FORWARD-LOOKING STATEMENTS

This report contains information that may constitute “forward-looking statements.” Generally, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “project,” “will” and similar expressions identify forward-looking statements, which generally are not historical in nature. However, the absence of these words or similar expressions does not mean that a statement is not forward-looking. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future—including statements relating to volume growth, share of sales and earnings per share growth, and statements expressing general views about future operating results—are forward-looking statements. Management believes that these forward-looking statements are reasonable as and when made. However, caution should be taken not to place undue reliance on any such forward-looking statements because such statements speak only as of the date when made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. In addition, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. These risks and uncertainties include, but are not limited to, those described in Part II, “Item 1A. Risk Factors” and elsewhere in this report and in our Annual Report on Form 10-K for the year ended June 30, 2015, and those described from time to time in our future reports filed with the Securities and Exchange Commission.

Endnote Explanations as of March 31, 2016 (Unaudited) and June 30, 2015 (Continued)

The terms “Prospect,” “we,” “us” and “our” mean Prospect Capital Corporation and its subsidiaries unless the context specifically requires otherwise. The securities in which Prospect has invested were acquired in transactions that (1) were exempt from registration under the Securities Act of 1933, as amended (the “Securities Act”). These securities may be resold only in transactions that are exempt from registration under the Securities Act.

Fair value is determined by or under the direction of our Board of Directors. As of June 30, 2015, one of our portfolio investments, Dover Saddlery, Inc. (“Dover”), was publicly traded and classified as Level 1 within the valuation hierarchy established by ASC 820, Fair Value Measurement (“ASC 820”). On July 1, 2015 we redeemed (2) our investment in Dover and realized a gain of \$200. As of June 30, 2015, the fair value of our remaining portfolio investments was determined using significant unobservable inputs. As of March 31, 2016, all of our investments were classified as Level 3. ASC 820 classifies such unobservable inputs used to measure fair value as Level 3 within the valuation hierarchy. See Notes 2 and 3 within the accompanying notes to consolidated financial statements for further discussion.

Security, or a portion thereof, is held by Prospect Capital Funding LLC (“PCF”), our wholly-owned subsidiary and a bankruptcy remote special purpose entity, and is pledged as collateral for the Revolving Credit Facility and such (3) security is not available as collateral to our general creditors (see Note 4). The fair values of the investments held by PCF at March 31, 2016 and June 30, 2015 were \$1,432,939 and \$1,511,585, respectively, representing 23.9% and 22.9% of our total investments, respectively.

Security, or a portion thereof, has a floating interest rate which may be subject to a LIBOR or PRIME floor. The (4) interest rate was in effect at March 31, 2016 and June 30, 2015.

Ellett Brothers, LLC, Evans Sports, Inc., Jerry’s Sports, Inc., Simmons Gun Specialties, Inc., Bonitz Brothers, Inc., (5) and Outdoor Sports Headquarters, Inc. are joint borrowers on the second lien term loan. United Sporting Companies, Inc. is a parent guarantor of this debt investment.

The interest rate on these investments contains a paid in kind (“PIK”) provision, whereby the issuer has either the (6) option or the obligation to make interest payments with the issuance of additional securities. The interest rate in the schedule represents the current interest rate in effect for these investments.

See notes to consolidated financial statements.

This investment is in the equity class of a CLO security. The CLO equity investments are entitled to recurring distributions which are generally equal to the excess cash flow generated from the underlying investments after payment of the contractual payments to debt holders and fund expenses. The current estimated yield is based on (24) the current projections of this excess cash flow taking into account assumptions which have been made regarding expected prepayments, losses and future reinvestment rates. These assumptions are periodically reviewed and adjusted. Ultimately, the actual yield may be higher or lower than the estimated yield if actual results differ from those used for the assumptions.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(in thousands, except share and per share data)
(Unaudited)

Note 1. Organization

In this report, the terms “Prospect,” “we,” “us” and “our” mean Prospect Capital Corporation and its subsidiaries unless the context specifically requires otherwise.

Prospect Capital Corporation is a financial services company that primarily lends to and invests in middle market privately-held companies. We are a closed-end investment company incorporated in Maryland. We have elected to be regulated as a business development company (“BDC”) under the Investment Company Act of 1940 (the “1940 Act”). As a BDC, we have elected to be treated as a regulated investment company (“RIC”), under Subchapter M of the Internal Revenue Code of 1986 (the “Code”). We were organized on April 13, 2004 and were funded in an initial public offering completed on July 27, 2004.

On May 15, 2007, we formed a wholly-owned subsidiary Prospect Capital Funding LLC (“PCF”), a Delaware limited liability company and a bankruptcy remote special purpose entity, which holds certain of our portfolio loan investments that are used as collateral for the revolving credit facility at PCF. Our wholly-owned subsidiary Prospect Small Business Lending, LLC (“PSBL”) was formed on January 27, 2014 and purchases small business whole loans on a recurring basis from online small business loan originators, including On Deck Capital, Inc. (“OnDeck”). On September 30, 2014, we formed a wholly-owned subsidiary Prospect Yield Corporation, LLC (“PYC”) and effective October 23, 2014, PYC holds our investments in collateralized loan obligations (“CLOs”). Each of these subsidiaries have been consolidated since operations commenced.

Effective July 1, 2014, we began consolidating certain of our wholly-owned and substantially wholly-owned holding companies formed by us in order to facilitate our investment strategy. The following companies have been included in our consolidated financial statements since July 1, 2014: AMU Holdings Inc.; APH Property Holdings, LLC; Arctic Oilfield Equipment USA, Inc.; CCPI Holdings Inc.; CP Holdings of Delaware LLC; Credit Central Holdings of Delaware, LLC; Energy Solutions Holdings Inc.; First Tower Holdings of Delaware LLC; Harbortouch Holdings of Delaware Inc.; MITY Holdings of Delaware Inc.; Nationwide Acceptance Holdings LLC; NMMB Holdings, Inc.; NPH Property Holdings, LLC (“NPH”); STI Holding, Inc.; UPH Property Holdings, LLC; Valley Electric Holdings I, Inc.; Valley Electric Holdings II, Inc.; and Wolf Energy Holdings Inc. On October 10, 2014, concurrent with the sale of the operating company, our ownership increased to 100% of the outstanding equity of ARRM Services, Inc. (“ARRM”) which was renamed SB Forging Company, Inc. (“SB Forging”). As such, we began consolidating SB Forging on October 11, 2014. We collectively refer to these entities as the “Consolidated Holding Companies.”

We are externally managed by our investment adviser, Prospect Capital Management L.P. (“Prospect Capital Management” or the “Investment Adviser”). Prospect Administration LLC (“Prospect Administration” or the “Administrator”), a wholly-owned subsidiary of the Investment Adviser, provides administrative services and facilities necessary for us to operate.

Our investment objective is to generate both current income and long-term capital appreciation through debt and equity investments. We invest primarily in senior and subordinated debt and equity of private companies in need of capital for acquisitions, divestitures, growth, development, recapitalizations and other purposes. We work with the management teams or financial sponsors to identify investments with historical cash flows, asset collateral or contracted pro-forma cash flows for investment.

Note 2. Significant Accounting Policies

Basis of Presentation and Consolidation

The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“GAAP”) pursuant to the requirements for reporting on Form 10-Q, ASC 946, Financial Services—Investment Companies (“ASC 946”), and Articles 6, 10 and 12 of Regulation S-X. Under the 1940 Act, ASC 946, and the regulations pursuant to Article 6 of Regulation S-X, we are precluded from consolidating any entity other

than another investment company or an operating company which provides substantially all of its services to benefit us. Our consolidated financial statements include the accounts of Prospect, PCF, PSBL, PYC, and the Consolidated Holding Companies. All intercompany balances and transactions have been eliminated in consolidation. The financial results of our non-substantially wholly-owned holding companies and operating portfolio company investments are not consolidated in the financial statements. Any operating companies owned by the Consolidated Holding Companies are not consolidated.

Reclassifications

Certain reclassifications have been made in the presentation of prior consolidated financial statements and accompanying notes to conform to the presentation as of and for the three and nine months ended March 31, 2016.

Use of Estimates

The preparation of the consolidated financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of income, expenses, and gains and losses during the reported period. Changes in the economic environment, financial markets, creditworthiness of our portfolio companies and any other parameters used in determining these estimates could cause actual results to differ, and these differences could be material.

Cash and Cash Equivalents

Cash and cash equivalents include funds deposited with financial institutions and short-term, highly-liquid overnight investments in money market funds. Cash and cash equivalents are carried at cost which approximates fair value.

Investment Classification

We are a non-diversified company within the meaning of the 1940 Act. As required by the 1940 Act, we classify our investments by level of control. As defined in the 1940 Act, "Control Investments" are those where there is the ability or power to exercise a controlling influence over the management or policies of a company. Control is generally deemed to exist when a company or individual possesses or has the right to acquire within 60 days or less, a beneficial ownership of more than 25% of the voting securities of an investee company. Under the 1940 Act, "Affiliate Investments" are defined by a lesser degree of influence and are deemed to exist through the possession outright or via the right to acquire within 60 days or less, beneficial ownership of 5% or more of the outstanding voting securities of another person. "Non-Control/Non-Affiliate Investments" are those that are neither Control Investments nor Affiliate Investments.

Investment Transactions

Investments are recognized when we assume an obligation to acquire a financial instrument and assume the risks for gains or losses related to that instrument. Investments are derecognized when we assume an obligation to sell a financial instrument and forego the risks for gains or losses related to that instrument. Specifically, we record all security transactions on a trade date basis. Amounts for investments recognized or derecognized but not yet settled are reported in due to broker or as a receivable for investments sold, respectively, in the consolidated statements of assets and liabilities.

Investment Risks

Our investments are subject to a variety of risks. Those risks include the following:

Market Risk

Market risk represents the potential loss that can be caused by a change in the fair value of the financial instrument.

Credit Risk

Credit risk represents the risk that we would incur if the counterparties failed to perform pursuant to the terms of their agreements with us.

Liquidity Risk

Liquidity risk represents the possibility that we may not be able to rapidly adjust the size of our investment positions in times of high volatility and financial stress at a reasonable price.

Interest Rate Risk

Interest rate risk represents a change in interest rates, which could result in an adverse change in the fair value of an interest-bearing financial instrument.

Prepayment Risk

Many of our debt investments allow for prepayment of principal without penalty. Downward changes in interest rates may cause prepayments to occur at a faster than expected rate, thereby effectively shortening the maturity of the security and making the security less likely to fully earn all of the expected income and reinvesting in a lower yielding instrument.

Structured Credit Related Risk

CLO investments may be riskier and less transparent to us than direct investments in underlying companies. CLOs typically will have no significant assets other than their underlying senior secured loans. Therefore, payments on CLO investments are and will be payable solely from the cash flows from such senior secured loans.

Investment Valuation

To value our investments, we follow the guidance of ASC 820, Fair Value Measurement (“ASC 820”), that defines fair value, establishes a framework for measuring fair value in conformity with GAAP, and requires disclosures about fair value measurements. In accordance with ASC 820, the fair value of our investments is defined as the price that we would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market in which that investment is transacted.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchy:

Level 1: Quoted prices in active markets for identical assets or liabilities, accessible by us at the measurement date.

Level 2: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

Level 3: Unobservable inputs for the asset or liability.

In all cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each investment.

Our Board of Directors has established procedures for the valuation of our investment portfolio. These procedures are detailed below.

Investments for which market quotations are readily available are valued at such market quotations.

For most of our investments, market quotations are not available. With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our Board of Directors has approved a multi-step valuation process each quarter, as described below.

1. Each portfolio company or investment is reviewed by our investment professionals with independent valuation firms engaged by our Board of Directors.
2. The independent valuation firms prepare independent valuations for each investment based on their own independent assessments and issue their report.
3. The Audit Committee of our Board of Directors reviews and discusses with the independent valuation firms the valuation reports, and then makes a recommendation to the Board of Directors of the value for each investment.
4. The Board of Directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of the Investment Adviser, the respective independent valuation firm and the Audit Committee.

Our non-CLO investments are valued utilizing a yield analysis, enterprise value (“EV”) analysis, net asset value analysis, liquidation analysis, discounted cash flow analysis, or a combination of methods, as appropriate. The yield analysis uses loan spreads for loans, dividend yields for certain investments and other relevant information implied by market data involving identical or comparable assets or liabilities. Under the EV analysis, the EV of a portfolio company is first determined and allocated over the portfolio company’s securities in order of their preference relative to one another (i.e., “waterfall” allocation). To determine the EV, we typically use a market multiples approach that considers relevant and applicable market trading data of guideline public companies, transaction metrics from precedent merger and acquisitions transactions and/or a discounted cash flow analysis. The

net asset value analysis is used to derive a value of an underlying investment (such as real estate property) by dividing a relevant earnings stream by an appropriate capitalization rate. For this purpose, we consider capitalization rates for similar properties as may be obtained from guideline public companies and/or relevant transactions. The liquidation analysis is intended to approximate the net recovery value of an investment based on, among other things, assumptions regarding liquidation proceeds based on a hypothetical liquidation of a portfolio company's assets. The discounted cash flow analysis uses valuation techniques to convert future cash flows or earnings to a range of fair values from which a single estimate may be derived utilizing an appropriate discount rate. The measurement is based on the net present value indicated by current market expectations about those future amounts.

In applying these methodologies, additional factors that we consider in valuing our investments may include, as we deem relevant: security covenants, call protection provisions, and information rights; the nature and realizable value of any collateral; the portfolio company's ability to make payments; the principal markets in which the portfolio company does business; publicly available financial ratios of peer companies; the principal market; and enterprise values, among other factors.

Our investments in CLOs are classified as ASC 820 Level 3 securities and are valued using a discounted cash flow model. The valuations have been accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view as well as to determine an appropriate call date (i.e., expected maturity). For each CLO security, the most appropriate valuation approach has been chosen from alternative approaches to ensure the most accurate valuation for such security. To value a CLO, both the assets and the liabilities of the CLO capital structure are modeled. Our valuation agent utilizes other methods to validate the results from the discounted cash flow method. We use a waterfall engine to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, distribute the cash flows to the liability structure based on the payment priorities, and discount them back using current market discount rates. We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third party CLO collateral managers. The main risk factors are: default risk, interest rate risk, downgrade risk, and credit spread risk.

Valuation of Other Financial Assets and Financial Liabilities

ASC 825, Financial Instruments, specifically ASC 825-10-25, permits an entity to choose, at specified election dates, to measure eligible items at fair value (the "Fair Value Option"). We have not elected the Fair Value Option to report selected financial assets and financial liabilities. See Note 8 for further discussion of our financial liabilities that are measured using another measurement attribute.

Convertible Notes

We have recorded the Convertible Notes at their contractual amounts. The Convertible Notes were analyzed for any features that would require bifurcation and such features were determined to be immaterial. See Note 5 for further discussion.

Revenue Recognition

Realized gains or losses on the sale of investments are calculated using the specific identification method.

Interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis.

Origination, closing and/or commitment fees associated with investments in portfolio companies are accreted into interest income over the respective terms of the applicable loans. Accretion of such purchase discounts or amortization of premiums is calculated using the effective interest method as of the purchase date and adjusted only for material amendments or prepayments. Upon the prepayment of a loan or debt security, any prepayment penalties and unamortized loan origination, closing and commitment fees are recorded as interest income.

Loans are placed on non-accrual status when there is reasonable doubt that principal or interest will be collected.

Unpaid accrued interest is generally reversed when a loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment.

Non-accrual loans are restored to accrual status when past due principal and interest is paid and in management's judgment, is likely to remain current. As of March 31, 2016, approximately 0.5% of our total assets are in non-accrual status.

Interest income from investments in the "equity" class of security of CLO funds (typically preferred shares, income notes or subordinated notes) and "equity" class of security of securitized trust is recorded based upon an estimation of an

effective yield to expected maturity utilizing assumed cash flows in accordance with ASC 325-40, Beneficial Interests in Securitized Financial Assets. We monitor the expected cash inflows from our CLO and securitized trust equity investments, including the expected residual payments, and the effective yield is determined and updated periodically.

Dividend income is recorded on the ex-dividend date.

Structuring fees and similar fees are recognized as income is earned, usually when paid. Structuring fees, excess deal deposits, net profits interests and overriding royalty interests are included in other income. See Note 10 for further discussion.

Federal and State Income Taxes

We have elected to be treated as a regulated investment company and intend to continue to comply with the requirements of the Code applicable to regulated investment companies. We are required to distribute at least 90% of our investment company taxable income and intend to distribute (or retain through a deemed distribution) all of our investment company taxable income and net capital gain to stockholders; therefore, we have made no provision for income taxes. The character of income and gains that we will distribute is determined in accordance with income tax regulations that may differ from GAAP. Book and tax basis differences relating to stockholder dividends and distributions and other permanent book and tax differences are reclassified to paid-in capital.

If we do not distribute (or are not deemed to have distributed) at least 98% of our annual ordinary income and 98.2% of our capital gains in the calendar year earned, we will generally be required to pay an excise tax equal to 4% of the amount by which 98% of our annual ordinary income and 98.2% of our capital gains exceed the distributions from such taxable income for the year. To the extent that we determine that our estimated current year annual taxable income will be in excess of estimated current year dividend distributions from such taxable income, we accrue excise taxes, if any, on estimated excess taxable income. As of March 31, 2016 and June 30, 2015, we accrued \$400 and \$305, respectively, for any unpaid potential excise tax liability and have included these amounts within other liabilities on the accompanying Consolidated Statements of Assets and Liabilities.

If we fail to satisfy the annual distribution requirement or otherwise fail to qualify as a RIC in any taxable year, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would we be required to make distributions. Distributions would generally be taxable to our individual and other non-corporate taxable stockholders as ordinary dividend income eligible for the reduced maximum rate applicable to qualified dividend income to the extent of our current and accumulated earnings and profits, provided certain holding period and other requirements are met. Subject to certain limitations under the Code, corporate distributions would be eligible for the dividends-received deduction. To qualify again to be taxed as a RIC in a subsequent year, we would be required to distribute to our shareholders our accumulated earnings and profits attributable to non-RIC years reduced by an interest charge of 50% of such earnings and profits payable by us as an additional tax. In addition, if we failed to qualify as a RIC for a period greater than two taxable years, then, in order to qualify as a RIC in a subsequent year, we would be required to elect to recognize and pay tax on any net built-in gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if we had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period of ten years.

