Important Information Regarding Forward-Looking Statements

Portions of this Quarterly Report on Form 10-Q (including information incorporated by reference) include “forward-looking statements” based on our current beliefs, expectations and projections regarding our business strategies, market potential, future financial performance, industry and other matters. This includes, in particular, “Item 2—Management’s Discussion and Analysis of Financial Condition and Results of Operations” of this Quarterly Report on Form 10-Q as well as other portions of this Quarterly Report on Form 10-Q. The words “believe,” “expect,” “anticipate,” “project,” “could,” “would,” and similar expressions, among others, generally identify “forward-looking statements,” which speak only as of the date the statements were made. The matters discussed in these forward-looking statements are subject to risks, uncertainties and other factors that could cause our actual results to differ materially from those projected, anticipated or implied in the forward-looking statements. The most significant of these risks, uncertainties and other factors are described in “Item 1A—Risk Factors” of this Quarterly Report on Form 10-Q and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012 filed with the Securities and Exchange Commission on March 13, 2013. Except to the limited extent required by applicable law, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

DIGIRAD CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. The Company

Digirad Corporation (“Digirad”), a Delaware corporation, is one of the largest national providers of in-office nuclear cardiology imaging and ultrasound services to physician practices, hospitals and imaging centers through our Digirad Imaging Solutions (“DIS”) segment. Through DIS, we provide in-office imaging services to physicians, offering certified personnel, required licensure, an imaging system and other support and supplies for the performance of nuclear and ultrasound imaging procedures under the supervision of our physician customers. DIS’ physician customers enter into service contracts for imaging services generally delivered on a per-day basis. We also sell medical diagnostic imaging systems including solid-state gamma cameras for nuclear cardiology and general nuclear medicine applications, as well as provide service on the products we sell through our Diagnostic Imaging segment. These two reportable segments, DIS and Diagnostic Imaging, are collectively referred to herein as the “Company.” The accompanying condensed consolidated financial statements include the operations of both segments. Intercompany accounts and transactions are accounted for at cost and have been eliminated in consolidation. All our long-lived assets are located in the United States and substantially all of our revenues arise from sales activity in the United States.

Basis of Presentation

The unaudited condensed consolidated financial statements included in this Form 10-Q have been prepared in accordance with the U.S. Securities and Exchange Commission (“SEC”) instructions for Quarterly Reports on Form 10-Q. Accordingly, the condensed consolidated financial statements are unaudited and do not contain all the information required by U.S. generally accepted accounting principles (“GAAP”) to be included in a full set of financial statements. The unaudited condensed consolidated balance sheet at December 31, 2012 has been derived from the audited consolidated financial statements at that date but does not include all of the information and footnotes required by GAAP for a complete set of financial statements. The audited consolidated financial statements for our fiscal year ended December 31, 2012, filed with the SEC on Form 10-K on March 13, 2013 include a summary of our significant accounting policies and should be read in conjunction with this Form 10-Q. In the opinion of management, all material adjustments necessary to present fairly the results of operations, cash flows and balance sheets for such periods have been included in this Form 10-Q. All such adjustments are of a normal recurring nature. In addition certain reclassifications have been made to the prior period financial statements to conform to the current period presentation. The results of operations for interim periods are not necessarily indicative of the results of operations for the entire year.

Note 2. Basic and Diluted Net Income (Loss) Per Share

For the three and nine months ended September 30, 2013 and 2012, basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of common shares and vested restricted stock units outstanding during the period. Diluted net income (loss) per common share is calculated to give effect of all dilutive securities, if applicable, using the treasury stock method.

The following table sets forth the reconciliation of shares used to compute basic and diluted net income (loss) per share for the periods indicated:

	Three Months Ended September 30,		Nine Months Ended September 30,	
(shares in thousands)	2013	2012	2013	2012
Weighted average shares outstanding - basic	18,328	19,263	18,890	19,273
Dilutive potential common stock outstanding:				
Stock options	250	—	—	—
Restricted stock units	2	—	—	—
Weighted average shares outstanding - diluted	18,580	19,263	18,890	19,273

The following weighted average outstanding common stock equivalents were not included in the calculation of diluted net loss per share because their effect was anti-dilutive:

Edgar Filing: DIGIRAD CORP - Form 10-Q

	Three Months Ended September 30,		Nine Months Ended September 30,	
(shares in thousands)	2013	2012	2013	2012
Stock options	—	331	338	412
Restricted stock units	—	22	12	24
Total	—	353	350	436

Note 3. Inventories

Our inventories are stated at the lower of cost (first-in, first-out) or market (net realizable value) and we review inventory balances for excess and obsolete inventory levels on a quarterly basis.

(in thousands)	September 30, 2013	December 31, 2012
Raw materials	\$2,653	\$2,522
Work-in-process	3,463	3,161
Finished goods	1,178	1,861
	7,294	7,544
Less reserve for excess and obsolete inventories	(2,881)	(2,565)
Inventories, net	\$4,413	\$4,979

Note 4. Property and Equipment

(in thousands)	September 30, 2013	December 31, 2012
Machinery and equipment	\$22,209	\$22,302
Computer hardware and software	2,508	2,827
Leasehold improvements	871	865
	25,588	25,994
Accumulated depreciation	(21,477)	(21,301)
Property and equipment, net	\$4,111	\$4,693

