and our failure to remedy the same, or by Tata Sons upon providing six months' notice for reasons to be recorded in writing. The agreement can also be terminated by Tata Sons upon the occurrence of certain specified events, including liquidation.

Table of Contents

The Tata Sons promoted entities have sought to continue to follow the ideals, values and principles of ethics, integrity and fair business practices originally established by the founder of Tata Sons, Mr. Jamsetji Tata, and his successors. To further protect and enhance the Tata brand equity, these values and principles have been articulated in the Tata Code of Conduct, which has been adopted by most of the Tata companies that have access to the larger resources and services of the Tata Sons promoted entities. The Tata Sons promoted entities have also made significant contributions towards national causes through promotion of public institutions in the field of science, such as the Indian Institute of Science and the Tata Institute of Fundamental Research and in the field of social services through the Tata Institute of Social Sciences, the Tata Memorial Hospital and the National Center of the Performing Arts. Tata trusts are among the largest charitable foundations in India.

A large number of the Tata Sons promoted entities hold shares in one another and some of our directors hold directorships on the boards of Tata Sons and/or Tata Sons promoted entities. However, there are no voting agreements, material supply or purchase agreements or any other relationships or agreements that have the effect of tying us together with other Tata Sons promoted entities at management, financial or operational levels. With the exception of Tata Steel, which under our Articles of Association has the right to appoint one director to the Board, Tata Sons and its subsidiaries do not have any special contractual or other power to appoint our directors or management beyond the voting power of their shareholdings in us. Except as set forth in the tables below under the heading *Subsidiaries and Affiliates* and except for approximately a 15.38% equity interest in Tata Services Ltd, a 12.47% equity interest in Tata International Limited, a 9.55% equity interest in Tata Industries Limited and a 6.67% equity interest in Tata Projects Ltd, our shareholdings in other the Tata Sons promoted entities are generally insignificant as a percentage of their respective outstanding shares or in terms of the amount of our investment or the market value of our shares of those companies.

Table of Contents

II Tata Motors Group:

Subsidiaries and Affiliates

The subsidiaries and equity method affiliates of Tata Motors Limited that together with Tata Motors Limited form the Tata Motors Group under Indian Law as of March 31, 2013 are set forth in the chart below:-

With respect to certain subsidiaries and affiliates, where the Company has a joint venture partner, voting on certain items of business may be based on affirmative voting provisions and Board participation clauses in the relevant joint venture agreement(s).

- 1) *Holding of 99.59% in its newly formed subsidiary, PT Tata Motors Distribusi Indonesia, incorporated with effect from February 11, 2013.*

Table of Contents

- 2) *These subsidiaries are based in many countries abroad.*
- 3) *Jaguar Land Rover PLC changed its name to Jaguar Land Rover Automotive PLC with effect from December 28, 2012.*
- 4) *Liquidated its 71.69% holding in its Norway-based subsidiary Miljobil Grenland AS with effect from August 30, 2012.*
- 5) *The holdings in these subsidiaries range from 72.32% to 72.52%.*
- 6) *Holding in Tata Hispano Motors Carrocerries Maghreb subsidiary based in Morocco is 100%.*
- 7) *Holding in its subsidiary, TDCV, is 100%.*
- 8) *A joint venture with Chery Automobile Company Limited incorporated with effect from November 16, 2012.*
- 9) *Is an affiliate of TTL.*
- 10) *Telco Construction Equipment Co. Ltd. changed its name to Tata Hitachi Construction Machinery Company Limited with effect from November 23, 2012. The holdings in these affiliates ranges from 18.14% to 39.99%.*
- 11) *Out of the 9 subsidiaries, 4 are presently in the process of liquidation and out of the 7 affiliates, 2 are currently in the process of liquidation. The holdings in these affiliates range from 15.80% to 31.61%.*

D. Property, Plants and Equipment.

Facilities: We operate six principal automotive manufacturing facilities in India. The first facility was established in 1945 at Jamshedpur in the State of Jharkhand in eastern India. We commenced construction of the second facility in 1966 (with production commencing in 1976) at Pune, in the State of Maharashtra in western India, the third facility in 1985 (with production commencing in 1992) at Lucknow, in the State of Uttar Pradesh in northern India, the fourth at Pantnagar in the State of Uttarakhand, India, which commenced operations in Fiscal 2008, the fifth at Sanand in Gujarat in western India for manufacturing of the Nano, which commenced operations in June 2010, and the sixth plant for manufacturing Tata Marcopolo buses under our joint venture with Marcopolo and LCV s at Dharwad in Karnataka (which buses are also produced at Lucknow). The Jamshedpur, Pune, Sanand, Pantnagar and Lucknow manufacturing facilities have been accredited with ISO/TS 16949:2000(E) certification.

The manufacturing facilities of TDCV are based in Gunsan, South Korea. TDCV has received the ISO/TS 16949 certification, an international quality systems specification given by SGS UK Ltd., an International Automotive Task Force, or IATF, accredited certification body. It is the first South Korean automobile original equipment manufacturer to be awarded an ISO/TS 16949 certification.

Fiat India Automobiles Limited, our joint venture with Fiat Group, has its manufacturing facility located in Ranjangaon, Maharashtra. The plant is used for manufacturing Tata and Fiat branded cars and engines, and transmissions for use by both partners.

Tata Motors (Thailand) Limited is our joint venture with Thonburi, and has a manufacturing facility located in Samutprakarn province, Thailand. The facility is used for the manufacture and assembly of pickup trucks.

Our 100% equity interest in Hispano provides us with access to two manufacturing units, one in Spain and another in Morocco.

Following our acquisition of Jaguar Land Rover, we currently operate three principal automotive manufacturing facilities in the United Kingdom at Solihull, Castle Bromwich, and Halewood and have two product development facilities in the United Kingdom at Gaydon and Whitley. Most of these facilities are owned as freehold estates or are held through long-term leaseholds, generally with nominal rents. A new advanced engine facility is being established at Wolverhampton in the United Kingdom s Midlands area to manufacture low-emission engines.

Jaguar Land Rover and Chery Automobile intend to accelerate plans to build a joint venture manufacturing plant for the Chery Jaguar Land Rover Automotive Co. Limited joint venture in Changshu, near Shanghai, as part of a RMB 10.9 billion investment that will also include a new research and development center and engine production facility. The two companies plan to complete the Changshu facility in Jiangsu province in 2014. Construction of a new engine plant for production of fuel efficient engines is also contemplated under the joint venture agreement.

Jaguar Land Rover s new Engine Manufacturing Centre in the UK is essential to support the Company s long-term strategic growth plans and will be the home for a new generation of technologically advanced, lightweight 4-cylinder low emission diesel and gasoline engines. Reinforcing Jaguar Land Rover s commitment to manufacturing and innovation in the United Kingdom, we will increase its investment in the facility to in excess of GBP 500 million from GBP 355 million. This will almost double the number of highly skilled engineering and manufacturing jobs at the plant, taking the total number of people who will be employed at the site to almost 1,400. The facility is the first in the Jaguar Land Rover s history to be entirely designed and specified by Jaguar Land Rover. With an area of almost 100,000 square meters, the plant will include an engine testing center alongside the manufacturing and assembly halls.

Table of Contents

The facility will endeavor to meet the highest standards of sustainable production and will feature a variety of energy efficiency technologies. The new Engine Manufacturing Centre is expected to open later this year with the first engines expected to be produced in 2015.

TMSA, our joint venture with Tata Africa Holdings (SA) (Pty.) Limited for the manufacture and assembly operations of our LCVs and M&HCVs in South Africa, owns and operates a manufacturing facility located in Rosslyn, South Africa.

Description of environmental issues that may affect the Company's utilization of facilities:

Tata Motors Limited:

As with other participants in the automobile industry around the world, we are exposed to regulatory risks related to climate change. The design and development of fuel efficient vehicles and vehicles running on alternative renewable energy have become a priority as a result of fossil fuel scarcity escalating price and growing awareness about energy efficiency among customers.

We have adopted the Tata Group Climate Change Policy which addresses key climate change issues related to products, processes and services. We are committed to reduction of greenhouse gases emissions throughout the lifecycle of our products and development of fuel efficient and low greenhouse gas emitting vehicles, as an integral part of our product development and manufacturing strategy.

Considering the climate change risk, we are actively involved in partnerships with technology providers to embrace energy efficient technologies not only for products but also for processes and are also participating actively in various national committees in India, which are working on formulating policies and regulations for improvement of the environment, including through reduction of greenhouse gases.

India, as a party to the United Nations Framework Convention on Climate Change, 1992 and its Kyoto Protocol, 1997, has been committed to addressing the global problem on the basis of the principle of common but differentiated responsibilities and respective capabilities of the member parties. At present, there are no legally binding targets for greenhouse gas reductions for India as it is a developing country. There are, however, opportunities for minimizing energy consumption through elimination of energy losses during manufacturing, thereby reducing manufacturing costs and increasing productivity.

In order to manage regulatory and general risks of climate change, we are increasingly investing in the design and development of fuel efficient and alternative energy vehicles, in addition to implementing new advanced technologies to increase efficiency of our internal combustion engines. We have manufactured CNG versions of buses, LCVs, and the ACE Xenon, as well as an LPG version of the Indica passenger vehicle.

In September 2010, Tata Motors Limited presented CNG-Electric hybrid low-floor Starbuses to the Delhi Transport Corporation. This was the first time in India that hybrid buses would be used for public transportation. The Tata hybrid Starbus offers substantial improvements in fuel economy compared to a conventional bus. The usage of this technology leads to lower emissions thereby contributing to cleaner air and a greener, more environment-friendly commercial passenger transportation application. Furthermore, we have developed a fuel cell powered bus which will undergo road trials shortly.

Moreover, we are using refrigerants such as R134A in our products in order to minimize our contribution towards greenhouse gas emissions. We also ensure that no refrigerant is released to atmosphere during any service, repair and maintenance of the air-conditioning systems of our vehicles by first recovering the refrigerant charge before the system is serviced and recharged. In addition, since 2009, we have voluntarily disclosed fuel efficiency information for our passenger vehicles in India in accordance with a decision by SIAM. We are also continually in the process of developing products to meet the current and future emission norms in India and other countries. For example, we offer products which meet the BS III and BS IV norms in India and Euro V norms in International markets.

We also strive to increase the proportion of energy sourced from renewables. As one of our prime objectives, we have incorporated environmentally sound practices in our processes, products and services. Our manufacturing facilities at Pune, Jamshedpur, Lucknow, Sanand, Dharwad and Pantnagar in India, each have an Environmental Management System, or EMS, in place and have achieved ISO-14001 certification. We have been implementing various Environment Management Programs, or EMPs, on energy conservation such as reduction in electricity and fuel consumption with resulting reductions in greenhouse gas emissions. We are actively working towards a shift to gas fuels to meet process heat requirements.

Table of Contents**Jaguar Land Rover:**

Our production facilities are subject to a wide range of environmental, health and safety requirements. These requirements address, among other things, air emissions, wastewater discharges, accidental releases into the environment, human exposure to hazardous materials, the storage, treatment, transportation and disposal of wastes and hazardous materials, the investigation and clean up of contamination, process safety and the maintenance of safe conditions in the workplace. Many of our operations require permits and controls to monitor or prevent pollution. We have incurred, and will continue to incur, substantial ongoing capital and operating expenditures to ensure compliance with current and future environmental, health and safety laws and regulations or their more stringent enforcement. Other environmental, health and safety laws and regulations could impose restrictions or onerous conditions on the availability or the use of raw materials the Company needs for our manufacturing process.

Our manufacturing process results in the emission of greenhouse gases such as carbon dioxide. The EU Emissions Trading Scheme, an EU-wide system in which allowances to emit greenhouse gases are issued and traded, is anticipated to cover more industrial facilities and become progressively more stringent over time, including by reducing the number of allowances that will be allocated free of cost to manufacturing facilities. In addition, a number of further legislative and regulatory measures to address greenhouse gas emissions, including national laws and the Kyoto Protocol, 1997 are in various phases of discussion or implementation. These measures could result in increased costs to: (i) operate and maintain our production facilities; (ii) install new emissions controls; (iii) purchase or otherwise obtain allowances to emit greenhouse gases; and (iv) administer and manage the Company's greenhouse gas emissions program.

Many of our sites have an extended history of industrial activity. We may be required to investigate and remediate contamination at those sites, as well as properties at which we formerly conducted operations, regardless of whether the Company caused the contamination or whether the activity causing the contamination was legal at the time it occurred. In connection with contaminated properties, as well as our operations generally, the Company also could be subject to claims by government authorities, individuals and other third parties seeking damages for alleged personal injury or property damage resulting from hazardous substance contamination or exposure caused by our operations, facilities or products. We could be required to establish or substantially increase financial reserves for such obligations or liabilities and, if we fail to accurately predict the amount or timing of such costs, the related impact on our business, financial condition or results of operations could be material.

We have a good health and safety record. We maintain our plants and facilities with a view to meeting these regulatory requirements and have also put in place a compliance reporting and monitoring process which is intended to help us to mitigate risk.

Production Capacity:

The following table shows our production capacity as of March 31, 2013 and production levels by plant and product type in Fiscal 2013 and 2012:

	Fiscal Year ended March 31,		
	Production Capacity	Production (Units) 2013	Production (Units) 2012
Tata Motors Plants in India*			
Medium and Heavy Commercial Vehicles, Light Commercial Vehicles, Utility Vehicles, Passenger Cars,	1,623,000	773,238	877,809
Jaguar Land Rover**			
Utility Vehicles, Passenger Cars	514,000	385,787	320,882
Other Subsidiary companies plants (excluding Jaguar Land Rover)***			
Medium & Heavy Commercial Vehicles, Buses & bus body and Pick-up trucks	59,088	28,272	27,843

* This refers to estimated production capacity on a double shift basis for all plants (except Uttarakhand plant for which capacity is on three shift basis) for manufacture of vehicles and replacement parts.

** Production capacity is on three shift basis.

*** The plants are located in South Korea, Spain, Morocco, South Africa and Thailand. Production capacity of plants at Spain and Morocco are on single shift basis

Properties:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

We produce vehicles and related components and carry out other businesses through various manufacturing facilities. In addition to our manufacturing facilities, our properties include sales offices and other sales facilities in major cities, repair service facilities and research and development facilities.

Table of Contents

The following table sets forth information, with respect to our principal facilities, a substantial portion of which are owned by us as of March 31, 2013. The remaining facilities are on leased premises.

Table of Contents

Notes:

- (1) Land at each of these locations is held under an operating lease.
- (2) Some of the facilities are held under operating lease and some are owned.

Substantially all of our owned properties are subject to mortgages in favor of secured lenders and debenture trustees for the benefit of secured debenture holders. A significant portion of our property, plant and equipment except those in the United Kingdom, is pledged as collateral securing indebtedness incurred by us. We believe that there are no material environmental issues that may affect our utilization of these assets.

We have additional property interests in various locations around the world for limited manufacturing, sales offices, and dealer training and testing. The majority of these are housed within leased premises.

Capital work in progress, as at March 31, 2013 includes building of Rs.3,098.8 million on leased land located in the State of West Bengal in India for the purposes of manufacturing automobiles. As a result of the decision to relocate and construct a similar manufacturing facility at another location, the management was in the process of evaluating several options, under all of which no adjustments to the carrying amount of the buildings was considered necessary. In June 2011, the newly elected Government of West Bengal (referred to as State Government) enacted legislation to cancel the land lease agreement.

The Company challenged the legal validity of the legislation. In June 2012, the High Court of Calcutta (referred to as the High Court) ruled against the validity of the legislation and restored the Company's rights under the land lease agreement. The State Government has filed an appeal in the Supreme Court of India. As of the date of the authorization of the financial statements, the Supreme Court has not concluded on the State Government appeal.

The Company reasonably expects that the High Courts' judgment, based on established law, will be upheld by the Supreme Court. For further details regarding the current legal proceedings with respect to the leased land please refer to Item 4.B Business Overview Legal Proceedings of this annual report.

We consider all of our principal manufacturing facilities and other significant properties to be in good condition and adequate to meet the needs of our operations.

Item 4A. Unresolved Staff Comments.

None.

Item 5. Operating and Financial Review and Prospects.

You should read the following discussion of our financial condition and results of operations together with our consolidated financial statements prepared in conformity with IFRS and information included in this annual report. This discussion and analysis contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors including, but not limited to, those set forth in Item 3.D and elsewhere in this annual report.

A. Operating Results.

All financial information discussed in this section is derived from our financial statements included in this annual report on Form 20-F, which has been prepared in accordance with International Financial Reporting Standards as issued by International Accounting Standards Board.

Overview

In Fiscal 2013, our total revenue (net of excise duties) including finance revenues increased by 13.5% to Rs.1,889,860 million from Rs.1,664,853 million in Fiscal 2012. We recorded a net income (attributable to shareholders of the Company) of Rs.88,697 million in Fiscal

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

2013, representing a decline of 23.3% or Rs.26,962 million over net income in Fiscal 2012 of Rs.115,659 million.

Table of Contents

Automotive operations

Automotive operations are our most significant segment, accounting for 99.4%, 99.4 % and 99.3% of our total revenues for Fiscal 2013, 2012, and 2011, respectively. For Fiscal 2013, revenue from automotive operations before inter-segment eliminations was Rs.1,878,571 million as compared to Rs.1,654,903 million for Fiscal 2012 and Rs.1,223,547million for Fiscal 2011.

Our automotive operations include:

All activities relating to the development, design, manufacture, assembly and sale of vehicles as well as related spare parts and accessories;

Distribution and service of vehicles; and

Financing of our vehicles in certain markets.

Our automotive operations segment is further divided into Tata and other brand vehicles including spares and financing thereof and the Jaguar Land Rover business. For Fiscal 2013, Jaguar Land Rover contributed 72.7% (63.1% for Fiscal 2012) of our total automotive revenue (before intra segment elimination) and the remaining 27.3% (36.9% or Fiscal 2012) was contributed by Tata and other brand vehicles.

Tata and other brands vehicles (including spares and financing thereof)

India is the major market for Tata and other brand vehicles (including spares and financing thereof). During Fiscal 2013, there was a significant deterioration in terms of macro-economic factors leading to volume contraction and competitive pressures across all major products.

The Indian economy continued to deteriorate in Fiscal 2013, recording a lower GDP growth of 5%, compared to 6.2% for Fiscal 2012 (based on data from the Ministry of Statistics and Programme Implementation). In Fiscal 2011, the inflationary pressures started mounting and the RBI started tightening monetary policy, which impacted growth. During Fiscal 2013, the moderation in growth was primarily attributable to weakness in industry. Furthermore, as the pace of growth started slowing down, government revenues started shrinking, exposing the economy to a higher fiscal deficit. The current account deficit also widened. Beginning in Fiscal 2012, corporate and infrastructure investment started slowing down mainly due to investment bottlenecks and tight monetary policy. Government expenditure on infrastructure and other key sectors declined. With the continued high interest rates and inflation, households were forced to spend more on essentials and discretionary spending was reduced, leading to the deferral of significant purchase decisions. The continued stagnation of industrial growth mainly in the areas of mining and quarrying, and manufacturing and infrastructure, adversely impacted the domestic auto industry. As a result, as compared to prior years, the domestic auto industry recorded an insignificant growth on an overall basis.

Sales of our commercial vehicles in India increased marginally by 1.0% to 536,491 units in Fiscal 2013 from 531,228 units in Fiscal 2012. The demand in the M&HCV category fell by 23.3% from Fiscal 2012, due to lower industrial growth and a significant reduction in infrastructure spending. However, the LCV category grew by 17.9% in Fiscal 2013, largely supported by demand for small commercial vehicles driven by certain niche segments. We also improved LCV volume performance in the pickup truck segment realizing sales of 393,726 units, an increase of 21.5% over 324,069 units sold in Fiscal 2012. Sales of the Tata Ace continued to increase year-on-year.

We launched several products and variants in the M&HCV category in Fiscal 2013, one of which was the first in class five axle rigid truck, the LPT 3723. The new generation LCV Ultra bus was launched during Fiscal 2013. A micro-segmentation effort was used to further grow market share in key markets.

Our passenger vehicle (including UV) sales in India decreased to 219,190 units in Fiscal 2013 from 347,323 units in Fiscal 2012. Domestic passenger vehicle sales were impacted by rising interest rates, fuel price hikes, inflationary pressures and intense competition. We sold 48,123 Nano cars in Fiscal 2013, a decrease of 37.8% over 77,394 units in Fiscal 2012. We have taken many initiatives to generate demand for the Nano, through Special Nano Access Points and ensuring availability of finance. We continue to offer products in the entry level, mid-size sedan market, through a portfolio including the original Indigo, the Indigo eCS, the Indigo Manza and the Indigo Manza club class. Our sales in the mid-size category reduced in Fiscal 2013, as competition severely intensified with multiple new launches from other players in this segment.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

In the UV category, we sold 46,366 units in Fiscal 2013, representing a decrease of 16.6% from 55,592 units in Fiscal 2012. The decrease was mainly due to absence of appropriate products in the fast growing soft road UV segment, although this category of the automotive industry in India grew by 51.5% in Fiscal 2013.

Table of Contents

Our overall sales in international markets decreased by 16.2% to 64,242 units in Fiscal 2013, as compared to 76,682 units in Fiscal 2012. Our exports of vehicles manufactured in India decreased by 22.1% in Fiscal 2013 to 48,145 units from 61,835 units in Fiscal 2012. The decrease in exports was attributable to the recent unrest in the Middle East and parts of Africa. For Tata Motors, traditionally strong markets in South Asia, such as Bangladesh, also were affected by internal conflict and unrest. Regulatory changes in certain other key markets, such as Sri Lanka, where the duties and taxes increased by approximately 20% to 100% depending on the type of product, introduced by the Sri Lankan Government to curb the imports, also affected our sales.

TDCV, our subsidiary company engaged in design, development and manufacturing of M&HCVs, recorded a 5% increase in its overall vehicle sales to 9,974 units in Fiscal 2013, from 9,500 units in Fiscal 2012. TDCV exported 4,700 units in Fiscal 2013, compared to 2,948 units in Fiscal 2012, an increase of 59.4%. TDCV's sales increased significantly in some of its traditional export markets like Algeria, Russia, Laos, South Africa, and Vietnam. TDCV has also commenced offering its products in some new markets like Indonesia, Ecuador, and Ghana with a view to diversify its market. In the South Korean market, TDCV's sales decreased by 17.6% from 6,552 units in Fiscal 2012 to 5,400 units in Fiscal 2013, primarily as a result of a slowdown in the South Korean economy.

Our overall vehicle sales decreased by 14.2% to 819,923 units in Fiscal 2013 from 955,233 units in Fiscal 2012, resulting in a revenue (before inter-segment elimination) decrease of 15.9% to Rs.513,817 million in Fiscal 2013, compared to Rs.611,048 million in Fiscal 2012. The decrease was mainly attributable to significant reduction in volumes on account of adverse economic factors in India and further accentuated by intense competitive pressures.

There was an increase in spares and after sales activity by 10.2% to Rs.38,802 million in Fiscal 2013, compared to Rs.35,221 million in Fiscal 2012.

Revenue from our vehicle financing operations increased by 23.3% to Rs.30,013 million in Fiscal 2013 as compared to Rs.24,340 million in Fiscal 2012. In response to significant competitive pressures, we focused on market penetration, resulting in volume growth of Rs.3,789 million. Revenues from our vehicle financing operations were also favorably impacted by increasing interest rates.

Earnings before other income, interest and tax before inter-segment eliminations from Tata and other brand vehicles/spares and financing thereof decreased by 73.8% to Rs.10,701 million in Fiscal 2013, compared to Rs.40,884 million in Fiscal 2012. Our reduced profitability was mainly a consequence of lower operating margins resulting from the decrease in revenues and the incurrence of fixed costs which were spread over lower volumes. Further, there was an increase in depreciation expense as a result of additions to plant / facility in recent years, and in amortization expense in respect of new products launched.

Automotive operations - Jaguar Land Rover

Jaguar Land Rover had a successful year of continued growth in all markets, including 48% year on year growth in China retail sales. Jaguar Land Rover also significantly improved sales in more developed economies, where, despite uncertain trading conditions, it has increased volumes in all major markets. The volume growth has been driven by a full year of Range Rover Evoque sales, new Jaguar product lines and increasing sales of our existing models.

Retail volumes in Fiscal 2013 were 374,636 units, an increase of 22% compared to the prior year. Retail volumes were 58,593 units for Jaguar and 316,043 units for Land Rover, growth of 8% and 26%, respectively. Retail volumes in Europe were 80,994, a 18% increase on the prior year. Retail volumes in the United Kingdom were 72,270 units, a 20% increase on the prior year, while the North American retail volumes were 62,959, representing an increase of 9%. Retail volumes in key growth markets increased significantly, with China retail volumes of 77,075, a 48% increase, with Asia Pacific of 17,849, a 27% increase and with other markets of 63,489, a 19% increase, respectively, compared to the previous year.

Wholesale volumes for Jaguar in Fiscal 2013 were 57,766 units, representing an increase of 7.0% as compared to 53,990 units sold in Fiscal 2012. Wholesale volumes for Land Rover in Fiscal 2013 were 314,290 units, representing an increase of 20.8% over sales of 260,260 units in Fiscal 2012.

Revenues (before inter-segment eliminations) for Jaguar Land Rover were Rs.1,365,620 million for Fiscal 2013, compared to Rs.1,044,533 million for Fiscal 2012, representing a 30.7% increase over Fiscal 2012. The increase was primarily driven by demand for both brands as well as a strong product and market mix, supported by favourable exchange rates. The revenues were also positively impacted by translation gain, of approximately Rs.140,655 million.

Table of Contents

For Fiscal 2013, the Jaguar Land Rover business reported earnings before other income, interest and tax before inter-segment eliminations of Rs.150,687 million, as compared to Rs.118,895 million for Fiscal 2012, representing an increase of 26.7% over Fiscal 2012. The improvement in profitability was mainly attributable to an increase in volumes, introduction of the new Range Rover, a full year of the Range Rover Evoque and the new variants of the Jaguar XF as well as the continued strength of the Range Rover Sport. Further, the performance was also supported by the positive impact of the continuing strength of the US dollar against the GBP and the Euro, improving its revenues against the backdrop of a largely GBP and Euro cost base. The reported earnings before other income, interest and tax also have an element of foreign currency translation gain.

Other Operations

Our other operations business segment includes information technology services and machine tools and factory automation solutions. Our revenue from other operations before inter-segment eliminations was Rs.22,179 million in Fiscal 2013, an increase of 17.3% from Rs.18,905 million in Fiscal 2012. Revenues from other operations represented 1.2%, 1.1% and 1.2% of our total revenues, before inter-segment eliminations, in Fiscal 2013, 2012 and 2011, respectively. Earnings before other income, interest and tax before inter-segment eliminations, were Rs.3,294 million, Rs.2,443 million and Rs.1,487 million in Fiscal 2013, 2012 and 2011, respectively.

Geographical breakdown

We have pursued a strategy of increasing exports of Tata and other brand vehicles to new and existing markets. Improved market sentiment and a strong portfolio of Jaguar Land Rover products during Fiscal 2013, have enabled us to increase our share in international markets. Further, Jaguar Land Rover also experienced a change in market mix, in particular the continued strengthening of business in China, which is our second largest single market, after India. The performance of our subsidiary in South Korea, TDCV, and successful operations of INCAT and its subsidiaries following acquisitions by TTL, facilitated further increase in our revenue from international markets. TDCV's major export markets are Algeria, Russia, Vietnam, South Africa and countries in the Middle East. Following the acquisition of the Jaguar Land Rover business in Fiscal 2009, the proportion of our net sales earned from markets outside of India has increased significantly to 76.1% and 66.8% for Fiscal 2013 and Fiscal 2012, respectively.

The following table sets forth our revenue from our key geographical markets:

Revenue	Fiscal 2013		Fiscal 2012		Fiscal 2011	
	Rs. in million	Percentage	Rs. in million	Percentage	Rs. in million	Percentage
India	451,652	23.9%	552,513	33.2%	464,676	37.7%
China	445,645	23.6%	296,923	17.8%	116,459	9.4%
United Kingdom	224,604	11.9%	179,866	10.8%	136,906	11.1%
United States of America	189,007	10.0%	157,855	9.5%	147,428	12.0%
Rest of Europe	220,489	11.7%	190,057	11.4%	150,148	12.2%
Rest of the World	358,464	18.9%	287,640	17.3%	216,517	17.6%
Total	1,889,860		1,664,853		1,232,134	

Rest of Europe is geographic Europe excluding United Kingdom. Rest of the World is any region not included above.

Significant Factors Influencing Our Results of Operations.

Our results of operations are dependent on a number of factors, which include mainly the following:

General economic conditions. We, similar to other participants in the automotive industry, are materially affected by general economic conditions. See Item 3.D Risk Factors Risks associated with Our Business and the Automotive Industry .

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Interest rates and availability of credit for vehicle purchases. Our volumes are significantly dependent on availability of vehicle financing arrangements and the cost thereof. For further discussion of our credit support programs, see Item 4.B Business Overview Automotive Operations .

Excise duty and sales tax rates. In India the excise / sales tax rate structure affects the cost of vehicles to the end user and hence impacts demand significantly. For a detailed discussion regarding tax rates applicable to us, please see Item 4.B Business Overview Government Regulations Excise Duty .

Table of Contents

Our competitive position in the market. For a detailed discussion regarding our competitive position, see Item 4.B Business Overview Automotive Operations Tata and other brand vehicles Competition .

Cyclicality. Our results of operations are also dependent on the cyclicality in demand in the automotive market, new government and environmental regulations.

Environmental Regulations. There has been a greater emphasis on raising emission and safety standards for the automobile industry by governments in the various countries in which we operate. Compliance with applicable environmental and safety laws, rules, regulations and standards will have a significant bearing on costs and product life cycles in the automotive industry. For further details with respect to these regulations, please see Item 4.B Business Overview Government Regulations Emission and Safety in India .

Foreign Currency Rates. Our operations and our financial position are quite sensitive to fluctuations in foreign currency rates. Jaguar Land Rover earns significant revenue in the United States, Europe and China and also sources a significant portion of its input material from Europe. Thus any exchange rate fluctuations of GBP to Euro, GBP to US dollars and GBP to other currencies would affect our financial results. We have significant borrowings in foreign currencies denominated mainly in US dollars. Our consolidated financial results are affected by foreign currency exchange fluctuations through both translation risk and transaction risk. Changes in foreign currency exchange rates may positively or negatively affect our revenues, results of operations and net income.

To the extent that our financial results for a particular period will be affected by changes in the prevailing exchange rates at the end of the period, such fluctuations may have a substantial impact on comparisons with prior periods. However, the translation effect is a reporting consideration and does not impact our underlying results of operations.

Transaction risk is the risk that the currency structure of our costs and liabilities will deviate from the currency structure of sales proceeds and assets. However, we enter into hedging instruments to mitigate some of these transaction risks. These instruments enable us to reduce, but not eliminate, the impact of fluctuations in foreign currency exchange rates. Please see Item 11 Quantitative and Qualitative Disclosures About Market Risk for further detail.