We follow ASC 740, Income Taxes ("ASC 740"). ASC 740 provides guidance for how uncertain tax positions should be recognized, measured, presented, and disclosed in the consolidated financial statements. ASC 740 requires the evaluation of tax positions taken or expected to be taken in the course of preparing our tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. As of March 31, 2016 and for the three and nine months then ended, we did not record any unrecognized tax benefits or liabilities. Management's determinations regarding ASC 740 may be subject to review and adjustment at a later date based upon factors including, but not limited to, an on-going analysis of tax laws, regulations and interpretations thereof. Although we file both federal and state income tax returns, our major tax jurisdiction is federal. Our tax returns for our federal tax years ended August 31, 2012 and thereafter remain subject to examination by the Internal Revenue Service.

Dividends and Distributions

Dividends and distributions to common stockholders are recorded on the ex-dividend date. The amount, if any, to be paid as a monthly dividend or distribution is approved by our Board of Directors quarterly and is generally based upon our management's estimate of our future earnings. Net realized capital gains, if any, are distributed at least annually.

Financing Costs

We record origination expenses related to our Revolving Credit Facility and Convertible Notes, Public Notes and Prospect Capital InterNotes® (collectively, our "Unsecured Notes") as deferred financing costs. These expenses are

deferred and amortized as part of interest expense using the straight-line method for our Revolving Credit Facility and the effective interest method for our Unsecured Notes over the respective expected life or maturity. In the event that we modify or extinguish our debt before maturity, we follow the guidance in ASC 470-50, Modification and Extinguishments (“ASC 470-50”). For modifications to or exchanges of our Revolving Credit Facility, any unamortized deferred costs relating to lenders who are not part of the new lending group are expensed. For extinguishments of our Unsecured Notes, any unamortized deferred costs are deducted from the carrying amount of the debt in determining the gain or loss from the extinguishment. Effective July 1, 2016, these costs will be reclassified to the

balance sheet as a deduction from the debt liability rather than an asset, in accordance with Accounting Standards Update 2015-03, Simplifying the Presentation of Debt Issuance Costs (“ASU 2015-03”).

We may record registration expenses related to shelf filings as prepaid assets. These expenses consist principally of SEC registration fees, legal fees and accounting fees incurred. These prepaid assets are charged to capital upon the receipt of proceeds from an equity offering or charged to expense if no offering is completed. As of March 31, 2016 and June 30, 2015, there are no prepaid assets related to registration expenses and all amounts incurred have been expensed.

Guarantees and Indemnification Agreements

We follow ASC 460, Guarantees (“ASC 460”). ASC 460 elaborates on the disclosure requirements of a guarantor in its interim and annual consolidated financial statements about its obligations under certain guarantees that it has issued. It also requires a guarantor to recognize, at the inception of a guarantee, for those guarantees that are covered by ASC 460, the fair value of the obligation undertaken in issuing certain guarantees.

Per Share Information

Net increase or decrease in net assets resulting from operations per share is calculated using the weighted average number of common shares outstanding for the period presented. In accordance with ASC 946, convertible securities are not considered in the calculation of net asset value per share.

Recent Accounting Pronouncements

In April 2015, the FASB issued ASU 2015-03 which requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the debt liability rather than as an asset. The new guidance will make the presentation of debt issuance costs consistent with the presentation of debt discounts or premiums. ASU 2015-03 is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for financial statements that have not been previously issued. The new guidance must be applied on a retrospective basis to all prior periods presented in the financial statements. The adoption of the amended guidance in ASU 2015-03 is expected to decrease total liabilities by decreasing the carrying value of our debt, and is expected to decrease total assets by decreasing deferred financing costs of our debt, but is not expected to have any other significant effect on our consolidated financial statements and disclosures.

In January 2016, the FASB issued Accounting Standards Update 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities (“ASU 2016-01”). The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. One such amendment requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option. That presentation addresses financial statement users’ feedback that presenting the total change in fair value of a liability in net income reduced the decision usefulness of an entity’s net income when it had a deterioration in its credit worthiness. ASU 2016-01 is effective for financial statements issued for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The new guidance must be applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption of ASU 2016-01. The adoption of the amended guidance in ASU 2016-01 is not expected to have a significant effect on our consolidated financial statements and disclosures.

Note 3. Portfolio Investments

At March 31, 2016, we had investments in 125 long-term portfolio investments, which had an amortized cost of \$6,208,157 and a fair value of \$6,005,105. At June 30, 2015, we had investments in 131 long-term portfolio investments, which had an amortized cost of \$6,559,376 and a fair value of \$6,609,558.

The original cost basis of debt placement and equity securities acquired, including follow-on investments for existing portfolio companies, payment-in-kind interest, and structuring fees, totaled \$685,064 and \$1,456,071 during the nine months ended March 31, 2016 and March 31, 2015, respectively. Debt repayments and proceeds from sales of equity securities of approximately \$955,415 and \$1,022,394 were received during the nine months ended March 31, 2016 and March 31, 2015, respectively.

In determining the range of values for debt instruments, except CLOs and debt investments in controlling portfolio companies, management and the independent valuation firm estimated corporate and security credit ratings and identified corresponding yields to maturity for each loan from relevant market data. A discounted cash flow analysis was then prepared using the appropriate yield to maturity as the discount rate, to determine a range of values. In determining the range of values for debt investments of controlled companies and equity investments, the enterprise value was determined by applying earnings before income tax, depreciation and amortization ("EBITDA") multiples, the discounted cash flow technique, net income and/or book value multiples for similar guideline public companies and/or similar recent investment transactions. For stressed equity investments, a liquidation analysis was prepared. For the private REIT investments, enterprise values were determined based on an average of results from a net asset value analysis of the underlying property investments and a discounted cash flow method utilizing capitalization rates for similar guideline companies and/or similar recent investment transactions.

In determining the range of value for our investments in CLOs, management and the independent valuation firm used a discounted cash flow model. The valuations were accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view as well as to determine an appropriate call date. For each CLO security, the most appropriate valuation approach was chosen from alternative approaches to ensure the most accurate valuation for such security. A waterfall engine was used to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, distribute the cash flows to the liability structure based on the payment priorities, and discount them back using proper discount rates to expected maturity or call date.

Our portfolio consists of residual interests in CLOs, which involve a number of significant risks. CLOs are typically very highly levered (10 - 14 times), and therefore the junior debt and residual interest tranches that we invest in are subject to a higher degree of risk of total loss. In particular, investors in CLO residual interests indirectly bear risks of the underlying loan investments held by such CLOs. We generally have the right to receive payments only from the CLOs, and generally do not have direct rights against the underlying borrowers or the entity that sponsored the CLO. While the CLOs we target generally enable the investor to acquire interests in a pool of senior loans without the expenses associated with directly holding the same investments, our prices of indices and securities underlying CLOs will rise or fall. These prices (and, therefore, the prices of the CLOs) will be influenced by the same types of political

and economic events that affect issuers of securities and capital markets generally. The failure by a CLO investment in which we invest to satisfy financial covenants, including with respect to adequate collateralization and/or interest coverage tests, could lead to a reduction in its payments to us. In the event that a CLO fails certain tests, holders of debt senior to us being entitled to additional payments that would, in turn, reduce the payments we would otherwise be entitled to receive. Separately, we may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting CLO or any other investment we may make. If any of these occur, it could materially and adversely affect our operating results and cash flows.

The interests we have acquired in CLOs are generally thinly traded or have only a limited trading market. CLOs are typically privately offered and sold, even in the secondary market. As a result, investments in CLOs may be characterized as illiquid securities. In addition to the general risks associated with investing in debt securities, CLO residual interests carry additional risks, including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the investments in CLO tranches will likely be subordinate to other senior classes of note tranches thereof; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the CLO investment or unexpected investment results. Our net asset value may also decline over time if our principal recovery with respect to CLO residual interests is less than the cost of those investments. Our CLO investments and/or the underlying senior secured loans may prepay more quickly than expected, which could have an adverse impact on our value.

An increase in LIBOR would materially increase the CLO's financing costs. Since most of the collateral positions within the CLOs have LIBOR floors, there may not be corresponding increases in investment income (if LIBOR increases but stays below the LIBOR floor rate of such investments) resulting in materially smaller distribution payments to the residual interest investors.

We hold more than 10% of the shares in a foreign corporation that is treated as a controlled foreign corporation ("CFC") (including residual interest tranche investments in a CLO investment treated as a CFC), for which we are treated as receiving a deemed distribution (taxable as ordinary income) each year from such foreign corporation in an amount equal to our pro rata share of the corporation's income for the tax year (including both ordinary earnings and capital gains). We are required to include such deemed distributions from a CFC in our income and we are required to distribute such income to maintain our RIC status regardless of whether or not the CFC makes an actual distribution during such year.

If we acquire shares in "passive foreign investment companies" ("PFICs") (including residual interest tranche investments in CLOs that are PFICs), we may be subject to federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend to our stockholders. Certain elections may be available to mitigate or eliminate such tax on excess distributions, but such elections (if available) will generally require us to recognize our share of the PFICs income for each year regardless of whether we receive any distributions from such PFICs. We must nonetheless distribute such income to maintain its status as a RIC.

Legislation enacted in 2010 imposes a withholding tax of 30% on payments of U.S. source interest and dividends paid after December 31, 2013, or gross proceeds from the disposition of an instrument that produces U.S. source interest or dividends paid after December 31, 2016, to certain non-U.S. entities, including certain non-U.S. financial institutions and investment funds, unless such non-U.S. entity complies with certain reporting requirements regarding its United States account holders and its United States owners. Most CLOs in which we invest will be treated as non-U.S. financial entities for this purpose, and therefore will be required to comply with these reporting requirements to avoid the 30% withholding. If a CLO in which we invest fails to properly comply with these reporting requirements, it could reduce the amounts available to distribute to residual interest and junior debt holders in such CLO vehicle, which could materially and adversely affect our operating results and cash flows.

If we are required to include amounts in income prior to receiving distributions representing such income, we may have to sell some of its investments at times and/or at prices management would not consider advantageous, raise additional debt or equity capital or forgo new investment opportunities for this purpose. If we are not able to obtain cash from other sources, we may fail to qualify for RIC tax treatment and thus become subject to corporate-level income tax.

The significant unobservable input used to value our investments based on the yield analysis and discounted cash flow analysis is the market yield (or applicable discount rate) used to discount the estimated future cash flows expected to

be received from the underlying investment, which includes both future principal and interest/dividend payments. Increases or decreases in the market yield (or applicable discount rate) would result in a decrease or increase, respectively, in the fair value measurement. Management and the independent valuation firm consider the following factors when selecting market yields or discount rates: risk of default, rating of the investment and comparable company investments, and call provisions.

The significant unobservable inputs used to value our investments based on the EV analysis may include market multiples of specified financial measures such as EBITDA, net income, or book value of identified guideline public companies, implied valuation multiples from precedent M&A transactions, and/or discount rates applied in a discounted cash flow analysis. The independent valuation firm identifies a population of publicly traded companies with similar operations and key attributes to that of the portfolio company. Using valuation and operating metrics of these guideline public companies and/or as implied by relevant precedent transactions, a range of multiples of the latest twelve months EBITDA, or other measure such as net income or book value, is typically calculated. The independent valuation firm utilizes the determined multiples to estimate the portfolio company's EV generally based on the latest twelve months EBITDA of the portfolio company (or other meaningful measure). Increases or decreases in the multiple may result in an increase or decrease, respectively, in EV which may increase or decrease the fair value measurement of the debt of controlled companies and/or equity investment, as applicable. In certain instances, a discounted cash flow analysis may be considered in estimating EV, in which case, discount rates based on a weighted average cost of capital and application of the capital asset pricing model may be utilized.

The significant unobservable input used to value our private REIT investments based on the net asset value analysis is the capitalization rate applied to the earnings measure of the underlying property. Increases or decreases in the capitalization rate would result in a decrease or increase, respectively, in the fair value measurement.

Changes in market yields, discount rates, capitalization rates or EBITDA multiples, each in isolation, may change the fair value measurement of certain of our investments. Generally, an increase in market yields, discount rates or capitalization rates, or a decrease in EBITDA (or other) multiples may result in a decrease in the fair value measurement of certain of our investments.

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may fluctuate from period to period. Additionally, the fair value of our investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize. Further, such investments are generally subject to legal and other restrictions on resale or otherwise are less liquid than publicly traded securities. If we were required to liquidate a portfolio investment in a forced or liquidation sale, we could realize significantly less than the value at which we have recorded it.

In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the unrealized gains or losses reflected in the currently assigned valuations.

During the nine months ended March 31, 2016, the valuation methodology for Empire Today, LLC ("Empire") changed to remove the waterfall analysis used in previous periods due to positive trends in financial performance and deleveraging. As a result of this change and current market conditions, the fair value of our investment in Empire increased to \$15,700 as of March 31, 2016, a premium of \$98 from its amortized cost, compared to the \$2,448 unrealized depreciation recorded at June 30, 2015.

Unconsolidated Significant Subsidiaries

Our investments are generally in small and mid-sized companies in a variety of industries. In accordance with Rules 3-09 and 4-08(g) of Regulation S-X, we must determine which of our unconsolidated controlled portfolio companies are considered “significant subsidiaries”, if any. In evaluating these investments, there are three tests utilized to determine if any of our controlled investments are considered significant subsidiaries: the investment test, the asset test and the income test. Rule 3-09 of Regulation S-X requires separate audited financial statements of an unconsolidated subsidiary in an annual report if any of the three tests exceed 20%. Rule 4-08(g) of Regulation S-X requires summarized financial information in an annual report if any of the three tests exceeds 10%, and summarized financial information in a quarterly report if any of the three tests exceeds 20% pursuant to Rule 10-01(b) of Regulation S-X.

As of March 31, 2016 and June 30, 2015, we did not have a single investment that represented greater than 20% of our total investment portfolio at fair value or 20% of our total assets. Income, consisting of interest, dividends, fees, other investment income and gains or losses, which can fluctuate upon repayment or sale of an investment or the marking to fair value an investment in any given period can be highly concentrated among several investments. After performing the income analysis for the nine months ended March 31, 2016, as currently promulgated by the SEC, we determined that two of our controlled investments individually generated more than 20% of our income for the nine months ended March 31, 2016. We do not believe that the calculation promulgated by the SEC correctly identifies significant subsidiaries but have included First Tower Finance Company LLC (“First Tower Finance”), Harbortouch and NPRC as significant subsidiaries.

The SEC has requested comments on the proper mechanics of how the calculations related to Rules 3-09 and 4-08(g) of Regulation S-X should be completed. There is currently diversity in practice for the calculations. We expect that the SEC will clarify the calculation methods in the future.

Note 4. Revolving Credit Facility

On March 27, 2012, we closed on an extended and expanded credit facility with a syndicate of lenders through PCF (the “2012 Facility”). The lenders had extended commitments of \$857,500 under the 2012 Facility as of June 30, 2014, which was increased to \$877,500 in July 2014. The 2012 Facility included an accordion feature which allowed commitments to be increased up to \$1,000,000 in the aggregate. Interest on borrowings under the 2012 Facility was one-month LIBOR plus 275 basis points with no minimum LIBOR floor. Additionally, the lenders charged a fee on the unused portion of the 2012 Facility equal to either 50 basis points if at least half of the credit facility is drawn or 100 basis points otherwise.

On August 29, 2014, we renegotiated the 2012 Facility and closed an expanded five and a half year revolving credit facility (the “2014 Facility” and collectively with the 2012 Facility, the “Revolving Credit Facility”). The lenders have extended commitments of \$885,000 under the 2014 Facility as of March 31, 2016. The 2014 Facility includes an accordion feature which allows commitments to be increased up to \$1,500,000 in the aggregate. The revolving period of the 2014 Facility extends through March 2019, with an additional one year amortization period (with distributions allowed) after the completion of the revolving period. During such one year amortization period, all principal payments on the pledged assets will be applied to reduce the balance. At the end of the one year amortization period, the remaining balance will become due, if required by the lenders.

The 2014 Facility contains restrictions pertaining to the geographic and industry concentrations of funded loans, maximum size of funded loans, interest rate payment frequency of funded loans, maturity dates of funded loans and minimum equity requirements. The 2014 Facility also contains certain requirements relating to portfolio performance, including required minimum portfolio yield and limitations on delinquencies and charge-offs, violation of which could result in the early termination of the 2014 Facility. The 2014 Facility also requires the maintenance of a minimum liquidity requirement. As of March 31, 2016, we were in compliance with the applicable covenants.

Interest on borrowings under the 2014 Facility is one-month LIBOR plus 225 basis points with no minimum LIBOR floor. Additionally, the lenders charge a fee on the unused portion of the 2014 Facility equal to either 50 basis points if at least 35% of the credit facility is drawn or 100 basis points otherwise. The 2014 Facility requires us to pledge assets as collateral in order to borrow under the credit facility.

As of March 31, 2016 and June 30, 2015, we had \$645,696 and \$721,800, respectively, available to us for borrowing under the Revolving Credit Facility, of which the amount outstanding was \$0 and \$368,700, respectively. As additional eligible investments are transferred to PCF and pledged under the Revolving Credit Facility, PCF will generate additional availability up to the current commitment amount of \$885,000. As of March 31, 2016, the investments, including cash and money market funds, used as collateral for the Revolving Credit Facility had an aggregate fair value of \$1,470,217, which represents 23.8% of our total investments, including cash and money market funds. These assets are held and owned by PCF, a bankruptcy remote special purpose entity, and as such, these investments are not available to our general creditors. The release of any assets from PCF requires the approval of the facility agent.

In connection with the origination and amendments of the Revolving Credit Facility, we incurred \$12,405 of new fees and \$3,539 of fees carried over for continuing participants from the previous facility, which are being amortized over

the term of the facility in accordance with ASC 470-50, of which \$8,210 remains to be amortized and is included within deferred financing costs on the Consolidated Statement of Assets and Liabilities as of March 31, 2016. During the six months ended December 31, 2014, in

accordance with ASC 470-50, we expensed \$332 of fees relating to credit providers in the 2012 Facility who did not commit to the 2014 Facility.

