**GOL makes strategic changes to its network and revises its 2015 operating margin guidance to adapt to the current economic scenario**

**São Paulo, November 11, 2015 - GOL Linhas Aéreas Inteligentes S.A.**

**(BM&FBOVESPA: GOLL4 and NYSE: GOL), (S&P: B-, Fitch: B-, Moody's: B3)**, the largest low-cost and best-fare airline in Latin America hereby announces a change to its 2015 guidance, disclosed in the material fact of March 30, 2015 and revised in the material fact of August 13, 2015, and also announces strategic changes to certain domestic and international routes in order to better meet demand from its customers and market movements.

Annual change in domestic supply (ASK)	zero	-1%	zero	-1%
Average exchange rate (R\$/US\$)	3.40	3.30	3.15	2.95
Jet fuel price	2.25	2.15	2.30	2.10
<b>Operating Margin (EBIT)</b>	<b>-2%</b>	<b>0%</b>	<b>2%</b>	<b>5%</b>

These guidance revisions reflects the high foreign exchange volatility, the decline in international oil prices, and the current economic scenario which, altogether, impacted GOL's costs and expenses and revenue from passenger transport, whose leisure and business traveler mix changed.

The maintenance of the 2015 domestic supply forecast, from zero to -1%, will reduce capacity by 5% to 7% in 4Q15, given the indicator's increase by 1.6% until September.

Due to the impact of an adverse macroeconomic scenario, GOL may revise its guidance to incorporate any developments in its operating and financial performance, as well as any changes in interest, FX, GDP and WTI and Brent oil price trends.

Regarding the network, the changes include the creation of new flights, routes and destinations, as well as changes in frequency and the cancellation of destinations impacted by the appreciation of the U.S. dollar and Brazil's economic downturn. The changes are presented below:

**Domestic Market**

- On October 25, the company launched new routes and flights departing from the Congonhas airport, in São Paulo. The destinations include the coastal cities of Salvador, Porto Seguro, Ilhéus and Florianópolis – very popular destinations during summer. Maringá, Londrina and Presidente Prudente will also gain new operations in Congonhas;
- Departing from the Santos Dumont airport, in Rio de Janeiro for the high season, the company will count with direct flights to Navegantes and Florianópolis, in the South of Brazil. More cities will also be connected to Porto Seguro, with direct flights from Belo Horizonte, Rio

de Janeiro and Brasília. The company will operate flights to Natal, Fortaleza, Salvador, Maceió and Recife, departing from Campinas;

- These changes are aimed at capturing opportunities in the tourism sector and adjusting the company's capacity to the current economic scenario in Brazil, in line with the already announced reduction in domestic supply of up to 1% in 2015.

**GOL Linhas Aéreas Inteligentes  
S.A.**

---

**GOL makes strategic changes to its network and revises its 2015 operating margin guidance to adapt to the current economic scenario**

**International Market**

- The flights to Miami and Orlando, in the United States, will only be operated on a seasonal basis as of February 19, 2016. The company's regular operation to Punta Cana, departing from Guarulhos, will remain unchanged;
- The company is still studying the feasibility to maintain its operations to Caracas, in Venezuela. The flights to that destination are currently still operating but frequency was reduced to once a week;
- GOL plans to add new Latin American destinations, such as Havana, in Cuba;
- Following the example of the Fortaleza – Buenos Aires and Natal – Buenos Aires stretches, the company is considering creating new direct flights to the Argentinean capital, departing from other cities in the Northeast.

These changes have the purpose of making a better use of the company's resources, redirecting them to more popular routes. The standardized Boeing 737 fleet allows GOL to operate its network in a flexible and dynamic manner, distributing its aircraft through the various routes, regardless of them being short- or long-haul flights, and based on the company's needs.