Political and Regional Factors. Similar to the rest of the automotive industry, we are affected by political and regional factors. For a detailed discussion regarding these risks, please see Item 3.D Risk Factors Political and Regulatory Risks.

Results of operations

The following table sets forth selected items from our consolidated statements of income for the periods indicated and shows these items as a percentage of total revenues:

	Percentage of Total Revenue			Percentage Change	
	Fiscal 2013	Fiscal 2012	Fiscal 2011	2012 to 2013	2011 to 2012
Total revenues	100%	100%	100%	13.5	35.1

Earnings before other income, interest and tax (% to total revenue)	14.9%	12.9%	10.0%		

Fiscal 2013 Compared to Fiscal 2012**Revenues**

Our total consolidated revenues (net of excise duty, where applicable) including finance revenues were Rs.1,889,860 million in Fiscal 2013, an increase of Rs.225,007 million or 13.5%, from Rs.1,664,853 million in Fiscal 2012.

The increase in revenues was primarily driven by our Jaguar Land Rover business, where revenues increased by 30.7%, from Rs.1,044,533 million in Fiscal 2012 to Rs.1,365,620 million in Fiscal 2013. The increase in revenues was primarily a result of volume increases across products and markets. The revenues also reflect an increase on account of currency translation from GBP to INR of Rs.140,655 million. Rs.150,630 million, or 14.4% of the aggregate increase in revenues of Rs.180,432 million (excluding translation impact) was mainly attributable to an increase in sales of the Range Rover Evoque from 59,948 units in Fiscal 2012 to 115,529 units in Fiscal 2013.

The increase in revenues at our Jaguar Land Rover business was partly offset by a decrease in revenue for Tata and other brand vehicles including financing thereof by 15.9% from Rs.611,048 million in Fiscal 2012, to Rs.513,817 million in Fiscal 2013. The decrease was mainly due to challenging market conditions and competition. In particular, the decrease in revenues resulted from a significant reduction in the vehicle sales volumes in several vehicle categories, including M&HCV in India, which decreased from Rs.246,079 to Rs.168,363 million and passenger cars, which decreased by 37.8% from Rs.81,330 million to Rs.50,551 million.

The above decrease in revenues was offset by:

an increase in finance revenue by 23.3% from Fiscal 2012, which resulted from increased volume of financing.

an increase in spares sales activity by 10.2% from Fiscal 2012

an increase in vehicle sales in LCV category, in India by 17.6% from Rs.95,805 million in Fiscal 2012 to Rs.112,631 million in Fiscal 2013, which was largely supported by demand for small commercial vehicles driven by certain niche segments and our market penetration.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

an increase in vehicle sales of TDCV by 24.1% from Rs.29,808 million in Fiscal 2012 to Rs.36,992 million in Fiscal 2013, primarily as a result of significant sales increase in some of the Company's traditional export markets like Algeria, Russia, Laos, South Africa, and Vietnam. TDCV has also commenced introducing its products in some new markets like Indonesia, Ecuador, and Ghana with a view to diversify its market.

Table of Contents

Revenues (net of excise duty, where applicable) before inter-segment eliminations, from other operations were Rs.22,179 million in Fiscal 2013, an increase of 17.3% from Rs.18,905 million in Fiscal 2012. The increase in revenues from other operations was mainly attributable to traction in the automotive and aerospace markets. Revenues from other operations represent 1.2% and 1.1% of our total revenues, before inter-segment eliminations, in Fiscal 2013 and 2012, respectively.

Cost and Expenses

Raw Materials and Purchase of Products for Sale (including change in stock): Raw material costs for Fiscal 2013 were Rs.1,206,250 million compared to Rs.1,100,477 million in Fiscal 2012, reflecting an increase of 9.6%, or Rs.105,773 million, from Fiscal 2012. The increase in raw material costs was mainly attributable to an increase volumes at our Jaguar Land Rover business as further discussed below. The increase was also partially attributable to the effect of currency translation from GBP to Indian rupees, which resulted in an increase of Rs.88,851 million. This was partly offset by decrease at our India operations, due to reduction in volumes. Raw material costs as a percentage of revenues (excluding finance revenues) decreased to 64.9% in Fiscal 2013 as compared to 67.1% in Fiscal 2012.

At our Jaguar Land Rover operations, raw material costs for Fiscal 2013 were Rs.850,372 million compared to Rs.671,043 million in Fiscal 2012, reflecting an increase of Rs.179,329 million from Fiscal 2012 (net of translation increase of Rs.90,478 million). The raw material cost as a percentage of revenues decreased to 62.8% in Fiscal 2013, as compared to 64.6% in Fiscal 2012. The raw material cost increased by GBP 896 million (Rs.77,081 million) due to increase in volume and increase in duties by GBP 213 million (Rs.18,314 million) mainly due to increase in sales to China by 32.7%. The decrease in material cost as a percentage to revenue was mainly due to cost reduction programs undertaken by Jaguar land Rover of approximately GBP 117 million (Rs.10,060 million) and positive movement of foreign currency rates applicable for sourcing countries of GBP 185 million (Rs.15,907 million).

At our India operations, raw material costs for Fiscal 2013 were Rs.329,621 million compared to Rs.397,023 million in Fiscal 2012, reflecting a decrease of Rs.67,402 million from Fiscal 2012. The reduction represent volume impact of M&HCV Rs.56,419 million and passenger cars by Rs.27,882 million. This was partly offset by increase in volumes of LCV by Rs.13,273 million. The raw material cost as a percentage of revenues increased to 73.5% in Fiscal 2013, as compared to 72.7% in Fiscal 2012 (before inter-segment eliminations). The percentage increase was due to change in proportion of products – lower M&HCV volumes (high contribution models) and higher LCVs (low contribution models).

Employee Cost: Our employee cost was Rs.166,038 million in Fiscal 2013, as compared to Rs.122,130 million in Fiscal 2012 and has gone up by 36.0% or Rs.43,908 million. Our permanent headcount increased by 7% as at March 31, 2013 to 62,716 employees, as compared to 58,618 employees as at March 31, 2012.

The employee cost at Jaguar land Rover was Rs.114,591 million in Fiscal 2013, as compared to Rs.77,813 million in Fiscal 2012, which reflects an increase of 47.3% or Rs.36,778 million. This includes currency translation of Rs.12,379 million. The employee cost as a percentage to revenue was 8.4% for Fiscal 2013 and 7.5% for Fiscal 2012. Jaguar Land Rover increased its permanent and agency headcount to support volume increases, as well as new launches and product development projects. The permanent headcount increased by 9.5% as at March 31, 2013 to 17,832 employees, as compared to 16,313 employees as at March 31, 2012. The average temporary headcount increased by 40.5% for Fiscal 2013 to 7,081 employees, as compared to 5,041 employees for Fiscal 2012. The increase in cost was also attributable to a wage agreement in November 2012, resulting in an increase of 4.5% increase in salary. Further increase in cost was due to higher pension charge by GBP 34 million (Rs.2,889 million), due to change in actuarial assumptions, such as discount rate and inflation and other benefits/costs to employees by GBP 40 million (Rs.3,412 million), on account of increase in salaries in Fiscal 2013.

In South Korea, our union employees had filed a lawsuit demanding inclusion of some elements of non-ordinary salary and bonus as part of ordinary wages, which has been decided by the district court in their favor. We have made a provision of Rs.2,124 million in Fiscal 2013 in respect of this lawsuit. We have filed an appeal against the order.

For our India operations (Tata brand vehicles) the employee cost was Rs.31,784 million in Fiscal 2013, as compared to Rs.30,079 million in Fiscal 2012, which reflects an increase of 5.7% or Rs.1,705 million. The permanent headcount increased by 4.5% as at March 31, 2013 to 36,522 employees, as compared to 34,593 employees as at March 31, 2012, mainly due to commencement of operations of Dharwad plant in March 2012 and increased product development activity. The increase was due to yearly increments (Rs.1,661 million for Tata Motors) and wage revision at one of the major location (increase of Rs.409 million), due in Fiscal 2013, which was partly offset by reduction in variable pay, due to performance factors (Rs.764 million for Tata Motors).

Table of Contents

Other Expenses: Other expenses increased by 23.5% to Rs.382,120 million in Fiscal 2013 from Rs.309,381 million in Fiscal 2012. This increase mainly reflects the impact of an increase in volumes at Jaguar Land Rover and currency translation of Rs.29,450 million. As a percentage of total revenues, these expenses represented 20.2% in Fiscal 2013, as compared to 18.6% in Fiscal 2012. The major components of expenses are as follows:

	Year ended March 31,		Increase/ (Decrease)
	2013	2012	
	(Rs. in millions)		
Freight and transportation expenses	55,851	45,891	9,960
Works operation and other Expenses	143,224	110,719	32,505
Publicity	66,315	53,931	12,384
Allowance for trade and other receivables, and finance receivables	10,569	6,745	3,824
Warranty and product liability expenses	41,869	35,815	6,054

- i) The increase in freight and transportation expenses relates to increase in volumes at our Jaguar Land Rover operations, predominantly for China sales.
- ii) Our works operation and other expenses represented 7.6% and 6.7% of total revenue for Fiscal 2013 and 2012, respectively. These mainly relate to volume related expenses at Jaguar Land Rover.
- iii) Publicity expenses were 3.5% of our revenues for Fiscal 2013, same as Fiscal 2012. In addition to routine product and brand campaigns, we incurred expenses relating to new product introduction campaigns, namely the all-new aluminum Range Rover that went on sale during September 2012 as well as the Jaguar all-wheel drive and smaller engine variants and 2013 Model Year launches of other vehicles. In India we launched the Safari Storme and the Tata LPT 3723.
- iv) Consequent to increase in level of financing activity and evaluation of defaults/overdues, the allowances for finance receivables have increased by Rs.3,681 million.
- v) Warranty and product liability expenses represented 2.3% and 2.2% of our revenues for Fiscal 2013 and Fiscal 2012, respectively. These expenses are accrued based on historical information on the nature, frequency and average cost of claims and management estimates. Please refer to Critical Accounting Policies included in Item 5.A of this annual report for further details.

Expenditure capitalized: These represent employee costs, stores and other manufacturing supplies and other works expenses incurred towards product development projects and also include costs attributable to internally constructed capital items. Considering the nature of our industry, we have to continually invest in the development of new products and also address safety, emission and other regulatory norms. The increase reflects expenditure on new products and other major product development plans, including for example, with respect to the new Range Rover, the Range Rover Sport, future LCVs, World Truck and passenger car models.

Depreciation and Amortization: Our depreciation and amortization expenses increased by Rs.19,288 million to Rs.73,723 million in Fiscal 2013, compared to Rs.54,435 million in Fiscal 2012. The increase on account of currency translation is Rs.5,401 million. The increase in depreciation expenses from Rs.31,849 million in Fiscal 2012 to Rs.38,088 million in Fiscal 2013, is on account of asset addition in Fiscal 2013 and plant and equipment (mainly towards capacity and new products) installed in Fiscal 2012 (production facility for Evoque at Halewood and plant at Dharwad), the full effect of which is reflected in the current year. The increase in amortization of product development cost from Rs.22,586 million in Fiscal 2012 to Rs.35,635 million in Fiscal 2013, reflects amortization cost of products capitalized and introduced during Fiscal 2012 and Fiscal 2013, primarily, the Range Rover Evoque and Safari Storme.

Other income (net): There was a net gain of Rs.12,024 million in Fiscal 2013, as compared to Rs.9,407 million in Fiscal 2012 an increase of Rs.2,617 million.

- i. There was a gain of Rs.3,933 million on fair value of prepayment option on Senior Notes.

Table of Contents

- ii. As compared to Fiscal 2012 there was reduction in gain on fair value of conversion option relating to convertible foreign currency notes by Rs.1,630 million in Fiscal 2013.

For further details refer note 30 to our consolidated financial statements included elsewhere in this annual report.

Interest expense (net): Our interest expense (net of interest capitalized) increased by 6.4% to Rs.40,752 million in Fiscal 2013, compared to Rs.38,290 million in Fiscal 2012. As a percentage of total revenues, interest expense represented 2.3% in Fiscal 2013 compared to 2.2% in Fiscal 2012. The gross interest expense increased by 16.7% to Rs.54,112 million in Fiscal 2013, compared to Rs.46,377 million in Fiscal 2012. Consequent to increase in financing activity and the rate change interest expense increased by Rs.3,765 million.

Foreign exchange (gain)/loss (net): We had a net foreign exchange loss of Rs.15,640 million in Fiscal 2013, compared to Rs.11,154 million in Fiscal 2012. This was primarily due to the following factors:

- i. Jaguar Land Rover incurred an exchange loss of Rs.12,680 million in Fiscal 2013 as compared to Rs.759 million in Fiscal 2012. There was a loss of Rs.5,047 million on cash flow hedges in Fiscal 2013 as compared to a gain of Rs.1,615 million in Fiscal 2012. We incurred a net exchange loss on Senior Notes of Rs.3,405 million in Fiscal 2013, as compared to Rs.924 million in Fiscal 2012.
- ii. For India operations, due to depreciation of the Indian rupee against all major currencies, we incurred exchange losses on foreign currency payments and borrowings. There was a net exchange loss of Rs.5,467 million in Fiscal 2013 as compared to Rs.9,672 million in Fiscal 2012. The reduction of Rs.4,205 million, attributable to reduction in foreign currency denominated borrowings (Zero Coupon Convertible Alternative Reference Securities and Foreign Currency Convertible Notes).

Income Taxes: Our income tax expense was Rs.39,191 million in Fiscal 2013, compared to Rs.4,707 million in Fiscal 2012. In Fiscal 2012. The main reason are

- i. In Fiscal 2012, we recognized all previously unrecognized unused tax losses and other temporary differences pertaining to Jaguar Land Rover operations resulting in tax credit of Rs.29,528 million.
- ii. During Fiscal 2013, we recognised Rs.4,133 million tax expense on distribution of dividend from an overseas subsidiary and there was increase of Rs.1,113 million in tax provision on undistributed earnings of subsidiaries / associates (due to increase in National Sales company profits of Jaguar Land Rover, mainly China).
- iii. There was an increase of Rs.1,533 million towards additional tax liability on the rate change and Rs.1,850 million Consequent to increase in income.

For further details refer to note 16 to our consolidated financial statements included elsewhere in this annual report.

Non-controlling Interests in Consolidated Subsidiaries and Share of profit of equity accounted investees, net of tax: In Fiscal 2013, our share of profit of equity accounted investees reflected a gain of Rs.1,734 million, as compared to loss of Rs.351 million in Fiscal 2012. In Fiscal 2013,

Table of Contents

our share of profits increased by Rs.1,101 million in one of equity accounted investees, which recorded gain on divestment of certain joint ventures investment by the affiliate.

in another affiliate our share of earning was Rs.1,538 million (loss of Rs.619 million in Fiscal 2012) consequent to revision in business model and pricing basis.

loss of Rs.1,017 million in the China JV due to start-up cost.

In Fiscal 2013, our share of non-controlling interest reflected a gain of Rs.886 million, as compared to Rs.781 million in Fiscal 2012, primarily due to increased profitability of our subsidiaries, mainly Tata Technologies Ltd.

Net Income

Our consolidated net income for Fiscal 2013 excluding share of non-controlling interests decreased by 23.3% to Rs.88,697 million from Rs.115,659 million in Fiscal 2012. Net income as a percentage of total revenues also decreased to 4.7% in Fiscal 2013 from 7.0% in Fiscal 2012. This decrease was the result of the following factors:

Revenues from the domestic market (India) decreased by 18.3% to Rs.451,652 million in Fiscal 2012 from Rs. 552,513 million in Fiscal 2012, resulting in earnings before other income, interest and tax of Rs.10,701 million in Fiscal 2013 for Tata and other brand vehicles including financing thereof, as compared to Rs.40,844 million in Fiscal 2012; and

higher income tax expense.

Which was offset by

Revenues from market outside India increased by 29.3% to Rs.1,438,238 million in Fiscal 2013 from Rs.1,112,340 million in Fiscal 2012, mainly attributable to our Jaguar Land Rover business. The earnings before other income, interest and tax for Jaguar Land Rover business was Rs.150,687 million in Fiscal 2013 as compared to Rs.118,895 million in Fiscal 2012; and

increase in other income, mainly due to gain on the fair value of prepayment option.

Fiscal 2012 Compared to Fiscal 2011

Revenues

Our total consolidated revenues (net of excise duty, where applicable) including finance revenues were Rs.1,664,853 million in Fiscal 2012, an increase of Rs.432,719 million or 35.1%, from Rs.1,232,134 million in Fiscal 2011. The growth was driven by volumes across all markets and more particularly growth in volumes by 29.1% in premium car segment, supported by new products and significant performance improvement of our Jaguar Land Rover in the Chinese market.

The revenue from Tata and other brand vehicles increased by 16.0% (the figures are before inter-segment eliminations), primarily due to:

15.3% increase in vehicle unit sales in India (mainly M & HCV by Rs.43,327 million);

21.5% increase in spares and after sales activity; and

9.5% increase in automotive financing revenues.

Revenues for the Jaguar Land Rover business increased by 49.3% to Rs.1,044,533 million. The increase is attributable to the launch of the Range Rover Evoque and an increase in sales volumes by 36.7% particularly in China, Russia, South Africa and Brazil. The increase on account of currency translation was Rs.80,712 million.

Revenues (net of excise duty, where applicable) before inter-segment eliminations, from other operations were Rs.18,905 million in Fiscal 2012, an increase of 26.7% from Rs.14,916 million in Fiscal 2011. Revenues from other operations represent 1.1% and 1.2% of our total revenues, before inter-segment eliminations, in Fiscal 2012 and 2011, respectively.

Cost and Expenses

Raw Materials and Purchase of Products for Sale (including change in stock): Raw material costs for Fiscal 2012 were Rs.1,100,477 million compared to Rs.796,224 million in Fiscal 2011, reflecting an increase of Rs.304,253 million or 38.2% from Fiscal 2011, mainly attributable to increase in volumes. The increase in raw material cost was also partly attributable to the effect of currency translation from GBP to Indian rupees, which resulted in an increase of Rs.54,570 million.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Raw material costs as a percentage of revenues (excluding finance revenues) increased to 67.1% in Fiscal 2012 as compared to 65.8% in Fiscal 2011.

At our Jaguar Land Rover operations, raw material costs for Fiscal 2012 were Rs.671,043 million compared to Rs.438,484 million in Fiscal 2011, reflecting an increase of Rs.232,559 million from Fiscal 2011 mainly due to increased volumes. The raw material cost as a percentage of revenues increased to 64.6% in Fiscal 2013, as compared to 62.7% in Fiscal 2012. Duty expense have increased in Fiscal 2012 by GBP 848 million (Rs.65,162 million), mainly due to increase in volumes at China by 137.8%. The raw material cost increased as a percentage to revenue due to exchange loss by GBP 51 million (Rs.3,919 million), change of price of major material cost, namely Steel, Aluminum, copper etc. by GBP 29 million (Rs.2,228 million) and other market related (mix and options) increase by GBP 146 million (Rs.11,219 million).

Table of Contents

At our India operations, raw material costs for Fiscal 2012 were Rs.397,023 million compared to Rs.340,668 million in Fiscal 2011, reflecting an increase of Rs.56,355 million from Fiscal 2012. The raw material cost as a percentage of revenues increased to 72.7% in Fiscal 2012, as compared to 72.4% in Fiscal 2011 (before inter-segment eliminations).

Employee Cost: Our employee cost was Rs.122,130 million in Fiscal 2012, an increase of 32.4% or Rs.29,880 million as compared to Rs.92,250 million in Fiscal 2011.

Our employee cost as a percentage of total revenues reduced marginally to 7.3% in Fiscal 2012 from 7.5% in Fiscal 2011, due to revenue growth.

Our permanent headcount increased by 12.2% as at March 31, 2012 to 58,618 employees, as compared to 52,244 employees as at March 31, 2011.

The employee cost at Jaguar Land Rover was Rs. 77,813 million in Fiscal 2012, as compared to Rs.55,923 million in Fiscal 2011, an increase of 39.1% or Rs.21,890 million. Jaguar Land Rover increased its permanent and agency headcount to support volume increases. The permanent headcount increased by 7.0% as at March 31, 2012 to 16,313 employees, as compared to 15,240 employees as at March 31, 2011. Further, Jaguar Land Rover employed temporary headcount 5,041 employees on average during Fiscal 2012. The increase was also due to higher pension charge by Rs.4,388 million on account of change in assumptions. The increase was also partially attributable to the effect of currency translation from GBP to Indian rupees, which resulted in an increase of Rs.5,874 million.

For our India operations, increase was due to normal annual increases (Rs. 2,791 million for Tata Motors) and increase in headcount. The permanent headcount increased as at March 31, 2012 to 34,593 employees, as compared to 30,871 employees as at March 31, 2011. The average temporary headcount increased by 11.7% for Fiscal 2012 to 35,122 employees, as compared to 31,455 employees for Fiscal 2011, to support the volumes. As a consequence of above the employee cost was Rs.30,079 million in Fiscal 2012, as compared to Rs.25,069 million in Fiscal 2011, which reflects an increase of Rs.5,010 million.

Other Expenses: Other expenses increased by 33.2% to Rs.309,381 million in Fiscal 2012 from Rs.232,342 million in Fiscal 2011. The increase mainly relates to increase in volume, size of operations and inflation. As a percentage of total revenues these expenses represented 18.6% in Fiscal 2012, as compared to 18.9% in Fiscal 2011. The major components of expenses are as follows:

	Year ended March 31,		Increase/ (Decrease)
	2012	2011	
	(Rs. in millions)		
Freight and transportation expenses	45,891	30,886	15,005
Works operation and other expenses	110,719	79,765	30,954
Publicity	53,931	40,453	13,478
Allowance for trade and other receivables, and finance receivables	6,745	5,972	773
Warranty and product liability expenses	35,815	29,334	6,481

- i) The increase in freight and transportation expenses mainly relate to volumes, mainly China and increases in freight rates.
- ii) Our works operation and other expenses represented 6.7% and 6.5% of total revenue for Fiscal 2012 and 2011, respectively. The increase was mainly due to external cost (mainly contract jobs) incurred to support the volumes.
- iii) The increase in publicity related expenses mainly relate to new product introduction campaigns. In addition to routine product and brand campaigns, we incurred expenses relating to new product introduction campaigns, namely Range Rover Evoque in September 2011 with a world-wide roll out in December 2011. In India we launched the Indigo eCS, Sumo Gold and Tata Ultra Bus.

iv)

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The warranty expenses are accrued based on historical information on the nature, frequency and average cost of claims and management estimates and represented 2.2% and 2.4% of our revenues for Fiscal 2012 and Fiscal 2011, respectively.

Expenditure capitalized: These represent employee costs, stores and other manufacturing supplies and other works expenses incurred towards product development projects and also includes costs attributable to internally constructed capital items. The increase reflects expenditure on new products and other major product development plans. Considering the nature of our industry, we have to continually invest in the development of new products and also introduce new models to address changing safety, emission and other regulatory norms.

Table of Contents

Depreciation and Amortization: Our depreciation and amortization cost increased by 25.3% to Rs.54,435 million in Fiscal 2012, compared to Rs.43,446 million in Fiscal 2011. The increase in depreciation expenses from Rs.29,382 million in Fiscal 2011 to Rs.31,849 million in Fiscal 2012 was on account of plant and equipment addition (mainly towards capacity and new products). The increase from Rs.14,064 million in Fiscal 2011 to Rs.22,586 million in Fiscal 2012 in amortization of product development cost is consequent to commencement of commercial production of new products mainly Range Rover Evoque and new products in Indian market.

Other income (net): There was a net gain of Rs.9,407 million in Fiscal 2012, representing a swing of Rs.17,625 million, as compared to net loss of Rs.8,218 million in Fiscal 2011.

- i. There was a gain on fair value of conversion option in respect of certain loans of Rs.2,432 million in Fiscal 2012, as compared to loss of Rs.13,850 million for Fiscal 2011. The gain has arisen due to certain options nearing maturity (July 2012) and marginal change in equity price movement as compared to significant increase in Fiscal 2011.
- ii. Miscellaneous income increased by Rs.1,728 million.

For further details refer note 31 to our consolidated financial statements included elsewhere in this annual report.

Interest expense (net): Our interest expense (net of interest capitalized) increased by 3.9% to Rs.38,290 million in Fiscal 2012, compared to Rs.36,854 million in Fiscal 2011. The increase represents increase in borrowing cost at Jaguar Land Rover consequent to issue of GBP 1,500 million Senior Notes by Rs.1,527 million and increase in financing activity by Rs.1,778 million.

Foreign exchange (gain)/loss (net): We had a net foreign exchange loss of Rs.11,154 million in Fiscal 2012, compared to gain of Rs.3,090 million in Fiscal 2011. Due to steep depreciation of Indian rupee against all major currencies, we incurred exchange loss on foreign currency payments and borrowings. A portion of the exchange loss in the Fiscal 2012 was on year end valuation of foreign currency borrowings of Rs.9,672 million as compared a net exchange gain to Rs.644 million in Fiscal 2011.

Impairment of equity accounted investees: In Fiscal 2012, we recognized an impairment loss Rs.4,981 million in respect of its investment in an associate, triggered by economic slowdown and increased competition from new entrants. The associate is engaged in the business of manufacture and sale of construction equipment. The recoverable amount of the investment is determined based on value in use.

Income Taxes: The income tax expense was Rs.4,707 million in Fiscal 2012, compared to Rs.12,787 million in Fiscal 2011.

The net decrease of Rs.8,080 million comprises mainly the following:

- a) On account of increased profits the incremental tax liability is Rs.9,310 million.
- b) There was an increase of Rs.2,366 million in tax on undistributed earnings of subsidiaries and associates (Jaguar Land Rover subsidiaries)
- c) The above increases were offset by the following credits:

- i. In Fiscal 2012, we recognized all previously unrecognized unused tax losses and other temporary differences pertaining to the subsidiary company in the United Kingdom. There was a net additional credit of Rs.12,458 million on account of utilization / credit of unrecognized tax losses / depreciation.
- ii. There has been a reduction in overall marginal tax rates applicable to entities in Fiscal 2012 to 26.9% from 27.8% in Fiscal 2011 (Rs.778 million).
- iii.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

We availed higher tax benefit on research and product development cost tax effect of Rs.7,501 million for Fiscal 2012 as compared to Rs.5,584 million for Fiscal 2011.

- iv. There was reduction in amounts for items considered as inadmissible on account of interest, loss on conversion option and other expenses; net decrease in tax of Rs.5,847 million, as compared to Fiscal 2011. This is because during the year there has been a gain on conversion option compared to loss in Fiscal 2011.

For further details refer note 16 to our consolidated financial statements included elsewhere in this annual report.

Non-controlling Interests in Consolidated Subsidiaries and Share of profit of equity accounted investees, net of tax: In Fiscal 2012, our share of profit of equity accounted investees reflected a loss of Rs.351 million, as compared to loss of Rs.458 million in Fiscal 2011. The increase in profit of some associates was offset due to loss incurred by an associate, engaged in construction equipment business on account of deterioration in the market and competition in India. In Fiscal 2012, share of non-controlling interest reflected a gain of Rs.781 million, as compared to gain of Rs.347 million in Fiscal 2011, primarily due to increased profitability of our subsidiaries.

Table of Contents

Net Income

Our consolidated net income for Fiscal 2012 excluding share of non-controlling interests was Rs.115,659 million, compared to Rs.73,402 million in Fiscal 2011. Net income as a percentage of total revenues increased to 7.0% in Fiscal 2012 from 6.1% to total revenues in Fiscal 2011. This increase was the result of the following factors:

Revenues from the domestic market (India) increased by 18.9% to Rs.552,513 million in Fiscal 2012 from Rs.464,676 million in Fiscal 2011, resulting in earnings before other income, interest and tax of Rs.40,844 million in Fiscal 2012 for Tata and other brand vehicles including financing thereof, as compared to Rs.48,916 million in Fiscal 2011;

Revenues from market outside India increased by 44.9% to Rs.1,112,340 million in Fiscal 2012 from Rs.767,458 million in Fiscal 2011, mainly attributable to our Jaguar Land Rover business. The earnings before other income, interest and tax for Jaguar Land Rover business was Rs.118,895 million in Fiscal 2012 as compared to Rs.75,673 million in Fiscal 2011;

increase in other income, mainly due to gain on the fair value of conversion option; and

lower income tax expense.

Recent Accounting Pronouncements

Please refer to Note 2 (v) to our consolidated financial statements included elsewhere in this annual report for adopted and yet to be adopted accounting pronouncements as of March 31, 2013.

Critical Accounting Policies

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. The actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis and at each balance sheet date. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

Impairment of Goodwill

Cash generating units to which goodwill is allocated are tested for impairment annually at each balance sheet date, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to that unit and then to the other assets of the unit pro rata on the basis of carrying amount of each asset in the unit. Goodwill impairment loss recognized is not reversed in subsequent period. Please refer to Note 13 to our consolidated financial statements included elsewhere in this annual report for assumptions used for goodwill impairment.

Impairment of property, plant and equipment and intangible assets

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable

amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually at each balance sheet date, or earlier, if there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

Table of Contents

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the income statement.

Impairment of equity accounted investees

In Fiscal 2012, the Company had recognized an impairment loss of Rs.4,981 million in respect of its investment in an associate on account of economic slowdown and increased competition from new entrants. The associate is engaged in the business of manufacture and sale of construction equipment. The recoverable amount of the investment is determined based on value in use.

Product Warranty

Vehicle warranties are provided for a specified period of time. Our vehicle warranty obligations vary depending upon the type of the product, geographical location of its sale and other factors.

The estimated liability for vehicle warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency, and average cost of warranty claims and our estimates regarding possible future incidence based on actions on product failures.

Changes in warranty liability as a result of changes in estimated future warranty costs and any additional costs in excess of estimated costs, can materially affect our net income. Determination of warranty liability is based on the estimated frequency and amount of future claims, which are inherently uncertain. Our policy is to continuously monitor warranty liabilities to determine the adequacy of our estimate of such liabilities. Actual claims incurred in the future may differ from our original estimates, which may materially affect warranty expense.

Employee Benefits

Employee benefit costs and obligations are dependent on assumptions used in calculating such amounts. These assumptions include salary increase, discount rates, health care cost trend rates, benefits earned, interest cost, expected return on plan assets, mortality rates and other factors.

While we believe that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect our employee benefit costs and obligations.

Recoverability/recognition of deferred tax assets

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Conversion options valuation

Fair value of conversion option in foreign currency convertible notes/convertible alternative reference securities is determined using various option valuation models such as Black Scholes Merton model, Cox Ross Rubinstein model and Monte Carlo simulation. Management uses its best judgment in estimating the fair value of its financial instruments. However, there are inherent limitations in any valuation technique. Changes in fair valuation of conversion option could have material impact on the results of the Company. However, there are no direct cash flow consequences.

Table of Contents***Financial instruments and fair valuation of prepayment options in Senior Notes***

Fair valuation of prepayment options and other financial instruments requires judgment around the valuations.