During the three months ended March 31, 2016 and March 31, 2015, we recorded \$3,046 and \$3,545, respectively, of interest costs, unused fees and amortization of financing costs on the Revolving Credit Facility as interest expense. During the nine months ended March 31, 2016 and March 31, 2015, we recorded \$10,291 and \$10,803, respectively, of interest costs, unused fees and amortization of financing costs on the Revolving Credit Facility as interest expense.

Note 9. Stock Repurchase Program, Equity Offerings, Offering Expenses, and Distributions

On August 24, 2011, our Board of Directors approved a share repurchase plan (the “Repurchase Program”) under which we may repurchase up to \$100,000 of our common stock at prices below our net asset value per share. Prior to any repurchase, we are required to notify shareholders of our intention to purchase our common stock. We delivered a notice with our annual proxy mailing on September 23, 2015 and our most recent notice was delivered with a shareholder letter mailing on February 2, 2016. This notice extends for six months after the date that notice is delivered.

During the nine months ended March 31, 2016, we repurchased 4,708,750 shares of our common stock pursuant to our Repurchase Program for \$34,140, or approximately \$7.25 weighted average price per share at approximately a 30% discount to net asset value as of June 30, 2015. Our NAV per share was increased by approximately \$0.02 for the nine months ended March 31, 2016 as a result of the share repurchases.

There were no repurchases made for the three months ended March 31, 2016 under our Repurchase Program.

Excluding dividend reinvestments, we issued 14,845,556 shares of our common stock during the nine months ended March 31, 2015. When our common stock is issued, the related offering expenses have been charged against paid-in capital in excess of par. All underwriting fees and offering expenses were borne by us.

On November 3, 2015, our Registration Statement on Form N-2 was declared effective by the SEC. Under this Shelf Registration Statement, we can issue up to \$4,822,456 of additional debt and equity securities in the public market as of March 31, 2016.

Dividends and distributions to common stockholders are recorded on the ex-dividend date. As such, the table above includes distributions with record dates during the nine months ended March 31, 2016 and March 31, 2015. It does not include distributions previously declared to stockholders of record on any future dates, as those amounts are not yet determinable. The following dividends were previously declared and will be payable subsequent to March 31, 2016: \$0.08333 per share for March 2016 to holders of record on March 31, 2016 with a payment date of April 21, 2016.

\$0.08333 per share for April 2016 to holders of record on April 29, 2016 with a payment date of May 19, 2016.

During the nine months ended March 31, 2016 and March 31, 2015, we issued 1,731,768 and 1,189,248 shares of our common stock, respectively, in connection with the dividend reinvestment plan.

On February 9, 2016, we amended our dividend reinvestment plan that already provides for reinvestment of our dividends or distributions on behalf of our stockholders, unless a stockholder elects to receive cash, to add the ability of stockholders to purchase additional shares by making optional cash investments. Under the revised dividend reinvestment and direct stock repurchase plan, stockholders may elect to purchase additional shares through our transfer agent in the open market or in negotiated transactions.

During nine months ended March 31, 2016, Prospect Capital officers purchased 16,198,071 shares of our stock, or 4.6% of total outstanding shares as of March 31, 2016, both through the open market transactions and shares issued in connection with our dividend reinvestment plan.

As of March 31, 2016, we have reserved 89,219,237 shares of our common stock for issuance upon conversion of the Convertible Notes (see Note 5).

Note 10. Other Income

Other income consists of structuring fees, overriding royalty interests, revenue receipts related to net profit interests, deal deposits, administrative agent fees, and other miscellaneous and sundry cash receipts. The following table shows income from such sources during the three and nine months ended March 31, 2016 and March 31, 2015.

Note 11. Net Increase in Net Assets per Share

The following information sets forth the computation of net increase in net assets resulting from operations per share during the three and nine months ended March 31, 2016 and March 31, 2015.

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2016	2015	2016	2015

Note 12. Income Taxes

While our fiscal year end for financial reporting purposes is June 30 of each year, our tax year end is August 31 of each year. The information presented in this footnote is based on our tax year end for each period presented, unless otherwise specified. The tax return for the tax year ended August 31, 2015 has not been filed. Taxable income and all amounts related to taxable income for the tax year ended August 31, 2015 are estimates and will not be fully determined until the Company's tax return is filed.

For income tax purposes, dividends paid and distributions made to shareholders are reported as ordinary income, capital gains, non-taxable return of capital, or a combination thereof. The tax character of dividends paid to shareholders during the tax years ended August 31, 2015, 2014 and 2013 were as follows:

	Tax Year Ended August 31,		
	2015	2014	2013
Ordinary income	\$413,640	\$413,051	\$282,621
Capital gain	—	—	—
Return of capital	—	—	—
Total dividends paid to shareholders	\$413,640	\$413,051	\$282,621

For the tax year ending August 31, 2016, the tax character of dividends paid to shareholders through March 31, 2016 is expected to be ordinary income. Because of the difference between our fiscal and tax year ends, the final determination of the tax character of dividends will not be made until we file our tax return for the tax year ending August 31, 2016.

Taxable income generally differs from net increase in net assets resulting from operations for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized gains or losses, as unrealized gains or losses are generally not included in taxable income until they are realized. The following reconciles the net increase in net assets resulting from operations to taxable income for the tax years ended August 31, 2015, 2014 and 2013:

	Tax Year Ended August 31,		
	2015	2014	2013
Net increase in net assets resulting from operations	\$360,572	\$317,671	\$238,721
Net realized loss on investments	164,230	28,244	24,632
Net unrealized (appreciation) depreciation on investments	(157,745)	24,638	77,835
Other temporary book-to-tax differences	98,289	(9,122)	(6,994)
Permanent differences	2,436	(4,317)	5,939
Taxable income before deductions for distributions	\$467,782	\$357,114	\$340,133

Capital losses in excess of capital gains earned in a tax year may generally be carried forward and used to offset capital gains, subject to certain limitations. The Regulated Investment Company Modernization Act (the “RIC Modernization Act”) was enacted on December 22, 2010. Under the RIC Modernization Act, capital losses incurred by taxpayers in taxable years beginning after the date of enactment will be allowed to be carried forward indefinitely and are allowed to retain their character as either short-term or long-term losses. As such, the capital loss carryforwards generated by us after the August 31, 2011 tax year will not be subject to expiration. Any losses incurred in post-enactment tax years will be required to be utilized prior to the losses incurred in pre-enactment tax years. As of August 31, 2015, we had capital loss carryforwards of approximately \$295,106 available for use in later tax years. Of the amount available as of August 31, 2015, \$32,612 and \$46,156 will expire on August 31, 2017 and 2018, respectively, and \$216,338 is not subject to expiration. The unused balance each year will be carried forward and utilized as gains are realized, subject to limitations. While our ability to utilize losses in the future depends upon a variety of factors that cannot be known in advance, substantially all of the Company's capital loss carryforwards may become permanently unavailable due to limitations by the Code.

For the tax year ended August 31, 2015, we estimated taxable income in excess of the distributions made and we will elect to carry forward the excess for distribution to shareholders in the tax year ending August 31, 2016. The cumulative amount carried forward to 2016 is expected to be approximately \$103,613. For the tax year ended August 31, 2014, we had distributions in excess of taxable income. After the excess distributions, we still had cumulative taxable income in excess of cumulative distributions, and therefore, we elected to carry forward the excess for distribution to shareholders in the tax year ended August 31, 2015. The amount carried forward to 2015 was approximately \$49,471. For the tax year ended August 31, 2013, we had taxable income in excess of the distributions made from such taxable income during the year, and therefore, we elected to carry forward the excess for distribution to shareholders in the tax year ended August 31, 2014. The amount carried forward to 2014 was approximately \$105,408.

As of March 31, 2016, the cost basis of investments for tax purposes was \$6,292,766 resulting in estimated gross unrealized appreciation and depreciation of \$215,114 and \$502,775, respectively. As of June 30, 2015, the cost basis of investments for tax purposes was \$6,599,876 resulting in estimated gross unrealized appreciation and depreciation of \$263,892 and \$254,210, respectively. Due to the difference between our fiscal year end and tax year end, the cost basis of our investments for tax purposes as of March 31, 2016 and June 30, 2015 was calculated based on the book cost of investments as of March 31, 2016 and June 30, 2015, respectively, with cumulative book-to-tax adjustments for investments through August 31, 2015 and 2014, respectively.

In general, we may make certain adjustments to the classification of net assets as a result of permanent book-to-tax differences, which may include merger-related items, differences in the book and tax basis of certain assets and liabilities, and nondeductible federal excise taxes, among other items. During the tax year ended August 31, 2015, we decreased overdistributed net investment income by \$2,435, increased accumulated net realized loss on investments by \$8,542 and increased capital in excess of par value by \$6,107. During the tax year ended August 31, 2014, we increased accumulated overdistributed net investment income by \$4,316, decreased accumulated net realized loss on investments by \$3,384 and decreased capital in excess of par value by \$932. Due to the difference between our fiscal and tax year end, the reclassifications for the taxable year ended August 31, 2015 is being recorded in the fiscal year ending June 30, 2016 and the reclassifications for the taxable year ended August 31, 2014 were recorded in the fiscal year ended June 30, 2015.

Note 13. Related Party Agreements and Transactions

Investment Advisory Agreement

On December 23, 2014, the Investment Adviser, Prospect Capital Management LLC, converted into a Delaware limited partnership and is now known as Prospect Capital Management L.P. (continues as the Investment Adviser). We have entered into an investment advisory and management agreement with the Investment Adviser (the “Investment Advisory Agreement”) under which the Investment Adviser, subject to the overall supervision of our Board of Directors, manages the day-to-day operations of, and provides investment advisory services to, us. Under the terms of the Investment Advisory Agreement, the Investment Adviser: (i) determines the composition of our portfolio, the nature and timing of the changes to our portfolio and the manner of implementing such changes, (ii) identifies, evaluates and negotiates the structure of the investments we make (including performing due diligence on our prospective portfolio companies); and (iii) closes and monitors investments we make.

The Investment Adviser’s services under the Investment Advisory Agreement are not exclusive, and it is free to furnish similar services to other entities so long as its services to us are not impaired. For providing these services the Investment Adviser receives a fee from us, consisting of two components: a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 2.00% on our gross assets (including amounts borrowed). For services currently rendered under the Investment Advisory Agreement, the base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our gross assets at the end of the two most recently completed calendar quarters and appropriately adjusted for any share issuances or repurchases during the current calendar quarter.

The total gross base management fee incurred to the favor of the Investment Adviser was \$31,442 and \$33,679 during the three months ended March 31, 2016 and March 31, 2015, respectively. The total gross base management fee incurred to the favor of the Investment Adviser was \$97,109 and \$100,878 during the nine months ended March 31, 2016 and March 31, 2015, respectively.

The Investment Adviser has entered into a servicing agreement with certain institutions who purchased loans with us, where we serve as the agent and collect a servicing fee on behalf of the Investment Adviser. During the three and nine months ended March 31, 2016, we received payments of \$465 and \$1,397, respectively, from these institutions, on behalf of the Investment Adviser, for providing such services under the servicing agreement. We were given a credit for these payments, which reduced the base management fee payable to \$30,977 and \$95,712 for the three and nine months ended March 31, 2016, respectively. No such payments were received during the three and nine months ended March 31, 2015.

The incentive fee has two parts. The first part, the income incentive fee, is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the immediately preceding calendar quarter. For this purpose, pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees (other than fees for providing managerial assistance), such as commitment, origination, structuring, diligence and consulting fees and other fees that we receive from portfolio companies) accrued during the calendar quarter, minus our operating expenses for the quarter (including the base management fee, expenses payable under the Administration Agreement described below, and any interest expense and dividends paid on any issued and outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature (such as original issue discount, debt instruments with payment-in-kind interest and zero coupon securities), accrued income that we have not yet received in cash. Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets at the end of the immediately preceding calendar quarter, is compared to a “hurdle rate” of 1.75% per quarter (7.00% annualized).

The net investment income used to calculate this part of the incentive fee is also included in the amount of the gross assets used to calculate the 2.00% base management fee. We pay the Investment Adviser an income incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

• No incentive fee in any calendar quarter in which our pre-incentive fee net investment income does not exceed the hurdle rate;

•

100.00% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 125.00% of the quarterly hurdle rate in any calendar quarter (8.75% annualized assuming a 7.00% annualized hurdle rate); and
20.00% of the amount of our pre-incentive fee net investment income, if any, that exceeds 125.00% of the quarterly hurdle rate in any calendar quarter (8.75% annualized assuming a 7.00% annualized hurdle rate).

These calculations are appropriately prorated for any period of less than three months and adjusted for any share issuances or repurchases during the current quarter.

The second part of the incentive fee, the capital gains incentive fee, is determined and payable in arrears as of the end of each calendar year (or upon termination of the Investment Advisory Agreement, as of the termination date), and equals 20.00% of our realized capital gains for the calendar year, if any, computed net of all realized capital losses and unrealized capital depreciation at the end of such year. In determining the capital gains incentive fee payable to the Investment Adviser, we calculate the aggregate realized capital gains, aggregate realized capital losses and aggregate unrealized capital depreciation, as applicable, with respect to each investment that has been in its portfolio. For the purpose of this calculation, an “investment” is defined as the total of all rights and claims which may be asserted against a portfolio company arising from our participation in the debt, equity, and other financial instruments issued by that company. Aggregate realized capital gains, if any, equal the sum of the differences between the aggregate net sales price of each investment and the aggregate cost basis of such investment when sold or otherwise disposed. Aggregate realized capital losses equal the sum of the amounts by which the aggregate net sales price of each investment is less than the aggregate cost basis of such investment when sold or otherwise disposed. Aggregate unrealized capital depreciation equals the sum of the differences, if negative, between the aggregate valuation of each investment and the aggregate cost basis of such investment as of the applicable calendar year-end. At the end of the applicable calendar year, the amount of capital gains that serves as the basis for our calculation of the capital gains incentive fee involves netting aggregate realized capital gains against aggregate realized capital losses on a since-inception basis and then reducing this amount by the aggregate unrealized capital depreciation. If this number is positive, then the capital gains incentive fee payable is equal to 20.00% of such amount, less the aggregate amount of any capital gains incentive fees paid since inception.

The total income incentive fee incurred was \$21,906, and \$21,860 during the three months ended March 31, 2016 and March 31, 2015, respectively. Administration Agreement

We have also entered into an administration agreement (the “Administration Agreement”) with Prospect Administration under which Prospect Administration, among other things, provides (or arranges for the provision of) administrative services and facilities for us. For providing these services, we reimburse Prospect Administration for our allocable portion of overhead incurred by Prospect Administration in performing its obligations under the Administration Agreement, including rent and our allocable portion of the costs of our Chief Financial Officer and Chief Compliance Officer and his staff. Under this agreement, Prospect Administration furnishes us with office facilities, equipment and clerical, bookkeeping and record keeping services at such facilities. Prospect Administration also performs, or oversees the performance of, our required administrative services, which include, among other things, being responsible for the financial records that we are required to maintain and preparing reports to our stockholders and reports filed with the SEC. In addition, Prospect Administration assists us in determining and publishing our net asset value, overseeing the preparation and filing of our tax returns and the printing and dissemination of reports to our stockholders, and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others. Under the Administration Agreement, Prospect Administration also provides on our behalf managerial assistance to those portfolio companies to which we are required to provide such assistance (see Managerial Assistance section below). The Administration Agreement may be terminated by either party without penalty upon 60 days’ written notice to the other party. Prospect Administration is a subsidiary of the Investment Adviser.

The Administration Agreement provides that, absent willful misfeasance, bad faith or negligence in the performance of its duties or by reason of the reckless disregard of its duties and obligations, Prospect Administration and its officers, managers, partners, agents, employees, controlling persons, members and any other person or entity affiliated with it are entitled to indemnification from us for any damages, liabilities, costs and expenses (including reasonable attorneys’ fees and amounts reasonably paid in settlement) arising from the rendering of Prospect Administration’s services under the Administration Agreement or otherwise as administrator for us. Our payments to Prospect Administration are periodically reviewed by our Board of Directors.

The allocation of gross overhead expense from Prospect Administration was \$5,698 and \$6,021 for the three months ended March 31, 2016 and March 31, 2015, respectively. We were given a credit for these payments as a reduction of the administrative services cost payable by us to Prospect Administration, resulting in net overhead expense of \$2,936 and \$2,984 during the three months ended March 31, 2016 and March 31, 2015, respectively. Had Prospect Administration not received these payments, Prospect Administration's charges for its administrative services would have increased by these amounts. We also incurred \$379 of overhead expense related to our consolidated entity SB Forging. Prospect Administration received estimated payments of 5,611 and \$5,584 directly from our portfolio companies and certain funds managed by the Investment Adviser for legal, tax and portfolio level accounting services during the nine months ended March 31, 2016 and March 31, 2015, respectively. Managerial Assistance

As a BDC, we are obligated under the 1940 Act to make available to certain of our portfolio companies significant managerial assistance. "Making available significant managerial assistance" refers to any arrangement whereby we provide significant guidance and counsel concerning the management, operations, or business objectives and policies of a portfolio company. We are also deemed to be providing managerial assistance to all portfolio companies that we control, either by ourselves or in conjunction with others. The nature and extent of significant managerial assistance provided by us to controlled and non-controlled portfolio companies will vary according to the particular needs of each portfolio company. Examples of such activities include (i) advice on recruiting, hiring, management and termination of employees, officers and directors, succession planning and other human resource matters; (ii) advice on capital raising, capital budgeting, and capital expenditures; (iii) advice on advertising, marketing, and sales; (iv) advice on fulfillment, operations, and execution; (v) advice on managing relationships with unions and other personnel organizations, financing sources, vendors, customers, lessors, lessees, lawyers, accountants, regulators and other important counterparties; (vi) evaluating acquisition and divestiture opportunities, plant expansions and closings, and market expansions; (vii) participating in audit committee, nominating committee, board and management meetings; (viii) consulting with and advising board members and officers of portfolio companies (on overall strategy and other matters); and (ix) providing other organizational, operational, managerial and financial guidance.