Note 5. Restructuring Charges

On February 28, 2013, we announced a plan to restructure our Diagnostic Imaging business to significantly reduce costs and focus on maximizing cash flow from our DIS service business (the "Diagnostic Imaging restructuring initiative"). The Diagnostic Imaging restructuring initiative includes a reduction in force. In addition, as part of the Diagnostic Imaging restructuring initiative, we entered into an agreement in September 2013 with a third party to outsource the majority of the manufacturing associated with our cameras. As a result of this Diagnostic Imaging restructuring initiative, we estimate that we will incur in total approximately \$1.7 million to \$1.9 million in restructuring charges, the majority of which will be incurred during fiscal year 2013. Included in this estimated range is approximately \$1.6 million of employee related costs, while the remaining costs include contract termination costs and other related costs. As currently planned, substantially all restructuring efforts associated with this initiative are expected to be complete by December 31, 2013. Through September 30, 2013, we have expensed approximately \$1.7 million of charges associated with the Diagnostic Imaging restructuring initiative, including approximately \$1.5 million of employee related costs. Restructuring liabilities and associated charges are measured at fair value as incurred. Restructuring charges do not include charges associated with excess inventory, any excess capacity, or personnel wages and benefits before personnel leave the Company.

The following table includes information regarding our current Diagnostic Imaging restructuring initiative:

(in thousands)	Accrued at December 31, 2012	Accrued Costs	Cash Payments and Other Reductions	Accrued at September 30, 2013
Total Diagnostic Imaging restructuring initiative	\$—	\$1,693	\$1,122	\$571

All accrued restructuring charges at September 30, 2013 are included in the accrued compensation line item in the unaudited condensed consolidated balance sheets. All the restructuring charges for the three and nine months ended September 30, 2013 are included in the Diagnostic Imaging segment.

Note 6. Financial Instruments

Assets and Liabilities Measured at Fair Value on a Recurring Basis. The following table presents information about our financial assets and liabilities that are measured at fair value on a recurring basis, and indicates the fair value hierarchy of the valuation techniques we utilize to determine such fair value at September 30, 2013 and December 31, 2012.

(in thousands)	Fair Value as of September 30, 2013			Total
	Level 1	Level 2	Level 3	
Assets:				
Corporate debt securities	\$—	\$8,301	\$—	\$8,301

(in thousands)	Fair Value as of December 31, 2012			Total
	Level 1	Level 2	Level 3	
Assets:				
Corporate debt securities	\$—	\$7,679	\$—	\$7,679

The fair value of our corporate debt securities is determined using proprietary valuation models and analytical tools. These valuation models and analytical tools use market pricing or prices for similar instruments that are both objective and publicly available, including matrix pricing or reported trades, benchmark yields, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids and/or offers. We did not reclassify any investments between levels in the fair value hierarchy during the nine months ended September 30, 2013.

Securities Available for Sale

Securities available-for-sale primarily consist of investment grade corporate debt securities. We classify all securities as available-for-sale and as current assets, as the sale of such securities may be required prior to maturity to execute management strategies. These securities are carried at fair value, with the unrealized gains and losses reported as a component of accumulated other comprehensive income (loss) in stockholders' equity until realized. Realized gains and losses from the sale of available-for-sale securities, if any, are determined on a specific identification basis. A decline in the market value of any available-for-sale security below cost that is determined to be other than temporary will result in an impairment charge to earnings and a new cost basis for the security is established. No such impairment charges were recorded for any period presented. It is not more likely than not that we will be required to sell investments before recovery of their amortized costs. Premiums and discounts are amortized or accreted over the life of the related security as an adjustment to yield using the straight-line method and included in interest income. Interest income is recognized when earned. Realized gains and losses on investments in securities are included in other income (expense) within the condensed consolidated statements of comprehensive income (loss). The realized gains and losses on these sales were minimal for the three and nine months ended September 30, 2013 and 2012.

The following table sets forth the composition of securities available-for-sale as of September 30, 2013 and December 31, 2012.

As of September 30, 2013 (in thousands)	Maturity in Years	Amortized Cost	Unrealized Gains	Losses	Fair Value
Corporate debt securities	3 or less	\$ 8,319	\$8	\$(26)) \$8,301

As of December 31, 2012 (in thousands)	Maturity in Years	Amortized Cost	Unrealized Gains	Losses	Fair Value
Corporate debt securities	3 or less	\$ 7,662	\$17	\$—	\$7,679

Note 7. Commitments and Contingencies

Radiopharmaceutical litigation. In April 2013, we settled a contractual dispute with our former radiopharmaceutical supplier who alleged that we, along with another radiopharmaceutical supplier, collaborated and breached our supply commitment contract. In summary, the settlement releases all parties from all claims associated with the dispute and the Company paid \$385,000 which was recorded in other accrued liabilities as of December 31, 2012. The associated expense was recognized in the consolidated statement of comprehensive income (loss) for the year ended December 31, 2012.

Annual Meeting Litigation. In May 2013, we were served with a complaint in Delaware Chancery Court by one of our larger shareholders, the Red Oak Fund, L.P. ("Red Oak"). In summary, the complaint alleged that the Annual Meeting of Shareholders election process (the "Election") was improperly conducted. Red Oak sought to have the results of the Election voided and to compel Digirad to conduct a new Annual Meeting process. On October 23, 2013, the Delaware Chancery Court issued a memorandum opinion in favor of the Company which upheld the Election as valid.

Other matters. In the normal course of business, we have been, and will likely continue to be, subject to litigation or administrative proceedings incidental to our business, such as claims related to customer disputes, employment practices, wage and hour disputes, product liability, professional liability, commercial disputes, licensure restrictions or denials, and warranty or patent infringement. Responding to litigation or administrative proceedings, regardless of whether they have merit, can be expensive and disruptive to normal business operations. We are not able to predict the timing or outcome of these matters.

Note 8. Income Taxes

As of December 31, 2012, we had unrecognized tax benefits of approximately \$1.5 million. Included in the unrecognized tax benefits were \$1.2 million of tax benefits that, if recognized, would reduce our annual effective tax rate, subject to the valuation allowance. We do not expect our unrecognized tax benefits to change significantly over the next 12 months.