Property, plant and equipment

Capital work in progress, as at March 31, 2013 includes building of Rs.3,098.8 million on leased land located in the State of West Bengal in India for the purposes of manufacturing automobiles. As a result of the decision to relocate and construct a similar manufacturing facility at another location, the management was in the process of evaluating several options, under all of which no adjustments to the carrying amount of the buildings was considered necessary. In June 2011, the newly elected Government of West Bengal (referred to as State Government) enacted legislation to cancel the land lease agreement.

The Company challenged the legal validity of the legislation. In June 2012, the High Court of Calcutta (referred to as the High Court) ruled against the validity of the legislation and restored the Company's rights under the land lease agreement. The State Government has filed an appeal in the Supreme Court of India. As of the date of the authorization of the financial statements, the Supreme Court has not concluded on the State Government appeal.

The Company reasonably expects that the High Courts' judgment, based on established law, will be upheld by the Supreme Court. For further details regarding the current legal proceedings with respect to the leased land please refer to Item 4.B Business Overview Legal Proceedings of this annual report.

B. Liquidity and Capital Resources.

We finance our capital requirements through cash generated from operations, debt and equity funding. We also raise funds through sale of investments including divestment in stakes of subsidiaries on a selective basis.

Our business segments are (i) automotive operations and (ii) all other operations. We provide financing for vehicles sold by dealers in India. Our automotive operations segment is further divided into Tata and other brand vehicles (including spares and financing thereof) and Jaguar Land Rover. Given the nature of our industry and competition, we are required to make significant investments in product development on an ongoing basis.

Principal Sources of Funding Liquidity

Our funding requirements are met through a mixture of equity, convertible or non-convertible debt securities and other long-term/short-term borrowings. We access funds from debt markets through commercial paper programs, convertible and non convertible debentures, and other debt instruments. We also continually monitor funding options available in the debt and capital markets with a view to maintaining financial flexibility.

See Note 35 to our audited consolidated financial statements included elsewhere in this annual report for additional disclosures on financial instruments related to liquidity, foreign exchange and interest rate exposures and use of derivatives for risk management purposes.

The following table sets forth our short-term and long-term debt position:

	Fiscal 2013	Fiscal 2012
	(Rs. in millions)	
Total short-term debt (excluding current portion of long-term debt)	116,218	111,180
Total current portion of long-term debt	115,139	109,795
Long-term debt net of current portion	325,457	287,148
Total Debt	556,814	508,123

During Fiscal 2013 and 2012, the effective weighted average interest rate on our long-term debt was 8.9% and 9.7% per annum, respectively.

Table of Contents

The following table sets forth a summary of the maturity profile for our outstanding long-term debt obligations as of March 31, 2013.

Payments Due by Period*	Rs. in millions
Within one year	143,383
After one year and up to two years	86,783
After two year and up to five years	135,010
After five year and up to ten years**	221,045
Total	586,221

* Including interest

** Jaguar Land Rover has only Senior Notes as long-term debt obligations as of March 31, 2013, which are due for payment after five years. We believe that we have sufficient liquidity available to meet our planned capital requirements. However, our sources of funding could be adversely affected by an economic slowdown, as was witnessed in Fiscal 2009, or other macroeconomic factors in India and abroad, such as in the United Kingdom, the United States, Europe and China, which are beyond our control. A decrease in the demand for our vehicles could lead to an inability to obtain funds from external sources on acceptable terms or in a timely manner.

We plan to continue investing in product development and manage our operations to pursue further growth opportunities and address competitive positioning. Additionally, in the Jaguar Land Rover business, we will be investing in augmenting capacity at the UK plants, developing a new engine facility and establishing the China JV. Further, we are exploring opportunities to expand the manufacturing base in the Jaguar Land Rover business. We expect to meet the part of such investments out of operating cash flows and cash and liquidity available to us. In order to meet the balance requirements, we may be required to raise funds towards the long term plans via additional bank loan markets and capital markets access from time to time, as deemed necessary.

At Tata Motors India operations, we have plan to raise long term funds through debt and equity, to refinance current debt and invest in Product development and plant and equipment.

In order to refinance our acquisition related borrowings and for supporting long term funding needs, we continued to raise funds in Fiscal 2012 and Fiscal 2013. We had in the past issued convertible notes, which were convertible into equity or repayable on maturity. Details of major funding during Fiscal 2009 through Fiscal 2013 are provided below.

Table of Contents**Long term funding**

On July 12, 2007, we raised funds aggregating US\$ 490 million (Rs.19,927.1 million at issue) by issue of Zero Coupon Convertible Alternative Reference Securities, or CARS due on July 12, 2012. The note holders had an option to convert the CARS into qualifying securities as per the terms of issue after appropriate adjustment to the conversion price. During Fiscal 2009, we repurchased and cancelled 170 Notes (principal value of US\$ 17 million). There was no conversion of CARS during Fiscal 2011 and Fiscal 2012. In Fiscal 2013, 1 CARS was converted into 22,370 Ordinary Shares and we repaid the entire outstanding amount of CARS in accordance with their terms on July 12, 2012, totaling to US\$ 773.9 million (Rs. 35,374 million), including redemption premium.

In May 2009, we issued secured non-convertible credit enhanced Indian rupee debentures in four tranches, having tenors up to seven years, aggregating Rs.42,000 million on a private placement basis. Proceeds were used to prepay part of the short-term bridge loan taken for the acquisition of the Jaguar Land Rover business. As on March 31, 2013 an amount of Rs.30,500 million is outstanding.

On October 15, 2009, we issued 29,904,306 new equity shares in the form of Global Depository Shares, or GDSs, at a price of US\$12.54 per GDS, aggregating US\$375 million (Rs.17,941.9 million), and 4% convertible notes due 2014, or FCCN, aggregating US\$375 million (Rs.17,941.9 million at time of issue). The holders of the FCCN had an option, subject to the terms and conditions of the issue, to convert these notes into Ordinary Shares, GDSs or ADSs. We utilized the proceeds from the GDS and FCCN to repay the outstanding bridge loan taken for the acquisition of the Jaguar Land Rover business. During Fiscal 2011, 2,576 FCCN were converted into 19,423,734 Ordinary Shares/ADSs. There was no conversion of FCCN during Fiscal 2012. During Fiscal 2013, 433 FCCN were converted into 16,519,201 Ordinary Shares/ADSs. As of March 31, 2013, 741 FCCN remained outstanding, representing the equivalent of 28,549,588 Shares or GDSs or 28,549,588 ADSs as converted. Subsequent to March 31, 2013, the balance of 741 FCCN have been converted into 28,549,566 Ordinary Shares.

In March 2010, we raised funds through further divestments of investments.

In October 2010, we raised funds totaling Rs.33,510 million through an issue of 32,165,000 A Ordinary Shares at a price of Rs.764/- per share (face value of Rs.10 each) and 8,320,300 Ordinary Shares at a price of Rs.1,074/- per share (face value of Rs.10 each) to qualified institutional buyers, under a qualified institutional placement or QIP. This financing strategy enabled us to reduce risks by further de-leveraging.

In May 2011, Jaguar Land Rover issued GBP 1,000 million equivalent senior notes, or Notes. The Notes included GBP 500 million Senior Notes due 2018 at a coupon of 8.125% per annum, US\$ 410 million Senior Notes due 2018 at a coupon of 7.75% per annum and US\$ 410 million Senior Notes due 2021 at a coupon of 8.125% per annum. The proceeds are, or will be used to refinance existing debt and for general corporate purposes. The Notes are callable at a premium for the present value of future interest rates, if called before a specified date for each series of notes and thereafter are callable at fixed premiums.

In September 2011, we raised syndicated foreign currency term loans of US\$ 500 million in two tranches with tenors between four to seven years. The proceeds were used to finance general capital expenditure and investments in its overseas subsidiaries in accordance with guidelines on External Commercial Borrowings, or ECB, issued by the RBI.

In March 2012, Jaguar Land Rover issued GBP 500 million Senior Notes due 2020 at a coupon of 8.25% per annum. The proceeds are/or will be used for general corporate purposes. The notes are callable at a premium for the present value of future interest rates, if called before a specified date and thereafter are callable at fixed premiums.

During Fiscal 2013, we issued rated, listed, unsecured non-convertible debentures of Rs.21,000 million with maturities between 2 to 7 years. During April and May 2013, we further issued rated, listed, unsecured non-convertible debentures of Rs 9,000 million with maturity of 3 years. These are steps towards raising long term financing and optimizing our loan maturity profile.

Table of Contents

In January 2013, Jaguar Land Rover issued US\$ 500 million Senior Notes due 2023 at a coupon of 5.625% per annum. The proceeds have been and will be used for general corporate purposes, including, to support ongoing growth and capital spending plans. The notes are callable at a premium for the present value of future interest rates, if called before a specified date and thereafter are callable at fixed premiums.

In December 2011, Jaguar Land Rover established a 3-5 year committed revolving credit facility for up to GBP 710 million aggregate principal amount from a syndicate of 13 commercial banks. During Fiscal 2013, Jaguar Land Rover received approval to increase the facility to GBP 795 million aggregate principal amount as of March 31, 2013. In July 2013, Jaguar Land Rover increased the size of revolving credit facility from GBP 795 millions to GBP 1.25 billion with 75% of the new facility size (GBP 937.5 million) for 5 years due 2018 and 25% of the new facility size (GBP 312.5 million) for 3 years due 2016.

In May 2013, TML Holdings Pte Ltd. has issued S\$ 350 million (approximately Rs. 15,313.3 million), 4.25% Senior Notes due 2018.

We plan to refinance and raise of long term funding through borrowings or equity issuances, on the basis of review of business plans, operating results and covenant requirements of our existing borrowings.

Table of Contents

Short term funding

We fund our short-term working capital requirements with cash generated from operations, overdraft facilities with banks, short and medium term borrowings from lending institutions, banks and commercial paper. The maturities of these short and medium term borrowings and debentures are generally matched to particular cash flow requirements. We had short-term borrowings of Rs.116,218 million and Rs. 111,180 million as of March 31, 2013 and 2012, respectively. We had unused short-term credit facilities of Rs.204,498 million and Rs.184,702 million as of March 31, 2013 and 2012, respectively.

During April 2012, we received approvals from our Board to increase our working capital limits to Rs.140,000 million from the existing Rs.120,000 million for our India operations. The working capital limits are secured by hypothecation of existing current assets of the Company including stock of raw material, stock in process, semi-finished goods, stores and spares not relating to plant and machinery (consumable stores and spares), bills receivables and book debts including vehicle finance receivable and all other moveable current assets except cash and bank balances, loans and advances of the Company both present and future. The working capital limits are renewed annually.

Our cash and cash equivalents and short term deposits with the banks, were Rs.185,076 million as at March 31, 2013, as compared to Rs.157,648 million as at March 31, 2012. Of the cash and cash equivalents and short deposits as at March 31, 2013, Jaguar Land Rover has Rs 166,263 million and Rs 126,804 as at March 31, 2012. Our investment in Mutual Funds (available for sale in liquid funds) were Rs.75,327 million as at March 31, 2013, as compared to Rs.75,356 million as at March 31, 2012. These include investments held by Jaguar Land Rover Rs.67,485 million as March 31, 2013 and Rs.71,334 million as at March 31, 2012. These resources enable us to cater to business needs in the event of changes in credit market conditions.

Our cash in India is located at various subsidiaries within the Tata Motors Group. Jaguar Land Rover's subsidiary in China is subject to foreign exchange controls including transferring cash to other companies of the group outside of China. Brazil, Russia, South Africa and other locations also have regulatory restrictions disincentives or costs on pooling or transferring of cash, which affects our use of those funds.

There may also be legal or economic restrictions on the ability of subsidiaries to transfer funds to us in the form of cash dividends, loans, or advances. However such restrictions have not had and are not estimated to have significant impact on our ability to meet our cash obligations.

Loan Covenants

Some of our financing agreements and debt arrangements set limits on and/or require prior lender consent for, among other things, undertaking new projects, issuing new securities, change in management, mergers, sale of undertakings and investment in subsidiaries. In addition, certain negative covenants may limit our ability to borrow additional funds or to incur additional liens, and/or provide for increased costs in case of breach. Certain of our financing arrangements also include financial covenants to maintain certain debt-to-equity ratios, debt-to-earnings ratios, liquidity ratios, capital expenditure ratios and debt coverage ratios.

We monitor compliance with our financial covenants on an ongoing basis. We also review our refinancing strategy and continue to plan for deployment of long term funds to address any potential non-compliance.

In May 2009, we issued, on a private placement basis, an aggregate amount of Rs.42,000 million in secured non-convertible credit enhanced Indian rupee debentures in four tranches, having tenors up to seven years. Proceeds were used to prepay part of the short-term bridge loan taken for the acquisition of the Jaguar Land Rover business. As of March 31 2013, principal amount of Rs 30,500 million was outstanding of which Rs 18,000 million is due for repayment in Fiscal 2014.

This credit enhancement of the debentures is in the form of bank guarantees and requires us to be in compliance with certain covenants with respect to Tata Motors standalone financials under Indian GAAP and further provide for an increase in costs upon certain specified breaches of the covenants. In Fiscal 2013, we did not comply with two covenants, relating to our ratio of total outstanding liability to tangible network and our debt service coverage ratio. As a result, the cost of credit enhancement provided by the bank increased by 100 basis points per annum. Pursuant to the terms of the deed of Trust, we requested the Security Trustee to waive the requirements of additional costs amounting to Rs.450.6 million which are due in Fiscal 2014. We received the approval from the Security Trustee for the waiver of such additional costs. Considering the continuing weak operating environment in India, we expect that we will be unable to comply with the same covenants in Fiscal 2014 and anticipate seeking the Security Trustee's waiver of additional costs for Fiscal 2015 totaling Rs.219.0 million. Such non-compliance with loan covenants has not triggered any cross-default provisions under any of our financing documents. Except for the two covenants discussed in this section, we expect to comply with our financial covenants during the 12-month period following the date of this annual report.

We believe that the above non-compliance will not affect our ability to raise funds in future.

Table of Contents**Cash Flow Data**

The following table sets forth selected items from our consolidated statements of cash flows for the periods indicated.

	Rs. in millions		
	2013	2012	2011
Net Cash provided by Operating Activities:	222,933	218,227	141,976

Net change in cash and cash equivalents	(32,521)	43,866	23,989
Cash and cash equivalents, end of the year	116,118	145,952	90,671

Fiscal 2013 Compared to Fiscal 2012

Cash and cash equivalents on March 31, 2013 decreased by Rs.29,834 million from March 31, 2012, to Rs.116,119 million. The decrease in cash and cash equivalents resulted from the changes to our cash flows in Fiscal 2013 when compared to Fiscal 2012 as described below.

Net cash provided by operating activities totaled Rs.222,933 million in Fiscal 2013. Cash inflows from operating activities increased by Rs.4,706 million in Fiscal 2013 from Rs.218,227 million in Fiscal 2012. The increase in net cash from operations were consequent to higher sales volumes in the Jaguar Land Rover business, which were partially offset by reduced sales volumes for Tata and other brand vehicles. Earnings before other income, interest and tax of Jaguar Land Rover business increased from Rs.118,895 million in Fiscal 2012 to Rs.150,687 million in Fiscal 2013, whereas earnings before other income, interest and tax of Tata and other brand vehicles (including financing thereof) decreased to Rs.10,701 million in Fiscal 2013 as compared to Rs.40,884 million in Fiscal 2012. As a result of an increase in volumes at Jaguar Land Rover, the trade receivables and inventories increased by Rs.51,339 million in Fiscal 2013 as compared to Rs.34,032 million in Fiscal 2012. After considering the increase in accounts payable and provisions, there was a net inflow of cash on account of changes in operating assets and liabilities of Rs.26,080 million in Fiscal 2013 as compared to Rs.42,915 million in Fiscal 2012 for Jaguar Land Rover. For Tata and other brand vehicles, the net change represented an outflow of Rs.32,870 million in Fiscal 2013 as compared to Rs.40,055 million in Fiscal 2012. Such outflow includes net increase in vehicle financing receivables of Rs.36,406 million in Fiscal 2013 as compared to Rs.30,660 million in Fiscal 2012, as a result of an increase in financing volumes.

Net cash used in investing activities totaled Rs.236,116 million in Fiscal 2013. Cash outflows from investing activities increased by Rs.32,772 million in Fiscal 2013 from Rs.203,344 in Fiscal 2012, mainly due to investment in property, plant and equipment and product development projects at our Jaguar Land Rover business. In Fiscal 2013, payments for capital expenditure at our Jaguar Land Rover business increased by Rs.49,844 million to Rs.157,458 million from Rs.107,614 million in Fiscal 2012. The increases in these investments are intended to support continued growth in sales volumes at our Jaguar Land Rover business during Fiscal 2013. The following table sets forth a summary of our cash flow on property plant and equipment and intangible assets for the periods indicated.

Rs. in millions

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

	2013	2012
<u>Purchase of / payment for Property, Plant and Equipment and Intangible Assets (Net)</u>		
Tata and other brand vehicles	27,587	30,204
Jaguar Land Rover	157,458	107,614

Our net investment in short-term deposit margin moneys and loans resulted in an outflow of Rs.59,849 million in Fiscal 2013 as compared to Rs.70,952 million in Fiscal 2012. This outflow mainly related to surplus cash investments in bank deposits by Jaguar Land Rover of Rs.66,637 million.

Table of Contents

Net cash used in financing activities totaled Rs.19,338 million in Fiscal 2013, as compared to cash inflow of Rs.28,983 million in Fiscal 2012, mainly due to increased interest paid in Fiscal 2013, resulting from increased borrowing levels. For Tata and other brand vehicles, the short term debt increased by Rs.12,366 million and long term debt increased by Rs.15,066 million in Fiscal 2013, as compared to net reduction of Rs.7,335 million in short term debt and increase of Rs.16,981 million in long term debt in Fiscal 2012. For Jaguar Land Rover, the short term debt increased by Rs.2,383 million and long term debt increased by Rs.25,375 million in Fiscal 2013, as compared to net reduction of Rs.9,266 million in short term debt and increase of Rs.81,324 million in long term debt in Fiscal 2012.

We paid dividend (including to non-controlling shareholders of subsidiaries) of Rs.15,057 million in Fiscal 2013 as compared to Rs.14,894 million in Fiscal 2012.

Fiscal 2012 Compared with Fiscal 2011

Cash and cash equivalents on March 31, 2012 increased by Rs.55,281 million from March 31, 2011, to Rs.145,952 million. The increase in cash and cash equivalents resulted from the changes to our cash flows in Fiscal 2012 when compared to Fiscal 2011 as described below.

Net cash provided by operating activities totaled Rs.218,227 million in Fiscal 2012. Cash inflows from operating activities increased by Rs.76,251 million in Fiscal 2012 from Rs.141,976 million in Fiscal 2011, mainly due to higher sales volumes in the Jaguar Land Rover business and Tata and other brand vehicles. Earnings before other income, interest and tax of Jaguar Land Rover business increased from Rs.75,673 million in Fiscal 2011 to Rs.118,895 million in Fiscal 2012, whereas earnings before other income, interest and tax of Tata and other brand vehicles (including financing thereof) decreased to Rs.40,844 million in Fiscal 2012 as compared to Rs.48,916 million in Fiscal 2011. At Jaguar Land Rover, the trade receivables and inventories increased by Rs.34,032 million in Fiscal 2012 as compared to Rs.5,654 million in Fiscal 2011. However, there was an increase in accounts payable and provisions, resulting in net inflow of cash on account of changes in operating assets and liabilities of Rs.42,915 million in Fiscal 2012 as compared to Rs.11,649 million in Fiscal 2011 for Jaguar Land Rover. For Tata and other brand vehicles the net change represented an outflow of Rs.40,055 million in Fiscal 2012 as compared to Rs.39,159 million in Fiscal 2011. After considering increased utilization of vehicle financing of Rs.30,660 million, net outflow towards other operating assets and liabilities was Rs.9,395 million in Fiscal 2012.

Net cash used in investing activities totaled Rs.203,344 million in Fiscal 2012. Cash outflows from investing activities increased by Rs.128,356 million in Fiscal 2012 from Rs.74,988 in Fiscal 2011, mainly due to investment in property, plant and equipment and product development projects at our Jaguar Land Rover business. In Fiscal 2012, payments for capital expenditure at our Jaguar Land Rover business increased by Rs.52,579 to Rs.107,614 million from Rs.55,035 million in Fiscal 2011.

	Rs. in millions	
	2012	2011
<u>Purchase of / payment for Property, Plant and Equipment and Intangible Assets (Net)</u>		
Tata and other brand vehicles	30,204	26,679
Jaguar Land Rover	107,614	55,035

Our net investment in short-term deposit, margin money and loans resulted in an outflow of Rs.70,952 million in Fiscal 2012 as compared to inflow of Rs.2,339 million in Fiscal 2011. This outflow represents mainly surplus cash investments in mutual funds by Jaguar Land Rover of Rs.58,784 million and restricted deposits of Rs.11,272 million.

Net cash from financing activities totaled Rs.28,983 million of cash inflows in Fiscal 2012, resulted from the additional debt incurred. For Tata and other brand vehicles, short term debt decreased by Rs.7,514 million and long term debt increased by Rs.17,227 million in Fiscal 2012, as compared to net increase of Rs.6,611 million in short term debt and reduction of Rs.6,460 million in long term debt in Fiscal 2011. For Jaguar Land Rover, short term debt decreased by Rs.9,266 million and long term debt increased by Rs.81,324 million in Fiscal 2012, as compared to net reduction of Rs.32,537 million in short term debt and increase of Rs.1,337 million in long term debt in Fiscal 2011.

During Fiscal 2011, we raised Rs.32,479 million by way of issue of shares through QIP issue, considering the market conditions and need of own funding to address the leverage.

We paid dividend (including to non-controlling shareholders of subsidiaries) of Rs.14,894 million in Fiscal 2012 as compared to Rs.10,230 million in Fiscal 2011.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Our financial strategy is maintaining a strong financial position that will allow us to fund its product development projects, capital expenditures and financing business (in India) efficiently, even if earnings are subject to short-term fluctuations. We believe that we maintain sufficient liquidity for our present requirements and will continue to be able to access funds from external sources in large amounts and at relatively low costs.

Table of Contents***Balance Sheet Data***

Please refer the consolidated balance sheet in the enclosed financial statements. We have discussed below major items and variations.

Our total assets were Rs.1,668,695 million and Rs.1,434,536 million as of March 31, 2013 and 2012, respectively. The increase in assets as of March 31, 2013 was partly attributable to foreign currency translation into Indian rupees.

Our total current assets have increased by Rs.70,031 million to Rs.723,261 million as of March 31, 2013, as compared to Rs.653,230 million as of March 31, 2012.

Cash and cash equivalents were Rs.116,119 million as of March 31, 2013, compared to Rs.145,952 million as of March 31, 2012. We hold cash and cash equivalent principally in Indian rupees, GBP, and Chinese Renminbi. It includes Rs.43,053 million as of March 31, 2013 (as compared to Rs.36,974 million as of March 31, 2012) held by Jaguar Land Rovers China subsidiary which is subject to exchange control restrictions that prevent the balances from being available for general use by Tata Motors Limited and other subsidiaries. These are allowed to be utilized for manufacturing and sales activity in China and for making dividend payments. Out of cash and cash equivalents as at March 31, 2013, Jaguar Land Rover holds Rs.102,649 million, which is surplus cash deposits for future use. As of March 31, 2013, we had short term deposits of Rs.68,957 million as compared to Rs.11,695 million as at March 31, 2012. The increase in cash and cash equivalents and deposits was primarily attributable to performance of our Jaguar Land Rover operations.

As of March 31, 2013, we had finance receivables including non-current portion (net of allowances for credit losses) of Rs.198,219 million as compared to Rs.171,241 million as of March 31, 2012, an increase of Rs.26,978 million representing increase in our vehicle financing activity. The vehicle financing integral to our automotive operations in India. For further detail see B. Liquidity and Cap. Resources Liabilities and Sources of Financing Principal Sources of Funding Liquidity Tata and other brand vehicles vehicle financing .

Trade receivables (net of allowance for doubtful receivables) were Rs.104,194 million as of March 31, 2013, representing an increase of Rs.16,539 million over March 31, 2012. As a result of reduction in volumes, the trade receivables for Tata and other brand vehicles have decreased from Rs.32,369 million as at March 31, 2012 to Rs.25,878 million as at March 31, 2013. The past dues for more than six months (gross) have increased from Rs.4,740 million as at March 31, 2012 to Rs.7,242 million as at March 31, 2013 and these mainly represent dues from government-owned transport undertaking and passenger vehicle dealers, for which we are pursuing recovery. The trade receivables of our Jaguar Land Rover business increased from Rs.53,819 million as at March 31, 2012 to Rs.76,116 million as at March 31, 2013, as a result of the growth in revenue by 16.8% (GBP terms).

As of March 31, 2013, inventories were at Rs.208,393 million compared to Rs.180,834 million as of March 31, 2012. The increase in finished goods inventory was Rs.28,012 million in Fiscal 2013 as compared to Fiscal 2012. In terms of number of days to sales, finished goods represented 31 inventory days in Fiscal 2013 sales as compared to 30 inventory days in Fiscal 2012. The increase in finished goods mainly relates to the increase in volumes, mainly at our Jaguar Land Rover operations.

Our investments (current and non-current investments) have decreased marginally to Rs.81,473 million as of March 31, 2013 from Rs.82,569 million as of March 31, 2012, representing a decrease of Rs.1,096 million. Our investments mainly comprise mutual fund investments of Rs.75,327 million as of March 31, 2013 as compared to Rs.75,356 million as at March 31, 2012. Of such investments Jaguar Land Rover were Rs.67,485 million as at March 31, 2013 as compared to Rs.71,334 million as at March 31, 2012.

Our other assets (current and non-current) decreased marginally to Rs.64,775 million as at March 31, 2013 from Rs.67,685 million as of March 31, 2012. The decrease mainly is due to decrease in VAT, other taxes recoverable, statutory deposits and dues from government of Rs.53,643 million as of March 31, 2013 as compared with Rs.58,581 million as of March 31, 2012 and increase in prepaid expenses of Rs.5,686 million as at March 31, 2013 as compared with Rs.3,529 million as at March 31, 2012.

Our other financial assets (current and non-current) have increased to Rs.39,686 million as of March 31, 2013 from Rs.38,391 million as of March 31, 2012. Derivative financial instruments increased by Rs.2,916 million from Rs.5,847 million as at March 31, 2012 to Rs.8,763 million as at March 31, 2013. Margin money held as security for securitization of finance receivables has decreased from Rs.2,589 million as at March 31, 2012 to Rs.2,096 million as at March 31, 2013, due to an increase in securitization and collection of receivables.

The income tax assets (both current and non-current) were Rs.9,062 million as of March 31, 2013 as compared to Rs.9,437 million as of March 31, 2012.

Table of Contents

The property, plant and equipment (net of depreciation) of Rs.346,663 million as at March 31, 2013, increased by Rs.63,947 million during Fiscal 2013. The increase mainly relates to Jaguar Land Rover towards investment in engine plant to support the growing demand for vehicles.

The intangible assets were Rs.351,236 million as at March 31, 2013, which mainly include product development projects and brands and other intangible assets, an increase by Rs.68,889 million during Fiscal 2013. As at March 31, 2013, there were product development project in process amounting to Rs.141,822 million. We are engaged in automotive business and our products include commercial vehicles in the entire range (LCV to M&HCV), passenger cars, and cars or SUV in the premium segment. Considering the nature of industry and competition, we continuously introduce new products and variants to meet the customers' needs.

Our carrying value of investments in equity accounted investees is Rs.30,392 million as at March 31, 2013, as compared to Rs.23,266 million as at March 31, 2012. In Fiscal 2012, we had recorded impairment loss of Rs.4,981 million in respect of an associate engaged in manufacturing and sale of construction equipment. The impairment was on account of economic slowdown and competitive pressures. In Fiscal 2013, Jaguar Land Rover has invested Rs.6,217 million in a joint venture to manufacture cars in China with Chery Automobiles Limited.

A deferred tax liability (net) of Rs.9,937 million was recorded in the income statement. Rs.10,685 million was recorded as asset (net) in other comprehensive income, which mainly include derivative financial instruments of Rs.4,144 million (credit) and Rs.5,932 million (credit) towards post-retirement benefits.

Accounts payable were Rs.409,096 million as of March 31, 2013, as compared to Rs.334,559 million as of March 31, 2012, reflecting increase in operations at Jaguar Land Rover.

Other financial liabilities (current and non-current) were Rs.60,288 million as of March 31, 2013 (Rs.34,771 million as of March 31, 2012), an increase of Rs.25,517 million, mainly include liability towards vehicles sold under repurchase arrangement, derivative instruments, deferred payment liabilities, interest accrued but not due on loans, lease liabilities etc. We have derivative financial instruments representing options and other hedging arrangements; mainly relate to Jaguar Land Rover. We have sold vehicles in certain markets under agreed repurchase arrangements for which we have liability of Rs.15,014 million as of March 31, 2013 (Rs.12,534 million as of March 31, 2012).

The provisions (current and non-current) as of March 2013 and 2012 were Rs.80,314 million and Rs.66,354 million, respectively, representing an increase of Rs.13,960 million. The provision for warranty increased by Rs.12,385 million mainly on account of volume growth. Warranty has been estimated on the basis of historical information on the nature, frequency and average costs and estimate regarding future incurrence. We have made a provision of Rs.2,124 million in Fiscal 2013 pursuant to lawsuit filed by employee union in South Korea to include some elements of non-ordinary salary and bonus as part of ordinary wages.

Other liabilities (non-current) have increased to Rs.58,704 million as of March 31, 2013, as compared to Rs.27,962 million as of March 31, 2012. The increase related to an additional employee benefit obligations totaling Rs.55,191 million incurred during this period, mainly pertaining to the Jaguar Land Rover pension plan, consequent to changes in actuarial factors, mainly discount rate.

Our total debt was Rs.556,814 million as of March 31, 2013, as compared to Rs.508,123 million as of March 31, 2012. Short-term debt including the current portion of long-term debt was Rs.231,357 million as of March 31, 2013, as compared to Rs.220,975 million as of March 31, 2012. Our long-term debt, excluding the current portion, increased by Rs.38,309 million to Rs.325,458 million as of March 31, 2013 (Rs.287,148 million as of March 31, 2012). Long-term debt including the current portion increased by Rs.43,653 million to Rs.440,596 million. During Fiscal 2013, we issued rated, listed, unsecured non-convertible debentures of Rs.21,000 million with maturities of 2-7 years as a step to raise long term resources and optimize the loan maturity profile and Jaguar Land Rover issued USD 500 million Senior Notes due 2023 at a coupon of 5.625% per annum. There was a net increase in collateralized debt obligation by Rs.3,057 million as of March 31, 2013, mainly due to securitized finance receivables. Further, Senior notes (EURO MTF listed debt) increased by Rs.26,436 million to Rs.150,087 million as of March 31, 2013 from Rs.123,651 million as of March 31, 2012. Fixed deposits from public and shareholders (unsecured) decreased by Rs.20,018 million, whereas loan from banks/financial institution increased by Rs.27,726 million.