Prospect Administration, when performing a managerial assistance agreement executed with each portfolio company to which we provide managerial assistance, arranges for the provision of such managerial assistance on our behalf. When doing so, Prospect Administration utilizes personnel of our Investment Adviser. We, on behalf of Prospect Administration, invoice portfolio companies receiving and paying for managerial assistance, and we remit to Prospect Administration its cost of providing such services, including the charges deemed appropriate by our Investment Adviser for providing such managerial assistance. No income is recognized by Prospect.

Co-Investments

On February 10, 2014, we received an exemptive order from the SEC (the "Order") that gave us the ability to negotiate terms other than price and quantity of co-investment transactions with other funds managed by the Investment Adviser or certain affiliates, including Priority Income Fund, Inc. and Pathway Energy Infrastructure Fund, Inc., subject to the conditions included therein. Under the terms of the relief permitting us to co-invest with other funds managed by our Investment Adviser or its affiliates, a "required majority" (as defined in Section 57(o) of the 1940 Act) of our independent directors must make certain conclusions in connection with a co-investment transaction, including that

(1) the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching of us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies. In certain situations where co-investment with one or more funds managed by the Investment Adviser or its affiliates is not covered by the Order, such as when there is an opportunity to invest in different securities of the same issuer, the personnel of the Investment Adviser or its affiliates will need to decide which fund will proceed with the investment. Such personnel will make these determinations based on policies and procedures, which are designed to reasonably ensure that investment opportunities are allocated fairly and equitably among affiliated funds over time and in a manner that is consistent with applicable

laws, rules and regulations. Moreover, except in certain circumstances, when relying on the Order, we will be unable to invest in any issuer in which one or more funds managed by the Investment Adviser or its affiliates has previously invested.

Airmall then distributed this amount to AMU as a return of capital, which AMU used to pay down the senior subordinated loan in the same amount. The minority interest held by a third party in AMU was exchanged for common stock of Airmall.

On July 1, 2014, Prospect began consolidating AMU. As a result, any transactions between AMU and Prospect are eliminated in consolidation and as such, transactions after July 1, 2014 are not presented below.

Change Clean owns 100% of each of Change Clean Energy, LLC and Down East Power Company, LLC, and 50.1% of BioChips LLC. Freedom Marine owns 100% of each of Vessel Company, LLC (f/k/a Vessel Holdings, LLC) (“Vessel”); Vessel Company II, LLC (f/k/a Vessel Holdings II, LLC) (“Vessel II”); and Vessel Company III, LLC (f/k/a Vessel Holdings III, LLC) (“Vessel III”). Yatesville owns 100% of North Fork Collieries, LLC.

Energy Solutions owns interests in companies operating in the energy sector. These include companies operating offshore supply vessels, ownership of a non-operating biomass electrical generation plant and several coal mines. Energy Solutions subsidiaries formerly owned interests in gathering and processing business in east Texas. As of July 1, 2011, the cost basis of Prospect’s investment in Energy Solutions, including debt and equity, was \$42,003.

In December 2011, Prospect completed a reorganization of Gas Solutions Holdings Inc. renaming the company Energy Solutions and transferring ownership of other operating companies owned by Prospect and operating within the energy industry. As part of the reorganization, Prospect transferred its debt and equity interests with cost basis of \$2,540 in Change Clean Energy Holdings, Inc. and Change Clean Energy, Inc. to Change Clean; \$12,504 in Freedom Marine Holdings, Inc. to Freedom Marine; and \$1,449 of Yatesville Coal Holdings, Inc. to Yatesville. Each of these entities is wholly owned (directly or indirectly) by Energy Solutions. On January 4, 2012, Energy Solutions sold its gas gathering and processing assets held in Gas Solutions II Ltd. (“Gas Solutions”) for a potential sale price of \$199,805, adjusted for the final working capital settlement, including a potential earn-out of \$28,000 that may be paid based on the future performance of Gas Solutions. After expenses, including structuring fees of \$9,966 paid to Prospect, and \$3,152 of third-party expenses, Gas Solutions LP LLC and Gas Solutions GP LLC, subsidiaries of Gas Solutions, received \$157,100 and \$1,587 in cash, respectively, and subsequently distributed these amounts, \$158,687 in total, to Energy Solutions. The sale of Gas Solutions by Energy Solutions resulted in significant earnings and profits, as defined by the Code, at Energy Solutions for calendar year 2012. In accordance with ASC 946, the distributions Prospect received from Energy Solutions during calendar year 2012 were required to be recognized as dividend income, as there were current year earnings and profits sufficient to support such recognition. As a result, we recognized dividends of \$53,820 from Energy Solutions during the year ended June 30, 2013. No such dividends were received from Energy Solutions during the year ended June 30, 2014.

During the year ended June 30, 2013, Energy Solutions repaid \$28,500 of senior and subordinated secured debt due to Prospect. In addition to the repayment of principal, Prospect received \$19,543 of make-whole fees for early repayment of the outstanding loan receivables, which was recorded as additional interest income during the year ended June 30, 2013.

On November 25, 2013, Prospect restructured its investment in Freedom Marine. The \$12,504 subordinated secured loan to Jettco Marine Services, LLC, a subsidiary of Freedom Marine, was replaced with a senior secured note to Vessel II. On December 3, 2013, Prospect made a \$16,000 senior secured investment in Vessel III. Overall, the restructuring of Prospect's investment in Freedom Marine provided approximately \$16,000 net new senior secured debt financing to support the acquisition of two new vessels. Prospect received \$2,480 of structuring fees from Energy Solutions related to the Freedom Marine restructuring which was recognized as other income.

During the year ended June 30, 2014, Energy Solutions repaid the remaining \$8,500 of the subordinated secured debt due to Prospect. On November 28, 2012 and January 1, 2014, Prospect received \$475 and \$25 of litigation settlement proceeds related to Change Clean and recorded a reduction in its equity investment cost basis for Energy Solutions, respectively.

On June 4, 2014, Gas Solutions GP LLC and Gas Solutions LP LLC merged with and into Freedom Marine, with Freedom Marine as the surviving entity.

On July 1, 2014, Prospect began consolidating Energy Solutions. As a result, any transactions between Energy Solutions and Prospect are eliminated in consolidation and as such, transactions after July 1, 2014 are not presented below. Transactions between Prospect and Freedom Marine are separately discussed below under "Freedom Marine Solutions, LLC."

Manx Energy, Inc.

As of June 30, 2014, Prospect owned 41% of the equity of Manx Energy, Inc. (“Manx”). Manx was formed on January 19, 2010 for the purpose of rolling up the assets of existing Prospect portfolio companies, Coalbed, LLC (“Coalbed”), Appalachian Energy LLC (f/k/a Appalachian Energy Holdings, LLC) (“AEH”) and Kinley Exploration LLC. The three companies were combined under new common management.

On January 19, 2010, Prospect made a \$2,800 investment at closing to Manx to provide for working capital. On the same date, Prospect exchanged \$2,100 and \$4,500 of the loans to AEH and Coalbed, respectively, for Manx preferred equity, and Prospect’s AEH equity interest was converted into Manx common stock. There was no change to fair value at the time of restructuring, and Prospect continued to fully reserve any income accrued for Manx. On October 15, 2010 and May 26, 2011, Prospect increased its loan to Manx in the amount of \$500 and \$250, respectively, to provide additional working capital. As of June 30, 2011, the cost basis of Prospect’s investment in Manx, including debt and equity, was \$19,019.

On June 30, 2012, AEH and Coalbed loans held by Manx with a cost basis of \$7,991 were removed from Manx and contributed by Prospect to Wolf Energy Holdings Inc., a separate holding company wholly owned by Prospect.

During the three months ended June 30, 2013, Prospect determined that our investment in Manx was impaired and recorded a realized loss of \$9,397 for the amount that the amortized cost exceeded the fair value, reducing the amortized cost to \$500. During the year ended June 30, 2014, Manx repaid \$450 of the senior secured note. During the three months ended December 31, 2014, Manx was dissolved and Prospect recorded a realized loss of \$50, reducing the amortized cost to zero.

Valley Electric owns 100% of the equity of VE Company, Inc., which owns 100% of the equity of Valley Electric Co. of Mt. Vernon, Inc. ("Valley"), a leading provider of specialty electrical services in the state of Washington and among the top 50 electrical contractors in the United States.

On December 31, 2012, Prospect initially invested \$52,098 (including 4,141,547 common shares of Prospect at a fair value of \$44,650) in exchange for \$32,572 was in the form of a senior secured note to Valley Holdings I, a \$10,000 senior secured note to Valley (discussed below) and \$9,526 to purchase the common stock of Valley Holdings I. The proceeds were partially utilized by Valley Holdings I to purchase 100% of Valley Holdings II common stock for \$40,528. The remaining proceeds at Valley Holdings I were used to pay \$977 of structuring fees from Valley Holdings I to Prospect (which were recognized by Prospect as structuring fee income), \$345 for legal services provided by attorneys at Prospect Administration and \$248 was retained by Valley Holdings I for working capital. The \$40,528 of proceeds received by Valley Holdings II were subsequently used to purchase 96.3% of Valley's common stock. Valley management provided a \$1,500 co-investment in Valley.

On December 31, 2012, Prospect invested \$10,000 (as mentioned above) into Valley in the form of senior secured debt. Total proceeds of \$52,028 received by Valley (including \$42,028 equity investment mentioned above) were used to purchase the equity of Valley from third-party sellers for \$45,650, pay \$4,628 of third-party transaction expenses (including bonuses to Valley's management of \$2,320), pay \$250 from Valley to Prospect (which were recognized by Prospect as structuring fee income) and \$1,500 was retained by Valley for working capital.

On June 24, 2014, Valley Holdings II and management of Valley formed Valley Electric and contributed their shares of Valley stock to Valley Electric. Valley management made an additional equity investment in Valley Electric, reducing our ownership to 94.99%. Prospect made a new \$20,471 senior secured loan to Valley Electric. Valley Electric then distributed this amount to Valley Holdings I, via Valley Holdings II, as a return of capital which was used to pay down the senior secured note of Valley Holdings I by the same amount. The remaining principal amount of the senior secured note, \$16,754, was then contributed to the capital of Valley Holdings I.

On July 1, 2014, Prospect began consolidating Valley Holdings I and Valley Holdings II. As a result, any transactions between Valley Holdings I, Valley Holdings II and Prospect are eliminated in consolidation and as such, transactions after July 1, 2014 are not presented below.

Vets Securing America, Inc.

As of June 30, 2014, Prospect owned 100% of the equity of Vets Securing America, Inc. (“VSA”) and 100% of the equity of The Healing Staff, Inc. (“THS”), a former wholly-owned subsidiary of ESA Environmental Specialists, Inc. (“ESA”). During the year ended June 30, 2015, THS ceased operations and the VSA management team supervised both the continued operations of VSA and the wind-down of activities at THS. VSA provides out-sourced security guards staffing.

As of July 1, 2011, the cost basis of Prospect’s investment in THS and VSA, including debt and equity, was \$18,219. During the year ended June 30, 2012, Prospect made follow-on secured debt investments of \$1,033 to support the ongoing operations of THS and VSA. In October 2011, Prospect sold a building previously acquired from ESA for \$894. In January 2012, Prospect received \$2,250 of litigation settlement proceeds related to ESA. The proceeds from both of these transactions were used to reduce the outstanding loan balances due from THS and VSA by \$3,144. In June 2012, THS and VSA repaid \$118 and \$42, respectively, of loans previously outstanding.

In May 2012, in connection with the implementation of accounts receivable based funding programs for THS and VSA with a third party provider, Prospect agreed to subordinate its first priority security interest in all of the accounts receivable and other assets of THS and VSA to the third party provider of that accounts receivable based funding. During the year ended June 30, 2013, Prospect determined that our investment in THS and VSA was impaired and recorded a realized loss of \$12,117, reducing the amortized cost to \$3,831. During the year ended June 30, 2014, Prospect received \$5,825 of legal cost reimbursement related to the ESA litigation settlement which had been expensed in prior years. The proceeds were recognized by Prospect as other income during the year ended June 30, 2014. During the year ended June 30, 2015, Prospect received \$685 related to the ESA litigation settlement which was recognized as realized gain.

On May 20, 2015, Prospect made a new \$100 secured promissory note to provide liquidity to VSA.

As of June 30, 2014, THS and VSA were joint borrowers on the secured promissory notes. On June 5, 2015, Prospect sold its equity investment in VSA and realized a net loss of \$975 on the sale. In connection with the sale, VSA was released as a borrower on the secured promissory notes, leaving THS as the sole borrower. During the year ended June 30, 2015, THS ceased operations and Prospect recorded a realized loss of \$2,956, reducing the amortized cost to zero.

Wolf Energy, LLC

Prospect owns 100% of the equity of Wolf Energy Holdings Inc. ("Wolf Energy Holdings"), a Consolidated Holding Company. Wolf Energy Holdings owns 100% of each of Appalachian Energy LLC (f/k/a Appalachian Energy Holdings, LLC) ("AEH"); Coalbed, LLC ("Coalbed"); and Wolf Energy, LLC ("Wolf Energy"). AEH owns 100% of C&S Operating, LLC.

Wolf Energy Holdings is a holding company formed to hold 100% of the outstanding membership interests of each of AEH and Coalbed. The membership interests and associated operating company debt of AEH and Coalbed, which were previously owned by Manx Energy, Inc. ("Manx"), were assigned to Wolf Energy Holdings effective June 30, 2012. The purpose of assignment was to remove those activities from Manx deemed non-core by the Manx convertible debt investors who were not interested in funding those operations. On June 30, 2012, AEH and Coalbed loans with a cost basis of \$7,991 were assigned by Prospect to Wolf Energy Holdings from Manx.

In addition, effective June 29, 2012, C&J Cladding Holding Company, Inc. ("C&J Holdings") merged with and into Wolf Energy Holdings, with Wolf Energy Holdings as the surviving entity. At the time of the merger, C&J Holdings held the remaining undistributed proceeds in cash from the sale of its membership interests in C&J Cladding, LLC ("C&J") (discussed below). The merger was effectuated in connection with the broader simplification of Prospect's energy investment holdings.

On June 1, 2012, Prospect sold the membership interests in C&J for \$5,500. Proceeds from the sale were used to pay a \$3,000 distribution to Prospect (\$580 reduction in cost basis and \$2,420 realized gain recognized by Prospect), an advisory fee of \$1,500 from C&J to Prospect (which was recognized by Prospect as other income) and \$978 was retained by C&J as working capital to pay \$22 of legal services provided by attorneys at Prospect Administration and third-party expenses.

On February 27, 2013, Prospect made a \$50 senior secured debt investment senior secured to East Cumberland, L.L.C., a former wholly-owned subsidiary of AEH with AEH as guarantor. Proceeds were used to pay off vendors.

On April 15, 2013, Prospect foreclosed on the assets of H&M Oil & Gas, LLC ("H&M"). At the time of foreclosure, H&M was in default on loans receivables due to Prospect with a cost basis of \$64,449. The assets previously held by H&M were assigned by Prospect to Wolf Energy in exchange for a \$66,000 term loan secured by the assets. The cost basis in this loan of \$44,632 was determined in accordance with ASC 310-40, Troubled Debt Restructurings by Creditors, and was equal to the fair value of assets at the time of transfer resulting in a capital loss of \$19,647 in connection with the foreclosure on the assets. On May 17, 2013, Wolf Energy sold the assets located in Martin County, which were previously held by H&M, for \$66,000. Proceeds from the sale were primarily used to repay the loan, accrued interest and net profits interest receivable due to us resulting in a realized capital gain of \$11,826 offsetting the previously recognized loss. Prospect received \$3,960 of structuring and advisory fees from Wolf Energy during the year ended June 30, 2013 related to the sale and \$991 under the net profits interest agreement which was recognized as other income during the fiscal year ended June 30, 2013.

On July 1, 2014, Prospect began consolidating Wolf Energy Holdings. As a result, any transactions between Wolf Energy Holdings and Prospect are eliminated in consolidation and as such, transactions after July 1, 2014 are not presented below.

During the three months ended September 30, 2014, Prospect determined that our investment in AEH was impaired and recorded a realized loss of \$2,050, reducing the amortized cost to zero. On November 21, 2014, Coalbed merged with and into Wolf Energy, with Wolf Energy as the surviving entity. During the three months ended December 31, 2014, Prospect determined that our investment in the Coalbed debt assumed by Wolf Energy was impaired and recorded a realized loss of \$5,991, reducing the amortized cost to zero.

During the year ended June 30, 2015, Wolf Energy Holdings received a tax refund of \$173 related to its investment in C&J and Prospect realized a gain of the same amount.

The following managerial assistance recognized had not yet been paid by Wolf Energy to Prospect and was included by Prospect within other receivables and due to Prospect Administration:

Note 15. Litigation

From time to time, we may become involved in various investigations, claims and legal proceedings that arise in the ordinary course of our business. These matters may relate to intellectual property, employment, tax, regulation, contract or other matters. The resolution of such matters as may arise will be subject to various uncertainties and, even if such claims are without merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any material legal proceedings as of March 31, 2016. Our Investment Adviser and Administrator have been named as defendants in a lawsuit filed on April 21, 2016 by a purported shareholder of Prospect in the United States District Court for the Southern District of New York under the caption Paskowitz v. Prospect Capital Management and Prospect Administration. The complaint alleges that the defendants received purportedly excessive management and administrative services fees from us in violation of Section 36(b) of the 1940 Act. The plaintiff seeks to recover on behalf of us damages in an amount not specified in the complaint. The defendants have informed us that they believe the complaint is without merit and intend to defend themselves vigorously against the plaintiff's claims. We believe that the lawsuit is not likely to have a material adverse effect on Prospect.

