GOL PN Shares included in Ibovespa Index

São Paulo, January 3, 2007 The PN shares of GOL Linhas Aéreas Inteligentes S.A. (NYSE: GOL and Bovespa: GOLL4), Brazil's low-fare, low-cost airline, have been added to the Ibovespa index.

The GOL PN shares are included in the *Ibovespa* index for the four-month period between January and April 2007 with a 1.05% weight. The *Bovespa* Index is the main indicator of the Brazilian stock market's average performance. The Ibovespa's relevance comes from two facts: it reflects the variation of BOVESPA's most traded stocks and it has maintained the integrity of its historical series without any methodological change since its inception in 1968.

In order to be part of the Ibovespa theoretical portfolio, shares have to meet the following criteria, with respect to the last twelve months: (i) be included in the group of shares whose negotiability indexes added represent 80% of the total value of all individual negotiability indexes; (ii) have a trading value participation higher than 0.1% of the total; (iii) have a trading session presence of more than 80%.