Total shareholders' equity was Rs.373,906 million and Rs.331,344 million as of March 31, 2013 and 2012, respectively.

Our reserves increased from Rs.146,808 million as of March 31, 2012 to Rs.197,577 million as of March 31, 2013. We paid a dividend of Rs.14,855 million in Fiscal 2013.

Our other components of equity reflected a loss of Rs.12,660 million as of March 31, 2013 against a gain of Rs.1,311 million as of March 31, 2012. We have accounted for an actuarial gains/loss (net) reduction of Rs.23,086 million (after considering the tax credit of Rs.6,156 million) in respect of pension obligations. Further, there was a loss of Rs.15,106 million on cash flow hedges, recorded in comprehensive income. These

were offset by a currency translation credit of Rs.798 million and gain on available for sale investments of Rs.353 million.

Table of Contents

The ratio of net debt to shareholders' equity (total debt less cash and cash equivalents and liquid marketable securities divided by total shareholders' equity) under IFRS increased from 0.9 as of March 31, 2012 to 1.0 as of March 31, 2013. Details of the calculation of this ratio are set forth in Exhibit 7.1 to this annual report.

- (1) The following table sets forth our contingent liabilities as of the dates indicated.

	Fiscal 2013	Fiscal 2012
	(Rs. in millions)	
Income Tax	1,215	1,832
Excise Duties	10,116	4,430
Sales Tax	4,574	5,506
Other Taxes and Claims*	3,055	2,383
Other Contingencies	467	836
Total	19,426	14,986

- * Other taxes and claims include claims by other revenue authorities and distributors. See Item 4.B Business Overview Legal Proceedings , of this annual report.

- (2) Rs.41,051 million and Rs.61,964 million in Fiscal 2013 and 2012, respectively, represent executory contracts on capital accounts otherwise provided for.

On an ongoing basis, our legal department reviews pending cases, claims by third parties against us and other contingencies. For the purposes of financial reporting, we periodically classify these matters into gain contingencies and loss contingencies. Gain contingencies are not recognized until the contingency has been resolved and amounts are received or receivable. For loss contingencies that are considered probable, an estimated loss is recorded as an accrual in financial statements and, if the matter is material, the estimated loss is disclosed. We do not consider any of these matters to be individually sufficiently material to warrant disclosure in our financial statements. Loss contingencies that are considered possible are not provided for in our financial statements, but if we consider such contingencies to be material, individually or in the aggregate, they are disclosed in our financial statements. Most loss contingencies are classified as possible unless clearly frivolous, in which case they are classified as remote and are monitored by our legal department on an ongoing basis for possible deterioration. We do not disclose remote matters in our financial statements. See note 34 of our audited consolidated financial statements included elsewhere in this annual report for additional information regarding our material claims and contingencies.

Since Fiscal 1997, we have benefited from participation in the EPCG Scheme which permits us to import capital equipment under a special license at a substantially reduced customs duty. Our participation in this scheme is subject to us fulfilling an obligation to export goods manufactured or produced by the use of capital equipment imported under the EPCG Scheme to the value of a multiple of the cost of insurance and freight value of these imports or customs duty saved over a period of 6, 8 and 12 years from the date of obtaining the special license.

Table of Contents

We currently hold 92 licenses which require us to export our products of a value of approximately Rs.71.71 billion between the years 2002 to 2019, and we carefully monitor our progress in meeting our incremental milestones. After fulfilling some of the export obligations as per provisions of Foreign Trade Policy, as on March 31, 2013 we have remaining obligations to export products of a value of approximately Rs.4.66 billion by March 2019. In the event that the export obligation under the EPCG Scheme is not fulfilled, we would have to pay the differential between the reduced and normal duty on the goods imported along with interest. In view of our past record of exceeding our export milestones, and our current plans with respect to our export markets, we do not currently foresee any impediments to meeting our export obligation in the required time frame.

Tata and other brand vehicles vehicle financing:

Through our vehicle financing division and wholly owned subsidiary, TMFL, we also provide financing services to purchasers of our vehicles through our independent dealers, who act as our agents, and through our branch network. The vehicle financing is intended to encourage sale of vehicles by providing financing to the dealers customers and as such is an integral part of automotive business.

In Fiscal 2013 and 2012, 33% and 27%, respectively, of our sales volumes in India were financed under loan contracts to our dealer s customers. As of March 31, 2013 and 2012 our customer finance receivable portfolio comprised 732,550 and 665,169 contracts, respectively, with gross finance receivables of approximately, Rs.212,754 million and Rs.182,330 million as at March 31, 2013 and 2012, respectively. We follow specified internal procedures including quantitative guidelines for selection of our finance customers to assist in managing default and repayment risk in our portfolio. We originate all the contracts through our authorized dealers and direct marketing agents with whom we have agreements. All our marketing, sales and collection activities are undertaken through dealers or by our subsidiary, TMFL.

We securitize or sell our finance receivables on the basis of evaluation of market conditions and funding requirements. The constitution of these pools is based on criteria that are decided by credit rating agencies and/or based on the advice that we receive as to the marketability of a pool. We undertake these securitizations of our receivables in either or both of the following forms:

assignment of the receivables due from purchasers under loan agreements; and

securitization of receivables due from purchasers by means of private placement.

We act as collection agent on behalf of the investors, representatives, special purpose vehicles or banks, in whose favor the receivables have been assigned, for the purpose of collecting receivables from the purchasers on the terms and conditions contained in the applicable deeds of securitization, in respect of which pass-through certificates are issued to investors in case of special purpose vehicles, or SPVs. We also secure the payments to be made by the purchasers of amounts constituting the receivables under the loan agreements to the extent specified by rating agencies by any one or all of the following methods:

by furnishing to the investors collateral, in respect of the obligations of the purchasers and the undertakings to be provided by us;

by furnishing, in favor of the investors, 16% to 32% of the gross receivables as cash collateral in case of previous year securitization, for securitizations done during Fiscal 2013 the range lies between 11% to 15% of the gross receivables either by way of a fixed deposit or bank guarantee to secure the obligations of the purchasers and our obligations as the collection agent, based on the quality of receivables and rating assigned to the individual pool of receivables by the rating agency(ies); and

by way of over-collateralization or by investing in subordinate pass-through certificates to secure the obligations of the purchasers.

For further details refer Note 36(b) to our consolidated financial statements included elsewhere in this annual report.

Capital Expenditure

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Capital expenditure totaled Rs.210,956 million, Rs.147,164 million and Rs.90,719 million during Fiscal 2013, 2012 and 2011, respectively. Our automotive operations accounted for a majority of this capital expenditure.

Our capital expenditures, during the past three years in India related mostly to (i) capacity expansion and new production facilities, (ii) the introduction of new products such as the Tata Nano, World Truck, Tata 407 Pickup, Tata Super ACE, Tata ACE EX, Tata Magic, Winger and Sumo Grande, (iii) the development of planned future products and technologies, (iv) quality and reliability improvements aimed at operating cost reductions and (v) modernization.

Capital expenditure in the Jaguar Land Rover business mainly included expenditure on plant at Halewood for Range Rover Evoque manufacturing and engine plant at Wolverhampton in Midlands UK, the construction which is in process. Jaguar Land Rover has entered into a joint venture agreement with Chery Automobile to build a factory in China for manufacturing of cars for Chinese market and product development for proposed new product introductions.

Table of Contents

For details on our product development projects, please refer note 14 to our consolidated financial statements included elsewhere in this annual report.

Tata Motors continues to focus on development of new products for the Indian market and other international market it serves. The Jaguar Land Rover business continues to make investments in new technologies through its research and development activities to develop products that meet the requirements of the premium segment including developing sustainable technologies to improve fuel economy and reduce CO2 emissions. Please refer to Item 4.B Business Overview Government Regulations of this annual report for further details.

We intend to continue to invest in our business units and research and development over the next several years, including capital expenditures for our ongoing projects, new projects, product development programs, mergers, acquisitions and strategic alliances to build and expand our presence in the passenger vehicle and commercial vehicle categories.

Some of our recently launched and anticipated new products are as follows:

Heavy Trucks: In September 2012, we launched Tata LPT 3723 first in class five axle rigid trucks in India in the 10 x 4 configuration, the Tata Prima 3138.K Tipper, the Tata Prima 4938.S tractor and the Tata Prima 230 HP LX range consisting of Tata Prima LX 4923.S, Tata Prima LX4023.S and Tata LPK 3118 tipper.

Buses: We launched MCV buses for intercity (AC 45 Seater) and staff transportation (Non AC 41 Seater), LP/ LPO Starbus Ultra with best in class features and fuel efficiency tailored to suit Indian conditions with highest capacity school bus in ICV platform in India (56 seats).

Passenger Cars: We launched the all-new Vista D90; and refreshed Tata Indica eV2, the most efficient car in its class with a mileage of 25 kmpl, with new exteriors and additional convenience features, launched the Manza Club Class with first in class features like 6.5 infotainment screen with voice enabled GPS guidance system, infinity roof, premium Italian leather seating system and plush interiors and the Nano MY13 with features like music system with Bluetooth/USB, glove box, refreshed interiors, etc., in an array of colours.

Utility vehicles: We launched the Tata Safari Storme with new interiors and improved performance with features like disc brake on all wheel and projector lens head lamp, we also launched Tata Aria Pure LX, a new variant with a bouquet of features.

Jaguar F-Type: We launched the new Jaguar F-TYPE convertible, which has been engineered for improved performance and responsive handling through features like supercharged V6 and V8 engines, lightweight body construction and advanced driving technologies.

Jaguar 2013 Model Year Sportbrake: In 2012, the new Jaguar XF Sportbrake took Jaguar's globally acclaimed sporting saloon and extended its versatility and practicality.

New Range Rover: The all new Range Rover, which was launched in September 2012, has been developed from the ground up to provide a luxurious driving experience. Its elegant styling is a fresh interpretation of the car's iconic design cues and while instantly recognizable as a Range Rover, the new vehicle takes a significant step forward with a bold evolution of the characteristic design.

We engaged in additional financing activities during Fiscal 2012 and 2013 as described above in the introduction to this Item 5.B. Liquidity and Capital Resources .

C. Research and Development, Patents and Licenses, etc.

Please see Item 4.B Business Overview of this annual report for the information required by this item.

D. Trend Information.

Please see Item 5.A Operating Results of this annual report for the information required by this item.

Item 6. Directors, Senior Management and Employees.**A. Directors and Senior Management.****Board of Directors.**

Under our Articles of Association, the number of our directors cannot be less than three or more than fifteen. At present, there are twelve directors.

Article 127 of our Articles of Association provide that the Board of Directors of Tata Steel, which, with its subsidiary, owns, as of June 30, 2013, 5.54% of our Ordinary Shares and none of A Ordinary Shares, has the right to nominate one director, the Steel Director to the Board. Mr. Cyrus P. Mistry was appointed as a nominee director of Tata Steel with effect from May 29, 2013.

In addition, our Articles of Association provide that (a) our debenture holders have the right to nominate one director; a Debenture Director, if the trust deeds relating to outstanding debentures require the holders to nominate a director; and (b) financial institutions in India, have the right to nominate two directors, the Financial Institutions Directors, to the Board pursuant to the terms of the loan agreements. Currently, there is no Debenture Director or Financial Institutions Director on the Board. Our directors are not required to hold any of our Shares by way of qualification.

As of June 30, 2013, our directors and senior management, in their sole and joint names, beneficially held an aggregate of 1,369,190 Ordinary Shares (approximately 0.05% of our issued share capital) and 120,860 A Ordinary Shares (approximately 0.03% of our issued share capital). In addition, some of our directors hold as trustees for various non-affiliated trusts, an aggregate of 1,774,880 Shares (representing approximately 0.07% of our issued share capital).

- (7) As per the Company policy employees retire at the age of 60.

Table of Contents

Biographies

Set forth below is a short biography of each of our directors, senior management and Chief Financial Officer:

Mr. Cyrus P. Mistry (Chairman): Mr. Cyrus P. Mistry is the Chairman of Tata Sons. He has been a director of Tata Sons since 2006. In addition to being Chairman of Tata Sons, Mr. Mistry is also Chairman of all major Tata companies, including Tata Industries, Tata Steel, Tata Motors Limited, TCS, Tata Power, Tata Teleservices, Indian Hotels, Tata Global Beverages and Tata Chemicals.

He was appointed as a director of Tata Motors with effect from May 29, 2012, and as Deputy Chairman of the Company with effect from November 7, 2012. Mr. Mistry took over as Chairman from Mr. Ratan N. Tata on his retirement with effect from December 28, 2012.

Mr. Mistry was previously a Managing Director of the Shapoorji Pallonji group. Under Mr. Mistry's guidance, Shapoorji Pallonji's construction business grew from a turnover of US\$20 million to approximately US\$1.5 billion. The group's companies have evolved from pure construction to executing projects under design and build and EPC delivery methodologies, implementing complex projects in the marine, oil and gas, and rail sectors. Under Mr. Mistry's stewardship, the companies executed many landmark projects in India—construction of the tallest residential towers, the longest rail bridge, the largest dry dock and the largest affordable housing project. The group's international construction business is now present in over 10 countries.

Mr. Mistry was responsible for building the infrastructure development vertical in the Shapoorji Pallonji group, beginning in 1995 with a 106MW power project in Tamil Nadu, followed by the development of India's largest biotech park near Hyderabad, in partnership with the Andhra Pradesh government. The infrastructure vertical has also developed two large road projects totaling an investment of US\$550 million.

Mr. Mistry is a graduate of civil engineering from the Imperial College London (1990) and has an MSc in management from the London Business School (1997). He was recently bestowed with the Alumni Achievement Award by the London Business School.

Mr. Ratan N. Tata: Mr. Tata holds a B.Sc. (Architecture) degree in structural engineering from Cornell University, USA, and completed the Advanced Management Program at Harvard Business School, USA. He joined the Tata Group in 1962. In 1991, Mr. Tata was appointed Chairman of Tata Sons. Mr. Tata is associated with various organizations in India and overseas significant being Alcoa, Mitsubishi Corporation, the American International Group, JP Morgan Chase and Rolls Royce. Mr. Tata is also affiliated with the Indian Institute of Science, the Tata Institute of Fundamental Research and is the Chairman of the two of the largest private sector promoted philanthropic trusts in India. During his tenure, the combined revenues of Tata entities have grown over ten-fold to annualized revenues of over US\$100 billion.

The Government of India honored Mr. Tata with its second highest civilian award, the Padma Vibhushan, in 2008. Earlier, in 2000, he had been awarded the Padma Bhushan. Mr. Tata has also been conferred honorary doctorates in business administration by the Ohio State University, in technology by the Asian Institute of Technology, Bangkok, in science by the University of Warwick and a fellowship of the London School of Economics.

Mr. Tata joined the Company's Board in 1981, became Executive Chairman in 1988 and was appointed as the Non Executive Chairman in 2001. Under his leadership, the Company has transformed from being a leader in the domestic commercial vehicle market to being India's largest automobile company, with strong businesses in both the commercial vehicles and passenger car segments and a growing international footprint. Some of his achievements include the design and development of India's first indigenously produced car, the Indica, and the Nano, among the world's cheapest cars and the acquisition of Jaguar Land Rover. He retired on December 28, 2012, on attaining the age of 75 as per the retirement policy and was appointed as Chairman Emeritus with immediate effect.

Mr. Ravi Kant (Vice-Chairman): Mr. Kant had his education at the Mayo College, Ajmer, the Indian Institute of Technology, Kharagpur and did his Masters in Management (Industry) from the Aston University, UK. He was conferred with an Honorary D.Sc. by the Aston University, UK and is an Honorary Industrial Professor at the University of Warwick, UK. Mr. Kant has extensive experience in the manufacturing and marketing fields, particularly in the automobile industry. Prior to joining the Company, he was with Philips India Limited as the director of the Consumer Electronics business.

He was awarded the Bombay Management Association Management Man of the Year Award 2008-09. The Indian Institute of Metals conferred him with the Honorary Membership of the Institute in the year 2010. He is also on the governing Board of Vale Columbia Center on Sustainable International Investment, SIFE Worldwide, the National Institute of Design, Ahmedabad, Chairman of IIM, Rohtak. He is the recipient of the Golden Peacock Corporate Award for Business Leadership for the year 2010 for his outstanding contribution in transforming Tata Motors Limited.

Table of Contents

Mr. Kant joined the Company as Senior Vice President in February 1999 and was appointed as an Executive Director (Commercial Vehicle Business Unit) in July 2000 and as Managing Director in July 2005. Upon retiring from his Executive position on June 1, 2009, Mr. Kant continued on the Company's Board of Directors as Vice-Chairman.

Mr. Nusli N. Wadia: Educated in the United Kingdom, Mr. Wadia is the Chairman of Bombay Dyeing & Manufacturing Company Limited and heads the Wadia Group.

He was appointed on the Prime Minister's Council on Trade & Industry in 1998, 1999 and 2000-04. Mr. Wadia has a distinct presence in public affairs and has been actively associated with leading charitable institutions. He is also on the Managing Committee of the Nehru Centre, Mumbai. He is also the Chairman/Trustee of various charitable institutions and non-profit organizations.

He was appointed as a director of the Company with effect from December 22, 1998.

Mr. S. M. Palia: Mr. Palia, a B.Com. LL.B. CAIIB and AIB (London), is a development banker by profession. He was with Industrial Development Bank of India, or IDBI, from 1964-1989. During this period, he held various positions including that of an Executive Director. He was also the Managing Director of Kerala Industrial and Technical Consultancy Organisation Limited, set up to provide consultancy services to micro enterprises and small and medium enterprises. Mr. Palia is on the Boards of various companies in the industrial and financial service sectors and is also actively involved as a trustee in various NGOs and trusts.

He was appointed as a director of the Company with effect from May 19, 2006. He retired with effect from April 25, 2013 on attaining the age 75 as per the retirement policy.

Dr. R. A. Mashelkar: Dr. Mashelkar is an eminent chemical engineering scientist. He retired from the post of Director General from the Council of Scientific and Industrial Research, or CSIR in 2006, after tenure of over 11 years. His leadership transformed CSIR into a user-focused, performance-driven and accountable organization.

Dr. Mashelkar is the President of Indian National Science Academy, or INSA, National Innovation Foundation, Institution of Chemical Engineers, UK and Global Research Alliance, a network of 60,000 scientists from five continents and has been honored with honorary doctorates from 26 universities, including Universities of London, Salford, Pretoria, Wisconsin and Delhi. Dr. Mashelkar has also been elected as Fellow/ Associate of Royal Society, or FRS, London National Academy of Science (USA), US National Academy of Engineering, Royal Academy of Engineering, UK, World Academy of Art and Science, USA and the Academy of the Developing World, Trieste, Italy.

Dr. Mashelkar has won over 50 awards and medals at national and international levels, including the JRD Tata Corporate Leadership Award and the Stars of Asia Award (2005). In the post liberalized India, Dr. Mashelkar through leadership of various organizations/ Government Committees has played a critical role in shaping India's Science & Technology policies. The Government of India honored Dr. Mashelkar with the Padmashri (1991) and the Padma Bhushan (2000). Dr. Mashelkar is also a director of several well-known companies.

He was appointed as a director of the Company with effect from August 28, 2007.

Mr. Nasser Munjee: Mr. Munjee was educated at the Leys School, Cambridge, UK and holds Bachelor's and Master's degrees from the London School of Economics, UK. He joined Mr. H. T. Parekh, Chairman, ICICI, to establish, HDFC, the first housing finance company in India.

Mr. Munjee served HDFC for over 20 years at various positions including as its Executive Director. He was the Managing Director of IDFC up to March 2004. Since June 2005, he is the Chairman of the Development Credit Bank, or DCB. He is on the Board of various multinational companies and trusts. Mr. Munjee is a Technical Advisor on the World Bank's Public Private Partnership Infrastructure and Advisory Fund.

He was appointed as a director of the Company with effect from June 27, 2008.

Mr. Subodh Bhargava: Mr. Bhargava holds a degree in Mechanical Engineering from the University of Roorkee. He served the Eicher Group of companies since 1975. He retired as the Group Chairman and Chief Executive in March 2000 but continues as Chairman Emeritus, Eicher Group. He was the past President of the Confederation of Indian Industry, or CII, and the Association of Indian Automobile Manufacturers; and the Vice President of the Tractor Manufacturers Association. He was also a member of the Insurance Tariff Advisory Committee, the Economic Development Board of the Government of Rajasthan. He has held various prominent positions on various Chambers/Associations in the field of research in engineering and technology; and technical and management education and is currently associated as a director of several Indian corporates, including Tata Communications Limited and Tata Steel.

Table of Contents

He was appointed as a director of the Company with effect from June 27, 2008.

Mr. V. K. Jairath: Mr. V. K. Jairath holds Bachelor of Arts Degree in Public Administration and Bachelor of Laws Degree, both, from the Punjab University, Masters in Economics from the University of Manchester, UK and joined Indian Administrative Service in 1982.

Mr. Jairath served as the Principal Secretary (Industries), Government of Maharashtra before he took voluntary retirement from Government Services on March 31, 2008. He is presently providing Consultancy and Advisory Services on Legal, Financial and Regulatory issues related to Infrastructure Development and Industrial Investment.

Mr. Jairath has over 25 years of experience in public administration, rural development, poverty alleviation, infrastructure, finance, industry, urban development, environmental management occupying various important positions in the Government of India and the State Government of Maharashtra.

He has held various positions as the Managing Director of SICOM, Secretary to the Governor of Maharashtra, Municipal Commissioner of Kolhapur, Collector of Wardha, besides being an Independent Director on the Boards of Public Sector Companies and Banks.

He was appointed as a director of the Company with effect from March 31, 2009.

Mr. Ranendra Sen: Mr. Sen, graduated from St. Xavier's College and joined the Indian Foreign Service in 1966. He served in various capacities at Embassies and Consulates in Moscow, San Francisco and Dhaka; as Deputy Secretary and Joint Secretary in the Ministry of External Affairs and as Secretary to the Atomic Energy Commission. He was also the Joint Secretary to successive Prime Ministers responsible for foreign and defense policies, atomic energy, space and other tasks.

Mr. Sen was assigned as the Ambassador to Mexico (1991-1992), Russia (1992-1998) and reunified Germany (1998-2002), as the High Commissioner to the United Kingdom (2002-2004) and as the Ambassador to the United States (2004-2009). He is the first Indian to serve as envoy to three P-5 and four G-8 capitals and has participated in about 180 multilateral and bilateral summits.

He was appointed as a director of the Company with effect from June 1, 2010 and ceased to be director with effect from October 16, 2012.

Dr. Ralf Speth: Dr. Speth is a Doctorate of Engineering in Mechanical Engineering and Business Administration from Warwick University, UK and holds a degree in engineering from Rosenheim University, Germany. Dr. Speth worked as a business consultant for a number of years before joining BMW in 1980. After serving BMW for 20 years, Dr. Speth joined Ford's Premier Automotive Group as Director of Production, Quality and Product Planning.

Dr. Speth was appointed to the post of Chief Executive Officer at Jaguar Land Rover on February 18, 2010. He is on the Board of Jaguar Land Rover Automotive PLC, UK and is also the Chairman and Chief Executive Officer of the two wholly-owned subsidiary companies, Jaguar Land Rover Limited and Land Rover in the United Kingdom. Prior to this appointment, Dr. Speth was Head of Global Operations at the International Industrial Gases and Engineering Company, The Linde Group.

He was appointed as a director of the Company with effect from November 10, 2010.

Mr. R Pisharody: Mr. Pisharody is an alumni of IIT Kharagpur and IIM Calcutta. He joined the Company in 2007 as Vice-President (Sales and Marketing, CVBU) and was later elevated to President (CVBU) in 2009. Mr. Pisharody played a significant role in doubling commercial vehicle volumes and also oversaw the launch of commercial vehicles, including the Company's entry into world class product platforms such as the Prima and Ultra. Prior to joining the Company, he worked in various roles with M/s Castrol India Ltd., BP Singapore Pte. Limited and Philips India Limited. He has over 30 years' experience in sales, marketing and business development.

Mr. Pisharody was appointed as Executive Director (Commercial Vehicles) of the Company with effect from June 21, 2012.

Mr. S. B. Borwankar: Mr. Borwankar is a Mechanical Engineer with honors from IIT, Kanpur. He joined the Company in August 1974 and has been responsible in various executive positions for overseeing and implementing product development, manufacturing operations and quality control initiatives. He played a significant role in setting up greenfield projects for M&HCVs, axle components, designing and production of trims and chassis. He has over 37 years of experience in manufacturing and quality control with the Company.

Table of Contents

Prior to his induction on the Board, Mr. Borwankar was Senior Vice President (Manufacturing Operations, CVBU).

Mr. Borwankar was appointed as Executive Director (Quality, Vendor Development & Strategic Sourcing) of the Company with effect from June 21, 2012.

Ms. Falguni Nayar: Ms. Falguni Nayar holds a B.Com, PGDM (from IIM, Ahmedabad) and has been an investment banker having spent over 19 years with Kotak Mahindra Bank with the last 6 years as Managing Director and CEO of Kotak Investment Bank. Prior to this, she was with A F Ferguson & Co. as Manager. She is currently the founder and CEO of Nykaa.com, an online shopping website for beauty and wellness products and also offers an online magazine, expert advice and virtual makeover tools. She is also the Corporate Advisor to Temasek Holdings Advisors India Pvt. Ltd., a Singapore based investment company supported by affiliates in Asia and Latin America. She has also held varied positions such as Director Business Standard, Founding Member of Asia Society and Member of BSE's CEO Selection Committee. She was recognized as the Top Business Woman by Business Today in 2009 and 2011 and has received the FICCI Ladies Organisation award for Top Woman Achiever in the field of banking in 2008.

She was appointed as a director of the Company with effect from May 29, 2013.

Mr. Karl Slym (Managing Director): Mr. Karl Slym joined Tata Motors as the Managing Director from September 13, 2012. He leads all operations of Tata Motors in India and international markets.

Before joining Tata Motors, Mr. Slym was the Executive Vice President and Board Member, SGMW Motors, China (a General Motors Joint Venture), prior to which he was President, Managing Director and Board Member of General Motors in India. For over two decades, Mr. Slym has been with Toyota and General Motors in various positions across geographies. Mr. Slym is an alumnus of Stanford University and a Sloan Fellow.

Mr. C. Ramakrishnan (Chief Financial Officer): Mr. Ramakrishnan, joined Tata Motors Limited in 1980. He handled corporate treasury and accounting functions as well as management accounting. After a two-year company-wide IT project responsibility covering R&D, manufacturing, sourcing and sales and service, he had worked in the Chairman's office. Mr. Ramakrishnan holds a B.Com. degree and is a qualified Chartered Accountant and Cost Accountant. Mr. Ramakrishnan was appointed as the Chief Financial Officer of Tata Motors with effect from September 18, 2007.

There is no family relationship between any of our directors, Executive Officers or Chief Financial Officer.

Besides these, the Managing Director also gets housing or compensation in lieu thereof.

C. Board Practices.

The Board size of twelve directors is commensurate with our size and consistent with other companies in the industry. The Board consists of Executive, Non-Executive and independent directors. Appointments of new directors are considered by the full Board and our shareholders at each year's Annual General Meeting.

The roles of the Chairman and the Chief Executive Officer are distinct and separate with appropriate powers being delegated to the Managing Director to perform the day to day activities of the Company.

The Board, along with its Committees, provide leadership and guidance to our management, in particular with respect to corporate governance, business strategies and growth plans, the identification of risks and their mitigation strategies, entry into new businesses, product launches, demand fulfillment and capital expenditure requirements, and the review of our plans and targets.

The Board has delegated powers to the Committees of the Board through written/stated specific terms of reference/scope and oversees the functioning operations of the Committees through various circulars/minutes circulated to it. The Committees operate as empowered agents of the Board as per their charter/terms of reference.

The Board also undertakes our subsidiaries' oversight functions through review of their performance against their set targets, advises them on growth plans and where necessary, gives strategic guidelines. While all our subsidiaries have their respective Board of Directors and their management is responsible for their performance, our Board oversees the performance of our subsidiaries on a quarterly basis to have an oversight over the performance and functioning of our subsidiary companies. Our Audit Committee also has a meeting wherein the CEO and the CFO of our subsidiary companies meet annually and make presentations on significant issues in audit, internal control and risk management. The minutes of the meetings of our subsidiary companies are also placed before our Board of Directors and attention is drawn to significant transactions and arrangements entered into by our subsidiary companies.

Committees.

The Audit Committee comprises four independent directors: N. Munjee, Chairman, Falguni Nayar (appointed with effect from May 29, 2013), R. A. Mashelkar and V. K. Jairath. The scope of the Audit Committee includes:

Reviewing the quarterly/annual financial statements before submission to the Board, focusing primarily on:

any changes in accounting policies and practices and reasons for any such change;

major accounting entries involving estimates based on an exercise of judgment by management;

qualifications in draft audit reports;

significant adjustments arising out of audits;

Table of Contents

compliance with accounting standards;

analysis of the effects of alternative GAAP requirements on the financial statements;

compliance with listing and other legal requirements concerning financial statements;

disclosure of related party transactions;

review Reports on the Management Discussion and Analysis of financial condition, Results of Operations and the Directors Responsibility Statement;

overseeing our financial reporting process and the disclosure of its financial information, including any earnings press release, to ensure that the financial statements are correct, sufficient and credible; and

disclosures made under the CEO and CFO certification to the Board and investors.

Reviewing with the management, external auditors and internal auditors, the adequacy of our internal control systems and recommending improvements to the management.

Reviewing, with the management, the statement of uses / application of funds raised through an issue (public issue, rights issue, preferential issue, etc.), the statement of funds utilized for purposes other than those stated in the offer document/ prospectus/ notice and the report submitted by the monitoring agency monitoring the utilization of proceeds of a public or rights issue and making appropriate recommendations to the Board to take up steps in this matter.

Recommending the appointment / removal of the statutory auditors, fixing audit fees and approving non-audit, consulting services provided by the firms of statutory auditors to us and our subsidiaries; and evaluating auditors performance, qualifications and independence.

Recommending the appointment/re-appointment/ removal of the cost auditors, fixation of audit fee, nature and scope of cost audit and approving other services provided by the firms of cost auditors to us and fees pertaining thereto; and ensure that the cost auditors are independent and have an arm's length relationship and are also not otherwise disqualified at the time of their appointment or during their tenure.

Review and recommend the Cost Audit Report to the Board.

Reviewing the adequacy of the internal audit function, including the structure of the internal audit department, coverage and frequency of internal audits, appointment, removal, performance and terms of remuneration of the chief internal auditor.

Reviewing the adequacy of the internal audit structure and function of the subsidiaries, their status of audit plan and its execution, key internal audit observations along with management response thereto and the status on

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

compliance with the Tata Code of Conduct (concern resolution), risk management and the control environment.

Oversight of our external financial reporting and monitoring components of internal control over financial reporting.

Discussing with the internal auditors and senior management, significant internal audit findings and following thereon.