Effective July 1, 2014, we began consolidating certain of our wholly-owned and substantially wholly-owned holding companies formed by us in order to facilitate our investment strategy. The following companies have been included in our consolidated financial statements since July 1, 2014: AMU Holdings Inc.; APH Property Holdings, LLC; Arctic Oilfield Equipment USA, Inc.; CCPI Holdings Inc.; CP Holdings of Delaware LLC; Credit Central Holdings of Delaware, LLC; Energy Solutions Holdings Inc.; First Tower Holdings of Delaware LLC; Harbortouch Holdings of Delaware Inc.; MITY Holdings of Delaware Inc.; Nationwide Acceptance Holdings LLC; NMMB Holdings, Inc.; NPH Property Holdings, LLC ("NPH"); STI Holding, Inc.; UPH Property Holdings, LLC; Valley Electric Holdings I, Inc.; Valley Electric Holdings II, Inc.; and Wolf Energy Holdings Inc. On October 10, 2014, concurrent with the sale of the operating company, our ownership increased to 100% of the outstanding equity of ARRM Services, Inc. ("ARRM") which was renamed SB Forging Company, Inc. ("SB Forging"). As such, we began consolidating SB Forging on October 11, 2014. We collectively refer to these entities as the "Consolidated Holding Companies."

We are externally managed by our investment adviser, Prospect Capital Management L.P. ("Prospect Capital Management" or the "Investment Adviser"). Prospect Administration LLC ("Prospect Administration" or the "Administrator"), a wholly-owned subsidiary of the Investment Adviser, provides administrative services and facilities necessary for us to operate.

Our investment objective is to generate both current income and long-term capital appreciation through debt and equity investments. We invest primarily in senior and subordinated debt and equity of private companies in need of capital for acquisitions, divestitures, growth, development, recapitalizations and other purposes. We work with the management teams or financial sponsors to seek investments with historical cash flows, asset collateral or contracted pro-forma cash flows.

We currently have nine origination strategies in which we make investments: (1) lending in private equity sponsored transactions, (2) lending directly to companies not owned by private equity firms, (3) control investments in corporate operating companies, (4) control investments in financial companies, (5) investments in structured credit, (6) real

estate investments, (7) investments in syndicated debt, (8) aircraft leasing and (9) online lending. We continue to evaluate other origination strategies in the ordinary course of business with no specific tops-down allocation to any single origination strategy.

Lending in Private Equity Sponsored Transactions – We make loans to companies which are controlled by leading private equity firms. This debt can take the form of first lien, second lien, unitranche or unsecured loans. In making these investments, we look for a diversified customer base, recurring demand for the product or service, barriers to entry, strong historical cash flow and experienced management teams. These loans typically have significant equity subordinate to our loan position. Historically, this strategy has comprised approximately 50%-60% of our business, but more recently it is less than 50% of our business.

Lending Directly to Companies – We provide debt financing to companies owned by non-private equity firms, the company founder, a management team or a family. Here, in addition to the strengths we look for in a sponsored transaction, we also look for the alignment with the management team with significant invested capital. This strategy often has less competition than the private equity sponsor strategy because such company financing needs are not easily addressed by banks and often require more diligence preparation. Direct lending can result in higher returns and lower leverage than sponsor transactions and may include warrants or equity to us. Historically, this strategy has comprised approximately 5%-15% of our business, but more recently it is less than 5% of our business.

Control Investments in Corporate Operating Companies – This strategy involves acquiring controlling stakes in non-financial operating companies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. We provide enhanced certainty of closure to our counterparties, give the seller personal liquidity and generally look for management to continue on in their current roles. This strategy has comprised approximately 10%-15% of our business.

Control Investments in Financial Companies – This strategy involves acquiring controlling stakes in financial companies, including consumer direct lending, sub-prime auto lending and other strategies. Our investments in these companies are generally structured as a combination of yield-producing debt and equity. These investments are often structured in a tax-efficient RIC-compliant partnership, enhancing returns. This strategy has comprised approximately 5%-15% of our business.

Investments in Structured Credit – We make investments in CLOs, generally taking a significant position in the subordinated interests (equity) of the CLOs. The CLOs include a diversified portfolio of broadly syndicated loans and do not have direct exposure to real estate, mortgages, debt or consumer based debt. The CLOs in which we invest are managed by top-tier collateral managers that have been thoroughly diligenced prior to investment. This strategy has comprised approximately 10%-20% of our business.

Real Estate Investments – We make investments in real estate through our three wholly-owned tax-efficient real estate investment trusts (“REITs”), American Property REIT Corp. (“APRC”), National Property REIT Corp. (“NPRC”) and United Property REIT Corp. (“UPRC” and collectively with APRC and NPRC, “our REITs”). Our real estate investments are in various classes of fully developed and occupied real estate properties that generate current yields. We seek to identify properties that have historically high occupancy and steady cash flow generation. Our REITs co-invest with established and experienced property managers that manage such properties after acquisition. This investment strategy has comprised approximately 5%-10% of our business.

Investments in Syndicated Debt – On an opportunistic basis, we make investments in loans and high yield bonds that have been sold to a syndicate of buyers. Here we look for investments with attractive risk-adjusted returns after we have completed a fundamental credit analysis. These investments are purchased with a long term, buy-and-hold outlook and we look to provide significant structuring input by providing anchoring orders. This strategy has comprised approximately 5%-10% of our business.

Aircraft Leasing – We invest debt as well as equity in aircraft assets subject to commercial leases to credit-worthy airlines across the globe. These investments present attractive return opportunities due to cash flow consistency from long-lived assets coupled with hard asset collateral. We seek to deliver risk-adjusted returns with strong downside protection by analyzing relative value characteristics across the spectrum of aircraft types of all vintages. Our target portfolio includes both in-production and out-of-production jet and turboprop aircraft and engines, operated by airlines across the globe. This strategy comprised approximately 1% of our business in the fiscal year ended June 30, 2015 and approximately 1% as of March 31, 2016.

Online Lending – We make investments in loans originated by certain consumer loan and small and medium sized business (“SME”) aggregators. We purchase each loan in its entirety (i.e., a “whole loan”). The borrowers are consumers and SMEs. The loans are typically serviced by the aggregators of the loans. This strategy comprised approximately 5% of our business in the fiscal year ended June 30, 2015 and approximately 5% as of March 31, 2016.

We invest primarily in first and second lien secured loans and unsecured debt, which in some cases includes an equity component. First and second lien secured loans generally are senior debt instruments that rank ahead of unsecured debt of a given portfolio company. These loans also have the benefit of security interests on the assets of the portfolio company, which may rank ahead of or be junior to other security interests. Our investments in CLOs are subordinated to senior loans and are generally unsecured. We invest in debt and equity positions of CLOs which are a form of

securitization in which the cash flows of a portfolio of loans are pooled and passed on to different classes of owners in various tranches. Our CLO investments are derived from portfolios of corporate debt securities which are generally risk rated from BB to B.

We hold many of our control investments in a two-tier structure consisting of a holding company and one or more related operating companies for tax purposes. These holding companies serve various business purposes including concentration of management teams, optimization of third party borrowing costs, improvement of supplier, customer, and insurance terms, and enhancement of co-investments by the management teams. In these cases, our investment in the holding company, generally as equity, its equity investment in the operating company and along with any debt from us directly to the operating company structure represents our total exposure for the investment. As of March 31, 2016, as shown in our Consolidated Schedule of Investments, the cost basis and fair value of our investments in controlled companies was \$1,959,243 and \$1,998,023, respectively. This structure gives rise to several of the risks described in our public documents and highlighted elsewhere in this Quarterly Report. On July 1, 2014, we began consolidating all wholly-owned and substantially wholly-owned holding companies formed by us for the purpose of holding our controlled investments in operating companies. There were no significant effects of consolidating these holding companies as they hold minimal assets other than their investments in the controlled operating companies. Investment company accounting prohibits the consolidation of any operating companies.

Third Quarter Highlights

Investment Transactions

We seek to be a long-term investor with our portfolio companies. During the three months ended March 31, 2016, we completed follow-on investments in existing portfolio companies totaling approximately \$17,099, funded \$2,742 of revolver advances, and recorded paid in kind (“PIK”) interest of \$3,335, resulting in gross investment originations of \$23,176. During the three months ended March 31, 2016, we received full repayments on one investment and received several partial prepayments and amortization payments totaling \$163,641, including realized losses totaling \$10,784. The more significant of these transactions are discussed in “Portfolio Investment Activity.”

Debt Issuances and Redemptions

During the three months ended March 31, 2016, we issued \$5,573 aggregate principal amount of Prospect Capital InterNotes® for net proceeds of \$5,503. These notes were issued with stated interest rates ranging from 5.38% to 5.50% with a weighted average interest rate of 5.41%. These notes mature between January 15, 2021 and March 15, 2021. The following table summarizes the Prospect Capital InterNotes® issued during the three months ended March 31, 2016.

Tenor at Origination (in years)	Principal Amount	Interest Rate Range	Weighted Average Interest Rate	Maturity Date Range
5	\$ 5,573 \$ 5,573	5.375%–5.500%	5.41 %	January 15, 2021 – March 15, 2021

During the three months ended March 31, 2016, we repaid \$1,163 aggregate principal amount of Prospect Capital InterNotes® at par in accordance with the Survivor’s Option, as defined in the InterNotes® Offering prospectus. As a result of these transactions, we recorded a loss in the amount of the difference between the reacquisition price and the net carrying amount of the notes, net of the proportionate amount of unamortized debt issuance costs. The net loss on the extinguishment of Prospect Capital InterNotes® in the three months ended March 31, 2016 was \$32.

On March 28, 2016, we repurchased \$500 aggregate principal amount of the 2017 Notes at a price of 98.25, including commissions. The transaction resulted in our recognizing a \$9 gain, excluding the \$4 write-off of deferred financing costs associated with the repurchase, for the three months ended March 31, 2016.

Equity Issuances

On January 21, 2016, February 18, 2016 and March 24, 2016, we issued 299,423, 255,743 and 146,899 shares of our common stock in connection with the dividend reinvestment plan, respectively.

On February 9, 2016, we amended our dividend reinvestment plan that already provides for reinvestment of our dividends or distributions on behalf of our stockholders, unless a stockholder elects to receive cash, to add the ability of stockholders to purchase additional shares by making optional cash investments. Under the revised dividend reinvestment and direct stock repurchase plan, stockholders may elect to purchase additional shares through our transfer agent in the open market or in negotiated transactions.

Affiliate Share Purchases

During three months ended March 31, 2016, Prospect Capital officers purchased 8,454,796 shares of our stock, or 2.4% of total outstanding shares as of March 31, 2016, both through the open market transactions and shares issued in connection with our dividend reinvestment plan.

“Spin-Offs” of Certain Business Strategies

We previously announced that we intend to unlock value by “spinning off” certain “pure play” business strategies to our shareholders. We desire through these transactions to (i) transform some of the business strategies we have successfully grown and developed inside Prospect into pure play public companies with the potential for increased earnings multiples, (ii) allow for continued revenue and earnings growth through more flexible non-BDC formats (which are expected to benefit from not having one or more of the (a) 30% basket, (b) leverage, and (c) control basket constraining BDCs, and (iii) free up our 30% basket and leverage capacity for new originations at Prospect. The business strategies we intend to enable our shareholders to participate in on a “pure play” basis have grown faster than our overall growth rate in the past few years, with outlets in less constricting structures required to continue this strong growth. We anticipate these non-BDC companies will have tax efficient structures.

We initially intend to focus our “spin-off” efforts on the launch of up to three separate companies owning portions of our (i) consumer online lending business, (ii) real estate business and (iii) structured credit business. We are seeking to divest these businesses in conjunction with rights offering capital raises in which existing Prospect shareholders could elect to participate in each offering or sell their rights. The goals of these “spin-offs” include leverage and earnings neutrality for Prospect. Our primary objective is to maximize the valuation of each offering (declining to proceed with any offering if we find any valuation not to be attractive).

The sizes and likelihood of these dispositions, some of which are expected to be partial rather than complete spin-offs, remain to be determined, but we currently expect the collective size of these three dispositions to be 10% or less of our asset base. We seek to complete these “spin-offs” in calendar year 2016 or 2017 in a sequential fashion. The consummation of any of the spin-offs depends upon, among other things: market conditions, regulatory and exchange listing approval, and sufficient investor demand, and there can be no guarantee that we will consummate any of these spin-offs.

On March 11, 2015, PYC filed a registration statement with the SEC in connection with our rights offering disposition of a portion of our structured credit business, and PYC filed an amendment on April 17, 2015. We are a selling stockholder under the registration statement. If favorable market conditions exist, we will seek but cannot guarantee consummation of this disposition, which is subject to regulatory review.

On May 6, 2015, Prospect Finance Company, LLC (“Prospect Finance”), our indirect wholly-owned subsidiary, filed a confidential registration statement with the SEC in connection with our rights offering disposition of our online consumer lending business, and Prospect Finance filed confidential amendments on June 16, July 20 and August 12, 2015. We are a selling stockholder under the registration statement. If favorable market conditions exist, we will seek but cannot guarantee consummation of this disposition, which is subject to regulatory review.

On May 6, 2015, Prospect Realty Income Trust Corp. (“Prospect Realty”), our wholly-owned subsidiary, filed a confidential registration statement with the SEC in connection with our rights offering disposition of a portion of our real estate business, and Prospect Realty filed confidential amendments on June 30, July 27 and August 12, 2015. We are a selling stockholder under the registration statement. If favorable market conditions exist, we will seek but cannot guarantee consummation of this disposition, which is subject to regulatory review.

On May 19, 2015, Prospect, Prospect Capital Management, PYC, Prospect Finance and Prospect Realty filed an application for an exemptive order authorizing a joint transaction that may otherwise be prohibited by Section 57(a)(4) of the 1940 Act in order to complete each of the rights offerings described above and, on October 2, 2015, an amended and restated application for the exemptive order was filed in response to comments from the SEC. There is no guarantee that the SEC will grant the relief requested in the exemptive order application.

We expect to continue as a BDC in the future to pursue our multi-line origination strategy (including continuing to invest in the businesses discussed above) as a value-added differentiating factor compared with other BDCs.

Investment Holdings

As of March 31, 2016, we continue to pursue our investment strategy. At March 31, 2016, approximately \$6,005,105, or 175.5%, of our net assets are invested in 125 long-term portfolio investments and CLOs.

During the nine months ended March 31, 2016, we originated \$685,064 of new investments, primarily composed of \$360,863 of debt and equity financing to non-controlled portfolio investments, \$227,581 of debt and equity financing to controlled investments, and \$96,620 of subordinated notes in CLOs. Our origination efforts are focused primarily on secured lending to non-control investments to reduce the risk in the portfolio by investing primarily in first lien loans, though we also continue to close select junior debt and equity investments. Our annualized current yield was 12.7% and 13.4% as of June 30, 2015 and March 31, 2016, respectively, across all performing interest bearing investments. The increase in our current yield is primarily due to market fluctuations and the resulting decline in our portfolio value. Monetization of equity positions that we hold and loans on non-accrual status are not included in this yield calculation. In many of our portfolio companies we hold equity positions, ranging from minority interests to majority stakes, which we expect over time to contribute to our investment returns. Some of these equity positions include features such as contractual minimum internal rates of returns, preferred distributions, flip structures and other features expected to generate additional investment returns, as well as contractual protections and preferences over junior equity, in addition to the yield and security offered by our cash flow and collateral debt protections.

We are a non-diversified company within the meaning of the 1940 Act. As required by the 1940 Act, we classify our investments by level of control. As defined in the 1940 Act, “Control Investments” are those where there is the ability or power to exercise a controlling influence over the management or policies of a company. Control is generally deemed to exist when a company or individual possesses or has the right to acquire within 60 days or less, a beneficial ownership of 25% or more of the voting securities of an investee company. Under the 1940 Act, “Affiliate Investments” are defined by a lesser degree of influence and are deemed to exist through the possession outright or via the right to acquire within 60 days or less, beneficial ownership of 5% or more of the outstanding voting securities of another person. “Non-Control/Non-Affiliate Investments” are those that are neither Control Investments nor Affiliate Investments.

As of March 31, 2016, we own controlling interests in the following portfolio companies: APRC; Arctic Energy Services, LLC (“Arctic Energy”); CCPI Inc. (“CCPI”); CP Energy Services Inc. (“CP Energy”); Credit Central Loan Company, LLC; Echelon Aviation LLC (“Echelon”); Edmentum Ultimate Holdings, LLC (“Edmentum”); First Tower Finance Company LLC (“First Tower Finance”); Freedom Marine Solutions, LLC (“Freedom Marine”); Gulf Coast Machine & Supply Company (“Gulf Coast”); Harbortouch Payments, LLC (“Harbortouch”); MITY, Inc. Investment Valuation

In determining the range of values for debt instruments, except CLOs and debt investments in controlling portfolio companies, management and the independent valuation firm estimated corporate and security credit ratings and identified corresponding yields to maturity for each loan from relevant market data. A discounted cash flow analysis was then prepared using the appropriate yield to maturity as the discount rate, to determine a range of values. In determining the range of values for debt investments of controlled companies and equity investments, the enterprise value was determined by applying earnings before income tax, depreciation and amortization (“EBITDA”) multiples, the discounted cash flow technique, net income and/or book value multiples for similar guideline public companies and/or similar recent investment transactions. For stressed equity investments, a liquidation analysis was prepared. For the private REIT investments, enterprise values were determined based on an average of results from a net asset value analysis of the underlying property investments and a discounted cash flow method utilizing capitalization rates for similar guideline companies and/or similar recent investment transactions.

In determining the range of value for our investments in CLOs, management and the independent valuation firm used a discounted cash flow model. The valuations were accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view as well as to determine an appropriate call date. For each CLO security, the most appropriate valuation approach was chosen from alternative approaches to ensure the most accurate valuation for such security. A waterfall engine was used to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, distribute the cash flows to the liability structure based on the payment priorities, and discount them back using proper discount rates to expected maturity or call date.

The Board of Directors looked at several factors in determining where within the range to value the asset including: recent operating and financial trends for the asset, independent ratings obtained from third parties, comparable multiples for recent sales of companies within the industry and discounted cash flow models for our investments in CLOs. The composite of all these analyses, applied to each investment, was a total valuation of \$6,005,105. Our portfolio companies are generally lower middle market companies, outside of the financial sector, with less than \$150,000 of annual EBITDA. We believe our market has experienced less volatility than others because we believe there are more buy and hold investors who own these less liquid investments.