We file income tax returns in the U.S. and in various state jurisdictions with varying statutes of limitations. We are no longer subject to income tax examination by tax authorities for years prior to 2008; however, our net operating loss and research credit carry-forwards arising prior to that year are subject to adjustment. It is our policy to recognize interest expense and penalties related to income tax matters as a component of income tax expense.

Note 9. Stock Repurchase Program

On February 27, 2013, our board of directors modified our stock buyback program originally adopted in February 2009 to increase repurchases to an aggregate of \$7.0 million, and subsequently, on March 13, 2013, increased the stock buyback program again for repurchases of up to an aggregate of \$12.0 million. During the three and nine months ended September 30, 2013, we repurchased 254,084 and 1,514,843 respectively, of shares of our common stock under the buyback program. Cumulatively through September 30, 2013, we have repurchased 2,588,484 shares of common stock at a cost of \$5.7 million.

Note 10. Segments

Our reporting segments have been determined based on the nature of the products and/or services offered to customers or the nature of their function in the organization. We evaluate performance based on the operating income (loss) contributed by each segment.

	Three Months Ended September 30,		Nine Months Ended September 30,	
(in thousands)	2013	2012	2013	2012
Gross profit by segment:				
DIS	\$2,573	\$1,976	\$6,983	\$6,757
Diagnostic Imaging	1,245	1,153	3,445	3,725
Condensed consolidated gross profit	\$3,818	\$3,129	\$10,428	\$10,482
Income (loss) from operations by segment:				
DIS	\$396	\$12	\$(192)) \$227
Diagnostic Imaging ⁽¹⁾	2,036	(1,079)) (417)) (3,482)
Condensed consolidated income (loss) from operations	\$2,432	\$(1,067)) \$(609)) \$(3,255)
Depreciation and amortization:				
DIS	\$348	\$440	\$1,095	\$1,414
Diagnostic Imaging	127	84	352	236
Condensed consolidated depreciation and amortization	\$475	\$524	\$1,447	\$1,650
(in thousands)			As of September 30, 2013	As of December 31, 2012
Identifiable assets by segment:				
DIS			\$11,620	\$9,105
Diagnostic Imaging			30,363	35,804
Condensed Consolidated assets			\$41,983	\$44,909

⁽¹⁾ Included in the Diagnostic Imaging loss from operations for the three and nine months ended September 30, 2013, are approximately \$0.1 million and \$1.7 million of charges, respectively, associated with our Diagnostic Imaging restructuring initiative (See Note 5), as well as a gain of approximately \$1.6 million associated with the sale of assets and licensing agreement from an uncommercialized surgical imaging system previously in development (See Note 12).

Note 11. Preferred Stock Rights

On May 23, 2013, the Company's Board of Directors adopted a tax benefit preservation plan in the form of a Section 382 Rights Agreement (the "382 Agreement"). The 382 Agreement is intended to diminish the risk that our ability to use our net operating loss carryforwards to reduce future federal income tax obligations may become substantially limited due to an "ownership change," as defined in Section 382 of the Internal Revenue Code. The Board authorized and declared a dividend distribution of one right for each outstanding share of common stock, par value \$0.0001 per share, of the Company to stockholders of record as of the close of business on June 4, 2013. Each right entitles the registered holder to purchase from the Company one one-thousandth of a share of Series B Participating Preferred Stock, par value \$0.0001 per share, of the Company at an exercise price of \$20.00 per one one-thousandth of a Preferred Share, subject to adjustment.

The rights will become exercisable following (i) the 10th business day (or such later date as may be determined by the Board of Directors) after the public announcement that an acquiring person has acquired beneficial ownership of 4.99% or more of the common shares of the Company or (ii) the 10th business day (or such later date as may be determined by the Board of Directors) after a person or group announces a tender or exchange offer that would result in ownership by a person or group of 4.99% or more of the common shares of the Company.

In addition, upon the occurrence of certain events, the exercise price of the rights would be adjusted and holders of the rights (other than rights owned by an acquiring person or group) would be entitled to purchase common stock at approximately half of market value. Given the potential adjustment of the exercise price of the rights, the rights could cause substantial dilution to a

person or group that acquires 4.99% or more of the Company's common stock on terms not approved by the Company's Board of Directors.

No rights were exercisable at September 30, 2013. There is no impact to the Company's financial results as a result of the adoption of the rights plan for the nine month period ended September 30, 2013.

Note 12. Surgical Imaging Asset Sale and License Agreement

On July 31, 2013, we entered into an asset purchase agreement with Novadaq Technologies Inc. ("Novadaq"). Under the terms of the asset purchase agreement, we sold Novadaq all of our assets specifically related to an uncommercialized surgical imaging system previously in development. We also licensed certain existing Company technology to Novadaq for their use in the peri-operative field. In exchange, we received upfront consideration of \$2.0 million, and could receive up to \$1.0 million in deferred contingent payments based on the achievement of specific regulatory and commercial milestones. In addition a royalty on sales, if any, will be paid for a period of five years from the date of the first commercial sale of the related surgical imaging system.

We identified the deliverables at the inception of the agreements and determined that the tangible assets, consisting of inventory parts, and intangible assets, consisting of the technology license and various patents and know-how, individually represent separate units of accounting because each deliverable has standalone value. The best estimated selling prices for these units of accounting were determined using the income method for the intangible assets, and a cost plus a reasonable margin basis for the tangible assets. The arrangement consideration was allocated to the deliverables based on the relative selling price method.