Reviewing the findings of any internal investigation by the internal auditors into matters involving suspected fraud or irregularity or a failure of internal control systems of a material nature and reporting any such matters to the Board.

Discussing with the external auditors before the audit commences the nature and scope of such audit, as well as conducting post-audit discussions to ascertain any areas of concern.

Reviewing our financial and risk management policies.

Reviewing the functioning of the Whistle-Blower mechanism (which is an extension of the Tata Code of Conduct).

Reviewing the financial statements and investments made by our subsidiary companies.

Look into the reasons for any substantial defaults in payment to the depositors, debenture-holders, shareholders (in case of non-payment of declared dividend) and creditors, if any.

Reviewing the effectiveness of the system for monitoring compliance with laws and regulations.

Approving the appointment of the Chief Financial Officer.

Table of Contents

The Committee has also adopted policies for the approval of services to be rendered by our independent statutory auditors, based on a procedure for ensuring such auditor's independence and objectivity, as well as for the oversight of audit work for streamlining the audit process across our subsidiaries.

The Remuneration Committee comprises two independent directors, namely N. N. Wadia and S. Bhargava and two non-Executive Directors, namely Cyrus P. Mistry (appointed with effect from February 14, 2013) and Ravi Kant. The committee is empowered to review the remuneration of whole-time directors, retirement benefits to be paid to them and dealing with matters pertaining to Employees' Stock Option Scheme.

We have not issued any stock options to our directors/employees.

The Investor Grievance Committee comprises Ms. Falguni Nayar (appointed with effect from May 29, 2013), Karl Slym (appointed with effect from February 14, 2013), Ravi Kant and V. K. Jairath, and oversees the redressing of investors' complaints pertaining to securities transfers, interest/dividend payments, non-receipt of annual reports, issue of duplicate certificates, transmission of shares and debentures, matters pertaining to our Fixed Deposit Program and other miscellaneous complaints. Its scope also includes delegation of powers to our executives or the share transfer agents to process share transfers and other investor-related matters.

The Executive Committee of the Board comprises Cyrus P. Mistry (appointed with effect from May 29, 2012) Chairman Ravi Kant, S. Bhargava, N. N. Wadia, N. Munjee, Ravindra Pisharody Satish Borwankar, and Karl Slym (appointed with effect from September 13, 2012). This Committee came into effect on July 25, 2006, upon the dissolution of the Finance Committee and the Committee of the Board. The Committee reviews revenue and capital expenditure budgets, long-term business strategy, the organizational structure, raising of finance, property related issues, review and sale of investments and the allotment of securities within established limits.

The Ethics and Compliance Committee sets forth policies relating to the implementation of the Tata Code of Conduct for Prevention of Insider Trading and takes on record the monthly reports and dealings in securities by the Specified Persons. It also implements appropriate actions in respect of violations of the Tata Code of Conduct. The Ethics and Compliance Committee comprises, Falguni Nayar (appointed with effect from May 29, 2013), Ravi Kant, V. K. Jairath and Karl Slym (appointed with effect from February 14, 2013) and C. Ramakrishnan, our Chief Financial Officer, who is the Compliance Officer under the said Code.

The Nominations Committee was constituted with the objective of identifying independent directors to be inducted on the Board from time to time to refresh its membership. The Nominations Committee comprises N. N. Wadia, Chairman, Cyrus P. Mistry (appointed with effect from February 14, 2013) and Ravi Kant.

The Safety, Health & Environment, or SHE, Committee was constituted with the objective of reviewing Safety, Health and Environment practices. The Board of Directors in its meeting held on February 14, 2013, constituted a Committee and adopted a Charter for the same. The SHE Committee comprises R.A. Mashelkar as Chairman, V.K. Jairath, Karl Slym, Ravindra Pisharody and Satish Borwankar as members of the said Committee.

Apart from the Committees described above, the Board of Directors also constitutes committee(s) of directors with specific terms of reference as it may deem fit.

D. Employees.

We consider our human capital as a critical factor to our success. Under the aegis of Tata Sons and the Tata Sons promoted entities, we have drawn up a comprehensive human resource strategy which addresses key aspects of human resource development such as:

Code of conduct and fair business practices.

A fair and objective performance management system linked to the performance of the businesses which identifies and differentiates high performers while offering separation avenues for non-performers.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Creation of a common pool of talented managers across Tata Sons and the Tata Sons promoted entities with a view to increasing their mobility through inter-company job rotation.

Evolution of performance based compensation packages to attract and retain talent within Tata Sons and the Tata Sons promoted entities.

Development of comprehensive training programs to impart and continuously upgrade the industry/function specific skills.

Table of Contents

In line with our human resource strategy, we, in turn, have implemented various initiatives in order to build better organizational capability that we believe will enable us to sustain competitiveness in the global market place. Our human resources focus is to attract talent, retain the better and advance the best.

Some of the initiatives to meet this objective include:

Extensive process mapping exercise to benchmark and align the human resource processes with global best practices.

Introduction of a globally benchmarked employee engagement programme.

Succession planning through identification of second level of managers for all units, locations, functions.

Implementation of a Fast Track Selection Scheme, which is a system for identifying potential talent in the areas of general, commercial and operations management and offering them opportunities for growth within the organization.

Our Talent Management Scheme which includes the identification of high performers and high potentials through various routes such as our Performance Management System and Development Centers. Subsequent to the identification process, we provide them with challenging assignments for faster development.

Introduction of performance rating based salary review and quality linked variable payment for supervisory category of employees.

Restructuring the top level organization and creation of new verticals for greater functional focus and moving towards creating a matrix organization.

Creation of a powerful employer brand to attract talent. Lead the Future has become our Employee Value Proposition statement.

Driving cultural transformation. We have reframed the mission, vision, values and culture of the organization and introduced the concept of ACES - Accountability, Customer & Product focus, Excellence and Speed.

Extensive brand building initiatives at university campuses to increase recruiting from premium universities.

Jaguar Land Rover launched a new Team Talk Online portal to its production workers, which provides them with business updates alongside information on employee benefits, training and development.

We employed approximately 62,716 and 58,618 permanent employees as of March 31, 2013 and 2012 respectively, including as part of our Jaguar Land Rover business. The average number of temporary employees for the Fiscal 2013 was approximately 39,009.

The following table set forth a breakdown of persons employed by our business segments and by geographic location as of March 31, 2013.

Segment	No. of Employees
Automotive	56,393
Other	6,323
Total	62,716

Location	No. of Employees
India	41,597
Abroad	21,119
Total	62,716

Training and Development

We are committed to building the competences of our employees and improving their performance through training and development. Our focus is on identifying gaps in our employees' competencies and preparing employees for changes in competitive environments, as well as to meet organizational challenges.

Some of the focus areas in training in the last year centered on leadership, innovation management and internationalization besides other training programs to drive a change in our employees' outlook as we continue to develop as a global competitor. Developmental initiatives for our senior leadership were undertaken through international programs at various premier institutions around the world. The entire senior leadership was also taken through a cultural sensitivity program conducted by world renowned faculty. Certain employees have also been selected for the Fulbright fellowships for leadership in management. In addition, in order to emphasize the sharing of skills across our locations and functions extensive technical training programs were organized in Pune, Jamshedpur and Lucknow. The technical exposure was enhanced further through international training and participation at international seminars.

Table of Contents

At Jamshedpur, Pune and Lucknow in India, we have also established training divisions that impart basic skills in various trades like milling, grinding and welding to our young apprentices. We received the Best Learning Organization in Asia award from Learning & Organization Development Roundtable in June 2012.

The Tata Motors Academy has created two initiatives in the Learning and Development space. iTeach is an innovative practice of getting line managers to take ownership in sharing their knowledge and experience. We have switched to e-enabled learning through Learning Management Systems, or LMSs. Programs like Autonova, Project Leap were introduced in Fiscal 2013.

Jaguar Land Rover launched a new higher apprenticeship programme offering 55 places this year in key pathways, in addition to its current intermediate and advanced apprenticeship portfolio, which currently has over 1,500 apprentices on programme in 2012. Jaguar Land Rover moved from 60th in 2011 to 26th in 2012 on the list of Times Top 100 Graduate employers. This was then followed by a move in the Guardian Top 300 Graduate employers from a position of 127th in 2011 to 30th in 2012.

Union Wage Settlements

All employees in India belonging to the operative grades are members of labor unions except at our Sanand and Dharwad plants. We have generally enjoyed cordial relations with our employees at our factories and offices.

Employee wages are paid in accordance with wage agreements that have varying terms (typically three years) at different locations. The expiration dates of the wage agreements with respect to various locations/subsidiaries are as follows:

Location/subsidiaries	Wage Agreement valid until
Pune CVBU	August 31, 2015
Pune PCBU	March 31, 2013**
Jamshedpur	March 31, 2013*
Mumbai	December 31, 2015
Lucknow	March 31, 2014
Pantnagar	March 31, 2015
Jaguar Land Rover	October 31, 2014
Tata Hispano	December 31, 2012*

* under negotiation

** Agreement signed in May 2013.

A cordial industrial relations environment has been maintained in all our manufacturing units.

The variability in wage settlements was built in by introducing vehicles and profit linked payment scheme based on the index of various parameters such as quality, productivity, operating profit and individual's performance and attendance. As a result, the payment was high if company did well and low if it did not.

Union support in implementation of reforms that impact quality, cost erosion and productivity improvements across all locations is commendable.

TDCV union employees had filed a lawsuit against TDCV in March 2011, for including some elements of non-ordinary salary and bonus as part of ordinary wages. The District court gave a judgment in the union employees favor on January 2013, and ordered TDCV to pay the employees KRW 17.2 billion and interest. TDCV has filed an appeal against the order.

E. Share Ownership.

The information required by this item is set forth in Item 6.A Directors, Senior Management and Employees of this annual report.

Table of Contents**Item 7. Major Shareholders and Related Party Transactions.****A. Major Shareholders.**

We are a widely held, listed company with approximately 396,528 shareholders for Ordinary Shares and 46,761 shareholders for A Ordinary Shares of record. To our knowledge, as of June 30, 2013, the following persons beneficially owned 1% or more of 2,736,705,717 Ordinary Shares and 481,959,620 A Ordinary Shares outstanding at that time:

⁽¹⁾ Citibank, N.A. as depository for our ADRs and GDRs, was the holder on record on June 30, 2013 of 526,671,120 Shares and 49,860 Shares respectively on behalf of the beneficial owners of deposited shares.

* The A Ordinary Shareholders are entitled to receive a dividend for any financial year at five percentage points more than the aggregate rate of dividend declared on Ordinary Shares for that financial year but are entitled to one vote for every ten A Ordinary Shares held as per the terms of its issue and the Articles of Association of the Company.

Table of Contents

From March 31, 2010 to June 30, 2013, the holdings of our largest shareholder, Tata Sons Limited (together with its subsidiaries), have decreased from 27.85% to 26.16%. The holdings of Tata Steel Ltd. (together with its subsidiaries) have decreased from 6.93% as of March 31, 2010 to 5.54% as of June 30, 2013. The shareholding of Citibank N.A. as depository for our ADRs and GDRs has increased from 11.89 % to 19.24 %. The shareholding of Life Insurance Corporation of India Ltd. has decreased from 10.83% to 5.27%.

According to our register of shareholders and register of beneficial shareholders, as of June 30, 2013, there were 74 registered holders of our shares with addresses in the United States, whose shareholdings represented approximately 0.03% of our outstanding Ordinary Shares on that date, excluding any of our shares held by United States residents in the form of depository shares. Because some of these shares were held by brokers or other nominees, the number of record holders with addresses in the United States may be fewer than the number of beneficial owners in the United States.

The total permitted holding of Foreign Institutional Investors, or FIIs, in our paid up share capital has been increased to 35% by a resolution passed by our shareholders on January 22, 2004. The holding of FIIs in us as of June 30, 2013 was approximately 30.68%. See Item 10.D Exchange Controls for further details.

None of our shares of common stock entitles the holder to any preferential voting rights.

Under the new Takeover Regulations of India, in the event of any acquisition of shares or voting rights, which, taken together with shares or voting rights held by the acquirer and by person acting in concert with such acquirer, aggregate to 5% or more of the shares, or any acquisition or disposal of 2% or more shares or voting rights, such person must file a report concerning the shareholding or the voting rights with us and the stock exchanges on which our Shares are traded. Please see Item 9.A Offer and Listing Details Markets for information with respect to these stock exchanges. Disclosures would be applicable under the Insider Trading Regulations of India with respect to (i) any person who holds more than 5% shares or voting rights and any change in his holdings by 2% or more (ii) any person, who is a director or officer of the company on becoming a director or an officer of the company and any person who is a promoter or part of a promoter group on becoming a promoter or belonging to a promoter group, shall disclose any change in the holdings exceeding Rs.5 lacs in value or 25,000 shares or 1% of the total shareholdings or voting rights whichever is lower. The above disclosure under Insider Trading Regulations would be made to us and we would in turn disclose to relevant stock exchanges. Furthermore, under our listing agreement with the stock exchanges where our Shares are listed, we are required to periodically disclose to such stock exchanges the name and percentage of shares held by persons or entities that hold more than 1% of our Shares. For the purposes of the above, reporting and takeover requirements under our listing agreements, shares withdrawn from our ADS/GDS facility will be included as part of a person s shareholding in us.

To our knowledge, we are not, directly or indirectly, owned or controlled by any other corporation or by any government or by any other natural or legal persons severally or jointly. We are not aware of any arrangements the operation of which may at a later time result in our change of control.

For details regarding voting rights, please refer to Item 10.B Memorandum and Articles of Association Voting Rights .

Table of Contents**B. Related Party Transactions.**

Our related parties principally consist of Tata Sons, subsidiaries and joint ventures of Tata Sons, our joint ventures and our associates and their subsidiaries. We routinely enter into transactions with these related parties in the ordinary course of business. We enter into transactions for sale and purchase of products with our associates and joint ventures.

The following table summarizes related party transactions and balances included in our consolidated financial statements included elsewhere in this annual report for the year ended / as of March 31, 2013:

	With associates and their subsidiaries	With joint ventures	With Tata Sons Ltd and its subsidiaries and joint ventures	Notes
	(Rs. in millions)			
Purchase of products	49,206	29,264	1,354	(Note a)
Sale of products	2,079	6,232	8,304	
Services received	2	5	5,178	(Note b)
Services rendered	154	258	576	
Interest Income	42	1,895	9	(Note c)
Interest expenses	17	1,519	213	
Dividend Income	589		115	
Dividend paid			2,898	
Amount receivable in respect of Loans and interest thereon	38	3,251	53	(Note c)
Amount payable in respect of Loans and interest thereon	295		1,431	(Note d)
Loans given		710	100	
Loans repaid by related parties	238		310	
Loans taken	710		3,291	
Loans repaid by us	505		5,277	(Note d)

Notes:

The details of major items are as follows:

- a. During Fiscal 2013, we purchased from our associates various vehicle components, assemblies, aggregates, etc., totaling Rs.49,206 million. For the period from April 1, 2013 through June 30, 2013, our purchases were Rs.7,522 million from these associates. These purchases have been made at fair market price determined in accordance with normal commercial terms.
- b.
 - i) The services received from Tata Sons Limited include those for which brand subscription fees were paid pursuant to an agreement with them (Refer to Exhibit 4.1), under which the Company and certain of its subsidiaries have agreed to pay an annual subscription fee for participation and gain from promotion and protection of the Tata brand identity. The annual subscription fee is equal to 0.15%-0.25% of annual net income (defined as net revenues exclusive of excise duties and other governmental taxes and non-operating income), subject to a ceiling of 5% of annual profit before tax (defined as profit after interest and depreciation but before income tax) (unconsolidated as per Indian GAAP).
 - ii) We received IT related services from one of the subsidiaries of Tata Sons (a leading IT service provider). We also received other business support services from subsidiaries of Tata Sons, in the areas of call center and transaction processing work for the Company and some of its subsidiaries. These services are in the normal course of business and the transaction prices represent fair market price of the consideration, and other terms have been based on the normal commercial terms.
 - iii) During Fiscal 2013, the Company engaged one of the subsidiaries of Tata Sons, TCS, a leading IT service provider, for integrated IT service relating to IT infrastructure for the Company, Jaguar Land Rover and other subsidiary companies. The contract was finalized after evaluation of competitive bids from TCS and other IT service provider. These services are in the normal course of

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

business and the transaction prices represent fair market price of the consideration, and other terms have been based on the normal commercial terms.

- c. As at March 31, 2013, the subordinated loan to a joint venture (including interest) was Rs.3,251 million and represents the largest amount outstanding during Fiscal 2013. The loan is subordinated to other borrowings of the joint venture. The interest in respect of loans was Rs.238 million for Fiscal 2013, and is based on the reference rate of the Reserve Bank of India. As of June 30, 2013, we had a total of Rs.3,301 million of outstanding loans (including interest).

Table of Contents

- d. In the earlier years, the Company sold finance receivables to one of the subsidiaries of Tata Sons that is engaged in financial services. Due to credit enhancement provided to the transferee, the transfers did not qualify for derecognition and therefore the amounts received were recorded as collateralized debt obligation. An amount of Rs.578 million represented the collateralized debt obligation outstanding as at March 31, 2013, with interest rate of 8% to 9.30%. The largest amount outstanding during Fiscal 2013 was Rs.2,914 million. As of June 30, 2013, we had nil outstanding of collateralized debt obligations. These finance receivables have been securitized in the normal course of business. These were on substantially the same terms, including interest rates and collateral, had these transactions been undertaken with an unrelated party.

Please refer to Note 38 to our consolidated financial statements included elsewhere in this annual report for further detail.

C. Interests of Experts and Counsel.

Not applicable.

Item 8. Financial Information.

A. Consolidated Statements and Other Financial Information.

The information required by this item is set forth beginning on page F-1 of this annual report.

Legal or Arbitration Proceedings.

The information on legal or arbitration proceedings required by this item is set forth in Item 4.B Business Overview Legal Proceedings .

Dividend Policy.

Any dividend declared by Tata Motors is based on the profits available for distribution as reported in the unconsolidated statutory financial statements of Tata Motors prepared in accordance with Indian GAAP. Further, Indian law mandates that dividend be declared out of distributable profits only after the transfer of a specified percentage of net income computed in accordance with current regulations to a general reserve. Based on the net income available for appropriation, dividends are recommended by the Board of Directors for approval by the shareholders at our Annual General Meeting. Further, the Board of Directors may also pay an interim dividend at its discretion. Since Fiscal year 1956, we have had an uninterrupted dividend distribution except for the Fiscal years 2001 and 2002. We returned to dividend distribution in Fiscal 2003. In view of our profitable performance, we declared dividends (excluding dividend tax) totaling Rs.12,807 million, 12,742 million and 8,590 million for Fiscal 2013, 2012 and 2011 to the shareholders.

B. Significant Changes.

Other than as set forth in this annual report, no significant change has occurred with respect to us since the date of our audited consolidated IFRS financial statements included elsewhere in this annual report.

Item 9. The Offer and Listing.

A. Offer and Listing Details.

There has been no SEC-registered offering of our Shares in the United States.

The details on our share and ADS price history are included in Item 9.C Markets .

B. Plan of Distribution.

Not applicable.

Item 10. Additional Information.

A. Share Capital

Our authorized share capital is Rs.39 billion divided into 3.5 billion Ordinary Shares of Rs.2/- each, 1 billion A Ordinary Shares of Rs.2/- each (the Ordinary Shares and the A Ordinary Shares are hereinafter together referred to as Ordinary Shares or Shares unless otherwise specifically mentioned to the contrary) and 300 million Convertible Cumulative Preference Shares of Rs.100/- each.

Under the Companies Act, as well as our Articles of Association, if our share capital is divided into different classes of shares, all or any of the rights or privileges attached to each class of shares may be varied, modified or abrogated with the consent in writing of the holders of not less than three-fourths of the issued shares of that class, or with the sanction of a special resolution passed at a separate meeting of the holders of the issued shares of that class. Our Articles of Association further provide that the rights conferred upon the holders of the shares of any class issued with preferential or other rights shall not, unless otherwise expressly prohibited by the terms of the issue of the shares of that class, be deemed to be varied by the creation or issue of further shares ranking pari passu thereto.

In accordance with the Articles and under the Companies Act, we may issue Ordinary Shares with differential rights as to voting and/or dividend up to an amount not exceeding 25% of the total issued Ordinary Share capital of the Company or such other limit as may be prescribed by applicable laws/regulations.

Table of Contents**Details of history and changes in our capital structure in the last three years**

The following table sets out the details of the equity shares allotted by us in the last three years:

Description of Paid up Capital	Ordinary Shares	Description of Paid up Capital	A Ordinary Shares

Table of Contents

B. Memorandum and Articles of Association.

Objects and Purposes

Our principal objects, as provided by Clause 3 of our Memorandum of Association, include:

manufacturing, marketing, import, export, hiring and letting on hire of commercial vehicles, automobile cars, two wheeler vehicles, heavy and construction equipment including components, accessories and spare parts in relation thereto;

to carry on the business as manufacturers and dealers of machinery articles and goods of all classes;

to carry on the business of manufacturing materials which may be usefully combined with our manufacturing and engineering business; and

to carry on the business of financing and re-financing of all types of vehicles, construction equipment, capital equipment and services by way of credit, hire purchases, leases and loans.

Directors

Under the Companies Act, as well as our Articles of Association, each of our directors, who is in any way directly or indirectly concerned or interested in a contract or arrangement or proposed contract or arrangement entered into or to be entered into by or on our behalf is required to disclose the nature of his interest at a meeting of the first meeting of the Board held after the director becomes concerned. Under the Companies Act, as well as the Articles of Association, an interested Director is not allowed to take part in the discussion of, or vote on, any contract, arrangement or proposal in which the director is interested.

Under the Companies Act and our Articles of Association, we are restricted from making loans to directors and the prior approval of the Central Government is required before we can make any loans, directly or indirectly, to any director or provide, directly or indirectly, any guarantees or security in connection with any loan made by a third party to a director.

Under our Articles of Association, a director is not required to hold any qualification shares. Our Articles of Association do not prescribe an age limit for the retirement of the directors. As per the Revised Guidelines (2012) adopted by our Board, Executive Directors retire at the age of 65, independent directors retire at the age of 75 and other non-Executive Directors retire at the age of 70 (subject to them meeting the transition clause). Further, as per the broad guidelines, the maximum tenure in case of non-Executive Directors is nine years and the Board may, based, *inter alia*, on the merit and contribution of each director, grant further tenure/s.

Under our Articles of Association, the number of our directors cannot be less than three or more than fifteen.

Dividends

Under the Companies Act, unless the Board recommends the payment of a dividend, the shareholders at a general meeting have no power to declare any dividend. Subject to certain conditions laid down by Section 205 of the Companies Act, no dividend can be declared or paid by a company for any Fiscal year except out of the profits of the company calculated in accordance with the provisions of the Companies Act or out of the profits of the company for any previous Fiscal year(s) calculated pursuant to the provisions of the Companies Act.

Under our Articles of Association, the shareholders at a general meeting may declare a lower, but not higher, dividend than that recommended by the Board. Dividends are generally declared as a percentage of the par value. The dividend recommended by the Board and approved by the shareholders at a general meeting is distributed and paid to shareholders in proportion to the paid-up value of their shares as on the record date for which such dividend is payable. In addition, the Board may declare and pay interim dividends. The shares to be issued upon the conversion of the ADSs will be fully paid-up when delivered as provided herein. Under the Companies Act, dividends can only be paid in cash to shareholders listed on the register of shareholders on the date which is specified as the record date or book closure date. No shareholder is

entitled to a dividend while any lien in respect of unpaid calls on any of their shares is outstanding.

Table of Contents

Shares issued upon conversion of ADSs will rank *pari passu* with our existing Ordinary Shares of Rs.2/- each in all respects including entitlement of the dividend declared.

Dividends must be paid within 30 days from the date of the declaration and any dividend which remains unpaid or unclaimed after that period must be transferred within seven days to a special unpaid dividend account held at a scheduled bank. Any money which remains unpaid or unclaimed for seven years from the date of such transfer must be transferred by us to the Investor Education and Protection Fund established by the Government of India pursuant to which no claim shall lie against us or the said fund.

Under the Companies Act, we may only pay a dividend in excess of 10% of paid-up capital in respect of any year out of the profits of that year after we have transferred to our reserves a percentage of our non consolidated Indian GAAP profits for that year ranging between 2.5% to 10% depending on the rate of dividend proposed to be declared in that year. The Companies Act further provides that if the profit for a year is insufficient, the dividend for that year may be declared out of the non consolidated Indian GAAP accumulated profits earned in previous years and transferred to reserves, subject to the following conditions: (i) the rate of dividend to be declared may not exceed the lesser of the average of the rates at which dividends were declared in the five years immediately preceding the year, or 10% of paid-up capital; (ii) the total amount to be drawn from the accumulated profits from previous years may not exceed an amount equivalent to 10% of paid-up capital and free reserves and the amount so drawn is first to be used to set off the losses incurred in the financial year before any dividends in respect of preference or equity shares; and (iii) the balance of reserves after withdrawals must not be below 15% of paid-up capital.

The holders of A Ordinary Shares will receive dividends for any financial year at five percentage points more than the aggregate rate of dividend declared on Ordinary Shares for that financial year.

Capitalization of Reserves and Issue of Bonus Shares

Our Articles of Association permit us by a resolution of our shareholders in a general meeting to resolve that amounts standing to the credit of reserves or securities premium can be capitalized by the issue of fully paid bonus shares (also referred to as a stock dividend) or by crediting shares not fully paid-up with the whole or part of any sum outstanding. Bonus shares must be issued pro rata to the amount of capital paid-up on existing shareholdings. Any issue of bonus shares would be subject to the guidelines issued by SEBI in this regard.

Calls on Shares, Pre-Emptive Rights and Alteration of Share Capital

Under the Companies Act, as well as our Articles of Association, the Board of Directors may from time to time make such calls as they think fit upon the members of the Company in respect of all moneys unpaid on the shares held by them respectively and each member is required to pay the amount of every call so made on him to the Company.

Subject to the provisions of the Companies Act, we may increase our share capital by issuing new shares on such terms and with such rights as we, by action of shareholders in a general meeting, determine. These new shares will be offered to existing shareholders listed on the members register on the record date in proportion to the amount paid-up on these shares at that date. The offer will be made by notice specifying the number of shares offered and the date (being not less than 15 days from the date of the offer) after which the offer, if not accepted, will be deemed to have been declined. After this date, the Board may dispose of the shares offered in respect of which no acceptance has been received, in such manner as the Board thinks most beneficial to us. The offer is deemed to include a right exercisable by the person concerned to renounce the shares offered to such person in favor of any other person provided that the person in whose favor these shares have been renounced is approved by the Board in their absolute discretion.

Under the Companies Act, new shares may be offered to any persons whether or not those persons include existing shareholders, if a special resolution to that effect is passed by the shareholders of the company in a general meeting. The issuance of shares upon conversion of our outstanding Convertible Notes has been duly approved by a special resolution of our shareholders and our shareholders have waived their pre-emptive rights with respect to these shares.

The Company can also alter its share capital by way of a reduction of capital or by undertaking a buy-back of shares under the prescribed SEBI guidelines.

Our Articles of Association provide that, by a special resolution passed at the general meeting, we may consolidate or subdivide our share capital, convert all or any of our fully paid-up shares into stock and re-convert that stock into fully paid-up shares or cancel shares which have not been taken up by any person. The Company may also from time to time by special resolution reduce its capital.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The Company had vide resolution passed by the Shareholders at the Annual General Meeting held on August 12, 2011 altered the Capital Clause i.e. clause V of the Memorandum of Association.

Table of Contents

Clause V of our Articles, as amended, reads as follows -

The Capital of the Company is Rs.39,00,00,00,000 divided into 3,50,00,00,000 Ordinary Shares of Rs.2/- each, 1,00,00,00,000 A Ordinary Shares of Rs.2/- each (The Ordinary Shares and the A Ordinary Shares are hereinafter together referred to as Ordinary Shares or shares unless otherwise specifically mentioned to the contrary) and 30,00,00,000 Convertible Cumulative Preference Shares of Rs.100/- each.

We the several persons whose names and addresses are subscribed are desirous of being formed into a Company, in pursuance of this Memorandum of Association and respectively agree to take the number of shares in the Capital of the Company set opposite our respective names.

General Meetings of Shareholders

We must hold our Annual General Meeting each year within 15 months of the previous Annual General Meeting and in any event not later than six months after the end of each accounting year, unless extended by the Registrar of Companies at our request for any special reason. Our Board of Directors may convene an Extraordinary General Meeting of shareholders when necessary or at the request of a shareholder or shareholders holding in the aggregate not less than 10% of our capital. Written notices convening a meeting setting out the date, place and agenda of the meeting must be given to members at least 21 days prior to the date of the proposed meeting. A general meeting may be called after giving shorter notice if consent is received from all shareholders in the case of an Annual General Meeting, and from shareholders holding not less than 95% of our paid-up capital in the case of any other general meeting. Currently, we give written notices to all members and, in addition, give public notice of general meetings of shareholders in a daily newspaper of general circulation in Mumbai. General meetings are generally held at some place in Mumbai. The quorum for a general meeting of the company is five shareholders personally present.

A company intending to pass a resolution relating to matters such as, but not limited to, amendment in the objects clause of the memorandum, buy back of shares under the Companies Act, giving loans or extending guarantee in excess of limits prescribed under the Companies Act, and guidelines issued thereunder, is required to obtain the resolution passed by means of a postal ballot instead of transacting the business in the general meeting of the company. A notice to all the shareholders shall be sent along with a draft resolution explaining the reasons therefore and requesting them to send their assent or dissent in writing on a postal ballot within a period of 30 days from the date of posting the letter. Postal ballot voting also allows shareholders to cast their votes by electronic means.

Voting Rights

At a general meeting upon a show of hands, every member holding shares and entitled to vote and present in person has one vote. Upon a poll, the voting rights of each shareholder entitled to vote and present in person or by proxy is in the same proportion as the capital paid-up on each share held by such holder bears to the total paid-up capital. Voting is by show of hands, unless a poll is ordered by the Chairman of the meeting or demanded by shareholder or shareholders holding at least 10% of the voting rights in respect of the resolution or by those holding paid-up capital of at least Rs.50,000. The Chairman of the meeting has a casting vote.