Control investments offer increased risk and reward over straight debt investments. Operating results and changes in market multiples can result in dramatic changes in values from quarter to quarter. Significant downturns in operations can further result in our looking to recoveries on sales of assets rather than the enterprise value of the investment. Transactions between our controlled investments and us have been detailed in Note 14 to the accompanying consolidated financial statements. Several control investments in our portfolio are under enhanced scrutiny by our senior management and our Board of Directors and are discussed below.

Due to improved operating performance at the property level, the Board of Directors increased the fair value of our investment in UPRC to \$105,632 as of March 31, 2016, a premium of \$22,473 from its amortized cost, compared to the \$9,057 unrealized appreciation recorded at June 30, 2015.

Valley Electric Company, Inc.

We own 94.99% of Valley Electric as of March 31, 2016. Valley Electric owns 100% of the equity of VE Company, Inc., which owns 100% of the equity of Valley Electric Co. of Mt. Vernon, Inc. ("Valley"). Valley is a leading provider of specialty electrical services in the state of Washington and is among the top 50 electrical contractors in the U.S. The company, with its headquarters in Everett, Washington, offers a comprehensive array of contracting services, primarily for commercial, industrial, and transportation infrastructure applications, including new installation, engineering and design, design-build, traffic lighting and signalization, low to medium voltage power distribution, construction management, energy management and control systems, 24-hour electrical maintenance and testing, as well as special projects and tenant improvement services. Valley was founded in 1982 by the Ward family, who held the company until the end of 2012.

On December 31, 2012, we acquired 96.3% of the outstanding shares of Valley. We funded the recapitalization of Valley with \$42,572 of debt and \$9,526 of equity financing. Through the recapitalization, we acquired a controlling interest in Valley for \$7,449 in cash and 4,141,547 unregistered shares of our common stock. On June 24, 2014, Prospect and management of Valley formed Valley Electric and contributed their shares of Valley stock to Valley Electric. Valley management made an additional equity investment in Valley Electric, reducing our ownership to 94.99%.

Due to a decrease in operational performance, the Board of Directors slightly decreased the fair value of our investment in Valley Electric to \$31,359 as of March 31, 2016, a discount of \$28,876 from its amortized cost, compared to the \$28,340 unrealized depreciation recorded at June 30, 2015.

Equity positions in our portfolio are susceptible to potentially significant changes in value, both increases as well as decreases, due to changes in operating results and market multiples. Several of our controlled companies experienced such volatility and we recorded corresponding fluctuations in valuations during the nine months ended March 31, 2016. See above for discussions regarding the fluctuations in APRC, First Tower Finance, Harbortouch, NPRC, UPRC and Valley Electric. During the nine months ended March 31, 2016, the value of our investment in Arctic Energy decreased by \$22,747 as a result of declining operations. During the nine months ended March 31, 2016, the value of our investment in CP Energy decreased by \$12,766 as a result of depressed earnings resulting from softness of the energy markets; Echelon decreased by \$9,023 due to aircraft sale proceeds and resulting dividend distribution; and R-V decreased by \$4,587 due to lower sales profitability. In total, eleven of the controlled investments are valued

at the original investment amounts or higher, and eight of the controlled investments have been valued at discounts to the original investment. Overall, at March 31, 2016, control investments are valued at \$38,780 above their amortized cost.

We hold two affiliate investment at March 31, 2016. Our affiliate portfolio companies did not experience a significant change in valuation during the nine months ended March 31, 2016.

With the non-control/non-affiliate investments, generally, there is less volatility related to our total investments because our equity positions tend to be smaller than with our control/affiliate investments, and debt investments are generally not as susceptible to large swings in value as equity investments. For debt investments, the fair value is generally limited on the high side to each loan's par value, plus any prepayment premium that could be imposed. Many of the debt investments in this category have not experienced a significant change in value, as they were previously valued at or near par value. Non-control/non-affiliate investments did not experience significant changes and are generally performing as expected or better. During the nine months ended March 31, 2016, the value of our CLO residual interest investments decreased by \$149,739 primarily due to non-credit related changes in the capital markets impacting the underlying collateral and increasing our discount rate by 305 bps. Overall, at March 31, 2016, non-control/non-affiliate investments are valued \$243,162 below their amortized cost.

Capitalization

Our investment activities are capital intensive and the availability and cost of capital is a critical component of our business. We capitalize our business with a combination of debt and equity. Our debt as of March 31, 2016 consists of: a Revolving Credit Facility availing us of the ability to borrow debt subject to borrowing base determinations; Convertible Notes which we issued in February 2011, April 2012, August 2012, December 2012 and April 2014; Public Notes which we issued in March 2013, April 2014 and December 2015; and Prospect Capital InterNotes® which we issue from time to time. Our equity capital is comprised entirely of common equity.

Historically, we have funded a portion of our cash needs through borrowings from banks, issuances of senior securities, including secured, unsecured and convertible debt securities, or issuances of common equity. For flexibility, we maintain a universal shelf registration statement that allows for the public offering and sale of our debt securities, common stock, preferred stock, subscription rights, and warrants and units to purchase such securities in an amount up to \$5,000,000 less issuances to date. As of March 31, 2016, we can issue up to \$4,822,456 of additional debt and equity securities in the public market under this shelf registration. We may from time to time issue securities pursuant to the shelf registration statement or otherwise pursuant to private offerings. The issuance of debt or equity securities will depend on future market conditions, funding needs and other factors and there can be no assurance that any such issuance will occur or be successful.

Each of our Unsecured Notes (as defined below) are our general, unsecured obligations and rank equal in right of payment with all of our existing and future unsecured indebtedness and will be senior in right of payment to any of our subordinated indebtedness that may be issued in the future. The Unsecured Notes are effectively subordinated to our existing secured indebtedness, such as our credit facility, and future secured indebtedness to the extent of the value of the assets securing such indebtedness and structurally subordinated to any existing and future liabilities and other indebtedness of any of our subsidiaries.

Revolving Credit Facility

On March 27, 2012, we closed on an extended and expanded credit facility with a syndicate of lenders through PCF (the “2012 Facility”). The lenders had extended commitments of \$857,500 under the 2012 Facility as of June 30, 2014, which was increased to \$877,500 in July 2014. The 2012 Facility included an accordion feature which allowed commitments to be increased up to \$1,000,000 in the aggregate. Interest on borrowings under the 2012 Facility was one-month LIBOR plus 275 basis points with no minimum LIBOR floor. Additionally, the lenders charged a fee on the unused portion of the 2012 Facility equal to either 50 basis points if at least half of the credit facility is drawn or 100 basis points otherwise.

On August 29, 2014, we renegotiated the 2012 Facility and closed an expanded five and a half year revolving credit facility (the “2014 Facility” and collectively with the 2012 Facility, the “Revolving Credit Facility”). The lenders have extended commitments of \$885,000 under the 2014 Facility as of March 31, 2016. The 2014 Facility includes an accordion feature which allows commitments to be increased up to \$1,500,000 in the aggregate. The revolving period of the 2014 Facility extends through March 2019, with an additional one year amortization period (with distributions allowed) after the completion of the revolving period. During such one year amortization period, all principal payments on the pledged assets will be applied to reduce the balance. At the end of the one year amortization period, the remaining balance will become due, if required by the lenders.

The 2014 Facility contains restrictions pertaining to the geographic and industry concentrations of funded loans, maximum size of funded loans, interest rate payment frequency of funded loans, maturity dates of funded loans and minimum equity requirements. The 2014 Facility also contains certain requirements relating to portfolio performance, including required minimum portfolio yield and limitations on delinquencies and charge-offs, violation of which could result in the early termination of the 2014 Facility. The 2014 Facility also requires the maintenance of a minimum liquidity requirement. As of March 31, 2016, we were in compliance with the applicable covenants.

Interest on borrowings under the 2014 Facility is one-month LIBOR plus 225 basis points with no minimum LIBOR floor. Additionally, the lenders charge a fee on the unused portion of the 2014 Facility equal to either 50 basis points if at least 35% of the credit facility is drawn or 100 basis points otherwise. The 2014 Facility requires us to pledge assets as collateral in order to borrow under the credit facility.

As of March 31, 2016 and June 30, 2015, we had \$645,696 and \$721,800, respectively, available to us for borrowing under the Revolving Credit Facility, of which the amount outstanding was \$0 and \$368,700, respectively. As additional eligible investments are transferred to PCF and pledged under the Revolving Credit Facility, PCF will generate additional availability up to the current commitment amount of \$885,000. As of March 31, 2016, the investments, including cash and money market funds, used as collateral for the Revolving Credit Facility had an aggregate fair value of \$1,470,217, which represents 23.8% of our total investments, including cash and money market funds. These assets are held and owned by PCF, a bankruptcy remote special purpose entity, and as such, these investments are not available to our general creditors. The release of any assets from PCF requires the approval of the facility agent.

In connection with the origination and amendments of the Revolving Credit Facility, we incurred \$12,405 of new fees and \$3,539 of fees carried over for continuing participants from the previous facility, which are being amortized over the term of the facility in accordance with ASC 470-50, of which \$8,210 remains to be amortized and is included within deferred financing costs on the Consolidated Statement of Assets and Liabilities as of March 31, 2016. During the six months ended December 31, 2014, in accordance with ASC 470-50, we expensed \$332 of fees relating to credit providers in the 2012 Facility who did not commit to the 2014 Facility.

During the three months ended March 31, 2016 and March 31, 2015, we recorded \$3,046 and \$3,545, respectively, of interest costs, unused fees and amortization of financing costs on the Revolving Credit Facility as interest expense. During the nine months ended March 31, 2016 and March 31, 2015, we recorded \$10,291 and \$10,803, respectively, of interest costs, unused fees and amortization of financing costs on the Revolving Credit Facility as interest expense.

Any such payment will be made on the settlement date applicable to the relevant conversion on the Convertible Notes.

No holder of Convertible Notes will be entitled to receive shares of our common stock upon conversion to the extent (but only to the extent) that such receipt would cause such converting holder to become, directly or indirectly, a beneficial owner (within the meaning of Section 13(d) of the Securities Exchange Act of 1934 and the rules and regulations promulgated thereunder) of more than 5.0% of the shares of our common stock outstanding at such time. The 5.0% limitation shall no longer apply following the effective date of any fundamental change. We will not issue any shares in connection with the conversion or redemption of the Convertible Notes which would equal or exceed 20% of the shares outstanding at the time of the transaction in accordance with NASDAQ rules.

Subject to certain exceptions, holders may require us to repurchase, for cash, all or part of their Convertible Notes upon a fundamental change at a price equal to 100% of the principal amount of the Convertible Notes being repurchased plus any accrued and unpaid interest up to, but excluding, the fundamental change repurchase date. In addition, upon a fundamental change that constitutes a non-stock change of control we will also pay holders an amount in cash equal to the present value of all remaining interest payments (without duplication of the foregoing amounts) on such Convertible Notes through and including the maturity date.

In connection with the issuance of the Convertible Notes, we incurred \$34,629 of fees which are being amortized over the terms of the notes, of which \$16,137 remains to be amortized and is included within deferred financing costs on the Consolidated Statement of Assets and Liabilities as of March 31, 2016. Net Asset Value

During the nine months ended March 31, 2016, our net asset value decreased by \$280,633, or \$0.70 per share, resulting from a \$271,470, or \$0.76 per weighted average share, decrease in net realized and unrealized gains and losses on investments (see “Results of Operations” for further discussion). This decrease in our net asset value was partially offset by net investment income of \$279,761, or \$0.79 per weighted average share and a \$0.02 per share increase attributable to share repurchases, earned in excess of dividends to shareholders of \$266,920 or \$0.75 per share.

During the nine months ended March 31, 2016, we repurchased 4,708,750 shares of our common stock pursuant to our Repurchase Program for \$34,140, or approximately \$7.25 weighted average price per share at approximately a 30% discount to net asset value as of June 30, 2015. Our NAV per share was increased by approximately \$0.02 for the nine months ended March 31, 2016 as a result of the share repurchases. During the nine months ended March 31, 2016, we issued 1,731,768 shares of our common stock in connection with the dividend reinvestment plan. The following table shows the calculation of net asset value per share as of March 31, 2016 and June 30, 2015.

Results of Operations		

Net change in net assets resulting from operations for the three months ended March 31, 2016 and March 31, 2015 was \$75,508 and \$81,492. During the three months ended March 31, 2016 the \$5,984 decrease is primarily due to a \$7,024 increase in net

realized and unrealized losses on investments when comparing results for the quarters ended March 31, 2016 and March 31, 2015. This \$7,024 increase is comprised of net realized and unrealized losses of \$26,202 and \$2,290 on our CLO residual interests and equity investments, respectively, and net realized and unrealized gains of \$21,468 on our debt investments. This increase in net realized and unrealized losses are primarily due to non-credit related macro changes in the capital markets impacting our valuations in late calendar year 2015. (See Investment Income, Net Realized Losses, and Net Change in Unrealized Appreciation (Depreciation) sections below for further discussion.) Net change in net assets resulting from operations for the nine months ended March 31, 2016 and March 31, 2015 was \$8,205 and \$251,570. During the nine months ended March 31, 2016, the \$243,365 decrease is primarily due to a \$251,025 increase in net realized and unrealized losses on investments, partially offset by net investment income, when comparing results for the nine months ended March 31, 2016 and March 31, 2015. This \$251,025 increase is primarily comprised of net realized and unrealized losses of \$126,772 and \$137,514 on our CLO residual interests and equity investments, respectively, and net realized and unrealized gains of \$13,261 on our debt investments. This increase in net realized and unrealized losses is primarily due to non-credit related macro changes in the capital markets impacting our valuations in late calendar year 2015. (See Investment Income, Net Realized Losses, and Net Change in Unrealized Appreciation (Depreciation) sections below for further discussion.) While we seek to maximize gains and minimize losses, our investments in portfolio companies can expose our capital to risks greater than those we may anticipate. These companies typically do not issue securities rated investment grade, and have limited resources, limited operating history, and concentrated product lines or customers. These are generally private companies with limited operating information available and are likely to depend on a small core of management talents. Changes in any of these factors can have a significant impact on the value of the portfolio company.

Investment Income

We generate revenue in the form of interest income on the debt securities that we own, dividend income on any common or preferred stock that we own, and fees generated from the structuring of new deals. Our investments, if in the form of debt securities, will typically have a term of one to ten years and bear interest at a fixed or floating rate. To the extent achievable, we will seek to collateralize our investments by obtaining security interests in our portfolio companies' assets. We also may acquire minority or majority equity interests in our portfolio companies, which may pay cash or in-kind dividends on a recurring or otherwise negotiated basis. In addition, we may generate revenue in other forms including prepayment penalties and possibly consulting fees. Any such fees generated in connection with our investments are recognized as earned.

Investment income, which consists of interest income, including accretion of loan origination fees and prepayment penalty fees, dividend income and other income, including settlement of net profits interests, overriding royalty interests and structuring fees, was \$189,493 and \$191,350 for the three months ended March 31, 2016 and March 31, 2015, respectively. Investment income was \$598,935 and \$592,254 for the nine months ended March 31, 2016 and March 31, 2015, respectively. The \$6,681 increase is primarily the result of a \$19,455 increase in dividend income primarily from our investments in APRC and Echelon. This increase was partially offset by a \$11,625 decrease in other income primarily from a reduction in structuring fees due to lower levels of originations.

The following table describes the various components of investment income and the related levels of debt investments:

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2016	2015	2016	2015

Average interest income producing assets decreased from \$6,248,211 for the three months ended March 31, 2015 to \$5,913,900 for the three months ended March 31, 2016. The average interest earned on interest bearing performing assets increased from 11.84% for the three months ended March 31, 2015 to 12.11% for the three months ended March 31, 2016. The increase in returns is primarily due to an increase in interest income from our CLO investments. Average interest income producing assets increased from \$6,161,906 for the nine months ended March 31, 2015 to \$6,122,039 for the nine months ended March 31, 2016. The average interest earned on interest bearing performing assets increased from 11.90% for the nine months ended March 31, 2015 to 11.95% for the nine months ended March 31, 2016. The increase in returns is primarily due to an increase in interest income from our CLO investments. Investment income is also generated from dividends and other income which is less predictable than interest income. Dividend income increased from \$1,371 for the three months ended March 31, 2015 to \$8,301 for the three months ended March 31, 2016. The increase in dividend income is primarily attributable to a \$7,250 dividend received from our investment in Echelon. No such dividends were received from Echelon during the three months ended March 31, 2015. We received dividends of \$961 and \$1,139 related to our investment in Nationwide during the three months ended March 31, 2016 and March 31, 2015, respectively. We also received dividends of \$75 related to our investment in R-V for both the three months ended March 31, 2016 and March 31, 2015.

Dividend income increased from \$5,607 for the nine months ended March 31, 2015 to \$25,062 for the nine months ended March 31, 2016. The \$19,455 increase in dividend income is primarily attributable to a \$11,016 dividend received from our investment in APRC and \$7,250 dividend received from our investment in Echelon. No such dividends were received from either APRC or Echelon during the nine months ended March 31, 2015.

Additionally, we received dividends of \$3,195, \$2,649 and \$710 related to our investments in CCPI, Nationwide and MITY, respectively, during the nine months ended March 31, 2016. No such dividends were received from CCPI or MITY during the nine months ended March 31, 2015. The increase in dividend income was partially offset by dividends of \$2,444 and \$1,929 received from our investments in Nationwide and First Tower, respectively, during the nine months ended March 31, 2015. No such dividends were received from First Tower during the nine months ended March 31, 2016.

Other income has come primarily from structuring fees, royalty interests, and settlement of net profits interests. Income from other sources decreased from \$4,986 for the three months ended March 31, 2015 to \$2,200 for the three months ended March 31, 2016. The decrease is primarily due to a \$3,167 decrease in structuring fees, which are generated from originations and will fluctuate as levels and types of loan originations fluctuate. In November 2014, we elected to suspend our equity raising activities, which has since reduced our origination activity. Total originations decreased from \$219,111 in the three months ended March 31, 2015 to \$23,176 in the three months ended March 31, 2016. As a result, structuring fees fell from \$3,367 in the three months ended March 31, 2015 to \$182 in the three months ended March 31, 2016. The structuring fees recognized during the three months ended March 31, 2015 resulted from follow-on investments in existing portfolio companies, primarily from our investments in NPRC, Atlantis Health Care Group (Puerto Rico), Inc., and USG Intermediate, LLC.