The amount of allocable arrangement consideration is limited to the amount that is not contingent upon meeting other specified performance conditions (the non-contingent amount); therefore, the amount allocated to the deliverables at September 30, 2013, was limited to the upfront cash received of \$2.0 million. Since performance and delivery occurred on both deliverables during the three months ended September 30, 2013, a gain of \$1.6 million representing the \$2.0 million of upfront consideration less legal, consulting and other transaction fees as well as the cost basis of the inventory was recorded in the three months ended September 30, 2013.

We expect to recognize the regulatory and commercial milestone payments as a gain if and when the milestones are achieved. We expect to recognize the sales royalty payments as a gain if and when the royalties are earned.

Note 13. Subsequent Events

On October 23, 2013, the Delaware Chancery Court issued a memorandum opinion in favor of the Company which upheld the 2013 Annual Meeting of Shareholders election as valid. In May 2013, we had been served with a complaint in Delaware Chancery Court by one of our larger shareholders, the Red Oak Fund, L.P. ("Red Oak"), alleging that the 2013 Annual Meeting of Shareholders election process was improperly conducted. See Note 7 to the unaudited Condensed Consolidated Financial Statements for further information.

On November 1, 2013, the Company's Board of Directors declared a cash dividend of \$0.05 per share payable on November 22, 2013 to shareholders of record on November 12, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This management's discussion and analysis of financial condition and results of operations ("MD&A"), contains forward-looking statements that involve risks and uncertainties. Please see "Important Information Regarding Forward-Looking Statements" for a discussion of the uncertainties, risks and assumptions that may cause our actual results to differ materially from those discussed in the forward-looking statements. This discussion should be read in conjunction with our unaudited condensed consolidated financial statements and related notes thereto and the other disclosures contained elsewhere in this Quarterly Report on Form 10-Q, and the audited consolidated financial statements and related notes thereto for the fiscal year ended December 31, 2012, which were included in our Form 10-K, filed with the U.S. Securities and Exchange Commission ("SEC") on March 13, 2013.

The results of operations for the periods reflected herein are not necessarily indicative of results that may be expected for future periods.

Overview

We are one of the largest national providers of in-office nuclear cardiology imaging and ultrasound services to physician practices, hospitals and imaging centers through our Digirad Imaging Solutions ("DIS") business segment. We also sell medical diagnostic imaging systems including solid-state gamma cameras for nuclear cardiology and general nuclear medicine applications, as well as provide service on the products we sell. We designed and commercialized the first solid-state nuclear gamma camera for the detection of cardiovascular disease and other medical conditions. Our nuclear cameras fit easily into floor spaces as small as seven feet by eight feet and facilitate the delivery of nuclear medicine procedures in a physician's office, an outpatient hospital setting or within multiple departments of a hospital, (e.g., emergency and operating rooms).

We generate revenues within two primary operating segments: DIS and Diagnostic Imaging. Through DIS, we offer a comprehensive diagnostic imaging services program as an alternative to purchasing a gamma camera or ultrasound equipment for physicians who wish to perform nuclear imaging, echocardiography, vascular ultrasound, or any combination of these procedures in their offices by utilizing our imaging systems, certified personnel and other support required to perform imaging in the physician's office. The flexibility of our products and our DIS diagnostic imaging service allows physicians more control over the diagnosis and treatment of their patients in their offices and to retain revenue from procedures they would otherwise refer elsewhere. DIS services are primarily provided to cardiologists, internal medicine physicians and family practice doctors who enter into contracts for our diagnostic imaging services delivered on a per-day basis. Our typical contracts provide service coverage ranging from once per month to five times per week. We experience some seasonality in our DIS business related to vacations, holidays and inclement weather. We may experience significant market changes due to fluctuations in reimbursements to our physicians and the uncertainty with healthcare legislation. These market changes may require further adjustments to our business model in order for our physician customers and us to maintain a viable economic model. Our Diagnostic Imaging segment revenue results primarily from selling solid-state gamma cameras and camera maintenance contracts. We sell our imaging systems to physician offices and hospitals primarily in the United States, although we have sold a small number of imaging systems internationally.

On February 28, 2013, we announced a plan to restructure our Diagnostic Imaging business to significantly reduce costs, including a reduction in force (the "Diagnostic Imaging restructuring initiative"). After completion of this restructuring, we believe the overall operating cash flow of the Company will increase. As part of the restructuring effort, we conducted a review as to whether we would continue to manufacture our nuclear gamma cameras internally or outsource the manufacturing to a third party, and in both cases, at what level we would produce cameras. In September 2013, we entered into an agreement with a third party to outsource the majority of manufacturing associated with our cameras. As a result of the outsourcing and restructuring efforts, we believe that we will be able to streamline the camera manufacturing process and ultimately reduce the cost of our cameras. The transition to the outsourcing partner will take place over the remainder of fiscal year 2013 as well as much of fiscal year 2014 and, as a result, we expect to see the cost savings slowly accrete over that same time period. Though we believe over the long term we will see cost savings in our camera manufacturing process, the volume of our future camera sales will ultimately be impacted by many factors, including economic conditions, health care law changes, and our ability to

penetrate new markets, all of which are difficult to predict. Overall, this restructuring resulted in certain charges being incurred in the first nine months of fiscal year 2013. We anticipate that there will be limited restructuring charges incurred in the last three months of fiscal year 2013, and first half of fiscal year 2014. See Note 5 to the unaudited Condensed Consolidated Financial Statements for further information.