Holders of ADSs and of GDSs are not entitled to attend or vote at shareholders meetings. Holders of ADSs may exercise voting rights with respect to the Ordinary Shares represented by ADSs only in accordance with the provisions of our ADS deposit agreement (as amended) and Indian law. A holder of ADSs may withdraw from the ADS facility the related underlying shares and vote as a direct shareholder, but there may not be sufficient time to do so after the announcement of an upcoming vote. If requested by us, the depository will notify holders of ADSs of upcoming votes and arrange to deliver our voting materials to holders of ADSs. The materials will describe the matters to be voted on and explain how holders of ADSs on a record date specified by the depository may instruct the depository to vote on the deposited securities underlying the ADSs as directed by the holders of ADSs. For the instructions to be valid, the depository must receive them in writing on or before a date specified by the depository. The depository will try, insofar as practicable, subject to Indian laws and the provisions of our Articles of Association, to vote or have its agents vote the deposited securities as instructed. The depository will only vote as instructed and is not entitled to exercise any voting discretion. If the depository timely receives voting instructions from a holder of ADSs and which fails to specify the manner in which the depository is to vote the shares underlying such holder's ADSs, such holder will be deemed to have instructed the depository to vote in favor of the items set forth in such voting instructions. If the depository does not receive timely instructions from a holder of ADSs, the holder shall be deemed to have instructed the depository to give a discretionary proxy to a person designated by us, subject to the conditions set forth in the deposit agreement (as amended). If requested by us, the depository is required to represent all shares underlying the outstanding ADSs, regardless whether timely instructions have been received from the holders of such ADSs, for the sole purpose of establishing a quorum at a meeting of shareholders.

The Depository for the holders of the GDRs shall exercise voting rights in respect of the GDSs by issue of an appropriate proxy or power of attorney in terms of the deposit agreement pertaining to the GDRs.

Table of Contents

Ordinary resolutions may be passed by simple majority of those shareholders present and voting at the meeting. Special resolutions require that the votes cast in favor of the resolution must be at least three times the votes cast against the resolution. The Companies Act provides that in order to amend the Articles of Association, a special resolution is required to be passed in a general meeting. Dissolutions, mergers or consolidations, transfers of the whole or a significant part of our business to another company or taking over the whole of the business of any other company and, in any case where shareholding of public financial institutions and banks exceeds 25%, appointment of statutory auditors, each require a special resolution. Our Articles of Association do not permit cumulative voting for the election of our directors.

A shareholder may exercise his or her voting rights by proxy to be given in the form required by our Articles of Association. The instrument appointing a proxy is required to be lodged with the company at least 48 hours before the time of the meeting. A shareholder may, by a single power of attorney, grant a general power of representation regarding several general meetings of shareholders. Any of our shareholders may appoint a proxy. A corporate shareholder is also entitled to nominate a representative to attend and vote on its behalf at general meetings. A proxy may not vote except on a poll and does not have a right to speak at meetings. A shareholder which is a legal entity may appoint an authorized representative who can vote in all respects as if a shareholder both on a show of hands and a poll.

The Companies Act allows for a company to issue shares with differential rights as to dividend, voting or otherwise subject to other conditions prescribed under applicable law. In this regard, the laws require that for a company to issue shares with differential voting rights the company must have had distributable profits in terms of the Companies Act for a period of three financial years, the company has not defaulted in filing annual accounts and annual returns for the immediately preceding three years, the articles of association of such company must allow for the issuance of such shares with differential voting rights and such other conditions set forth in the Companies (Issue of Share Capital with Differential Voting Rights) Rules, 2001 must be fulfilled.

In the case where a resolution is put to vote on a poll, such voting entitlement (excluding fractions, if any), will be applicable to holders of A Ordinary Shares. As per the terms of issue, the outstanding A Ordinary Shares shall be entitled to one vote for every ten A Ordinary Shares held.

In the case where a resolution is put to vote in the meeting and is to be decided on a show of hands, the holders of A Ordinary Shares shall be entitled to the same number of votes as available to holders of Ordinary Shares.

Convertible Securities/Warrants

We may issue from time to time debt instruments that are partly and fully convertible into shares and/or warrants to purchase shares.

Register of Shareholders and Record Dates

We are obliged to maintain a register of shareholders at our registered office in Mumbai or at some other place in the same city. The register and index of our beneficial owners maintained by a depository under the Depositories Act, 1996 is deemed to be a part of the index of members and register of shareholders. We recognize as shareholders only those persons who appear on our register of shareholders and we cannot recognize any person holding any Share or part of it upon any trust, express, implied or constructive, except as permitted by law. In the case of shares held in physical form, we register transfers of shares on the register of shareholders upon lodgment of the share transfer form duly complete in all respects accompanied by a share certificate or if there is no certificate, the letter of allotment in respect of shares transferred together with duly stamped transfer forms. In respect of electronic transfers, the depository transfers shares by entering the name of the purchaser in its books as the beneficial owner of the shares. In turn, we enter the name of the depository in our records as the registered owner of the shares. The beneficial owner is entitled to all the rights and benefits as well as the liabilities with respect to the shares that are held by the depository.

For the purpose of determining the shareholders, the register may be closed for periods not exceeding 45 days in any one year or 30 days at any one time. In order to determine the shareholders entitled to dividends, we keep the register of shareholders closed for approximately 21 days, generally in June or July of each year. Under the listing regulations of the stock exchanges on which our outstanding shares are listed, we may, upon at least 15 days advance notice to these stock exchanges, set a record date and/or close the register of shareholders in order to ascertain the identity of shareholders entitled to the dividend. The trading of shares and the delivery of certificates in respect thereof may continue while the register of shareholders is closed.

Annual Report and Financial Results

Our Indian GAAP audited financial statements for the relevant Fiscal year, the directors report and the auditors report, (collectively the AGM Report), must be prepared before the Annual General Meeting. These also include other financial information, a corporate governance section and management s discussion and analysis report and general shareholders information and are also made available for inspection at our registered office during normal working hours for 21 days prior to our Annual General Meeting.

Table of Contents

Under the Companies Act, we must file the AGM Report with the Registrar of Companies within seven months from the close of the accounting year or within 30 days from the date of the annual general meeting, whichever is earlier. As required under listing agreements with the applicable stock exchanges, copies are required to be simultaneously sent to all the stock exchanges on which our Shares are listed. We must also publish our financial results in at least one English language daily newspaper circulating in the whole or substantially the whole of India and also in a newspaper published in the language of the region where our registered office is situated.

We submit information, including our AGM Report and half yearly financial statements, in accordance with the requirements of the listing agreement with the Singapore Stock Exchange.

Transfer of Shares

Shares held through depositories are transferred in book-entry form or in electronic form in accordance with the regulations laid down by the SEBI. These regulations provide the regime for the functioning of the depositories and the participants and set out the manner in which the records are to be kept and maintained and the safeguards to be followed in this system. Transfers of beneficial ownership of shares held through a depository are exempt from stamp duty. We have entered into an agreement for these depository services with National Securities Depository Limited and the Central Depository Services (India) Limited.

The SEBI requires that all investors hold our Shares in book-entry form for trading and settlement purposes, except for transactions that are not made on a stock exchange and transactions that are not required to be reported to the stock exchange.

The requirement to hold shares in book-entry form will apply to ADS holders when the shares are withdrawn from the depository facility upon surrender of the ADSs. In order to trade in our Shares in the Indian market, the withdrawing ADS holder will be required to comply with the procedures above.

Our Ordinary Shares are freely transferable, subject only to the provisions of the Companies Act under which, if a transfer of shares contravenes the SEBI provisions or the regulations issued under it or any other law for the time being in force or the Sick Industrial Companies (Special Provisions) Act, 1985, or SICA, or any other similar law, the Indian Company Law Board may, on an application made by the company, a depository incorporated in India, an investor, the SEBI or other parties, direct a rectification of the register of records. If a company without sufficient cause refuses to register a transfer of shares within two months from the date on which the instrument of transfer is delivered to the company, the transferee may appeal to the Indian Company Law Board seeking to register the transfer of equity shares. The Indian Company Law Board may in its discretion, issue an interim order suspending the voting rights attached to the relevant equity shares before completing its investigation of the alleged contravention. Under the Companies (Second Amendment) Act, 2002, the operative provisions of which are yet to come into force, the Indian Company Law Board is proposed to be replaced with the National Company Law Tribunal. Further, under the Sick Industrial Companies (Special Provisions) Repeal Act, 2003, or the SICA. The SICA is sought to be repealed and the Board of Industrial and Financial Reconstruction, as constituted under the SICA, is to be replaced with the National Company Law Tribunal.

Pursuant to the Listing Agreement, in the event we have not effected the transfer of shares within one month or where the Issuer has failed to communicate to the transferee any valid objection to the transfer within the stipulated time period of one month, the Issuer is required to compensate the aggrieved party for the opportunity loss caused during the period of the delay.

The Companies Act provides that the shares or debentures of the public listed company (like the Issuer) shall be freely transferable. Our Articles of Association provide for restrictions on the transfer of shares, including granting power to the Board of Directors in certain circumstances to refuse to register or acknowledge transfer of shares or other securities issued by us. However, under the Companies Act the enforceability of these transfer restrictions is unclear.

Acquisition of Our Own Shares

The Company is prohibited from acquiring its own shares unless the consequent reduction of capital is effected by an approval of at least 75% of its shareholders voting on the matter in accordance with the Companies Act, 1956 and is also sanctioned by a High Court of competent jurisdiction. Moreover, subject to certain conditions, a company is prohibited from giving, whether directly or indirectly and whether by means of a loan, guarantee, the provision of security or otherwise, any financial assistance for the purpose of or in connection with a purchase or subscription made or to be made by any person of or for any shares in the company or its holding company. However, pursuant to amendments to the Companies Act, companies have been empowered to purchase its own shares or other specified securities out of their free reserves, or the securities premium account or the proceeds of any shares or other specified securities (other than the kind of shares or other specified securities proposed to be bought back) subject to the following conditions:

- (i) the buy back should be authorized by the Articles of Association;
- (ii) a special resolution has been passed at our general meeting authorizing the buy back;

Table of Contents

- (iii) the buy back is limited to 25% of the total paid up capital and free reserves;
- (iv) the debt owed by the company (including all amounts of unsecured and secured debt) is not more than twice the capital and free reserves after the buy back; and

(v) the buy-back is in accordance with the Securities and Exchange Board of India (Buy-Back of Securities) Regulations, 1998. The condition mentioned above in (ii) would not be applicable if the buy-back is for less than 10% of the total paid-up equity capital and free reserves of the company and provided that this buy-back has been authorized by the Board of Directors of the company. A company buying back its securities is required to extinguish and physically destroy the securities so bought back within seven days of the last date of completion of the buy-back. Further, a company buying back its securities is not permitted to buy-back any securities for a period of one year from the buy-back and to issue securities for six months. The aforesaid restriction relating to the one year period does not apply to a buyback authorized by a special resolution of the shareholders in general meeting. Every buy- back has to be completed within a period of one year from the date of passing of the special resolution or resolution of the Board, as the case may be.

A company is also prohibited from purchasing its own shares or specified securities through any subsidiary company including its own subsidiary companies or through any investment company (other than a purchase of shares in accordance with a scheme for the purchase of shares by trustees of or for shares to be held by or for the benefit of employees of the company) or if the company is defaulting on the repayment of deposit or interest, redemption of debentures or preference shares or payment of dividend to a shareholder or repayment of any term loan or interest payable thereon to any financial institution or bank, or in the event of non-compliance with other provisions of the Companies Act.

Liquidation Rights

Subject to the rights of creditors, workmen and of the holders of any other shares entitled by their terms of issue to preferential repayment over the shares, in the event of our winding up, the holders of our Shares are entitled to be repaid the amounts of capital paid-up or credited as paid-up on these shares, or in case of shortfall, proportionately. All surplus assets after payments due to workmen, the holders of any preference shares and other creditors belong to the holders of the equity shares in proportion to the amount paid up or credited as paid-up on these shares respectively at the commencement of the winding-up.

C. Material Contracts.

Except as given below, neither Tata Motors Limited nor any of its consolidated subsidiaries or associated companies is a party to any material contract other than contracts entered into in the ordinary course of business:

The Tata Brand Equity and Business Promotion Agreement, dated December 18, 1998, incorporated by reference into this annual report as Exhibit 4.1. Tata Motors Limited and certain of our subsidiaries have agreed to pay an annual subscription fee to Tata Sons which is equal to 0.15%-0.25% of annual net income (defined as net revenues exclusive of excise duties and other governmental taxes and non-operating income), subject to a ceiling of 5% of annual profit before tax (defined as profit after interest and depreciation but before income tax) for participation and gain from promotion and protection of the Tata brand identity. Pursuant to the agreement, we have also undertaken certain obligations for the promotion and protection of the Tata brand licensed to us under the agreement.

The agreement dated August 24, 2012, entered into by us with Mr. Karl Slym for his appointment as Managing Director. The compensation drawn by him pursuant to this agreement is shown in Item 6B compensation .

The agreement dated January 26, 2010, entered into by Jaguar Land Rover with Dr. Ralf Speth in connection with his appointment as CEO and director. The compensation drawn by him pursuant to this agreement is shown in Item 6 B compensation .

D. Exchange Controls.

General

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Prior to June 1, 2000, foreign investment in Indian securities, including the acquisition, sale and transfer of securities of Indian companies, was regulated by the Foreign Exchange Regulation Act, 1973, or FERA, and the notifications issued by the RBI thereunder.

With effect from June 1, 2000, foreign investment in Indian securities is regulated by the Foreign Exchange Management Act 1999, or FEMA (as amended from time to time), and the rules, regulations and notifications made under FEMA. A person resident outside India can transfer any security of an Indian company or any other security to an Indian resident only under the terms and conditions specified in FEMA and the rules and regulations made thereunder or as permitted by the RBI.

Table of Contents

The RBI issued the Foreign Exchange Management (Transfer or issue of Security by a Person Resident Outside India) Regulations 2000, or the Regulations, to regulate the issue of Indian securities including American depository receipts to persons resident outside India and the transfer of Indian securities by or to persons resident outside India. The Regulations provide that an Indian entity may issue securities to a person resident outside India or record in its books any transfer of security from or to such person only in the manner set forth in FEMA and the rules and regulations made thereunder or as permitted by the RBI.

Foreign Direct Investment

The Government of India, pursuant to its liberalization policy, set up the Foreign Investment Promotion Board, or the FIPB, to regulate all foreign direct investment into India. Foreign Direct Investment, means investment by way of subscription and/or purchase of securities of an Indian company by a non-resident investor. Regulatory approval is required for investment in some sectors, including housing, petroleum (other than refining), defense and strategic industries. Also, the following investments would require the prior regulatory permission:

investments, including a transfer of shares, in excess of specified sectoral caps;

investments by an unincorporated entity;

investment in industries for which industrial licensing is compulsory; and

all proposals relating to acquisition of shares of an Indian company by a foreign investor (including individuals of Indian nationality or origin residing outside India (a Non-Resident Indian), the activities of which company are not under the automatic route under existing Indian foreign investment policy.

Prior no-objection certificates of the relevant financial regulator are required for transfers of shares from residents to non-residents in the financial services sector.

Subject to certain exceptions, Foreign Direct Investment and investment by individuals of Indian nationality or origin residing outside India, or Non-Resident Indians, in Indian companies does not require the prior approval of the FIPB or the RBI. The Government of India has indicated that in all cases where Foreign Direct Investment is allowed on an automatic basis without FIPB approval the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The foregoing description applies only to an issuance of shares by, and not to a transfer of shares of, Indian companies.

The Government of India has set up the Foreign Investment Implementation Authority, or the FIIA in the Ministry of Commerce and Industry. The FIIA has been mandated to (i) translate foreign direct investment approvals into implementation, (ii) provide a proactive one-stop after-care service to foreign investors by helping them obtain necessary approvals, (iii) sort out operational problems and (iv) meet with various government agencies to find solutions to foreign investment problems and maximize opportunities through a co-operative approach.

Pricing

The price of shares of a listed Indian company issued to non-residents under the foreign direct investment scheme on an automatic basis cannot be less than the price worked out in accordance with the guidelines issued by the SEBI for the preferential allotment of shares where the shares of such company are listed.

Every Indian company issuing shares or convertible debentures in accordance with the Regulations is required to submit a report to the RBI within 30 days of receipt of the consideration and another report within 30 days from the date of issue of the shares to the non-resident purchaser.

The above description applies only to a primary issue of shares or convertible debentures by an Indian company.

Portfolio Investment by Foreign Institutional Investors

In September 1992, the Government of India issued guidelines that enable foreign institutional investors, including institutions such as pension funds, investment trusts, asset management companies, nominee companies and incorporated/institutional portfolio managers referred to as FIIs, to make portfolio investments in all securities of listed and unlisted companies in India. Investments by registered Foreign Institutional Investors or Non-Resident Indians made through a stock exchange are known as Portfolio Investments. Foreign investors wishing to invest and trade in Indian securities in India under these guidelines are required to register with the SEBI and obtain a general permission from the RBI under the Foreign Exchange Management Act, 1999. However, since the SEBI provides a single window clearance, a single application must be made to the SEBI. Foreign investors are not necessarily required to register with the SEBI under the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations 1995 (the Foreign Institutional Investor Regulations) as Foreign Institutional Investors and may invest in securities of Indian companies pursuant to the Foreign Direct Investment route discussed above.

Table of Contents

Foreign Institutional Investors who are registered with the SEBI are required to comply with the provisions of the Securities and Exchange Board of India (Foreign Institutional Investors) Regulations, 1995, or Foreign Institutional Investor Regulations. A registered foreign institutional investor may buy, subject to the ownership restrictions discussed below, and sell freely securities issued by any Indian company, realize capital gains on investments made through the initial amount invested in India, subscribe to or renounce rights offerings for shares, appoint a domestic custodian for custody of investments made and repatriate the capital, capital gains, dividends, income received by way of interest and any compensation received towards sale or renunciation of rights offerings of shares. A Foreign Institutional Investor may not hold more than 10% of the total issued capital of a company in its own name; a corporate/individual sub-account of the Foreign Institutional Investor may not hold more than 5% of the total issued capital of a company, and a broad based sub-account may not hold more than 10% of the total issued capital of a company. The total holding of all Foreign Institutional Investors in a company is subject to a cap of 24% of the total paid up capital of a company, which can be increased to the relevant sectoral cap/ceiling applicable to the said company under the Foreign Direct Investment Regime with the passing of a special resolution by the shareholders of the company in a general meeting.

FII's are permitted to purchase shares and convertible debentures, subject to the FII's limits, of an Indian company either through:

a public offer, where the price of the shares to be issued is not less than the price at which the shares are issued to Indian residents, or

a private placement, where the price of the shares to be issued is not less than the price according to the terms of the relevant guidelines or the guidelines issued by the former Controller of Capital Issues.

Registered FII's are generally subject to tax under Section 115AD of the Income Tax Act of 1961. There is uncertainty under Indian law as to the tax regime applicable to FII's that hold and trade in ADS's and Shares. See Item 10.E Taxation Taxation of Capital Gains and Losses Indian Taxation .

Investment by Qualified Foreign Investors

The RBI has allowed Qualified Foreign Investors, or QFIs to purchase equity shares and certain other securities of Indian companies on a repatriation basis subject to certain conditions. The individual and aggregate investment limits for QFIs are 5% and 10%, respectively of the paid up capital of Indian company. These limits are over and above the FII and NRI investment ceilings prescribed under the PIS route for foreign investment in India. Only QFIs from jurisdictions which are compliant with Financial Action Task Force, or FATF, standards and that are signatories to the International Organization of Securities Commission s, or IOSCO s, Multilateral Memorandum of Understanding, or MMOU, are eligible to invest as QFIs.

Portfolio Investment by Non-Resident Indians

A variety of methods for investing in shares of Indian companies are available to Non-Resident Indians. These methods allow Non-Resident Indians to make Portfolio Investments in shares and other securities of Indian companies on a basis not generally available to other foreign investors. In addition to Portfolio Investments in Indian companies, non-resident Indians may also make foreign direct investments in Indian companies pursuant to the Foreign Direct Investment route discussed above.

Transfer of shares and convertible debentures of an Indian company by a person resident outside India

The Government of India has granted general permission to persons residing outside India to transfer shares and convertible debentures held by them to an Indian resident, subject to compliance with certain terms and conditions and reporting requirements. A resident who wishes to purchase shares from a non-resident must, pursuant to the relevant notice requirements, file a declaration with an authorized dealer in the prescribed Form FC-TRS, together with the relevant documents and file an acknowledgment thereof with the Indian company to effect transfer of the shares to his name.

Moreover, the transfer of shares between an Indian resident and a non-resident (except NRI) does not require the prior approval of the Government of India or RBI, provided that: (i) the activities of the investee company are under the automatic route pursuant to FDI Policy and the transfer is not subject to regulations under the Indian Takeover Code; (ii) the non-resident shareholding complies with sector limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

Table of Contents

Indirect Foreign Investment

In April 2010, the Indian Government issued the Consolidated FDI Policy, or the Policy, setting out guidelines for foreign investment in India. The policy used to be reissued every six months and is now to be reissued annually. The Policy *inter alia* prescribes the guidelines for (i) the calculation of total indirect foreign investment in Indian companies, (ii) transfer of ownership or control of Indian companies in sectors with caps from resident Indian citizens to non-resident entities and (iii) guidelines on downstream investments by Indian companies. Pursuant to the Policy, for the purposes of computation of indirect foreign investment in an Indian company, foreign investments in its parent company, by FIIs (holding as of March 31 of the relevant year), NRIs, ADRs, GDRs, FCCBs, FDI, convertible preference shares and convertible currency debentures are required to be taken together.

Sponsored ADR Schemes

By notification dated November 23, 2002, the RBI has permitted existing shareholders of Indian companies to sell their shares through the issuance of ADRs against the block of existing shares of the Indian company, subject to the following conditions:

The facility to sell the shares would be available *pari passu* to all categories of shareholders.

The sponsoring company whose shareholders propose to divest existing shares in the overseas market through issue of ADRs will give an option to all its shareholders indicating the number of shares to be divested and the mechanism how the price will be determined under the ADR norms. If the shares offered for divestment are more than the pre-specified number to be divested, shares would be accepted from the existing shareholders in proportion to their existing shareholdings.

The proposal for divestment of the shares would have to be approved by a special resolution of the Indian company.

The proceeds of the ADR issue raised abroad shall be repatriated into India within a period of one month from the closure of the issue. However, the proceeds of the ADR issue can also be retained abroad to meet the future foreign exchange requirements of the company and by a recent notification this facility has been extended indefinitely until further notice.

The issue related expenses in relation to public issue of ADRs under this scheme would be subject to a ceiling of 4% of the issue size in the case of public issues and 2% of the issue size in the case of private placements. The issue related expenses would include underwriting commissions, lead managers' charges, legal expenses and reimbursable expenses. The issue expenses shall be passed on to the shareholders participating in the sponsored issue on a *pro rata* basis.

Transfer of ADRs by Non-residents

The Ministry of Finance, Government of India, has granted general permission for the transfer of ADRs outside India and also permitted non-resident holders of ADRs to surrender ADRs in exchange for the underlying shares. Pursuant to the terms of the relevant deposit agreement (as amended) an investor who surrenders ADRs and withdraws shares is permitted to re-deposit such shares subject to the total issued ADRs and obtains ADRs at a later time.

Fungibility of ADRs/GDRs

In March 2001, the RBI permitted the re-conversion of shares of Indian companies into ADRs/GDRs, subject to the following conditions:

the Indian company has issued ADRs/GDRs;

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

the shares of the Indian company are purchased by a registered stock broker in India in the name of the Depository, on behalf of the non-resident investor who wishes to convert such shares into ADRs/GDRs;

shares are purchased on a recognized stock exchange;

the shares are purchased with the permission of the custodian of the ADRs/GDRs of the Indian company and are deposited with the custodian;

the issuer company has authorized the custodian to accept shares from non-resident investors for re-issuance of ADRs/GDRs;

the number of shares so purchased do not exceed the ADRs/GDRs converted into underlying shares, and are in compliance with the sectoral caps applicable under the Foreign Direct Investment regime; and

the non-resident investor, broker, custodian and the overseas depository comply with the provisions of the Depository Receipt Mechanism and the guidelines issued thereunder from time to time.

Table of Contents

Also the RBI has prescribed that the domestic custodians are the entity required to ensure compliance with the RBI guidelines and to file reports with the RBI from time to time. The domestic custodian is also required to perform the following functions:

provide a certificate to the RBI and the SEBI stating that the sectoral caps for foreign investment in the relevant company have not been breached;

monitor the total number of ADRs/GDRs that have been converted into underlying shares by non-resident investors;

liaise with the issuer company to ensure that the foreign investment restrictions, if any, are not being breached; and

file a monthly report about the ADRs/GDRs transactions under the two-way fungibility arrangement with the RBI and the SEBI.

Two-way Fungibility of Depository Receipts

We offer foreign investors a limited facility for conversion of Ordinary Shares into American Depositary Receipts within the limits permissible for two-way Fungibility, as announced by the Reserve Bank of India vide its operative guidelines for the limited two way fungibility under the Issue of Foreign Currency Convertible Bond and Ordinary Shares (Through Depository Receipt Mechanism) Scheme, 1993, dated February 13, 2002 .

E. Taxation.

This section describes the material U.S. federal income tax consequences to U.S. holders (as defined below) and the Indian stamp duty and income and service tax consequences to non-residents (as defined below) of owning shares or ADSs. It applies to you only if you hold your shares or ADSs as capital assets for tax purposes. This section does not apply to you if you are a member of a special class of holders subject to special rules, including:

a dealer in securities,

a trader in securities that elects to use a mark-to-market method of accounting for securities holdings,

a tax-exempt organization,

a life insurance company,

a person liable for alternative minimum tax,

a person that actually or constructively owns 10% or more of our voting stock,

a person that holds shares or ADSs as part of a straddle or a hedging or conversion transaction,

a person that purchases or sells shares or ADSs as part of a wash sale for tax purposes or

a U.S. holder (as defined below) whose functional currency is not the US dollar.

With regard to United States tax, the following discussion addresses only the material U.S. federal income tax consequences for persons that are U.S. holders . You are a U.S. holder if you are a beneficial owner of shares or ADSs and you are, for U.S. federal income tax purposes:

a citizen or resident of the United States,

a domestic corporation,

an estate whose income is subject to U.S. federal income tax regardless of its source, or

a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

With regard to Indian tax, the following discussion addresses only the tax consequences for persons that are non-residents of India, as defined in the Indian Income Tax Act of 1961, the Income Tax Act , and is based on the provisions of Section 115AC and other applicable provisions of the Income Tax Act and the Issue of Foreign Currency Convertible Bonds and Ordinary Shares (Through Depository Receipt Mechanism) Scheme, 1993 promulgated by the Government of India (together, the Section 115AC Regime) .

If a partnership holds shares or ADSs, the U.S. federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. If you hold shares or ADSs as a partner in a partnership, you should consult your tax advisor with regard to the U.S. federal income tax treatment of an investment in our Shares or ADSs.

Table of Contents

This discussion addresses only U.S. federal income taxation and Indian stamp duty and income and service taxation. In addition, this section is based in part upon the representations of the depositary and the assumption that each obligation in the deposit agreement (as amended) and any related agreement will be performed in accordance with its terms.

The DTC, proposes to replace the existing Income Tax Act, 1961, and other direct tax laws, with a view to simplify and rationalize the tax provisions into one unified code. The Indian Government has placed before the parliament the proposed DTC. The various proposals included in DTC are subject to review by Indian parliament and, as such, the impact, if any, is not quantifiable at this stage.

This summary is not intended to constitute a complete analysis of the individual tax consequences to nonresident holders for the acquisition, ownership and sale of ADSs and equity shares.

Taxation of Dividends

Indian Taxation

Dividends paid to non-residents of India will not be subject to Indian tax. However, the Company has to pay a dividend distribution tax, as applicable, currently at the rate of 15% (plus a surcharge at 10% and an education cess at the rate of 3% on the sum of the dividend distribution tax and surcharge) on the total amount distributed as a dividend. The effective rate of dividend distribution tax is 16.995%.

Distributions to non-residents of India of additional ADSs or shares or rights to subscribe for such shares made with respect to ADSs or shares are not subject to Indian tax.

U.S. Federal Income Taxation

Under the U.S. federal income tax laws, and subject to the Passive Foreign Investment Company, or PFIC, rules described below, if you are a U.S. holder, the gross amount of any dividend we pay out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) is subject to U.S. federal income taxation. If you are a non-corporate U.S. holder, dividends that constitute qualified dividend income will be taxable to you at the preferential rates applicable to long-term capital gains provided that you hold the shares or ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and meet other holding period requirements. Dividends we pay with respect to our Shares or ADSs generally will be qualified dividend income.

The dividend is taxable to you when you, in the case of shares, or the Depositary, in the case of ADSs, receive the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend distribution that you must include in your income as a U.S. holder will be the US dollar value of the Indian rupee payments made, determined at the spot Indian rupee/US dollar rate on the date the dividend distribution is includible in your income, regardless of whether the payment is in fact converted into US dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date you include the dividend payment in income to the date you convert the payment into US dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for U.S. federal income tax purposes, will be treated as a non-taxable return of capital to the extent of your basis in the shares or ADSs and thereafter as capital gain. However, we do not expect to calculate earnings and profits in accordance with United States federal income tax principles. Accordingly, you should expect to generally treat distributions we make as dividends for U.S. federal income tax purposes.

Dividends will generally be income from sources outside the United States and will, depending on your circumstances, be either passive or general income for purposes of computing the foreign tax credit limitation allowable to you.

Distributions of additional shares to you with respect to shares or ADSs that are made as part of a pro rata distribution to all of our shareholders generally will not be subject to U.S. federal income tax.

Taxation of Capital Gains and Losses

Indian Taxation

Table of Contents

Capital Gains: Under Section 115AC and other applicable provisions of the Income Tax Act, any gain realized on the sale outside India of the ADSs from one non-resident of India to another non-resident of India is not subject to Indian capital gains tax. However, it is unclear whether a capital gain derived from the sale of rights by a non-resident of India to another non-resident of India outside of India may be subject to Indian capital gains tax.

Capital gains arising to the non-resident investor on the transfer of equity shares (including shares received in exchange of the ADSs) whether in India or outside India to a non-resident investor or Indian resident, will be liable for income tax under the provisions of the Income Tax Act.

Equity shares (including shares issuable on the exchange of the ADSs) held by a non-resident investor for a period of more than 12 months are treated as long-term capital assets and the capital gains arising on the sale thereof are treated as long-term capital gains. If the equity shares are held for a period of 12 months or less, it are treated as short-term capital assets and the capital gains arising on the sale thereof are treated as short-term capital gains. A non-resident holder's holding period (for purposes of determining the applicable Indian capital gains tax rate) in respect of shares received in exchange for ADSs commences on the date of the advice of withdrawal of such shares by the relevant depository to its custodian.

For the purpose of computing capital gains tax on the sale of the equity shares, the cost of acquisition of equity shares received in exchange for ADSs will be determined on the basis of the prevailing price of the shares on the Indian Stock Exchanges as on the date on which the relevant depository gives notice to its custodian for the delivery of such equity shares upon redemption of the ADSs, while the cost of acquisition of shares directly converted from the ADSs will be determined on the basis of the price prevailing on the Indian Stock Exchanges on the date of conversion into equity shares.

Gain realized on the sale of listed equity shares held for more than 12 months will not be subject to Indian capital gains tax if the Securities Transaction Tax, or STT has been paid on the transaction. The STT will be levied on and collected by a domestic stock exchange on which equity shares are sold at the rate of 0.025% to 0.1% depending upon the nature of the transaction.