Income from other sources decreased from \$28,700 for the nine months ended March 31, 2015 to \$17,075 for the nine months ended March 31, 2016. The decrease is primarily due to a \$14,021 decrease in structuring fees, which are generated from originations and will fluctuate as levels of originations and types of originations fluctuate. In November 2014, we elected to suspend our equity raising activities, which has since reduced our origination activity. Total originations decreased from \$1,456,071 in the nine months ended March 31, 2015 to \$685,064 in the nine months ended March 31, 2016. As a result, structuring fees fell from \$24,162 in the nine months ended March 31, 2015 to \$10,623 in the nine months ended March 31, 2016. Included within the \$24,162 of structuring fees recognized during the nine months ended March 31, 2015 is a \$3,000 fee from Airmall Inc. ("Airmall") related to the sale of the operating company for which a fee was received in August 2014 and a \$2,000 fee from Ajax Rolled Ring & Machine, LLC ("Ajax") related to the sale of the operating company for which a fee was received in October 2014. The remaining \$19,162 of structuring fees recognized during the nine months ended March 31, 2015 resulted from follow-on investments in existing portfolio companies and new originations, primarily from our investments in InterDent, Instant Web, LLC ("IWCO"), Pacific World Corporation, PrimeSport, Inc., Trinity Services Group, Inc., and UPRC, as discussed above. The structuring fees recognized during the nine months ended March 31, 2016 resulted from follow-on investments in existing portfolio companies, primarily from our investments in Crosman, Intelius, Broder,

Coverall, NPRC and System One.

Operating Expenses

Our primary operating expenses consist of investment advisory fees (base management and income incentive fees), borrowing costs, legal and professional fees and other operating and overhead-related expenses. These expenses include our allocable portion of overhead under the Administration Agreement with Prospect Administration under which Prospect Administration provides administrative services and facilities for us. Our investment advisory fees compensate the Investment Adviser for its work in identifying, evaluating, negotiating, closing and monitoring our investments. We bear all other costs and expenses of our operations and transactions. Operating expenses were \$101,867 and \$103,909 for the three months ended March 31, 2016 and March 31, 2015. Operating expenses were \$319,174 and \$319,025 for the nine months ended March 31, 2016 and March 31, 2015, respectively.

The net base management fee was \$30,977 and \$33,679 for the three months ended March 31, 2016 and March 31, 2015, respectively, holding constant at \$0.09 per weighted average share. The total gross base management fee incurred to the favor of the Investment Adviser was \$31,442 and \$33,679 during the three months ended March 31, 2016 and March 31, 2015, respectively. The \$2,237 decrease in total gross base management fee is directly related to a decrease in average total assets. The Investment Adviser has entered into a servicing agreement with certain institutions, where we serve as the agent and collect a servicing fee on behalf of the Investment Adviser. During the three months ended March 31, 2016, we received payments of \$465 from these institutions, on behalf of the Investment Adviser, for providing such services under the servicing agreement for the three months ended March 31, 2016. We were given a credit for these payments as a reduction of base management fee payable by us to the Investment Adviser during the three months ended March 31, 2016 resulting in net total base management fees of \$30,977. No such credits were received during the three months ended March 31, 2015.

The net base management fee was \$95,712 and \$100,878 for the nine months ended March 31, 2016 and March 31, 2015, respectively (\$0.27 and \$0.29 per weighted average share, respectively). The total gross base management fee incurred to the favor of the Investment Adviser was \$97,109 and \$100,878 during the nine months ended March 31, 2016 and March 31, 2015, respectively. The \$3,769 decrease in total gross base management fee is directly related to a decrease in average total assets. The Investment Adviser has entered into a servicing agreement with certain institutions, where we serve as the agent and collect a servicing fee on behalf of the Investment Adviser. During the nine months ended March 31, 2016, we received payments of \$1,397 from these institutions, on behalf of the Investment Adviser, for providing such services under the servicing agreement for the nine months ended March 31, 2016. We were given a credit for these payments as a reduction of base management fee payable by us to the Investment Adviser during the nine months ended March 31, 2016 resulting in net total base management fee of \$95,712. No such credits were received during the nine months ended March 31, 2015.

For the three months ended March 31, 2016 and March 31, 2015, we incurred \$21,906 and \$21,860 of income incentive fees, respectively, holding constant at \$0.06 per weighted average share. This slight increase was driven by a corresponding increase in pre-incentive fee net investment income from \$109,301 for the three months ended March 31, 2015 to \$109,532 for the three months ended March 31, 2016, primarily due to an increase in dividend income. No capital gains incentive fee has yet been incurred pursuant to the Investment Advisory Agreement.

For the nine months ended March 31, 2016 and March 31, 2015, we incurred \$69,940 and \$68,307 of income incentive fees, respectively (\$0.20 and \$0.19 per weighted average share, respectively). This increase was driven by a corresponding increase in pre-incentive fee net investment income from \$341,536 for the nine months ended March 31, 2015 to \$349,701 for the nine months ended March 31, 2016, primarily due to an increase in dividend income. No capital gains incentive fee has yet been incurred pursuant to the Investment Advisory Agreement.

During the three months ended March 31, 2016 and March 31, 2015, we incurred \$41,719 and \$42,213, respectively, of interest expenses related to our Revolving Credit Facility, Convertible Notes, Public Notes and Prospect Capital InterNotes® (collectively, our “Notes”). During the nine months ended March 31, 2016 and March 31, 2015, we incurred \$125,881 and \$127,371, respectively, of expenses related to our Notes. These expenses are related directly to the leveraging capacity put into place for each of those periods and the levels of indebtedness actually undertaken in those periods.

The table below describes the various expenses of our Notes and the related indicators of leveraging capacity and indebtedness during these periods.

	Three Months Ended March 31,		Nine Months Ended March 31,	
	2016	2015	2016	2015
Interest on borrowings	\$36,268	\$37,605	\$110,515	\$112,319

Weighted average interest rate on borrowings(2)	6.12	% 5.86	% 5.91	% 6.02
Revolving Credit Facility amount at beginning of period	\$885,000	\$810,000	\$885,000	\$857,500

(1) Includes only the stated interest expense.

(2) Includes the stated interest expense, amortization of deferred financing costs, accretion of discount on Public Notes and commitment fees on the undrawn portion of our Revolving Credit Facility.

Interest expense during the nine months ended March 31, 2016 and March 31, 2015 is relatively stable as a result of increased issuances through our InterNotes programs and increased utilization of our Revolving Credit Facility, offset by both Public and Convertible Note maturities. The weighted average stated interest rate on borrowings (excluding amortization, accretion and undrawn facility fees) decreased from 5.31% for the nine months ended March 31, 2015 to 5.18% for the nine months ended March 31, 2016. This decrease is primarily due to issuances of shorter term debt at lower rates.

The allocation of gross overhead expense from Prospect Administration was \$5,698 and \$6,021 for the three months ended March 31, 2016 and March 31, 2015, respectively. Prospect Administration received estimated payments of \$2,762 and \$3,037 directly from our portfolio companies and certain funds managed by the Investment Adviser for legal, tax and portfolio level accounting services during the three months ended March 31, 2016 and March 31, 2015, respectively. We were given a credit for these payments as a reduction of the administrative services cost payable by us to Prospect Administration, resulting in net overhead expense of \$2,936 and \$2,984 during the three months ended March 31, 2016 and March 31, 2015, respectively. Had Prospect Administration not received these payments, Prospect Administration's charges for its administrative services would have increased by these amounts. As our portfolio continues to grow, we expect Prospect Administration to continue to increase the size of its administrative and financial staff.

The allocation of gross overhead expense from Prospect Administration was \$14,725 and \$13,998 for the nine months ended March 31, 2016 and March 31, 2015, respectively. During the nine months ended March 31, 2016, we renegotiated the managerial assistance agreement with First Tower LLC and reversed \$1,200 of previously accrued managerial assistance at First Tower Delaware as the fee was paid by First Tower LLC, which decreased our overhead allocation. We also incurred \$379 of overhead expense related to our consolidated entity SB Forging. Prospect Administration received estimated payments of \$5,611 and \$5,584 directly from our portfolio companies and certain funds managed by the Investment Adviser for legal, tax and portfolio level accounting services during the nine months ended March 31, 2016 and March 31, 2015, respectively. We were given a credit for these payments as a reduction of the administrative services cost payable by us to Prospect Administration, resulting in net overhead expense of \$9,114 and \$8,414 during the nine months ended March 31, 2016 and March 31, 2015, respectively. Had Prospect Administration not received these payments, Prospect Administration's charges for its administrative services would have increased by these amounts. As our portfolio continues to grow, we expect Prospect Administration to continue to increase the size of its administrative and financial staff.

Total operating expenses, net of investment advisory fees, interest and credit facility expenses, allocation of overhead from Prospect Administration ("Other Operating Expenses") were \$4,329 and \$3,173 for the three months ended March 31, 2016 and March 31, 2015, respectively. The increase of \$1,156 during the three months ended March 31, 2016 is

primarily due to an overall increase in audit, compliance and tax related fees due to the growing size and complexity of our business. Other Operating Expenses were \$18,527 and \$14,055 for the nine months ended March 31, 2016 and March 31, 2015, respectively. The increase of \$4,472 during the nine months ended March 31, 2016 is primarily due to an increase in audit, compliance and tax related fees due to the growing size and complexity of our business.

Net Investment Income

Net investment income represents the difference between investment income and operating expenses. Net investment income was \$87,626 and \$87,441 for the three months ended March 31, 2016 and March 31, 2015, respectively. Net investment income remained constant as increases in dividends and CLO interest income was offset by a decrease in other income as a result of lower levels of originations and structuring fees.

Net investment income was \$279,761 and \$273,229 for the nine months ended March 31, 2016 and March 31, 2015, respectively. The \$6,532 increase during the nine months ended March 31, 2016 is primarily the result of a \$19,455 increase in dividend income related to APRC's sale of the Vista property and a \$3,533 decrease in advisory fees. These positive results were offset by a \$1,149 decrease in interest income, primarily due to an increase in foregone interest on non-accrual loans, and a \$11,625 decrease in other income, primarily due to a decrease in structuring fees from originations.

Net Realized Gains/Losses

During the three months ended March 31, 2016 we recognized net realized loss on investments of \$10,784 and a net realized gain of \$4,704 for the three months ended March 31, 2015. The net realized loss during the three months ended March 31, 2016 was primarily due to the \$17,194 write-down of our investment in Targus and write-off of our remaining investment in Wind River. The net realized gain during the three months ended March 31, 2015 was primarily due to an escrow release related to our investment in NRG Manufacturing, Inc. for which we realized a gain \$4,647. This gain was supplemented by other realized gains totaling \$357, primarily from partial sales and the release of escrowed amounts due to us from other portfolio companies. These gains were partially offset by realized losses resulting from the write-downs of certain investments for which we recognized total realized losses of \$300.

During the nine months ended March 31, 2016 and March 31, 2015, we recognized net realized losses on investments of \$18,237 and \$150,973, respectively. The net realized loss during the nine months ended March 31, 2016 was primarily due to the write-down of our investment in Targus and write-off of our remaining investment in Wind River discussed above, along with \$5,062 of write-offs of our small business whole loan portfolio. The net realized loss during the nine months ended March 31, 2015 was primarily due to the sale of our investments in Airmall, Ajax, Borga, Inc. ("Borga") and BXC Company, Inc. ("BXC") for which we recognized total realized losses of \$46,571, and the sale of four of our CLO investments for which we realized total losses of \$15,561. During the nine months ended March 31, 2015, we decreased our cost basis in several of our investments (e.g., Appalachian Energy LLC, Change Clean Energy Company, Coalbed, LLC, Manx Energy, Inc., NCT, Stryker Energy, LLC, Wind River, and Yatesville Coal Company, LLC) were written-off and recorded total realized losses of \$96,700 (which were previously recognized as unrealized losses) for the amount that the amortized cost exceeded the fair value. These losses were partially offset by net realized gains from the proceeds collected on warrants redeemed from Snacks Parent Corporation, litigation settlements, partial sales, and the release of escrowed amounts due to us from several portfolio companies, for which we recognized total realized gains of \$7,859.

Net Change in Unrealized (Depreciation) Appreciation

Net change in unrealized depreciation was \$1,311 and \$9,775 for the three months ended March 31, 2016 and March 31, 2015, respectively. For the three months ended March 31, 2016, the \$1,311 net decrease in unrealized depreciation was driven primarily by increases in market yields and the competitive environment faced by our energy-related companies. Unrealized losses on our CLO debt and equity investments comprised \$33,556 of total net change in unrealized depreciation, and unrealized losses on our energy-related investments comprised \$40,022 of total net change in unrealized depreciation for the three months ended March 31, 2016. These unrealized losses were offset by \$69,985 unrealized appreciation in our REITs portfolio due to improved operating performance at the property-level. The remaining \$2,282 net decrease in unrealized depreciation is primarily the result of current market conditions and the results of operations of individual portfolio companies across various industries. For the three months ended March 31, 2015, the \$9,775 net change in unrealized depreciation was primarily the result of significant write-downs in our investments in CP Energy, Edmentum, Gulf Coast, and R-V. These instances of unrealized depreciation were partially offset by unrealized appreciation related to APRC, Echelon, First Tower, and UPRC.

Net change in unrealized (depreciation) appreciation was \$(253,233) and \$130,528 for the nine months ended March 31, 2016 and March 31, 2015, respectively. For the nine months ended March 31, 2016, the \$253,233 net decrease in unrealized depreciation was driven primarily by increases in market yields and the competitive environment faced by our energy-related companies. Unrealized losses on our CLO debt and equity investments comprised \$153,524 of total net change in unrealized depreciation and unrealized losses on our energy-related investments comprised \$77,618 of total net change in unrealized depreciation for the nine months ended March 31, 2016. During the nine months ended March 31, 2016, the valuation of our portfolio was also negatively impacted by increased regulatory scrutiny within the consumer finance industry and we recognized \$26,762 in unrealized losses, primarily related to our investment in First Tower. Additionally, during the nine months ended March 31, 2016, we reduced the value of our investment in Harbortouch by \$37,228 due to current market developments and our investment in Pacific World by \$12,109 due to declining operating results. These unrealized losses were offset by \$56,807 unrealized appreciation in our REITs portfolio due to improved operating performance at the property-level. The remaining unrealized depreciation was partially offset by unrealized appreciation due to operating improvements across multiple investments and industries. For the nine months ended March 31, 2015, the \$130,528 increase in net change in unrealized (depreciation) appreciation was primarily the result of realizing losses that were previously unrealized related to the sale of our investments in Airmall, Ajax, Borga and BXC, and the write-off of certain investments for which we eliminated the unrealized depreciation balances related to these investments. We also experienced significant write-ups in our investments in First Tower, Harbortouch, and NPRC. These instances of unrealized appreciation were partially offset by unrealized depreciation related to CP Energy, Edmentum, Gulf Coast, R-V, and United States Environmental Services, LLC.

Financial Condition, Liquidity and Capital Resources

For the nine months ended March 31, 2016 and March 31, 2015, our operating activities provided \$643,137 and used \$88,389 of cash, respectively. There were no investing activities for the nine months ended March 31, 2016 and March 31, 2015. Financing activities used \$583,951 and provided \$17,788 of cash during the nine months ended March 31, 2016 and March 31, 2015, respectively, which included dividend payments of \$255,063 and \$328,620, respectively.

Our primary uses of funds have been to continue to invest in portfolio companies, through both debt and equity investments, repay outstanding borrowings and to make cash distributions to holders of our common stock.

Our primary sources of funds have historically been issuances of debt and equity. More recently, we have and may continue to fund a portion of our cash needs through repayments and opportunistic sales of our existing investment portfolio. We may also securitize a portion of our investments in unsecured or senior secured loans or other assets.

Our objective is to put in place such borrowings in order to enable us to expand our portfolio. During the nine months ended March 31, 2016, we borrowed \$615,000 and made repayments totaling \$983,700 under our Revolving Credit Facility. As of March 31, 2016, we had no outstanding balance on our Revolving Credit Facility, \$1,089,000 outstanding on the Convertible Notes, Public Notes with a carrying value of \$708,242 and \$898,535 outstanding on the Prospect Capital InterNotes®. (See “Capitalization” above.)

Undrawn committed revolvers and delayed draw term loans to our portfolio companies incur commitment and unused fees ranging from 0.00% to 6.00%. As of March 31, 2016 and June 30, 2015, we had \$60,242 and \$88,288, respectively, of undrawn revolver and delayed draw term loan commitments to our portfolio companies. The fair value of our undrawn committed revolvers and delayed draw term loans was \$(202) as of March 31, 2016 and zero as of June 30, 2015.

Our shareholders' equity accounts as of March 31, 2016 and June 30, 2015 reflect cumulative shares issued as of those respective dates. Our common stock has been issued through public offerings, a registered direct offering, the exercise of over-allotment options on the part of the underwriters, our dividend reinvestment plan and in connection with the acquisition of certain controlled portfolio companies. When our common stock is issued, the related offering expenses have been charged against paid-in capital in excess of par. All underwriting fees and offering expenses were borne by us.

As part of our Repurchase Program, we delivered a notice with our annual proxy mailing on September 23, 2015 and our most recent notice was delivered with a shareholder letter mailing on February 2, 2016. This notice extends for six months after the date that notice is delivered. During the nine months ended March 31, 2016, we repurchased

4,708,750 shares of our common stock pursuant to our Repurchase Program for \$34,140, or approximately \$7.25 weighted average price per share at approximately a 30% discount to net asset value as of June 30, 2015. Our NAV per share was increased by approximately \$0.02 for the nine months ended March 31, 2016 as a result of the share repurchases.

On November 3, 2015, our Registration Statement on Form N-2 was declared effective by the SEC. Under this Shelf Registration Statement, we can issue up to \$4,822,456 of additional debt and equity securities in the public market as of March 31, 2016.

Off-Balance Sheet Arrangements

As of March 31, 2016, we did not have any off-balance sheet liabilities or other contractual obligations that are reasonably likely to have a current or future material effect on our financial condition, other than those which originate from 1) the investment advisory and management agreement and the administration agreement and 2) the portfolio companies.