Edgar Filing: DIGIRAD CORP - Form 10-Q

Results of Operations

The following tables set forth our results from operations for the three and nine months ended September 30, 2013 and 2012:

(in thousands)	Three Months Ended September 30,						Change from Prior Year	
	2013	Percent of 2013 Revenues	2012	Percent of 2012 Revenues			Dollars	Percent

Comparison of the Three Months Ended September 30, 2013 and 2012

Revenues

Consolidated. Consolidated revenue was \$12.4 million for the three months ended September 30, 2013, an increase of \$0.6 million, or 5.0%, compared to the prior year quarter, primarily as a result of an increase in revenue associated with our DIS business, driven by a greater number of imaging days provided offset partially by a decrease in the average mobile imaging rate per day. DIS revenue accounted for 76.4% of total revenues for 2013, compared to 74.9% for the prior year quarter. The percentage of consolidated revenue associated with our DIS segment was slightly higher for the three months ended September 30, 2013 compared to the same period in the prior year, primarily as a result of DIS revenue growth for the three months ended September 30, 2013 compared to the same period in the prior year, while Diagnostic Imaging revenue remained relatively consistent for the three months ended September 30, 2013 compared to the same period in the prior year. We expect our DIS revenue to continue to represent the larger percentage of our consolidated revenue, however the percentage will fluctuate quarter by quarter given the significant variability in the timing and volume of camera unit sales. In addition, DIS revenue may generally increase as a percentage of consolidated revenue for future periods as a result of our Diagnostic Imaging restructuring initiative. See "Restructuring" discussed below.

Cost of Revenue and Gross Profit

Consolidated. Consolidated gross profit was \$3.8 million for the three months ended September 30, 2013, an increase of \$0.7 million, or 22.0%, compared to the prior year quarter. The increase in consolidated gross profit is primarily the result of higher DIS revenue during the three months ended September 30, 2013, compared to the prior year quarter. Consolidated gross profit as a percentage of revenue increased to 30.8% for the three months ended September 30, 2013 from 26.5% for the prior year quarter, primarily as a result of lower radiopharmaceutical costs and improved utilization of labor in our DIS business, as well as increased camera average selling prices and lower camera manufacturing costs.

DIS. Cost of DIS revenue primarily consists of labor, radiopharmaceuticals, equipment depreciation, and other costs associated with providing our services. Cost of DIS revenue was \$6.9 million for the three months ended September 30, 2013 consistent with the prior year quarter. For the three months ended September 30, 2013 as compared to the prior year quarter, there was an increase in cost of DIS revenue primarily as a result of the increased amount of revenue and associated imaging days, offset by reduced radiopharmaceutical costs, improved utilization of labor and reduced depreciation expense. DIS gross profit was \$2.6 million for the three months ended September 30, 2013, an increase of \$0.6 million, or 30.2%, from gross profit of \$2.0 million for the prior year quarter. DIS gross profit as a percentage of DIS revenue increased to 27.1% for the three months ended September 30, 2013 from 22.3% for the prior year quarter. The improvement in gross profit was primarily attributable to reduced radiopharmaceutical costs, improved utilization of labor and lower depreciation expense.

Diagnostic Imaging. Cost of Diagnostic Imaging revenue primarily consists of materials, labor and overhead costs associated with the manufacturing, warranty and service contracts associated with our products. Cost of Diagnostic Imaging revenue was \$1.7 million for the three months ended September 30, 2013, a decrease of \$0.1 million, or 7.1%, compared to the prior year quarter, which is primarily the result of reduced manufacturing costs. Diagnostic Imaging gross profit was \$1.2 million for the three months ended September 30, 2013, an increase of \$0.1 million, or 8.0%, compared to the prior year quarter primarily as a result of increased camera average selling prices, favorable product mix and lower camera manufacturing costs, partially offset by a reduction in the total number of service contracts. Diagnostic Imaging gross profit as a percentage of Diagnostic Imaging revenue was 42.6% for the three months ended September 30, 2013, compared to 38.9% for the prior year quarter due to increased average selling prices for cameras and lower camera manufacturing costs.

Operating Expenses

Research and Development. Research and development expenses are the costs associated with the design, development and expansion of our existing technology and consist of salaries, development material costs, facility and overhead costs, consulting fees, and engineering costs. Research and development expenses were \$24 thousand for the three months ended September 30, 2013, a decrease of \$1.0 million, or 97.7%, from the prior year quarter. The decrease is due to our Diagnostic Imaging restructuring initiative, which focuses on our existing camera product

offerings rather than continued development of completely new product offerings. We believe our current product line has a technological advantage over competing products and continued relevance well into the future. We expect that research and development expense for the remainder of fiscal year 2013 will be significantly lower than the comparable period in fiscal year 2012. In future quarters beyond fiscal year 2013, we plan to primarily utilize outside service providers for research and development services on an as needed basis for updates and enhancements, with the amount of corresponding expenditure fluctuating commensurately quarter by quarter.

Marketing and Sales. Marketing and sales expenses consist primarily of salaries, commissions, travel and marketing costs. Marketing and sales expenses were \$1.0 million for the three months ended September 30, 2013, a decrease of \$0.3 million, or

22.7%, compared to the prior year quarter, primarily as a result of the Diagnostic Imaging restructuring initiative. We expect that marketing and sales expense for the remainder of fiscal year 2013 will be lower than the comparable period in fiscal year 2012.

General and Administrative. General and administrative expenses consist primarily of salaries and other related costs for finance, human resources, information technology, executive personnel, legal related costs, professional fees, outside services, insurance, and costs related to our board of directors. General and administrative expenses were \$1.8 million for the three months ended September 30, 2013, consistent with the prior year quarter. For the three months ended September 30, 2013 as compared to the prior year quarter, there was lower utilization of facility space by manufacturing, which resulted in a greater allocation of facility costs to general and administrative expense, as well as higher variable compensation expense associated with Company performance. The aforementioned increases in general and administrative expense for the three months ended September 30, 2013 as compared to the prior year quarter, were offset by decreases in human resources, information technology, legal and billing and collection expenses. On a go forward basis, we expect general and administrative expense to generally approximate the level of expense noted in the three months ended September 30, 2013 notwithstanding any one-time initiatives.