Any gain realized on the sale of listed equity shares held for more than 12 months on which no STT has been paid will be subject to Indian capital gains tax at the rate of 10% plus applicable surcharge on income tax and education cess at the applicable rates.

Capital gains realized in respect of equity shares held (calculated in the manner set forth in the prior paragraph) for 12 months or less (short-term gain) on which STT is paid in the manner and rates set out above, is subject to tax at the rate of 15% plus applicable surcharge on income tax and an education cess at the applicable rate. In the event that no STT is paid, short-term gain is subject to tax at variable rates with the maximum rate of 40% plus applicable rate of surcharge on income tax and education cess at the applicable rate. The actual rate of tax on short-term gains depends on a number of factors, including the legal status of the non-resident holder and the type of income chargeable in India.

Tax on capital gains is to be deducted at source by the person paying for the shares in accordance with the relevant provisions of the Income Tax Act.

Capital Losses: The Section 115AC Regime does not deal with capital losses arising on a transfer of shares. In general terms, losses arising from a transfer of a capital asset in India can only be set off against capital gains and not against any other income. A short-term capital loss can be set off against a capital gain, whether short-term or long-term. However, long-term capital loss can only be set off against long-term capital gain and not against short-term capital gain. To the extent that the losses are not absorbed in the year of transfer, they may be carried forward for a period of eight assessment years immediately succeeding the assessment year for which the loss was first determined and may be set off against the capital gains assessable for such subsequent assessment years. In order to set off capital losses in this manner, the non-resident investor would be required to file appropriate and timely tax returns in India. The long-term capital loss arising on a sale of equity shares in respect of which STT is paid may not be available for set-off against any capital gains.

U.S. Federal Income Taxation

Generally, subject to the PFIC rules discussed below, if you are a U.S. holder and you sell or otherwise dispose of your shares or ADSs, you will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference between the US dollar value of the amount that you realize and your tax basis, determined in US dollars, in your shares or ADSs. Capital gain of a non-corporate U.S. holder, is generally taxed at preferential rates where the holder has a holding period greater than one year. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

Passive Foreign Investment Companies: We believe that the Shares and ADSs should not be treated as stock of a PFIC for U.S. federal income tax purposes, but this conclusion is a factual determination that is made annually and thus may be subject to change.

Table of Contents

If we were to be treated as a PFIC, then unless you elect to be taxed annually on a mark-to-market basis with respect to your shares or ADSs, gain realized on the sale or other disposition of your shares or ADSs would in general not be treated as capital gain. Instead, if you are a U.S. holder, you would be treated as if you had realized such gain and certain excess distributions ratably over your holding period for the shares or ADSs and would be taxed at the highest tax rate in effect for each such year to which the gain was allocated, together with an interest charged in respect of the tax attributable to each such year. With certain exceptions, your shares or ADSs will be treated as stock in a PFIC if we were a PFIC at any time during your holding period in your shares or ADSs. Dividends that you receive from us will not be eligible for the special tax rates applicable to qualified dividend income if we are treated as a PFIC with respect to you either in the taxable year of the distribution or the preceding taxable year, but instead will be taxable at rates applicable to ordinary income.

Indian Tax Treaties

The provisions of the tax treaty entered into by India and the country of residence of the non-resident investor will be applicable to the extent they are more beneficial to the non-resident investor. The Government of India has introduced General Anti Avoidance Rules, or GAAR, which will be applicable from April 1, 2015. As per the provisions of GAAR, an arrangement entered into by the assessee may be declared by the Income Tax Authorities to be an impermissible avoidance arrangement if it satisfies the specified conditions and consequently benefit under a tax treaty could be denied. Also, the Government of India has introduced a provision as per which the non-resident would not be entitled to claim any relief under the tax treaty unless the tax residency certificate is obtained by him from the government of the country of which he is a tax resident.

Dividend income is not subject to tax in India in the hands of the non-resident holder of the shares. If any shares are held by a non-resident investor following withdrawal thereof from the depository facility under the deposit agreement (as amended), the provisions of a tax treaty, if any, entered into by India and the country of residence of such non-resident investor will be applicable to determine the taxation of any capital gain arising from a transfer of such shares.

However, during the period of fiduciary ownership of shares in the hands of the overseas depository bank, the provisions of the tax treaty entered into by India and the country of residence of the overseas depository bank will be applicable to determine the taxation of any capital gains in respect of ADSs.

Indian Stamp Duty

Under Indian law, any transfer of ADSs will be exempt from liability to Indian stamp duty. Purchasers of shares who seek to register such shares on the share register of the company are required to pay Indian stamp duty at the rate of Rs.0.25 for every Rs.100 or part thereof of the market value of such shares. In order to register a transfer of shares in physical form with the company, it is necessary to present a stamped deed of transfer. An acquisition of shares in physical form from the Depository in exchange for ADSs representing such shares will not render an investor liable to Indian stamp duty but the company will be required to pay stamp duty at the applicable rate on the share certificate. However, since our shares are compulsorily deliverable in dematerialized form (except for trades of up to 500 shares which may be delivered in physical form), no stamp duty is payable on the acquisition or transfer of shares in dematerialized form.

Indian Service Tax

Brokerage or commission fees paid to stockbrokers in India in connection with the sale or purchase of shares are now subject to an Indian service tax of 12% (plus a 3% education cess). A stockbroker is responsible for collecting such service tax at such rate and for paying the same to the relevant authority

I. Subsidiary Information.

Not applicable.

Item 11. Quantitative and Qualitative Disclosures about Market Risk.

Our exposure to financial risks derives primarily from changes in interest rates and foreign exchange rates. To mitigate these risks, we utilize derivative financial instruments, including interest rate option contracts and currency swap agreements, the application of which is primarily for hedging purposes and not for speculative purposes.

Commodity price risk

Commodity price risk is the possibility of impact from changes in the price of commodities, such as non-ferrous metals (like aluminum), ferrous alloys (like steel) and others (like rubber, platinum and rhodium), which we use in production of automotive vehicles and their components.

See Note 37 of our audited consolidated financial statements included elsewhere in this annual report for additional disclosures on financial instruments including disclosure on fair value of financial instruments.

D. American Depositary Shares.

Fees Payable by ADS Holders

Citibank, N.A., the depository of our ADR program, collects fees for issuance and cancellation of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them on such fees as per the Depositary agreement.

An ADS holder is required to pay the following service fees to the depository:

Service	Fees
	Up to US\$0.05 per ADS issued

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Issuance of ADSs, Cancellation of ADSs, Distribution of ADSs pursuant to stock dividends, free stock distributions or exercise of rights and Distribution of securities other than ADSs or rights to purchase additional ADSs

Distribution of cash dividends or other cash distributions

Up to US\$0.02 per ADS held

Depository services

Up to US\$0.02 per ADS held on the applicable record date(s) established by the depository

Table of Contents

An ADS holder will also be responsible to pay certain fees and expenses incurred by the depositary bank and certain taxes and governmental charges such as:

Service	Fees
Transfer and registration on the share register (for example, upon deposit and withdrawal of Ordinary Shares)	Registration and transfer fees
Converting foreign currency into US dollars	
Cable, telex and fax transmissions and delivery expenses	Expenses incurred by the depositary
Transfer of securities (for example, when Ordinary Shares are deposited or withdrawn from deposit)	Taxes and duties for the transfer of securities
Delivery or servicing of Ordinary Shares on deposit	Fees and expenses incurred by the depositary

The fees and charges an ADS holder may be required to pay may vary over time and may be changed by us and by the depositary bank. ADS holders will receive prior notice of such changes.

Fees and Other Payments Made by the Depositary to U.S.

For Fiscal 2013, we have received US\$2.3 million from the Depositary for standard out of pocket maintenance costs of our ADR Program consisting of continuing annual stock exchange listing fees, special investor promotion activities and issue related expenses, cost for preparing and audit of IFRS accounts, legal/ accounting fees associated with the foreign listing, miscellaneous expenses such as costs associated with voting of ADRs holders, payment made to proxy firms, etc.

Disclosure Controls and Procedures

Tata Motors Limited performed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures as of March 31, 2013. Based on this evaluation, our Managing Director, Karl Slym, and our Chief Financial Officer, C. Ramakrishnan have concluded that our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, are effective.

Based on this evaluation, our Managing Director and Chief Financial Officer concluded that our disclosure controls and procedures are effective, as of March 31, 2013, to provide reasonable assurance that the information required to be disclosed in filings and submissions under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Managing Director and Chief Financial Officer, as appropriate to allow timely decisions about required disclosure.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Table of Contents***Management's Annual Report on Internal Control Over Financial Reporting***

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with IFRS. Our internal control over financial reporting includes policies and procedures that:

- i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets;
- ii. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Our management conducted an assessment of the effectiveness of our internal control over financial reporting based on the framework established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that our internal control over financial reporting as at March 31, 2013 is effective.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

The effectiveness of our internal control over financial reporting as at March 31, 2013 has been audited by Deloitte Haskins & Sells, an independent registered public accounting firm, as stated in their report appearing on the accompanying consolidated financial statements in Item 18, which expresses an unqualified opinion on the effectiveness of our internal control over financial reporting as at March 31, 2013.

Changes in Internal Control over Financial Reporting

During the period covered by this annual report, there were no changes in our internal control over financial reporting that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert.

Our Board has determined that Mr. Nasser Munjee, an independent director and a member of our Audit Committee, is an Audit Committee financial expert as defined under the applicable rules of the SEC issued pursuant to Section 407 of the Sarbanes – Oxley Act of 2002.

Item 16B. Code of Ethics.

We have adopted the Tata Code of Conduct, hereinafter referred as to the Code, a written code of ethics which is applicable to all our employees. The Code is available at all our offices and on our website www.tatamotors.com.

In August 2004, our Audit Committee adopted a Whistle Blower Policy, or the Policy, that provided a formal mechanism for all our employees to approach our management (or the Audit Committee in cases where the concern involves the senior management) and make protective disclosures to the Management about unethical behavior, actual or suspected fraud or violations of the Company's Code or ethics policy. The Policy was updated on January 29, 2009. The Policy is an extension of the Code, which requires every employee to promptly report to the

Management any actual or possible violation of the Code or an event such employee becomes aware of that could affect our business or reputation. The disclosures reported are addressed in the manner and within the time frames prescribed in the Policy. The Policy is available on our website www.tatamotors.com.

Item 16C. Principal Accountant Fees and Services.

Our financial statements prepared in accordance with IFRS, are audited by Deloitte Haskins & Sells, or DHS, a firm registered with the Public Company Accounting Oversight Board in the United States and which is also registered with the Institute of Chartered Accountants of India.

DHS has served as our independent public accountant for each of the years ended March 31, 2013 and March 31, 2012, for which audited financial statements appear in this annual report. The following table presents the aggregate fees for professional services and other services rendered by DHS and the various member firms of Deloitte to us including some of our subsidiaries in Fiscal 2013 and 2012.

Table of Contents

	2013 US\$ in million	2013 Rs. in million	2012	
Audit Fees	7.3	393.8	344.9	Audit and review of financial statements
Tax Fees	0.4	20.2	13.2	Tax audit, certification of foreign remittances and tax advisory services
All Other Fees	0.6	30.2	64.3	Other certifications and advisory services
Total	8.3	444.2	422.4	

Audit Committee pre-approval for services rendered by independent accountants:

We have adopted a policy for pre-approval of services to be rendered by our independent accountants for us and our subsidiaries based on an elaborate procedure for ensuring auditor independence and objectivity.

At the beginning of each year, the Audit Committee approves the proposed services, including the nature, type and scope of services contemplated and/or the related fees to be rendered by these firms during the year.

In addition, Audit Committee pre-approval is also required for those engagements that may arise during the course of the year that are outside the scope of the initial services and such fees are pre-approved by the audit Committee.

We do not engage our independent accountants for prohibited services .

Our Audit Committee recommends the appointment and compensation of independent accountants.

In case of urgent requirements, our CFO and the Chairman of our Audit Committee jointly approve any services that may be rendered by our independent accountants or their member firms and such services are subsequently ratified at the next Audit Committee meeting.

The pre-approval is not required where the fees proposed to be paid for the non-audit services do not exceed 5% of the total amount of fees paid by us to our independent accountants and their member firms during the Fiscal year, provided that such services were not recognized as non audit services at the time of the engagement of services. Such services are also brought to the attention of the Audit Committee at the next meeting.

Item 16D. Exemptions from the Listing Standards for Audit Committees.
Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.
None.

Item 16F. Change in Registrant s Certifying Accountant.

None.

Item 16G. Corporate Governance.

As a foreign private issuer, as defined under Rule 3b-4 of the Exchange Act, Tata Motors Limited is permitted under the NYSE listing standards to follow applicable Indian corporate governance practices with regard to various corporate governance matters. The following is a summary comparison of significant differences between our corporate governance practices and those required by the NYSE for non-U.S. issuers.

Independent directors: The Board has determined the independence of its directors pursuant to applicable Indian listing requirements. Six directors of the Board of Directors are independent directors pursuant to such requirements. Under such requirements, a non-Executive Director is considered independent if he:

apart from receiving director's remuneration, does not have any material pecuniary relationships or transactions with us or our promoters, our directors, our senior management or our holding company, its subsidiaries and associates which may affect the independence of the director;

is not related to promoters or person occupying management position at the board level or at one level below the board;

has not been an executive of the Company in the immediately preceding three financial years;

Table of Contents

is not a partner or an executive or was not a partner or an executive during the preceding three years, of our statutory audit firm or internal audit firm or a legal/consulting firm that has a material association with us.

is not a material supplier, service provider or customer or a lessor or lessee of the Company, which may affect their independence; and

is not our substantial shareholders, owning two percent or more of our voting shares.

is not below 21 years of age.

Non-management directors meetings: The NYSE listing standards require regularly scheduled executive sessions of non-management directors without management participation or regularly scheduled executive sessions consisting of only independent directors. There is no such requirement under applicable Indian legal requirements.

Remuneration Committee: The NYSE listing standards require a listed company to maintain a Remuneration Committee, composed entirely of independent directors. Our Remuneration Committee comprises two independent members and two non-independent members, which is in compliance with the requirement regarding the number of independent members of the Remuneration Committee under applicable Indian laws. The constitution and main functions of this committee as approved by our Board are described above and, we believe, generally comply with the spirit of the NYSE requirements for non-U.S. issuers.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Tata Motors Limited

Mumbai, India

We have audited the accompanying consolidated balance sheets of Tata Motors Limited and subsidiaries (the Company or Tata Motors) as of March 31, 2013 and 2012, and the related consolidated income statements, consolidated statements of comprehensive income, consolidated statements of cash flows, and consolidated statements of changes in equity for each of the three years in the period ended March 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Tata Motors Limited and subsidiaries as of March 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended March 31, 2013, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of March 31, 2013, based on the criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated August 2, 2013, expressed an unqualified opinion on the Company's internal control over financial reporting.

Our audit for the year ended and as of March 31, 2013, also comprehended the translation of Indian rupee amounts into United States dollar amounts and in our opinion, such translation has been made in conformity with the basis stated in Note 2(w). The translation of the consolidated financial statements amounts into United States dollars have been made solely for the convenience of the readers.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

Tata Motors Limited

Mumbai, India

We have audited the internal control over financial reporting of Tata Motors Limited and subsidiaries (the Company or Tata Motors) as of March 31, 2013, based on criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Item 15 under Controls and Procedures of the accompanying Form 20-F titled Management’s Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed by, or under the supervision of, the company’s principal executive and principal financial officers, or persons performing similar functions, and effected by the company’s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2013, based on the criteria established in Internal Control – Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended March 31, 2013 of the Company and our report dated August 2, 2013, expressed an unqualified opinion on those financial statements.

Table of Contents

Tata Motors Limited and subsidiaries

Notes to Consolidated Financial Statements

1. Background and operations

Tata Motors Limited and its subsidiaries, collectively referred to as (the Company or Tata Motors), designs, manufactures and sells a wide range of automotive vehicles. The Company provides financing for the vehicles sold by dealers of the Company in certain markets. The Company also manufactures engines for industrial and marine applications, aggregates such as axles and transmissions for commercial vehicles and factory automation equipment, and provides information technology services.

Tata Motors Limited is a public limited company incorporated and domiciled in India and has its registered office at Mumbai, Maharashtra, India.

The consolidated financial statements were approved by the Board of Directors and authorised for issue on August 2, 2013.

The Company's subsidiaries includes the Jaguar Land Rover business (referred to as JLR) which has three manufacturing facilities and two advanced engineering centres in the UK and a world wide sales network.

As on March 31, 2013, Tata Sons Limited (or Tata Sons), together with its subsidiaries, owns 28.96% of the ordinary shares and 0.87% of A ordinary shares of Tata Motors Limited, and has the ability to significantly influence the Company's operations (refer note 25 for voting rights relating to ordinary shares and A ordinary shares).

2. Significant accounting policies

a. Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (referred to as IFRS) as issued by the International Accounting Standards Board (referred to as IASB).

b. Basis of preparation

The consolidated financial statements have been prepared on historical cost basis except for certain financial instruments measured at fair value.

c. Basis of consolidation

Subsidiaries

The consolidated financial statements include Tata Motors Limited and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that currently are exercisable are taken into account. The results of subsidiaries acquired or disposed of during the year are included in the consolidated financial statements from the effective date of acquisition and up to the effective date of disposal, as appropriate.

Inter-company transactions and balances including unrealized profits are eliminated in full on consolidation.

Non-controlling interests in the net assets (excluding goodwill) of consolidated subsidiaries are identified separately from the Company's equity. The interest of non-controlling shareholders may be initially measured either at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition by- acquisition basis.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Total comprehensive income is attributed to non-controlling interests even if it results in the non-controlling interest having a deficit balance.

Changes in the Company's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Company's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company.

F-12

Table of Contents

When the Company loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. Amounts previously recognized in other comprehensive income in relation to the subsidiary are accounted for (i.e. reclassified to profit or loss or transferred directly to retained earnings) in the same manner as would be required if the relevant assets or liabilities were disposed of. The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IAS 39 *Financial Instruments: Recognition and Measurement* or, when applicable, the cost on initial recognition of an investment in an associate or jointly controlled entity.

Associates and jointly controlled entities (equity accounted investees)

Associates are those entities in which the Company has significant influence, but not control, over the financial and operating policies. Significant influence is presumed to exist when the Company holds between 20 and 50 percent of the voting power of another entity. Jointly controlled entities are those entities over whose activities the Company has joint control, established by contractual agreement and requiring unanimous consent for strategic financial and operating decisions.

Equity accounted investees are accounted for using the equity method and are recognized initially at cost. The Company's investment includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the Company's share of profits or losses and equity movements of equity accounted investees, from the date that significant influence or joint control commences until the date that significant influence or joint control ceases. When the Company's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest (including any long-term investments in the nature of net investments) is reduced to nil and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee.

When the Company transacts with an associate or jointly controlled entity of the Company, unrealized profits and losses are eliminated to the extent of the Company's interest in its associate or jointly controlled entity.

d. Business combination

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. Acquisition related costs are recognized in profit or loss as incurred. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition are recognized at their fair value at the acquisition date, except certain assets and liabilities required to be measured as per the applicable standard.

Purchase consideration in excess of the Company's interest in the acquiree's net fair value of identifiable assets, liabilities and contingent liabilities is recognized as goodwill. Excess of the Company's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over the purchase consideration is recognized, after reassessment of fair value of net assets acquired, in the income statement.

e. Use of estimates and judgments

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses and disclosures of contingent assets and liabilities at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

- i) Note 11(3) Property, plant and equipment

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

As described in Note 11(3), the Company reasonably expects that the outcome of any legal proceeding in the Supreme Court of India, in respect of decision by the High Court of Calcutta, relating to the cancellation of the lease land will be upheld in the Company's favor.

- ii) Note 13 Impairment of goodwill

- iii) Note 14 Impairment of indefinite life intangible assets

- iv) Note 15 Impairment of equity accounted investees

- v) Note 16 Recoverability/recognition of deferred tax assets

F-13

Table of Contents

- vi) Note 20 Provision for product warranty
- vii) Note 32 Assets and obligations relating to employee benefits
- viii) Note 35(a) and (d)(iv) Determination of fair value of conversion option
- ix) Note 35 (a) and (d)(iv) Financial instruments and fair valuation of prepayment options in Senior Notes.

f. Revenue recognition

Revenue is measured at fair value of consideration received or receivable.

i. Sale of products

The Company recognizes revenues on the sale of products, net of discounts, sales incentives, customer bonuses and rebates granted, when products are delivered to dealers or when delivered to a carrier for export sales, which is when title and risks and rewards of ownership pass to the customer. Sale of products includes export and other recurring and non-recurring incentives from Governments (referred to as incentives). Sale of products is presented net of excise duty where applicable and other indirect taxes.

Revenues are recognized when collectability of the resulting receivable is reasonably assured.

Incentives are recognized when there is reasonable assurance that the Company will comply with the conditions and the incentive will be received. Incentives are recorded at fair value where applicable. Revenues include incentives of Rs. 8,361.1 million, Rs. 4,402.5 million and Rs. 8,112.8 million for the year ended March 31, 2013, March 31, 2012 and March 31, 2011, respectively.

ii. Finance revenues

Finance and service charges are accrued on the unpaid principal balance of finance receivables using the effective interest method.

g. Cost recognition

Costs and expenses are recognized when incurred and are classified according to their nature.

Expenditure capitalized represents employee costs, stores and other manufacturing supplies, and other expenses incurred for construction including product development undertaken by the Company.

h. Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

i) Product warranty expenses

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidences based on actions on product failures. The timing of outflows will vary as and when warranty claim will arise, being typically up to four years.

ii) Residual risk

In certain markets, the Company is responsible for the residual risk arising on vehicles sold by dealers under leasing arrangements. The provision is based on the latest available market expectations of future residual value trends. The timing of the outflows will be at the end of the lease arrangements being typically up to three years.

i. Foreign currency

These consolidated financial statements are presented in Indian Rupees, which is the functional currency of Tata Motors Limited.

Transactions in foreign currencies are recorded at the exchange rate prevailing on the date of transaction. Foreign currency denominated monetary assets and liabilities are remeasured into the functional currency at the exchange rate prevailing on the balance sheet date. Exchange differences are recognized in the income statement except to the extent, exchange differences, which are regarded as an adjustment to interest costs on foreign currency borrowings, are capitalized as part of borrowing costs.

Table of Contents

For the purpose of consolidation, the assets and liabilities of the Company's foreign operations, are translated to Indian Rupee at the exchange rate prevailing on the balance sheet date, and the income and expenses at the average rate of exchange for the respective month. Exchange differences arising are recognized as currency translation reserve under equity.

j. Income taxes

Income tax expense comprises current and deferred taxes. Income tax expense is recognized in the income statement except, when they relate to items that are recognized outside profit or loss (whether in other comprehensive income or directly in equity), in which case tax is also recognized outside profit or loss, or where they arise from the initial accounting for business combination. In the case of a business combination the tax effect is included in the accounting for the business combination.

Current income taxes are determined based on respective taxable income of each taxable entity and tax rules applicable for respective tax jurisdictions.

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilized business loss and depreciation carry-forwards and tax credits. Such deferred tax assets and liabilities are computed separately for each taxable entity and for each taxable jurisdiction. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilized.

Deferred tax assets and liabilities are measured based on the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

k. Earnings per share

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Partly paid up shares are included as fully paid equivalents according to the fraction paid up. Diluted earnings per share has been computed using the weighted average number of shares and dilutive potential shares, except where the result would be antidilutive.

l. Inventories

Inventories (other than those recognized consequent to the sale of vehicles subject to repurchase arrangements) are valued at the lower of cost and net realizable value. Cost of raw materials and consumables are ascertained on a first in first out basis. Cost, including fixed and variable production overheads, are allocated to work-in-progress and finished goods determined on a full absorption cost basis. Net realizable value is the estimated selling price in the ordinary course of business less estimated cost of completion and selling expenses.

Inventories include vehicles sold subject to repurchase arrangements. These vehicles are carried at cost to the Company and are amortized in changes in inventories of finished goods to their residual values (i.e. estimated second hand sale value) over the term of the arrangement.

m. Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any.

Freehold land is measured at cost and is not depreciated.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Cost includes purchase price, taxes and duties, labor cost and direct overheads for self constructed assets and other direct costs incurred up to the date the asset is ready for its intended use.

Interest cost incurred for constructed assets is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings, if no specific borrowings have been incurred for the asset.

F-15

Table of Contents

Depreciation is provided on a straight-line basis over estimated useful lives of the assets. Estimated useful lives of the assets are as follows:

	Estimated useful life (years)
Buildings	20 to 40
Plant and equipment	3 to 30
Computers	3 to 6
Vehicles	3 to 10
Furniture and fixtures	3 to 20

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

Depreciation is not recorded on capital work-in-progress until construction and installation are complete and the asset is ready for its intended use. Capital-work-in-progress includes capital advances.

n. Intangible assets

Intangible assets purchased including acquired in business combination, are measured at cost or fair value as of the date of acquisition where applicable less accumulated amortization and accumulated impairment, if any. Intangible assets with indefinite lives are reviewed annually to determine whether indefinite-life assessment continues to be supportable. If not, the change in the useful-life assessment from indefinite to finite is made on a prospective basis.

Amortization is provided on a straight-line basis over estimated useful lives of the intangible assets as per details below

	Estimated amortization period
Patents and technological know-how	2 to 12 years
Dealer network	20 years
Intellectual property rights	7 to 9 years
Software	2 to 8 years

The amortization period for intangible assets with finite useful lives is reviewed at least at each year-end. Changes in expected useful lives are treated as changes in accounting estimates.

Capital work-in-progress includes capital advances.

Customer related intangible consists of dealer network.

Internally generated intangible asset

Research costs are charged to the income statement in the year in which they are incurred.

Product development costs incurred on new vehicle platform, engines, transmission and new products are recognized as intangible assets, when feasibility has been established, the Company has committed technical, financial and other resources to complete the development and it is probable that asset will generate probable future economic benefits.

The costs capitalized include the cost of materials, direct labor and directly attributable overhead expenditure incurred up to the date the asset is available for use.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Interest cost incurred is capitalized up to the date the asset is ready for its intended use, based on borrowings incurred specifically for financing the asset or the weighted average rate of all other borrowings if no specific borrowings have been incurred for the asset.

Product development cost is amortized over a period of 24 months to 120 months or on the basis of actual production to planned production volume over such period.

Capitalized development expenditure is measured at cost less accumulated amortization and accumulated impairment, if any.

F-16

Table of Contents

o. Leases

At the inception of a lease, the lease arrangement is classified as either a finance lease or an operating lease, based on the substance of the lease arrangement.

Assets taken on finance lease

A finance lease is recognized as an asset and a liability at the commencement of the lease, at the lower of the fair value of the asset and the present value of the minimum lease payments. Initial direct costs, if any, are also capitalized and, subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Assets taken on operating lease

Leases other than finance leases, are operating leases, and the leased assets are not recognized on the Company's balance sheet. Payments made under operating leases are recognized in the income statement on a straight-line basis over the term of the lease.

p. Impairment

i) Goodwill

Cash generating unit to which goodwill is allocated are tested for impairment annually at each balance sheet date, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to that unit and then to the other assets of the unit pro rata on the basis of carrying amount of each asset in the unit. Goodwill impairment loss recognized is not reversed in subsequent period.

ii) Property, plant and equipment and other intangible assets

At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually at each balance sheet date, or earlier, if there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the income statement.

As of March 31, 2013 and 2012, none of the Company's property, plant and equipment and intangible assets were considered impaired.

Table of Contents

q. Employee benefits

i) Pension plans

The Jaguar Land Rover subsidiaries operate several defined benefit pension plans, which are contracted out of the second state pension scheme. The assets of the plan are held in separate trustee administered funds. The plans provide for monthly pension after retirement as per salary drawn and service period as set out in rules of each fund.

Contributions to the plans by the subsidiary group take into consideration the results of actuarial valuations. The plans with a surplus position at the year end have been limited to the maximum economic benefit available from unconditional rights to refund from the scheme or reduction in future contributions. Where the subsidiary group is considered to have a contractual obligation to fund the pension plan above the accounting value of the liabilities, an onerous obligation is recognized.

A separate defined contribution plan is available to employees of a major subsidiary group, Jaguar Land Rover. Costs in respect of this plan are charged to the income statement as incurred.

ii) Gratuity

Tata Motors and its subsidiaries in India have an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 to 30 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. Tata Motors and such subsidiaries make annual contributions to gratuity funds established as trusts or insurance companies. Tata Motors and its subsidiaries in India account for the liability for gratuity benefits payable in the future based on an actuarial valuation.

iii) Superannuation

Tata Motors and some of its subsidiaries in India have two superannuation plans, a defined benefit plan and a defined contribution plan. An eligible employee on April 1, 1996 could elect to be a member of either plan.

Employees who are members of the defined benefit superannuation plan are entitled to benefits depending on the years of service and salary drawn. The monthly pension benefits after retirement range from 0.75% to 2% of the annual basic salary for each year of service. Tata Motors and such subsidiaries account for superannuation benefits payable in future under the plan based on an actuarial valuation.

With effect from April 1, 2003, this plan was amended and benefits earned by covered employees have been protected as at March 31, 2003. Employees covered by this plan are prospectively entitled to benefits computed on a basis that ensures that the annual cost of providing the pension benefits would not exceed 15% of salary.

Separate irrevocable trusts are maintained for employees covered and entitled to benefits. Tata Motors and its subsidiaries contribute up to 15% of the eligible employees' salary to the trust every year. Such contributions are recognized as an expense when incurred. Tata Motors and such subsidiaries have no further obligation beyond this contribution.

iv) Bhavishya kalyan yojana (BKY)

Bhavishya Kalyan Yojana is an unfunded defined benefit plan for employees of Tata Motors and some of its subsidiaries. The benefits of the plan include pension in certain cases, payable upto the date of normal superannuation had the employee been in service, to an eligible employee at the time of death or permanent disablement, while in service, either as a result of an injury or as certified by the appropriate authority. The monthly payment to dependents of the deceased/disabled employee under the plan equals 50% of the salary drawn at the time of death or accident or a specified amount, whichever is higher. Tata Motors and these subsidiaries account for the liability for BKY benefits payable in the future based on an actuarial valuation.

Table of Contents

v) Provident fund and family pension

In accordance with Indian law, eligible employees of Tata Motors and some of its subsidiaries are entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The contributions, as specified under the law, are made to the provident fund and pension fund set up as an irrevocable trust by Tata Motors and its subsidiaries or to respective Regional Provident Fund Commissioner and the Central Provident Fund under the State Pension scheme.

vi) Severance indemnity

Tata Daewoo Commercial Vehicle Company Limited (TDCV), a subsidiary company incorporated in Korea has an obligation towards severance indemnity, a defined benefit retirement plan, covering eligible employees. The plan provides for a lump sum payment to all employees with more than one year of employment equivalent to 30 days' salary payable for each completed year of service.

vii) Post-retirement medicare scheme

Under this unfunded scheme, employees of Tata Motors Limited and some of its subsidiaries receive medical benefits subject to certain limits of amount, periods after retirement and types of benefits, depending on their grade and location at the time of retirement. Employees separated from the Company as part of an Early Separation Scheme, on medical grounds or due to permanent disablement are also covered under the scheme. Tata Motors and such subsidiaries account for the liability for post-retirement medical scheme based on an actuarial valuation.