Critical Accounting Policies and Estimates

Basis of Presentation and Consolidation

The accompanying consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (“GAAP”) pursuant to the requirements for reporting on Form 10-Q, ASC 946, Financial Services—Investment Companies (“ASC 946”), and Articles 6, 10 and 12 of Regulation S-X. Under the 1940 Act, ASC 946, and the regulations pursuant to Article 6 of Regulation S-X, we are precluded from consolidating any entity other than another investment company or an operating company which provides substantially all of its services to benefit us. Our consolidated financial statements include the accounts of Prospect, PCF, PSBL, PYC, and the Consolidated Holding Companies. All intercompany balances and transactions have been eliminated in consolidation. The financial results of our non-substantially wholly-owned holding companies and operating portfolio company investments are not consolidated in the financial statements. Any operating companies owned by the Consolidated Holding Companies are not consolidated.

Reclassifications

Certain reclassifications have been made in the presentation of prior consolidated financial statements and accompanying notes to conform to the presentation as of and for the three and nine months ended March 31, 2016.

Use of Estimates

The preparation of the consolidated financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of income, expenses, and gains and losses during the reported period. Changes in the economic environment, financial markets, creditworthiness of our portfolio companies and any other parameters used in determining these estimates could cause actual results to differ, and these differences could be material.

Cash and Cash Equivalents

Cash and cash equivalents include funds deposited with financial institutions and short-term, highly-liquid overnight investments in money market funds. Cash and cash equivalents are carried at cost which approximates fair value.

Investment Classification

We are a non-diversified company within the meaning of the 1940 Act. As required by the 1940 Act, we classify our investments by level of control. As defined in the 1940 Act, "Control Investments" are those where there is the ability or power to exercise a controlling influence over the management or policies of a company. Control is generally deemed to exist when a company or individual possesses or has the right to acquire within 60 days or less, a beneficial ownership of more than 25% of the voting securities of an investee company. Under the 1940 Act, "Affiliate Investments" are defined by a lesser degree of influence and are deemed to exist through the possession outright or via the right to acquire within 60 days or less, beneficial ownership of 5% or more of the outstanding voting securities of another person. "Non-Control/Non-Affiliate Investments" are those that are neither Control Investments nor Affiliate Investments.

Investment Transactions

Investments are recognized when we assume an obligation to acquire a financial instrument and assume the risks for gains or losses related to that instrument. Investments are derecognized when we assume an obligation to sell a financial instrument and forego the risks for gains or losses related to that instrument. Specifically, we record all security transactions on a trade date basis. Amounts for investments recognized or derecognized but not yet settled are reported in due to broker or as a receivable for investments sold, respectively, in the consolidated statements of assets and liabilities.

Investment Risks

Our investments are subject to a variety of risks. Those risks include the following:

Market Risk

Market risk represents the potential loss that can be caused by a change in the fair value of the financial instrument.

Credit Risk

Credit risk represents the risk that we would incur if the counterparties failed to perform pursuant to the terms of their agreements with us.

Liquidity Risk

Liquidity risk represents the possibility that we may not be able to rapidly adjust the size of our investment positions in times of high volatility and financial stress at a reasonable price.

Interest Rate Risk

Interest rate risk represents a change in interest rates, which could result in an adverse change in the fair value of an interest-bearing financial instrument.

Prepayment Risk

Many of our debt investments allow for prepayment of principal without penalty. Downward changes in interest rates may cause prepayments to occur at a faster than expected rate, thereby effectively shortening the maturity of the security and making the security less likely to fully earn all of the expected income and reinvesting in a lower yielding instrument.

Structured Credit Related Risk

CLO investments may be riskier and less transparent to us than direct investments in underlying companies. CLOs typically will have no significant assets other than their underlying senior secured loans. Therefore, payments on CLO investments are and will be payable solely from the cash flows from such senior secured loans.

Investment Valuation

To value our investments, we follow the guidance of ASC 820, Fair Value Measurement (“ASC 820”), that defines fair value, establishes a framework for measuring fair value in conformity with GAAP, and requires disclosures about fair value measurements. In accordance with ASC 820, the fair value of our investments is defined as the price that we would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market in which that investment is transacted.

ASC 820 classifies the inputs used to measure these fair values into the following hierarchy:

Level 1: Quoted prices in active markets for identical assets or liabilities, accessible by us at the measurement date.

Level 2: Quoted prices for similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active, or other observable inputs other than quoted prices.

Level 3: Unobservable inputs for the asset or liability.

In all cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to each investment.

Our Board of Directors has established procedures for the valuation of our investment portfolio. These procedures are detailed below.

Investments for which market quotations are readily available are valued at such market quotations.

For most of our investments, market quotations are not available. With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our Board of Directors has approved a multi-step valuation process each quarter, as described below.

1. Each portfolio company or investment is reviewed by our investment professionals with independent valuation firms engaged by our Board of Directors.
2. The independent valuation firms prepare independent valuations for each investment based on their own independent assessments and issue their report.
3. The Audit Committee of our Board of Directors reviews and discusses with the independent valuation firms the valuation reports, and then makes a recommendation to the Board of Directors of the value for each investment.
4. The Board of Directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of the Investment Adviser, the respective independent valuation firm and the Audit Committee.

Our non-CLO investments are valued utilizing a yield analysis, enterprise value (“EV”) analysis, net asset value analysis, liquidation analysis, discounted cash flow analysis, or a combination of methods, as appropriate. The yield analysis uses loan spreads for loans, dividend yields for certain investments and other relevant information implied by market data involving identical or comparable assets or liabilities. Under the EV analysis, the EV of a portfolio company is first determined and allocated over the portfolio company’s securities in order of their preference relative to one another (i.e., “waterfall” allocation). To determine the EV, we typically use a market multiples approach that considers relevant and applicable market trading data of guideline public companies, transaction metrics from precedent merger and acquisitions transactions and/or a discounted cash flow analysis. The

net asset value analysis is used to derive a value of an underlying investment (such as real estate property) by dividing a relevant earnings stream by an appropriate capitalization rate. For this purpose, we consider capitalization rates for similar properties as may be obtained from guideline public companies and/or relevant transactions. The liquidation analysis is intended to approximate the net recovery value of an investment based on, among other things, assumptions regarding liquidation proceeds based on a hypothetical liquidation of a portfolio company's assets. The discounted cash flow analysis uses valuation techniques to convert future cash flows or earnings to a range of fair values from which a single estimate may be derived utilizing an appropriate discount rate. The measurement is based on the net present value indicated by current market expectations about those future amounts.

In applying these methodologies, additional factors that we consider in valuing our investments may include, as we deem relevant: security covenants, call protection provisions, and information rights; the nature and realizable value of any collateral; the portfolio company's ability to make payments; the principal markets in which the portfolio company does business; publicly available financial ratios of peer companies; the principal market; and enterprise values, among other factors.

Our investments in CLOs are classified as ASC 820 Level 3 securities and are valued using a discounted cash flow model. The valuations have been accomplished through the analysis of the CLO deal structures to identify the risk exposures from the modeling point of view as well as to determine an appropriate call date (i.e., expected maturity). For each CLO security, the most appropriate valuation approach has been chosen from alternative approaches to ensure the most accurate valuation for such security. To value a CLO, both the assets and the liabilities of the CLO capital structure are modeled. Our valuation agent utilizes other methods to validate the results from the discounted cash flow method. We use a waterfall engine to store the collateral data, generate collateral cash flows from the assets based on various assumptions for the risk factors, distribute the cash flows to the liability structure based on the payment priorities, and discount them back using current market discount rates. We are not responsible for and have no influence over the asset management of the portfolios underlying the CLO investments we hold as those portfolios are managed by non-affiliated third party CLO collateral managers. The main risk factors are: default risk, interest rate risk, downgrade risk, and credit spread risk.

Valuation of Other Financial Assets and Financial Liabilities

ASC 825, Financial Instruments, specifically ASC 825-10-25, permits an entity to choose, at specified election dates, to measure eligible items at fair value (the "Fair Value Option"). We have not elected the Fair Value Option to report selected financial assets and financial liabilities. See Note 8 for further discussion of our financial liabilities that are measured using another measurement attribute.

Convertible Notes

We have recorded the Convertible Notes at their contractual amounts. The Convertible Notes were analyzed for any features that would require bifurcation and such features were determined to be immaterial. See Note 5 for further discussion.

Revenue Recognition

Realized gains or losses on the sale of investments are calculated using the specific identification method.

Interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis.

Origination, closing and/or commitment fees associated with investments in portfolio companies are accreted into interest income over the respective terms of the applicable loans. Accretion of such purchase discounts or amortization of premiums is calculated using the effective interest method as of the purchase date and adjusted only for material amendments or prepayments. Upon the prepayment of a loan or debt security, any prepayment penalties and unamortized loan origination, closing and commitment fees are recorded as interest income.

Loans are placed on non-accrual status when there is reasonable doubt that principal or interest will be collected.

Unpaid accrued interest is generally reversed when a loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment.

Non-accrual loans are restored to accrual status when past due principal and interest is paid and in management's judgment, is likely to remain current. As of March 31, 2016, approximately 0.5% of our total assets are in non-accrual status.

Interest income from investments in the "equity" class of security of CLO funds (typically preferred shares, income notes or subordinated notes) and "equity" class of security of securitized trust is recorded based upon an estimation of an

effective yield to expected maturity utilizing assumed cash flows in accordance with ASC 325-40, Beneficial Interests in Securitized Financial Assets. We monitor the expected cash inflows from our CLO and securitized trust equity investments, including the expected residual payments, and the effective yield is determined and updated periodically.

Dividend income is recorded on the ex-dividend date.

Structuring fees and similar fees are recognized as income is earned, usually when paid. Structuring fees, excess deal deposits, net profits interests and overriding royalty interests are included in other income.

Federal and State Income Taxes

We have elected to be treated as a regulated investment company and intend to continue to comply with the requirements of the Code applicable to regulated investment companies. We are required to distribute at least 90% of our investment company taxable income and intend to distribute (or retain through a deemed distribution) all of our investment company taxable income and net capital gain to stockholders; therefore, we have made no provision for income taxes. The character of income and gains that we will distribute is determined in accordance with income tax regulations that may differ from GAAP. Book and tax basis differences relating to stockholder dividends and distributions and other permanent book and tax differences are reclassified to paid-in capital.

If we do not distribute (or are not deemed to have distributed) at least 98% of our annual ordinary income and 98.2% of our capital gains in the calendar year earned, we will generally be required to pay an excise tax equal to 4% of the amount by which 98% of our annual ordinary income and 98.2% of our capital gains exceed the distributions from such taxable income for the year. To the extent that we determine that our estimated current year annual taxable income will be in excess of estimated current year dividend distributions from such taxable income, we accrue excise taxes, if any, on estimated excess taxable income. As of March 31, 2016 and June 30, 2015, we accrued \$400 and \$305, respectively, for any unpaid potential excise tax liability and have included these amounts within other liabilities on the accompanying Consolidated Statements of Assets and Liabilities.

If we fail to satisfy the annual distribution requirement or otherwise fail to qualify as a RIC in any taxable year, we would be subject to tax on all of our taxable income at regular corporate rates. We would not be able to deduct distributions to stockholders, nor would we be required to make distributions. Distributions would generally be taxable to our individual and other non-corporate taxable stockholders as ordinary dividend income eligible for the reduced maximum rate applicable to qualified dividend income to the extent of our current and accumulated earnings and profits, provided certain holding period and other requirements are met. Subject to certain limitations under the Code, corporate distributions would be eligible for the dividends-received deduction. To qualify again to be taxed as a RIC in a subsequent year, we would be required to distribute to our shareholders our accumulated earnings and profits attributable to non-RIC years reduced by an interest charge of 50% of such earnings and profits payable by us as an additional tax. In addition, if we failed to qualify as a RIC for a period greater than two taxable years, then, in order to qualify as a RIC in a subsequent year, we would be required to elect to recognize and pay tax on any net built-in gain (the excess of aggregate gain, including items of income, over aggregate loss that would have been realized if we had been liquidated) or, alternatively, be subject to taxation on such built-in gain recognized for a period of ten years.

We follow ASC 740, Income Taxes ("ASC 740"). ASC 740 provides guidance for how uncertain tax positions should be recognized, measured, presented, and disclosed in the consolidated financial statements. ASC 740 requires the evaluation of tax positions taken or expected to be taken in the course of preparing our tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. As of March 31, 2016 and for the three and nine months then ended, we did not record any unrecognized tax benefits or liabilities. Management's determinations regarding ASC 740 may be subject to review and adjustment at a later date based upon factors including, but not limited to, an on-going analysis of tax laws, regulations and interpretations thereof. Although we file both federal and state income tax returns, our major tax jurisdiction is federal. Our tax returns for our federal tax years ended August 31, 2012 and thereafter remain subject to examination by the Internal Revenue Service.

Dividends and Distributions

Dividends and distributions to common stockholders are recorded on the ex-dividend date. The amount, if any, to be paid as a monthly dividend or distribution is approved by our Board of Directors quarterly and is generally based upon our management's estimate of our future earnings. Net realized capital gains, if any, are distributed at least annually.

Financing Costs

We record origination expenses related to our Revolving Credit Facility and Convertible Notes, Public Notes and Prospect Capital InterNotes® (collectively, our "Unsecured Notes") as deferred financing costs. These expenses are deferred and amortized as part of interest expense using the straight-line method for our Revolving Credit Facility and

the effective interest method for our Unsecured Notes over the respective expected life or maturity. In the event that we modify or extinguish our debt before maturity, we follow the guidance in ASC 470-50, Modification and Extinguishments (“ASC 470-50”). For modifications to or exchanges of our Revolving Credit Facility, any unamortized deferred costs relating to lenders who are not part of the new lending group are expensed. For extinguishments of our Unsecured Notes, any unamortized deferred costs are deducted from the carrying amount of the debt in determining the gain or loss from the extinguishment. Effective July 1, 2016, these costs will be reclassified to the

balance sheet as a deduction from the debt liability rather than an asset, in accordance with Accounting Standards Update 2015-03, Simplifying the Presentation of Debt Issuance Costs (“ASU 2015-03”).

We may record registration expenses related to shelf filings as prepaid assets. These expenses consist principally of SEC registration fees, legal fees and accounting fees incurred. These prepaid assets are charged to capital upon the receipt of proceeds from an equity offering or charged to expense if no offering is completed. As of March 31, 2016 and June 30, 2015, there are no prepaid assets related to registration expenses and all amounts incurred have been expensed.

Guarantees and Indemnification Agreements

We follow ASC 460, Guarantees (“ASC 460”). ASC 460 elaborates on the disclosure requirements of a guarantor in its interim and annual consolidated financial statements about its obligations under certain guarantees that it has issued. It also requires a guarantor to recognize, at the inception of a guarantee, for those guarantees that are covered by ASC 460, the fair value of the obligation undertaken in issuing certain guarantees.

Per Share Information

Net increase or decrease in net assets resulting from operations per share is calculated using the weighted average number of common shares outstanding for the period presented. In accordance with ASC 946, convertible securities are not considered in the calculation of net asset value per share.

Recent Accounting Pronouncements

In April 2015, the FASB issued ASU 2015-03 which requires debt issuance costs related to a recognized debt liability to be presented in the balance sheet as a direct deduction from the debt liability rather than as an asset. The new guidance will make the presentation of debt issuance costs consistent with the presentation of debt discounts or premiums. ASU 2015-03 is effective for financial statements issued for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. Early adoption is permitted for financial statements that have not been previously issued. The new guidance must be applied on a retrospective basis to all prior periods presented in the financial statements. The adoption of the amended guidance in ASU 2015-03 is expected to decrease total liabilities by decreasing the carrying value of our debt, and is expected to decrease total assets by decreasing deferred financing costs of our debt, but is not expected to have any other significant effect on our consolidated financial statements and disclosures.

In January 2016, the FASB issued Accounting Standards Update 2016-01, Recognition and Measurement of Financial Assets and Financial Liabilities (“ASU 2016-01”). The amendments in ASU 2016-01 address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. One such amendment requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option. That presentation addresses financial statement users’ feedback that presenting the total change in fair value of a liability in net income reduced the decision usefulness of an entity’s net income when it had a deterioration in its credit worthiness. ASU 2016-01 is effective for financial statements issued for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The new guidance must be applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. The amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption of ASU 2016-01. The adoption of the amended guidance in ASU 2016-01 is not expected to have a significant effect on our consolidated financial statements and disclosures.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We are subject to financial market risks, including changes in interest rates and equity price risk. Some of the loans in our portfolio have floating interest rates.

We may hedge against interest rate fluctuations by using standard hedging instruments such as futures, options and forward contracts subject to the requirements of the 1940 Act. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of higher interest rates with respect to our portfolio of investments. During the quarter ended March 31, 2016, we did not engage in hedging activities.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

155

As of March 31, 2016, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the 1934 Act). Based on that evaluation, our management, including the Chief Executive Officer and Chief Financial Officer, concluded that our disclosure controls and procedures were effective and provided reasonable assurance that information required to be disclosed in our periodic SEC filings is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of such possible controls and procedures.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting during the quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1. Legal Proceedings

From time to time, we may become involved in various investigations, claims and legal proceedings that arise in the ordinary course of our business. These matters may relate to intellectual property, employment, tax, regulation, contract or other matters. The resolution of such matters as may arise will be subject to various uncertainties and, even if such claims are without merit, could result in the expenditure of significant financial and managerial resources. We are not aware of any material legal proceedings as of March 31, 2016. Our Investment Adviser and Administrator have been named as defendants in a lawsuit filed on April 21, 2016 by a purported shareholder of Prospect in the United States District Court for the Southern District of New York under the caption Paskowitz v. Prospect Capital Management and Prospect Administration. The complaint alleges that the defendants received purportedly excessive management and administrative services fees from us in violation of Section 36(b) of the 1940 Act. The plaintiff seeks to recover on behalf of us damages in an amount not specified in the complaint. The defendants have informed us that they believe the complaint is without merit and intend to defend themselves vigorously against the plaintiff's claims. We believe that the lawsuit is not likely to have a material adverse effect on Prospect.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended June 30, 2015, which could materially affect our business, financial condition or future results. The risks described in this report and in our Annual Report on Form 10-K are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.