Restructuring. On February 28, 2013, we announced a plan to restructure our Diagnostic Imaging business to significantly reduce costs, including a reduction in force (the "Diagnostic Imaging restructuring initiative"). In September 2013, as part of the restructuring initiative, we entered into an agreement with a third party to outsource the majority of the manufacturing related to our cameras. After completion of this restructuring, we believe the overall operating cash flow of the Company will increase. Overall, this restructuring resulted in certain charges being incurred in the first nine months of fiscal year 2013. Total restructuring charges incurred during the three months ended September 30, 2013 were \$0.1 million. These charges consisted primarily of employee related costs. We anticipate that there will be limited restructuring charges incurred in the last three months of fiscal year 2013, and first half of fiscal 2014. See Note 5 to the unaudited Condensed Consolidated Financial Statements for further information.

Gain on sale of assets and license agreement. On July 31, 2013, we entered into an asset purchase agreement with Novadaq Technologies Inc. ("Novadaq"). Under the terms of the asset purchase agreement, we sold Novadaq all of our assets specifically related to an uncommercialized surgical imaging system previously in development. We also licensed certain existing Company technology to Novadaq for their use in the peri-operative field. In exchange, we received upfront consideration of \$2.0 million, and could receive up to \$1.0 million in deferred contingent payments based on the achievement of specific regulatory and commercial milestones. In addition, a royalty on sales, if any, will be paid for a period of five years from the date of the first commercial sale of the related surgical imaging system. The sale of the technology is consistent with our focus on our existing camera product offerings, rather than development of completely new product offerings.

We recorded a gain of \$1.6 million during the three months ended September 30, 2013 related to the Novadaq agreement, representing the \$2.0 million of upfront consideration less legal, consulting and other transaction fees as well as the cost basis of the inventory. We expect to recognize the regulatory and commercial milestone payments as a gain if and when the milestones are achieved. We expect to recognize the sales royalty payments as a gain if and when the royalties are earned. See Note 12 to the unaudited Condensed Consolidated Financial Statements for further information.

Comparison of the Nine Months Ended September 30, 2013 and 2012

Revenues

Consolidated. Consolidated revenue was \$36.8 million for the nine months ended September 30, 2013, a decrease of \$0.6 million, or 1.7%, compared to the prior year period, primarily as a result of a decrease in camera sales in our Diagnostic Imaging segment during the three months ended March 31, 2013 compared to the prior year period offset by increased revenue in our DIS services business driven by a greater number of imaging days provided. DIS revenue accounted for 75.7% of total revenues for 2013, compared to 73.4% for the prior year period. The percentage of revenue associated with our DIS segment was higher for the nine months ended September 30, 2013 compared to the same period in the prior year, primarily as a result of lower camera sales during 2013 and increased revenue in our DIS services business.

Cost of Revenue and Gross Profit

Consolidated. Consolidated gross profit was \$10.4 million for the nine months ended September 30, 2013, a decrease of \$0.1 million, or 0.5%, compared to the prior year period. The decrease in consolidated gross profit is primarily the result of lower camera sales during the three months ended March 31, 2013 compared to the prior year period, as well as inventory reserve adjustments included within our Diagnostic Imaging segment during the three months ended March 31, 2013, related to our Diagnostic Imaging restructuring initiative. The aforementioned factors were partially offset by greater gross profit in our DIS segment related to increased revenue for the nine months ended September 30, 2013 compared to the prior year period. Consolidated gross profit as a percentage of revenue increased to 28.3% for the nine months ended September 30, 2013 from 28.0% for the prior year period.

DIS. Cost of DIS revenue was \$20.9 million for the nine months ended September 30, 2013, an increase of \$0.2 million, or 0.7%, compared to the prior year period. The increase in cost of DIS revenue is primarily a result of the increase in revenue for the nine months ended September 30, 2013 compared to the prior year period, as well as an increase in insurance costs as a one-time workers' compensation insurance refund that occurred in the nine months ended September 30, 2012 did not reoccur in the nine months ended September 30, 2013. DIS gross profit was \$7.0 million for the nine months ended September 30, 2013, an increase of \$0.2 million, or 3.3%, from a gross profit of \$6.8 million for the prior year period. DIS gross profit as a percentage of DIS revenue increased to 25.0% for the nine months ended September 30, 2013 from 24.6% for the prior year period. The increase in gross profit was primarily attributable to reduced radiopharmaceutical costs and lower depreciation expense.

Diagnostic Imaging. Cost of Diagnostic Imaging revenue was \$5.5 million for the nine months ended September 30, 2013, a decrease of \$0.7 million, or 12.0%, compared to the prior year period, which is primarily the result of lower camera sales partially offset by inventory reserve adjustments related to our Diagnostic Imaging restructuring initiative. Diagnostic Imaging gross profit was \$3.4 million for the nine months ended September 30, 2013, a decrease of \$0.3 million, or 7.5%, compared to the prior year period. Diagnostic Imaging gross profit as a percentage of Diagnostic Imaging revenue was 38.5% for the nine months ended September 30, 2013, compared to 37.3% for the prior year period due to favorable changes in product mix and camera average selling prices, partially offset by inventory reserve adjustments associated with our Diagnostic Imaging restructuring initiative.

Operating Expenses

Research and Development. Research and development expenses were \$1.0 million for the nine months ended September 30, 2013, a decrease of \$2.0 million from the prior year period. The decrease is due to our Diagnostic Imaging restructuring initiative, which focuses on our existing camera product offerings rather than continued development of completely new product offerings. We believe our current product line has a technological advantage over competing products and continued relevance well into the future.