Actuarial gains and losses

Actuarial gains and losses relating to retirement benefit plans are recognized directly in other comprehensive income in the period in which they arise. Actuarial gains and losses relating to long-term employee benefits are recognized in the income statement in the period in which they arise.

Measurement date

The measurement date of retirement plans is March 31.

r. Dividends

Any dividend declared by Tata Motors Limited is based on the profits available for distribution as reported in the unconsolidated statutory financial statements of Tata Motors Limited prepared in accordance with Generally Accepted Accounting Principles in India (Indian GAAP). Further, Indian law mandates that dividend be declared out of distributable profits only after the transfer of a specified percentage of net income computed in accordance with current regulations to a general reserve. Accordingly, in certain years the net income reported in these financial statements may not be fully distributable. As of March 31, 2013 and March 31, 2012, the amounts available for distribution were Rs. 69,481.9 million and Rs. 79,752.6 million respectively.

s. Segments

The Company primarily operates in the automotive segment. The automotive segment comprises of two reportable segments i.e. Tata and other brand vehicles, including financing thereof and Jaguar Land Rover. Other operating segments do not meet the quantitative thresholds for disclosure and have been aggregated.

t. Financial instruments

i) Classification, initial recognition and measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified into categories: financial assets at fair value through profit or loss, held-to-maturity investments, loans and receivables and available-for-sale financial assets. Financial liabilities are classified into financial liabilities at fair value through profit or loss and other financial liabilities.

Financial instruments are recognized on the balance sheet when the Company becomes a party to the contractual provisions of the instrument.

Initially, a financial instrument is recognized at its fair value. Transaction costs directly attributable to the acquisition or issue of financial instruments are recognized in determining the carrying amount, if it is not classified as at fair value through profit or loss. Subsequently, financial instruments are measured according to the category in which they are classified.

Table of Contents

Financial assets and financial liabilities at fair value through profit or loss: Derivatives, including embedded derivatives separated from the host contract, unless they are designated as hedging instruments, for which hedge accounting is applied, are classified into this category. These are measured at fair value with changes in fair value recognized in the income statement.

Loans and receivables: Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortized cost using the effective interest method less any impairment losses.

These include trade receivables, finance receivables, balances with banks, short-term deposits with banks, other financial assets and investments with fixed or determinable payments.

Available-for-sale financial assets: Available-for-sale financial assets are those non-derivative financial assets that are either designated as such upon initial recognition or are not classified in any of the other financial assets categories. Subsequently, these are measured at fair value and changes therein, other than impairment losses are recognized directly in other comprehensive income, net of applicable deferred income taxes.

Dividends from available-for-sale debt securities are recognized in the income statement when the right to receive payment has been established.

Equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured, are measured at cost.

When the financial asset is derecognized, the cumulative gain or loss in equity is transferred to the income statement.

Foreign currency convertible notes: Convertible notes issued in foreign currency are convertible at the option of the holder into Ordinary Shares, Global Depository Shares, American Depository Shares or Qualified Securities of the Company as per the terms of the issue. Conversion option which is not settled by exchanging a fixed amount of cash for a fixed number of shares is accounted for separately from the liability component as derivative and initially accounted for at fair value. The liability component is recognized initially at the difference between the fair value of the note and the fair value of the conversion option. Directly attributable costs are allocated to the liability component and the conversion option in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of the foreign currency convertible notes is measured at amortized cost using the effective interest method. The conversion option is subsequently measured at fair value at each reporting date or on the date of conversion, as applicable, with changes in fair value recognized in income statement.

The conversion option is presented together with the related liability.

Fair valuation of prepayment options in Senior Notes: Embedded derivatives relating to prepayment options in Senior Notes are not considered as closely related and are separately accounted unless the exercise price of these options are approximately equal on each exercise date to the amortized cost of the Senior Notes.

The embedded derivative is initially accounted for separately from the liability component as derivative at fair value. The fair value represents the difference in the traded market price of the Notes and the expected price of the Notes would trade at if they did not contain any prepayment features. The expected price is based on market inputs including credit spreads and interest rates. Directly attributable costs are allocated to the liability component and the prepayment option in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of the Senior Notes are measured at amortized cost using the effective interest method. The prepayment option is subsequently measured at fair value at each reporting date with changes in fair value recognized in income statement.

The prepayment option is presented together with the related liability.

Equity instruments: An equity instrument is any contract that evidences residual interests in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Other financial liabilities: These are measured at amortized cost using the effective interest method.

Table of Contents*ii) Determination of fair value:*

The fair value of a financial instrument on initial recognition is normally the transaction price (fair value of the consideration given or received). Subsequent to initial recognition, the Company determines the fair value of financial instruments that are quoted in active markets using the quoted bid prices (financial assets held) or quoted ask prices (financial liabilities held) and using valuation techniques for other instruments. Valuation techniques include discounted cash flow method and other valuation models.

iii) Derecognition of financial assets and financial liabilities:

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

Financial liabilities are derecognized when these are extinguished, that is when the obligation is discharged, cancelled or has expired.

iv) Impairment of financial assets:

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

Loans and receivables:

Objective evidence of impairment includes default in payments with respect to amounts receivable from customers.

Impairment loss in respect of loans and receivables is calculated as the difference between their carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Such impairment loss is recognised in the income statement. If the amount of an impairment loss decreases in a subsequent period, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. The reversal is recognized in the income statement.

Available-for-sale financial assets:

If the available-for-sale financial assets is impaired, the difference between the financial asset's acquisition cost (net of any principal repayments and amortization) and the current fair value, less any previous impairment loss recognized in the income statement, is reclassified from equity to income statement. If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognized, the impairment loss is reversed. The reversal is recognized in the income statement. Reversal of impairment loss on equity investments classified as available-for-sale, is not recognized in the income statement. Increase in their fair value after impairment, is recognized in other comprehensive income.

Impairment loss on equity investments carried at cost is not reversed.

u. Hedge accounting:

The Company uses foreign currency forward and option contracts to hedge its risks associated with foreign currency fluctuations relating to highly probable forecast transactions. The Company designates these forward and option contracts in a cash flow hedging relationship by applying the hedge accounting principles.

These forward and option contracts are stated at fair value at each reporting date. Changes in the fair value of these forward and option contracts that are designated and effective as hedges of future cash flows are recognized in other comprehensive income (net of tax), and the ineffective portion is recognized immediately in the consolidated income statement. Amounts accumulated in equity are reclassified to the consolidated

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

income statement in the periods in which the forecasted transactions occurs.

For options, the time value is not considered part of the hedge, and this is treated as an ineffective hedge portion and recognised immediately in the consolidated income statement.

F-21

Table of Contents

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. For forecast transactions, any cumulative gain or loss on the hedging instrument recognized in equity is retained there until the forecast transaction occurs.

If the forecast transaction is no longer expected to occur, the net cumulative gain or loss recognized in equity is immediately transferred to the consolidated income statement for the year.

v. ***New accounting pronouncements***

The following pronouncements, issued by the IASB, are not yet effective and have not yet been adopted by the Company. The Company is evaluating the impact of these pronouncements on the consolidated financial statements:

IAS 1 Presentation of Financial Statements was amended in June 2011 to require items of other comprehensive income to be grouped into those that will and will not subsequently be reclassified to profit or loss with tax on items of other comprehensive income required to be allocated on the same basis. The amendments are effective for annual periods beginning on or after July 1, 2012.

IFRS 7 Financial Instruments: Disclosures and *IAS 32 Financial Instruments: Presentation* were amended in December 2011 to clarify requirements for offsetting financial assets and financial liabilities and amend disclosures. The new disclosures are required for annual or interim periods beginning on or after January 1, 2013 and the clarifying amendments to IAS 32 are effective for annual periods beginning on or after January 1, 2014.

IFRS 9 Financial Instruments was issued by IASB in November 2009 and revised in November 2010 as part of its project for revision of the accounting guidance for financial instruments. The new standard provides guidance with respect to classification and measurement of financial assets and financial liabilities. The standard will be effective for annual periods beginning on or after January 1, 2015.

IFRS 10 Consolidated Financial Statements establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities. The standard will be effective for annual periods beginning on or after January 1, 2013.

IFRS 11 Joint Arrangements classifies joint arrangements as either joint operations (combining the existing concepts of jointly controlled assets and jointly controlled operations) or joint ventures (equivalent to the existing concept of a jointly controlled entity). Joint operation is a joint arrangement whereby the parties that have joint control have rights to the assets and obligations for the liabilities. Joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement. IFRS 11 requires the use of the equity method of accounting for interests in joint ventures thereby eliminating the proportionate consolidation method. The standard will be effective for annual periods beginning on or after January 1, 2013.

IFRS 12 Disclosure of Interests in Other Entities applies to entities that have an interest in a subsidiary, a joint arrangement, an associate or an unconsolidated structured entity. The IFRS requires an entity to disclose information that enables users of financial statements to evaluate the nature of, and risks associated with, its interests in other entities; and the effects of those interests on its financial position, financial performance and cash flows. The standard will be effective for annual periods beginning on or after January 1, 2013.

IFRS 13 Fair value measurement defines fair value and sets out in a single IFRS a framework for measuring fair value and requires disclosures about fair value measurements. It seeks to increase consistency and comparability in fair value measurements and related disclosures through a fair value hierarchy. IFRS 13 is applicable prospectively from the beginning of the annual period in which the Standard is adopted. The standard will be effective for annual periods beginning on or after January 1, 2013.

In June 2011, the IASB issued *IAS 19, Employee Benefits*, the amended IAS 19 eliminates the corridor approach and requires recognition of actuarial gains and losses in line item Other Comprehensive Income. These changes will have no impact on the Company because the Company does not apply the corridor approach and already recognizes changes in actuarial gains and losses in line item Other Comprehensive Income.

Further, the amended IAS 19, replaces the expected return on assets and interest costs on the defined benefit obligation with a single net interest component. Past service costs will be recognized fully in the period of the related plan amendment. The amendments to IAS 19 also change the requirements for termination benefits and include enhanced presentation and disclosure requirements. The standard will be effective for annual periods beginning on or after January 1, 2013.

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

The Annual improvements to IFRSs 2009 – 2011 Cycle issued in May 2012 include a number of amendments to various IFRSs. The amendments are effective for annual periods beginning on or after January 1, 2013. These amendments include:

Amendments to *IAS 1 Presentation of Financial Statements* which clarify that an entity is required to present a third statement of financial position only when the retrospective application, restatement or reclassification has a material effect on the information in the third statement of financial position and that related notes are not required to accompany the third statement of financial position.

Amendments to *IAS 16 Property, Plant and Equipment* which clarify that spare parts, stand-by equipment and servicing equipment should be classified as property, plant and equipment when they meet the definition of property, plant and equipment in IAS 16 and as inventory otherwise.

Amendments to *IAS 32 Financial Instruments: Presentation* which clarify that income tax relating to distributions to holders of an equity instrument and to transaction costs of an equity transaction should be accounted for in accordance with *IAS 12 Income Taxes*.

F-22

Table of Contents**w. Convenience translation**

The consolidated financial statements have been expressed in Indian rupees (Rs.), Tata Motors Limited functional currency. For the convenience of the reader, the financial statements as at and for the year ended March 31, 2013, have been translated into U.S. dollars at US\$ 1.00 = Rs. 54.285, based on fixing rate in the City of Mumbai on March 31, 2013, for cable transfers in Indian rupees as published by the Foreign Exchange Dealers Association of India (FEDAI).

Such translation should not be construed as representation that the rupee amounts have been or could be converted into U.S. dollars at that or any other rate, or at all.

3. Cash and cash equivalents

Cash and cash equivalents consist of the following:

	2013	As of March 31, 2013 (In millions)	2012
Cash balances	US\$ 7.7	Rs. 414.4	Rs. 215.5
Balances with banks (including deposits with original maturity of upto three months)	2,131.4	115,704.1	145,736.9
Total	US\$ 2,139.1	Rs. 116,118.5	Rs. 145,952.4

Cash and cash equivalents includes Rs. 43,052.5 million and Rs. 36,974.1 million as of March 31, 2013 and 2012 respectively, held by a subsidiary that operates in a country where exchange control restrictions prevent the balances being available for general use by Tata Motors Limited and other subsidiaries. As at March 31, 2013, it is considered that all of this cash could be utilised against current liabilities in that country and therefore the exchange control restrictions on movement of cash do not curtail the group's liquidity position.

4. Finance receivables

Finance receivables consist of vehicle loans, the details of which are as follows:

	2013	As of March 31, 2013 (In millions)	2012
Finance receivables	US\$ 3,919.2	Rs. 212,754.0	Rs. 182,330.4
Less: allowance for credit losses	267.7	14,534.8	11,089.6
Total	US\$ 3,651.5	Rs. 198,219.2	Rs. 171,240.8
Current portion	1,316.4	71,460.5	68,438.8
Non-current portion	2,335.1	126,758.7	102,802.0
Total	US\$ 3,651.5	Rs. 198,219.2	Rs. 171,240.8

Changes in the allowance for credit losses in finance receivables are as follows:

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

	2013	Year ended March 31,		2011
		2013	2012	
	(In millions)			
Balance at the beginning	US\$ 204.3	Rs. 11,089.6	Rs. 9,070.9	Rs. 8,481.1
Allowances made during the year	173.6	9,427.9	5,747.3	4,872.7
Written off	(110.2)	(5,982.7)	(3,728.6)	(4,282.9)
Balance at the end	US\$ 267.7	Rs. 14,534.8	Rs. 11,089.6	Rs. 9,070.9

F-23

Table of Contents**5. Allowance for trade and other receivables**

Change in the allowances for trade and other receivables are as follows:

	2013	Year ended March 31,		2011
		2013	2012	
		(In millions)		
Balance at the beginning	US\$ 70.9	Rs. 3,847.2	Rs. 2,963.3	Rs. 3,023.7
Allowance made during the year (net)	21.0	1,141.3	997.3	1,099.4
Written off	(4.0)	(218.8)	(211.5)	(1,216.6)
Foreign exchange translation differences	0.1	7.3	98.1	56.8
Balance at the end	US\$ 88.0	Rs. 4,777.0	Rs. 3,847.2	Rs. 2,963.3

6. Investments

Investments consist of the following:

	2013	As of March 31,	
		2013	2012
		(In millions)	
Available-for-sale, at fair value	US\$ 1,428.0	Rs. 77,516.4	Rs. 78,365.0
Unquoted equity investments, at cost	71.4	3,877.0	3,866.4
Loans and receivables	1.4	80.0	337.6
Total	US\$ 1,500.8	Rs. 81,473.4	Rs. 82,569.0

Available-for-sale, financial assets (investments) are as follows:

	2013	As of March 31,	
		2013	2012
		(In millions)	
Quoted equity shares	US\$ 38.1	Rs. 2,067.2	Rs. 2,885.3
Mutual funds	1,387.7	75,327.0	75,356.3
Corporate bonds and other debt instruments	2.2	122.2	123.4
Total available for sale securities	US\$ 1,428.0	Rs. 77,516.4	Rs. 78,365.0

The current and non-current classifications of investments are as follows:

	2013	As of March 31,	
		2013	2012
		(In millions)	
Current investments	US\$ 1,385.1	Rs. 75,191.2	Rs. 75,299.3
Non-current investments	115.7	6,282.2	7,269.7
Total	US\$ 1,500.8	Rs. 81,473.4	Rs. 82,569.0

The fair value of the unquoted equity investments cannot be reliably measured as the variability in the range of fair value estimates is significant and the probabilities of the various estimates cannot be reasonably assessed.

F-24

Table of Contents**7. Other financial assets - current**

Other financial assets current consist of the following:

	2013	As of March 31, 2013 (In millions)	2012
Derivative financial instruments	US\$ 47.3	Rs. 2,568.1	Rs. 3,950.4
Advances and other receivables recoverable in cash	108.4	5,884.6	3,764.7
Inter corporate deposits	0.1	3.1	504.2
Margin money with banks	25.8	1,402.9	405.0
Restricted bank deposits	211.6	11,484.1	12,676.7
Total	US\$ 393.2	Rs. 21,342.8	Rs. 21,301.0

Margin money with banks is restricted cash deposits and consists of collateral provided for transfer of finance receivables. Restricted bank deposits include Rs. 9,002.4 million and Rs. 10,709.1 million as of March 31, 2013 and 2012 respectively, held as security in relation to bank borrowings. The deposits are pledged till the maturity of the respective borrowings.

8. Inventories

Inventories consist of the following:

	2013	As of March 31, 2013 (In millions)	2012
Raw materials and consumables	US\$ 462.6	Rs. 25,112.3	Rs. 27,980.5
Work-in-progress	397.2	21,563.6	19,148.5
Finished goods	2,979.1	161,717.3	133,705.0
Total	US\$ 3,838.9	Rs. 208,393.2	Rs. 180,834.0

Inventories of finished goods include Rs. 14,055.3 million and Rs. 10,916.1 million as of March 31, 2013 and March 31, 2012, respectively, relating to vehicles sold subject to repurchase arrangements.

Cost of inventories (including cost of purchased products) recognised as expense during the years ended March 31, 2013, March 31, 2012 and March 31, 2011 amounted to Rs. 1,382,008.9 million, Rs. 1,221,929.5 million and Rs. 908,917.6 million, respectively.

During the years ended March 31, 2013, March 31, 2012 and March 31, 2011 the Company recorded inventory write-down expense of Rs. 3,675.1 million, Rs. 2,098.8 million and Rs. 1,512.5 million, respectively.

9. Other current assets

Other current assets consist of the following:

	2013	As of March 31, 2013	2012
--	------	-------------------------	------

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

	(In millions)		
Advances to suppliers and contractors	US\$ 44.9	Rs. 2,435.5	Rs. 2,624.9
VAT, other taxes recoverable, statutory deposits and dues from government	859.0	46,627.7	51,334.8
Prepaid expenses	104.7	5,686.0	3,529.0
Others	3.6	196.6	61.6
Total	US\$ 1,012.2	Rs. 54,945.8	Rs. 57,550.3

F-25

Table of Contents**10. Other financial assets (non-current)**

Other financial assets - non-current consist of the following:

	2013	As of March 31, 2013 (In millions)	2012
Margin money with banks	US\$ 12.8	Rs. 693.1	Rs. 2,184.4
Restricted deposits	74.4	4,036.9	6,577.2
Loans to employees	8.1	437.0	476.1
Loan to the equity accounted investee	48.8	2,650.0	2,650.0
Derivative financial instruments	114.1	6,194.7	1,897.0
Others	79.7	4,331.9	3,305.2
Total	US\$ 337.9	Rs. 18,343.6	Rs. 17,089.9

Margin money with banks is restricted cash deposits, and consists of collateral provided for transfer of finance receivables. Restricted deposits are held as security on vehicles sold by dealers under leasing arrangements. The amount is pledged until the leases reach their respective conclusion.

Loan to the equity accounted investee represents loan given to a joint venture of the Company. This loan is subordinated to other borrowings of the joint venture. Subject to certain conditions, the loan is convertible into equity of the joint venture at the option of the joint venture.

Table of Contents

Notes:

1. Net carrying amounts of property, plant and equipment under finance lease arrangements were as follows:

	2013	As of March 31, 2013 (In millions)	2012
Land	US\$ 3.3	Rs. 180.9	Rs. 184.5
Buildings	7.6	414.1	314.6
Plant and equipment	37.5	2,034.0	1,728.1
Computers	10.4	566.7	508.3
Total	US\$ 58.8	Rs. 3,195.7	Rs. 2,735.5

2. Land and buildings includes freehold land of Rs. 17,265.4 million and Rs. 16,975.1 million as of March 31, 2013 and March 31, 2012 respectively.

3. Capital work in progress, as at March 31, 2013 includes building of Rs. 3,098.8 million on leased land located in the State of West Bengal in India for the purposes of manufacturing automobiles. As a result of the decision to relocate and construct a similar manufacturing facility at, another location, the management was in the process of evaluating several options, under all of which no adjustments to the carrying amount of the buildings was considered necessary. In June 2011, the newly elected Government of West Bengal (referred to as State Government) enacted legislation to cancel the land lease agreement.

The Company challenged the legal validity of the legislation. In June 2012, the High Court of Calcutta (referred to as the High Court) ruled against the validity of the legislation and restored the Company's rights under the land lease agreement. The State Government has filed an appeal in the Supreme Court of India. As of the date of the authorization of the financial statements, the Supreme Court has not concluded on the State Government appeal.

The Company reasonably expects that the High Courts' judgment, based on established law, will be upheld by the Supreme Court.

Table of Contents**12. Leases**

The Company has taken land, buildings, plant and equipment, computers and furniture and fixtures under operating and finance leases. The following is the summary of future minimum lease rental payments under non-cancellable operating leases and finance leases entered into by the Company:

	2013		As of March 31,			2012	
	Operating	Finance	(In millions)			Operating	Finance
			Minimum Lease Payments	Minimum Lease Payments	Present value of minimum lease payments		
Not later than one year	Rs.988.1	Rs. 732.0	Rs. 592.8	Rs. 926.4	Rs. 585.9	Rs. 524.7	
Later than one year but not later than five years	1,863.1	1,959.0	1,684.3	2,375.9	1,760.7	1,550.5	
Later than five years	9,632.0	157.8	149.5	9,288.3	3.7	3.3	
Total minimum lease commitments	Rs. 12,483.2	Rs. 2,848.8	Rs. 2,426.6	Rs. 12,590.6	Rs. 2,350.3	Rs. 2,078.5	
	US\$ 230.0	US\$ 52.5	US\$ 44.7				
Less: future finance charges		(422.2)			(271.8)		
Present value of minimum lease payments		Rs. 2,426.6			Rs. 2,078.5		
Included in the financial statements as:							
Other current financial liabilities (refer note 19)			Rs. 592.8			Rs. 524.7	
Other non-current financial liabilities (refer note 23)			1,833.8			1,553.8	
			Rs. 2,426.6			Rs. 2,078.5	
			US\$ 44.7				

Total operating lease rent expense was Rs. 3,992.0 million, Rs. 2,863.6 million and Rs. 2,297.2 million for the years ended March 31, 2013, 2012 and 2011, respectively.

Significant leasing arrangements include lease of land under operating lease for a period of 90 years with a renewal option for a further period of 90 years. Minimum lease payments for a period later than five years includes Rs. 8,429.7 million relating to this leasing arrangement.

13. Goodwill

	2013	As of March 31,	2012
		2013	
		(In millions)	
Balance at the beginning	US\$ 78.3	Rs.4,253.0	Rs.3,760.8
Write off of goodwill			(45.7)

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

Currency translation differences	1.3	67.3	537.9
Balance at the end	US\$ 79.6	Rs. 4,320.3	Rs. 4,253.0

As of March 31, 2013, goodwill of Rs. 229.8 million and Rs. 4,090.5 million relates to the automotive and related activity segment (Tata and other brand vehicles including financing thereof) and others segment respectively. As of March 31, 2012, goodwill of Rs. 229.8 million and Rs. 4,023.2 million relates to the automotive and related activity segment (Tata and other brand vehicles including financing thereof) and others segment respectively.

As of March 31, 2013, goodwill of Rs. 4,090.5 million has been allocated to software consultancy and services cash generating unit. The recoverable amount of the cash generating unit has been determined based on value in use. Value in use has been determined based on future cash flows, after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions.

F-29

Table of Contents

As of March 31, 2013, the estimated cash flows for a period of 5 years were developed using internal forecasts, and a pre-tax discount rate of 16.91 %. The cash flows beyond 5 years have been extrapolated assuming zero growth rates. The management believes that any reasonably possible change in the key assumptions would not cause the carrying amount to exceed the recoverable amount of the cash generating unit.

14. Intangible assets

Intangible assets consist of the following:

	Software	Patents and technological know how	Customer related	Intellectual property rights and other intangibles (In millions)	Product development	Indefinite life trademarks and brands	Total
Cost as of April 1, 2012	Rs. 17,134.1	Rs. 12,434.2	Rs. 7,232.9	Rs. 207.8	Rs. 121,687.8	Rs. 50,407.5	Rs. 209,104.3

The useful life of trademarks and brands in respect of the acquired Jaguar Land Rover businesses have been determined to be indefinite as the Company expects to generate future economic benefits indefinitely from these assets.

The indefinite life intangible assets have been allocated to the Jaguar Land Rover businesses. The recoverable amount of the cash generating unit has been determined based on value in use. Value in use has been determined based on future cash flows after considering current economic conditions and trends, estimated future operating results, growth rates and anticipated future economic conditions.

The estimated cash flows for a period of five years were developed using internal forecasts, and a pre-tax discount rate of 10.2%. The cash flows beyond five years have been extrapolated assuming zero growth rate. The management believes that any reasonably possible change in the key assumptions would not cause the carrying amount to exceed the recoverable amount of the cash generating unit.

Table of Contents**15. Investments in equity accounted investees:****a) Associates:**

Summarized financial information in respect of the Company's associates is as follows:

	2013	As of March 31, 2013 (In millions)	2012
Total assets	US\$ 1,034.6	Rs. 56,161.9	Rs. 58,339.7
Total liabilities	677.4	36,772.8	42,151.4
Carrying amount of investment in associates	US\$ 346.9	Rs. 18,830.2	Rs. 18,151.0

	2013	Year ended March 31, 2013 2012 (In millions)		2011
Total revenue	US\$ 1,495.8	Rs. 81,199.7	Rs. 101,269.6	Rs. 75,392.7
Total profits for the period	100.6	5,462.5	1,788.5	3,210.9
Company's share in profit*	US\$ 22.3	Rs. 1,211.8	Rs. 275.8	Rs. 856.2

- (i) The Company acquired additional equity shareholding in one of the associates and increased its ownership to 47.18% from 44.21% during the year ended March 31, 2012, for a total consideration of Rs. 58.6 million.
- (ii) Fair value of investment in an equity accounted associate for which published price quotation is available was Rs.684.8 million and Rs. 894.3 million as of March 31, 2013 and 2012, respectively. The carrying amount as of March 31, 2013 and 2012 was Rs. 1,306.0 million and Rs. 1,270.7 million, respectively.
- (iii) During the year ended March 31, 2012, the Company recognized an impairment loss of Rs 4,981.0 million in respect of its investment in an associate on account of economic slowdown and increased competition from new entrants. The associate is engaged in the business of manufacture and sale of construction equipment. The recoverable amount of the investment is determined based on value in use.

b) Jointly controlled entities:

Summarized financial information in respect of the Company's jointly controlled entities (adjusted for the percentage of the ownership held by the Company) is as follows:

	2013	As of March 31, 2013 (In millions)	2012
Current assets	US\$ 271.2	Rs. 14,722.6	Rs. 7,229.1
Non-current assets	285.3	15,489.3	15,587.3
Current liabilities	230.5	12,510.0	10,448.7
Non-current liabilities	128.4	6,971.2	8,313.9
Carrying amount of investment in jointly controlled entities	US\$ 213.0	Rs. 11,561.5	Rs. 5,114.9

Edgar Filing: TATA MOTORS LTD/FI - Form 20-F

	2013	Year ended March 31,		2011
		2013	2012	
	(In millions)			
Income	US\$ 338.8	Rs. 18,393.4	Rs. 17,810.3	Rs. 19,515.1
Expenses	329.1	17,865.6	18,319.5	20,764.7
Company's share of profit/ (loss)*	US\$ 9.6	Rs. 521.7	Rs. (626.9)	Rs. (1,314.6)

- (i) The Company has 50% equity shareholding with equivalent voting power in Fiat India Automobiles Ltd., a joint venture established in India.
- (ii) During the year, the Company has invested 50% stake in Suzhou Chery Jaguar Land Rover Trading Company Limited and 50% stake in Chery Jaguar Land Rover Automotive Company Limited aggregating Rs. 6,216.6 million. The Company's share of loss was Rs. 1,016.4 million for both the joint ventures.

F-32

Table of Contents

c) Summary of carrying amount of investments in equity accounted investees:

	2013	As of March 31, 2013 (In millions)	2012
Carrying amount of investment in associates	US\$ 346.9	Rs.18,830.2	Rs. 18,151.0
Carrying amount of investment in jointly controlled entities	213.0	11,561.5	5,114.9
Total	US\$ 559.9	Rs.30,391.7	Rs. 23,265.9

* Company's share of profit/(loss) of the equity accounted investees has been determined after giving effect for the subsequent amortization/depreciation and other adjustments arising on account of fair value adjustments made to the identifiable net assets of the equity accounted investee as at the date of acquisition and other adjustment arising under the equity method of accounting.

16. Income taxes

The domestic and foreign components of net income before income tax:

	2013	Year ended March 31, 2013 2012 (In millions)		2011

Deferred tax asset			US\$ 832.7	Rs. 45,205.2
Deferred tax liability			US\$ (288.5)	Rs. (15,668.1)

* Net off Rs. 3,490.5 million reversed on dividend distribution by subsidiaries.

In fiscal 2012, the Group recognised all previously unrecognised unused tax losses and other temporary differences pertaining to the subsidiary company in the UK of Rs. 38,934.2 million in light of the planned consolidation of the UK manufacturing business in fiscal 2013 and business forecasts showing continuing profitability. Accordingly, Rs. 11,553.4 million of previously unrecognised deductible temporary differences has been utilised to reduce current tax expense and previously unrecognized deferred tax benefit of Rs. 17,975.3 million and Rs. 9,405.5 million has been recognized in the income statement and other comprehensive income respectively during the year ended March 31, 2012.

As of March 31, 2013, unrecognized deferred tax assets amount to Rs. 776.3 million and Rs. 6,534.4 million, which can be carried forward indefinitely and upto a specified period, respectively. These relate primarily to business and capital losses. The deferred tax asset has not been recognized on the basis that its recovery is not probable in the foreseeable future.

Table of Contents

Tata Motors Limited (on standalone basis, being its tax status) is liable to pay Minimum Alternate Tax (MAT). Under the Indian Income tax laws, the tax paid under MAT provisions can be carried forward and set-off against future income tax liabilities computed under normal tax provisions within a period of ten years. Deferred tax assets of Tata Motors Limited (on standalone basis, being its tax status) as at March 31, 2013 of Rs. 10,031.2 million towards depreciation, Rs. 2,450.4 million towards business loss and Rs. 15,089.8 million towards credit for MAT paid, have been recognized on the basis of estimated taxable income for future years and computation of tax liability.

Unrecognized deferred tax assets expire unutilized based on the year of origination as follows:

March 31,	In millions	
	Rs.	US\$
2014	338.8	6.2
2015	393.8	7.3
2016	239.3	4.4
2017	308.7	5.7
2018	257.6	4.7
Thereafter	Rs. 4,996.2	US\$ 92.1

The Company has not recognized deferred tax liability on undistributed profits of certain subsidiaries amounting to Rs. 153,647.3 million because it is able to control the timing of the reversal of temporary differences associated with such undistributed profits and it is probable that such differences will not reverse in the foreseeable future.
