MECHEL REPORTS TECHNICAL REVAMPING OF MINING FACILITIES

Moscow, Russia - August 13, 2014 - Mechel OAO (NYSE: MTL), one of the leading Russian mining and metals companies, reports acquiring new equipment in line with its technical revamping program for Mechel Mining OAO's facilities. The company plans to invest a total of 2.9 billion rubles into maintenance of the mining division's production facilities in 2014 (excepting investment into Elga Coal Complex).

As part of this program, equipment worth a total of 1.2 billion rubles has already arrived at Southern Kuzbass Coal Company OAO and Korshunov Mining Plant OAO's facilities.

An ESH-20/90 walking excavator is being assembled at the Krasnogorsky Pit. The dragline worth some 1 billion rubles was produced by Uralmashplant OAO to a special order by Southern Kuzbass Coal Company. The dragline, whose boom length is 90 meters, will be used for overburden mining. Its assembly, commissioning and start-up and launch are due to be completed by the end of this year.

A tunneling machine produced by Korum Rus OOO arrived at Southern Kuzbass Coal Company OAO's Lenina mine. It enables the company to mine and transport raw coal from horizontal and slanting mine openings depending on a mine's geological specifics. The machine will be launched in August.

Besides that, assembly of a new Scharf ZL 200-130-900D diesel locomotive is due to be completed this month at Southern Kuzbass Coal Company OAO's New-Olzherassk mine. The locomotive, which was acquired as part of the facility's second line construction, will be used to transport personnel and cargo to mine openings. The locomotive is equipped with a transport platform, can transport up to 48 tonnes of cargo and work on surfaces slanting up to 30 degrees.

Assembly of a Liebherr R9250 mine excavator with a monthly capacity of over 200,000 cubic meters of rock mass is due to begin shortly at Korshunov Mining Plant's Rudnogorsky mine. Its chief components have already been delivered, and the new excavator is due to begin operations by mid-September.

"Over the past few years we have been paying particular attention to modernizing our mining segment's production facilities and launching equipment that would enable us to cut expenses and, accordingly, production costs. Even now when our financial situation is not entirely unclouded, the technical revamping program is being implemented in full, as mining is meant to become our company's chief growth point according to Mechel's strategy," Mechel OAO's Chief Executive Officer Oleg Korzhov commented.