Marketing and Sales. Marketing and sales expenses were \$3.3 million for the nine months ended September 30, 2013, a decrease of \$1.4 million, or 30.6%, compared to the prior year period, primarily as a result of the Diagnostic Imaging restructuring initiative.

General and Administrative. General and administrative expenses were \$6.4 million for the nine months ended September 30, 2013, an increase of \$0.6 million, or 10.4%, compared to the prior year period. This increase is primarily related to costs associated with our proxy contest and subsequent litigation commenced by Red Oak. See Note 7 to the unaudited Condensed Consolidated Financial Statements for further information.

Restructuring. Total restructuring charges incurred during the nine months ended September 30, 2013 were \$1.7 million related to our Diagnostic Imaging restructuring. These charges consisted primarily of employee related costs, while the remaining costs include contract termination costs and other related costs. We anticipate that there will be limited restructuring charges incurred in the last three months of fiscal year 2013, and first half of fiscal 2014. See Note 5 to the unaudited Condensed Consolidated Financial Statements for further information.

Gain on sale of assets and license agreement. On July 31, 2013, we entered into an asset purchase agreement with Novadaq Technologies Inc. ("Novadaq"). Under the terms of the asset purchase agreement, we sold Novadaq all of our assets specifically related to an uncommercialized surgical imaging system previously in development. We also licensed certain existing Company technology to Novadaq for their use in the peri-operative field. In exchange, we received upfront consideration of \$2.0 million, and could receive up to \$1.0 million in deferred contingent payments based on the achievement of specific regulatory and commercial milestones. In addition, a royalty on sales, if any, will be paid for a period of five years from the date of the first commercial sale of the related surgical imaging system. We recorded a gain of \$1.6 million during the nine months ended September 30, 2013 related to the Novadaq arrangement, representing the \$2.0 million of upfront consideration less legal, consulting and other transaction fees as well as the cost basis of the inventory. See Note 12 to the unaudited Condensed Consolidated Financial Statements for further information.

Liquidity and Capital Resources

We require capital principally for equipment to provide services to our customers and to finance accounts receivable and inventory, which we manage closely. Our working capital requirements vary from period to period depending on

manufacturing volumes, the timing of deliveries and the payment cycles of our customers. Our capital expenditures consist primarily of nuclear cameras, ultrasound machines, vehicles and computer hardware and software.

As of September 30, 2013, we had cash, cash equivalents and securities available-for-sale of \$25.9 million. We currently invest our cash reserves in money market accounts and high quality investment grade corporate debt securities. Based upon our current level of expenditures, we believe our current working capital, together with cash flows from operating activities, will be more than adequate to meet our anticipated cash requirements for working capital and capital expenditures for at least the next 12 months.

Cash Flows

The following table shows cash flow information for the nine months ended September 30, 2013 and 2012:

	Nine Months Ended September 30,	
(in thousands)	2013	2012
Net cash provided by (used in) operating activities	\$819	\$(1,624)
Net cash provided by (used in) investing activities	254	(3,339)
Net cash used in financing activities	(2,949)	(733)

Operating Activities

Net cash provided by operating activities increased \$2.4 million for the nine months ended September 30, 2013 compared to the prior year period. This provision of cash was related to a lower net loss period over period, as well as cash provided by favorable overall working capital changes, primarily related to accrued compensation, inventory and accounts receivable.

Investing Activities

Net cash provided by investing activities increased \$3.6 million for the nine months ended September 30, 2013 compared to the prior year period. This increase was primarily attributable to proceeds from the sale of assets related to an uncommercialized surgical imaging system and associated license agreement, as well as increased sales and maturities of securities available-for-sale. See Note 12 to the unaudited Condensed Consolidated Financial Statements for further information on the sale of the uncommercialized surgical imaging system and associated license agreement.

Financing Activities

Net cash used in financing activities increased by \$2.2 million for the nine months ended September 30, 2013 compared to the prior year period. This change is attributable to higher share repurchases during the nine months ended September 30, 2013, partially offset by proceeds from stock option exercises driven by employees that were terminated as a result of Diagnostic Imaging restructuring initiative.

Off-Balance Sheet Arrangements

As part of our ongoing business, we do not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, or SPEs, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of September 30, 2013, we were not involved in any unconsolidated SPE transactions.

Contractual Obligations

There have been no material changes outside of the ordinary course of business in our outstanding contractual obligations from those disclosed within "Management's Discussion and Analysis of Financial Condition and Results of Operations," as contained in our Annual Report on Form 10-K filed with the SEC on March 13, 2013.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our exposure to market risk due to changes in interest rates relates primarily to the increase or decrease in the value of debt securities in our investment portfolio. Our risk associated with fluctuating interest rates is limited to our investments in interest rate sensitive financial instruments. Under our current policies, we do not use interest rate derivative instruments to manage exposure to interest rate changes. We attempt to increase the safety and preservation of our invested principal funds by limiting default risk, market risk and reinvestment risk. We mitigate default risk by investing in investment grade securities. A 100 basis point adverse move in interest rates along the entire interest rate yield curve would not materially affect the fair value of our interest sensitive financial instruments. Changes in interest rates over time will increase or decrease our interest income.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities and Exchange Commission Act of 1934 reports is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such

information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control

objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by Securities and Exchange Commission Rule 13a-15(e) and 15d-15(e), we carried out an evaluation, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There has been no change in our internal controls over financial reporting during our most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

See Note 7 to the unaudited Condensed Consolidated Financial Statements for a summary of legal proceedings.

ITEM 1A. RISK FACTORS

In evaluating us and our common stock, we urge you to carefully consider the risks and other information in this Quarterly Report on Form 10-Q, as well as the risk factors disclosed in Item 1A to Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, which we filed with the SEC on March 13, 2013. Beyond what is described below, the risks and uncertainties described in “Item 1A – Risk Factors” of our Annual Report on Form 10-K have not materially changed. Any of the risks discussed in this Quarterly Report on Form 10-Q or any of the risks disclosed in Item 1A to Part I of our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, as well as additional risks and uncertainties not currently known to us or that we currently deem immaterial, could materially and adversely affect our results of operations or financial condition.

We adopted a tax benefits preservation plan, designed to preserve the value of certain income tax assets, primarily tax net operating loss carryforwards (“NOLs”), which may discourage acquisition and sale of large blocks of our stock and may result in significant dilution for certain stockholders.

In May 2013, we adopted a tax benefits preservation plan in the form of a Section 382 Rights Agreement (the “382 Agreement”). The 382 Agreement is designed to preserve stockholder value and the value of certain income tax assets primarily associated with NOLs by acting as a deterrent to any person acquiring beneficial ownership of 4.99% or more of the Company’s outstanding common stock without the approval of the Board. The 382 Agreement may discourage existing 5% stockholders from selling their interest in a single block which may impact the liquidity of the Company's common stock, may deter institutional investors from investing in our stock, and may deter potential acquirers from making premium offers to acquire the Company, factors which may depress the market price of our stock.

We intend to outsource the manufacturing of the majority of the components associated with our nuclear gamma cameras to streamline operations and reduce costs. Outsourcing our manufacturing process may be difficult, could result in business disruptions caused by the outsource partner and may not result in significant cost savings.

In September 2013, we announced an agreement to outsource the majority of our nuclear gamma camera production processes to a third party. The manufacturing of these cameras will be transitioned to the third party manufacturer over several months before it is fully implemented. This transition process may prove to be difficult, reducing the savings and benefit of the overall outsourcing agreement. Following the completion of the outsourcing effort, we will be reliant on our third party manufacturer, which would expose us to any disruptions in their supply chain, processes, employees, and other underlying activities associated with their manufacturing process. Should we experience a disruption in their supplying of cameras, we may not be able to find a suitable alternative solution in a reasonable period of time which may cause a disruption in camera sales.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Sales of Unregistered Securities**

None.

Issuer Purchases of Equity Securities

Issuer purchases of equity securities during the quarter ended September 30, 2013 were:

	Total Number of Shares Purchased During the Period	Average Price Paid Per Share for Period Presented	Total Cumulative Number of Shares Purchased as Part of Publicly Announced Plan (1)	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plan
July 1, 2013 — July 31, 2013	254,084	\$2.47	2,588,484	\$6,271,789
August 1, 2013 — August 31, 2013	—	\$—	2,588,484	\$6,271,789
September 1, 2013 — September 30, 2013	—	\$—	2,588,484	\$6,271,789

Edgar Filing: DIGIRAD CORP - Form 10-Q

254,084

2,588,484

\$6,271,789

(1) On February 27, 2013, our board of directors modified our stock buyback program originally adopted in February 2009 to increase repurchases to an aggregate of \$7.0 million, and subsequently, on March 13, 2013, increased the stock buyback program again for repurchases of up to an aggregate of \$12.0 million. The

timing of stock repurchases and the number of shares of common stock to be repurchased are in compliance with Rule 10b-18 under the Securities Exchange Act of 1934. The timing and extent of the repurchase depends upon market conditions, applicable legal and contractual requirements, and other factors.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit Number	Description
3.1	Amended and Restated Certificate of Incorporation of Digirad Corporation (Incorporated by reference to the exhibits to the Company's report on Form 8-K originally filed with the Commission on May 3, 2006, as amended thereafter).
3.2	Amended and Restated Bylaws of Digirad Corporation (Incorporated by reference to the exhibits to the Company's report on Form 8-K originally filed with the Commission on May 9, 2007).
3.3	Certificate of Designation of Rights, Preferences and Privileges of Series B Participating Preferred Stock (Incorporated by reference to the exhibits to the Company's report on Form 8-K originally filed with the Commission on May 24, 2013).
4.1	Form of Specimen Stock Certificate (Incorporated by reference to the exhibits to the Registration Statement on Form S-1 (File No. 333-113760) originally filed with the Commission on March 19, 2004, as amended on May 24, 2004).
4.2	Preferred Stock Rights Agreement, by and between Digirad Corporation and American Stock Transfer and Trust Company, dated November 22, 2005 (Incorporated by reference to the exhibits to the Registration Statement on the Company's report on Form 8-K originally filed with the Commission on November 29, 2005).
4.3	Tax Benefit Preservation Plan by and between Digirad Corporation and American Stock Transfer and Trust Company, dated as of May 23, 2013 (Incorporated by reference to the exhibits to the Company's report on Form 8-K originally filed with the Commission on May 24, 2013).
10.1	Consulting Agreement by and between Digirad Corporation and Todd P. Clyde, dated as of July 1, 2013 (Incorporated by reference to the exhibits to the Company's report on Form 8-K originally filed with the Commission on July 1, 2013).
10.2	Asset Purchase Agreement by and between Digirad Corporation and Novadaq Technologies Inc., dated July 31, 2013 (Incorporated by reference to Form 8-K filed with the Commission on August 1, 2013, and to the exhibits to the amended Form 8-K/A filed with the Commission on September 18, 2013).
31.1*	Certification of President and Chief Executive Officer pursuant to Rules 13a-14(a) and 15d-14(a) promulgated pursuant to the Securities Exchange Act of 1934, as amended.
